LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ROAD THROUGH PURCHASED LAND OF MR. HENRY  
PRICE, AUCKLAND VILLAGE RESERVE.

(PETITION—HENRY PRICE.)

*Ordered by the Legislative Assembly to be Printed, 15 December, 1868.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Henry Price, of the Auckland Reserve, near Singleton,  
in the Colony of New South Wales, Farmer,—

MOST RESPECTFULLY SHEWETH :—

That in the year one thousand eight hundred and fifty-six, your Petitioner having saved some money by many years of labour, purchased from the Crown, at public auction, several allotments in the village reserve of Auckland, containing in the whole upwards of sixty acres of land.

That at the time of such sale, certain roads and streets were marked out on the plan of sale, by which your Petitioner bought running at right angles through the said allotments, and especially a road called the "Jerry's Plains Road."

That before such sale, one Samuel Billingsley Dight, a landed proprietor residing at Clifford—an estate somewhat further from Singleton than your Petitioner's residence—had been in the habit of making a short cut across the land then belonging to the Crown, but now to your Petitioner, and thus cutting off an angle from one part of the said "Jerry's Plains Road" to another part thereof.

That your Petitioner having bought all the allotments in the said village reserve between the said Jerry's Plains Road and the River Hunter, afterwards received from the Government a letter informing him that, as he had purchased the whole of the said allotments, he had the right, in pursuance of the Act 4th William 4th, No. 11, to close all the streets laid out on the said plan, not leading to any other places, and that such streets became his property; and your Petitioner fenced all the said land between the said Jerry's Plains Road and the river, and placed his cattle and horses therein to graze.

That after your Petitioner had been in possession of the said land for some time, the said Samuel Billingsley Dight attempted to force a road across the same, in the direction of the track he had formerly used for the purpose of cutting off the angle formed by the river—Jerry's Plains Road turning to the left, after passing through the land of your Petitioner; but the said Mr. Dight was then prevented by your Petitioner from committing such trespass, and he, Mr. Dight, then declared his intention of having a road there by some means.

That the said Jerry's Plains Road is in good order; and the distance which the said Samuel Billingsley Dight, or others, would save by going through the land of your Petitioner, instead of passing along the said Jerry's Plains Road, is not above ninety rods. That some time after the said Samuel Billingsley Dight had been so prevented from passing through the land of your Petitioner, a notice appeared in the *Government Gazette*, notifying that the Government had found it expedient to form a parish road through the land of your Petitioner, somewhat in the same line as the track formerly used by the said Samuel Billingsley Dight.

That your Petitioner caused certain objections to be lodged, as required by Act of Council 4th Wm. 4, No. 11, which objections, however, were all disallowed; and your Petitioner craves that your Honorable House will be pleased to refer to the said objections and the various other documents referred to in this his Petition, in the various public offices in which the same may be, and copies of some of which are forwarded herewith.

That your Petitioner, in accordance with another notice which appeared in the said *Government Gazette*, then caused a claim for compensation in respect of the land proposed to be taken from him for the formation of the said road, to be lodged in the proper office, which claim was also disallowed.

That the said road, as described and delineated on the plan thereof, is in fact a short cut across your Petitioner's land, for the convenience of the said Samuel Billingsley Dight and his family, and is not, as your Petitioner respectfully submits, a parish road within the meaning of the Act, and is not required for the use of the public. He cuts obliquely through several of the allotments bought by your Petitioner, as laid out at right angles with the several roads or streets set out on the said plan, and no such road as that now sought to be opened is shewn on the said plan; and your Petitioner humbly submits that, had several persons bought the said allotments as so laid out, and had the streets as shewn on the said plan been opened to the public, no such road would ever have been proclaimed; although, by a letter from the Surveyor General to your Petitioner, it is now sought to be shewn that the said road had been intended to be opened some years ago, but no correct description thereof was made; but even were this the case, your Petitioner craves leave to point out that all intention of forming such road was abandoned by the Government, when the village reserve of Auckland was laid out, and the allotments afterwards sold, and your Petitioner informed by the Surveyor General, as before mentioned, that he might close the said streets; and that the attempt to open such a road, whilst there is one in existence between the same points, is a breach of good faith on the part of the Government towards your Petitioner. And your Petitioner would humbly submit, that the Act never contemplated such a case as the present, but cases where large grants of land have been made either at a quit rent or by purchase, and where the necessities of the public require roads to be made.

That your Petitioner intended at one time to address a Petition to His Excellency the Governor-in-Chief, for redress of his grievances, and a Memorial to that effect was prepared, numerously signed, and ready for presentation; but a lingering hope that the Government might be persuaded to reconsider the matter and rescind their decision, induced your Petitioner to refrain from forwarding that document. A similar Petition, addressed to your Honorable House, and signed by upwards of seventy of the most respectable residents at Singleton and the adjacent district, engaged in constant traffic on the said Jerry's Plains Road, is however, forwarded herewith, and which your Petitioner humbly craves your Honorable House to refer to for corroboration of some of the statements herein contained.

That your Petitioner afterwards received a letter from the Lands Office, informing him that the sum of seventy-two pounds was at his disposal, for the purpose of fencing the road; but as the said sum was utterly insufficient to erect such a fence as that which your Petitioner had already erected on his said land, and as your Petitioner was advised and believed that the making of the said road was not in accordance with the spirit or words of the Act, and that your Petitioner, by addressing your Honorable House, or otherwise, would obtain redress, he refused to accept the said sum; and he thereupon received a notice that the road would be opened and his fence taken down; and accordingly, Mr. Licensed Surveyor Biden came with a party of men and, in spite of a protest in writing, and verbally, on behalf of your Petitioner, to cut down or pull down your Petitioner's fence in two places, and nearly the whole of your Petitioner's cattle and horses got out, some of which have not yet been recovered. Besides this, various persons, some of bad character, trespassed on various parts of your Petitioner's land and refused to leave, stating that there was a public road through the same.

That your Petitioner, however, some short time afterwards, obtained permission to re-erect his fence, until further communication had passed between the Government and his solicitors; and your Petitioner caused his solicitors to write to the Minister for Lands, proposing certain terms of compromise, without obtaining any satisfactory result.

That your Petitioner subsequently determined, by the advice of his solicitors, to lay a full statement of his case before your Honorable House, in the shape of a Petition, soliciting such redress as to your Honorable House should seem meet; and the necessary arrangements were made for that purpose; and your Petitioner received intimation from his solicitors, on 16th November, 1867, of their intention to forward the said Petition for presentation on the 18th of same month, but that intention was not carried out, delays unaccountable to your Petitioner took place, and eventually the Petition was withdrawn, in consequence of an official communication having been received from the Under Secretary for Lands, dated 19th December, 1867, stating—"I am directed to inform you that Mr. Secretary Wilson has approved of your application being granted."

That instead of carrying out the above promise to agree with your Petitioner's proposal to compromise the matter, shortly after the termination of the Parliamentary Session your Petitioner was subjected to a repetition of the annoyances of which he complains. On the 13th of April, 1868, a notice was served on your Petitioner, by Mr. W. D. Biden, licensed surveyor in charge of the district, announcing that, "at the expiration of one month from that date," the road through your Petitioner's land would be formally opened, and all the obstructions removed, which was carried out on the 12th May last.

Finding that, although the road was thus (nominally) "formally opened to the public, and all obstructions removed," no progress was made beyond the taking down of a certain fencing belonging to your Petitioner, the intervening fences of other landowners remaining undisturbed, your Petitioner considering he had just cause of complaint, felt himself justified in appealing to the Surveyor General, and making the following demand:—"That the line of road through Auckland to Merton, *via* Jerry's Plains, which, according to statements of the district surveyor, has been confirmed by notice in the *Government Gazette*, shall be really and effectually opened to the public without further delay, and all other obstructions besides those opposed by my fencing be equally removed."

That

That no notice has been taken of the remonstrances of your Petitioner, and tenders have been invited for fencing off the road in question, by Mr. Surveyor Biden, to whom the charge of carrying out the work has been entrusted.

That the opening of said road confers no benefit whatever upon your Petitioner, but on the contrary, will render a large portion of his land almost useless for grazing purposes, as it hinders his cattle from watering at the river, and injures him in various ways.

That your Petitioner begs to refer to a sketch of the said land, shewing the present Jerry's Plains Road and that sought to be opened, and also to refer to the several copies of documents and letters which have passed between himself, his solicitors, and the various officers of the Government, which are in his possession.

Your Petitioner, therefore, most humbly prays that your Honorable House will be pleased to take the matters herein referred into favourable consideration, and grant him such redress as the premises shall warrant.

And your Petitioner, as in duty bound, will ever pray.

1868.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ROAD THROUGH PURCHASED LAND OF MR. HENRY  
PRICE, AUCKLAND VILLAGE RESERVE.

(PETITION—CERTAIN RESIDENTS, SINGLETON AND JERRY'S PLAINS.)

*Ordered by the Legislative Assembly to be Printed, 15 December, 1868.*

To the Honorable the Speaker and the Honorable the Members of the Legislative  
Assembly of New South Wales, &c., &c.

The humble Petition of the undersigned Residents in the Districts of Singleton  
and Jerry's Plains,—

MOST RESPECTFULLY SHEWETH:—

That your Petitioners are in the habit of travelling the line of Road from  
Singleton to Jerry's Plains, at present proclaimed, and running through land belonging  
to Mr. Henry Price, at the Auckland Reserve.

That, in the humble opinion of your Petitioners, the road as at present used is a  
good road, and sufficient for all purposes of public use.

That your Petitioners also know the land purchased in allotments from the  
Government by the said Henry Price, and fenced in by him; and they have heard with  
surprise and regret that it is the intention of the Government to open a Parish Road  
leading out of the Jerry's Plains Road aforesaid, and running through the said allotments,  
and cutting several of them into triangular blocks.

That, in the humble opinion of your Petitioners, such intended road is not only  
unnecessary and undesirable, but the enforcing its opening will be a great act of injustice  
towards a hard-working man; and such intended road has not been applied for by any of  
your Petitioners, and will not be a parish road, but a road for the convenience of one or  
two families, who will save a few chains in length by cutting off a corner of the said  
Henry Price's land.

That your Petitioners have been credibly informed that the said Auckland Reserve,  
when laid out in allotments as shewn upon the Government plan of sale, had certain  
roads or streets cut through it for the convenience of purchasers; but no such road as  
that now sought to be opened was shewn upon such plan; although it is now said that  
such road is an old road, although never properly described; and your Petitioners  
crave leave to observe that, had such road been known, the said Auckland Reserve, which  
was intended as a village, would not have been so laid out.

That your Petitioners have also learned that, although the said Henry Price  
caused certain objections to be lodged against the opening of such road in due time,  
and further caused an application to be made to the proper officer for compensation for  
the land intended to be taken from him, the said objections have been disallowed, and  
compensation has been refused, on the ground that there is a reservation in the grants  
from the Crown to the said Henry Price, enabling Her Majesty to resume the said land,

or so much thereof as might be required for public purposes; and your Petitioners here would most respectfully submit that such road so intended to be made is not required for public purposes, but for private purposes and private convenience, and is in breach of good faith of the public sale so made and the plan so exhibited as aforesaid, as no person would have been likely to bid—or, at any rate, to give high prices—for allotments of land in a village reserve, with the knowledge that such a road was in existence or was ever likely to be made, unless, indeed, ample compensation were allowed to them for the injury they might sustain; for your Petitioners believe and submit that no benefit will be derived by the said Henry Price from such road being so enforced through his land.

That your Petitioners have been further informed, that it is the intention of the said Henry Price to petition your Honorable House with respect to some or all of the matters herein set forth.

Your Petitioners, therefore, most humbly pray that your Honorable House will be pleased to give this their Petition, and the Petition of the said Henry Price, your most favourable and attentive consideration, and that you will afford such relief as the nature and circumstances of this matter may seem to your Honorable House to require.

And your Petitioners will ever pray, &c., &c., &c.

*(Here follow 84 Signatures.)*

Moore, Charles, Esq. ( <i>Mayor of Sydney</i> ) ....	10

1868-9.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

RANDWICK AND COOGEE ROADS TRANSFER BILL.

WEDNESDAY, 27 JANUARY, 1869.

Present:—

MR. HART,  
MR. FORSTER,

MR. OATLEY,  
MR. R. STEWART.

JAMES HART, Esq., IN THE CHAIR.

Henry Clarke, Esq., examined:—

1. *Chairman.*] You are Chairman of the Randwick and Coogee Road Trust? I am.
2. By whom is that Trust appointed? By the Governor and Executive Council, I presume.
3. Who are the members? Myself, the Mayor of Sydney, Messrs. S. H. Pearce, J. B. Holdsworth, Buchan Thomson; and Dr. Reid, of Coogee, has been lately appointed. The Mayor of Sydney is Commissioner only during his term of office.
4. That is by virtue of 31st Vic., No. 21? Yes; that is the Act passed in February of last year.
5. What are the duties of the Trust? The duties of the Trust are, to let the tolls annually, and to see to the proper expenditure of the money from the tolls—to receive the endowment from the Government. The endowment is very little—it is only £10 a mile.
6. *Mr. Forster.*] By endowment you mean the annual grant? The annual grant for Minor Roads.
7. *Chairman.*] Do you supervise the whole of the roads contained in the Schedule to 18th Vict., No. 14? Yes.
8. That is to say, the Old Botany Road, the Randwick and Coogee Road, and the Frenchman's Road? The Frenchman's Road we have the power to transfer, according to the last Act, and we want merely the same power for the Coogee Road, from Botany-street to Coogee.
9. What has been done under the Act passed last Session—what steps have been taken—what negotiations have been entered into? We have merely entered into a negotiation with the Waverley and Randwick Council, to transfer the Frenchman's Road, that is, the road from Randwick High Cross to Waverley; the Randwick Municipal Council have agreed to take their portion over, and to keep it in repair; and the Waverley Municipal Council have agreed to the same, and to give us £50 for toll-house, and the toll is to be abolished at Waverley on that portion of the road.
10. Then the Frenchman's Road would be maintained partly by Randwick and partly by Waverley? Yes, when completed. We merely wait the sanction of the Executive.
11. Has any debt been incurred by the Road Trust for the maintenance of these roads? Yes, a debt of £2,000—a mortgage on the whole of the tolls on the road.
12. Is that all you owe at present? There is, besides, an overdrawn account, for which the Mayor of Sydney and myself are responsible, of about £1,600.

H. Clarke,  
Esq.

27 Jan., 1869.

- H. Clarke, Esq.  
27 Jan., 1869.
13. What revenue is derived from the tolls established on the Old Botany Road? That is, the main road?
  14. Yes? This year it is let for about £800—£807 or £810—I am not sure of the precise sum.
  15. Has the amount increased or diminished from year to year? It increased over £100 from last year; that is, for the present year.
  16. Do you anticipate any further increase? If the roads were in good order, I anticipate a great increase.
  17. Is there not a new road now being constructed from Botany Road to Randwick Racecourse? Not that I am aware of.
  18. Botany-street? That is a portion of new road that is to be in lieu of the old road.
  19. Do you anticipate that, when that road is completed, there will be greater facilities for traffic? Yes, when the whole road is in good order, I believe there will be a largely increased traffic.
  20. Have you read the Bill that was brought in by Mr. Oatley, with reference to this trust? I have.
  21. Does that Bill meet with the sanction of the Road Trust Commissioners? The whole of them. It was passed at a full meeting called for that purpose, and passed unanimously.
  22. Do you consider it expedient to make further provision for the transfer of the Old Botany, Randwick, and Coogee Roads Trust from the Commissioners to the Municipality of Sydney? I do, or to the Municipality of Randwick; I should prefer the Municipality of Sydney.
  23. What are your reasons for arriving at that conclusion? Because the road runs through a great deal of the property of the Municipality of Sydney; and I think, if they had it in their hands, they would be much better able to make a good road than the present Commissioners—they would have greater means at command.
  24. Do you anticipate any difficulty in borrowing sufficient money to keep the roads in order? We have great difficulty; we have tried several times, but people do not care to lend, except at a high rate of interest. We have been asked 8 per cent., and even then we have not been able to succeed in getting more than the promise of £4,000.
  25. What amount would be necessary to put both of these roads in thorough repair? You do not mean the Waverley portion?
  26. The Old Botany, Randwick, and Coogee Roads? It would take a great deal more than we have the power to borrow at present. It would take between £2,000 and £3,000 yet.
  27. In the Act that passed last Session, there was a proviso inserted, limiting your power of borrowing money? That was in the old Act as well as in the new.
  28. Do you find that an inconvenience? It is an inconvenience so far that we cannot borrow enough.
  29. Could you offer sufficient security if you were allowed to borrow more? We have no security but the toll.
  30. The tolls produce £800 a year? Yes.
  31. What do you think a person would be safe in lending, assuming that the revenue would be the same from year to year? I should say they would be safe, after paying off all liabilities, in lending about £6,000. Our object was to borrow enough to pay off the existing liability—to borrow the amount required in one sum.
  32. Do you think it would be safe to borrow to the amount of ten years' income? At the present low rates of interest it might be safe, but if money becomes higher it might be a question.
  33. Will Moore Park produce any revenue, when completed, in the shape of grazing or otherwise? Not that I am aware of.
  34. Have you spoken to any of the inhabitants of Randwick or Coogee about this Bill? Yes.
  35. What do you gather is their opinion? The opinion of people generally is, that it would be better if it were in the possession of the Municipality of Sydney, or of the Municipality of Randwick. They would, they think—as I think myself—be able to borrow money at a lower rate of interest, and be able to make a better road.
  36. *Mr. Oatley.*] You are paying 8 per cent.? Yes; and I believe that either Municipality could borrow at 6 per cent. There are various institutions that cannot lend to Road Trusts, as for instance, the Savings' Bank, and the Mutual Provident Association; but they can lend to Municipal Councils.
  37. *Chairman.*] What state of repair is the Coogee Road in? Not a very good state. A good sum of money has been expended in cutting down a hill, and in making a slight deviation from the old road, which is proclaimed lately. When that is completed, it will be in pretty fair order. It is in front of Mr. Daintrey's, and runs through Mr. Nathan's property, which now belongs to Mr. Tait.
  38. *Mr. Oatley.*] The road you have been speaking of—the Old Botany Road—commences at the city boundary, and proceeds from that to the Coogee Bay? Yes.
  39. Is that in the Municipality of Randwick? Yes.
  40. Then I understand that the chief reason of seeking for this transfer is, to enable the parties to borrow the money required at a less rate of interest? Yes.
  41. I think it is six times the annual amount of your tolls you are at present limited to? Yes.
  42. Making about £5,000? Yes.
  43. If you had that, you would pay off the £2,000 borrowed, and you would then have £3,000 left to improve the road? I think our present debt is about £3,600.
  44. That is £1,600 borrowed since the other Bill was passed? Yes, and £2,000 previous mortgage.

45. You think, if this Bill were passed, and the parties were able to borrow at 5 per cent., the money so raised would put the road in a decent state of repair? I think about £6,000 would put it in a decent state of repair.

46. That would be an additional £1,000? Yes.

47. You say £800 is the toll on the present road? Yes; the other lets for £140.

48. That would enable you to borrow what you require? Yes, I think we could borrow on the rate of the last year's toll.

49. Do you not think it would be much better that the Municipality of Randwick, having a portion of these roads, should have the remainder; because the Municipality of Randwick would be able to borrow at the same rate as the Municipality of Sydney, and then they would have the sole management of the whole? The matter originated with the Randwick Municipality at first.

50. And they are quite willing to take it now, are they not? Yes; but when the Mayor of Sydney was made a member of the Trust, Mr. Pearce, as Mayor of Randwick, said he had no objection for the Municipality of Sydney to have it, and he would give way and give the first offer to Sydney.

51. Still, if the Municipal Council of Sydney refused to take it, the Municipal Council of Randwick were willing to take it? They were willing to take it in any way. They were willing to give Sydney the first offer. There has been no disunion in the matter.

52. There was a meeting of the whole of the Trustees called by circular? Yes.

53. At that meeting this Bill was submitted and approved of? Approved of unanimously. I believe if the Municipal Council of Sydney get it, they will be able to make a better road than the Municipal Council of Randwick.

54. I do not suppose it will add anything to their funds? I do not suppose it will; it might, as I believe the toll would bring in £1,200 a year or more.

55. The toll-house has been removed? Not yet.

56. They are now erecting it? Yes, the Municipality of Sydney is now erecting a new in lieu of the old one.

57. *Chairman.*] On the same road? On the same road; at the commencement of the Old Botany or Bunnerong Road. A good many people came over these hills at race-time and evaded the toll; it will catch them.

58. *Mr. Forster.*] Do not you think, as a matter of principle, it would be better to leave the road to be managed by the Municipality through which it passes? It would, certainly; the whole of it does pass through the Municipality of Randwick at the present time.

59. When you gave as a reason for preferring the Municipality of Sydney, that the persons who compose the Municipality of Sydney have a quantity of property in Randwick,—do not you think this property has such an influence on the Municipality in Randwick, as to produce nearly the same result in its effect upon the Council? No doubt, whoever has property in Randwick or Coogee will be anxious to have a road.

60. Practically, then, the effect will be much the same in either case? I do not see that it will make much difference: the members of the Municipality of Randwick have as much property as the members of the Municipality of Sydney.

61. There is a sort of identity of interest? I think so.

62. Practically, the result would be about as beneficial in one case as in the other? Yes, very little difference. I think, however, that the Municipality of Sydney would be able to make a better road—they have more means to do so. That is my impression. I have very little property in Randwick myself—my residence is on lease.

63. Of course, as the people of Sydney and the members of the Council have so much property in Randwick, their interest would be much the same; and they would, I suppose, be likely to assist as much as they would if they were directly armed with this authority? I think it would make very little difference.

64. *Chairman.*] Do you know what amount was spent upon the road last year? I could not say, without the books.

65. *Mr. Forster.*] Why are the Botany tolls proposed to be given up? They are not: it is proposed only to remove the toll-house, so as to catch those people who now at race-time evade the toll. The Municipal Council of Sydney have agreed to build the toll-house in lieu of the other.

66. *Mr. R. Stewart.*] In point of fact, Sydney possesses no property except the Common? And the Water Reserve.

67. Does their property involve any large amount of traffic on the road? A great deal of traffic; since they have commenced the Common, it has cut up our road a good deal.

68. They are forming a new road? At the expense of the tolls.

69. *Chairman.*] I understood that the new road was paid for out of money obtained from the sale of a portion of the Common? No, that was done by the Road Trust because the old road was in a bad state. As far as we have gone, we have made that road, but we do not intend to go any further.

70. *Mr. Forster.*] If you armed the Municipality of Sydney with too much power in this matter, might they not look after their own interest, in opposition to the interest of the people of Randwick? I think not; it is their interest to have a good road, as well as the interest of the Municipality of Randwick. One of the largest landholders and the Mayor of Randwick, Mr. Pearce, said he was willing to take the whole of the road with all its liabilities. He is also a member of our Trust.

71. *Mr. Stewart.*] Suppose this Bill were passed, would the Trustees have any choice as to whom it should be handed over to? No; in the first instance it would be offered to the Municipality of Sydney, and then to that of Randwick.

72. To the highest bidder? That is the resolution that was come to, and the Act says so.

H. Clarke,  
Esq.

27 Jan., 1869.

Charles Moore, Esq., examined:—

- C. Moore, Esq.  
27 Jan., 1869.
73. *Chairman.*] You are Mayor of the City of Sydney? Yes.
74. You are also a member of the Botany, Randwick, and Coogee Road Trust? Yes.
75. Under the Act passed last Session? Under the Act passed last Session.
76. Have you read the Bill introduced by Mr. Oatley to transfer certain roads to the Municipal Council of Sydney, or of Randwick? Yes.
77. Does that Bill meet with your approval? Yes.
78. Has it in any way been submitted to the Municipal Council of Sydney? This has not; a former Bill has been submitted.
79. That is the one transferring the Frenchman's Road? No.
80. A similar Bill has been submitted to the Council? No, it is not a similar Bill—it is a different one altogether.
81. *Mr. Oatley.*] The principle of the Bill was the same—to hand over the road to the Municipal Council of Sydney? Yes.
82. *Chairman.*] A new road is now being constructed from Botany-street towards the Randwick Racecourse? Yes.
83. At whose expense is that road being constructed? At the expense of the present Road Trust; it is in conjunction with the Sydney Common improvement—the Road Trust are making it. As far as the road has gone, it will be a shortening of the road, but no additional expense to them.
84. Has any portion of the money that has been derived from the sale of the Sydney Common been applied to the construction of the road through Moore Park? No, no portion of the road—the levelling has been; that is, the cutting down the hills, and filling in the hollows.
85. *Mr. Stewart.*] That is the purpose for which the Act was obtained? Yes, but not for making the road.
86. *Chairman.*] Is it not rather inequitable to ask the Randwick Road Trust to construct a road through Moore Park? Not at all; it is the proper course for it, and it is the better way.
87. Is Moore Park situated in the City of Sydney, or in the Municipality of Randwick? At present it is within the Randwick Municipality; but we have a Bill before the House to extend the boundaries of the City, so as to take in the Common and the Water Reserve. They should never have been beyond the boundaries of the City. The Municipal Council of Sydney have borrowed £10,000 for the improvement of the Common; and the Road Trust have agreed, in conjunction, to make this road for the benefit of both parties.
88. If that Bill should pass the House, would it not be proper to transfer that portion of the road to the City of Sydney, leaving the other portion to the Municipality of Randwick? How will you divide the tolls?
89. That is a question rather for your consideration than for mine. Is there any toll now on the Coogee Road? The toll now is the Coogee Toll-house, situated on the Common.
90. *Mr. Oatley.*] Commonly known as the Old Botany Road Toll-house? Yes.
91. *Chairman.*] There is but one toll-house from Botany-street down to the bay? Yes. We are now moving it nearer to the Racecourse, in order to have it more on the margin of the Common, so that the citizens may take a drive without paying toll; but if they want to go to Coogee, Randwick, or the Races, they must then pay toll.
92. Is it in contemplation of the Randwick Municipality, if this Bill passes, to erect a toll-house on the Randwick and Coogee Road? No.
93. What amount would be necessary to put these two roads in a thorough state of repair? I think it will take £6,000, including what has been expended already.
94. *Mr. Oatley.*] That will be about £4,400? No, £6,000 altogether. There is a mortgage of £2,000, and about £1,600 or £1,700 of an open account, which make £3,700, and it would take about £2,300 to complete it; in all about £6,000. The last Act gave us power to borrow £5,000; but the tolls this year have been let for considerably more than they have ever before, and they will increase every year, I have no doubt.
95. *Chairman.*] Do you find your power cramped by reason of the limitation of the former Act, as to borrowing? We cannot borrow the money.
96. Is it on account of the limitation, or on account of not being able to give security? I think, on account of there being a first mortgage on the tolls; no one will come in as a second mortgagee. That is my opinion.
97. Do you think it would be prudent to give the Trust, or the Municipalities, in case the roads are transferred to them, the power to borrow ten times the amount of the annual revenue? We should not want that power.
98. What amount would you require? The last Act, I think, gave us the power to borrow six times the amount of the revenue; eight times the present revenue would do it.
99. Could a Municipality offer better security than a Road Trust? Yes; the Municipality of Sydney have borrowed for the Common improvements at 5 per cent. I think that was the last, and the Road Trust cannot get it at 8; that on £6,000 would be about £150 a year—sufficient almost to keep the road in repair.
100. Will any revenue be derived from Moore Park after it is constructed? Yes, a large revenue.
101. In what way? From grazing.
102. Are you aware of any scheme by which the toll on the road could be altogether abolished in time? I should like to see it very much.

103. Are you aware of any plan by which that could be effected? I have not given it consideration. C. Moore, Esq.
104. If the road were put into a thorough state of repair, what would be the annual cost of its maintenance? I do not think it would cost more than from £200 to £300 a year. 27 Jan., 1869.
105. Supposing your powers were transferred to Randwick Municipality, could you ensure that the roads would be kept in repair or a sufficient amount of the income be spent upon them instead of being applied to other purposes? I will give my own opinion now. I think Randwick Municipality would be in the same fix as the Road Trust are in at present. They have a first mortgage at 8 per cent. on their rates for the erection of the Council Chamber, and I fear the same question would arise upon that as upon the first mortgage of the Road Trust.
106. Then it would be desirable to give the power of transfer to the Municipal Council of Sydney in the first instance? Yes, and if they do not take it the Randwick Municipality must do the best they can with it afterwards; then the improvements of levelling the Common, and so on, must be carried on in conjunction.
107. Can you state what has been done, in accordance with the Act of last Session, for transferring the Frenchman's Road to the Randwick and Waverley Municipalities? The arrangements are almost completed for the transfer of these two portions of the road, in accordance with the powers given in that Act.
108. Will these Municipalities take any portion of the debt? No portion of the debt.
109. Then you relieve them entirely from the debt, in consideration of their keeping the road in repair and abolishing one of the tolls? Abolishing one of the tolls; that portion of the road has always been a loss to the Trust.
110. What benefit does the Road Trust receive by reason of the transfer of the Frenchman's Road to the Municipalities mentioned? They get rid of an incubus; it is of no use to them at all, and the other people have no objection to take it.
111. You allude to the toll-bar? I allude to the toll-bar. The money that came from that never did pay for its maintenance, but if it is transferred to the Municipality they will then get the mileage.
112. *Mr. Oatley.* That is £10 a mile? Yes, I think for first class it is £10.
113. You said that a Bill similar to this was presented to the Municipal Council last year? Yes.
114. What was the fate of that—I declined, did I not, to have anything to do with it? It was brought before the Council, and Mr. Alderman Oatley made a sort of drawn game of it—it was half and half.
115. Was it not thrown out? It was not thrown out, but a sort of agreement was come to that the Mayor of Sydney was to be made one of the Trustees. If it had not been for Mr. Alderman Oatley it would not have been thrown over.
116. The Bill did not pass the Municipal Council? It was passed, but afterwards an additional Member came in and it was rescinded. The Council was fairly divided—it was eight to eight; that is, the Chairman was for it—there were seven on his side besides himself, and eight on the other.
117. There was a full Council, fifteen Aldermen and the Mayor? Yes.
118. There were eight of the Aldermen against it, and seven for it? It was withdrawn; it was not thrown out in consequence of disagreement—there would be objection, it was said, to the Mayor of Sydney being a member of the old Trust, and it was agreed to.
119. The Randwick people are quite willing to take it? The Randwick Council are quite willing to take it if we do not take it.
120. *Chairman.* I understood you to say that your purpose would not be effected by a transference to the Randwick Municipality, in consequence of that Municipality having mortgaged their revenue to some person or other? I fear they would not be in a position to take it, because they would be in the same situation as the Road Trust, having a first mortgage on their rates.
121. *Mr. Oatley.* If the Municipal Council of Randwick are in that position, are not the Municipal Council of Sydney also—is not the whole of their revenue mortgaged—have not debentures been issued to a very large amount? We can borrow at 5 per cent.
122. *Mr. Stewart.* In point of fact, the whole interest of this road is in the Randwick Municipality, as far as keeping it in repair is concerned? About five-eighths of this road passes through City property to the Racecourse.
123. Does that form five-eighths? Yes.
124. *Mr. Oatley.* When you say City property, is not this Common for general purposes? So is the Water Reserve.
125. Will you have the kindness to answer my question, Mr. Mayor—is it not for general purposes—is not the Common as much for the benefit of the people of Randwick, of Waverley, and of the general public, as for the benefit of the Municipality of Sydney? The Common belongs to the City of Sydney.
126. Has it not been granted as much for the general public as for the benefit of the people of Sydney? I deny that. The Common is the property of the City of Sydney.
127. Has there been any grant? It was granted in 1811.
128. Has there been any grant at all? They do not give any grants now; the Act of Parliament is enough. The great object is to have the road in the hands of one party. There would be nothing but squabbling if two municipalities had it. Give it to Sydney—if Sydney does not take it, let the other have it altogether.
129. *Mr. Stewart.* What objection would there be to the City keeping the road in repair up to the boundary? Not the slightest, but how will you divide the Trust.

- C. Moore, Esq.  
 27 Jan., 1869.
130. Unless you do away with tolls? I wish you would find some means of doing so. If you could do that, we would find some means to pay off one portion of it.
131. *Chairman.*] If the Bill you have spoken of, to extend the city boundary, passes, the Municipal Council of Sydney will be bound to keep the road in repair? No doubt.
132. Then the remainder of the road will be kept by the Municipality of Randwick? Yes.
133. The citizens of Randwick are assessed for that purpose? They are.
134. Would it not then be possible to abolish the toll? If you could abolish the toll I should be very happy: it costs me about £16 a year for tolls.
135. *Mr. Stewart.*] Are you aware that in England there is a strong feeling in that direction—to do away with tolls? Yes.
136. Is it not felt that, in many instances, the expense of collecting the tolls is almost as much as the amount collected? Yes.
137. *Mr. Oatley.*] You stated, just now, that a Bill was before the House for the extension of the boundaries of the City of Sydney—When was the Bill brought in? Notice was given.
138. By whom? By Mr. Windeyer.
139. It has not been brought up: notice has been given? He has given notice.
140. *Mr. Stewart.*] Would that Bill include "No Man's Land"? Yes, the Water Reserve and Sydney Common.

1868-9.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

RANDWICK AND COOGEE ROADS TRANSFER BILL.

(PETITION—COMMISSIONERS OF THE OLD BOTANY, RANDWICK, AND COOGEE ROADS TRUST.)

---

*Ordered by the Legislative Assembly to be Printed, 10 February, 1869.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Commissioners of the Old Botany, Randwick, and  
Coogee Roads Trust,—

MOST RESPECTFULLY SHEWETH:—

That the Bill, as amended by the Select Committee, and now before your Honorable House, and cited as the “Randwick and Coogee Roads Transfer Bill,” does not meet the wishes of your Petitioners, and therefore humbly pray that the Bill may be restored to its original form.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 6 Signatures.]

PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK.

No. 1.

W. BLAND, Esq., AND OTHERS, to THE SECRETARY FOR LANDS.

Sydney, 31 August, 1860.

SIR,

We have the honor to request that you will appoint a surveyor to mark out a line of public road through a part of the Balmain Estate (or through land reputed to belong to that estate), from the New Abattoir Road on the west side of Glebe Island to Fig Tree Point on Long Cove Creek, where it is intended to have a bridge across to the Five Dock Estate; and further to survey and mark out a line for a public road through lands on the Five Dock Estate, belonging to some of the undersigned, to a point near the Five Dock Heads on the Parramatta River, from which point it is intended to erect a bridge across to Tarban as soon as Legislative enactment can be obtained.

We have, &c.,

W. BLAND.

D. N. JOUBERT.

F. W. PERRY.

WALTER BEAMES.

CHARLES ABERCROMBIE.

SAMUEL LYONS.

W. WRIGHT, J.P.,

(By authority, CHARLES ABERCROMBIE.)

W. H. GADEN, J.P.

Surveyor General.—M.F.—B.C., 13 September.

No. 2.

THE SURVEYOR GENERAL to MR. LICENSED SURVEYOR LANGLEY.

Surveyor General's Office,

Sydney, 2 October, 1860.

SIR,

In submitting for your perusal an extract from a letter which has been received from Messrs. Bland, C. Abercrombie, and others, I have to request that you will be good enough to make a survey of the best line of road from Glebe Island to the point at which it is proposed to cross Long Cove, interfering as little as is compatible with the selection of the best line with the design for subdivision of the Balmain Estate.

2. For the performance of this duty, you will be allowed to make a charge of three guineas for field work and two guineas for office work, conditionally that the time consumed does not exceed three days in the field and two days in the office.

3. You will be good enough to draw your plan in accordance with the enclosed directions, and furnish a book of reference on the accompanying form.

I have, &c.,

A. G. McLEAN, S.G.

No. 3.

THE SURVEYOR GENERAL to MR. LICENSED SURVEYOR LANGLEY.

Surveyor General's Office,

Sydney, 6 December, 1860.

SIR,

With reference to my letter of the 2nd October last, whereby you were instructed to mark out the best line of road from Glebe Island to the point at which it is proposed to cross Long Cove, I have to request that you will be good enough to inform me when you anticipate completing the survey.

I have, &c.,

A. G. McLEAN, S.G.

No. 4.

MR. LICENSED SURVEYOR LANGLEY to THE SURVEYOR GENERAL.

Sydney, 20 December, 1860.

SIR,

I have the honor to transmit a Plan\* of road leading from Glebe Island, \* Appendix. through the Balmain Estate, over Long Cove, through Five Dock Estate, across the Parramatta River, thence through the Lunatic Asylum Reserve, to meet the Great North Road opposite Gladesville, in accordance with your instructions received in October last. I also enclose † Book of Reference, together with my account of expenses for survey, plan, sections, &c.

I have, &c.,

CHAS. E. LANGLEY, L.S.

† NOTE.—Book of Reference cancelled, 5 Dec., 1864.

[Enclosure

## [Enclosure 1 in No. 4.]

BOOK of Reference of Road from the Abattoir Road near the Glebe Island to the Great North Road opposite Gladesville, to be opened as a Parish Road, under the Act of Council 4 William IV., No. 11.

No.	Portion of Road.	Reputed Owner.	Occupier.	Character of Land.	Bearings.	Length in Chains.	Enclosures.	Character and State of Preservation of Fencing.	Cultivation.	Breadth of Road.	Area.	Remarks.
1	Balmain Estate—from East Abattoir Road to south-east side of Long Cove.	Trustees of Gilchrist.	Unoccupied ...	Principally rocky ...	North-westerly	chs. lks. 74 71	Fenced ...	.....	None .....	1 chain ...	a. r. p. 7 1 34	
1a	Crossing that Cove to its north-west side.	.....	.....	Long Cove .....	do							
2	Birkenhead—from the north-west side of Long Cove to the south side of a road 33 feet wide, called Lyons' Road.	Charles Abercrombie.	C. Abercrombie Esq.	Good agricultural land	W. 42° 30' N.	40 40	Fenced ...	.....	None .....	1 chain ...	4 0 6	
3	Crossing Lyons' Road .....	.....	.....	.....	W. 42° 30' N.	0 50						
4	South Hythe—from the north side of Lyons' Road to south side of the Parramatta River	Samuel Lyons, Esq.	Unoccupied ...	Portion of this is tolerably good land; but remainder to Parramatta River is rocky.	Westerly	65 90	Fenced ...	.....	None .....	1 chain ...	5 1 0	For 25 chs. 13 lks. there is a road between Lyons' property and Wright's of 33 feet wide, which is deducted.
5	Crossing that river.....	.....	.....	River.								
6	Parish of Hunter's Hill—from north side of the Parramatta River to the south-east side of Isler's fence.	Crown .....	Unoccupied ...	Rocky, but mixed with good land.	Westerly	65 33	Fenced ...	.....	None .....	1 chain ...	6 2 0	
7	Parish of Hunter's Hill—from the south-east boundary of Isler's fence to the Great North Road.	Isler .....	Isler .....	Good cultivation land.	do. ...	7 60	Fenced ...	.....	None .....	1 chain		

NOTE 1.—Each number will represent one block of property through which the road may pass, whether of the Crown, of an individual, or devoted to the public as a reserve or road.

„ 2.—Each portion of road will be within the property to which the No. applies, and should be described, as “from the south boundary of John Smith's 600 acres to the boundary line between that land and Thomas Jones' 50 acres.”—“From the last-mentioned boundary to, &c., &c.”

„ 3.—The name of the reputed owner may be filled in from information obtained on the spot; or, failing such information, with the name of the grantee from the Crown.

NOTE 4.—The name of the occupier, should there be one, can of course be ascertained on the spot.

„ 5.—The bearings should be stated from the nearest cardinal point, as “E. 10° N.”; but where they are numerous, and shown in a table on the plan; the general bearing need only be stated as “north-easterly.”

„ 6.—In the column of remarks may be introduced any information which cannot conveniently be inserted in any of the other columns; such as the dedication of the portion of the road to the public, in the subdivision of surrounding land; the reputed free use of road by the public for any specific period, &c.

PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK. 5

[Enclosure 2 in No. 4.]

4 February 1861.

The Surveyor General,  
To Chas. E. Langley.

To tracing out a line of road leading from the Abattoirs (Glebe Island) to Bedlam Ferry, passing through the Balmain and Garryowen Estates, across Long Cove, through Bourke Town and the Five Dock Estate, to Bedlam Ferry, and across the Parramatta River, taking sections, breadth of river, &c., 3 days ...	£9 9 0
To plotting sections and making tracing showing the proposed road, also showing the road already surveyed, making out report, &c., 3 days ...	6 6 0
	<u>£15 15 0</u>

## No. 5.

MR. LICENSED SURVEYOR LANGLEY to THE SURVEYOR GENERAL.

Sydney, 4 February, 1861.

SIR,

I have the honor to transmit herewith, for your information, a sketch and report upon a line of road leading from the Abattoirs (Glebe Island) to meet the Great North Road at Bedlam Ferry.

I have, &amp;c.

CHARLES E. LANGLEY, L.S.

[Enclosure in No. 5.]

Mr. Licensed Surveyor Langley's Report.

REPORT upon a line of road, leading from the Abattoirs at Glebe Island, through the Balmain and Garryowen Estates, across Long Cove, through Bourke Town and the Five Dock Estate, to the Great North Road leading to Bedlam Ferry, across Bedlam Ferry in continuation of the said road:—

After having inspected this line of road, and taken sections of the two crossings as shown upon the tracing as sent herewith, I find a great many difficulties which render this line of road more difficult of construction than the one previously surveyed and laid out by me and edged green on the said tracing. The portion of the road in the Balmain and Garryowen Estates would be very expensive, in consequence of the great declivity and the many gullies to pass.

The crossing over Long Cove to Bourke Town is eight chains longer than the crossing from the Balmain Estate to the Sisters Rocks—the depth of water is about the same.

The ascent through Bourke Town is very great, and the only portion which is available is Thompson Street, it being only 50 feet wide; the township being laid out in small allotments, and a great portion of them sold, there would be a difficulty in making the road the proper width, in consequence of parties requiring compensation.

After leaving Bourke Town, the road would pass through several blocks of land belonging to Dr. Bland, Murray, and Abercrombie. From the diagonal way in which it severs these blocks, I am afraid the proprietors would require large compensation. The remaining portion of the road will have to pass through narrow roads varying from 16-24 and 33 feet wide, and very tortuous in its course. The greater portion of the land adjoining these roads are all divided into small allotments of 20 feet frontage and upwards, fenced in and improved as gardens, &c., thus rendering it very difficult in making the road of the proper width.

The Parramatta River at Bedlam Ferry will have to be crossed by a suspension bridge, as the bottom is very irregular as shown by the section on the accompanying sketch.

The difference in distance of the two roads is more than  $\frac{1}{2}$  of a mile; and the road edged green, already surveyed, would be several thousand pounds less expensive than the other. The enclosed tracing is taken from Reuss & Brown's Plan, which, I am sorry to say, is not very accurate, but, I trust, will answer the purpose required.

I have, &amp;c.,

CHARLES E. LANGLEY, L.S.,

Sydney, 4 February, 1861.

The Surveyor General.

## No. 6.

THE SURVEYOR GENERAL'S REPORT ON FOREGOING.

THE accompanying is a Plan, with a Book of Reference, of a road from the Abattoir Road near Glebe Island to the Great Northern Road near Gladesville, which has been laid out in compliance with the within petition, signed by W. Bland, S. Lyons, W. Wright, and others. It is intended as the way of access to the proposed bridge across the Parramatta River, for the erection of which, with one across Long Cove, and the construction of the road, certain of the commoners of the Field of Mars Common desire, as stated in the petition referred to me on the 20th ultimo, to surrender their commonage rights, with a view to the Government, under Legislative enactment, selling the Common land and erecting the bridge with the proceeds. The line of road proposed is, as will be seen from the plan, a most direct one to the old Great North Road near the Lunatic Asylum and the district in which the majority of the commoners reside, and the distance from the Market Wharf to the Old North Road would be only 5 miles. A line to meet the Old Great North Road on the south side of the river, and across the river at Bedlam Ferry where the river is somewhat narrower, has been examined; but it is considerably longer, and inequalities of the ground, as well as existence of improvements with which it would interfere, form obstacles to its adoption—while the river is very much deeper, which would form either an obstacle to, or a source of vastly increased expense in, the erection of a bridge on piers or piles.

See Return in  
reference to Field  
of Mars Com-  
mon. Printed  
29 Oct., 1861.

Notwithstanding

## 6 PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK.

Notwithstanding these considerations, I am not in a position to say that the termination of this road is the best site for a bridge; and I think that it would be premature to proclaim the road in the present uncertainty, not only on this point but on that of the erection of a bridge or bridges at all, were it not—

- 1st—That Government may proclaim the road without in any way pledging themselves to the erection of bridges in the construction of the road.
- 2nd—That all the proprietors through whose land it passes, with the exception of the representatives of the Balmain Estate, have petitioned for its opening, on the ground that it is intended to erect a bridge across to Tarban, “as soon as Legislative enactment can be obtained,” thus without seeking any pledge at the hands of the Government.
- 3rd—That the Balmain Estate is now being alienated rapidly, by a design in which this road or any direct road westerly is not provided for; and that when the lands so being sold come to be occupied and improved, it would become impossible without a special Act to carry so good a line as this is across the estate.
- 4th—That by proclamation of now existing roads, in lieu or under the new Land Bill, it will be practicable to practically rescind the opening of this road should it not be required.

The proclamation of this road then would be only a preliminary or provisional step, and as such I would recommend its early adoption.

A. G. M'LEAN.

Surveyor General's Office,  
Sydney, 26 March, 1861.

The Under Secretary for Lands.

Approved.—JOHN R., 9 May.

Clerk of the Executive Council.—M.F.—B.C., 10 May, 1861.

## No. 7.

### MINUTE OF THE EXECUTIVE COUNCIL.

Minute 6-21, 14 May, 1861.—Confirmed, 28 May, 1861.

THE Executive Council advise that the intended formation, as a parish road, of the proposed line of road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, be notified in the manner prescribed by the Act 4 Will. IV., No. 11.

EDWARD C. MEREWETHER,  
Clerk of the Council.

Approved—J.Y.  
23 May, 1861.

Forwarded to the Acting Surveyor General, in order that a copy of the Plan and Book of Reference may be lodged with the nearest Bench.—M.F.—B. Cover, 31 May, 1861.

Copies of the Plan and Book of Reference have been sent to the Central Police Office.—A. G. M'LEAN.—B.C., 7 June, 1861.

## No. 8a.

THE UNDER SECRETARY FOR LANDS to THE BENCH OF MAGISTRATES, CENTRAL POLICE OFFICE, SYDNEY.

Department of Lands,  
Sydney, 7 June, 1861.

GENTLEMEN,

I have the honor to forward, for deposit in the Police Office, Sydney, for public inspection and information, copies of a Plan and Book of Reference of a road which is about to be opened as a parish road, under the Act of Council 4th William IV., No. 11, from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, the receipt of which documents you will be good enough to acknowledge.

I have, &c.,  
MICHL. FITZPATRICK.

No. 8b.

## No. 8b.

NOTIFICATION IN *Government Gazette*.Department of Lands,  
Sydney, 15 June, 1861.

HIS Excellency the Governor, with the advice of the Executive Council, having deemed it expedient to open and make a parish road (to be maintained at the expense of the parishes through which it passes), from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, running through the lands granted to, or now occupied by, the Trustees of — Gilchrist, Messrs. Chas. Abercrombie, S. Lyons, and — Isler: Notice is hereby given, that in conformity with the provisions of the Act of the Governor and Council, 4th Will. IV., No. 11, a Plan and Book of Reference, showing the intended line of the road above named are now deposited at the Office of the Surveyor General in Sydney, and at the Central Police Office in Sydney; and all persons interested therein are requested to transmit in writing to the Clerk of the Executive Council, within one month from this date, any well-grounded objections which may exist to the formation of the Road in question.

By His Excellency's Command,  
JOHN ROBERTSON.

## No. 9.

J. G. LENNON, Esq., to THE UNDER SECRETARY FOR LANDS.

The Treasury,  
Sydney, 24 June, 1861.

SIR,

With reference to an advertisement in the *Government Gazette* dated 15th instant, relative to a Parish Road running through the lands of Mr. C. Abercrombie and others, I beg leave to inform you that, as a holder of land situate at Five Dock, I do object to the present line as laid down on plan now exhibited at the Survey Office, for this reason,—that if the road was carried along the fence which separates my land from that of C. Abercrombie, I would give one half the area gratis; or, in the event of Mr. Abercrombie objecting, I would be willing to give the whole area. And further, the road would be in my opinion more direct and the space of the intended bridge of less dimensions.

I need hardly point out that if this line be adopted, the expense would be materially less.

I have, &c.,  
JOHN G. LENNON.

Acting Surveyor General.—M.F.—B.C., 27 June.

## No. 10a.

THE UNDER SECRETARY FOR LANDS to THE CLERK OF THE EXECUTIVE COUNCIL.

Department of Lands,  
Sydney, 25 June, 1861.

SIR,

In drawing your attention to the notice in the *Government Gazette* of the 15th instant, respecting the intended formation of a parish road from the Abattoir Road near Glebe Island to the Great North Road near Gladesville, I am directed to request that you will have the goodness, at the end of one month from the date thereof, to inform me whether any objections have been received by you in respect of the said road, in pursuance of the notice alluded to.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 10b.

THE CLERK OF THE EXECUTIVE COUNCIL to THE SECRETARY FOR LANDS.

Executive Council Office,  
22 July, 1861.

SIR,

In compliance with the request contained in Mr. Under Secretary Fitzpatrick's letter of the 25th ultimo, I have the honor to forward three letters which have been received by me, containing objections to the proposed new line of road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville.

One

44  
8 PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK.

One of these—that from Mr. Isaac Shepherd—though bearing the date of the 12th July, did not reach me until this morning, which is after the period within which it should have been lodged.

I have, &c.,

EDWARD C. MEREWETHER,  
Clerk of the Council.

Acting Surveyor General.—M.F.—B.C., 31 July, 1861.

[Enclosures in No. 106.]

The Agents for the Trustees of the Balmain Estate to The Clerk of the Executive Council.

Sydney, 3 July, 1861.

Sir,

Referring to the advertisement in the *Government Gazette*, dated 15 June, notifying that His Excellency the Governor, with the advice of the Executive Council, had deemed it expedient to make a parish road from the Abattoir Road near Glebe Island to the Great North Road, running through the land granted to, and occupied by, the Trustees of the late Dr. Gilchrist, and calling upon persons interested to transmit, in writing, within one month from that date, any well-grounded objection which may exist to the formation of the road in question,—we beg to submit the following:—

1. That the Balmain Estate has been surveyed at considerable expense to the Trustees of the late Dr. Gilchrist, and divided into allotments, some of which have been sold, and others are still unsold.
2. That the contemplated line of road, running through numbers of these allotments, will involve the necessity of a re-survey of all that portion of the estate, and a considerable amount of expense in consequence.

The Trustees would therefore require to be compensated, not only for the quantity of land which will be taken up by making this road, but also for the unavoidable expenses to which they will be put.

We are, &c.,

THACKER, DANIELL, & CO.

The Agents for the Trustees of the Balmain Estate to The Clerk of the Executive Council.

*Balmain Estate.*

Sydney, 4 July, 1861.

Sir,

With enclosures  
from Executive  
Council Office.

Referring to our letter of yesterday, on the subject of the contemplated road about to be proclaimed, we have now to inform you that we have received a surveyor's report thereon, by which we observe that the quantity of land which will be abstracted by this road is 7 acres, more or less, worth, according to the result of the last auction sales, £700, and that the expense of re-survey and making new plans is £50.

We therefore claim £750 compensation for the unsold portion of the land which will be taken away, and for the expenses the Trustees will be put to.

We have, &c.,

THACKER, DANIELL, & CO.

Forwarded to the Colonial Secretary, to whom it ought to have been addressed in the first instance.—E.C.M.—4 July, 1861.

For the Secretary for Lands.—C.C.—B.C., 9 July.

Acting Surveyor General.—M.F.—B.C., 12 July.

Mr. Henry Isler to The Clerk of the Executive Council.

Gladesville, 10 July, 1861.

Sir,

On observing in the *Government Gazette* of the 15th June, 1861, the proclamation for forming a road from the Abattoirs, Glebe Island, to Gladesville, joining the Great Northern Road,—I, Henry Isler, object to the formation of a road passing through my land, which is cleared and fenced in, which leaves only a small corner on one side. On the other hand, I am willing, if paid for my land, and the road fenced off.

I am, &c.,

HENRY ISLER.

Isaac Shepherd, Esq., to The Clerk of the Executive Council.

Ryde, 12 July, 1861.

Sir,

I have to request that you will lay before the Honorable the Executive Council my objections to proclaiming as a Parish Road, the line laid down and described by Mr. Langley as crossing from the Abattoirs over Iron Cove, continuing in a line to the Parramatta River and crossing at Five Dock, and meeting the great North Road on the north-west side of the Asylum.

1. That the present proposed road is impracticable, there being no means of crossing either Iron Cove or the Parramatta River.
2. That the present line of road, crossing by the Bedlam Ferry, is perfectly practicable, and the crossing place more central and attended with less expense than would attend the crossing of two rivers.
3. That the site of the proposed bridge is falsely described. It is represented as crossing the Parramatta River opposite Gladesville, whereas it is a very considerable distance from that place on the Sydney side, and not at the most desirable crossing-place.

I have, &c.,

ISAAC SHEPHERD.

This is dated the 12th July, but was not received in the Executive Council Office until the 22nd; see envelope herewith.—E.C.M., July 22/61.

## No. 11

MR. SURVEYOR LANGLEY to THE SURVEYOR GENERAL.

Sydney, 4 September, 1861.

SIR,

In pursuance with your instructions, I have inspected the site for the proposed bridge across Iron Cove from Balmain to Five Dock at the Sisters' Rocks, also the road leading therefrom through the Five Dock Estate to Lyons' Road,—and requesting to be informed whether a better or more advantageous position for carrying out the works above mentioned might not be procured further up the cove, somewhere about the termination of the eastern boundary of Mr. Lennon's property, and along that boundary northward to Lyons' Road aforesaid.

In answer, I beg leave to inform you that the Sisters Rock is decidedly the most eligible site for the proposed bridge. It possesses many advantages, both in direction and shortness, as it would cross the cove at right angles, and the rocks projecting a very considerable distance into the water would form an excellent foundation for the abutments, embankments, &c. To cross the cove higher up near Mr. Lennon's boundary would increase the length of the bridge at least 200 feet, besides giving it a diagonal direction. To carry the road along Mr. Lennon's property would not be so favourable as the road already laid out, as to gradients, &c., it would also cause two sharp turnings, besides increasing the length in this short distance by nearly 100 yards.

Taking everything into consideration, I am of opinion that the position laid out has every advantage in its favour.

I have, &amp;c.,

CHAS. E. LANGLEY, L.S.

## No. 12.

THE SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

The three objections enclosed, are—(1st) that of Mr. King, as representative of the owner of the Balmain Estate; (2nd) that of Mr. Lennon, as owner of land on the west side of Long Cove; and (3rd) by Mr. Isler, a proprietor near the Lunatic Asylum.

I shall report on these objections on the assumption that the Legislature will determine on the sale of the Field of Mars Common, and the construction of the bridges and roads as proposed; as, should this not be the case, the proposal for opening the road will of course fall to the ground.

The first objection is less an objection than a claim for compensation. There is not in the grant of the Balmain Estate any general reservation for ways; and though there is *another reservation* it is specific in character, and has already been acted on, and therefore I am of opinion that the claim to compensation would be tenable under the Act. The claim made is for the value of the land and the cost of resurvey of the allotments affected by the new road. The latter is, I think, a fair and reasonable claim, and one which might be recognized by the Government. The former should not in my opinion, be conceded, for the following reasons:—

1st. The new road will occupy little if any more land than the roads previously designed, and which may, on the readjustment of allotments, be set aside to a great extent.

2nd. Should the bridges be constructed by Government, and the road opened, the traffic resulting through the Balmain Estate will, doubtless, tend materially to enhance the value of the estate; and although other land will no doubt, be brought by the bridges into competition with that estate, the balance of advantage will, I believe, be so much in favour of the estate, as to fully compensate for any additional area of land which may be taken up by the new road. The proper time to bring forward such a claim for compensation is after the confirmation of the road; and its legal settlement is by arbitration, but it may be more convenient to arrange with the agent, should he be disposed to accept the terms recommended, than to refer the matter to arbitration. I would therefore advise, that these terms be communicated to Mr. King, but that in any case, so far as his objection forms an impediment, the confirmation and opening of the road should proceed.

The second objection is by a proprietor whose land does not touch the proposed road, and who desires that the road should be diverted to pass along his boundary, and alleges that such a line would be more direct and less expensive. The report of Mr. Langley who surveyed the road, and has since re-examined this portion and the plan of the road, shows that the deviation would make the road longer, would cause two rectangular bends in the line which as proposed is straight, and would make the gradients less easy. Mr. Lennon's desire is of course to obtain a frontage for his property to the road; and although, other things being equal, it would be desirable to carry the road along his boundary as is the practice in such cases, I cannot recommend that the proposed deviation should be adopted.

The third objection is like the first—a claim for compensation rather than an objection. The claim to have the road fenced where it passes through enclosed land is fair, and the expense would be very trifling. The claim for the value of the land may be left to arbitration under the Act, after the confirmation; and, so far as the objection goes, the road may be confirmed.

A. G. M'LEAN.

Surveyor General's Office—B.C., 18 November, 1861.

The Legislature not having determined its course in the matter, the case must stand over.—JOHN R., 2 Dec.

10 PROPOSED ROAD TO GLADESVILLE *viâ* BALMAIN & FIVE DOCK.

## No. 13.

SAMUEL LYONS, Esq., to THE SECRETARY FOR LANDS.

Lyons' Buildings,  
30 April, 1863.

SIR,

A number of gentlemen residing on the Parramatta River, and others interested in that district, have requested me to write to your Department, and to beg that immediate steps may be taken to have the line of road *viâ* Pyrmont, Glebe Island, Five Dock, to Hunter's Hill, as surveyed by Mr. Langley, proclaimed forthwith, in order that they may take steps to have this new line of road cleared and fenced.

I have, &c.,  
SAMUEL LYONS.

The Surveyor General.—M.F.—B.C., 8 May, 1863.

The road has been already proclaimed, and its confirmation, without either bridges or ferries, might be involving the Government in the construction of them, and which might not be desirable.—(For the Surveyor General.)—P. F. ADAMS, 16 June.

Consultation, with Memorial presented yesterday.—J.R., 17 July.

## No. 14.

## EXTRACT FROM MEMORIAL OF FIELD OF MARS COMMONERS.

\* \* \* \* \*

"That your petitioners verily believe that the best interests and the future advancement of the said district, as also of the country around and far beyond it, would be greatly promoted by the formation of roads and the construction of bridges over the Parramatta River at Five Dock, and across Iron Cove, so as to obtain more direct communication than at present exists between the lands on the northern side of the Parramatta River and the City of Sydney."

"That your petitioners are entitled to the use and benefit of the said Common as aforesaid, and are anxious and willing (as indeed they believe are others whose names are not subscribed hereto, but who are similarly entitled to your petitioners) to relinquish the commonage rights now enjoyed by them under the said grant, whatever they may be; provided that the lands comprised in the said grant are resumed by the Crown, and that roads are made, and bridges over the Parramatta River at Five Dock and across Iron Cove, at some convenient place, are constructed, so as to obtain that which does not at this time exist, namely, a direct line of communication between the lands on the northern side of the Parramatta River and the City of Sydney, *viâ* Balmain, Glebe Island, and Pyrmont."

THE UNDER SECRETARY FOR LANDS to THE SECRETARY TO CROWN LAW OFFICERS.

Department of Lands,  
Sydney, 7 October, 1863.

SIR,

In forwarding to you the accompanying papers, together with a petition from commoners of the Field of Mars Common, I am directed by the Secretary for Lands to request that you will have the goodness to move the Parliamentary Draftsman to prepare a Bill to provide for the sale of the abovenamed Common, and for the payment of an amount out of the Revenue equal to the proceeds of such sale, for the purpose of constructing bridges over the Parramatta River, at Five Dock, and across Iron Cove, with a view to obtain a direct line of communication between the lands on the northern side of the Parramatta River and Sydney, *via* Balmain, Glebe Island, and Pyrmont.

I have, &amp;c.,

MICHL. FITZPATRICK.

## No. 17.

MR. J. RYAN BRENNAN, ESQ., to THE SURVEYOR GENERAL.

Garryowen House,  
Balmain, 15 April, 1864.

SIR,

I have the honor to draw your attention to a road that the late Government had laid out, and caused to be surveyed by Mr. Langley, through the Balmain Estate, and proclaimed in *Gazette* of 15th and 18th June, 1861, commencing at the south side of the Abattoirs, and intended to connect the proposed bridge to Five Dock with the Balmain Estate. I believe this road has not been opened by order of the Government. I have the honor to request the same may be now formally opened, as the Glebe and Abattoir Road is being repaired, and I am willing to put the new road in repair fit for use.

I have, &amp;c.,

J. RYAN BRENNAN.

## No. 18.

THE SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

Surveyor General's Office,  
Sydney, 26 April, 1864.

SIR,

The road from the Abattoir Road near Glebe Island, through the Balmain Estate, to the Great North Road near Gladesville, not having been confirmed, I have the honor to request that, in order that this step may be taken, I may be favoured with the return of the papers which, with others, were sent to the Crown Law Officers on the 7th October, for the preparation of a Bill for the alienation of the Field of Mars Common.

I have, &amp;c.,

P. F. ADAMS.

(For the S.G.)

Request return of papers.—Crown Solicitor.—B.C., 29 April.—M.F.

THESE papers have been handed to me by the Crown Solicitor, in reference to previous papers and letter of 7th October last—they are now returned as requested.—W. E. PLUNKETT.

ROBERT WATSON.  
THOS. MAHER.

## No. 22.

## THE SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

*Road from the Abattoir Road to Great North Road at Gladesville:*

THIS road, which has not been confirmed, passes through the grants to Balmain and Harris (Five Dock Estate), in the deeds of which the usual right of making roads has not been reserved.

With that portion of the road which passes through the former it is not now proposed to deal.

In

In the deed to Harris, a copy of which is enclosed, a road 66 feet wide has been reserved around the shore; but from the nature of the ground it could not be made practicable without considerable expense, and it is moreover so circuitous that it could not be adopted as part of the line.

By the 15th section of the Act 4 William IV., No. 11, the Governor, with the advice of the Executive Council, has the power to divert, shorten, alter, and improve the the course of any public road or way already made; and by the 16th section it is enacted that when any such road shall be altered, and the new road shall be made and completed, such new road shall be in lieu of the old road, which shall thereupon cease to be a public road, and the property in the ground shall vest in and be held by the proprietors of the immediately adjoining lands.

The road reserved through Harris's grant cannot, it appears to me, be considered to be a public way in the meaning of the Act, and the sections quoted are therefore inapplicable; but as those interested in the opening of the line are of a different opinion, and have suggested that the reserved road might be given in compensation for the land which will be occupied by the proper road, I submit the question for the consideration of the Honorable the Secretary for Lands.

W. R. DAVIDSON.

B.C., 1 September, 1864.

The question at issue requires legal advice. Refer, therefore, to the Crown Solicitor.—M.F.—B.C., 2 Sept., 1864.

[Enclosure.]

Copy of Deed.

John Harris—1,500 Acres.

1,500 ACRES of land lying and situate in the District of York Place bounded on the east by Iron Cove Creek commencing at the north corner of Townson's farm on the north by the main river on the west by Hen and Chicken Bay including Samuel Ash Clode's farm to the Parramatta Road on the south by that road and Townson's farm to the Iron Cove Creek.

To be known by the name of \_\_\_\_\_ and to be had and held by him the said John Harris his heirs and assigns free from all fees taxes quit-rents and other acknowledgments for the space of 5 years from the date hereof. Such timber as may now be growing or that may grow hereafter upon the said land which may be deemed fit for naval purposes to be reserved for the use of the Crown and paying an annual quit rent of 30 shillings after the term or time of 5 years before mentioned.

This grant including that of Edward Field Seager Jones William Strong George Benyon Samuel Ash Clode and John Aitkins which are all legally cancelled also including the farm of 100 acres granted to William Jamieson reserving the claim of the heir-at-law to William Jamieson deceased when he comes of age for the said farm lately occupied by the said William Jamieson in case the said heir-at-law to William Jamieson should not be satisfied with the grant of 100 acres given to him as an equivalent for the said 100 acres granted to his father dated 12 November 1799. Then the 100 acres so granted as an equivalent shall revert to the Crown as expressed in the body of the equivalent grant made out to Thomas Trotter his father-in-law also reserving the right of any claims to the proprietary of grants heretofore given in York Place where the said William Jamieson deceased farm is situate.

A road 1 chain wide is also to be reserved round the shores of the Harbour surrounding the said farm and in case His Majesty's Government should hereafter find it necessary to erect fortifications or barracks on any of the including points of land (not exceeding twenty acres of land in all) so as not to destroy any building erected thereon by the grantee without his being remunerated for the expense the Governor or Officer in Command for the time being is to erect hold and maintain such fortifications or barracks at no expense to the Crown for the hire or rent thereof.

In testimony of this, &c.

PHILIP GIDLEY KING.

1st January, 1806.

## No. 23.

E. MILLETT, ESQ., AND OTHERS *to* THE UNDER SECRETARY FOR LANDS.

Sydney, 16 September, 1864.

SIR,

Having been informed that it is the intention of the Government to open the road from the Abattoir Road to the Great North Road at Gladesville which was some since duly proclaimed, and that the Government purpose at an early period appointing persons to act as Trustees thereof, we, the undersigned, bearing in mind the great importance of having thoroughly competent and proper persons appointed to act in such capacity, would take the liberty of stating that George Robinson Elliott of Fig-tree Point, Balmain, William Wright of Drummoyne, and Alfred Reynolds Huntley of Hunter's Hill, Esquires, are, as far as we believe, in every respect fit and proper persons to be Trustees for the road, and that their appointment as such Trustees would meet with the approbation of by far the greater number of freeholders and residents in the district that will be benefitted by the opening of such road.

Under these circumstances, we have the honor to suggest that the above-named gentlemen should be appointed as Trustees of the road in question.

We have, &c.,

E. MILLETT,  
JOHN B. ADNAM,  
WILLIAM S. FRIEND,  
S. W. BROWN,  
And 16 others.

No. 24.

14 PROPOSED ROAD TO GLADESVILLE *viâ* BALMAIN & FIVE DOCK.

No. 24.

THE CROWN SOLICITOR to THE UNDER SECRETARY FOR LANDS.

Crown Solicitor's Office,  
Sydney, 22 September, 1864.

SIR,

I have the honor to return to you herewith the papers that I received from your Department, relative to the road from the Abattoir Road to the Great North Road at Gladesville; and to state that I have laid them before Mr. Solicitor General Faucett, who has been pleased to write an Opinion upon the question raised by the Surveyor General in his Minute of the 1st instant, a copy of which I send to you on the annexed half-sheet.

I have, &amp;c.,

JOHN WILLIAMS, C.S.

Surveyor General.—M.F.—B.C., 23 Sept., 1864.

[Enclosure in No. 24.]

In this case I am of opinion that the proposed road is not such a diversion or alteration of, or substitution for, a public road already made as to deprive the owner of the land through which the new road is intended to pass of the right to compensation.

The owner of the land, however, might be induced to accept the cancellation of the reservation in his grant of a road round the shores of the harbour surrounding the land, in lieu, or as part, of the compensation for the proposed new road.

P. FAUCETT,  
21 Sept., 1864.

No. 25.

MR. SURVEYOR DEBENHAM to THE SURVEYOR GENERAL.

30 September, 1864.

SIR,

In accordance with your verbal instructions to examine and report upon proposed deviations in the Gladesville Road, leading from the Abattoir Road to the Great Northern Road, suggested by Mr. Beames.

I have the honor to report that I accompanied Mr. Beames over the above-mentioned road, and beg to recommend that his suggestions be carried out.

The alteration suggested is at the north-west extremity of the Gladesville Road, at its junction with the Abattoir Road, from which a much easier gradient will be obtained.

I would beg to suggest that the portion of the Gladesville Road extending from the Abattoir Road to Long Cove be resurveyed and marked. The ground is cleared and perfectly bare, and marks of the previous survey cannot be found.

I have, &amp;c.,

JOHN DEBENHAM,  
Surveyor.

Mr. Surveyor Debenham may be instructed to survey and mark the deviation recommended by him, viz., from the Abattoir Road to Long Cove; and forward plan, and report through whose land the proposed deviation passess.—W.R.D., 3 Oct.

Also to survey a deviation passing through Mr. Abercrombie's Birkenhead Estate, at the Sisters' Rocks, Long Cove.—W.R.D., 4 Oct.

No. 26.

THE UNDER SECRETARY FOR LANDS to E. MILLETT, ESQ., AND OTHERS.

Department of Lands,  
Sydney, 24 October, 1864.

GENTLEMEN,

I am directed to inform you that, in compliance with the request contained in your letter of the 16th ultimo, the Secretary for Lands has approved of Messrs. G. R. Elliott, W. Wright, and A. R. Huntley being entrusted with the expenditure of any funds which may be appropriated for the repair of the road from the Abattoir Road to the Great North Road at Gladesville, or for the formation of approaches to the Punts on the line in question.

I have, &amp;c.,

MICHL. FITZPATRICK.

No. 27.

PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK. 15

No. 27.

MR. SURVEYOR DEBENHAM to THE SURVEYOR GENERAL.

4 November, 1864.

SIR,

In compliance with your instructions, dated 4th October, 1864, to survey some deviations in the Gladesville Road, I have now the honor to forward herewith a plan of the Gladesville Road, shewing proposed deviation at the south-east end of its junction with the Abattoir Road, also, deviation on the west side of Long Cove through C. Abercrombie's land.

I have also surveyed the approaches to Long Cove, and the Parramatta River, in accordance with previous verbal instructions.

The deviation from Abattoir Road avoids a sharp rise in the line surveyed by C. E. Langley, and also avoids passing through the private lands of T. Beames. The line I have selected is a more expensive one, but presents an easier gradient, and is decidedly a better approach to the Abattoir Road.

I enclose herewith Book of Reference of proposed deviation at the Abattoir Road.

I have, &amp;c.,

JOHN DEBENHAM.

[Enclosure in No 27.]

Book of Reference of proposed deviation in Road from the Abattoir Road near Glebe Island, to the Great North Road near Bedlam Asylum, to be opened as a parish Road, under the Act of Council, 4 William IV., No. 11.

No.	Portion of Road.	Reputed Owner.	Occupier.	Character of Land.	Bearings.	Length in chains.	Enclosures.	Character and state of preservation of Fencing.	Cultivation.	Breadth of Road.	Area.	Remarks.
1	From junction of Crescent-street with the Abattoir Road, following Crescent-street, to the north-west corner of J. Beame's land	.....	.....	.....	WNW	840	.....	.....	.....	1 chain.	.....	.....
2	Balmain Estate—From Crescent-street to junction with road surveyed by C. E. Langley, and already proclaimed	Trustees of Gilchrist.	None.	Rocky.	WNW	1,400	None.	None.	None.	1 chain.	a. r. p. 1 3 8	.....

- NOTE 1.—Each number will represent one block of property through which the road may pass, whether of the Crown, of an individual, or devoted to the public as a reserve or road.
- 2.—Each portion of road will be within the property to which the No. applies, and should be described as "from the south boundary of John Smith's 600 acres to the boundary line between that land and Thomas Jones' 50 acres." "From the last-mentioned boundary to, &c., &c."
- 3.—The name of the reputed owner may be filled in from information obtained on the spot, or, failing such information, with the name of the grantee from the Crown.
- 4.—The name of the occupier, should there be one, can of course be ascertained on the spot.
- 5.—The bearings should be stated from the nearest cardinal point, as "E. 10° N.," but where they are numerous and shown in a table on the plan, the general bearing need only be stated, as "north-easterly."
- 6.—In the column of remarks may be introduced any information which cannot conveniently be inserted in any of the other columns; such as the dedication of the portion of the road to the public, in the sub-division of surrounding land; the reputed free use of road by the public for any specific period, &c.

No. 28.

THE SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

*Road from Great North Road near Gladesville to Abattoir Road at Glebe Island:*

THE approaches to Punts on this road are nearly complete, and parties interested are pressing the opening of the road.

The confirmation has been delayed in consequence of liability to claims for compensation, arising from the absence of a general right to make roads in the deeds of grant.

The question of confirming the road, and thereby admitting such claims, is submitted for the consideration of the Honorable the Secretary for Lands.

The amount of compensation and fencing required to open the road throughout its length, is estimated as follows, viz. :—

Compensation in Balmain Estate	...	...	...	£750	0	0
Do. Harris	...	...	...	300	0	0
Cost of Fencing, to Isler and Roman Catholic Mission	...	...	...	27	0	0
				£1,077	0	0

A

16 PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK.

A considerable saving, probably of £650, might be effected (at least for the present) by not confirming that part of the road which passes through the unsold portion of the Balmain Estate. The Trustees have stated that they will claim compensation if the road is confirmed, being bound to do so under their trust; but, at the same time, as the opening of the road would enhance the value of the property to a certain extent, there does not appear to be any probability of their offering any obstruction to the formation of the road even without confirmation.

It is probable that an understanding might be arrived at with the Balmain Trustees, and also with Mr. C. Abercrombie, as to a reduced valuation in consequence of the advantages of the passage of the road through their properties.

(For the Surveyor General),  
P. F. ADAMS,  
8th Nov., 1864.

THE road, as per preliminary notification, may be confirmed, with the following deviations, viz:—

1st. From the Abattoir Road, following Crescent-street for about 6 chains; thence through the Balmain Estate, north-westerly, about 20 chains.

2nd. At the Punt Approach on the Balmain Estate, through land now occupied by Chape.

3rd. At the Punt Approach on the Birkenhead Estate, through land occupied by C. Abercrombie.

4th. At the Punt Approach on the Five Dock Estate, through land occupied by S. Lyons.

5th. At the Punt Approach at Hunter's Hill, through Crown land occupied by the Lunatic Asylum.

(For the Surveyor General),  
P. F. ADAMS,  
14 Novr.

## No. 29.

INDORSEMENTS ON LETTER, No. 21, *from* W. BLAND, ESQ., AND OTHERS.

Refer, as to the suggested balance, to Under Secretary for Works.—M.F.—B.C., 10th October, 1864.

The sum of £1,400 was voted on Lands Estimate for Punts and Approaches at Five Dock and Ironbark Creek. Tenders have been accepted by this department for £1,125, leaving an available balance of £275. Mr. Moriarty might probably be asked to report.—J.R.—B.C., 14/10/64.

We shall probably require about £100 for metalling the approaches with ironstone or blue metal; cost of ropes and moorings will be about £75—leaving £100, which might, I think, be applied to the purposes of clearing and fencing the road, as far as it will go.—E.O.M., 16/11/64.

## No. 30.

MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Department of Lands,  
Sydney, 19 November, 1864.

For the reasons stated in the enclosed communication from the Surveyor General, it is recommended to His Excellency the Governor and the Executive Council, that the proposed line of road from the Great North Road near Gladesville to the Abattoir Road at Glebe Island, as notified in the *Gazette* of the 18th June, 1861, be confirmed under the Act 4th William IV., No. 11, with the deviations suggested by that officer.

J. BOWIE WILSON.

Clerk of the Executive Council.—M.F.—B.C., 19 November, 1864.

Minute 64-49, 21 November, 1864.—Confirmed, 28 Novr., 1864.

THE Executive Council advise that the line of road herein referred to, with the deviations suggested by the Surveyor General, be now confirmed as a parish road, in terms of the Act 4 William IV., No. 11.

ALEX. C. BUDGE,  
Clerk of the Council.

Approved—J.Y.,  
1 December, 1864.

## No. 31.

## No. 31.

NOTIFICATION IN THE *Government Gazette*.Department of Lands,  
Sydney, 1 December, 1864.

WITH reference to the Government notice, dated 15th June, 1861, relative to the opening and making of a parish road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville: Notice is hereby given, in accordance with the Act of Council, 4th William, No. 11, that, notwithstanding the objections which have been made to the proposed road in conformity with the said Act, His Excellency the Governor, with the advice of Executive Council, has been pleased to confirm the said road with the following deviations, namely,—(1st) from the Abattoir Road following Crescent-street about 6 chains, thence through the Balmain Estate north-westerly about 20 chains; (2nd) at the punt approach on the Balmain Estate through land occupied by Chape; (3rd) at the punt approach on the Birkenhead Estate through land occupied by C. Abercrombie; (4th) at the punt approach of the Five Dock Estate through land occupied by S. Lyons; (5th) at the punt approach at Hunter's Hill through Crown Lands occupied by the Lunatic Asylum—and, it is therefore hereby declared expedient to open and make the road referred to according to the amended Plan and Book of Reference to be seen at the office of the Surveyor General, at Sydney, and at the Central Police Office, Sydney; and all persons intending to claim compensation in respect of the said line, are hereby reminded that notice must be served upon the Colonial Secretary, within 40 days hereof, in such manner and form as are provided by the 6th section of the Act above referred to, or they will be for ever foreclosed from such claim.

By His Excellency's Command,  
J. BOWIE WILSON.

## No. 32a.

THE UNDER SECRETARY FOR LANDS to THE PRINCIPAL UNDER SECRETARY.

Department of Lands,  
Sydney, 5 December, 1864.

SIR,

In drawing your attention to the notice in the *Government Gazette* of the 2nd instant, respecting the confirmation of the line of road from Abattoir Road near Glebe Island, to the Great North Road opposite Gladesville, I am directed to request that you will have the goodness, at the end of 40 days from the date thereof, to state whether any claims to compensation have been made in respect of the said road, in pursuance of the notice referred to.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 32b.

THE UNDER SECRETARY FOR LANDS to THE BENCH OF MAGISTRATES, CENTRAL POLICE OFFICE, SYDNEY.

Department of Lands,  
Sydney, 5 December, 1864.

GENTLEMEN,

I have the honor to forward, for deposit in the Police Office, Sydney, for public inspection and information, copies of a Plan and Book of Reference of a Road which is about to be opened as a Parish Road under the Act of Council 4th William IV., No. 11, from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, the receipt of which documents you will be good enough to acknowledge.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 33.

MESSRS. DAINTRY &amp; CHAPMAN to THE SECRETARY FOR LANDS.

Sydney, 19 December, 1864.

SIR,

We are requested by Mr. Samuel Lyons to claim compensation from the Government for land taken, or to be taken, from his estate at Five Dock, for the purposes of a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, proclaimed by Notice dated 1st instant. There being no reservation of roads in the original grant, except along the shore of the Harbour, Mr. Lyons considers himself clearly entitled to such compensation; and we shall be obliged if you will favour us, on his behalf, with the views of the Government on the subject of the same.

We are, &amp;c.,

DAINTREY &amp; CHAPMAN.

Surveyor General.—M.F.—B.C., 22 Dec., 1864.

## No. 34.

THE UNDER SECRETARY FOR LANDS to W. BLAND, ESQ., AND OTHERS, IN REPLY TO No. 21.

Department of Lands,  
Sydney, 21 December, 1864.

GENTLEMEN,

Referring to your letter of the 31st August last, applying for the appropriation, towards the repair of the road leading through the Five Dock Estate, of any surplus funds remaining from the money voted for the formation of the punts and approaches in connection with that road, I am directed by the Secretary for Lands to apprise you that it had already been determined to hand over to the parties named in the margin any funds which may be available for the repair of the road in question.

MESSRS. G. B.  
ELLIOTT, WM.  
WRIGHT, ALFRED  
R. HUNTLEY.

I have, &amp;c.,

MICHAEL FITZPATRICK.

## No. 35.

MR. H. ISLER to THE COLONIAL SECRETARY.

Woodbine Villa,  
*viâ* Gladesville, 4 January, 1865.

SIR,

With reference to a notice which appeared in the *Government Gazette* of the 18th June, 1861, and to a subsequent notice published in said *Gazette* on the 2nd December, 1864, respecting a parish road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, I do myself the honor to state, for the information of the Honorable the Colonial Secretary, that I am a claimant for compensation in the following form, namely, that the Government shall be at the expense of fencing in both sides of the proposed line of road, so far as the same shall extend through my land near the Lunatic Asylum, with a paling fence not less substantial than that already placed around the paddock through which it is proposed to carry the road referred to.

I have, &amp;c.,

HENRY ISLER, SENR.,

(FOR HENRY ISLER, JUNR.)

For the Secretary for Lands.—W.F., 6 June.

Surveyor General.—M.F.—B.C., 10 January, 1865.

The cost of enclosing the road through Mr. Isler's land with a fence similar to that fencing the enclosure will be £74, which amount is recommended to be granted.—P. F. ADAMS.—(For the Surveyor General.)

## No. 36.

MR. W. H. GADEN to THE COLONIAL SECRETARY.

Five Dock, 5 January, 1865.

SIR,

Referring to the notice in the *Government Gazette* of the 6th December, 1864, respecting a road to be made from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, I beg to give you notice that I shall claim compensation for the land taken from me, according to the original proclamation, in accordance with the survey made by the late Mr. Langley; and that I object to the deviation, No. 3, as is now proposed, on my land in the plan exhibited at the Surveyor General's Office.

I have, &amp;c.,

W. HENRY GADEN,

(By his Attorney),

CHAS. ABERCROMBIE.

For the Secretary for Lands.—W.F., 12 Jany.

No. 37.

## No. 37.

MR. C. ABERCROMBIE to THE COLONIAL SECRETARY.

Five Dock, 5 January, 1865.

SIR,

Referring to the notice in the *Government Gazette* of the 6th December, 1864, respecting a road to be made from the Abattoir Road near Glebe Island to the Great North Road near Gladesville, I beg to give you notice that I shall claim compensation for the land taken from me, according to the original proclamation, in accordance with the survey made by the late Mr. Langley; and that I object in toto to the deviation No. 3, as now proposed, on my land in the plan exhibited at the Surveyor General's Office.

I have, &amp;c.,

CHAS. ABERCROMBIE.

For the Secretary for Lands.—W.F.—12 Jany.

Surveyor General.—M.F.—B.C., 17 Jan., 1865.

This is identical with H. Gaden's claim, who is said to be the holder of the land.—

P.F.A.

## No. 38.

MR. A. CHAPE to THE COLONIAL SECRETARY.

Balmain, 9 January, 1865.

SIR,

Referring to the notice in *Government Gazette* of 6 December, 1864, relative to the road to be made from the Abattoir Road near Glebe Island to the Great North Road near Gladesville, I beg to give you notice that I shall demand compensation for the land taken from me on the Balmain Estate, and that I object to the proposed deviation No. 2, as shown on the plan at the Surveyor General's Office.

I have, &amp;c.,

A. CHAPE.

For the Secretary for Lands.—W.F.—12 Jan.

Surveyor General.—M.F.—B.C., 17 Jan., 1865.

This land forms part of the Balmain Estate, and has apparently been sold to Mr. Chape. The injury to it is estimated at £100.—P. F. ADAMS, 18 Jan.

## No. 39.

THE PRINCIPAL UNDER SECRETARY to THE UNDER SECRETARY FOR LANDS.

Colonial Secretary's Office,

Sydney, 18 January, 1865.

SIR,

In reply to your letter of the 5th December, No. 93, I am directed to state, for the information of the Secretary for Lands, that no applications have been received in this office for compensation in respect to the line of road from Abattoir Road near Glebe Island to the Great North Road, excepting those from Henry Isler, sen., Charles Abercrombie, W. H. Gaden (*per* Charles Abercrombie), and A. Chape, which have already been forwarded under blank cover.

I have, &amp;c.,

W. ELYARD.

Surveyor General.—M.F.—B.C., 27 January, 1865.

## No. 40.

MINUTE OF THE SURVEYOR GENERAL ON NO. 33.

THE deed of grant does not contain the general right to make roads. The land taken by the road from Mr. Lyons is 5 acres 1 rood 34 perches. I estimate its value at £30 per acre. The benefit derived from the opening of the road to this land will not be more than the injury caused by severance.

(For the Surveyor General),

P. F. ADAMS,

18 Jan., 1865.

## No. 41.

## MR. SURVEYOR DEBENHAM'S ESTIMATE OF LAND RESUMED FOR ROAD.

1. Mr. Surveyor Debenham will be good enough to report the estimated value of the 1 rood 32 perches of land taken from Chape for the passage of the Balmain and Gladesville Road, taking into consideration the injury in deviating from the course first proclaimed and any benefit that may accrue to him.

2. Also, the estimated value of the land not dedicated to the public as road in the sale of property taken from the Five Dock Estate, and area of portions claimed by Mr. Chas. Abercrombie and Mr. Henry Gaden, and its position on the map—this subdivision being hitherto unknown.

3. Also, to ascertain the number of rods of fencing to enclose the road through Isler's land; and of the Mission land, if the latter is enclosed by a fence of greater value than an ordinary post and rail fence.

P. F. A.,  
18 Jany., 1865.

Mr. Debenham, waiting for your report.—P. F. ADAMS, 20 Jany.

1. Value of land taken from — Chape, originally part of the Balmain Estate, I estimate at £100.

2. The surveyed line of roads passes through Henry Gaden's land, and not at all through C. Abercrombie's land.

3. There are 75 rods of fencing required through Isler's, at £1 per rod—£75.

JOHN DEBENHAM,  
Surveyor.

## No. 42.

## REPORT OF THE SURVEYOR GENERAL ON CLAIMS FOR COMPENSATION.

*Road from the Great North Road at Gladesville to the Abattoir Road at Glebe Island:*

THE period for lodging applications for compensation in the case of the above-mentioned road having expired, the applications noted in the margin are submitted.

In the case of Messrs. Thacker, Daniell, and Co., for the Balmain Estate, I beg to say, that although the land taken by the road may be valued at £650, still the increased value of the property will almost, if not quite, equal that amount, and the appraised value should be very low, say £100.

In the case of A. Chape, a purchase of a portion of the Balmain Estate, the case is different, the deviation in the road necessary to form the approaches does, to a certain extent, injure him, and the amount is estimated at £100.

Two claimants appear for the Birkenhead Estate, viz., Messrs. Abercrombie and Gaden; but it appears that the latter is the actual claimant. The value of the land is estimated at £30 per acre, and considerable benefit will be derived by him, perhaps equal to the value of the land taken.

In the case of Mr. S. Lyons the damage done by severance will equal the advantage derived. The value of the land is about £30 per acre.

In Mr. Isler's case, it appears that the fence forming the enclosure is of much more value than an ordinary enclosure, being a paling fence valued at £1 per rod. Isler claims no compensation for land taken, but asks to have the road enclosed with a similar fence to that forming the enclosure; the sum of £75 is recommended.

It is suggested that the course taken in the case of the Reverend W. M'Kee (as directed by Mr. Secretary Robertson, in December, 1862,) should be adopted, to ascertain the amount of compensation in each individual case therein (excepting that of Mr. Isler), viz., by appraisalment under the existing law.

(For the Surveyor General),  
P. F. ADAMS,  
20 January, 1865.

## No. 43.

## MINUTE OF THE UNDER SECRETARY FOR LANDS AND MINISTER'S DECISION.

I UNDERSTAND from the Deputy Surveyor General that, in recommending the reference of these claims to arbitration, he was under the impression that the Government were entitled to set up a *set off* by reason of the additional value conferred on the land through which the road passes. I am under the impression that this cannot be claimed as a matter of right, although it may be admitted by the appraisers as a matter of conscience. If my view be right, the Government in consenting to an arbitration may be committing itself to the payment of the full value of the land taken, probably not less than £1,000; and I gather from the Deputy Surveyor General that, in his opinion, this would be paying very dearly for the benefit to be derived from the opening of the road.—M.F.—  
24 Jany., 1865.

The

22 PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK.

The Assembly having voted the money for punts, &c., the road must be opened, and the valuation may go on.—J.B.W.—25 Jany.

Surveyor General.—M.F.—B.C., 27 Jany., 1865.

The Government Appraiser for Sydney and Suburbs may be instructed to carry out the appraisement.

(For the Surveyor General),  
P. F. ADAMS.

## No. 44.

MR. SURVEYOR ROWLAND *to* THE SURVEYOR GENERAL.

Sydney, 30 March, 1865.

SIR,

Verbal  
instructions.

I have the honor to transmit, for your information and approval, the sections you ordered of the approaches from the Balmain and Five Dock Estates to the proposed punt or bridge at Long Cove :—

1. The road as sectioned by me from the Balmain Estate I consider far preferable to that marked by Mr. Surveyor Debenham, as, in the first plan, it does not interfere with private property, is straight, and considerably shorter. The only objection is the cutting through the sandstone rock, marked in brown on section; but its length is only 180 feet, average depth of cutting  $2\frac{1}{2}$  feet, and width 20 feet, making 333 cubic yards, which can be made for 3s. the cubic yard, at a total cost £49 19s., a sum much below what would have to be paid by Mr. Debenham's route for purchased property. I therefore recommend it not only on its merits as a road, but as a saving to the Government.

2. The section on the Five Dock side is of an alternative road, which only requires a clearing of 280 or 300 feet 50 links wide, and the rubble stones removed, for which purpose I consider £15 would be ample remuneration.

I have, &c.,  
ISAIAH ROWLAND.

## No. 45.

MR. C. ABERCROMBIE *to* THE SECRETARY FOR LANDS.

Sydney, 4 April, 1865.

SIR,

Some time in August last year, I sent in an application, signed by several, to your predecessor, about the appointment of trustees for the new road from the Abattoir Road to Gladesville, to which I have never received any reply. But I am told that Wm. Wright, Esq., of Five Dock, Alfred Huntley, Esq., of Hunter's Hill, and Geo. R. Elliott, Esq., of Balmain, have been made the Trustees; and against the appointment of the two last-named gentlemen I beg to enter my protest, because neither of them have anything to do with Five Dock property. Indeed, I doubt much if they know even where the line of road is to be; and it is notorious that, within a municipality, trustees cannot interfere in any way in the management of roads—and, in this instance, it is on record in your Office that the municipality of Hunter's Hill refused to proceed with the making of the road from the punt on the Parramatta River to Gladesville, until a letter was sent from your office stating that the trustees named by me were to have no control whatever of that part of the road; and, no doubt, the same must be the case with that part of the road which runs through the Balmain Municipality.

I therefore, on behalf of B. C. Rodd, Esq., and myself, beg to inquire of you the cause of our names not being inserted as Trustees of the Five Dock part of the road, seeing that we have been so many years in the Trust on the Great North Road running through that Estate, and that a memorial was sent into your Office, signed by the large landholders of Five Dock in our favour.

I have, &c.,  
CHAS. ABERCROMBIE.

Surveyor General.—M.F.—B.C., 6 April, 1865.

## No. 46.

REPORT OF THE SURVEYOR GENERAL ON NO. 44.

FROM the report of Mr. Surveyor Rowland it appears that the cost of the cutting proposed by him to avoid Chape's land would be less than the estimated cost of compensation for going through it; and I would, therefore, recommend the abandonment of the intended passage through Chape's land, and the adoption of Mr. Rowland's proposal in taking the reserved road in the subdivision of the Balmain Estate. The required work being within that municipality, the expenditure of the amount, estimated at £50, cannot be recommended to be placed in the hands of other trustees, unless the Municipality will not undertake it, when I would recommend it being done under the supervision of the Department of Works, as in the case of the approaches to the punt, and the expense might be met by a grant from the Vote for Unclassified Roads.

The

PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK. 23

The correspondence in reference to the appointment of the trustees objected to by Mr. Abercrombie is not in the Office; but, from recollection, I believe that the unexpended balance of the vote for the punts was promised to the gentlemen objected to by Mr. Abercrombie, and I see no reason why they should not be entrusted with it. Messrs. Abercrombie and Rodd have not been previously trustees for this road.

W. R. DAVIDSON.

Surveyor General's Office,  
Sydney, 9 April, 1865.

N.B.—Amount voted for punts and approaches	...	...	£1,400
Cost of punts	...	£890	
Cost of approaches	...	235	
			1,125
Non-expended balance	...	...	£275

The Under Secretary for Lands.

For the information of the Engineer of Harbours.—M.F.—B.C., 22 April.

I presume, under the Surveyor General's Report, the matter will be left with the Municipality of Balmain.—E.O.M.—25/4/65.

## No. 47.

## ARRANGEMENTS IN REFERENCE TO APPRAISEMENTS.

MR. THOMAS,

The Deputy Surveyor General desires that the appraisements (excepting in Chape's case) should be again sent to Mr. Gorman, without reference to the Alienation Act, 25 Vict., No. 1, and that gentleman informed that it is desirable that he should make the appraisement, if he is willing, as far as the Crown is concerned to do so, at the customary rate. Should this, however, be demurred to, he is to be requested to return the papers.—H.H.—2 May, /65.

As the land cannot be valued under the Alienation Act, the reference to arbitration (if this is the course to be pursued) should, I think, be preceded by an agreement to be entered into by the Secretary for Lands on the one hand and the parties interested on the other. There would otherwise be nothing binding on either side.—W.T., 3 May.

THAT, I am aware, is the course in private transactions, and is, no doubt, essential in this; but the obtaining from the interested parties the customary engagement may fall within the action to be taken by Mr. Gorman, if he be willing to appraise at the rate named.—H.H., 3 May.

*Manner of Arbitrations.*

COMPENSATION for Land required for the Road from the Abattoir Road to Gladesville:

The mode of procedure in this case should, as regards the preliminary steps, be the same as that in determining the amount of compensation to be paid for land required for railway purposes. The persons interested having made their applications for compensation, it is now for the Government to appoint a valuator, who, after an inspection, will state what he believes to be the value of each portion required for the road, taking into consideration the amount of damage done to the remainder by severance, and adding 10 per cent. for compulsory sale. A formal offer will then be made by the Government to each of the parties, who, it is probable, will not accept. The amount of compensation should, in this event, properly be determined in the manner provided by the Act 4 Will. IV., No. 11; but as this course will be very expensive and tedious, the Crown Solicitor thinks that it might be waived, and that the matter might be determined by the ordinary way.—W.T., 8 May.

Proceed accordingly.—W.R.D., 10 May.

It is submitted, for the approval of the Honorable the Secretary for Lands, that the course indicated herein should be followed, and that Mr. Gorman, the Appraiser for the Metropolitan District, should be instructed to make the preliminary valuation suggested.—W.R.D.—Under Secretary for Lands.—B.C., 27 June.

Follow the precedent set in M'Kee's case.—JOHN R.—B.C.—Surveyor General.

## No. 48.

THE SURVEYOR GENERAL to J. V. GORMAN, Esq.

Surveyor General's Office,  
Sydney, 14 August, 1865.

SIR,

I have the honor to subjoin a Schedule, containing the names of certain parties who have respectively claimed compensation from the Government for the portions of land set opposite to their names, which have been resumed by the Crown for the purpose of forming the road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, as more particularly shown upon the tracing which accompanies these instructions.

2. I have addressed letters to the various claimants, informing them of your appointment as arbitrator, and requesting that their replies may be sent to you. I have also supplied them with forms for concurring in your appointment as sole arbitrator, as also forms for appointing arbitrators for themselves, if they so desire. If any of them adopt the latter course, you will supply them with the forms herewith marked "C."

3. I enclose the necessary forms for making awards, which you will use as the occasion may require.

4. It may be observed that, as in some instances the value of these properties has been much enhanced by the formation of the road in question, the amount of such value should, in fairness, be deducted from the value of the land actually resumed by the Government, the balance being the amount of compensation payable to the claimants.

I have, &amp;c.,

W. R. DAVIDSON, S.G.

## THE SCHEDULE REFERRED TO.

Claimant.	Area.	Situation of Land.
Messrs. Thacker, Daniell, & Co., Trustees for the Balmain Estate.	a. r. p. 6 0 0	For that portion of the Gladesville Road passing through part of the Balmain Estate, under trust.
Samuel Lyons, by his Attorneys, Daintrey & Chapman.	5 1 34	For that portion of the Gladesville Road passing through Mr. S. Lyons' property, part of the Five Dock Estate.
Henry Gaden, by his Agent, C. Abercrombie.	4 3 0	For that portion of the Gladesville Road passing through Mr. Gaden's property, part of the Five Dock Estate.

## No. 49.

THE SURVEYOR GENERAL to MESSRS. THACKER, DANIELL, &amp; Co.

Surveyor General's Office,  
Sydney, 14 August, 1865.

GENTLEMEN,

With reference to your letter of the 4th July, 1861, seeking compensation from the Government for 6 acres of land—part of the Balmain Estate—resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, I have to inform you, that the Secretary for Lands having authorized me in that respect, I have appointed Mr. John Valentine Gorman, of Pitt-street, Sydney, arbitrator on behalf of the Government. If you are satisfied that the amount of compensation to be paid to you, as Trustees of the Balmain Estate, shall be determined by Mr. Gorman alone, you will please sign the form sent herewith—marked A. If, however, you wish to appoint an arbitrator to act on your behalf, you will be required to pay the costs of such arbitrator, and of the umpire who will then have to be appointed, and upon your signing an undertaking to that effect—in form B, also sent herewith—and forwarding same to Mr. Gorman, of Pitt-street, Sydney, he will proceed to act herein on behalf of the Government. You will, of course, understand that unless either form A or B is signed and forwarded to Mr. Gorman within sixty days from this date, the appointment of an arbitrator will be void, and your claim for compensation will be considered to be abandoned.

I am, &amp;c.,

W. R. DAVIDSON.

Surveyor General.

## No. 50.

THE SURVEYOR GENERAL to MR. W. H. GADEN.

[Per Mr. C. Abercrombie.]

Surveyor General's Office,  
Sydney, 14 August, 1865.

SIMILAR letter to foregoing, answering letter of the 5th January last, on behalf of Mr. William Henry Gaden, respecting 4 acres 3 roods, part of the Five Dock Estate.

W. R. DAVIDSON, S.G.

## No. 51.

THE SURVEYOR GENERAL to SAMUEL LYONS, Esq.

[Per Messrs. Daintrey &amp; Chapman.]

Surveyor General's Office,  
Sydney, 14 August, 1865.

SIMILAR letter to foregoing, answering letter of the 19th December last, on behalf of Mr. Samuel Lyons, respecting 5a. 1r. 34p., part of the Five Dock Estate.

W. R. DAVIDSON, S.G.

## No. 52.

MR. SURVEYOR ARMSTRONG to THE SURVEYOR GENERAL.

Sydney, 2 October, 1865.

SIR,

According to your verbal instructions requiring me to inquire into the alleged departure from the line of road proclaimed and confirmed, from Glebe Island towards Gladesville, where it passes through Mr. Abercrombie's Birkenhead Estate, by the trustees for the expenditure of the money voted for its formation, I have the honor to inform you that I examined the road, and the clearing which was done under the direction of Mr. W. Wright, one of the trustees.

During my inspection of it, Mr. Abercrombie still insisted that Mr. Langley's line of road was departed from, and that the clearing was actually on his land.

Finding a survey was necessary to prove it, and having your sanction, I fortified myself by reference to Mr. Langley's and Mr. Debenham's surveys. By my plan, now transmitted, I have clearly shewn that Mr. Wright had not extended too far; therefore, Mr. Abercrombie was in error.

2. The deviation extending beyond Mr. Debenham's, as agreed to by you on the ground, is shown by blue lines. Mr. Abercrombie's present proposal, now submitted, to remove the road further from his fence, is shown by yellow lines. This latter line would pass over similar land, but most part of that already cleared would then be useless for the road and would have to be accounted for.

With these facts now laid before you for your decision, I will wait for your reply before working any more.

I have, &c.,  
JOHN ARMSTRONG.

To make any deviation from the line suggested by Mr. Debenham would virtually be commencing the whole affair *de novo*; the appraisement is now being made, and I scarcely think it advisable to stop it.—P.F.A., 12.

## No. 53.

E. T. BLACKET, Esq., to THE SURVEYOR GENERAL.

Sydney, 27 December, 1865.

SIR,

Messrs. J. V. Gorman and Walter Beames, the Arbitrators to determine the sum of money to be paid to Mr. Abercrombie for land resumed by the Government at Five Dock, for the New Road to Hunter's Hill, have appointed me the Umpire.

As these gentlemen are unable to agree as to their award, the matter has been referred for my decision; but at the outset a difficulty occurs upon which I am desirous to have your opinion.

In estimating the sum thus to be paid, am I to take into consideration the increase of value given to the remaining land belonging to the same owner by the road itself, or am I to consider that the spirit of the 45th clause of the Railway Act of 1858 applies in this case?

I have, &c.,  
EDMUND T. BLACKET.

## No. 54.

THE SURVEYOR GENERAL to E. T. BLACKET, Esq.

Surveyor General's Office,  
Sydney, 5 January, 1866.

SIR,

In reply to your letter of the 27th ult., I have the honor to inform you, that the arbitration to determine the value to be paid to Mr. Abercrombie for that portion of his land required for the Gladesville Road is by consent, and it will consequently not be carried out under any particular Act.

2. As Umpire it rests with you fairly to balance the interests on both sides.

I have, &c.,  
W. R. DAVIDSON, S.G.

## No. 55.

E. T. BLACKET, Esq., to THE SURVEYOR GENERAL.

Sydney, 14 February, 1866.

SIR,

I do myself the honor to transmit my awards, as Umpire in the arbitrations of Messrs. Samuel Lyons and Mr. Henry Gaden, for lands resumed by the Crown at Five Dock.

I have, &c.,  
EDMUND T. BLACKET.

## [Enclosures in No. 55.]

*Appointment of Arbitrator by the Government.*

WHEREAS Messrs. Daintrey and Chapman, of Sydney, in the Colony of New South Wales, have applied, on behalf of Mr. Samuel Lyons, for compensation by the Government for 5a. 1r. 34p. of land, part of the Five Dock Estate, resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, as more particularly shown upon the tracing accompanying these presents; and whereas the Government have taken into consideration the above claim. Now I, the Surveyor General of the Colony aforesaid, having been duly authorized by the Minister for Lands, do hereby appoint J. V. Gorman of Pitt Street, Sydney, aforesaid, to be the Arbitrator on behalf of the Crown to determine the amount of compensation to be paid to the said Samuel Lyons for the land so resumed as aforesaid.

In witness whereof I have hereunto set my hand, this 14th day of August, A.D. 1865,—

W. R. DAVIDSON,  
Surveyor General.

I, the within named J. V. Gorman, do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matters referred to me.

J. V. GORMAN.

Subscribed and declared this 1st day of }  
November, A.D. 1865, before me,— }

HENRY PRINCE, J.P.

## C.

*Applicant appointing Arbitrator on his own behalf.*

WHEREAS I, Samuel Lyons, by my attorneys, Messrs. Daintrey and Chapman of Sydney, in the Colony of New South Wales, have applied for compensation by the Government for 5a. 1r. 34p. of land at Five Dock, resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville; and whereas the Minister for Lands has duly appointed J. V. Gorman to be the person to fix and determine the amount of compensation to be paid to the said Samuel Lyons; whereas, I am desirous of appointing an arbitrator on my behalf, in the matter aforesaid, now I, the said Samuel Lyons, do hereby, in pursuance of the provisions of the Crown Lands Alienation Act of 1861, appoint F. H. Reuss of 134 Pitt Street, in the Colony aforesaid, to arbitrate on my behalf to determine the amount of compensation to be paid to me by the said Government.

In witness whereof I have hereunto set my hand, this 25th day of October, A.D. 1865,—

SAMUEL LYONS,  
(DAINTREY & CHAPMAN.)

I, the within named F. H. Reuss do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matters referred to me under the Crown Lands Alienation Act of 1861.

F. H. REUSS.

## B.

WHEREAS Samuel Lyons, by his attorneys, Messrs. Daintrey and Chapman, of Sydney, in the Colony of New South Wales, has applied to the Government of the said Colony for compensation for 5a. 1r. 34p. of land, part of the Five Dock Estate resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville; and whereas the Surveyor General of New South Wales has intimated that he has appointed John V. Gorman, of Pitt-street, Sydney aforesaid, to fix and determine the amount of compensation to be paid to the said Samuel Lyons for the land so resumed as aforesaid, on condition that if the said Samuel Lyons do not agree that the said J. V. Gorman shall be sole arbitrator to act in the matter of the said arbitration on behalf of the said Samuel Lyons as well as on the behalf of the Government, he shall pay all costs charged by or payable to the person he may appoint as arbitrator on his behalf, and also the costs of and payable to any umpire that may be appointed in the matters aforesaid: Now, the said Samuel Lyons, in consideration of the Minister for Lands appointing the said J. V. Gorman to be the arbitrator on behalf of the Government in the matters aforesaid, doth hereby undertake and promise to the Honorable John Robertson, Minister for Lands, that he will pay to the person hereinafter appointed as arbitrator on behalf of the said Samuel Lyons, and to any umpire who may be appointed in the matters aforesaid, all costs, charges, and expenses which shall or may become payable to the said arbitrator who may be appointed herein, and that the said Samuel Lyons will hold the Government of the said Colony indemnified from being called upon to pay the said cost and charges and expenses, or any part thereof.

In witness whereof, the said Samuel Lyons, by his Attorneys Messrs. Daintrey and Chapman, has hereunto set his hand, this 13th day of October, 1865,—

SAMUEL LYONS.  
(DAINTREY & CHAPMAN.)

To all to whom these presents shall come, E. T. Blacket, of Sydney, in the Colony of New South Wales, sends greeting:

WHEREAS, on 14th day of August, 1865, J. V. Gorman was duly appointed by the Minister for Lands to determine the amount of compensation to be paid to Samuel Lyons, for lands resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville; and whereas, on the 25th day of October, 1865, F. H. Reuss, of Sydney, was duly appointed by the said Samuel Lyons to determine the amount aforesaid; and whereas the said J. V. Gorman and the said F. H. Reuss, before proceeding to enter upon the said arbitration, duly appointed the said E. T. Blacket as umpire in the matter of the said arbitration; and whereas it hath become necessary that the said E. T. Blacket should act as umpire in the premises, and he hath, before entering upon the said arbitration, duly made the declaration required by law:

Now, know ye, that the said E. T. Blacket, having heard and considered the allegations and witnesses on behalf of the Minister for Lands, and of the said Samuel Lyons, respectively, doth hereby declare the sum of £160 16s. 6d. to be the amount of compensation to be paid to the said Samuel Lyons for the land resumed as aforesaid, and doth further fix the costs to be paid to the said J. V. Gorman as such arbitrator at the sum of £5 5s., which sum the said E. T. Blacket doth direct shall be paid by the Minister for Lands—and the costs to be paid to the said F. H. Reuss as such arbitrator at the sum of £5 5s., and of the said E. T. Blacket as umpire herein at the sum of £5 5s., which last-mentioned sums the said E. T. Blacket doth hereby order and direct shall be paid by the said Samuel Lyons.

In witness whereof the said E. T. Blacket hath hereto set his hand, this 8th February, 1866,—

EDMUND T. BLACKET.

Witness—WILLIAM SLADE.

## B.

WHEREAS W. H. Gaden, by his attorney Charles Abercrombie, of Five Dock in the Colony of New South Wales, has applied for compensation by the Government for 4 acres 3 roods of land, part of the Five Dock Estate, resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville; and whereas the Surveyor General of New South Wales has intimated that he has appointed John V. Gorman, of Pitt-street, Sydney, aforesaid, to fix and determine the amount of compensation to be paid to the said W. H. Gaden for the said land so resumed as aforesaid—on condition, that if the said W. H. Gaden does not agree that the said John V. Gorman shall be the sole arbitrator to act in the matter of the said arbitration, on behalf of the said W. H. Gaden as well as on behalf of the Government, he shall pay all costs charged by or payable to the person he may appoint as arbitrator on his behalf, and also the costs of and payable to any umpire that may be appointed in the matters aforesaid: Now, the said W. H. Gaden, in consideration of the Minister for Lands appointing the said J. V. Gorman to be the arbitrator on behalf of the Government, in the matters aforesaid, does hereby undertake and promise to the Honorable John Robertson, Minister for Lands

28 PROPOSED ROAD TO GLADESVILLE *viâ* BALMAIN & FIVE DOCK.

Lands, that he will pay to the person hereinafter appointed as arbitrator on behalf of the said W. H. Gaden, and to any umpire who may be appointed in the matters aforesaid, all costs, charges, and expenses which shall or may become payable to the said arbitrator who may be appointed herein; and that the said W. H. Gaden will hold the Government of the said Colony indemnified from being called upon to pay the said costs, charges, and expenses, or any part thereof.

In witness whereof the said W. H. Gaden hath hereunto set his hand, this 11th October, A.D. 1865,—

WILLIAM H. GADEN.  
(By his Attorney),  
CHARLES ABERCROMBIE.

*Appointment of Arbitrator by Government.*

WHEREAS Charles Abercrombie, of Five Dock, near Sydney, in the Colony of New South Wales, has applied, on behalf of Henry Gaden, for compensation by the Government for 4 acres 3 roods of land, part of the Five Dock Estate, resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, as more particularly shown upon the tracing accompanying these presents; and whereas the Government have taken into consideration the above claim: Now I, the Surveyor General of the Colony aforesaid, having been duly authorized by the Minister for Lands, do hereby appoint John Vale Gorman, of Pitt-street, Sydney, aforesaid, to be the arbitrator on behalf of the Crown, to determine the amount of compensation to be paid to the said Henry Gaden for the land so resumed as aforesaid.

In witness whereof I have hereunto set my hand, this 14th day of August, 1865,—

W. R. DAVIDSON,  
Surveyor General.

I, the within-named John Valentine Gorman, do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me; and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matter referred to me.

J. V. GORMAN.

W. CHURCH, J.P.

To all to whom these presents shall come, Edmund Thomas Blacket, of Sydney, in the Colony of New South Wales, sends greeting:

WHEREAS, on the 14th August, 1865, John Valentine Gorman was duly appointed by the Minister for Lands to determine the amount of compensation to be paid to W. H. Gaden, by his attorney Charles Abercrombie, for land resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville; and whereas on the 11th October, 1865,

1865, Walter Beames of Leichhardt, was duly appointed by the said W. H. Gaden, by his attorney Charles Abercrombie, to determine the amount aforesaid; and whereas the said J. V. Gorman and the said Walter Beames, before proceeding to enter upon the said arbitration, duly appointed the said E. T. Blacket as umpire in the matter of the said arbitration: And whereas it hath become necessary that the said E. T. Blacket should act as umpire in the premises, and he hath before entering upon the said arbitration duly made the declaration required by law:

Now know ye, that the said E. T. Blacket, having heard and considered the allegations and witnesses on behalf of the Minister for Lands and of the said W. H. Gaden, by his attorney Charles Abercrombie, respectively, doth hereby declare the sum of £141 2s. 6d. to be the amount of compensation to be paid to the said Samuel Lyons for the land resumed as aforesaid; and doth further fix the costs to be paid to the said J. V. Gorman as such arbitrator at the sum of £5 5s., which sum the said E. T. Blacket doth direct shall be paid by the Minister for Lands; and the costs to be paid to the said W. Beames as such arbitrator at the sum of £5 5s., and of the said E. T. Blacket as umpire herein at the sum of £5 5s.—which last-mentioned sums the said E. T. Blacket doth hereby order and direct shall be paid by the said W. H. Gaden, by his attorney Charles Abercrombie.

In witness whereof the said E. T. Blacket hath hereto set his hand, this 8th February, 1866,—

EDMUND T. BLACKET.

Witness.—WM. SLADE.

No. 56.

THE SURVEYOR GENERAL to MR. J. V. GORMAN.

Surveyor General's Office,  
Sydney, 17 February, 1866.

SIR,

With reference to my instructions of the 14th August, 1865, relative to the valuation of certain land resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, I have the honor to inform you that Mr. Blacket the umpire has forwarded his awards in Messrs. Lyons' and Gaden's cases, and that, as the delay has been considerable, it is hoped you will use every exertion to hasten the award in the case of the Trustee of the Balmain Estate.

I have, &c.,  
W. R. DAVIDSON, S.G.

No. 57.

MR. J. V. GORMAN to THE SURVEYOR GENERAL

Tara, near Sydney,  
22 February, 1866.

SIR,

I beg herewith to transmit my award of £510 made in the matter of arbitration between the Crown and Messrs. Thacker, Daniell, and Co., in a claim for compensation made by the latter for 6 acres of land, part of the Balmain Estate, resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, being at the lowest current rate at which that estate is now being sold.

As both the other claims for compensation for lands similarly resumed were referred to the umpire, the arbitrators being unable to agree upon one particular point, I was desirous of availing myself of the opinion of the umpire in those cases, in order, if possible, to fortify my own view; and hence the delay in making my award, the other awards having only been made a few days since.

I may remark, that, as this arbitration does not in any way come within the provisions of the Crown Lands Aliation Act of 1861, I am not, in my capacity of Appraiser to the Government under that Act, bound to arbitrate for Messrs. Thacker, Daniell, and Co., without payment for my services in the usual way; I have therefore included in my award the fee to which I am entitled from them, but in regard to which the Government is not in any way responsible.

I have, &c.,  
J. V. GORMAN.

[Enclosures in No. 57.]

*Appointment of Arbitrator by Government.*

WHEREAS Messrs. Thacker, Daniell, & Co. of Sydney, in the Colony of New South Wales, have applied, on behalf of the Trustees of the Balmain Estate, for compensation by the Government of New South Wales for 6 acres of land (part of the above estate) resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, as more particularly shown upon the tracing accompanying these presents; and whereas the Government have taken into consideration the above claim: Now I, the Surveyor General of the Colony aforesaid, having been authorized by the Minister for Lands, do hereby appoint J. V. Gorman, of Pitt-street, Sydney, aforesaid, to be the arbitrator on behalf of the Crown to determine the amount of compensation to be paid to the said trustees for the land so resumed as aforesaid.

In witness whereof I have hereunto set my hand, this 14th day of August, A.D. 1865,—

W. R. DAVIDSON,  
Surveyor General.

30 PROPOSED ROAD TO GLADESVILLE *viâ* BALMAIN & FIVE DOCK.

I, the within-named J. V. Gorman, do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me; and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matters referred to me.

J. V. GORMAN.

Subscribed and declared this 1st day of }  
November, A.D. 1865— }  
HENRY PRINCE, J.P.

A.

WHEREAS Messrs. Thacker, Daniell, & Co. of Sydney, in the Colony of New South Wales, as Trustees of the Balmain Estate, have applied to the Government of the said Colony for compensation from the Government for 6 acres of land, part of the Balmain Estate, resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville; and whereas the Surveyor General of the said Colony has, by the authority of the Minister for Lands, appointed J. V. Gorman, of Pitt-street, Sydney, aforesaid, to fix and determine the amount of compensation to be paid to the said Messrs. Thacker, Daniell, & Co. for the land so resumed as aforesaid; and whereas the said Messrs. Thacker, Daniell, & Co. are desirous of concurring in the appointment of the said J. V. Gorman as such arbitrator as aforesaid: Now, therefore, the said Messrs. Thacker, Daniell, & Co. do hereby nominate and appoint the said J. V. Gorman to be arbitrator on behalf of the said Thacker, Daniell, & Co. as such trustees as aforesaid, to the intent that upon his being appointed by the Minister for Lands as arbitrator on behalf of the Government, he may as sole arbitrator determine the matters aforesaid.

In witness whereof the said Trustees have hereunto set their hands, this 19th day of August, A.D. 1865,—

CHARLES HOLLOND.  
(By his Attorney, G. KING.)  
JOHN BOWNING.  
(By his Attorney, G. KING.)  
ROBERT VANTY.  
(By his Attorney, G. KING.)

To all to whom these presents shall come, I, J. V. Gorman of Sydney, in the Colony of New South Wales, send greeting:

WHEREAS, on the 14th day of August, A.D. 1865, I was duly appointed arbitrator by the Minister for Lands, and on the 19th day of August, A.D. 1865, also appointed as sole arbitrator by Messrs. Thacker, Daniell, & Co., Trustees for the Balmain Estate, to fix and determine the amount to be paid to the said Messrs. Thacker, Daniell, & Co. as such Trustees, for 6 acres of land, part of the above estate, resumed by the Crown for the purpose of forming a road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville; and whereas I have entered upon the consideration of the matter, and have heard and considered the evidence produced before me by or on behalf of the Minister for Lands and the said Messrs. Thacker, Daniell, & Co., as such trustees aforesaid: Now I, the said J. V. Gorman, do hereby declare that the sum of £510 be the amount of compensation to be paid to the said Messrs. Thacker, Daniell, & Co., as trustees aforesaid for the Balmain Estate, for the land so resumed by the Government as aforesaid; and I assess and fix the costs of this arbitration payable to me at the sum of £7 10s.—of which said sum I hereby direct that £2 10s. shall be paid to me by the Minister for Lands, and £5 shall be paid to me by the said Messrs. Thacker, Daniell, & Co.

In witness whereof I have hereunto set my hand, this 22nd day of February, A.D. 1866,—  
J. V. GORMAN.

No. 58.

THE SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

THE valuation of the portions required for the Gladesville Road having been received, a Schedule is forwarded showing the amount to be paid in compensation to those persons from whose lands the portions have been taken.

As the late Minister for Lands decided that, in dealing with this matter, M'Kee's case should be taken as a precedent, it is presumed that, subject to the approval of the Executive Council, the respective amounts will be paid to the persons interested, in anticipation of a vote of Parliament.

W.R.D.—B.C., 12 March, 1866.

Prepare Minute for Executive.—J.B.W., 14 March.

SCHEDULE showing the Amount of Compensation to be paid by Government, for the resumption of certain Land, at Balmain, for Road purposes.

No. 59.

GEORGE KING, Esq., to THE SURVEYOR GENERAL.

Sydney, 14 March, 1866.

*Balmain Estate.*

SIR,

Having been informed that an award had been made by the arbitrator as to the value of the land taken by the Government from the above estate for the new road recently made, I request that I may be informed of the result of the award, as to the amount of compensation and the line of road taken, in order that I may have the alteration made in the plan of the estate.

I have, &c.,

GEO. KING,

Attorney for the Trustees of the Balmain Estate.

No. 60.

MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Department of Lands,  
Sydney, 26 March, 1866.

It having been found necessary, in forming the line of road from the Abattoir Road through the Balmain Estate to the Great North Road opposite Gladesville, to appropriate the several portions of land specified hereunder, it is now recommended, for the approval of His Excellency the Governor and the Executive Council, that the following sums of money be paid, in anticipation of Legislative sanction, to holders of said lands, by way of compensation for their loss, viz. :—

The Trustees of the Balmain Estate	...	...	...	...	£510	0	0
Samuel Lyons	...	...	...	...	160	16	6
Henry Gaden	...	...	...	...	141	2	6
					£811	19	0

J. BOWIE WILSON.

This has now, I think, been voted.—M.F.

No. 61.

THE UNDER SECRETARY FOR LANDS to THE UNDER SECRETARY FOR FINANCE AND TRADE.

Department of Lands,  
Sydney, 6 April, 1866.

SIR,

Referring to the Vote recently taken on Additional Estimates, for the £512 purpose of compensating the owners of land appropriated for the Road from Balmain to the Great North Road opposite Gladesville for their loss, I am now directed to request that the following sums may be paid, in full compensation, to the parties named in each case, viz. :—

To Thacker, Daniell, & Co., Trustees for the Balmain Estate	...	...	...	...	£510	0	0
Samuel Lyons	...	...	...	...	160	16	6
Henry Gaden	...	...	...	...	141	2	6
					£811	19	0

I have, &c.,

MICHL. FITZPATRICK.

No. 62.

MESSRS. DANIELL, KING, & Co. to THE SURVEYOR GENERAL.

Sydney, 7 April, 1866.

SIR,

We have a letter from Mr. J. V. Gorman, informing us that he had sent in his award in the matter of the land resumed by Government from the Balmain Estate in February last, and that he had awarded the trustees £510 compensation.

We will feel obliged by the Government paying us the amount of the award, and sending us a tracing of the road now proclaimed, that we may know what land to except from future sales.

We have, &c.,

DANIELL, KING, & CO.

The

32 PROPOSED ROAD TO GLADESVILLE *vid* BALMAIN & FIVE DOCK.

The awards are at present with the Under Secretary for Lands. A tracing is exhibited at all times at the Surveyor General's Office.—P. F. ADAMS, 11 April.  
Under Secretary for Lands.

These papers may now, it is presumed, be returned to the Surveyor General, in order that steps may be taken for the formal opening of the line, should no objection exist.—M.F.—B.C., 21 April, 1866.

Will it not be better in the first instance to deal with Isler's case of cost of fencing, or shall the remainder of the road be opened forthwith?—(For the Surveyor General)—P. F. ADAMS, 2 May.

The former.—M.F., 7 May.

The sum of £74 should now be given to Mr. Isler for fencing, as recommended by my B.C. of the 20 January, 1865.—W.R.D.—B.C., 11 May, 1866.

Approved.—J.B.W., 17 May.

## No. 63.

THE UNDER SECRETARY FOR LANDS to THE UNDER SECRETARY FOR FINANCE & TRADE.

Department of Lands,  
Sydney, 22 May, 1866.

SIR,

I am directed by the Secretary for Lands to request that you will have the goodness to cause the sum of £74 to be paid to Mr. Isler, or his order, for fencing that portion of the road from the Abattoir Road, through the Balmain Estate, to the Great North Road opposite Gladesville, which passes through his enclosed land.

2. This sum will be charged against the Vote for Fencing roads through enclosed land for the present year.

I have, &c.,

MICHL. FITZPATRICK.

## No. 64.

MR. J. G. LENNON to THE UNDER SECRETARY FOR LANDS.

Leicester Place,  
Paddington, 2 June, 1866.

SIR,

With reference to the new line of road running through the Five Dock Estate, I am informed that, in consequence of some disagreement as to compensation with Mr. Abercrombie, through whose land the said road is to pass, a fresh proclamation will have to be issued. If such is the case, I beg to state that I am willing to give all the land required for the road without any compensation other than that of frontage; and I have little doubt that, on a re-survey of the line through my land, it will be found quite as good as that of the present. In conclusion, I have to remark that the above proposition was made by me some years back.

I have, &c.,

JOHN G. LENNON.

Surveyor General.—M.F.—B.C., 4 June, 1866.

THE delay already in opening this line of road has been so great, that, notwithstanding the inducement to adopt Mr. Lennon's offer, I prefer recommending the opening of the road as proclaimed. To take the line offered by Mr. Lennon, it would be necessary to pass through a portion of Mr. S. Lyons' property through which no right to make roads is reserved; also through a portion of Mr. Gaden's (Abercrombie's). But, as there is a reservation of "a road one chain wide round the shores of the Harbour surrounding the same" in the deed of grant, it is probable that the interference with this property would be trifling.—(For the Surveyor General)—P. F. ADAMS, 19 June.

The Under Secretary for Lands.

Approved.—J.B.W., 23 June.

For the Surveyor General, in order that the road may be formally opened.—M.F. B.C., 29 June, 1866.

Mr. Licensed Surveyor Huntley to formally open the road.—P.F.A., 5 July.

## No. 65.

THE UNDER SECRETARY FOR LANDS to J. G. LENNON, Esq.

Department of Lands,  
Sydney, 29 June, 1866.

SIR,

Referring to your letter of the 2nd instant, suggesting that the line of the proposed road from the Abattoir Road through the Balmain Estate should be altered so as to pass through your land, I am directed by the Secretary for Lands to inform you that it has been determined to adopt the line of road already proclaimed, and that instructions have been given for its formal opening to public use.

I have, &amp;c.,

MICHL. FITZPATRICK.

## No. 66.

MR. SURVEYOR HUNTLEY to THE SURVEYOR GENERAL.

No. 5, Exchange, Sydney,  
15 August, 1866.

SIR,

I have the honor to report that in pursuance of instructions received by Deputy Surveyor General's B. Cover, dated 5 July, 1866, I have formally opened the abovenamed road.

The marking of the road is plain, and the greater portion, that from the Great North Road to Mr. Abercrombie's north fence, is formed, and above half the length through his property is cleared and stumped.

In Mr. Abercrombie's fence, at the crossing of the road, there are slip-rails, so I saw no necessity for removing his fence, and I may, therefore, declare that no obstruction now exists on this line of road.

I have, &amp;c.,

A. S. HUNTLEY, C.E.

THE customary notice of the formal opening of the road may appear. The traffic on the road is not disturbed; and if any complaint is made, the removal of the slip-rails can be carried out.

(For the Surveyor General),

P. F. ADAMS,  
16 Aug., 1866.

The Under Secretary for Lands.

## No. 67.

NOTIFICATION IN THE *Government Gazette*.Department of Lands,  
Sydney, 17 August, 1866.

## ROAD.

NOTICE is hereby given that the line of parish road, from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, mentioned in the *Government Gazette* of the 29th November, 1864, (No. 232,) has been formally marked and opened by the proper officer, and that the same is now open for public use.

J. BOWIE WILSON.

## No. 68.

MESSRS. CAIRD, PATERSON, &amp; Co., to THE SECRETARY FOR LANDS.

Sydney, 15 January, 1867.

SIR,

Referring to a conversation which the writer had with you some time ago, in which it was agreed that the road through our property at Five Dock (formerly Mr. Abercrombie's) should be shifted its own width to the north of its present position, we are informed that no steps have been taken to carry this out, in consequence of our having omitted to send the Government an undertaking to the effect that we would claim no further compensation than that which has already been received.

In consideration of the improvement to our property which will be made by shifting the road as above, we hereby absolve the Government from all further claims in respect of same, and will be greatly obliged if you will cause the necessary steps to be taken for having the road so altered and reproclaimed.

We have, &amp;c.,

CAIRD, PATERSON, &amp; Co.

Surveyor General.—M.F.—B.C., 19 January, 1867.

Mr. Licensed Surveyor Huntley for report as to any objection to the slight deviation sought; and if not, to prepare a plan and book of reference.—P.F.A., 22 Jan.

34 PROPOSED ROAD TO GLADESVILLE *viâ* BALMAIN & FIVE DOCK.

## No. 69.

MR. SURVEYOR HUNTLEY *to* THE SURVEYOR GENERAL.Bell's Chambers, 171, Pitt-street,  
Sydney, 15 February, 1867.

SIR,

In reply to Deputy Surveyor General's blank cover dated 22 January, 1867, I have the honor to state that the sum of £35 has been expended by the trustees of the above road on the line as proclaimed, and on that portion passing through the late property of Mr. Abercrombie, and that there is no physical difficulty in deviating the road as applied for.

I have, &c.,  
A. S. HUNTLEY.

From this report, I could scarcely recommend the deviation, unless Mr. Caird was willing to pay the £35 expended on the road. His application is too late; and it must be borne in mind that he has received the award of compensation for injury, in full, done to his property by the road in taking its original course.—(For the Surveyor General)—P. F. ADAMS, 25 Feby., '67.

## No. 70.

THE UNDER SECRETARY FOR LANDS *to* MESSRS. CAIRD, PATERSON, & Co.Department of Lands,  
Sydney, 4 March, 1867.

GENTLEMEN,

In reference to your letter of the 15th ultimo, in which you propose a deviation from the portion of the New Gladesville Road passing through your property, I am directed by the Secretary for Lands to inform you that there will be no objection to the alteration suggested by you, provided you repay to the trustees of the road the amount of £35 expended by them in the formation of the portion proposed to be cancelled.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 71.

MESSRS. CAIRD, PATERSON, & Co. *to* THE SECRETARY FOR LANDS.

Sydney, 14 March, 1867.

SIR,

In reply to your favour of the 4th instant, regarding New Gladesville Road, we will be glad to repay the £35 expended by trustees in formation of the portion of the road we wish cancelled, if the alteration we wish is carried out.

We have, &c.,  
CAIRD, PATERSON, & Co.

Inform Trustees. Is it necessary to take any other steps on account of deviation? —J.B.W., 15 March.

The Surveyor General.—M.F.—B.C., 23 March, 1867.

The road as marked by Mr. Armstrong may be proclaimed.—(For the Surveyor General)—P. F. ADAMS, 17 April.

The Deputy Surveyor General has authorized the delay in the proclamation of this line until the deviation is formed.

The road is open and the works are being carried out upon the line at the request of the trustees; the proclamation has been delayed pending some work that was incomplete; it is now desirable that they should reply as to whether the proclamation shall issue according to the survey, or if any amendment is required to facilitate their operations.—(For the Surveyor General)—P.F.A., 7 June.

## No. 72.

THE UNDER SECRETARY FOR LANDS *to* THE TRUSTEES OF NEW GLADESVILLE ROAD.Department of Lands,  
Sydney, 21 March, 1867.

GENTLEMEN,

I am directed to inform that application having been made by Messrs. Caird, Paterson, & Co. for the proclamation of a deviation from the New Gladesville Road, where it passes through their lands (formerly C. Abercrombie's property) at Five Dock, in lieu of the portion of that road which passes through that land, it has been determined to effect such alteration on the understanding that the applicants repay the trustees whatever expense the latter may have incurred in the formation of the portion of the present line referred to.

2. Messrs. Caird, Paterson, & Co. having agreed to this course, I am to inform you that steps will be at once taken for the proclamation of the deviation in question.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 73.

## No. 73.

THE UNDER SECRETARY FOR LANDS *to* THE TRUSTEES OF NEW GLADESVILLE ROAD.Department of Lands,  
Sydney, 13 July, 1867.

GENTLEMEN,

Referring to my letter of the 21st March last, on the subject of Messrs. Caird, Paterson, and Co.'s consent to repay to your trust the sum of £35 expended on the new line to Gladesville where it passes through their land, provided a deviation were effected at that spot, by which means the land would be relieved of the intersection by the road as originally intended, I am now directed to inquire whether the proclamation of the line, which has been delayed at your instance, and pending the completion of certain works in progress, shall now be proceeded with in accordance with the survey, or whether any further amendment is required to facilitate your operations.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 74.

MR. SURVEYOR HUNTLEY *to* THE UNDER SECRETARY FOR LANDS.Bell's Chambers, Pitt-street,  
Sydney, 25 July, 1867.

SIR,

In reply to your letter of the 13th instant, inquiring whether the proclamation of the New Gladesville Road through the land belonging to Messrs. Caird, Paterson, and Co., may now be proceeded with, I have the honor, on behalf of myself and co-trustees, to inform you that the road is now formed in accordance with the deviation required by Messrs. Caird, Paterson, and Co.; but I am not aware whether another survey will be required previous to proclamation.

I have, &c.,  
A. R. HUNTLEY.

The Trustees say they are not aware of any necessity for a further survey of the line, but the attention of the Surveyor General may be drawn to this letter.—M.F.—B.C., 31 July, 1867.

Mr. Surveyor Knapp to inspect the work done by Trustees, and see if any further proclamation is necessary to include the works.—P. F. ADAMS.—B.C., 27 Aug., /67.

## No. 75.

MR. SURVEYOR KNAPP, JUNR., *to* THE SURVEYOR GENERAL.No. 131, Pitt-street, Sydney,  
16 September, 1867.

SIR,

Acting on your blank cover of 27th August last, I have inspected that portion of the New Gladesville Road passing through land (forming part of the Five Dock Estate) lately belonging to Mr. Charles Abercrombie, and do myself the honor to report that the work done by the trustees stands on the line of road Mr. Caird informed me he is willing should pass through the property; a strip, about 20 links wide, extending from the elbow to about the second culvert from the waters of Long Cove, remains to be cleared.

There being a considerable deviation from Mr. Licensed Surveyor Armstrong's line and the one proposed by Mr. Caird, I have, to save time, made a survey to include all the work done by the trustees, without waiting for further instructions from you. I trust this course will meet with your approval.

This survey will include a fine bluff rock on the waters of Long Cove, which will hereafter answer for a buttress for a bridge, should it be thought requisite to erect one.

Herewith I transmit book of reference, and return the papers.

I have, &c.,  
EDWARD J. H. KNAPP, JUNR.

[Enclosure]

[Enclosure in No. 75.]

BOOK of Reference of Road from Long Cove to Lyons' Road, being a deviation in the road from the Abattoir Road near Glebe Island to the Great Northern Road opposite Gladesville, to be opened as a Parish Road, under the Act of Council 4 William IV., No. 11, in lieu of a portion of that road which was confirmed by *Government Gazette* Notice of the 1st December, 1864, fol. 2752.

No.	Portion of Road.	Reputed Owner.	Occupier.	Character of Land.	Bearings.	Length in chains.	Enclosures.	Character and State of Preservation of Fencing.	Cultivation.	Breadth of Road.	Area.	Remarks.
1	From the Punt Wharf, at the Sisters' Rocks, Long Cove, to fence on the N.E. side of Lyons' Road, opposite the gates of Drummoyne, the property of William Wright.	Caird & Paterson.	C. Abercrombie	Principally sandy soil.	Northerly, westerly, and north-westerly.	48.60	3-rail fence.	Good.....	None	1 chain	a. r. p. 4 3 0	

NOTE 1.—Each number will represent one block of property through which the road may pass, whether of the Crown, of an individual, or devoted to the public as a reserve or road.

" 2.—Each portion of road will be within the property to which the No. applies, and should be described, as "from the south boundary of John Smith's 600 acres to the boundary line between that land and Thomas Jones' 50 acres."—"From the last-mentioned boundary to, &c., &c."

" 3.—The name of the reputed owner may be filled in from information obtained on the spot, or, failing such information, with the name of the grantee from the Crown.

" 4.—The name of the occupier, should there be one, can of course be ascertained on the spot.

" 5.—The bearings should be stated from the nearest cardinal point, as "E. 10° N.," but where they are numerous, and shown in a table on the plan, the general bearing need only be stated, as "north-easterly."

" 6.—In the column of remarks may be introduced any information which cannot conveniently be inserted in any of the other columns; such as the dedication of the portion of the road to the public in the subdivision of surrounding land, the reputed free use of road by the public for any specific period, &c.

## THE SURVEYOR GENERAL to THE UNDER SECRETARY FOR LANDS.

THE accompanying Plan and Book of Reference of a road from Long Cove to Lyons' Road, being a deviation in the road from the Abattoir Road near Glebe Island to the Great Northern Road opposite Gladesville, are forwarded, with the view to the opening of the line as a parish road, under the Act of Council 4 William IV., No. 11, in lieu of a portion of that road confirmed by *Gazette* Notice of the 1st December, 1864.

(For the Surveyor General),

P. F. ADAMS,

B.C., 17 October, 1867.

## No. 77.

## THE UNDER SECRETARY FOR LANDS to THE BENCH OF MAGISTRATES, CENTRAL POLICE OFFICE, SYDNEY.

Department of Lands,  
Sydney, 14 November, 1867.

GENTLEMEN,

I have the honor to forward, for deposit in the Police Office, Sydney, for public inspection and information, copies of a Plan and Book of Reference of a road which is about to be opened as a parish road, under the Act of Council 4th William IV., No. 11, from Long Cove to Lyons' Road, being a deviation in the road from the Abattoir Road near Glebe Island to the Great Northern Road near Gladesville, the receipt of which documents you will be good enough to acknowledge.

I have, &amp;c.,

MICHL. FITZPATRICK.

## No. 78.

NOTIFICATION IN THE *Government Gazette*.

Department of Lands,  
Sydney, 15 November, 1867.

## ROAD.

HIS Excellency the Governor, with the advice of the Executive Council, having deemed it expedient to open and make a parish road (to be maintained at the expense of the parishes through which it passes), from Long Cove to Lyons' Road, being a deviation from the road from the Abattoir Road near Glebe Island to the Great Northern Road near Gladesville, in lieu of a portion of that road confirmed by *Government Gazette* Notice of 1st December, 1864, running through the lands supposed to be the property of Messrs. Caird, Paterson, & Co.: Notice is hereby given, that in conformity with the provisions of the Act of the Governor and Council 4th William IV., No. 11, a plan and book of reference showing the intended line of the road abovenamed are now deposited in the office of the Surveyor General in Sydney, and at the Central Police Office, Sydney; and

PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK. 37

and all persons interested therein are requested to transmit, in writing, to the Clerk of the Executive Council, within one month from this date, any well-grounded objections which may exist to the formation of the road in question.

By His Excellency's Command,  
J. BOWIE WILSON.

No. 79.

THE UNDER SECRETARY FOR LANDS to THE CLERK OF THE EXECUTIVE COUNCIL.

Department of Lands,  
Sydney, 19 November, 1867.

SIR,

In drawing your attention to the notice in the *Government Gazette* of the 2nd December, 1864, respecting the intended formation of a parish road from Long Cove to Lyons' Road, being a deviation from the road from the Abattoir Road near Glebe Island to the Great Northern Road opposite Gladesville, I am directed to request that you will have the goodness, at the end of one month from the date thereof, to inform me whether any objections have been received by you in respect of the said road, in pursuance of the notice alluded to.

I have, &c.,  
MICHL. FITZPATRICK.

No. 80.

THE CLERK OF THE EXECUTIVE COUNCIL to THE UNDER SECRETARY FOR LANDS.

Executive Council Office,  
3 January, 1868.

SIR,

From Long Cove to Lyons' Road, being a deviation from the road from the Abattoir Road near Glebe Island to the Great Northern Road near Gladesville, in lieu of a portion of that road confirmed by *Gazette* Notice of 1 Dec., 1864.—*Abercrombie's*.

In compliance with the request contained in Mr. Under Secretary Fitzpatrick's letter of the 19th November, 1867, No. 123, I do myself the honor to forward to you the objection lodged with me to the formation of the proposed parish road noted in the margin.

I have, &c.,  
ALEX. C. BUDGE,  
Clerk of the Council.

Cost of fencing cannot be recommended in this case, as the Government have already paid for all damage to the property through the opening of the road.—(For the Surveyor General)—P. F. ADAMS.

The confirmation of the road is recommended.—P.F.A., 9 Jany.

[Enclosures in No. 80.]

Mr. Chas. Abercrombie to The Clerk of the Executive Council.

Five Dock, 13 December, 1867.

Sir,

With reference to the notice issued by the Secretary for Lands on the 15th November last, relative to a deviation made in the road from Long Cove to Lyons' Road, running through the middle of my paddock which is substantially enclosed with a three-railed fence, and in which paddock I have been in the habit of taking in horses and cattle on agistment since 1852, and still continue to do so,—I beg to give you notice that I shall object to the said road being opened for public traffic until the Government erect a strong three-railed fence on each side of the said road, which, I estimate, will cost about £180, say 9s. per rod, and the compensation paid by the Government for the land (5 acres) is only £130.

I have, &c.,  
CHAS. ABERCROMBIE.

P.S.—To save repetition, I may just state that the within notice is from me as lessee of the ground; and I beg to give the Government the same notice, and state that the owner of the land (Mr. W. H. Gaden) has the same objections to make to the opening of the road, until it is properly fenced in, and at the expense of the Government.

CHAS. ABERCROMBIE,  
Attorney for W. H. GADEN.

No. 81.

SAMUEL LYONS, Esq., to THE SECRETARY FOR LANDS.

No. 227, George-street,  
13 January, 1868.

SIR,

I have the honor to lay before you the following facts, with the view of obtaining compensation for land taken by the Government, in addition to that I have already been paid for. In April, 1866, I received a notification from the Department of Lands that compensation had been awarded to me, to the extent of £160 16s. 6d., for 5 acres 1 rood and 34 perches, for loss of land appropriated for the formation of the road from Balmain to the Great North Road. Since then I have ascertained by surveys (especially by one made by Mr. Reuss) that the quantity of land taken for the above was 6 acres 2 roods and 34 perches, being 1 acre 1 rood more than I have received payment

38 PROPOSED ROAD TO GLADESVILLE *viâ* BALMAIN & FIVE DOCK.

payment for ; in other words, that the whole of the road was taken from my property. This error arises from an impression that the new line of road runs into a private road, laid out by my brother and myself. Mr. Wright, the purchaser of my brother's property, has recently, by payment to me, acknowledged that the road referred to, running between the two properties, was by mistake enclosed in his boundary wall.

I have, &c.,  
SAMUEL LYONS.

Mr. Lyons states that the road in question cuts off a larger area of his land than that for which he has been paid, viz., 5a. 1r. 34p., and he claims further compensation to be calculated for the 1 acre 1 rood overlooked.

This is a matter requiring the report of the Surveyor General.—M.F.—B.C., 24 January, 1868.

## No. 82.

NOTIFICATION IN THE *Government Gazette*.

Department of Lands,  
Sydney, 14 February, 1868.

WITH reference to the notice in the *Government Gazette* of the 15th November, 1867, relative to the opening and making of a parish road from Long Cove to Lyons' Road, being a deviation from the road from the Abattoir Road near Glebe Island to the Great Northern Road near Gladesville, in lieu of a portion of that road confirmed by *Gazette* Notice of the 1st December, 1864,—notice is hereby given, in accordance with the Act of Council 4 Will. IV., No. 11, that no objections having been made to the proposed road, in conformity with the said Act, His Excellency the Governor, with the advice of the Executive Council, has been pleased to confirm the said road ; and it is therefore hereby declared expedient to open and make the road referred to, according to the plan and book of reference, to be seen at the Office of the Surveyor General at Sydney, and at the Central Police Office, Sydney ; and all persons intending to claim compensation, in respect of the said line, are hereby reminded, that notice must be served upon the Colonial Secretary within forty days from the date hereof, in such manner and form as are provided by the 6th section of the Act above referred to, or they will be for ever foreclosed from such claim.

By His Excellency's Command,  
J. BOWIE WILSON.

## No. 83.

## THE UNDER SECRETARY FOR LANDS to THE PRINCIPAL UNDER SECRETARY.

Department of Lands,  
Sydney, 18 February, 1868.

SIR,

In drawing your attention to the notice in the *Government Gazette* of the 14th instant, respecting the confirmation of the line of road from Long Cove to Lyons' Road, being a deviation from the road from the Abattoir Road near Glebe Island to the Great Northern Road near Gladesville, in lieu of a portion of the road confirmed by *Gazette* Notice of 1 December, 1864,—I am directed to request that you will have the goodness, at the end of forty days from the date thereof, to state whether any claims to compensation have been made in respect of the said road, in pursuance of the notice referred to.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 84a.

## INDORSEMENT BY THE SURVEYOR GENERAL ON No. 81.

I CANNOT recommend any further compensation ; the road was laid out in accordance with the existing occupation, by Mr. Wright on one side and Mr. Lyons on the other, of a reserved road 50 links wide, which road was widened to one chain, and compensation paid to Mr. Lyons. Mr. Lyons now claims that Mr. Wright had enclosed the reserved road, and that the whole width is taken from his property. This I am not prepared to admit ; but, even if it should prove to be the case, Mr. Lyons can have no claim on the Crown for compensation, although he might succeed in opening the road enclosed by Mr. Wright. But, having accepted compensation from Mr. Wright already, I do not think he could press the matter.

The public interest would not be affected or advanced by the change ; in fact, as the road has been cleared, it would be better to let the matter stand as it is.

(For the Surveyor General),  
P. F. ADAMS,  
21 Feby.

Approved.—J.B.W., 22 Feby.

No. 84b.

## No. 84b.

THE UNDER SECRETARY FOR LANDS to SAMUEL LYONS, Esq.

Department of Lands,  
Sydney, 5 March, 1868.

SIR,

Referring to your letter of the 15th January last, in which you apply for a further allowance for compensation for your loss sustained by the passage through your property of the road from the Balmain Road to the Great North road, I am directed by the Secretary for Lands to inform you, that beyond the allowance of the kind already made in your favour, it is considered that you are not entitled to further compensation in the matter.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 85.

SAMUEL LYONS, Esq., to THE SECRETARY FOR LANDS.

No. 227, George-street,  
23 March, 1868.

SIR,

In acknowledging the receipt of your letter of the 5th instant, I beg respectfully to place the following facts before you, in support of my claim contained in my letter to you under date 13 January last.

The road laid out by my brother and myself was not a public road. It was agreed upon solely for our joint benefit, and was intended to lead to a private wharf—each brother contributing half the land; my brother conveying to me by deed his contribution, and I in like manner conveying to him my half. This road Mr. Wright by error enclosed in his boundary wall and has since paid me for. I now ask for compensation for that portion of the road that I have not been paid for, having been paid for part, the whole of the road having been taken from my freehold.

I have, &c.,  
SAMUEL LYONS.

Surveyor General.—M.F.—B.C., 28 March.

## No. 86.

THE PRINCIPAL UNDER SECRETARY to THE UNDER SECRETARY FOR LANDS.

Colonial Secretary's Office,  
Sydney, 30 March, 1868.

SIR,

In reply to your letter of the 18th ultimo, No. 18, I am directed to state, for the information of the Secretary for Lands, that no applications have been received in this office for compensation in respect to the line of road from Long Cove to Lyons' Road, being a deviation from the road from the Abattoir road near Glebe Island to the Great Northern Road near Gladesville, in lieu of a portion of the road confirmed by *Gazette* Notice of 1st December, 1864.

I have, &c.,  
HENRY HALLORAN.

## No. 87.

INDORSEMENT BY THE SURVEYOR GENERAL ON No. 85.

MR. L. S. HUNTLEY is requested to report on the facts in this case, with the view of determining whether Mr. Lyons has any right to claim a further portion of the road as his land.

P. F. ADAMS,  
B.C., 20 May.

## No. 88.

THE COUNCIL CLERK, BALMAIN MUNICIPAL COUNCIL, to THE SECRETARY FOR LANDS.

Balmain Municipal Council,  
1 June, 1868.

SIR,

I have the honor, by direction of this Council, to respectfully call your attention to the following resolution, passed at a general meeting of the Council on the 19th day of May last.

Resolution

40 PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK.

Resolution, as per Minute Book :—

“ That, with a view to understand the cause of the delay in opening the road from Hunter's Hill to Sydney *via* Five Dock and Balmain, this Council appoint a Committee, consisting of the Mayor, Aldermen Booth, Elliott, and Robinson, to wait upon the Honorable the Secretary for Lands, to ascertain the wishes of the Government upon the subject, explain the position of the Municipality with respect to it, and report to this Council.”

The Honorable the Secretary for Lands will favour by appointing a day to receive the Committee named as in the foregoing.

I have, &c.,  
HENRY CATT,  
Council Clerk.

## No. 89.

MR. SURVEYOR HUNTLEY to THE SURVEYOR GENERAL.

Bell's Chambers, 171, Pitt-street,  
Sydney, 1 June, 1868.

SIR,

In reply to your blank cover dated 20th May, 1868, I have the honor to place the following facts before you for your consideration in this case :—

- 1.—The road in question passes through lot 104 of the original subdivision of Harris' acres.
- 2.—This lot 104 was left to two brothers—George Joseph, and Samuel, Lyons—and in deed of partition, and also in separate descriptions of the two brothers' properties, provision is made for the beforenamed road.
- 3.—G. J. Lyons being in England, S. Lyons acting for self and brothers, subdivided both properties, and on many lithographs still extant this and many other roads are shown. Mr. William Wright purchased the whole of G. J. Lyons' share of original lot, and erected a substantial stone wall along his boundary on the lines shown by the pegs then placed by the surveyor employed by Mr. Samuel Lyons to subdivide both properties.
- 5.—Some years after this, Mr. Lyons claimed compensation for the loss of the road said to be enclosed by Mr. Wright, which the latter gentleman resisted, and justly, as the verdict and judgment of the Supreme Court show.
- 6.—It was proved during the trial, which occupied the Court during the 18th, 20th, and 21st February, 1867, that each held, exclusive of road as at present existing, 10 acres more ground than described—the difference between the two areas being only 7 perches—and moreover, the very pegs indicating the road, and placed there by Mr. Lyons, or his agent the surveyor, were found and identified.
- 7.—A new trial being granted, Mr. Wright paid Mr. Lyons £120, and obtained from the Land Titles Office an amended title and description on the diagram, on which a road is shown throughout the entire length of Mr. Wright's southern wall.

I have, &c.,  
A. S. HUNTLEY.

I HAVE seen the copy of deed granted to Mr. Wright at Land Titles Office, and according to that deed there is a road 50 links wide outside Mr. Wright's land. It is for part of this road that Mr. Lyons claims compensation. As the question has been thus decided at the department referred to, where it was, I believe, thoroughly investigated, I cannot recommend any further compensation to Mr. Lyons.

ROBERT D. FITZGERALD,  
(For the Surveyor General),  
25 June, 1868.

## No. 90.

THE UNDER SECRETARY FOR LANDS to SAMUEL LYONS, Esq.

Department of Lands,  
Sydney, 3 July, 1868.

SIR,

Referring to your letter of the 23rd March last, in which you allude to your claim to compensation for half the area of the road to Gladesville passing between your lands and the property of Mr. Wright, I am directed by the Secretary for Lands, to inform you that, after a consideration of the circumstances of the case, and the fact that the deeds granted to Mr. Wright at the Titles to Lands Office show that a road 50 links wide exists outside that property, your claim cannot be entertained.

I have, &c.,  
MICHL. FITZPATRICK.

## No. 91.

PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK. 41

No. 91.

THE SURVEYOR GENERAL to MR. LICENSED SURVEYOR KNAPP.

Surveyor General's Office,  
Sydney, 26 August, 1868.

SIR,

The Road from Long Cove to Lyons' Road, being a deviation in the Road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, having been confirmed as a parish road by Notice dated 14th February, 1868, folios 448 and 474 in the *Government Gazette* of 14th February, 1868,—I have to request that you will, as early as may be convenient, proceed to formally open the road.

In carrying out this instruction you will give notice, either verbally or in writing, to the proprietors of any enclosed lands through which the road passes, and suggest to them the desirability of their removing any fences or other obstructions which may exist; and you will then proceed along the road for the purpose of re-marking it in those places where the previous marking may have become obliterated.

Should the parties to whom you may give notice not remove the fences or other obstructions, you will summarily remove them; and in doing so you will be guaranteed from loss by action by the Government.

You will be good enough to report the fulfilment of this instruction.

I have, &c.,

ROBT. D. FITZGERALD.  
(For Surveyor General.)

No. 92.

MR. LICENSED SURVEYOR KNAPP to THE SURVEYOR GENERAL.

No. 131, Pitt-street, Sydney,  
3 September, 1868.

SIR,

In conformity with your instructions, dated 26th August, 1868, (Roads, Bridges, and Ferries,) I have opened the Road from Long Cove to Lyons' Road, being a deviation in the Road from the Abattoir Road near Glebe Island to the Great North Road opposite Gladesville, which was confirmed as a parish road by a Notice dated 14th February, 1868, in *Government Gazette* of the 14th and 18th February, 1868.

I have, &c.,

EDWARD J. H. KNAPP.

No. 93.

MR. LICENSED SURVEYOR KNAPP to THE SURVEYOR GENERAL.

No. 131, Pitt-street, Sydney,  
8 September, 1868.

SIR,

Having received from Mr. Charles Abercrombie a summons to attend next Friday, the 11th September, at the Central Police Court, to answer a complaint laid against me for pulling down his fence on Lyons' Road, Five Dock, which I removed in conformity with your instructions of 26th August, 1868, (Roads, Streets, Bridges, and Ferries,) I respectfully request that legal assistance may be rendered me in this case.

I have, &c.,

EDWARD J. H. KNAPP.

It is recommended that in this case which is simply one of removal of fencing to open a road, this defence should be entrusted to the Crown Law Officers.

ROBERT D. FITZGERALD.

(For the Surveyor General.)  
8 Sept.

Approval.—J.B.W., 9 Sept.

Crown Solicitor.—M.F., B.C., 10 September, 1868.

42 PROPOSED ROAD TO GLADESVILLE *via* BALMAIN & FIVE DOCK.

No. 94.

THE CROWN SOLICITOR to THE UNDER SECRETARY FOR LANDS.

Crown Solicitor's Office,  
Sydney, 11 September, 1868.

SIR,

I have the honor to return to you the accompanying papers relative to the opening of the parish road (deviation), Long Cove to Lyons' Road, and to state that I attended at the Police Court this morning for the purpose of defending Mr. Knapp, who had been served with a summons, at the instance of Mr. Abercrombie, charging him with destroying fencing, when Mr. Abercrombie withdrew his charge, stating that he had arranged the matter with the Honorable the Minister for Lands.

With reference to the appointment of Mr. Knapp, I would beg to suggest that in future all letters deputing the power of the Surveyor General to open roads, &c., should be signed by the Surveyor General himself. The Roads Act authorizes the Surveyor General to appoint persons for such purposes, and I think he cannot delegate the power to make such appointment to another person.

I have, &c.,  
JOHN WILLIAMS.

At a private interview with Mr. Caird and Mr. Abercrombie, I stated that there was no wish on the part of the Government to interfere with the slip-rails on this road, until the traffic was of sufficient importance to demand its being cleared.

J.B.W.,  
24 Sept., 1868.

Surveyor General.—M.F.—B.C., 14 Sept., 1868.

# WINDERMERE FORD.

(REPORT IN REFERENCE TO.)

---

*Ordered by the Legislative Assembly to be Printed, 6 January, 1869.*

---

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 15 December, 1868, That there be laid upon the Table of this House,—

“ A copy of the Report of Mr. Licensed Surveyor Maitland,  
“ on the proposed proclamation of Windermere Ford.”

(*Mr. Burns.*)

---

## WINDERMERE FORD.

---

MR. LICENSED SURVEYOR MAITLAND to THE SURVEYOR GENERAL.

Maitland, 3 June, 1868.

SIR,

Referring to your instructions herein, of the 13th September, 1867, of the 14th October, 1867, and 28th October, 1867, I do myself the honor to represent that, being well acquainted with the uncertainty of these crossing-places, I have delayed my report until in a position to do so with some degree of accuracy.

2. The flood of 1867 utterly destroyed the crossing between Windermere and Luskintyre, so completely indeed that the proprietor of both estates has been obliged to keep his communication open by a raft of casks. For many years past this ford was believed to be *permanent*.

3. In September, 1867, the crossing-place at the end of Farrell's Lane was difficult (not impossible), and after the flood I crossed it repeatedly when it was not more than 15 inches deep. After a subsequent freshet it again was reported to be impassable. I have crossed it with about 2 feet 9 inches of water on it thrice within these last ten days.

4. The crossing-place to and through the Boiling-down has always hitherto been good, but the cost of fencing, &c., through the premises of the Mill and Boiling-down, would, I think, very considerably exceed the cost of making a *permanent* ford at the proclaimed crossing-place, not forgetting that the Boiling-down crossing-place may any day be destroyed.

5. As the Works Department are now about to put a permanent causeway at the Kaleudah crossing-place, I am of opinion that further action as regards the lower crossing-place at Farrell's Lane may with advantage be suspended for a short time longer—there being, properly speaking, little or no through traffic—and I think but about six families supply all the *local*——about whose transit (on sufferance), in case of necessity, I believe no difficulty has ever been made by the proprietors or tenants of the Windermere Boiling-down.

I have, &c.,

D. M. MAITLAND,  
Licensed Surveyor.

## BRIDGE OVER THE NEPEAN, AT PENRITH.

(PETITION—CERTAIN INHABITANTS OF EMU PLAINS.)

---

*Ordered by the Legislative Assembly to be Printed, 3 February, 1869.*

---

To the Legislative Assembly.

We, the undersigned Inhabitants and Landholders of Emu Plains and Penrith, pray that your House will be pleased to take into consideration the heavy local tax imposed on us by the demanding of tolls for crossing the Nepean River, by the Victoria Bridge. On a previous occasion, when it was requested that a station house for goods might be erected on Emu Plains, it was objected to by the Minister of Works, that the making of a sidling to the railway could be done only at a very great expense ; and we therefore pray that you will make the Victoria Bridge a free bridge, abolish the tolls, and place the inhabitants of Emu Plains in an equal position with other colonists, and give them free access to the nearest railway station without toll or other demand, and that your House will take the above premises into your favourable consideration.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## BRIDGES CONSTRUCTED BY LOAN.

(SCHEDULE OF.)

*Ordered by the Legislative Assembly to be Printed, 9 February, 1869.**Laid on Table in reply to Question No. 1. See Votes and Proceedings, No. 35, of Tuesday, 9 February, 1869.*

Name.	Where situated.	Year.	Cost.			
			£	s.	d.	
Menangle Bridge.....	Over the Nepean River, on Road, Campbelltown to Picton.	1854	2,000	0	0	Traffic, since opening of Railway, too trifling to pay for a toll.
Denison „ .....	Over Macquarie River, at Bathurst.	1855	11,000	0	0	Carried away by floods. Toll close to, at Kelso, for bridge.
Carcoar „ .....	Over River Belubula, at Carcoar.	1854	2,300	0	0	In a town.
Paddy's River „ .....	Over Paddy's River, on Great South Road.	1854	3,000	0	0	Tolls on both sides, at Hanging Rock and Wingello (about 5 miles on each side).
Gunning „ .....	At Gunning .....	1854	1,776	3	3	In a town.
Queanbeyan „ .....	At Queanbeyan .....	1854	6,103	2	8	In a town.
Jugiong „ .....	At Jugiong .....	1854	4,009	13	4	Toll placed on this bridge, but removed, as it was not sufficiently remunerative.
Union „ .....	Over Murray River at Albury .....	1858	*10,000	0	0	†Tolls let for £700 per annum.
Approaches, N.S.W. side.	Albury .....	1858				(£3,486 18s. 6d. paid from Revenue.)
Tumut Bridge .....	At Tumut .....	1861	2,399	19	0	In a town.
Royal Alfred „ (Iron)	Over the Murrumbidgee.....	1862	20,000	0	0	} Tolls let for £547 per annum.
and Approaches ...	At Gundagai.....	1862	16,000	0	0	
Deniliquin Bridge ...	Over the River Edward, at Deniliquin.	1862	7,000	0	0	The placing a toll on this bridge, under consideration. Until lately there was a private bridge close to it, which would have rendered a toll unremunerative.
Narrabri „ .....	Over the Namoi, at Narrabri .....		2,950	12	10	River fordable greater part of the year.
Bendemeer „ .....	At Bendemeer .....		9,140	0	0	£6,000 from Loan Vote; £3,140 from General Revenue. River fordable greater part of the year.
Pitnacree „ .....	Over the Hunter, at Pitnacree .....		11,294	0	0	Toll on Dunmore Bridge, within 2½ miles; and also, at Campbell's Hill and Morpeth Road.
Dunmore „ .....	Over the Paterson, at Dunmore.		7,125	8	6	Tolls let for £179 per annum.
Penrith „ .....	Over the Nepean, at Penrith .....		33,000	0	0	Estimated collection, £400 per annum.
Singleton „ .....	Over the Hunter, at Singleton .....		15,500	0	0	River fordable much nearer to the town, for greater portion of year. Toll would not be remunerative.
Abattoir „ .....	At Glebe Island .....		20,186	5	11	Toll, £648.

\* Paid by Victorian Government, £4,508 17s. 6d.

† Half net tolls, after paying for repairs of Bridge, paid to Victorian Government.

1868.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## RAILWAY TRIAL SURVEY BETWEEN BATHURST AND ORANGE.

(PETITION—CERTAIN INHABITANTS OF ORANGE.)

*Ordered by the Legislative Assembly to be Printed, 10 December, 1868.*

To the Honorable the Legislative Assembly of the Colony of New South Wales.

The humble Petition of the undersigned Inhabitants of the Town and District of Orange and its neighbourhood,—

SHEWETH:—

That your Petitioners are deeply impressed with the vast importance to their district of railway communication with Bathurst and the metropolis, for the development of its rich mineral and agricultural resources, as well as to the trading and agricultural community resident in such district.

That your Petitioners accept the modern idea,—that the development of the prosperity of any country mainly depends on the formation of Railways through its length and breadth; and, whilst observing the fact that a trial survey is progressing from Goulburn towards the South, regret that no beginning has yet been made in the trial survey from Bathurst towards Orange and the West.

That Orange being one of the finest agricultural districts of the Colony, is capable of producing a very large quantity of wheat and flour for the metropolitan market, but the cost of carriage by the common roads renders it unprofitable, and retards production. Six copper mines have been opened, and other lodes are known to exist in the vicinity, with marble, slate, and stone quarries, and that nearly all the wool from the West passes through the town of Orange.

Your Petitioners, therefore, believe the prosperity of the country would be considerably improved by advancing the Railway to the West.

That at a meeting of the inhabitants of the town and district of Orange, held at the Court House, Orange, on Wednesday the 23rd of September, 1868, resolutions in support of the foregoing views upon the subject of a trial survey from Bathurst to Orange and the West, and the great necessity for its immediate prosecution, were passed; and it was resolved that a Petition, signed by the inhabitants, should be presented to your Honorable House.

Your Petitioners, therefore, humbly pray that your Honorable House will be pleased to take steps for the promotion and immediate prosecution of a trial survey between Bathurst and Orange, and the West, as to your Honorable House shall seem fit.

And your Petitioners will ever pray, &c.

[Here follow 280 Signatures.]

1868.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## DISEASE IN GRAPE VINES.

(REPORT FROM CHARLES MOORE, Esq., BOTANICAL GARDENS, ON "OIDIUM TUCKERI.")

*Ordered by the Legislative Assembly to be Printed, 16 December, 1868.*

THE DIRECTOR, BOTANIC GARDENS, to THE UNDER SECRETARY FOR LANDS.

Botanic Gardens,  
12 December, 1868.

Sir,

Having now acquired every possible information relative to the mildew which has this season so very seriously attacked the vines in many parts of the Colony, I do myself the honor to furnish the following report on the subject, for the information of the Government.

The mildew in question is, I regret to say, after the most careful examination which I have been able to give to it, that form of disease called *Oidium Tuckeri*, which, according to Professor Berkeley, is an immature state of the genus *Erysiphe*. This fungus was first observed in England about the year 1845, upon vines cultivated under glass, and proved most destructive, until a Mr. Tucker, a gardener near Margate, prevented its ravages by the application of sulphur, which previously had been applied with great success for the cure of mildew on peaches, &c. This simple remedy having proved very efficacious, Professor Berkeley named the fungus after the discoverer. The disease, some time after this, attacked the vines in the Gardens at Versailles, near Paris, and rapidly made its way through Spain, Portugal, Italy, Hungary, Switzerland, and the Rhine, where its effects were much slighter than elsewhere, due, no doubt, to the absence of great heat, and the dry situation of the vineyards. It afterwards extended to Algeria, Syria, Cape of Good Hope, and other countries. In Madeira, where it is said nothing was done to stop its progress, it destroyed vast numbers of the vineyards, and nearly put an end to the production of the celebrated Madeira wine. The disease is still very prevalent in many parts of the south of Europe, particularly in the sherry-producing districts of Spain (as I noticed last year), but in other places where it had been very general it is gradually disappearing. In Portugal, it appears by late accounts, the extensive vineyards in the Upper Dauro are this year entirely free from it, and this for the first time since 1851. Although it has only now been clearly determined that the disease affecting the vines in this Colony is the same as that which caused such havoc in Europe, yet there is no doubt it has existed in a slight form, in some vineyards on the eastern coast, for nearly three years past. So far as I can learn, Mr. Coxen of Queensland was the first to notice this pest in Australia. In the summer of 1866, that gentleman forwarded to me, through Dr. Bennett, specimens of some leaves from his vineyard, which were attacked by an unknown fungoid disease. As the fungus on these leaves was new to me, I took the specimens with me to Europe, but unfortunately, on the passage thither the leaves had become so dried and brittle that the fungus on them was scarcely apparent, and no distinct opinion could be pronounced concerning it. It is now known, however, that this was the first indication of *Oidium* in this quarter of the globe. In March last, I was requested to examine the vineyard of a Mr. Tourle, near Waratah, Hunter River, and in my report to the Government on that occasion I stated that the vines which I had examined were affected by a form of *Oidium*, and advised that they should be carefully watched during this season, so as to check the disease, should it again appear. This precaution, however, has not had the desired effect, as, with the approval of Mr. Secretary Forster, and at the request of Mr. John Wyndham, of Dalwood, I, in company with that gentleman, lately examined Mr. Tourle's and other Waratah vineyards, as well as that of Mr. Scobie, near Maitland, in all of which the disease prevailed to an alarming extent. Since that time, I have had specimens of vines affected with the disease sent to me from many other quarters. It is now known to have attacked the vines on the Clarence, to be very general on those about Sydney, Gladesville,

Ryde, Parramatta, Prospect, Nepean Towers, and in Illawarra, where it appeared last season, in the garden of Mr. Kirtain, of Keira Vale, whose vines are now almost destroyed by it. I have consulted every available authority relative to this matter, and the following extracts supply the best information which I have been able to discover on the subject. In a paper by J. H. L  veill  , D.M., translated from the French by the Rev. Professor Berkeley, it is said, that

"The plants on which the mould *Oidium Tuckeri* is developed present the same appearance as others, except that the shoots of the year, the leaves, bunches, berries, and stamens, in a word all the diseased parts, are covered with a very thin, white, pulverulent down, which is visible at some distance, and which diffuses a very perceptible mouldy smell. It forms on the leaves white circumscribed spots, which resemble those of *Erysiphe*. This down, when examined under the microscope, is formed of slender, branched, articulated threads, which creep over the surface of the leaves. From different points of this primitive mycelium spring little, erect, straight stems, which are transparent, simple, and articulated, and which bear at their extremity three, four, or five oval or elliptic simple hyaline spores, joined end to end like the beads of a necklace, and filled with extremely fine granules. These granules, when forced out by compression between two plates of glass, are spherical, transparent, and endowed with molecular motion.

"M. Decaisne and myself have made vain efforts to discover, under the epidermis, the least trace of mycelium upon the grapes, the vine-leaves, and on the branches, when beginning to be diseased. We have satisfied ourselves that all the phases of the vegetation of the *Oidium* take place on the surface. The tissues are first affected, and when a white spot begins to appear, however minute it may be, the mould is developed. If the finger is simply passed over it, it disappears; and if we examine the spot with a lens, we see at the point which it occupied, and around it, where no malady was suspected, extremely minute black or brown specks, upon which the mould is successively developed. The parenchym which corresponds with these specks is equally brown, and less filled with juice than that which surrounds it. If at this time it were covered with or traversed by mycelium, one ought to find it; but this is not the case.

"At a later period, the epidermis is frayed, the parenchym dries up, and, after having lived some time, the fungus disappears.

"When the stalk is diseased through its whole extent, the grapes entirely perish; when the malady attacks the berries in the first stage of their development, they dry up or fall; if, on the contrary, they have acquired a certain size, they are able to resist it; some crack, split, and expose their seeds; others are deformed and arrive at maturity, but they never acquire the size which they would have done had they not been diseased.

"Like fruits which have been punctured by insects, they appear to me to ripen before other grapes; but they are rather fleshy than succulent, and they are almost destitute of flavour.

"M. Duchartre, Professor of the Agronomie Institute of Versailles, in a report addressed to the Minister of Agriculture and Commerce, on the means of combating the effects of the fungus which attacks the vines, said:—'I am to-day happy in being able to announce to you that the treatment to which the diseased vines have been submitted has given excellent results, and that henceforth we may flatter ourselves with being able to combat it with success whenever it may appear.'

"The remedy employed by Duchartre consists in dashing over the diseased vines, by help of a garden syringe pierced with rather large holes, water in which flowers of sulphur are held in suspension. This simple, inexpensive means, by common consent, has been most successful. The employment of sulphur in this form had already been recommended by Mr. Kyle, an English agriculturist, who had discovered its properties. These advantages cannot be called in question.

"If we wish to prevent, not the ravages but the development of this fungus, we must not allow ourselves to be taken by surprise, but commence from the beginning at the moment of flowering, on the first symptoms of the disease, and not when it is generally dispersed, for then it has produced its effects, and it is difficult to appreciate the advantage of the means we have employed."

Referring to these views of L  veill  , the Rev. Professor Berkeley makes the following observations:—

"It is curious that, with respect to the vine disease, the majority are in favour of the fungal theory; and my friend Dr. L  veill   is almost alone on the other side. It is not to be denied that his arguments are extremely plausible, and that there is much in his observations that is worth attentive consideration, but I cannot always admit his data. It may be true that neither he nor M. Decaisne, of whom no botanist will speak without the greatest respect and self-distrust, have been able to detect mycelium within any part of the plant; but it is no less true that myself and Mr. G. Hoffman have seen it most distinctly, and that the figure given in the *Gardeners' Chronicle*, in November, 1847, was drawn from specimens lying on the field of the microscope, in which the growth through the stomata was as evident as that of *Botrytis infestans* through the stomata of the potato.

"I do not for a moment doubt the correctness of a single observation of Dr. L  veill  , so far as it goes; but the circumstances under which disease of all kinds is propagated are so extremely variable that it is impossible to come to any conclusions, from the simple fact of certain individuals escaping where others are attacked; and it is very easy to conceive that where the attack proceeded from within the tissues, as in this case, if I am correct in my observations, the injury would be greater than where the fungus was propagated secondarily on external surfaces from fallen spores.

"It is very possible that, while superficial, it may do no further harm than clogging

clogging up the superficial pores, and hindering the due access of light and air, and that it is only directly destructive where it enters the tissue through the stomata; but this, of course, is mere conjecture.

"As sulphur is the well-ascertained cure of the fungus to which peach mildew is due, it is only natural to conclude that the cause is somewhat similar in grape mildew, where the effect is equally beneficial.

"Salt was not found efficacious in England; and where sulphur is used, except in the form of vapour, it must be used in substance, as it is insoluble in water.

"How it acts upon the mould is not known, but doubtless some decomposition takes place, and, where used in combination with lime, the sulphate of lime may act as a stimulant to the vegetative powers. Possibly a combination of quick-lime and Glauber salts, as recommended with such great benefit in the case of Bunt, might be an improvement on the methods hitherto practised."

The next extracts are taken from a paper on Grape Mildew by Professor Von Mohl, a distinguished German botanist, whose views as to the cause and effect of the *Oidium* are in unison with those of Dr. Léveillé. Professor Von Mohl remarks:—

"With respect to *Oidium Tuckeri*, the difficult question arises whether the fungus is the cause or consequence of the disease. Were the fungus an entophyte—did it arise from a visible demonstrable alteration of the contents of the cells—did it break out from within the plant to its external surface—the latter position might be considered as proved. The contrary, however, of all these things is the case. Not the slightest trace can be discovered of any disease of the vine anterior to the appearance of the fungus, which creeps over the cuticle of the plant, does not protrude into its tissues, and much less arises within previous to bursting forth into the free air.

"These circumstances make it probable that the fungus first affects the plant on which it grows by decomposing the juices of the superficial cells, and impeding their growth, in the same way in which *Achlya prolifera* injures aquatic animals on which it grows, and as *Merulius destructor* produces decay in dead wood.

"Many experiments also seem to prove that the course of the disease is to be found in the fungus, according to which, the further diffusion of the evil is greatly repressed by the removal of the first affected shoots.

"The indisputably contagious character of the disease is also explained only by the fact that fungus causes the malady, for it is easily imagined how the slightest breeze may carry the innumerable quantity of spores it produces.

"The appearance which the diseased vines present is as follows:—The spots on the green bark of this year's shoots, on which the fungus has begun to vegetate, are discernible by a faint cloud in their green tint, before the fungus itself is visible to the naked eye. The fungus consists at this time of minute, extremely delicate threads, visible only through a good lens, resembling those of a spider, which creep on the cuticle, forming an irregular web. The bark has assumed, in the spots which are attacked, a somewhat deeper tint; those spots soon increase in diameter as the disease spreads, become confluent, and change, in consequence of the death of the superficial cells, into a chocolate brown. Microscopic observations show that the depravations of the juices which produce this change of colour, and the death of the diseased cells, is confined to the most superficial strata, while those which lie deeper, as well as the wood, remain perfectly sound. Under these circumstances, the malady, as far as it attacks the branches, seems a very unimportant evil, and there is no danger of the death of the vines which are attacked, inasmuch as the internal coats of the bark must, in the natural course of things, be dried up in the ensuing autumn and winter, and thrown off during the next year. The fungus exercises a still smaller influence on the leaves than on the branches; at least I could not remark, even in those vines which were thickly covered with the fungus to the very tips of the shoots, that vegetation of the leaves was really affected.

"As regards the fruit, the case is far otherwise. Here also only the extreme layer of cells at first suffers under the attack, while the inner parts of the fruit—as far, at least, as may be concluded from microscopic observation—remain perfect. The appearances which the affected berries exhibit differ much according to the time which has elapsed since they were infested, the greater or less vigour of the fungus, &c. When the fruit is sharply attacked, and at a time when it has arrived at about half its growth, or when it is scarcely so large, since the outer diseased skin cannot keep up with the expansion of the juicy parenchym, it splits longitudinally into many lobes, so that the seeds, which are more or less perfectly developed, are exposed, as in the ruptured capsule of an *Euonymus*. These fissured berries seem, under all circumstances, incapable of further development; they remain small, although they hang on the vine till late in the autumn, and seem at last to dry up or rot; at least, I saw in none any symptoms of becoming ripe. On the contrary, if the fruit is attacked towards autumn, when already it is much advanced in its development, the influence of the fungus is too weak to prevent the production of ripe, perfect, normal fruit, even when the stalks of the berries are thickly overrun with its threads. Between these two extreme cases, a number of intermediate conditions naturally occur, in which the berries do not crack, but are arrested in their growth, and never ripen or become profitable. It is a natural question,—what will be the condition of the disease in future; is it transitory, brought on and favoured only by accidental and temporary circumstances; or, is it a durable evil; and what remedy, in this case, can be administered for the warding off, or diminution of the malady? We are treading here on dangerous ground, for it is notorious how little, for the most part in epidemic diseases, science is in a condition to answer such questions; and the potato murrain affords a lamentable instance amongst vegetable epidemics, how little the numerous solutions of the difficulty—and these frequently given with no less confidence than imperfect knowledge—serve for the removal of the evil.

"The

"The question as to the future condition of the malady—whether it will extend step by step to the districts which at present are uninfected—is, from the very nature of the case, perfectly incapable of answer. The prospects afforded by its previous history are by no means comfortable. We have to contend with an enemy against which, as regards its diffusion, we are perfectly powerless, since every breeze may bring thousands of its microscopic germs from an infected district to one which is at present untainted. Nor less is any notion of the destruction of the fungus on the diseased vines, by washing, fumigation, &c., in places where vines are extensively cultivated, completely out of the question.

"Under these circumstances, there remains only the by no means powerful consolation that, as in analogous diseases produced by other fungi, even though it may not entirely vanish, it may be expected to be at all widely extended, and consequently, decidedly injurious, only in certain years."

From Chambers' Encyclopædia, vol. x, Supplement, in which there is a microscopic representation of the fungus, which has been copied, and is now being lithographed, by direction of P. F. Adams, Esq., Surveyor General:—

"*Oidium Tuckeri* makes its appearance at first in the form of a mycelium of webby, creeping, branching filaments, which send out upright or decumbent jointed stems. The bead-like joints at the stems become successively filled with spores, which are finally discharged in little clouds for the multiplication of the species. The disease is first perceived in the leaves, which become whitish, in consequence of a mycelium spreading over the upper surface of the leaf. The leaves sometimes curl up, or they become black at the centre, the blackness extending towards the circumference, and finally they drop off. The plant, through loss of its leaves, now becomes more unhealthy, the shoots are attacked by the disease, the stalks of the bunches of grapes, and the grapes themselves. The parasite penetrates into the young wood, the shoots are covered with spots and blotches of a reddish brown, or even black colour, and look as if a red-hot iron had been applied to them. Sometimes they secrete a clammy, inodorous fluid, all over their surface; and in many cases they wither from the top down half their length. The affected grapes very often first exhibit the disease in a single whitish spot on a single grape on a bunch, which enlarges by radiating irregularly. If in a bunch there is one abortive grape, it often shows signs of the disease, whilst the rest remain free. The creeping branches of the mycelium are fixed upon the skin of the grape by rootlets, which do not penetrate into the juicy pulp. The mycelium sends up vertical fertile branches of nearly equal height, densely aggregated, and forming a velvet-like mass. The extremities of these become beaded, and at last the uppermost cell or bead increases in volume, becomes detached, and is carried off by some slight breath of air, to multiply the species by the dispersion of its spores. The other bead-like cells follow in succession.

"Various means have been resorted to for the prevention and cure of the grape disease. The application of pulverized sulphur has been found useful, the fungus withering and drying up when brought into contact with a minute particle of sulphur. The application of sulphur must be frequent, as portions of the mycelium and some of the spores always escape. The use of sulphur has been the chief means of checking the spread of *Oidium* in French and other European vineyards; it is now general in the south of France and in Italy; and, in consequence of its national importance, the duty on sulphur has been reduced by the French Government. Hydrosulphide of lime has also been applied to vines with very beneficial effect. It is prepared by thoroughly mixing sixty-eight ounces of flowers of sulphur with the same quantity of slaked lime, adding three or four quarts of water, boiling for about ten minutes, allowing it to settle, and decanting the clear liquor. When it is to be used, one quart is mixed with 100 quarts of water, and it is poured over the vines."

These extracts from such eminent authorities, will suffice to show the nature and character of the *Oidium* disease in Europe; and, so far as my information and observations have extended, these descriptions agree in every respect with the form which the disease has assumed here. To the superficial observer this may be readily known by the parts subject to be attacked, the young ward-leaves and fruit showing a light grey, pulverulent or mealy appearance, which becomes in time floccose or cottony. In either condition it is easily rubbed off. The effect is, the outer tissue becomes decomposed, and the respiratory organs destroyed; the young wood appears as if it had been eaten by a grub; the leaves dry, curl up, and fall off; and the fruit ceases to enlarge, shrivels, and hardens, or splits and is rendered useless for any purpose. It does not follow, however, that these bad effects are general. In some cases the disease may attack vines without destroying either the leaves or the fruit. I observed vineyards in Spain with the fungus very noticeable upon the plants, yet from which the ripe fruit was being gathered. The remedies mentioned by the authorities quoted are all that can be relied on. The sulphur, when in a dry state, should be used by means of a bellows made for the purpose; but when employed in any condition in a fluid state, a common garden syringe is the only instrument necessary. I have a very strong impression that any application of sulphur, if adopted in time and properly used—not once, but frequently if necessary—will both save the plants from present further injury and prevent them from being again attacked.

I have the honor to be,

Sir,

Your most obedient servant,

CHARLES MOORE.

## GRAPE DISEASE (OÏDIUM TUCKERI).

(PETITION—PROPRIETORS OF VINEYARDS, AND OTHERS, ILLAWARRA.)

---

*Ordered by the Legislative Assembly to be Printed, 20 January, 1869.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Proprietors of Vineyards in the Town and neighbourhood of Illawarra, and others interested in the production thereof,—

RESPECTFULLY SHEWETH :—

That the growth of the Vine, and the production of Wine, have become of great social and commercial importance to the Colony, as shewn by the last Statistical Returns. Upwards of 2,000 acres are now under cultivation, yielding 285,283 gallons of Wine, and 700 tons of table Grapes, of an annual value of £70,000.

Your Petitioners are aware that the disease known as “Oïdium Tuckeri” has made its appearance in this Colony ; and, through carelessness and negligence in applying the remedies to prevent its further spread, is daily increasing ; and likely, if not properly and speedily checked, to cause the utter destruction of their Vineyards, as was the case in Madeira, the Cape, and the South of France.

Your Petitioners, therefore, pray that your Honorable House will meet this imminent danger with the least possible delay, by passing an Act to cause the application of Sulphur, or other approved remedies, to be made compulsory, where the Vines are infected with the disease.

And your Petitioners, as in duty bound, will ever pray.

The Petition of the undersigned Proprietors of Vineyards in the District of Central Cumberland, and others interested in the cultivation of the Vine in New South Wales,—

RESPECTFULLY SHEWETH :—

That the growth of the Vine, and the production of Wine, have become of great social and commercial importance to the Colony, as shewn by the last Statistical Returns. Upwards of 2,000 acres are now under cultivation, yielding 285,283 gallons of Wine, and 700 tons of table Grapes, of an annual value of £70,000.

Your Petitioners are aware that the disease known as “Oïdium Tuckeri” has made its appearance in this Colony ; and, through carelessness and negligence in applying the remedies to prevent its further spread, is daily increasing ; and likely, if not properly and speedily checked, to cause the utter destruction of their Vineyards, as was the case in Madeira, the Cape, and the South of France.

Your Petitioners, therefore, pray that your Honorable House will meet this imminent danger with the least possible delay, by passing an Act to cause the application of Sulphur, or other approved remedies, to be made compulsory, where the Vines are infected with the disease.

And your Petitioners, as in duty bound, will ever pray.

## DISEASES IN GRAPE-VINES PREVENTION BILL.

(PETITION--CERTAIN INHABITANTS OF ALBURY AND COROWA.)

*Ordered by the Legislative Assembly to be Printed, 4 February, 1869.*

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Vineyard Proprietors and others of the Albury and Corowa Districts,—

HUMBLY SHEWETH:—

(1.) That your Petitioners, whilst acknowledging that some legislative action may be required to prevent the propagation of the Oidium, or Vine Disease, which appears to have manifested itself in the Coast Districts, have observed with surprise and alarm that the Bill brought before your Honorable House, with that object, by the Honorable Member for The Williams, is calculated, if passed into law, to inflict a serious injury upon the vine-growing interest.

(2.) That your Petitioners do not share in the exaggerated fears of Vignerons in the Metropolitan Districts, as to the effects to be anticipated in this locality from the said disease, should it even unfortunately happen to be introduced here. Firstly, the climate of the Upper Murray is too dry to favour the growth of fungoid parasites; secondly, the Oidium is seldom known to attack young vineyards; thirdly, the Vine-growers, as a body, in this portion of the Colony, are sufficiently watchful of their own interest to apply, immediately on the appearance of disease, those remedial measures now so well known, whilst they are also sufficiently experienced in vine culture to be able to detect the first symptoms of infection.

(3.) That no trace of Oidium Tuckeri having been yet discovered in the Upper Murray Districts, and very slight fears being entertained of its spreading to any great extent if introduced, your Petitioners submit that it would be unfair to compel them to pay for clearing diseased vineyards in other parts of the Colony.

(4.) That the scale of contributions and fees fixed by the Bill is exorbitantly high; that the penalties are unnecessarily heavy and numerous; that the Inspectors likely to be appointed to carry out the proposed law will in few cases be qualified by any experience to undertake their duties; that the restriction as to the number of days allowed for dressing a vineyard would operate harshly in Districts where labour is not always procurable, and where the materials and appliances for sulphuring are not immediately obtainable; that the proposal for placing vineyards in quarantine is both ridiculous and useless; that all these provisions, if enforced, would have but little or no effect in diminishing the risk of infection; but, on the other hand, would subject the Vine-growers to harassing and troublesome restrictions, and involve them in expenses which they could ill afford to pay from their present small profits.

(5.) Your Petitioners are of opinion that the Colony should be divided into Vine-growing Districts, and that the Vine-growers in each District should be permitted to elect their own Inspectors, and empowered to tax themselves by levying a small occasional rate during the existence of the disease. They can perceive no necessity for levying an annual contribution when the District is clean; and they consider that the sum to be raised in each District for providing proper inspection, &c., should be regulated according to the amount required for the purpose.

(6.) For the reasons set forth in the foregoing clauses, your Petitioners, therefore, humbly pray that your Honorable House will reject the Bill for preventing the propagation of the Vine Disease, now before Parliament; or will at least make such amendments and alterations therein as will fulfil the desires of your Petitioners.

And your Petitioners, as in duty bound, will ever pray.

## DISEASES IN GRAPE-VINES PREVENTION BILL.

(PETITION—PATRICK'S PLAINS.)

---

*Ordered by the Legislative Assembly to be Printed, 4 February, 1869.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Vine-growers residing in the District of  
Patrick's Plains,—

RESPECTFULLY SHEWETH :—

That your Petitioners view with feelings of alarm and distrust the provisions of a Bill to prevent the Diseases in Vines, which is now before your Honorable House.

That your Petitioners are of opinion that the proposed enactment, if passed into law, would seriously interfere with the interests of your Petitioners and of the Vine-growers of the Colony generally, by imposing unnecessary fetters on the hitherto free and untrammelled development of one of the most important and rapidly extending industrial pursuits in the Colony.

Your Petitioners beg respectfully to submit that, an efficient remedy having been discovered to check the development of the Oidium, and as the same has been generally applied in all those vineyards in the Colony wherever the disease has made its appearance up to the present time, no legislation is required to compel the Vine-growers of using this remedy.

Your Petitioners respectfully request that your Honorable House will take the above premises into consideration, and as in duty bound, will ever pray, &c., &c.

Singleton, 23 January, 1869.

## DISEASES IN GRAPE-VINES PREVENTION BILL.

(PETITION—CERTAIN VINEYARD PROPRIETORS, COROWA.)

*Ordered by the Legislative Assembly to be Printed, 9 February, 1869.*

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Vineyard Proprietors of Corowa, in Public Meeting assembled,—

HUMBLY SHEWETH:—

That your Petitioners, whilst acknowledging that some legislative action may be required to prevent the propagation of the Oidium or Vine Disease which appears to have manifested itself in the Coast Districts, have observed with surprise and alarm, that the Bill brought before your Honorable House with that object, by the Honorable Member for The Williams, is calculated, if passed into law, to inflict a serious injury on the vine-growing interest in this District.

That your Petitioners do not share in the exaggerated fears of Vignerons in the Northern Districts, as to the effect to be anticipated in this locality from the said disease, should it even unfortunately happen to be introduced here. The Vine-growers as a body, in this portion of the Colony, are sufficiently watchful of their own interests to apply, immediately on the appearance of disease, those remedial measures so well known, whilst they are also sufficiently experienced in vine culture to be able to detect the first symptoms of infection.

That no trace of "Oidium Tuckeri" having been yet discovered in the Upper Murray Districts, and very slight fears being entertained of its spreading to any great extent, if introduced, your Petitioners submit that it would be unfair to compel them to pay for cleaning diseased vineyards in other parts of the Colony.

That the scale of contributions and fees fixed by the Bill is exorbitantly high; that the penalties are unnecessarily heavy and numerous; that the Inspectors appointed to carry out the proposed law will in few cases be qualified by any experience to undertake their duties; that the restriction as to the number of days allowed for dressing a vineyard would operate harshly in Districts where labour is not always procurable, and where the materials and appliances for sulphuring are not immediately obtainable. That all these provisions, if enforced, would have little or no effect in diminishing the risk of infection, but on the other hand, would subject the Vine-growers to harassing and troublesome restrictions, and involve them in expenses which they could ill afford to pay from their present small profits.

## 2 DISEASES IN GRAPE-VINES PREVENTION BILL.—PETITION.

That your Petitioners would recommend that, in place of the proposed Bill, the following suggestions be adopted as a basis for legislation, for the prevention of the Vine Disease :—

- (1st.) That the Colony be divided into Vine Districts, and that the boundaries of the present existing Police Districts be adopted as boundaries of the Vine Districts.
- (2nd.) That in lieu of Inspectors, any three Vine-growers in such Districts shall, upon obtaining a Magistrate's order, be empowered to enter upon and inspect any vineyard in which the disease is supposed to exist; and if they are convinced that the disease is "Oidium," shall forthwith issue a written notice to the proprietor of such diseased vineyard, requiring him to adopt the recognized curative measures.
- (3rd.) That in the event of the proprietor of such vineyard refusing to comply with such order within fourteen days from the issue thereof, he shall be subjected to a penalty not exceeding ten pounds per acre, which penalty may be enforced by any Court of Petty Sessions.

That, for the reasons set forth in the foregoing clauses, your Petitioners therefore humbly pray that your Honorable House will reject the present proposed Bill for preventing the propagation of the Vine Disease, now before Parliament, or will at least make such amendments and alterations therein as will fulfil the desires of your Petitioners.

And your Petitioners, as in duty bound, will ever pray.

GEO. GRAY,  
Chairman of a Public Meeting of Vine-growers, held at  
Corowa, upon the 1st day of February, 1869.

## DISEASES IN GRAPE-VINES PREVENTION BILL.

(PETITION—JOHN WYNDHAM, AS CHAIRMAN OF THE HUNTER RIVER VINEYARD ASSOCIATION.

---

*Ordered by the Legislative Assembly to be Printed, 11 February, 1869.*

---

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the Members of the Hunter River Vineyard Association,—

HUMBLY SHEWETH :—

That your Petitioners, at a meeting of the body held at Maitland, on the 26th day of January, 1869, unanimously passed the following Resolution, viz. :—"That this Meeting is of opinion that the Bill which has been presented to the Legislative Assembly, for the prevention of the disease known as the *Oidium Tuckeri*, will be very prejudicial to the interests of the Vine-growers of the Colony, and respectfully requests that it be withdrawn."

That your Petitioners holding, as they do, about one-fifth of the whole of the vineyard, and represent a large proportion of the Vine-growers of the Colony.

Your Petitioners, therefore, humbly pray that your Honorable House would be pleased to take this Petition into your favourable consideration, and if the said Bill be not withdrawn, that your Honorable House will be pleased to reject the same; and your Petitioners will for ever pray.

Signed by order of the Meeting, on behalf of the members present.

JOHN WYNDHAM,  
Chairman.

## DISEASES IN GRAPE-VINES PREVENTION BILL.

(PETITION—BATHURST.)

*Ordered by the Legislative Assembly to be Printed, 18 February, 1869.*

To the Honorable the Speaker and Members of the Legislative Assembly, in Parliament assembled.

The Petition of the undersigned Vine-growers, Gardeners, and others interested in the cultivation of the Vine, resident in the District of Bathurst,—

HUMBLY SHEWETH:—

That your Petitioners have heard with alarm of the introduction into your Honorable House of a Bill intituled, "A Bill to prevent the propagation of the Disease in Vines known as Oidium and to make provision for the cure thereof."

Your Petitioners are of opinion that the Bill, should it be passed into law, through its restrictions and highly penal clauses, have the effect of deterring many persons engaged in the cultivation of the Grape-vine, and of causing many others to destroy vineyards already planted, thereby severely damaging an interest of growing importance containing elements of wealth and fast developing into a staple product.

That there are many other valuable products liable to diseases, for instance, the apple, the orange, the cabbage, wheat, lucerne, &c., &c., which, if neglected, will spread through whole districts, and to prevent which there has been no legislation yet. We know that, without such compulsion, growers find it to their interests to adopt curative or preventive means, and thus ensure a return for their labour; and we have not found, when Providence has favored the Colony with growing seasons, any scarcity of bread-stuffs, fodder, fruits, or vegetables, and we do not fear that the Vine-growers, if left to their own resources, will be less careful of their interests than the growers of any other products.

That many scientific and highly experienced persons, who know something of the nature of the disease, have expressed opinions that legislation for its prevention would be ineffectual, inasmuch as the disease is not confined to the Grape-vines, but attacks many other plants, even some growing wild in the bush, so that its eradication is simply a matter of impossibility; but to render the law effectual, even if the disease were confined to the Grape-vine, it would be necessary that every vine in the country should be frequently inspected, and such inspection would be impossible as vines are grown in nooks and corners unknown. Seeing, therefore, the uselessness and impracticability of the measure, we submit that it would be impolitic to encumber the statute book with a law the only effect of which would be to create offices, the occupants of which in endeavouring to do their duty would but render themselves troublesome and obnoxious without any good results.

## 2 DISEASES IN GRAPE-VINES PREVENTION BILL.—PETITION.

That your Petitioners cannot learn that any such law is in force in any of the large Vine-growing European countries, although the disease has been long known to exist in them. Considering that grapes and wine are staple products of those countries, and the people must, of necessity, have great experience in the cultivation of the Grape-vine, the absence of any legislation for the prevention of the disease is evidence of its uselessness.

That your Petitioners have heard that a Petition, purporting to be from the Vine-growers of this district, in favour of the Bill has been presented to your Honorable House ; that the principal and largest Vine-growers here were not informed that such a Petition was in course of signature ; and that several who signed it now admit that they did so in ignorance of the nature of the Bill, and would, if they could do so, erase their names.

That your Petitioners believe that any legislation such as is proposed by the Bill now before your Honorable House would be useless, oppressive, troublesome, and highly mischievous in its effects, therefore—and believing that wine-growers will of their own accord, free from the terrors of the law, and for their own interests, adopt both preventive and curative measures when necessary—your Petitioners humbly pray your Honorable House will take the premises into your favorable consideration, and refuse your assent to the passing of the said Bill.

And your Petitioners, as in duty bound, will ever pray, &c.

[*Here follow 46 Signatures.*]

NEW SOUTH WALES.

DISEASES IN GRAPE-VINES PREVENTION BILL.  
(PETITION—HUNTER RIVER AND NEIGHBOURHOOD.)

*Ordered by the Legislative Assembly to be Printed, 18 February, 1869.*

To the Honorable the Members of the Legislative Assembly of New South Wales, in  
Parliament assembled.

We, the undersigned residents on the Hunter River and neighbourhood, Wine-growers and others interested in the cultivation of the Vine, beg respectfully to petition your Honorable House, that the Bill lately presented for the prevention of the disease known as Oidium Tuckeri may not become law, as we consider its provisions will be very prejudicial to the interests of the Wine-growers of the Colony.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 276 Signatures.]

## EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE LEGISLATIVE ASSEMBLY.

VOTES, No. 38. FRIDAY, 12 FEBRUARY, 1869.

13. Diseases in Grape-vines Prevention Bill:—Mr. Nowlan moved,—“That” this Bill be now read a second time.  
Mr. Mate moved, That the Question be amended, by the omission of all the words after the word “That,” with a view to insert the following words, viz.:—“this Bill be referred to a Select Committee for consideration and report, with power to send for persons and papers.”  
“(2.) That such Committee consist of the following Members, viz.:—Mr. Forster, Mr. Phelps, Mr. Smart, Mr. Tunks, Mr. W. Suttor, Mr. De Salis, Mr. Farnell, Mr. Lackey, Mr. Nowlan, and the Mover.”  
Debate ensued.  
Question,—That the words proposed to be omitted stand part of the Question,—put and negatived.  
Question then,—That the words proposed to be inserted be so inserted,—put and passed.  
Whereupon, Question,—(1.) That this Bill be referred to a Select Committee for consideration and report, with power to send for persons and papers;—  
(2.) That such Committee consist of the following Members, viz.:—Mr. Forster, Mr. Phelps, Mr. Smart, Mr. Tunks, Mr. W. Suttor, Mr. De Salis, Mr. Farnell, Mr. Lackey, Mr. Nowlan, and the Mover,—put and passed.

VOTES, No. 41. THURSDAY, 18 FEBRUARY, 1869.

4. Diseases in Grape-vines Prevention Bill (“*Formal*” *Motions*):—  
(1.) Mr. W. Suttor moved, pursuant to Notice No. 1, That the Petition presented by him, on the 17th February, from the Vine-growers and others from the District of Bathurst, against the Bill now before the House for the Prevention of the Diseases in Grape-vines, be printed, and referred to the Committee now sitting on the said Bill.  
Question put and passed.  
Ordered to be printed, and referred accordingly.  
(2.) Mr. Dodds moved Notice No. 2 (*as amended with the concurrence of the House*), That the Petition presented by him, on the 17th February, from 276 Vine-growers and others resident on the Hunter, against the passing of the “Diseases in Grape-vines Prevention Bill,” be printed, and referred to the Committee now sitting on the said Bill.  
Question put and passed.  
Ordered to be printed, and referred accordingly.

VOTES, No. 47, TUESDAY, 2 MARCH, 1869.

2. Member of Legislative Council as Witness:—Mr. Mate moved, That the following Message be carried to the Legislative Council:—  
MR. PRESIDENT,  
The Legislative Assembly having appointed a Select Committee “to consider and report upon the Diseases in Grape-vines Prevention Bill,” and that Committee being desirous to examine the Honorable Sir William Macarthur, Knight, Member of the Legislative Council, in reference thereto, requests that the Legislative Council will give leave to its said Member to attend and be examined by the said Committee, on such day and days as shall be arranged between him and the said Committee.  
*Legislative Assembly Chamber,*  
*Sydney, 2nd March, 1869.* Speaker.

VOTES, No. 58. FRIDAY, 19 MARCH, 1869.

2. Diseases in Grape-vines Prevention Bill:—Mr. Mate, as Chairman, brought up a Progress Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 12th February, 1869, together with Appendix.  
Ordered to be printed.

1868-9.

## DISEASES IN GRAPE-VINES PREVENTION BILL.

## PROGRESS REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on the 12th February last, the "*Bill to prevent the spread of Diseases in Grape-vines*,"—"*with power to send for persons and papers*,"—to whom were referred, on the 18th February,—"*the Petitions from the Vine-growers and others of the District of Bathurst, and from the Vine-growers and others resident on the Hunter, against the passing of the said Bill*,"—have agreed to the following Progress Report :—

Your Committee have obtained, from the witnesses named <sup>\*Charles Moore, Esq.,  
Director of the Botanic  
Gardens.</sup> in the margin,\* the valuable evidence herewith appended; but, owing <sup>P. F. Adams, Esq.</sup> to the late period of the Session when the Bill was referred to your <sup>P. L. Cloete, Esq.</sup> Committee for their consideration and report, they are unable to <sup>Jules Joubert, Esq.</sup> conclude the necessary inquiry and consideration of the Bill before <sup>S W. Macarthur, Knt.</sup> the close of the present Session.

Your Committee, therefore, are desirous of presenting to your Honorable House their Progress Report, and recommend the matter may be resumed the early part of the ensuing Session.

THOMAS H. MATE,  
Chairman.

No. 2 Committee Room,  
Sydney, 19 March, 1869.

## PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 17 FEBRUARY, 1869.

MEMBERS PRESENT:—

Mr. Mate,		Mr. Nowlan,
		Mr. Tunks.

Mr. Mate called to the Chair.

Printed copies of the Bill referred, on the Table.

Committee deliberated; and decided to examine Charles Moore, Esq., Director of the Botanic Gardens, and P. F. Adams, Esq., at next meeting.

[Adjourned to Wednesday next, at *Eleven* o'clock.]

WEDNESDAY, 24 FEBRUARY, 1869.

MEMBERS PRESENT:—

Mr. Mate in the Chair.

Mr. Nowlan,		Mr. De Salis,
Mr. Tunks,		Mr. Farnell,
Mr. W. Suttor,		Mr. Phelps.

Charles Moore, Esq. (*Director of the Botanic Gardens*), called in and examined.

Witness gave his opinion as to specimens of diseased cuttings and grapes submitted to him, and also produced work shewing microscopic drawings of various forms of mildew.

Witness withdrew.

Committee deliberated.

Motion made (*Mr. Nowlan*), and *Question*,—"That the Chairman be requested to move the House, that a Message be sent to the Legislative Council, asking leave for the Honorable Sir William Macarthur, Knight, M.L.C., to attend and be examined by this Committee,"—*agreed to*.[Adjourned to Friday next, at *Eleven* o'clock.]

FRIDAY, 26 FEBRUARY, 1869.

MEMBERS PRESENT:—

Mr. Mate in the Chair.

Mr. Nowlan,		Mr. Tunks,
Mr. Lackey,		Mr. Farnell,
Mr. Forster,		Mr. Phelps,
Mr. W. Suttor,		Mr. De Salis.

P. F. Adams, Esq., called in and examined.

Witness withdrew.

Committee deliberated.

Clerk directed to summon P. L. Cloete, Esq., and Jules Joubert, Esq., for next meeting.

[Adjourned to Tuesday next, at *Eleven* o'clock.]

TUESDAY, 2 MARCH, 1869.

MEMBERS PRESENT:—

Mr. Mate in the Chair.

Mr. W. Suttor,		Mr. Tunks,
Mr. Nowlan,		Mr. Lackey,
Mr. Phelps,		Mr. Smart.

P. L. Cloete, Esq., examined.

Witness withdrew.

Jules Joubert, Esq., called in and examined.

During his examination, witness read extracts from *Griffith's Micrographic Dictionary*.

Witness withdrew.

Committee deliberated, and decided that the next meeting of the Committee should be arranged by the Chairman.

[Adjourned.]

WEDNESDAY,

WEDNESDAY, 10 MARCH, 1869.

MEMBERS PRESENT :—

Mr. Mate in the Chair.

Mr. Nowlan,	Mr. W. Suttor,
Mr. Lackey,	Mr. Phelps,
Mr. Farnell,	Mr. Tunks.

Chairman read a letter from Jules Joubert, Esq., respecting remedies, &c., used in Europe, for curing vine diseases.

Ordered to be appended. (*Vide Appendix.*)

Committee deliberated.

Sir William Macarthur, Knight, M.L.C., called in and examined, and produced various works and drawings on the subject of the inquiry.

Witness withdrew.

Committee deliberated.

[Adjourned to Tuesday next, at *Eleven* o'clock, to consider Progress Report.]

TUESDAY, 16 MARCH, 1869.

MEMBER PRESENT :—

Mr. Mate.

In the absence of a quorum, the meeting called for this day lapsed.

FRIDAY, 19 MARCH, 1869.

MEMBERS PRESENT :—

Mr. Mate in the Chair.

Mr. Farnell,	Mr. Nowlan,
Mr. Phelps.	

Chairman brought up Progress Report.

Same read and agreed to.

Chairman to report to the House.

## MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

## DISEASES IN GRAPE-VINES PREVENTION BILL.

WEDNESDAY, 24 FEBRUARY, 1869.

Present:—

MR. DE SALIS,  
MR. FARNELL,  
MR. MATE,MR. NOWLAN,  
MR. PHELPS,  
MR. W. SUTTOR,

MR. TUNKS.

THOMAS HODGES MATE, ESQ., IN THE CHAIR.

Charles Moore, Esq., examined:—

1. *Chairman.*] You are Director of the Botanical Gardens? I am.
2. A Bill has been introduced into Parliament, having for its object the prevention of diseases in grape-vines; that Bill has been referred to the Committee now sitting; and they are desirous of obtaining information as to any course it may be necessary to adopt. Have you had any opportunities of seeing the disease? I have seen the disease, and I have more particularly examined it in this country. I saw it in Europe; but, little dreaming that it would ever develop itself here, I regret that I did not pay so much attention to it as I should otherwise have done; but I saw sufficient to be aware, when it was brought under my notice at Newcastle, that it was the same form of disease as that I saw in the vineyards of Spain and Portugal.
3. *Mr. Tunks.*] Are you speaking of the *oidium tuckeri*? Of the *oidium tuckeri*.
4. *Chairman.*] Is that anything like it (*handing a specimen to witness*)? This I apprehend is the effect of the disease, but there is now no mildew apparent on this.
5. That was cut on Monday last? This I rather think is the effect. The disease appears to be gone—I cannot see any disease upon it. (*The Chairman handed to witness a specimen of grapes.*) That is the true form of the *oidium tuckeri*. If this were more developed it would become floccose, which is the true character of the disease.
6. Is the disease you have witnessed on the Continent the same as that now prevailing in this Colony? I am satisfied it is.
7. Do you know what measures are adopted on the Continent for the prevention or cure of it? In some parts of Portugal, I was informed, particularly near the Douro, great attention was paid to the application of sulphur, and with very great success. When I reached Spain, my attention was called to it by Mr. Campbell, the Consul at Cadiz; and he particularly referred to his own vineyard, as an instance of the success attending the application of sulphur. He directed my attention to other vineyards which were perfectly white with the disease, where he could not persuade the proprietors to apply this remedy. His words were—"They laugh at me, and think I am spending a large sum of money, and a great deal of trouble, and shall not be benefited, but you see what the result is."
8. Do you think there is any danger of the disease spreading, unless measures are adopted to prevent it, so as to become general throughout the whole of the vineyards of the Colony? I think it is very possible; in fact, I think it is very likely to spread, unless some precautionary measures are taken.

C. Moore,  
Esq.

24 Feb., 1869.

- C. Moore, Esq.  
24 Feb., 1869.
9. Do you think younger are more free from it than older vineyards? I have not been able to form any judgment upon that point.
10. When I cut off this branch on Monday, the spots were almost purple? It is stated by very competent authorities that the disease is the effect of the stoppage of pores or stomata of the epidermis, but that it does not penetrate, unlike the *botrytis* or potato disease. As an instance of disease affecting plants, where apparently it did not exist before, I recollect one very remarkable case near Dublin, at the time the potato disease was prevalent. My brother was appointed to investigate the subject, and I went with him. There was a field of potatoes which appeared to be perfectly healthy one day, and the following day it was entirely destroyed. These diseases spread so rapidly that a vineyard may apparently be free from disease one day, and yet may exhibit all the symptoms of disease on the following.
11. Do you think it is a disease peculiar to the grape-vine only? Yes, from all I have been able to read on the subject, I think it is confined to the genus *vitis*.
12. Have you never observed anything similar to it in indigenous plants or shrubs, or in roses? I take it that all diseases called mildew are similar.
13. This disease is a species of fungi? It is a fungus. To shew how difficult it is to determine these diseases simply by the naked eye, I may refer the Committee to a little book I have here, on the subject, which shows how different they appear when subjected to the microscope, although to the naked eye they seem alike. (*The witness produced a book entitled "Microscope Fungi," by Cooke.*) To the naked eye it would appear that these were the same forms of disease; but when examined by the aid of a powerful microscope, it would be seen that the genus to which the *oidium tuckeri* properly belongs can at once be determined by its ovoid spores.
14. Do you think the disease has arisen spontaneously in this country, from the vine itself? No, I do not. It is an argument very often used, that diseases of this kind occur spontaneously; but as I hold to the doctrine that there is no such thing as spontaneous generation, I cannot entertain that view. There are many ways in which it might have been introduced into this Colony, even in the clothing of persons who have visited glass-houses in which affected grapes have been grown, in England.
15. Your opinion is, that it has been introduced into this Colony? I have no doubt of it. The disease is always of exactly the same type, but if it were spontaneous it would not always appear in the same form. In Europe the disease travelled from cold to warm countries: here it appears that it has travelled from the warm to the colder. It occurred in Queensland first, then it appeared in Grafton, and it is now spreading, or has spread, rapidly here; it is still spreading, and has reached as far south as Kiama. It is just possible that it may not go further, but I think there is great danger to be apprehended elsewhere.
16. Have you known it in latitudes equal to our southern latitude here at Melbourne, Victoria? It existed on the Rhine, but not to any considerable extent, and that country is similar to Melbourne.
17. You think there is danger of its spreading itself from the north, where it first appeared, as far south as Melbourne? I think so. I think the Rhine is very similar in point of climate to Melbourne, but its greatest ravages have been in warmer climates. There is now very little of it on the Rhine, if any.
18. Are you of opinion that any legislative enactments would be effectual in arresting the progress of the disease, or in eradicating it entirely? I think, if proper measures were effectually carried out, it would be eradicated in a year or so.
19. Do you know whether there is any legislative enactment on the Continent, at the places you have mentioned, where you have witnessed the disease, of this character? I believe there are none whatever, and the result, in my opinion, is that the disease has existed so long. I may mention that I observed at St. Mary's, near Cadiz, fields which had been sulphured, and which were comparatively clean; while, on the other side, where they had been neglected, they were almost white with the disease. Their appearance was as though lime had been thrown over them. It is now disappearing altogether in Portugal.
20. I suppose some of these diseases do run themselves out in a number of years? Yes; the *botrytis* (the potato disease) is almost unknown now.
21. Still, I think your opinion is that, in a young country like this, it would be well to take precautionary measures, by legislation, to arrest the progress of the disease? I think so, unless the measures were oppressive and very expensive. If it could be done without unnecessarily interfering with the people, I think it would be a good thing.
22. What are the remedies you would recommend particularly? Sulphur, in any mode people may like to apply it. The general recommendation of the authorities I have consulted is sulphur in suspension, but others say that powdered sulphur is better.
23. Do you think sulphur and lime mixed would be good, when the pruning is finished, for washing the stocks? I think it would be a very good thing indeed. Any remnant of the disease—any spores that might rest in the bark—would be effectually destroyed by that means.
24. *Mr. De Salis.* Have you an idea that the disease comes from a distance, or that it gradually spreads from one vineyard to those in the immediate neighbourhood? I think, from what I know of the matter, that, did the disease exist in any part of the country, it might be carried to the most distant parts, for the spores pervade the air.
25. When it was once in the country, it would naturally affect the nearest portions first? I think probably it would. It spread gradually in Europe; it first went from England to France, and then it travelled south; then it took a westerly direction, and came northerly to the Rhine; then it appeared in Portugal, and thence it went through Spain and Italy.

26. Having once made its appearance in one vineyard, it spread to other vineyards around? Yes.
27. It could invariably be traced from one vineyard to another? It appeared in the Gardens of Versailles, near Paris, and then it spread about Paris before it was known elsewhere on the Continent.
28. You compared it to the *botrytis*—I suppose you consider it bears some analogy to that disease? One penetrates the plant, the other does not.
29. Did *botrytis* appear in one paddock and then spread to the next, or did it appear over whole districts almost simultaneously? It spread very rapidly for a time, but it was a considerable time before it became so bad. For a considerable period the cause of the disease was unknown, but at length it was discovered that the fungus was the cause, and not the result of the disease.
30. You do not believe in spontaneous generation? No, I do not, and I cannot believe it.
31. Does this disease affect other parts besides the leaves? It affects the young wood, the leaves, and the fruit.
32. When the leaves fall off, does it still remain in the young wood during the winter? I think it does.
33. Therefore, in order to eradicate the disease, it would be necessary to get rid of the young wood? Yes, it should all be burned.
34. That all the rest might be perfectly clean? It would be a good thing, after pruning, to wash the stems over with a preparation of lime and sulphur, in order that, if any spores were left, it might destroy them.
35. You said this disease was peculiar to the genus *vitis*—Are there any other plants of that genus indigenous to this country? Our native grape is a species of *vitis*.
36. Is there much of that in the scrubs of this country? Yes, a great deal of it exists in all scrubby places.
37. Are you aware whether this native vine is affected by the *oidium*? I have not met with it.
38. Do you think it is likely? Yes, I think, if the disease be confined to this genus, it is quite possible.
39. I suppose, if the disease were driven away from vineyards, it might still lurk in the bush? It is quite possible.
40. You stated that the Consul at Cadiz had his vineyard in a good healthy state? In a comparatively healthy state.
41. It was still affected? It was still affected.
42. Did he regret that his neighbours would not adopt his remedial measures? Yes.
43. For his own sake, or for theirs? He simply expressed his regret that it was not done. He is largely interested in wine-making, besides having vineyards of his own.
44. If the country around were infected, could any individual keep his own vineyard perfectly clean, so as to grow grapes successfully? I think he might; but if there were diseased vineyards in his neighbourhood, his vineyard would always be liable to disease.
45. Are you aware whether it is very expensive to keep a vineyard in order? From all I have been able to learn, I think it is not.
46. Have you any idea what extent of ground one man would be able to attend to for the cure of this disease? I have not, but I recollect an observation of Sir William Macarthur,—that forty acres of vineyard would cost about the labour of one man.
47. During the season? Yes; and that, I think, was admitted by Mr. Wyndham.
48. Would the expense of the sulphur be very serious? I think the estimate was, that the cost of sulphur and labour would be about £1 an acre.
49. Supposing no steps are taken for its eradication, do you think this disease will ultimately disappear? I think there can be no doubt of it.
50. Has it disappeared in Portugal? Yes, in a great degree, and almost entirely on the Rhine.
51. Do you think that the *oidium* in Portugal, and the *botrytis* in Ireland, have entirely disappeared, or that they are still latent? I think the *botrytis* has almost disappeared, though it may appear on occasional plants, but that I am not aware of.
52. It appears to me that the treating vineyards in this way is similar to treating land that is overrun with weeds? I fancy a man could do more with sulphur to arrest this disease, than he could do in clearing the ground of weeds.
53. I mean that the principle is the same. If a man allowed weeds to grow in his garden, he could not have good vegetables or fruit; and if he did not treat his vines, he could not have good grapes or healthy vines? Yes, in that way the treating of the vines and the eradication of weeds may be regarded as analogous.
54. Would you then recommend a law that a man should be compelled to keep down the weeds in his garden? I think it would be a very hard case, if I had a clean garden, free from weeds, and my neighbour had a dirty one, that I should be compelled to employ labour to free myself from the weeds which sprung up from the seeds which came from my neighbour's ground.
55. In that case you would advocate legislative interference? If I were consulted, I would.
56. In the case of all kinds of weeds? In the case of some particular kinds of weeds.
57. In the case of *oidium tuckeri*, you would recommend legislative interference with your neighbour? I said before, and I repeat, that I would, if it could be done without being too expensive or oppressive.
58. *Mr. Tunks.* Will you be kind enough to explain the meaning of the term *oidium*? It is so called from the spores being egg-shaped.

C. Moore,  
Esq.

24 Feb., 1869.

- C. Moore, Esq.  
24 Feb., 1869.
59. The spores of some particular kind of fungi? A species of fungi.
60. And *tuckeri* is from the gardener who discovered the mode of treating the disease? Yes. The discoverer of the disease was Professor Berkeley.
61. You have stated that you do not adhere to the principle of spontaneous generation in this matter? Yes.
62. Then it would follow, as a matter of course, that this disease has existed from the creation till now, in some form or other? That inference may be made, of course.
63. We could only infer? There may have been successive creations, but I would not go deeply into that matter. I hold this to be the true principle,—that forms of disease may exist and remain for years before they are developed, and may then suddenly develop themselves to an extraordinary degree, then partially disappear, if not altogether; but I cannot, from all I have been able to gather from reading and observation, come to any other conclusion than that there is no such thing as spontaneous generation. There is certainly an extraordinary fact, with which we are, no doubt, all acquainted, that may seem to tell against that conclusion, namely, that where ground has been cleared between the Blue Mountains and Parramatta, wattles have invariably sprung up in the greatest possible abundance, though none had grown on the spot before; but, if this were an instance of spontaneous generation, we should have different species, which we have not.
64. There having been some process of development of this disease into active existence, have we any proof as to its travelling over the world? We have no absolute proof—only the fact of its appearing at different places, one after another; and the inference is, that it must have travelled by means of these spores, which are, in fact, the seeds of this species of fungi, which are carried and driven about in the air.
65. Until finding a suitable place for its development, it reproduces itself? Yes.
66. Have we any knowledge of the precise date of this disease appearing in Queensland? The disease appeared in Queensland, I think, in December, 1866, but I have not Mr. Coxen's pamphlet—that was my first knowledge of it.
67. Have you any knowledge of the date of its first appearance in Illawarra? Last year (1868), shortly after my arrival from Europe, it was shown to me by a gardener from Wollongong.
68. Will your memory enable you to say whether it was before or after the Act was passed to prevent the importation of grapes? After the Act was passed. I think the Act was passed in 1867.
69. Would it not be possible to import this disease by means of specimens? No doubt of it. So strongly did I believe that, that although I had various collections of vines offered to me when I was in Europe, I declined to accept them.
70. Mr. De Salis.] In the report you wrote on the subject, you mentioned that it was external? Yes, quite external.
71. Would the disease then bury itself in cuttings that might be sent to this country? It would destroy or decompose the tissue.
72. Mr. Tunks.] You have produced a book detailing several species of mildew on various kinds of plants—Have you ever taken notice of the mildew on the grape-vine, in its state of decay, towards the latter end of the season, other than that? Yes; but that which is commonly supposed to be mildew is another form of disease, called *erineum*. It has a sort of webby appearance under the leaf.
73. Does that necessarily occur on the decay of vegetation for the year? Not necessarily; it appears only occasionally upon the vine.
74. Have you seen it on the pea? On the pea there is true mildew, and under the microscope you would see that it has different kinds of spores; but this to which you refer on the vine, although it looks similar to the naked eye, yet, under the microscope, it would be seen to have spores.
75. Have you any idea how that is propagated from season to season? That is, the *erineum* is supposed to be caused by the extension of the tissues; it is, in point of fact, not a fungus.
76. It is necessarily owing to the decay or dying out of the physical power of the plant? It might be so. My attention was more particularly called to it when I first went to ———, and I then carefully examined it, and I could find under the microscope no appearance of a fungus. I then referred to an article by Professor Lévillé on *erineum*; and the description given by him, led me to the conclusion that what I had supposed was an incipient form of mildew, was a peculiar development of the tissues, and not a fungus.
77. We do not see that in young, vigorous plants? No, it is always towards the end of the season.
78. If you have old plants alongside of young ones, it communicates from one to the other? That again is true mildew when such takes place.
79. This is communicated by one plant to the other, from their being in the immediate vicinity of each other? Yes.
80. Is it within your knowledge that we have quantities of edible grapes growing wild, from cuttings which have floated down the rivers? In all my travels I have never observed it.
81. The wild grape you say is a true *vitis*? Yes.
82. Is it possible by cultivation to improve that? I think it is. I do not know that it has been tried.
83. If it be a true grape, it would probably produce different varieties from the seeds? Yes, if it would cross with the known edible varieties, we might get a distinct fruit altogether.
84. Is it known that particular kinds of grapes for their qualities have been propagated very extensively in almost every country? Yes.
85. These grapes must be getting old? Fresh plantations are formed. 86.

C. Moore,  
Esq.

24 Feb., 1869.

86. From cuttings? Yes.

87. But the wood of the grape must be very old? I fancy if you take a portion of the young wood, say last year's wood, and make cuttings of it, next year you will have a vigorous plant.

88. It continues the same species? Yes.

89. The wood is the same in age and constitution as the parent stock? By planting cuttings, you renew the vigour of the stock. I may illustrate this by referring to the double dahlia. If the tuber of this flower be left in the ground, it will in time degenerate and produce only single flowers, but a young shoot from the same tuber will produce double flowers.

90. Are we able to trace the vine up to any primitive vine, such as we find indigenous in this country? The original vine is very well known.

91. Having produced different sorts by sport, how old are some of these that are now in use for wine-making purposes—have you any idea? No.

92. Is it possible they may be several hundred years old? Yes.

93. Is it possible that some of these are dying out constitutionally, and are thereby becoming food for this kind of disease? I do not think we have any proof of that. I know that at one time when a disease broke out among apple-trees in England, it was thought the ribstone pippins, for instance, were dying out; but the disease disappeared, and the trees are still in bearing.

94. Will the same grape-vine last for ever? The same plant?

95. Cuttings from the same plant, will they last for ever? No doubt of that.

96. You think there is no danger that the wood or constitution of the vine will be so deteriorated as to become at length food for, or an attraction for, particular parasites? I think not, if good healthy wood be taken for cuttings.

97. Do you say these diseases in course of time die out? That I gather from what I have heard, and from personal observation.

98. That they become extinct? I will not say that they become extinct—I do not think they do; but they disappear, and it may be many years before they develop themselves again.

99. Would it be likely that some particular kind of season or climatic influence might develop them into activity? Yes, I think so.

100. The spread of this disease may arise from some peculiarity in the season? It may be so; but there did not appear to be anything peculiar in the season in Europe when it made its appearance; and it spread from north to south, then went in a westerly direction, and then turned to the north, because it appeared in the southern part of Germany before it reached the Rhine.

101. That appears to have reference to its locomotion, rather than to its development at any particular stage; that is to say, that it travelled about at a rapid rate after its development? Yes. After it appeared at the Rhine it went south, where it made the greatest ravages; it went from the south of Europe to Madeira, and from Madeira to the Cape of Good Hope. In Madeira, where no precautionary measures were taken, but the disease was regarded as a visitation of Providence, the disease has, as I have been given to understand, worn itself out, and the vineyards are now free from it.

102. We have introduced small-pox into this country before now? During my long residence in this Colony, I have heard from time to time that small-pox has existed, but I do not think it has been proved.

103. It has not spread? No. My impression is that there is some peculiarity in the atmosphere which will not allow it to spread.

104. What is the peculiarity? That I am unable to explain; but we have had vessels coming in constantly from India and other places where small-pox was known to exist, and yet we have had no well-authenticated cases.

105. You have said, I think, that this disease is not to be found on any of the indigenous vines of the Colony? As far as I am aware, it has not. The only one that I apprehend could be affected by it is the wild vine.

106. *Mr. Farnell.* Have you any doubt in your mind that, so far as Australia is concerned, *oidium* originated in Queensland? I have very little doubt of it.

107. Are you aware that, when it first made its appearance in Queensland, Mr. Coxen wrote to the late Rev. Mr. Turner informing him of the fact? He did.

108. Did he send samples? Of what he considered to be *oidium*; but he did not know what it was. He also wrote to Dr. Bennett on the subject.

109. Is it not possible that, in sending grapes from Queensland to this Colony, the disease might have been introduced? I think it very possible, and very likely.

110. Would it not be possible to transmit the disease by means of the cases in which the grapes were forwarded here, those cases being sent up to fruit and vine growers in various parts of this Colony? Very possible.

111. Are all kinds of grapes, or are only some kinds liable to be attacked? I believe almost all kinds. About Paris, black grapes only were supposed to be subject to attack, but it was subsequently proved that the white were equally liable.

112. Perhaps the impression was first formed from the fact that the mildew being white, was not so readily seen on white grapes? That might have been the case.

113. Have we any kind of grapes that are free from the attack of the *oidium*? I am not aware.

114. If this *oidium* were to deposit itself upon any other kind of plant, do you think it would develop itself? It has been asserted by Professor Berkeley that, in one case it was known to have attacked the chrysanthemum indicum; but Professor H. Von Mohl denies it, and he gives a case in point where he put various kind of plants with the chrysanthemum

- C. Moore, Esq.  
24 Feb., 1869.
- santhemum indicum, and they remained a whole season with it, and they were not attacked; and he says that ampelopsis quinquefolia, which is closely allied to the vine family and it, was not attacked. I can furnish the paragraph from his report.
115. Did you ever notice that the sweetwater grape, which is not so largely cultivated in the Colony as it was formerly, was attacked by a peculiar kind of disease some years ago, before the introduction of the *oidium*? I have no recollection of it.
116. The sweetwater grape became spotted with black spots? Yes, I remember to have seen it.
117. Was that mildew, or the effects of climatic change—I may state that I have understood it was attributable to climatic change from hot winds to southerly? I think, if it be the same thing that my attention was called to on the Hunter, that I think Mr. Wyndham attributed to insects. It was a little, dark-brown spot on the grape.
118. I think you stated that sulphur in suspension was an effective cure for the *oidium*? So the European authorities say.
119. You said something about sulphur and lime in solution? That is for washing the stems of plants. I would prefer to use that after pruning, to wash the stems of plants.
120. Is it not the fact that sulphur is not soluble in cold water? Yes.
121. How could you make it soluble? I should merely apply it by means of a syringe while it was held in suspension.
122. You would recommend the solution to be used only after pruning? That is the practice I would adopt myself.
123. Have you yourself seen grapes sulphured by the ordinary process of blowing it on them? Yes, I have, frequently.
124. Have you noticed the effect it had upon the disease? No. I have seen it applied, but I have not seen the vines afterwards, but I have heard that it has been an effectual cure.
125. Is it possible for this *oidium* to lie dormant—supposing persons to sulphur their vineyards for any reasonable time—and then to develop itself in the vines? I think it is; that is my impression.
126. In your opinion, the disease will eventually die out? I have very little doubt of that, for I think it is analogous to various diseases which have appeared on different plants from time to time in my own lifetime, and not one of them has been permanent. The most permanent has been rust in wheat, which has existed more or less for many years. In Europe, during some years, it has been very bad, in others again it has been scarcely known, but it has been the most persistent of any of that class of diseases I have known.
127. Do you know whether the sulphuring of grapes will at all affect the wine made from them? I made inquiry respecting that of some wine merchants at home; and Mr. Holdsworth, a very large wine merchant in London, said he fancied sherry was affected by it, but it was denied in Cadiz.
128. I believe wine-makers, in cleansing casks for racking off, use sulphur? Yes. I have been perfectly sensible, in tasting colonial wines, of the taste of sulphur.
129. I believe in France they look upon the sulphuring of vineyards as a matter of course—that they do it as regularly as they prune the vines? I am not very sure upon that point, but I think it is very likely large vigneron would adopt that practice.
130. Do you know whether the *oidium* exists in China or India? I am not aware. I searched every possible authority, but I have no recollection of seeing that it was either in China or India.
131. In Java, or any of those islands? I do not think they grow the grape in Java.
132. Mr. Suttor.] Do you not think that, as the grape-vine has been cultivated from time immemorial from cuttings, so as to become almost an artificial plant, it is more likely to be attacked by insects or by diseases of this nature than seedlings? I think it would be; but the healthiness or otherwise of the plant would depend upon the circumstances of its growth; for instance, if one plant were growing under circumstances favourable to luxuriant growth it would throw off disease, while another less favourably situated will become subject to disease. We had numerous illustrations of this in the case of the orange disease. Where a tree was languishing, if, by the application of fresh soil, of water, or other means, a more luxuriant growth could be induced, it threw off the disease; and therefore it follows that, a seedling being more luxuriant than a cutting, it would be less likely to be affected by disease.
133. It was the general impression at the time of the potato disease, that they had been raising the potato from the root too much, instead of getting back to the seed again? That was the impression, but it is proved to have been incorrect; for the disease has gone, and they are still growing the same kinds of potato.
134. You stated that this disease was prevalent for a certain number of years, and then disappeared altogether? Yes.
135. It may be expected to come again? Yes.
136. I want your opinion as to the best means of prevention as well as of cure. Do you not think this might be done by means of raising the vine from seedlings? Yes, that might be done, but you could not perpetuate varieties by that means.
137. Although you might have a thousand seedlings, you would not have two of the same kind? Yes, because they are varieties. Species will reproduce their exact types, but varieties will not. Not one of these seedlings would exactly resemble the original, because they are all varieties; but if you were to take the seed of our own wild vine, it would reproduce itself precisely. But while I am on this subject, I may state that there are varieties which will reproduce themselves from time to time, such as cabbages; but if you grow the cabbage year after year in the same ground, it will degenerate to the original

original type. Hence the advantage of having seed from distant countries, even for vegetables. It is always better to obtain seed grown in a colder country, as Tasmania, than that grown in the neighbourhood of Sydney.

C. Moore,  
Esq.

24 Feb., 1869.

138. Do you think frost would affect this parasite or fungus on the grape? No, because they have very severe frosts in some parts of France, where the disease has been, and the disease was not thereby destroyed. I may state, however, that heat causes its development rather than cold.

139. *Mr. Nowlan.*] You have stated that the disease known here as the *oidium tuckeri* is precisely the same as that known by the same name in Europe? That is my opinion.

140. It has been asserted, on several occasions, during the discussion on this disease, that it has been seen in this Colony many years ago,—one person stated that he had seen it thirty years ago in this country? That I take to be a mere assertion, unsupported by anything like proof; for I think the mere figures in that book will shew that, although to the naked eye the disease may appear the same in various cases, yet, when seen under the microscope, they are utterly dissimilar; therefore, for any person to say that it was the same disease, unless he had made a microscopical examination, I say would be to make an assertion unsupported by facts.

141. I am now quoting from the translation of a work by M. L. R. Le Canu, which was sent out to the Acclimatization Society of Queensland, in answer to a communication made by Mr. Coxen, in April, 1867, to the Acclimatization Society of Paris, requesting information on the subject of the vine disease; and it is there stated that the disease was first discovered by Mr. Tucker, a gardener residing in Margate, in the Isle of Thanet, on a vine grown in his hot-house, in the year 1845; and that in the year 1848 it made its appearance at Versailles and Montagne, near Paris; in 1849 it appeared in the north of France and Belgium; in 1850, in Languedoc and Provence, and in Italy and Spain; in 1851, at Bordelais; and in 1852 and 1853 it invaded the vineyards of Europe, and a great number of those of Asia, Africa, and America; and that it had not disappeared from those places where it first shewed itself. Now, I think it is evident that the disease said to have been seen here thirty years ago could not have been the disease known as *oidium tuckeri*. Are you satisfied in your own mind of that? Yes.

142. I think the mention of those dates, shewing its spread through Europe from the time of its original discovery by Mr. Tucker, proves that it steadily advanced through the vineyards of Europe, and did not simultaneously spread over a considerable area owing to any peculiar climatic influence or otherwise; but I should gather from this information here, that its spread can be clearly traced from country to country, and from vineyard to vineyard, over Europe? That was the impression on my mind, after reading all I could on the subject.

143. You have arrived at the same conclusion? Yes.

144. *Mr. Tunks.*] But you stated that it existed, in some shape or other, from the creation till now? If all plants were created at the beginning, it must have been so.

145. That is, before 1849? Yes.

146. We have assurance that it must have been created before 1849? Yes.

147. Then there is nothing impossible in its appearance anywhere, under certain circumstances? Nothing impossible.

148. *Mr. Nowlan.*] You have stated, I think, that the spread of the disease may be occasionally due to peculiarity of season; but I would beg leave to ask you whether you are aware that, from the time of its first discovery in 1845, in England, it was known to disappear, owing to the different seasons, in England and Europe? I am not aware. I have no data to go upon to answer that.

149. From the statement made in this pamphlet of Le Canu, it appears to have gone on steadily, without any obstacle from the seasons. With reference to its appearance in this hemisphere, did Mr. Coxen communicate to you? To me, through Dr. Bennett.

150. I find from Mr. Coxen's own statement, that it made its appearance in Queensland at the end of October, 1866? He must have written to Dr. Bennett at the latter end of November, 1866.

151. Do you know when it made its appearance in New South Wales? My attention was first called to it in the month of March, 1868; and then I learned from a gardener, who has a garden near Wollongong, that the same disease appeared the previous year in his vineyard.

152. That is, according to his own opinion? There is no doubt about its being the disease he observed.

153. Then it must have appeared at Wollongong in 1867? Yes.

154. Then it must have made its appearance in this Colony first at Wollongong? Yes.

155. Where did you see it? At the garden of Mr. Tourle, near Newcastle, in March, 1868.

156. Did you see it again the following season? In that and the adjoining vineyard.

157. You saw it in different parts of the district on the Hunter? Yes, near Maitland.

158. In Mr. Scobie's? Yes.

159. When did you first notice it in the district immediately around Sydney? It was subsequently to that; but many persons who were unaware of the existence of the disease until the publication of my report, then examined their vines, and found them to be affected.

160. It was then you made the tour of Central Cumberland? Yes.

161. After returning from the Hunter? Yes.

162. Shortly after that, these vineyards were found to be in a very advanced state of disease—worse than any vineyards in any part of the Colony? Yes, worse than in any other part that I saw.

163. I understood you to say that you are of opinion the disease must have spread from vineyard to vineyard? Not necessarily so, but I think it probable.

164.

- C. Moore, Esq.  
24 Feb., 1869.
164. From your observation, are you of opinion that the disease has spread from vineyard to vineyard, rather than that the spores have been carried in the air to distant places? I think the spores must have been carried to very great distances.
165. Judging from the whole history of the disease, it spread steadily? In Europe it spread steadily.
166. Do you believe that any particular mode of treatment of the vine, in the way of cultivation, would render it impervious to disease? No.
167. Do you think young vines are less liable to take the disease than old ones? It might be for the reason I have already assigned,—that there is more vigour in the younger than in the older ones.
168. Do you believe that vines planted on trenched lands would be more free from the attacks of the disease? I do not think so.
169. Are you acquainted with the district of Albury? No.
170. You have never been there? No.
171. From your general knowledge of the character of the country, would you suppose that part of the country would be likely to be exempt from the disease? I should think it more likely to be exempt from the disease than warmer parts of the country, but I do not think it will be exempt on that account.
172. Do you know the district of the Macintyre, where the Bukkulla is grown? Not quite that locality.
173. Do you think there is some similarity between that country and Albury? No, that is a warmer country.
174. From what you have heard, you believe this dressing of sublimated sulphur to be effective? From what I have heard.
175. Do you think sulphuric acid diluted with water would be more efficacious, or less expensive and as efficacious as sublimated sulphur? I have had no means of ascertaining.
176. Do you believe that, if there were united action on the part of vine-growers in the application of sulphur, it would have the effect of eradicating the disease from the Colony? I think it would.
177. You believe that legislation on the subject, compelling the application of this remedy, or of the best remedy known, to diseased vines, would have a very beneficial effect, if it did not eradicate the disease completely? It would subdue, if not eradicate it.
178. Do you consider, from your knowledge of the wine-growing interest in this country, that it is worth while some such united action should be attempted in order to eradicate this disease? I think it would be worth making the attempt.
179. Do you think it is likely the vigneron of this country—taking them all, both large and small growers—would be likely to take such means, without legislative enactment? I think large growers would.
180. Do you think small growers would—those who have only a quarter of an acre, half an acre, or an acre, would? I do not think they would. I give that answer in consequence of what I observed at a meeting held at Ryde, for the purpose of considering this matter. I then heard some of the small vine-growers say they would not take the trouble, and they used the expression that they would let the vines go to the dogs—or some stronger term—rather than take the trouble. But I think it hardly fair to the larger growers who have such a great interest in the growth of the vine, that they should be compelled to employ labour, while the nuclei of disease are existing close to them, in consequence of the neglect of their neighbours, and that they should have no means of compelling these people to apply the proper remedy.
181. In your opinion, the disease would be propagated in these small vineyards equally with large ones? Yes.
182. And unless these small growers of vines could be compelled to take action in the matter, it would be useless to attempt to eradicate the disease thoroughly from the country? The large growers could, no doubt, keep down the disease in their own vineyards.
183. Then dressing would be merely with the object of keeping down the disease on their own vineyards—they could not hope to extirpate it by that means? Not for a great length of time, until it wore itself out.
184. You have stated, in answer either to Mr. De Salis or Mr. Farnell, that you have never seen the fruit-bearing vine growing wild? I have never come across it wild.
185. You have travelled over a considerable area of this country? I know all the coast districts, where it would be most likely to occur, but I have no recollection of ever having met with it in a wild state.
186. Do you think that the possibility of the disease being propagated by these wild vines would be at all a barrier to legislation on this subject? I do not think so.
187. Do you know whether the disease, if unchecked, will ultimately kill the vine? It has, according to European experience, when the disease has become bad.
188. It has so killed the vines in Madeira? Yes.
189. Do you know how many years it would take to accomplish that result? I think if a vine were very much diseased, it would die in two or three years.
190. Have you heard of any vineyards in France having been destroyed by the disease? I have not.
191. You are aware that vines sometimes produce a second crop of grapes? Yes.
192. And, of course, that crop would be liable to disease, supposing the disease had been destroyed in the first crop? No doubt.
193. Do you think it likely that many vigneron would take the trouble of dressing this second crop? I think it would scarcely be worth while for the sake of saving the crop, but it might be worth while for the purpose of eradicating the disease.

194. *Mr. De Salis.*] Do you know of compulsory legislation for the destruction of *oidium* in any country? No.

195. Do you know of compulsory legislation for the destruction of weeds in any country? My impression is that there is, but I do not recollect at this moment.

C. Moore,  
Esq.  
24 Feb., 1869.

196. If there were compulsory legislation in this country, for the destruction of *oidium*, it would also be necessary that there should be similar legislation in Queensland, Victoria, and South Australia? It would be desirable, but we would have no power in the case of those Colonies.

197. It would be of very little use here, unless the other Colonies did the same? We might keep the disease down here.

198. Have you any idea of the size of the spores? They are exceedingly minute. They require a rather powerful microscope to see them.

199. Finer than the finest dust? The most impalpable dust.

200. They would be blown by the wind as far as the finest dust? Yes.

201. *Mr. Tunks.*] They are specifically lighter than dust? Yes.

202. *Mr. De Salis.*] Would you suggest that legislation should allow you to enter your neighbour's paddock, and destroy the weeds in it? No, I would not recommend interference to that extent.

203. No doubt something might be done in that way which would check very much the growth of weeds, but that is a matter of policy? I would not myself recommend it.

204. You would not like some one to come into your garden to destroy your weeds? No.

205. You could do a great deal of good to your garden, if you had power to go into the garden of a neglectful neighbour who allowed it to be overrun with weeds, and to destroy those weeds? Yes; because I am now obliged to employ labour to destroy weeds in my own garden, which spring up from seeds that come from his.

206. Are you aware whether the spores of the *oidium* retain life for a long time? Under certain circumstances, no doubt they do.

207. I suppose they remain latent about the old vines during the winter? Either about the old vines, or in the leaves or branches that may be lying upon the ground.

208. You would recommend the removal or burning of all this? Yes, it should be burned.

209. Are you acquainted with the apple blight? Yes.

210. Are you aware that it attacks some kinds of apple-trees, and not others? Yes.

211. Does it attack the same apple-trees under different circumstances, or different apple-trees? Different apple-trees.

212. The circumstances make no difference? No.

213. *Mr. Tunks.*] You have stated that a number of vine-growers at Ryde expressed their determination to destroy their vines, rather than go to the expense of applying this remedy? At the meeting to which I have referred.

214. Was that very early in the history of this disease? At the first meeting.

215. Is it within your knowledge that many of these people had been almost ruined about that time, by the attacks of another disease upon their orange-trees? Yes.

216. Is it within your experience that a large number of orange-trees had been dressed and redressed, and yet were destroyed after all? Yes.

217. Would the expression then given utterance to, convey the mature opinion of the people on this matter now? I may infer that their feeling was, that it was of no use going to the expense, inasmuch as they had bestowed great labour and expense in their attempt to save the orange-trees, and had failed.

218. They were smarting under previous failure? Yes.

219. Diseases of this kind—of this insidious character—are they, or are they not, more common than they were formerly? I do not think so. I have no recollection that they are.

220. Do you think this is such a disease as might be destroyed by the importation of certain insects or birds? I do not think that this disease is affected either by insects or by birds, if it is a true fungus.

221. *Mr. Phelps.*] Do you recollect what were the vines introduced into Madeira after the destruction of the original vines—were they seedlings or varieties from Spain? From various parts.

222. Do you know whether, prior to the discovery of this *oidium* by Mr. Tucker, that or any corresponding disease was ever detected on the vine? The history is not quite accurately given in that pamphlet. About two years before, Professor Berkeley, one of the greatest mycologists of the day, observed this peculiarity in the vine, which he considered to be another form of *oidium*, and in 1847 his attention was called to it by Mr. Tucker.

223. *Mr. Nowlan.*] Mr. Tucker observed it in 1845? My authority states that it was noticed by Professor Berkeley in 1845, and that in 1847 Mr. Tucker discovered that the same application he had been accustomed to use for peach blight was a remedy for this. Professor Berkeley's attention was then more particularly called to the matter. He found it was a new form of *oidium*, and gave to it the name of *tuckeri*.

224. *Mr. Phelps.*] Have we in history any account of anything similar to this *oidium tuckeri*? It was unknown to botanists up to 1845.

225. Have you ever observed the branch of a vine growing under the eaves of a house or a similar place, that it becomes larger than one growing in a different situation? Yes.

226. Have you observed on such branches a number of small globules about the size of the head of a pin? Of a brownish colour?

227. Quite colourless? No.

228. *Mr. Suttor.*] Of course you could not take upon yourself to say that this would not appear on the grape indigenous to the Colony? No.

229. When you have been travelling about the country, it never occurred to you to examine;

- C. Moore, Esq.  
24 Feb., 1869.
- examine; so that it may have existed, and yet have escaped your observation? I think the probability is that, although I might not have observed it at the time, the fact of the disease being brought under my notice would have brought the matter back to my memory, had I seen it on the native vine.
230. You have seen the fruit of the wild grape? Yes, and eaten it.
231. *Mr. Nowlan.*] I do not exactly understand from you that you stated that any varieties of the vine were not attacked by the disease. Have any been known to be free from the disease? I have not made any inquiry.
232. I have understood the Isabella grape is rarely attacked—have you ever heard so? I am not quite clear upon that point.
233. With reference to Mr. De Salis' question about compulsory legislation, and non-legislation in other countries,—I believe, when the disease first appeared in Europe, no specific remedy was known for it for some time? Mr. Tucker, in 1847, discovered that the remedy used for blight in peach trees was also efficacious in the treatment of this disease, and it was from his experience that the French applied it.
234. When it appeared in Madeira, it was supposed to be a visitation of Providence, and no remedy was adopted? No remedy was adopted.
235. Since it is an established fact that the application of sublimated sulphur is a remedy, we are in a different position here, as regards the treatment of the disease, from what they were in Europe in the commencement of the disease? Yes.
236. We know better what to do? Yes, quite so.
237. And we have therefore more reason for carrying out compulsory legislation.
238. With reference to the parties at Ryde, who stated that they would rather allow their vines to go to the dogs than take the trouble of applying this remedy,—were they large or small growers of the vine? Very small.
239. Was the growing of grapes very profitable to them? They were mostly grown for the market.
240. I mean, was it, from the area they had under grapes, a matter of much importance to them whether their grapes were destroyed or not? The people in that district grow a little of everything, and the loss of their grapes would, of course, be of some importance to them.
241. Still, it would not be so important to them as it would be to those persons with whom the growth of grapes was their sole occupation? Perhaps not; but I know that many were reduced to great distress by the loss of their fruit crops, and of course the disease in the vine would contribute to that distress. I wish the Committee clearly to understand that it was not the general opinion of the meeting; indeed the general opinion of the small growers was, that there should be some legislative enactment to make the application of the remedy compulsory.
242. *Mr. Tunks.*] Have you any knowledge of the annual value of the fruit crop in the neighbourhood of Parramatta? No; I have no data to go upon.

FRIDAY, 26 FEBRUARY, 1869.

Present:—

MR. DE SALIS,	MR. NOWLAN,
MR. FARNELL,	MR. PHELPS,
MR. FORSTER,	MR. W. SUTTON,
MR. LACKEY,	MR. TUNKS.

THOMAS HODGES MATE, Esq., IN THE CHAIR.

Philip Francis Adams, Esq., called in and examined:—

- P. F. Adams, Esq.  
26 Feb., 1869.
243. *Chairman.*] You are proprietor of a vineyard in the district of Albury? I am.
244. Are you aware of the existence of any disease in the vines of that vineyard? Not in that vineyard.
245. You are, however, aware of the existence of a disease in vines—the *oidium tuckeri*? I have seen it.
246. Where have you seen it? In several of the vineyards in the vicinity of Sydney, but more particularly in the district of Hunter's Hill.
247. Do you consider this disease to be destructive to the vines affected? I would imagine that the vines in the district I have alluded to would die very shortly if not attended to.
248. Are you aware of any remedy sufficient to secure the vines against infection, or to cure a vineyard which has been diseased, or to arrest the progress of the disease in an infected vineyard? Sulphur appears to be a palliative.
249. Do you think the sulphur remedy sufficient to eradicate the disease from the Colony, if it were applied to all the vineyards? I am scarcely prepared to say it would, in any way which it is practicable to administer it. I should not like to say that a vineyard could not be cured in any way; for if it were possible to cover it entirely, as, for instance, with a large tent, and fill the space with sulphur fumes, the likelihood is that the *oidium* plant would be killed; but I do not see any way in which it is practicable to do this.
250. Then, if that remedy were applied to the vines, by the proprietors of vineyards, you think that would eradicate the disease—that is, if it could be applied in the way you describe? Yes, sulphur fumes are a certain cure, if they can be effectually applied to the vines without being dispersed in the atmosphere.
251. But, supposing that the remedy should be applied by the proprietor of one vine, yards.

yard, and that the owner of a neighbouring vineyard should refuse or neglect to treat his vines, would the disease go over from the neglected vineyard to the one that had been dressed, and break out there afresh? I think it would.

252. Do you think the vine-growing interest is of sufficient importance to require from the Legislature an enactment making it compulsory on all parties to treat their vines for this disease? I think it is of sufficient importance, if the measure before the Legislature is effective to the purpose intended, and can be carried out satisfactorily.

253. You have seen the vineyards of the Hunter? Not since the appearance of the *oidium* amongst them.

254. But you have seen them? Yes.

255. You have been amongst them and examined them? Yes.

256. Have you seen sufficient of them to enable you to judge of the difference of soil of those vineyards and of the vineyards in the Albury district? I have.

257. Do you think that, being younger, there is less fear of the disease in the Albury district than in that of the Hunter? No, I do not think that either soil or age has any thing to do with the spread of the disease, or with the liability of the vines to infection. Probably climate may have a very considerable influence on the disease—I think it has.

258. Are you aware which way the disease is progressing at present, whether west, north, or south? I have not heard of it further south than Picton at present, if I except its appearance in the Illawarra district. It is reported to have extended much further in a south-westerly direction, but I cannot speak with certainty on this point. I have heard that it has made its appearance at Kyeamba, Mr. Smith's vineyard, but I hardly think they are correct in their suspicion that it is the *oidium*.

259. Have you heard of any other method of treating vines for the *oidium* besides the sulphur treatment? I have heard of many, but none of them having such efficacy.

260. Is the sulphur treatment an expensive process? No.

261. What would you calculate that the cost per acre would be for dressing a vineyard with sulphur? At Albury, with the carriage added, it would probably cost from 40s. to 50s. per acre; that would be the limit—the outside cost.

262. If the disease makes its appearance in the spring, does it affect the crop of grapes for that year? Certainly.

263. Then it is not confined to the wood and leaves, but attacks the grapes also? Yes. The first appearance is generally upon the shoots—so I have been informed—for my own experience does not go so far as that. When I first saw the disease, the grapes were formed on the vine; but I believe, from all I can learn, that it is first seen on the young shoots, before the berries are formed; and if they are virulently attacked, the disease is sufficient to almost destroy the shoots, if no remedy be applied.

264. Do you think that if, after the bearing season, all the cuttings were destroyed by fire, and the stocks were well washed with lime and sulphur, that would act as a preventative to the disease in the next season? I am scarcely prepared to say whether it would or not, but I do not think it would.

265. You do not think that any measures would be taken certainly to prevent it? I am afraid not.

266. *Mr. Nowlan.*] Have you had much personal experience of the *oidium*? Only very little.

267. You have never personally treated a vineyard for the disease, and noticed the effect of the dressing? I have treated a few vines, and seen the operation of the dressing on them, but I have not dressed a vineyard.

268. And from that you judge —? The effects of the sulphur treatment are marvellous.

269. You are aware that the sulphur treatment is now generally adopted in Europe? I am.

270. And that there it is considered efficacious? Yes, as I have said, the effects are marvellous.

271. Do you consider that the *oidium* disease owes its appearance in the Colony to climatic influences, or has it been brought to the Colony by means of cuttings, or otherwise? I have very great doubts of my capacity to give a satisfactory answer to that question—it is one for a naturalist.

272. Do you believe the statements which have been made, from time to time, that this disease was known in the Colony many years ago? I scarcely think it could have been the case—all the experience of other countries is against that conclusion.

273. Do you think the disease has spread from vineyard to vineyard? It appears so.

274. It first made its appearance in Queensland? Yes.

275. And thence it has progressed southwards? Most decidedly.

276. You are well acquainted with the Albury district? Yes, very well.

277. Do you think there is anything in the nature of the climate or soil of that district which would render the vineyards there less liable to take the disease than are the vineyards of the Hunter? I think the disease will be there ultimately—it will reach there in its progress.

278. Are you aware that there is a general impression amongst the vignerons of the Albury district that, owing to the nature of the climate and soil of the district, the vineyards there are not likely to be affected by the *oidium*? I have heard so; that is, I have read as much in the Albury prints. My own opinion is, that it will be there, as well as in every vineyard of the Colony, as the disease spreads. At the same time, my impression is that, owing to the dry climate of the Albury district, the vineyards there will suffer less than in the moister climate on the coast.

279. But Queensland is a dry climate, is it not? I think not. In the lower part of that

P. F. Adams,  
Esq.

26 Feb., 1869.

P. F. Adams, Esq., that Colony, especially on the coast line, there is as much moisture in the atmosphere as there is in the Sydney district, and perhaps more so.

280. When this plan of compulsory dressing was first proposed, were you in favour of it?  
26 Feb., 1869. I was.

281. Are you so now? I am not in favour of the proposed Bill.

282. Are you in favour of legislation in another shape? I am unable to suggest a better form at present. If I were, I should be in favour of it; for I think something ought to be done. At the present moment, I am really unable to suggest a better plan than that embodied in the Bill.

283. Do you think that the owners of very small patches of vines, say of half an acre in extent, would be likely to adopt the necessary precautions for saving their vines, in the event of the disease appearing amongst them? I think they would.

284. But if they did not, or if a vigneron had dressed his vines and a neighbouring proprietor neglected to take the necessary measures for preventing the spread of disease,—do you think that, if an effort is not made voluntarily, they should be compelled to make it? If proper precautions are not taken, I think it should be made compulsory.

285. Then, you think that neighbouring vignerons who have dressed their vineyards should have the power of compelling others who neglected it, to do the same? I think so. If it should be found that vineyards so neglected become a serious nuisance from disease, then legislation should be provided, under which informations might be laid against the persons so neglecting; and either their vines should be destroyed, or they should be compelled to dress them.

286. Do you not think it would be wise for the wine-growers of the Colony to make a combined effort to eradicate the disease? I am very much afraid that such an effort will be futile.

287. Did you ever meet, in the course of your travels in the Colony, with wild vines, either indigenous or the progeny of cultivated vines, growing in a wild state? Not in Australia. I have seen several species in America.

288. You have met with none in this country? No.

289. And you have been over a considerable area of the Colony? Yes. I have met with what are called vines in the bushes, but never with the grape-vine.

290. If there are vines in such a state as I have described, or growing indigenous, and spread over a large area, would they not form a serious bar to legislation on this subject? The wild vines that I have seen in other countries are free from *oidium*. The wild species, Isabella and Catawba, now cultivated in America, are almost proof against the disease. I have seen the Isabella vine, at Hunter's Hill, covered with *oidium*, from being surrounded by vines which were very badly diseased; but the disease never seemed to hurt the fruit.

291. You are not aware whether this disease was the *oidium* we now have in the Colony, or whether it was some disease peculiar to the plant? The disease had all the characteristics of the *oidium tuckeri*. On the Isabella vine it was certainly the *oidium*.

292. It has been stated to this Committee that there are in the Colony a large number of wild vines, that is, vines grown from the scattered seed of the grape, and growing in the bush, or on grass lands, or on neglected cultivation land; and that these, together with the indigenous vines in the bushes, exist to such an extent that it would be useless to attempt the adoption of preventive measures. Do you think that these would form a bar to our legislation? No, I think not.

293. You say that you have never met with any of these wild vines? No. I do not think either that there is a sufficient number of wild or neglected vines in the Colony to form a bar to legislation; and for this reason,—that if the disease goes all through the Colony, they are sure to catch it, and being neglected they will perish, and in the course of a year or two will die out.

294. Mr. Tunks.] You stated, I think, that sulphur is a palliative of the *oidium*, and, under some circumstances, a specific? Yes.

295. Has it been ascertained what effect the sulphur will have upon the wine subsequently made from the grape? Sulphur will do the wine no harm.

296. Has that been ascertained? Yes, that is an ascertained fact. Sulphur, in its crude state, is not acted upon by any of the acids existing in wine.

297. Sulphur in any form has, I believe, a powerful action upon the disease, and I should like to know its effect upon the grape? The action is caused by the sulphurous acid gas, which is a mixture of sulphur and oxygen, rising in fume. This is not hurtful to the wine, because this fume is used to sweeten wine-casks. They are kept clean by filling them with the fume, and bunging them up close until they are wanted for use. All effects of the sulphur are afterwards removed by a bucket of water.

298. Then you are quite clear that the application of sulphur to the vine has no ill effect upon the grape, or upon the wine made from it? None whatever. The action is this:—The sulphur being applied to the vine, the oxygen of the air mixes with it, and disseminates a fume amongst the vines, and destroys the *oidium*.

299. Have you any idea of the money importance of the grape crop to this Colony? I have read it in the statistics of the Colony, but I have not carried the amount in my mind. It appears amongst the statistics.

300. Have you any idea of the comparative value of grapes for wine-making and of grapes for table use—for edible purposes? I have read it, but I cannot quote it from memory.

301. Then how do you arrive at the conclusion that the vine-growing interest is of sufficient importance to justify the Parliament in legislating for it? It is a rising interest, and has now become a highly important one.

302. You mean, then, that in its present, but still more in its prospective position, it is an interest that will afford a remunerative return on the outlay of capital, and, in the present state of the labour market, a wide field for employment? I do, most decidedly.
303. That is, I suppose, if the import duty of 3s. per gallon be continued upon foreign wines? I think, in any case it will form a remunerative investment.
304. Suppose the duty on foreign wine to be abolished, would wine-making be a remunerative occupation? I think it would pay even then.
305. Up to a certain point, however, it pays better with the duty? In the present state of vine culture in the Colony, I have no doubt that, without the duty, wine-making would prove very unremunerative to some vine-growers; but if the import duty were taken off, even that would not put an end to vine-growing; it would still go on, and well pay those who adopted the best methods of cultivating the vines and of making the wine.
306. In saying this, do you speak generally, or do you regard the matter from the Albury point of view? I speak generally, that is, as far as those parts of the Colony suited for vine-growing are concerned.
307. Do you think we can depend upon a market, without having to go to the expense of carriage for the wine? Yes; the consumption of the Colony will be quite sufficient to absorb all the wine that will be grown in it during the next twenty years.
308. Do you mean the consumption of this Colony alone, or of this Colony with others? I allude to the Australian Colonies generally. And I say this, because, if the duty be taken off the imported wine, we shall, as a matter of certainty, have free trade between the Colonies to make up for it.
309. May I be allowed to ask you how long you have been engaged in wine-growing? About eleven years.
310. Have you any objection to state what would be about the cost per acre of laying down a vineyard? Taking a ten-acre vineyard, from the commencement to the time when the wine is fit to take to market, after being held for two years, the total cost, including preparing the land, planting, cultivation, cellars, casks, &c., will be nearly £200 per acre.
311. Have you paid sufficient attention to the matter, to know whether the new or the old vines produce the best wine? It is the received opinion in Europe that the old vines produce the best wine, and I think the same thing will be found in this Colony. My experience, however, is not sufficiently great for me to give a decided opinion.
312. Have the vineyards been formed from imported vine-cuttings of different sorts, or from vines reared from seed in the Colony? They are nearly all from imported cuttings. We have only two or three good kinds of grapes grown in the Colony from seeds; all the others are from imported stocks.
313. By the importation of a particular kind of vine from Europe, and by treating it, after it has been received, in the same manner in every way as it is treated in the country it comes from, is the same character of wine produced as in Europe? Not in every case.
314. The wine would appear to be affected by the soil and climate acting on the vine? Yes; these two elements not only modify, but change the character of the wine considerably. But the same thing occurs in the other hemisphere; the grape grown on the Rhine produces a totally different wine from what is made from the same kind of grape grown at Madeira.
315. Is there any probability of these particular sorts of vine now most in favour in the Colony dying out from age? I do not think so. We have had experience of a particular kind of vine (the "Hermitage") lasting for above a thousand years—not of one particular vine, but of vines grown from an especial stock.
316. Then, for all practical purposes, it may be considered that the vine will last for ever? Not the particular vine itself, but the variety will last, by being reproduced by cuttings, for a very long time.
317. Is it not possible that of these vines some may become worn out, and so be nothing better than rearing places for this and other kindred diseases? I am not prepared to answer that question.
318. The *oidium* is a kind of fungus? Yes.
319. Do you know what produces this fungus? That I could not undertake to answer—it is a matter altogether beyond my knowledge.
320. You have said that climate may have some effect upon this disease? To some extent.
321. Will you define what you mean by climate? I mean that the amount of rain or moisture, or the dryness of the atmosphere, has a nutritive or a contrary effect upon the *oidium*. Being a fungoid growth, a humid atmosphere will encourage it, whilst a dry atmosphere is against it.
322. You think, then, that being a fungus, it is more likely to be encouraged and to spread rapidly in a humid atmosphere and a sheltered position, than in a dry climate and exposed situation? Precisely.
323. I think you have said that the disease first made its appearance in Queensland? Yes.
324. Have you any notion of the date of its first appearance in that Colony? All my information on the subject has been acquired from Mr. Coxsen's pamphlet, and I would refer the Committee to that.
325. You are aware, however, that on intelligence of the outbreak of the disease in Queensland reaching this Colony, the Legislature passed an enactment prohibiting the importation of grapes or vine-cuttings from that Colony? Yes.
326. Is it known now that the disease was actually in the Colony at the time that Act was passed? Yes, I think we may be pretty sure that it was.

- P. F. Adams, Esq.  
26 Feb., 1869.
327. Do you know when the disease first appeared in Illawarra? I was told of the existence of the disease there last vintage.
328. Would experienced persons take this to be a specimen of *oidium* (producing a vine-leaf covered with a mouldy growth)? It smells like the *oidium*; and when I have any doubt on the subject, I apply the sense of smell to it, and I am never deceived.
329. Has it come within your observation that, when a grape-vine is dying off at the end of the season, the leaves are covered with a mouldy growth like that? Something like it, but I never paid particular attention to the kind of fungus. I fancy, however, that this is not the mould you allude to, but that it is the *oidium*.
330. Have you noticed that pumpkins and pease, and many other vegetables, die off in the same way with a fungoid growth on the leaves? I have never particularly remarked it.
331. What do you define *oidium* to be? It is a kind of mould or fungoid growth which appears on the vine leaves and fruit, stopping the growth of the fruit, and eventually destroying it.
332. Is it a well-known disease? I think so. Under the microscope there is no possibility of mistaking it.
333. Is it a spontaneous production, or is it produced from some element latent in the vine? That is a question for a naturalist to decide. I should not like to answer it, being a matter upon which I am not competent to form an opinion.
334. You have alluded to the cost of dressing vines with sulphur. Now, in the event of the disease spreading rapidly next season, have we a stock of sulphur on hand sufficient to meet all our requirements? I am not sure about that. I made some inquiries at the beginning of the season, as to the stocks of sulphur on hand, and these led me to suppose that there was amply sufficient then for all purposes. Since then, however, they have been largely drawn upon for use, and if they have not been replenished, there will not be sufficient on hand next season.
335. I ask this in order to put people on their guard, so that they may not be unprovided in the event of the disease breaking out virulently next year? I have no doubt that steps will be taken to replenish the stocks by that time.
336. Have you seen or do you know of a grape-vine indigenous to this Colony? I have seen a plant which the bushmen of the Colony call the wild vine, but I do not think it is a vine at all.
337. But if the Director of the Botanical Gardens says it is a vine? He is likely to be right, and I wrong; he is a botanist, and I am not.
338. Mr. Forster.] Where have you seen it? In the brushes on the Hunter.
339. Mr. Tunks.] Would it be wise in the Parliament to legislate upon this subject, until we can get some further and better information than that we now possess? I think it would be better not.
340. You believe it would be better to wait a little before taking any decided step? I do.
341. Mr. Phelps.] You think it would be better to leave legislation alone for a bit? I do.
342. I have been thinking whether it might not be possible to establish something like a municipality amongst the vine-growers, and then to leave them to act in their municipal capacity, giving them all necessary powers by an Act of Parliament. What is your opinion of such a plan? I do not think that legislation of that kind would be of any service.
343. You do not think such a plan is feasible? I am scarcely prepared to say myself that this would be the best form for legislation to take; but it might be advisable at some time, and perhaps it may not be too soon to adopt it at once,—to have a penal Act authorizing the destruction of diseased vines.
344. What is your opinion? I think that, without taking any immediate steps, it might very well be left to the vine-growers themselves to look after their own interests.
345. This plan has occurred to me from the objections raised by the Albury people. As I understand it, their principal objection is, that the money which it would be necessary to raise in order to carry out the Act would go into the hands of the Treasurer here in Sydney. It struck me, therefore, that legislation under the municipal system would leave the funds in the hands of the different localities, and so remove this objection. Would such a plan be satisfactory? I do not think it would.
346. Mr. W. Suttor.] Do you not think that the grape-vine, as well as all fruit trees, is more susceptible of disease after it has been long propagated from, by cuttings, and by grafting and re-grafting—not because the vine itself is a thousand years old, but from its having been propagated through a long series of years, from cuttings and grafts from the same stock—Do you not think that the stock becomes worn out, and that it would be desirable to renew the stocks, by going back to the seed, or to cuttings from plants raised from the seed? I am scarcely prepared to answer that question.
347. You are aware that, some years ago, the potato plant ran out, and that it was found necessary to go back to the seed? Yes.
348. And might it not be desirable to adopt the same plan with regard to the vine? I am not prepared to give an opinion on that point.
349. Have you had any experience in the growth and culture of apple trees? Very little.
350. Mr. Forster.] How long have you paid attention to this subject? I have read on the subject of the *oidium* for the last ten years. I have read every work on the subject which I could obtain.
351. And how long is it since you have become personally acquainted with the disease? Only within the last twelve months.
352. You know it well, however? Yes, I believe so.

353. Under the microscope there is no difficulty whatever in recognizing it? No P. F. Adams, Esq.  
difficulty whatever. If you bring out the spores by the aid of a powerful microscope, no one can be deceived.
354. If inspectors were appointed previously unacquainted with the disease, it would be easy to train them to such a knowledge of it as that they could not make a mistake? 26 Feb., 1869.  
I think so.
355. It is so easily recognizable that no owner of a vineyard need remain in ignorance of it? Yes, I think so.
356. A perfect acquaintance with the disease is very easily acquired? It is.
357. It is only since the disease has broken out in this Colony that you have become acquainted with it from personal inspection? That is all.
358. Have you any idea whether the disease has been very widely spread over the Colony? I think it may be said that, as a general rule, it has gone all through the northern districts of the Colony, from Queensland as far south as Illawarra. We know that it is in the Bukkulla vineyard, on the Macintyre, and it has been heard of in the most remote localities of the Hunter River valley.
359. It has come to this Colony from Queensland? I believe so.
360. How has it been brought into the Colony—by contact, by the importation of grapes or cuttings, or by being borne on the wind? I am not prepared to say how it has come, but we know very well that it is here. Very probably it has been carried by the winds to those parts of the country towards which the prevailing winds blow. The north-easter is a prevailing wind, and, blowing from Queensland to this Colony, very probably the spores have been carried over by it, and disseminated the disease.
361. Is there any limit to which this disease may extend—may it not be carried by the wind all over the globe? I think it might. That is the only way in which we can account for its going from Europe to the Cape.
362. It is known at the Cape? Yes. It made its appearance there only two years after it showed itself in Europe. At the same time, I am not prepared to say positively whether it travelled there upon the winds, or whether it was imported.
363. Do you think it possible that the disease may have come to the Colony from the Cape? It seems almost impossible, but I should not like to say that it has not.
364. Is there any probability of its having arisen spontaneously? That I am not prepared to say; it is a question I am not qualified to answer.
365. Are you aware whether or not the disease has been known in the Colony many years ago? I have never been able to detect it, and I have been looking for it for years, almost since its first appearance in Europe. In the year 1860, or 61, I examined a plot of vines, in the Albury district, which had been injured by disease, but I was unable to trace the *oidium*.
366. Do you think the disease is capable of being communicated to a vine in any state, whether cultivated or growing wild—and by growing wild, I mean the same species of vine as that which is cultivated, only in a wild state? I think it makes no difference whether cultivated or growing wild.
367. Is it capable of being communicated to other plants not belonging to the same species as the vine? That I cannot say.
368. You have never seen the native vine which grows in the bushes of this Colony? I have not.
369. Have you ever seen anything at all like a grape-vine growing in the bush? I have not had an opportunity of examining the plants closely enough to say.
370. Do you think that direct contact, or bringing diseased vines or cuttings into a vineyard, and in close proximity to the healthy vines, would be likely to communicate the disease? I believe that, under those circumstances, contagion would be certain. I believe that a person merely walking through a diseased vineyard would carry the contagion on his clothes for hundreds of miles.
371. Then, in your opinion, contact by woollen clothes would be the most easy means of infection? Certainly.
372. I think you spoke as if there were no limit to this means of communicating the disease—you spoke of its being carried hundreds of miles? Yes.
373. Do you think that the disease we have here is the same as that known as the *oidium* in England? I have no doubt about it. It is in every respect the same as that described by Mr. Moore in his paper—the drawing taken from an encyclopædia.
374. Do you not think that, before we legislate upon this matter, we should be satisfied as to the possible exhibition of the disease upon other plants. Though we might legislate for vines, it would be impossible to legislate for all other plants, if it be shewn that they are likely to contract the disease? If it can be shewn that the disease is transmittable to other plants, legislation would be useless.
375. Then would not legislation be rash until this point has been ascertained with certainty? Certainly.
376. Are you not aware that there are many diseases in fruit trees which have in the first instance, made their appearance in the brushes? I was not aware of that.
377. For instance, take the diseases in peaches. There is one very common disease which shows itself by the development of large maggots in the peach? Yes, I have seen it.
378. Are you aware that that disease is said to have originated in the brushes? This is the first I have heard of it.
379. You say that the *oidium* is a fungoid disease, and that the fungi shew themselves most in moist seasons? Yes, moist seasons appear to favour the development of all kinds of mouldy growth.

P. F. Adams, Esq.  
26 Feb., 1869.

380. Has not this been a remarkably dry season? No, not on the coast line, although all the climate beyond the coast range has been remarkably dry. On the eastern side of the range the hygrometer has shewn a large amount of moisture in the air. Thus the hygrometric state of the atmosphere during the late drought has been highly favourable to the development of all fungoid growths.

381. Then we have this remarkable fact,—that whilst the country has been suffering severely from a protracted drought, the atmosphere has continued moist? Yes, on the coast line.

382. The moisture of the atmosphere has been very great, although there has been no fall of rain? Yes, very great, particularly in the mornings. This moist state of the atmosphere has held the spores of the *oidium*, and the disease has thus been borne on overland before the prevailing north-east winds.

383. Have you noticed that similar diseases of a fungoid character, existing on other plants, have been propagated or disseminated by a peculiarly suitable condition of the atmosphere? That I am not prepared to say.\*

384. The rust in wheat, for instance? I am not prepared to say whether the rust in wheat (which is a fungus, I believe) or any other fungoid growth has been actually developed by the peculiar state of the atmosphere, for I have not taken sufficient notice to enable me to say; but I should imagine that the growth of all the moulds would be favoured by a humid atmosphere.

385. Could you undertake to say whether the communication of the disease to the various vineyards of the Colony has been the result of the late peculiar season, or to what extent has it been due to the humid atmosphere? I cannot say that the disease was caused by the season, but I think its effects were much aggravated by the state of the atmosphere at the time it first made its appearance. The atmosphere was more moist and humid than usual at the time the disease was first observed, and that, doubtless, caused it to spread with greater rapidity.

386. Have you any statistics to give, or any data to lay before the Committee, with regard to the effect of the state of the atmosphere upon these fungoid growths—Whilst one state of the atmosphere is favourable to it, does another destroy it, or affect it in such a way as to make it less injurious to the vines? The hot winds have a very powerful effect upon it. The hot wind we had, I think the day before Christmas Day, seemed to me to completely stay the progress of the disease in one garden in which I saw it. There is, however, a doubt in my mind, whether the stoppage of the disease was caused by the hot wind, or whether it was not due to the dust which had been brought up by the strong southerly wind of the day before, and which had thickly coated the leaves of the vines.

387. In that case, if we applied dust or hot air to the vines, we should destroy the disease? You would check it, but not destroy it.

388. The application of air heated to a certain temperature will destroy fungi of all kinds? Yes, certainly.

389. Then, the application of a certain amount of heat to the vine would destroy the *oidium*? You would destroy the fungus, but you would kill the vine too.

390. Do you know if cold will destroy the fungoid growth? I do not think it would have any effect.

391. Not even the application of a temperature below zero? I do not know of any country in which the *oidium* has had to contend with a temperature below zero.

392. But supposing that it could be applied, do you think it would have any effect upon the vitality of the fungus? I am scarcely prepared to answer that question.

393. Do you think our knowledge of the disease, as it at present exists in the Colony, warrants us in legislating upon the subject? I do not think it does.

394. And do you not think that we shall be going to too great a length, if we place in the hands of a number of officials, persons who are not scientific men, the duty of inspecting the vines, and of determining whether they are affected with this particular disease? My own opinion is, that we do not yet possess sufficient information to warrant us in legislating upon the subject.

395. Would you, as a vine-grower, prefer to be let alone? I would.

396. And is that the general opinion? Yes; the general opinion amongst the vine-growers is, that it would be much better for the Legislature to leave us alone for a time, or at all events, until we can see what the effect of another season will be upon our vineyards.

397. *Mr. Mate.*] Since you have examined the leaf now before the Committee, with the lens, you are not quite sure whether the mouldy appearance on it is the *oidium* or not? I certainly have my doubts about it.

398. Are you not aware that the disease assumes different appearances at different stages of its development? Yes; but the peculiar appearance of the spore is an unmistakable evidence of the *oidium* at every stage of its development. It requires a good microscope to see them plainly, but once seen, the *oidium* can be identified without difficulty.

399. But looking at the stock affected, would not the disease have a different appearance on a plant which was in full vigour, and which it had only recently attacked, to what it would have on a plant which was sickly, and had been for some time overrun with the disease? I do not know that there is much difference.

400. The plant dies away gradually, and then the fungus assumes a different appearance, when the disease is in full force, to what it presents on that leaf? The disease when in full force has not precisely this appearance, but there is very little difference.

401.

\* NOTE (on revision).—I can affirm that most moulds are both propagated and disseminated most rapidly in damp, warm atmospheres.

401. If inspectors were appointed, they would have to study all these matters? Certainly. P. F. Adams, Esq.
402. And to be provided with microscopes, so as to leave no doubt on their minds? Yes.
403. Mr. Forster.] Is it your opinion that healthy vines are more susceptible to the disease than are unhealthy vines? I do not think there is any difference in the susceptibility to disease, but the unhealthy vines certainly show symptoms of destruction more quickly than the others.
404. Mr. Nowlan.] You state that you have not the least doubt that the disease which has made its appearance here is exactly the same as that which is known in Europe as the *oidium*? I have no doubt of it.
405. Are you aware of the precise date when it was first seen in England? I think it was in 1854.
406. Earlier than that. I think you will find the date to be 1845? I cannot undertake to say the precise date.
407. According to reliable accounts, then, they have had in Europe an experience of twenty-four years in this disease. Do you not think that, during an experience extending over that long number of years, the nature of the disease has been thoroughly ascertained by the scientific men of Europe? Yes, certainly, and all that science can do has been done there.
408. Then, can any experience we can possibly obtain in this Colony be likely to throw any more light on the subject than that we now have? We might perhaps, by accident, obtain some further experience, but I think not.
409. Then, when you say that it is not desirable to legislate upon the subject until we have acquired more knowledge than we now possess of the nature of the disease, I do not well see how you apply that remark. The disease is well known in Europe, in every way, and the most effective mode of treatment has long been agreed upon. All that they know there we can know here by reading, and the only thing that we really have to learn is, to recognize the disease. I mean by that, that the vignerons generally should be in a position to recognize it when they see it. I presume that what you mean to convey is, that you think legislation is not necessary, because of our improved knowledge of the disease? As far as I can see, European experience has never suggested legislation on the subject. If we are to be guided by that experience, we shall not legislate either, for I know of no country in which a law is in force for dealing with the disease.
410. What I mean is, whether we cannot here avail ourselves of the knowledge acquired in Europe during an experience of twenty-four years—Having the results of that experience before us, is not our position here the same as that of the vignerons of Europe? I scarcely think it is. They are in a better position than we are, to decide whether legislation is necessary or not, and they have not adopted it.
411. I do not speak with reference to legislation, but to the nature of the disease? My impression is, from my reading, that they have tried all that science can do in Europe, and that everything has been found powerless to exterminate the disease.
412. But we can surely do here all that has been done in England? I do not know that, for we have not the same scientific skill here that they possess. On that account, I would prefer following the results of their experience, rather than attempting to legislate for that which we do not understand so well as they do, and for which they have not legislated.
413. The vine-growers knew of no remedy when the disease first showed itself? No.
414. When it appeared in Madeira, the owners of vineyards did nothing, I believe? Nothing. They appear to have been paralyzed, and let the disease take its course. At the Cape it was the same thing, according to the description given by Mr. Cloete. He visited that Colony recently, and made the disease the subject of very careful study. He gives some most remarkable instances of the effect of the infection.
415. Then, with reference to the way in which you suggest that the disease has been introduced into and spread over the Colony—you think that this has been by means of the spores of the fungi being carried by the wind from some infected vineyard over which it has passed? That is mere matter of conjecture.
416. But there is no conjecture about the certainty of the introduction of the disease by cuttings? None whatever.
417. There has been some question whether the spores would exist or would retain their vitality after a voyage from Europe? That is not known.
418. Are you of opinion that the disease is spread from vineyard to vineyard, rather than that it is conveyed by the winds to an indefinite distance? I am rather inclined to believe that it has been brought here by the wind. In passing over an infected vineyard, the wind picks up the seeds as the spores burst, and carries them onwards for hundreds of miles, disseminating them in its progress over the country.
419. That is mere matter of opinion? Precisely.
420. Supposing it to be the case—how do you account for the fact that the disease has not by this time reached Albury? In this way:—The prevailing wind since the disease appeared is the north-east, and that blows directly from Queensland down the coast to Sydney, and further southward; that wind does not cross the great coast range, but dies out about Goulburn, in the Albury direction; thus the seeds have not yet been carried beyond the coast range.
421. Goulburn is nearly the extreme end of the influence of the north-easter? Yes.
422. Is it probable that the coast range will intercept the disease, and prevent its spread into the interior? No; but I should imagine that the disease having reached Goulburn, will only travel very slowly in the direction of Albury; but I am confident that sooner or later it will be there, and I believe that it will be in every vineyard in the Colony before three years have passed.

- P. F. Adams, Esq. 423. Have you heard of the disease having made its appearance in California? I have not.
- 26 Feb., 1869. 424. The trade winds extend over to the coasts of that country? They do.
425. I believe the disease took several years before it had overspread all the vineyards of Europe? Yes, about four years.
426. Or more? It appeared first in 1845, and it was 1851 before it had reached the Bordelais. In 1848 it was in Paris, and in 1849 it had spread over the north of France. In 1850 it appeared in Languedoc and in Spain; and in 1851 it reached the Bordelais; so that you see it travelled but slowly? Yes; but in no part of Europe have they such a direct prevailing wind as we have in this Colony in our north-easter.
427. You spoke about the stocks of sulphur on hand. Are you aware that sulphur in any quantity may be obtained from the islands of the Pacific? Yes, it may be obtained for the gathering in Tanna, and in some parts of New Zealand. There is no limit to the quantity, but it will require to be sublimated in the first place.
428. That is not a difficult or expensive process? No.
429. *Mr. Tunks.*] In the event of legislation being adopted in this Colony, would it not be altogether useless unless the other Colonies joined us in passing prohibitive measures? Certainly. If Queensland does not stamp out the disease, I believe it would be altogether useless for us to attempt to do anything either for prevention or cure.
430. If, for instance, an ignorant man has a vine diseased in the same way as that exhibited to the Committee, and refuses to believe that it is the *oidium*, that would perpetuate the disease? No doubt, unless the action be general, it will be useless.
431. Is it not just possible that an indefinite cause of dissemination may have existed in the boxes of specimens of vines which have been imported into the Colony? Yes, I believe cuttings from diseased vines would disseminate the disease.
432. Are you aware that such importations have taken place since the legislation prohibiting them has been passed? I am not; but I should be more afraid of infection from the clothes of a person who had passed through a diseased vineyard.
433. You think that the disease is carried in this way to every part of the Colony over which he may chance to travel? Yes, and will remain in his clothes for an indefinite period.
434. Do you think that this disease, like many other similar scourges which have appeared from time to time, will run its course and then die out? I hope so.
435. It is more virulent at one time than at another? Yes.
436. And is less active at certain times than at others? Yes; such is generally the case, I believe, with all the fungoid growths—they have their course either shorter or longer, and then die out.
437. Would it, in your opinion, be desirable to cultivate different sorts of vines from those now used, or to restore the stocks by growing plants from the seed? Judging from my own experience, the difficulties of propagating new species of vines lies in the waste of time and labour before a good kind of new vine is procured. Enormous numbers of seedlings have to be grown, tended, and cultivated up to the period when they ought to bear fruit, and then the majority of the plants will be found barren; and of those that do bear fruit, not one in a hundred perhaps will bear even a passable grape. There is the long time to wait for the fruit, the expense of tending and cultivating, and then the probability that after all there may not be one good plant out of the whole of the seedlings you have raised.
438. All this forms the difficulty in the way of rearing plants from the seed? Yes.
439. But this difficulty is not insuperable? No, not at all.
440. *Mr. Mate.*] You lived some years in Albury, I believe? Yes, five years.
441. Did you notice, when you resided there, that the north-east and east winds seldom prevailed there? Very seldom.
442. And you think that, on that account, the disease is not likely to spread so rapidly as in other parts where those winds prevail? Yes, I have said as much in answer to a previous question.
443. *Mr. Suttor.*] With regard to your objections to growing from seedlings, might not all these seedlings be used as stocks on which to graft or bud from the favourite kinds of grape? I do not think that would be of any advantage.
444. There would be the advantage of having a new and sound root for the plant? I do not think it would have any effect in checking the disease.
445. *Mr. Farnell.*] If you require a new kind of vine, you would have to propagate plants from the seed? Yes, that is the only method I know of.
446. Merely sowing the seed, and then grafting, on the stock thus procured, a scion from an old plant, would not be of any advantage, for you would only propagate the same description of grape, with all its inherent defects? I think so.
447. Would it really be any improvement to graft a scion of a worn-out sort on to a new stock raised from a seedling? I am scarcely qualified to give an opinion on that point.
448. If you were to lay the wood of the grape-vine in the same way that you lay the orange plant, do you think that a vine propagated in that way would be more vigorous than one grown from a cutting? I do not think there would be any difference in the vigour of the plant.
449. You think, then, that you get a vine to suit all purposes when you raise one from cuttings? Yes. The object is to get a fully developed stock as soon as possible, then graft a better kind of vine on to it, and so get our fruit more quickly and better developed.
450. Then, is the wine that is made from a cutting grafted on to an old stock, an improvement on the wine that would be made from a cutting planted in the ordinary way? No; we

we employ grafting simply to take advantage of the developed roots of the old vine, to get our scion into full bearing two or three years sooner than it otherwise would be, and not for the improvement of the plant. P. F. Adams,  
Esq.

451. Is there any difference in the quality of wine made from a three or four year old vine, and that made from a vine fifteen or twenty years old? Yes, in all very young vines the must is not so good as the must from older vines. I cannot say, however, that the must goes on improving up to twenty years of age. I should think not. I should imagine that the wine from a vine of about six years old would be quite as good as one twenty years old. But the first year's must from a vineyard is never so good as that which succeeds it. 26 Feb., 1869.

452. Do you use manure to your vines? No, except to those in the garden.

453. That is, for the table grapes? Yes, but not for the vineyard.

454. Have we soils in the Colony suitable for the growth of the champagne wine? I am not aware what particular kind of soil this wine is grown upon.

455. *Mr. Nowlan.*] Do you think that sulphuric acid diluted with water would be as cheap and as effective a dressing for vines as the sublimated sulphur? I do not think it would meet the requirements of the case at all, because sulphurous acid is the active principle employed to destroy the fungus. Sulphuric acid is a different product. It was once sulphurous acid, but changed into sulphur by the absorption of more oxygen.

456. Then sulphurous and not sulphuric acid is the specific? Yes. Sulphuric acid will have scarcely any effect.

TUESDAY, 2 MARCH, 1869.

Present:—

MR. TUNKS,  
MR. SMART,  
MR. W. H. SUTTON,

MR. NOWLAN,  
MR. PHELPS,  
MR. LACKEY.

THOMAS HODGES MATE, ESQ., IN THE CHAIR.

Peter Lawrence Cloete, Esq., called in and examined:—

457. *Chairman.*] It has been intimated that you can give some valuable information to the Committee with respect to this disease in the grape-vine. I believe you have lately visited the Cape of Good Hope? I have. P. L. Cloete,  
Esq.

458. Have you had opportunities of seeing the disease? I have seen the disease itself. 2 Mar., 1869.

459. At the Cape? Yes.

460. Have you also seen the disease here? I have also seen it here.

461. Do you think the two diseases are identical? I do think so. I went to Mr. Wright's, on the Parramatta River, purposely to see it.

462. Can you inform the Committee what remedies they apply at the Cape for the cure or checking of the disease? They use the sulphuring solely. Sublimated sulphur is applied the moment the disease makes its appearance.

463. Is it there considered a disease so damaging to the crop of grapes as to require legislative enactment for its prevention or cure? No, there is no legislation on the subject, nor did I hear that there was a necessity for it.

464. *Mr. Tunks.*] You stated, Mr. Cloete, that you had paid some attention to this matter? Well, I took a very good look at it when I was at the Cape, for the purpose of identifying it if it should come here.

465. Look at the drawing in that book (*American Patent Office Reports*, 1853)? That would seem to me to be largely magnified. As I saw it, it appeared to me more like threads. I did not notice it in the egg-shape like that.

466. Have you any such knowledge as to be able to furnish the Committee with a history of this disease? I have not. I have paid no attention to it whatever, except a practical observation,—carefully looking at it, so as to be able to identify it, should it come under my notice again.

467. Did it devastate the crop of grapes at the Cape? Yes. Several hundreds of acres of fruit-bearing vines were entirely destroyed by it.

468. Did you notice whether it was more injurious to some kinds of grapes than to others? No; I should think difference in kind had very little to do with it; I imagine the condition of the plant itself had more to do with it.

469. The state of the plant's health? Yes, the healthiness or unhealthiness.

470. Were the vines you speak of imported or raised from seed at the Cape? They were all raised there.

471. From seed? No, cuttings. With the exception of some lately introduced cuttings, the "Constantia" consists of old vines introduced by the Dutch.

472. That is, the European sorts? Yes.

473. Can you give me an idea of what you mean by the state or condition of the plant? I think vines in a healthy state, and well cultivated ground, would not be so liable to be affected by the disease; as the healthy strong plant would be likely to throw it off—more so than weakly, old vines.

474. Can you furnish us with any idea of the date at which this particular kind of grape was first cultivated at the Cape? It was shortly after the revocation of the Edict of Nantes when the French Huguenots left France.

475. How many years would that be ago? About 180 years or more—I cannot speak positively on that point. It was introduced by the French immediately after the revocation of the Edict of Nantes. 476.

- P. L. Cloete, Esq. 476. It is your opinion that the vines would constitutionally die out, or what would be the course of their unhealthy condition? These identical vines have not lasted that time; they are of the original kind, but the old vines are pulled up.
- 2 Mar., 1860. 477. And have rooted afresh? They lay in fresh cuttings every year.
478. Would vines raised in that way be reinvigorated equally with those raised from seed? I have not known any vines raised from seed, and therefore I cannot speak on the subject.
479. The sort there must have originally come from seed? Of course, but where the origin was I cannot say.
480. Do I understand it to be your opinion that, whether raised from cuttings or from seed, the plant receives new vigour as if raised from seed? When a plant gets old, after many years' bearing, it begins to decay; and old vineyards will not bear like young ones; so they are taken out, and new ones put in every year.
481. Then, the condition of the vine, deteriorated from age, would render it a fit home for these parasites? It might or might not; I do not know that there was any distinction made there. Some vineyards never got it at all, while others quite close got it very badly.
482. Did it affect the wine, do you know? At the Cape they told me not; at Madeira, I was told that it did.
483. The mixture of the dressing with the grapes? Yes, I was told so at Madeira.
484. Have you any idea how long they have known the disease at Madeira? The vines were all destroyed there about eighteen or nineteen years ago; perhaps not so much as that.
485. In 1854 was it? Very likely. And at the Cape about six years ago.
486. Has it been ascertained by what means the disease is conveyed about from one place to another? No.
487. You have stated your opinion as regards legislation on the subject? Yes.
488. You are not favourable to it? I think you only asked me if there had been legislation at the Cape on the subject.
489. In your opinion, do you think it desirable for us to legislate upon it? Merely as a matter of opinion, I should think not.
490. *Mr. Suttor.*] From your experience of vines and trees generally, have you not found that, when they are in a weakened and sickly state, they are more likely to be attacked by insects or fungus? I have already stated that vines in a weakly or sickly condition are more liable to any disease.
491. What remedy did they adopt at the Cape? Simply the sulphuring.
492. Was there any other preventive? No. It has become a regular portion of the annual work connected with the vineyards, as much as planting cuttings or anything else. They generally give a sulphuring at the very commencement, when the grape is forming, on the first sign of disease.
493. You say that many hundreds of grape-vines were destroyed just before they knew how to cure the disease? Yes. They might have had the disease for several years before they knew it.
494. They are in a fair way of eradicating it at the Cape? Yes. They are preventing it, but not eradicating it, because it comes there regularly every year, more or less. Some vines do not take it, and some only a little.
495. Then, you think that, when it is completely cured this year, it will break out again next year? Yes.
496. Then legislation on the subject would be perfectly useless? That is the reason with which I gave an opinion to that effect. It does not affect the crop when taken in time; the grape fructifies, and the vineyard is not injured.
497. Then your opinion is, that it can be cured, but not prevented? Yes, and easily cured if taken in time.
498. You have no doubt whatever that the disease we have here is the same as that at the Cape and at Madeira? Not the least. It does not appear to me to be so bad here as at the Cape.
499. Do you think that may arise from the vineyards here not being so old? It might arise from that, and perhaps having only just arrived here it would not be so bad yet.
500. From your knowledge of fruit trees here, do you not think it very likely that when they get into a state of decay they become more liable to be attacked by parasites or fungus? I should certainly think so.
501. *Mr. Lackey.*] I think I understood you to say that, at the Cape, the old vineyards were frequently eradicated, and new plants put in their stead? Yes.
502. About what age are they allowed to attain before that process is carried out? I suppose about thirty years and over.
503. Would these be vines grown from cuttings? Yes, grown from cuttings.
504. You have never known this disease to be prevented from attacking any particular vineyard by the use of sulphur? No.
505. The sulphur is always applied after the disease shews itself? Yes, after the disease has shewn itself. It is a cure, but not a preventive.
506. And this a generally admitted fact? Yes.
507. Have you ever known the berry of the grape to be destroyed after sulphur had been used? If it was used too late; but otherwise the disease very soon dies, the husk of the berry begins to shine, and the growth goes on.
508. *Mr. Phelps.*] You mention that at the Cape they seem to consider that the disease had an effect upon the wine? At Madeira.
509. Did they use the sulphur at Madeira? Yes.

510. And anything else? And nothing else.

511. *Mr. Nowlan.* Are you aware of the date when the disease made its appearance first at the Cape Colony? No, I cannot say, and I do not think they can say, for, by the destruction it caused, it had very likely been there two or three years before it was discovered; and when they did find it out, it probably was not at the worst.

512. Have you heard of its introduction being accounted for? No.

513. You never had any speculations on the subject? No. They seem now to take it as an expected fact.

514. It is productive of great loss there? Yes.

515. Have you known any instance of vineyards being cut up entirely, owing to this disease? No.\* They have been rooted up, turned into paddocks, and sheep put on them.

516. Have you heard from any of the vineyard proprietors, that they suffered from neglect of neighbouring vigneron in not arresting the progress of the disease? No.

517. You said sulphur is considered a remedy if used freely at the outset—Have you ever heard any complaints from vigneron that their neighbours did not pay this attention to their vines? No. On the contrary, I remember asking a cousin of mine about his neighbours, and he said he did not know whether they used this remedy, but if they did not it was to their own loss.

518. From what you have heard of the disease, and know of it, do you think that, if the Cape colonists had been aware of the character of the disease before it reached them, had noticed it from its first appearance, and were aware of the sulphur remedy, they would have made a decided effort to get rid of it from the country? If they had known the remedy, no doubt they would at once have adopted it, and have saved their vines.

519. You think they might have done so? Yes, certainly.

520. Do you think our position is analogous to that of the Cape, considering that we were aware of the disease before it reached us, from experience of it in Queensland, and also knew of the sulphur remedy? No; I think the circumstances of this Colony quite different, because here you receive the disease under the most favourable circumstances. You know the disease and its remedy, and if a man loses his vineyards, it is his own fault.

521. Although legislation would be inoperative in the Cape Colony, do you not think it would have beneficial results here, by compelling the people to adopt the course considered to be most desirable, of taking united action against the disease? I do not think that would make much difference. You naturally suppose that every man who owns a vineyard will do his best to protect it.

522. You arrive, then, at the idea that self-interest would be sufficient? Yes. If a man's neighbour did not adopt the means of remedy, it would not affect him any the more.

523. Do you not think the disease is conveyed from vineyard to vineyard? I am not prepared to say that; but I do not think the fact of a man having a vineyard perfectly clean would prevent the next man having the disease among his vines.

524. Then you are not perfectly satisfied how the disease is communicated? No. I have not studied the subject, but merely took notice of the disease so as to be able to identify it.

525. Is it the practice in that Colony to uproot the vines at twenty years of age? There is no fixed number of years. It depends upon how the vineyard is worked, and upon the soil. But when the vines reach a certain age, they do not bear so well, and new vineyards are planted.

526. Have you any knowledge of the oldest vineyards bearing? Yes, there is one of those originally planted there.

527. How long ago? Upwards of a hundred and fifty years.

528. That vine is still flourishing? Yes.

529. You have heard of the old vine at Hampton Court? Yes, I saw it.

530. How old is that? About one hundred years, I believe.

531. And bears very well to this day? Yes, I believe so. If the Committee wish it, in order to obtain information upon any particular portion of the subject, I could write to Mr. Cloete of Constantia for it, and get the whole history of the disease as known at the Cape. He could not only give the history of the grape from its first introduction there, but, being in correspondence with every leading vine proprietor in Europe, he would be able to give full practical details.

532. How long would it take you to communicate with that gentleman? Four or five months. I can get the history of the grape from its being first planted there, tracing the appearance of the *oidium* and its treatment.

533. *Chairman.* Did you learn at the Cape whether the sulphuring of the grapes had any prejudicial effect on the sale, or upon grapes for the table? No.

534. Do they consider it at all unwholesome? No, and I never tasted it myself.

535. Are you a vineyard proprietor? No. We were. My own father planted a vineyard, and they were all destroyed by the disease.

536. You are not the proprietor of a vineyard here? No.

537. *Mr. Nowlan.* In the vineyard you say was destroyed by the *oidium*, were remedial steps taken at the outset, or was it allowed to get a firm hold of the vineyard before the sulphur was applied? It got a firm hold before the disease was known, and had probably been there two years or more.

538. They noticed the unproductive crops? Yes; and, by the decayed appearance of the vine, they knew what it was.

P. L. Cloete,  
Esq.

2 Mar., 1869

\* NOTE (on revision):—Yes. I have heard so.

- P. L. Cloete, Esq.  
2 Mar., 1869.
539. Then, when they found what the disease was, and knew the remedy, it was too late? It saved a good many, but in this instance it was too late. In some cases where the vines were in a more healthy state, they were not so badly attacked, and these were saved. No doubt here some have it worse than others.
540. Are they not under the impression that, when sulphur is used at an early stage, it is efficacious in getting rid of the disease? Yes.
541. Although it recurred the following year? Even the same year. I saw grapes on the point of ripening, in the beginning of January last year, having had *oidium* when small, and having been sulphured, attacked by *oidium* again. The sulphuring again disappeared, and the grapes ripened.
542. Do you recognize anything remarkable in that bunch (*small cluster of grapes handed to witness*)? It seems to be attacked by *oidium*.
543. It has a peculiar smell, has it not? It has disappeared a good deal from this.
544. It is stated to be a bunch of second crop affected by the disease, and the first crop had been cured and sold in this market? Yes.
545. Are you aware whether people would now be prevented from planting new vineyards (with the knowledge of sulphur as a remedy), from the fact of the disease being new in the Colony? On the contrary, every one that can afford it has replanted; and, the year I was there, they were first getting the new crops from the new vineyards.
546. They have nothing to fear? They have a certain knowledge of the disease, and of the remedy.
547. Have you any knowledge of the expense of planting a vineyard, per acre, at the Cape? I could not say exactly.
548. Mr. Lackey.] It is done by manual labour, I suppose—trenched with the spade? Yes, and then worked with the plough.
549. Mr. Phelps.] What is the particular grape grown at Constantia? It is a muscatel grape. The particular grape generally grown everywhere is one they call the *stein* grape—what the French call the *folle blanche*—a small grape, closely clustering.
550. Chairman.] What colour? Greenish white.
551. Mr. Phelps.] Was sulphur used in the early attack to extinguish *oidium* there? I fancy not.
552. Do you know it exists now at Madeira? I am informed so.
553. And sulphur is used there? Yes. They say it rather affects the wine. I was told that, on this account, they did not allow the wine to ferment so long in the husk.
554. Mr. Tunks.] Have you ever heard of the mildew spoken of in these Patent Office Reports, as existing in the United States? No, I cannot say that I have.

---

Jules Joubert, Esq., called in and examined:—

- J. Joubert, Esq.  
2 Mar., 1869.
555. Chairman.] Are you a vineyard proprietor? I am a grower of vines, but can hardly call myself a vineyard proprietor.
556. You have had opportunities of seeing the disease in the grape-vine? Yes.
557. And took some interest in it? Yes.
558. Will you be kind enough to state to the Committee your knowledge, as far as it has gone, of the disease, and your opinion of the best means that could be adopted for the cure or prevention of it? The first appearance of disease I noticed in my vines was in the spring of 1867-68. My vines are divided in three different trellises, and one of them was affected partially. I called the attention of several people lately arrived from home to the disease, thinking that it was *oidium*. The matter was poo-pooed; and gentlemen of authority in such matters—such as Sir William Macarthur, and others—attributed the appearance of the disease to the want of drainage. As it so happened that it was in the only part of my garden not drained, I did not take any further notice of the complaint, until reading Mr. Coxson's report of the *oidium* in Queensland, which led me to believe that the disease was to all intents and purposes the *oidium tuckeri*. This year the disease made its first appearance in these vines, and in forty-eight hours spread over the whole of the vines in the garden. I then applied the sulphur, and the disease was checked almost instantaneously, owing to the atmospheric influence of two or three hot days that followed the application. Since the formation of the Agricultural Association, application has been made to France for information of the disease, and that information was received four or five months ago, and entirely corroborated all that I had noticed in my vines and those of my neighbours, both as to the appearance of the plant and the means of cure. Some valuable information on the subject, from the Minister of Agriculture in Paris, is expected by the next mail, and then I think we shall be able to afford you some further knowledge of the disease and its treatment.
559. You can put it as an appendix to your evidence? Yes, translated. We have received Maré's work, which arrived in last September. It contains information as to the progress of the disease in France, and its cure. But it is small as compared with the information which the Minister for Agriculture has forwarded to the Society. But here some interesting information is given. There is this remark as to the necessity of applying the remedy:—"Since the beginning of the vintage we have been able to ascertain the immense evil caused by the *oidium* this year (that is, since 1855), in the vineyards in our department, particularly where it has not been cured. In a great number of "departements" the crop is nil, or nearly nil; it will be the worst we have seen, without even excepting the year 1854, of sad memory for our vine-growers. The vines of those who rationally use the sulphur are the only exceptions. These alone, or nearly

nearly so, will produce grapes of sufficient quality and quantity. This result, which is general, has induced a real mania for the application of sulphur. Stores are already being laid up for next year, although double the former price is paid. The country people are opening their eyes. "We long," they say, "to see next year, in order to sulphur our vines. As to adversaries of this means of checking the disease, they are now very glad to be able to make use of this agent for curing their vines, and they keep silence. The most remarkable results are those obtained in the parish of Frontignan. I have insisted very strongly that the proprietors there should sulphur their vines, and went to many to assure myself that the operation had been carried out. The success is complete, and has not failed anywhere, whatever may be the intensity of the disease. The results have been the same here as those I witnessed at many places in 1855. They are the more remarkable, as the territory of Frontignan was never attacked before this year. I went, on the 12th of this month, to witness the state of the vines, and found everywhere the most complete ruin. A great many of the vines will not yield any crop. The parts sulphured, decimated among others, presented on the other hand, fine vegetation and perfectly healthy fruit. This is the spot that should be brought under the notice of the Inspectors of Agriculture, and those who complain of being ruined by *oidium* and refuse to use the remedy against it. They are now, however, edified in that department; everywhere the complaint will be fought against vigorously; and as the price of sulphur is likely to rise excessively, I am happy to see that manufactories have been established at Montpellier and in its environs. Thus this question of the cure of the disease is completely solved in conformity with the views of the Imperial Central Society of Agriculture, and the results obtained have been put into practice."

J. Joubert,  
Esq.

2 Mar., 1869.

560. Do you think that, if it becomes generally known here that sulphur is so excellent a remedy, vine-growers will be sufficiently alive to their own interests to use it, without compulsory legislation? I am afraid not. I think the large proprietors, for the sake of their own crops, will apply the remedy—we find it so in our immediate neighbourhood; but a great many of the small proprietors would sooner lose their crops than use the remedy, although it is inexpensive; and their carelessness naturally endangers the rest of the vines.

561. In consequence of the refusal of these proprietors to apply the remedy? It is my opinion that one vine may spread the disease over a hundred acres of vines.

562. *Mr. Nowlan.*] You are the Secretary to the Agricultural Society? Yes.

563. Had you any knowledge of the *oidium*, from experience in France, or in other countries, before its appearance here? No.

564. Have you read on the subject, and have you informed yourself of what has been done in other countries in reference to the disease? Yes.

565. Have you been in communication with any of the Societies in France? Yes.

566. With a view to getting information? I have just read some extracts from a book which I got from the President of the Imperial Society of Agriculture in France.

567. Have you been in communication with the Minister of Agriculture in Paris? Yes, I have so stated.

568. From what you know of the disease, do you know it is peculiar to the grape, or do you think it attacks other plants? From experiments we have made here, and backed out by the works we have consulted on the subject, I am positive that the *oidium tuckeri* will attack the vine only. We have tried to communicate other diseases to the vine, and *oidium tuckeri* to other plants, and have not been successful. But I believe persons could be readily mistaken in taking other diseases for the *oidium tuckeri*. The best authority, Dr. Berkeley, acknowledges his error in mistaking other fungi for the *oidium tuckeri*.

569. Can it be detected by means of the naked eye? No, only by the microscope, at a particular period of the germination of the spores from the bodies that contain them. Griffith Henfrey's "Micrographic Dictionary" gives the *erysiphe* as the nearest to *oidium*, but shews the particular time when you can detect the one fungus from the other. By Dr. McKay's microscope we have seen the difference, and where is the line of demarcation between the two. Experiments made here by the scientific committee of our Society have shown, in the most undeniable way, that the *erysiphe* put in contact with the vine will not attack it.

570. Have you any idea of the date when the disease made its first appearance in France? It is doubtful. In 1849 and 1850 it began to attack the vines of L'erault; and two years afterwards, the extent of the disease was so great that, in many parts of this department, and in Médoc, the question was mooted of uprooting the vines and planting oranges instead.

571. Do you recollect when it was first introduced into England by Tucker? I think it was in 1849 or 1850. I think Mr. Moore gives us that date. It was, however, between 1845 and 1850.

572. Are you aware by what means it is supposed to spread? The floating of the spores after arriving at maturity. These bodies burst open, and the sporules they contain are wafted by the air. That is easily detected by the microscope.

573. It is communicated from vineyard to vineyard? Yes.

574. It is not owing to climatic influences, or to the season? I believe that climatic influence has a great deal to do with it, and tends more or less to the spread of the disease.

575. But it does not originate from climatic influences, although they may tend to its spread with greater rapidity? It is one of the mysteries of nature, and I am sorry I cannot answer you; but I believe the disease may first be created by climatic influences.

576. Judging from the history of the disease, as far as you know, would it not appear all over

J. Joubert,  
Esq.

2 Mar., 1869.

over the country and continue so, instead of gradually spreading in the course of eight years? I should think so. The best answer I could give is, that the disease was created in a hot-house, owing to a certain atmospheric influence artificially formed, whence the disease spread; and wherever it found an assimilation of circumstances, it adapted itself to them.

577. Are you aware that it is said to have been introduced by some foreign plant into Mr. Tucker's hot-house? I am aware it is so stated, but I believe the opinion has been pulled to pieces most conclusively.

578. Do you not think it extraordinary that it should have originated solely in this hot-house of Mr. Tucker's—you would fancy if it had arrived in that way, it must have appeared in every other part of the world? I said before, it is very mysterious, but it is one of the extraordinary freaks of nature.

579. Are you under the impression that it was communicated from vineyard to vineyard in the first instance, or was it due to climatic influence? I think it originated in climatic influences, but was afterwards communicated by cuttings, the seeds of the disease being taken from one plant to another.

580. We know that rust appears in all directions in many localities; but would you think that, when the disease simply appeared in a hot-house, it would not also occur in thousands of other hot-houses about the country—is that clear to your mind? No, I think the first appearance of the disease is, to a certain extent, mysterious; it is only partially explained by scientific researches, and attributed to a concurrence of particular circumstances attending an artificial atmosphere created in a hot-house, and does not exist out-of-doors. You may create a disease, and, when it is once created, it may spread.

581. How? By the very fact of the diseased vines emanating from Mr. Tucker's garden, and being planted out-of-doors, disseminating the disease all over the world.

582. Disseminating it from that one vine? All those who have written of the disease go back to Mr. Tucker's vine.

583. Therefore it would be due to peculiar atmospheric influences, although in certain circumstances vineyards may be predisposed to take it? ———

584. Are you aware how it was introduced to this country? No, except it was by imported vines.

585. Where was it first known here? In Queensland.

586. Do you know at what date? The beginning of 1867 or 1868. The calculation of the period in vines must take two years; it begins to germinate in September, and fructifies in February or March.

587. Do you think that Mr. Coxsen was satisfied that the first disease was created? I think so.

588. He says in 1866? Yes.

589. And you believe his information to be correct? Yes.

590. Have you any idea under what circumstances it was communicated from Queensland to this country? I cannot say whether by importation of vines or by the northerly winds.

591. From your knowledge of the disease, do you believe sulphur is a specific remedy? Yes; not only for that fungus, but all fungi that I have applied it to.

592. Do you think that the owners of small vineyards, having a few hundred or so, not forming the source of a large profit, would be inclined to take proper steps to eradicate the disease when it made its appearance among their vines? I think small proprietors will not do so—that I know from experience. I have sent a machine and sulphur to use, and they were too indolent to have it done.

593. *Mr. Tunks.* You have stated your opinion that legislation would be desirable to diminish the spread of the disease? Yes.

594. Would legislation be any use in this country, unless the neighbouring Colonies legislated to the same effect also? Legislation would protect us; it would be beneficial as far as we are concerned.

595. Have we settled, in any way, the mode of conveying the disease from one place to another—how it travels? No; as I have stated, the sporules will be carried by the wind.

596. Therefore it may travel along the coast with a north-east wind? Yes.

597. Do you know whether we have native vines? I believe the *vitis*, or grape-vine, is not indigenous to Australia. Some vines may be found here and there in the bush, but they are not indigenous.

598. If the Director of the Botanic Gardens says we have, what do you think of the matter? I should bow to his decision.

599. In the event of the indigenous vine being affected, would it not furnish a stock of this disease? I should not alter my opinion until we know that the vine would take the disease by inoculation. The vine Mr. Moore refers to I do not know, but I doubt whether it is a true *vitis*. It may be of the same family, but not of the same nature.

600. It is your opinion that, notwithstanding the want of legislation in the neighbouring Colonies, and this indigenous vine, legislation on our part would be desirable? I think it would be desirable, as a protection to the large vineyards of the Colony.

601. You have stated to the Committee that the disease *oidium tuckeri* has been created in a hot-house in England? That is the origin of the disease.

602. That is a new creation then? A new creation.

603. Do you believe a new creation possible? Yes.

604. Have we not heard of this disease, or a similar disease, for hundreds of years? I believe not; and all the authors I have translated and read on the subject, heard nothing of it until it was discovered in Mr. Tucker's hot-house.

605. For instance, have you ever taken notice of a passage of this description (28th Deuteronomy, 22nd verse) in the Old Scriptures: "The Lord shall smite thee with blasting

- blasting and with mildew"? I am not so well posted up in those matters as you are, but I will take your word for it.
606. I want to know whether our reading has posted us up as to this particular kind of disease, or something analogous,—you have not come across that passage? No.
607. Nor did you know there was such a passage in the Old Testament? No. There are a great many things we are threatened with in Scripture that have not come to pass yet.
608. But these are prophetic words. Then we see in Solomon's prayer, 1st Kings, a thousand years before Christ: "If there be in the land famine, if there be pestilence, blasting, mildew." This being the mildew in the grapes, is it not more likely that it will be perpetuated through the world by the spores laying inert until they find a favourable condition for developing into active life, than that it should be a new creation? When I say it is a new creation, I speak of the first time that particular complaint took such a form as to alarm the vine-growers. I am positive of this,—that when I was in France, in the midst of vineyards, nothing was spoken of the mildew in that or any other shape, and it only appeared in France after having originated in England.
609. Would that be a fair representation of a diseased grape magnified (*engraving on American Patent Office Reports, page 311, volume for 1853, handed to witness*)? Yes, as perfect as it can be. The appearance of the berry may be rather exaggerated.
610. Look at the date of the book? It is 1854. The extracts I have read to this Committee just now are exactly the same date—1854 and 1855.
611. You state that this disease will not communicate to other plants? No.
612. It is said in the articles to which I refer: "Olive trees are also attacked with the same disease, and last year the quantity of oil was about two-thirds of the quantity usually produced." This scarcely coincides with your view? That is in 1854.
613. This is in Portugal? Yes. I have read the work.
614. How long has the vine been cultivated in the district of France where you say it made its appearance comparatively recently? For four or five centuries.
615. This kind of disease was never before known? No.
616. No "blasting" nor "mildew"? The vines were perfectly free from disease up to 1849 and 1850.
617. It is said it first made its appearance in Australia—in Queensland? Yes.
618. Do you know when an Act was passed in our Legislature to prevent the importation of cuttings from that Colony? Yes, it was last year.
619. Was it known that the disease existed here then? It did exist, for I had it in my vines; but it was not believed to be this identical disease.
620. Has it come to your knowledge, in any way, that the disease existed in Illawarra previous to that? I have been told so since. I know it did exist last year—I have heard so from various persons.
621. Is it possible it went from Illawarra to Queensland, instead of coming from Queensland to Illawarra? It might.
622. If legislation takes place on the subject, it can only be enforced by penalties, I presume. In what way would you enforce observance of the law, if legislation takes place? I should make the application of the known remedy compulsory, and in default destroy the vines diseased—that is destroying the disease and the possibility of its spreading.
623. You cannot punish people for not dressing vines, when they do not know whether it is the disease or not that they are affected by? I would call their attention to their vines being diseased, and then if they did not apply the remedy I would destroy the vine.
624. Then it would be the business of vine inspectors to travel and make examinations? I think, in each district, a committee should be appointed among those interested, and a local board, of an honorary character formed—a kind of vigilance committee—to see where the disease exists; and where it was found to exist, they should call the attention of the growers to it, and let that committee have power, in case of neglect, to summon the vine-grower and punish him.
625. Have you noticed any other kind of mildew on the vines in this country? Upon other vines, not on the grape-vine. There is an appearance of rust on the vines, which some people attribute to another disease, but it is merely a secondary form of the same disease. I discovered this last year, and saw it again on the vines this year. I believe the rusty character is a proof that the vine was attacked in some mild way the year before.
626. Have you noticed a mildew in pease and pumpkins? Yes; and on the passion-vine; but it is a totally different complaint. The diseased fruit of one being put in a box with an undiseased bunch of grapes, the disease will not attack it, and *vice versa*.
627. Is it known that the disease exists on the indigenous trees in any form? The disease on indigenous trees is a kind of fungus much like it, but not the same.
628. How many experiments in inoculation have the scientific committee tried? Hundreds.
629. Explain from what time? From September till now they have been constantly making experiments. When specimens are sent to us, we send them to gentlemen taking an interest in the subject—Dr. M'Kay and others—and they test them by microscopic observations, and try, in every possible way, to trace a connection between fungi of different kinds and *oidium tuckeri*. In every instance they have noticed a marked difference.
630. The specimens forwarded to you are generally the grape leaves or grapes? They are on bunches of grapes, leaves, stems, and in some instances the whole vine, root and all. In other cases, we have young wood, bits of bark, or pieces of the wood.
631. The specimens have had sap enough to retain the fungus in vigour? Yes, so full of life that, by submitting them to a heated temperature, it has caused the spores to open, and we could then watch the progress of the disease. I think Dr. M'Kay, who has devoted much time and care to this study, could give you some valuable information on this part of the subject.

J. Joubert,  
Esq.

2 Mar., 1869.

J. Joubert, Esq. 632. You said you had looked over these reports? Yes, I have had a series of them, and found different descriptions of the mildew, both on the vines and lettuce, and other plants affected by it.

2 Mar., 1869. 633. It is stated in one of these reports that the mildew is an American disease? An Australian writer will hereafter say it is an Australian disease.

634. I believe it is not the received view that the disease has been in existence hundreds of years, but that it is a new creation? I believe that it is a new creation altogether, having its first appearance in England. They make experiments now, and trace the germs of various fungi in the air in closely packed houses. I see an experiment has been made in Manchester. "Dr. Smith and Dr. Danneer have been examining the air of Manchester by the aid of the microscope, and have found it to be full of spores and other organic germs, the presence of which leads no doubt to the phenomena imputed to spontaneous generation, and probably the cause of the epidemic character of many diseases. The air was first washed by shaking it in a bottle with distilled water; and in a drop of the water it was reckoned that there were about 250,000 spores, and these only require to be lodged in suitable situations to spring into activity. In the quantity of air respired by a man in ten hours it was reckoned that there would be about 37½ millions of these spores or organic germs" inhaled. These millions of spores are considered harmless, as, by inhaling a quantity of sulphur, the air is purified, and the number is diminished to almost nil.

635. *Mr. Suttor*] You are not aware of any legislation in Europe on the subject? I can give a more decided answer when I get the expected works from France. In France, the Agricultural Societies were empowered to send Inspectors; and if they were Inspectors, there must have been some kind of legislation. I believe, in 1843, 1844, and 1845, the application of sulphur was made compulsory throughout the vineyards of France. It is probable we shall receive a copy of the decree, in the case of books the Minister for Agriculture is forwarding.

636. Of course you are aware, from publication, that the matter has been thoroughly studied in Europe? Yes.

637. And are you prepared to recommend a different mode of treatment to that carried out in France? I believe no other mode is known than the application of sulphur in various forms.

638. Then you think it is as well understood as it can be in Europe, and you have no doubt the disease here is the same? Yes.

639. And you recommend the same treatment? It is impossible to have anything more instantaneous than the effect of sulphur upon it.

640. Sulphur is very destructive to insect life as well as fungus? I believe so. It is proved by the experiments in purifying the air of workhouses in Manchester, that the application of sulphur is beneficial.

641. It is beneficial to the large animal, and destructive to the small? Destructive to fungi, and beneficial to animals.

642. *Mr. Phelps*] I think you mentioned the disease as showing itself at one period, and coming to a fructified state at another? Yes.

643. What might be the length of time from its first appearance to its showing the spores? We have had the mildewy appearance of the disease on a berry in the morning, and by putting it under a certain temperature, it has grown, burst, and the sporules been emitted within five hours. In fact, it belongs to the mushroom tribe, and we know how rapid is their growth.

644. *Mr. Lackey*] You said something about legislation, and your impression is that it had taken place in France. Is it your impression that it was parliamentary legislation, or confined to the Society of Vignerons? If there has been any legislation in the matter, it will be a mere imperial decree authorizing the Minister for Agriculture to take such steps as would cause the disease to be checked. We have there a Minister of Agriculture, and the management of the agriculture there emanates from that Minister, and branches off among the various societies. It may be that, by such authority, the societies have sent inspectors to coerce the vine-growers into the application of remedies.

645. *Mr. Tunks*] Have they been propagating from the same species of grapes for all the years you speak of in France? I suppose upwards of 200 years. There are different kinds of grapes, but all propagated one from the other. There is no such thing as raising grapes from seed usually. I mean that the large propagation in the vineyards is by cuttings.

646. Where do they get the originals, except from seeds? Of course they must originally have been seedlings, and nurserymen do get new sorts by raising vines from seed.

647. Is there any possibility of the constitution of these vines dying out, so as to make them homes for disease or insects? *M. Marès* says, in an extract I translated, and which with others were published in the *Sydney Morning Herald*, "It is now admitted that the disease is entirely an outward complaint. The idea of it being a generation—a plethory—a disease of the root—cannot be admitted now, in the face of the thousand proofs we have that the cause of the complaint is external, and owing only and solely to the presence of a vegetable parasite."

648. But how does it live? On the plant.

649. On the juices of the plant? On the epidermis.

650. Is that the received opinion—that it lives on the juices of the plant? Yes—the juices being the blood of the plant.

651. Then the plant may be vitiated? Yes, certainly.

652. My object is, to ascertain the opinion whether it is desirable to cultivate from seeds? No. I would have no hesitation this year in propagating grapes by using some of the cuttings

cuttings of the vines diseased this year, submitting them to certain cleansing processes. I believe the disease is left upon the bark of the vine, and will deter me from using the cuttings from many vines.

J. Joubert,  
Esq.

2 Mar., 1869.

653. In America they cultivate sorts that are not grown in Europe? I doubt whether they are new sorts. They vary perhaps in flavour, but it is so elsewhere according to the difference in kind, and the soil, climate, &c., in which they are planted.

654. If it is said in the Patent Office Reports that they are from seeds, do you doubt it? No; but for propagation the process is so long that it would not pay.

655. If they say they have, do you believe it? Yes.

656. And they have been able to grow sorts in positions where imported sorts would not grow? I know the Americans have done wonders in that way.

657. I come to this conclusion,—that the statement in the Patent Office Reports of 1854, which says, “a few years ago a parasite fungus made its appearance on the grape-vines of Madeira, and has been very destructive there,” refers to the *oidium tuckeri*, or is the writer mistaken? I think it does not refer to the *oidium tuckeri*—it did destroy the vines.

658. That is not the *oidium tuckeri*? No.

659. The statement in the Patent Office Reports in 1854, which says the mildew destroyed the grape-vines of Madeira, is an error, and not veritable? No, it is perfectly correct with regard to 1854, when the vineyards of Madeira were destroyed by mildew, which is in reality the *oidium tuckeri*.

660. Then the disease spoken of in one of these volumes is not the disease spoken of in 1854? I believe the writer has mistaken the one disease for another. It is the opinion of the greatest writers of the day on that disease that he was erring for eight or ten years. He acknowledged his error, and gave his acknowledgment in a very graphic description. I allude to Dr. Berkeley.

661. Then there must have been two diseases in Madeira at the same time, both destroying the grape vines? No, I say the fungi existed at that time, and may have existed for thousands of years probably, but that the *oidium tuckeri* alone attacked the grape.

662. *Chairman.*] Then you think these works are not so much to be relied upon as later publications? Decidedly not. These were written when *oidium* was making its first appearance, and others had been written since the disease has been travelling all over the world, and thoroughly studied.

663. *Mr. Tunks.*] Then the statement and description of the *oidium* in Madeira is correct? Yes.

664. And if the writer states it to be an American disease, native to that country, he is mistaken? Yes, I believe that the fungi which existed in America, existed there and here long before the *oidium*.

665. *Mr. Nowlan.*] Do you believe that the experience of the disease in Europe is applicable to our circumstances in New South Wales? Yes, I believe that the climate of the South of France is so nearly identical with ours that the same diseases require the same remedies.

666. And if we follow the experience of Europe in the treatment of this disease, we cannot do better? We have proved that already.

667. Have we anything to learn in the nature and treatment of the disease? No.

668. We are in as good a position to treat it as if we waited for two years? Yes.

WEDNESDAY, 10 MARCH, 1869.

Present:—

MR. NOWLAN,  
MR. W. SUTOR,  
MR. LACKEY,

MR. PHELPS,  
MR. FARNELL,  
MR. TUNKS.

THOMAS HODGES MATE, ESQ., IN THE CHAIR.

The Honorable Sir William Macarthur, Knight, M.L.C., attending by leave of the Legislative Council, examined:—

669. *Chairman.*] I believe you are the proprietor of extensive vineyards in the district of Camden? Yes, moderately extensive.

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.

670. Have you had any opportunity of examining the vine disease called *oidium*? To a limited extent I have, in Europe and in this country.

671. Will you be kind enough to state to the Committee the result of your observation of the disease? I may state generally that, a good many years ago, I had an opportunity of seeing the disease in France, at the commencement of the season, but it was then in the incipient stage. I saw it in the District of Bordeaux, where one of the principal vine proprietors pointed it out to me on the vines, and explained to me the mode they found effectual in suppressing the disease, which was by the use of sublimed sulphur.

10 Mar., 1869.

672. Do you consider that that remedy has been efficacious in this Colony? Perfectly so, as far as I have been able to observe.

673. *Mr. Nowlan.*] I believe you have paid considerable attention to collecting information with reference to this disease, since its first appearance in Europe? Yes, I have.

674. Do you feel satisfied that the disease known as *oidium tuckeri* here is identical with the European disease? I believe it to be the same, though, perhaps, it is to a certain extent modified here; but that amount of modification I apprehend to arise from the circumstance of this being a much drier climate. The *mycelium* here is scarcely so prominent as that which I remember to have seen in Europe; but it must be borne in mind

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.  
10 Mar., 1869.

mind that it was twelve years ago that I saw it, that I only saw it once in a well-defined state, and that I may not have retained a perfect impression of that which I did see. What I did see seemed to me to have somewhat more of the character of thistledown on the under side of the leaf, than has the disease as I have seen it here. It is finer here—more delicate; but that it is the same in its nature I have very little doubt.

675. Are you aware at what date this disease made its first appearance in the Australian Colonies? I think, three years ago, in Queensland—either two or three years ago.

676. Have you any idea how it was introduced into Queensland? I believe it was introduced by vines from Europe; I understood so at the time—that that was their impression.

677. Are you satisfied in your own mind as to how this disease is communicated or spread? No, I do not think any person can possibly arrive at absolute conclusions upon the subject, because the spores are so minute that they are even beyond the powers of the microscope to detect them.

678. It has been stated by some that these spores are capable of being driven for thousands of miles, and then infecting vines? I believe they may be driven for scores, and perhaps even for hundreds of miles; thousands of miles is probably too wide an expression.

679. From your knowledge of its spread in Europe, do you think it was spread from vineyard to vineyard, or that its spread was owing to climatic influences? I believe it is a disease of contagion.

680. Do you think the history of its spread in Europe warrants us in believing that, rather than the other theory, that it is climatic? Undoubtedly I think it clearly is a disease of contagion.

681. If it were climatic, it would have appeared simultaneously over a large portion of Europe? One would suppose so.

682. Are you aware of the date of its first appearance in England? In 1843 or 1844.

683. In 1845 it is stated? I think it was before that; I think I have evidence to that effect.

684. Do you know when it was noticed in France? I believe the year after, or the year after that, and it rapidly spread.

685. But still in such a way as to warrant the conclusion that it was from contagion? It is so generally considered by those who have studied the question in France; and of course a vast deal of attention has been bestowed upon it by the French authorities.

686. Have you heard the statement made with reference to the disease in these Colonies, that it had been seen here thirty years back? No, I have not.

687. Have you any doubt on your mind as to that? I do not believe it has; in fact, I feel confident it has never been here until now.

688. Have you heard of the statement made by a writer in Queensland, I believe, that he had seen the disease at Camden Park ten years ago? I am certain he did not.

689. Have you heard that such a statement has been made? No, I never heard of it.

690. It has been stated that he saw it at Camden Park ten years ago, and immediately recognized it when he saw it in Queensland? I am quite certain that could not have been the case. There is another disease of the vine which appears to be identical with the ordinary vine disease of the United States of America. I may mention that, when I was young, being on the Continent with my father, accident threw us into the society of a very intelligent Swiss who had introduced the first vineyards, which had ever succeeded, of European varieties of the grape, in the United States. This man had returned to Europe for the purpose of bringing out his wife and family to the United States, where he had already established his brothers, but was prevented, by the breaking out of war between England and the United States, from going back. We found him in 1815 in his native district, and he then described to my father the disease which attacked almost all the European varieties of the vine in the United States, and said that the same disease existed in the Swiss vineyards, but only there on vines in young vineyards. He pointed it out on the sweetwater grape, and my father immediately recognized it as being the same in appearance as our vine disease, which also attacks the sweetwater, and which destroyed the early vineyards planted here. But this disease is wholly distinct from *oidium tuckeri*, although it is, I believe, a fungoid growth. It spots the shoots of the vine with brown spots, beginning usually at the bottom of the vine, and, when very virulent, spreading in a single night, or a single day, to a considerable extent; but, in ordinary cases, if the infected portions are carefully removed, it does very little damage.

691. Are you aware how the *oidium tuckeri* was first introduced, or what was its early history? No. I know it appeared in a hot-house at Margate.

692. I think one of the statements mentioned that the disease was introduced from abroad? I think it is wholly unknown how it was introduced.

693. Do you think *oidium tuckeri* is peculiar to the grape-vine? I do.

694. Have you any doubt that it does not attack other plants? My opinions are only founded on the opinions of scientific men who have treated on the subject; and not one of these, so far as I am aware, has ever doubted that it is peculiar to the vine.

695. It has been asserted that it is the same as the blue mould that attacks tobacco? I think I can give you evidence here to the contrary. If the Committee will allow me, I will read a very short paragraph from a work I have brought with me, in which, however, I do not know that the tobacco-mould is mentioned. It is a work on "Microscopic Fungi," by M. C. Cooke, published in 1865:—"Notwithstanding the inconvenience to ourselves of calling very different fungi by the same common name of 'mildew,' the popular mind does not recognize the inconvenience"—there are not words in the English language, you will observe, to express the difference—"since it scarcely troubles itself to inquire whether they are not the same thing. In obedience to this custom, we again write of 'mildew,' or 'blight,' as it is called in some districts, but of a very different kind

kind to that which is so detrimental to growing crops of corn. In the present instance it is our intention to illustrate a group of fungi which are exceedingly common, and which differ greatly in appearance and structure from any to which we have had occasion to allude." Then the writer goes on to describe a very considerable number of them, and says:—"The vine disease, so fearfully destructive on the continent, and not altogether unknown in this country, is another of these incomplete fungi." He says very little about this particular disease, because, naturally, he devotes himself more to those which are very common in England, and which have been very destructive, than to those not now to be met with in England—for the vine disease is not now known in England. He says,—“From an individual, who, at the time of its first discovery in the south of England, took considerable interest in the subject, it was called *oidium tuckeri*, which name it continued to bear, both here and abroad, until, with many others, probably all of the same genus, it was found to be only a barren state of what is called by mycologists an *erysiphe*. The real discoverer of this mildew was undoubtedly the Rev. M. J. Berkeley, who has successfully devoted a long life to the study of these minute organisms, through evil and through good report; and when that study was beset with more difficulties and received less encouragement than at present.” He states in another place, that “Twenty years since, some of these little pests were altogether unknown, whilst others were only recognized, and partly understood, by a few scientific men. During the period to which we have alluded, more than half the present species contained in the genus *Peronospora*, had never been observed; and amongst these, the most devastating of its tribe—the associate and undoubted cause of the potato disease. Parasitic fungi are far more numerous, both in individuals and species, than most persons are aware; and cultivated plants of all kinds are more or less subject to their ravages. Some are more susceptible than others, of which the corn and grass tribe, or *Graminaceæ*, as they are termed by botanists, is an example.” He then goes on to describe a number of different species which are observed.

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.

10 Mar., 1869.

696. Do you think it is possible to check or extirpate this disease, *oidium tuckeri*, from the Colony? I do, if taken in time.

697. And you have no doubt of the efficacy of the sublimed sulphur dressing? I have no doubt, so far as my personal experience goes, which is very limited, but quite in accordance with statements published elsewhere. I may mention that I have vines growing in three distinct localities, separated by distances of a mile or half a mile—

698. Has the disease attacked your own vines? Yes; and these three localities were attacked simultaneously.

699. At what period of the year? In the beginning of December.

700. Do you think the disease would have been more injurious to the vines and crop, if it had made its appearance two months earlier? No doubt about it. I was going to describe what had taken place with reference to these portions of vines. In each of them it was subdued in two or three days by the application of sublimed sulphur, and we saw no more of it for about five or six weeks. In one locality it then reappeared, but at this time only upon the young bunches of grapes of the second and third growth, which on several varieties were covered with the *oidium*—

701. After the first crop had been treated with sulphur? After the first crop had been treated with sulphur, and was perfectly sound. At this time I could see not the slightest appearance on the leaves, but some suspicious violet-coloured spots upon the wood, which I never observed before, and which but for the presence of the disease I might not have noticed at all. All this second attack of disease upon second crop bunches was destroyed by sulphur again; but after the gathering of the crop, or at the time of gathering, I observed the disease again coming on some of the vines in a very different position, that is, the extremities of the shoots, upon the *upper* surfaces of the leaves of the very trifling young growth which had taken place; and I became suspicious, from the upper surfaces alone being diseased (there being no young bunches of fruit left), that it came from a distance. I therefore desired the person in charge of our vineyard to examine a neighbouring vineyard, which I knew to be in a neglected condition. He went last Sunday to the proprietor, and with him, as he reported to me, went into the vineyard, where he observed the disease in full vigour on a number of neglected plants. He asked the proprietor, “Have you not sulphured your vines?” He said yes, he had sulphured the Black Hamburgh, but did not think it worth while to sulphur the others. “Do you know you are sending the disease to us?” No, he did not think it possible. He was told it was possible, and that we keep getting it afresh; but that it did not appear in any other of our vineyards but the one nearest to his vineyard, which is only about half a mile distant from his last one.

702. Do you think the appearance of the disease on this second crop is attributable to its being introduced from neighbouring vineyards? That I cannot say. It only appeared on the second crop in this one locality, and this second crop being removed and destroyed, and only for the third time in the same locality, and upon the upper surfaces alone of very young leaves—not at all in the other two.

703. Which led you to the conclusion that it was brought there? Yes. I was also led to that conclusion by the fact of its making its appearance on the upper parts of the vines. If generated on the spot, it would most naturally attach itself to the under part of the leaves, in the same way as appears to be the case with the rust in wheat. It appears to me that, when this last disease is originated on the spot, it is found on the underside of the leaves, low down; but when it comes from a distance, it is seen on the upper side, and nearer the extremities.

704. Do you believe it would be desirable to have united action with reference to the treatment of diseased vines, with the object of getting rid of the disease thoroughly? I cannot imagine that any but united and uniform action will be at all efficacious.

705,

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.  
10 Mar., 1869.

705. Have you considered whether, in carrying out that object, it will be desirable to have legislation on the subject? I think so.

706. Do you consider that the self-interest of vineyard proprietors would lead them to adopt the necessary means for extirpating this disease, without legislation? The larger and better informed proprietors might adopt the necessary remedy; but unfortunately, a very few ignorant, obstinate, or careless men would be sufficient to neutralize the efforts of the majority, and be the means of spreading the disease.

707. You think that the remedies adopted by large proprietors would be ineffectual in eradicating the disease, unless vines on small holdings were similarly treated? No doubt of that.

708. Do you think the holders of small patches of vines, who do not perhaps derive much profit from them, would be likely to exert themselves to take the necessary means to suppress the disease? I am afraid a great many would not. I have given you an instance of one whom I believe to be a very respectable man, and who has been a neighbour, and a good neighbour, ever since I have been in that neighbourhood. He has little interest in his neglected vines.

709. Then you are decidedly of opinion that good would result from united action in the way of treating this disease? I quite believe that by united action the disease might be wholly eradicated, if that united action takes place at once, but there is no time to lose.

710. Supposing the other Colonies did not join in passing an enactment to compel the use of these remedies, do you think our efforts would have much effect? Their failure to do so would be a very considerable drawback; but it is to be hoped that, if they saw the good results of united action here, they would adopt similar measures. We could, at all events, prevent the disease from spreading far beyond our borders.

711. Are you aware that amongst proprietors generally, when disease makes its attacks—say scab in sheep, pleuro-pneumonia in cattle—they do not always take the same view in reference to the treatment that should be adopted? I do not know that any instance immediately suggests itself to me, but no doubt there are many different opinions, as there are also many persons who, except under compulsion, would leave everything to chance.

712. Do you believe that amongst large vineyard proprietors there is any difference of opinion as to the desirability of united action or the mode of treatment? I do not think there is any difference of opinion as to the mode of treatment, or as to the desirability of united action, although there may be much difference as to the propriety of enforcing united action.

713. What I mean is this,—whether, supposing a majority of large proprietors were to determine on a certain course, that determination is likely to be interfered with by the entertaining of different views by other large proprietors? We can only fall back on experience. I have no doubt that, if you made the system of treating the disease dependent upon the action of distinct bodies, you would have all sorts of nostrums proposed. The more ignorant a man is, the more presumptuous you often find him, and the more eager and resolute to enforce his crude ideas.

714. And therefore, you think it desirable that legislative enactment should come to the assistance of private effort? I believe it is perfectly necessary that you should enforce a uniform system of treatment.

715. Are you acquainted with the Albury district? Not personally.

716. You have never been there? No.

717. Are you aware that there is anything in the climate of the Albury district, or in the nature of the soil, that renders it unlikely to receive the disease? I cannot think there is anything in the soil. The drier climate may make the vines less susceptible of taking the disease; but if once the disease gets there—and I have no doubt it will get there—it will spread.

718. Do you think vines are more liable to receive attacks of the disease from any peculiarity in planting, or age, or vigorous growth? I have no doubt that the more succulent and vigorous the growth—the more shaded, in fact—the more liable it will be to attacks of the disease.

719. With reference to young and old vines, do you think young vines are less likely to be attacked than old vines? Not at all.

720. Do you think vines grown upon trenched land are less liable to attack? No, I think they are rather more liable, because their growth is more vigorous and succulent.

721. You have stated that the application of sublimed sulphur is the best known remedy? So I have understood. It is the remedy recommended by all or nearly all whose authority is to be depended upon.

722. Are you aware whether a solution of sulphuric acid would be more economical or more efficacious? I never heard it proposed.

723. Do you know of any reason why it should not be? I am not sufficiently a chemist to state in correct form; but it is not sulphuric acid, but sulphurous acid that is the antidote to the disease—the first containing two, the latter only one, equivalent of oxygen.

724. Do you know whether wild vines of the European varieties—not the wild vine of the brushes—are spread largely over the country? I never saw them or heard of them.

725. Do you apprehend that, in the event of legislation taking place on this subject, the fact of the disease being likely to be propagated by these wild vines, would be a bar to the effectual operation of such a measure? I cannot fancy so.

726. I understand that there is in the brushes a wild vine somewhat similar to the wine grape, or of the same species. Do you think the disease would be likely to affect that vine? Certainly not. It has never been discovered upon any plant but the true wine grape. It has never been seen on any of the American varieties of the vine, so far as my information extends.

727. *Mr. W. H. Suttor.*] I think I understood you that you would recommend legislation for compulsory attention to the disease? Decidedly.

728. Is the wild vine Mr. Nowlan has spoken of really a grape? No, it is a *cissus*. The grape is a *vitis*. It belongs to the same natural order as the vine, but is a very distinct plant. For instance, the plum belongs to the same natural order as the peach or the apricot, but they are very distinct plants. You may graft the one on the other, and you may graft the wine grape upon this wild vine, I believe—I have no doubt you can. The structure of the wood is similar, but the plants are very distinct.

729. This wild vine has never been cultivated? I am not aware that it has. But you may cultivate it for ever, and you will not make it the wine grape. It is a *cissus*, and you will not make it a *vitis* by any cultivation.

730. Have you been in Madeira? Many years ago.

731. You are not aware whether there has been any legislation there? No.

732. Do you think it likely, from your experience of other fungi, that these diseases will, in course of time, pass off? I think it exceedingly probable they will abate in virulence after a considerable period; but that period may be centuries. You must be aware that many of the diseases which attack the human frame are now attributed to fungoid bodies. The cholera, for instance. You are aware that it arose first in the East, and, after a period of several years, proceeded, by almost regular steps, westerly, until it attacked the people of the United States. Many of the most fatal diseases are attributable to fungoid bodies.

733. Following up the subject:—Supposing wild vines of the wine grape should exist, they would be so few in number as to be easily destroyed? I should imagine the cattle would keep them down; for, wherever they can get to them, they eat them greedily.

734. If they should exist, they could be easily destroyed? Yes.

735. *Mr. Lackey.*] Do you think this disease could be eradicated if legislation were adopted? I think, if effective measures were put into force early, there is every hope of eradicating the disease. It has not yet got sufficient hold to make it very difficult to deal with; but, if we neglect it, it will become, like the rust in wheat, exceedingly difficult to eradicate.

736. If a uniform and compulsory mode of treatment be adopted, you think we shall not be likely to have annual attacks of it? Possibly we may for a time, but it would be so rapidly suppressed that there would be no opportunity for the whole country to become saturated—if I may use the expression—with the spores. Probably many millions of these spores are produced for one which becomes a living plant; but if we multiply them infinitely, of course the chances of their reproduction become multiplied in proportion.

737. Legislation would involve vine-growers in a large amount of trouble and expense? Yes. I for one would be quite willing to submit to all the expense, which is not very great, and to all the inconvenience, which in some particular cases might be considerable. I should be willing to sacrifice part of my free action for the sake of the object.

738. Of course inspectors would have to be appointed? Yes; and they ought to be appointed by the Government, from persons recommended by the vine-growers. It would not do, in my opinion, to have the inspectors elected by them.

739. Would you be likely to be embarrassed in your action, in your own vineyard, by inspectors indiscriminately appointed by the Government? No, I should not apprehend it. I should take very good care to eradicate the disease before the inspector could hear of its existence. The very fact of there being an inspector would make me, anxious as I am on the subject, doubly vigilant. If all are active in treating the disease (and some would only be so under compulsion) I should not anticipate material embarrassment.

740. Supposing legislation were to take place in this Colony, and not in the neighbouring Colonies—Queensland, for instance—do you not think we would be likely to suffer almost the same as if the disease were in existence in different districts of this Colony? Not at all to the same extent; because the increase of the infection—the means of contagion—would be so infinitely greater if you permit it to exist in vineyards here than they could possibly be if brought from a distance. No doubt you might have the infection reappearing here and there, but you could suppress it again instantly. I do not conceive the tax proposed by the Bill to be at all an onerous tax. In my case, it would, perhaps amount to about £10 a year.

741. What number of acres have you? I can only tell you by estimate—about twenty—but I know the number of vines, for I have had them counted. I have ascertained that our vines amount to thirty-eight thousand some odd hundreds.

742. You are aware that the disease has been for many years raging in the wine countries of Europe; and at the Cape, we have recently heard, it has been very severe? Yes.

743. And also in the United States? That I am ignorant of. I know the American varieties of the vine are not subject to the same mould. They may be subject to another.

744. Are they not subject to the same disease? Perhaps you may not be aware that the varieties of the vine chiefly cultivated in the United States do not belong to the true European species. They are derived from the wild vines of America, and are said to have been improved by crossing with European varieties. It is quite possible the introduction of the European blood into the new varieties may have rendered them more susceptible of the vine disease, but all the evidence we have upon the subject goes to show that the American varieties of the vine are wholly exempt. Even some of the European varieties seem to be exempt. The varieties cultivated in America are chiefly new varieties raised from seed.

745. Has it come within your knowledge that legislation on this subject has taken place anywhere? No. I am not aware that any country has been so favourably circumstanced as this is at this time for legislation.

746.

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.

10 Mar., 1869.

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.

10 Mar., 1869.

746. In what respect favourably circumstanced? The disease is of quite recent introduction, the vineyards are not extensive, and generally are widely separated, and the means of cure are thoroughly understood. When the vine disease first spread throughout the world, the means of destroying the disease were not at all generally known. At the time I was in France, when they were applying sulphur, the means of applying it were much more troublesome than they are now. They had a particular box which distributed the sulphur by means of worsted threads; and that was considered to be a great improvement.

747. If uniform and compulsory treatment of diseased vines were necessary, do you not think the experience of the last few years, in countries where the cultivation of the vine and the manufacture of wine are the chief occupations, would have pointed out to them the desirability of legislation to get rid of the disease if possible? In France, for instance, I do not see that any legislation would be necessary. The French Government has the means of enforcing any particular operation of cure it pleases, from its organization. It has a particular department devoted to agriculture. I have not the least doubt that, if it chose to direct any particular means to be adopted with regard to the vines, it could cause it to be done without reference to the Legislature.

748. *Mr. Tunks.*] Has anything of the kind taken place having the nature of law? I have very little doubt, although I cannot state it as a fact, that a uniform mode of action has been adopted, and probably, I will not say by compulsion, but under direction. The authorities in France have infinitely more power than ours—in fact, we have no analogous bodies at all in England.

749. *Mr. Phelps.*] Did you observe—I think it was in one of the Albury papers—that there have been numerous meetings on this subject in that district? I am aware they have had meetings.

750. And they are opposed to legislation? I am aware that they are opposed to this Bill, but not to all legislation. I understood that they admitted the necessity for legislation, but objected to the Bill which has been drafted.

751. Would you think direct legislation, or a form of municipal legislation, would be the best? Direct legislation, because we must have a uniform system. You could only constitute your local bodies by the same means as other municipal bodies are constituted, and these local bodies would not have uniform action.

752. Would it not be sufficient if we had uniform legislation in one respect, that is, that a certain remedy must be used. The reason I ask the question is this: I know the persons down there have great objection to this Bill, and it is chiefly in consequence of the money. If they had the distribution of their own money themselves, they would be quite satisfied, perhaps, to be taxed; but they object to it, as I understand, being placed in the hands of the Government, as it is under our Scab Act? I have already stated that I think the money part of the question to be of very little importance; the amount of the tax is so small that it cannot be there that the shoe pinches.

753. You were giving us some information about the grape grown in America, and I understood you to say that it is of native growth, modified by the pollen of the imported grape? So they profess.

754. Grown from seed? Yes; that they have crossed the two different species. I may state to you, generally, that the wild vines of America, for the most part, have a very different habit from European vines. They spread over an immense extent of surface; a few vines of some sorts—not perhaps a dozen—being enough for an acre of ground, and produce an infinite number of bunches, with but few berries on each bunch. They all have a very peculiar flavour, something of the raspberry, with a sort of foxy taste afterwards. They do not arrive at maturity until after the frost has made its appearance, so that when the leaves fall off, the bunches, of which there are many thousands on each vine, are seen and easily collected. Now, by fructifying this grape with the pollen of the European plant, they have produced something like the wild vine, but with many of the valuable qualities of the European species. All the varieties of the European vine, of which there were about a hundred and fifty cultivated by M. Dufour, at Veoev, in Ohio, took the peculiar disease I mentioned in the early part of my evidence as having been pointed out to my father by this Swiss cultivator, excepting two, and these two were planted by him in his vineyard. I heard of this vineyard, many years afterwards, as being very flourishing, but I do not know what has become of it since. I was very curious, in 1856, being at the same place where we had previously met this Swiss vine-grower, to go into the vineyards again to look for the disease, and there I found it just as we have it here—not the *oidium*, but the “old” vine disease. I may mention that, in the early days of the Colony, several vineyards were planted, and abandoned in consequence of the attacks of this disease. The varieties at first planted appeared to be particularly subject to it, viz., the Frontignan (muscat) and the sweetwater. It is not the *oidium* at all—not like it.

755. *Mr. Farnell.*] In reference to the inspectors, would it be necessary they should be acquainted with the disease? I think any person of ordinary intelligence might make himself acquainted with it very quickly. I do not think it would be necessary that he should be acquainted with the botanical structure of the disease. All he wants to know is, its appearance to the naked eye, or under an ordinary magnifying-glass; and, of course, he knows that sulphur is the remedy.

756. He should be a person that should be competent to tell the disease called *oidium* from common mildew? No other mould that I am aware of attacks the vine—we do not know of any other but the *oidium*.

757. I think you wrote a book, some years ago, upon the vine? Yes.

758. And you there mentioned some vine disease? Yes, the one I have just alluded to. It is not a “mildew” at all.

759. Are all kinds of vines attacked alike by *oidium*? I cannot say of my own knowledge. I believe, in Europe all, or nearly all, have been attacked, but I am not quite certain. Some have been more susceptible than others. In our vineyard, we have only found certain varieties to be attacked, although the number seems to be increasing; and no doubt, as the spores are multiplied, we shall find fresh varieties susceptible.

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.

10 Mar., 1869.

760. You have raised vines from seed? Yes.

761. Are they bearing fruit? I have destroyed the whole of them long ago. They were not equal to the finer European varieties, although some were moderately good. I think I had about fifteen hundred bearing fruit.

762. Do you think it is advisable to burn infected portions of the vine? Yes, every single scrap is carefully destroyed by fire in our vineyard.

763. *Mr. Tunks.*] You would do that, whether compelled or not? Yes, everything I could collect.

764. *Mr. Funnell.*] In France would not the Minister for Agriculture have the power of issuing an order which would be equal to an Act of Parliament here? Yes, I should think so. I know they are very arbitrary.

765. Do you know whether this disease at all affects the wine? I understand that it does, if the grapes are in a highly diseased state.

766. Would using sulphur on the grapes affect the wine? I have no doubt it would, if used too recently before the grapes were gathered.

767. *Mr. Sutor.*] From your own experience, could you say where the disease generally attacks the vine—whether near the ground? Generally in the places most sheltered and shaded, where there is a damp, stagnant atmosphere, no matter whether the shade is produced by the vine itself or by neighbouring plants or buildings.

768. Have you formed any idea of the usual way that the disease gets over the country—whether it is always carried through the air? Of course it may be carried by persons' clothes or hands.

769. Is it possible for it to travel over the ground? No, I should think not. I was going to explain what I meant by conditions favourable to the propagation of the disease. Where there is a damp, perfectly stagnant atmosphere, the mouths of the plants, which receive moisture, are open, and therefore ready to receive the spores. There are, under such conditions, more mouths open, and the leaf is in a state more favourable to their immediate germination; but when exposed to the burning heat of the sun, the mouths are closed, and are not then susceptible of receiving the spores.

770. Have you generally found the leaf or the fruit attacked first? I imagine the disease will attack that part, whether fruit or leaf, which is in the state most favourable to receive the germ. Perhaps it may attack the whole simultaneously; but I believe the rule is, that it attacks the young shoots first, just about the time the vine is producing sufficient shade to give favourable conditions for receiving the disease.

771. *Mr. Tunks.*] You have expressed yourself favourable to legislation? Yes.

772. I think you have stated, as an instance, that a neighbour of yours had neglected his vines, and thereby seemed to have communicated the disease afresh to your vines? Yes.

773. Would that imply, in your view, that the spores are conveyed by the prevailing winds, or by the atmosphere? Undoubtedly by the wind, in this case.

774. Do we trace it, in this particular case, to that fact? I think so. This person's vineyard lies directly in the line of the strongest winds we have had this season—the south-easters.

775. Then it is possible that this disease, flocculent matter as it is, may be conveyed by the wind to a great distance? No doubt to a very considerable distance.

776. Is there any ordinary probability of its being conveyed thousand of miles in the same way? I should think not at once, but by distinct stages it may be conveyed several thousands of miles in a comparatively short space of time. Of course it is impossible to prove how far it may be conveyed.

777. Do scientific men consider this a new creation, are you aware? The fact is, there appears to have been very little inquiry into the subject of diseases of this kind until within the last twenty or twenty-five years, and many very distinct moulds have been confounded together, until they came to be examined by the microscope. Our language alone, from the deficiency of terms applicable to these growths, will satisfy you how ignorant we have been. They are all called moulds or mildew, embracing many hundreds, perhaps thousands, of species. The term "mildew," as already stated, covers a multitude of very distinct things. Our language is too poor to express all that has been discovered recently on the subject, and therefore they are obliged to give them very hard, learned names, which are great stumbling-blocks to the unlearned in such matters, as, unfortunately, is the case with us.

778. Is there any principle you are acquainted with, in the production of different sorts of grapes or fruit by what is called "sport," without the interposition of pollen? I am quite unable to tell you. No doubt, when a plant has been long in cultivation, and frequently renewed from seed, it acquires a tendency, from the very fact of cultivation, to diverge into different types; but that appears to be only after a very considerable period of cultivation. The tendency to "sport," as it is termed, once created, seems to be continued in succeeding generations from seed with constantly increasing force; so that, amongst hundreds of seedlings, not one shall resemble the parent plant.

779. The vines we have in use in Europe and this Colony are many years removed from their origin—that is, from seed? Undoubtedly. Many of them must be, perhaps, thousands of years old.

780. Would there therefore be, in your opinion, any disposition to decay, so as to render them fit homes for the disease? I should think not. I am aware that such an opinion was broached by the late Thomas Andrew Knight, a very eminent man, who

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.  
10 Mar., 1869.

argued that the most celebrated apple-trees, for instance, were worn out, and, amongst the rest, the golden pippin. Now, I have at this moment the true old English golden pippin bearing as fine apples as could be produced. He argued that the plants propagated by extension were only parts of the same original plant, and that they partook of all the diseases incident to the original plant. But that seems to have been a very great mistake, although it was the mistake of a very eminent and learned man.

781. That is matter of opinion? It is matter of proof, because the very varieties he instanced as being perfectly worn out have since been perfectly re-established.

782. Are you certain as to the sorts? There is no doubt on that point. Some pains have been taken on the subject; the doctrine, being a very important one, having naturally excited great attention.

783. Have you ever seen vines affected by mildew at the latter end of the season, previous to the appearance of this disease? I never saw any mildew at all on vines before this. I can quite imagine that, on a decayed leaf, you may find some ordinary form of mildew, when the leaf has fallen to the ground, and in a decaying state; but that kind of "mould" is held to be perfectly distinct from a parasite feeding itself upon the juices of a living plant.

784. Could the disease you have before spoken of be easily known by an inspector from the genuine *oidium tuckeri*? Well, the fact is this,—that if he found mould upon the leaf or fruit of a growing vine, he might at once assume it to be *oidium tuckeri*, because there is no evidence, so far as I am aware, of any other mould having been seen on living parts of the vine. On the dead parts, occasionally, mould may be seen, in the same way as it may be seen on straw, or any other decayed or decaying vegetable matter.

785. *Chairman.*] From your long experience of the various interests of this Colony, do you consider that the vine-growing interest is of sufficient importance to demand legislation? I do; I consider it of very great and rising importance just now. I consider that vine cultivation has just got through the difficult period of infancy, and is now, you may say, in its adolescence, and likely, if not checked by some very formidable evil, to rise into vigorous manhood.

786. *Mr. Tunks.*] Would it be profitable if the differential duty of three shillings a gallon were taken off? I believe it would. The taste for the wine is already acquired, and that is all that was wanted. We want no protection.

787. *Chairman.*] Do you think that, unless legislation takes place upon this subject, the progress of the cultivation is likely to be retarded? I believe there will be very great risk of the vine being completely extirpated.

788. Would you yourself undertake to plant a vineyard, unless you were satisfied some legislation would be carried out? Most certainly not.

789. I think you have said you have noticed, from the reports of meetings, that the principal objection to legislation appeared to be the taxation,—they are afraid of the money consideration? As far as I understood the nature of the objections, that was one of them. I have heard other objections stated.

790. If that were the only objection, do you not think that implies that legislation would be good upon the point? I think, in so far as I have understood, it has been admitted that legislation is necessary, but that it should take some different form, and they wish it to take the form of enabling them in each locality to deal with the subject as they please. That, I think, would be not simply dangerous, but would make any measure absolutely of no value.

791. You have looked through the Bill, I believe? I have, not very recently, but I have looked it over carefully. I cannot say I concur in all its provisions.

792. You think it might be amended? Yes, I think some of the provisions too stringent. The periods allowed, for instance (forty-eight hours), for giving notice—that seems too brief a period. Five days I should think a more reasonable period to allow.

793. You are aware that, at this late period of the session of Parliament, it would be impossible to get the Bill through? I do not think there is a very great deal that is objectionable in this Bill. I do not think there is much that might not be corrected in a single night.

794. It would be necessary, of course, to make the measure apply to every vine in the Colony, even a single plant in a garden? No doubt. There is a provision in the Bill that every vine should be registered—that if a man has a single vine, he must register it—and I think that a very important provision.

795. If that could be done with little trouble, and free from expense, you would not consider it objectionable? I cannot think there is any material objection to it.

796. *Mr. Nowlan.*] You are aware that considerable opposition has been offered to this Bill, by a number of vine-growers throughout the Colony? I am quite aware of it.

797. And also, that it is most unlikely that any measure could be got through, during the present session, in the face of that opposition? I am not prepared to give any answer to that question.

798. Supposing the Members in the Assembly were sufficiently strong to enable them to pass this measure, do you think it would be politic to do it, in the face of a largely expressed opinion of vine-growers throughout the Colony against it? I am not sensible that that opinion is so largely expressed. Of this I am sensible,—that generally, when there is opposition to anything, it is noisy and clamorous. The great majority may, at this very time, be favourable to such a measure, but it is silent.

799. Are you aware that a petition has been presented to the Assembly, from vineyard proprietors in the district of the Hunter? I have heard of a very extensively signed petition against the Bill.

800. And also from Albury? Yes; but I am also aware that very extensively signed petitions have been presented in its favour from all the home districts.

801.

801. Do you think the vine-growers of the country would be likely to agree, if some little longer time were granted for the consideration of the subject—for instance, after the circulation of the evidence given before this Committee, do you think vine-growers generally would be likely to agree to a measure? I really cannot say. I should imagine, that when they discover their vines to be irreparably diseased, they may then get their eyes opened to their folly in opposing such a measure.

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.  
10 Mar., 1869.

802. Do you think a legislative enactment of this kind would interfere greatly with the growers of table grapes, so as to prevent them sending their produce to market? I cannot imagine it would; because if inspectors are appointed, and the vines dressed sufficiently early, it cannot affect the production of table grapes. I brought a bunch of grapes to Sydney, expecting to be examined here some time ago—the most diseased bunch I ever saw—there was not a single berry that had not had the *oidium* upon it; but it had been perfectly cured by one dressing, and had become perfectly black and well-ripened. The only fault was that, through much handling to examine it, there was hardly any bloom upon it.

803. Then you are of opinion that, if proper means were adopted, at proper times, the growers of table grapes would not suffer by being prevented from sending their produce to market? Certainly not. They will be in a much worse position if their grapes are destroyed by the disease.

804. I think you stated, in answer to a previous question, that New South Wales is in a more favourable position, with reference to dealing with the disease by legislative enactment, than other countries? I think so.

805. In other countries, I believe, the disease had taken a firm hold before it was noticed? No doubt about it; the whole country side was diseased before they were aware what it was.

806. And they were not aware of the remedy? No, it was not at all understood, and there were many reasons why the disease spread rapidly. The greater part of the vineyards in France, for instance, are in possession of small proprietors, men of very humble means, and very ignorant; they understood merely the routine of the culture. These men were perfectly ignorant of what had happened to their vines.

807. It has been stated here that, instead of profiting by the experiences of other countries in this matter, we ought to wait and be guided by our own experience of the disease. Do you not think we shall be unnecessarily losing time, by waiting to gain our own experience? I can only say that, in our vineyard, the disease was immediately checked, in three different localities, not by the same hands. In one locality they applied the sulphur too abundantly, and spotted the grapes. I cannot understand what is to be gained by waiting for our own experience, when we have such a mass of information to guide us, coming from other countries.

808. Do you think vine proprietors generally are apt to under-estimate the effect of the disease? I can hardly answer such a question. That they do not thoroughly estimate the nature of the disease appears to be pretty certain; they do not at all estimate its exceedingly insidious nature, and rapid progress under conditions favourable to its growth.

809. Then again, some of the proprietors think that, if sulphur is a specific, they need not trouble their heads about it—that they have only to apply the sulphur, and it will be all right? It seems to me that, with many of the smaller proprietors, all they care about is, to get the fruit in a state to go to market; and the fruit being marketed, they would utterly neglect their vines, and allow the disease to spread. The appointment of inspectors would be the means of checking that. I cannot better illustrate my opinion than by pointing out what has happened with regard to rust. The nature of rust was thoroughly known sixty or seventy years ago; but notwithstanding, you find at this hour the utmost ignorance prevailing among cultivators of wheat, as to what rust is. They will say it is an insect. I can state, as a member of the Agricultural Society, that a few weeks ago a bottle was sent in, containing a number of insects of a very useful species—the ichneumon—which destroys caterpillars; and these, it was said, were the insects that caused the rust. The insects were red, and so is the rust; the insects were hovering over the crop, and that seemed to be the whole of the argument.

810. *Mr. Phelps.* Have you observed the peculiar furry appearance on the back of the leaf of the sweetwater grape? Yes, the natural down.

811. The muscat leaf is smooth? Yes.

812. I saw a specimen of what we supposed to be *oidium* on this table a few days ago, and examining it on the back of the muscat leaf handed to me, I saw, as it seemed to me, exactly the appearance of the natural fur that is on the sweetwater? Of course I cannot explain what the appearances were that you observed, but it is quite easy to satisfy yourself what is *oidium*. It is immediately removable by the touch—the slightest touch will remove it; and underneath, there is an appearance as if a solution of gum had been put upon the spot.

813. *Mr. Tunks.* Have you read an article among the American Patent Office Reports, in which this disease is treated of? I have cast my eye over it.

814. Have you observed that the writer states that this *oidium* is similar to the American mildew, and that there can be no doubt of the identity of the two species? I am of opinion that the writer is most probably mistaken. One variety of mould may be easily mistaken for another, excepting the observer has, by careful study, made himself well acquainted with the subject.

815. He also states that it attacks the "Catawba" and "Isabella" grapes, which are American varieties? It has been stated repeatedly, by European writers of celebrity, that this disease, *oidium tuckeri*, does not affect the American varieties of the grape; in fact, it was pointed out to me, by an eminent French botanist, that the "Isabella" grape did not take it.

The Hon.  
Sir William  
Macarthur,  
Knt., M.L.C.

10 Mar., 1869.

816. *Mr. Nowlan.*] I suppose you are aware that the "Isabella" has taken it in this Colony? I have never heard that it has.

817. *Mr. Suttor.*] Have you ever applied sulphur to any other disease in trees, or to destroy the aphid? I do not imagine it would have any effect in destroying the aphid.

818. Not upon insect life? No. All species of mould are immediately destroyed by it; the mould you may see on pumpkin and melon vines, for instance.

819. *Mr. Tunks.*] Have we any knowledge of the origin of this particular disease we are now talking of? None, except that it first appeared in a hot-house at Margate. There are some mysteries which it is very difficult indeed to get to the bottom of; and it is still, I believe, quite unexplained how the vine suddenly, as it were, became attacked by such a novel and fatal disease.

820. *Chairman.*] The Committee will be glad to receive any other information you may be able to append to your evidence?

In accordance with the permission of the Committee, I append to my evidence, in reply to questions, the following observations in support of immediate legislation with reference to the vine disease:—

The disease in question has been carefully studied in Europe, and we have the immense advantage of the results of this study and experience in a concentrated form. Having been introduced here, it is so far fortunate that the *oidium* had only time to spread to a limited extent, before a dry and unusually hot summer immensely facilitated its temporary suppression, so as to enable the growing crops, except in a few instances, to be secured in fine condition. But the germs of the disease are, no doubt, infinitely more widely spread than they were last autumn; and it seems to be quite certain that they only await the return of conditions favourable to their development to break forth with hundred-fold virulence. Is it to be doubted what will be the upshot next spring, if, when it appears through every vine district in the Colony, we are not provided with a law making imperative the rational treatment of such a highly contagious malady? It is hardly possible to mistake the disease. The remedy is simple and inexpensive; but the evil is of such a nature that one refractory owner of vines in a hundred may make himself the means of continuing it to an extent productive of infinite loss and expense to the remainder. Where is the great hardship in the whole submitting themselves to a measure which makes the rational treatment of the malady imperative? Why should we be so chary of surrendering, to a limited extent, our liberty of action, that we may extirpate the disease with the greater facility? We do so in numerous instances, in the precautions enforced to prevent infection with certain dangerous diseases, as well amongst animals as amongst human beings,—the storage and conveyance of gunpowder or other dangerous substances,—and in various matters connected with the cleanliness, health, and good order of towns; in short, wherever the carelessness and neglect of some may operate to the injury or discomfort of all.

Without the advantage of knowing what has been stated to the Committee by the opponents of the Bill, I am led to infer, by the nature of the questions put to me, that various false issues have been raised by them. It is not the amount of the proposed tax upon vines which is at the root of the objections. It would be absurd to suppose that 10s. or 12s. an acre for a few years can be of much consequence to a vine-grower. It is the fear of having his vines put into quarantine, and of being *compelled*, under pain of being subject to all the expense and inconvenience incident to this state of things, to use vigorous measures for the suppression of the disease. That is, as I believe, the real objection.

It is not at all surprising that the district of Albury has not been visited by the disease this season—it would rather have been surprising if it had. The vine-growers in the home districts know that, since December, the combined heat and dryness have nearly obliterated it in an active form; and it would be in opposition to our short experience to learn that it had, under such circumstances, extended itself so far as Albury. But it will be equally in opposition to our experience if it does not shew itself there next spring or early summer. There is nothing in its history to justify the belief that, where the vine flourishes, the disease will not flourish also, if the site be within reach of contagion.

The appointment of vine inspectors, it appears to me, ought to be vested in the Executive Government, that they may be free from the imputation even of being under local influence; but it would seem to be desirable that they should be chosen from persons elected in the various districts by the vine-growers. The votes of these last might be exercised rateably, say at one vote per 2,000 vines planted out to bear fruit, and not less than three years old; no owner of less than 1,000 vines to be entitled to vote at all. Each distinct body of qualified vine-growers might be empowered to elect from its number vine directors—say three or five to a district—to whom any vine proprietors, feeling aggrieved by the action of the inspectors, might appeal for redress. Any question not settled to the satisfaction of the disputing parties to be subject to reference for final settlement to the Executive; but, until otherwise settled, the action of the inspectors to be in full force. It might be provided that the money raised in a district should only be expended in that district, and that the surplus unexpended after two years be returned rateably to the original vine-tax payers of that district.

# DISEASES IN GRAPE-VINES PREVENTION BILL.

## APPENDIX.

(To Evidence given by Jules Joubert, 2 March, 1869.)

Letter from Jules Joubert, Esq., respecting remedies used in Europe for curing vine diseases.

T. H. Mate, Esq.,  
Chairman of the Select Committee on the *Oidium* Bill.

Sydney, 8 March, 1869.

Sir,

Since I had the honor of being examined by you on the *Oidium* Bill, I have received from the Minister of Agriculture in Paris twenty different works, written by various authors, on the vine disease. I have also the Reports of the Committees appointed in France to inquire into the matter, which has of late engrossed the attention of our vine-growers, and given rise to the measure you are endeavouring to elucidate.

According to promise, I have read attentively the whole of the works received, and will try to convey the gist of my observations.

1. The majority of the pamphlets received were published in France, in 1852, 53, 54, and 55, and are, up to that date, mere descriptions of the disease, accompanied by experiments of several remedies, the whole of which seem to have given way to the application of "dry pulverized sulphur," by means of bellows. The last publications, dated 1860 and 61, contain the most important points, inasmuch as the writers are in possession of facts, and deal with the complaint from its origin to its cure, following it throughout the whole of its destructive career.

2. I see that the vine disease, which in 1845 made its appearance at Margate, and was reported by Mr. Tucker, has been described by a Greek botanist, Theophrastes, in 1552, and also by the well-known naturalist Pliny, in 1606; but owing, I surmise, to the limited extent of vines under cultivation, the disease does not seem to have caused any real damage until 1847, when it spread with terrific rapidity all over Europe, and would have destroyed one of the most productive industries, had not proper precautions been adopted to cause the immediate and vigorous application of the antidote, sulphur, to be used in every locality as soon as the disease made its appearance.

3. I conclude, therefore, that we have it in our power to check and eradicate the disease, providing we apply the remedy in good time.

I have, &c.,

JULES JOUBERT,  
Secy. Agr. Society, N.S.W.

Sydney: Thomas Richards, Government Printer.—1869.

1868-9.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

# ABATTOIRS.

(RETURNS FOR THE YEARS 1865, 1866, 1867, AND 1868, RESPECTING.)

*Ordered by the Legislative Assembly to be Printed, 16 February, 1869.**Laid on Table in reply to Question No. 2. See Votes and Proceedings, No. 35, of Tuesday, 9 February, 1869.*

No. 1.

RETURN of the Number of Beef and Mutton Slaughter-houses leased at the Abattoirs, for the Years 1865, 1866, 1867, and 1868, showing for what term each Slaughter-house was leased, and the Amount received in Rents annually.

## SYDNEY CATTLE SLAUGHTERING PREVENTION BILL.

(PETITION—CERTAIN BUTCHERS OF SYDNEY AND SUBURBS.)

---

*Ordered by the Legislative Assembly to be Printed, 11 February, 1869.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned,—

RESPECTFULLY SHEWETH :—

(1.) That your Petitioners are Butchers, residing in, and carrying on business in, the City of Sydney and its Suburbs.

(2.) That your Petitioners have been informed that a Bill to prevent slaughtering of Cattle within the City of Sydney was introduced into your Honorable House, on the twenty-ninth day of January last, and read a first time, and ordered to be read a second time on Friday next, the fifth of February.

(3.) That your Petitioners have been informed that the said Bill contains provision for conferring powers calculated to invade the rights and liberties of your Petitioners, as subjects of Her Majesty the Queen.

(4.) Your Petitioners, therefore, humbly pray your Honorable House to delay the said second reading of the said Bill until your Petitioners shall have had time and opportunity to read and consider the Bill.

And your Petitioners, as in duty bound, shall ever pray.

Sydney, 4 February, 1869.

[*Here follow 62 Signatures.*]

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## ROBERT TAYLOR.

(PETITION OF.)

*Ordered by the Legislative Assembly to be Printed, 10 December, 1868.*

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Memorial of Robert Taylor, Free Selector, Gilmore Creek, County of Wynyard, District of Murrumbidgee,—

MOST RESPECTFULLY SHEWETH:—

That Memorialist selected 100 acres of land on the Rose Bank Run, in the District of Murrumbidgee, on the 22nd February, 1866, and paid the usual moiety to the Land Agent.

That Memorialist had improved the said land to the amount of £250, when he received notice, on 28th January, 1867, from the Department of Lands, that his selection was cancelled, in consequence of improvements said to be previously effected by Mr. Robert Downey, to the amount of £100.

That Memorialist's father and brother then proceeded to Sydney, under considerable expense, for the purpose of obtaining an interview with the Minister for Lands, when that gentleman told them to represent the case to him in writing, which was done, through the medium of a Member of your Honorable House, and, through that gentleman's kind offices, the dispute was referred to arbitration. In following up the instructions of the Minister for Lands, agreeably to letter dated 17th August, 1867, Memorialist named an arbitrator, who made the requisite declaration before a Justice of the Peace, on the following 9th September. The same day Mr. Downey was made acquainted with the steps that had been taken, and was requested to appoint his arbitrator in furtherance to a settlement of the dispute. On the 21st October, Memorialist received a note from Mr. Downey, stating that his arbitrator would attend at his house—"The Killarney Inn." Memorialist went, accompanied by arbitrator and witnesses, when it was agreed to request L. Mandelson, Esq., to act as umpire. That gentleman declined the office. A few days after this, Memorialist's arbitrator sent a note to Mr. Downey, requesting an interview with his arbitrator, and to this no reply was given. Shortly afterwards, Memorialist, accompanied by his father and arbitrator, called upon Mr. Downey, and again solicited an interview with his arbitrator. He replied in coarse and abusive terms—"There is no arbitrator here," and that he would have no more to do with it, but that the Government should settle it.

That Memorialist then communicated the particulars of what had transpired to the gentleman who had kindly interested himself in his behalf; and, by his advice, my arbitrator again addressed Mr. Downey, requesting an interview with his arbitrator, and appointed a time and place for meeting, and to this no answer was returned.

That Memorialist, accompanied by his father and arbitrator, again called upon Mr. Downey, who said that he had already given his answer—not to bother him any more about it; that if the Government thought fit to give me the land, let them give it. On the same day Memorialist's father and arbitrator met Mr. Downey's arbitrator near Tumut, when they agreed to appoint Mr. McGruer as umpire, with an understanding that they were to meet on the following morning at 9 o'clock, at the Killarney Inn. Upon our arrival there at the appointed hour, Mr. Downey said "There is no arbitrator here," that he did not know where he was, nor did he care; that the time for arbitration had passed, and that the Government must settle it. This occurred on the 27th November last.

That Memorialist growing tired of Mr. Downey's evasion and abuse, again addressed the gentleman who had interested himself in his affairs; and by his instructions,  
100—  
through

through letter from the Minister for Lands, my arbitrator, in the presence of witnesses, announced to Mr. Downey to proceed with the case on the 21st December, at my residence, on the Gilmore, requesting the attendance of his witnesses to settle the dispute in question. Memorialist also requested Mr. John Wilkinson, a squatter on the Tumut River, to attend on this date, as for twenty years and upwards he possessed a knowledge of the land in dispute. This gentleman stated on oath, that the extent of the improvements effected by Mr. Downey or any other person did not exceed £3; and with regard to the two-rail fence, he had known part of it to be standing for the last fifteen years, and considered it of mere nominal value. There were also the affidavits of A. K. Taylor and John Taylor, certifying to the value of the improvements not exceeding £15, and the appraiser considered that £12 was the full value; he therefore decreed in Memorialist's favour.

That Memorialist begs to remark, that the whole of the land which Downey's fence enclosed is about twenty-seven and a half acres, of which, twenty acres is forest land, and the other seven and a half acres has been cleared by nature. The remaining portion of the 100 acres has been cleared at Memorialist's expense and by his labour; and Memorialist further begs to remark that, about three weeks after he had selected such land, upon the Government Surveyor stating that there was a portion of the fence belonging to Mr. Downey, on the said selection, due notice was given, through the local journal, to Mr. Downey to remove the same, to which no attention was paid.

That Memorialist, upon the decision of the appraiser, forwarded the documents relating to such, to the Minister for Lands, on the evening of the same day, and in reply, a letter from the Department of Lands, dated 6th May, 1868, states that the Secretary for Lands had revoked the cancellation of the conditional purchase in question, thereby approving of the appraiser's decree, and giving Memorialist full right and title to the selection. Upon receipt of this letter Memorialist commenced ploughing, and sowed twenty acres with wheat, and cleared twenty acres more for corn. At this juncture, a letter from the Department of Lands, dated 23rd June, 1868, states that a document had been overlooked, which again brought the case under reconsideration, and appointing F. W. Vyner, Esq., as appraiser. On the 6th July Mr. Vyner, accompanied by E. G. Brown, Esq., the Representative for Tumut, and Mr. Downey and son, came on the land in question, when he (Mr. Vyner) briefly stated that he did not intend to examine any witnesses that he would see for himself. Upon this occasion, Mr. Brown took a very active part; and when Memorialist's father drew Mr. Vyner's attention to the circumstance of a neighbouring selector having taken up a considerable portion of Mr. Downey's fence, and nothing said about it, Mr. Brown remarked, that the squatter had the option to arrange such matter with the selector. The said selector being within call, denied that he had ever entered into any arrangement with Mr. Downey.

That Memorialist, to his astonishment, received a communication from the Department of Lands, dated 22nd September, stating that his conditional purchase was again cancelled, under a fresh award which gave the value of Mr. Downey's improvements at £75. This amount is Mr. Vyner's return, by which the affidavits of four respectable individuals have been cast aside, and a single person's statement acted upon, to the impoverishment and irreparable injury of the free selector.

That Memorialist most respectfully prays your Honorable House to cause an investigation into the foregoing circumstances, and further prays that he may be allowed to complete the purchase of his selection.

That Memorialist, relying on the equity of your Honorable House, confidently awaits your decision.

ROBERT TAYLOR.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

MR. JOHN THOMAS NEILSON.  
(PETITION OF.)

---

*Ordered by the Legislative Assembly to be Printed, 8 January, 1869.*

---

To the Honorable the Legislative Assembly of the Colony of New South Wales, in  
Parliament assembled.

The Petition of John Thomas Neilson, of Windsor, in the aforesaid Colony,—

HUMBLY SHEWETH :—

That your Petitioner, in the month of May, 1866, tendered for a new Run of vacant Crown Lands upon the confines of the Albert and Darling Pastoral Districts, under the name of "Menindie East," No. 19, of June, 1866, in due form, and paid the necessary deposit, &c., as required by the Crown Lands Occupation Act of 1861.

That the tender in question was forwarded to Mr. Commissioner Cole, of the Darling District, for his report.

That, upon the 26th July, 1867, your Petitioner was informed by letter—"that his tender for the run called 'Menindie East,' in the District of the Darling, had been declined, the land therein applied for being comprised in the runs known as Wambah, Outer Wambah, and East Wambah, already under promise of lease."

That your Petitioner being aware, by the documents then extant in the Crown Lands Office, that the land applied for by him, and of which he was legally entitled to the lease thereof, embraced no land under lease, or promise of lease, nor applied for under any previous tender, wrote, on the 17th March, 1868, to the Minister for Lands for the time being, asking for a reconsideration of his tender, to which he received a similar reply as conveyed by letter of 26th July, 1867.

That your Petitioner called further attention to this matter, by letter dated 28th July, 1868, but has received no reply thereto.

That your Petitioner has every reason to believe that, since he has made application for the lease of the aforesaid "Menindie East" Run, that the boundaries of the runs adjoining his application have been amended and enlarged, in order to unjustly deprive him of the lease of the aforesaid "Menindie East" Run.

That an injustice has thereby been done to your Petitioner.

Your Petitioner, therefore, humbly prays that your Honorable House may be pleased to take the premises into consideration, and to order a Select Committee to make inquiries in the matter, and to grant such relief as your Honorable House may in your wisdom direct.

And your Petitioner, as in duty bound, will ever pray.

JOHN THOMAS NEILSON,  
Windsor, N. S. Wales.

## Minindie East Run—Papers.

### No. 1.

MR. J. T. NEILSON'S TENDER FOR MENINDIE EAST RUN.

*Tender for a Lease of a new Run of Crown Lands.—Second Class Settled, or Unsettled Districts.*

IN accordance with the provisions of the Crown Lands Occupation Act of 1861, and of the Regulations made in pursuance thereof, I, John Thomas Neilson, of Sydney, do hereby propose to take a lease of the Crown Lands known as Menindie East, in the districts of Albert and Darling, which lands are particularly described in the Schedule annexed to this tender.

2. And, in consideration of such lease, I am willing, and hereby offer, to pay yearly, in advance, the rent of the said Crown Lands, as the same may be determined by appraisalment under the said Act.

3. And I do agree that, in the event of this tender being accepted, and of such acceptance being notified in the *Gazette*, I will, within sixty days after such notification, pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, and pending such appraisalment as aforesaid, the sum of ten pounds, together with the sum of twenty pounds, being the assessment payable under the Increased Assessment and Rent Act of 1858; and also the sum of two shillings sterling, by way of premium for the said lease: that is to say—

Rent, pending appraisalment	...	...	...	...	£	s.	d.
Assessment, do.	...	...	...	...	10	0	0
Additional yearly payment, offered by way of premium (if any)	...	...	...	...	20	0	0
	...	...	...	...	0	2	0
Total	...	...	...	...	£30	2	0

And in default of such payments, I agree to forfeit my deposit on this tender.

Given under my hand, this fifth day of May, A.D., 1866,—

JOHN THOS. NEILSON,

Care of MESSRS. LAWSON & CADELL,  
George-street, Sydney.

To the Honorable  
The Minister for Lands, Sydney.

### SCHEDULE referred to in the foregoing Tender.

Pastoral Districts and General Locality.	Name of Run.	Estimated Area in Square Miles.	Estimated Pastoral Capability.	Description of the boundaries of the Run, and the marks or natural features by which such boundaries are indicated. (N.B.—This description must be clear, detailed, and specific.)
Albert and Darling Districts, upon the east bank of the Darling River.	Menindie East.	100, or 64,000 acres.	2,500 sheep.	Commencing on the east bank of the Darling River, at the south-west corner of Blenheim Run, and immediately opposite the junction of Laidley Ponds Creek with the river Darling; bounded on the north by a line east, coincident with the southern boundary of the aforesaid Blenheim Run, and part of the southern boundary of Back Blenheim, 20 miles; on the east by a line south to a point where a line eastward for 20 miles from the north-west corner of Wambah Run would intersect it; on the south by a line west 20 miles to the north-west corner of Wambah Run; and on the west by the river Darling, upwards, to the point of commencement—being vacant Crown Lands existent upon the Darling River, not embraced in any accepted tender, and subject to any adjustment of boundaries that may be necessary.

JOHN THOS. NEILSON.

### Deposit Certificate.

I CERTIFY that the sum of two pounds ten shillings sterling has this day been paid into the Colonial Treasury by John Thos. Neilson, of Sydney, care of Messrs. Lawson and Cadell, George-street, as the deposit on a tender for a run named Menindie East, Albert and Darling Districts.

W. NEWCOMBE.

Colonial Treasury, Sydney,  
5 May, 1866.

UNDER

UNDER the Commissioner's Report, dated 16 February, 1867, that the land herein applied for is comprised in the runs known as "Wambah," "Outer Wambah," and "East Wambah," already under promise of lease,—I recommend that this tender be declined.

67-1580.—Declined, 26 July, 1867.

A. O. MORIARTY,  
24 April, 1867.

## No. 2.

MR. J. T. NEILSON to THE CHIEF COMMISSIONER OF CROWN LANDS.

No. 2, Sea-view Terrace,  
Liverpool-street, Darlinghurst,  
7 June, 1866.

SIR,

Menindie East,  
No. , of June,  
1866.  
Appendix A.

Referring to my tender, named and numbered in the margin, for a run of Crown Lands on the river Darling, contiguous to the boundary between the Albert and Darling Districts, I have the honor herewith to transmit tracing of the run applied for by me, and, in explanation, to state that the northern boundary of the run in question commences where the south boundary of Blenheim Run (No. 33 of Nov., 1848) starts from the Darling, *i. e.*, at a point opposite the junction of Laidley Ponds Creek, and at the southern boundary of the run applied for by me, as before mentioned; commences at a point 5 miles below the junction of Laidley Ponds Creek, and at the termination of the northern and western boundary of Wambah (No. 9 of Feb., 1856), as laid down in the report of Mr. Commissioner Cole upon that tender.

I have, &c.,  
JOHN THOS. NEILSON.

## No. 3.

MR. R. P. RAYMOND to THE CHIEF COMMISSIONER OF CROWN LANDS.

No. 15, Bligh-street,  
Sydney, 28 November, 1866.

SIR,

I do myself the honor to inform you, that I have received a letter from Mr. Jno. Thos. Neilson, requesting me to draw your attention to his tender for a new run on the Darling River, called by him "Menindie East," and to beg that you will give his application your earliest attention.

Mr. Neilson states that the run known as Wambah was originally placed on the Commissioner's tracing 5 miles below the position lately assigned to it on an amended tracing; and that it is now incorrectly shown as adjoining Mr. Phelps' Blenheim Run, whereas the description of "Wambah" clearly indicates the local Commissioner was correct, in the first instance, in placing it where he did.

Under these circumstances, he maintains the country tendered for by him is vacant Crown Lands and open to tender.

I have, &c.,  
R. PEEL RAYMOND,  
Agent.

For the report of Commissioner with reference to the tender referred to.—B.C.,  
29 January, 1867.—A.O.M.  
To be returned.

## No. 4.

MR. COMMISSIONER COLE to THE CHIEF COMMISSIONER OF CROWN LANDS.

Euston, 16 February, 1867.

THERE is no vacant frontage on either side of the Darling River in this district. The tender for "Menindie East" is recommended to be declined, as indicating country already leased as—

Wambah, tender No. 9 of February, 1850; accepted, 28th February, 1855—  
Outer Wambah, No. 45 of September, 1855; accepted, 12th March, 1856—  
East Wambah, No. 103 of December, 1857; accepted, 15th August, 1859.

2. It is difficult to understand how J. T. Neilson can state—"that the run of 'Wambah' was originally placed on the Commissioner's tracing 5 miles below the position lately assigned to it on an amended tracing, and that it is now incorrectly shown as adjoining Mr. Phelps' Blenheim Run," inasmuch as he has never seen the original tracing in my possession on which such runs are marked.

3. It appears to be assumed, that the plan printed in Melbourne by R. P. Counsel, in May, 1860, to illustrate tenders for runs between the Lachlan and Darling, on which the run of Wambah is placed in the manner stated by J. T. Neilson, was the published tracing of the Commissioner; whereas the plan in question was constructed without any reference and unknown to me, and is moreover most erroneous.

4. The frontage of 10 miles between the north boundary of Makenyah or Yenda, No. 30 of February, 1850, and the south boundary of Blenheim, No. 33 of November, 1848, now in the Albert District, has always been occupied as Wambah and South Wambah, and are so charted by me.

5. On reference to tender No. 52 of May, 1865, declined on the 18th January, 1867, it will be seen that a considerable portion of the country included in No. 19 of June, 1866, was previously applied for by John Neilson and Henry Leonard; and, judging from the description given in tender No. 52 of May, 1865, Outer Tyndya, Neilson appears to have adopted the plan above referred to, inasmuch as the starting point in the same is given from a run called Tyndya, laid down thereon as having a frontage to the River Darling.

6. At a subsequent date, it appears to me that Neilson must have ascertained that Tyndya was a back block, and adopting Counsel's plan, he proceeded to frame the description embraced in No. 19 of June, 1866, as "Menindie East," so as to secure to himself the supposed vacant country.

7. Mr. Raymond's letter of the 28th November, 1866, is herewith returned, and a tracing of Counsel's plan, together with a diagram from my own map is forwarded for information. Appendix B.  
Appendix C.

STEPHEN COLE.

#### No. 5.

MR. COMMISSIONER COLE to THE CHIEF COMMISSIONER OF CROWN LANDS.

Crown Lands Office,  
Euston, Darling District,  
16 February, 1867.

SIR,

I do myself the honor to recommend that tender No. 19 of June, 1866, Menindie East, by John Thomas Neilson, should be declined, as indicating country already under lease as—

Wambah, No. 9 of February, 1850; accepted, 28th February, 1855—  
Outer Wambah, 45 of September, 1855; accepted, 12th March, 1856—  
East Wambah, No. 103 of December, 1857; accepted, 15th August, 1859.

I have, &c.,  
STEPHEN COLE,  
Commissioner for Crown Lands.

#### No. 6.

MR. J. T. NEILSON to THE CHIEF COMMISSIONER OF CROWN LANDS.

[Care of R. P. Raymond, Esq., Bligh-street.] Sydney, 14 March, 1867.

SIR,

Having reference to my tender, No. of June, 1866, Menindie East, as well as my explanatory letter forwarded with the tender in question, I respectfully beg to submit that the tender in question does not embrace any land under lease or promise of lease, but embraces an area originally charted in the Commissioners' map as "Tyndya," which has no existence as a run; and the run as applied for by me embraces the frontage thus erroneously charted, and lying between Mr. Phelps' run "Blenheim" and Mr. Reid's run "Wambah," the description of which coincides with its position as originally laid down by Mr. Commissioner Cole, in his original tracing (before-mentioned) showing the position and approximate boundaries of the runs in his district.

I have, &c.,

#### No. 7.

MINUTE OF THE CHIEF COMMISSIONER OF CROWN LANDS.

It is quite clear that the land applied for by Neilson is the Wambah Run, as originally applied for by James Macleod. In recommending the tender for acceptance, however, the Commissioners proposed an amended description, the effect of which was to make Wambah overlap in its entirety the run called South Wambah, applied for at the same time by the same applicant, and to leave apparently vacant the land actually applied for.

As the land was that originally applied for, and has always been occupied by the lessees of the two runs as the Wambah, for which they paid rent, and as there is no other country available for them supposing this to be vacant, I do not think there can be any question as to the manifest impropriety and injustice that would be perpetrated were they to be now deprived of their run as the penalty of a mere blunder of the Commissioner, for which neither they nor their predecessors are accountable.

The

The proper course will be to correct the error in the description of Wambah, and decline the within tender.

It is difficult to understand how so palpable an error as that committed by Mr. Cole could have occurred originally, or been suffered to remain undetected for so long, had reasonable care and attention been bestowed by him upon matters of such importance.—A.O.M.—11 April, 1867.

Approved.—J.B.W.—29 May.

### No. 8.

Sydney, 16 April, 1867.

SIR,

No. 19, of June,  
1866.

With reference to your report, dated the 16th February last, on Mr. Raymond's letter relative to J. T. Neilson's tender for Menindie East, I have the honor to point out that it is quite clear that the land applied for by Neilson is the Wambah Run, as originally applied for by James Macleod.

In recommending this tender for acceptance, however, you proposed an amended description, the effect of which was to make Wambah overlap in its entirety the run called South Wambah, applied for at the same time by the same applicant, and to leave apparently vacant the land actually applied for.

As the land was that originally applied for, and has always been occupied by the lessees of the two runs as the Wambah, for which they paid rent, and as there was no other country available for them supposing this to be vacant, I do not think there can be any question as to the manifest impropriety and injustice that would be perpetrated were they to be deprived of their runs as the penalty of a mere blunder of yours, for which neither they nor their predecessors are accountable.

It is difficult to understand how so palpable an error as that committed by you could have occurred originally, or been suffered to remain undetected for so long, had reasonable care and attention been bestowed by you in a matter of such importance.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner of Crown Lands.

### No. 9.

MR. J. T. NEILSON to THE SECRETARY FOR LANDS.

Cockenzie Bank,  
Windsor, 11 February, 1868.

Some time since I received a notification from the Chief Commissioner of Crown Lands, informing me that my tender for a run of Crown Lands, named as in the margin, had been rejected for the reason that it embraced land previously leased.

As the Commissioner of the district has committed some mistake in thus reporting, I respectfully requested to be furnished with a copy of his report on the tender in question.

I have, &c.,

JOHN THOS. NEILSON.

Chief Commissioner of Crown Lands.—12 February.—M.F.  
I see no object in pursuing this correspondence.—A.O.M., 20.

### No. 10.

MR. J. T. NEILSON to THE SECRETARY FOR LANDS.

Cockenzie Bank,  
Windsor, 17 March, 1868.

SIR,

I have the honor to address you in reference to my application, in the usual form, for the lease of a new run of Crown lands, upon the confines of the present boundaries of the Darling and Albert Districts, and being named and numbered as in the margin. The tender being received in due form (the necessary deposit of £2 10s. having been paid) was forwarded to Mr. Commissioner Cole for his report.

Menindie East,  
No. 19 of June,  
1866—Albert  
and Darling  
Districts.

Unfortunately for my interests, and as you are well aware, I had fallen into collision with this subordinate, through his having, in an unguarded and imprudent moment, attempted to fasten upon me the opprobrium of a felonious act, and having necessarily taken upon myself the onus of disproving the same. This officer has further sought

MR. JOHN THOMAS NEILSON.

7

sought to use his influence in erroneously reporting upon this tender for rejection, and, in an incorrect and sophistical manner, to deprive me of the lease of the lands specified in schedule of the tender in question.

The facts are these. The Commissioner is, no doubt, extremely annoyed that I should have made the discovery that there was any vacant Crown lands in his district, and especially land which was considered to form part of a run in which he held a beneficial interest with Mr. James Macleod before its sale to the present lessees; but which land, by letters and diagrams following the tender, I proved to be vacant Crown Lands—i. e., lands not being held under lease or promise of lease, or applied for under any previous tender; and, as such, it was competent for me to tender for a lease of the same, under the 14th section of the Crown Lands Occupation Act of 1861.

I respectfully beg to submit that I am justly and legally entitled to a lease of the run in question, and humbly ask a reconsideration of the tender in question.

I have, &c.,

JOHN THOS. NEILSON.

Chief Commissioner of Crown Lands.—18 March.—M.F.

### No. 11.

THE UNDER SECRETARY FOR LANDS to MR. J. T. NEILSON.

Department of Lands,

Sydney, 9 June, 1868.

SIR,

Referring to your letter of the 17th March last and previous correspondence, respecting your tender for lease of a new un in the Darling and Albert Districts, I am directed by the Secretary for Lands to inform you that, after inquiry into the matter, it appears quite clear that the land applied for by you is the Wambah Run, as originally applied for by Mr. James Macleod, and your tender for the same could not therefore be accepted.

I have, &c.,

MICHL. FITZPATRICK.

### No. 12.

MR. J. T. NEILSON to THE SECRETARY FOR LANDS.

Cockenzie Bank,

Windsor, 28 July, 1868.

SIR,

I beg to acknowledge receipt of communication from your department, dated 9th June last (copy of which is enclosed for your reference), in which I am informed "that the land applied for by me (as per tender in margin) is the Wambah Run as originally applied for by Mr. James Macleod, and your tender for the same could not therefore be accepted." In reply, I respectfully beg to submit that upon reference to the descriptions in the annexure and the accompanying diagram, you will find that a *manifest error* has been committed. You will see that the tender Menindie East (colored yellow) embraces no portion of the Wambah Run (colored red), as now held under promise of lease from the Crown. I may also add that the land applied for by me is vacant Crown lands, according to the documents at present extant in the Crown Lands Office.

See letter from Under Secretary for Lands to Mr. Neilson, dated 9 June, 1868. Appendix D.

It may be proper to remark that the present lessees of the Wambah Run are at present in the enjoyment of nearly double the area for which they pay rent to the Crown.

JOHN THOS. NEILSON.

Chief Commissioner of Crown Lands.—31 July.—M.F.

### [Enclosures in No. 12.]

#### DARLING DISTRICT.

MENINDIE EAST:—64,000 acres, 2500 sheep—No. 19 of June, 1866, tendered for by J. T. Neilson. Commencing on the east bank of the Darling River at the south-west corner of Blenheim Run, and immediately opposite the junction of Laidley Ponds Creek with the Darling River; bounded on the north by a line east coincident with the southern boundary of the aforesaid Blenheim Run and part of the southern boundary of Back Blenheim, 20 miles; on the east by a line south to a point where a line eastward for 20 miles from the north-west corner of Wambah Run would intersect it; on the south by a line west to the north-west corner of Wambah Run; and on the west by the river Darling upwards to the commencing point.

WAMBAH:—16,000 acres, 4,000 sheep—No. 9 of February, 1850, leased to R. T. & W. L. Reid. Commencing at a point on the river Darling, 10 miles below the junction of Laidley Ponds Creek with that river or 30 miles above Walshe's hut at Cunyponulla; bounded on the north by a line east, 5 miles; on the east by a line south, 5 miles; on the south by a line west, 5 miles; and on the west by the river Darling, to the starting point.

No. 13.

## No. 13.

## MINUTE OF THE CHIEF COMMISSIONER OF CROWN LANDS.

Appendix E.

THE land already leased is now shown accurately on the sketch supplied by the writer, who had shown a portion of it only, and that incorrectly.

I have, on more than one occasion, gone fully into this case with the writer personally, and he is quite well informed of all the facts. His claim is a preposterous one, quite unworthy of serious attention; and I can see no good in permitting him to waste valuable time in further correspondence with respect to it.—A.O.M.

The Under Secretary for Lands.—B.C., 12 August, 1868.

Approved.—J.B.W., 15 August.

Chief Commissioner of Crown Lands.—B.C., 15 Aug.—G.J.A. (For the U. S.)

## No. 1.

## MR. JAMES MACLEOD'S TENDER FOR WAMBAB RUN.

*Tender for a Lease of a new Run of Crown Lands.—Intermediate or Unsettled Districts.*

5 February, 1850.

IN accordance with the provisions contained in Her Majesty's Order in Council, published in the New South Wales *Government Gazette* of the 7th October, 1847, and of the Regulations of 1st January, 1848, published in pursuance thereof, I, James Macleod, of Darling District, do hereby propose to take a lease, for fourteen years, of the Crown Lands known as Tally Workah, or Wambah, in the district of Darling River, which lands are particularly described in the Schedule annexed to this tender; and in consideration of such lease I am willing, and hereby offer, to pay yearly, in advance, the minimum rent of ten pounds, with two pounds ten shillings added, for every thousand sheep or their equivalent in cattle above four thousand sheep or their equivalent which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying; and also, the additional sum or yearly rent, in advance, of one pound one shilling for every thousand sheep, or their equivalent, as aforesaid, by way of premium for the said lease.

Given under my hand, this 1st day of January, A.D., 1850,—

(For JAMES MACLEOD),

DONALD R. MACLEOD.

To the Honorable the Colonial Secretary.

Applicants informed.—9 Feb., 1850.

Commr.—10 Feb., /50.

## SCHEDULE referred to in the foregoing Tender.

Commissioner's District and General Locality.	Name of Run.	Estimated number of Acres.	Estimated capability for grazing.		Description of the Lands by reference to leading geographical features, and marked or determined boundary lines.
			Cattle.	Sheep.	
Commissioner Geo. S. McDonald, Eastern Bank of the Darling, nearly opposite Laidley's Ponds.	Wambah	15,000	200	4,000	This run is on the eastern bank of the Darling River, on or about 30 miles above Walshe's hut. This hut is estimated to be about 100 miles above the junction of the rivers Murray and Darling. The run now applied for to commence where the Creek Tally Workah (native name) joins the Darling, and to extend up the river 5 miles.

(For JAMES MACLEOD),

D. R. MACLEOD.

UNDER the report of the Commissioner, we recommend the acceptance of this tender; subject, however, to the amended description.

JOHN THOMPSON,

H. H. BROWN,

GEO. BARNEY,

2 Jan., 1855.

Appd.—W.D., 26 Jan.

Mr. Macleod, Commr. Cole, Auditor General, and Colonial Treasurer.—28 Feb., 1855.

## No 2.

MR. COMMISSIONER COLE to THE CHIEF COMMISSIONER OF CROWN LANDS.

Crown Commissioner's Office,  
Euston, Lower Darling,  
1 December, 1854.

SIR,

I do myself the honor to recommend for acceptance tender No. 9 of February, 1850 (G. Macleod), and to furnish herewith an amended description of the same.

I have, &c.,  
STEPHEN COLE.

## DESCRIPTION OF WAMBAH.

Estimated area—16,000 acres : Estimated grazing capabilities—4,000 sheep.

COMMENCING at a point on the Darling River, about 10 miles below the junction of Laidley Ponds Creek, or Menindie, with the Darling, or at a point about 30 miles above Walshe's hut at Cunyponulla, and extending up the river about 5 miles ; on the north by a line east about 5 miles ; on the east by a line south about 5 miles ; on the south by a line west about 5 miles, to the starting point on the river.

## No. 3.

THE COLONIAL TREASURER to THE CHIEF COMMISSIONER OF CROWN LANDS.

Revenue Branch, Colonial Treasury,  
Sydney, 12 April, 1855.

SIR,

With reference to your letter, dated 28 Febry. last, No. 55-199, notifying the acceptance of Mr. James Macleod's tender for a station in the district of Lower Darling, called Wambah, I have the honor to report, for the information of His Excellency the Governor General, that the first year's rent of the station in question was paid into this office on the 11th instant.

I have, &c.,  
FRANCIS L. MEREWETHER,  
Colonial Treasurer.

Occupation to be authorized.—26.  
Commissioner and party.—10 May, 1855.

## No. 4.

## APPRAISEMENT OF GRAZING CAPABILITIES OF WAMBAH.

*Queen's Orders in Council, Chapter 2, Section 3.—9 March, 1847.*

WE, the undersigned—George Butler Fletcher, Esquire, acting as valuer for James Macleod, and Stephen Cole, Esq., Commissioner of Crown Lands, acting as valuer for the Government—do hereby estimate the Run of Wambah as capable of carrying 4,000 sheep or their equivalent in cattle.

Wambah—4,000 sheep.

GEORGE B. FLETCHER.  
STEPHEN COLE.

Euston, Lower Darling, 12 February, 1859.

## No. 5.

MR. COMMISSIONER COLE to THE CHIEF COMMISSIONER OF CROWN LANDS.

Crown Lands Office,  
Euston, Darling District,  
31 January, 1867.

SIR,

On the examination of the description of the run embraced in tender No. 9, of February, 1850, accepted under an amended description, 28th February, 1855, it appeared to me that the same had been furnished in error.

A reference to the description in the abovenamed tender will show that the starting point given in the same was "where the Talya Walka (native name) joins with the Darling, and to extend up the river 5 miles," which clearly shows that the amended description does not illustrate the country originally applied for by Mr. Macleod and transferred to the Messrs. Reid.

232—B

Under

Under these circumstances, I deemed it desirable, when on that country in November last, to obtain the sanction of the Messrs. Reid to the amended description herewith enclosed; and, at their request, to make the starting point from the surveyor's marked line cut from Menindie—and these descriptions, so subscribed by them, I have the honor to submit, under approval, may be adopted as the descriptions of—

Wambah, tender No. 9 of February, 1850, accepted 28th February, 1855;  
South Wambah, No. 43, September, 1855, accepted 12th March, 1856.

I have, &c.,

STEPHEN COLE,  
Commissioner of Crown Lands.

[Enclosure in No. 5.]

#### DESCRIPTION OF WAMBAH.

Estimated area—25 square miles: Estimated grazing capabilities—4,000 sheep.

COMMENCING at a tree marked with a broad-arrow on the east bank of the Darling River opposite the junction of Laidley Ponds, or Menindie Creek, with the Darling; and bounded on the north by a line east about 5 miles, to the five-mile peg; on the east by a line southerly about 5 miles; on the south by a line west about 5 miles crossing Undeathi Creek; thence by the Darling River upwards, to the starting point aforesaid.

Tolarno, Darling River,  
27 November, 1866.

WM. L. & R. T. REID.  
STEPHEN COLE,  
Commissioner.

### Outer Wambah Run—Papers.

#### No. 1.

#### MR. J. T. NEILSON'S TENDER FOR OUTER WAMBAH.

*Tender for a Lease of a new Run of Crown Lands.—Intermediate or Unsettled Districts.*

IN accordance with the provisions contained in Her Majesty's Order in Council, published in the New South Wales *Government Gazette* of the 7th October, 1847, and of the Regulations of the Local Government published in pursuance thereof, I, James Macleod, of the Junction of the Darling, do hereby propose to take a lease, for fourteen years, of the Crown Lands known as Outer Wambah, in the district of the Lower Darling, which lands are particularly described in the Schedule annexed to this tender.

2. And in consideration of such lease, I am willing, and hereby offer, to pay in advance the minimum rent below which it is provided by the said Order in Council that no run shall be let, namely, ten pounds per annum, with two pounds ten shillings per annum added thereto for every thousand sheep or their equivalent in cattle beyond four thousand sheep or their equivalent which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying; and also in consideration of such lease, and by way of premium for the same, I do offer to pay yearly, in advance, the further sum of \_\_\_\_\_ in addition to the amount of the said minimum rent.

3. And I do agree that, in the event of this tender being accepted by His Excellency the Governor General, and of such acceptance being notified in the New South Wales *Government Gazette*, I will, within sixty days after such notification, pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, notwithstanding that the lease of the said run may not have been executed, the sum of ten pounds, being the amount, according to my computation, of the grazing capabilities of the run, of the payments which I have above offered to make, viz.:—

	£	s.	d.
Minimum yearly rent below which no run can be let ...	10	0	0
Further payment at the rate of £2 10s. per thousand for the number of stock above four thousand sheep or their equivalent which the run applied for is estimated to be capable of carrying ...			
Additional yearly payment offered by way of premium .....			
Total ...	£10	0	0

Such payment nevertheless to be without prejudice to the subsequent adjustment of the rent according to the second and third sections of the second chapter of the above-mentioned Order in Council.

4. And in consideration of this tender being accepted, and in the event of such payment not being made within the beforementioned period of sixty days, I further agree to forfeit to Her Majesty the sum of twenty pounds by way of liquidated damages, and to forfeit any right acquired by virtue of this tender and such acceptance thereof as aforesaid.

Given under my hand, this 8th day of August, A.D. 1855,—

JAMES MACLEOD.

To the Chief Commissioner of Crown Lands, Sydney.

SCHEDULE

## SCHEDULE referred to in the foregoing Tender.

Commissioner's District, and General Locality.	Name of Run.	Estimated Number of Acres.	Estimated Capability.	Description of the Lands, by reference to leading geographical features and marked or determined boundary lines.
Lower Darling .....	Outer Wambah.	32,000	4,000 sheep.	Commencing at the north-east corner of the Wambah Run, and bounded on the east by a line south, 10 miles; on the south by a line west, 5 miles; on the west by a line north, 10 miles; on the north by a line east to the starting-point, about 5 miles. This is the back country of the Wambah and South Wambah Runs, and is only winter feeding country if rain falls for about three months.

JAMES MACLEOD.

Commissioner and party.—24 September, 1855.

UNDER the report of the Commissioner, we recommend that this tender be accepted.

W. DENISON, February, 1856.  
Accepted, 12th March, 1856.H. H. BROWN,

## East Wambah Run—Papers.

## No. 1.

## MR. JAMES MACLEOD'S TENDER FOR EAST WAMBAB.

*Tender for a Lease of a new Run of Crown Lands.—Intermediate or Unsettled Districts.*

IN accordance with the provisions contained in Her Majesty's Order in Council, published in the New South Wales *Government Gazette* of the 7th October, 1847, and of the Regulations of the Local Government published in pursuance thereof, I, James Macleod, of the River Darling, do hereby propose to take a lease, for fourteen years, of the Crown Lands known as East Wambah, in the district of Lower Darling, which lands are particularly described in the Schedule annexed to this tender.

2. And in consideration of such lease, I am willing, and hereby offer, to pay in advance the minimum rent below which it is provided by the said Order in Council that no run shall be let, namely, ten pounds per annum, with two pounds ten shillings per annum added thereto for every thousand sheep or their equivalent in cattle beyond four thousand sheep or their equivalent which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying; and also, in consideration of such lease, and by way of premium for the same, I do offer to pay yearly, in advance, the further sum of \_\_\_\_\_ in addition to the amount of the said minimum rent.

3. And I do agree that, in the event of this tender being accepted by His Excellency the Governor General, and of such acceptance being notified in the New South Wales *Government Gazette*, I will, within sixty days after such notification, pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, notwithstanding that the lease of the said run may not have been executed, the sum of ten pounds, being the amount, according to my computation of the grazing capabilities of the run, of the payments which I have above offered to make, viz. :—

Minimum yearly rent below which no run can be let	... £10 0 0
Further payment at the rate of £2 10s. per thousand for the number of stock above four thousand sheep or their equivalent which I estimate the run applied for to be capable of carrying	... ..
Additional yearly payment offered by way of premium	... ..
Total	... £ _____

Such payment nevertheless to be without prejudice to the subsequent adjustment of the rent according to the second and third sections of the second chapter of the above-mentioned Order in Council.

4. And in consideration of this tender being accepted, and in the event of such payment not being made within the beforementioned period of sixty days, I further agree to forfeit to Her Majesty the sum of twenty pounds by way of liquidated damages, and to forfeit any right acquired by virtue of this tender and such acceptance thereof as aforesaid.

Given under my hand, this 27th day of October, A.D. 1857,—

JAMES MACLEOD.

To the Chief Commissioner of Crown Lands, Sydney.

UNDER the report of the Commissioner, and subject to the amended description of boundaries furnished by him, we beg to recommend the acceptance of this tender.

W. C. MAYNE,  
A. ORPEN MORIARTY,  
GEO. BARNEY,

Accepted.—15 August, 1859.

May 2, '59.

## SCHEDULE referred to in the foregoing Tender.

Commissioner's District and General Locality.	Name of Run.	Estimated Area.	Estimated Capability.	Description of the Lands, by reference to leading geographical features and marked or determined boundary lines.
Stephen Cole, Esq., Lower Darling.	East Wambah.	200 sq. miles.	4,000 sheep.	Commencing at the north-east corner of the Outer Wambah Run, and bounded on the east by a line south, 10 miles; on the south by a line east, 20 miles; on the east by a line north, 10 miles; on the north by a line west to the starting point, about 20 miles. The above is a dry back country, and is only available in a wet winter.

JAMES MACLEOD.

No. 2.

## No. 2.

MR. COMMISSIONER COLE to THE SURVEYOR GENERAL.

Crown Lands Office,  
Euston, Lower Darling,  
16 March, 1859.

SIR,

I beg to recommend for acceptance tender No. 103, December, 1857, East Wambah, as reduced in its area and amended in its boundaries.

2. The description given in the abstract of tender takes the north-east corner of Wambah Run for its starting point; whereas the starting point should be from the north-east corner of Outer Wambah, No. 45,—September, 1855, accepted 7th May, 1856.

3. Subject to the foregoing remarks, I am not aware of any objection to the tender.

## DESCRIPTION OF EAST WAMBAH.

Estimated area—100 square miles: Estimated grazing capabilities—4,000 sheep.

COMMENCING at the north-east corner of Outer Wambah, and bounded on the north by a line east, 10 miles; on the east by a line south, 10 miles; on the south by a line west, 10 miles; on the west by the east line of Outer Wambah Run to the starting point, to which run it adjoins.

I have, &c.,  
STEPHEN COLE,  
Commissioner of Crown Lands.

## No. 3.

APPRAISEMENT OF ANNUAL VALUE OF EAST WAMBAH.

District of Darling.

Name of Run: East Wambah.

Claimant of a Lease: James Macleod.

Under and in pursuance of the provisions in that behalf contained in the Crown Lands Occupation Act of 1861, I, Stephen Cole, the appraiser duly appointed in the matter of the appraisement of the rent of the run known as East Wambah (of which a description is appended hereto), now held, under the promise of a lease from the Crown, by James Macleod, do hereby certify and declare that I have gone over and inspected the lands comprised in the said run, and made diligent inquiry and examination as to the fair annual value thereof for pastoral purposes; and I do hereby appraise such value to be equivalent to the sum of £40 per annum, which said sum I do adjudge and determine shall be the annual rent to be paid for and in respect of the said run, during the term of such lease.

Given under my hand at Euston, this 7th day of January, A.D., 1864,—

STEPHEN COLE.

## DESCRIPTION OF OUTER WAMBAH.

Estimated area—100 square miles.

BOUNDARIES: Commencing at the north-east corner of Outer Wambah, and bounded on the north by a line east, 10 miles; on the east by a line south, 10 miles; on the south by a line west, 10 miles; on the west by the east line of Outer Wambah Run to the starting point, to which it adjoins.

## No. 4.

THE UNDER SECRETARY FOR FINANCE AND TRADE to THE CHIEF COMMISSIONER OF CROWN LANDS.

The Treasury, New South Wales,  
7th April, 1865.

SIR,

With reference to the notice in the *Government Gazette*, dated 31st October, 1864, notifying that the undermentioned run had been appraised, under the Crown Lands Occupation Act of 1861, at its fair annual value for pastoral purposes, I am directed to inform you that the adjusted rental for the year 1865, of the run in question, was paid on 31st December last. Lessees, W. L. & R. T. Reid. District, Darling. Run, East Wambah. £40.

I have, &c.,  
W. NEWCOMBE,  
Pro Under Secretary.

Occupation authorized, 9 June, 1865.

## South Wambah Run—Papers.

MR. JAMES MACLEOD'S TENDER FOR SOUTH WAMBAB.

## No. 1.

*Tender for a Lease of a new Run of Crown Lands.—Intermediate or Unsettled Districts.*

IN accordance with the provisions contained in Her Majesty's Order in Council published in the New South Wales *Government Gazette* of the 7th October, 1847, and of the Regulations of the Local Government published in pursuance thereof, I, James Macleod, of the Junction of the Darling, do hereby propose to take a lease, for fourteen years, of the Crown Lands known as South Wambah, in the district of the Lower Darling, which lands are particularly described in the Schedule annexed to this tender.

2. And in consideration of such lease I am willing, and hereby offer, to pay in advance the minimum rent below which it is provided by the said Order in Council that no run shall be let, namely, ten pounds per annum, with two pounds ten shillings per annum added thereto for every thousand sheep or their equivalent in cattle beyond four thousand sheep or their equivalent which the run shall, under the provisions of the said Order in Council, be estimated as capable of carrying; and also, in consideration of such lease, and by way of premium for the same, I do offer to pay yearly, in advance, the further sum of in addition to the amount of the said minimum rent.

3. And I do agree that, in the event of this tender being accepted by His Excellency the Governor General, and of such acceptance being notified in the New South Wales *Government Gazette*, I will, within sixty days after such notification, pay into the hands of the Colonial Treasurer, at Sydney, as and for the first year's rent of the said run, notwithstanding that the lease of the said run may not have been executed, the sum of ten pounds, being the amount, according to my computation of the grazing capabilities of the run, of the payments which I have above offered to make, viz. :—

	£	s.	d.
Minimum yearly rent below which no run can be let	10	0	0
Further payment at the rate of £2 10s. per thousand for the number of stock above four thousand sheep or their equivalent which the run applied for is estimated to be capable of carrying	...	...	...
Additional yearly payment offered by way of premium	...	...	...
Total	£10	0	0

Such payment nevertheless to be without prejudice to the subsequent adjustment of the rent according to the second and third sections of the second chapter of the above-mentioned Order in Council.

4. And in consideration of this tender being accepted, and in the event of such payment not being made within the beforementioned period of sixty days, I further agree to forfeit to Her Majesty the sum of twenty pounds by way of liquidated damages, and to forfeit any right acquired by virtue of this tender and such acceptance thereof as aforesaid.

Given under my hand, this 8th day of August, A.D., 1855,—

JAMES MACLEOD.

To the Chief Commissioner of Crown Lands, Sydney.

## SCHEDULE referred to in the foregoing Tender.

Commissioner's District, and General Locality.	Name of Run.	Estimated Number of acres.	Estimated Capability.	Description of the Lands, by reference to leading geographical features and marked or determined boundary lines.
Lower Darling .....	South Wambah	16,000	4,000 sheep.	Commencing at the southern boundary of Wambah, and extending down the river about 5 miles; on the south by a line, 5 miles; on the east by a line, 5 miles; on the north by the south boundary of my run, Wambah.

Address—

JAMES MACLEOD,  
Junction, Albert District.

JAMES MACLEOD.

UNDER the report of the Commissioner, we recommend that this tender be accepted.

W. D., 10 Feby., /56.  
Accepted, 12 March, /56.

H. H. BROWNE,  
GEO. BARNEY,  
Jany. 7, /56.

## No. 2.

MR. COMMISSIONER COLE to THE CHIEF COMMISSIONER OF CROWN LANDS.

Crown Commissioner's Office,  
Euston, Lower Darling,  
26 November, 1855.

SIR,

I beg to report herewith on tender No. 43 of September, 1855, and to recommend that the same should be accepted.

The description of the country and the boundaries appear definite, and the tender is in all respects unobjectionable.

South Wambah.

I have, &c.,  
STEPHEN COLE,  
Commissioner of Crown Lands.

## No. 3.

THE COLONIAL TREASURER to THE CHIEF COMMISSIONER OF CROWN LANDS.

Revenue Branch, Colonial Treasury,  
Sydney, 14 May, 1856.

SIR,

With reference to your letter, dated the 12th of March last, No. 56-140, notifying the acceptance of Mr. James Macleod's tender for a station, in the district of Lower Darling, called South Wambah,—I have the honor to report, for the information of His Excellency the Governor General, that the first rent of the station in question was paid into this office on the 7th instant.

I have, &c.,  
C. D. RIDDELL,  
Colonial Treasurer.

## No. 4.

## DESCRIPTION OF SOUTH WAMBAH.

Estimated area—25 square miles : Estimated grazing capabilities—4,000 sheep.  
COMMENCING at a marked tree at the south-west corner of the Wambah Run ; and bounded on the north by the south boundary of said run ; on the east by a line south, about 5 miles ; on the south by the north boundary of the Makenyah Run, crossing the Undeathi Creek ; then by the bend of the Darling River, upwards, to the point of commencement.

Tolarno, Darling River,  
27 November, 1866.

W. L. & R. T. REID.  
STEPHEN COLE,  
Commissioner.

## No. 5.

## APPRAISEMENT OF GRAZING CAPABILITIES OF SOUTH WAMBAH.

*Queen's Orders in Council, Chapter 2, Section 3.—9 March, 1847.*

WE, the undersigned—George Butler Fletcher, Esquire, acting as valuer for James Macleod, and Stephen Cole, Esquire, Commissioner of Crown Lands, acting as valuer for the Government—do hereby estimate the run of South Wambah as capable of carrying 4,000 sheep or their equivalent in cattle.

South Wambah—4,000 sheep.

Euston, Lower Darling,  
12 February, 1859.

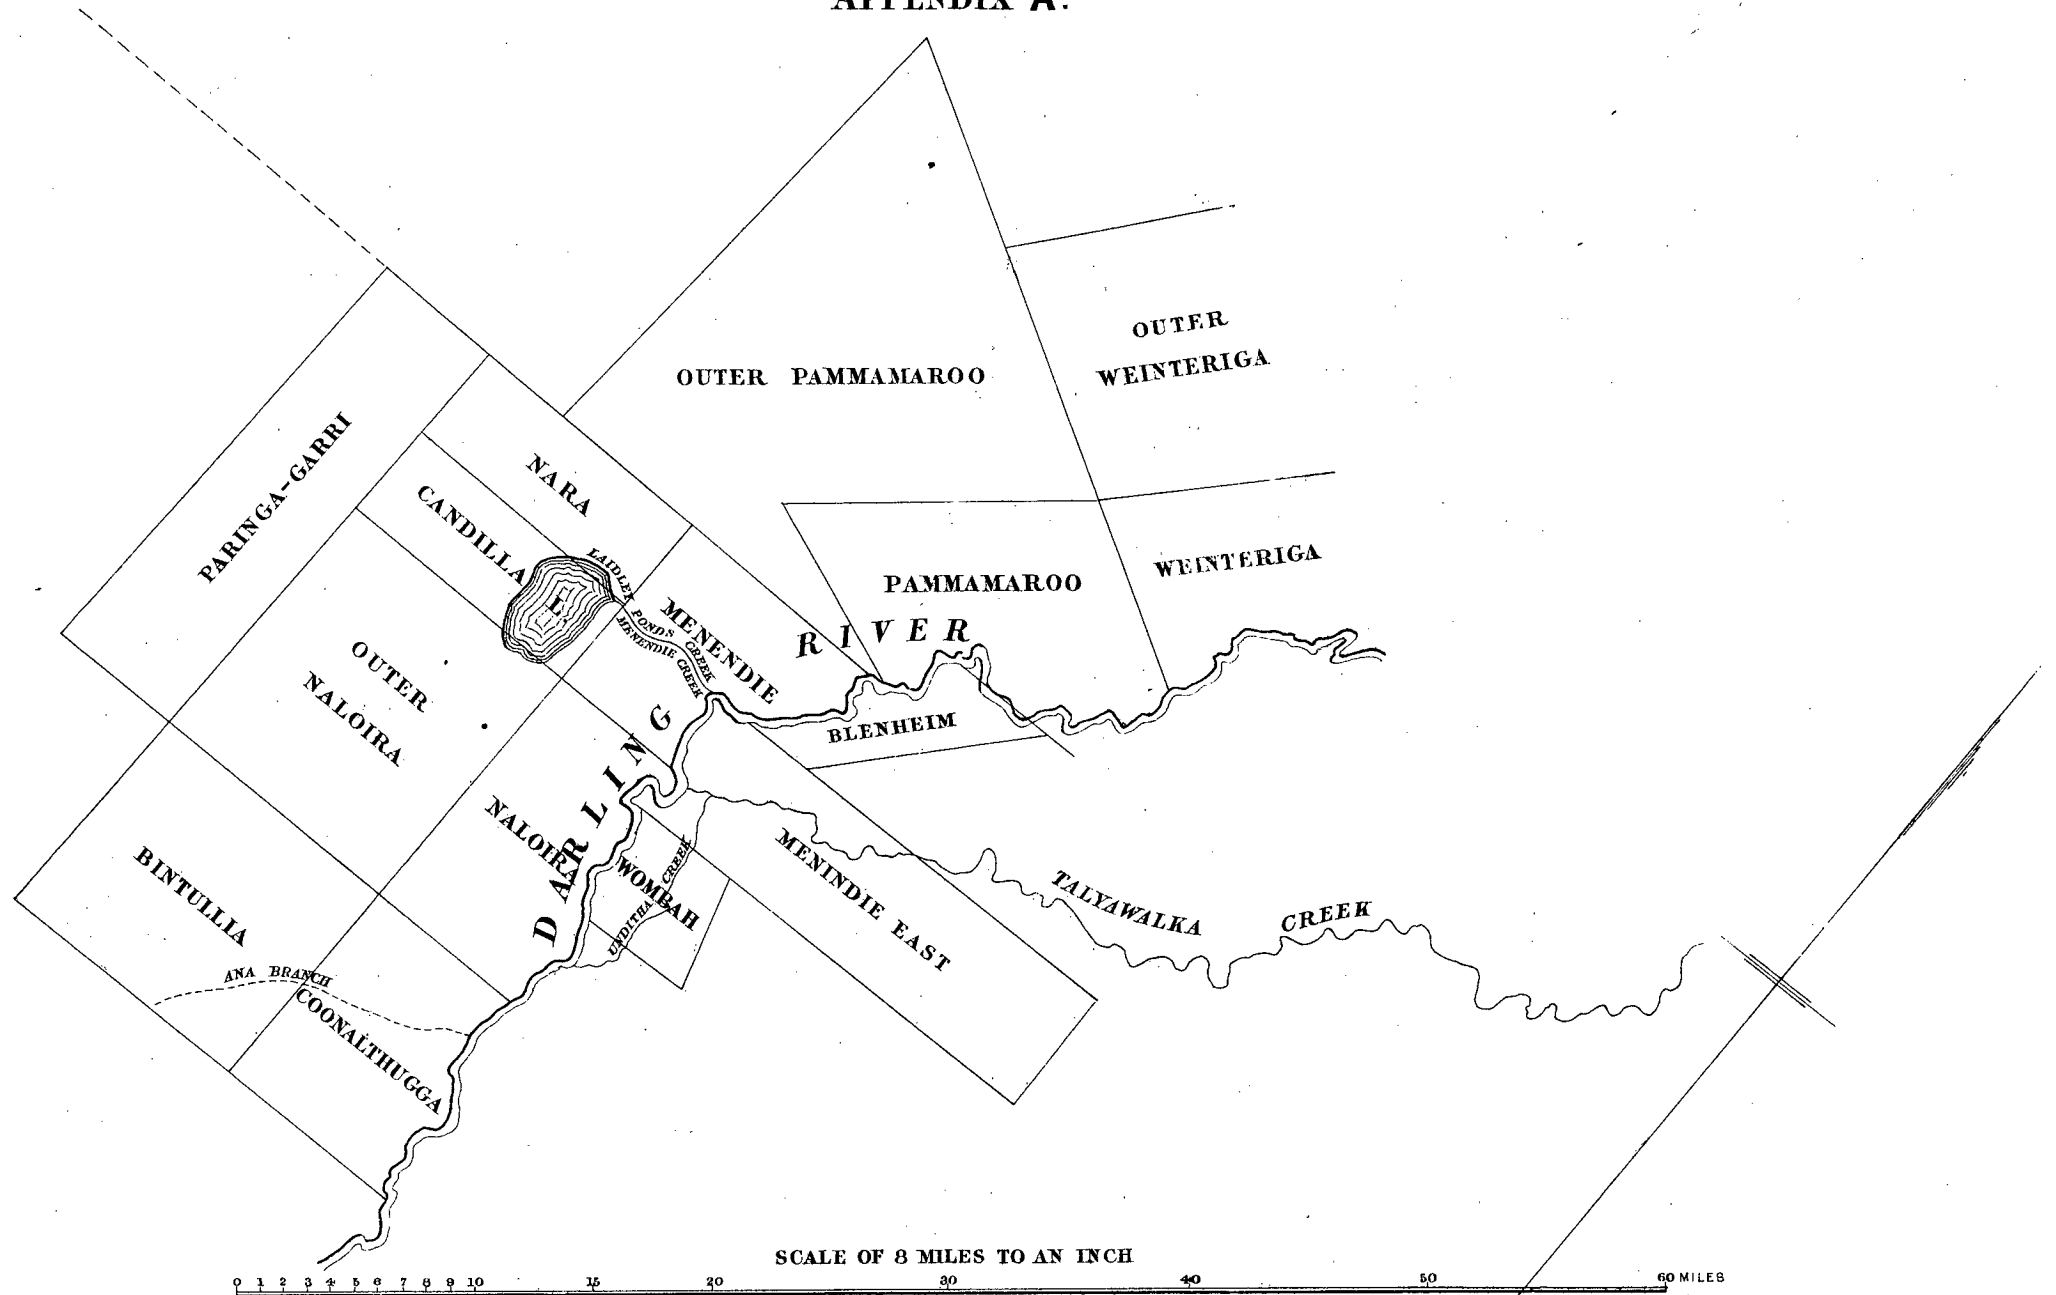

GEORGE B. FLETCHER.  
STEPHEN COLE.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

CROWN LANDS ALIENATION ACT OF 1861.

(PARTICULARS OF APPLICATIONS TO PURCHASE AND RECLAIM LAND UNDER  
9TH AND 12TH CLAUSES OF.)

---

*Ordered by the Legislative Assembly to be Printed, 7 January, 1869.*

---

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 5 November, 1867, praying that His Excellency the Governor would be pleased to cause to be laid upon the Table of this House,—

“ A Return stating the names of all applicants to purchase  
“ and reclaim land under the 9th and 12th clauses of the  
“ Crown Lands Alienation Act of 1861, particularizing each  
“ case as under :—

“ (1.) Whether a reserve or a reclamation; the situation,  
“ area, and lineal frontage to the water of the land author-  
“ ized to be sold.

“ (2.) The situation, area, and lineal frontage to the water  
“ of the land refused to be sold, and the reason for such  
“ refusal.

“ (3.) The amount of money paid, and the rate per foot  
“ frontage to the water.

“ (4.) The conditions imposed in the permission to reclaim  
“ land from the water.

“ (5.) The nature and the estimated money value of the  
“ improvements which have been effected since the sale of  
“ the land, up to the 30th September last.

“ Also, a Statement whether any Board or Boards have been  
“ appointed to report on all applications to purchase land  
“ under the Crown Lands Alienation Act of 1861, and if so,  
“ the names of the persons constituting such Boards; the date  
“ of their appointment; their emolument, if any, in connec-  
“ tion with such appointment; together with a copy of all  
“ Executive or Ministerial Minutes, or other documents defin-  
“ ing the duties of such Boards, or approving any regulations  
“ adopted by the same for their guidance and uniformity in  
“ protecting the interest of the public, and carrying out the  
“ provisions of the law; together with a copy of all such  
“ regulations, if any are in existence.

“ Also, a Statement of the situation, area, and lineal water  
“ frontage of all reserves of land abutting on the Harbour of  
“ Port Jackson, including Middle Harbour, Lane Cove, and  
“ Parramatta River; and whether formally dedicated to the  
“ public or not; and if dedicated to the public, the names of  
“ the Trustees, and the purposes of the trust or dedication.”

(*Mr. Tunks.*)

There has been no formal appointment of a Board, but all applications to reclaim under the 9th Clause of the Act, or for the rescission of reserves under the 12th Clause, are uniformly referred for the joint report of the Chief Engineer for Harbours and River Navigation and the Surveyor General for the time being.

There is no emolument attaching to the duty performed by these officers in this respect. There has been no Executive Minute or other document defining their duties, nor have there been any formal regulations drawn up by them for their own guidance, beyond a memorandum to the effect, that they would consider themselves justified in reporting in favour of the owners of waterside properties being allowed to improve and utilize the same by the construction of wharfs or other useful works, to such extent as might be practicable, consistently with a due regard to the rights of the public and the requirements of navigation.

The duty to be performed by them, it is conceived, is indicated with sufficient clearness without any such minute or regulations—namely, to see how far a compliance with the individual applications, made in terms of the Act, would or would not be consistent with the public interests.

RETURN of Applications made under the 12th clause of the Crown Lands Alienation Act of 1861.

Register No.	Names of Applicants.	Situation of Land.	Area.	Lineal frontage to the water.	Amount of money paid.	Rate per foot frontage to water.	Reason for Refusal. ## PROGRESS REPORT.

---

THE SELECT COMMITTEE of the Legislative Assembly appointed on the 23rd February, 1869,—“*with power to send for persons and papers*”—“*to inquire into and report upon the proceedings of the Land Titles Department, in reference to the application of Mr. William Wright for a Certificate of Title to Land at Five Dock*”—have agreed to the following Progress Report,—

Your Committee have examined the witnesses named in the margin, and have the honor to report as follows :—

Your Committee have not arrived at any definite conclusion, and recommend that the inquiry be resumed next Session.

The evidence of the witnesses together with Appendices are herewith annexed.

JOHN STEWART,  
Chairman.

No. 3 Committee Room,  
Sydney, 23 March, 1869.

S. Lyons, Esq., M.P.  
E. G. Ward, Esq.  
F. H. Reuss, Esq.  
W. F. M'Carthy, Esq.  
W. M. Brownrigg, Esq.  
R. D. Fitzgerald, Esq.  
W. G. Pennington, Esq.  
R. M. Pearson, Esq.  
G. K. Holden, Esq.  
Wm. Deane, Esq.

# PROCEEDINGS OF THE COMMITTEE.

FRIDAY, 26 FEBRUARY, 1869.

MEMBERS PRESENT:—

Mr. Lyons,		Mr. Burns,
Mr. J. Stewart,		Mr. Farnell,
		Mr. Tighe.

Mr. J. Stewart, called to the Chair.

Committee deliberated as to their course of proceedings.

*Ordered*,—That the Clerk summon T. J. Jaques, Esq. (Registrar General), and F. H. Reuss, Esq. (Surveyor), for next meeting.

[Adjourned to Tuesday next, at *Eleven* o'clock.]

TUESDAY, 2 MARCH, 1869.

MEMBERS PRESENT:—

Mr. J. Stewart, in the Chair.

Mr. Burns,		Mr. Farnell,
Mr. Lyons,		Mr. Tighe.

Samuel Lyons, Esq., M.P., a Member of this Committee, examined in his place.

Witness *produced* description of the two properties in question, and other documents, to which he referred during his examination.

Witness *handed in* letter from S. Lyons to the Registrar General, respecting the division between his property and Mr. Wright's, and reply thereto.

*Ordered* to be appended. (*Vide Appendix A 1 and A 2.*)

The Chairman withdrawing from the room, the Chair was taken *pro tem.* by Mr. Farnell.

E. G. Ward, Esq. (*Deputy Registrar General*), called in and examined.

Witness *produced*—First Certificate of Title issued to Mr. William Wright, of Drummoyne, Five Dock; also document cancelling that title. Witness also *produced* Second Certificate of Title to Mr. William Wright, and other documents bearing on the case.

Witness withdrew.

F. H. Reuss, Esq. (*Surveyor*), called in and examined.

During the examination of this Witness, the Chairman re-entered the room, and after the vacation of Mr. Farnell, again took the Chair.

Witness *handed in*—Boundary Survey of North and South Hythe, Five Dock Estate.

Witness withdrew.

*Ordered*,—That W. M. Brownrigg, Esq. (*Surveyor*), and W. F. M'Carthy, Esq. (*Solicitor*), be summoned for next meeting.

[Adjourned to Thursday next, at *Eleven* o'clock.]

THURSDAY, 4 MARCH, 1869.

MEMBERS PRESENT:—

Mr. J. Stewart, in the Chair.

Mr. Lyons,		Mr. Farnell.
------------	--	--------------

W. F. M'Carthy, Esq. (*Solicitor*), called in and examined.

Witness *produced* various documents which bore on the case, from which he quoted during his examination.

Witness also *produced* plan of the properties of Messrs. Lyons and Wright (Mr. Huntley's.)

Witness withdrew.

Committee deliberated.

*Ordered*,—That W. M. Brownrigg, Esq., and Robert D. Fitzgerald, Esq., be summoned for next meeting.

[Adjourned to Wednesday next, at *Eleven* o'clock.]

WEDNESDAY,

WEDNESDAY, 10 MARCH, 1869.

The meeting called for this day was postponed, by direction of the Chairman, until Friday next.

FRIDAY, 12 MARCH, 1869.

MEMBERS PRESENT:—

Mr. J. Stewart, in the Chair.

Mr. Farnell, | Mr. Lyons,  
Mr. Burns.

W. M. Brownrigg, Esq. (*Surveyor*), called in and examined.

Witness handed in description of boundary of George Lyons's 61 acres, Five Dock Estate.

Ordered to be appended. (*Vide Appendix C.*)

Witness also produced tracing of the original plan of the Five Dock Estate.

Witness withdrew.

Robert D. Fitzgerald, Esq. (*Surveyor*), called in and examined.

Witness withdrew.

Committee deliberated.

Clerk directed to summon R. W. Robberds, and W. G. Pennington, Esqs., Solicitors, and Robert M. Pearson, Esq., Principal Draftsman, Registrar General's Department, for next meeting.

Clerk submitted revised evidence of Samuel Lyons, Esq., M.P., as containing an additional statement to that which he made when under examination, which the Committee ordered could form part of his evidence.

The Clerk also brought under the notice of the Committee two documents received from E. G. Ward, Esq., Deputy Registrar General (furnished by desire of the Committee), being the first and second Certificates of Title issued to Mr. William Wright, which were ordered to be appended. (*Vide Appendix, B 1 and B 2.*)

[Adjourned to Wednesday next, at Eleven o'clock.]

WEDNESDAY, 17 MARCH, 1869.

MEMBERS PRESENT:—

Mr. J. Stewart, in the Chair.

Mr. Tunks, | Mr. Lyons,  
Mr. Farnell.

Clerk submitted letter from W. M. Brownrigg, Esq., Surveyor, claiming a fee of £2 12s. 6d. for attending and giving evidence before this Committee on the 12th March.

Committee deliberated.

*Resolved*,—On motion of Mr. Lyons, "That the sum of £2 2s. be paid to W. M. Brownrigg, Esq., Surveyor, for attending and giving evidence before this Committee as a professional witness."

W. G. Pennington, Esq. (*Solicitor*), called in and examined.

Witness withdrew.

R. M. Pearson, Esq. (*Principal Draftsman, Land Titles Department*), called in and examined.

Witness produced plan of original distribution of the properties of George and Samuel Lyons.

Witness withdrew.

Committee deliberated, and directed that G. K. Holden, Esq. (*Examiner of Land Titles*), and R. D. Fitzgerald, Esq., be summoned for next meeting.

[Adjourned to Friday next, at Eleven o'clock.]

FRIDAY, 19 MARCH, 1869.

MEMBERS PRESENT:—

Mr. J. Stewart, in the Chair.

Mr. Lyons, | Mr. Tighe,  
Mr. Farnell, | Mr. Burns.

R. D. Fitzgerald, Esq., called in and again examined.

Witness handed in letter from Mr. Licensed Surveyor Huntley to the Surveyor General, reporting on Mr. Samuel Lyons's application for further compensation on the New Gladesville Road, dated June 1, 1868.

Ordered to be appended. (*Vide Appendix D.*)

Witness withdrew.

G. K. Holden, Esq. (*Examiner of Land Titles*), called in and examined.

Witness withdrew.

William Deane, Esq. (*Solicitor*), called in and examined.

Witness handed in copy of agreement of boundary of the properties of Messrs. Lyons and Wright, dated 26 February, 1866; also, copy of certificate of Messrs. Reuss and Huntley, Surveyors, as to position of reserved road dividing the two properties, 19 March, 1866; also, Rule *Nisi* for new trial Lyons v. Wright.

Ordered to be appended. (*Vide Appendix, E 1 to E 3.*)

Witness withdrew.

Committee deliberated.

[Adjourned to Tuesday next, at 11:30 o'clock, to consider Progress Report.]

TUESDAY, 23 MARCH, 1869.

MEMBERS PRESENT:—

Mr. Lyons,                      |                      Mr. Lucas,  
   Mr. Farnell.

In the absence of the Chairman, Mr. Farnell took the Chair.

Mr. Farnell submitted Progress Report.

Same read and agreed to.

Chairman to report to the House.

1869.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

LAND TITLES DEPARTMENT—MR. W. WRIGHT.

TUESDAY, 2 MARCH, 1869.

Present:—

MR. J. STEWART,  
MR. LYONS,MR. FARNELL,  
MR. TIGHE,

MR. BURNS.

JOHN STEWART, ESQ., IN THE CHAIR.

Samuel Lyons, Esq., a Member of the Committee, examined in his place:—

In discussing the Estimates under the head of Land Titles Examiner, I deemed it my duty, as a Member of the Legislative Assembly, to make a statement of irregularities which had come under my notice, arising out of some neglect of the Land Titles Office. In doing so, I connected Mr. Holden's name with such irregularities. My remarks, not correctly reported, were complained of by him to the Hon. John Robertson, who, in speaking to me on the subject, agreed that I should prove my case by a Select Committee; which having been granted by the Legislative Assembly, my case is as follows:—

S. Lyons, Esq.  
2 Mar., 1869.

1. *Chairman.*] Will you please to state the case? The case is this:—On the 3rd August, 1851, my father died, leaving myself and my brother 61 acres of land each at Five Dock. In consequence of some error in the description in the will, it was agreed between us that we should join in the conveyance of this land to Mr. Want, and that the land should be then subdivided equally and reconveyed by Mr. Want to us. Mr. Brownrigg was the surveyor appointed to carry out this arrangement. He proposed that he should run a road 50 links wide down between the two properties, which we acquiesced in; and for the choice of these two portions of land, two pieces of paper were put into a hat, and my brother drew one and I drew the other. This road is on the deed which I produce. An indorsement appears, by which my brother conveys to me the half of the road that he contributed, and a like indorsement appears on his deed, conveying to me his half of the road. My brother left the Colony, having appointed Mr. Billyard his agent. We had a large plan prepared of the two properties, and offered them for sale, but they were not sold; and, at the same time, we had lithographic plans struck off. Mr. Billyard sold this land to Mr. Wright as 61 acres.

2. Sold your brother's portion? Yes. Mr. Wright immediately went on to the ground. He did not have the land surveyed. He put up a boundary wall, as he supposed enclosing his purchase. The road running down between the two properties was, I believe, cleared; but it was some four years afterwards, I think, that Mr. Wright bought. Some years after Mr. Wright had taken possession, he brought his land under the Land Titles Act, and it struck me then that it was time to inquire as to whether the boundaries were right. I went on to the ground with my surveyor, and found that his wall enclosed the whole of this road. It shut it up completely. I then wrote this letter to Mr. Jaques, on the 24th October, 1865. (*Letter read and handed in. Vide Appendix A 1.*) In reply to that letter, I received this letter from the Registrar General's Department,

S. Lyons, Esq. Department, under date 1st November, 1865. (*Letter read and handed in. Vide Appendix A 2.*) After a great deal of correspondence with Mr. Wright, respecting this disputed road, it was agreed between us that he should appoint a surveyor, and that I should appoint a surveyor, and that the two gentlemen (Mr. Reuss and Mr. Huntley were appointed) should go on to the ground and determine the correct boundaries. In mentioning this agreement to Mr. Reuss, he told me it was quite useless to go on to the ground with Mr. Huntley, unless we both agreed in writing to accept their joint decision. In consequence of that, he gave me a form, which he said had never been disputed during the whole of his professional career. I copied it, and signed one copy myself and sent the other to Mr. Wright, who returned it to me, with his signature, agreeing to that proposition. These documents, I think, are mislaid; but Mr. Reuss will be able to speak on that point. They went on to the land, and found (as I before said) that the whole of this road was enclosed. Then I wrote to Mr. Wright, calling his attention to the result of this survey, and explaining to him that I had no desire to put him to any inconvenience by the removal of his wall, as it would have to fall back on improved land, but that I was quite willing to negotiate with him for compensation. He wrote back to me, asking what amount of compensation I required. I said, that as the portion of the road belonging to me comprised three acres, and as the Government had a few weeks before given me £30 an acre for some land they had taken, I wanted £30 an acre—£90 for the land, and £100 for the total loss of the road—in all £190. Mr. Wright then wrote back to me to say, that having discovered what I wanted, I should have neither the road nor the compensation, but that he was willing to submit the matter to arbitration. I replied, that the matter had gone too far now; that having been asked to name my price, and having done so, I was not disposed to arbitrate any further, and that I should take the matter into the Court. The matter went into the Court. On the first day that the jury were impanelled they were invited by Mr. Wright's counsel to go on to the ground and inspect the land. After they had inspected the land, Mr. Wright invited them into his house to take luncheon; which I objected to, as I thought it was an improper thing for him to invite a jury into his house to take luncheon while the case was pending. However, Mr. Deane, my solicitor, went in. He told me it was a sumptuous lunch, and that I had no chance of a verdict—that he had heard some of the jury express an opinion adverse to my case. The verdict of the jury was, that Mr. Wright had put his wall up according to some pegs which he says he found on the ground, and that it stood in its right place. I moved for a new trial, and a rule *nisi* was granted, on the ground that the verdict was against law and against evidence. Pending the action connected with this new trial, Mr. Wright negotiated with me for a compromise, and he gave me £150, which just cleared my expenses.

3. Your law expenses? My law expenses; so that I lost the road, and lost also my compensation. I produce a survey made by Mr. Reuss, which, I believe, upon examination, will be found to be quite correct. This survey shows that Mr. Wright had 69 acres 3 roods and 30 perches, whereas he had only paid for 61 acres; and that he has 21 chains 25 links frontage to Lyons' Road, whereas he ought, by his deed, to have but 20 chains 75 links. The description of his frontage to this road I will produce. It goes on to say that he has 21 chains to Lyons' Road, less 25 links for half the moiety of the road. This is the description of Mr. Wright's property:—"All that piece or parcel of land situate in the parish of —, county of Cumberland, in the Colony of New South Wales, containing 61 acres, more or less; commencing at the north-west corner of Lyons' Road, at the side of the Parramatta River"—(no high-water-mark could be more distinctly marked than the one referred to here; I have seen it myself, and all the surveyors admit this)—"and bounded towards the east by that road, bearing south 42 degrees west 21 chains; thence toward the south-west by a line bearing north 37 degrees west to the Parramatta River; and on the north and north-east by the Parramatta River to the commencing point; 25 links to be given on the south-west side for the moiety of a road 50 links wide, which is to separate the property of George Lyons from that of Samuel Lyons." Messrs. M'Carthy, Son, and Donovan were the solicitors for Mr. Wright. They prepared a deed, and I conveyed to Mr. Wright the whole of my interest in this road and the land which had been bequeathed to me. In this map (*produced*) there is a Government road, which the Government paid me for; but, under the supposition that this road ran on the north-east side of the wall, they deducted some portion of the compensation money for that part which they thought was already a road. When this matter between myself and Mr. Wright was settled, I applied to the Government for this additional compensation, and, to my surprise, I learnt that the Land Titles Office had issued a fresh certificate to Mr. Wright, showing another road on the north-east side of Mr. Wright's wall, as it stands now.

4. That is on the outside of his wall? On the outside of his wall. That was done on Mr. Wright's application. It appears to me very extraordinary, that the Land Titles Office should have issued a fresh certificate, and marked out a fresh road, without giving me notice of it. I may state, that Mr. Wright, after he bought this land, never had it surveyed. The Land Titles Office never had it surveyed; and even if they had inquired into the survey, they would have found that it had been made by a gentleman who was not licensed under the Act; and, therefore, I conclude that his survey, under any circumstances, would not have been acceptable to the office. The office licenses a number of surveyors under the Act, whose surveys are always accepted by the office as correct. I believe I am the adjoining proprietor of Mr. Wright, and I have no recollection of having received any notification from the office that Mr. Wright was going to bring his land under the Act. The 18th clause of the Real Property Act states:—"The Registrar General shall under such direction as aforesaid or under any order of the Supreme Court cause notice to be published in such manner as by such direction or order may be prescribed that application

application has been made for bringing the land therein referred to under the provisions of this Act and shall also cause copy of such notice to be posted in a conspicuous place in his office and in such other places as he may deem necessary and shall forward by registered letter marked outside 'Land Titles Office' through the Post Office copy of such notice addressed to the persons (if any) whom the Commissioners shall have directed to be served with such notice and to the persons (if any) stated in the declaration by the applicant proprietor to be in occupation of such land or to be occupiers or proprietors of land contiguous thereto so far as his knowledge of the addresses of such persons may enable him and in case such applicant shall have required any such notice to be personally served upon any person named in his application then and in such case the Registrar General shall cause copy of such notice to be so served upon such person"—

S. Lyons, Esq.

2 Mar., 1869.

JAMES SQUIRE FARNELL, Esq., in the Chair.

*Witness continued*.—They are bound to serve all adjoining proprietors with notice under that clause. No such notice was given to me; and, on my first interview with Mr. Holden, in regard to this matter, he admitted that that was a great mistake, and that the whole transaction, to use his own words, was "a gross and unpardonable error."

5. *Mr. Burns.*] On the part of whom? On the part of the office. He called in one of the officers, and, in my presence, spoke in those terms about the way in which the business had been conducted.

6. *Chairman.*] Did you see any notification in the newspapers, or in the *Government Gazette*, in reference to the application made by Mr. Wright to bring this land under the Act? Yes, I did. That was a question Mr. Holden put to me. I admitted having seen the notification; but of course that is a very different thing from receiving a notice, such as I have received in another case. When the proprietor on the other hand brought his land under the Act, I received a notification, with a sketch showing the boundaries.

7. It is usual in the Land Titles Office to send a notice to adjoining proprietors, giving all the particulars, and enclosing a sketch? Yes, I have one here (*exhibited*). This is from the office. It relates to the land on the other side, belonging to Mr. Frith.

8. *Mr. Burns.*] You give them as a sample of what the office is in the habit of doing? Yes.

9. But that has no particular connection with the case in hand? No.

10. *Chairman.*] Are you going to put in the deed? Yes.

11. The original partition deed, or merely a description of it? A description.

12. If you put in one description, I think you ought to put in both? I put in this description of my own land:—"All that piece or parcel of land, situate in the parish of Concord, county of Cumberland, in the Colony of New South Wales, containing 61 acres of land, more or less; commencing on the north-west side of Lyons' Road, at a point 21 chains from the north-west corner of the same on the side of the Parramatta River; and bounded towards the east by Lyons' Road bearing south 42 degrees west 10 chains, more or less; thence towards the south-west by a line bearing west 42 degrees north, to Five Dock Bay; on the west and north-west by Five Dock Bay and the Parramatta River; and on the north-east by a line south 37 degrees east, to the commencing point; 25 links to be given on the north-east side for a moiety of a road of 50 links wide, which is to separate the property of Samuel Lyons from that of George Joseph Lyons."

13. I suppose that is an exact copy? Yes.

14. I see by this map that, although your partition deed says that each brother is to have 61 acres, more or less, the portion now held by Mr. Wright is 69 acres 3 roods and 30 perches? Yes, inclusive of the road since in dispute.

15. And your portion is 61 acres and 1 rood? Yes, by deed; but by actual survey, 60 acres 1 rood.

16. So that there is an excess in both cases? There is an excess in both cases. That goes to prove that the Land Titles Office issue titles for perhaps a larger quantity of land, or a smaller quantity, without knowing it. In this case they did. They issued a title for 61 acres of land in regard to a property which contains 69 acres 3 roods and 30 perches.

17. *Mr. Burns.*] Did they take the original description of the land, without measuring it? I do not think they measured it at all; they took the description.

18. From the former deed? From this deed; but they omitted, it appears to me, the concluding part of the description, where the proviso exists for the surrender of these 25 links to form half the road.

19. *Chairman.*] You have spoken of a Government road that has been proclaimed through your land? Yes.

20. Was that proclaimed subsequently to the deed of partition between you and your brother? Yes.

21. It was not an original Government road? No; it was proclaimed subsequently.

22. When you saw advertised in the newspapers and *Government Gazette* the application of Mr. Wright to bring this land under the Act, did you lodge a caveat? No, I did not lodge any caveat. I thought, of course, that Mr. Wright would get his quantity of land according to the frontages and boundaries given in his deed.

23. *Mr. Burns.*] You did not imagine, from the description you saw in the papers, that Mr. Wright would encroach upon your rights? No.

24. *Chairman.*] When the partition deed was made out between you and your brother, was a survey performed? Mr. Brownrigg was the party who received £80 for dividing these two properties, and furnishing the solicitors with a description.

25. These two properties, which were divided between you and your brother, were surveyed previously by Mr. Brownrigg? Yes.

26. Did you subsequently have this land laid out in allotments? At the same time.

27.

- S. Lyons, Esq. 27. They were called Hythe? Yes, North Hythe and South Hythe.
28. The partition, I suppose, took place previous to the subdivision? Previous to the subdivision.
29. That is, the whole of the land was subdivided in the first instance? It was divided into two equal portions—not subdivided.
30. I want to get at this,—whether, previous to the partition of this land between you and your brother, you both agreed to have the whole of it laid out in allotments? No; we divided the land first, and then it was laid out in allotments for sale.
31. You said something about an action in the Supreme Court, instituted by yourself against Mr. Wright? Yes.
32. What decision was come to in that case? I think this was the view the jury took of it:—That Mr. Wright had gone on to the ground, and found some pegs there, and that he had put his wall up according to those pegs. But I believe Mr. Brownrigg's evidence will show that those were the outside pegs instead of the inside pegs.
33. Were those pegs put in by Mr. Brownrigg? Yes.
34. Was he your surveyor and your brother's? Yes.
35. And the verdict was against you, was it not, in that case? Yes.
36. And you moved for a new trial? Yes.
37. Who was Mr. Wright's solicitor in that case? His solicitors were Messrs. Mc'Carthy, Son, and Donovan.
38. *Mr. Burns.*] In what form did you bring your action against Mr. Wright—was it for damages or for trespass? For trespass.
39. And the decision of the jury was, that Mr. Wright was not a trespasser? Yes.
40. The reason for coming to that conclusion was, that he had put his wall according to the pegs which he found on the ground? Yes; those pegs were driven in some four years before he took possession.
41. Can you tell from what the Land Titles Office took the description they gave in the title to Mr. Wright? They took it from my brother's deed, which would give him 20 chains, less 25 links, to Lyons' Road; whereas they gave him, by the plan I saw in the office, 21 chains, instead of 20 chains 75 links.
42. You say they did not make any survey of the land? Yes.
43. That they gave no notice to the adjoining proprietor? They gave no notice.
44. And that if they had known who made the survey the description of which they copied, they would not have accepted that as a proper survey? Yes.
45. You say that the person who made that survey was not a competent person, under the Act, to make a survey? Yes.
46. Speaking about this action again—you said you moved for a new trial? Yes.
47. And that you got a new trial? A rule *nisi* was granted, on the ground that the verdict was against law and against evidence.
48. Was it after the rule *nisi* had been granted that you compromised the matter with Mr. Wright? Yes. I may state my grounds for proceeding in this matter. I think what I said in the House was, that Mr. Holden aided and abetted this wrong. My grounds for saying that are, that Mr. Wright, on all occasions, told me that he would look to the office to indemnify him; that he did nothing without consulting them, and that in all matters connected with this dispute he got his advice from the office. In several letters that I have he speaks of this matter. In this (*letter produced*) particularly, he says,—“Your letter of the 18th was duly received by me on the 20th, and no time was lost in laying it before the proper authorities at the Land Titles Office.” In all his letters, and in his personal conversation with me, he gave me to understand that in whatever he did he consulted the Land Titles Office, and was guided entirely by them. I felt aggrieved that, after having received his written agreement to abide by a joint survey, he should repudiate it; and, of course, I came to the conclusion that, as he had consulted with the Land Titles Office, they had advised him to repudiate.
49. *Mr. Burns.*] When the action was compromised, from whom did the proposition first emanate? From Mr. Wright. He first offered me one sum; then he offered me another; and the third offer he made was £150.
50. But what reason had you to know that Mr. Wright was advised—Is there anything written to show that he was advised by the Land Titles Office as to the course he took in the matter? In the compromise?
51. No? He has told me, in personal conversations, that he looked to the office—that the office was responsible for the error; and in his letters he speaks of having consulted with the office. I think this letter is the only one I have with me, which says—“No time was lost in laying it before the proper authorities at the Land Titles Office.”
52. What had that letter reference to? To this matter. I wrote to Mr. Wright, on the 28th August, 1866, as follows:—“Mr. Gorman's and Mr. Holden's names were mentioned by you as sole arbitrators. I could scarcely have been expected to accept the services of the latter gentleman in a matter in which you have often said he and his office were culpably neglectful, and whom you have always represented to me as being responsible to you for all loss and inconvenience arising out of the errors of your boundary as given to you from the Land Titles Office. The fact of my letter having been laid before the authorities of that office confirms this.”
53. Did he, in answer to that, or at any time, disclaim being advised by Mr. Holden, in the office, with reference to his course of proceeding? No; he always told me to the contrary.
54. *Chairman.*] When you speak of Mr. Wright having received advice from Mr. Holden, the Land Titles Examiner, do you mean during the time of passing the title under the Act? No, during the time I was disputing with Mr. Wright about the land.
55. After he had got his certificate? After he had received his certificate.

Edward Grant Ward, Esq., Acting Registrar General, called in and examined:—

56. *Chairman.*] I suppose you understand the nature of this inquiry? Hardly. E. G. Ward,  
Esq.
57. Was a certificate issued to Mr. William Wright, of Drummoyne, from your office, some time back? Yes.
58. Will you tell us the date, if you please? I must mention, before we go into the matter of this certificate of title, that it has been the subject of a suit in the Supreme Court—*Lyons v. Wright*—in which the defendant gained a verdict. The date of the certificate is 4th April, 1864. That is the date of the first certificate of title. 2 Mar., 1869.
59. Of course you cannot leave that certificate with us? No. That certificate is cancelled; it is not in existence at the present time.
60. Will you state to the Committee the reason why it was cancelled? It was cancelled, at the request of Mr. Wright, in consequence of the issue of a Crown grant of a road bounding the water frontage of the land. He delivered up his Crown grant, and requested a new certificate of title, including the Crown grant.
61. And a subsequent title was issued? It has been issued.
62. Cancelling the former one? Yes; the words are—"Cancelled and fresh certificate of title issued, at the request of the above-named William Wright. Vol. 51, folio 59."
63. Will you produce the certificate under which Mr. Wright now holds his property? Mr. Wright has his certificate in his own possession. I can produce the Register Book containing a copy. (*Book produced.*)
64. I suppose there is a description of the land in that? There is. It is—"All that piece of land, situated on the Parramatta River, parish of Concord and county of Cumberland, containing 70 acres or thereabouts, commencing on the north-west side of Lyons' Road, at its intersection with the high-water-mark of Parramatta River, and bounded on the south-east by that road bearing south-westerly 2,125 links, more or less, to the south-west side of a stone wall; on the south-west by the south-west side of that wall, bearing north-westerly 49 chains to the river downwards, 49 chains to the river aforesaid; and on all other sides by the high-water-mark of that river, downward, to the point of commencement; as shown on the plan herein, and therein edged red, being part of 1,500 acres delineated in the public map of the said parish, deposited in the office of the Surveyor General; originally granted to John Harris as a Crown grant, dated 1st January, 1806."
65. Is the description in the cancelled deed similar to that? No, I apprehend not; because this contains the Crown grant in addition.
66. A Crown grant? Yes, a Crown grant which Mr. Wright had from the Government, which I now produce, and which was also cancelled, in consideration of its being included in the certificate of title.
67. You use the term "Crown grant" in reference to the water frontage—the land between the original boundary and high-water-mark? Yes.
68. And this deed includes now the land to high-water-mark? Yes.
69. The previous deed did not? No, it could not. The Government had a road a chain wide between this land and high-water.
70. I suppose you do not know anything concerning any dispute about the road? No. The only facts I know in relation to that matter came out at the trial. I was subpoenaed, and I heard the whole of the evidence.
71. You heard the whole of the evidence given at the trial instituted by Mr. Lyons against Mr. Wright? Yes.
72. Who was the verdict in favour of? Mr. Wright.
73. Was not a new trial moved for? I am told that a new trial was moved for, and that it was granted; but I did not see any account of the matter in the papers. The affair was subsequently compromised, I believe.
74. You have heard so? Yes.
75. You do not know anything about it yourself? No.
76. Is the description in the first cancelled deed that you submitted similar to the description of the deed under which Mr. Wright now holds, except that it does not take in the Crown grant? I think there is a difference of a few links in the length of one of the lines, but of that I will not be quite certain. It is a matter always decided by the Examiners of Titles and the draftsman and surveyor to the establishment.
77. *Mr. Burns.*] Do you know whether Mr. Wright was in the habit of obtaining information from the office about the action which was commenced against him by Mr. Lyons? I do not think so.
78. You are not aware that he was advised by the office as to the proceedings he should take? I am not aware. I never gave him any advice. I heard it stated that he thought we had acted very hardly with him in not taking up the action ourselves, instead of leaving him to defend it.
79. You do not know that he, at any time, stated in the office, to any of the officials, that he would hold the office responsible for any damage he sustained in regard to the issue of the certificate and the proceedings subsequently taken? I never heard that he said so. I heard that he said he thought we dealt hardly with him in not defending the action ourselves, and casting the burden on his shoulders.
80. When you issued to Mr. Wright his title, did you take any steps to have the land surveyed? I think there was a survey made.
81. Do you know by whom? I cannot tell by whom; but I think there was a survey made.
82. Do you know whether any information was furnished to the adjoining proprietor, in reference to the issuing of the title? I do not think there is any adjoining proprietor. The land is surrounded by roads.

E. G. Ward, Esq. 83. *Mr. Lyons.*] You had better look at the first certificate of title when you speak about that? It is surrounded by a road. There is a reserved road 50 links wide, and another road—Lyons' Road.

2 Mar., 1869. 84. *Mr. Burns.*] I am labouring under a mistake. It seems that Mr. Ward is not the officer that would be applied to? That is not my branch.

85. *Mr. Lyons.*] Have you with you Mr. Wright's first application to have his land brought under the Act? Yes, I have it here.

86. Will you allow me to see it? Yes (*application produced*).

87. Are you aware that Mr. Holden admitted to me that Mr. Wright's land had never been surveyed? I am not aware of it.

88. Are you aware that he, in my presence, called in one of the gentlemen of the office, and asked whether the land was surveyed? I am not aware of it.

89. And that he received a reply that it was not? I am not aware of it.

90. Is it usual, when you issue an amended title, to send a notice to the adjoining proprietor? No.

91. Then, you amend a title, and increase the quantity of land, and the adjoining proprietor is not informed? I do not recollect any case but this one that has occurred. We have amended a title by direction of the Commissioners.

92. This is an amended title, is it not? Yes; but it is not only that—it includes other land granted to Mr. Wright by a Crown grant. We do not call that an "amended title." We call it a "consolidated title," when we include two or three or more properties in one certificate. No notices are ordered to be sent then.

93. Are you aware that the road which separated Mr. Wright's property from mine consisted of 50 links wide (I am speaking of this road on the first plan)? I do not know whether it is mentioned here or not. (*Witness referred to plan.*) Yes, there is a reserved road 50 links wide.

94. Are you aware that the 25 links on this side were conveyed to me by my brother, and that the 25 links on that side were conveyed to my brother by myself? I am not aware of that. The only thing I am aware of is, that you have the use of the road. A road was taken 25 links out of one side and 25 links out of the other.

95. Would not that make me an adjoining proprietor? No; you have merely the use of it—not the fee of it.

96. Would not that constitute me an adjoining proprietor? No. In many cases, and especially since this has happened, we have sent notices where we are not required by law to do so. We do it to prevent disputes hereafter. If I had known that you (or any one else) were an adjoining proprietor, I should have sent a notice.

97. Does Mr. Wright's deed give him 25 chains to Lyons' Road? I believe it does.

98. Will you produce the partition deed between myself and my brother? I have the conveyance, G. J. Lyons to William Wright.

99. Be kind enough to read the description? "All that piece or parcel of land, situate in the parish of ———, county of Cumberland, in the Colony of New South Wales, containing 61 acres, more or less; commencing at the north-west corner of Lyons' Road, at the side of the Parramatta River, and bounded towards the east by that road bearing south, 42 degrees west 21 chains; thence towards the south-west by a line bearing north 37 degrees west, to the Parramatta River; and on the north and north-east by the Parramatta River to the commencing point; 25 links being given on the south-west side for the moiety of a road 50 links wide, separating the property of George Lyons (the parcel of land now being described) from the property of Samuel Lyons, and which said piece of land is more particularly delineated on the plan, and endorsed on the said recited indenture of 23rd February, 1853." There is a plan, I find, so I expect that no other plan was considered necessary.

100. Do you not understand from that, that my brother's boundary to Lyons' Road is 21 chains less 25 links? Yes, or thereabouts, I should say. I am not quite certain whether the surveyor took his measurement from high-water-mark, or from a chain from high-water-mark, where the Government road begins.

101. Can you inform me who can give the information whether there was a survey or not, because I am certain that Mr. Holden told me there was not? I do not say that there was; the probability is, that there was not.

102. Do you recognize surveys made by surveyors who are not qualified under the Act? Yes, for the purpose of bringing land under the Act, if we think them qualified.

103. Then for what are licensed surveyors appointed? To give us plans of any subdivision under the Act. The clause is very plain on that subject, with regard to the licensing of surveyors. It says:—"Any proprietor subdividing any land under the provisions of this Act for the purpose of selling the same in allotments as a township shall deposit with the Registrar General a map of such township. Provided that such map shall exhibit distinctly delineated all roads streets passages thoroughfares squares or reserves appropriated or set apart for public use and also all allotments into which the said land may be divided marked with distinct numbers or symbols and every such map shall be certified as accurate by declaration of a licensed surveyor before the Registrar General or a Justice of the Peace. Provided that no person shall be permitted to practise as a surveyor under the provisions of this Act unless specially licensed for that purpose by the Surveyor General."

104. That is, after land has been brought under the Act? Yes; and the Act then says:—"The Registrar General may require the proprietor applying to have any land brought under the provisions of this Act or desiring to transfer or otherwise to deal with the same or any portion thereof to deposit at the Registry Office a map or plan of such land certified by a licensed surveyor in manner aforesaid."

105. Have you not in your office a list of surveyors who are licensed? We have. E. G. Ward, Esq.
106. Do you ever accept the surveys of any one whose name does not appear in that list? Yes, sometimes, for the purpose of bringing land under the Act.
107. Do you accept Mr. Brownrigg's surveys? I do not know. There are several 2 Mar., 1869. whose surveys we do not accept, because we have found them so faulty. In some cases, where we find a tolerable plan on the conveyance, we do not require a survey at all; or, in cases where the whole of a Crown grant is surveyed, there we get the tracing from the Government plans.
108. You say that the first title issued to Mr. Wright was issued in accordance with the description in his deeds? I think so; I imagine so.
109. If his deeds say that he shall have 21 chains less 25 links to Lyons' Road, will that show it? I cannot say. My only doubt is, whether we have not given him a chain too little. I think his measurement should commence from the Government road.
110. Which? The Government road which bounded the water.
111. Are you aware that the survey made by Mr. Reuss and Mr. Huntley (both licensed under your Act) went to show that Mr. Wright had enclosed this road? I am not aware. It was decided in the Supreme Court.
112. No, it was not decided in the Supreme Court? Mr. Wright obtained a verdict.
113. Yes—but on the ground that he had put his wall up where he found the pegs? It was shown that he had put his wall up according to the pegs. My only doubt is, whether Mr. Wright ought not to have had a longer line, because the Government have a chain from high-water-mark.
114. The measurement made by Mr. Huntley and Mr. Reuss was from high-water-mark? I do not think they had any business to make it from high-water-mark. There was a chain belonging to the Government there at the time the survey was made. This shows an excess of the lines—not only in Mr. Wright's portion, but also in this.
115. An excess in acres? Yes, and also in length of line.
116. *Chairman.*] If you increase the area, it naturally follows that you must increase the length of line? Nearly all the old grants are in excess, some of them to an enormous extent. I have known as much in excess as 10 acres in 100.
117. Do you know, from the recent survey of Mr. Reuss and Mr. Huntley, whether they have not made this land to contain a larger area than it was previously said to contain? They have.
118. That is, under the deed? They have; there is no doubt of it. Mr. Lyons has 10 chains and Mr. Wright 21 chains and 25 links from the road. That line is wrong. There is half a chain Mr. Lyons has in excess. Mr. Wright has a few links too, and there is the road.
119. By the more accurate survey by Mr. Reuss and Mr. Huntley, they have discovered that there is a greater length of lines from these boundaries than there was originally thought to be? Yes.
120. And, consequently, the area of the land is increased? The length of this line is settled by the deed.
121. Then the survey made by your office was incorrect? I do not think our office made a survey at all.
122. Is it the duty of your office to have a survey made? No; but we may require one. I am not quite certain whether we did or not in this instance; but I should say we did not, looking at that plan. That is a matter which rests with the Examiners of Titles.
123. Are you aware that any surveyor would pronounce that map incorrect at first sight? I am not sufficiently acquainted with surveys to determine. These disputed measurements seem to agree with the measurements in the deeds, so far as the figures go.
124. *Mr. Lyons.*] That cannot be by the deed, because it says 21 chains, less 25 links, whereas this gives 21 chains without deduction? 21 chains, with the right of way, less 25 links. Mr. Wright would have the right of 25 links over your boundary, he being the adjoining proprietor on the other side. I think I have the deed here from Lyons to Wright, settling the whole of the question, as I thought.
125. In that deed you are now looking for, do not I convey to Mr. Wright my interest in this road down here (*road indicated on map*)? You did.
126. Then how is it that the Land Titles Office show another road on this side the wall? There is a Government road there, I think.
127. No, this is the portion (*indicated*). How is it that, after my having compromised the dispute with Mr. Wright, and having conveyed to him the road in dispute, the Land Titles Office show another road here? I do not think it ought to be shown.
128. If that had not been shown there, this inquiry would never have taken place? There was a remedy for you, by applying to the Registrar General to have it corrected. The Real Property Act is framed on the assumption that errors will occur. This road is not described; it is a delineation.
129. It is a gross error on the part of the office—putting that road there? It is a delineation. It may be an error, but I do not say it is. It is shown here as a road 50 links wide, but there is no road mentioned in the description. But if it be an error, the Real Property Act provides a remedy. It says that the Registrar General, upon such evidence as shall appear to him and the Land Titles Commissioners sufficient in that behalf, may correct errors in certificates of title, or in the register book, or in entries made therein respectively, and may supply entries omitted to be made under the provisions of this Act. Provided always that in the correction of any such error he shall not erase or render illegible the original words, and so on.
130. But the whole of the facts of this dispute, and the closing up of that road, were in the possession of the office; and it seems strange that, having the information in their hands,

E. G. Ward, Esq., hands, they should produce a map showing a road where one does not exist? I cannot say that one does not exist. I am not sufficiently cognizant of the matter. These certificates come down to me; they are passed by the Examiner of Titles and initialled, and that is my warrant for signing them.

2 Mar., 1869.

131. *Chairman.*] What do you call that? This is a plan or diagram.

132. Do I understand you to say that in the description there is no right of road? No, no road is described.

133. The fact of its being marked upon this diagram does not make it a road? Certainly not. Our certificates of title have nothing to do with rights of road; the description is the deed.

134. That is merely a diagram? Yes; it does not necessarily give a right of way because it is marked there. I see that the stone wall is specially mentioned as the boundary on that side.

135. Do you find, in passing titles through your department, that many of the old grants measure a great deal more than is specified in the grants? Nearly all of them.

136. And sometimes they contain less? Very seldom.

137. Sometimes? I do not recollect any instance. I know that some of the excesses in the areas of the whole grants have quite astounded me.

138. *Mr. Lyons.*] Who can give us the information whether that property was surveyed before it was brought under the Act? I imagine that Mr. Holden would be able to tell you. I see that Mr. Dick's initials are to this. I think he had more to do with it than Mr. Holden.

139. He told me personally that he had nothing to do with it? I see his initials here—"A. D."

Ferdinand Hamilton Reuss, Esq., called in and examined:—

F. H. Reuss, Esq., 140. *Chairman.*] You are a licensed surveyor? I am a licensed surveyor.

141. Under the Land Titles Act? Under the Land Titles Act.

142. Are your surveys always accepted by the Land Titles Office? There has never been one refused; they have always been accepted.

143. Do you remember a dispute between Mr. Lyons and Mr. Wright, about twelve or eighteen months since, in reference to the boundaries of their respective properties at Five Dock? I do.

144. Were you one of two deputed to survey the land? I was—to ascertain the position of a certain road.

145. And you went on to the ground for that purpose? I went on to the ground for that purpose.

146. Did you make a joint report? We made a joint report.

147. On the boundary? On the boundary.

148. Did you receive any description to go by? We did.

149. What was it? From the deed. In fact we had both deeds.

150. Which deeds do you refer to? Mr. Lyons' and Mr. Wright's.

151. You had the deed of conveyance to Wright? Yes, and the deed of conveyance to Lyons. They matched. There was no discrepancy between them.

152. Did Mr. Lyons and Mr. Wright agree to refer the dispute to your decision? To me and Mr. Wright's surveyor; to me and Mr. Huntley.

153. They jointly agreed to refer the question of disputed boundary to your decision? Yes.

154. Did they do it in writing? I forget whether it was in writing or not. It was done through a solicitor.

155. Did you find your report of the boundaries correspond with the description of boundaries given in Mr. Wright's certificate of title? We had not Mr. Wright's certificate of title at that time. We had only the deeds, and we reported that the road was in a certain position with respect to a certain wall that was built.

156. Did you find the wall inside or outside of Mr. Wright's boundary? It was outside of Mr. Wright's boundary, and included the whole of the road; that is to say, Mr. Wright was in possession of his land and the whole of the road.

157. And, according to your decision, Mr. Wright was a trespasser on Mr. Lyons to the breadth of the road? No; it was a road reserved between them. Mr. Wright's deed shows that his land runs 21 chains from the water along the road. But there is excepted thereout of 25 links for the moiety of a road, which reduces his deed from 21 chains to 20 chains 75 links. But he was in possession of 21½ chains, showing at once that he was in possession of the whole of the road. The opposing surveyor agreed to that.

158. That Mr. Wright had appropriated both halves of the road? That he had possession of both halves.

159. Have you any plan of the survey you made at that time? I can only refer to the plan before the Committee. That is my own copy.

160. Does it clearly show the portion of the road closed on the two properties? It clearly shows the portion of the road taken by Mr. Wright. The double line represents Mr. Wright's wall. This side represents Mr. Wright's property, and the other shows the property of Mr. Lyons. The road referred to in the deed is marked here, showing that it is entirely within Mr. Wright's enclosed boundary. The other mark shows the Government road.

161. I suppose you are well acquainted with the Land Titles Act? Yes, pretty well; I practice under it every day. I have a large business under it.

162. According to the 18th section of that Act, the Registrar General is bound, is he not, to give notice, to the owners of contiguous lands, of applications made to bring property under that Act? Yes. According to the directions conveyed to me, I have to give the names of adjoining proprietors and occupiers as well.

F. H. Reuss,  
Esq.

2 Mar., 1869.

163. Was any notice given to Mr. Samuel Lyons? I cannot tell.

164. He should have had a notice? He should have had one.

165. According to custom, Mr. Lyons was entitled to a notice? Mr. Lyons was entitled to a notice, by the peculiar wording of the deed.

166. According to the Act, and according to the custom of the office, he ought to have got a notice? I do not know about the custom of the office; but according to the wording of the deed he should, because Mr. Wright's land goes up to Mr. Lyons'. If it had been bounded by a road, Mr. Lyons need not have had a notice; but being bounded by the land, and the road having been excepted afterwards, he was bound to have a notice, because he was an adjoining proprietor.

167. Have you any remark to make yourself in reference to this disputed boundary? No.

168. *Mr. Lyons.*] If the Land Titles Office has issued a title to Mr. Wright, with 21 chains to Lyons' Road, is that incorrect? Yes; they have issued him the land and half the road, if it is 21 chains. I have not seen it; but if that is so, they have given him half the road.

169. *Mr. Farnell.*] If, in your capacity as a surveyor, you were called upon to survey this portion of land for the purpose of bringing it under Torrens' Act, and you found that there was a reserved road here, would you think it consistent with your duty to describe this land as being bounded by some land adjacent? I should in all instances which showed adjacent property.

170. But in the description, would you describe this property as being bounded by the other—Would you describe Mr. Wright's as being bounded by Mr. Lyons', when there was a reserved road between the two? I should not. I should simply describe it as being bounded by a reserved road.

171. You would do that under all circumstances? Yes; but in Mr. Wright's deed it is not so described. It is described up to the boundary of the other land, and then the road is excepted, which is a very different thing.

172. There was some mutual arrangement between Mr. Samuel Lyons and Mr. George Lyons? Yes; first the land is described, and then that mutual arrangement is alluded to.

173. Each brother gives 25 links? Yes.

174. Making a total of 50 links? Yes. In such a case, it would be part of my duty to show the adjoining proprietor. In this particular case it would have been my duty.

175. You performed a survey of this land? Yes.

176. Have you surveyed Mr. Samuel Lyons' portion of it? I have surveyed both.

177. You surveyed the whole of it? I surveyed the whole of it.

178. I see by this map that Mr. Wright's portion contains 69 acres 3 roods and 30 links, and that Mr. Lyons' contains 66 acres 1 rood; whereas, according to the will and the original deed there were only 61 acres each? Exactly.

179. Where have you got that extra quantity of land from? It is simply there.

180. That is, these lines are wrong? No; the extra quantity arises out of the shore line. There is a large quantity of shore line, and no doubt when it was first measured it was not measured very carefully. It was very likely taken leaving all these points out in the first instance altogether.

181. Are you aware that there is a reserve of a chain wide all round the shore? Yes.

182. And did you include 1 chain of Government property within the area of Mr. Lyons' land? The area of that is not included in Mr. Lyons' land. I have a note of it so.

183. There are 66 acres 1 rood in Mr. Samuel Lyons' portion, independent of this reserve? This 66 acres includes all the roads.

184. Let us finish about the water reserve first. There are 66 acres 1 rood, exclusive of the water reserve? Exclusive of the water reserve.

185. And are there 69 acres 3 roods and 30 links in Mr. Wright's land, exclusive of the water reserve? No, inclusive.

186. How is it you came to measure Mr. Wright's portion from high-water-mark, when 1 chain is reserved from high-water-mark? The description says, commencing at high-water-mark.

187. Is there not a reserve in the grant, reserving one chain from high-water-mark? Not specially in that grant. It applies generally to all grants. It is not specially mentioned in that grant. The description of Mr. Wright's land commences at high-water-mark, and at nothing else.

188. Still, there is at the same time a general law or rule by which there is an exception in all grants of 1 chain from high-water frontage? Yes; there is at Five Dock, of which this forms a part.

189. Of course we have many grants in this Colony which that reservation does not affect? I suppose so. I know several.

190. You commenced your survey from this point, I believe, on the Parramatta River? Yes.

191. How did you get your data to commence from that point—How do you know that you commenced from the right point? By Lyons' Road and high-water-mark. It is very distinct on the ground. The partition deed says:—Commencing at the intersection of Lyons' Road.

- F. H. Reuss, Esq.  
2 Mar., 1869.
192. But how did you determine Lyons' Road to commence from? Lyons' Road was determined years ago. There is no dispute about this Lyons' Road. I have surveyed at Abercrombie's.
193. *Mr. Lyons.*] Was his defined? It was defined.
194. Down to the water's edge? Yes; there is Mr. Wright's wall alongside.
195. *Mr. Farnell.*] In surveying this, did you find that the length of lines was greater than that given in the partition deed? Do you mean Mr. Lyons' 10 chains?
196. Of both? Yes, it is greater.
197. The whole length is greater? The whole length is greater.
198. Then what would be the length of Mr. Samuel Lyons' frontage, providing you took this boundary which was originally intended by the partition deed? There is no actual position to give it you.
199. But I want to know what will be the length? 10 chains.
200. Not more than 10 chains? It is 10 chains by the partition deed. He was entitled to 10 chains, and I took it.
201. Is it not more than 10 chains from the point where you say Mr. Wright's land terminates, to the outside boundary of Mr. Samuel Lyons' land? This area is taken out to 10 chains.
202. Will you tell me whether it is not more than 10 chains from the termination of Mr. Wright's land, exclusive of the road (that is, presuming it to be the correct boundary, according to your shewing)? There is said to have been a fence here (*point indicated on plan by witness*). That is the reason I did not like to answer your question directly.
203. Have you defined Mr. Samuel Lyons' corner at this point? At 10 chains, but there is said to have been a fence further out than I defined it. I did not take more than his deeds gave him. I did not go beyond the land.
204. I do not see how you can measure one of these allotments without the other? They are both measured. Mr. Lyons' commences at a point 21 chains from the Parramatta River, and thence is bounded by 10 chains.
205. Then you measured 10 chains from this point. This land has been given by will, and divided by partition deed; and, after measuring 21 chains to this point, and taking out the partition road, I want to know whether, from that point up to the boundary of Mr. Samuel Lyons' land, there is more or less than 10 chains? You can answer your own question by me telling you the fact. I have taken from that point 10 chains, and said that is Mr. Lyons' boundary, and defined it there to make it 66 acres and 1 rood. But there is said to have been a fence somewhere further out, which I never could find.
206. How much further out? That I do not know.
207. If you were called upon now to survey this land for Mr. Samuel Lyons, or for whoever owns it now, from this termination of Mr. Wright's portion, would you mark that as the boundary? Yes.
208. The 10 chains? That is what I should do. That is all he is entitled to.
209. *Mr. Lyons.*] And that gives 66 acres? 66 acres 1 rood. If Mr. Lyons took the land to the fence said to be there (I do not believe it is), he would take possession of a piece of land belonging to Mr. Frith.
210. *Mr. Farnell.*] Has Mr. Frith got his land defined in any way? It is unfenced for a tremendous way down.
211. You know, from your experience in surveying, that when land comes to be surveyed accurately, it is generally found to contain a larger area than that specified? Yes, as in this instance; but that only occurs under certain conditions. An old grant or a new grant, defined by four straight lines, never contains much more; but when they are defined by broken lines, or creek lines, you will find that the grant is in excess of the quantity named. That is the reason, no doubt, why both these are in excess.
212. Are you not aware that, in former years, many surveys were performed incorrectly—that the undulations were never allowed for? That is perfectly correct; but at the same time, when the land stated in the grant is between straight lines, it invariably contains the right quantity. It is only when it is bounded by a creek or a river, or where the line gets broken, that the quantities differ materially.
213. Materially! They do differ under any circumstances? They always multiply. If this gives ten and that gives ten, they are always given as a hundred acres.
214. And when you come to measure this land? They exceed.
215. Did you see the original grant of this land? I have never seen the original grant of Five Dock; I have seen descriptions of it. It is to Harris.
216. Then you do not know whether, in the original grant, this land is described by metes, or bounds, or bearings? I believe it is bounded by metes and bounds. The bearings and distances are given. It goes a long way down, including part of the Parramatta Road.
217. Mr. Huntley accompanied you on this survey? Yes.
218. By arrangement between Mr. Lyons and Mr. Wright? By arrangement between them.
219. And did you and Mr. Huntley agree to start from some point as a correct one? Yes; and the conclusion we came to was, that the whole of the road was within Mr. Wright's enclosure, and we both reported so in writing.
220. To whom? I to Mr. Lyons, and Mr. Huntley to Mr. Wright, by a letter mutually signed.

THURSDAY,

THURSDAY, 4 MARCH, 1869.

Present:—

MR. FARNELL, | MR. LYONS.

JOHN STEWART, ESQ., IN THE CHAIR.

William Frederick McCarthy, Esq., examined:—

221. *Chairman.*] You are a solicitor, and member of the firm of M'Carthy, Son, and Donovan? Yes.

222. Under what style was your firm formerly known? Immediately before the name of the present firm, M'Carthy and Son.

223. Was it once named Holden, M'Carthy, and Son? Never. Holden and M'Carthy before that.

224. Is the Mr. Holden who was a member of that firm now Examiner of Land Titles? Yes; Mr. George Kenyon Holden. He was a partner of the firm up to the end of 1862.

225. Had you anything to do, professionally, in an action of Lyons v. Wright? Yes; I was the defendant's attorney.

226. Mr. Wright's attorney? Yes.

227. Was that the first case in which you acted for Mr. Wright? Yes.

228. And the only case? Not the only case; I have had other business.

229. Since then? Since then.

230. Is your firm acting as Mr. Wright's professional advisers now? Yes, I believe so.

231. Did you ever speak to Mr. Holden, or consult with him, about the action between Messrs. Lyons and Wright? I did speak to him once or twice.

232. Did you consult with him professionally? No—not consult with him professionally.

233. *Mr. Farnell.*] What case was it you were engaged in on behalf of Mr. Wright—what was the case? The case of Lyons v. Wright. It was an action brought by Mr. Lyons for the obstruction of a right of way.

234. What was the result of that action? A verdict for the defendant.

235. Was a new trial moved for by Mr. Lyons afterwards? Yes.

236. Was that granted? The rule *nisi* was granted, but it was not argued.

237. A rule *nisi* was granted? A rule *nisi* was granted, calling upon the defendant to show cause why a new trial should not be granted.

238. Did he show cause? No, because the matter was settled.

239. Between Messrs. Lyons and Wright? Yes.

240. Was the whole question involved in the matter a question of boundary? Yes, I think I may say so.

241. Was that the turning-point of the case? Yes.

242. Did the jury go up to view this land? They did.

243. Did you accompany the jury? I did; so did all the parties, Mr. Lyons amongst others, his counsel and witnesses.

244. Did you think any improper influence was brought to bear upon the jury, by Mr. Wright, when they were up there? I am quite certain there was not.

245. Nothing Mr. Wright did or said, you think, influenced the jury in their verdict? Nothing, I am positive.

246. And, so far as you are concerned, as being the attorney for Mr. Wright, you believe that no other person outside of the firm—for instance, Mr. Holden, who is the Land Titles Examiner—had anything to do with the case? Nothing whatever.

247. He did not give you any assistance for the defence? None whatever. I saw Mr. Holden once or twice, the matter having been in the Land Titles Office, to get information in order that I might bring the case into as small a compass as possible.

248. That you procured in the official way? Yes.

249. He being the Land Titles Examiner? Yes.

250. If any other gentleman had been in the same position as Mr. Holden, would you have applied to him in the same way? Of course I would.

251. Have you anything further to state to the Committee? I should like, as I am here, to make a few remarks with respect to a speech made by Mr. Lyons in the Assembly, in reference to this case. I read a report of Mr. Lyons' speech, in the *Sydney Morning Herald* of the 4th February last; and, assuming it to be correct, I think it is a very unfair statement of the whole case. I think there are many suppressions of the truth in it, which ought to have been made known. I will take the liberty of reading the speech, and of making a few comments as I go on. "Mr. Lyons said,—he rose for the purpose of making a grave charge against Mr. Holden, and he did so in order that his statement might be published, and the public placed on their guard. The case was one in which he and his brother were concerned. They made a division of their property, it was surveyed by Mr. Brownrigg, and a road was laid out between the two properties." Now, in the first place, Mr. Brownrigg was employed by Mr. Lyons, and he made a survey under his instructions. The speech goes on,—“His brother sold his property, and the gentleman to whom it was sold put up a boundary fence, according to a lithographic plan.” Well, the “fence” the gentleman put up was a stone wall, and “a lithographic plan” was the lithographic plan prepared by this same Mr. Brownrigg, who was employed by Mr. Lyons. “Some time afterwards, the gentleman was anxious to bring the property under the Land Titles Act. The survey had been made by a person who was not licensed under the Act, and who was, therefore, incompetent. But his survey was accepted by the officers of the Land Titles Department, and the road between the properties was blocked up. He (Mr. Lyons) called upon

W. F.  
McCarthy,  
Esq.

4 Mar., 1869.

W. F.  
McCarthy,  
Esq.  
4 Mar., 1869.

upon Mr. Holden, and explained to him what had been done. Mr. Holden admitted that an unpardonable infringement of the Act had been committed, and offered some suggestions as to how the matter should be settled. It was ultimately agreed that the matter should be referred to two competent surveyors—Mr. Huntley and Mr. Reuss. They decided in his (Mr. Lyons') favour—that the error he had pointed out was correct, and that the Land Titles Office had included and blocked up this road unjustifiably. It was agreed that their decision should be final, and that the matter should be settled in that way. The party owning the adjoining property considered that the money he (Mr. Lyons) asked as compensation for loss of land and the road was too much, and declined to be bound by the written arbitration. The case ultimately went into Court; and, singular to relate, that this gentleman, instead of placing his case in the hands of the attorney who for years had transacted his business, placed it in the hands of Messrs. Holden, McCarthy, and Company." I complain of that statement, because, in the first place, I am informed that the gentleman who had formerly acted for Mr. Wright had merely acted for him in the matter of preparing the conveyance of this particular land; and, in the next place, because there is no firm of Holden, McCarthy, and Company. I think it was an unfair thing to state that in his place in the House, and to endeavour to induce the public to believe that Mr. Holden and ourselves were interested in the defence; "and it was clear to his (Mr. Lyons') mind that Mr. Holden was advising and abetting this wrong. The matter, however, went into the Supreme Court, a jury was impanelled, and the case was argued. But he lost his case, on the grounds of an estoppel." That is utterly incorrect, for on the question of estoppel the Chief Justice decided in Mr. Lyons' favour.

252. *Mr. Lyons.*] The report of the case would show that? I have here the Chief Justice's charge to the jury, and also the report of the case. These are the Chief Justice's remarks:—"The plaintiff himself, however, and his brother, when dividing their properties, or when apportioning both for sale, may have definitely recognized that starting-point or that mark as one further inland than the present high-water-mark, and so have mutually settled the boundary, in fact, at the spot now occupied by the wall complained of. In this point of view, the line of pegs along the course of that wall would be material, and in the same view (as an admission by the plaintiff that such was the proper termination of the stated line from the river), the erection of the defendant's wall without complaint, if the plaintiff knew of such erection during its progress, coupled with his silence for the period then intervening up to the date of his demand—I did not see that at law there was any 'estoppel' by this conduct, but in order to raise the point, if necessary, hereafter, I put two questions respecting the facts to the jury." The case was decided against Mr. Lyons, not on the question of estoppel, as will be seen by reference to the report of the case in the *Herald* of February 22nd, 1867. "The jury, after a few minutes consideration, found a verdict for the defendant. In reply to questions from His Honor, they stated their opinion to be, that the wall was in its proper place, and that it had been built according to the line of pegs laid out by the surveyors, with the plaintiff's concurrence."

253. *Mr. Lyons.*] That was the jury who had the lunch? Who went up to view the land.

254. I had no lunch? You were invited; your counsel went to lunch, and your witnesses.

255. *Mr. Farnell.*] I suppose they were respectable men on the jury? I believe so.

256. Were they such persons as a champagne lunch would influence? I should certainly think not. It was a long and troublesome journey; we walked some miles inspecting this wall, on a very oppressive day; and after the inspection, Mr. Wright invited the whole company to take lunch at his house, Mr. Lyons included. Mr. Lyons declined, but his counsel and witnesses all sat down together. To continue my statement: I think that, in fairness, when Mr. Lyons was in his place in the House, he should have stated other material facts of the case, namely, this,—that the whole property had originally been divided by the late Mr. Samuel Lyons equally among his two sons, that is to say, he gave each of them 61 acres, the whole property being supposed by him to consist of 122 acres. However, after his death there was a partition and survey. It was proved at the trial that the property was surveyed by Mr. Brownrigg, who laid down a dividing road between the two—a road of, I think, 50 links wide—dividing the property.

257. That is taking 25 links from each property? 25 links from each property. It was proved that when Mr. Wright purchased his property, he saw a line of pegs forming the road, and that he built his wall upon the line of pegs nearest the Parramatta River.

258. Did Mr. Brownrigg make the survey, and supply the description for the partition deed, between the two Messrs. Lyons? I really do not know how that was.

259. Because you said something in reference to Mr. Brownrigg having performed the survey, put down pegs, and defined a road. Was that subsequent to the partition deed between the Messrs. Lyons? I think that was a short time before. I understood from Mr. Brownrigg's evidence that he surveyed it for the purpose of partition, and that the road was put down by him as the boundary between the two parties.

260. *Chairman.*] Then the description contained in the partition deed corresponded to the survey made by Mr. Brownrigg? No; strange enough, the description did not correspond, because the line given from the river to the wall was 21 chains, whereas it was really 21 chains 25 links, according to Mr. Reuss.

FRIDAY,

FRIDAY, 12 MARCH, 1869.

Present :—

MR. BURNS,

MR. FARNELL,

MR. LYONS.

JOHN STEWART, Esq., IN THE CHAIR.

William Meadows Brownrigg, Esq., examined :—

261. *Chairman.*] You are a licensed surveyor, practising in Sydney? I am.
262. How many years have you been engaged in that occupation? Thirty years.
263. Do you remember surveying a property belonging to the Messrs. Lyons, at Five Dock, for the purpose of partitioning it? I do. I surveyed several properties for them.
264. Were you instructed to divide the property into two equal parts? Yes.
265. Did you do so? I did.
266. Did you describe the boundaries of each portion to the lawyer employed? I did.
267. You supplied the solicitor (Mr. Want) with the boundaries of each portion? My instructions being to reserve a road 50 links wide—that is to say, taking 25 links off each portion, so as to admit of a road of 50 links along the dividing line between the two portions; that is, the portion of Mr. Samuel Lyons and the portion of Mr. George Lyons.
268. Did you furnish the boundary lines, for the description of the property, to the solicitor? I did, of each portion.
269. And that description formed the title of each property? Of each property.
270. Have you got any description of the property partitioned to Mr. George Lyons? To both. I have a copy here. (*The witness read the same. Vide Appendix C.*)
271. You hand that in as a description of Mr. George Lyons' portion? Yes.
272. As contained in the deed? Yes. That was sold to Mr. Wright.
273. What length to Lyons' Road was Mr. George Lyons entitled to? 21 chains, less 25 links, for the moiety of a road 50 links wide, separating his from Mr. Samuel Lyons' portion.
274. What is the starting point of the measurement? High-water-mark. This is the starting point for the whole of the Five Dock Estate of all the subdivisions. I have had a great deal to say to the measurement of portions of the Five Dock Estate, within the last thirty years.
275. According to the copy of the title, George Lyons seems now to hold a frontage of 21 chains to Lyons' Road. This is a copy of the certificate of title issued to Mr. Wright, from the Land Titles Office (*handing the same to witness*)? This would not be right.
276. You say that certificate of title is incorrect? It is incorrect, inasmuch as they give the whole length of the line, 21 chains, whereas there ought to be 25 links broken off from the moiety of Mr. George Lyons. It ought to be 20 chains 75 links, and not 21 chains. You will observe that the deed gives the full length of 21 chains, but then there is the proposed 25 links to be taken off each portion to form the road of 50 links.
277. How could that mistake have occurred in the description of a deed passing through the Land Titles Office? That I cannot say.
278. There was no diagram, showing the boundary, in the deeds conveying the property to George and Samuel Lyons? I am not sure. The deed itself will show that.
279. *Mr. Lyons.*] In the plan you hold in your hand, is not the reservation with regard to the road totally ignored—Will you kindly read it? (*The witness read the same.*) This is not right; it is 21 chains, less 25 links, therefore the length of the line is strictly 20 chains 75 links.
280. You see nothing in that certificate of title having reference to a road beyond the delineation on the map below? "To a reserved road 50 links wide." No; this ignores the existence of the road of 50 links, as agreed on between the two parties, Messrs. George and Samuel Lyons.
281. Then, by that certificate, you say the Land Titles Office has given Mr. Wright more frontage to Lyons' Road than he is entitled to in his deed, and that the road, as represented there, does not stand in its right position? Certainly not; they give him the full length of 21 chains, and then place the road of 50 links the other side of that, which is quite wrong.
282. This is the amended title issued to Mr. Wright since he and I have settled our dispute about the road. Will you be kind enough now, as a professional witness, to say what that delineation at the bottom of the copy of the certificate represents—as a surveyor of thirty years' standing, would you call that a delineation or a road? Here it says, "a road 50 links wide." It is not only a delineation, but it is put down in letters what it means.
283. *Chairman.*] That road is in the wrong place? It is.
284. *Mr. Farnell.*] You say that you surveyed this land for the purpose of having it divided—of partitioning it between the two brothers, the Messrs. Lyons? Yes.
285. When you wrote these descriptions for the preparation of the deed, did you write them from actual survey made? An actual survey, not only made by myself, but subsequently made by my late partner; and subsequently again made when they were marked out by an assistant I had at the time.
286. That survey would not have anything to do with the description of this partition deed? No.
287. I understood you to say that you took your commencing point from high-water-mark at Parramatta River? Yes.

W. M.  
Brownrigg,  
Esq.  
12 Mar., 1869.

W. M.  
Brownrigg,  
Esq.  
12 Mar., 1869.

288. Are you aware that there is a reservation in the grant out of which this land is taken? There is generally a reservation in grants having a water frontage of 100 feet.
289. Are you aware that there was a particular reservation in this particular case? I am; but I was not until recently, when the case was before the Supreme Court.
290. Then, if you took as a starting point high-water-mark at Parramatta River, that would not be the correct starting point? It would, according to the manner in which the whole Five Dock Estate was divided.
291. You included this reservation in the area of this land? I did.
292. What was the area of each of these portions when you measured them? Sixty-one acres, or thereabouts, each.
293. Are you aware that a recent survey of this property has been made by Messrs. Reuss and Huntley? I am not. I am aware that Mr. Reuss made some survey for Mr. Lyons.
294. Do you know what the area of this water frontage would be, taken from that portion of this original grant to Harris? Very considerable, if you took 100 feet all round.
295. I think a chain —? A chain would not be 100 feet.
296. I am aware of that; but I think only a chain was allowed? A chain would not be 100 feet; they could not allow less than what is by the grant laid down. If it says 100 feet, there is nothing to alter that 100 feet.
297. However, supposing it to be 100 feet—if you were to take that out of this area, it would not leave 61 acres? No, to neither of them; it would make a considerable reduction in the whole area, if you went to take 100 feet—that is, a chain and a half all round; I dare say it would be a mile and a half round at least.
298. From what source did you get your data to commence the survey in the partition of this land? From a tracing taken from the original plan of the Five Dock Estate, which plan has been in my possession twenty-five years at least, and which plan was produced at the Supreme Court at the late trial. It is attested by Mr. Uhr as a true copy of the original plan.
299. Was there any particular mark from which you started—a marked rock, or anything of that kind? If I do not mistake, I think there was a fence up at the time, at one side or the other; a fence or the remnant of a fence.
300. Was that fence, at high-water-mark, acknowledged to be the correct boundary between the property of the Messrs. Lyons and the neighbouring proprietors? Always.
301. Strictly speaking, there was no defined point to start from? Yes there was, because it is the south-west corner of Lyons' Road; and Lyons' Road was laid down, and laid down on the ground then. As far as my recollection serves me, I think it was the property opposite that was fenced.
302. *Mr. Lyons.*] Mr. Abercrombie's? Yes.
303. *Mr. Farnell.*] Lyons' Road then was defined? Yes.
304. Could you, without the assistance of any person to go and show you this particular land, from any documents in your possession, or that you might obtain from the Surveyor General's Office, define the point from which you started? The Surveyor General can give no information about the subdivision of private property.
305. You merely surveyed this piece of land as being portion of a grant? As being portion of a grant.
306. You did not survey the whole original grant, to ascertain whether this land was in its proper position? No; it would take a long time to go over that.
307. *Mr. Lyons.*] How many acres did that grant contain? Some thousands, I think—something very large. I forget now; but it was a very considerable extent.
308. *Mr. Farnell.*] I do not know whether you are aware that, from a recent survey by Messrs. Reuss and Huntley, the area of this land has been increased. For instance, Mr. George Lyons' property is said to contain 70 acres 2 roods 37 perches, and Mr. Samuel Lyons' the same. If the area has been increased by a recent survey, would it not necessarily follow that you would have to increase the length of the line on Lyons' Road? No; because there may be an incorrectness in calculating the area. The area was stated in the will to be 61 acres.
309. Did you, from actual survey, ascertain that it contained 61 acres, or did it contain more? I actually surveyed the land, and my calculation for one portion was 59 acres 2 roods and 8 perches, and for the other was about the same—very nearly the same.
310. *Chairman.*] Did that include the portion reserved as a road? Yes. If two surveyors are going round a tortuous line of that kind, one may, perhaps, say—"This is high-water," when you get to a certain place; and the other may say—"This is high-water-mark"; and a great deal will depend upon the way in which the surveyor treats the high-water-mark, as regards the difference in the area.
311. *Mr. Farnell.*] From your experience as a surveyor of some years, you are aware, as a matter of fact, that we have no correct data to start from, scientifically determined, anywhere in the county of Cumberland? In what way do you mean?
312. I mean a point defined upon scientific principles? If a description is put into my hands, and a commencing point given, I take that point for granted. You might dispute the correctness of the streets in Sydney upon the same principle. Thus, if a description were given, "commencing at the corner of Macquarie and Hunter streets" how are you really and truly to determine that it is the corner of Macquarie and Hunter streets, except by existing boundaries. It might otherwise be objected that it is not right; it ought to be a little more to the east, or a little more to the west, and thus endless disputes might be raised.
313. *Mr. Burns.*] Can the natural boundaries of this estate determine the real boundary to start from? Coupled with the description from the will, where it is stated, commencing

mening on the Parramatta River as a natural boundary, and the south-west boundary a known road that had existed for years.

314. Then, from having these natural boundaries to guide you, you had not the same difficulty that you would have had in other parts of the county of Cumberland? No; because where there are not natural boundaries, you may have to go three or four miles to obtain a proper starting point.

315. *Mr. Farnell.*] I understood you to say that you obtained your data for the commencement of your survey from the will? Yes; from the will, and from the plan that was in my possession of the estate.

316. Then, the correctness of your survey depends upon the correctness of the information given you by the will? Yes.

317. *Mr. Burns.*] Would you not also be guided by the original plan? Yes, of the original subdivision of the estate, of which this is a true copy, and which I have had in my possession twenty-five years.

318. *Mr. Farnell.*] You say that the data for your commencing point of the survey of this land you obtained from the will and from the map to which you have referred—The correctness of your survey will, therefore, depend upon the correctness of the data obtained from those sources? And the information derived on the spot from the parties. I know there was an existing fence there. I went up the road a considerable distance, and found fences dividing the properties.

319. You did not ascertain this starting point yourself, but your data was obtained from information procured from the description given by the will and map? And an existing road which existed on the ground, and which road exists now, according to the position detailed upon these documents.

320. Could you state for a fact that that road is in the correct position? I believe it to be so.

321. Is this land undulating or level land? It dips all down to the river; it is very broken land.

322. Undulating? No; it inclines towards the river. It gets very rough in some parts towards the river.

323. I suppose the land would make a considerable angle to the horizon, would it not? Yes, there is a great dip.

324. What instrument did you survey this land with? A circumferentor.

325. Had the circumferentor a tangent scale on it? Yes.

326. Did you take the undulations of the ground or the elevations? Yes; you can do that with a circumferentor and a chain.

327. I want to know whether you did so or not? Of course. What is the use of measuring land without making allowances?

328. Are you not aware that many surveyors survey without making allowances? Yes; I have often found it out in the early surveys made by Government. They have gone up hill and down dale without making any allowance; but the original survey of Five Dock was made by a scientific surveyor,—Captain Wilson, of the Royal Engineers.

329. Was he employed as a surveyor by the Government? He was both in the public and private employ; and I know he took a great deal of pains over that survey, for I was in the Colony at the time. I have great faith in Captain Wilson.

330. I understood you to say that there was no marked rock in the Parramatta River? Yes.

331. You took an old fence? Yes; and then I surveyed, and run up to see whether it was a continuation of Lyons' Road. That line runs, I dare say, a mile and a half.

332. According to your survey of the land, and the description given by you in the partition deeds, you have no doubt the Land Titles Office has given a title to more land than it should have done? No doubt; for they have taken the same bearings—the same length of line as I describe in my description, without the deduction of the 25 links reservation.

333. A Mr. Frith has some land adjoining this land, has he not? I am not aware.

334. Do you know whether the south-west corner of Mr. Samuel Lyons' land was fenced? No; I do not think there was any fence there.

335. Not when you surveyed it? No; but I think higher up I found fences of other property, the bearing of which, I think, corresponded nearly with the same line. Such is my recollection.

336. If a line were measured from that fence you speak of, or the trace of a fence, up to the road dividing Mr. Samuel Lyons' property from Mr. George Lyons'—taking into consideration the road—and said to be 10 chains 25 links, would that be correct? No. Do you mean where the stone wall exists?

337. Yes. When you surveyed the property, was there any fence on the south-west line? I think there was, but I am not sure.

Robert David Fitzgerald, Esq., examined:—

338. *Chairman.*] You are engaged in the Survey Department? Yes.

339. Do you remember Mr. Samuel Lyons applying for compensation from Government for land taken for a road at Five Dock? Yes, additional compensation.

340. Was the application complied with? No, it was not.

341. On what ground was it refused? I considered that the boundaries of Mr. Wright's property had been fixed by the Real Property Act, and the certificate of title under that showed part of the road outside; and on that ground I recommended that no further compensation should be given to Mr. Lyons. The Minister of Lands approved of that.

R. D.  
Fitzgerald,  
Esq.

12 Mar., 1869.

W. M.  
Brownrigg,  
Esq.

12 Mar., 1869.

- R. D. Fitzgerald, Esq.  
12 Mar., 1869.
342. Then there was some compensation given to Mr. Lyons? Yes.
343. *Mr. Lyons.*] Do you recognize that (*handing a document to witness*)? The road was a chain wide, and Mr. Lyons was given compensation for more than half the road at a chain wide, and for the remainder at 50 links wide.
344. As what would you describe this—would you describe it as a delineation or as a road? As a road.
345. Will you examine the description of this title—that is a certified copy of Mr. Wright's amended title? There is no reference to a road on that side; there is on the other side.
346. Which side? On the eastern side; on the southern side no road is described.
347. Do not you think if no road exists there, it is a singular thing that the Land Titles Office should show a road there? I think they decidedly intended to show a road there.
348. Mr. Ward, in his evidence the other day, said there was no written description appearing on the title, and that that could not be considered as anything more than a delineation—Do you understand that? Yes.
349. *Chairman.*] But it gives Mr. Wright no title to a road? I should say this gives Mr. Wright and any one else a title to a road. It was on that ground I made the representation I have stated; at least, it was on that ground I did not go into the matter any further. I considered that the road was a settled matter.
350. Mr. Ward says that the plan is incorrect, and the certificate of title shows a road where there is none? I consider this shows a road where, under the Real Property Act, it was determined there was a road.
351. *Mr. Lyons.*] You, as an officer of the Land Department, say it does show a road? Yes.
352. *Chairman.*] You reported, in consequence, that Mr. Lyons was not entitled to compensation for the loss of a road? Yes. I reported that there was no necessity to go into his claim for compensation—that he was not entitled, on the showing of the plan.
353. *Mr. Farnell.*] Is this road you speak of, delineated at the foot of the certificate, a proclaimed road? This is proclaimed.
354. The whole of it? The part shown on the plan as a 1-chain road is proclaimed.
355. The continuation of the road dividing Mr. Samuel Lyons' property from Mr. Wright's property—is that a proclaimed road or a private road? It is a private road for about half the length of the boundary.
356. The old side line? The old side line.
357. What is the width of that? 50 links.
358. Do you know whether that road was reserved by the proprietors of the adjacent land, for the purposes of a road for their own convenience? I do not know it of my own knowledge.
359. I understand you to say that Mr. Lyons put in a claim for compensation for the portion of the road proclaimed through his property of a chain wide? He put in a claim for extra compensation for half of it.
360. For half the road? Yes.
361. That is, for 50 links? Yes.
362. Did he receive compensation for 50 links? Yes.
363. Did anybody receive compensation for the other 50 links? No.
364. Did anybody apply? No, till Mr. Lyons recently applied.
365. Through whose property did the other 50 links wide of this road run? The 50 links was supposed to be composed half of Mr. Lyons' and half of Mr. Wright's, which was considered to be dedicated to the public.
366. Do you know for a fact whether it was dedicated or not? No, I do not. I know a doubt has been thrown over the dedication of it.
367. If this road were not dedicated to the public, he would have been entitled to compensation for 75 links? Yes, for 25 links more than he got.

WEDNESDAY, 17 MARCH, 1869.

Present:—

MR. FARNELL, | MR. LYONS,  
MR. TUNKS.

JOHN STEWART, ESQ., IN THE CHAIR.

William George Pennington, Esq., examined:—

- W. G. Pennington, Esq.  
17 Mar., 1869.
368. *Chairman.*] You are a solicitor in the Supreme Court of New South Wales? Yes.
369. How long have you been so? In this country, about twenty years. Here, and in the old country, nearly thirty years.
370. Did you recently act as Examiner of Titles to the Land Titles Office? I did.
371. During what period? From June, 1867, to July, 1868.
372. Will you be good enough to explain to the Committee the usual way of proceeding, as to describing boundaries of land placed under the Titles to Land Act—Are the boundaries described in the certificate of title the same as those in the deed by which the applicant holds his land? The party making his application is required to state clearly the boundaries of the land, and to give the names of the adjoining owners and occupants.

W. G.  
Pennington,  
Esq.

17 Mar., 1869.

373. Then the boundaries described in the certificate of title are, word for word, the same as those in the deed by which the land is held? Certainly. If the boundaries are unobjected to, upon the application being complied with, the licensed surveyor's certificate is always taken; but in ordinary cases, where the boundaries are very clearly shown by the deeds, it is not the practice to call for a diagram.

374. Is it the custom of the office to make any survey of properties, where there is any doubt about the boundaries? Certainly—it is always required.

375. Always? Always required where there is any doubt about the boundaries, because the licensed surveyor is sworn to give a faithful certificate. It is upon the condition of getting it; and therefore the office always relies upon the licensed surveyor's certificate.

376. Then the diagram usually appended to the certificate of title only shows what is described in words? Yes.

377. Will you look at this certificate of title, dated 4th April, 1864 (*handing B 1 to the witness*), and say whether the description in the words corresponds with the description in the diagram? Yes.

378. The two correspond? I think the description seems to correspond with the diagram.

379. Do you observe the road marked in the diagram on the north-west side of the property? Yes.

380. No such road is mentioned in the verbal description? "Commencing on the Parramatta River at the north-west corner of Lyons' Road and bounded on the east by a road bearing southerly 21 chains to a reserved road." That is correct, according to the diagram.

381. Does the verbal description mention any road on the north-west side? On the north-west side. This (*pointing to the diagram*) I call the north-east side.

382. *Mr. Lyons.*] Does that certificate of title describe the land as being bounded on the north-east side by a reserved road? "Bounded on the east by that road bearing southerly 21 chains to a reserved road."

383. Does that describe the property as being bounded by a reserved road? "On the south by that road"—that reserved road "bearing westerly to the Parramatta River." That description is quite correct.

384. *Chairman.*] So far, the verbal description corresponds with the chart? It appears to me to do so.

385. That copy of the certificate of title is a copy of the title given to Mr. Wright? So it appears. I have seen it before. I was not in the office at the time it was issued. It usually bears the signature of one of the Examiners.

386. *Mr. Lyons.*] Will you be kind enough to read that description, handed in by Mr. Brownrigg, who prepared the partition deed (*Appendix C*)—Will you also look at the first certificate of title? (*The witness examined the same.*) This description of Mr. Brownrigg seems to include the road.

387. Does Mr. Brownrigg give a description of 21 chains, less 25 links? He gives 21 chains, less 25 links, for a reserved road on the south-west.

388. According to the descriptions in the title, is that correct? I do not think it is; it does not seem to follow this description, if Mr. Brownrigg's road is correct; because the road ought to be taken out of the land of the applicant.

389. *Chairman.*] Out of the land certified to belong to Mr. Wright? Yes.

390. *Mr. Lyons.*] Do the office ever accept a title without knowing who has surveyed the land—Would they be justified in accepting a title without knowing who surveyed the land? No, certainly not. Unless it is a clearly reliable survey they never accept it.

391. Would the office be justified in accepting a survey from a surveyor to whom they had refused a license? Certainly from one who had not been licensed.

392. Whom they had refused to license? I cannot answer that question. I have known instances in which a survey has been taken by a person who was not a licensed surveyor.

393. I am speaking of a person who had applied for a license and been refused? I could not answer that question. I know only of one instance of a person having applied and been refused, and that was the case of Mr. Brownrigg.

394. You see the reserved road between these two properties? Yes.

395. The adjoining property would be my property? Yes.

396. Would you consider me as an adjoining proprietor, and entitled to a notice from the office, if that road came into existence by half of it having been granted by my brother to me, and half granted by me to my brother? I should think so.

397. You would consider me as an adjoining proprietor, and entitled to notice from the office, of Mr. Wright's intention to bring his land under the Act? Certainly; because the property is not bounded by the road. I do not know what view the office would take of it.

398. That road is 50 links wide—25 links was granted by my brother to me from his portion, and 25 links was granted by me to him, to form that road of 50 links wide? Yes. You asked me just now whether you ought to have had notice. According to the practice of the office, if the road was shown on the diagram on the south side, they would not consider you entitled to notice.

399. Suppose the deed showed that half that road had been conveyed to me for a money consideration? If that appeared pretty clearly upon the documents produced in the office, you ought to have had notice.

400. *Mr. Tunks.*] Would that appear as a formally dedicated road in the plans transmitted to you, if it were so? We should not make any difference, I think. No matter whether it was a road dedicated to the public, or a right-of-way for two private individuals, it would be just the same.

W. G.  
Pennington,  
Esq.

17 Mar., 1869.

401. *Mr. Lyons.*] I produce the second certificate of title issued to Mr. Wright (*handing the same to witness*)? I see this is 21 chains 25 links, but in the other case it is only 21 chains.

402. Do you think that I, as an adjoining proprietor of that land, was entitled in the second case to a notice from the office? I do not know for what purpose this amended certificate was issued. I see now this is 70 acres. I suppose Mr. Wright purchased some other land.

403. He purchased some other land from me? And he got a consolidated certificate for the two.

404. *Mr. Farnell.*] I may inform you, also, that Mr. Wright purchased a water reserve from the Crown.

405. *Mr. Lyons.*] And the reserve of the road conveyed to him—upon that he applied for a new certificate of title. Do you think, under these circumstances, I should have been entitled to notice from the office? It appears in one of these descriptions that there was 61 acres, and in the other 70 acres. If the 9 acres was under the Act or under the Crown Lands Act, I do not think, according to the practice of the office, you would have been entitled to notice.

406. Do you notice that the reserved road of 50 links wide has been shifted in these two certificates? Yes, I observed that they give a line here of 21—25 in the new certificate.

407. Do you think they were justified in shifting the line without giving me notice? No, I do not think so.

408. *Mr. Farnell.*] Is not the matter respecting which you are now being questioned, more a question of survey than one within your province as Examiner of Titles? Yes, I think it is.

409. You were asked a question as to whether the Land Titles Office had done right in issuing the second title and shifting a road from the lines—Do you know, for a matter of fact, whether they have shifted the road or not? No, I do not.

410. *Mr. Lyons.*] Do you see in the first title issued the road is 21 chains from high-water-mark, 21 chains frontage to Lyons' Road? Yes.

411. In the other it is 21 chains 25 links? Yes.

412. Does not that shift the road? Yes, I think so.

413. *Mr. Tunks.*] The 21-25 you allude to are merely figures in the plan—Is there any starting-point indicated? The starting-point I think is high-water-mark at the Parramatta River. I confess I cannot understand why it should be 21-25 in one case and not in the other.

414. *Mr. Lyons.*] You said, I think, that this matter was not adjudicated when you were in office? Yes. The second certificate appears to have issued when I was in office, but I do not see my initials on it.

415. Is it usual to initial the certificate? Yes.

416. And that second certificate is not initialled at all? No. One of the Examiners always initials the certificates.

417. *Mr. Farnell.*] These are only copies? He initials the certificate and copy. This is not the copy to which I refer, but is merely a certified copy of the record.

Robert Mead Pearson, Esq., examined:—

R. M. Pearson,  
Esq.

17 Mar., 1869.

418. *Chairman.*] What is your designation? Principal Draftsman to the Land Titles Office.

419. *Mr. Lyons.*] Can you tell the Committee whether there is any record in the office of the survey of the different properties that are taken under the Land Titles Act? No; we do not keep a record of them. If there is any survey, it is kept in each particular package.

420. Can you answer the question, as to whether Mr. Wright's property was surveyed by the office, for the issue of the first certificate of title? It was not.

421. Is it usual for the office to accept the survey of a surveyor who has not been licensed by the office? Yes, we often do so if the property is not within the city, and if we have a plan which we consider sufficiently reliable to make use of.

422. Do you know whether Mr. Brownrigg ever applied to the office to be licensed by the office? I do not.

423. He is not a licensed surveyor? Not under the Act. They do not apply to the Land Titles Office in the first instance, but to the Surveyor General; so that I should not know if he had applied.

424. *Mr. Farnell.*] He is not registered under the Land Titles Act? No.

425. *Mr. Lyons.*] Can you say whether the office would accept a survey laid out by Mr. Brownrigg, without having it resurveyed by its own officer? Yes, we should, in particular instances, if we thought it reliable. Of course it would depend upon the examination of the plan.

426. Do the office, before they take a title, require to know by whom the survey has been made? If a survey had been made, a plan would be furnished us with surveyor's name attached thereto. In that case, the office would know when it came under the examination of the surveyor and draftsman who surveyed it.

427. *Mr. Lyons.*] If a person makes an application to have his property brought under the Act, and produces a deed of the property with plan on it, how can you know by whom the survey was prepared? In that case I could not tell.

428. *Mr. Tunks.*] If an individual made an application, and referred to a Government survey, you would not put him to the cost of a survey? No. So much depends upon where the land is, and the nature of the plan furnished. R. M. Pearson,  
Esq.
429. Supposing it referred to No. 43, Balgowlah? Then it would depend upon my own judgment. 17 Mar., 1869.
430. *Mr. Lyons.*] You were not at the head of the Land Titles Office when Mr. Wright applied to the office for his first certificate? No.
431. Who was? Mr. Charles Arthur.
432. Who has the regulation of notices to be sent out to adjoining proprietors? Mr. Ward solely.
433. You have nothing to do with that department? Nothing, excepting furnishing tracings to accompany notices. If there are not sufficient furnished, he sends to me for more.
434. Did you prepare this amended plan of Mr. Wright's? I prepared it for the draft certificate.
435. Did you, in preparing that amended certificate, include in the area a strip of land conveyed by me? Yes; I saw the deed.
436. From me to Mr. Wright? Yes.
437. And from that deed you gave Mr. Wright additional frontage? No; I did not take the deed into consideration, further than as a settlement of a dispute without reference to where the land was.
438. How is it that in the first certificate it states 21 chains, and in the other 21 chains 25 links? That was caused by the addition of the land you conveyed to him to outside the wall. We had a survey then of the exact distance of the wall from the water; and believing the deed before referred to to be a settlement of the dispute between you and Mr. Wright, we gave him the full distance from the water to outside the wall.
439. You see on the first plan the reserved road between the two properties of 21 chains. Can you explain how that road—the road between myself and Mr. Wright's property—having been conveyed to him, another road is shown in this amended certificate? In the second certificate, we took the decision of the Supreme Court as settling where the road was. That was my principal guide in the preparation of that new certificate. Believing that the dispute was wholly settled, and that the object was to fix carefully the position of Mr. Wright's land, I gave him to the outside of the wall.
440. Are you aware that, in the case of *Wright v. Lyons*, a new trial was applied for, and a rule *nisi* was granted, upon the ground that the verdict was against law and against evidence? I did not know what the reasons for giving it were; but I always understood that a new trial was granted, and that it was afterwards settled between you and Mr. Wright for a consideration, and that the deed referred to just now was supposed to be the final settlement of it.
441. By whose instructions was the road shifted in the second certificate? I do not know that it was by any person's instructions. I believed the road to be there when the draft was prepared.
442. You call that a road? Yes, decidedly.
443. Has Mr. Ward made a mistake if he has called it a delineation? I do not know what Mr. Ward's opinion is.
444. Does that road appear in the description of the property above? No.
445. Ought it to appear? Not necessarily. If it had not been for the wall, I should have made use of the road in the description; but, to make it quite clear, I used the south-west side of the wall.
446. Upon second consideration, seeing that the dispute between myself and Mr. Wright was going to a new trial upon the grounds of law and evidence, and that I conveyed to him the whole of my right to a disputed road—do you still think that road is rightly placed there? I do; I think the Supreme Court clearly fixed its exact position, and that neither Mr. Wright nor yourself had any power to shut it up.
447. In issuing that new certificate of title, do you know whether I, as an adjoining proprietor, was entitled to notice? Not according to the rule laid down by Mr. Ward, that those on the other side of a road do not have notice—that has always been the rule.
448. Do you know how that road comes into existence? Through the partition deed.
449. Do you know that that road is 50 links wide? Yes.
450. Do you know that the partition deed bears an indorsement by which half of that road is conveyed to me, and the other half is conveyed to my brother? No, I did not know that there was such an indorsement on it. I do not remember. I remember only the description, in which 25 links was deducted from each.
451. You do not remember anything about a grant being on the partition deed? No.
452. Do you think you ought to have seen that in drawing up the description? I should have done so had I examined the original application, but this was done by Mr. Arthur; it was unnecessary for me to refer to them.
453. *Mr. Tunks.*] What is the area of the land that has apparently been taken from Mr. Lyons? An acre and four perches.
454. What is the probable value of that quantity of land there? I do not know of any land having been sold there to guide me. I think it might be about £30.
455. *Mr. Lyons.*] Was not the starting-point of each of these descriptions high-water-mark? Yes.
456. *Mr. Farnell.*] Is not the length of the road you have just calculated 49 chains? Yes.
457. In this description of Mr. Huntley, is it not given as 49 chains 10 links? Yes, that also is taken from high-water-mark.

- R.M. Pearson, Esq. 458. *Mr. Tunks.*] Is not the mean taken between neap and spring tides? Yes.
459. If the water extended a mile at high-water, would not that make the position of high-water-mark somewhat doubtful? Yes, if the land were very flat.
- 7 Mar., 1869. 460. Is the road you are speaking of now called the Five Dock Road? Half of it. It is a chain wide, part of the way down; and the rest is 50 links. The chain-wide road is dedicated.
461. That is, the road leading to Five Dock Point? Yes.
462. Is any portion of that road only 50 links wide? No. Where the Government road branches off—from there to the river, along the wall, is 50 links wide. Along the remainder of the wall, 50 links were, I think, taken by the Survey Office, and considered as a public road.
463. *Mr. Furnell.*] Do you know whether Mr. Brownrigg ever surveyed this land? I do not, excepting that there is a subdivision of his, and therefore I suppose he may have surveyed it.
464. A subdivision plan of the whole estate? There is a plan, though I do not know whether he surveyed it or not.
465. Do you know whether he, at any time, marked out this particular road between the properties of the two brothers—Messrs. Samuel and George Lyons—in that subdivision? Not for certain. The subdivision shows that he has put a road there, but the exact distance is not given. That is the road (*pointing to the plan*), and he is supposed to have surveyed this and cut it up into certain allotments.
466. Do you know whether these allotments were all marked or pegged out, or the road defined in any way? Yes, I believe it was pegged the whole length—evidence to that effect having been given at the trial; and the pegs were found on both sides of the road, and the wall was built along one line of pegs.
467. The pegs were placed there by Mr. Brownrigg? Yes, if he surveyed it.
468. This action in the Supreme Court was a dispute as to the position of this road? Yes.
469. Has the verdict of the Supreme Court decided that the road where it is now placed is in its true position? Yes, that was the decision.
470. And that Mr. Wright placed his wall on the correct boundaries, as laid down by some surveyor—Mr. Brownrigg, or someone else—who was employed by Messrs. Lyons? Yes.
471. There is a difference in the length of lines given in the two certificates of title. The description in the first certificate does not contain the same length of lines on the Lyons' Road as that in the latter certificate? No, it does not.
472. Can you now inform the Committee what is the length of the line, from a point at high-water-mark, running south-westerly to the south-west line of Mr. George Lyons' road, now Mr. Wright's, that side being the north-east side of the reserved road? That would be 21 chains 25 links.
473. Then, how far would it be from that point to the centre of this reserved road? 25 links further on.
474. And 25 links from that point again in the same direction would be the whole width of the reserved road, 50 links? Exactly.
75. From the point at the centre of the road, could you tell us the distance to the south-west side-line of Mr. Samuel Lyons' property? I think, from memory only, it would be something more than 10 chains—10 chains and 70 or 80 links. I remember seeing Mr. Huntley's plan, on which it was more than 10 chains.
476. This is Mr. Huntley's plan—(*handing the same to the witness*)—will you look at it? 10 chains 50 links.
477. To the south-west boundary line of Mr. Samuel Lyons' property? Yes.
478. You are aware, I suppose, that Mr. Huntley and Mr. Reuss recently surveyed this land? Yes, I heard so.
479. Have you seen a plan similar to that prepared by Mr. Huntley from that survey? Yes, we have one in the office.
480. Have you any doubt, as far as you are able to judge, of the correctness of that plan of Mr. Huntley's? No, I have not; he is a careful surveyor.
481. If those lines were surveyed some years ago by Mr. Brownrigg, and a description were made from that survey, giving the length of the lines as 21 chains and 10 chains, respectively, to these two different properties, it would not be very extraordinary if, from recent and more careful survey, the lines should be lengthened, or even shortened? I think not, considering the locality.
482. There was a Crown reserve on this land—water frontage? Yes, a chain wide.
483. Mr. Wright has applied to purchase that from the Crown? Yes, he has purchased it.
484. I believe he included that in the certificate of title? Yes.
485. Which accounts for the large increase in the area of the land? Yes, that makes a considerable difference.
486. Are you aware that the area of land given by the partition deed to each of the brothers is 61 acres? —
487. What is the area given by your certificate to Mr. Wright? 70 acres.
488. Is the reserved road separating the property of Mr. Samuel Lyons from that of George Lyons, correctly delineated upon the plan accompanying the certificate? Yes.
489. As being on the south-west side of Mr. Wright's wall? Yes.
490. The Government, you are aware, have proclaimed a road 1 chain wide a certain distance down the side of this wall? Yes.
491. And have had to compensate the parties through whose land it ran? Yes, in all cases.

492. Do you know for what width of road Mr. Lyons received compensation? No, I do not, but I should think for 50 links. R.M. Pearson,  
Esq.
493. *Mr. Tunks.*] Nor what amount of money he received? No.
494. *Mr. Farnell.*] Do you know anything of a deed between Mr. Lyons and Mr. Wright for the purchase of any portion of this reserved road? I saw the deed when it came out of the office. It was produced for the consolidation of Mr. Wright's certificates—the old certificate and the new grant for the water frontage. 17 Mar., 1869.
495. You have no difficulty in coming to the conclusion that the position of the road is rightly defined now? I think so; and I always have thought so.
496. *Mr. Lyons.*] Then, if the road in the first certificate is rightly placed, it is wrongly placed in the second? That must have been the case; but if no survey was made at the time, that would account for that. I believe, if a survey had been made, and the road had been shown to exist in its present position, we should have given the extra links in the first certificate.
497. *Mr. Farnell.*] In your experience as Chief Draftsman of the Land Titles Office, does it not often occur that the lines of many of these old grants and surveys that were made many years, when they come to be surveyed, are found to be much longer or shorter? In almost every case longer. I have never known them to be shorter. In one application which has just come to me for report, one boundary is 6 chains, and another 11 chains, longer than in grant.
498. *Mr. Farnell.*] In fact, in the olden times they did not survey very accurately—they did not take into consideration the undulations of the ground? Very often they did not survey it at all.
499. *Mr. Lyons.*] That shows the necessity of the office having its own survey? If there is so much more land, it is to the advantage of the applicant to have a survey; but where it is a whole Crown grant, it is unnecessary to put the applicant to the expense.
500. This is only a small portion of a grant? Yes.
501. *Mr. Farnell.*] If I had a grant from the Crown of 100 acres, a certificate would be issued to me under the Land Titles Act? Yes.
502. If I wanted to sell 50 acres of that 100, it would not be necessary to employ a surveyor? No; if the boundaries were regular.
503. You having the area and data in the office, it would not be necessary for me to have it subdivided by a surveyor? No, we would rather do it in the office if practicable. In some cases it would not be so. We should then keep a record of how much had been sold.
504. *Mr. Tunks.*] It is the object of your department to facilitate the transfer? We do so in every instance. In the case of the 100-acre grant, we should have a plan of it in the office, and on that plan we should mark the transfer of the piece or pieces sold, and edge them with green; so that by reference to it, it could be seen in a moment how much had been sold.
505. *Mr. Farnell.*] Then the person who might purchase any of this land would have the length of his lines given to him, and he might either measure it himself or employ some other person to do so, from the measurement given in the Land Titles Office? Yes, and the matter would be so clear that there could be no possibility of mistake.
506. *Mr. Tunks.*] Then, in this view of the matter, the original owner of a 100-acre grant, which really contains 120 acres, may see 100 acres but no more? Exactly; or if he had a survey made, and showed clearly that there were 120 acres, and if required produce other evidence as to his possession, we would give him the 120 acres.
507. *Mr. Farnell.*] When the Government sell land they chart it, do they not, and you have access to those charts, or have them in your office? Yes, we have copies of many of them.
508. My question does not refer to surveys made years ago, but to recent surveys? Yes, we have many copies of both old and new.
509. That is, where you have correct lines given and the correct area of land, persons can divide their land for purposes of transfer without difficulty? Yes.
510. In such cases, persons would have no difficulty in subdividing land without the agency of a surveyor, except to get some one who understood surveying to mark it out on the ground? No.
511. There would be no danger, then, of any person getting a certificate for more than he was entitled to? It would be impossible.
512. *Mr. Lyons.*] Did you ever hear that Mr. Huntley and Mr. Reuss had been appointed by Mr. Wright himself to go on to our ground and determine where the road ran? Yes, I heard such was the case.
513. Did you hear the result of the joint survey? No, I never saw Mr. Reuss' survey, and I did not hear the result of it.
514. *Mr. Farnell.*] I would call your attention to the map produced before the Committee, prepared by Mr. Reuss, and to that prepared by Mr. Huntley (*the witness referred to the same*)—Do you notice the bearings of the line given of Lyons' Road, that the bearing given by Mr. Huntley on the line is south 42 degrees west, while that given by Mr. Reuss is north 44 degrees east; showing a difference of 2 degrees in the bearing. The length of the line is the same by both surveyors? Yes.
515. I will also call your attention to the south-west boundary line of Mr. Samuel Lyons. The bearing given by Mr. Huntley is north 48 degrees west, the length 28 chains 12 links; while that given by Mr. Reuss is west 44 degrees north 27 chains 90 links; being a difference of 4 degrees. Could you give us any information as to these discrepancies? There must be some considerable difference in the instruments, or careless reading.

- R.M. Pearson, Esq. 516. These discrepancies, as shown in these two different maps, would make a great difference in the position of this piece of land, would it not? It would make only a slight difference.
- 17 Mar., 1869. 517. It would alter the shape of the figure of the piece of land to some extent? Slightly; but the length of the lines being so short, it would not make much difference.
518. Which, in your opinion, would be the more reliable survey to go upon? I think they are both careful men. I should not prefer one before the other.
519. These errors may not have arisen from any want of ability on the part of the gentlemen employed? No; but from a difference in the instruments, or careless reading.
520. The lines are measured from the water, and the discrepancy in their length may have arisen from the want of any definite point to start from at the water's edge? Yes; the difference in the length of the line would arise from the uncertainty as to high-water.
521. *Mr. Lyons.*] You have never seen the high-water-mark at the bottom of Lyons' Road? No.
522. And you do not know that it is clearly defined by rocks? No; I have never been on either of the allotments.
523. *Mr. Tunks.*] Has the Survey Department any mode of adjusting the chains and instruments used by licensed surveyors? They usually employ Mr. Tornaghi to repair and keep them in order.

FRIDAY, 19 MARCH, 1869.

Present:—

MR. BURNS,	MR. LYONS,
MR. FARNELL,	MR. TIGHE.

JOHN STEWART, Esq., IN THE CHAIR.

Robert David Fitzgerald, Esq., examined:—

- R. D. Fitzgerald, Esq. 524. *Mr. Farnell.*] Did you receive a summons to attend here to-day, and to produce a report received by the Surveyor General from Mr. Huntley? Yes.
525. Do you hand in that report? I do. (*The witness handed in the same. Vide Appendix D.*)
- 19 Mar., 1869. 526. Is that a report asked for by the Surveyor General from Mr. Huntley in reference to compensation for some road at Five Dock? It is.
527. *Mr. Lyons.*] Is that for additional compensation, or with reference to the original claim? Additional. I may mention that the recommendation I made happens to be in that letter, on which the Minister for Lands acted.

George Kenyon Holden, Esq., examined:—

- G. K. Holden, Esq. 528. *Chairman.*] You are Examiner of Titles in the Land Titles Office? I am.
529. Do you remember an application made by Mr. Wright to get a portion of land placed under the Land Titles Act? I do.
- 19 Mar., 1869. 530. Was the certificate of title granted to Mr. Wright ever disputed? An objection was made to it by Mr. Lyons, some time after the certificate was issued.
531. What was the nature of the objection? I should like to have the letter written by Mr. Lyons—I prefer referring to the documents—I have the answer to it, which would show what the letter was.
532. Perhaps this letter (*handing a letter to the witness*) would assist your memory. It is a letter from your department, dated 1st November, 1866. Will you look at it, and see if that is it? (*The witness examined the letter.*) That is the letter written in answer to Mr. Lyons. I now find I also have here Mr. Lyons' own letter of the 28th October, 1865. (*The witness produced it.*)
533. It is alleged by Mr. Samuel Lyons, the adjoining proprietor, that you have included a portion of his land in the title you gave to Mr. Wright? As to the words "adjoining proprietor,"—in point of fact he is not, strictly speaking, a contiguous proprietor—and, therefore, it was not incumbent upon Mr. Wright to point him out as such in his application. Had he done so, notice would have been given to Mr. Lyons; and the question, if deemed important, would have been raised before the issue of the certificate.
534. He was not considered an adjoining proprietor, because there was a road or right-of-way between his property and Mr. Wright's? That was the case—not that it was at that time a matter of consideration by me or by any officer of the department, but it prevented his being referred to as such in the application, according to the form given in the Act. Mr. Wright not being obliged to notify him as an adjoining proprietor, we got no notice of the fact; and, consequently, Mr. Lyons got no notice.
535. Then, the description of Mr. Wright's property, in the certificate of title, corresponded with the description given in the deed lodged on his application? Corresponded with the plan of the property upon that deed, which deed bore the signatures of both Mr. Samuel Lyons and Mr. George Lyons.

536.

536. The deed by which Mr. Wright held his title to that land had an indorsement upon G. K. Holden, Esq.

537. Conferring a right-of-way? That plan was identical in all respects with the plan of our surveyor, placed upon the certificate of title. 19 Mar., 1869.

538. There was no difference made whatever? No difference whatever.

539. Either in the verbal description or the description by diagram? I believe, none. I had nothing personally to do with this—that was a matter for the draftsman.

540. You have, I presume, a clear recollection of the facts of the case, from the matter having been repeatedly brought before your notice? Yes.

541. *Mr. Lyons.*] After I had written this letter to you, dated 1st November, 1865, I had several conversations with you respecting it? You had some conversations with me.

542. In your own office? In my own office, I believe.

543. Do you remember saying to me, in the office, that you had made a mistake in not giving me notice? I remember expressing regret that you had not received notice. I at first thought the omission was a mistake, but I afterwards discovered that it was not.

544. Are you aware that, in issuing the first certificate of title to Mr. Wright, the office completely overlooked the indorsement granting half the road to me? There was no indorsement granting half the road to you.

545. Not on the face of the deed? No; but giving a right of way over it—arranging for a right of way.

546. The half-road found by myself was granted to my brother, and the road found by my brother was granted to me? It was not granted as land, but granted as a right-of-way. It was arranged between you that each should have a right-of-way.

547. Would not that, in your opinion, make us contiguous proprietors? No, decidedly not; at least, it was not so treated by the draftsman, and it was not so treated in the application. There may have been ambiguity about it, but it was not so treated. The road appeared, on the face of the plan, as separating your land from your brother's; and, therefore, it was concluded that there was no adjacent proprietor. If, in this, there were any mistakes, the plan on your deed, signed by yourself, was that which misled.

548. Do you know by whom the plan was made? I do not. I was asking respecting it only yesterday, but could get no clue to it. I have it here (*producing the plan*). You may know—I do not.

549. Is it not a part and parcel of the duty of the office over which you preside, to remedy errors made by surveyors not licensed under the Act? I do not exactly understand in what state of the matter, and for what purpose.

550. I want to know, if a title is sought to be brought under the Act through your office, whether it is the duty of the office to ascertain whether the surveys are correct or not? As a general rule, unquestionably; but, in this case we have a survey already made, and attested by the only parties interested at the time,—namely, yourself and brother.

551. Then, in the office, you never inquire whether these surveys are correct or not? I can best answer that by reading one of the regulations, in a circular letter. "No. 1.—Instructions for guidance in bringing Land under the Act." Section 7 points out certain cases in which a plan may be furnished for a small fee, at the expense of the applicant, through the Survey Office. "In all other cases," section 8 goes on, "a plan must, *in general*, be furnished by a surveyor specially licensed by the Surveyor General for the purposes of the Act, verified by declaration before the Registrar General or a J.P." It is, however, provided by the same section that this rule may be relaxed, when it is shown that the deed surrendered, or the map already deposited, contains an accurate description of the land. Whether or not to make requisition for another expensive survey, is left generally to the draftsman to determine. In this case, I have the means of showing what was the course taken by the office. Here is my own draft of requisitions, one of which calls for "The plan showing lines of subdivision." I see a note in the margin by the draftsman, now deceased, Mr. Arthur—"Produced"—from which the Examiners were entitled to infer that he was satisfied on that point, and the matter proceeded on that assumption.

552. Does not the printed form of application, supplied to the parties wishing to bring their land under the Act, state this—"If the land comprises a portion only of a grant, an accurate plan must accompany that application, either annexed or indorsed. It is also desirable, and in many cases absolutely necessary, that this plan be prepared and certified by one of the surveyors licensed under the Act?" That accords with what I have already read as the rule of the office.

553. Are you aware that the office never made any inquiry, and never knew that this land had not been surveyed? I am aware of nothing more than I have disclosed. I have disclosed all the part I took in the matter.

554. Can you tell me who is responsible, if a mistake is made by the office, through accepting an inaccurate survey? The Act provides for responsibility by an insurance fund, if the case is of such a nature as to entail a wrongful injury.

555. Which is the officer responsible—who is to blame? That would be for the Government to determine upon, investigating the merits of each particular case. It would depend upon the peculiarity of each case, and the particular duty that would, under the circumstances, devolve upon each individual officer administering the Act. In this case, the main duty of this investigation would devolve upon the draftsman who reports that he is satisfied.

556. Did you ever advise Mr. Wright in this matter of dispute between him and myself? Mr. Wright complained to me that we did not enforce his view of the matter, and he received precisely the same answer that we gave to yourself, namely, that under the peculiar circumstances of the case, the action of this department had not in any manner altered

- G. K. Holden, Esq.  
19 Mar., 1869.
- altered the position of either party. Therefore, all we have been saying about responsibility is beside the purpose. There could be no responsibility in this case, because the certificate issued had not in the slightest degree, according to its legal interpretation, altered your position. This was manifested by the fact of your bringing an action, and carrying it to a conclusion, and obtaining or suffering a verdict. The whole matter was thoroughly investigated upon its independent merits; for, as far as regarded this right of road, the certificate had no operation whatever. The policy of the Legislature has been to render any errors in the certificate in matters of this kind (and it must be apparent that it is impossible always to avoid such errors) actually inoperative.
557. *Chairman.*] Mr. Wright's certificate of title gave him neither more nor less land than he had before? Neither more nor less, as regards area. As to any right of way, the certificate of title was wholly inoperative, and left the parties in precisely the position they stood before, as is pointed out in the letter I have put in.
558. Then, if there were any doubt at all, it was derived from the original deed dividing that property? It was—if there was any doubt that remained open to litigation, and has been litigated, and has been settled.
559. Has Mr. Samuel Lyons placed his portion of land under the Land Titles Act? No. If you will allow me, I will go a little further into the question whether I advised Mr. Wright. Mr. Wright, as I said, complained that we did not support his views by maintaining the certificate as granted. The same explanation was given to him as was given to Mr. Lyons thereupon. I had some conversation with him upon the subject; and if I went at all beyond my province in the matter, it was in advising him to submit to pay compensation for any portion of the land.
560. Rather than enter upon litigation? Rather than enter upon litigation. Mr. Wright appeared to me to adopt that view, and I know that he made some application to Mr. Lyons in the nature of an offer of compensation. If Mr. Lyons had accepted that offer in that stage of the matter, compensation would have been made, on the assumption that Mr. Wright had been a trespasser, although I know he asserted at the same time that he was not so.
561. If Mr. Samuel Lyons applied to place the land under the Land Titles Act, would you give notice to Mr. Wright of his application? It would depend upon the nature of Mr. Lyons' application. If Mr. Lyons had not disclosed Mr. Wright as an adjoining proprietor—which he might not, in consequence of the intervention of the road—we should not, unless our attention were pointed to it. I admit that, if my attention had been pointed to this by the draftsman, and I had anticipated the possibility of a dispute, I should have requested the Registrar General to have forwarded a notice to Mr. Lyons.
562. Then, litigation between Mr. Lyons and Mr. Wright might have occurred, although this land had never been placed under the Land Titles Act? Exactly. The point was not in the least degree altered or affected by the issue of a certificate.
563. The litigation arose from the ambiguity in the deed of partition? In the deed of partition, taken in connection with the plan thereon and the surveyor's marks on the land.
564. *Mr. Lyons.*] Are you aware, referring to this grant, that there is an indorsement on the deed that a money consideration passed between myself and brother for this road? I only see 5s.
565. You see 5s.? Yes.
566. Do you still say that the grant, having passed from one brother to another, does not make us contiguous proprietors? I would say that, according to the plan on the deed, you are not contiguous proprietors.
567. I am referring to the grant of the road—to the indorsement on the other side? The grant of road does not constitute you contiguous proprietors, but tends to make you otherwise.
568. Are you aware that, by that grant, I conveyed to my brother my half, and that he conveyed to me his half? No, I am not aware of it.
569. Does not that grant of road show that? It shows you conveyed a right of way—
570. For a money consideration? I do not call 5s. a money consideration. It is always inserted when no consideration passes; it is only nominal. The only effect of that is that you establish a road between your two properties.
571. You are aware that this dispute between myself and Mr. Wright was taken into the Supreme Court? I am.
572. And that a verdict was given for the defendant? I am.
573. Are you aware that a rule *nisi* was applied for and a new trial granted, upon the ground that the verdict was against law and against evidence? My impression is—I can only speak of my impression from reading the reports in the newspapers, and so on—my impression is, that a new trial was granted solely on the ground that Mr. Wright had committed himself by reference to arbitration, assuming that he had trespassed; and that he was thereby precluded from proving, as the fact was afterwards proved on the trial, that he had not trespassed. I considered, according to what appeared to me on the face of the report in the newspapers, which is all I know about it, that the merits of the case had been decided on the trial by the jury, but that a new trial\* was applied for, because the jury was not entitled to go into the merits, on account of Mr. Wright having submitted to reference to arbitration; and that was the ground taken up by your counsel, and the ground upon which a rule *nisi* was granted. That was my impression of the facts.
574. The matter being in that state, are you aware whether judgment was given in that case? I am not.
575. Do you consider that a trial standing in that state was finally adjudicated? The thing speaks for itself. Of course, it was open to you to prosecute your application for a new trial.

576.

\* NOTE (on revision):—There was no actual grant of new trial—only a rule *nisi*.

576. Are you aware that Mr. Wright made one or two applications to me to settle the matter amicably? I believe Mr. Wright was from the first extremely anxious to settle the matter amicably on any reasonable terms. As far as I know, from any communication I had with him, he certainly was so; and as far as I meddled in the matter, it was to persuade him to do so, even though he might thereby submit to some injustice; and it was only under the pressure of what he considered an exorbitant demand that he went into Court.

G. K. Holden,  
Esq.

19 Mar., 1869.

577. Do you remember what my first demand was—was it not £190? As far as my memory of the facts goes, Mr. Wright offered to compensate you for the assumed encroachment on the same terms that the Government had compensated you.

578. £30 an acre? I do not know; but whatever you were to get from Government, that is what I understood to have been his offer to you.

579. Are you aware that he eventually gave me £150? I am aware that eventually, in order to put an end to litigation, he paid £150, to avoid paying more costs. A great many costs were due, and you were willing to accept £150, and he was willing to give it rather than continue the litigation. But up to the last, I apprehend, he fully asserted, as he did at first—though he did not then consider that he had the means of proving it—that he had built on the right line. He only discovered the means of proving it by degrees as the action proceeded; and then he discovered, ultimately, not only that the compensation you asked him was excessive, but that he was not bound to pay you anything.

580. The result of that compromise was, that I conveyed to him the disputed piece of land? Yes.

581. After that he applied for a second certificate? He applied for a consolidated certificate, having in the meantime purchased from Government a piece of road running round the water, which, if it had been before regarded, might have altogether altered the view of the measurement; because, taking that road into consideration, and excluding it from the measurement, it would give the whole of the 21 chains palpably and clearly to Mr. Wright.

582. Would your office have been justified in making a starting-point for themselves, irrespectively of the deed put in as part of the title? I do not know what the office would have done. I am not bound to state what the office would have done under circumstances that have not taken place.

583. I will call your attention to Mr. Wright's first certificate of title. You will see there that the road is placed 21 chains from the Parramatta River—"Commencing on the Parramatta River at the north-west corner of Lyons' Road."

584. I refer to the plan showing 21 chains fronting to Lyons' Road—Is that road placed in its right position there? That is a question of survey. It is a matter upon which I should have consulted with the draftsman before I formed an opinion; but if it had been before discovered that the existence of the Government road would reconcile the facts of the case, the probability is the road would have been inserted upon the plan, and that would have made the 21 chains palpably right. And if we had gone into all these particulars, it would have disclosed that Mr. Wright's 61 acres was 69 acres, and that your 61 acres was also 69 acres. I am now speaking in the light of subsequent discoveries.

585. Does not that go to show that the office never had the property surveyed? I have told you already that the draftsman appears to have adopted and been satisfied with the plan on your own deed.

586. Whether it was right or whether it was wrong? Of course he was then satisfied it was right. I am not the draftsman.

587. In issuing Mr. Wright's second or amended certificate you conveyed to him? I conveyed to him.

588. The office issued a title giving him the whole of the road in dispute. They gave him up to his wall, it being apparent by the verdict of a jury that he was entitled to his wall, and in addition to that, by your subsequent conveyance to him, to clear up all doubts. The office refused to give him an apparent 5 links more, because you had not palpably conveyed it to him. To show the punctiliousness of the office in that matter, the measurement put before us was 21 chains and 30 links, and we were so punctilious in the matter that we refused to give him more than 21 chains 25 links.

589. That verdict given in the case of Lyons v. Wright might have been disturbed, might it not, by a new trial? Why should I be asked such a question as that?

590. I ask you as a lawyer whether the verdict might not have been disturbed by a new trial? You ask me as a lawyer whether a new trial might have disturbed the verdict. Of course it might.

591. Upon that doubtful verdict, was the officer justified in shifting the road? It is not for me to say that it was a doubtful verdict.

592. It was not a final verdict? It was not a final verdict, so long as the motion for new trial was pending.

593. *Mr. Farnell.*] It is final until it is reversed? Yes, *prima facie*.

594. *Mr. Lyons.*] Did you ever advise Mr. Wright? I advised Mr. Wright to settle the matter if he possibly could.

595. Did you advise Mr. Wright to take his case to Messrs. M'Carthy, Donovan, & Co.? I believe not; but if I had done so, I should have been as much entitled to do so as a perfect stranger. I was no party to the transaction, but a mere spectator. I believe the extent of my advice was, that if he did not feel inclined to give this amount which he thought exorbitant, the proper course was to enter an appearance, to endeavour to settle it, or to pay money into Court. Whatever I did advise at the first was, with a view simply to postpone the matter, in order that the negotiation for a compromise might

G. K. Holden, Esq.  
19 Mar., 1869. continue. Then he afterwards discovered he could disprove your claim *in toto*. In consequence of the discoveries he made, stimulated by your refusal to receive reasonable compensation, the case went on, and the result was that he succeeded; the jury being of opinion that he had not trespassed at all.

596. Who is responsible for the issue of that second certificate—is it the draftsman or the Examiner?—If that certificate is wrong, who is responsible for it? If it is wrong to the prejudice of any one, the Act points out the remedy.

597. What particular officer of the department would be responsible? The Act will point out—I am not bound to.

598. I have a copy of the Act here. Will you be kind enough to point out in which clause the Act points to a particular officer? In the first place, I should say, if there is a misdescription it can be remedied under clause 126; and it would have been remedied in the first instance, if it had been a misdescription that would have affected the interests of any one; but as it was not, there was no cause to resort to any remedy. I think, before I answer this question, I ought to be acquainted with the nature of the error you assert existed.

599. The nature of the error I believe to have existed is that, in the first plan, the road is put 21 chains from the Parramatta River, and on the second certificate it is shifted to the other side of 21 chains 25 links? But then, be it so or be it not so, the delineation of that road does not affect anybody's rights or interests. It is equally open to them to resort to the Supreme Court to assert and enforce their rights, whatever they are, precisely as if the certificate had not issued. That being the case, there is an end of the question.

600. *Mr. Farnell.* Is it the fact that, in the second certificate, there is an area of land taken in—some chain of water frontage. That would increase the length of the line on that road? It does materially.

601. *Mr. Lyons.* I beg to call your attention to the fact that the second certificate clearly points out that the starting-point is high-water at Parramatta River, which does not appear in the first certificate. The first certificate states, 61 acres “commencing at Parramatta River at the north-west corner of Lyons’ Road. The second certificate says—“commencing at the north-west side of Lyons’ Road at its intersection with the high-water-mark of the Parramatta River”? The second may be more minute, because it is the result of the actual survey which you say ought to have been made before.

602. *Mr. Farnell.* Mr. Lyons has said something with reference to one description being given, in the first certificate of title issued to Mr. Wright, as starting at a point on Lyons’ Road—That is so? Yes.

603. The second certificate gives a description as starting from high-water-mark. In the first certificate it would not have been correct to have described it as starting from high-water-mark? Precisely.

604. If it had been described in the first certificate as starting from high-water-mark, it would not have been correct, as it would have included Crown land? Yes; that was purchased afterwards, at considerable expense, by Mr. Wright, from Government—nine acres.

605. *Mr. Lyons.* How do you account for the office not broaching that subject in their first correspondence on the matter? The attention of the draftsman was not called to it, I presume. It is not my department.

606. *Mr. Farnell.* You are the head of the department? I am, and I do not wish to evade any responsibility that belongs to me as head of the department; but, at the same time, if I am accused of improper motives, it will be proper for me to show in what degree my action in the matter is limited.

607. You would not be responsible for any error committed by the draftsman in his capacity as draftsman? I should say not, unless I had some means of control.

608. If any error, from want of knowledge or neglect on the part of the draftsman, were discovered, and it was made known to you, you would recommend that he should be dismissed, and that some other should be appointed? Yes, if the case were such as to require it. Do not, however, let it be understood that I attribute any error in this case. If I did, it would only be in reference to a gentleman now no longer alive.

609. The deed that was given in to the department in the first instance, for the purpose of obtaining a certificate of title for Mr. Wright, had a delineation on it? Had a delineation, and that was adopted by the department as the plan. In fact, the department has been subject to frequent complaints, on the ground that the parties applying for a certificate of title have been put to the expense of £10 or £20 for a survey. It was, therefore, not to be done hastily or inadvertently, without sufficient reason; and, I apprehend, the reason the plan on the deed was adopted as sufficient in this case was, that it was considered to be thoroughly settled between the parties themselves.

610. In the diagram given in the deed, Mr. Lyons is not, strictly speaking, an adjacent proprietor—the road divides the two proprietors? It was open to the applicant to regard him as not being so, because the road ran between; and not being so, he is not stated as the adjacent proprietor in the application. The form of application requires that the applicant shall state the names and addresses of the occupants and proprietors of all land contiguous to the land in respect to which the application is made. If this road had not been between, it would have been incumbent to have mentioned Mr. Lyons as contiguous proprietor; and, in the routine of the office, Mr. Lyons would have got a notice. This peculiarity of the case did not occur to my mind; so that, when Mr. Lyons complained to me, I said—“You got notice—this matter should have been settled before the application was complied with”; and I was considerably annoyed at first on discovering that Mr. Lyons had not notice, until it was explained that he was not a contiguous proprietor, and was not named in the application of Mr. Wright, and for that reason no special notice was sent to him.

611. The usual notices were inserted in the *Government Gazette* and the daily news-papers? Yes; and if Mr. Wright had inserted Mr. Lyons' name as contiguous proprietor, Mr. Lyons would have had a sketch sent to him. In fact, these sketches being sent to contiguous proprietors often lead to explanations that are satisfactorily dealt with before the certificate issues. G. K. Holden,  
Esq.  
19 Mar., 1869.

612. It is not the duty of your office to correct surveys; but when persons endeavour to bring land under the operation of the Act, if the department is not satisfied with the survey then presented, they may call upon the person to have a survey made by some surveyor licensed under the Act? Yes, in some cases we insist upon it; but this rule may be relaxed when it is shown that the deed surrendered contains an accurate description of the land; and here there was such a description, signed by both parties.

613. The object of the law is to facilitate the transfer of land? Yes.

614. *Mr. Lyons.*] Then, if the office accepted that sketch on the partition deed as accurate, were they not bound to accept the starting-point of the surveyor who made that plan? The plans are identical.

615. Then, if the office accepted that plan as an accurate sketch, would they not be bound to accept the starting-point taken by the surveyor who made that plan? They do accept it as far as they can.

616. *Mr. Farnell.*] If the plan were produced at the office, and the draftsman discovered any inaccuracy, he would advise the Examiner of Titles to that effect? He adopts the plan.

617. In this action between Mr. Lyons and Mr. Wright, you had nothing whatever to do with it, I presume? Nothing more than I have said already,—that I was inclined to persuade Mr. Wright to come to an amicable settlement if possible.

618. You did not advise with the firm of Messrs. M'Carthy, Donovan & Company, in the matter at all? Not in the least. Mr. M'Carthy called upon me once for information, and I gave it to him. Mr. Deane, Mr. Lyons' solicitor, called upon me for information, and I gave it to him. I did not utter a syllable in the presence of either one that the other might not have overheard. I gave all the information that would throw light upon the subject, both to Mr. Deane and to Mr. M'Carthy. I believe I expressed myself in the same terms to both.

619. You gave information as Examiner of Titles? Yes, information of which I was possessed in my official position, throwing light upon the subject; but the evidence elicited on the trial was elicited from surveys I had nothing to do with.

620. I believe Messrs. Lyons and Wright consented to have a survey made of this land? Yes, I believe they did. I took no part in the matter—I was desirous to see it settled, to prevent the trial.

621. The trial was subsequent to these surveys? Yes.

622. The evidence of the surveyor was taken at the trial? Yes.

623. The jury gave a verdict in favour of Mr. Wright? Yes. After hearing the evidence of the surveyor, showing that the road was on the original line as agreed upon between the two brothers.

624. And that Mr. Wright's wall was on the right position? Yes.

It was here signified to the witness that the Committee did not desire to put to him any further questions. Before withdrawing, he addressed the Committee as follows:—

I think I am entitled to make this observation:—My motives have been impugned, and I should like the Committee to state whether anything has transpired in the course of this inquiry upon which any possible imputation of improper motives could be founded with respect to anything I have done; and, if so, that the matter may be thoroughly investigated.

William Deane, Esq., examined:—

625. *Chairman.*] You are a solicitor of the Supreme Court of New South Wales? I am.

626. You were solicitor for the plaintiff in the case of Lyons v. Wright? Yes.

627. A case of a disputed road at Five Dock? Yes.

628. Do you produce the papers connected with that case? I produce the first agreement between Messrs. Wright and Lyons, signed by those two gentlemen, to submit the question to the arbitration of Messrs. Reuss and Huntley. (*The witness handed in the same. Vide Appendix E 1.*)

629. Can you tell the Committee what was the result of this reference to arbitration—Are they both licensed surveyors under the Land Titles Act? I am not certain whether Mr. Reuss is. Mr. Huntley is—I do not think Mr. Reuss is. The gentlemen made their award certifying that "the position of the reserved road dividing Mr. Wright's and Mr. Lyons' properties, according to the description furnished to us, to be on the north-eastern side of Mr. Wright's present wall."

630. That is to say, Mr. Wright's present wall entirely shut up that road? The same wall forms the south-western boundary of the side wall. I put in a copy, because the original is lost. (*The witness handed in the same. Vide Appendix E 2.*)

631. You are prepared to state that that is a correct copy of the original award? Yes. The original was produced at the trial, and admitted by the defendant. The original was lost at the trial.

632. *Mr. Lyons.*] The dispute was tried, and the verdict was given for the defendant? Yes.

633. A new trial was then applied for? A rule nisi was applied for and granted, amongst other grounds, upon the ground that the verdict was against evidence and against law.

W. Deane,  
Esq.  
19 Mar., 1869.

- W. Deane, Esq.  
19 Mar., 1869.
634. What is that document you now produce? The original rule *nisi*. (*The witness handed in the same. Vide Appendix E 3.*)
635. There were other grounds? There were other grounds.
636. While the new trial was pending, negotiations were entered into by the plaintiff with the defendant to settle the matter? Yes.
637. And it was ultimately settled by Mr. Wright paying £150? Yes, for the disputed road.
638. Which was conveyed to him? Yes.
639. Through your office? Acting on the part of Mr. Lyons, the conveyance of course being prepared by the purchaser's solicitor.
640. The original demand made upon Mr. Wright was £190? I think it was, but I am not certain.
641. Do you consider that verdict, the rule *nisi* having been given, was a decision on the matter? No, certainly not. A verdict is not conclusive until a judgment follows upon it.
642. There was no judgment in this case? There was no judgment, and there is no judgment now in this case.
643. In settling the matter, did you not understand that the plaintiff and defendant in that action had decided to close up the road altogether, by conveying to Mr. Wright—that the parties, both plaintiff and defendant, had decided that the road should be closed up altogether? I was under the impression, although it formed no part of the agreement. It was intimated at the time that Mr. Wright's object in purchasing was to close up the road, as he thought it unnecessary.
644. Have you had any experience of the Land Titles Office? Yes, I have brought several properties under the Land Titles Office.
645. Do you consider it rather an unusual thing for them, in dealing with Mr. Wright's second certificate of title, to shift the road? Without notice to any other party who was interested, I think very unusual.
646. If the road dividing the property of Samuel Lyons from that of George Lyons came into existence by grant from one brother to the other, for a money consideration, would you consider those parties contiguous proprietors—For instance, if the two brothers were to plan out a road, and each to contribute half the road, and then to convey these half roads, to form a road of 50 links, to each other, for a money consideration, should you consider them contiguous proprietors? Yes, I should; because the road belongs solely to themselves, and no other person has any right over it.
647. *Mr. Farnell.* Is not this decision of the Supreme Court final, until it is reversed by some other decision? No; a verdict in the Supreme Court is not final until it is followed by judgment, because a new trial is always liable to be granted, or the verdict reversed for plaintiff or defendant, as the full Court may decide.
648. Would it be competent for Mr. Lyons to proceed now and move for a new trial? No, in consequence of his having parted with his interest in the land in dispute.
649. The matter is finally settled? The matter is finally settled as between Mr. Lyons and Mr. Wright. Still, there is no judgment in the case, and never has been.
650. Do you know what area of land was conveyed in this case? I cannot remember now.
651. Do you remember the description of land and of the road conveyed? I am not prepared to say. I can only say that it was 50 links wide; but I do not know the length of the side lines.
652. Then, Mr. Samuel Lyons has conveyed to Mr. Wright the whole of this reserved road? Yes, the whole of this reserved road.
653. If Mr. George Lyons sold his share of the property, would not the party to whom he sold it be entitled to the use of this reserved road? Yes.
654. And the adjoining proprietor could not shut it up without he purchased his consent? Certainly not.
655. Then, to all intents and purposes, it would be a road dividing two proprietors, after the land had passed into the hands of strangers? Yes.
656. Then, in that case, they would be contiguous to the adjoining land? Still, the two proprietors would be the only persons who would have a right over the road. No other person would, if they chose to object.
657. If it were sold to a number of persons, each one of those persons would be entitled to use this road? Yes, each one; and to agree among themselves to exclude others.
658. We have had some evidence that this road is dedicated—Are you aware whether it is or not? I am quite certain it is not. It has not been dedicated; but I believe a public road has been dedicated alongside of it, but I am not very clear.
659. A public road has been proclaimed adjacent to this road? Yes.
660. Making the whole road one chain wide? Something of that kind.
661. Fifty links out of Mr. Samuel Lyons' property, and 50 links, a portion of this reserved road, it has been stated, has been conveyed to Mr. Wright? Something of that kind, I believe; but I am not very clear upon that point.

# LAND TITLES DEPARTMENT—MR. W. WRIGHT.

## APPENDIX.

(To Evidence given by Samuel Lyons, Esq., M.P., 2 March, 1869.)

### A 1.

Samuel Lyons, Esq., to The Registrar General.

Sydney, 227, George-street,  
24 October, 1865.

Sir,

On the 4th April, 1864, Mr. William Wright, of Drummoyne, Parramatta River, whose land adjoins my own, brought his property, bearing that name, under the Real Property Act; the description of his boundaries terminating with a proviso that 25 links of the said land should form part of a road, 50 links wide, which separates the two properties.

The deed of partition between my brother and myself, from which Mr. Wright derives his title, is endorsed with a conveyance to me of the said 25 links.

I desire to call your attention to the fact that neither the proviso nor the conveyance have been recognized by your office, and that the boundaries shown in the plan now exhibited there are incorrect.

I would be glad to know from you how this error is to be remedied, and by whom.

Awaiting your reply,—

I remain, &c.,  
SAMUEL LYONS.

### A 2.

The Deputy Registrar General to Samuel Lyons, Esq.

Registrar General's Department,  
Land Titles Branch,  
Sydney, 1 November, 1865.

Sir,

I have to acknowledge the receipt of your letter of the 28th ultimo, with reference to the property of Mr. William Wright, of Drummoyne, Parramatta River, the said property being under the provisions of the Real Property Act.

Your letter has been submitted to the Examiners of Titles; and they have advised the Registrar General that there is nothing in the certificate of title granted to Mr. Wright which can operate to the prejudice of your title to the adjacent land, which was allotted to you by the partition deed you refer to, or your right over the road thereby reserved between the two lots conveyed to you and to your brother, under whom Mr. Wright claims.

25 links are reserved out of each lot for a road; but you are in error in assuming that the 25 links within your brother's boundary was "conveyed" to you.

If this were true, 25 links of your land would have been conveyed to your brother, as the same language is employed in both cases.

The effect of the partition deed was to give to each a right of way over 25 links of each other's land, making together a road of 50 links wide.

Whether Mr. Wright has or has not trespassed on this road is a question the raising of which by you is not precluded in any way by the certificate, as no right of way (even if not mentioned) is thereby barred.—See section 40 of the Real Property Act.

Besides which, in the present case, the land of Mr. Wright, as described in his certificate, is bounded by a reserved road.

And even if there were any error which was not within the exception of section 40, Mr. Wright, as the original applicant, would remain liable to any person injured thereby.

For all these reasons, the Examiners of Titles are of opinion that no action of the Registrar General is required in the matter.

I am, &c.,  
E. G. WARD,  
Deputy Registrar General.

(To Evidence given by E. G. Ward, Esq., Deputy Registrar General, 2 March, 1869.)

### B 1.

#### CERTIFICATE OF TITLE.

(C.)

New South Wales.

Register Book, vol. IV, folio 175.

WILLIAM Wright of Drummoyne Parramatta River in the Colony of New South Wales Esquire is now seised of an estate in fee simple subject nevertheless to the reservations if any contained in the grant hereinafter referred to and also subject to such encumbrances liens and interests as are notified by memorial underwritten or endorsed hereon in that piece of land situated in the parish of Concord county of Cumberland and Colony aforesaid containing sixty-one acres or thereabouts Commencing on the Parramatta River at the north-west corner of Lyons' Road and bounded on the east by that road bearing southerly twenty-one chains to a reserved road fifty links wide on the south by that road bearing westerly to the Parramatta River and on the west and north by that river downwards to the point of commencement

commencement as shown on the plan hereon and therein edged red being part of one thousand five hundred acres in the district of York-place delineated in the public map of the said parish deposited in the office of the Surveyor General which were originally granted to John Harris by Crown grant dated the first day of January one thousand eight hundred and six.

In witness whereof I have hereunto signed my name and affixed my seal this fourth day of April one thousand eight hundred and sixty-four.

C.

FIVE DOCK ESTATE.

Geo. Lyons—61 acres.

COMMENCING at the north-west corner of Lyons' Road at the side of the Parramatta River and bounded towards the east by that road bearing S. 42° W. 21 chains towards the south-west by a line bearing N. 37° W. to the Parramatta River and on the north and north-east by the Parramatta River to the commencing point 25 links being reserved on the south-west side for the moiety of a road which is to separate the property of Geo. Lyons from that of S. Lyons.

(To Evidence given by R. D. Fitzgerald, Esq., 19 March, 1869.)

D.

Mr. Licensed Surveyor Huntley to the Surveyor General.

Bell's Chambers, 171, Pitt-street,  
Sydney, 1 June, 1868.

Sir,

In reply to your B.C., No. 68/4, dated May 20, 1868, I have the honor to place the following facts before you, for your consideration in this case:—

1. The road in question passes through lot 104 of the original subdivision of Harris' acres.
2. This lot 104 was left to two brothers, George Joseph and Samuel Lyons; and, in deed of partition, and also in separate descriptions of the two brothers' properties, provision is made for the before-named road.
3. G. J. Lyons being in England, S. Lyons, acting for self and brother, subdivided both properties; and on many lithographs still extant, this and many other roads are shown.
4. Mr. William Wright purchased the whole of G. J. Lyons' share of original lot, and erected a substantial stone wall along his boundary, on the lines shown by the pegs there placed by the surveyor employed by Mr. Samuel Lyons to subdivide both properties.
5. Some years after this, Mr. S. Lyons claimed compensation for the loss of the road said to be enclosed by Mr. Wright, which the latter gentleman resisted, and justly, as the verdict and judgment of the Supreme Court show.
6. It was proved during this trial, which occupied the Court during the 18th, 20th, and 21st February, 1867, that each held, exclusive of road as at present existing, 10 acres more ground than described, the difference between the two areas being only 7 perches; and moreover, the very pegs indicating the road, and placed there by Mr. Lyons, by his agent the surveyor, were found and identified.
7. A new trial being granted, Mr. Wright paid Mr. Lyons £120, and obtained from the Land Titles Office an amended title and description, on the diagram of which a road is shown throughout the entire length of Mr. Wright's southern wall.

I have, &c.,

A. S. HUNTLEY.

I have seen the copy of deed granted to Mr. Wright, at Land Titles Office; and, according to that deed, there is a road 50 links wide outside Mr. Wright's land.

It is for part of this road that Mr. S. Lyons claims compensation. As the question has been thus decided at the department referred to, where it was, I believe, thoroughly investigated, I cannot recommend any further compensation to Mr. Lyons.

25th June, 1868.

ROBT. D. FITZGERALD.  
(For Surveyor General.)

SAMUEL LYONS.  
17th Feb., 1866.

E 2.

COPY CERTIFICATE.

WE, the undersigned, hereby certify that we have ascertained the position of the reserved road dividing Mr. Wright's and Mr. Lyons' properties at Five Dock, according to the description furnished to us, to be on the north-eastern side of Mr. Wright's present wall, and that said wall forms the south-western boundary of said road.

Sydney, 19th March, 1866.

F. H. REUSS, Surveyor.  
A. S. HUNTLEY, C.E.

E 3.

In the Supreme Court of New South Wales.

Between Samuel Lyons, plaintiff, and William Wright, defendant.

Tuesday the fifth day of March, in the year of our Lord one thousand eight hundred and sixty-seven.

UPON hearing Sir William Montagu Manning of counsel for the plaintiff, it is ordered that the defendant do, upon notice of this rule nisi to be given to his attorney, show cause, upon the day fixed according to the practice of this Court for the hearing of New Trial Motions, why the verdict for the defendant should not be set aside and a new trial had between the parties, on the grounds following, that is to say :—

1. That the verdict was against the evidence and also against law, on the ground that the question depended solely on the deeds in evidence and on the length of line mentioned in those deeds.

2. That the Judge before whom the case was tried was in error in telling the jury that the award in evidence was not binding.

3. That his Honor was wrong in leaving to the jury any question as to estoppel, or as to any supposed admission or acquiescence by conduct of the plaintiff.

By the Court.

Messrs. Deane and Deane,  
Attorneys for plaintiff,  
104, Elizabeth-street.

D. B. HUTCHINSON,  
Prothonotary.

FILED copy hereof in the Supreme Court, and served copy thereof on M'Carthy, Son, & Donovan, by leaving same with Mr. M'Carthy, junr., at same time showing this original, this eighth day of March, A.D. 1867.

1868-9.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF  
THE LEGISLATIVE ASSEMBLY.

VOTES, No. 23. FRIDAY, 15 JANUARY, 1869.

3. Clifts' Coal Properties Leasing Bill ("*Formal*" *Motions*) :—
- (1.) Mr. Lee moved, pursuant to *Contingent Notice*, That so much of the Standing Orders be suspended as would prevent the Clifts' Coal Properties Leasing Bill being proceeded with.  
Question put and passed.
- (2.) Mr Lee then moved, pursuant to Notice,—
- (1.) That the Bill to enable William and Samuel Clift, of West Maitland, to grant Mining Leases, be referred to a Select Committee, for consideration and report.
- (2.) That such Committee consist of the following Members, viz. :—Mr. Piddington, Mr. J. Stewart, Mr. J. Campbell, Mr. Farnell, Mr. Dodds, Mr. Nowlan, Mr. Burns, and the Mover.  
Question put and passed.

VOTES, No. 26. THURSDAY, 21 JANUARY, 1869.

4. Clifts' Coal Properties Leasing Bill :—Mr. Lee, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this Bill was referred on 15th January, 1869.  
Ordered to be printed.

CLIFTS' COAL PROPERTIES LEASING BILL.

---

REPORT.

---

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on the 15th instant, "*the Bill to enable William and Samuel Clift, of West Maitland, to grant Mining Leases,*"—beg leave to report to your Honorable House,—

That they have examined the witness named in the margin,\* <sup>W. H. Mullen, Esq.</sup> (whose evidence will be found appended hereto); and that, the Preamble having been proved to the satisfaction of your Committee, by the evidence of this gentleman, they proceeded to consider the several clauses of the Bill, in which it was not deemed necessary to make any amendment.

And your Committee now beg leave to lay before your Honorable House the Bill without amendment.

BENJAMIN LEE,  
Chairman.

No. 3 Committee Room,  
Sydney, 20 January, 1869.

---

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 20 JANUARY, 1869.

MEMBERS PRESENT :—

Mr. Lee,           |           Mr. Burns,  
                          |           Mr. Farnell.

Mr. Lee called to the Chair.

Printed copies of the Bill *referred*,—together with the original Petition for leave to introduce the same,—before the Committee.

Present for the Promoters—W. H. Mullen, Esq., *Solicitor*.

William Henry Mullen, Esq., *Solicitor for the Bill*, called in and examined.

Witness *produced* a copy of the Will of the late S. Clift—and also a lease made by W. Clift in favour of Messrs. G. Vindin, and J. R. Mitchell, dated 23rd June, 1868.

Room cleared.

Committee deliberated.

Preamble read and considered.

Motion made (*Chairman*), and *Question*,—That this Preamble stand part of the Bill,—*agreed to.*

Mr. Mullen called in and informed.

Clauses 1 and 2 read and agreed to without amendment.

Schedules 1 and 2 read and agreed to without amendment.

Chairman requested to report the Bill without amendment to the House.

WITNESS.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

CLIFTS' COAL PROPERTIES LEASING BILL.

WEDNESDAY, 20 JANUARY, 1869.

Present:—

MR. LEE, | MR. BURNS,  
MR. FARNELL.

BENJAMIN LEE, ESQ., IN THE CHAIR.

William Henry Mullen, Esq., called in and examined:—

1. *Chairman.*] You are Solicitor for the Petitioners for this Bill, Messrs. William and Samuel Clift? Yes. W. H. Mullen,  
Esq.  
20 Jan., 1869.
2. The preamble of the Bill states that certain land has been devised to them, by the will of the late Samuel Clift, for their lives, and to their children, if any; and that the will does not contain the power of granting leases. Is that the case? It is. The will gives no power to grant leases beyond the lives of the devisees.
3. The preamble also sets forth that coal has been discovered on these lands. Is that the case? It is.
4. Have the coal mines been worked? They have, under a lease from Mr. Samuel Clift, granted during his life, which lease has expired.
5. Do you produce the will, or a copy of the will? I produce a copy of the will. (*Produced.*)
6. Is it an attested copy? It is a copy made in my office, from the original will, which I can swear to as correct.
7. Are you aware of the contents of the original will? Yes. The whole of the original will and codicils is in my handwriting.
8. Are you able to state, from your own knowledge, that no power to grant leases existed in the original will? Only for the life estate.
9. Would the fact of being enabled to grant longer leases for these lands be of advantage to the devisees? No doubt of it; and, in proof of that, I produce a lease which has been made by William Clift, in favour of Messrs. George Vindin and John R. Mitchell, for a period of fourteen years, subject to this Bill passing, dated 23rd June, 1868. (*Lease produced.*) I can state that, from the amount of money which is to be spent on the property, and the royalty to be received, its value will be enhanced, in my estimation, from (say) £50 to be worth £1,000.
10. No lease could be granted at present on such advantageous terms to the devisees? No. The parties taking the lease do not feel justified in spending the amount of money they will have to do, simply on the life estate; and, unless they can have the fourteen years' lease now proposed to be granted to them, they will not take the land. They will have to build engine-houses, sink new shafts, make a line of railway, and altogether expend about £20,000 on the land, before they can make it available to its full extent.
11. I see by the Bill you seek for powers to grant leases for twenty-one years? Yes.
12. Are you aware what is the age of the youngest child—Have both these parties children? William Clift's youngest child I believe to be about two years old. Samuel Clift is not married.

- W.H. Mullen, Esq.  
20 Jan., 1869.
13. The lease is for fourteen years? Yes.
  14. The interests of the children will not be damaged by the issue of these leases? No, because by getting power to give leases, the property will be enormously increased in value.
  15. Would the rights or interests of any party concerned be damaged? No, I think not; quite the contrary.
  16. *Mr. Burns.*] These lands, I believe, are close to the Great Northern Railway? It goes through them.
  17. These mines, then, would act as feeders to the railway? To a very great extent.
  18. Does any land intervene between the land where these mines are and the railway? No, the lands adjoin the railway.
  19. You are not aware of any opposition to this Bill? None whatever.
  20. Of course, regular notice of the intention to apply for the Bill has been given in the papers? Yes, it has been given twice. In the first place Mrs. Parnell's name was included in the first Bill, but after the notice had been given, Mr. Parnell did not care about his land being included, and then fresh notice was given in the name only of William and Samuel Clift.
  21. *Chairman.*] Are you aware of any petitions or objections, on the part of any person, after the publication of these notices? None whatever.
  22. *Mr. Burns.*] The effect of the Bill will be to enhance the value of the property to all parties concerned? No doubt of it.
  23. *Mr. Farnell.*] Is there any one interested in this property except Samuel and William Clift? They have a life interest under the will, and after their decease it goes to their children. All they can do now, is to grant leases for their lives; but the gentlemen who propose to take the lease require to be secured in the event of their decease, as they intend spending a very large amount of money.
  24. The fact of Samuel and William Clift not being able to give leases for a certain time, makes it necessary to bring in a Bill to protect the persons who may lease the land from them? Yes, that is the object of the Bill.
  25. And if the objects of the Bill are carried out, it will eventually benefit the children of William and Samuel Clift? Yes, to a wonderful extent. It will make land which is now useless very valuable.
  26. Unless this Bill be passed, William and Samuel Clift will not be able to lease this land, or have it improved, from the fact of the tenure being uncertain to the lessees? Exactly so.
  27. This is not, strictly speaking, an entailed property? It is not, but it is left in such a way that it is quite impossible the land can be made any use of except as grazing land.
  28. How is Mr. Parnell interested? Mrs. Parnell is Mr. Clift's sister, and this property was divided among the three of them, by the will of the late Mr. Samuel Clift. From mistaken economy, Mr. Clift introduced Mrs. Parnell's name into the first Bill; but after the notices were published, Mr. Parnell said he felt annoyed at the name being introduced without his sanction; it was therefore withdrawn, and fresh notices given for the present Bill.
  29. *Mr. Burns.*] Mr. Parnell has no interest in the land referred to in this Bill? No.
  30. *Chairman.*] As I understand you, it was at first intended to ask for general powers as far as the family were concerned? Yes.
  31. Now it is intended to be confined to the persons named in the Bill? Yes.
  32. *Mr. Farnell.*] Even if Mrs. Parnell had a very remote interest in this property, as one of the family to whom it might descend, it would be an advantage to her that such a Bill should be passed; that is, on the supposition that both the Messrs. Clift and their children were to die? It is not very likely that she will ever have an interest in the land. William Clift has nine children. I do not know whether it is necessary to prove the death of the late Mr. Samuel Clift, but I can state myself that his death took place on the 19th July, 1862.
  33. *Chairman.*] And he did not revoke or alter his will? No. The will was made a very few hours before he died.

1868.

## NEW SOUTH WALES.

## AUSTRALIAN MUSEUM.

(REPORT FROM TRUSTEES FOR 1867.)

Presented to Parliament, pursuant to Act 17 Vict., No. 2, Sec. 9.

REPORT OF THE TRUSTEES OF THE AUSTRALIAN MUSEUM, FOR THE  
YEAR ENDING 31st OF DECEMBER, 1867.To HIS EXCELLENCY THE GOVERNOR-IN-CHIEF,  
&c., &c., &c.

1. The Trustees of the Australian Museum have the honor to submit to Your Excellency this their Fourteenth Annual Report.

2. The Museum has been open to the public daily (Sundays excepted) during the past year, and has been visited by 83,610 persons.

3. The system of exchanging specimens of natural history with the principal Foreign Museums is still maintained by the Trustees, who have received several valuable collections during the past year, a list of which is appended. (*Appendix No. 2.*)

4. Numerous donations have been received during the year, a list of which is appended. (*Appendix No. 3.*)

5. In Appendix No. 4 will be found a list of the various objects sent in exchange, together with the names of the recipients.

6. Several valuable works, purchased out of the Endowment Fund, have been added to the Museum Library, a list of which is appended. (*Appendix No. 5.*)

7. Three experienced Taxidermists have been occupied during the year in preparing and mounting the following specimens:—

54 mammals,

143 birds,

10 reptiles,

23 skeletons of mammals and birds,—

and in cleaning, and preserving from decay, the collection already displayed for public inspection.

8. The Trustees have to record the re-election, as a Member of their Board, of Alexander Walker Scott, Esq., M.A.

9. The Trustees have to report that the work of forming a Catalogue of the Specimens in the Museum is still carried on, and that the part containing the Geological and Mineralogical Collection is ready for the press. They wish also to draw attention to paragraph 9 of last year's Report, stating that the first edition of the Catalogue was out of print, and that a second enlarged edition was urgently required. It would be very desirable to print such portions of the Catalogue as may be finished from time to time—in particular, the List of Minerals, Fossils, and Geological Specimens,

which would be of great assistance to persons interested in mining. The very limited sum placed at the command of the Trustees prevents them from carrying out this plan, and they suggest that application be renewed to the Government to have the Catalogue printed at the Government Printing Office free of expense.

10. The sum of £1,000 (one thousand pounds) voted by the Legislature will shortly be due to the contractor, for cabinets erected in the two north rooms on the ground floor; and a further sum of £1,000 (one thousand pounds) will be required to supply cases for the south rooms.

11. The first floor has been partly fitted up with cabinets, &c., for which a sum of £300 (three hundred pounds) was advanced from the Endowment Fund; so that the building was opened to the public during the Christmas holidays, when more than 10,000 (ten thousand) visitors passed through the Museum.

The space which the collection now occupies is more than twice the size of the old building; and to keep so large an addition clean and in repair, it will be necessary to provide additional funds.

12. The Trustees desire to point out the necessity of providing workshops for the taxidermists and carpenters outside the building, and of erecting quarters for the messenger.

13. Mr. George Masters, the Assistant Curator, has visited Tasmania, and collected a large number of valuable specimens; so that the Fauna of that Island is now well represented in the Museum. A list of the collections thus made during the year is appended. (*Appendix No. 6.*)

14. Appendix No. 1 contains an abstract of the receipts and payments of the Trustees on behalf of the Museum, for the year ending 31st December, 1867.

15. Appendix No. 2 contains a list of the specimens received in exchange.

16. Appendix No. 3 contains a list of the various donations during the year, with the names of the donors.

17. Appendix No. 4 contains a list of the specimens sent in exchange to various persons and institutions.

18. Appendix No. 5 contains a list of the books purchased for the Museum Library.

19. Appendix No. 6 contains a list of the specimens collected by Mr. George Masters, Assistant Curator.

20. The Trustees have the honor to submit this their Report for the year 1867; and, in testimony thereof, have caused their corporate Seal to be hereunto affixed, this 7th day of September, 1868.

(L.S.) W. B. CLARKE,  
Chairman.

By order of the Board of Trustees,—

GERARD KREFFT,  
Curator and Secretary.

<i>Hirundo daurica</i> .....	4	<i>Anser cinereus</i> .....	2
<i>Thamnobia cambaiensis</i> .....	2	<i>Oreocincla dauma</i> .....	2
<i>Passer indicus</i> .....	2	<i>Vanellus cristatus</i> .....	1
<i>Passer flavicollis</i> .....	2	<i>Melophus melanicterus</i> .....	1

## LIST OF BIRDS' EGGS RECEIVED FROM MR. C. BAUMEISTER, OF SACHSENRIED, BAVARIA.

<i>Aquila albicilla</i> .....	1	<i>Regulus flavicapillus</i> .....	2
<i>Falco buteo</i> .....	13	<i>Cinclus aquaticus</i> .....	1
<i>Buteo lagopus</i> .....	1	<i>Motacilla alba</i> .....	18
<i>Pernis apivorus</i> .....	1	<i>Motacilla sulphurea</i> .....	5
<i>Astur palumbarius</i> .....	2	<i>Anthus pratensis</i> .....	3
<i>Astur nisus</i> .....	5	<i>Anthus arboreus</i> .....	5
<i>Milvus regalis</i> .....	1	<i>Emberiza militaria</i> .....	2
<i>Milvus ater</i> .....	1	<i>Emberiza citrinella</i> .....	12
<i>Falco cenchris</i> .....	1	<i>Alauda arvensis</i> .....	7
<i>Falco tinunculus</i> .....	3	<i>Fringilla coelebs</i> .....	12
<i>Strix scops</i> .....	1	<i>Fringilla domestica</i> .....	16
<i>Lanius rufus</i> .....	3	<i>Fringilla montana</i> .....	5
<i>Lanius excubitor</i> .....	5	<i>Fringilla chloris</i> .....	10
<i>Lanius collurio</i> .....	25	<i>Parus palustris</i> .....	5
<i>Pica varia</i> .....	6	<i>Parus ater</i> .....	12
<i>Corvus glandarius</i> .....	6	<i>Parus major</i> .....	24
<i>Corvus cornix</i> .....	1	<i>Parus oerulens</i> .....	9
<i>Corvus corone</i> .....	5	<i>Certhia familiaris</i> .....	24
<i>Corvus frugilegus</i> .....	1	<i>Troglodytes parvulus</i> .....	12
<i>Corvus monedula</i> .....	3	<i>Hirundo riparia</i> .....	8
<i>Oriolus galbula</i> .....	4	<i>Hirundo urbica</i> .....	8
<i>Turdus viscivorus</i> .....	7	<i>Hirundo rustica</i> .....	10
<i>Turdus musicus</i> .....	10	<i>Coracias garrula</i> .....	2
<i>Turdus iliacus</i> .....	1	<i>Alcedo isipida</i> .....	1
<i>Turdus torquatus</i> .....	2	<i>Picus canus</i> .....	5
<i>Turdus merula</i> .....	14	<i>Picus martius</i> .....	1
<i>Saxicola rubetra</i> .....	4	<i>Picus medius</i> .....	2
<i>Sylvia tithys</i> .....	5	<i>Picus major</i> .....	12
<i>Sylvia phoenicurus</i> .....	11	<i>Columba aenea</i> .....	3
<i>Sylvia rubecula</i> .....	12	<i>Columba palumbus</i> .....	2
<i>Sylvia rufa</i> .....	9	<i>Tetrao tetrix</i> .....	1
<i>Sylvia trochilus</i> .....	3	<i>Perdix saxatilis</i> .....	1
<i>Sylvia sibilatrix</i> .....	2	<i>Perdix coturnix</i> .....	3
<i>Strix otus</i> .....	1	<i>Scolopax rusticola</i> .....	2
<i>Sylvia nisoria</i> .....	2	<i>Scolopax gallinago</i> .....	1
<i>Sylvia hortensis</i> .....	4	<i>Totanus calidris</i> .....	2

## BIRDS' EGGS—continued.

Totanus hypoleucus .....	5	Larus tridactylus .....	1
Tringa pugnax .....	1	Anas crecca .....	2
Hematopus ostralegus .....	2	Anas mollissima .....	1
Charadrius pluvialis .....	1	Anas tadorna .....	1
Charadrius minor .....	2	Anas penelope .....	2
Vanellus cristatus .....	8	Podiceps cristatus .....	2
Streptopelia interpres .....	1	Mormon fratercula .....	1
Circus cinerea .....	1	Numenius arquatus .....	1
Falco tinnunculus .....	1	Perdix cinerea .....	2
Gallinula porzana .....	2	Alca torda .....	1
Gallinula chloropus .....	8	Strix aluco .....	1
Fulica atra .....	4	Larus melanocephalus .....	1
Lestris catarrhactes .....	1	Corvus corax .....	1
Sterna nigra .....	2	Podiceps minor .....	2
Sterna hirundo .....	40	Sitta casia .....	1
Sterna anglica .....	40	Sylvia atricapilla .....	2
Sterna minuta .....	3	Sylvia .....	1
Larus ridibundus .....	5	Sturnus vulgaris .....	12

Australian Museum,  
Sydney, 7 September, 1868.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 3.

## DONATIONS TO THE AUSTRALIAN MUSEUM, DURING THE YEAR 1867.

## MAMMALIA.

	PRESENTED BY
A Dasyurus ( <i>Dasyurus viverrinus</i> ) .....	Mr. M'Intosh.
A Rat ( <i>Hoplotis</i> ) .....	Mr. R. D. Fitzgerald.
A small Pony ( <i>Equus caballus</i> ) .....	Mr. Burt.
A Black Wallaroo ( <i>Orphanter robustus</i> ) .....	Mr. Ed. S. Hill.
A Water Rat ( <i>Hydromys leucogaster</i> ) .....	Mr. J. Lemon.
A Tree Rat ( <i>Hoplotis arboricola</i> ) .....	Mr. F. Lemon.
A Dasyurus ( <i>Dasyurus viverrinus</i> ) .....	Mr. M'Intosh.
A Flying Fox ( <i>Pteropus poliocephalus</i> ) .....	Mr. Ed. S. Hill.
A Black Wallaby ( <i>Halmaturus ualabatus</i> ) .....	From Botanical Gardens.
A Ring-tailed Opossum ( <i>Phalangista cookii</i> ) .....	
A Dasyurus ( <i>Dasyurus maculatus</i> ) .....	Dr. Ward.
A Water Rat ( <i>Hydromys leucogaster</i> ) .....	Mr. B. P. Rodd.
A large Bloodhound .....	Mr. Thos. Allen.
A Perameles ( <i>Perameles nasuta</i> ) .....	Mr. Ed. Hill.
A Flying Squirrel—white variety .....	Mr. J. W. Edwards.
A Flying Squirrel ( <i>Belideus breviceps</i> ) .....	Mr. J. E. Fassnidge.
A Porcupine Ant-eater ( <i>Echidna hystrix</i> ) .....	From Manly Beach.
A Porcupine Ant-eater ( <i>Echidna hystrix</i> ) .....	Mr. R. S. Watson.
Two Wallabys ( <i>Halmaturus ualabatus</i> ) .....	From Botanical Gardens.
A Dasyurus ( <i>Dasyurus viverrinus</i> ) .....	Mr. Dumaresq.
A Tasmanian Tiger ( <i>Thylacinus cynocephalus</i> ) .....	Mrs. J. C. Cox.
Two Skulls of Australian Aborigines .....	Mr. W. Allen.

## BIRDS.

Four Ducks ( <i>Spatula rhyncotis</i> , <i>Malacorynchus membranaceus</i> ) and an Ibis ( <i>Geronticus epincollis</i> ) .....	Mr. Josephson.
A collection of Parrots and Finches from Queensland .....	Mr. E. Eastway.
A Cassowary ( <i>Casuarius johnsonii</i> ) .....	Mr. J. R. Johnson.
A Pheasant .....	By the Council of the Acclimatisation Society, and from the Botanical Gardens.
An Adjutant Bird .....	
A Common Pheasant .....	
A Lemur .....	
A Parrot .....	
A pair of Soemmering Pheasants .....	
Four Mandarin Ducks .....	
A Bustard ( <i>Eupodotis australis</i> ) .....	
A Parrot .....	
A Lyre Bird .....	
A Cockatoo .....	Mr. J. Ellery.
A Goatsucker .....	
An Indian Stork .....	
Two Pheasants .....	
A Duck ( <i>Anas superciliosa</i> ) .....	
A Fishing Eagle ( <i>Ichthyæus leucogaster</i> ) .....	
An Owl ( <i>Athene connivens</i> ) .....	
A Parrakeet ( <i>Melopsittacus undulatus</i> ) .....	
A Pelican ( <i>Pelecanus conspicillatus</i> ) .....	
A Musk Duck ( <i>Biziura lobata</i> ) .....	
A Parrakeet .....	Mrs. E. Whitfield.
Five Australian Ducks ( <i>Spatula rhyncotis</i> , and <i>Malacorynchus membranaceus</i> ) .....	
A Canary .....	
A Black-necked Ibis ( <i>Threskiornis strictipennis</i> ) .....	
Two Hawks ( <i>Astur nova-hollandiae</i> from Queensland, and ( <i>Buza sub-cristata</i> ) .....	
Ten Birds' Nests .....	
Two Birds ( <i>Dicaeum hirundinaceum</i> ) .....	
A Parrakeet ( <i>Platycercus eximius</i> ) .....	
An Apteryx ( <i>Apteryx australis</i> ) .....	
A rare variety of the Domestic Pigeon .....	

Mr. W. H. Barnett.  
Mr. R. Houston.  
Mr. H. Emberson.  
Mr. E. Dunn.  
Mr. E. S. Hill.  
Mr. Sallett.  
Dr. Geo. Bennett.  
Mr. M'Carthy.

## BIRDS—continued.

A Quail .....	PRESENTED BY His Excellency Sir John Young, Bart., K.C.B.
A Hawk ( <i>Hieracidea occidentalis</i> ).....	} Master Blaxland.
A Honey-eater ( <i>Ptilotis</i> ) .....	
A Parrot ( <i>Psittacus</i> ) .....	Miss Wyatt.
Nests and Eggs of Australian Birds .....	Mr. E. Dunn.
A collection of Eggs—Australian Birds .....	Mr. W. Allen.

## REPTILES.

A Tree Snake ( <i>Dendrophis punctulata</i> ).....	Mr. B. C. Rodd.
A Collection of Reptiles from Hunter's Hill .....	Mr. J. Seymour.
A Banded Snake ( <i>Vermicella annulata</i> ) .....	Mr. J. Cook.
A Diamond Snake ( <i>Morelia spilotes</i> ) .....	Mr. Burt.
A Snake ( <i>Diemenia psammophis</i> ) .....	Mr. G. Fitzhardinge.
A Black and White Banded Snake ( <i>Vermicella annulata</i> ).....	Mr. S. Woodroffe.
Four Australian Reptiles (Lizards) .....	Mr. E. Dunn.
A Sea Snake.....	Mr. G. Strong.
A Diamond Snake ( <i>Morelia spilotes</i> ) .....	Mr. M. Clarke.
A Black Snake ( <i>Pseudechis porphyriacus</i> ) .....	Mr. Creeg.
A Collection of Reptiles.....	Mr. J. F. Josephson.
A Lizard ( <i>Grammatophora barbata</i> ).....	Mr. F. R. Firth.
A Black Snake ( <i>Pseudechis porphyriacus</i> ) .....	Mr. J. E. Fassnidge.
A Lizard ( <i>Hinulia whitei</i> ).....	Mr. J. L. Dole.
A Small Ring Snake ( <i>Vermicella annulata</i> ).....	Mr. W. C. Shorland.
A Collection of Lizards' Eggs.....	Mr. J. S. Bray.
A Sleeping Lizard ( <i>Cyclodus gigas</i> ).....	Mr. Bradley.
A Sleeping Lizard ( <i>Cyclodus gigas</i> ).....	Mr. W. Davison.
A Lizard ( <i>Hydrosaurus varius</i> ).....	Mr. J. Crossley.
A Brown Snake ( <i>Diemenia superciliosa</i> ) .....	Mr. J. B. Holdsworth.
A Lace Lizard ( <i>Hydrosaurus varius</i> ) .....	Mr. Thos. Patterson.
Four Lizards ( <i>Hinulia</i> ) .....	Mr. S. Pierce.
A Lizard ( <i>Phyllurus</i> ) .....	Mr. A. W. Scott, M.A.

## FISHES.

A young Angel Shark.....	Mr. L. Assenheim.
A Fish ( <i>Pricanthus</i> ) .....	Mr. W. Buchanan.
A Silver Eel ( <i>Muraena</i> ) .....	Mr. J. Islay.
A Fish .....	Mr. W. Emlyn.
A Fish ( <i>Pricanthus</i> ) .....	Mr. E. Lander.
A Fish .....	Captain Geo. Banks.
A Fish ( <i>Caranx</i> ).....	Mr. John Hubaw.
A Fish ( <i>Pricanthus</i> ) .....	Mr. W. Macleay, M.L.A., F.L.S.
A Shark ( <i>Carcharias</i> ).....	Mr. Ed. Seymour.
A Fish ( <i>Serranus</i> ).....	Mr. J. S. Andrews.
Two rare Fishes ( <i>Fistularia</i> ).....	Mr. F. O'Brien.
A Fish ( <i>Pricanthus</i> ) .....	Mr. G. H. Jones.
A Shark ( <i>Carcharias</i> ).....	Mr. Dobson.
A Fish ( <i>Batrachus</i> ).....	Mr. Hargraves.
A Shark ( <i>Squatina vulgaris</i> ) .....	Mr. Fitzhardinge.
A Fish ( <i>Diodon</i> ) .....	Mr. Centy.
Two Golden Carp ( <i>Cyprinus aurantius</i> ) .....	Mrs. Harrison.
Two Fishes ( <i>Centropristis</i> ).....	Mrs. Harrison.
A Golden Carp ( <i>Cyprinus aurantius</i> ) .....	Mr. G. Sirkitt.
A Golden Carp ( <i>Cyprinus aurantius</i> ) .....	Mrs. J. Gorruck.
Jaw of a Shark ( <i>Carcharias</i> ).....	Mrs. W. Wright.
A Fish ( <i>Centropogon</i> ).....	Mr. J. Duffy.
A Port Jackson Fish ( <i>Julis</i> ).....	Mr. E. Dunn.
A Golden Carp ( <i>Cyprinus aurantius</i> ) .....	Mr. L. Hordern.

## MOLLUSCS.

A Collection of Shells.....	Mrs. Dido.
A Shell ( <i>Tridacna</i> ).....	Captain Fairclough.
A Collection of Shells.....	Mr. W. Allen.
A Nudibranchiate Mollusc.....	Mr. L. Hordern.
A Collection of Shells.....	Mr. J. Brazier.

## INSECTS.

A Phasma.....	Captain Fairclough.
A Phasma.....	Mr. D. D. Rutledge.
Three Beetles .....	Mr. Fassnidge.
A Phasma.....	Mr. R. Cooper.

## RADIATED ANIMALS.

A piece of Coral .....	Mr. Higginbotham.
------------------------	-------------------

## POLYPL.

A Species of Pennatula .....	Mr. H. B. Dobson.
A Sea Feather ( <i>Pennatula</i> ) .....	Mr. J. Brazier.

## GEOLOGY AND MINERALOGY.

A piece of Copper Ore .....	Dr. George Bennett.
The Ear-bone of a Fossil Whale, from East Suffolk .....	Mr. J. A. Edwards.
A Collection of Fossils .....	Mr. J. Wallis.
Two fossil teeth of a species of Shark .....	Mr. J. Brazier.
A piece of a tusk of an extinct Elephant (probably <i>Elephas primigenius</i> ) .....	Captain Crook.
A fossil Shell .....	Mr. G. R. Drovers.
A specimen of Quartz.....	Mr. R. A. Catter.
Specimens of Silver and Copper Ore from the Burnett District .....	Mr. G. Walker.

## AUSTRALIAN MUSEUM.

7

## ETHNOGRAPHICAL SPECIMENS.

## PRESENTED BY

A Fiji man's Wig .....	Mr. J. Harman.
A gigantic Feasting Bowl, and a Collection of Weapons and Implements from the South Sea Islands .....	Mr. Thos. Brown.
Two Carved Ornaments .....	Captain J. W. Clarke.
A Seal-gut Jacket .....	Mr. V. Dowling.
Two Stone Implements from the Paroo .....	

## COINS.

A Collection of Silver and Copper Coins.....	Mr. Delarue.
--	--------------

## MISCELLANEOUS.

The Model of a Church .....	Mr. W. H. Cross.
Samples of Silk .....	Miss M. H. Moore.

Australian Museum,  
Sydney, 7 September, 1868.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 4.

LIST OF SPECIMENS SENT IN EXCHANGE TO VARIOUS INSTITUTIONS,  
DURING THE YEAR 1867.

*To the Institute Museum, Adelaide.*

## MAMMALS.

<i>Halmaturus bennettii</i> .....	1	<i>Perameles gunnii</i> .....	1
<i>Halmaturus billardieri</i> .....	1	<i>Phascolumys wombat</i> .....	1
<i>Bettongia cuniculus</i> .....	1	<i>Sarcophilus ursinus</i> .....	1
<i>Phalangeria fuliginosa</i> .....	1	<i>Thylacinus cynocephalus</i> (skull) .....	1

## BIRDS.

<i>Alcyon diemenensis</i> .....	1	<i>Calamanthus fuliginosus</i> .....	1
<i>Pardalotus affinis</i> .....	2	<i>Ptilotis flavigula</i> .....	1
<i>Gymnorhina organica</i> .....	1	<i>Anthochaera insularis</i> .....	1
<i>Graucalus parvirostris</i> .....	1	<i>Acanthorhynchus dubius</i> .....	1
<i>Colluricincla selbii</i> .....	1	<i>Melithroptus melanoccephalus</i> .....	2
<i>Petroica fusca</i> .....	2	<i>Platycercus flaviventris</i> .....	1
<i>Malurus longicaudus</i> .....	2	<i>Tribonyx mortieri</i> .....	1
<i>Acanthiza diemenensis</i> .....	2		

## INSECTS.

Species .....	37	Specimens .....	73
---------------	----	-----------------	----

*To the Government Museum at Christchurch, New Zealand.*

## BIRDS.

<i>Astur approximans</i> .....	1	<i>Pomatorhinus temporalis</i> .....	1
<i>Astur novæ-hollandiæ</i> .....	1	<i>Ptilotis chrysostis</i> .....	1
<i>Jeracides berigora</i> .....	1	<i>Ptilotis chrysops</i> .....	1
<i>Podargus humeralis</i> .....	1	<i>Ptilotis plumulus</i> .....	1
<i>Eurystomus australis</i> .....	1	<i>Ptilotis auricomis</i> .....	1
<i>Haleyon macleayi</i> .....	1	<i>Xanthomyza phrygia</i> .....	1
<i>Artamus leucopygialis</i> .....	1	<i>Anthochaera carunculata</i> .....	1
<i>Pardalotus punctatus</i> .....	2	<i>Myzomela sanguinolenta</i> .....	1
<i>Cracticus nigrogularis</i> .....	1	<i>Entomyza cyanotis</i> .....	1
<i>Graucalus hypoleucos</i> .....	1	<i>Dicaeum hirundinaceum</i> .....	1
<i>Campephaga karu</i> .....	1	<i>Climacteris scandens</i> .....	1
<i>Pachycephala gutturalis</i> .....	1	<i>Scythrops novæ-hollandiæ</i> .....	1
<i>Colluricincla rufogaster</i> .....	1	<i>Eudynamys flindersii</i> .....	1
<i>Dicrurus bracteatus</i> .....	1	<i>Calyptorhynchus funereus</i> .....	1
<i>Gerygone albogularis</i> .....	2	<i>Aprosmictus scapulatus</i> .....	1
<i>Petroica multicolor</i> .....	1	<i>Platycercus palliceps</i> .....	1
<i>Petroica bicolor</i> .....	1	<i>Platycercus barnardii</i> .....	1
<i>Psophodes crepitans</i> .....	1	<i>Trichoglossus concinnus</i> .....	1
<i>Malurus lambertii</i> .....	1	<i>Melopsittacus undulatus</i> .....	1
<i>Malurus melanoccephalus</i> .....	1	<i>Ptilinopus swainsonii</i> .....	1
<i>Anthus-australis</i> .....	1	<i>Geopelia humeralis</i> .....	1
<i>Sphaeneacus galactotes</i> .....	1	<i>Geopelia cuneata</i> .....	1
<i>Estrela temporalis</i> .....	1	<i>Phaps chalconotera</i> .....	1
<i>Donacola castaneothorax</i> .....	1	<i>Turnix melanogaster</i> .....	1
<i>Pitta strepitans</i> .....	1	<i>Hiaticula ruficapilla</i> .....	1
<i>Cinclosoma punctatum</i> .....	1	<i>Rallus pectoralis</i> .....	1
<i>Oreocincla lunulata</i> .....	1	<i>Scolopax australis</i> .....	1
<i>Chlamydera maculata</i> .....	1	<i>Tribonyx mortieri</i> .....	1
<i>Sericulus chrysocephalus</i> .....	1	<i>Ardea novæ-hollandiæ</i> .....	1

## SHELLS.

13 species. | 40 specimens.

## INSECTS.

62 species. | 112 specimens.

To Allan Hume, Esq., C.B., Agra.

## BIRDS.

Climacteris scandens	3	Myzomela sanguinolenta	2
Climacteris picumnus	2	Petroica goodenovii	2
Sittella chrysoptera	4	Artamus sordidus	2
Cuculus cinereus	4	Sittella leucocephala	1
Meliphaga novæ-hollandiæ	4	Calamanthus campestris	1
Meliphaga australasiana	3	Campephaga humeralis	2
Ptilotis auricomis	4	Glyciphila fulvifrons	2
Ptilotis chrysops	3	Malurus cyaneus	1
Ptilotis fusca	2	Meliphaga sericea	1
Anthus australis	3	Melithreptus cruralis	1
Pardalotus punctatus	3	Xerophila leucopsis	2
Falcunculus frontatus	3	Rhipidura motacilloides	2
Acanthorhynchus tenuirostris	3	Artamus leucopygialis	1
Cinclosoma punctatum	3	Pelecanus conspicillatus	1
Chthonicola minima	3	Crysococcyx lucidus	2
Eopsaltria australis	3	Myiagra plumbea	1
Acanthiza nana	2	Zosterops dorsalis	1
Pomatorhinus temporalis	1	Hiaticula ruficapilla	4
Pomatorhinus ruficeps	1	Hiaticula monacha	1
Pomatorhinus superciliosus	2	Schœnielus albescent	2
Pachycephala olivacea	1	Gerygone albogularis	2
Graucalus melanops	1	Seisura inquieta	1
Graucalus hypoleucos	1	Pachycephala gutturalis	3
Acanthylis caudacuta	2	Amadina castanotis	2
Acanthorhynchus superciliosus	2	Donacola castaneothorax	2
Anthochæra lunulata	3	Amadina modesta	1
Rhipidura albiscapa	1	Smicronis brevirostris	1
Porzana fluminea	1	Acanthiza lineata	1
Porzana immaculata	1	Ptilotis leucotis	1
Platalea flavipes	1	Hylacola pyrrhopygia	1
Poephila cineta	1	Syncoicus australis	1
Ptilotis chrysotis	1	Sericornis humilis	1
Eurystomus australis	1	Merops ornatus	1
Melopsittacus undulatus	1	Sarcophorus pectoralis	1
Syncoicus diemenensis	2	Platycercus eximius	3
Corvus coronoides	1	Platycercus flaviventris	3
Strepera arguta	1	Platycercus bernardii	2
Calyptrorhynchus xanthonotus	1	Trichoglossus concinnus	3
Anthochæra inauris	1	Trichoglossus pusillus	1
Scolopax australis	1	Polyteles melanura	1
Tribonyx mortierii	2	Polyteles barrabandii	1
Jeracidea berigora	4	Petroica fusca	1
Falco frontatus	2	Estrela bella	2
Astur approximans	3	Petroica phœnicea	2
Botaurus australis	1	Acanthiza chrysorrhœa	2
Spatula rhynchotis	2	Ptilotis flavigula	2
Malacorhynchus membranaceus	1	Pachycephala glaucura	2
Menura superba	1	Accipiter torquatus	1
Nycticorax caledonicus	2	Corcorax leucopterus	1
Podiceps gularis	2	Elanus axillaris	2
Chlamydera nuchalis	1	Gymnorhina tibicen	1
Haliastur spheurnus	1	Biziura lobata	1
Haliastur leucosternus	1	Milvus affinis	1
Tadorna radjah	2	Megapodius tumulus	1
Falco melanogenys	1	Strepera anaphonensis	1
Nymphicus novæ-hollandiæ	1	Eudynamys flindersii	1
Geopelia humeralis	1	Podiceps poliocephalus	1
Astur novæ-hollandiæ	2	Callocephalon galeatum	1
Athene connivens	2	Ptilonorhynchus holosericeus	1
Elanus scriptus	2	Porphyrio melanotus	1
Jeracidea occidentalis	2	Thalasseus poliocercus	1
Strix delicatulus	2	Hœmatopus longirostris	1
Platalea regia	1	Lobivanellus lobatus	2
Petroica bicolor	4	Glottis glottoides	2
Petroica multicolor	4	Astur cruentus	2
Colluricincla harmonica	2	Astur novæ-hollandiæ	1
Acanthogenys rufogularis	1	Strix castanops	1
Grallina australis	1	Aquila fucosa	1
Xanthomyza phrygia	4	Podargus humeralis	1
Pachycephala pectoralis	2	Cacatua leadbeateri	1
Tropidorhynchus corniculatus	1	Herodias symmatophorus	1
Stipiturus malachurus	1	Ardea novæ-hollandiæ	2
Microeca macroptera	1	Bernicla jubata	1
Myzantha garrula	2	Ardeita flavicollis	1
Anthochæra carunculata	2	Plotus novæ-hollandiæ	1
Phaps chalcoptera	2	Phalacrocorax carboideus	1
Meliphaga longirostris	1	Anseranas melanoleuca	1
Pardalotus affinis	2	Cygnus atratus	1
Diæaum hirundinaceum	2	Geronticus spinicollis	1
Chelidon arborea	1	Threskiornis strictipennis	1
Hirundo neoxena	2		

To Captain R. H. Beddome, Official Conservator of Forests, Madras.

Hoplocephalus curtus. Tasmania.  
Hoplocephalus curtus. N.S. Wales.  
Hoplocephalus variegatus.  
Vermicella annulata. N.S. Wales.  
Diemenia superciliosa.

Diemenia superciliosa (young).  
Diemenia psammophis.  
Brachysoma diadema.  
Dipsas fusca.  
Tropidonotus picturatus.

Australian Museum,  
Sydney, 7 September, 1868.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 5.

## LIST OF BOOKS PURCHASED FOR THE LIBRARY OF THE AUSTRALIAN MUSEUM.

2 parts, folio—Gould: Birds of Great Britain.  
12 parts—Annals of Natural History.  
3 parts, 4to.—Diggles: Australian Ornithology.  
1 vol.—Exotic Butterflies.  
2 vols.—Zoological Records.

12 numbers of the Athenæum.  
3 vols., 8vo.—Newton: "The Ibis"; Ornithological Journal.  
3 vols.—"Iconica."

Australian Museum,  
Sydney, 7 September, 1868.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 6.

## LIST OF SPECIMENS COLLECTED BY MR. GEORGE MASTERS, ASSISTANT CURATOR, FROM DECEMBER, 1866, TO MARCH, 1867.

## At Tasmania.

## MAMMALIA.

<i>Placentalia.</i>			
<i>Vespertilio tasmaniensis</i> .....	1	<i>Perameles gunnii</i> .....	7
<i>Scotophilus microdon</i> .....	2	<i>Perameles obesula</i> .....	4
<i>Nyctophilus unicolor</i> .....	1	<i>Phalangista fuliginosa</i> .....	7
<i>Mus tasmaniensis</i> .....	3	<i>Phalangista vulpina</i> .....	4
<i>Hydromys chrysogaster</i> .....	3	<i>Phalangista viverrina</i> .....	7
<i>Implacentalia.</i>		<i>Dromicia gliriformis</i> .....	3
<i>Phascolomys wombat</i> .....	11	<i>Antechinus swainsonii</i> .....	1
<i>Halmaturus bennettii</i> .....	50	<i>Dasyurus viverrinus</i> .....	15
<i>Halmaturus billardieri</i> .....	74	<i>Dasyurus maculatus</i> .....	13
<i>Bettongia cuniculus</i> .....	13	<i>Sarcophilus ursinus</i> .....	43
<i>Hypsiprymnus apicalis</i> .....	4	<i>Thylacinus cynocephalus</i> .....	25
		<i>Ornithorhynchus anatinus</i> .....	3
		<i>Echidna setosa</i> .....	3

## BIRDS.

## ORDER—RAPTORES.

<i>Fam. Falconidæ.</i>		<i>Fam. Strigidæ.</i>	
<i>Aquila audax</i> .....	2	<i>Strix castanops</i> .....	1
<i>Falco lunulatus</i> .....	2	<i>Athene maculata</i> .....	2
<i>Hieracidea berigora</i> .....	6		
<i>Astur novæ-hollandiæ</i> .....	2		
<i>Astur approximans</i> .....	2		

## ORDER—INCESSORES.

<i>Fam. Caprimulgidæ.</i>		<i>Fam. Maluridæ.</i>	
<i>Podargus curvieri</i> .....	4	<i>Malurus longicaudus</i> .....	5
<i>Fam. Hirundinidæ.</i>		<i>Sericornis humilis</i> .....	2
<i>Acanthylis caudacuta</i> .....	1	<i>Acanthiza diemenensis</i> .....	7
<i>Fam. Alcedinidæ.</i>		<i>Acanthiza chrysorrhoa</i> .....	3
<i>Alecyon diemenensis</i> .....	2	<i>Calamanthus fuliginosus</i> .....	3
<i>Fam. Ampelidæ.</i>		<i>Fam. Motacillidæ.</i>	
<i>Pardalotus punctatus</i> .....	4	<i>Anthus Australis</i> .....	1
<i>Pardalotus affinis</i> .....	11	<i>Fam. Fringillidæ.</i>	
<i>Pardalotus quadrigintus</i> .....	1	<i>Estrela bella</i> .....	6
<i>Fam. Laniidæ.</i>		<i>Fam. Merulidæ.</i>	
<i>Strepera fuliginosa</i> .....	1	<i>Cinclosoma punctatum</i> .....	7
<i>Strepera arguta</i> .....	5	<i>Fam. Meliphagidæ.</i>	
<i>Gymnorhina organiceum</i> .....	6	<i>Meliphaga novæ-hollandiæ</i> .....	1
<i>Craicticus cinereus</i> .....	3	<i>Meliphaga australasiana</i> .....	11
<i>Fam. Campephagidæ.</i>		<i>Ptilotis flavigula</i> .....	10
<i>Grauculus parvirostris</i> .....	3	<i>Anthochaera inauris</i> .....	9
<i>Pachyocephala glaucura</i> .....	9	<i>Acanthorhynchus tenuirostris</i> .....	4
<i>Pachyocephala olivacea</i> .....	1	<i>Melithreptus validirostris</i> .....	2
<i>Colluricincla selbii</i> .....	6	<i>Melithreptus melanocephalus</i> .....	8

## MUNICIPALITIES.

(BOROUGH OF SINGLETON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 1st September, 1868.

## BOROUGH OF SINGLETON.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of Singleton to regulate the proceedings of the Council and for the collection of rates, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BY-LAWS OF THE BOROUGH OF SINGLETON.

*Preamble.*

WHEREAS it is expedient that provision should be made for regulating the proceedings of the Borough Council of Singleton, &c., &c., &c., and in accordance with a resolution adopted by the Council of the said Borough, on the 3rd day of June, 1868, and in virtue of the power and authority vested in them in that behalf, that the following by-laws do now take effect, and that they are hereby established for the purposes aforesaid.

*Standing Orders of the Borough Council of Singleton.*

1. The Chairman shall preserve order, and his decision on disputed points of order shall be final.
2. When the Chairman is required or called upon to decide a point of order or practice, he is to state the rule, custom, or precedent applicable to the case, without argument or comment.
3. The Mayor or Chairman for the time being may take part in all the proceedings of the Council.
4. The Mayor or Chairman shall put all questions to the meeting, and declare the sense of the Council thereon.
5. The Mayor or Chairman for the time being, in case of an equality of votes, upon any division, shall give a casting vote in addition to his vote as Alderman.
6. If two or more members rise to speak at the same time, the Chairman shall decide which member is entitled to pre-audience.
7. The Chairman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on same question, except in explanation, and without introducing any new matter.
8. The Council shall vote by show of hands, but any Alderman may call for a division upon any question.

9. The Chairman shall, on every motion made and seconded, put the question first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion, from the show of hands, as to the majority.

10. In special cases, such as the accepting of tenders, the appointment of Committees or any officers, the Council may, if they deem it expedient, have recourse to the ballot (which may be done on motion without notice), and cause the names of the tenderers or candidates to be written on slips of paper, of which one shall be handed to each Alderman. Having struck out the names of all but those for whom he votes, each Alderman shall fold his paper and hand it to the Chairman. The ballot papers having been first mixed, so as to prevent identification, shall then be examined by the Chairman in the presence of the Aldermen, and the result ascertained and recorded.

11. Every member shall stand when speaking, and address the Chair.

12. Except in Committees, no member shall speak twice on the same question, unless in explanation, when he has been misrepresented or misunderstood: Provided however that the mover be allowed to reply, and that every member shall be entitled to speak once upon every amendment as well as on the original motion.

13. No Alderman, when discussing any matter, shall be interrupted, unless by a call to order, when he shall sit down; the Alderman calling to order shall then be heard, and the question of order decided before the debate or any other business is resumed.

14. No Alderman shall digress from the subject under discussion, nor make personal reflections on members, nor impute motives; and all personal reflections shall be considered highly disorderly, and any member so offending shall be required by the Mayor or Chairman to withdraw the expression, and to make a satisfactory apology to the Council.

15. In all divisions, every member present shall be compelled to vote.

16. All divisions of the Council shall be entered in the minutes of the proceedings.

17. Any member may require the question or matter under consideration or discussion to be read for his information, at any time during the debate, but not so as to interrupt any other member while speaking.

18. The order of the day shall include all business of which due notice has been given, and all matters arising out of former meetings of the Council.

19. Any motion entered on the notice paper, and the Alderman who has given notice of the same being absent, and no Alderman having been deputed to bring it forward, such motion, when business is called in order, shall be permitted to lapse.

20. A debate may be adjourned to a later hour of the same day, or to another day specified; and the member moving the adjournment shall be entitled to pre-audience on the resumption of the same.

21. If the Mayor be not present within ten minutes after the time appointed for the meetings of the Council, any Alderman may be elected Chairman for that particular meeting.

22. The business of each ordinary meeting of the Council shall be transacted in the following order, viz. :—

1. The reading and confirmation of the minutes of the previous meeting.
2. The reading of official correspondence.
3. The presentation of petitions.
4. Reports brought up from Committees.
5. Miscellaneous business.
6. Motion of which notice has been given.
7. Notices of motion.
8. Order of the day.

23. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment is moved and seconded, the question shall first be put on the last amendment, and then on the next to the last, and so on, in the reverse order in which they are moved, except when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, then the next to the lowest, and so on to the highest.

24. Any motion for adjournment, if seconded, shall be put from the Chair, but if such motion be negatived it shall not be competent for any member to make a similar motion until half an hour, at least, shall have elapsed from the moving of the one that has been negatived.

25. No notice shall be taken by the Chairman of any motion unless it be seconded.

26. All notices of motion shall be dated, signed, and given to the Town Clerk, and shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

27. No motion, the effect of which, if carried, would be to rescind any motion which has already passed the Council, shall be entertained for a period of three months from the date of such resolution (excepting matters connected with public works), unless a call of the whole Council has been duly made for that purpose; and no motion for rescinding any resolution of the Council, which has been negatived, shall be again put for three months from the time it has been so negatived.

#### *Petitions.*

28. On the presentation of a petition, no debate shall take place until notice has been given in the usual manner; and the only question that can be entertained by the Council on the day of its presentation shall be, that the petition be received, or that it be referred to a Committee.

29. It shall be incumbent on any member presenting a petition, to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

30. That all petitions be received only as the petitions of the parties signing the same.

#### *Committees.*

31. Besides such special Committees as may from time to time be found necessary, there shall be two standing Committees, namely, a Finance and an Improvement Committee.

32. No standing Committee of the Council shall consist of less than three members or more than four (4), three of whom shall form a quorum. The Mayor shall be *ex officio* a member of all Committees.

33. The Mayor or Chairman of every Committee shall be convener thereof, and may direct the Town Clerk to call meetings whenever he shall think it expedient.

34. The appointment of special Committees shall continue until the specific duty for which they are appointed shall have been discharged: Provided that such Committee may at any time be dissolved by a vote of the Council.

35. The orders of the Council shall be observed in Committee of the whole Council, except the order limiting the number of times speaking.

36. Every report of a Committee shall be signed by the Chairman thereof.

37. The Finance Committee, in addition to the duty of examining all accounts, shall deliberate and report upon all questions affecting the finances of the Municipality, which may be committed to it by a resolution of the Council. It shall be the duty of this Committee to watch generally over the financial affairs and administration of the Municipality, and it shall have the right of calling the attention of the Council, by a report, to any matters connected with such administration which may seem to require such attention.

38. The Improvement Committee shall have the general inspection of all public works in progress throughout the Municipality, and shall have the right of calling the attention of the Council, by report, to any matters connected with such works, or with the state of any public thoroughfare which may require such attention. It shall also consider and report upon any questions of an analogous nature to those which may be referred to it by a resolution of the Council.

39. Every Committee shall have a right to take evidence upon any question or questions of fact referred to it by a resolution. A minute of the evidence thus taken, or of its substance, must, however, in all cases of this character, be appended to the Committee's report.

40. The standing Committees shall be appointed within thirty days after the commencement of each Municipal year.

41. Any member moving for a special Committee may propose certain Aldermen as members of the same, but, if demanded, the selection of the Committee shall be made by ballot.

42. Every member proposing the appointment of a select Committee, and naming its proposed members, must name himself as one of them.

#### *Miscellaneous Regulations.*

43. In cases where security is required by the Municipalities Act of 1867, the sureties offered shall be approved of by the Council; and it shall not be competent for them to accept as surety any of its members, or any person holding office under the Council; and in all cases in which security for due and faithful performance of any duty or contract is required, the expenses of preparing the bond for such security shall be borne by the Council.

44. No work affecting the funds of the Corporation shall be undertaken until the probable expense be first ascertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee, and reported on by them before any warrant shall be issued for the payment thereof: Provided always, that, in cases of emergency, the Mayor, with the assent of any three Aldermen, may authorize the expenditure of any sum not exceeding ten pounds, and such expenditure shall be reported to the Council at next sitting.

45. The Treasurer's accounts and the bank book of the Council shall be laid before the Council as often as required.

46. No officer appointed by the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council, to any person not a member of the Council, without leave from such Council, except as otherwise provided by law.

47. No by-laws shall be decided on without due notice, as in cases of motions.

48. Any member may record his protest against any decision of the Council, provided the same be made in writing before the next meeting of the Council, and couched in respectful language, and be consistent with truth. Notice of such intention, however, must be given on the adoption of the resolution.

49. No election to any paid office at the disposal of the Council shall take place until seven days notice be given in a local newspaper, inviting applications for the same.

50. The Town Clerk shall have the charge of the common seal of the Corporation, and shall be responsible for the safe custody and proper use of the same, each impression thereof being duly verified by the signature of that officer; and he shall not affix the seal to any corporate documents without the express order of the Council, nor unless such documents have the signature of the Mayor.

51. Any one or more of the standing orders of the Council may be suspended *pro tempore* in cases of emergency: Provided that the majority of the members present deem it necessary.

#### *Collection of Rates.*

52. The rates shall be levied and collected yearly, and shall be held to be due and payable on and after such day as the Council shall by resolution appoint from time to time.

53. All persons liable to pay any rates or assessments, shall pay the amount within the time prescribed by the Act, into the office of the Town Clerk, during office hours, viz., from 11 a.m. to 3 p.m. every lawful day.

54. It shall be the duty of the Town Clerk, to furnish the Council with a list of the names of all persons whose rates are unpaid, at the expiration of the notice thereof given pursuant to the Municipalities Act of 1867.

#### *The Bailiff and his duties.*

55. The bailiff shall be appointed by a resolution of Council, and may at any time be removed in a similar way.

56. The bailiff shall find two sureties, to the satisfaction of the Mayor, to the extent of fifty pounds each, for the faithful performance of his duty.

57. The bailiff shall make all levies and distresses for the recovery of rates, under warrant, in the form of the schedule hereto annexed and marked with the letter A, under the hand of the Mayor, or any person who may for the time being be duly authorized to perform the duties of that office.

58. At the time of making a distress, the bailiff shall forthwith make out a written inventory, in the form or to the effect of the schedule annexed hereto and marked with the letter B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made, and the bailiff shall give a copy of the inventory to the ratepayer, on demand, at any time within one month after the making of such distress.

59. It shall be lawful for the bailiff, and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property, in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful for such bailiff to sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Municipality as the said bailiff may think proper to remove them to for such purpose; and the surplus (if any) that may remain, after deducting the amount of the sum distrained for, together with the expenses attendant upon such distress, shall be paid over, on demand, to the owner of the goods so sold: Provided always, that nothing herein contained, as to the time of

sale, shall apply to any corn, grass, hops, roots, fruits, pulse, or other product whatever, which may be growing at the time of the same being seized as a distress.

60. The bailiff, in making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or in such part of the land or premises chargeable with the rate as shall be most fit and convenient for this purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where the distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

61. The owner of any goods so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods and chattels shall in such case be put up for sale according to such direction.

62. The bailiff shall hand over to the Council Clerk all proceeds of such distresses within forty-eight hours after having received the same.

63. The bailiff, with the sanction of the Mayor of the Borough, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise, for the time being, all the powers of the bailiff himself; but the bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

64. The bailiff shall be paid for every levy made under these by-laws, according to the schedule hereunto annexed marked C.

#### SCHEDULE A.

##### *Warrant of Distress.*

I the Mayor of the Municipality of Singleton, do hereby authorize you Bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house, or in and upon the lands and premises of situate at for the sum of being the amount of municipal rates due to the Borough to the day of for the said dwelling-house, land, or premises (as the case may be), and to proceed thereon for the recovery of the said rates, according to law.

Dated this day of , 186 .

Mayor.

#### SCHEDULE B.

##### *Inventory.*

I HAVE this day, in virtue of a warrant under the name of the Mayor of the Municipality of Singleton, dated distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of situate at within the Borough of Singleton, for the sum of being the amount of rates due to the said Municipality to the day of 186 .

Dated this day of 186 .

Bailiff.

#### SCHEDULE C.

##### *Fees to Bailiff.*

FOR making entry and inventory, three shillings; if in possession more than five hours, three shillings additional, and for every subsequent day whilst in possession, five shillings; and five per cent. on the net amount of sale.

Made and passed by the Borough Council of Singleton, this third day of June, one thousand eight hundred and sixty-eight.

ALEX. MUNRO,

EWD. GREGGHEGAN,  
Council Clerk.

Mayor.

1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF CUDGEGONG—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 11th September, 1868.

## BOROUGH OF CUDGEGONG.

## BY-LAWS.

THE following By-laws made by the Council of the Borough of Cudgegong, to regulate the proceedings of the Borough Council, for the collection of rates, and for the general good rule and government of the Borough, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BOROUGH OF CUDGEGONG.

BY-LAWS to regulate the proceedings of the Borough Council of Cudgegong, the collection of rates, and for the general good rule and government of the Borough.

*Preamble.*

WHEREAS it is expedient that provision should be made for regulating the proceedings of the Council of the Borough of Cudgegong, it is hereby ordered by the said Council, by virtue of the powers and authority vested in the said Council in that behalf, that the following shall be the by-laws and standing orders, for regulating the proceedings of the said Council, &c.

*Standing orders of the Council.*

1. If, at any meeting of the Council duly held, the Mayor shall be absent at the expiration of twenty minutes after the time of holding the meeting, the Members present shall choose for that meeting a Chairman from amongst themselves.
2. All questions duly proposed and seconded shall be put by the Mayor or Chairman, and the sense of the Council thereon shall be declared by him.
3. The Mayor or Chairman shall preserve order and his decision on disputed points of order shall be final.
4. That the meetings of the Council shall be held at the Council Chambers every alternate Tuesday, at eleven o'clock, a.m.

*Order of business.*

5. The business of each ordinary meeting of the Council shall be transacted in the following order, viz. :—
  - (1.) The reading and confirmation of the minutes of the previous meeting.
  - (2.) The reading of official correspondence.
  - (3.) The presentation of petitions.
  - (4.) Miscellaneous business.
  - (5.) Reports brought up from committees or officers.
  - (6.) Motions, of which notice has been given.
  - (7.) Notices of motion.
  - (8.) Orders of the day.

6. The questions for confirming the minutes of the previous meeting shall be proposed by the Mayor or Chairman immediately upon their being read, and shall be to the effect that the minutes now read are a correct record of the proceedings, and no discussion, shall be allowed thereon, except on the point of accuracy.

*Rules of debate.*

7. Except in Committee, no Member shall speak more than once on the same question, unless in explanation, when misrepresented or misunderstood: Provided, however, that the mover of any question shall have the liberty of reply; and provided further, that every Member shall be at liberty to speak once on any amendment, as well as on the original motion, but the right of reply shall not extend to the mover of an amendment.
8. No Member shall speak upon any motion or amendment for a longer period than fifteen minutes, unless by permission from the Council.
9. When any Member shall use any expression which the Mayor or Chairman shall think capable of being applied offensively to any other Member, the Member so offending shall be required by the Mayor or Chairman to withdraw the expression, and to make a satisfactory apology to the Council.

*Divisions.*

10. It shall be competent for any Member to divide the Council upon any question put from the chair, either in full Council or Committee of the whole Council; and upon such division, those who are on the affirmative side shall place themselves on the Mayor or Chairman's right hand, and those who are on the negative shall place themselves on his left hand; and no Member shall leave his place until the names of all the Members present have been taken down by the Council Clerk, or person officiating for him.
11. All divisions of the Council shall be entered on the minutes of the proceedings.

12. In divisions, every Member present, except the Mayor or Chairman, shall be compelled to vote.

#### *Motions.*

13. When a motion has been proposed and seconded, it shall be the property of the Council, and shall not be withdrawn without the consent of the Council.

14. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment is moved and seconded, the question shall first be put on the last amendment, and then on to the one next to the last, and so on in the inverse order in which they are moved: Provided, however, that when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest.

15. Any motion for adjournment, if seconded, shall be put immediately, without discussion; but if such motion be negatived, it shall not be competent for any Member to make a similar motion until at least half an hour shall have elapsed from the period of moving the one that has been negatived.

16. No motion, the effect of which, if carried, would be to rescind, or be repugnant to any resolution which has been passed by the Council, shall be entertained during the same municipal year, unless a call of the whole Council has been duly made for that purpose; and no such motion, if negatived by the Council, shall be again entertained during the same municipal year.

#### *Petitions.*

17. It shall be incumbent on any Member presenting a petition to acquaint himself with the contents thereof, and to report to the Council that it contains nothing objectionable.

18. On the presentation of a petition no debate shall take place, and the only question that can then be entertained by the Council shall be, that the petition be received, or that it be referred to a Committee: Provided, however, that any petition which has been received by the Council may be taken into consideration upon notice of motion in the usual way.

19. Every petition received by the Council shall be received only as the petition of the party or parties whose signature it bears; and no petition shall be received unless at least one signature be upon the sheet containing the petition.

#### *Committees.*

20. In a Committee of the whole Council the general rules of the Council shall be observed, except the rule limiting the times of speaking.

#### *Miscellaneous.*

21. No payments out of the funds of the Corporation shall be made but such as are authorized by a vote of the Council: Provided always, that, in cases of emergency, the Mayor, with the assent of two Aldermen, may authorize the expenditure of any sum (twenty pounds in all) during a recess, but all such discretionary payments shall be reported to the Council at its next meeting.

22. Whenever the Council is adjourned for want of a quorum, the names of the Members then present and the hour at which the adjournment takes place shall be entered on the minutes.

23. Any Member may record his protest against any decision of the Council, provided the protest be handed to the Council Clerk not later than the next Council meeting; and provided also, that the notice of his intention to protest be given immediately on the passing of the resolution to which the protest refers.

24. The common seal and all charters, deeds, muniments, and records of the Corporation shall be kept in the Council Chamber, or office of the Corporation, in custody of the Council Clerk, unless for any purpose the Council shall otherwise order.

25. The common seal shall not be affixed to any document without the express authority of the Council; and every impression thereof so authorized, shall be verified by the signatures of the Chairman and the Council Clerk.

26. Any one or more of the standing orders may be suspended (*pro tempore*) in a case of emergency, if a majority of the Council then present shall deem such suspension necessary.

27. Any person who shall dig or open any drain, or who shall cause any obstruction by fallen trees or other material, in any road or thoroughfare, or who shall remove from the banks of any creeks or river, or other lands over which the Council may have control, any turf, soil, gravel, stone, or other material, without leave in writing, first obtained from the Council, shall, on conviction before any Justice of the Peace, forfeit and pay for every such offence, any sum not less than ten shillings, nor more than five pounds, together with the costs of removing such obstruction or replacing such material.

28. Any person allowing the weeds known as the Bathurst Burr and Scotch or other noxious thistle to grow upon cultivated land, and failing to destroy the same within one week after due notice from the Council has been served upon the owner or occupier, shall forfeit and pay for such offence, any sum not less than ten shillings, nor more than five pounds, together with the costs of removing the same, and costs of Court, to be recovered before any Justice of the Peace.

#### *Collection of rates.*

29. The rates shall be levied and collected yearly in advance, and shall be held due and payable on such day as the Council shall by resolution from time to time appoint.

30. It shall be the duty of the Council Clerk to furnish the Mayor of the Borough from time to time with lists of all persons who are in default within the meaning of this by-law or section 176 of the Municipalities Act of 1867.

#### *The Bailiff and his duties.*

31. It shall be the duty of the bailiff to make all levies by distress for the recovery of rates in manner hereinafter provided. He shall give security, to the satisfaction of the Mayor, to the extent of fifty pounds, for the faithful performance of his duties.

32. All levies and distresses shall be made under warrant in the form or to the effect of the schedule hereunto annexed and marked with the letter A, under the hand of the Mayor, or of any person who may for the time being be duly authorized to perform the duties of that office.

33. At the time of making the distress the bailiff shall hand a copy of the warrant to the occupant of the land or premises, or the owner of the goods distrained on, or to some person resident at the place where such distress is made; and in case there shall be no such person at such place, he shall give a copy to the ratepayer, on demand, at any time within one month after the making such distress.

34. On making the distress the bailiff shall forthwith make out a written inventory in the form or to the effect of the schedule annexed hereto, and marked with the letter B, which inventory shall be delivered to the occupant of the land or premises, or to the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made, and the bailiff shall give a copy of the inventory to the ratepayer, on demand, at any time within one month after the making such distress.

35. When a distress has been made and the rates levied for shall not be paid within three days thereafter, the bailiff may sell the goods distrained upon by public auction, or may cause the same to be thus sold by any duly licensed auctioneer, for the best price that can be gotten for the same, towards the satisfaction of the said rates and costs, as per schedule hereto annexed and marked C; the overplus, if any, shall be handed over to the owner of the goods or the occupant of the land or premises where the distraint has been made, and a full and true account in writing shall in every case be given by the bailiff to the said owner or occupant on demand.

36. The bailiff, on making a distress for rates as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or such part of the land or premises chargeable with the rate as shall be most fit and convenient for the purpose, or should there be no safe place on the premises, then it shall be lawful for him to remove the same to some secure and convenient place, giving notice thereof, in writing, to the owner of the goods distrained; and it shall be lawful for any person whatsoever, after the expiration of the three days hereinbefore mentioned, to come

and go to and from such place or part of the said land or premises, wherein any distress may be impounded or secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchase thereof, such time not to exceed three days.

37. The owner of any goods so distrained upon, may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods and chattels shall in such case be put up for sale according to such directions.

38. The bailiff may, with the sanction, in writing, of the Mayor of the Municipality or Borough, authorize, by writing, any person to act temporarily as his deputy, and the person thus authorized shall have and exercise, for the time being, all the powers of the bailiff himself, but the bailiff and his sureties shall in every case be held responsible for the acts of his deputy.

#### SCHEDULE A.

##### WARRANT OF DISTRESS.

To

I, A.B., Mayor of the Borough of Cudgegong, do hereby authorize you, C.D., the bailiff of the said Borough, or your deputy, to distrain the goods and chattels in the dwelling-house (or in or upon the land and premises) of E.F., situate at \_\_\_\_\_ for \_\_\_\_\_ being the amount of rates due to this Borough to the day of \_\_\_\_\_ for the said dwelling-house (land or premises as the case may be), and to proceed thereon for the recovery of the said rates according to law.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ A.D. 186 .

(Seal.)

Mayor.

Passed by the Council of the Borough of Cudgegong, this second day of June, in the year of our Lord one thousand eight hundred and sixty-eight.

ROBERT LOWE,  
Mayor.

RICHARD HUGHSON,  
Council Clerk, &c.

1868-9.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF CUDGEGONG—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 25th January, 1869.

## BOROUGH OF CUDGEGONG.

## BY-LAW.

THE following By-law, made by the Council of the Borough of Cudgegong, for the regulation of Slaughter-houses in that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

## BOROUGH OF CUDGEGONG.

## BY-LAW FOR THE REGULATION OF SLAUGHTER-HOUSES.

1. Every Inspector of Slaughter-houses, and of cattle and sheep intended to be slaughtered within the Borough of Cudgegong, shall, upon receiving due notice thereof, inspect all cattle or sheep intended to be slaughtered, and shall particularly describe the color, mark or marks, brand or brands, and sexes, together with the name of the owner or owners thereof, which particulars he shall carefully enter, or cause to be entered, in a book to be kept for that purpose, and which book such Inspector shall produce when required, for examination by the Council or any Justice of the Peace, Inspector, Sub-Inspector, Sergeant of Police, or any other Police Officer.

2. The Inspector shall only inspect cattle for slaughter in the yards adjoining a licensed slaughter-house.

3. The owner or occupier of any slaughter-house within the Borough of Cudgegong, used for slaughter of animals intended for human food, shall keep the milts or spleens of all animals slaughtered in the said slaughter-house, for a period of twenty-four hours after the cattle have been slaughtered, unless the Inspector of Slaughter-houses shall have previously examined the milts or spleens of such slaughtered animals; and any such owner and occupier as aforesaid, who shall refuse or neglect so to do, shall forfeit and pay a penalty not less than forty shillings nor more than twenty pounds.

4. Every person who may from time to time be in that behalf appointed by the Council of the Borough of Cudgegong, shall be the Inspector (during the pleasure of the Council) of Slaughter-houses within the said Borough, and such Inspector shall from time to time, enter into and examine all such slaughter-houses, and the milts or spleens and carcasses of all cattle slaughtered, or any cattle intended to be slaughtered therein.

5. Any person who shall assault, resist, or obstruct any such Inspector of Slaughter-houses when in the execution of his duty, or shall aid, abet, or incite any persons so to do, shall for every such offence forfeit and pay a penalty of not less than twenty shillings, nor more than ten pounds.

6. The blood, offal, and filth of all such animals as may be slaughtered in any slaughter-houses situated in the Borough of Cudgegong, shall be removed therefrom to a

distance of at least one hundred yards, once at least in every twelve hours; and any owner or occupier of any such slaughter-house, who shall fail, neglect, or refuse to comply with this by-law, shall for every offence forfeit and pay a penalty of not less than forty shillings, nor more than ten pounds.

7. If the owner or occupier of any slaughter-house in the Borough of Cudgegong, used for the slaughter of cattle intended for human food, shall knowingly cause, permit, or suffer any animal infected with any disease affecting the milt or spleen to be slaughtered in any such slaughter-house, or if, after the slaughter of any animal, it shall be found to be diseased, and such owner or occupier, so soon as the animal is inspected and condemned, shall not immediately thereupon cause the entire carcass to be destroyed, in the presence of the Inspector (as in the case of animals dying of disease), such owner or occupier shall, for every such offence, forfeit and pay any sum not exceeding fifty pounds, nor less than ten pounds: Provided however, that should the owner of any animal which may be condemned by the Inspector, object to the decision of that officer, the owner thereof shall be at liberty to appoint some professional person as judge in his behalf, and in the event of such Inspector and such professional person not agreeing, it shall be lawful for them to appoint an umpire, whose decision shall be final.

8. The word "animal," for the purposes of the by-laws, shall be held to include cattle, sheep, pigs, calves, and lambs; and the words, "die of any disease," shall be held to apply to all cases of death other than death caused by killing and slaughtering.

9. All penalties recovered under any of these by-laws shall be paid over to the Treasurer of the Borough of Cudgegong, to be appropriated towards the general revenue of the Borough.

10. All fines, penalties, and forfeitures incurred under these by-laws, may, unless otherwise provided for, be recovered in a summary way before any two Justices in Petty Sessions, according to the provisions of the Act 14th Vict., No. 43, and the Acts therein adopted.

Made and passed by the Council of the Borough of Cudgegong, this 30th June, 1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF WAVERLEY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 28th September, 1868.

## BOROUGH OF WAVERLEY.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of Waverley, for regulating the proceedings of the said Council, for the collection of rates or assessments, and for the regulation of public vehicles plying for hire within the said Borough, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

J. BOWIE WILSON.

## BOROUGH OF WAVERLEY.

WHEREAS it is expedient that provision should be made for regulating the proceedings of the Council of the Borough of Waverley, the collection of rates or assessments, and the regulation of public vehicles plying for hire within the said Borough: It is hereby ordered by the said Municipal Council, by virtue of the powers and authority of the Municipalities Act of 1867, and subject to the provisions therein contained, that the following by-laws shall be enforced within the Borough:—

BY-LAW TO REGULATE, BY MEANS OF STANDING ORDERS, THE PROCEEDINGS OF THE MUNICIPAL COUNCIL OF WAVERLEY.

*Meetings.*

1. The Council shall meet for the transaction of its ordinary business on the first Tuesday in each month, at 7 o'clock p.m.
2. In the event of a quorum not being present at such meetings within half an hour after the time appointed, the names of the Aldermen present shall be entered in the Minute Book by the Council Clerk; and each Alderman absent shall pay a fine of five shillings, such fine to be remitted only in the case of illness or other cause deemed sufficient by a majority of the Council at the next monthly meeting.
3. The Council Clerk shall be in attendance at the Council Chambers, Waverley-street, on Tuesday and Saturday in each week, between the hours of nine o'clock a.m. and four o'clock p.m., for the purpose of receiving rates, licenses, &c., &c., and for transacting the ordinary business of the Council.

*Order of Business.*

4. Confirmation of the minutes of last meeting, upon which no discussion shall be allowed, except only as to the accuracy thereof.
5. Reading and ordering on correspondence, petitions, or memorials.
6. Reading and ordering on reports from permanent committees.
7. Reading and ordering on reports from special committees or deputations.
8. Special business, or questions relative to any matter under the control of the Council: Providing, however, that no debate shall be permitted upon any question or reply thereto without notice in the usual way.

9. Orders of the day, including subjects arising from proceedings of former meetings.

10. Motions of which previous notice has been given, and other matters entered on the business paper by direction of the Mayor.

*Order of Debate.*

11. The Mayor or presiding Alderman shall preserve order, and his decision on disputed points of order or explanation shall be final.

12. Whenever any matter of order arises, it shall immediately be taken into consideration.

13. No Alderman, when discussing any subject, shall be interrupted, unless by a call to order, when he shall sit down; the Alderman calling to order shall then be heard, and the question of order decided before the debate is resumed.

14. Every Alderman shall stand when speaking, and address the chair; and if two or more rise to speak at the same time, the Mayor or presiding Alderman shall decide which Alderman is entitled to pre-audience.

15. Any Alderman may require the question or matter under discussion to be read for his information at any time during the debate, but not so as to interrupt any other Alderman while speaking.

16. A debate may be adjourned to a later hour of the same day, or to another day specified. The Alderman moving the adjournment of the debate shall be entitled to pre-audience on the resumption of the same.

17. No Alderman shall digress from the matter under consideration, or use any expressions capable of being applied offensively to any Alderman. The Alderman so offending shall be required by the Mayor to withdraw the expressions, and to make to the Council a satisfactory apology.

18. Any Alderman who shall be guilty of any gross contempt of Council shall pay a penalty of not less than one pound for every such offence.

19. The Council shall vote by shew of hands; but any Alderman may divide the Council on any question, both in full Council or in Committee of the whole Council, in which case every Alderman then present shall be compelled to vote; and all divisions shall be entered in the minute book.

20. The Mayor or presiding Alderman shall, on every motion made and seconded, put the question, first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion from the shew of hands as to the majority.

21. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment has been moved and seconded, the question shall first be put on the last amendment, and then on the one next the last, and so on, in the inverse order in which they have been moved: Provided, however, that when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest.

22. No Alderman shall speak twice on the same question, unless in explanation: Provided, however, that the mover of all motions shall be allowed to reply, and that every Alderman shall be entitled to speak once on every amendment as well as on the original motion. The right of reply shall not extend to the mover of an amendment, and the question shall be put by the Mayor or presiding Alderman immediately after the Alderman moving has replied.

23. No Alderman shall be permitted to speak upon any motion or amendment for a longer period than ten minutes, except with the concurrence of a majority of the Council.

#### *Motions and Amendments.*

24. All notices of motion shall be in writing, dated, and signed by the Alderman proposing the same, previous to being handed to the Council Clerk, and shall be considered the property of the Council, and shall not be withdrawn from the Business Paper without leave of a majority of the Council.

25. All amendments upon original motions and other questions for the consideration of the Council shall be in writing.

26. A motion for adjournment, if seconded, shall be at once put by the Mayor or presiding Alderman, without discussion; but in the event of such motion being negatived, it shall not be competent for any member to make a similar motion until half an hour at least shall have elapsed from the moving of previous motion for adjournment.

27. No notice shall be taken by the Mayor of any motion or of any amendment unless it be seconded.

28. No motion the effect of which, if carried, would be to rescind any motion which has already passed the Council, shall be entered on the Business Paper, unless a "call of the whole Council" has been duly made and granted for that purpose.

29. It shall be competent for any Alderman, by a notice of motion, to move for a "call of the whole Council" for rescinding any resolution; and upon such motion, naming the day for a "call of the Council," being carried, notice shall then be given of the motion for which call is made; and any Alderman not in attendance when the motion comes under consideration shall be fined five shillings, unless cause for such absence be shewn to the satisfaction of the Council, when, upon motion, the said fine may be remitted.

#### *Petitions.*

30. On the presentation of a petition, no question shall be entertained, except as to whether or not such petition shall be received, and whether or not it shall be referred to any committee.

31. It shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

32. That all petitions be received only as the petitions of the parties signing the same.

#### *Committees.*

33. Besides such special committees as may from time to time be found necessary, there shall be two standing committees—namely, a Finance and an Improvement Committee.

34. The standing committees shall be appointed by a resolution of the Council, within thirty days after the election of the Mayor for the municipal year.

35. Every such standing committee shall consist of three Aldermen, two of whom shall form a quorum; and one Alderman representing each Ward of the Borough shall be appointed to each such standing committee.

36. All committees, before proceeding to any business, shall elect a chairman, and the chairman of every committee shall be the convener thereof, and may direct the Council Clerk to call meetings of the committee whenever he shall think it expedient.

37. All reports from committees shall be in writing, dated, and signed by the chairman or a majority of such committee.

38. In a committee of the whole Council the general rules of the Council shall be observed, except the rule limiting the number of times of speaking; and it shall not be necessary to rise when discussing any question.

39. The Finance Committee, in addition to the duty of examining all accounts, shall deliberate and report upon all questions affecting the finances of the Borough.

40. The Improvement Committee shall have the general inspection of all public works in progress, and may call the attention of the Council, by report, to any matters connected with such works, or to the state of any thoroughfare which may require such attention; and it shall be the duty of this committee to carry out all works (excepting urgent repairs) ordered by the Council during each municipal year, in the same order they have severally been voted by the Council.

41. No report from any committee recommending a money vote for any public work shall be adopted by the Council without notice.

42. The Improvement Committee shall examine all accounts relating to the works of the Borough, and if found correct shall be so certified by the Chairman or any member of the Committee; the accounts shall then be passed to the Finance Committee, who shall report thereon to the Council for their payment in the usual way.

43. Any Alderman moving for a special Committee may propose certain Aldermen as members of the same, but must name himself as one of them: Provided, however, that if demanded by any Alderman, the selection of the Committee shall be made by ballot.

#### *Miscellaneous Regulations.*

44. In special cases, such as the accepting of tenders, the appointment of any committees or any officers, the Council may, if they deem it expedient, have recourse to the ballot, which may be done on motion, without notice, and cause the names of the tenderers, candidates, or Aldermen as members of any committee, to be written on slips of paper, of which one shall be handed to each Alderman. Having struck out the names of all but those for whom he votes, each Alderman shall fold his paper and hand it to the Mayor; the ballot papers, having been first mixed so as to prevent identification, shall then be examined by the Mayor in the presence of the Aldermen, and the result ascertained and recorded.

45. No work affecting the funds of the Corporation shall be undertaken until the probable expense thereof be first ascertained by the Council: Providing always, that in cases of emergency, the Mayor, with the assent of any two Aldermen, may authorize the expenditure of any sum not exceeding ten pounds, and such expenditure shall be reported by the Mayor to the Council at its next sitting.

46. In cases where security is required by the Municipalities Act of 1867, the sureties offered shall be approved by the Council. It shall not be competent to accept as surety any Alderman or person holding office under the Council; and in all cases in which security for due and faithful performance of any duty or contract is required, the expenses of preparing the bond for such security shall be borne by the Council.

47. Any Alderman may record his protest against any decision of the Council, provided the same be made in writing at the next Council meeting, couched in respectful language, and be consistent with truth. Notice of such intention, however, must be given upon the adoption of the resolution.

48. The Council Clerk shall have the charge of the common seal of the Corporation, and shall be responsible for the safe custody and proper use of the same, each impression thereof being duly verified by the signature of that officer; and he shall not affix the seal of the Corporation to any documents without the express order of the Council, nor unless such documents have the signature of the Mayor.

49. Any one or more of the standing orders may be suspended, *pro tempore*, but only in cases of emergency, and that the whole of the Aldermen present deem it necessary.

50. All fines imposed under this by-law may be enforced in a summary way, and all penalties recovered shall be paid over to the Treasurer of this Borough.

DAVID FLETCHER,  
Mayor.

Passed by the Municipal Council of the Borough of Waverley, this seventh day of July, in the year of our Lord one thousand eight hundred and sixty-eight.

WILLIAM MORTIMER,  
Council Clerk.

#### BOROUGH OF WAVERLEY.

##### BY-LAW PROVIDING FOR THE COLLECTION OF RATES OR ASSESSMENTS.

1. The rates of the Borough shall be levied and collected yearly, and shall be held due and payable on or before the first day of July in each municipal year.

2. All persons liable to pay any rates or assessments shall pay the amount within the time prescribed by law, at the Municipal Council Chambers, Waverley-street, during office hours—that is to say, between the hours of nine o'clock a.m. and four o'clock p.m., on Tuesdays and Saturdays in each week.

3. It shall be the duty of the Council Clerk to furnish the Council with a list of the names of all persons whose rates are unpaid at the expiration of the date mentioned in clause No. 2 of this by-law, and the Mayor of the Borough shall take immediate proceedings, either by summons or by the issue of distress warrants, against all defaulters reported to the Council in the manner aforesaid.

#### *Bailiff and his duties.*

4. The bailiff shall be appointed by the Mayor, and shall find two sureties to the extent of ten pounds each for the faithful performance of his duty—such sureties to be approved by the Mayor.

5. The bailiff shall make all levies and distresses for the recovery of rates under warrant, in the form of the schedule hereto annexed and marked with the letter A, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

6. The bailiff shall be paid for every entry and levy made under these by-laws according to the schedule hereto annexed and marked with the letter B.

7. At the time of making a distress, the bailiff shall make out a written inventory, in the form of the schedule annexed hereto and marked with the letter C, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person, for his or her behalf, resident at the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made.

8. It shall be lawful for the bailiff, and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein, or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful for such bailiff to sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Borough as the bailiff may think proper to remove them to for such purpose; and the surplus, if any remain after deducting the amount distrained for, together with the expenses attendant upon such distress, shall be paid over to the owner of the goods so sold: Provided that nothing herein contained shall apply to the sale of any product whatever which may be growing upon the land at the time of making any distress.

9. The bailiff, in making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such place or part of the land or premises chargeable with the rate as shall be most fit and convenient for this purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinafore mentioned, to come and go to and from such place or part of the said land or premises where any distress shall be impounded, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

10. The owner of any goods so distrained upon may, at his or her option, direct and specify the order in which they shall be sold, and the said goods and chattels shall, in such case, be put up for sale according to such direction.

11. The bailiff shall hand over to the Council Clerk or the Treasurer all proceeds of such distresses immediately after having received the same.

12. The bailiff, with the sanction of the Mayor of the Borough, may authorize any person to act temporarily as his deputy, and the person thus authorized shall have and exercise, for the time being, all the powers of the bailiff himself; but the bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

13. The bailiff shall be paid for every entry and levy made under these by-laws according to the schedule hereunto annexed and marked B.

#### SCHEDULE A.

##### *Warrant of Distress.*

I the Mayor of the Borough of Waverley, do hereby authorize you bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of situate at within the Borough of Waverley, for the sum of being the amount of municipal rates due to the Borough of Waverley to the day of for the said [dwelling-house, land, or premises, as the case may be], and to proceed thereon for the recovery of the said rates according to law.

Dated this day of 18 .

Mayor.

[Corporate Seal.]

Council Clerk.

#### SCHEDULE B.

##### BOROUGH OF WAVERLEY.

##### *Fees to Bailiff.*

For making every entry or inventory, in the execution of distress warrant, five shillings; if in possession more than five hours, five shillings additional; and for every subsequent day whilst in possession, five shillings; and five per cent. on the net amount of sale.

#### SCHEDULE C.

##### BOROUGH OF WAVERLEY.

##### *Inventory.*

I HAVE this day, in virtue of a distress warrant under the name of the Mayor of the Borough of Waverley, dated dis-  
trained the following goods and chattels in the dwelling-house,  
or in and upon the land and premises of situate at  
within the Borough of Waverley, for the sum of being  
the amount of rates due to the said Borough to the day  
of 18 .

Dated this day of 18 .

Bailiff.

Passed by the Municipal Council of the Borough of  
Waverley, this seventh day of July, one thousand  
eight hundred and sixty-eight.

DAVID FLETCHER,

Mayor.

WM. MORTIMER,  
Council Clerk.

#### BOROUGH OF WAVERLEY.

BY-LAW FOR IMPOSING AND ENFORCING A FIXED CHARGE  
UPON PUBLIC VEHICLES PLYING OR CARRYING PASSENGERS  
FOR HIRE WITHIN THE BOROUGH OF WAVERLEY.

1. The proprietor or driver of every omnibus, car, or other public conveyance, plying for passengers within the Borough of Waverley, shall pay to the Treasurer or Council Clerk thereof, for the uses of said Borough, an annual, half-yearly, or quarterly charge, according to the scale set out in the schedule annexed hereto and marked with the letter A.

2. Every holder of a license as such proprietor or driver from the Sydney Corporation, or from the Mayor of this Borough, shall be entitled to ply with his vehicle, on the production of such license and payment of the aforesaid charge.

3. The said charge shall be payable, in advance, on the first day of January, first day of April, first day of July, and the first day of October in each year, and every such payment to the Council shall cover the ensuing quarter; but any such proprietor or driver shall be at liberty, at any of the said periods, to pay one, two, or three quarters, or for the ensuing twelve months: Provided, however, that the payment of such charge in reference to any such public vehicle shall free it from any further charge by the Council of this Borough for the current quarter, half-year, or year, as the case may be, even although there may be a change of the proprietorship or of the driver of such vehicle.

4. Every such proprietor or driver shall, on the making of every such payment, receive a document in the form given in schedule B hereto, and the driver of the omnibus, car, or other public conveyance in reference to which such charge has been imposed shall produce the said document to the officer appointed by the Council of this Borough, whenever required so to do by the said officer.

5. The driver of every such omnibus, car, or other public conveyance, who shall ply for passengers within this Borough, or shall traverse any of its roads, streets, or public thoroughfares, or any part thereof, for the purpose of taking up or setting down passengers without having first paid the said quarterly, half-yearly, or annual charge, as the case may be, shall, for every such offence, forfeit and pay a sum of not less than ten shillings nor more than five pounds; and for every time that he shall so ply or shall so traverse any of such roads, streets, or public thoroughfares within this Borough, he shall be liable to be proceeded against as for a separate offence.

6. Every such omnibus, car, or other public conveyance, being driven from or to any stand for public vehicles appointed, or that may be appointed as such within this Borough, shall, upon the production of evidence of that fact, be taken and deemed to be sufficient *prima facie* evidence of plying for passengers.

7. Every vehicle carrying passengers for hire, excepting hackney carriages, cabs, or other conveyances hired for an especial occasion by any individual or party, and not taking any other passenger or passengers, shall be deemed a public conveyance within the meaning of this by-law.

8. Every offence against any of the provisions of this by-law may be enforced in a summary way; and all fines and penalties recovered shall be paid over to the Treasurer, for the use of this Borough.

#### SCHEDULE A.

##### BOROUGH OF WAVERLEY.

##### *Scale of charges for public vehicles.*

For every public conveyance plying for passengers, having four

wheels, and drawn by two or more horses:—

One quarter—One pound five shillings.

Two quarters—Two pounds ten shillings.

Three quarters—Three pounds fifteen shillings.

Annual charge—Five pounds sterling.

For every public conveyance plying for passengers, having two or four wheels, and drawn by one horse only :—

One quarter—One pound sterling.

Two quarters—Two pounds sterling.

Three quarters—Three pounds sterling.

Annual charge—Four pounds sterling.

#### SCHEDULE B.

##### BOROUGH OF WAVERLEY.

##### *Certificate of payment.*

Council Chambers,  
Waverley, 18 .

I                    Mayor of the Borough of Waverley, do hereby certify that                    proprietor or driver of the omnibus, car, or other public conveyance, called                    licensed by the Council (of the City of Sydney or by the Council) of this

Borough, and numbered                    has paid the sum of £                    being the charge made by this Council, and referred to in this by-law to be paid for permission for such                    public conveyance to ply for passengers within this Borough for the period of                    and that such                    public conveyance is entitled so to ply until the                    day of                    18 .

Entered—                    Mayor.

Council Clerk.

This by-law was passed by the Municipal Council of the Borough of Waverley, this seventh day of July, in the year of our Lord one thousand eight hundred and sixty-eight.

DAVID FLETCHER,  
Mayor.

WILLIAM MORTIMER,  
Council Clerk.

1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF ARMIDALE—BY-LAWS.)

Presented to Parliament; pursuant to Act 31 Vict., No. 12, Sec. 158.

## BOROUGH OF ARMIDALE.

BY-LAWS adopted at a Meeting of the Council of the Borough of Armidale, held on the twenty-second day of April, one thousand eight hundred and sixty-eight, for the regulation of their own proceedings.

1. The Council shall hold their monthly meeting on the first Tuesday in each month, and such meeting shall commence at  $\frac{1}{2}$  past seven o'clock in the evening, and the Mayor or Presiding Alderman may adjourn any such meeting or any special meeting to any such other day and hour as the majority of the Council then present may determine upon.

2. At any monthly or special meeting questions may be considered at such meeting, or any adjournment thereof, without any previous notice.

3. The Mayor or Presiding Alderman, as the case may be, shall preserve order, and prevent interruption at any meeting of the Council, or of any Committee, and may, of his own authority, call to order any member of the Council or Committee—may regulate the order and precedence in which each speaker is to address the Council, when two or more rise to speak; at the same time his decision upon any disputed point of order shall be final.

4. No person whomsoever, except a member of the Council, shall by words, sound, or otherwise howsoever, interrupt the business of the meeting of the Council, or of any Committee, or at the sitting of any Court, held under the Municipalities Act of 1867, for the revision of the Municipal list or roll, or cause a disturbance thereat; any person, except as aforesaid, interrupting the business of any such meeting or sitting, or causing any disturbance thereat, shall forfeit any sum not less than two pounds, and not more than five pounds, to be recovered in a summary way before any two Justices of the Peace, in Petty Sessions, according to the provisions of the Act, 14 Victoria, No. 43.

5. The Mayor or Presiding Alderman shall have equal right with the other members of Council in speaking to the merits of all questions brought before the Council.

6. The Mayor or Presiding Alderman shall, on every motion made and seconded, put the question first in the affirmative and then in the negative, and then declare the result to the meeting; and if any dispute or misunderstanding shall arise as to the declared result, the Mayor or Presiding Alderman shall be entitled to put the question again, and so often as may be necessary, in order to enable him to declare definitely by the show of hands whether the motion has been carried or negatived.

7. At every meeting of the Council the minutes of the proceedings of the previous meeting shall be read by the Council Clerk, and after confirmation by the vote of the majority of the Council present, shall be signed by the Mayor or Presiding Alderman.

8. Then reports from Committees shall be received, but these shall not be taken into consideration or adopted, unless after due notice has been given at the previous meeting, or to the Council Clerk, not less than four days before the meeting.

9. Every member shall stand when speaking, and shall address the Mayor or Presiding Alderman, and, in course of a debate, if any question of order shall arise, it shall immediately be taken into consideration, and be disposed of by the Mayor or Presiding Alderman.

10. Except in Committee no member shall speak twice on the same question; if he has been misrepresented or misunderstood, he may, if he thinks proper, briefly make such explanations as may be necessary, provided that the mover shall be allowed to reply, and that every member shall have the liberty of speaking once on every amendment, as well as on the original motion.

11. No member shall speak upon any motion or amendment for a longer period than fifteen minutes, without the consent of a majority at least of the members present at the time, and he shall not digress from the matter under discussion, or make personal reflections on members, or impute improper motives; any member making any personal reflections on any other member, or impute to him any improper motive, shall forfeit and pay the sum of not less than ten shillings, and not more than one pound.

12. If any member shall make use of any expression, or so conduct himself that his words or actions shall be taken, construed, or held by a majority of the members present to be offensive to the Council, or to any member thereof, he shall be called to order by the Mayor or Presiding Alderman, and by him required to withdraw the objectionable expression and satisfactorily apologize for having used the same, or for having conducted himself in such manner as to give cause of offence; any member neglecting or refusing to withdraw any

objectionable expression or satisfactorily apologize when called upon so to do by the Mayor or Presiding Alderman, shall forfeit and pay a penalty of not less than ten shillings and not more than one pound.

13. A debate may be adjourned to a later hour of the same day or to another specified day, and the member upon whose motion any debate shall be adjourned, shall be entitled to precedence on the resumption of the debate.

14. It shall be competent for any member to divide the Council on any question, both in full Council and in Committees of the whole Council; and upon such division those who are in the affirmative shall pass on the right hand of the Mayor or Presiding Alderman, and those who are in the negative shall pass on to his left hand; and no member after dividing shall leave his place till the names of all the members shall be taken down by the Council Clerk, or some person officiating for him.

15. Any member may require the question or subject under discussion to be read, or the substance thereof explained to him at any time during the debate, but not in such a way as to interrupt any member while speaking, or to unduly protract the proceedings.

#### *Motions.*

16. After the reading of correspondence and the presentation of reports and petitions, such motions as may be in the motion book shall take precedence of all other business of the day, and shall be taken up in the order in which they are in the motion book.

17. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment is moved and seconded, the last amendment shall be first put to the meeting on in the reverse order in which they were moved, until the whole are disposed of, when the original motion shall be put to the meeting, and the result declared by the Mayor or Presiding Alderman.

18. Any motion for adjournment, if seconded, shall be immediately put without any discussion, and, if negatived, it shall not be competent to put a similar motion until five minutes at least shall have elapsed from the time of moving the one which had been negatived; but no notice shall be taken by the Mayor or Presiding Alderman of any motion, unless it has been seconded.

19. Notice of motion shall be given to the Council Clerk at any meeting of the Council, or not less than four days before the meeting of the Council at which the motion is intended to be made: Provided that no motion, of which notice shall have been given as aforesaid, shall be made, except at an adjourned meeting, unless notice thereof, setting forth in general terms the purport of such motion, shall have been given by the Council Clerk to each member of the Council in the summons issued by him for the meeting of the Council.

20. The Council Clerk shall enter in a book to be kept for that purpose, and to be called "the Motion Book," all notices of motion in the order in which they are received.

#### *Petitions.*

21. No discussion shall take place on the presentation of any petition without notice of motion given after its reception.

#### *Committees.*

22. No Committee of the Council shall consist of less than three members and the Chairman, or a majority of every Committee shall summon the Committee, and may direct the Council Clerk to call meetings whenever they may consider it necessary or expedient.

23. The appointment of special Committees shall continue until the specific duty for which they were appointed shall have been discharged, provided that such Committees may at any time be dissolved by vote of the Council.

24. The rules affecting the Council shall be observed and be in force in any Committee, with the exception of the rule limiting the number of times of speaking; and every report of a Committee shall be signed by the Chairman thereof.

#### *Officers.*

25. No officers shall be appointed until a general outline of his duties and the amount of salary shall be approved of by the Council; and no appointment of any

kind shall take place until one week's notice at least shall have been given in one or more of the local papers, inviting applications for the same.

26. Every officer or servant of the Council, who, by reason of his office or employment under the Council, shall be entrusted with the custody or control of any moneys, shall give security, to the satisfaction of the Council, in the sum of not less than one hundred pounds, for faithfully and duly accounting for the same.

27. Any officer or servant of the Council who shall be entrusted with the receipts of any moneys for the Council shall not have or retain in his hands any sum at any one time exceeding ten pounds of any such moneys; any such officer or servant offending against this by-law, shall forfeit and pay a penalty of not less than two pounds, and not more than twenty pounds.

28. In cases where security shall be required by the Municipalities Act of 1867, the sureties offered shall be approved of by the Council before they are accepted as surety—any of its members, or any person holding office under the Council; and in all cases in which security for the due and faithful performance of any duty or contract is required, the expense of preparing such security shall be borne by the person or persons giving the same.

29. No work affecting the funds of the Corporation shall be undertaken until the probable expense shall be first ascertained and authorized to be executed by the Council; and, before any motion shall be made for the payment of any such works, the accounts shall be examined and passed by the Finance Committee: Provided that in the event of any day laborer being discharged by a majority of the Improvement Committee, such majority shall have power to authorize the Mayor to pay the amount actually due to such laborers, or any of them, by cheques drawn in the usual way on the Bank account, and any such payment shall be confirmed at the ensuing meeting of the Council: Provided, further, that in cases of emergency, the Improvement Committee may authorize the expenditure of any sum not exceeding three pounds, and such expenditure shall be reported to the Council at its next meeting, and the reasons given why the authority so to expend became necessary.

30. The Treasurer's account shall be laid before the Council by the Mayor or Presiding Alderman at the monthly meeting of the Council, or oftener, if required.

31. No officer appointed by the Council shall be at liberty to show, lay open, expose, or give any information of, any of the books, papers, records, or any other documents or vouchers belonging to the Council, to any one, not a member of the Council, without permission from the Council, except, always, as may be otherwise provided by law.

32. Any alterations proposed to be made in the by-laws, or any new by-law proposed to be added, shall require the same notice to be given and proceedings taken thereon, as in the case of motions.

33. No election, to any paid office at the disposal of the Council, shall take place until after seven clear days' notice shall be given in one or more newspapers, inviting applications for the same.

34. The Council Clerk shall have, under the supervision of the Mayor at the Town Hall, control and charge of all charters, deeds, muniments, and records of the Corporation, or relating to the property thereof.

35. The common seal shall be kept at the Town Hall, and the Mayor shall have the custody of the same, and shall affix it to all documents creating obligations on the Corporation, in the presence of the Council Clerk; but for the purpose of officially authenticating documents, the Mayor may alone affix the seal.

36. Any one or more of the standing orders of Council may be suspended at any meeting of the Council (for that meeting only) in case of emergency: Provided that a majority of members present consider it necessary.

37. Any Alderman absenting himself for more than two consecutive meetings of the Council, without leave, shall be fined ten shillings, unless reasonable cause for such absence shall be shown to the satisfaction of the Council.

38. The order of the day shall include all business of which due notice has been given and all matters arising out of former meetings of the Council. Any motion entered on the motion book, and the Alderman having

given notice of the same being absent, and no other Alderman deputed to bring forward such motion when the business is called in order, such motion shall be struck out.

I hereby certify that the foregoing by-laws, consisting of thirty-eight clauses, were duly passed by the Municipal Council of the Borough of Armidale, on the twenty-second day of April, in the year of our Lord one thousand eight hundred and sixty-eight.

T. B. FITZGERALD,  
Mayor.

THOMAS LAMB,  
Council Clerk.

BY-LAWS for the better enabling of the Council of the Borough of Armidale to collect rates.

1. The rates shall be levied and collected half-yearly, and shall be held to be due and payable on such days as the Council shall, by resolution, from time to time, appoint.

2. All persons liable to pay any rates or assessments, shall pay the amount within any such period that the Council have directed by a resolution, into the office of the Council Clerk during the office hours, that is to say, between the hours of 10 a.m. and 3 p.m. on Tuesdays.

3. It shall be the duty of the Council Clerk to furnish the Mayor of the Municipality, from time to time, with a list of the names of all persons who are in default within the meaning of section 176 of the Municipalities Act of 1867.

4. It shall be the duty of the Mayor of the Municipality to issue distress warrants against defaulters, after such default shall in manner aforesaid have been reported to him, and to cause such warrants to be enforced: Provided, that this by-law shall not prevent such other proceedings being taken for the recovery of over-due rates or assessments, as a majority of the Council shall, from time to time, deem necessary.

5. The bailiff of the Municipality shall be appointed by a resolution of the Council, and may at any time be removed in a similar way.

6. The bailiff shall find security to the Mayor—himself in £50, and two sufficient sureties in £25 each, for the faithful performance of his duty.

7. It shall be the duty of the bailiff to make all levies by distress for the recovery of rates in the manner herein-after provided.

8. Any person, whosoever, who shall interrupt, interfere with, or obstruct the bailiff of the Council, or his deputy, or any of his assistants in the execution of any warrant to distrain, or in the execution of his or their duty under such warrant, or under any of the provisions of the Municipalities Act of 1867, or under any of these by-laws, or in the performance of any matter or thing which he or they are authorized by law to do, shall forfeit and pay a penalty of not less than twenty-five pounds, nor more than fifty pounds.

9. All levies and distresses shall be made under warrant in the form or the effect of the schedule hereunto annexed and marked with the letter A, under the hands of the Mayor and the seal of the Municipality.

10. It shall be lawful for the bailiff or his deputy, and such assistants as he may take with him, to enter into any part of the building, tenements, or other property, in respect of which such rate or rates shall have been levied as aforesaid, and to distrain the goods therein or thereon, and to remain in or upon such building, tenement, or other property in charge thereof, until payment; and if the sum, for which such distress shall have been made or taken, shall not have been paid on or before the expiration of five days from the date of making such distress, it shall be lawful for such bailiff or his deputy to cause the goods or other property so distrained on, or a sufficient portion thereof, to be sold by public auction, on the premises, or at some public place within the Municipality, to be appointed for that purpose by the Council, and the surplus, if any, that may remain, after deducting the amount of the sum distrained for, together with expenses, over on demand to the owner of the goods so sold.

11. The bailiff, on making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature and kind soever it may be, in such part of the land or premises chargeable with the rate, or in such other place as shall be most fit and convenient for this purpose; and it shall be lawful for any person, whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such part of the

said land and premises, where any distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

12. The bailiff shall hand over to the Council Clerk all proceeds of such distresses, within forty-eight hours after having received the same.

13. If the bailiff shall neglect or refuse, faithfully, to perform any of his duties, or shall make any bad use of the powers entrusted to him, or shall neglect to pay over the moneys received by him as such bailiff, within the time hereinbefore mentioned, he shall forfeit and pay a penalty of not less than one pound, nor more than ten pounds.

14. The bailiff may, with the sanction in writing of the Mayor of the Municipality, authorize, by writing under his hand, any person to act temporarily as his deputy, and the person thus authorized shall have and exercise all the powers of the bailiff himself, but the bailiff and his sureties shall in every case be held responsible by the Council for the acts of such deputy.

Made and passed by the Municipal Council of the Borough of Armidale, on the twenty-second day of April, in the year of our Lord one thousand eight hundred and sixty-eight.

T. B. FITZGERALD,  
Mayor.

THOMAS LAMB,  
Council Clerk.

*Warrant of distress against Tenant actually rated and occupant.  
To and his assistants.*

WHEREAS the person whose name appears in the schedule hereunder written has been rated by the Municipal Council of the Borough of Armidale in respect of the property also appearing in the said schedule at the sum and for the purpose set down opposite to his or her name And whereas the said sum was and still is due and payable on account of such rate and default having been made in the payment thereof to the Treasurer although demand has been made as is required by law These are therefore to authorize you forthwith to make distress of the goods and chattels in the first place upon those of the person named in the schedule if he or she be then resident in the said premises and have any goods and chattels there and in case of a change of possession then upon the goods and chattels of any person who shall then be the occupier thereof or upon the goods and chattels of the person in possession of the said premises so appearing in the said schedule at the time of executing this warrant And if within the space of five days next after the making of such distress the said sum of money set opposite to his or her name at which the person was so rated as aforesaid shall not be paid together with costs that then you do sell the said goods and chattels of the person so by you distrained and out of the money arising by such sale you retain the sum so due and owing for the premises in the said schedule mentioned and occupied by the party whose goods you shall have sold together with costs rendering to him or her the overplus and that you certify to me on or before the day of what you shall have done by virtue of this warrant.

#### SCHEDULE A.

No. in rate book.	Name of Ratepayer.	Description of property.	Situation of Property.	Rate.
				£ s. d.

Given under my hand and under the common seal of the Mayor Aldermen and Citizens of the Town of Armidale at the Town Hall this      day of      A.D. 186 .

Mayor.

#### *Schedule of costs.*

	s.	d.
For every warrant of distress .....	2	0
For every levy .....	1	0
For man in possession each day or part of a day .....	5	0
For inventory sale commission and delivery of goods not exceeding one shilling in the pound on the net proceeds of sale.		

I hereby certify that the above corporate seal was affixed in my presence according to by-law No. 35.

Council Clerk.

BY-LAWS for the care and management of the roads and public streets and public thoroughfares of the Borough of Armidale.

1. The Council shall, within the Municipality, have the care, construction, and management of all roads and public streets and public thoroughfares within the Municipality, which may have been, or may hereafter be, duly proclaimed or marked out, or in actual public use as such.

2. In any street or road, where it may be deemed necessary to cut or fill up to a greater depth than three feet, the Council shall cause a plan and section, showing the proposed cuttings and fillings, to be exhibited at the Council Chambers for seven days, for the information and inspection of ratepayers, and notify the same in one or more of the local newspapers; and no objections thereto shall be entertained by the Council, unless made within twenty-one days after such notice shall have been given.

3. No person shall encroach beyond the building-line in any street or lane, by the erection of houses, verandahs, door-steps, fences, or any other obstructions whatsoever, without consent of the Council.

4. No driver, carter, or other person, shall wilfully or negligently do or suffer, or cause to be done, any damage or injury to the culverts, kerbstones, gutters, or pathways of any street or roadway.

5. Any person whosoever who shall wilfully drive, lead, or ride any horse or cattle, or any other animal, along any pathway, (except in crossing such pathway to or from any premises adjoining the same), or shall permit any horse or cattle to stand upon any pathway, or any part thereof, within the Municipality, shall forfeit and pay a penalty of not less than five shillings, nor more than five pounds.

6. No person shall be allowed to alter, cut up, or destroy the pathways or roads, or to remove stone, loam, sand, gravel, or any other substance whatsoever, from any of the roads or streets of the Municipality, without the authority of the Council.

7. No person shall be allowed to obstruct any road, street, or public thoroughfare within the Municipality, by building materials, drays, carts, or anything calculated to obstruct and hinder free passage, without the sanction of the Council in writing; and no person shall be allowed to leave waterholes, or excavations for cellars or other purposes, unfenced, or in such a manner as to be dangerous to passers-by; and at all places where buildings are being carried on, or where any obstruction to the danger of passers-by exists, the person causing such obstructions shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise.

8. If any person or persons shall drive, or cause to be driven, any cart or other vehicle with any night-soil, or shall take away or remove any noisome matter in any cart or other vehicle, through or in any of the streets, roads, or public places within the said Municipality, between the hours of 6 o'clock in the morning and 10 at night, or shall fill any cart or other carriage so as wilfully to turn over or cast any night-soil, or other offensive matter, in or upon, or near any of the said streets or public places, or shall deposit or cast out the night-soil hereinbefore described, from such carts as aforesaid nearer to any street, road, or dwelling-place, than shall be directed by the said Council, or shall allow any such carts to stand nearer to any road, street, or dwelling-place than shall be directed by the said Council, he shall for every such offence forfeit and pay a penalty of not less than one pound, and not more than ten pounds; and in case the person so offending cannot be apprehended, then the owner of such cart or other vehicle, in which such night-soil or offensive matter shall be put or placed, and also the employer of the person offending, shall be liable to pay and forfeit such penalty as aforesaid.

9. Any person who shall form, dig, or open any drain or sewer, in any part of the lanes, roads, streets, or thoroughfares within the Municipality, or shall move or cause to be moved any turf, clay, sand, soil, gravel, stone, or other material, without leave first had and obtained from the officers or persons having lawful charge of such lanes, roads, streets, or thoroughfares respectively, or who shall wantonly break up or otherwise damage any part of the said lanes, roads, streets, or thoroughfares, shall on conviction forfeit and pay for every such offence a penalty of not less than one pound, nor more than five pounds.

10. The Council, or any officer appointed by them, may, after one month from the date of publication of these by-laws in the *Government Gazette* upon due notice direct the removal of any fence or other obstruction or encroachment in and upon any lane, road, street, or thoroughfare under the management of the Council; and such notice shall be served personally, or at the usual or last known place of abode of the person who made, or caused to be made, such obstruction or encroachment, or any party who may be in charge of the same, or to whom the same may belong.

11. In any case where service of notice for the removal of any obstruction as aforesaid, the same shall not be removed within such reasonable time as the Council shall appoint, it shall be lawful for the Council to direct the removal of the same, at the cost of the person by or to whom the same shall have been made, or any party who may be in charge, or to whom the same may belong: Provided that the expenses thereby incurred shall not exceed the sum of twenty pounds; and in any case where the obstructions or encroachments cannot be removed, unless at a greater cost than twenty pounds, it shall be open to the Council either to direct such removal and to pay all costs thereof, above twenty pounds, from the Municipal funds, or to proceed by action of trespass against the person who shall make, or cause to be made, such obstructions or encroachments, or who may be in charge thereof.

12. Any person who shall ride or drive through any lane, road, street, or public place, negligently, carelessly, or furiously, to the common danger of the public, shall forfeit and pay a sum not less than ten shillings, nor more than five pounds.

13. Upon representation by any two respectable householders that the house, premises, yard, closet, or drains of the adjoining premises, are a nuisance or offensive, the Mayor and any two Aldermen shall cause an inspection to be made of the premises complained of, and if any such premises shall be found to be a nuisance, or otherwise offensive, notice in writing shall be given to the proprietor, or resident of such premises, that if, within seven days after such notice, the nuisance shall not be removed, the proprietor or tenant of the aforesaid premises, shall be liable to a penalty of not less than one pound, nor more than ten pounds.

14. Upon representation by any two respectable householders that the house or premises adjoining is one of ill-fame, it shall be lawful for the Mayor and any two Aldermen, to cause the resident of such house to furnish to the Council a list of the names, sex, birth-place, and occupation of all the inmates of the said house, and upon non-compliance with the request, or if, upon consideration, the Mayor and any two Aldermen still consider the house to be one of ill-fame, the Mayor shall cause a notice in writing, to be served on such householder or resident to discontinue and abate the said house of ill-fame within forty-eight hours after the receipt of such notice, otherwise to be liable to a penalty not exceeding one pound for every day, or part of a day, which such house of ill-fame shall remain unabated within the Municipality.

15. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, water-hole, or river, or creek, or canal, or shall obstruct or direct from its channel, any such sewer, canal, or watercourse, shall forfeit and pay a sum of not less than one pound, nor more than five pounds, and shall pay the costs of removing such filth or obstructions, or of restoring such watercourse or canal to its proper channel, not exceeding fifty pounds in the whole.

16. Any person who shall wash or caused to be washed any wool, hides, skins, or otherwise, in any creek or watercourse within the Municipality, shall forfeit and pay a penalty of not less than one pound, nor more than ten pounds.

17. It shall not be lawful for any person whomsoever to suffer any kind of swine, or any horse, ass, mule, sheep, goat, or cattle belonging to him, or under his or her charge, to stray, or go about, or to be tethered, or depastured in any lane, road, or street within the said Municipality; and any person who shall so offend shall forfeit and pay, in respect of every such animal, a sum not less than five shillings, nor more than two pounds: Providing that after due enquiry shall have been made, and the owner thereof cannot be discovered, it shall be lawful for the said Council, or any officer belonging to the said Council, to destroy any swine or goats so straying, and injuring

property of any description: Provided further, that the Council, or any officer or officers appointed by them, may impound any swine, horse, ass, mule, sheep, goat, or cattle found straying or going about, or depasturing in any lane, road, or street, within the Municipality.

18. If any person shall haul or draw, or caused to be hauled or drawn, upon any part of the streets, roads, or public places, any timber, stone, or other thing otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such street or public place, to the injury thereof, every such person so offending shall forfeit and pay for every such offence a sum not less than five shillings, nor more than two pounds over and above the damages occasioned thereby; and it shall be lawful for any constable or any other person to lay an information against any person whom he shall find in the act of committing any such offence.

19. If any person shall in any street or road throw, cast, or lay, or shall permit or suffer to be thrown, cast, or laid, or to remain any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing in or upon the carriage-way or footway of

any such street or road, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other cattle in or so near to any of the said streets or roads as that any blood or filth shall run or flow upon or over or to be on any such carriage or footway, shall forfeit and pay a sum not less than ten shillings nor more than forty shillings.

20. All fines, penalties, and forfeitures incurred under any of these by-laws may be recovered in a summary way before any two Justices in Petty Sessions, according to the provisions of the Act 14th Victoria, No. 43, and the Acts therein adopted.

21. That it shall and may be lawful for any ratepayer residing within the Municipality to give such information as may be necessary for the conviction of any party or parties who may ride or drive any horse, cattle, or vehicle upon the footpaths of this Municipality.

22. In any by-laws of this Municipality, any words in the singular number shall be taken to import the plural number, and any words in the plural number shall also be taken to import the singular number, and any words in the masculine gender shall be taken to include the feminine gender, unless the same shall be repugnant to the construction thereof.

Made and passed by the Municipal Council of the Borough of Armidale, on the twenty-second day of April, one thousand eight hundred and sixty-eight.

THOMAS LAMB,  
Council Clerk.

T. B. FITZGERALD,  
Mayor.

1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(MUNICIPALITY OF THE BOROUGH OF ST. LEONARDS—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

## MUNICIPALITY OF THE BOROUGH OF ST. LEONARDS.

## BY-LAWS.

WHEREAS it is expedient that provision should be made for regulating the proceedings of the Municipal Council of the Borough of St. Leonards, it is hereby ordered by the said Council, by virtue of the power and authority vested in the said Council in that behalf, that on the first day of September A.D. 1868, the following By-laws shall be the Standing Orders for regulating the proceedings of the said Council, and shall commence and take effect from that day.

*Business-papers.*

1. The business-paper of each ordinary meeting of the Council shall be made up by the Council Clerk, who shall, in so doing, place each notice of motion in the same numerical order in which it has been handed to him: Provided, however, that it shall be open to the Council, at any time, upon a motion by any member, without notice, to direct that any particular business have precedence: Provided, also, that any business may, with the consent of the Council, be postponed to a later period of the evening.
2. The business-paper, when then made up by the Council Clerk, shall be deemed a record of the Council, and no member or officer shall be permitted to alter it in any way.

*Duties of Chairman.*

3. The Chairman shall preserve order, and his decision on disputed points of order shall be final.
4. When the Chairman is called upon to decide a point of order or practice, he is to state the rule applicable to the case, without argument or comment.
5. The Chairman shall, on every motion made and seconded, put the question, first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion as to which party has a majority.
6. If two or more members rise to speak at the same time, the Chairman shall decide which member is entitled to pre-audience.
7. The Chairman may, without waiting for the interposition of any member of the Council, call to order any Alderman proceeding to speak a second time, except in explanation and without introducing any new matter, or speaking with permission of Council.
8. Questions having reference to any business before the Council, or to any matter connected with his office, shall be put to an officer of the Council by the Chairman, and by him alone.

*Order of Business.*

9. The business of the ordinary meetings of the Council shall be taken in the following order, viz.:—
  1. Reading correspondence referred to the Council.
  2. Reading and receiving petitions and memorials without discussion.
  3. Reading and receiving reports from Committees and officers of the Council.
  4. Notices of motion.
10. The question of confirming the minutes of the previous meeting shall be proposed by the Chairman at every original meeting only, immediately upon their being read; and no discussion shall be allowed thereon, except on the point of accuracy.
11. The adoption of the report of the Finance Committee on the payment of accounts shall take precedence of other reports.

*Rules of Debate.*

12. Every member shall stand when speaking, and shall address the Chair.
13. Except in Committee, no member shall speak more than once on the same question, unless in explanation when misrepresented or misunderstood, or by permission of the whole Council: Provided, however, that the mover of any question shall be allowed the liberty of reply, and, provided further, that every member shall be at liberty to speak once on every amendment as well as on the original motion, but the right of reply shall not extend to the mover of any amendment.
14. No member shall speak upon any motion or amendment for a longer time than ten minutes, except by permission of the Council.
15. No member shall digress from the matter under discussion, nor make personal reflections upon members, nor impute motives.
16. When any member shall use any expression which the Chairman, or majority of the other members then present, shall think to be capable of being applied offensively to any other member, the expression shall be taken down, and the member so offending shall be required by the Chairman to withdraw the expression, and to make a satisfactory apology to the Alderman injured, failing which, a minute expressive of the Council's disapprobation shall be recorded against him.
17. No member, except on a point of order, shall be allowed to interrupt any speaker, either by remarks or otherwise.

18. Whenever any matter of order arises, it shall be taken into consideration immediately; and upon a member rising to order, he shall be heard, and the member who was speaking shall sit down until the question of order shall be stated.

19. Any member may require the question for discussion, or matter connected with it, to be read for his information, at any time during a debate, but not so as to interrupt any other member when speaking.

20. A debate may be adjourned to a later hour of the day, or to another day specified; and the member upon whose motion a debate is adjourned shall be entitled to pre-audience on resumption of the debate.

21. Any question may be decided by ballot, should a majority of the members then present require it. Should no ballot be required, it shall be competent for any member to divide the Council upon any question put from the Chair, either in full Council or Committee of the whole Council; and upon such division, those who are on the affirmative side shall place themselves on the Chairman's right hand, and those who are on the negative shall place themselves on his left hand; and no member shall leave his place until the names of all the members present have been taken down by the Council Clerk, or person officiating for him, and shall be entered on the Minutes of the proceedings.

#### *Motions.*

22. All motions and amendments shall be in writing, and shall be signed by the mover and seconder.

23. When a motion or amendment has been proposed and seconded, it shall be the property of the Council, and shall not be withdrawn without the consent of the Council.

24. Any number of amendments may be proposed on a motion before the Council; and when more than one amendment is moved and seconded, the rule shall be that the question shall first be put on the last amendment, and then on the one next to the last, and so on in the inverse order in which they are moved: Provided, however, that the Chairman may depart from this order when it shall appear to him, or to a majority of the Council, that the sense of the Council may be more correctly ascertained by such deviation: Provided also, that when such motion or amendment shall relate to the fixing of salaries, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest: Provided also, that after a question on the last amendment shall have been put from the Chair, no further amendment shall be received.

25. Any motion for adjournment, if seconded, shall be put immediately, without discussion; but if such motion be negatived, it shall not be competent for any member to make a similar motion until at least half an hour shall have elapsed from the period of moving the one that has been negatived.

26. No resolution of Council shall be rescinded, unless seven days' notice of the intention to rescind such resolution be given, in writing, to each member of Council.

#### *Committees.*

27. In a Committee of the whole Council the general rules of the Council shall be observed, except the rule limiting the number of times of speaking.

28. Every report of a Committee shall be signed by the chairman or sub-chairman thereof.

29. The Standing Committees, namely, the Finance Committee, the Improvement Committee, and the By-laws Committee, shall be appointed for the municipal year, at the first meeting of the Council after the election of the Mayor of the Municipality.

30. All reports of Committees shall be fairly written upon foolscap paper, for convenience of binding or folding.

31. No matters of account shall be disposed of by the Council until they shall have been examined and reported upon by the Finance Committee.

32. No payments out of the funds of the Council shall be made but such as are authorized by a vote of the Council: Provided always, that the Finance Committee may, on its own discretion, authorize disbursements for current expenses, to any amount not exceeding five pounds in any one week: And provided further, that in cases of emergency, the Mayor, with the assent of any two Aldermen, may authorize the expenditure of any sums not exceeding twenty-five pounds in all, during a recess; but all such payments, whether by the Finance Committee or by the Mayor, shall be reported to the Council, in writing, at its next sitting.

33. No public works, involving an expenditure of more than ten pounds, shall be undertaken, until the Improvement Committee have reported to the Council an estimate of the probable cost thereof.

#### *By-laws.*

34. Before any proposed By-law shall be discussed in Council, a copy thereof shall be open to public inspection in the Municipal Council Chambers, for a period of not less than seven days.

35. All By-laws, when confirmed and published as the law directs, shall be fairly transcribed into a book to be kept for that purpose, signed by the Mayor and countersigned by the Council Clerk; and the said book shall at all reasonable times be open to public inspection.

#### *Miscellaneous Regulations.*

36. In cases where security is required by the Municipalities Act, the sureties shall be approved by the Council. And it shall not be competent for the Council to accept as surety any of its members, or any person holding office under the Council.

37. The Treasurer's accounts shall be laid before the Council once in every quarter, or oftener if required by the Council.

38. The common seal, and all charters, deeds, muniments, and records of the Council, shall be kept in the Council Chambers, in the custody of the Council Clerk, unless for any purpose the Council shall otherwise order.

39. Any one or more of the Standing Orders may be suspended, if a majority of the Council shall deem such suspension necessary; provided that due notice of such proposed suspension be given.

WILLIAM TUNKS,

Adopted 1st July, 1868.

Mayor.

GEORGE PILE, Junr.,

Council Clerk.

1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF BALMAIN—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

## BOROUGH OF BALMAIN.

## BY-LAWS.

*To establish Tolls, Rates, and Dues at certain Public Wharves.*

1. That the wharves at the foot of the undermentioned streets, situate within and belonging to the Borough of Balmain, are public wharves at which tolls, rates, and dues may be collected under the Municipalities Act of 1867, namely:—Adolphus-street, Darling-street, Mort-street, and at the northern side of Waterview Bay.

2. That the Municipal Council for the time-being of the Borough of Balmain, or their lessee or lessees, shall be entitled to and may charge, demand, and receive at the said wharves, respectively, the tolls, rates, and dues, following, that is to say:—

3. For each steamer embarking or landing passengers or cargo at any of the said wharves, not exceeding ten shillings for each week, or two shillings and six-pence for each trip, for any term less than a week; from every licensed waterman plying for hire, one shilling for each week; for all other vessels embarking or discharging any cargo, not exceeding six-pence for each ton, or for any quantity less than a ton at one time.

4. No vessel, other than such as shall have a right to ply, embark, or land cargo at any of the public wharves, will be allowed to make fast any warp to the same or any of them.

5. Any person who shall wilfully commit a breach of these By-laws, shall, for the first offence, forfeit and pay a sum not to exceed five pounds, for the second offence a sum not less than five pounds and not exceeding ten pounds, and for every other offence not less than ten pounds and not exceeding twenty pounds additional, recoverable before any two Justices of the Peace.

Passed the Municipal Council of Balmain, this the second day of June, in the year of our Lord, one thousand eight hundred and sixty-eight.

H. PERDRIAU, Mayor.

HENRY CATT, Council Clerk.

## No. 3.

## A BY-LAW FOR COLLECTING RATES.

1. It shall be the duty of the Council Clerk to furnish the Mayor of the Borough with a list of all persons whose rates are unpaid at the expiration of the thirty days after notice thereof given pursuant to the 176th section of the Municipalities Act of 1867; and it shall be the duty of the Mayor to lay such list of defaulters before the Council as early as practicable.

2. For the purpose of saving expense and simplifying the levying of distress, it shall be lawful for the Mayor to make and issue one or more warrants of distress against any number of persons neglecting or refusing to pay the rate.

*The Bailiff and his duties.*

3. The bailiff of the Borough shall be appointed by resolution of the Council, and may, at any time, be removed in a similar way.

4. The bailiff shall give security to the satisfaction of the Mayor, to the extent of fifty pounds, for the faithful performance of his duty.

5. It shall be the duty of the bailiff to make all levies by distress for the recovery of rates, in the manner hereinafter provided.

6. All levies and distresses shall be made under warrant, in the form or to the effect of the schedule hereto annexed and marked with the letter A, under the hand of the Mayor or any person who may, for the time being, be duly authorized to perform the duties of that office.

7. It shall be lawful for the bailiff or his deputy, and such assistants as he may take with him, to enter into any part of the building, tenement, or other property, in respect of which such rate or rates shall have been made as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of three days, together with the cost of such distress, it shall, between the hours of twelve at noon and two in the afternoon on the next day thereafter, be lawful for such bailiff, or his deputy, to cause the goods so distrained on, or a sufficient portion thereof, to be sold by public auction, either on the premises, or at such other place within the Borough of Balmain, as the said bailiff or his deputy may think proper to remove them to for such purpose; and the surplus (if any) that may remain after deducting the amount of the sum distrained for, with costs as aforesaid, to pay over on demand to the owner of the goods so sold.

8. The bailiff, on making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or in such part of the land or premises chargeable with the rate, as shall be most fit and convenient for this purpose. And it shall be lawful for any person whatsoever, after the expiration of the three days hereinbefore mentioned, to come and go to and from such place or part of the

said land or premises where any distress shall be impounded and secured as aforesaid, in order to view and buy and in order to carry off and remove the same on account of the purchaser thereof.

9. The owner of any goods so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods and chattels shall in such case be put up for sale according to such directions.

10. The bailiff shall hand over to the Council Clerk all proceeds of such distresses, within forty-eight hours after having received the same.

11. The bailiff may, with the sanction of the Mayor of the Borough, or, in his absence, with the sanction of any member of the Finance Committee, authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise all the powers of the bailiff, and his sureties shall in every case be held responsible for the acts of such deputy.

12. The bailiff shall be paid for every levy made under these By-laws according to the schedule hereunto annexed marked C.

#### SCHEDULE A.

##### *Warrant of distress.*

I, Mayor of the Borough of Balmain, do hereby authorize you, the Bailiff of the said Borough, or your deputy, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of situate at for being the amount of rates due to this Borough to the day of for the said dwelling-house, land, or premises, as

the case may be, and to proceed thereon for the recovery of the said rate according to law.—Dated this day of A.D. 1868.

Mayor.

#### SCHEDULE B.

##### *Inventory.*

I have this day, in virtue of the warrant under the hand of the Mayor of the Borough of Balmain, dated of which a copy is attached hereto, distrained the following goods and chattels in the dwelling-house or in and upon the land and premises of situate at within the Borough of Balmain, for being the amount of rates due to the said Municipality to the day of A.D. 1868.

Bailiff.

#### SCHEDULE C.

##### *Fees to Bailiff.*

For making an entry and inventory, 5s.; if in possession more than five hours, 8s. additional; and for every subsequent day whilst in possession, 8s. per day.

Mayor.

Passed the Municipal Council of Balmain, this the second day of June, in the year of our Lord one thousand eight hundred and sixty-eight.

H. PERDRIAU,

Mayor.

HENRY CATT,  
Council Clerk.

1868-9.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF BALMAIN—BY-LAW.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 22nd February, 1869.

BOROUGH OF BALMAIN.

BY-LAW.

THE following By-law, made by the Council of the Borough of Balmain, to facilitate the abatement and removal of nuisances within that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BOROUGH OF BALMAIN.

BY-LAW TO FACILITATE THE ABATEMENT AND REMOVAL OF  
NUISANCES.

UPON representation made to the Council or to the Mayor, by the Health Officer, Inspector of Nuisances, or a householder, at any time, that any house, cellar, closet, or other building or yard, or premises, situate within the Borough of Balmain, contains filth, offal offensive, or stagnant water, or other offensive matter, causing a nuisance, or that the contents of any privy or water-closet overflows or soaks therefrom, the Mayor may cause an inspection to be made of the premises complained of, and if he shall think fit, give notice in writing to the proprietor or occupier of such premises, to remove or abate any such nuisance or offensive matter within twenty-four hours after service of such notice; and if the same be not removed or abated within such twenty-four hours, the proprietor or occupier shall be liable to pay a penalty not exceeding forty shillings for every such offence, and a further penalty of ten shillings for every day during

which any such nuisance or offensive matter shall be continued or allowed to remain after the expiration of such notice; and the Municipal Council, or Mayor, or any one duly appointed by him, shall remove or abate, or cause to be removed or abated, every such nuisance. And the said Municipal Council or Mayor, or any one appointed by him, shall have power to enter any house, yard, or premises, for the purpose of ascertaining whether there be any nuisance therein, or of removing or abating the same. And the expense incurred by them in carrying out the provisions of this by-law shall be repaid to them by the occupier or owner of the premises upon which the same exists, and be recoverable before any two Justices of the Peace.

Passed the Municipal Council of the Borough of Balmain, this 17th day of November, in the year of our Lord one thousand eight hundred and sixty-eight.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF PARRAMATTA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 28th August, 1868.

## BOROUGH OF PARRAMATTA.

## BY-LAWS.

THE following By-laws made by the Council of the Borough of Parramatta, for regulating the proceedings of the Borough Council, and preserving order at Council meetings,—for the better enabling the Borough Council to collect rates,—for regulating and licensing public carriers, carters, water-drawers, and vehicles plying for hire,—for regulating the market and fixing dues,—for the regulation and management of the public wharf, fixing dues, and the maintenance of good order thereat,—and for the care and management of the public roads and thoroughfares,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BOROUGH OF PARRAMATTA.

BY-LAWS for the regulation of the proceedings of the Council of the Borough of Parramatta.

## STANDING ORDERS OF THE COUNCIL OF THE BOROUGH OF PARRAMATTA.

*General Duties of the Chairman.*

1. The Chairman shall preserve order, and his decision on disputed points of order shall be final.
2. The Chairman may take part in all proceedings of the Council.
3. The Chairman shall put all questions, and declare the sense of the Council thereon.
4. The Chairman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same question, except in explanation, and without introducing any new matter.

*General Rules for the Conduct of Business.*

5. Reports from Committees shall be received before any other business, but shall not be considered or adopted without due notice thereof.
6. Whenever any question of order arises, it shall be immediately taken into consideration.
7. Every member of Council who shall make any motion, or move any resolution, shall be allowed to reply; and every member shall have the liberty of speaking once on each amendment, as well as on the original motion.
8. No member shall digress from the matter under discussion, or make personal reflections, or impute motives.
9. When any member shall use any expression capable of being applied offensively, and the Mayor's attention being called thereto by one of the Aldermen, the Mayor shall order such offensive words to be taken down by the Clerk; and request the member so offending to retire, and shall decide, as to the point of order, which decision shall be reported to the member on his return, who shall then be allowed to speak in explanation.
10. It shall be competent for any member to divide the Council on any question, both in full Council, and in Committees of the whole Council.
11. All divisions, with the names of the Aldermen, shall be entered on the minutes of the Council.

12. Any member may require the question or matter under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member while speaking.

*Motions.*

13. After the presentation of Reports and Petitions, and the reading of Correspondence, Motions shall take precedence of all business of the day.

14. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment is moved and seconded, the question shall first be put on the last amendment, and then on the next to the last, and so on, in the reverse order in which they are moved, except when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, and then the next lowest, and so on to the highest.

15. Any motion for adjournment, if seconded, shall be immediately put without discussion; but if such motion be negatived, it shall not be competent for any member to make a similar motion until after other business has been transacted.

16. The Council Clerk shall receive every notice of motion; if put into writing, and when moved and seconded, shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

*Petitions.*

17. On the presentation of a petition, no debate shall take place until notice has been given in the usual manner; and the only question that can be entertained by the Council on the day of its presentation shall be that the petition be received, or that it be referred to a Committee.

18. It shall be incumbent on any member presenting a petition, to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

19. All petitions shall be received only as the petitions of the parties signing the same.

*Committees.*

20. The Chairman of every Committee shall be the convener thereof, and may direct the Council Clerk to call meetings whenever he shall think it expedient.

21. The rules of the Council shall be observed in a Committee of the whole Council, excepting the rule limiting the number of times of speaking.

22. Every report of a Committee shall be signed by the Chairman thereof.

*Miscellaneous Regulations.*

23. In cases where securities are required by the Municipalities Act, sureties shall be approved by the Council; and it shall not be competent for the Council to accept as surety any of its members or any person holding office under the Council.

24. No work affecting the funds of the Municipality shall be undertaken until the probable expense be first ascertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee, and reported on by them before any warrant shall be issued for the payment thereof.

25. The Treasurer's accounts shall be laid before the Council by the Mayor at the first meeting of each quarter, or oftener if required.

26. No person shall be at liberty to remove any book, paper, or record, from the Council Chamber, without leave first had and obtained from the Mayor.

27. The Seal of the Municipality, and all charters, deeds, muniments, and records of the Council, shall be kept in the Council Chamber, in the custody of the Council Clerk, unless the Council shall otherwise order.

28. Any one or more of the Standing Orders may be suspended *pro tempore* in a case of emergency, if a majority of the Council then present shall deem such suspension necessary.

Passed by the Municipal Council of the Borough of Parramatta, at a meeting held on Tuesday, 26th May, A.D. 1868.

JOHN CHAS. BARKER,  
Council Clerk.

T. W. BOWDEN,  
Mayor.

BY-LAWS for the better enabling the Municipal Council of the Borough of Parramatta to collect rates.

1. That all persons liable to pay rates or assessments shall pay the amount when due at the office of the Council Clerk, in the Municipal Council Chambers, during office hours.

2. All levies and distresses shall be made under warrant, in the form or to the effect of the Schedule hereunto annexed, and marked with the letter A, under the hand of the Mayor.

3. The Bailiff shall hand over to the Council Clerk all proceeds of such distresses within forty-eight hours after having received the same.

4. The costs and charges incurred, and to be paid for any levy, for rates under, and by virtue of the provisions of the Municipalities Act of 1867, shall be as set out at the foot of Schedule A, hereunto annexed.

5. The owner of any goods distrained upon may, at his or her option, direct and specify the order in which they shall be successively offered for sale; and the said goods and chattels shall, in such case, be put up for sale according to such directions.

A.

*Warrant of Distress.*

I, Mayor of the Borough of Parramatta, do hereby authorize you, the Bailiff of the said Borough, or your deputy, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of , situate at , for , being the amount of rates due to this Borough to the day of , for the said dwelling-house, land and premises, as the case may be, and to proceed thereon for the recovery of the said rates, according to law.

Dated at Parramatta, this day of A.D. 186 .

Mayor.

To

Bailiff and his assistants.

*Schedule of Costs.*

	s.	d.
For warrant of distress	2	0
For levy	1	0
For man in possession, each day or part of a day	5	0
For inventory, sale, commission, and delivery of goods, not exceeding one shilling in the pound on the net proceeds of the sale.		

*Inventory.*

I have this day, by virtue of the Warrant of which a copy is attached hereto, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of , situate at within the Borough of Parramatta, being the amount of rates due to the Municipal Council of the said Borough, to the day of , A.D.

Dated this day of , A.D. 186 .

Bailiff.

Passed by the Municipal Council of the Borough of Parramatta, at a meeting held on Tuesday, 2nd June, A.D. 1868.

T. W. BOWDEN,  
Mayor.

JOHN CHAS. BARKER,  
Council Clerk.

BY-LAWS for the regulation and licensing of public carriers, carters, water-drawers, and public vehicles, omnibuses, cars, hackney carriages, cabs, water-carts, drays, carts, or vans, and the drivers and conductors of passenger-carrying vehicles.

1. No vehicle shall ply or be used for hire within the Borough of Parramatta, unless the same be duly licensed in the manner hereinafter described.

2. Before any license for plying a vehicle, or to drive or conduct the same, shall be granted, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of the schedule hereunto annexed marked with the letter A, or to the like effect, and duly fill up and sign the same, and deliver it to the Council Clerk; and in the case of drivers or conductors, shall also obtain a certificate from two respectable householders, to the effect that the applicant is of good character, and competent to act as such driver or conductor, as the case may be.

3. No license shall be granted in respect of any vehicle which in the opinion of three Aldermen, who shall be appointed by a resolution of the Council of the said Borough, is unsafe, or in bad repair, or otherwise unfit for the accommodation and conveyance of passengers therein; nor until the number of such vehicle be painted thereon, on a plate or plates affixed thereon outside on the panel of each door of such vehicle, or on such other place or places, and in such manner as the said three Aldermen may direct.

4. Licenses for proprietors, drivers, and conductors of vehicles shall be in the form contained in the schedule hereunto annexed, marked with the letter B, or to the like effect; and any person plying, driving, or conducting any vehicle for hire with passengers without such license, shall be deemed guilty of a breach of these By-laws.

5. Every license granted under these By-laws shall be under the Common Seal of the Council of the Borough of Parramatta, and signed by the Mayor, and countersigned by the Council Clerk, upon production of a certificate signed by the Aldermen who shall be appointed as aforesaid, and shall be in force from the date of such license until the 31st day of December next ensuing, subject to the conditions in section 10; and no such license shall include more than one vehicle: Provided that where the licensed vehicle shall be under repair, if the proprietor shall so desire, he may be permitted to substitute another for a period to be then specified, and endorsed on the license signed by the Mayor, and countersigned as aforesaid.

6. For every such license there shall be paid to the Treasurer of the Borough of Parramatta, for the benefit of the town fund, the several rates set forth in the schedule hereunto annexed marked with the letter C.

7. No license shall be granted to any person to drive any passenger-carrying vehicle who shall be under the age of eighteen years.

8. All licenses shall be made out by the Council Clerk, and numbered consecutively.

9. The person in whose name a license shall appear to have been obtained shall be *prima facie* deemed to be the owner of the vehicle in respect of which the same shall have been taken out.

10. The three Aldermen aforesaid shall, as often as they may deem it necessary, cause an inspection to be made of all or any licensed vehicles, and of the harness, horse, or horses; and if any such vehicles, harness, horse, or horses, shall at any time be found by the said Aldermen to be unfit for use, the Mayor may cancel the license of such vehicle, on the written report of the said Aldermen.

11. The number of the license granted to every omnibus or car, in figures not less than four inches in height, and for every hackney carriage or cab in figures not less than two inches in height, of proportionate breadth, white upon a ground of black, shall be painted outside on the panel of the door or doors of such vehicle, or on such other part or parts thereof as the Aldermen aforesaid may direct; and such numbers shall be kept legible and undefaced during all the time such vehicle shall ply or be used for hire.

12. The number of the license of every hackney carriage or cab, on a card or plate six inches by three inches, painted or printed in clear legible figures, and the table of fares fixed by the Council, shall be affixed at the upper part of the front panel, or in such other place or places inside of such carriage or cab as the three Aldermen aforesaid may direct; and such card or plate shall be kept so affixed and legible and undefaced during all the time the carriage or cab shall ply or be used for hire.

13. No proprietor or driver of any licensed hackney carriage or cab shall demand, receive, or take more than the several fares set forth in the schedule hereunto annexed, marked with the letter D: Provided that the sums so set forth may be varied from time to time by a resolution of the Council, as occasion may seem to them to require; and notice of such alteration shall be published in the *Government Gazette*, and in one or more of the newspapers circulating in the Borough.

14. So far as concerns fares in these By-laws, any vehicle, of whatever form or construction, for which a hackney-carriage license has been taken out, if drawn upon four wheels, shall be deemed to be a *hackney carriage*; and if drawn upon two wheels, a *cab*.

15. Carters (plying for hire) of water-carts, drays, carts, or vans, are to be registered at the Council Chamber, and receive a license, for which each applicant shall pay in accordance with schedule C.

16. The name and place of abode, number of license, and the words "licensed cart, dray, or van," as the case may be, are to be painted, in letters one inch long, upon the right or off side of such cart, dray, or van.

17. Whenever the word "vehicle" shall be used in these By-laws, the same shall be understood to apply to either an omnibus, car, hackney carriage, or cab; and an omnibus shall be meant to be a vehicle upon four wheels, drawn by two or more horses; and a "car," a vehicle upon two wheels; and a "hackney carriage" shall mean a vehicle upon four wheels, drawn by two or more horses; and a "cab," a vehicle upon two wheels for which a "hackney-carriage" license has been taken out; and the word "cart" shall be understood to apply to carts, drays, or vans plying for hire.

18. That all vehicles licensed to carry passengers shall be provided with suitable carriage lamps, to burn candles, one to be fixed on each side of the driver's box, and a third one inside of all omnibuses and closed coaches; and that the same shall be lighted not later than one hour after sundown, and kept burning while the vehicles are on the stand, or running the streets, either with or without passengers.

19. That when any carriage is submitted for inspection by the owner or other applicant, with a view to obtain a license, the Aldermen appointed by the Council to that duty shall then determine upon the number of passengers the vehicle shall be permitted to carry, and give a certificate to that effect, such number to be mentioned in the license.

20. That the number of passengers the vehicle is licensed to carry, and the legal fare, shall be painted or printed in legible characters, and affixed within and without the vehicle, in such places as the inspecting Aldermen shall direct.

21. For every offence against the provisions of these By-laws, the offender shall be liable to and pay a penalty of not more than twenty pounds nor less than ten shillings, to be recovered in a summary way as the law directs.

#### SCHEDULE A.

##### A Requisition for License.

To the Municipal Council of the Borough of Parramatta.  
I, \_\_\_\_\_, residing at \_\_\_\_\_ street,  
within the Borough of Parramatta, do hereby request that a  
license may be granted to me to \_\_\_\_\_  
within the limits of the said Borough.  
Dated at Parramatta, this \_\_\_\_\_ day of \_\_\_\_\_  
A.D. 186 \_\_\_\_.

Description of

#### SCHEDULE B.

##### Form of License for Driver or Conductor.

This is to certify that \_\_\_\_\_ of \_\_\_\_\_ street,  
Parramatta is hereby licensed to \_\_\_\_\_ (an  
omnibus, car, hackney carriage, or cab, as the case may be),

#### SCHEDULE D.

Rates and fares to be paid for any Hackney Carriage or other passenger-carrying vehicle, plying within the limits of the Borough of Parramatta:—

If drawn by one or more horses, at the rate or fare of sixpence for any distance not exceeding a mile.

Passed by the Municipal Council of the Borough of Parramatta, at a meeting held on Tuesday, 2nd June, A.D. 1868.

[L.S.] T. W. BOWDEN,

Mayor.

JOHN CHAS. BARKER,  
Council Clerk.

#### By-LAWS for the regulation of the Parramatta Market.

1. The Parramatta Market shall be a general market for the sale of live-stock, game, and poultry; also, for grain, pulse, hay, straw, grass, and other green fodder; also, for butcher's meat, and dairy produce; also, for fruit, vegetables, garden produce, and any other articles, at the discretion of the Municipal Council of the Borough of Parramatta.

2. Any person who shall sell, or expose for sale, any of the articles specified in clause No. 1, within the Borough of Parramatta, before the hour of eight of the clock in the forenoon in the summer months, and nine of the clock in the forenoon of the winter months, whether the dues have been paid therefor or not, except in the said market, or in his or her own shop or house,—or any person who shall sell or expose for sale any of the said articles after the hour of eight of the clock in the forenoon in the summer months, and nine of the clock in the forenoon in the winter months, except in the said market, or in his or her shop or house,—without having first entered the said market, and paid to the Clerk or Lessee thereof the dues thereon shall, on proof thereof, be deemed to be guilty of a breach of these By-laws. The Summer months mentioned in these By-laws shall be considered to be the period of time from the first day of September to the thirty-first day of March inclusive; and the Winter months shall be considered to be the period of time from the first day of April to the thirty-first day of August inclusive.

3. The said market shall be opened every day during the year, except Sundays, Christmas Day, and Good Friday.

4. The said market shall commence by ring of bell, at five o'clock in the morning, from the first day of September to the thirty-first day of March inclusive; and at six o'clock from the first day of April to the thirty-first day of August inclusive; and shall remain open until sunset throughout the year.

5. The Council may appoint the Lessee as the Clerk of the market, and Inspector of provisions therein.

6. The Clerk of the market and Inspector of provisions may inspect all articles exposed for sale in the said market, and seize and cause to be destroyed—as the law directs—all articles which are bad and unwholesome.

7. The Clerk of the market shall keep and be responsible for the market scales, and shall be provided with weights and measures regularly stamped; and when required to weigh any article, he shall receive, as a fee for so doing, the sum of one penny per hundredweight, or any quantity under one hundred-weight.

8. The Clerk of the market, or Lessee, shall preserve order and regularity in the market, shall open and shut it by ring of bell at the stated hours, and shall remove therefrom and cause to be dealt with according to law any person making a riot or disturbance therein, or any person guilty of using profane, indecent, or threatening language, offending against common decency, or in any other way provoking a breach of the peace.

9. The Lessee, or Clerk of the market, shall have charge of the weigh-bridge, and shall keep it in repair during the term of his lease, and deliver it up to the Council in good order.

10. All goods brought to the market and required to be weighed between seller and buyer shall, at the request of either party, be weighed at the market scales.

11. The weekly rents for the several stalls in the said market to be paid by the several tenants thereof to the Clerk or Lessee of the said market, shall be as follows, viz.:—Numbers one and seven in front of the said market building, any sum not exceeding four shillings each per week; and the remaining stalls, any sum not exceeding two shillings each per week.

12. Carts or other conveyances with grain, pulse, hay, straw, grass, green fodder, or other produce, shall be arranged in such part or parts of the market as may be appropriated for that purpose by the Council.

13. The Clerk or Lessee of the market shall demand and receive for all articles weighed on the weigh-bridge the sum of one shilling and sixpence per load, when the load does not exceed one ton in weight, and the sum of two shillings per load when it does exceed that weight.

14. There shall be paid to the Clerk or Lessee of the said market, dues as per schedule hereinafter mentioned, viz.:—

#### SCHEDULE OF DUES.

	s.	d.
For every load of hay drawn by one horse or other animal, the sum of ...	0	6
For every load of hay drawn by two or more horses or other animals, the sum of ...	0	9
For every load of straw drawn by one horse or other animal, the sum of ...	0	6
For every load of straw drawn by two or more horses or other animals, the sum of ...	0	9
For every cart with other produce, if drawn by one horse or other animal, the sum of ...	0	6
For every cart with other produce if drawn by two or more horses or other animals, the sum of ...	1	0
For every horse, mare, gelding, foal, ass, or mule exposed for sale, the sum of ...	0	6
For every head of neat cattle exposed for sale, the sum of ...	0	6
For every sheep or lamb exposed for sale, the sum of ...	0	0½
For every pig or goat exposed for sale, the sum of ...	0	2

15. No person shall drive into or through the said market, any live stock after the hour of seven of the clock in the forenoon, nor before ten of the clock in the evening, during the whole year, except such as are bridled or haltered, or ridden, or led singly.

16. Any person coming to the said market with a load of goods in a cart or other carriage shall, before the opening of the said market, or if arriving thereafter, within twenty minutes after such arrival, take the animal or animals drawing such cart or other carriage out of such cart or other carriage, and secure them in a place to be pointed out for that purpose by the Clerk or Lessee of the market, and not again attach the said animal or animals to such cart or carriage until final removal from the market.

17. Producers or other vendors may expose their produce for sale on the space of ground allotted for that purpose by the Council, outside the said market building, on payment to the Clerk or Lessee of the said market a fee of sixpence for such standing each day.

18. All fees to be collected under these By-laws shall be deemed to be due before any portion of the goods are sold by the vendor.

Passed by the Municipal Council of the Borough of Parramatta, at a meeting held on Tuesday, the fourteenth day of July, A.D. 1868.

T. W. BOWDEN,  
Mayor.

JOHN CHAS. BARKER,  
Council Clerk.

BY-LAWS for the regulation and management of the Queen's Wharf at Parramatta, and the maintenance of good order thereat.

1. That the said wharf shall be considered as divided into three parts or lots, to be numbered, respectively, 1, 2, and 3; the dividing lines to be defined by the Town Surveyor or Acting Town Surveyor, as the Council may, from time to time, direct.

2. That the side lines or boundaries of the respective lots shall be in parallel lines with Messieurs Byrnes' mill property, and commence at the river.

3. That lot 1 shall be reserved and appropriated for and to the use of steamers, licensed watermen, or private individuals, for the purpose of landing or taking off passengers.

4. That lot 2 shall be reserved and appropriated for the loading and unloading of colonial produce or general merchandise.

5. That lot 3 shall be reserved and appropriated for the loading and unloading of timber, bricks, manure, lime, sand, and shells, &c.

6. That the wharfinger to be appointed by the Council or the lessee shall be entitled to demand and receive the fees or tolls set out in the schedule hereunto annexed, from all persons using any portion of the said wharf.

7. That all articles landed at or upon any portion of lot 2 of the said wharf shall be removed therefrom, by the persons landing the same, within twenty-four hours after the time of landing. Bricks, firewood, and other articles allowed to be deposited on lot 3, shall be removed within forty-eight hours after being laid down, excepting the articles mentioned in section 10 of these By-laws, and therein provided for.

8. That the Council may, from time to time, as it shall deem advisable, appoint a wharfinger or wharfingers, not being the lessee or lessees, and the same from time to time to suspend or remove; and such wharfinger or wharfingers shall have power to, and are hereby authorized and required to keep good order upon the wharf and every part thereof, and to remove all disorderly persons therefrom.

9. No boat shall be allowed to remain at the passengers' stairs longer than is necessary to land or receive passengers.

10. No rubbish, cinders, ballast, shells, animal or vegetable matter, shall be landed, except on lot 3 of the said wharf, and only in bags, baskets, or casks; and such articles shall be taken away within twelve hours after landing.

11. Any person offending against any of these By-laws shall, for every such offence, on conviction, forfeit and pay a sum not less than ten shillings nor more than five pounds.

*Schedule of dues to be paid for all goods shipped and landed at the said wharf.*

Passed by the Municipal Council of the Borough of Parramatta, at a meeting held on Tuesday, 16th June, A.D. 1868.

T. W. BOWDEN,  
Mayor.

JOHN CHAS. BARKER,  
Council Clerk.

BY-LAWS for the care and management of the Public Roads, Public Streets, and Public Thoroughfares.

1. The Surveyor or Acting Surveyor of the Municipality duly appointed by the Council thereof, shall be the proper officer for marking out, when necessary, any roads, streets, or lanes within the Municipality; he shall also be the proper officer for marking out the carriage and footways in such roads, streets, and lanes, or other public place; but it shall be sufficient for him for this purpose to place posts or kerb-stones at the corners or intersections of the streets, or wherever the same may be necessary or desirable, so as to give a width of forty-two feet for the carriage-way, and twelve feet for the foot-way on each side when the street shall be sixty-six feet or more wide; and in proportion, and in the discretion of the said Surveyor, in any public roads, streets, lanes, or public places of other widths than sixty-six feet.

2. With regard to any buildings hereafter to be built or rebuilt, it shall not be lawful for any coping, parapet, over-hanging eaves, cornice, window, string-course, string-cornice, dressing or other architectural decoration, forming part of any external wall, to project more than eighteen inches, nor any balcony more than thirty-six inches beyond the general line of front, in any street or road. All overhanging eaves to be properly guttered, together with down pipes.

3. Provided always, that nothing in these By-laws contained shall be deemed to prevent any person from placing a movable awning in front of his or her shop or house, and such awning be at least 8 feet above the height of the footway in front of such shop or house, and that the posts be placed fair with the kerb-stone or outer edge of the footways.

Passed by the Municipal Council of the Borough of Parramatta, at a meeting held on Tuesday, 26th May, A.D. 1868.

T. W. BOWDEN,  
Mayor.

BOROUGH OF PARRAMATTA.

AN ADDITIONAL BY-LAW for the regulation of the Parramatta Market.

No person shall sell, or offer for sale, in any part of the Borough of Parramatta, except in the market or open spaces adjoining, or in the house, shop, or premises of the person so selling, any victuals, beef, mutton, or other butchers' meat, or any pork, bacon, ham, butter, cheese, eggs, poultry, game, or potatoes, or other esculent root, or fruit, vegetables, or garden produce of any description: Provided that nothing herein contained shall prevent any person from selling or offering for sale any of the goods or articles herein enumerated (or in clause 1 of these by-laws) from a hand-basket, on payment of one shilling per week; from a wheelbarrow, or any vehicle drawn by any animal other than a horse, on payment of two shillings per week to the clerk or lessee of the market, or other person duly authorized to receive the same by the Municipal Council of the said Borough.

Passed by the Municipal Council of the Borough of Parramatta, at a meeting held on Saturday, 5th December, A.D. 1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF MUDGEES—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 18 June, 1868.

## BOROUGH OF MUDGEES.

## BY-LAWS FOR REGULATING THE MANAGEMENT OF THE PROCEEDINGS OF THE BOROUGH COUNCIL.

THE following By-laws, made by the Council of the Borough of Mudgees, for regulating the management of the proceedings of the said Council, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BY-LAWS FOR REGULATING THE MANAGEMENT OF THE PROCEEDINGS OF THE BOROUGH COUNCIL OF MUDGEES.

*Duties of Mayor.*

1. The Mayor or Chairman shall preserve order, and his decision on disputed points of order shall be final.
2. The Mayor or Chairman shall not give his opinion, unless the votes of the members upon a division be equal, when he may state the reasons which influenced him in giving his casting vote.
3. The Mayor or Chairman shall put all questions, and declare the sense of the Council thereon, always putting the last amendment first.
4. If two or more members rise to speak at the same time, the Chairman shall decide which member is entitled to pre-audience.
5. The Chairman may, without interposition of any member of the Council, call to order any member proceeding to speak a second time on the same subject, except in explanation, and without introducing any new matter—the member introducing the motion to have the right of reply.
6. If the Mayor be not present within 10 minutes after the time appointed for the meeting of the Council, an Alderman shall be elected Chairman for that particular meeting.

*Order of Business.*

7. Confirmation of and signing the minutes of last meeting.
8. Reading copies of letters sent by order of the Council.
9. Reading letters received, considering and ordering thereon.
10. Reading and ordering of Reports from Committees.
11. Special payments.
12. Special business not classified.
13. Orders of the day and adjourned motions.
14. Motions of which notice has been given.
15. Notices of motion.

*Order of Debate.*

16. Any Alderman proposing a motion or amendment, or discussing any matter, must rise and address the chair; and no Alderman shall be interrupted, unless by a

call to order (when he shall sit down); the Alderman calling to order shall then be heard, and the question of order decided before the debate or any other business is resumed.

17. Any Alderman proposing a motion or amendment must have the motion or amendment read by the Town Clerk before addressing the Council.

18. No Alderman shall digress from the subject under discussion, nor impute motives, and all personal reflections shall be considered highly disorderly; the member so offending shall be required by the Mayor or Chairman to withdraw the expression, and to make a satisfactory apology to the Council before the close of the Council that evening; any Alderman refusing to comply with the above law, when called upon by the Mayor or Chairman to do so, shall be liable to a penalty of not less than £1 or more than £5, to be recovered in the same manner as any other penalties.

19. Any Alderman may demand the production of any of the documents of the Council relating to the subject under discussion.

20. Only one amendment shall be discussed at one time; and upon the adoption of any amendment the original motion shall be deemed rejected, and the amendment so carried shall be acted upon as an original motion.

21. Any Alderman may call for a division.

22. No member shall speak on any motion or amendment for a longer period than 15 minutes, without the consent of the Council.

23. Any Alderman may record his protest against any decision of the Council: Provided the same be made in writing before the next meeting of the Council, and couched in respectful language, and be consistent with truth; notice of such intention, however, must be given on the adoption of the resolution.

24. No motion, the effect of which, if carried, would be to rescind any motion which has already passed the Council, shall be entertained during the same Municipal year, unless a call of the Council has been duly made for that purpose; and no such motion, for rescinding any resolution of the Council, which has been negatived by the Council, shall be again put during the same Municipal year.

25. A debate may be adjourned to a later hour of the day, or to another day specified, and the member moving the adjournment shall be entitled to pre-audience on the resumption of the same.

26. Upon the opening of any tender, or appointment of any officers, strangers may be ordered to withdraw; and in all divisions every member shall be compelled to vote; any member refusing to comply with the above law, when called upon by the Mayor or Chairman to do so, shall be liable to a penalty of not less than £1, or more than £5, to be recovered in the same manner as any other penalties.

27. Notices of motion may be given at any meeting of the Council, or to the Town Clerk two days before the meeting of the Council at which the motion is intended to be made: Provided no motion, of which notice has been given, may be moved, unless a copy of such notice be sent by the Town Clerk to each member of the Council, at least two days previous to the meeting, proof of posting to be considered as delivery.

28. The Town Clerk shall enter in a book to be kept for that purpose, and to be called the Notice Book, all notices of motion in the order in which they are received, and such notices to be signed by the Alderman giving such notice, and no motion shall be entertained by the Council, except as above.

29. No discussion shall take place on a notice of motion.

#### *Petitions.*

30. On the presentation of a petition no debate shall take place until notice has been given in the usual manner; and the only question that can be entertained by the Council on the day of its presentation, shall be its reception or reference to a Committee.

31. Any Alderman presenting a petition shall acquaint himself with the language thereof, and report to the Council that he considers it unobjectionable.

32. Petitions shall be received only as the petitions of parties signing the same.

#### *Committees.*

33. No Committee of the Council shall consist of more than five elected members, three of whom shall form a quorum, except when the Council at its meetings resolve itself into a Committee of the Whole. The Mayor shall be *ex officio* a member of all Committees.

34. The Chairman of the Committee shall be the convener thereof, and he may direct the Town Clerk to call meetings whenever he shall think it expedient.

35. The appointments of Special Committees shall continue until the specific duties for which they were appointed shall have been discharged, providing that such Committee may at any time be dissolved by a vote of the Council.

36. That the orders of the Council be observed in a Committee of the whole Council, except the order limiting the number of times of speaking.

37. Every report of the Committee shall be signed by the Chairman thereof.

#### *Appointment of Officers.*

38. No officer shall be appointed until a specification of his duties and the amount of his salary shall be approved of by the Council; and no appointment of any officer shall take place until one week's notice at least shall have been given in one or more of the local papers, inviting applications for the same, according to such specification.

39. All officers shall be required to give security to the Council for the due performance of the duties according to the terms of the specification.

40. The Town Clerk shall have charge, at the Town Hall, of all books, stationery, charters, deeds, muniments, and records of the Corporation or relating thereto.

41. The Mayor shall have custody of the Corporation seal and shall affix it to all documents creating obligations on the Council, in the presence of the Town Clerk, each impression thereof being duly verified by the signature of that officer, and the seal not to be affixed to any document, except having the signature of the Mayor.

42. The Treasurer shall immediately, or within 24 hours after the receipt of moneys (when possible), deposit the same in a Bank to be named by the Council, to the credit of the Corporation; and his cash-book, and the Bank pass-book balanced shall be laid before the Council at its meetings.

43. No work affecting the funds of the Municipality shall be undertaken until the probable expense be first ascertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee, and reported on by them before any warrant shall be issued for the payment thereof, which warrant shall be signed by the Mayor or Chairman: Provided always, that in cases of emergency, a warrant may be granted by the Mayor, with the assent of any two Aldermen, authorizing the expenditure of any sums not exceeding £20, and such expenditure shall be reported to the Council at its next meeting.

44. No officer or servant appointed by the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without leave from such Council, except as provided by law.

45. In all cases where security shall be required by the Municipalities Act of 1867, the surities offered shall be approved of by the Council, and it shall not be competent for the Council to accept as surity any of its members, or any person holding office under the Council.

46. The rate collector or collectors shall, on every Monday, Wednesday, and Friday, between the hours of 2 and 4 p.m., hand over to the Treasurer the amount received to that time, together with a written statement, detailing the particulars of their collections, duly dated and signed, and shall receive a voucher from that officer, which voucher must be produced to the Finance Committee upon presentation of accounts; and no such account will be attended to unless accompanied by the Treasurer's receipts. Collectors failing to attend as above will be fined 10s. for each offence.

47. All cheques to be signed by the Mayor, Treasurer, and members of the Finance Committee, but no cheques to be issued, except on the production of a warrant authorizing payment—the No. of cheque to be inserted on the warrant, and the No. of the warrant on the butt of the cheque.

48. Any member absenting himself for more than two consecutive meetings of the Council, without leave being previously granted, shall be fined 10s. for that, and similar fined for each subsequent absence.

49. Any member of the Council having given notice of motion, and failing to attend at the proper time, or procuring a substitute, the notice shall be struck from the book.

50. All fines to be paid into the Corporation Fund.

HENRY TEBBUTT,  
Mayor.

Made and passed by the Borough Council of Mudgee,  
on the second day of April, one thousand  
eight hundred and sixty-eight.

H. M. INNES, Town Clerk.

1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF WEST MAITLAND—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 18th May, 1868.

## BOROUGH OF WEST MAITLAND.

BY-LAWS FOR THE REGULATION OF THE PROCEEDINGS OF THE BOROUGH COUNCIL, THE COLLECTION OF RATES, THE PREVENTION AND EXTINGUISHING OF FIRES, THE CARE AND MANAGEMENT OF THE PUBLIC ROADS AND STREETS, THE SUPPRESSION OF NUISANCES AND HOUSES OF ILL-FAME, THE KILLING OF CATTLE AND THE ESTABLISHMENT OF SLAUGHTER-HOUSES, AND FOR THE GENERAL GOOD RULE AND GOVERNMENT OF THE BOROUGH.

WHEREAS, by the Municipalities Act of 1867, section 153, it is amongst other things enacted, that the Council of any Municipality may, from time to time, make by-laws for any of the purposes therein mentioned: And whereas by the 158th clause of the said Act, it is further enacted that all or any such by-laws, being consistent with the provisions of the said Act, and not repugnant to any other Act or law in force within the Colony of New South Wales, shall have the force of law when confirmed by the Governor and published in the *Government Gazette*, but not sooner or otherwise: And whereas the Council of the Municipality of West Maitland have, under the power hereinbefore recited, made by-laws for regulating their own proceedings, the collection of rates, the prevention and extinguishing of fires, the care and management of the public roads and streets, the suppression of nuisances and houses of ill-fame, the killing of cattle and the establishment of slaughter-houses, and for the general good rule and government of the Borough, and the said by-laws having been confirmed by the Governor, with the advice of the Executive Council, in accordance with the said Act, are hereby published in the *Government Gazette*.

HENRY PARKES.

## BOROUGH OF WEST MAITLAND.

BY-LAWS to regulate the proceedings of the Borough Council of West Maitland, the collection of rates, the prevention and extinguishing of fires, the care and management of the public roads and streets, the suppression of nuisances and houses of ill-fame, the killing of cattle and the establishment of slaughter-houses, and for the general good rule and government of the Borough.

## BY-LAWS OF THE BOROUGH OF WEST MAITLAND.

*Preamble.*

WHEREAS it is expedient that provision should be made for regulating the proceedings of the Borough Council of West Maitland, &c., &c., and in accordance with a resolution adopted by the Council of the said Borough on 14th April, 1868, and in virtue of the power and authority vested in them in that behalf, that the following by-laws do now take effect, and that they are hereby established for the purposes aforesaid:—

*Standing Orders of the Borough Council of West Maitland.*

1. The Chairman shall preserve order, and his decision on disputed points of order shall be final.

52—

2. When the Chairman is required or called upon to decide a point of order or practice, he is to state the rule, custom, or precedent applicable to the case, without argument or comment.

3. The Mayor or Chairman for the time-being may take part in all the proceedings of the Council.

4. The Mayor or Chairman shall put all questions to the meeting, and declare the sense of the Council thereon.

5. The Mayor or Chairman for the time-being, in case of an equality of votes, upon any division, shall give a casting vote in addition to his vote as Alderman.

6. If two or more members rise to speak at the same time, the Chairman shall decide which member is entitled to pre-audience.

7. The Chairman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on same question, except in explanation, and without introducing any new matter.

8. The Council shall vote by show of hands, but any Alderman may call for a division upon any question.

9. The Chairman shall, on every motion made and seconded, put the question, first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion, from the show of hands, as to the majority.

10. In special cases, such as the accepting of tenders, the appointment of Committees, or any officers, the Council may, if they deem it expedient, have recourse to the ballot (which may be done on motion without notice), and cause the names of the tenderers or candidates to be written on slips of paper, of which one shall be handed to each Alderman. Having struck out the names of all but those for whom he votes, each Alderman shall fold his paper and hand it to the Chairman. The ballot-papers having been first mixed so as to prevent identification, shall then be examined by the Chairman, in the presence of the Aldermen, and the result ascertained and recorded.

11. Every member shall stand when speaking, and address the Chair.

12. Except in Committees, no member shall speak twice on the same question, unless in explanation when he has been misrepresented or misunderstood: Provided, however, that the mover be allowed to reply; and that every member shall be entitled to speak once on every amendment, as well as on the original motion.

13. No Alderman, when discussing any matter, shall be interrupted, unless by a call to order, when he shall sit down. The Alderman calling to order shall then be heard, and the question of order decided before the debate or any other business is resumed.

14. No Alderman shall digress from the subject under discussion, nor make personal reflections on members, nor impute motives; and all personal reflections shall be considered highly disorderly; and any member so offending shall be required, by the Mayor or Chairman to withdraw the expression, and to make a satisfactory apology to the Council.

15. In all divisions every member present shall be compelled to vote.

16. All divisions of the Council shall be entered in the minutes of the proceedings.

17. Any member may require the question or matter under consideration or discussion to be read, for his information, at any time during the debate, but not so as to interrupt any other member while speaking.

18. The order of the day shall include all business of which due notice has been given, and all matters arising out of former meetings of the Council.

19. Any motion entered on the notice paper and the Alderman who has given notice of the same being absent, and no Alderman having been deputed to bring it forward, such motion, when business is called in order, shall be permitted to lapse.

20. A debate may be adjourned to a later hour of the same day, or to another day specified, and the member moving the adjournment shall be entitled to pre-audience on the resumption of the same.

21. If the Mayor be not present within ten minutes after the time appointed for the meetings of the Council, any Alderman may be elected Chairman for that particular meeting.

22. After the reading and confirming of previous minutes, the presentation of reports and petitions, the reading of correspondence, and the reception of notices of motion, motions of which due notice have been given shall take precedence of all other business of the day.

23. Any number of amendments may be proposed on a motion before the Council; and when more than one amendment is moved and seconded, the question shall first be put on the last amendment, and then on the next to the last, and so on, in the reverse order in which they are moved, except when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance; in which case the lowest sum shall be put first, then the next to the lowest, and so on to the highest.

24. Any motion for adjournment, if seconded, shall be put from the Chair, but if such motion be negatived, it shall not be competent for any member to make a similar motion until half an hour at least shall have elapsed from the moving the one that has been negatived.

25. No notice shall be taken by the Chairman of any motion, unless it be seconded.

26. All notices of motion shall be dated, signed, and given to the Town Clerk, and shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

27. No motion, the effect of which, if carried, would be to rescind any motion which has already passed the Council, shall be entertained for a period of three months from the date of such resolution (excepting matters connected with public works), unless a call of the whole Council has been duly made for that purpose; and no motion for rescinding any resolution of the Council, which has been negatived, shall be again put for three months from the time it has been so negatived.

#### *Petitions.*

28. On the presentation of a petition, no debate shall take place until notice has been given in the usual manner, and the only question that can be entertained by the Council on the day of its presentation shall be, that the petition be received, or that it be referred to a Committee.

29. It shall be incumbent on any member presenting a petition, to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

30. That all petitions be received only as the petitions of the parties signing the same.

#### *Committees.*

31. Besides such special Committees as may from time to time be found necessary, there shall be two Standing Committees, namely, a Finance and an Improvement Committee.

32. No Standing Committee of the Council shall consist of less than three members or more than four (4), three of whom shall form a quorum. The Mayor shall be *ex-officio* a member of all Committees.

33. The Chairman of every Committee shall be the convener thereof, and may direct the Town Clerk to call meetings whenever he shall think it expedient.

34. The appointment of Special Committees shall continue until the specific duty for which they are appointed shall have been discharged, provided that such Committee may at any time be dissolved by a vote of the Council.

35. The orders of the Council shall be observed in Committee of the whole Council, except the order limiting the number of times of speaking.

36. Every report of a Committee shall be signed by the Chairman thereof.

37. The Finance Committee, in addition to the duty of examining all accounts, shall deliberate and report upon all questions affecting the finances of the Municipality, which may be committed to it by a resolution of the Council. It shall be the duty of this Committee to watch generally over the financial affairs and administration of the Municipality, and it shall have the right of calling the attention of the Council by a report to any matters connected with such administration, which may seem to require such attention.

38. The Improvement Committee shall have the general inspection of all public works in progress throughout the Municipality, and shall have the right of calling the attention of the Council by report to any matters connected with such works, or with the state of any public thoroughfare, which may require such attention. It shall also consider and report upon any questions of an analogous nature to those which may be referred to it by a resolution of the Council.

39. Every Committee shall have a right to take evidence upon any question or questions of fact referred to it by a resolution. A minute of the evidence thus taken, or of its substance, must, however, in all cases of this character, be appended to the Committee's report.

40. The Standing Committees shall be appointed within thirty days after the commencement of each municipal year.

41. Any member moving for a Special Committee may propose certain Aldermen as members of the same; but if demanded, the selection of the Committee shall be made by ballot.

42. Every member proposing the appointment of a Select Committee, and naming its proposed members, must name himself as one of them.

*Miscellaneous Regulations.*

43. In cases where security is required by the Municipalities Act of 1867, the sureties offered shall be approved by the Council; and it shall not be competent for them to accept as surety any of its members, or any person holding office under the Council; and in all cases in which security for due and faithful performance of any duty or contract is required, the expenses of preparing the bond for such security shall be borne by the Council.

44. No work affecting the funds of the Corporation shall be undertaken until the probable expense be first ascertained by the Council; and all accounts to be paid by the Council shall be examined by the Finance Committee and reported on by them, before any warrant shall be issued for the payment thereof: Provided always, that in cases of emergency, the Mayor, with the assent of any three Aldermen, may authorize the expenditure of any sum not exceeding ten pounds, and such expenditure shall be reported to the Council at its next sitting.

45. The Treasurer's accounts and the bank book of the Council shall be laid before the Council at the first meeting of each quarter, or oftener, if required by the Council.

46. No officer appointed by the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council, to any person not a member of the Council, without leave from such Council, except as otherwise provided by law.

47. No by-laws shall be decided on without due notice, as in cases of motions.

48. Any member may record his protest against any decision of the Council, provided the same be made in writing before the next meeting of the Council, and couched in respectful language, and be consistent with truth. Notice of such intention, however, must be given on the adoption of the resolution.

49. No election to any paid office at the disposal of the Council shall take place, until seven days' notice be given in a local newspaper, inviting applications for the same.

50. The Town Clerk shall have the charge of the common seal of the Corporation, and shall be responsible for the safe custody and proper use of the same,—each impression thereof being duly verified by the signature of that officer; and he shall not affix the seal to any corporate documents without the express order of the Council, nor unless such document have the signature of the Mayor.

51. Any one or more of the standing orders of the Council may be suspended *pro tempore*, in cases of emergency, provided that the majority of the members present deem it necessary.

*Collection of Rates.*

52. The rates shall be levied and collected half-yearly, and shall be held to be due and payable on and after such day as the Council shall by resolution appoint from time to time.

53. All persons liable to pay any rates or assessments, shall pay the amount within the time prescribed by the Act, into the office of the Council Clerk, during office hours.

54. It shall be the duty of the Town Clerk to furnish the Council with a list of the names of all persons whose rates are unpaid at the expiration of the notice thereof given pursuant to the Municipalities Act of 1867.

*The Bailiff and his duties.*

55. The bailiff shall be appointed by a resolution of the Council, and may at any time be removed in a similar way.

56. The bailiff shall find two sureties, to the satisfaction of the Mayor, to the extent of fifty pounds each, for the faithful performance of his duty.

57. The bailiff shall make all levies and distresses for the recovery of rates under warrant, in the form of the schedule hereto annexed and marked with the letter A, under the hand of the Mayor or any person who may for the time-being be duly authorized to perform the duties of that office.

58. At the time of making a distress, the bailiff shall forthwith make out a written inventory, in the form or to the effect of the schedule annexed hereto and marked with the letter B, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her

behalf, resident at the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made, and the bailiff shall give a copy of the inventory to the ratepayer, on demand, at any time within one month after the making of such distress.

59. It shall be lawful for the bailiff, and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of five days, it shall be lawful for such bailiff to sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Municipality as the said bailiff may think proper to remove them to for such purpose; and the surplus (if any) that may remain, after deducting the amount of the sum distrained for, together with the expenses attendant upon such distress, shall be paid over, on demand, to the owner of the goods so sold: Provided always, that nothing herein contained as to the time of sale shall apply to any corn, grass, hops, roots, fruits, pulse, or other product whatever, which may be growing at the time of the same being seized as a distress.

60. The bailiff, in making a distress as aforesaid, may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places or in such part of the land or premises chargeable with the rate as shall be most fit and convenient for this purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

61. The owner of any goods so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods and chattels shall in such case be put up for sale, according to such direction.

62. The bailiff shall hand over to the Council Clerk all proceeds of such distresses within forty-eight hours after having received the same.

63. The bailiff, with the sanction of the Mayor of the Borough, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise, for the time being, all the powers of the bailiff himself; but the bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

64. The bailiff shall be paid for every levy made under these by-laws, according to the schedule hereunto annexed marked C.

*SCHEDULE A.**Warrant of Distress.*

I, the Mayor of the Municipality of West Maitland, do hereby authorize you, bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of situate at \_\_\_\_\_ being the amount of municipal rates due to the Borough to the day of \_\_\_\_\_ for the said dwelling-house, land, or premises, as the case may be, and to proceed thereon, for the recovery of the said rates, according to law.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_\_ Mayor.

*SCHEDULE B.**Inventory.*

I HAVE this day, in virtue of a warrant under the name of the Mayor of the Municipality of West Maitland, dated \_\_\_\_\_ distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of situate at \_\_\_\_\_ within the Borough of West Maitland, for the sum of \_\_\_\_\_ being the amount of rates due to the said Municipality, to the day of \_\_\_\_\_ 18 \_\_\_\_\_ Dated this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_\_ Bailiff.

## SCHEDULE C.

*Fees to Bailiff.*

For making entry and inventory, five shillings; if in possession more than five hours, five shillings additional; and for every subsequent day, whilst in possession, five shillings; and five per cent. on the net amount of sale.

*Prevention and extinguishing of fires.*

1. No householder shall place, or knowingly permit to be placed in any house, yard, workshop, out-offices, or other premises, fire, powder, or combustible materials of any kind, in such a manner as to endanger contiguous buildings.

2. It shall be lawful for the Mayor, upon the representation of one or more householders that fire is being used to the danger of contiguous buildings, to cause a notice in writing to be served upon, or left at the residence of, the owner or occupier of the premises on which any such fire may exist, and direct (if the urgency of the case should require it) that the said fire shall be removed at once, or within any reasonable time afterwards, which he might deem expedient.

3. Any such householder, however, shall have the right to shew cause (except in what may as already related be considered urgent cases) why the said or any such fire should not be removed; and the opinion of a majority of the Council, in such cases, shall be final.

4. In every case in which it shall be made to appear to the satisfaction of any Justice of the Peace, that the chimney of any house or building within the limits of the Municipality has taken fire, from the occupier of any such house or building having omitted to cause such chimney to be regularly and sufficiently swept and cleaned, or from any other neglect of such occupier, or of his or her servant or servants, such occupier shall, on conviction before any such Justice of the Peace, forfeit and pay for every such offence any sum not exceeding forty shillings, to be recovered by distress and sale of the offender's goods and chattels. And in every such case, the proof that any such chimney did not take fire through the neglect of such occupier in not having the same regularly and sufficiently swept or cleaned shall be upon such occupier.

*Care and management of the public roads and streets and public thoroughfares of the Borough.*

1. All roads and public thoroughfares, streets, and lanes, within the Municipality, which have been, or hereafter may be, duly proclaimed or marked out, or in actual public use as such, shall be from henceforth under the charge and care of the Borough Council.

2. The Surveyor of the Municipality, duly appointed by the Council thereof, or any person acting for him, shall be the proper person for marking out, when necessary, any roads, streets, or thoroughfares, in actual public use as such within the Borough. In marking out such roads, streets, or thoroughfares, recourse shall be had, when practicable, to the plans under which lands with frontage to the road, street, or thoroughfare in question, shall have been sold; and it shall be the duty of the Surveyor, or any person acting for him, to place posts at the corners or intersections of any roads, streets, lanes, or thoroughfares, wherever the same may be considered necessary or desirable by the Municipal Council, so as to give a width of forty-two feet at least for the carriage-way, and twelve feet at least for the foot-way, on each side, when the street shall be sixty-six feet wide; and in proportion, and in the discretion of the said Surveyor, or person acting for him, in any public roads, streets, lanes, or thoroughfares of other width than sixty-six feet.

3. Whenever any road, street, or lane, has been marked out in the manner herein provided, no house, shop, fence, or other structure, shall be erected or allowed to project or encroach on any part thereof.

4. Whenever any footways shall have been marked out, the Surveyor or person acting for him, may, with the sanction of the Council, cause the same to be levelled and made as nearly as practicable of equal height and breadth, and with an equal slope and inclination; and for this purpose may remove any flagging, steps, or other matter or thing that may injure or obstruct the said foot-way, or render it unequal or inconvenient, and which now is, or may hereafter be erected or placed on the space marked out for any of the said footways.

*Obstructions and encroachments.*

5. The Surveyor may at any time, or the person acting as such, on the order of the Council, and upon due notice of ten days, direct the removal of any building, fence, or other obstruction or encroachment which shall be made in and upon any road, street, lane, or thoroughfare, under the charge of the Council. Notice shall in this case be served, either personally, or at the usual or last known place of abode of the person to whom such obstructive or encroaching structure belongs, or who has erected the same, or caused it to be erected, or who may be in charge of the same.

6. In any case where, after the service of notice for the removal of any obstruction or encroachment as aforesaid, the person causing the same shall not remove it within a reasonable time, it shall be lawful for the Council to direct the removal of the same, under the superintendence of its own proper officer, and at the cost of the owner or of the person thus offending, or of the person who may be in charge thereof: Provided that the expenses thereby incurred shall in no case exceed the sum of ten pounds, to be recovered summarily in manner provided for the recovery of penalties under these by-laws.

7. In case when the obstruction or encroachment cannot be removed unless at a greater cost than ten pounds, it shall be open to the Council either to direct such removal, and to pay all costs thereof above ten pounds, from the municipal funds, or to proceed by action of trespass against the person causing such obstruction or encroachment, or who may be in charge thereof.

8. The foregoing provisions shall be equally applicable to all obstructions by digging or excavation.

9. The Surveyor, or person acting for him, may, at any time, by order of the Council, cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this by-law, either by travelling on, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

10. No person shall be allowed to obstruct any path-way, road, street, or public thoroughfare, within the Municipality, by building materials, drays, carts, goods, merchandise, or anything whatsoever calculated to obstruct or hinder free passage, without the sanction of the Mayor in writing; and no person shall be allowed to leave water-holes or excavations for cellars or other purposes unfenced, or in such a manner as to be dangerous to passers by; and at all places where buildings are being carried on, or where any obstruction to the danger of passers by exists, the person causing such obstruction shall be required to provide lights on either side, and keep the same lighted from sunset to sunrise.

*Trespasses and removal of nuisances, &c.*

1. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, waterhole, river, creek, or canal, or who shall suffer slops, suds, or filth of any kind, to flow from his or her premises into any such watercourse, sewer, waterhole, river, creek, or canal, or who shall permit or suffer any such slops, suds, or filth to flow from his or her premises over any of the footways or streets of the Municipality, or shall permit or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatsoever to flow into any public watercourse, sewer, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any such sewer or watercourse, shall forfeit any sum not exceeding five pounds, and shall pay the cost of removing such filth or obstruction, or of restoring such sewer, river, or watercourse, to its proper channel; such penalty and costs of removal to be recovered summarily in the manner provided for the recovery of penalties under these by-laws.

2. No person shall form, dig, or open any drain or sewer in any public road, street, lane, or thoroughfare, or shall cut up the surface of any such road, street, lane, or thoroughfare, upon any pretence whatever, without leave in writing from the Mayor.

3. No person shall be allowed to throw rubbish, sweepings, or deposits of any kind whatsoever, on the streets, pathways, or gutters of the Borough.

4. No driver, carter, or other person shall wilfully or negligently do, or suffer, or cause to be done, any damage or injury to the curb-stones, gutters, or pathways of any

street or roadway; and no person shall be at liberty to drive a wheel vehicle of any kind, or ride or drive, lead, or stand, or permit to stand, any horse or horses or other animals on the pathways within the Borough.

5. Any person who shall form, dig, or open any drain or sewer on any part of the roads, streets, or thoroughfares of the Borough, or who, from the banks of any of the creeks or rivers which bound the Borough over which the Council may have control, shall remove or cause to be removed any turf, loam, clay, sand, soil, gravel, stone, or other material, without leave in writing first had and obtained from the Council, or who shall break up or otherwise damage any part of the said roads, streets, or thoroughfares, shall, on conviction before any Justice of the Peace, forfeit and pay for every such offence any sum not less than ten shillings nor more than five pounds.

6. Any person who shall damage any public building, wall, parapet, bridge, road, street, sewer, watercourse, sluice-pump, fountain-cock, water-pipe, shoot, embankment, or other public property in possession of the Council, shall pay the costs of repairing the same; such costs to be recovered summarily in the manner provided for the recovery of penalties under these by-laws; and if the same be wilfully done, shall on conviction before any one or more Justices of the Peace, forfeit and pay a sum not less than five shillings and not exceeding ten pounds; and it shall be lawful for any constable or any other person to seize any person whom he shall find in the act of wilfully committing any such offence, and to convey such person to the nearest watch-house, there to be detained until he or she can be brought before a Justice of the Peace, to be dealt with according to law.

*Throwing filth on carriage or foot ways, driving barrows and carriages on pavement, &c.*

1. If any person shall in any street or road throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage-way or foot-way of any such street or road, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other cattle, in or so near to any of the said streets or roads as that any blood or filth shall run or flow upon, or over, or to be on any such carriage or foot way, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the footways of any street or road, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, or any truck or cask, or shall wilfully lead, stand, drive, or ride any horse or other beast upon any of the footways aforesaid, every person so offending, upon conviction before any Justice of the Peace or upon the view of any such Justice, shall forfeit and pay a sum not exceeding forty shillings, nor less than five shillings, for every such offence.

*Awnings.*

1. Nothing in these by-laws contained shall be deemed to prevent any person from placing an awning in front of his or her shop or house: Provided, however, that such awning be not less than 8 feet above the height of the footway in front of such house or shop, and that the posts be placed into the kerb-stone at the outer edge of such foot-way.

*Suppression of nuisances and houses of ill-fame.*

1. No householder or resident shall be permitted, under a penalty of any sum not exceeding ten pounds, to allow his or her premises, yards, closets, or drains, to be offensive or a nuisance to the neighbouring householders or residents.

2. No noisome or offensive trade shall be permitted, under a penalty of any sum not exceeding ten pounds, to be carried on in any premises, to the inconvenience or annoyance of the residents of neighbouring or adjoining houses or premises.

3. Upon representation by any respectable householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance, or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this by-law, to go upon such premises for the aforesaid purpose; and if any such premises shall be found to be a nuisance, or otherwise offensive, notice in writing shall be given to the proprietor or resident of such premises,

that if within seven days after the service of such notice the nuisance shall not be removed, the proprietor, tenant, or occupant of the aforesaid premises shall, upon conviction before any two Justices of the Peace, be liable to any penalty not exceeding twenty pounds.

4. Upon representation by any respectable ratepayer, that the house or neighbouring or adjoining premises is of ill-fame, it shall be lawful for the Mayor and any Alderman to cause the residents of such house or premises to furnish to the Council a list of names, ages, sex, birthplace, and occupation of all the inmates of the said house or premises; and upon non-compliance with such request, or if, upon consideration, the Mayor and any Alderman consider the house to be one of ill-fame, they shall, with the sanction of the Council, declare the same to be a nuisance; and the Mayor shall cause a notice in writing to be served upon such householders or residents to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice, otherwise they shall, upon conviction before any two Justices of the Peace, be liable to any penalty not exceeding ten pounds for every day, or part of a day, during which such nuisance shall remain unabated within the Municipality.

5. Any owner or occupier of any house or place who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance, by offensive smell or otherwise, shall forfeit, upon conviction before any two Justices of the Peace, and pay a sum not exceeding forty shillings for every such offence.

6. For preserving the cleanliness of the said Borough and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any officer appointed by the Council, by any writing under the hand of the Mayor, from time to time, and when and as often as he or the Council shall see occasion, to visit and inspect the butchers' shambles and slaughter-houses, and to give such directions concerning the cleansing such shambles and slaughter-houses, both within and without, as to him or the said Council shall seem needful; and any butcher, and the owner or occupier of any such shambles or slaughter-houses, who shall obstruct or molest any such officer in the inspection thereof, or who shall refuse or neglect to comply with such directions within a reasonable time, shall, upon the view of any Justice of the Peace, or on conviction on the complaint of any such officer, forfeit and pay any sum not exceeding forty shillings.

*Swine, horses, goats, &c., not suffered to wander about the streets.*

1. It shall not be lawful for any person whatsoever to suffer any kind of swine, or any horse, ass, mule, sheep, or goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any road, street, or public place; and any person who shall so offend shall forfeit and pay, in respect of every such animal, a sum not exceeding forty shillings: Provided that, after due inquiry shall have been made and the owner thereof cannot be discovered, it shall be lawful for the said Council, or the proper officer of the said Council, to destroy, or cause to be destroyed or impounded, any kind of goats or swine so straying as aforesaid.

*Hog-sties and nuisances not removed on complaint.*

1. In case any privy, hog-sty, boiling-down, or any other matter or thing which shall at any time or times hereafter be in any place within the said Municipality shall be or become a nuisance, it shall be lawful for the said Council, upon complaint thereof to them, made by any of the inhabitants, and after due investigation of such complaint, by notice in writing, to order that such privy, hog-sty, boiling-down, or other matter or thing being a nuisance, shall be remedied and removed within seven days after such notice shall have been given to the owner or occupant of the said premises wherein such nuisance shall exist, or shall have been left for such owner or occupier at his or her last or usual place of abode, or on the said premises; and every such owner or occupier neglecting to remedy or remove such nuisance, pursuant to such notice and to the satisfaction of the Council, shall, on conviction, forfeit and pay any sum not less than one pound nor more than ten pounds for every such neglect or disobedience. And also it may be lawful for the said Council to indict, or cause to be indicted, for such nuisance, such person so neglecting or disobeying any such notice, at the then next Court of General or Quarter Sessions to be held

in or nearest to the said Municipality; and such person or persons being found guilty thereof, such nuisance or nuisances shall be removed, taken down, and abated according to the law with regard to public or common nuisances.

*Drawing or trailing timber, &c.*

If any person shall haul or draw, or cause to be hauled or drawn, upon any part of the streets, roads, or public places, any timber, stone, or other thing, otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon wheeled carriages, to drag or trail upon any part of such streets or public places to the injury thereof, or to hang over any part of any such carriage, so as to occupy or obstruct the street or road beyond the breadth of the said carriage, every such person so offending shall, upon conviction, forfeit and pay for every such offence a sum not exceeding forty shillings over and above the damages occasioned thereby; and it shall be lawful for any constable or any other person to apprehend any person whom he shall find in the act of committing any such offence, and to convey such person before any Justice of the Peace, to be dealt with according to law.

*Cellars or openings beneath the surface of footways prohibited, &c.*

It shall not be lawful for any person to make any cellar, or any opening, door, or window in or beneath the surface of the footway of any road, street, or public place; and if any person shall offend in the premises he shall forfeit and pay any sum not exceeding five pounds over and above the expenses of remedying or removing any such cellar, opening, door, or window, such expense to be assessed and allowed by the convicting Justice or Justices.

*Wells to be covered over, &c.*

Every person who shall have a well situated between his dwelling-house, or the appurtenances thereof, and any road, street, or footway within the limits of the said Borough, or at the side thereof, or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall, on conviction before any Justice of the Peace, forfeit and pay the sum of five shillings for every day that such well may remain open or uncovered contrary to the provisions hereof.

*Enclosures around scaffolding.*

If any person shall dig or make, or cause to be dug or made, any hole, or leave, or cause to be left, any hole in or adjoining to any street, road, or public place, for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, and shall not forthwith enclose the same in a good and sufficient manner, or shall keep up or cause to be kept up and continued, any such enclosure for any time which shall be longer than shall be reasonably required, or shall not, when thereunto required by the said Council or its officer, well and sufficiently fence or enclose any such hole within twenty-four hours after he shall be required to do so by the said Council or officer, and in the manner and with such materials as they or he shall direct, and to their or his satisfaction, and shall not place a light upon the said enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, or shall fail to place or erect a fence, rail, or boarding, around any scaffolding or ladder that may be required, during the repairs or erection of any building (such fence, rail, or boarding, not to extend beyond the footway of any street), or fail to keep, during the existence of such fence, rail, or boarding, a light burning from sunset to sunrise at each corner of the same, then and in every such case the person so offending shall, on conviction before any Justice of the Peace, forfeit and pay for every such offence, and for every such refusal or neglect, any sum not exceeding five pounds.

*Erections, &c., in front of public streets, roads, &c.*

No person shall build, erect, put up, or remove, or cause to be built, erected, put up, or removed, any building, house, shop, warehouse, wall, or fence, fronting any

public street, road, or thoroughfare, unless he shall have previously given seven days' notice of his intention to commence such works, to the Mayor or the Council Clerk of the Municipality; and any person so offending shall, upon conviction before a Justice of the Peace, pay for every such offence any sum not less than ten shillings nor more than forty shillings.

*Slops, nightsoil, &c., to be conveyed away only at certain hours, &c.*

If any person or persons shall drive, or cause to be driven, any cart or other carriage, with any nightsoil or ammoniacal liquor therein, through, or in any of the streets or roads or public places within the said Borough, between the hours of five o'clock in the morning and ten o'clock at night, or shall fill any cart or other carriage so as to turn over or cast any nightsoil, ammoniacal liquor, slop, mire, or channel dirt or filth, in or upon or near to any of the said streets or other public places, it shall and may be lawful for any person whomsoever to seize and apprehend, and to assist in seizing and apprehending the offender, and to convey him before any Justice of the Peace; and in order to prevent nuisances, it shall not be lawful for any person to deposit nightsoil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house, than shall be directed by the said Council or their officer; and all nightsoil or other offensive matter shall be removed within the hours before prescribed, in properly covered and water-tight carts or other vehicles; and no vehicle used for this purpose shall be allowed to stand on any premises nearer to any road, street, or dwelling-house, than shall be directed by the said Council or their officer; and every person so offending shall, for every such offence, forfeit and pay any sum not exceeding five pounds; and in case the person so offending cannot be apprehended, then the owner of such cart or carriage in which such nightsoil, ammoniacal liquor, slop, filth, mire or channel dirt, shall be put or placed, and also the employer of the person so offending, shall be liable to, and forfeit and pay such penalty as aforesaid.

*Interrupting free passage, &c., driving on wrong side of road, &c.*

If the driver of any waggon, wain, cart, or dray of any kind, shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver, or guided with reins only excepted), or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation whilst it shall be passing upon such street, that he cannot have the direction and government of the horse or horses, or cattle drawing the same, or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street or thoroughfare, or if any person shall in any manner, wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same, every such driver or person so offending shall, upon conviction before any Justice of the Peace, forfeit and pay any sum not exceeding forty shillings; and it shall be lawful for any constable to seize and convey any person so offending, before any Justice of the Peace, to be dealt with according to law.

*Furious or careless driving, &c.*

Any person who shall ride or drive through or upon any road, street, or public place, negligently, carelessly, or furiously, so as to endanger the life or limb of any person, or to the common danger of the passengers, shall, on conviction before any Justice of the Peace, forfeit and pay any sum not exceeding ten pounds.

*Leading animals on footpaths, &c.*

Any person who shall lead, drive, or stand, or permit to stand or ride any horse or other animal upon any of the footways of any of the streets or roads of the Borough, shall, upon conviction before any Justice of the Peace, forfeit and pay any sum not exceeding forty shillings nor less than five shillings.

*Affixing placards on walls; and chalking thereon.*

It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, house, or building, by chalk or paint, or in any other manner, unless with the consent of the owner thereof; and any person who shall be guilty of any such offence shall, on conviction before any Justice of the Peace, forfeit and pay any sum not exceeding forty shillings nor less than five shillings.

*Hours for cattle-driving.*

No person shall drive through any street or public thoroughfare of the Borough any live stock between the hours of 6 o'clock a.m. and 6 o'clock p.m., during the months of May, June, July, and August, nor between the hours of 6 o'clock a.m. and 8 o'clock p.m. during the other months of the year, except calves and foals under the age of one year, quiet milch cows, horses, or cattle, broken to draft or saddle, and known as such, and pigs and goats. Any and every person or persons who shall drive or cause to be driven any live stock, except those above enumerated, through any street or public thoroughfare of the Municipality, between such hours, shall, on conviction before any Justice of the Peace, forfeit and pay any sum not exceeding five pounds for every such offence: Provided always, that the burden of proving that all or any such live stock as aforesaid, driven through any street or thoroughfare within the prohibited hours aforesaid, fall within the exception above specified, shall be cast upon the party or parties driving such live stock.

*Swine not to be kept.*

It shall not be lawful for any person whomsoever to breed, feed, or keep any kind of swine in any house, building, yard, garden, or other hereditaments situate and being in or within forty yards of any street or public place in the Borough; and any person who shall so offend shall, on conviction, forfeit and pay for every such offence any sum not exceeding forty shillings, nor less than five shillings.

*Open spaces and steps adjoining the footways to be enclosed, under penalty.*

Every owner or occupier of any house, building, or premises, having any entrance, area, garden, or other space open adjoining the footway of any street or public place, within the Municipality, beneath the level of the kerbstone or exterior edge of such footway, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and re-passing; and further, that every such owner or occupier of any such house, building, or other premises having any steps adjoining or upon the footway of any street or public place, shall in like manner protect and guard the same by rails or other inclosures, so as to prevent the like danger to persons passing and re-passing; and in failure thereof, every such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay any sum not being less than forty shillings nor more than five pounds.

*Carrying carcasses of newly-slaughtered meat, &c.*

Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place, the carcass, or any part of the carcass, of any newly-slaughtered animal, without a sufficient and proper cloth covering the same for the concealment from public view, shall be liable, on conviction, to a penalty of any sum not exceeding two pounds for every such offence.

*Rain not to be carried to footways.*

It shall not be lawful for any person whomsoever to carry, by means of pipes, gutters, or other contrivances, any rain-water from the roof of his or her premises or house, nor permit nor suffer any rain-water to drop from the roof of his or her premises or house, upon any part of the footways of any street or public place within the Borough. And any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances, when required to do so by any municipal officer, shall, on conviction, forfeit and pay any sum not exceeding ten shillings, and a like sum for every day or part of a day that the same shall not be remedied or removed: Provided that the owner or occupier of any such house or premises may convey any such rain-water by means of pipes laid under the surface of any such footways into the gutters adjoining

the same: And provided also, that all such pipes shall be laid down to the satisfaction of and under the superintendence of the Town Surveyor, or any other person appointed by the Council.

*Breaking horses, &c.*

It shall not be lawful for any person or persons, in any street or public place within the Municipality, to drive any carriage or carriages for the purpose of breaking, exercising, or trying horses, or to ride, drive, or lead any horse, mare, or gelding, for the purpose of airing, exercising, trying, breaking, showing, or exposing for sale any such horse, mare, or gelding, otherwise than by passing quietly through such streets or public places: Provided further, that no person or persons shall be allowed within the said Borough to furiously or carelessly drive any horse, mare, or gelding to or from any public watering-place, creek, or river; and the person or persons in charge thereof, and who shall be *prima facie* presumed to be the owner of the said animal or animals, and shall be liable accordingly. And every person so offending, upon conviction before any Justice of the Peace, shall forfeit and pay for every such offence any sum not exceeding forty shillings nor less than five shillings.

*By-laws for the regulation of Slaughter-houses.*

1. Every Inspector of Slaughter-houses and of animals intended to be slaughtered within the Borough of West Maitland shall, upon receiving due notice thereof, inspect all animals intended to be slaughtered, and shall particularly describe the colour, mark or marks, brand or brands, and sexes, together with the name of the owner or owners thereof, which particulars he shall carefully enter, or cause to be entered, in a book to be kept for that purpose, and which book such Inspector shall produce, when required, for examination by the Council or any Justice of the Peace, Inspector, sub-inspector, sergeant of police, or any other police officer.

2. The owners or occupiers of slaughter-houses shall give the Inspector at least six hours' notice, in writing, of the number of cattle intended to be slaughtered at any particular time; and for every head of cattle slaughtered prior to inspection, the person or persons slaughtering or causing the same to be slaughtered shall pay a penalty of not less than forty shillings nor more than five pounds.

3. The Inspector shall only inspect cattle for slaughter in the yards adjoining licensed slaughter-houses.

4. Any person found slaughtering animals without being duly licensed shall be liable to a penalty not exceeding five pounds for every such offence; and no person shall be permitted to slaughter cattle, sheep, or pigs, intended for sale within the Borough, except at a duly licensed slaughter-house.

5. The only form of license necessary shall be a certificate under the hand of the Mayor, countersigned by the Council Clerk, that the necessary fee has been paid, and that the person or persons for whom it has been so paid is henceforward permitted to slaughter; but no such license shall be issued or granted for any other slaughter-house within the limits of the Borough than for any now in existence at the passing of these by-laws.

6. The license fee shall be 2s. 6d. per annum.

7. The license shall be in force twelve months from the 1st January in each year.

8. Nothing herein contained shall extend to or affect any person or persons slaughtering at his, or her, or their own residences within the Municipality, animals for his, or her, or their family, servants, or labourers.

9. The owner or occupier of any slaughter-house within the Municipality of West Maitland, used for the slaughter of animals intended for human food, shall keep the milts or spleens and lungs of all animals slaughtered in the said slaughter-house for a period of six hours after the animals have been slaughtered, unless the Inspector of Slaughter-houses shall have previously examined the milts or spleens and lungs of such slaughtered animals. And any such owner or occupier as aforesaid who shall neglect or refuse so to do, shall forfeit and pay a penalty of not less than forty shillings nor more than twenty pounds.

10. Every person who may from time to time be in that behalf appointed by the West Maitland Municipal Council, shall be the Inspector of Slaughter-houses within the Borough of West Maitland; and such Inspector shall from time to time enter into and examine all such slaughter-houses, and the milts or spleens and lungs and carcasses of all animals slaughtered, or any animals intended to be slaughtered therein.

11. It shall be lawful for any such Inspector, appointed or to be appointed as aforesaid, to ask, demand, and receive the sum of three-pence for each and every head of cattle or skin, and one penny for each and every head of sheep, pig, calf, and lamb inspected by him under the authority of these by-laws, to be paid by the keeper of such licensed house or place, and to be recovered before any one or more Justice or Justices of the Peace.

12. Any person who shall assault, resist, or obstruct any such Inspector of Slaughter-houses when in the execution of his duty, or shall aid, abet, or incite any person so to do, shall, for every such offence, forfeit and pay a penalty of not less than twenty shillings nor more than ten pounds.

13. The blood, offal, and filth of all such animals as may be slaughtered in any such slaughter-house and premises used therewith, shall be removed at least once in every twelve hours; and any owner or occupier of any such slaughter-house who shall fail, neglect, or refuse to comply with this by-law, shall, for every such offence, forfeit and pay a penalty of not less than forty shillings nor more than ten pounds.

14. If the owner or occupier of any such slaughter-house shall knowingly cause, permit, or suffer any animal infected with any disease affecting the milt or spleen, or lungs, to be slaughtered in any such slaughter-house, or if, after the slaughter of any animal, it shall be found to be diseased, and such owner or occupier, as soon as the animal is inspected and condemned, shall not immediately thereupon cause the entire carcass to be destroyed by fire in the presence of the Inspector, such owner or occupier shall, for every such offence, forfeit and pay any sum not exceeding fifty pounds nor less than ten pounds: Provided, however, that should the owner of any animal which may be condemned by the Inspector, object to the decision of that officer, the owner thereof shall be at

liberty to appoint some veterinary surgeon, or other competent person, as arbitrator in his behalf; and in the event of the Inspector and such veterinary surgeon, or other competent person, not agreeing, it shall be lawful and incumbent upon them, under a penalty of ten pounds, to appoint an umpire, whose decision shall be final.

15. All penalties imposed under these by-laws may be sued for and recovered in a summary way before any two Justices of the Peace.

16. The word "animal" shall, for the purposes of these by-laws, be held to include cattle, sheep, pigs, calves, and lambs; and the words "die of any disease" shall be held to apply to all cases of death other than death caused by killing or slaughtering.

17. All penalties recovered under any of these by-laws shall be paid over to the Council Clerk, to be appropriated towards the Borough funds.

All fines, penalties, and forfeitures, incurred under these by-laws may, unless otherwise provided for, be recovered in a summary way, by distress and sale of the offender's goods, before any two Justices of the Peace in Petty Sessions, according to the provisions of the Act 14 Victoria, No. 43, and the Acts therein adopted; and all such fines, penalties, and forfeitures, when recovered as aforesaid, shall be paid into the corporate fund of the Borough; and no person shall be liable to any penalty, fine, or forfeiture, under this Act, unless proceedings in respect thereof be commenced within six months after the same shall have been incurred.

Made and passed by the Borough Council of West Maitland, this 14th day of April, one thousand eight hundred and sixty-eight.

JOHN LEE, Mayor.

JAMES FULLFORD, JUNR., Council Clerk.

1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF NEWCASTLE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 23rd June, 1868.

## BOROUGH OF NEWCASTLE.

BY-LAWS, TO REGULATE, BY MEANS OF STANDING ORDERS, THE PROCEEDINGS OF THE COUNCIL OF THE BOROUGH OF NEWCASTLE.

THE following By-laws, made by the Council of the Borough of Newcastle, to regulate, by means of Standing Orders, the proceedings of the said Council, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

## BOROUGH OF NEWCASTLE.

BY-LAWS, to regulate, by means of Standing Orders, the proceedings of the Council of the Borough of Newcastle.

*Order of business.*

1. Confirmation of the minutes of last meeting, upon which no discussion shall be allowed, except as to the accuracy thereof.
2. Reading of copies of letters sent by authority of Council.
3. Reading of letters received, and considering and ordering thereon.
4. Reception and reading of petitions and memorials.
5. Reception and reading of reports from Standing or Special Committees.
6. Consideration of all business standing over from, or arising out of, former meetings.
7. Motions, of which previous notice has been given.

*General duties of the Mayor or Chairman.*

8. The Mayor or presiding Alderman shall preserve order, and his decision on disputed points of order shall be final.
9. When the Mayor or presiding Alderman is called upon to decide a point of order or practice, he is to state the rules applicable to the case, without argument or comment.
10. Whenever any matter of order arises, it shall be immediately taken into consideration.
11. The Mayor or presiding Alderman shall put all questions, and declare the sense of the Council thereon.
12. If two or more members rise to speak at the same time, the Mayor or presiding Alderman shall decide which member is entitled to pre-audience.
13. The Mayor or presiding Alderman shall, on every motion made and seconded, put the question first in the affirmative and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

14. The Mayor or presiding Alderman shall, without waiting for the interposition of any member of the Council, call to order any member who shall use any expressions capable of being applied offensively to any other member; and the member so offending shall be required to withdraw the expressions, and to make a satisfactory apology to the Council.

*Committees.*

15. Besides such special Committees as may from time to time be found necessary, there shall be two Standing Committees, namely, a Finance Committee and an Improvement Committee.

16. The Standing Committees shall be appointed for each municipal year, within one month after the election of the Mayor, and any vacancies occurring therein during the year shall be filled up by the election of another member by the Council.

17. No Committee shall consist of less than three nor more than five members, except when the Council shall resolve itself into a Committee of the whole. A majority in every case to form a quorum.

18. Every Committee, of which the Mayor is not a member, shall choose its own Chairman; and the Chairman of every Committee shall be the convener thereof, and may at any time direct the Town Clerk to summon meeting of such Committee.

19. Every Committee shall be chosen by ballot in manner following, viz.: A list of the names of all the members of the Council shall be furnished by the Town Clerk to every member present, who shall then strike out the names of all members except those for whom he votes; and having folded the paper, he shall hand the same to the Mayor or Presiding Alderman, who, having mixed the papers so as to prevent identification, shall open and inspect them in the presence of the Council, and the result shall be recorded in the minute book.

20. Reports from Committees shall not be taken into consideration, nor adopted without notice in the usual way; but the question of the reception of any report may be moved, and (if seconded) put at once.

21. All reports from Committees shall be fairly written upon foolscap paper, for the convenience of filing or binding, and shall be signed by the Chairman of such Committee.

22. The Improvement Committee shall have the general inspection of all public works in progress throughout the Borough, and shall have the right of calling the attention of the Council, by report, to any matter connected with such works, or with the state of any public thoroughfare, which may seem to require such attention. It shall also consider and report upon any question of an analogous character, which may be referred to it by a resolution of the Council.

23. The Finance Committee shall examine all accounts for payment, before any cheque shall be issued for payment thereof, and report upon them to the Council.

24. The Finance Committee shall also deliberate and report upon all questions affecting the finances of the Borough which may be committed to it by a resolution of the Council. It shall be the duty of this Committee to watch over generally the financial administration of the Borough; and it shall have the right of calling the attention of the Council, by report, to any matters connected with such administration, which may appear to require such attention.

25. The orders of the Council shall be observed in all Committees, except the order limiting the number of times of speaking.

26. The appointment of Special Committees shall continue until the specific duties for which they are appointed shall have been discharged, unless the Council shall deem it necessary to dissolve such Committee.

#### *Motions and Amendments.*

27. No notice shall be taken by the Mayor or Presiding Alderman of any motion or amendment, unless it be seconded.

28. If the proposer of any motion be absent when the same is called on in order, and has not deputed any member to take charge of it for him, such motion shall be struck off the business paper.

29. No motion, the effect of which, if carried, would be to rescind or be repugnant to any resolution which has been passed by the Council, shall be moved without express notice, and a call of the whole Council for a particular day to be named for that purpose; and no such motion, if negatived, shall be again entertained during the same municipal year.

30. Any motion for adjournment shall be immediately put without discussion; but if such motion be negatived, it shall not be competent for any member to make a similar motion until half an hour at least shall have elapsed from the moving the one that has been negatived.

31. When a motion has been proposed and seconded it shall be the property of the Council, and shall not be withdrawn without the consent of the Council.

32. That whenever an amendment is made upon an original proposition, no second amendment can be taken into consideration until the first amendment is disposed of.

33. When an amendment is carried it only displaces the original question, and so becomes itself the question for consideration, whereupon any further amendment may be moved, and such further amendment being received, then the mover of the amendment which has displaced the original question will be entitled to a reply, and the like course will be pursued as to any further displacing and fresh amendment.

34. That if the first amendment be negatived, then a second may be moved to the original question under consideration.

35. All notices of motion must be in writing, dated, and signed by the member making the same, and shall be filed and kept by the Town Clerk until the end of each municipal year, when they may be destroyed.

#### *Divisions.*

36. It shall be competent for any member to divide the Council on any question, both in full Council and in Committees of the whole; and upon such divisions, those who are on the affirmative side shall seat themselves on the right hand of the Mayor or presiding Alderman, and those who are on the negative shall seat themselves on his left hand; and no member shall leave his seat till the names of the members be taken down by the Town Clerk, or person officiating for him.

37. All divisions of the Council or of Committees of the

whole shall be entered on the minutes of proceedings.

38. In all divisions, every member present shall be compelled to vote.

#### *Petitions.*

39. No debate shall take place on the presentation of a petition; but the question of its reception, or that it be referred to a Committee, may be moved and put at once.

40. It shall be the duty of any member presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable.

41. That all petitions be received only as the petitions of the parties signing the same.

#### *Miscellaneous.*

42. Except in Committee, no member shall be allowed to speak twice on the same question, unless in explanation merely; but the mover of any motion shall have the right of reply, without introducing any new matter: Provided, however, that every member shall have the liberty of speaking once on every amendment as well as on the original motion.

43. No member shall digress from the matter under discussion, or make personal reflections on members, or impute motives.

44. A debate may be adjourned to a later hour of the same day, or to another day which may be specified.

45. The member upon whose motion any debate shall be adjourned by the Council, shall be entitled to pre-eminence on the resumption of the debate.

46. Every member shall stand while speaking, and address the Chair.

47. Any member may demand the production of any of the documents of the Council relating to the subject under discussion.

48. Whenever the Council is adjourned for want of a quorum, the names of the members then present, and the hour at which the adjournment takes place, shall be entered on the minutes.

49. Any member may require the question or matter under discussion to be read for his information at any time during the debate, but not so as to interrupt any other member while speaking.

50. Any member may record his protest against any decision of the Council, or ruling of the Mayor or presiding Alderman, provided the same, made in writing before the next meeting of the Council, be in respectful language and consistent with truth. Notice of such protest must, however, be given at the time the decision out of which it may arise is delivered.

51. For the consideration of any by-law, or for the borrowing of money, or for the rescission of any motion previously adopted by the Council, it shall be competent for any member, without previous notice, to move for a call of the whole Council, for the consideration of any such subject, at the next or any subsequent meeting; and upon such motion being carried, due notice thereof shall be given in the business paper of the day.

52. The Mayor and any two Aldermen, or, in the absence of the Mayor from the Municipality, any three Aldermen may, in writing, order any sum, not exceeding twenty pounds, to be expended in repairing any public work under the control of the Council, which may be suddenly damaged: Provided it shall appear to them that such repair cannot be delayed until the next sitting day of the Council; and they may appoint a proper person to execute such repairs: Provided always, that the making of such order shall be reported at the next meeting of the Council, and provided also, that not more than one such order shall be made between the termination of one meeting and the commencement of another.

53. No election to any paid office at the disposal of the Council shall take place until seven clear days' notice shall be given in one or more of the local newspapers inviting applications for the same.

54. The Town Clerk shall have the charge of the common seal of the Corporation, and shall be responsible for the safe custody and proper use of the same—each impression thereof being duly verified by the signature of the Mayor.

55. The Town Clerk shall affix the common seal to all contracts, bonds, and licenses requiring the same, and to all by-laws and addresses to the Governor, and also to all petitions to Parliament passed by the Council, but he shall not affix it to any other document without the authority of the Council.

56. The Council shall vote by show of hands, except in cases of elections—but any member may call for a division.

57. A detailed account of all moneys received and of all sums disbursed on behalf of the Council, up to the end of each month, and also the cash-book and bank pass book, balanced, shall be laid before the Council by the Town Clerk, at each monthly meeting, or oftener, if required.

58. No officer shall be at liberty to shew, lay open, or expose any of the books, papers, or records, to any person not a member of the Council, without leave from the Council, except as otherwise provided by law.

59. Contracts for all public works shall be by tender.

60. Every contractor shall be required to find approved securities for the due performance of his contract.

61. In no case shall the Council accept as surety for the due and faithful performance of any duty or contract, any member of the Council, nor any person holding office or employment under the Council.

62. The Town Clerk shall have the custody of, and shall be responsible for the safe keeping of, all books, charters, deeds, municipal documents, and records of the Corporation, or relating to the property thereof.

63. The monthly meetings of the Council shall be held as by law required—upon the first Monday in every month, at 4 o'clock p.m.

64. Any one or more of the standing orders of the Council may be suspended, *pro tempore*, in cases of emergency, provided that the majority of members present deem it necessary.

Made and passed by the Council of the Borough of Newcastle, on the 20th day of April, 1868.

JAMES HANNELL,

JNO. BURROWS,  
Town Clerk.

Mayor.

1868.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF BALMAIN—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, Sec. 158.

Colonial Secretary's Office,  
Sydney, 12th May, 1868.

## BOROUGH OF BALMAIN.

BY-LAWS FOR THE REGULATION, BY MEANS OF STANDING ORDERS, OF THE PROCEEDINGS OF THE COUNCIL, AND FOR DELEGATING CERTAIN POWERS TO THE MAYOR.

WHEREAS, by the Municipalities Act of 1867, section 153, it is amongst other things enacted, that the Council of any Municipality may, from time to time, make by-laws for regulating their own proceedings, and the duties of their officers and servants, and preserving order at Council Meetings, and for other purposes therein mentioned: And whereas, by the 158th section of the said Act, it is further enacted, that all or any such by-laws, being consistent with the provisions of the said Act, and not repugnant to any other Act or law in force within the Colony of New South Wales, shall have the force of law when confirmed by the Governor and published in the *Government Gazette*, but not sooner or otherwise: And whereas the Council of the Municipality of Balmain have, under the power hereinbefore recited, made the following by-laws for the regulation, by means of Standing Orders, of the proceedings of the Council, and for delegating certain powers to the Mayor, and the said by-laws having been confirmed by the Governor, with the advice of the Executive Council, in accordance with the said Act, the same are hereby published in the *Government Gazette*.

HENRY PARKES.

BY-LAWS for the regulation, by means of Standing Orders, of the proceedings of the Council of the Borough of Balmain, and for delegating certain powers to the Mayor.

## No. 1.—STANDING ORDERS.

*Duties of the Mayor.*

1. If at any meeting of the Council duly held, the Mayor shall be absent at the expiration of fifteen minutes after the time appointed for holding the meeting, the Aldermen present shall forthwith choose one of themselves to preside.

2. All questions duly proposed shall be put by the Mayor or presiding Alderman, and the sense of the Council thereon shall be declared by him.

3. Every such question shall be put first in the affirmative and then in the negative; and this may be done as often as the Mayor or presiding Alderman shall deem necessary for enabling him to determine which side has the majority.

4. If two or more members rise to speak at the same time, the Mayor or presiding Alderman shall decide which of them is entitled to pre-audience.

5. The Mayor or presiding Alderman shall preserve order; his decision on disputed points of order shall be final, unless exception shall be taken thereto by any Alderman, in which case the Mayor or presiding Alderman shall submit the same to the Council for their decision.

*Order of business.*

6. The business of each ordinary meeting of the Council shall be transacted in the following manner, viz. :—

1. The reading and the confirmation of the minutes of the previous meeting.
2. The reading of official correspondence.
3. The presentation of petitions.
4. Reports brought up from Committees.
5. Miscellaneous business.
6. Motions of which notice has been given.
7. Notices of motion to be given.
8. Orders of the day.
7. The question for confirming the minutes of the previous meeting shall be proposed by the Mayor or presiding Alderman immediately upon their being read, and shall be to the effect that the minutes now read are a correct record of the proceedings; and no discussion shall be allowed thereon, except on the point of accuracy.
8. The orders of the day shall comprise all business set down for the day by order of any previous meeting, or necessarily arising out of the proceedings of a former meeting, or the consideration of such matters as the Mayor may deem necessary to bring before the Council.

*Rules of Debate.*

9. Every member shall stand when speaking, and shall address the Chair.

10. Except in Committee, no member shall speak more than once on the same question, unless in explanation when misrepresented or misunderstood: Provided, however, that the mover of any question shall be allowed the liberty of reply; and provided further, that every member shall be at liberty to speak once on any amendment, as well as on the original motion; but the right of reply shall not extend to the mover of an amendment.

11. No member shall speak upon any motion or amendment for a longer time than fifteen minutes, unless by permission from the Council.

12. No member shall digress from the matter under discussion, nor make personal reflections on members, nor impute motives.

13. When any member shall use any expression which the Mayor or presiding Alderman shall think capable of being applied offensively to any other member, the member so offending shall be required by the Mayor or presiding Alderman to withdraw the expression, and to make a satisfactory apology to the Council.

14. Whenever any matter of order arises, it shall be taken into consideration immediately; and upon a member rising to order he shall be heard, and the member who was speaking shall sit down until the question of order has been decided.

15. Any member may require the question under discussion to be read for his information at any time during a debate, but not so as to interrupt any other member when speaking.

16. A debate may be adjourned to a later hour of the day, or to another day specified; and the member upon whose motion a debate is adjourned shall be entitled to pre-audience on resumption of the debate.

#### *Divisions.*

17. It shall be competent for any member to divide the Council upon any question put from the Chair, either in full Council or in Committee of the whole Council; and upon such division, those who are on the affirmative side shall place themselves on the Mayor or presiding Alderman's right hand, and those who are on the negative shall place themselves on his left hand; and no member shall leave his place until the names of all the members present have been taken down by the Council Clerk or person officiating for him.

18. All divisions of the Council shall be entered on the minutes of the proceedings.

19. In division every member present shall be compelled to vote, except as provided by section 106 of the Municipalities Act of 1867.

#### *Motions.*

20. No motion shall be put unless it be seconded.

21. When a motion has been proposed and seconded it shall be the property of the Council, and shall not be withdrawn without the consent of the Council.

22. Any number of amendments may be proposed on a motion before the Council; and when more than one amendment is moved and seconded, the question shall first be put on the last amendment, and then on to the one next to the last, and so on in the inverse order in which they are moved: Provided, however, that when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest.

23. Any motion for adjournment, if seconded, shall be put immediately, without discussion; but if such motion be negatived, it shall not be competent for any member to make a similar motion until at least half an hour shall have elapsed from the period of moving the one that has been negatived.

24. No motion, the effect of which, if carried, would be to rescind, or be repugnant to any resolution which has been passed by the Council, shall be entertained during the same municipal year, unless a special meeting of the Council have been duly called for that purpose; and no such motion, if negatived by the Council, shall be again entertained during the same municipal year.

#### *Petitions.*

25. It shall be incumbent on any member presenting a petition, to acquaint himself with the contents thereof, and to report to the Council that it does not contain disrespectful language.

26. On the presentation of petitions no debate shall take place, and the only question that can be entertained by the Council shall be that the petition be received, or that it be referred to a Committee: Provided, however, that any petition which has been received by the Council may be taken into consideration upon notice of motion in the usual way.

27. Every petition received by the Council shall be received as the petition of the party or parties whose signatures it bears; and no petition shall be received unless at least one signature be upon the sheet containing the petition.

#### *Committees.*

28. In a Committee of the whole Council the general rules of the Council shall be observed, except the rule limiting the number of times of speaking.

29. Every Select Committee, of which the Mayor of the Borough is not a member, shall choose its own Chairman, and the Chairman of every Committee shall be the convener thereof, and may direct the Council Clerk to call meetings of the Committee whenever he shall think fit.

30. Every report of a Committee shall be signed by the Chairman thereof.

31. When the report of a Select Committee is brought up and presented to the Council, the question as to its reception may be moved and put at once, but it shall not be adopted or taken into consideration without notice in the usual way.

#### *Finance Committee.*

32. No matters of account shall be disposed of by the Council until they have been examined and reported by the Committee of Finance.

33. No payments out of the funds of the Corporation shall be made but such as are authorized by a vote of the Council: Provided always, that the Committee of Finance may, on its own discretion, authorize disbursements for current expenses to any amount not exceeding five pounds (£5) in any one week: And provided further, that in cases of emergency, the Mayor, with the assent of any two members of the Committee of Works, may authorize the expenditure of any sums not exceeding ten pounds (£10) in all, during a recess; but all such discretionary payments, whether by the Committee of Finance or by the Mayor, shall be reported to the Council at its next meeting.

#### *Committee of Works.*

34. No public works involving a probable expenditure of more than fifty pounds (£50) shall be undertaken until the Committee of Works have reported to the Council an estimate of the cost thereof.

35. All accounts against the Corporation relating to works shall be examined by the Committee of Works, and such as are found correct shall be certified and passed to the Committee of Finance.

#### *Committee of General Purposes.*

36. All matters which the Council shall think fit to refer to a Committee, and which do not fall within the province of any other Standing Committee, shall be referred to the Committee of General Purposes: Provided, however, that the Council may at any time refer such matters to a Committee appointed for that particular business.

#### *Making By-laws.*

37. Before any proposed by-law is discussed in Council, a copy thereof shall be open for public inspection in the office of the Corporation not less than seven days.

38. No by-law shall be passed until it has been reported upon by a Committee of the whole Council, nor until it has been twice read in Council on different days.

#### *Miscellaneous.*

39. Whenever the Council is adjourned for want of a quorum, the names of the members then present, and the hour at which the adjournment took place, shall be entered on the minutes.

40. Any member may record his protest against any decision of the Council, provided the protest be handed to the Council Clerk not later than the next Council meeting; and provided also, that notice of his intention to protest be given immediately on the passing of the resolution to which the protest refers.

41. The common seal and all charters, deeds, muniments, and records of the Corporation, shall be kept in the Town Hall or office of the Corporation, in custody of the Council Clerk, unless for any special purpose the Council shall otherwise order.

42. No officer of the Corporation shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Corporation, to any person other than an Alderman, without leave from the Council, except as otherwise provided by the Municipalities Act of 1867.

43. Any one or more of the standing orders may be suspended *pro tempore* in a case of emergency, if a majority of two-thirds of the members then present shall deem such suspension necessary.

44. Any Alderman or officer of the Corporation offending against the provisions of this by-law, by refusal, neglect, or otherwise, shall forfeit and pay a sum not exceeding five pounds (£5).

H. PERDRIAU, Mayor.

Made and passed by the Council of the Borough of Balmain, this 17th day of March, in the year of our Lord one thousand eight hundred and sixty-eight.

JAMES M'DONALD,  
Council Clerk.

No. 2.—FOR DELEGATING CERTAIN POWERS TO THE  
MAYOR.

That the Mayor be the officer appointed by this Council for the purpose of carrying out the provisions of the 128th clause of the Municipalities Act of 1867, except so much of the clause as apply to the setting out and defining of the carriage-way and foot-ways of streets and public places.

H. PERDRIAU, Mayor.

Made and passed by the Council of the Borough of Balmain, this 17th of March, in the year of our Lord one thousand eight hundred and sixty-eight.

JAMES M'DONALD,  
Council Clerk.

1868-9.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF RANDWICK—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 30th December, 1868.

## BOROUGH OF RANDWICK.

## BY-LAWS.

THE following By-laws made by the Council of the Borough of Randwick,—to repeal the original By-laws of the Borough, Nos. 1 and 2, to regulate by means of Standing Orders the proceedings of the Borough Council, for the collection of rates, the licensing of public vehicles, the slaughtering of cattle, the suppression of nuisances, the sewerage, and for the general good rule and government of the Borough,—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

## BOROUGH OF RANDWICK.

## BY-LAWS No. 1.

To repeal original By-laws Nos. 1 and 2, to regulate by means of Standing Orders the proceedings of the Municipal Council of Randwick, the collection of rates, the licensing of public vehicles, the slaughtering of cattle, the suppression of nuisances, the sewerage, and general good rule and government of the Borough.

*Original By-laws repealed.*

1. The By-law of the Municipal Council of Randwick, No. 1, dated the 23rd day of May, 1859, and the By-law of the said Council, No. 2, dated the 17th day of August, 1860, are hereby repealed.

*Regulation and order of proceedings.*

2. The sittings of the Council shall on all ordinary occasions be open to the Public, but any Alderman may require the exclusion of strangers while the sense of the Council is taken on any case mentioned in the 101st clause of the Act, 31 Vic., No. 12, as to whether the question proposed shall be discussed with closed doors.

3. The business of the Council shall commence with a quorum. If at the expiration of thirty minutes from the time of the meeting there is no quorum, no business shall be transacted, but the names of the Aldermen present shall be recorded in the Minutes.

4. If the Mayor be not present one quarter of an hour after the time appointed for the meeting of the Council, an Alderman shall be elected to preside as Chairman for the time being.

5. The Mayor or Chairman of the Council for the time being may take part in all the proceedings of the Council, and in case of an equality of votes upon any division, may give a casting vote in addition to his vote as Alderman.

*Chap. I.—Order of business.*

1. Confirmation of minutes of last meeting.
2. Reading of copies of letters sent by authority of Council.
3. Reading of letters received, and considering and ordering thereon.
4. Reception and reading of petitions and memorials.
5. Reading and ordering on reports of permanent committees.
6. Reading and ordering on reports of select committees.
7. Reading and ordering on reports of deputations.
8. Financial statement and accounts.
9. Special business not classified.
10. Order of the day, including subjects arising from proceedings of former meetings.
11. Motions of which previous notice has been given.
12. Notices of motion.
6. The first business of each meeting of the Council shall be to confirm the minutes of the preceding meeting; and no discussion shall take place thereupon, except as to the accuracy thereof.
7. All communications by letter intended for the Council shall be made and addressed to the Council Clerk, and all applications and memorials shall be addressed to the Mayor, under cover to the Council Clerk.
8. No motion shall be decided on at any meeting of the Council unless notice in writing signed by the Alderman

proposing shall have been given at the previous meeting of the Council, except with the consent of two-thirds of the Aldermen then present.

9. The order of the day shall include all business of which due notice has been given, and also all matters arising out of former meetings of the Council.

10. Any motion entered on the notice paper, and the Alderman having given notice of the same being absent, and no other Alderman deputed to bring forward such motion when the business is called in order, such motion shall be struck out.

11. No by-law shall be decided on without due notice (as in cases of motions), and a copy of the proposed by-law shall be open in the Council Chambers seven days for the inspection of all ratepayers, free of charge, or of any person duly qualified to vote at elections under the Municipalities Act.

#### *Chap. II.—Order of debate.*

1. Any Alderman proposing a motion or amendment, or discussing any matter, must rise and address the Mayor or Chairman, and no Alderman shall be interrupted unless by a call to order, when he shall sit down, and the Alderman calling to order shall then be heard, and the question of order decided before the subject is resumed or any other business.

2. Any Alderman proposing a motion or an amendment, must state the nature of it before addressing the Council.

3. No Alderman shall speak twice on the same question, unless by way of explanation merely, or in reply as the mover of an original motion, or upon any amendment; and after such explanation or reply the question shall forthwith be put to the vote.

4. If more than one Alderman rise at one time, the Mayor or Chairman for the time being shall decide which is entitled to pre-audience.

5. No Alderman shall digress from the subject under discussion, nor impute motives; and all personal reflections shall be considered highly disorderly, and withdrawn accordingly.

6. The Chairman, when called upon to decide a point of order or practice, shall state the rule or precedent applicable to the case, without argument or comment; and his decision as to what is order or explanation shall be final.

7. The Chairman shall arise when addressing the Council in discussion of any question.

8. Any Alderman may demand the production of any of the documents of the Council relating to the subject under discussion.

9. Only one amendment shall be discussed at one time; and upon the adoption of any amendment, the original motion shall be deemed rejected, and the amendment so carried shall be acted upon as an original motion.

10. The Chairman shall, on taking the sense of the Council, put the question first in the affirmative, then in the negative; and the votes of all Aldermen shall, if demanded, be entered on the minutes.

11. The Council shall vote by show of hands, except in cases of elections.

12. No proposition once brought before the Council shall be withdrawn without leave of the Council, nor shall any proposition be entertained by the Council until the same be seconded.

13. No discussion shall be allowed on any motion of adjournment; but if the question be negatived, the next motion or order of the day shall be considered before the question of adjournment shall be again entertained: Provided the motion be carried, any business left undecided shall take precedence at the next meeting of Council.

14. Any Alderman may record his protest against any decision of the Council, provided the same be made, in writing, before the next meeting of the Council, and couched in respectful language, and be consistent with truth. Notice of such intention, however, must be given on the adoption of the resolution.

15. No motion, the effect of which if carried would be to rescind any motion which has already passed the Council, shall be entertained during the same municipal year, unless a call of the whole Council has been duly made for that purpose; and no such motion for rescinding any resolution of the Council which shall have been negatived by the Council, shall be again entertained during the same municipal year.

16. All notices of motion shall be dated and signed by the intended mover, and read by the Council Clerk at the close of the ordinary business, before the adjournment of the Council.

#### *Chap. III.—Elections.*

1. No election to any paid office at the disposal of the Council, which may exceed the sum of one hundred pounds per annum, shall take place until four clear days' notice shall have been given in one of the local newspapers, inviting applications for the same; and the salary of such office shall in all cases be fixed for the municipal year before proceeding to the election.

2. No Alderman or officer of the Council shall be received as security for any officer appointed by the Council, or for any work to be performed for the Council; and in all cases in which security for the due and faithful performance of any duty or contract is required, the expense of preparing such security shall be defrayed by the person or persons giving the same.

3. At all such elections, and also at the election of Mayor of Council, the votes shall be taken in the usual manner, by a show of hands; and the votes of all the Aldermen shall be entered on the minutes in the order in which they are given.

4. The Council Clerk shall make a half-yearly return of the revenue and expenditure of each ward, and shall charge to each ward one-third share of the general expenses of the Borough, and the balance of revenue of each ward shall be expended in such ward to which such revenue belongs: Provided, however, that it shall be lawful for the Council to lend to any or either of the said ward or wards, for any general improvement, the whole or any part of the balance of the general revenues of the Borough for one year only; and the sum or sums so lent to such ward or wards shall be repaid from the future revenues of such ward or wards which may have borrowed as aforesaid, and be expended in the ward or wards entitled to such expenditure; and the Mayor of the Borough shall, at the expiration of every three years after the division into wards has been made, cause all such accounts to be properly and equitably adjusted; and the Council shall spend forthwith, in the ward or wards so entitled to such expenditure, the amount so due to such ward or wards respectively.

5. In every case where the boundaries of any two wards shall be a road, street, or thoroughfare, one-half of the expense of making and upholding such road, street, or thoroughfare, shall be charged to each of the wards so connected; and in case of any emergency, for the repair of any street, fence or bridge, the Mayor shall, with the consent of two Aldermen, authorize the expenditure of any sum not exceeding ten pounds, providing, however, that such expenditure shall be reported to the Council at the next meeting.

6. No officer of the Council shall show, lay open, or expose any of the books, papers, or records of the Council, to any person, without the consent of the Mayor, except as otherwise provided by law.

#### *Chap. IV.—Miscellaneous regulations.*

1. For the consideration of any by-law, or for the raising or appropriating of money, or for the objects contemplated in the standing order, it shall be competent for any Alderman, without previous notice, to move for a call of the whole Council, for the consideration of any such subject at the next or any subsequent meeting; and upon such motion being carried, due notice thereof shall be given in the notice paper of the day or notice of motion for which such call was made and set down for consideration; and any member not in attendance when such order of the day or notice of motion comes under consideration, or not in attendance at the voting upon such question or any amendment thereof, whether of adjournment or otherwise, shall be liable to a penalty of five shillings unless reasonable cause for such absence be shown to the satisfaction of the Council.

2. The Council Clerk shall have the charge of the common seal of the Corporation, and shall be responsible for the safe custody and proper use of the same; each impression thereof being made under the authority of the Council, and duly verified by the signature of that officer.

3. The Council Clerk shall affix the municipal seal to all contracts, bonds, and licenses requiring the same, and to all by-laws and addresses to the Governor passed by the Council; but he shall not affix it to any other document without the authority of the Mayor and under his signature.

4. Any one or more of the standing orders may be suspended *pro tempore* in case of emergency, provided that the majority present deem it necessary.

*Chap. V.—Collection of rates.*

1. All rates and assessments made and authorized by the Council shall be levied and collected yearly, and shall be held to be due and payable on or before the first day of July in each and every year.

2. Every person who shall have been assessed or who shall be liable to pay any such rate or assessment, shall, on or before the date above mentioned, pay the amount of such rate or assessment to the Treasurer, Collector, or Council Clerk, at the Council Chambers, Randwick, or at such other place as the Council may by any resolution appoint.

3. The Council Clerk shall prepare every year, a list of the names of all persons whose rates are unpaid on the first day of July; and the Mayor of the said Council shall, as soon as the necessary arrangements can be made, proceed against such persons for the recovery of the rates and assessments then due and unpaid, either by summons, or the issue of distress warrants, as he may determine.

*Chap. VI.—Bailiff and his duties.*

4. The bailiff shall be appointed by the Mayor, and shall give such security as he shall approve, for the faithful performance of the duties of such office.

5. The bailiff shall make all levies and distresses for the recovery of rates, under the warrant of the Mayor, such warrant to be made in accordance with the form in the schedule hereto annexed, marked A.

6. The bailiff shall be paid for every entry and levy made under these by-laws, according to the annexed schedule marked B.

7. At the time of making a distress, the bailiff shall forthwith make out a written inventory, in the form or to the effect of the schedule annexed hereto, marked C; which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident in the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made; and the bailiff shall deliver a copy of such inventory to the Council Clerk of the Borough, for the information of all parties concerned.

8. It shall be lawful for the bailiff and such assistants as he may require, to enter into any part of the land, building, tenement, or other property, in respect of which a warrant has been issued, for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property, in charge thereof; and if the sum for which distress shall have been made or taken, shall not be paid on or before the expiration of five days, it shall be lawful for such bailiff to sell the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the Borough as the said bailiff may think proper to remove them to for such purpose; and the surplus (if any) that may remain after deducting the amount of the sum distrained for, together with the expenses attendant upon such distress, shall be paid over on demand to the owner of the goods so sold: Provided always that nothing herein contained as to the time of sale, shall apply to any crop of fruit or vegetables which may be growing at the time when such distress shall be made.

9. The bailiff in making a distress as aforesaid may impound or otherwise secure the distress so made, of what nature or kind soever it may be, in such places, or in such part of the land or premises chargeable with the rate, as shall be most fit and convenient for such purpose; and it shall be lawful for any person whatsoever, after the expiration of the five days hereinbefore mentioned, to come and go to and from such place, or part of the said land or premises where any distress shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof.

10. The owner of any goods so distrained upon, may by writing direct and specify the order in which they shall be successively sold; and the said goods and chattels shall in such case be put up for sale according to such direction.

11. The bailiff shall hand over to the Council Clerk all proceeds of such distresses as soon as possible after such sale, also the copy of every inventory and account of every such sale or sales.

12. The bailiff, with the sanction of the Mayor, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise for the time being all the powers of the bailiff himself, but the bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

## SCHEDULE A.

*Warrant of Distress.*

I, Mayor of the Borough  
of Randwick, do hereby authorize you  
Bailiff of the said Borough, to distrain the goods and chattels  
in the dwelling-house or in and upon the land and premises of  
situate at  
for the sum of being the amount of municipal  
rates due to the said Borough to the day of  
for the said dwelling-house, land, or premises, as the case may  
be, and to proceed thereon for the recovery of the said rates,  
according to law.

Dated this day of 18  
Mayor.

## SCHEDULE B.

*Fees to Bailiff.*

	s.	d.
1. For making every entry and inventory in the execution of warrant.....	5	0
2. If in possession more than five hours .....	5	0
3. For every other day or part of a day .....	5	0
And five per cent. on the net amount of sale.		

## SCHEDULE C.

*Inventory.*

I have this day, in virtue of a warrant under the name of the  
Mayor of the Borough of Randwick, dated  
distrained the following goods and chattels in the dwelling  
house (or in and upon the land and premises) of  
situate at  
within the said Borough, for the sum of  
being the amount of rates due to the said Borough, to the  
day of 18

Dated this day of 18  
Bailiff.

## BY-LAWS

For regulating and licensing public vehicles plying for hire or carrying passengers within the Borough of Randwick.

1. Each proprietor or driver of every omnibus, coach, or other public vehicle, carrying passengers or plying for hire within this Borough, shall pay to the Council thereof the charge or sum mentioned in the Schedule hereunto annexed marked A.

2. Every person holding an authority or license from this Council as such proprietor or driver, according to the form annexed marked B, shall be permitted to ply for hire and carry passengers within the said Borough for the term therein mentioned; but it shall not be lawful for any person to ply for hire or carry passengers as aforesaid, until having obtained the said authority or license so to do.

3. The said charge or sum for every such vehicle shall be paid in advance, commencing on the first day of January, and ending on the thirty-first day of December in every year, or rateably, according to the date of the said authority or license, and the production of such authority, license, or receipt, shall free the vehicle numbered therein from all other charges by this Council, except fines and tolls, during the current year or the period therein specified.

4. The driver of every such omnibus, coach, or other public vehicle, plying for hire, or carrying passengers within or through any part of this Borough, shall, previous to doing so, pay unto the said Council the said charge or sum therein provided; and any person found plying for hire, or carrying passengers in any vehicle within this Borough (except in hackney carriages and other conveyances hired by an individual or party for an especial occasion, and who shall not take up or set down passengers during their route), shall forfeit and pay for every such offence any sum not more than one pound, nor less than ten shillings; and in case of a second conviction within six months, not less than one pound.

5. Every public vehicle driven to or from any public stand for vehicles now appointed by the Council of the City of Sydney, or which may be appointed by the Council of this Borough, or shall be employed in carrying passengers in or through this Borough, shall be deemed and taken to be a public vehicle plying for hire.

6. The Council of this Borough may appoint stands for public vehicles within their own boundaries, at such times and places as may be considered necessary by any resolution of Council, and may also under any such resolution regulate the time of starting of every such vehicle from any such public stand, on giving public notice thereof to the licensed drivers one month previous to the commencement of such regulation; but in the absence of any such regulation by resolution as aforesaid, no such licensed vehicle shall leave any such appointed stand within thirty minutes of each other; and any person who shall offend against this or any other such regulation, shall forfeit and pay for every such offence not more than one pound nor less than ten shillings.

7. These by-laws shall come in force on the 1st day of January, 1869.

#### SCHEDULE OF CHARGES.

##### A.

1st. For every vehicle plying for passengers, having four wheels, per annum, £5.

2nd. For every vehicle plying for passengers, having two wheels, per annum, £3.

##### SCHEDULE B.

#### *License and Certificate of payment for public vehicles.*

Borough of Randwick,

18

I, the undersigned, do hereby certify that of the public vehicle No. has paid unto the Council of this Borough the sum of £ for permission to ply for hire and carry passengers within this Borough for the period of from the date hereof, and that the said is hereby authorized and entitled to ply for hire and to carry passengers in the said vehicle, within the limits of the said Borough, for the period above stated.

Mayor.

Registered,

Council Clerk.

#### *Slaughter-houses, &c., Borough of Randwick.*

1. The Council of the said Borough may appoint houses and places for the slaughtering of cattle and other animals, and grant licenses for such houses or premises, in such place or places as the said Council shall approve. The license fee for every such house or premises shall be two shillings and sixpence per annum, paid in advance.

2. It shall not be lawful for any person to slaughter or cause to be slaughtered for the purpose of sale any cattle, sheep, or other animal, in any house or place within the said Borough other than in such house or premises for slaughtering as may be appointed and licensed as aforesaid; and any person who shall so offend shall, on conviction, forfeit and pay for every such offence the sum of ten pounds.

3. Any officer of the said Council, shall be at liberty, at all times during the day, to enter such licensed house or premises for the purpose of inspecting the same with reference to its cleanliness, and also all cattle slaughtered or intended to be slaughtered in such house or premises; and the owner or occupier of such house or premises who shall neglect to keep such house or premises in a clean and wholesome state, or shall refuse to admit the said officer for the purposes aforesaid, shall, for every such offence, on conviction thereof, forfeit and pay the sum of two pounds.

4. Any person who shall knowingly slaughter for human food any animal infected with any disease affecting the milt or spleen, or shall offer or expose for sale any such animal or any part thereof, or of any animal which shall, after being slaughtered, be found to be so diseased, shall, on conviction thereof, forfeit and pay for every such offence any sum not exceeding fifty pounds, nor less than ten pounds.

#### *Suppression of nuisances, &c.*

1. In case any privy, hog-sty, or any other matter or thing whatsoever, which shall at any time be or become a nuisance, by causing unwholesome smells to arise within any part of this Borough, it shall be lawful for any two

Justices, upon complaint thereof by any person, to investigate such complaint, and to order that such privy, hog-sty, boiling-down establishment, or other matter or thing, being a nuisance, as aforesaid, to be cleansed, removed, or discontinued, as the case may be, within seven days after such order has been made, and notice given to the owner or occupier of the premises whereon such nuisance shall exist; and every such owner or occupier neglecting to remedy or remove such nuisance pursuant to such notice or order, and to the satisfaction of such Justices, shall forfeit and pay the sum of ten pounds for every such neglect or disobedience; and also it shall be lawful for such Justices to indict or cause to be indicted for such nuisance such person or persons so neglecting or disobeying any such notice or order at the then next Court of General or Quarter Sessions to be held nearest to the said Borough; and the person or persons being found guilty, shall be subject to such punishment and to such further order as the Justices assembled at such Sessions shall lawfully decide.

#### *Sewerage, and general good rule and government of the Borough.*

1. It shall be lawful for the Council of the said Borough, at any time and at all times, and they are hereby authorized and empowered, by themselves, their servants, agents, or contractors, to make and construct any sewer or drain as the said Council may think necessary in, under, or through any part of the said Borough, and to do and perform all excavations and other works connected therewith, and to cause all or any such sewers or drains to communicate with the sea or otherwise as the case may be; and also, from time to time, to open, cleanse, or repair such sewers or drains, or alter the position thereof, to connect or repair other sewers or drains, or to cleanse the same: Providing also that the said Council shall repair and make good all damage or loss occasioned by the excavations, &c., required for the making, connecting, altering, cleansing, or repairing as aforesaid.

2. No person shall open or connect with either of the main sewers, drains, or connections, any private sewer or drain, without the written consent of the Council; and the work shall then be performed according to the direction and under the control of the said Council, at the expense of the person requiring such connection; and the owner or person who shall require any such work or improvement shall, at his own expense, make good all roads, streets, kerbing, &c., which shall have been injured by or through any such work; and all such repairs shall be performed to the satisfaction of such officer as the Council shall appoint to superintend such work; and any person who shall do or perform anything contrary to this clause, or shall neglect to make good all such damage as aforesaid, shall, on conviction thereof, forfeit and pay any sum not exceeding fifty pounds, nor less than one pound.

3. No surface-drain shall be made in any footpath, nor any pipes laid across the same, without the authority of the Council; and no such pipe or drain shall be used for the discharge into any street or roadway of any offensive liquid or matter of any kind whatsoever; and any person who shall so offend shall forfeit and pay for every such offence any sum not exceeding fifty pounds, nor less than one pound.

#### *General good rule and government of the Borough.*

1. Any person who shall wilfully destroy or damage any shrub or tree growing on any street, thoroughfare, or other place within this Borough, or shall injure any hedge, fence, gate, or building in such street, thoroughfare, or other public place, or shall set fire to any shrubs or trees, or shall cut or remove any timber from any such street, thoroughfare, or public place as aforesaid, shall, on conviction thereof, forfeit and pay for every such offence any sum not exceeding fifty pounds, nor less than one pound.

#### *Obstructing public watercourses.*

2. Any person who shall cast any filth or rubbish into any public watercourse, sewer, drain, or canal supplying water or used for drainage within this Borough, or shall obstruct or divert from its channel or proper course any such watercourse, sewer, drain, or canal, except under the authority of the said Council, shall, on conviction, forfeit and pay any sum not exceeding five pounds, nor less than one pound: and shall also pay all costs and charges of removing such filth or obstruction, or of restoring such watercourse, sewer, drain, or canal to its proper channel or connection.

*Injuring public fountains, &c.*

3. Any person who shall injure any public fountain, pump, cock, water-pipe, or any other thing connected with the preservation or supply of water to the said Borough, or to any portion thereof, shall forfeit and pay the amount of such damage and any further sum not exceeding twenty pounds nor less than one pound; and any person who shall bathe or wash himself, or shall wash any clothes or other article, at or in any reservoir, channel, fountain, or basin provided for public use, or who shall in any other way foul the water preserved or used for the purposes aforesaid, shall forfeit and pay any sum not exceeding one pound nor less than five shillings.

*Indecent exposure.*

4. It shall not be lawful for any person to bathe in any waters exposed to public view from any road, street, or public place within the said Borough, between the hours of six a.m. and eight p.m.; and any person who shall indecently expose himself or herself, by bathing as aforesaid within the prohibited time herein mentioned, shall, on conviction before any Justice, forfeit and pay any sum not exceeding one pound.

*Cattle, &c., not allowed to go about the streets, &c.*

5. It shall not be lawful for any person whomsoever to suffer any kind of cattle, horse, ass, mule, sheep, swine, or goats belonging to him or under his or her charge, to depasture, stray, or go about, or to be tethered or depastured in any street, road, or public place within the said Borough; and any person who shall so offend shall forfeit and pay, in respect of every such offence, any sum not exceeding two pounds nor less than five shillings.

*Throwing filth, &c., on or near public places, roads, streets, or thoroughfares.*

6. If any person shall in any public place, road, street, or thoroughfare within this Borough, throw, cast, lay, or deposit any manure, filth, rubbish, night-soil, offal, dead

animal, or any other offensive matter or thing, except in such place or places as this Council may appoint, or shall deposit or cause to be deposited any such unwholesome matter within two hundred yards of any such public place, road, street, or thoroughfare, or shall allow any such matter to flow in or upon, or to be in any way deposited on any such place, road, street, or thoroughfare, shall, on conviction, forfeit and pay any sum not exceeding two pounds nor less than five shillings.

*No materials to be removed from roads, &c.*

7. It shall not be lawful for any person to remove any stone, sand, turf, clay, or gravel, or other material, from any road, street, or public place, without the authority of the said Council, neither shall it be lawful for any person to place any timber or other material on any such road, street, or public place, or to cause any obstruction whatever to any such road, street, or public place, or to ride or drive upon any footpath, or to furiously race, ride, or drive, any horse or other animal through, in, or upon any such road or street as aforesaid; and any person who shall offend against any of these provisions shall forfeit and pay any sum not exceeding ten pounds, nor less than two pounds.

*Disposal of offences.*

8. All offences against any of these by-laws may be determined in a summary way, before any Justice or Justices of the Peace, as the case may require.

Made and passed by the Municipal Council of the Borough of Randwick, this 4th day of November, 1868.

S. H. PEARCE,

Mayor.

E. T. SAYERS,  
Council Clerk.

1868-9.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF GOULBURN—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 23rd February, 1869.

## BOROUGH OF GOULBURN.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of Goulburn, to regulate its proceedings—for regulating the duties of its officers, servants, and contractors—for works and contracts—for the collecting and enforcing the payment of rates—for preventing and extinguishing fires—for the extirpation of weeds—and for the general good rule and government of the Municipality—having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

**BY-LAWS for regulating the proceedings of the Council of the Borough of Goulburn, and preserving order at meetings of the said Council ;**  
 For regulating the duties of the officers and servants of, and contractors with, the said Council ;  
 For works, and contracts for the same ;  
 For collecting and enforcing the payment of the rates ;  
 For preventing and extinguishing fires ;  
 For the extirpation of weeds ; and  
 Generally maintaining the good rule and government of the Municipality.

*By-law for regulating the proceedings of the Council, and preserving order at the meetings thereof.*

1. The Council shall meet at the Council Chamber, during the months of April, May, June, July, August, and September, at 4 p.m., and during the other six months of the year, at 7 o'clock p.m., on the first Thursday in every month ; but if such day be a public holiday, then on the day following ; and each meeting may be adjourned from day to day, until all the business then pending shall have been disposed of : Provided also, the Council may, by resolution, appoint any other hour for adjournment.
2. If the Mayor shall be absent at the expiration of fifteen minutes after the time appointed for the holding of any meeting of the Council, the Aldermen present shall choose a chairman : Provided always, that if the Mayor shall afterwards attend, such Alderman shall leave the chair to be taken by the Mayor.
3. Whenever any meeting called shall lapse or be adjourned for want of a quorum, the names of the members present shall be recorded by the Council Clerk in the minute book, and such record shall be read at the next meeting of the Council ; and each Alderman absent shall pay a fine of five shillings, to be remitted only in case of illness, or other cause deemed sufficient by a majority of the Council at the next meeting. Such fines to go to the poor fund, to be administered by the Mayor.

*Order of business.*

4. The business of each ordinary meeting of the Council shall be transacted in the following manner, viz. :—

1. Reading and confirming minutes of last meeting.
2. Reading of correspondence, reception of reports and petitions.
3. Notices of motion to be given.
4. Adjourned motions, and motions of which notice has been given.
5. Orders of the day.

Provided that it shall be competent for the Council to take any particular matter out of the regular order on the paper, on cause shewn, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

5. The orders of the day shall comprise all business set down for the day by order of any previous meeting, or necessarily arising out of the proceedings of a former meeting, and motions on notice.

6. The Council shall have power, in case of any emergency that may arise within four days preceding the meeting, to suspend *pro tem.* one or more of the by-laws : Provided that no such suspension shall be allowed for the purpose of voting money.

7. Except in Committee, every Alderman shall stand when speaking, and shall address the chair.

8. No Alderman shall be allowed to speak on any motion or amendment for more than fifteen minutes, without the consent of the Council.

9. Any debate or order of the day, when called on, may be postponed to another time to be duly specified ; and the Alderman upon whose motion any debate shall be adjourned, shall be entitled to open the debate on resumption.

10. All resolutions proposed, and all amendments, shall be handed to the Council Clerk in writing.

11. No motion proposed shall be withdrawn if any Alderman shall object; and if the Alderman who has given notice of a motion, shall fail or decline to move it, the Mayor, or any other Alderman, may take up and move the same.

12. No question shall be put to the Mayor or Aldermen unless twenty-four hours' previous notice in writing shall have been given thereof to the Council Clerk.

13. Any number of amendments may be proposed upon a motion before the Council; and when more than one amendment has been moved, the question shall first be put upon the last amendment, and then upon the one next to the last, and so on in inverse order to that in which they were moved: Provided always, that when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest.

14. Any motion for adjournment shall be put immediately without discussion. If such notice be negatived, the business then under consideration, or the next order on the business paper, shall be discussed before any other motion for adjournment may be moved; and if a motion shall be made at the same meeting for adjournment, it shall not be deemed carried, except by a majority of two-thirds in its favour.

15. It shall be competent for any Alderman to divide the Council upon any question put from the chair, either in full Council or in Committee of the whole Council; and upon such division, every member present shall give his vote by standing up, whereupon his name and vote shall be taken down and recorded by the Council Clerk; and any Alderman so present, refusing to vote, shall be liable for every such offence to a penalty of not less than twenty shillings, nor more than forty shillings.

16. Every Committee of the Council shall consist of not less than three Aldermen, two to form a quorum, and shall be called together in pursuance of the direction of the Chairman of such Committee, or any two members thereof, by the Council Clerk, by notice in writing, delivered twenty-four hours at least before any meeting. There shall be Standing, Finance, and Improvement Committees; and one Alderman representing each Ward of the Borough shall be appointed to every such Committee.

17. When the report of a Committee is brought up and presented to the Council, the question as to its reception may be moved, and notice of motion for its adoption may then be given for the next day of meeting; but if notice shall be given to the Council Clerk, by any member of the Committee, four days previous to the time of such report being brought up, of his intention to move its adoption, such motion may then be made.

18. No motion, the effect of which, if carried, would be to rescind, or be repugnant to any resolution which has been passed or negatived by the Council, shall be entertained during the same municipal year, unless a special meeting of the Council have been duly called for that purpose; and no such notice, if negatived by the Council at such special meeting, shall be again entertained during the same municipal year.

19. Any Alderman presenting a petition shall acquaint himself with the wording thereof, and report to the Council that he considers such petition unobjectionable; but he shall not be regarded as affirming the statements therein, or be bound to support the prayer of such petition. All petitions shall be received only as the petitions of the parties signing the same.

20. No debate shall take place on the presentation of a petition, nor until notice has been given in the usual manner; and the only question in reference thereto that shall be entertained by the Council on the day of its presentation shall be, that the petition be received, or that it be referred to a Committee.

21. The Rules of the Council shall be observed in Committee of the whole, except the rule limiting the number of the times of speaking.

22. Any Alderman who shall be guilty of any contempt of Council, shall pay a penalty of not less than one pound for every such offence. Such fines to go to the "*Poor Fund*."

*Works, and contracts for the same.*

23. No work affecting the funds of the Borough shall be determined upon, until the probable expense shall have been first ascertained by the Council, on the report of some officer nominated for the purpose, or the report of the Improvement Committee.

24. Tenders shall be called for all works undertaken by the Council, upon such terms and subject to such conditions as to the Council may seem expedient; and no Tender shall be entertained unless it be accompanied by an agreement, signed by two or more responsible parties, agreeing to become sureties for the contract, if tender be accepted: Provided that this law shall not apply to any works provided for by by-law No. 25, nor to any labourers employed by authority of the Council. Contractors shall, with sufficient sureties, give bonds to the Council for the due performance of their contracts, in such sum as the Council shall fix.

25. The Mayor and any two Aldermen, or, in the absence of the Mayor from the Municipality, any three Aldermen may, in writing, order any sum not exceeding £20 to be expended in repairing any public work, under the control of the Council, which may be suddenly damaged: Provided that it shall appear to them that such repair cannot be delayed until the next sitting day of the Council; and they may appoint a proper person to execute such repairs: Provided always, that the making of such order shall be reported at the next meeting of the Council; and provided also, that not more than one such order shall be made between the termination of one meeting and the commencement of another.

26. It shall not be competent for the Council, where surety is required for officers, servants, or contractors, to accept as such surety any of its members, or any person holding office under the Council.

27. No appointment to any permanent office shall take place until public notice shall have been given, inviting applications for the same. Such notices shall in all cases state the salary affixed to such office by the Council; and the Council shall, by resolution, determine the times and places when and where such notice shall be given. Every such appointment shall be by ballot, although there shall be but one applicant for such office. The Council shall require all officers and servants of the Council to give bonds for the faithful discharge of their duties, in such sum as the Council may determine.

28. The Council Clerk shall in all things generally assist the Mayor and Council in carrying out the provisions of the Act and the by-laws.

29. The Treasurer shall, immediately on the receipt of moneys, deposit the same into the Bank for the time-being selected by the Council, to the credit of the Borough of Goulburn; and the Treasurer's cash-book, and the Bank pass-book balanced, shall be laid before the Council at all its meetings.

30. No money shall be paid by the Council until the account for the same shall have been examined and reported on by the Finance Committee.

31. The Mayor shall have custody of the common seal, and shall affix it to all documents creating obligation on the Corporation, in the presence of the Town Clerk; but for the purpose of authenticating documents, the Mayor may alone affix the seal, and charge a fee for so doing of one pound (£1); such fee or fees to form a poor relief fund, to be administered by the Mayor.

32. All charters, deeds, muniments, and records of the Municipality, shall be kept in the office thereof, in custody of the Council Clerk, unless the Council shall otherwise order.

*For collecting and enforcing payment of rates.*

33. The rates of the Borough shall be levied and collected half-yearly, and shall be held due and payable on or before the first day of June and the first day of December in each municipal year.

34. All persons liable to pay any rates or assessments shall pay the same within the time prescribed by law, to the Council Clerk, at the Municipal Council Chamber, during office hours, that is to say, between the hours of 10 o'clock a.m. and 4 o'clock p.m., Saturdays excepted.

35. It shall be the duty of the Council Clerk to furnish the Council with a list of the names of all persons whose rates are unpaid at the expiration of thirty days from the time of notice prescribed by the Act; and the Mayor of the Borough shall take immediate proceedings authorized by law, against all defaulters reported to the Council in the manner aforesaid.

*Bailiff, and his duties.*

36. The Bailiff shall be appointed by the Mayor, and shall find two sureties, to the extent of ten pounds each, for the faithful performance of his duty; such surety to be approved by the Mayor.

37. The Bailiff shall make all levies and distress for the recovery of rates under warrant, in the form of the Schedule hereunto annexed and marked with the letter A, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

38. The Bailiff shall be paid for every entry and levy made under these by-laws according to the Schedule hereunto annexed and marked with the letter B.

39. The Bailiff, and such assistants as he may take with him, shall enter into any part of the land, building, or tenement in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of two days, it shall be lawful for the bailiff to sell the goods so distrained, or a sufficient portion thereof; and if the party distrained upon shall so require, by public auction, either on the premises or at such other place within the Borough as the bailiff may think proper to remove thereto, such party consenting in writing to pay the charges of the auctioneer, if so sold; and the surplus, if any remain after deducting the amount distrained for, together with the expenses attendant upon such distress and sale, shall be paid over to the owner of the goods so sold: Provided that nothing herein contained shall apply to the sale of any produce whatever which may be growing upon the land at the time of making the distress: Provided always, that no distress shall be made on the goods of any casual visitor, or on the goods of any lodger in any house or apartment, ordinarily let or used as a lodging-house or apartment.

40. At the time of making a distress, the bailiff shall make out a written inventory, in the form of the schedule hereto annexed and marked with the letter C, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person for his or her behalf, resident at the place where the distress has been made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made.

41. The bailiff, in making a distress as aforesaid, may impound or otherwise secure the distress so made of what nature or kind soever it may be, in such place or part of the land or premises chargeable with the rate as shall be most fit or convenient for this purpose; and it shall be lawful for any person whatsoever, after the expiration of the two days hereinbefore mentioned, to come and go to and from such place or part of the said land or premises where any distress shall be impounded, in order to view or buy, and in order to carry off and remove the same on account of the purchaser thereof.

42. The owner of any goods so distrained upon may, at his or her option, direct and specify the order in which they shall be offered for sale; and the said goods and chattels shall in such case be sold according to such direction.

43. The bailiff shall hand over to the Council Clerk or the Treasurer all proceeds of such distress, immediately after having received the same, with the particulars of the goods distrained, and of the sale thereof.

44. The bailiff, with the sanction of the Mayor of the Borough, may authorize any person to act temporarily as his deputy; and the person thus authorized shall have and exercise, for the time being, all the powers of the bailiff himself, but the bailiff and his sureties shall in every case be held responsible for the acts of his deputy.

#### SCHEDULE A.

##### Warrant of Distress.

I, \_\_\_\_\_, Mayor of the Borough of Goulburn, do hereby authorize you, \_\_\_\_\_, bailiff of the said Borough, and your deputy or deputies duly appointed, or either of them, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of \_\_\_\_\_, situate at \_\_\_\_\_, within the Borough of Goulburn, for the sum of \_\_\_\_\_, being the amount of municipal rates due to the Borough of Goulburn, to the \_\_\_\_\_ day

of \_\_\_\_\_, for the said (dwelling-house, land, or premises, as the case may be), and to proceed thereon for the recovery of the said rates, according to law.

Dated this \_\_\_\_\_ day of \_\_\_\_\_, 18 \_\_\_\_\_, Mayor.  
(Corporate seal) \_\_\_\_\_, Council Clerk.

#### SCHEDULE B.

##### Borough of Goulburn.—Fees of Bailiff.

For making every entry or inventory in the execution of distress warrant, five shillings; if in possession more than five hours, five shillings additional; and for every subsequent day whilst in possession, five shillings, and five per cent. on the net amount of sale.

#### SCHEDULE C.

##### Borough of Goulburn.—Inventory.

I have this day, in virtue of a distress warrant, under the name of the Mayor of the Borough of Goulburn, dated \_\_\_\_\_, distrained the following goods and chattels in the dwelling-house, or in and upon the land and premises of \_\_\_\_\_, situate at \_\_\_\_\_, within the Borough of Goulburn, for the sum of \_\_\_\_\_, being the amount of rates due to the said Borough, to the \_\_\_\_\_ day of \_\_\_\_\_, 18 \_\_\_\_\_, Bailiff.

##### For preventing fires.

45. No person shall make, or knowingly permit to be made, any fires in the open air nearer to any building or public way than twenty feet, under a penalty not exceeding five pounds.

46. No person shall stack any hay or straw, otherwise than in an enclosed building, nearer than two hundred feet to any building or public way, under a penalty not exceeding ten pounds.

47. Any person throwing hot ashes or live coal adjacent to any buildings or into any enclosures, shall be liable to a fine not exceeding five pounds.

48. Upon the representation of one or more householders, that fire is being used to the danger of adjacent buildings, it shall be lawful for the Mayor to cause a notice in writing to be served upon, or left at the residence of the owner or occupier of the premises on which any such fire may exist, and direct, if the urgency of the case should require it, that the said fire shall be removed at once, or within any reasonable time afterwards, which he may deem expedient: Provided always, that any such owner or occupier shall have a right to shew cause, except in what may as already related be considered urgent cases, why the said or any such fire should not be removed, and the opinion of the majority of the Council shall be final.

49. That in every case in which it shall be made to appear that the chimney of any house or building within the Borough has taken fire from the occupier thereof having omitted to have such chimney regularly and sufficiently cleaned, such occupier shall, upon conviction, forfeit and pay for every such offence forty shillings; and in every such case the proof that any such chimney did not take fire through the neglect of such occupier having the same regularly and sufficiently cleaned, shall be on such occupier.

##### For the extirpation of weeds.

50. Any person appointed by the said Council may enter upon any lands within the said Municipality, and for that purpose may break open gates, or take down or remove fences, to extirpate the weed known as the Bathurst burr or Scotch thistle, or other noisome weeds: Provided always, that if any gates be broken open or fences removed, the same shall immediately after the work then required be done, be restored to their former condition as nearly as may be. Any person hindering or obstructing any person so appointed as aforesaid, shall, for every such offence, be liable to a penalty of forty shillings.

Passed by the Municipal Council of the Borough of Goulburn, this nineteenth day of November, one thousand eight hundred and sixty-eight.

WILLIAM DAVIS,  
Mayor.

THEOPH. KIRKE,  
Town Clerk.

1868-9.

## NEW SOUTH WALES.

## MUNICIPALITIES.

(BOROUGH OF ORANGE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 18 March, 1869.

## BOROUGH OF ORANGE.

## BY-LAWS.

THE following By-laws, made by the Council of the Borough of Orange, to regulate, by means of Standing Orders, their own proceedings, for the general good rule and government of the Municipality, for the collection of rates, the prevention and abatement of nuisances, and other matters, for the care and management of the roads, &c., and for regulating the right to be enjoyed by the inhabitants over the Town Common, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

## BOROUGH OF ORANGE.

BY-LAWS to regulate, by means of Standing Orders, the proceedings of the Municipal Council of Orange, for the general good rule and government of the Municipality, and for the collection of rates, the prevention and abatement of nuisances, and other matters.

1. That the by-laws made and passed by the Municipal Council, under the Municipalities Act of 1858, section 72, so far as the same may now be in force, shall be and the same are hereby repealed; and in lieu thereof the following shall be the By-laws of the Municipality of Orange:—

*Meetings of Municipal Council, and duties of Mayor and Aldermen.*

2. The Council shall meet at the Court-house, or other place that may hereafter be appointed within the Borough of Orange, at 7 o'clock, p.m., on every alternate Tuesday, for the transaction of business, unless otherwise adjourned; subject, however, to the provisions of the Municipalities Act of 1867.

3. There shall be two half-yearly meetings of the Council, in the months of March and September in each municipal year, for the purpose of making up the accounts of the Municipality for the half-year respectively expiring in the preceding months of February and August in such year.

4. The Mayor or presiding Alderman shall preserve order, and his decision on disputed points of order shall be final.

5. The Mayor or presiding Alderman may take part in all the proceedings of the Council.

6. When the Mayor or presiding Alderman is called upon to decide upon a point of order or practice, he is to state the rules applicable to the case, without argument or comment.

7. The Mayor or presiding Alderman shall put all questions, and declare the sense of the Council thereon.

8. If two or more members rise to speak at the same time, the Mayor or presiding Alderman shall decide which member is entitled to pre-audience.

9. The Mayor or presiding Alderman may, without waiting for the interposition of any member of the Council, call to order any member proceeding to speak a second time on the same subject, except in the way of explanation only, or of reply by the mover of any motion then under consideration.

10. The Mayor or presiding Alderman shall, on every motion made, put the question, first in the affirmative, and then in the negative; and he may do so as often as may be necessary to enable him to form and declare his opinion from the show of hands as to which party has the majority.

11. Every Alderman shall enter his name and address in a book, to be kept by the Council Clerk, where summonses and other papers may be left for him.

12. Every Alderman present shall record his vote openly upon all subjects.

*Order of Business.*

13. The business of the Council shall be taken in the following order:—

1. Reading and signing minutes of last meeting.
2. Reading of copies of letters sent by authority of Council.
3. Reading of letters received, and considering and ordering thereon.
4. Reception and reading of petitions and memorials, but without discussion.
5. Reception and reading of reports from permanent and select committees, and ordering thereon.
6. Order of the day and adjourned motions.
7. Motions according to notice.
8. Payment of accounts and special payments.
9. All motions shall be made, and petitions presented, by Aldermen in their places; and every Alderman shall stand when speaking, and address the chair.

14. The order of the day shall include all business of which due notice has been given, and all matters arising out of former meetings of the Council.

15. Any motion entered on Notice Paper, and the Alderman having given notice of the same being absent, and no other Alderman having been deputed to bring forward such motion when the business is called on, shall be struck out.

16. Any number of amendments may be proposed on a motion before the Council; and when more than one amendment is moved, the question shall first be put on the last amendment, and then on the next, and so on, in the reverse order in which they were moved; except when such motion or amendment shall relate to the acceptance of tenders, the fixing of salaries, or other matters of finance, in which case the lowest sum shall be put first, then the next lowest, and so on, to the highest.

17. It shall not be necessary for any motion to be seconded.

18. Motions for adjournment shall be put without discussion, and, if negatived, it shall not be competent for any Alderman to make a similar motion until half an hour shall have elapsed.

19. Motions to rescind or to vary a former vote of the Council shall not be moved without express notice, and a call of the Council on a particular day to be named for the purpose.

#### *Notices of Motion.*

20. The Council Clerk shall enter in a book to be kept for that purpose, to be called the "Notice Book," all notices of motion in the order in which they are received.

#### *Petitions.*

21. No discussion shall take place on the presentation of any petition without notice of motion given after its reception.

22. It shall be incumbent on any Alderman presenting a petition to acquaint himself with the language thereof, and to report to the Council that he considers it unobjectionable in that respect.

23. All petitions shall be received only as the petitions of the parties signing the same.

#### *Committees and their Reports.*

24. No committee shall consist of less than three members of the Council, which number shall form a quorum.

25. The mover of any motion for a committee shall be a member thereof; and at all meetings of such committee the Mayor, if a member, shall preside, or if he be not a member, then such Alderman shall preside as a majority of the members of the committee shall have appointed permanent chairman thereof; and in the absence of the Mayor or the permanent chairman respectively, such chairman as the members present shall appoint shall preside.

26. No report of any committee shall be adopted unless due notice of motion for that purpose be given after its reception.

27. The rules of the Council shall be observed in a committee of the whole Council, except the rule limiting the number of times of speaking.

#### *Order of Debate.*

28. Any Alderman proposing a motion or amendment, or discussing any matter, shall not be interrupted, unless by a call to order; when he shall sit down; the Alderman calling to order shall then be heard, and the question of order decided before the subject is resumed or any other business proceeded with.

29. Any Alderman proposing a motion or any amendment must state the nature of it before addressing the Council.

30. Except in committee, no Alderman shall speak twice on the same question, unless in explanation, when he has been misrepresented or misunderstood: Provided, however, that the mover shall be allowed to reply, and that every Alderman shall have the liberty of speaking once on every amendment as well as on the original motion.

31. No Alderman shall digress from the subject under discussion, nor shall he speak upon any motion or amendment for a longer period than fifteen minutes without the consent of the Council.

32. A debate may be adjourned to a later hour of the same evening, or to another day, to be specified.

33. The Alderman upon whose motion any debate shall be adjourned by the Council shall be entitled to pre-audience on the resumption of the debate.

34. It shall be competent for any Alderman to divide the Council on any question, both in full Council and committee, and the Mayor or presiding Alderman shall take the division in the usual way, by show of hands; and the names given by the Mayor or presiding Alderman to the Council Clerk shall be taken down by him and recorded.

35. All divisions of the Council shall be entered in the Minute Book.

36. Any Alderman using offensive or abusive language towards any other Alderman, or persisting in speaking when requested by the Mayor or presiding Alderman to desist, or refusing to sit down when called to order by the Mayor or presiding Alderman, shall forfeit and pay for every such offence a sum of money not being less than five shillings nor exceeding five pounds.

#### *The Estimate.*

37. No work affecting the expenditure of the funds of the Municipality shall be undertaken until an estimate of the expense shall have been laid before the finance committee, reported thereon at the next meeting, and approved of by the Council.

38. A committee or surveyor shall in all cases be appointed to inspect the work performed, as soon as completed; and on the written approval of such committee or surveyor, the same shall be paid for.

39. It shall be lawful for any ratepayer, at any time previous to any tender for work being accepted, to petition the Council in support of or against the expenditure on account of such contract.

#### *Officers.*

40. The Council Clerk shall have the custody of the common seal, and of all books, charters, deeds, muniments, and records of the Corporation, or relating to the property thereof.

41. The Treasurer's cash-book and the banker's pass-book shall be laid before the Council at all its meetings.

#### *By-laws.*

42. That no new by-law shall be proposed at any meeting unless notice in writing has been duly given, and no new by-law, amendment, or repeal, shall be finally passed at the meeting at which it is first proposed.

43. That not less than seven days shall intervene between the meeting at which the new by-law, amendment, or repeal shall be proposed, and the meeting at which the same shall be passed by the Council.

44. That any proposed new or amended by-law, or repeal of any existing by-law, shall be filed in the Council Clerk's office, for the inspection of the Aldermen or inhabitants of the Borough, from the time at which it is proposed until the meeting at which it is to be finally adopted.

45. Any one or more of the by-laws of the Council may be suspended, *pro tempore*, in cases of emergency, if notice of the intended motion for that purpose be given to the Council Clerk four days before the day of meeting at which such motion shall be intended to be made, and the majority of the Aldermen present agree thereto, or without such notice, if the whole of the Aldermen present at such meeting agree thereto.

#### *Miscellaneous Regulations.*

46. All contracts for municipal works shall be by tender, or otherwise, as the Council may see fit.

47. No Alderman or officer of the Council shall be surety for any contractor or officer of the Municipality.

#### *Collection of Rates.*

48. That, if necessary, a duly qualified person shall be appointed for the collection of the municipal rates; and the remuneration shall be an agreed percentage upon the actual amount collected by such officer from the ratepayers.

49. That such rates be collected by half-yearly instalments.

50. The collector of such rates for the time being, if appointed, shall be the bailiff for the Municipality; and in the meantime, until such collector be appointed, a proper person shall be appointed as bailiff.

51. The collector, if appointed, shall, in accordance with the provisions of the Municipalities Act of 1867, collect the rates, when made, from the ratepayers, and shall from time to time report the result of his collection to the Council, and shall execute all warrants for distresses, or take such proceedings for enforcing payment of the said rates, if in arrear, as the Mayor, or any person who may for the time being be duly authorized to perform the duties of that office, shall direct.

52. The collector, if appointed, shall keep such books required for the collection of rates as shall be furnished him by the Council Clerk, and shall produce the same for the inspection of any ratepayer at any reasonable time.

53. All levies and distresses shall be made under warrant, in the form of the Schedule hereunto annexed, and marked with the letter A, under the hand of the Mayor or any person who may for the time being be duly authorized to perform the duties of that office.

54. The bailiff shall be paid for every levy made by him under these by-laws the fees mentioned in the Schedule hereunto annexed and marked B.

#### *SCHEDULE A.*

##### *Warrant of Distress.*

I, \_\_\_\_\_ Mayor of the Borough of Orange, do hereby authorize you, \_\_\_\_\_, the bailiff of the said Borough, to distrain the goods and chattels in the dwelling-house [or in and upon the land and premises] of \_\_\_\_\_, situate at \_\_\_\_\_, being the amount of rates due to the Corporation of the said Borough to the \_\_\_\_\_ day of \_\_\_\_\_ for the said dwelling-house [or premises as the case may be], and to proceed thereon for the recovery of the said rates according to law.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 186 .

Mayor.

## SCHEDULE B.

*Fees to Bailiff.*

For making entry and inventory, three shillings; if in possession more than five hours, three shillings additional; and for every subsequent day whilst in possession, five shillings per day, and five per cent. upon the net proceeds of sale.

**BY-LAWS** for the care and management of the public roads and streets, and the general good rule and government of the Municipality.

55. No cattle intended for slaughter and sale in the town shall be driven through any street or public thoroughfare of the Municipality between the hours of 8 o'clock in the morning and 6 o'clock in the evening; and every person who shall drive, or cause to be driven, any such cattle through any street or public thoroughfare of the Municipality between such hours shall, on conviction, forfeit and pay for every such offence a sum of money not being less than five shillings nor exceeding five pounds.

56. That any person who shall draw any logs, stumps, or any kind of rubbish, on to any of the reserves within the Municipality, or take loam, sand, or stone, from off any of the streets within the said Municipality, without the permission of the Mayor, shall, on conviction, for every such offence, forfeit and pay a sum of money not being less than five shillings and not exceeding five pounds.

**BY-LAWS** for regulating the right to be enjoyed by the inhabitants of the Municipality of Orange over the Town Common.

57. Every inhabitant of the Municipality who shall hold a license to slaughter cattle under any Act now or hereafter to be in force for such slaughtering, shall be entitled, on payment of the fees hereinafter provided, to depasture over any land lawfully set apart as a common any number of sheep not exceeding two hundred.

58. Every such inhabitant shall, before depasturing such sheep upon such common, pay to the Treasurer of the Municipality, or to such officer or person as the Municipal Council may appoint, in respect of such sheep, a fee or charge at the rate of two pounds sterling per annum for every one hundred sheep; and shall at all times keep registered, in a book to be kept for that purpose in the Council Clerk's Office in Orange,

and to be called the "Register of Brands," an accurate description of all such sheep as may be from time to time depasturing upon such common under this by-law.

59. Every inhabitant of the said Municipality shall be allowed—on payment, in advance, to the Treasurer, or such officer as shall be appointed, of the fees or charges hereinafter mentioned—to depasture on such common any number of horses or cattle not exceeding twelve: Provided that this provision shall not extend to entire horses over the age of twelve months, and bulls over the age of six months; and no fees or charges shall be taken in respect of the progeny of such horses or cattle running with their dams, and under the age of six months.

60. Every such inhabitant shall, for the depasturing of such horses or cattle, pay yearly, to the Treasurer of the Municipality, and previous to such depasturing, the fees and charges hereinafter mentioned:—

For horses or cattle, not exceeding four in number, one shilling and sixpence per head.

For each head of horses or cattle exceeding four in number, the sum of five shillings.

61. Every such inhabitant shall, before so depasturing such horses or cattle, cause to be registered in the "Register of Brands," in the Council Clerk's office in Orange, an accurate description of such horses and cattle, with their brands and distinguishing marks.

62. Nothing hereinbefore contained shall limit or abridge the right of the said Municipality to exercise their powers to impound any cattle, horses, or sheep, in excess of the number which it is hereby provided may be so depastured upon such common.

63. The ranger, or any person authorized by the Council of the Municipality, may impound, in the public pound at Orange, any cattle, sheep, horses, or other animals which are not authorized, in manner hereinbefore mentioned, to be depastured upon such common, or in respect of which the fees hereinbefore mentioned have not been paid.

JAMES DALE,

Mayor.

Made and passed by the Municipal Council of Orange, this third day of November, in the year one thousand eight hundred and sixty-eight.

GEORGE TOWSON,  
Council Clerk.

1868-9.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF GRAFTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict., No. 12, sec. 158.

Colonial Secretary's Office,  
Sydney, 11th March, 1869.

BOROUGH OF GRAFTON.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Grafton, for regulating its proceedings and for the collection of rates, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

JOHN ROBERTSON.

BOROUGH COUNCIL OF GRAFTON.

CHAPTER I.

BY-LAWS for regulating proceedings of Council Committees, Officers, &c.

*General conduct of business.*

1. That the ordinary sittings of the Council shall be on the second Wednesday in every month, at 4 p.m.
2. In the event of any meeting or intended meeting lapsing or being adjourned for want of a quorum, the names of the Aldermen present shall be recorded in the minute book.
3. At every meeting of the Council the first business shall be the reading and putting a question for the confirmation of the minutes of the proceedings at the preceding meeting; and no discussion shall be permitted thereon, except as to their accuracy as a record of the proceedings; and the said minutes of the proceedings at the said preceding meeting shall then be signed by the Mayor or chairman.
4. After the signing of the minutes as aforesaid, the order of business of an ordinary or adjourned meeting shall be as follows, or as near thereto as may be practicable; but, for the greater convenience of the Council, at any particular meeting thereof, it may be altered by resolution of the Council:—
  1. Reading of copies of letters sent by order of the Council.
  2. Reading letters received, and considering and ordering thereon.
  3. Reception and reading of petitions and memorials.
  4. Reception of and acting on reports of Standing Committees.
  5. Reception of reports of Select Committees.
  6. Payments.
  7. Questions.
  8. Order of the day, including subjects continued or arising out of the proceedings of former meetings.
  9. Other motions of which previous notice has been given.
  10. Notices of motions.

And the order of business at a special meeting shall be in the order in which it stands in the notice thereof.

5. All notices of motion shall be dated and numbered, and given by the intending mover to the Council Clerk, at the close

of the meeting of the Council, or four clear days prior to the next monthly meeting of the Council; and the Council Clerk shall enter the same in the Notice of Motion Book, in the order in which they may be received.

6. No member shall make any motion initiating a subject for discussion, but in pursuance of a notice given as prescribed in the last preceding clause.

7. No motion, except that for receiving the same, shall be made on any petition, memorial, or other like application, until the next ordinary or adjourned meeting of the Council after that at which it has been presented.

8. Except by leave of the Council, motions shall be moved in the order in which they have been received and recorded by the Council Clerk in the Notice of Motion Book, and if not so moved or postponed, shall be struck out.

9. A motion, entered in the Notice of Motion Book, may (with the consent of the Council) be proceeded with, in the absence of the Alderman who gave notice thereof, by some other Alderman on his behalf, or shall otherwise lapse.

*Order of debate.*

10. Any Alderman desirous of making a motion or amendment, or taking part in any discussion, shall rise and address the Mayor or chairman, and shall not be interrupted, unless called to order, when he shall sit down until the Alderman (if any) calling to order shall have been heard thereon, and the question of order disposed of, when the Alderman in possession of the chair may proceed with the subject.

11. Any Alderman desirous of proposing an original motion or amendment must state the nature of the same, before he addresses the Council thereon.

12. No motion or amendment shall be withdrawn without the consent of the Council.

13. No motion or amendment shall be discussed or put to the vote of the Council unless it be seconded, but an Alderman may, however, require the enforcement of any standing order of the Council, by directing the Mayor's or chairman's attention to the infraction thereof.

14. An Alderman moving a motion shall be held to have spoken thereon, but an Alderman merely seconding a motion shall not be held to have spoken to it.

15. The Aldermen in meetings of the Council shall designate each other by their official titles, namely, that of Mayor, chairman, or Alderman, as the case may require.

16. If two or more Aldermen rise to speak at the same time, the Mayor or chairman shall decide which is entitled to priority.

17. The Mayor or chairman shall rise in addressing the Council to discuss any motion, but shall not leave the chair on such occasions.

18. No Alderman shall speak a second time on the same question, unless entitled to reply, or in explanation when he has been misrepresented or misunderstood.

19. At all meetings the Mayor or chairman shall preserve order. His decision on disputed points of order shall be final, unless exception shall be taken thereto by any Alderman, in which case the Mayor or chairman shall submit the same to the Council for its decision.

20. No Alderman shall digress from the subject matter of the question under discussion, or comment upon the words used by any other Alderman in a previous debate; and all imputations of motives, and all reflections on members of the Council, shall be deemed highly disorderly.

21. Whenever any Alderman shall make use of any expressions disorderly, or capable of being applied offensively to any other Alderman, the Alderman so offending shall be required by the Mayor or chairman to withdraw the expression and make a satisfactory apology to the Council.

22. An Alderman called to order shall sit down, unless permitted to explain.

23. Any Alderman using offensive or disorderly language, and having been called to order, or to withdraw and apologize for such conduct, and refusing so to do, shall be guilty of an offence.

24. Any person, not being an Alderman, who shall, having been admitted to or present at any meeting of the Council, be guilty thereof of any improper or disorderly conduct, or who shall not leave when lawfully requested by the Mayor or chairman so to do, may be forthwith removed, and shall be deemed guilty of an offence.

25. For the consideration of any by-law, or for the raising or appropriation of money, or for any of the objects contemplated in the Standing Order, it shall be competent for any Alderman, without previous notice, to move for a call of the whole Council for the consideration of any such subject, at the next or any subsequent meeting; and upon such motion being carried, due notice thereof shall be given to the members by summons, and any member not in attendance when such order of the day comes on for consideration, or not in attendance at the voting upon such questions or any amendment thereof, whether of adjournment or otherwise, shall, unless reasonable cause for such absence be shown, to the satisfaction of the majority of the Council, be guilty of an offence.

26. Any Alderman may of right demand the production of any of the documents of the Council applying to the question under discussion.

27. The Council shall vote by show of hands, except in cases of elections, and every Alderman present, if called upon, shall vote.

28. The Mayor or chairman shall, in taking the sense of the Council, put the question first in the affirmative, then in the negative; and the result thereof shall be recorded in the minutes, and the votes of the Aldermen shall be entered when demanded.

29. At every meeting of the Council, all motions, whether original motions or amendments, shall be reduced into writing, signed by the mover, and delivered to the Mayor or chairman, immediately on their being moved and seconded.

30. No second or subsequent amendment, whether upon an original proposition or on an amendment, shall be taken into consideration until the previous amendment has been disposed of.

31. If an amendment be carried, the question as amended shall become itself the question, whereupon any further amendment upon any portion of the question coming after such first-mentioned amendment may be moved.

32. The mover of every original proposition, but not of any amendment, shall have a right to reply—immediately after which the question shall be put from the chair; but no Alderman shall be allowed to speak more than once on the same question, unless permission be given to explain, or the attention of the chair be called to a point of order.

33. No discussion shall be allowed on any motion for adjournment of the Council; but if, on the question being put, the motion be negatived, the subject then under consideration, or the next on the notice paper, shall be discussed, or any other that may be allowed precedence, before any subsequent motion for adjournment be made.

34. An Alderman may protest against any resolution of the Council; and notice of intention to protest shall, in every case, be given forthwith on the adoption of the resolution protested against; and the protest shall specify the reasons for protesting, and shall be entered three days at least before the next ordinary meeting of the Council, by the protesting Alderman, in a book to be kept for that purpose in the Council Clerk's office, and signed by such Alderman; and shall be also entered in the minutes of the meeting at which notice of the intention

to protest shall have been given, previously to the confirmation thereof. But such protest may be expunged from the minutes, if declared by a majority of the Council to be not in accordance with the truth, or in its terms respectful to the Council.

35. No motion the effect of which if carried would be to rescind any motion which has already passed the Council shall be entertained during the same municipal year, unless a call of the whole Council has been duly made for that purpose; and no such motion for rescinding any resolution of the Council which shall have been negatived by the Council shall be again entertained during the same municipal year.

36. A debate may be adjourned to a later hour of the same day, or to another day which may be specified.

#### *Lapsed questions.*

37. If a debate, or any motion moved and seconded, be interrupted by the number of the members present becoming insufficient for the transaction of business, such debate may be resumed at the point where it was so interrupted, upon motion by notice.

38. If a debate upon any order of the day be interrupted by such insufficiency of numbers as aforesaid happening, such order may be restored to the Notice Book for a future day, on motion upon notice, and then be resumed at the point where it was so interrupted.

#### *Committees.*

39. Besides such Select and Special Committees as may from time to time be found necessary, there shall be three Standing Committees, namely,—a Finance Committee, a Public Works Committee, and a Committee of General Purposes.

40. The Standing Committees shall consist of three members, one from each ward, two to form a quorum. Every Committee, of which the Mayor of the Borough is not a member, before proceeding to other business shall choose its chairman. If the chairman of a Committee shall cease to be a member of the Council, or shall decline to act further as such chairman, a new chairman shall be chosen before any further business is entered upon.

41. In a Committee of the whole Council, the general rules of the Council shall be observed, except as to limiting the number of times of speaking.

42. When the report of a Select Committee is brought up and presented to the Council, the question as to its reception may be moved and put at once; but it shall not be adopted or taken into consideration without notice in the usual way.

43. No matters of account shall be disposed of by the Council until they have been examined and reported upon by the Finance Committee.

44. No payments out of the funds of the Corporation shall be made but such as are authorized by a vote of the Council: Provided always, that the Mayor with the assent of any two members of the Committee of Public Works may, in cases of emergency, authorize the expenditure of any sum not exceeding ten pounds (£10), during a recess; but such discretionary expenditure shall be reported to the Council at its next meeting.

45. The Finance Committee shall report generally upon the finances of the Borough, at the monthly meetings of the Council, in February, May, August, and November, or oftener if required by the Council.

46. No public works involving a probable expenditure of more than fifty pounds (£50) shall be undertaken until the Public Works Committee have reported to the Council an estimate of the cost thereof.

47. The Public Works Committee, as such, shall have the general inspection of all public works in progress throughout the Borough, and shall have the right of calling the attention of the Council by report to any matter connected with such works, or with the state of any public thoroughfare which may seem to require such attention.

48. All accounts against the Corporation relating to works shall be examined by the Public Works Committee; and such as are found correct shall be certified and passed by the Finance Committee.

49. All matters which the Council shall think fit to refer to a Committee, and which do not fall within the province of any other Standing Committee, shall be referred to the Committee of General Purposes: Provided, however, that the Council may at any time refer such matters to a Committee appointed for that particular purpose.

50. Every Committee shall have a right to take evidence upon any question or questions of fact, wherein it is the duty of such Committee to report. A minute of the evidence thus taken, or of its substance, must, however, in all cases, be appended to the Committee's report.

51. Minutes of all proceedings of Committees, as well as their reports, numbered in consecutive order, shall be entered in the Committee's Minute Book, and being signed by the chairman of the Committee, to the Council Clerk twenty-four hours previous to the meeting of Council when such report is to be brought up. (*sic*)

52. The chairman of every Committee shall have the right, without asking leave of the Council, to remove from the Council Chamber, for any space of time not exceeding sixty hours, any

book, document, or paper, other than the Minute Book, either for inspection by such Committee, or for reference in the preparation of the report. In all such cases, however, he shall deliver to the Council Clerk an acknowledgment under his hand of having received such book, document, or paper, and shall be held responsible for the safe keeping of the same.

53. The Standing Committees shall be reappointed within one month after the commencement of the municipal year.

54. Any Alderman moving for a Select Committee may propose certain Aldermen as members of the same; or he may simply state the nature of such intended Committee, leaving the selection to be made by ballot.

55. Every Alderman proposing the appointment of a Select Committee must name himself as one.

56. The appointment of every Special Committee shall continue until the specified duty for which it has been appointed shall have been discharged.

57. Before any proposed by-law is discussed in Council, a copy thereof shall be open for public inspection in the office of the Corporation, not less than seven days.

58. No by-law shall be passed until it has been reported upon by a Committee of the whole Council, nor until it has been twice read in Council on different days.

#### *Petitions.*

59. No petition shall be presented after the Council shall have proceeded to the order of the day.

60. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council, and that the contents do not violate any by-law or any provision thereof.

61. Every Alderman presenting a petition to the Council shall write his name at the beginning thereof.

62. Every petition shall be in writing, and not printed or lithographed, and shall contain the prayer of the petitioners at the end thereof, and be signed by at least one person on every skin or sheet upon which it is written.

63. Every petition shall be signed by the persons whose names are appended thereto, by their names or marks, and by no one else, except in cases of incapacity by sickness.

64. No letters, affidavits, or other documents, shall be attached to any petition.

65. Every Alderman presenting a petition to the Council shall confine himself to a statement of the persons from whom it comes, of the number of signatures attached to it, of the material allegations contained in it, and to the reading of the prayer thereof.

#### *Appointment of officers.*

66. No appointment to any paid office at the disposal of the Council shall take place until seven clear days' public notice shall have been given, by advertisement in one or more newspapers circulating in the borough, inviting applications from qualified candidates for the office.

67. The salary or allowance attached to all offices and places at the disposal of the Council, shall in all cases be fixed before proceeding to appoint any person to fill the same, before the advertisement inviting applications as aforesaid, and shall be specified in such advertisement.

68. No Alderman, or officer of the Council, or Auditor of the borough, shall be received as a surety for any officer appointed by the Council, or for any work to be done for the Council.

69. In all cases of security being given for the faithful performance of any duty or contract, the expense of preparing such security shall be borne by the person providing the same.

70. All such appointments shall be by election, the voting being (except at that of chairman of Council) on cards or paper to be provided for that purpose, on which the voter shall write the name of the candidate he supports, and sign his own; no others will be received, and the Council Clerk shall preserve them as a record.

#### *Miscellaneous.*

71. The common seal of the Borough shall be kept in a box having two locks, of one of which locks the Mayor shall have the key, and of the other of which locks the key shall be kept by the Council Clerk; and the seal shall not be affixed to any document unless in the presence of the Mayor and one other member of the Council, and such sealing shall be duly certified by the Council Clerk.

72. All charters, deeds, documents, and records of the Corporation, shall be kept in the Town Hall, or office of the Corporation, in custody of the Council Clerk, unless for any special purpose the Council shall otherwise order.

73. No officer or servant of the Corporation shall be at liberty to show, lay open, or expose, any of the books, papers, or records of the Corporation, to any person other than an Alderman, without leave from the Council, except as otherwise provided by the Municipalities Act of 1867.

74. Any person altering or defacing any such book, paper, or record, shall for every such offence forfeit and pay a penalty of not more than fifty pounds (£50).

75. No cheque shall be drawn, except a warrant authorizing the same has been first issued—the number of the warrant to be entered on the butt of the cheque.

76. Any member absenting himself for more than two consecutive monthly meetings of the Council, without leave having been previously granted, shall forfeit and pay a sum not exceeding one pound, unless reasonable cause for such absence be shown to the satisfaction of the Council.

77. Any one or more of the standing orders may be suspended, *pro tempore*, in a case of emergency, if a majority of two-thirds of the members then present shall deem such suspension necessary.

78. The Council Clerk shall be the officer appointed by this Council for the purpose of carrying out the provisions of the Municipalities Act of 1867, except so much thereof as applies to the setting out and defining of the carriage-way and foot-ways of streets and public places.

79. If any person shall be guilty of any wilful offence or misfeasance, or wilful or negligent act of commission or omission of these by-laws, and to which no penalty is otherwise affixed, shall forfeit a sum not exceeding five pounds.

Passed by the Borough Council of Grafton, this 12th day of August, 1868.

T. BAWDEN,  
Mayor.

#### CHAPTER 2.

#### BY-LAWS for enabling the Borough Council of Grafton to collect rates.

1. The rates shall be levied and collected yearly, for the municipal year, and shall be held to be due and payable thirty days after notice of assessment and rates, as provided by the 164th clause of the Municipalities Act of 1867: Provided that special rates may by order of the Council be collected half-yearly.

2. All persons liable to pay any rates or assessments shall pay the amount within the time prescribed by the Act, to the rate collector, at the Council Office, during office hours, on the days appointed for that purpose by order of the Council.

3. It shall be the duty of the Bailiff to serve the notices of the rate upon all ratepayers residing within the Borough, and to make levies by distress for the recovery of rates, under warrant in the form or to the effect of the schedule A hereto annexed, signed by the Mayor.

4. It shall be lawful for the Bailiff, or his deputy, and such assistants as he may take with him, to enter into any part of the building, tenement, or premises, in respect of the rate or rates for which a warrant shall have been issued, and to distrain the goods or chattels therein or thereon, and to remain in such building, tenement, or other premises, in charge thereof.

5. At the time of making a distress, the Bailiff, or other officer acting as Bailiff, shall hand a copy of the warrant to the occupant of the land or premises, or the owner of the goods distrained on, or to some person resident at the place where such distress is made, and shall forthwith make out a written inventory, in the form or to the effect of schedule B hereto annexed, which inventory shall be delivered to the aforesaid person occupying or owning the premises; and in case there shall be no person at such place, with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress has been made.

6. Where a distress has been made, and the rates levied for shall not be paid within five days thereafter, the Bailiff may sell the goods and chattels distrained upon, at public auction, or may cause the same to be sold by any licensed auctioneer, towards the satisfaction of the said distress; and the costs thereof, the surplus (if any) arising from any such sale shall be paid to the owner of the goods, or the occupant of the land or premises upon which the distrains have been made; and a full and true account in writing shall in every case be given by the Bailiff to the said owner or occupier on demand: Provided always, that nothing herein contained as to the time of sale, shall apply to any crop which shall be growing at the time of the same being levied upon.

7. The Bailiff, on making a distress for rates as aforesaid, may impound or otherwise secure the distress so made, of what kind soever it may be, in such places as he may deem most fit and convenient for his purpose; but no distress shall be made upon the goods of any casual visitor in any house, nor on the goods, other than furniture, of any lodger, in any house or apartment: Provided that such ownership is established to the satisfaction of the Bailiff, by declaration taken before a Justice of the Peace.

8. All sales of goods and chattels upon which levy has been made, shall be held between the hours of twelve at noon and two in the afternoon, either on the premises where the levy has been made, or at some other place within the Borough as the Bailiff or his deputy may think proper to remove the said goods and chattels to.

9. The Bailiff shall pay to the Borough Council account, at the bank where such account is kept, all moneys received by him on account of the Council, within forty-eight hours after receiving the same.

10. The Bailiff may, with the sanction in writing of the Mayor, authorize any person to act temporarily as his deputy ; and the person thus authorized shall have and exercise all the powers of the Bailiff himself ; but the Bailiff and his sureties shall in every case be held responsible for the acts of such deputy.

11. The Bailiff shall receive such salary or allowance as the Council may from time to time appoint for the performance of his general duties ; and, in the execution of warrants, shall be empowered to charge, in addition to the sum set forth in the warrants, the fees according to the schedule C hereto annexed.

SCHEDULE A.

I, the Mayor of the Borough of Grafton, do hereby authorize you the Bailiff of the said borough, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of situate at for the sum of being the amount of rates due to the borough to the day of for the said (dwelling-house, land, or premises, as the case may be), and to proceed therein for the recovery of the said rates according to law.—Dated this day of A.D. 18 .

(Signature) (L.S.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MUNICIPALITIES.

(PETITION FROM BOROUGH OF COOK, RESPECTING BOUNDARIES THEREOF, &c.)

*Ordered by the Legislative Assembly to be Printed, 15 December, 1868.*

To the Honorable the Members of the Legislative Assembly of New South Wales, at present in Parliament assembled.

The humble Petition of the Municipal Council of the Borough of Cook,—

SHewETH:—

(1.) That the inhabitants of this district petitioned for and accepted incorporation, upon the faith that the boundaries asked for would have been granted.

(2.) That the boundaries requested in the original Petition for incorporation included not only the University and Colleges, but the present Borough of Camperdown.

(3.) That the area of this Borough has been greatly reduced, by the formation of the Borough of Camperdown, which was included in the original Petition.

(4.) That a further curtailment of the revenue of this Municipality has taken place, to the extent of one hundred and fifty-six pounds per annum, by the exemption of the University and Colleges from taxation.

(5.) That no Municipality in the Colony is so affected, by the operation of the Municipalities Act of 1867, as this Borough.

(6.) That, in consequence of the loss of revenue sustained by the reduction of the area, and the exemption of the University and Colleges from taxation, this Council is far behind others in municipal progress, and have not been able to effect the improvements which otherwise would have been done.

(7.) That, in the belief that the revenue of the Borough would not be reduced by exemptions of the nature mentioned above, the Council raised a loan upon the security of such revenue, and are now greatly in debt.

Your Petitioners, therefore, pray that your Honorable House will take the premises under your favourable consideration.

And your Petitioners will ever pray.

WM. J. HOWE,  
Council Clerk.

JAMES MALONEY,  
Mayor. (L.S.)

## SYDNEY BOUNDARIES AMENDMENT BILL.

(PETITION—INHABITANTS OF PADDINGTON.)

---

*Ordered by the Legislative Assembly to be Printed, 3 February, 1869.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Owners of Property, Leaseholders and Householders of the Borough of Paddington,—

RESPECTFULLY SHEWETH :—

(1.) That your Petitioners have memorialized the Right Worshipful the Mayor and Aldermen of the City of Sydney, to take such steps as may be requisite for obtaining an extension of the present boundary of the City, by the annexation of the Borough of Paddington thereto as a Ward thereof.

(2.) That your Petitioners, comprising more than two-thirds of the electors of said Borough, are anxious for such annexation, and therefore pray that their desire may be granted, by the passing of the Bill for that purpose which is now before your Honorable House.

And your Petitioners, as in duty bound, will ever pray.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF  
THE LEGISLATIVE ASSEMBLY.

VOTES, No. 38. FRIDAY, 12 FEBRUARY, 1869.

7. Sydney Boundaries Amendment Bill :—Mr. Windeyer moved, "That" this Bill be now read a second time.  
Mr. S. Brown moved, That the Debate on this Question be postponed till this day week.  
Debate ensued.  
Motion for Postponement of Debate, by leave withdrawn.  
Mr. Hart moved, That the Question be amended by the omission of all the words after the word "That," with a view to insert the following words, viz. :—"this Bill be referred to a Select Committee for its consideration and report, with power to send for persons and papers."  
(2.) That such Committee consist of the following Members, viz. :—Mr. Forster, Mr. Sutherland, Mr. Windeyer, Mr. Hill, Mr. S. Brown, Mr. Lucas, Mr. Oatley, Dr. Lang, Mr. Neale, and the Mover."  
Debate ensued.  
Question,—That the words proposed to be omitted stand part of the Question,—put and negatived.  
Question then,—That the words proposed to be inserted be so inserted,—put and passed.  
Whereupon, Question,—(1.) That this Bill be referred to a Select Committee for its consideration and report, with power to send for persons and papers ;—  
(2.) That such Committee consist of the following Members, viz. :—Mr. Forster, Mr. Sutherland, Mr. Windeyer, Mr. Hill, Mr. S. Brown, Mr. Lucas, Mr. Oatley, Dr. Lang, Mr. Neale, and the Mover,—put and passed.

VOTES, No. 42. FRIDAY, 19 FEBRUARY, 1869.

8. Sydney Boundaries Amendment Bill :—  
(1.) Mr. Hill presented a Petition, bearing the Seal of the Corporation, from the Mayor and Aldermen of the Municipal Council of the Borough of Waverley, praying that, for the reasons therein set forth, the House may not pass this Bill into law without such Amendments as will prevent the closing of certain Roads within the Municipality.  
Petition received, and referred to the Select Committee now sitting upon the Bill.  
(2.) Mr. S. Brown presented a Petition, signed by the Mayor, on behalf of the Municipal Council of Paddington, and bearing the Seal of the Corporation, praying that, for the reasons therein set forth, this Bill may not be passed into law.  
Petition received, and referred to the Select Committee now sitting upon the Bill.  
(3.) Mr. S. Brown presented a Petition from certain freeholders, leaseholders, and householders—ratepayers of the Borough of Paddington—praying that, for the reasons therein set forth, this Bill may not be passed into law.  
Petition received, and referred to the Select Committee now sitting upon the Bill.

VOTES, No. 43. TUESDAY, 23 FEBRUARY, 1869.

4. Sydney Boundaries Amendment Bill :—Mr. Neale presented a Petition from certain freeholders and ratepayers of the Borough of Waverley, in opposition to this Bill in its present form, and protesting against the annexation to Sydney of any portion of the land in the said Borough.  
Petition received, and referred to the Select Committee now sitting upon this Bill.

VOTES, No. 55. TUESDAY, 16 MARCH, 1869.

2. Sydney Boundaries Amendment Bill :—Mr. Hart, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and of Evidence taken before, the Select Committee for whose consideration and report this Bill was referred, on 12th February, 1869, together with Appendix.  
Ordered to be printed.

## SYDNEY BOUNDARIES AMENDMENT BILL.

## REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on the 12th February, 1869,—“ *The Bill to amend the Boundaries of the City of Sydney*”—“ *with power to send for persons and papers*”—to whom were referred, on the 19th February,—“ *A Petition, bearing the Seal of the Corporation, from the Mayor and Aldermen of the Municipal Council of the Borough of Waverley, praying that, for the reasons therein set forth, the House may not pass this Bill into law without such Amendments as will prevent the closing of certain Roads within the Municipality*”;—also—“ *A Petition, signed by the Mayor on behalf of the Municipal Council of Paddington, and bearing the Seal of the Corporation, praying that, for the reasons therein set forth, this Bill may not be passed into law*”;—also—“ *A Petition from certain freeholders, leaseholders, and householders—ratepayers of the Borough of Paddington—praying that, for the reasons therein set forth, this Bill may not be passed into law*”;—and to whom was referred, on the 23rd February—“ *A Petition from certain Freeholders and Ratepayers of the Borough of Waverley, in opposition to this Bill in its present form, and protesting against the annexation to Sydney of any portion of the land in the said Borough*”—have agreed to the following Report :—

Your Committee have examined the promoters of the Bill, and also several of the inhabitants of Randwick, Waverley, and Paddington, whose interests would be likely to be affected by the measure; and, having given it their attentive consideration, have arrived at the following conclusions :—

1. As regards the portion known as the Water Reserve, a part of which runs into the Municipality of Waverley, your Committee consider that, instead of extending the boundaries as proposed, it would be better to allow the land to remain, as it at present is, in trust for the purposes for which it is dedicated.

2.

2. The evidence given before your Committee leads them to the opinion, that it would be to the interests of the inhabitants of Paddington, in a sanitary point of view, to be incorporated with Sydney ; but as there is a wide difference of opinion upon the subject, amongst those who are interested, your Committee consider that it would not be wise to legislate upon the subject, until your Honorable House is formally advised by the Municipality of that Borough as to the wishes of the inhabitants.

3. With respect to the land known as the Sydney Common, containing 490 acres, and which has been dedicated under the Crown Lands Alienation Act for a permanent Common, your Committee consider that, as upwards of £15,000 has already been spent upon it, with the sanction of your Honorable House, it would be advisable to extend the boundaries so as to include that land, and place it more immediately under the control of the Sydney Corporation. An apportionment of the tolls derivable from the Randwick Road will become necessary.

4. The evidence shows that it is highly necessary to include the spot called No Man's Land.

5. Your Committee have accordingly amended the Bill and Schedules, and now present the same to your Honorable House.

JAMES HART,  
Chairman.

*No. 3 Committee Room,  
Sydney, 12 March, 1869.*

---

# PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 16 FEBRUARY, 1869.

MEMBERS PRESENT:—  
Mr. Hart, | Mr. Lucas,  
Mr. Oatley.

Mr. Hart called to the Chair.

Printed copies of the Bill referred, on the Table.

Committee deliberated as to their course of proceedings.

Ordered to be appended. (*Vide Plan marked D.*)

Witness withdrew.

Committee deliberated.

Bill considered.

Preamble postponed.

Clause 1 read and agreed to.

Clause 2 read and agreed to.

Clause 3 read and considered.

Amendments proposed (*Mr. Oatley*),—to omit from line 15 the word "nine," and substitute the word "eight," also to omit the words "Paddington Ward" from line 17,—*agreed to.*

Clause, as amended, agreed to.

New clause proposed (*Dr. Lang*), to stand clause 4 of the Bill.

Same read as follows:—

"4. From and after the passing of this Act one-half of the proceeds derivable by the Commissioners of the Randwick and Coogee Bay Road Trust from the tolls arising from that Trust and also a moiety of any moneys payable by the Government for the maintenance of the said road shall be payable to the Municipal Council of Sydney who shall be bound to keep that portion of the Randwick Road included in Schedule A in good order and repair."

Apportionment  
of tolls.

*Question*,—That the clause as read stand clause 4 of the Bill,—*agreed to.*

Clause 4, to stand as clause 5, read and agreed to.

Schedule A. Amendment proposed (*Mr. Oatley*),—to omit Schedule A, with the view of *inserting* new Schedule,—*agreed to.*

New Schedule proposed (*Mr. Oatley*),—to stand as Schedule A.

Same read as follows:—

#### " SCHEDULE A.

"Commencing in the centre of Parramatta-street at its junction with Bay-street thence on the west by a straight line along the centre of Bay-street and its prolongation to the eastern shore of Blackwattle Cove thence again on the west and on the north-west north-north-east and east by the waters of Port Jackson to the centre of the bridge at the foot of William-street East thence on the east by the stream entering Rush-cutter's Bay to a culvert on the South Head Old Road at the north-west corner of Sydney Common thence again on the east by the centre of Dowling-street to a point where it intersects the southern boundary of the Borough of Paddington thence on the north by that boundary to its intersection with the southern alignment of the South Head Old Road thence by that alignment to its intersection with a line laid down marked out with stone posts and deemed to be the dividing line between Sydney Common and the Water Reserve thence again on the east by the said dividing line to its intersection with the southern boundary of Sydney Common thence by that boundary to the south-west angle of the said Common thence in a northerly direction by the western boundary of the said Common to its intersection with the centre of Cleveland-street thence by the centre of that street and a prolongation thereof to a landmark on the road to Cook's River thence on the west by the western side of that road to the north-eastern angle of the University Reserve thence by a straight line from that angle to the point of commencement in the centre of Parramatta-street opposite the centre of Bay-street."

*Question*,—That the Schedule, as read, stand Schedule A of the Bill,—*agreed to.*

Schedule B. Amendment proposed (*Mr. Hill*),—to omit "Cook Ward," in order to *insert* new boundaries to that Ward,—*agreed to.*

New boundaries of "Cook Ward" proposed (*Mr. Hill*).

Same read as follows:—

#### " COOK WARD.

"The portion of the City of Sydney bounded by the centre of Liverpool-street from its junction with Elizabeth-street to the South Head Old Road along the centre of that road to the north-west angle of Sydney Common thence along the centre of Dowling-street to a point where it intersects the southern boundary of the Borough of Paddington thence by that boundary to its intersection with the southern alignment of the South Head Old Road thence by that alignment easterly to its intersection with a line laid

down marked out with stone posts and deemed to be the dividing line between Sydney Common and the Water Reserve thence in a south-westerly direction by the said dividing line to its intersection with the southern boundary of Sydney Common thence by that boundary to the south-west angle of Sydney Common thence in a northerly direction by the western boundary of that Common to its intersection with the centre of Cleveland-street thence along the centre of that street to the centre of Elizabeth-street thence along the centre of Elizabeth-street to the centre of Liverpool-street."

*Question*,—That the new boundaries of "Cook Ward" stand part of Schedule B,—*agreed to*.

Amendment proposed (*Mr. Oatley*),—to omit "Paddington Ward,"—*agreed to*.

Schedule B, as amended,—*agreed to*.

Preamble read and considered.

Amendments proposed (*Mr. Oatley*),—to omit the words "the Water Reserve," in line 4, and the words "and Paddington," in line 5,—*agreed to*.

Preamble, as amended, *agreed to*.

Title read and *agreed to*.

Chairman submitted Draft Report.

Same read, amended, and *agreed to*.

Chairman to report.

#### SCHEDULE OF AMENDMENTS.

Preamble, line 4. *Omit* "the Water Reserve."

" " 5. *Omit* "and Paddington."

Clause 3, " 15. *Omit* "nine," *insert* "eight."

" " 17. *Omit* "Paddington Ward."

*Insert* the following *new clause*, to stand clause 4 of the Bill:—

"4. From and after the passing of this Act one-half of the proceeds derivable by the Commissioners of the Randwick and Coogee Bay Road Trust from the tolls arising from that Trust and also a moiety of any moneys payable by the Government for the maintenance of the said road shall be payable to the Municipal Council of Sydney who shall be bound to keep that portion of the Randwick Road included in Schedule A in good order and repair."

#### SCHEDULE A.

*Omit* Schedule A, and *insert* new Schedule A, as follows:—

##### "SCHEDULE A.

"Commencing in the centre of Parramatta-street at its junction with Bay-street thence on the west by a straight line along the centre of Bay-street and its prolongation to the eastern shore of Blackwattle Cove thence again on the west and on the north-west north north-east and east by the waters of Port Jackson to the centre of the bridge at the foot of William-street East thence on the east by the stream entering Rushcutter's Bay to a culvert on the South Head Old Road at the north-west corner of Sydney Common thence again on the east by the centre of Dowling-street to a point where it intersects the southern boundary of the Borough of Paddington thence on the north by that boundary to its intersection with the southern alignment of the South Head Old Road thence by that alignment to its intersection with a line laid down marked out with stone posts and deemed to be the dividing line between Sydney Common and the Water Reserve thence again on the east by the said dividing line to its intersection with the southern boundary of Sydney Common thence by that boundary to the south-west angle of the said Common thence in a northerly direction by the western boundary of the said Common to its intersection with the centre of Cleveland-street thence by the centre of that street and a prolongation thereof to a landmark on the road to Cook's River thence on the west by the western side of that road to the north-eastern angle of the University Reserve thence by a straight line from that angle to the point of commencement in the centre of Parramatta-street opposite the centre of Bay-street.

#### SCHEDULE B.

*Omit* "Cook Ward" and *insert* new Boundaries, as follows:—

##### "COOK WARD.

"The portion of the City of Sydney bounded by the centre of Liverpool-street from its junction with Elizabeth-street to the South Head Old Road along the centre of that road to the north-west angle of Sydney Common thence along the centre of Dowling-street to a point where it intersects the southern boundary of the Borough of Paddington thence by that boundary to its intersection with the southern alignment of the South Head Old Road thence by that alignment easterly to its intersection with a line laid down marked out with stone posts and deemed to be the dividing line between Sydney Common and the Water Reserve thence in a south-westerly direction by the said dividing line to its intersection with the southern boundary of Sydney Common thence by that boundary to the south-west angle of Sydney Common thence in a northerly direction by the western boundary of that Common to its intersection with the centre of Cleveland-street thence along the centre of that street to the centre of Elizabeth-street thence along the centre of Elizabeth-street to the centre of Liverpool-street.

*Omit* "Paddington Ward."

Apportionment  
of tolls.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

# MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

## SYDNEY BOUNDARIES AMENDMENT BILL.

FRIDAY, 19 FEBRUARY, 1869.

Present:—

MR. HART,  
MR. NEALE,

MR. SUTHERLAND,  
DR. LANG,

MR. OATLEY.

JAMES HART, Esq., IN THE CHAIR.

Philip Francis Adams, Esq., Surveyor General, called in and examined:—

P. F. Adams,  
Esq.

19 Feb., 1869.

1. *Chairman.*] There is a Bill before this Committee to amend the boundaries of the city of Sydney, so as to include the lands known as the Sydney Common, the Water Reserve, No Man's Land, and Paddington; and the Committee wish to have some information from you respecting the boundaries of the land so proposed to be included within the boundaries of the city. Have you any plan in your possession showing the lands respectively known as the Sydney Common, and the Water Reserve? I produce a plan, which shows, I think, everything that will be required by the Committee. (*Plan produced, marked No. 1.*) I can give you a copy of this, but I cannot spare the original.

2. Does the plan you now refer to, show the original boundaries of the Sydney Common? It shows the boundaries in 1811, and also the boundaries of the Municipality of Randwick, as proclaimed on 27th February, 1859, and the portion dedicated on the 5th October, 1866.

3. How are these boundaries tinted on the plan? They are tinted red for the boundaries of 1811; the purple and red edgings taken together show the space within the limits indicated by four posts originally erected, and referred to in the description.

4. Upon referring to the *Government Gazette* of 21st August, 1849, now before you, do you find a notice bearing date 17th August, 1849, in which the boundaries of the Sydney Common are described? Yes, it appears here.

5. Will you be good enough to read the description of the land known as the Sydney Common? "Parish of Alexandria, 1,300 acres of land known as the Water Reserve, or Sydney Common; bounded on the west by Foveaux and Hall's grant (known as the 'Surry Hills,' and 'Campbell's Grant'); on the south by S. Terry's 570 acres (known as the 'Lachlan Mills'), and the Sydney Racecourse Reserve; on the east by a line north, to near the three-milestone on the Old South Head Road; and on the north by that road to nearly opposite the Gaol at Woolloomooloo. This land is situated on both sides of the Botany Road, and is exclusive of the small grants of Gordon, Newcombe, Levey, Brooks,—Church of England, Presbyterian, and Wesleyan appropriations,—the General Cemetery, —and St. James' Glebe."

6. Have you any plan showing the boundaries of the 1,300 acres there described? This plan shows it by the purple edging.

7. Are you aware of the Government having appointed a Commission, in 1861, with the view of reporting upon the alienation of lands, in or near the city, for the purpose of the Water Reserve? Yes; Mr. Pearce, Mr. Maclean, and Mr. Bell, were appointed. Their report

P. F. Adams, Esq., report will be found attached to the Progress Report of the Select Committee on "Sydney Water Reserves" (ordered to be printed, 21st April, 1864), and forms Appendix A to the evidence given by Mr. Davidson, the then Surveyor General, before that Committee, on 19 Feb., 1869. 18th November, 1862.

8. Have you the plan illustrating the result arrived at by that Commission? Yes. (*Plan produced, marked No. 2.*)

9. Will you hand in to the Committee a copy of it? Yes, as soon as it can be prepared.

10. Did the Government, acting under the power conferred upon them by the Land Alienation Act of 1861, proclaim that land as a permanent common, and also as a water reserve? Yes, by notice dated 5th October, 1866.

11. What quantity of land was proclaimed as a common? 490 acres.

12. And as a water reserve? 768 acres.

13. Making, in all, 1,258 acres? Yes.

14. Does the plan you have already handed in, marked No. 1, show the portions so appropriated, and how they are tinted? It does. The purple edging indicates the additional space which is claimed by the Corporation, as being (according to report) within the limits indicated by the four posts originally erected, and referred to in the description.

15. How is the Water Reserve indicated—the 768 acres? By a broad, green edging.

16. Are there any streets laid out or recognized by the Government, over the portion appropriated as a water reserve? Yes; there are streets through the Water Reserve.

17. I refer more particularly to that portion which lies within the Municipality of Waverley, and which was lately added to the original grant? I really could not say, from this plan; I should have to look to other plans.

18. Do any appear on that plan? There are lines indicating either proposed or actual streets—I cannot say which.

19. On further reference to official plans, you will be able to inform the Committee? I can tell you precisely.

20. Do you think it would be advisable to allow any streets to be constructed over the Water Reserve—so far as regards the supply of water to Sydney? I do not think that one or more streets would injure the water at all. The Randwick Road goes through a portion of the Botany Water Supply, and I cannot say it does any injury at all. Of course, it would not be advisable to cut up the Reserve with streets in the ordinary way; but I cannot see that public interests should be obstructed simply by the fact of its being a water reserve.

21. I suppose it would depend altogether on the locality in which it might be proposed to lay out streets? In a great measure.

22. It would not do to carry them through the midst of the swamp? A street through the middle of the swamp might, perhaps, be injurious to the water supply, by stopping the percolation of the water; I do not see that otherwise it would make any difference whether it went through the swamp or not.

23. *Mr. Oatley.* At present, you are not prepared to give the Committee the information as to where these streets really are? No, I could not say, from memory.

24. But, by examining other maps in the office, you will be able to form a better opinion as to whether they would be likely to be injurious or not? I can.

25. I understand you to say that, if they were on the heights above the flat, it would not be injurious to have two or three streets or roads made through the Reserve? No; I do not think a road or two, more or less, would injure it.

26. But if these roads or streets were lined with houses, would not the drainage be injurious to the water supply? That is an extreme case—I would never think of proposing anything of that sort.

27. *Mr. Neale.* You have said that there are some lines marked on the plan which seem to indicate proposed streets? Yes.

28. May they not indicate the boundaries of allotments of land proposed for sale, and not streets at all? Possibly so. I think it very probable.

29. *Mr. Oatley.* Do you know when Waverley was proclaimed a municipality? In 1859.

30. This portion added to the Reserve—was that a portion of the Municipality of Waverley in 1859? It was.

31. Then, this portion has been taken from that municipality by proclamation? Yes.

32. And that is the portion on which these supposed streets or allotments are marked out on the plan? Yes. They are continuations of Market, Bourke, and Victoria Streets, and are about being proclaimed under the Road Act (4 Wm. IV, No. 11). There is also another road or street passing over the part (taken from Waverley) added to the Common; thence to St. Matthias' Church, which is about being proclaimed under the same Act. The roads shown on plan No. 1, coloured brown, are opened to the public; those coloured red are intended to be opened to the public.

Charles Moore, Esq., Mayor of Sydney, called in and examined:—

Chas. Moore, Esq., 33. *Chairman.* Are the Sydney Municipal Council the promoters of the Bill, now before this Committee, to amend the boundaries of the City of Sydney? Yes; the Municipal Council of Sydney want to extend the boundaries of the city, as proposed in the Bill.

19 Feb., 1869. 34. So as to include the lands known as the Sydney Common and Water Reserve, as defined

defined by proclamation of the 5th October, 1866,—the piece of land at the Glebe known as No Man's Land,—and Paddington? Yes. We have been petitioned to take Paddington in, by the inhabitants of Paddington. A petition was sent to the Sydney Municipal Council, and passed by the Council, to take it in.

Chas. Moore,  
Esq.  
19 Feb., 1869.

35. *Mr. Neale.*] Have any other petitions been sent in? We have had none.

36. *Dr. Lang.*] You are aware there have been petitions against it? One to the Legislature—not to the City Council. We have had only the one petition—that is, for taking in Paddington.

37. *Chairman.*] With regard to the Sydney Common, containing 490 acres of land,—is it desirable that it should be incorporated with the city? No doubt about it.

38. Will you explain your reasons? The Municipal Council of Sydney have got a Bill for its improvement; they have also got a Bill to borrow £15,000 for its general improvement; and, under these considerations, it is my opinion it should belong to the city, simply because it was originally granted to the citizens in 1811.

39. Has any sum of money been spent upon it already? Yes; I think, somewhere about thirteen or fourteen thousand pounds.

40. How has that money been raised? By debentures: a portion of the outskirts of the Common to be sold, to pay them on maturity, when the improvements are made.

41. Then, the improvement of the Common has been no additional tax upon the citizens of Sydney? None whatever.

42. Can any revenue be made derivable from it when the improvements are completed? A revenue can be derived from the grazing. The grass will be in splendid condition, and it must bring a large revenue when the improvements are completed.

43. That Common, or a portion of it, lies, I believe, within some municipality? The whole of the Common lies within the Randwick Municipality, and a portion of the Water Reserve is in Waverley.

44. And another portion in Randwick? And a portion in Paddington—a small reserve intended for another reservoir at Paddington.

45. One of the reservoirs for supplying the city of Sydney with water lies within the municipality of Paddington? Yes; and the vacant ground for another lies alongside it.

46. Do the Paddington Municipality tax that reservoir? They have taxed it.

47. Do the Municipality of Randwick claim to tax the whole of the land known as the Sydney Common and Water Reserve? They have not attempted it yet.

48. It would be very desirable to exempt the reservoir from taxation? No doubt it would be, because it is for the general use of the public—the public benefit.

49. If it is for the public benefit, how can it be taxed under the Municipalities Act? They have taxed us, and we have paid it.

50. There is a piece of land that joins the city boundary, near the Glebe, known as "No Man's Land"—that is also included in this Bill? Yes.

51. It is very desirable, for preserving the public health, that that should be included in the boundaries of the city? Yes, very desirable.

52. Will the mere fact of the city taking it in, yield any revenue to the city? I think it will be the other way, for some considerable time to come. There may be a small revenue from it, but nothing like equal to the expenditure that will be necessary upon it.

53. Now, with respect to Paddington, is there any reason why that should be included within the boundaries of Sydney? A portion of the Common is in Paddington—that is, the sand-hill from Dowling-street towards the Barracks—and that portion should be taken out of Paddington.

54. If the Sydney Common, as defined by the Surveyor General, is included in the Bill, that will exempt it from the municipality of Paddington? Yes.

55. Therefore, so far as that reason is concerned, there is no necessity for taking in Paddington? There would be no necessity to take in Paddington, provided we have the Sydney Common and Water Reserve exempted. I am not in favour of taking in Paddington myself, but I must give way to the larger number.

56. *Mr. Outley.*] The fact of taking in Paddington would be no benefit to the city at all, in any way—the amount that would have to be expended on it would be more than the benefit to be derived from the taxes paid? It would be no benefit at all to the city.

57. The Municipal Council of Sydney took no action in the matter, until they were applied to by petition from the people of Paddington? No. We brought in a Bill last year to take in the reservoir and sand-hill only.

58. It was at the request of the people of Paddington that the City Council took action in this matter? Yes.

59. Speaking of No Man's Land,—the amount that will have to be expended to improve the sanitary condition of that particular portion of the city will be considerably more than the amount of revenue? Ten times more.

60. I suppose from ten to fourteen thousand pounds will have to be expended upon the sewerage of that piece of land? Yes—a very large amount for years to come.

61. The Municipality of the Glebe refused to take it in, on account of its requiring so large an expenditure? Yes; they refused to take it, as they had not the means to make improvements on it.

62. Do you know if the people of Waverley object in any way to this portion of that municipality being handed over to the Municipal Council of Sydney? I have not heard any objection; all they wanted was the street.

63. Have you heard of any objection from the Randwick people? I have heard of none from the Randwick people.

64. *Chairman.*] With regard to the reservoir, does it not lie within the original boundaries of the Sydney Common? It did, but it was taken into Paddington in 1859 or 1860. They should never have been allowed to have it, if our old aldermen had done their duty. They have filched these properties from the city—they have no right to do it.

65.

Chas. Moore, Esq. 65. *Mr. Oatley.*] You speak of the large revenue that will be derivable from grazing cattle on this Common after the improvements are completed—Do you not think the Common will be injured by the cattle tearing and trampling down the shrubs? No; it will be covered with grass when we have finished the improvements.

19 Feb., 1869.

66. Are not the cattle that are grazing there now destroying the shrubs, and thereby allowing the sand to drift into the city? That is where there is no grass—on the portion which remains in its original state. On the portion which has been made, the grass is as good as in the Domain; consequently, the cattle cannot do it any harm.

67. Inside the fence of the Water Reserve, the ground is nicely covered with shrubs; while, outside, the shrubs have been nearly all torn down? I should never think of allowing cattle to go into the inner portion of the Water Reserve.

68. *Chairman.*] You only contemplate allowing cattle to graze there when the grassing is completed? Yes, and only a limited number.

69. It will be a benefit then? It will; it will bring in, I am sure, £400 or £500 a year. I would just like to mention that, in this plan of 1862 (*handed in by Mr. Adams, and marked No. 2*), there are no streets shown through the Water Reserve; but I am aware of another plan got up by a private party—not by the Government—showing these streets.

70. *Dr. Lang.*] Is the ground within the Water Reserve so level as to enable grass-cutters to perform their operations within it? We do not allow any person inside the fence of the Water Reserve at all.

71. I asked the question, with a view to mention the case of the city of Edinburgh. There is a large revenue derived by the City of Edinburgh from meadows that are watered with the stuff from the city, and they raise a large amount from the grass that is grown? That could not be adjacent to a water reserve; it would never do to use any stuff from the city in a water reserve. That might be done, perhaps, on a portion of the Common where it would not drain into the Water Reserve.

72. *Mr. Oatley.*] The night-soil is, in fact, spread about now on portions of the Common? Yes.

73. *Dr. Lang.*] Are you aware that there is a party at Paddington opposed to the junction of that municipality with the city? I know a petition has been received by the Legislature, from the people of Paddington, against the junction with Sydney.

74. The ground on which they allege that it would be inexpedient for them to join their municipality to the city is, that they would be subject to the debt for sewerage—Are you aware of that? That is mere talk. Paddington is a mere trifle, compared to the rest of the city.

75. Do you think it would be desirable, for sanitary objects, that that municipality should be joined with the city? I think it would, because they want both water and sewerage. It would be beneficial to them. One sewer made in the year would take all their funds.

Edward Bell, Esq., City Engineer, called in and examined:—

Edward Bell, Esq. 76. *Chairman.*] Are you acquainted with the localities mentioned in the Bill to amend the boundaries of the city of Sydney? I am.

19 Feb., 1869.

77. Can you speak to the accuracy of the Schedules to the Bill? I can. There are some corrections necessary in Schedule A,—chiefly mistakes in the printing.

78. Schedule A, as printed, I believe, comprises the land known as the Sydney Common and Water Reserve, containing 1,258 acres? It does.

79. The piece of land at the Glebe (known as No Man's Land), and Paddington? Yes.

80. Have you any plan showing the boundaries of the city as so extended? I have, as proposed to be so extended by the Bill. The plan is marked A, and coloured blue. (*Plan handed in.*) That I hand in, accompanied by a revised Schedule. (*Schedule handed in.*)

81. Have you any plan showing the several places separately, and with reference to the municipalities? I produce a plan marked B (*handed in*), which shows the boundaries of the city and adjacent municipalities, as they now exist. The part tinted red indicates the portion lying between the city of Sydney and the Glebe, known as No Man's Land.

82. How is the Sydney Common shown there—Is it shown separately from the Water Reserve? The plan marked B shows the Water Reserve and Sydney Common in the municipality of Randwick.

83. Are they separately indicated by any lines? They are separately indicated by lines, and also by colours. The city of Sydney is tinted blue; Sydney Common and Water Reserve and Randwick, green; Waverley, neutral tint; Woollahra, yellow; Paddington, pink; and No Man's Land, red.

84. Supposing it were proposed to omit Paddington, can you supply the Committee with a description showing how Schedule A would then stand? I can. I produce a plan, marked C. (*Handed in.*) Plan C, where tinted blue, shows the city of Sydney, No Man's Land, Sydney Common, and Water Reserve, leaving out Paddington, excepting a small portion of that municipality which is a part of the Sydney Common, and the site of the reservoir. I also hand in a Schedule, which may be used as Schedule A, in the event of that plan being adopted. (*Schedule handed in.*)

85. Schedule B of the Bill would also have to be amended, by omitting Paddington Ward? Yes. That will depend upon which plan you adopt—whether A or C.

86. Do you think it is desirable that the boundaries of the city should be extended as proposed, either including Paddington or omitting it? I think it would be a great benefit to Paddington to include it in the city, but none whatever to the city to be joined to Paddington. There is one thing with regard to the sewerage: the boundary between Paddington

Paddington and the city is Rushcutter's Bay Creek, which now is a watercourse, but must eventually become a sewer; and it will have to be made, either at the expense of the city or Paddington, or both. I think it would be far beyond the means of the municipality of Paddington to make such a sewer. I believe their revenues to be about £1,100 a year; and I think the first sewerage work we should have to perform, after having been connected with Paddington, would be to lay a sewer through that creek, which would cost four or five thousand pounds.

Edward Bell,  
Esq.  
19 Feb., 1869.

87. Is any portion of the city now drained by that watercourse? Yes, a small portion—the slope from Darlinghurst Road to the creek.

88. With reference to the Sydney Common, or Water Reserve,—would it, or would it not be desirable simply to include the land known as the Sydney Common, and leave the land known as the Water Reserve in trust for the purpose for which it is now held, so as not to include it within the boundaries of the city? It must be put into the hands of somebody—some trustees who have means to keep it in order, and to keep up the fences, so that there may be no trespass on the Reserve. It strikes me it could not be better placed than in the hands of the municipal body, who have the means to keep it in order, and whose interest it is to do so.

89. In course of time, is it your opinion that the land known as the Water Reserve will become wholly insufficient for the purpose of supplying Sydney with water, and that the land may be then dealt with as public land? I think, if the Reserve is preserved, it will supply the present city of Sydney to all time, but it will not supply the suburbs too. We have more than sufficient water now for the supply of the city of Sydney, without going to any extraordinary expense to husband it; but we have not water enough for the city and suburbs. If that Water Reserve is properly preserved, I have no hesitation in saying we will have water for the city, and those portions of the suburbs that are now supplied, for the next thirty or forty years, and the best water that can be had.

90. *Chairman.*] Are not its powers of supplying water yearly diminishing? No; I am decidedly of the reverse opinion.

91. If the Government determine upon some large scheme for the purpose of supplying Sydney with water, that land known as the Water Reserve could be appropriated for public purposes? Yes, if the present Sydney Water Works are abolished.

92. Would it not suit all the purpose of the promoters of this Bill to have that land vested in them in trust, instead of making it a portion of the city? That depends upon the powers you confer upon the trust. The city are virtually trustees of that land now, without any power whatever to take care of it or keep it in order; and unless it be taken out of the adjacent municipalities, by special enactment, it would always be subject to be rated by those municipalities.

93. Is that through some defect in the Crown Lands Alienation Act? I am not aware from what it is; but it appears to me the Corporation has not power to protect that land from trespass.

94. Have any of the lands that have been dedicated to the city been given by grant, or are they merely dedications? Merely dedications.

95. No grants have been issued? I think there have been one or two, for markets. There is a grant of the land for the Market Wharf, for instance, and I believe for the Haymarket. I have never seen the grant for the Haymarket, but I have seen the grant for the Market Wharf. With reference to the water supply, I may say that the rainfall for the last twelve months did not exceed thirty-seven\* inches (the average for ten years being about forty-nine† inches), and yet we have had plenty of water, although during last year we have pumped in 267 millions of gallons more than in any previous year.

96. *Mr. Sutherland.*] You have stated that the Corporation have no power over the Water Reserve to protect it at present? Yes.

97. Have they not full power, by an Act called the Water Act, to protect this water? They have to protect the water from pollution; but they are not sufficiently in charge of the land to give them the power to protect the land from trespass.

98. Is not the Botany Reserve proclaimed in the same way? That is proclaimed and purchased.

99. From private individuals? That is purchased from private individuals, by the Corporation, in fact. It was first proclaimed under the Act, and then purchased and paid for.

100. But the Corporation has no deeds or grants for it? I am not aware; I have never seen any deeds. It was proclaimed under the Act, and they required no deeds.

101. And a similar proclamation proclaims this under the Act? Yes, if it were proclaimed under the Water Act. I have always maintained that it should be proclaimed under the Water Act, but I have been told repeatedly there was no occasion.

102. *Mr. Oatley.*] Have you made a survey of this place—No Man's Land? I have not made an actual survey of the land, only of the creek between it and the city boundary.

103. Have you any idea what it would cost the city to drain it? I have just brought in an estimate of over £8,000.

104. That is for one portion? Yes. I think it will take about £5,000 more.

105. Are there many houses there? I should think the taxes would not amount to more than three or four hundred pounds a year. It is a poor neighbourhood.

106. *Mr. Sutherland.*] Have you put in any Schedule showing the boundaries of the Common, in the event of the Committee or the Legislature excluding the Water Reserve from this Bill? No, I have not.

107. But it is shewn clearly on the plan? A line has been surveyed, which is shown on the plan, dividing the Sydney Common from the Water Reserve—the line of the watershed.

108. Does not the watershed at present take in a large portion of the municipality of Waverley? It does.

109.

\* NOTE (on revision):—Thirty-two.

† NOTE (on revision):—Fifty.

Edward Bell, Esq. 109. Could you give the Committee any idea of the number of acres included in the watershed that now supplies the Lachlan Swamp with water, which lie within the municipality of Waverley, and which have been alienated? About 163 acres; 52 of which have no building on the several allotments. The drainage of these lands may be taken away by sewers, so as to preserve the Water Reserve from pollution, as stated in Report of Commissioners, of February, 1862.

110. With reference to the junction of Paddington with the city,—would it not be a great benefit to both the city and Paddington if they could join in the sewerage, and in making the streets? I think it would be a great benefit for them to be joined, in one respect, to enable us to work the sewerage under the Sewerage Act; because it would not be pleasant for the Paddington Municipality to be taxed under the Sewerage Act by the City of Sydney. The City of Sydney have power to tax where they lay a sewer, when the sewer is finished, both in city and suburbs, for the sewerage rate; and that would be unpleasant for both parties—the taxed and the assessors.

111. Would it not be a great benefit hereafter, in a sanitary point of view, to have the streets, crossing the dividing creek or gully between Paddington and Sydney, raised, instead of letting people's houses be built there, where they must hereafter be almost buried? No doubt about that, especially on the Paddington side. There is a very long slope leading from the creek to the higher parts of Paddington; the slope on the Sydney side is very short indeed.

112. *Dr. Lang.*] From your experience of the last eighteen months, are you still of opinion that the Botany Swamps are adequate to supply the city with water for any considerable time to come? I am, undoubtedly, for the next twenty-five years—the city and suburbs as now supplied—and the city alone for all time.

113. *Mr. Oatley.*] With additional expense, of course? Yes, out of the revenues of the water.

114. *Dr. Lang.*] So that you do not consider there is any immediate necessity for the action which is recommended—bringing water from the Nepean, or other distant sources, for the city? For the city itself, no; for some of the surrounding municipalities and towns, which lie between here and where they may propose to bring the water from, it might be advisable; but for the city itself, I conceive there is abundance of water—more than they can use.

115. You stated that the average rainfall in this locality, for ten years past, has been about 49\* inches? Yes; and during the last twelve months the rainfall has not exceeded 37† inches. I am not speaking of last year, but of the last twelve months.

116. Are you aware that a similar process of junction to that which is proposed for the city and the municipality of Paddington, has been carried into effect in the city of Glasgow? I have heard of it, but I do not know it of my own knowledge.

117. A municipality on the opposite side of the river was taken into the city? Yes.

118. Do you not think there would be considerable objection to the formation of a separate trusteeship for the Water Reserve, apart from the Corporation generally? I think it would be very objectionable.

119. You think the Corporation should be the trustees? While they hold the Water-works, they ought to have the control over the Reserve for collecting the water.

120. *Mr. Oatley.*] In fact, a great deal of the citizens' money has been expended on these water-works? Yes, a great deal. We are expending money every year, particularly on the swamps.

121. *Mr. Sutherland.*] Can you give the length of the road within the boundaries of the Sydney Common and Water Reserve—the new line as well as the old—from where the trust begins to where it crosses the boundary and leaves the Reserve?

#### Measurement of Old Road—

From city boundary to the new toll-house .....	97 chains
From the new toll-house to the boundary of the Water Reserve, where the road crosses .....	44 „
Total .....	141 chains

#### Measurement of New Road—

From city boundary to the new toll-house .....	94 chains
From the new toll-house to the boundary of the Water Reserve, where the road crosses .....	44 „
Total .....	138 chains

\* NOTE (on revision) :—50.

† NOTE (on revision) :—32.

TUESDAY, 23 FEBRUARY, 1869.

Present:—

MR. HILL,  
MR. OATLEY,  
DR. LANG,MR. FORSTER,  
MR. SUTHERLAND,  
MR. NEALE.

JAMES HART, ESQ., IN THE CHAIR.

Mr. Stephen Dickson called in and examined:—

122. *Chairman.*] You are Mayor of the municipality of Waverley? Yes.

123. You are desirous, I believe, of affording some information to this Committee, respecting the Bill before the House to amend the boundaries of the city of Sydney? I am.

Mr.  
S. Dickson.

23 Feb., 1869.

124. The Bill recites that it is desirable to include within the boundaries of the city the lands severally known as Sydney Common, the Water Reserve, No Man's Land, and Paddington. I believe it is more with reference to the Water Reserve than anything else that you desire to speak? Yes; it is a part of the proclaimed district of the municipality of Waverley, as will be shown on this Government plan—a copy of the parish map. (*Handed in.*)

125. Have you any objection as far as regards the Sydney Common? That does not come within our district.

126. You have no objection as far as that is concerned? No.

127. But you allege that the portion known as the Water Reserve, comprising, I think, 768 acres, lies within the municipality of Waverley, and that the municipality will be in some way affected by this Bill? Yes.

128. Will you be good enough to state what your objections are to the Bill? By a proclamation in 1859, the municipality of Waverley was properly defined, and the boundaries were fixed accordingly, and we wish to still retain possession of that land. We have been in existence about nine years; and it is only about four years ago that this land which we object to hand over to the city of Sydney was devoted to the city, by proclamation, for a water reserve.

129. What is the date of the proclamation? The proclamation of the municipality is dated 14th June, 1859. The boundaries are described on that map by marked lines.

130. The plan you have handed in shows the boundaries of the municipality by a red edging? Yes.

131. Where does this plan come from? From the Government office—it is a copy drawn by Mr. Langley, I think. In this plan, you will observe certain streets were marked out by the Government, many years ago—as far back as 1844. This green line is what they call the new Water Reserve.

132. That is under the proclamation of 1866? Yes. This is a copy from the old Government maps, parish of Alexandria. I also hold in my hand tracings from the Government office of lands that have been sold on plans showing roads through that Water Reserve.

133. You state that you obtained this from the Surveyor General's Office? Yes.

134. Is it now in the same state as when you obtained it? It is. I can produce the surveyor, who is ready to prove so.

135. I see there are two streets marked here—Bourke-street and Market-street—Are they actually used as streets, or merely laid down on the plan as intended streets? Merely as intended streets, but they have been used by some parties that will appear before you, for many years.

136. If this land is to be retained as a water reserve, is it not extremely desirable to prevent its being cut up by streets? I think it is useless as a water reserve.

137. But supposing the Government deem it desirable to keep it as such, is it not extremely undesirable to have any thoroughfares through it? I do not think the streets would do any harm to it. No harm would accrue to the water reserve by opening these streets, but there would be great damage to those who desire to obtain access to their property, if they are closed.

138. Is there not a public road, parallel with these streets, a short distance from them? It is very much higher, and a round-about road.

139. What is the distance? I should think it is from a mile to a mile and a half further going round. You can take a short cut through a street called Bourke-street, from Birrell-street to Mr. Hooper's land. For him to go across that way, with a properly made road, would save, I am sure, over a mile.

140. Then, by allowing these streets to be formed, two or three persons would be enabled to get to their property more easily than at present? Very much so.\*

141. What are the particular streets that you claim to have opened? Bourke-street and Market-street, and that little bit of Victoria-street. By the map you will see it is fenced right across. I have also to say that, if such a Bill as this is passed, and that land taken away from us, of course we will lose a great portion of our prospective revenue.

142. From the circumstance of this land being within your municipality, do you actually claim it? Yes, most undoubtedly.

143. Has there been any grant to you? Only by the proclamation.

144. *Mr. Sutherland.*] You do not claim it as a freehold? No.145. *Chairman.*] It has been dedicated in trust as a water reserve? That is since our establishment.

146.

\* NOTE (on revision):—I did not hear the words two or three. My answer was given with those omissions.

- Mr. S. Dickson.  
23 Feb., 1869.
146. Is it not the fact? I only know it by seeing a few figures in the *Government Gazette*, but no regular proclamation that I know of. I also go upon the ground that we have been proclaimed with these boundaries, and also been gazetted, under the new Act, as a properly constituted municipality; and as, under the new Act, there are modes of annexation provided for taking away a portion of one municipality and adding it to another, I think it would be wrong to carry it out in the way proposed by this Bill.
147. Would the circumstance of transferring this land from the care of one municipality to another, at all alter the circumstances of the trust? I think we ought to have been consulted. I know we made application for it first for a pleasure ground.
148. Supposing the Government chose to put up this land for sale, would you have any objection? No, because it would then bring us revenue.
149. Do you derive any revenue from it at present? Not from Government land. These tracings of pieces of land that have been sold, show that the parties have bought with a right to expect these streets to be made.
150. You say that land adjoining this water reserve has, at various times, been sold to different individuals, with streets laid out on the Government plan? Yes; these are some of the tracings of the different lands (*referring to tracings exhibited by the witness*).
151. *Mr. Oatley.*] Have they not a right of road as far as the land has been sold already? If you shut off the road at any part of it, the right is taken away.
152. Have they not a right of road as far as the land has been sold,—that is what I ask? I believe so.
153. Then their frontage to the road is not taken away, if they have a right to the road as far as the land has been sold at the present time? No, except one plot of ground belonging to a man named Guinsey; which, I think I can show you, cannot be got at if this street is closed. (*Witness explained by reference to the map.*) We object to this Bill, on the principle that it takes away a portion of the revenue which we expect to get at a future time —
154. *Mr. Hill.*] Contemplated revenue? Contemplated revenue; and also, that it destroys the rights of some of our ratepayers, by taking away the roads they ought to have free access over.
155. *Mr. Oatley.*] Was any objection taken at the time, by the Municipality of Waverley, to the proclamation of this additional piece of ground for a water reserve? We never observed it.
156. Then no objection was made? We have never seen it.
157. How many allotments are sold fronting this reserve you speak of? It is sold all round it.
158. Do you not think it would be injurious to the Water Reserve if persons were to build on these allotments—that the drainage from water-closets and such things would be objectionable? I think not, because there is no water in that portion of it.
159. Does it not drain into the Water Reserve—the fall is that way? Yes, but there is no water on this land. I do not think it would interfere with the water, because the drainage would have such a distance to go; and the sand is a perfect filter. All the land in Waverley abuts on the Water Reserve, every bit of it—the whole of the hills.
160. *Chairman.*] Did not the Government withdraw a large portion of these lands from sale, in consequence of a Report from a Committee of this House, representing that the sale would be injurious to the public interests, on account of the damage to the water supply? Yes.
161. That was the reason why it was handed over to the city as a water reserve? I suppose so.
162. And as to the portions that were sold, were they not accompanied by conditions that only one house should be built on each acre? I am not aware of that.
163. *Mr. Forster.*] Are there not some other objections, to which you have not referred, to this proposal—Does it not strike you that it would very much destroy the symmetry of your municipality, by cutting a piece of it out and handing it over to another? It would take away nearly one-fourth of our municipality.
164. And alter the shape of it considerably? Very considerably.
165. Do you not think it would be very undesirable to construct a municipality of the form which yours would assume if this large piece were cut out of it? There would be so many irregularities in it, that it would puzzle people to find out what was the municipality.
166. I suppose, when the municipality was formed, you expected the size of it to be maintained? Yes.
167. Do you speak the sentiments of many of the ratepayers? I do. I represent the Council and the ratepayers.
168. Are these streets you speak of open—Have they been opened yet? Not as regards making them. There is a question of law, two cases pending, about these very streets.
169. Have the Government opened them? No; none of our roads have been opened by the Government.
170. How do you open them then—Are they opened without proclamation by the Government? The Government say the right of user is sufficient. We have requested them to proclaim streets, but they say we have used them, and that is sufficient. That was the reply of Mr. Wilson, the Minister for Lands under the late Government.
171. Have you made any application to the present Government? Yes, about these two streets.
172. What was the answer? The answer, I think, was, that they were about being proclaimed.

173. Supposing this water reserve to be retained, does it follow as a matter of course that these streets might not be dealt with in a way to serve the public interest, without reference to the question of taking so much from the municipality of Waverley? I think they might. There is no occasion to hand it over to the city of Sydney, for I think at some future time we shall not have our water from that district. Mr.  
S. Dickson.  
23 Feb., 1869.
174. Supposing this land to be required as a water reserve, do you not think your municipality is capable of looking after the public interests as well as the City Corporation? Yes.
175. Do you not think it probable that the water reserve being in the hands of three or four municipalities, the public rights would be more likely to be consulted than if it were handed over to a single municipality? I am sure they would.
176. Would not the very circumstance of four municipalities having a joint interest in it, be a greater protection to the public rights than if it were handed over to a single one? I should think they would look after it more than the city of Sydney, which is so far away from it.
177. You would have no objection to the Government selling the land, if that was found to be necessary? Not in the least.
178. You would prefer it almost, because you would get more revenue? Yes, we could tax it at once.
179. Then it is not simply as Government land, or in any particular respect, that you desire this land to be retained within the boundaries of your municipality? We wish to retain our boundaries as given to us in the year 1859, and proclaimed by law.
180. If this land were required for a water reserve, I suppose your interest in it would be proportionate to the interest of the city of Sydney? Not as far as concerns water for the district; but most of us are Sydney residents, and are therefore interested to see that Sydney is supplied with water.
181. Do you apprehend that, if this is retained in your hands, any injury will be likely to be done to the public interest in that respect? I think not.
182. Do I understand that you were not consulted at all in this arrangement? No.
183. Then, this Bill was introduced into the House without any application to your municipality? Without any application. The first we heard of the land in question being handed over to the city as a water reserve, was about twelve months ago.
184. The Mayor of Sydney did not ask your opinion on the matter? No.
185. You have no objection to the Sydney Common being included? No; it does not interfere with us.
186. Does not any part of your boundary touch the Sydney Common? No.
187. Do you not consider your ratepayers have any commonage rights over the Sydney Common? We naturally expected it would be so. We applied for the land some years ago, but did not follow up the application, and therefore, I suppose, it was not handed over to us.\*
188. Is it a matter of fact that your ratepayers, as ratepayers of Waverley, have no commonage rights? None.
189. *Chairman.*] Has your municipality spent any money on this land known as the Water Reserve, for any public purpose? Not in forming the roads. I think there has been some money lately expended in clearing these roads, but not a very great amount.
190. What is the amount of your annual revenue? About £1,100, with the Government endowment.
191. Are you not aware that the dedication of this land by the Government is a portion of a large scheme for supplying the city of Sydney and the surrounding municipalities with water? We were not aware of it until about twelve months ago. When these questions arose, we looked to see whence the city of Sydney obtained their rights over this land; and then we found out that, by a sort of proclamation, it had been handed over to them in 1866.
192. The water that accumulates on this reserve flows into the Lachlan Swamp, I believe? There is no water accumulates there; the only water that would come from there would be from the rainfall; it may come from it underground, but there is no visible water there.
193. *Mr. Neale.*] Is it of a swampy nature? It is all sand; I do not think any portion of it is swamp.
194. *Chairman.*] Have you ever tried it by boring? No.
195. Then you are speaking without any data to go upon? Only by observation of its outward appearance.
196. *Mr. Oatley.*] Does the rainfall wash any rubbish into the Water Reserve? Yes, from the whole of Waverley.
197. If the Municipal Council of Sydney had not attempted to close these two roads you have been speaking of, you would not have taken any objection to the Bill? We would not have taken so much objection; but still, if this land is handed over to the city, of course our right to tax it will cease.
198. Do you not think the fact of these roads being occupied by houses would lead to the pollution of the Water Reserve? If it became a district like the city of Sydney—very closely built upon—then it might.

\* NOTE (on revision):—I meant my answer to refer, not to the City Common, but to the 768 acres of land set apart as a water reserve.

Mr. Richard Watkins called in and examined :—

- Mr. Richard Watkins.  
23 Feb., 1869.
199. *Chairman.*] You reside at Waverley? I do.
200. I believe you are desirous of affording the Committee some information respecting the Bill now before the House to extend the boundaries of the city of Sydney—Will you be good enough to state what objection you have to the Bill? I object to it because it deprives us of a good deal of our land, and especially of a street which leads to Randwick, on which frontage I bought my land.
201. When you say "our land," do you mean the municipality? Yes.
202. Are you under the impression that this piece of land belongs to the municipality? I certainly am; I certainly was led to understand that it was our reserve land.
203. Are you aware that that impression is incorrect—that it has been dedicated by the Government as a Water Reserve for the city of Sydney? Such dedication I never was in possession of, and never knew of before the fence was erected by the City Council.
204. By proclamation in the *Gazette*, 5th October, 1866, 768 acres were granted as a Water Reserve, and 490 acres as a Common? As a Water Reserve I think it would be a very bad reserve indeed, because the drainage of the whole neighbourhood goes into it—it is a gully.
205. What is the particular street you say will be shut up? It was what we called the the Lower Randwick Road; it was not named at the time I bought the land.
206. Will you look at this map (*map handed in by Mr. Dickson*), and see if there is any name to it? It appears to be called Bourke-street-here. I bought the corner on the allotment marked "S. H. and J. Pearce—4 acres, 2 roods."
207. Do you not observe that no portion of that street lies within the Water Reserve, as far as your allotment is concerned? No; but the stopping up of that street cuts off our connection with Randwick, as far as straight lines are concerned.
208. Where do you find straight lines? Well, nearly so. (*Witness explained by reference to the plan.*)
209. You say this portion which lies within your municipality is a gully? Yes.
210. And the Government have reserved it from sale? I understood so, and that the reserves were handed over to the Waverley Municipality. You must recollect that the rates of our municipality have been mortgaged for money borrowed, including the whole boundary of the municipality as proclaimed; and, to take away this large block of land, will affect the mortgagee's security.
211. Do you derive any revenue from this land at present? I am not in a position to answer that question.
212. *Mr. Hill.*] Are you an alderman? No, I am only a rate-payer. With respect to these streets, I have been using Bourke-street and Market-street for fourteen years.
213. *Chairman.*] Is there any considerable amount of traffic from Waverley to Randwick, on the road you have been speaking about? Not very much; but we bought our ground with the understanding that it was to be kept open.
214. How many persons travel over it in a day? I could not say.
215. One? Yes, more than that; perhaps a hundred; but I could not say; I am not there to witness it.

Mr. John Madden called in and examined :—

- Mr. John Madden.  
23 Feb., 1869.
216. *Chairman.*] You are a market gardener, I believe, residing at Waverley? Yes, I have been a market gardener.
217. You have heard, I suppose, that it is contemplated to extend the boundaries of the city of Sydney so as to include the piece of land known as the Water Reserve, lying within the municipality of Waverley? Yes.
218. Is there any objection to that course, as far as you are concerned? It would be a great disadvantage to me and those people who bought pieces of land, fourteen or fifteen years ago, with frontage to the road they want to shut up. If that is shut up, we shall have to go another road, about a mile and a half round.
219. If that road is left open, do you see any objection to the Bill? No; we only want the roads open. I do not know what the Council object to, but for myself, I only wish to have the road left open.
220. You allude to the road or track leading from Waverley to Randwick? Yes, from the tea-gardens over to Mr. Hooper's market garden. I helped to measure it, twenty-five years ago.
221. Is there any amount of traffic along that road? Not now, since the fence was put up; but it used to be a good thoroughfare before the fence was put up.
222. *Mr. Sutherland.*] Will you look at this plan (*put in by Mr. Dickson*), and see the name of the street you refer to? There was no name to it that I know of, only it was a Government road.
223. *Chairman.*] It is the road that lies between the Pound and the Roman Catholic Church, and runs down to Mr. Hooper's? Yes. It is more than twenty-five years ago since I helped to measure it with Mr. Lewis Gordon, the Government Surveyor; I held the chain for him.
224. *Mr. Hill.*] Has it been used ever since as a road? Yes; until of late years, Mr. Hooper had no other road to go to his garden.
225. *Chairman.*] Now there is another road? There is another road that takes them a mile or a mile and a half round, and they go that road because this one is so sandy.
226. *Mr. Forster.*] You say if these streets are left all right, you do not care much about the question otherwise? It would be nothing material to me if the ground were given to the City Corporation.

227. Are you not a ratepayer of the Waverley Municipality? Yes.

228. And you vote? Yes.

229. Do you want your municipality to be made smaller? No. If there were more rates to be recovered on the place, the rates would not come so heavy on us ratepayers. 23 Feb., 1869.

230. *Chairman.*] Is any revenue derived from this land at present? No.

231. Is it likely there ever will be? Not if the City Council takes it.

232. *Mr. Hill.*] So far as you are concerned, you are very much opposed to the City Council taking it, on the ground which you state? I am.

Mr. John  
Madden.

Mr. Charles Logue called in and examined:—

233. *Chairman.*] Are you desirous of making any statement to the Committee, respecting the Bill before the House, to extend the boundaries of the city of Sydney? I think it would be very injurious to the municipality of Waverley, to take away any of these lands granted to them. 23 Feb., 1869.

Mr. C. Logue.

234. What lands have been granted to them? The boundaries specified under the Municipalities Act.

235. You must distinguish between lands granted to the municipality and the boundaries of the municipality—the mere fact of proclaiming the boundaries does not vest the lands in the municipality? I thought so.

236. Is there any other objection? Yes; I have a great objection to it personally. If the City Council close the road across to Randwick, it will be a great loss to me. I went to great expense in building boxes for race-horses, and they were in the habit of going by that road to the race-course. It will be a loss of £150 a year to me personally. I built the boxes on account of this road being open, and being a soft road for the horses, feet to travel on, and a mile shorter.

237. But if this land is to be used as a water reserve —? It will never do for a water reserve.

238. Be good enough to hear the question before you answer it. If this land is to be used as a water reserve, would it not be very undesirable to have cattle travelling over it, so as to cut down the herbage, and dry up any water that might find its way there? They would do no harm on the road or street.

239. Then, your objection is, to having the road or track you have used shut up? Yes.

240. That is your principal objection? Yes; and I understood also that the land was part of Waverley—that it was to be used as a common for Waverley—when I built there. I never knew it was to be dedicated as a water reserve. It is not fit for a water reserve.

241. Have you been obliged to discontinue the use of your horse-boxes in consequence of this road being shut up? This last time I have had no horses, on account of the rows we have had about the streets there. It has been a great loss to me, for the gentlemen said they could not send their horses round by the other road.

242. Is there not a public road within a few yards of your horse-boxes? Yes; that is the Randwick and Coogee Road; it is a mile further than what this road would be, and they look to the distance more than anything.

243. *Mr. Forster.*] I think you misunderstood a question of the Chairman's—you seemed to imply that when the municipality was proclaimed, this land was granted to the municipality—Did you mean that it was to be granted as property, or to be a portion of it? To be a portion of it.

244. You did not mean that it was to be the property of the municipality? Yes.

245. To sell or do what they like with it? No, but to tax it.

246. How could it be taxed if it was not sold? I do not think they would have the power to sell it.

247. If it was granted to the municipality, who else would have the power to sell it? I am not aware who would have the power.

248. You said you thought this land was granted to the municipality? I thought so. When I went to build there, I was under the impression that it was a common for the inhabitants.

249. Have you been in the habit of looking on it as a portion of the municipality of Waverley? Yes.

250. Did you ever exercise any commonage rights over this land? Only by going through it and passing over it.

251. What sort of commonage rights have been exercised? People going through it, getting wood, and such things as that.

252. Has it always been an open thoroughfare? Yes.

253. How long has it been in use in that way? For many years.

254. How long? It is about eleven years since I went there.

255. Has it been used as a common by the people during that time? Yes, by Randwick and Waverley, and it has been a continual thoroughfare.

256. Do you object to its being used as a water reserve? I do not think it fit for it.

257. Do you think it would be an infringement of the rights of the commoners if it were so used? Yes.

258. Do you look on this attempt to transfer the land to the city of Sydney as an infringement of those rights? I do.

259. Do you object also on the ground of the municipality being made smaller? Yes, I do.

260. You think the municipality is small enough already? Yes.

- Mr. C. Logue. 261. Who closed these streets? I believe the Mayor of Sydney.  
 262. What authority had he to do so? I do not know.  
 23 Feb., 1869. 263. How was it your municipal authorities allowed the Mayor to close those streets? They did not—they disputed his right.  
 264. Are they closed now? No, I believe they are open now.  
 265. Did they knock the fence down? Yes, I believe so.  
 266. Do you apprehend that, if this land were included within the area of the city of Sydney, they would be closed? Yes, I think that is the purpose it is for.  
 267. You are afraid of that? Yes.  
 268. Suppose it is found necessary for the public good generally, to make a water reserve of this land, would that be inconsistent with retaining it still as a portion of the Waverley Municipality? I think it would never answer that purpose. There is no water there, except perhaps a little after a storm of rain.  
 269. *Mr. Neale.*] Which way does the water from it flow? Right down to the swamps; it is all inclined that way.  
 270. Where does the surface water escape to? I suppose into the old water reserve.  
 271. *Mr. Forster.*] Are the opinions you express now, those of a majority of the people of Waverley? Yes, I believe they are.  
 272. Have you heard many speak of it? Yes, and petitions have been got up against it.  
 273. *Mr. Oatley.*] I believe your chief objection is to the fact of the roads being stopped up? Yes.  
 274. If these roads were kept open, you would not so much object? Not so much.  
 275. *Mr. Forster.*] If these roads were opened, would you agree to hand it over to the city of Sydney? No, I do not think we ought to lose it.  
 276. Supposing the question of the roads were settled, you would still have a strong feeling against handing over this land? Yes.

---

Mr. James Hooper called in and examined:—

- Mr. J. Hooper. 277. *Chairman.*] You reside at Waverley? No, at Randwick.  
 23 Feb., 1869. 278. Have you any interest in the municipality of Waverley? Yes, I have property at Waverley, and property at Randwick.  
 279. You are aware that some land has been dedicated by the Government within the municipality as a water reserve? Yes.  
 280. And that it is now proposed to extend the boundaries of the city of Sydney so as to include that land? Yes; because they are ruining my little property, by dragging me a mile and a half round, as I cannot use the old track to Paddington.  
 281. Have you been in the habit of using the track from the South Head Road to Waverley? Yes, I have for nearly nineteen years. That was the only road we had to go to the garden at that time; no other road was ever laid out for it.  
 282. By going round by the Randwick and Coogee Road the distance would be increased? Certainly it would—nearly a mile and a half.  
 283. You object, then, to the road being closed up? I do, strongly.  
 284. If that road were left open, do you see any other objection to the proposed Bill? No, not so much.  
 285. You do not think the fact of allowing that road to remain open would injure the land as a water reserve? No; there is no water on it, except when it rains hard. I have known it these twenty years.  
 286. Have you ever dug for water upon it? Never; but there is a drain there now deep enough, and no water in it.  
 287. You are not aware, then, of its capabilities? It is a regular sewer for taking all the water from Waverley during rain.  
 288. Do you wish to offer any other observations to the Committee besides those you have mentioned? No.  
 289. *Mr. Hill.*] So far as you are concerned, you have no objection to the Sydney Corporation taking this land, provided they leave the road open? No, except that, if you take that land from us, who is to pay our mortgage debt on the two Councils?  
 290. Are you a member of the Municipal Council? No.  
 291. You are not aware whether the Council derives any revenue from this piece of land? I do not think they ever have yet.  
 292. *Mr. Forster.*] Are you a ratepayer and voter? Yes.  
 293. Do you want your municipality to be made smaller? I want it to be made bigger.  
 294. You do not wish any portion of the municipality to be taken away and added to Sydney? We do not.  
 295. Will it do you any good to take it from your municipality and give it to Sydney? It will do us a great deal of injury.

---

Mr. Llewellyn Baglin called in and examined:—

- Mr. L. Baglin. 296. *Chairman.*] You are desirous of giving some evidence respecting the Bill now before the House? Yes.  
 23 Feb., 1869. 297. Will you be good enough shortly to state your views upon the subject? One point I view it on is, the encroachment on our boundary line—the city of Sydney's encroachment over the line which was granted to the Waverley Council in 1859.

298.

298. Does your Council derive any revenue from the land in question? I do not know that they do from the land in question, but they do from the line of road leading across this land.

Mr.  
L. Baglin.

23 Feb., 1869.

299. Do they derive revenue from the line of road? Yes, from Bourke-street.

300. Has any money been expended by the municipality on that line of road? Yes.

301. How much? I should say nearly 200 pounds since I have been there.

302. Has any money been expended on the street from the southern boundary to the Pound and the Roman Catholic Church? Yes.

303. Has the street been made from Birrell-street up to the Pound? Yes.

304. Has it been made beyond the Pound? No.

305. Has any money been expended on that portion? There has been a little money expended in clearing.

306. You say the Council derives revenue from that road? Yes.

307. In what way? From the ratepayers and freeholders.

308. By reason of the road? Yes; there are houses on Bourke-street.

309. The shutting up of the road does not interfere with the access to these houses? Not from Waverley, but from Randwick it does. I am representing the people of Waverley; I am one of the aldermen, and I came here to look after their interests.

310. You think it would not be desirable to have the road shut up? I do not.

311. If the road were kept open, do you see any valid objections to the Bill? Yes, I do. I mean to say it cuts the boundary line which the Government gave to the municipality of Waverley, thereby taking that land away, and robbing the municipality of its revenue.

312. If this land is appropriated for public purposes, do you not observe that your Council can obtain no revenue from it? They expect to get revenue from it.

313. When? When it is built upon, which will, I have no doubt, be some day.

314. But at present the Government have reserved it, and I want to know if your Council suffers in any respect whatever? Yes, I should say they did suffer greatly. We might just as well say, why should not the corporation of Waverley take a part of the city of Sydney? It is just the same thing as the Corporation of Sydney taking a part of the Corporation of Waverley.

315. You will observe that this is only a trust for public purposes? It might be a trust, but it was given to the Waverley Municipality.

316. That is, it is included within the boundaries? Yes.

317. *Mr. Hill.*] Did you purchase your property originally from the Government? No, I purchased from Simeon Henry Pearce. At the time I purchased, this road was called the Lower Randwick Road. I built houses there.

318. Were you under the impression, when you purchased, that this portion here marked (*referring to the map*), belonged to the municipality of Waverley? I was. I was under the impression that the street ran through to Randwick, and it was called then the Lower Randwick Road. Another thing I would wish to state, that is, that the revenue of the Corporation of Waverley is mortgaged to a certain extent; and if we break the boundary line, we are liable to an action. There are a great many of the people there who have bought allotments fronting that street, with the idea that they were to have a road across to Randwick, which is a short cut—at any rate, it makes a mile difference if you go round by Charing Cross. I have been living there myself from twelve to thirteen years, just by the Pound.

319. *Chairman.*] Opposite the Roman Catholic Church? Yes. I mean to say that it would be doing great injustice to me and fifty others in the same locality, hard-working men who work for their living.

320. When did you purchase your land? About twelve years ago.

321. As the municipality only came into existence in 1859, how can you say you thought this land formed a portion of the municipality? I withdraw what I said then. I thought the road went through to Randwick.

322. Merely a bush track? It was a Government road, 66 feet wide.

323. *Mr. Oatley.*] Are you aware that there were a number of allotments marked out and offered for sale by the Government? Yes.

324. Are you aware that the Municipal Council of Sydney made objection to their being sold, on account of their being likely to pollute the Water Reserve? No, I am not aware of that.

325. The whole of the drainage from this road falls into the Water Reserve—the Lower Randwick Road as you call it? The fact is, the whole of the drainage from Waverley falls into it.

326. If this place were built upon, do you not think it would be injurious to the water—likely to pollute it—the drainage from water-closets, soap-suds, and so on? The water reserve is far away.

327. Would it not be injurious from the fact of this stuff washing down and draining into it? It might be; but the water is a long way from Bourke-street.

328. *Mr. Forster.*] Do you think all the people of Waverley agree with you in objecting to this proposed transfer of land? I think they do.

329. Do you think there is any single ratepayer in Waverley that approves of this measure? I do not know of one.

330. What use has this water reserve been put to? It was never called a water reserve that I know of.

331. What has it been used for—a common? A common; nothing else but for cattle to run upon.

332. Has it been useful in that respect? Yes.

333. Do you think it is suitable for a water reserve? No.

334.

- Mr. L. Baglin.  
23 Feb., 1869.
334. If it should turn out not to be required for a water reserve, I suppose you expect to derive revenue from the land being sold by the Government? Yes.
335. On the other hand, if it is used as a water reserve, and the Sydney Municipality obtain revenue from it, do you not think you are entitled to a portion of that revenue? I should think we would be entitled to all the revenue.
336. To all the revenue derived from what is within your municipality? Yes. If our boundary line is broken, the next thing will be that we will have no municipality at all; perhaps next year some one else will come for a piece.
337. Is there any part of Sydney you would like to have annexed to Waverley? No.

Simeon Henry Pearce, Esq., J.P., called in and examined:—

- S. H. Pearce, Esq., J.P.  
23 Feb., 1869.
338. *Chairman.*] You are desirous of affording the Committee some information about this Bill? I have been deputed, by the Municipal Council of Randwick, to attend here this morning to represent their interests in this matter.
339. Be good enough to state what their views are upon the subject? The views of the Municipal Council of Randwick, as far as I understand them, are these,—that the Bill which has been laid before Parliament seeks to invade and confiscate a portion of their territory.
340. What portion? The Sydney Common, and a portion also of the Water Reserve, which has been attached to the Sydney Common during the last year or two.
341. I suppose you are aware that the Government have dedicated both the pieces of land that you allude to for public purposes; that is to say, that 768 acres have been dedicated as a water reserve, and the remainder, 490 acres, for a common? I am aware that the Government have dedicated certain portions of the land known as Sydney Common for the use of the citizens, and also a portion of land as a part of the Water Reserves for the benefit of the citizens and the suburbs, just in the same way as other dedications or grants are made, I presume—something similar to the grants made to you and to me, without any but the usual exemptions in the grant.
342. Has your municipality expended any money over this land? Yes, in Market-street, a portion of it; we have opened Market-street to our boundary.
343. Do you not observe that no portion of Market-street lying within your municipality is included in this Bill? On reference to the map I see it is not; the other or northern portion of Market-street is in the Waverley Municipality. But a portion of the Water Reserve is within our boundary; and, according to the description of the boundaries given in the Bill, Wentworth-street is included. On the plan before you (*that handed in by Mr. Dickson*) I see the green line excludes it; but the boundaries given in the Bill, as I read them, includes it in that Bill.
344. If the Government thinks it right effectually to provide a supply of water for the city and suburbs, is it not necessary that every precaution should be taken to prevent the water being defiled? If they had taken that care years ago, by reserving all the land at Waverley, Paddington, &c., and all the land that drained into the reserve, there would have been some sense in it; but now it is perfectly preposterous to depend on such a source for the wants of this city and suburbs, and to preserve its purity.
345. You are aware that there is a track from Waverley to Randwick, formerly known as the Lower Randwick Road. Do you think it would injure the Water Reserve by allowing that road to remain open? I have known that road since 1847—since I went to Randwick first. That is the road I used to travel in going to Randwick. I lived at Waverley then. It was merely a bush track at that time. I remember that, about eighteen years ago, I took a person named James Hooper and measured that road, for the purpose of having it cleared. This track has been used by Hooper and others ever since he has been living there, and long previous to that time.
346. Then the roads laid down on the map here (*Mr. Dickson's map*), by these lines, were never in existence? They were never formed according to the present plan, to the exact lines, although laid down on the map, I believe, by Mr. Lewis Gordon. These lands were measured many years ago. This is, as far as I remember, a proper plan of the old Government map, which is in the office of the Surveyor General—not the map they will show you at the office, but the old parish map of Alexandria.
347. The track you speak of is not shown on this plan? No. No doubt the track was shown on the old map referred to.
348. Could this road, as defined on this map, be used by any person? Yes.
349. Could there be traffic along these lines that are drawn at right angles? There are no impediments in the way, except a hill that is rather steep. That is the reason why the carts used to take the side of the hill, and get up in a zigzag manner the best way they could; but that could be made a thorough good road, at a little cost.
350. Do you think it would be any injury to the Water Reserve to have that road open? Not the slightest—no more than the Randwick Road is. Nothing accumulates upon the road, except the droppings from animals, which is soon absorbed by the sun and air.
351. *Mr. Hill.*] Do you think it would be very injurious if this was taken away from the municipality of Waverley? I think it would be a piece of great injustice; just the same as if the Waverley Council were to take a piece of the city of Sydney and to add it to their municipality.
352. *Chairman.*] Suppose it were necessary for public purposes? If it were necessary, and did not damage their vested rights, there might not be so much objection; but I think it highly wrong for any municipality to damage or invade another borough to aggrandize itself.

353. Supposing this Water Reserve were held in trust, instead of being granted to the city, would you see any objection to that? No, provided they did not stop the roads, nor interfere with the rights of the municipalities in whose localities the land was situated.

S. H. Pearce,  
Esq., J.P.

354. Somebody must have the control over these roads, and the question arises—which can most effectually carry out the object? I think that where a piece of land is within the area already proclaimed for any municipality, the Government and Parliament ought to have sufficient confidence in the Council thus created, that they would be able to manage the piece of land which had been placed under their care by proclamation, just as much as they would have in the Council of Sydney. I should like to know what difference there is between the judgment or practical experience of the aldermen of the city of Sydney and the judgment and competence of the aldermen of Randwick or Waverley.

23 Feb., 1869.

355. It seems to be a question of funds. Is your municipality in a position to take and manage that Water Reserve for the purpose of supplying Sydney with water? That does not come within our province. This piece of land in question is set apart to supply Sydney and the suburbs with water; but now there is not a drop of water on the surface in this part—the Waverley portion. If you examine it for yourself, you will see that, instead of being a feeder of the water supply, as it once was, it is now the main receptacle for all the filth of a large portion of Waverley, and will become the natural and common sewer for a portion of that borough. Anticipating that this land will be given up directly as a water reserve—that the water for the city will be obtained from another source—all this land will then undoubtedly be sold; and that is one of the reasons why the municipalities who have this land, resist any encroachment or confiscation of any of their property.

356. You see it is not proposed to vest the city of Sydney with the fee simple of this land? If it is not intended to do that, what is the reason of their application for it. They desire to enlarge the city of Sydney at the expense of the suburban municipalities.

357. You are aware there must be a controlling power over it? There is a controlling power within every corporate body at the present time. Every piece of land within our boundaries was proclaimed as the municipality of Randwick, in 1859; and those boundaries were confirmed by the Municipalities Act of 1867; and therefore, the Council of the municipality of Randwick have as much control over every portion of the land within their boundaries as the Council of the city of Sydney has within theirs, for everything which is required to be done or performed; so that, I presume, even on that matter, the Council of Waverley or the Council of Randwick have just as much knowledge, judgment, power, and experience, as the members of the City Council.

358. Have they the funds? We can have the funds just in the same way as the City Council—the power of borrowing. And, as far as that goes, we are better off than they are, for they are heavily in debt. We have power under the Act, with the consent of the Government, to borrow what we want for local purposes.

359. To what amount? I believe to six times the amount of our revenue. Our debt now is £700, and that was borrowed for the erection of Council Chambers. The city of Sydney is in debt for at least two or three hundred thousand pounds. We can borrow at the same rate as they can. They are a richer body, it is true; but I do not see that a rich city should be permitted to rob a poorer neighbourhood for the purpose of increasing its funds.

360. Is not the city of Sydney extending in that direction? The city is not, but the population is increasing in these neighbourhoods; and the object of this Bill is, to increase the area and the funds of the city, at the expense of its neighbours.

361. Will there be any distinction between these neighbourhoods and the city proper? There will be this distinction—that the debts of the suburbs will not be in connection with the city of Sydney, nor the debts of the city borne by the suburban municipalities. The City Council is over head and ears in debt, and I should hope that we shall not be joined to them under such circumstances. As far as I am personally and privately concerned, I should be glad to see the city boundary pushed out against my property to-morrow. It would do me an infinite amount of good, by making my property more valuable. But I am here to represent a corporate borough; I am here as one of the representatives of the people of our neighbourhood; and therefore I speak for them, without considering my own interests. If I were to consent to one inch of our municipality being encroached upon, or confiscated in any way, I should be forfeiting the oath I have taken as a representative of the people in the municipality; and therefore I protest against one inch of the land of the Municipality of Randwick being taken by any other municipality, for any purpose whatever.

362. If it were necessary for sanitary purposes, what would be the use of your protest, either as regards Waverley, the city of Sydney, or other corporate body? Possibly my protest may be of no service, because might generally creates right! but I am now speaking of the equity and justice of the case. Whatever is required for sanitary or other purposes could be done without taking their property from any of the municipalities, just the same as all private and public improvements are now made. Moreover, every portion of the land of the municipality of Randwick is mortgaged for the £700 we owe; and therefore it would be unjust and illegal for the Council of our borough to surrender any portion of their vested rights. If the Parliament is prepared to pay off our debt, then the next consideration would be, whether our Council would be willing to give it up; but, until that debt is paid, I presume the mortgagee would be treated improperly if any portion of his security were taken away.

363. Has any portion of the £700 been spent on this small piece of land? No; but when any of the Councils borrow money, they borrow on security of their revenue, and this revenue is raised on the whole area within their boundaries.

- S. H. Pearce, Esq., J.P.  
23 Feb., 1869.
364. Has any revenue been raised on that piece of land affected by this Bill? Not yet. We can assess it at any time we think proper—there is not an inch of it but what is liable to assessment, as it is not Crown lands, nor belonging to any charitable institution; and considering that the City Council derive a large revenue from the sale of the water that runs from this land, they could not complain if we did assess them. But when the water is taken from the Nepean or some other source, all this land, between two and three hundred acres, belonging to our municipality, now called a water reserve, will, in my opinion, ultimately be sold; and if it is unjustly taken away from us now, our municipality will lose, and the city would gain, all the rates which would then be collected from that property. If you go and examine the place, from the Lachlan Swamp right down to the Dam at Botany, you will see there is not a sufficient quantity of water to supply even the present wants of the city of Sydney. On this newly created Water Reserve there is not a drop of water on the surface that I can see, except in the ditches.
365. *Mr. Oatley.*] Are you not aware that Busby's Bore, as it is commonly called, supplies nearly the whole of the lower portions of the city? Yes, but that partly comes from the Lachlan Swamp, and from the Paddington heights, as well as from Waverley.
366. Were you not one of the persons who signed for the municipality of Sydney to have the Randwick Road? I will tell you how that was. The Bill you refer to was drafted by me, in the first place, to hand over the road to the municipality of Randwick; but when the Draft Bill was laid before our Road Trustees, the Mayor of Sydney objected to it, unless the roads were handed over to the city of Sydney instead of to the Randwick Municipality; and, as all I wanted was a good road to our borough, I consented to that alteration, which our Commissioners adopted.
367. There was a resolution passed by the Randwick Council, that they were willing to take this road? Yes, I believe it was carried unanimously by a full Council. That was the reason why I, as Mayor of the borough, drafted the Bill for our Road Trust.
368. *Mr. Forster.*] Do I understand you to object to this alteration of the boundaries of these two municipalities, Waverley and Randwick, irrespective of the question of the Water Reserve—You object on municipal grounds? I do, most decidedly.
369. Do you think either of these municipalities would be injured by being made smaller, in consequence of these areas being transferred? I think they would, as their powers of assessment would be decreased accordingly.
370. Do you think the public objects which are supposed to be included in the dedication of this land as a water reserve or a common, are in any way inconsistent with retaining the areas within your municipalities? I do not. I do not think any municipality should have any control in shutting up roads, or doing anything else antagonistic to the public interests; neither do I think that any municipality having property within the boundaries of any other municipality should be exempt from the same liabilities as private persons are subject to.
371. Do you object to the Sydney Common being taken away from your municipality? I am instructed by our Council to protest against any portion being taken from our boundaries. The City Council are now selling a part of that common, and the revenues of the land so sold within our boundaries will belong to Randwick, and not to Sydney.
372. Have your ratepayers any commonage rights over this common? No, we know quite well we have not. It was set apart for the use of the citizens, for grazing purposes, by Governor Macquarie.
373. May the common not remain a common for the use of the Sydney people, and still the area be within your municipality? Exactly so, without any detriment to the city, except with reference to the taxes which may be raised thereupon. The reason we never taxed the City Council was because the land is set apart for a common, &c., and the people of Randwick will, we presume, have equal rights to walk or drive over it when completed—although we could tax them if we desired so to do.
374. Suppose it should turn out that this piece of land called the Water Reserve is not wanted for that purpose, do you look forward to its being sold to private persons? Yes.
375. In that case, a considerable revenue would be derived from it for municipal purposes? Yes, a large revenue would be derived from that land.
376. And you object to surrender that? Just so. We are confident that the land will be ultimately sold, because we cannot see any use in keeping it. The City Council will have to go somewhere else for water to supply their people. I would recommend them to sell that land, also a portion of the common, and pay for the water being brought from a higher and more permanent source.

FRIDAY, 26 FEBRUARY, 1869.

Present:—

MR. HILL,

MR. NEALE.

JAMES HART, Esq., IN THE CHAIR.

John Shedden Adam, Esq., Chief Draftsman, Surveyor General's Office, called in and examined:—

- J. S. Adam, Esq.  
26 Feb., 1869.
377. *Chairman.*] I believe the maps in the Surveyor General's Office, including those relating to the suburbs of Sydney, are more particularly under your care? Yes.
378. This plan has been handed in to the Committee, by Mr. Dickson, Mayor of Waverley, who states that it is an exact copy of an old original map deposited in the Surveyor

Surveyor General's Office—Will you be good enough to see if that is the case? (*Plan exhibited to witness.*) This map is not an exact copy of any map; it is enlarged from the map of the parish of Alexandria, in use at present in the office. I have looked over this tracing, and, as far as I can see, it shows all that is shown on that map, but on a larger scale. J. S. Adam,  
Esq.  
26 Feb., 1869.

379. Does it show anything more? It shows a part of Market-street more; but that street is shown on a still older map, which has been put away since 1861—a map of the same parish which was in use previous to 1861. So that this, in fact, is apparently taken from both maps of the parish of Alexandria.

380. It is a compilation from the two? It is.

381. Is the portion of Bourke-street from the Pound down to Victoria-street shown in the old maps that you refer to? Yes, it is shown on both. It is so shown on the old map, and in the same way on the map at present in use. (*Witness exhibited the two maps referred to.*)

382. Have you any map in your possession showing the two divisions lately proclaimed as a Sydney common and as a water reserve? The same map shows those divisions. I understand that tracings have already been prepared for the Committee. (*Maps handed in by the Surveyor General exhibited to witness.*) The original Sydney Common has been dedicated partly as a common and partly as a water reserve. 490 acres of it have been dedicated as a common, under the present law; and the green line, shown on plan No. 1, is the dividing boundary. The remainder, and a little more, has been dedicated for a water reserve.

383. Embracing a portion of the municipality of Waverley? Yes. There are plans now in the office of two streets—Victoria-street and Market-street—which are about to be proclaimed. They are before the Executive Council now for proclamation.

384. Have any portions of those streets been enclosed by the Corporation of Sydney, do you know? I am not aware personally.

George Layton, Esq., Accountant, Colonial Treasury, called in and examined:—

385. *Chairman.*] The Committee are desirous of knowing what amount of money is due, by the Corporation of the City of Sydney, to the Government, either in respect of sewerage or otherwise? I have a memorandum here showing the amount—it is similar to an answer given to a question asked, on the 4th February, by Mr. John Stewart, in the Assembly. Geo. Layton,  
Esq.  
26 Feb., 1869.

386. What is the total amount of debt due by the City of Sydney to the Government? £534,547 4s. 8d.

387. Have you only one account with the City Corporation? We have debentures and interest accounts.

The amount of debentures is .....	£417,430	0	0
Interest, &c. ....	117,117	4	8
Total .....	£534,547	4	8

388. Can you state the amount of debentures issued, respectively, for sewerage and water?

Sewerage .....	£209,030
Water .....	208,400
Total .....	£417,430

Edward Lord, Esq., City Treasurer, called in and examined:—

389. *Chairman.*] The Committee are desirous of knowing the liabilities of the City Council, as a total, and also separately, if you will be good enough to afford them the information, showing the different heads of liabilities? This paper which I hand in is an abstract of the accounts as audited in January, 1869. (*The witness handed in the same.*) Edward Lord,  
Esq.  
26 Feb., 1869. (*Vide Appendix A 1.*) I have placed there the Corporation liabilities to the Colonial Government as they appear in our books, and a note at the foot, remarking that there is an additional sum to be charged for interest and commission, which is only ascertainable from the Audit Office.

390. The Committee would wish you to hand in a statement showing the revenue derived by the Corporation from city rates, water rates, street watering rates, sewerage rates, and from any other source? Would it not be better to submit to you statements of the receipts and expenditure for the whole of last year, which will embody everything?—They are just published.

391. Do they shew the revenue derived under each head? Yes.

392. Will you hand in a copy of that? Yes, I will append it to my evidence. (*Vide Appendix A 2.*)

393. In the accounts you have mentioned, do you take into account the £10,000 granted by the endowment? Yes, it has been debited as interest to the sewerage and water funds. We have debited the sewerage fund with £10,000, and the water fund with £10,000, and credited the city with £20,000, as the amount they should have got from the Government as endowment.

394. Have you any means of ascertaining what would be the annual charge to the Government, for water to public buildings, ships of war, and other public purposes? The City Surveyor has already, I think, procured particulars of that, and also particulars with regard to the sewerage that would be claimable from the Government if they were liable for the rate.

TUESDAY, 2 MARCH, 1869.

Present:—

MR. OATLEY,  
MR. HILL,MR. NEALE,  
DR. LANG.

JAMES HART, ESQ., IN THE CHAIR.

Mr. Henry Nicholson called in and examined:—

Mr. H.  
Nicholson.

2 Mar., 1869.

395. *Chairman.*] I believe you are desirous of giving some evidence before this Committee respecting the Bill to extend the city boundaries? Any facts I possess I am willing to communicate.

396. You are an alderman of the borough of Paddington, I believe? I was last year.

397. Did you take any interest in any movement for annexing the borough of Paddington to the city of Sydney? I collected a number of signatures to a petition that was got up for that purpose.

398. Can you state what was the general feeling of the ratepayers and owners of property there upon the subject? Every one that I spoke to and asked to sign the petition did so, at once, willingly, and seemed only too anxious to get the borough annexed to Sydney, for the purpose of getting water, of which we feel the want very much at Paddington.

399. Do you think it would be conferring a benefit on the people of Paddington by incorporating it with Sydney? Most decidedly.

400. I believe it will be necessary, at some time or other, to construct extensive drainage from the watershed about the Gaol, and the north-western side of Paddington? That is the only natural watercourse there is for drainage, and, no doubt, in a very short time that will have to be done. But sewerage will be of no use to Paddington without water.

401. Is the municipality of Paddington in any difficulty with regard to monetary affairs? I think the overdraft at the City Bank is something like £900.

402. Is that found to be sufficient for the purpose of keeping the streets in repair, and providing water and sewerage? No, not at all; the working expenses of the municipality and the gas eat up the whole of the revenue, leaving nothing for improvement.

403. Do you know what amount of rates is now imposed? A shilling in the pound.

404. Is that the only rate? That is the only rate at present.

405. You cannot impose a water-rate, because you have no power of supplying water? No; that is what we are desirous of obtaining.

406. In a sanitary point of view, it would be desirable that this Bill should be passed? Most undoubtedly. We cannot have any but surface drainage unless we have water.

407. *Mr. Hill.*] How are you supplied with water now? There are three public wells sunk at the cost of the municipality—one in each ward; but they are quite inadequate to the demand.

408. *Chairman.*] It is out of the question, I suppose, for the ratepayers to obtain a sufficient supply of water for baths and other household purposes? They can only purchase it from men with water-carts.

409. The cost must be considerable? I have paid as much as six shillings a week for water myself.

410. *Mr. Oatley.*] You spoke about a petition you took round in favour of annexing. Do you know how many signatures there were to that petition? I do not recollect the exact number, but I know that it was signed by more than two-thirds of the ratepayers. The petition was lodged in the Town Hall.

411. In going round with this petition, you had the opportunity of ascertaining the feeling of the ratepayers and owners of property? Yes.

412. And the feeling was very largely in favour of annexing to the city? Every one I spoke to was in favour of it.

413. Can you inform us what were the particular reasons which actuated the parties who signed—were they dissatisfied with the way in which municipal matters were conducted? The way in which the business of the Municipal Council was conducted during the last twelve months had not given satisfaction to the generality of the ratepayers, and that in connection with wishing to get water and sewerage—these were the reasons for endeavouring to get annexation to the city.

414. The Municipal Council took no part in the matter until they were applied to by the ratepayers? A portion of the aldermen were in favour of the petition.

415. *Chairman.*] Was the petition presented to the House of Assembly, do you know? I believe there was a *fac simile* copy.

416. Do you know when that was? I am not aware; I think it was on the night of the first reading of the Bill.

417. *Mr. Oatley.*] How many signatures did you get? Between forty and fifty, I think. That was only in a portion of my ward where I sought for signatures. I was never refused, except by two persons, out of the whole number I applied to—only two had any objection.

418. *Mr. Hill.*] Are you still of opinion that Paddington ought to be annexed to the city? Most decidedly.

419. Have you heard that there is a counter-petition being got up? Yes, I am aware there is.

420. I suppose, so far as your knowledge of the petition goes, all the signatures are *bonâ fide*? What I took were *bonâ fide*, I made a declaration in regard to it, before it went to the City Council.

421. *Chairman.*] To verify the genuineness of the signatures? Yes.

422. *Mr. Oatley.*] That was on account of some reports circulated that they were not genuine? Yes.

423. The whole of the other parties who obtained signatures to the petition did the same? Yes; I think, if you look at the petition in the Town Hall, you will find the signatures are all attested.

424. *Chairman.*] Are you of opinion that the present revenue of the municipality is sufficient to secure every requisite improvement? No, the revenue is too small—the revenue of the whole municipality is not more than about £1,100. The municipality is too small to be ever of any permanent benefit—the rates do not amount to sufficient. The gas consumes something like £400 a year.

Mr. H.  
Nicholson.

2 Mar., 1869.

Mr. Charles Artlett called in and examined:—

425. *Chairman.*] You were lately Mayor of Paddington, I believe? Yes.

426. Have you had an opportunity of ascertaining whether it would be desirable to extend the boundaries of the city of Sydney so as to include Paddington? I have.

427. What is your opinion, and the reasons for that opinion? My opinion is that it would be decidedly advantageous for the borough of Paddington to be joined to the city, for several reasons—amongst others, that, although the township is by nature well formed for sewerage, the funds of the Municipal Council will not admit of sewers being properly formed; and beside that, I believe Paddington never will have a proper supply of water unless it is joined to the city. It is considered desirable by the great bulk of the people of Paddington that both water and sewerage should be obtained, and these can only be obtained by our being joined to the city. I myself have known, during the last long drought, poor people, who could scarcely buy bread, obliged to pay a penny a bucket for water. Mr. Mort has spoken to me about it several times, and even offered to subsidize the funds required by the City, if they would lay the water on. These are amongst the reasons why annexation to the city is considered desirable.

Mr. Charles  
Artlett.

2 Mar., 1869.

428. I believe a large portion of the watershed that drains Paddington extends into the city of Sydney itself? Yes, there is a creek which forms the boundary between the city and Paddington. You may say nature has excavated the sewerage for us. I am firmly convinced the City Council will ultimately make a sewer there, and very shortly too, in which case they will charge the Municipality of Paddington one-half the expense; and if they do so, it will take, at a fair calculation, five years of our rates—that is, what will be available—because nearly one-half of what is collected and the endowment is expended in the working expenses of the Council.

429. The borough of Paddington, I believe, is rather small? It is small. I would, with your permission, remark, that observations have been made by a few parties who have been getting up a petition against joining Paddington with Sydney, at the last Council meeting, to the effect that the Council had previously objected to the City taking Paddington into its boundaries; but I would wish to call attention to the fact that the Council, as a body, has never done so. If the books are produced, it will be seen that when a Bill was introduced into Parliament last year, during the time I was in the chair, I objected to the City taking any portion of Paddington unless they took the whole; and a majority of the Council was at that time in favour of the City taking the whole, but not a portion, to make it less when it is already too small.

430. Do you know whether a petition has been presented to this House, praying that Paddington might be annexed to the city? There was a petition, signed by 554 petitioners, all of which were *bonâ fide* signatures, taken by parties who have or are willing to make affidavit that they saw the parties and took their names. Several of these parties have signed another petition, and they have told me since that they did so on the understanding that it was a petition to strengthen the former one.

431. *Mr. Hill.*] Do you know that of your own knowledge? I know the parties have told me distinctly that it was so. In one case, Mr. Charles Smith, shoemaker, Rusheutter's Bay, said he would not sign until they told him it was to strengthen the other petition. He is exceedingly vexed at it, and is still favourable to the annexation of the borough.

432. As far as you can gather, do you know whether the persons who signed the original petition are of the same opinion now that they were then, as regards the incorporation with the city? Yes, I have heard nothing to the contrary, except in one case; I have heard of one party who said he decidedly thought it would be advantageous then, but since he has been elected an alderman he has altered his views.

433. *Mr. Hill.*] What is his name? Roberts.

434. *Chairman.*] What rate is imposed now by the Borough of Paddington? A shilling in the pound.

435. Is there only a general rate? Only a general rate at present.

436. Does that include lighting? It does at the present time.

437. The Council have not taken advantage of the provisions in the late Municipalities Act to impose rates for other purposes? No.

438. It would be oppressive on the people to do so? Yes. A lighting rate will have to be charged, I have no doubt, and very shortly. The gas is costing now nearly £400 a year.

439. *Mr. Hill.*] What is the amount of taxes collected for Paddington? About £1,100.

440. What is the population? I could not tell, from memory. I should state that the endowment from the Government is half the amount of rates collected, which gives us £550 a year more.

441. *Mr. Oatley.*] Have the Council been working satisfactorily lately—have the people complained at all of the way in which the Council has been worked? Very much indeed.

- Mr. Charles Artlett. 442. Has very much of this money been expended in lawsuits lately? About £300 during the last year, very improperly and quite illegally in many instances.
- 2 Mar., 1869. 443. Have you a solicitor for the Borough, or do you engage one as cases arise? There is a solicitor appointed under the seal of the Council, and paid by fees; he sends in his account, and receives a cheque for it.
444. Who is the solicitor? Mr. Stephen Brown.
445. He is not paid by annual salary? No.
446. Have the Council any by-laws to work by? We have no legal by-laws at the present time, because the by-laws we are working under were made under the Act of 1858, and are not considered by counsel to be legal, although we pretend to work under them in some instances.
447. Mr. Hill.] Are you an alderman still? Yes.
448. Do you know of your own knowledge that the Council is not working satisfactorily? I am sorry to say it is not, and I have no hope that it ever will. There is so much self-interest in the immediate township that it seems to operate against the interest of the public.
449. Mr. Oatley.] Are you of opinion, from what you learned when you went round with the petition to get signatures, and from having conversations with parties interested, that the majority are particularly anxious to be annexed to the city? I feel quite certain they are very anxious. I have heard the present Mayor say, some time ago, before he was elected Mayor, that he would not mind giving a good subscription towards the expenses that might be incurred in getting annexed to the city; but he has altered his mind since. He said that in the presence of myself and some dozen gentlemen.

Mr. William Taylor called in and examined:—

- Mr. William Taylor. 450. Chairman.] You are the present Mayor of Paddington? I am.
- 2 Mar., 1869. 451. And you are desirous of affording this Committee some information about the Sydney Boundaries Bill? Yes.
452. You are aware that a Bill is before the House for the purpose of extending the boundaries of the city of Sydney so as to include Paddington and some other portions of the suburbs. The Committee desire to hear what you have to say upon the subject? I am decidedly against Paddington being annexed to the city, and I think it is the wish of the principal part of the inhabitants not to be. I cannot see any advantage that we would derive from being annexed, on account of the enormous amount that Sydney is indebted to the Government—some £800,000 I have been informed—and we are almost free from debt.
453. Are you not aware that there is a limit to the amount of taxation which can be imposed. The question of the debt cannot affect the ratepayers, because the powers of taxation are limited? Yes, but if we were annexed to the city, we would have to conform with their taxation, and we would lose the Government endowment.
454. Mr. Hill.] Are you aware that petitions have been largely signed by the people of that district, asking to be annexed? Yes, I believe upwards of 500 signed that petition, but I firmly believe that upwards of 300 of them were not ratepayers; and the principal part of those who signed it did so under misrepresentation. Most every individual I have been speaking to on the subject told me that they were labouring under an impression that they were signing a petition to get water.
455. Chairman.] Have you at present any means of supplying Paddington with water? No, except by wells.
456. Would it not be very desirable to remedy that evil? We have tried all we could since 1860 to get the water supplied to us. We have offered the Town Council 10 per cent. upon the outlay if they will lay it on. When the reservoir at Paddington was built, we were under the impression that Paddington would be supplied from it. But the level will not admit, and the engine power is insufficient for a higher level.
457. Were you always of your present opinion as to the advisability of annexing Paddington? I never felt the slightest inclination to be annexed to Sydney. If there was any benefit at all to be derived from it, no man in Paddington would receive greater benefit than I should.
458. Will it not be requisite to construct a very large sewer for the purpose of draining the eastern portion of the city of Sydney and Paddington? That might not be required for years.
459. Will it be ultimately required? It will be; but there are not many houses at present that require a sewer there,—only a few little houses down on Mr. West's ground. I do not see any occasion to have a sewer there.
460. Have you established any special water rate at present? No.
461. Or any special gas rate? No.
462. Merely the general rate of a shilling in the pound? That is all.
463. Do you think the inhabitants of Paddington would be desirous of being further taxed? I do not think they would.
464. You have no sewerage rate either? None.
465. If the Municipality of Sydney undertook to do all these things for you—to complete the sewerage, to light the place, to supply the people with water, and other benefits,—and if the people of Paddington were not to be taxed more than the people of Sydney are,—do you think there would then be any objection to the annexation? Yes, I do. In the first place, we have gas in every principal street; and as for water, I consider we shall get water supplied to us eventually cheaper than we could from the town. As for the

the expenses of keeping the municipality,—the streets between the upper and lower South Head Roads are only about 30 feet wide, and most every street is formed, and kerbed and guttered, and very little expense would keep them continually in good repair. The principal thing is the water, and I have heard no one in Paddington express a wish to be annexed for any other purpose than to get water.

Mr. William  
Taylor.

2 Mar., 1869.

466. A great many are desirous of being annexed for that purpose? Yes; but when we have offered the City Council—times out of number—to pay for the water if they could supply us, why not embrace the opportunity, if they have the means to do it?

467. Have you made any estimate of the cost of laying down the main pipes and branch lines? Not that I am aware of.

468. Do I understand that you did formerly express yourself of opinion that annexation to the city would be desirable, simply for the purpose of getting water? No, I never expressed any such desire; I am not aware that I ever made use of a word favourable to it at all. But those that signed the former petition, signed it because they thought they would get the water and the gas. It was represented that the gas as well as the water was to be laid on free, and several other advantages. I do not know what privilege water would be to Paddington if annexed, any more than when separate, because we should have to pay for it just the same. In fact, there may be advantages in being separated; because, if water is brought in by this company that is to be formed, I do not think we shall be rated so heavily for it as we would be by the city.

469. What company do you refer to? A company which is proposed to be formed to bring water from George's River or Cook's River.\* They have sent us notices about it.

470. *Mr. Hill.*] You say that if any benefit is to be derived from the annexation of the two places, you will benefit as largely as anybody else? Yes, more than anybody there.

471. For what reason? Because I have a larger property.

472. How is the Municipal Council of Paddington working now—harmoniously? It has not worked harmoniously for some time past.

473. What is the reason of that? The principal cause was, that there was an expense incurred for an election in 1867, amounting to £21, and the Act says the Returning Officer or Mayor shall produce vouchers for all the expenses incurred; but, in place of these vouchers being laid upon the table to the satisfaction of the Council, the amount was given *in globo*, as they called it. This did not please the ratepayers, and the auditors wanted the vouchers produced. Ultimately, it led to some action, I think, against the auditors, in the Police Office, and also in the District Court, and the quarrel has gone on from that time to the present continually in agitation.

474. Is that the only bone of contention? From that springs all the rest of the evils.

475. *Chairman.*] The Council may be said to be divided into two parties? Yes; ever since that time one party is almost continually against the other. As to law expenses, I beg leave to inform you that we have not gone to such enormous expense as the public are led to believe. In some remarks of his reported in the paper, Mr. Piddington said that the Paddington Council had been badly worked, for it had been run to a thousand pounds expense in litigation. That is quite a mistake. When I came into office in 1868 there was a lawsuit going on, and the expenses amounted to about £85.† That was incurred through these vouchers not being produced, but we had the amount reduced; we told Mr. Forster that we would give him £45 if he thought proper to give us a clear receipt. He said he would do it on condition that he was allowed to sue the other parties, Mr. Artlett and Mr. Davis. We told him he could sue either of them if he liked; all we wanted was, a clear receipt for £45 in place of £67. This last year we have been defendants in several actions; we have never been plaintiff; and if actions are brought against the Council, the Council must defend them.

476. What were these actions about? Two or three little debts that were sued for. The Council considered that the charges were excessive, and ought not to be paid. They were for electioneering, principally, at the beginning of 1868. The expense of that election mounted up to, I think, £36 17s. 9d. This again irritated the aldermen, because three times I had conducted the election in the same place, and I do not think the expense either time exceeded £18.

477. *Mr. Oatley.*] What was Cunningham's action for? Some little bill, £2, for printing.

478. Did he recover? Yes.

479. What was Booth's action for? That was for decorating the Council Chambers at the time the Prince came.

480. He recovered, did he not? Yes.

481. What was Martin's action for? Martin was employed to sink a well, and the first well was laid out in the wrong place.

482. He recovered? He sued for £28; and in place of getting £28, he got £8.

483. In Booth's and Cunningham's cases, why were they not paid without obliging the men to take proceedings? It was the wish of the Council.

484. There was also a case of Artlett's—what was that for—an action for libel against you, was it not? Not against me individually; it was on account of a report brought up by my instructions as Mayor.

485. Did he recover? He recovered damages to the amount of one shilling, but I got a verdict on the principal count.

486. And that carried costs, I suppose? Yes. I would like to tell you about these cases, if you will allow me.

487. What was Davis' case? All the charges you are speaking about now mounted up to about £70 or £75.

488.

\* *Revised.*—The Government Commission appointed for this purpose.

† *NOTE (on revision).*—There were two bills comprised in this £85:—1st, £68; 2nd, £17. The first was compromised for £45.

- Mr. William Taylor. 488. There was Penfold's case—what was that for—was it not an action against you for refusing to allow him to put a motion to rescind a resolution for the payment of costs in your own case? Yes.
- 2 Mar., 1869. 489. Did you not vote twice in that case? No. Penfold's case was dismissed from the Police Office.
490. Was there not a case, in which Mr. Penfold was plaintiff, against you, for refusing to allow him to put a motion for rescinding a resolution for the payment of costs in your own case? He ceased to reside in the municipality, and ceased to be a property holder there; that was one reason why I refused.
491. Can you state the total amount of costs and damages awarded last year against the Municipality—was it not about £300? Nothing of the sort; that is quite a misstatement. We are not £200 out of pocket for law expenses, the bulk of which was incurred by Artlett in the prosecution against the late auditors.
492. And costs? And costs. As to Artlett's case:—After Martin sued me as Mayor at the District Court, I said to the Council Clerk—"You have heard the evidence of Mr. Artlett and the remarks of the aldermen; now draw up an honest report." He brought me a report, and I said there were two words I did not understand. He said they were harmless words, and I put it on the table, for the aldermen to read. Each of them who were present read it, and I said—"Do you approve of this report?" They did approve of it; and for the words that I considered objectionable, that there seemed to be collusion between Mr. Artlett and the well-sinker Martin to mulct the Council as much as possible, the action was brought. If Mr. Artlett had thought proper at the time, he could have had those words struck out of the report. He never did, but sued me; and the Council brought forward a proposition that they would defend the action, which was carried.
493. The votes were equal, and you voted as alderman and voted again as chairman? I gave my casting vote.\*
494. You voted twice; that is, you voted as councillor once, and then gave your casting vote as chairman? From memory I could not say how I voted; I only exercised my privilege as chairman, whatever it was. If you refer to the things that have taken place—there are the books outside—you will find that Mr. Artlett has done the same thing himself.
495. Have you had any request made, or petition sent to you, for sewerage to be done? No.
496. You never have? I cannot say we never have.
497. The extension of a culvert in Hopewell-street, for instance? There was a petition sent in for that.
498. Did you comply with it? No.
499. Why not—because the funds would not admit of it? I tell you we are not above eight or nine hundred pounds in debt.
500. All that I say is, that you did not comply with the petition, on account of the funds not admitting it? That is not the whole of the grounds. If we had ever so much funds I would not consent to that, because it is through private property.
501. Was not that the reason assigned at the time? I am not aware that it was.
502. Is this the first attempt that has been made to break up the municipality? Until Mr. Artlett was in the minority, and Mr. Davis, the Council Clerk, was dismissed, we never had any attempt.
503. Was not one made by Mr. Humphrey, in 1860? There was an attempt made, I believe, in 1864, to divide.
504. There was afterwards an attempt made to divide the municipality, by cutting off the greater portion of Glenmore Ward? I do not recollect that any attempt was ever made afterwards.
505. Have you ever expressed a desire to Mr. Reddy, Mr. Artlett, or Mr. Nicholson, to have the borough annexed to the city? When?
506. I do not know when? Never. In 1860 I might have expressed my opinion that, rather than continue this way, it was better to be anywhere.
507. During the time you have been Mayor of Paddington, have you ever made application to the City Council to be supplied with water? Not this last time: we did before.
508. Do you not know the Council stated that they would have no objection to supply the water, if you would lay down the pipes; and your answer was, that you had no means to do so—Is not such the fact, that if the City Council were ready to supply the water, you could not raise sufficient means to purchase and lay down the pipes? I do not suppose we could. The Sydney Corporation were never in a position to supply Paddington with water, nor are they at present.
509. Still, although you think the water would be such a great boon to the people of Paddington, you do not think it advisable to annex the borough to the city? By no means. I think our municipality could be worked as easily, as comfortably, and more cheaply, than any municipality within twenty miles of Sydney.
510. You say you are in debt to the extent of £800 or £900. Do you not know that £900 is the extent to which you can borrow by the Act—have you not gone to the extent to which you are allowed to borrow? Yes; the present cash credit is for £900, for which the Governor's permission is granted; but sect. 190 gives us the power to borrow to the amount of five years' revenue, or £5,000, if needful; but every road in the municipality is in good, passable repair, and no expense is urgently required. We have good Council Chambers, free from debt. The roads are only 30 feet wide, so that it does not take so much to keep them in repair as if they were 66 feet wide. 511.

\* NOTE (on revision):—This refers to Penfold's motion for rescinding, and not to the action of Mr. Artlett.

511. Do you believe it would be any advantage to the Municipal Council of Sydney to have you? Yes, I do.
512. In what way—when they would have to expend so much money in laying down water-pipes and making sewers, what advantage would they derive? The City Council would derive the benefit of being paid for the water.
513. You are willing to pay for that now? Certainly we are. Then again, we would be supposed to pay a portion of the debt the City has incurred, that we have had no benefit from. I cannot see why we should be compelled against our wish to do that.
514. *Mr. Hill.*] Did you take any part in getting up the petitions that have been sent in? I took no part in the first one—I never paid any attention to it; but within the last week I did go round to a few, and so did Mr. Stone, who is an alderman, and has been in the Council for three or four years; and, if you will call him, he can give you more information than I can on that subject.
515. How long have you been Mayor? This is my second time as Mayor. I was Chairman once before.
516. Does the Mayor of the municipality receive any salary? No.
517. Then there is no benefit to be derived from the office except the honor? No. I wish I was out of office; I would rather be out of office than in it. I may say that, at the time this petition for joining Paddington to the city was sent in, with 526 names attached to it, the number of individuals entitled to vote, according to Mr. Artlett's Revised Municipal Roll for 1868, was in the Upper Ward 33, Lower Ward 94, and Glenmore Ward 53. This was at the time Mr. Joyner conducted the election in 1868; and Mr. Artlett, Mr. Davis, and those who were with them at the time, would not allow any other person to vote except those that actually paid the rates. That only amounts to 180; consequently, 346 names attached to the petition were not those of ratepayers.
518. *Chairman.*] If they were residents, would they not be equally interested in a matter that would benefit them? We consider that if they pay no rates, they have no right to interfere in municipal matters.
519. Is there anything else you would wish to say? No. I would wish to impress on your minds that Mr. Piddington is most decidedly wrong in what he said about the law expenses. We have not been run to £200 expense. £100 has been lodged in Court, in the case of Davis against the Council, to try a certain point whether Mr. Davis could be legally suspended from office. It was the wish of the Judge that the case should be tried in the Supreme Court, and we were requested to lodge £100 to defray expenses. This £100 might be returned to us again.

Mr. William  
Taylor.

2 Mar., 1869.

Mr. William Stone called in and examined:—

520. *Chairman.*] You are an alderman of the borough of Paddington? I am.
521. And have been for the last three years? Going on three years.
522. You are aware that a Bill is before the House for the purpose of extending the boundaries of the city so as to include Paddington? I am.
523. Do you think it desirable to pass that Bill? I am positive in my own mind that it is not.
524. Will you state your reasons? One reason would be, because the majority of the inhabitants are against it.
525. How do you know that? When the Bill was presented to Parliament, the other day, I went round myself to get signatures to a petition against it; and in the course of three days we got 350 names to it, and could have got a couple of hundred more, if necessary, if we had time.
526. Are you aware that it is not very long since a petition was got up in favour of annexation, and signed by upwards of 500 persons? I am quite aware of it.
527. Were you one of the petitioners at that time? I was not.
528. Do the petitioners against this Bill imagine that, by being annexed to the city, their rates would be increased? No, it is not that particularly. Many who signed the petition in favour of it have since signed the petition against it. Some said they signed the first one through misrepresentation; and others said that, when they came to consider the large city debt, and the freedom of Paddington from debt, and one thing and the other, they thought it far preferable to remain as they were.
529. How can the question of the debt affect the ratepayers in any way? As far as we can see, the City Act provides that they would have to pay a rateable share of the burden. The Paddington Council got the City Act, and of course we endeavoured to explain it to the ratepayers; and as soon as they found that to be the case, and that they were deceived with reference to the water —
530. *Mr. Oatley.*] How were they deceived in reference to the water? Those that got up the former petition said they would get water at a certain rate—in fact, without any extra taxation; that was the inducement with a large number.
531. Do you believe the people really thought they were to get water for nothing? There were printed papers left at the houses, stating the fact that they should get water, and various other things—that working men would get plenty of work; and as there are a large number of working men in Paddington, they all signed, thinking they were going to get all the good things for nothing.
532. *Chairman.*] I suppose when the people were told they would be burdened with a debt of £800,000, they at once changed their minds? They changed their minds so much that some who had actually paid money towards the expenses of getting up the other petition, signed the one against it.

Mr. William  
Stone.

2 Mar., 1869.

- Mr. William Stone.  
 2 Mar., 1869.
533. Do you think, if they had sewerage and plenty of water, without being taxed more than the citizens of Sydney, they would be against this Bill? Yes, they would, inasmuch as, if they were taxed for water, the water-rate might be just with regard to Sydney, but not with regard to Paddington. In Paddington there are a good many out-houses and various things which the city taxes as rooms, while in the city itself there are not so many of these outbuildings, and most places are what may fairly be called rooms. If we get water, we want to get it at a fair price.
534. Are you aware that it has been stated by Mr. Sutherland, who is supposed to possess some knowledge of the matter, that Sydney is supplied with water at a cheaper rate than any other place in the world? I doubt that.
535. Can you mention any instance to the contrary? My native city, Bristol, is supplied at something like eighteen-pence a room.
536. What is the population of Bristol? Something like two hundred thousand.
537. Of course, as population increases, buildings will increase, and water will be supplied at a cheaper rate? I should suppose so.
538. How far does the eastern boundary of Paddington go? It is bounded by Darling Point and the Point Piper Road.
539. What is the municipality beyond that? Woollahra.
540. You are aware, I suppose, that no rate can be charged for water, except where the main lies within a certain distance of the house? I am aware of that.
541. Would it not be desirable to compel persons to lay on water? I think so.
542. How can you reconcile that with the present condition of Paddington—entirely destitute of water? We are not so destitute as we were; but the inhabitants of Paddington wish to be supplied with water at five shillings a room.
543. Is your Municipality capable of supplying the mains and laying them down? We could do the same as Sydney would,—go in debt for the principal, and charge interest upon it.
544. Your powers of borrowing are limited by the Act? Yes, but they could be increased. I think there is sufficient power given to us for every purpose of that description.
545. Have you taken any step towards supplying the ratepayers with water? Yes; we have sunk three public wells and fitted them with pumps,—one in each ward. It is our intention to sink more, if necessary.
546. *Mr. Outley.*] Is any charge made to the inhabitants for taking water from these pumps? No.
547. *Dr. Lang.*] I think you stated an objection to the mode of rating for water supply under the Corporation of Sydney? My objection was, that although the mode of rating might be just for Sydney, it would not be just for Paddington, inasmuch as most people living in the suburban districts have horses and other things for which sheds are erected, and they would have to pay for these as if they were rooms; but these are not so common in Sydney.
548. You object to the mode of rating for rooms? Not for rooms, but for these sheds and outhouses.
549. The question is, what should be called rooms? We call rooms anything under the roof of the dwelling-house. The definition of a room is the same as that in the Municipalities Act of 1867, which defines what is to be considered a room for water-rate.
550. *Mr. Hill.*] Beyond that you object to it? Yes.
551. *Mr. Outley.*] Then if a man had a four-stalled stable, and kept four horses and a carriage, you think he ought to pay nothing for the water used for them? The Municipalities Act provides only for rooms contained in the main building.
552. You would not consider that a man should have four horses and a carriage, and pay nothing for the water drunk by the horses or used for washing the carriage? Certainly not. Neither should I consider it fair to charge, as is now the case in Sydney in a place of business that I am acquainted with, for four workshops where no water is ever used. Where water is consumed, the parties should not object to pay. It is also thought it would be unjust to many of the inhabitants of Paddington who have gone to great expense in sinking wells and getting a thorough supply, to make them pay for water when they did not want it. One of the largest house proprietors at Paddington must have gone to an expense of some hundreds of pounds for water, and has now got an abundant supply.
553. Who is that? Mr. William Taylor, the present Mayor of Paddington.
554. Do you consider that all these places should be exempt? I do not.
555. Do you think they ought to be charged? I think they ought, for the benefit of the whole.
556. Do you recollect that the answer of the City Council to one application from Paddington was, that they would have no objection to supply the water, in the event of the Municipality purchasing the mains and laying them down? I do not recollect that; no account of such an offer is in the Municipal records.
557. Such was the case. If the Council of Sydney would supply the water, do you think the Municipality of Paddington could find the money to lay down the pipes? Yes.
558. *Chairman.*] Have you made any estimate of the cost of laying down the pipes? I have not.
559. Then how can you come to any conclusion? I suppose we should have to raise the money the same as the Sydney Corporation would have to do. I would observe, with reference to the petition sent in in favour of annexation to the city, that out of 520 odd names, only 180 were on the municipal roll.
560. The others were residents? Some of them were not. In looking over the list, I reckoned something like eighty that were not residents.
- 561.

561. Were they not as much entitled to petition as ratepayers? If they lived there; but there were as many as eighty that I knew were not in the municipality; others, again, were minors. Mr. William Stone.

562. *Mr. Oatley.*] Do you think it would be any direct benefit to the Municipal Council of Sydney to have Paddington annexed to it? I cannot see that it would; and I am sure it would be no benefit to Paddington, for Paddington has made most of her permanent improvements,—lit her thoroughfares with gas, and most of the back streets also,—without any extra taxation. 2 Mar., 1869.

Simeon Henry Pearce, Esq., J.P., called in and further examined:—

563. *Chairman.*] I believe, in the year 1849, or thereabouts, you were appointed Bailiff or Ranger of Crown Lands about Sydney? I was first appointed Bailiff, and subsequently Commissioner, of Crown Lands for Cumberland. S. H. Pearce, Esq., J.P.

564. Can you state what lands were placed under your charge then, and how they were described? Under my first appointment, the lands were all described and published in the *Government Gazette*. As far as I remember, they were all the Crown Lands in the parish of Alexandria, all the islands in the harbour, and all Crown Lands in the parish of Botany. 2 Mar., 1869.

565. Was there not one piece of land described as the Sydney Common, containing 1,000 acres or thereabouts? I would not be sure, without reference, that it was then generally called the Sydney Common.

566. The proclamation I allude to is dated 17th August, 1849; and I think you will find, on reference to it, that there were placed under your charge, amongst other lands, 1,300 acres, "known as the Water Reserve or Sydney Common"? Yes, on looking at the *Gazette* I see it is so styled, although it was not generally known to us in those days that it was the Sydney Common.

567. Was it not known to the Government? No, I believe not; because, if it had been, they never would have given me the instructions they did with reference to that portion. I think it was sometimes called, by Mr. George Hill and others, the Sydney Common; but I never saw a document from the Lands Office which referred to it as such, excepting this statement in the *Gazette*, and that had escaped my recollection altogether.

568. These 1,300 acres now form a large portion of the municipalities of Waverley or Randwick, do they not? There are portions of this land in both municipalities.

569. In 1862, I think, you were appointed by the Government as a Commissioner, together with two other gentlemen—Mr. Bell, the City Engineer, and Mr. M'Lean, the Surveyor General—to report upon the alienation of lands in and near the basin of the water supply for the city and suburbs? I was. I will not be sure about the dates, but if you have the documents they must be correct.

570. Will you look upon this plan (*No. 2, handed in by Mr. Adams*), and observe whether what I will now state is correct or not? This is the plan, without doubt, that was adopted by the Commissioners, with reference to the watersheds of the Sydney water supply at the time referred to.

571. The land you reported as being desirable to supply Sydney with water is there tinted green, I think? Yes. I think there were certain portions of land mentioned in our report that were recommended to be sold, and certain portions to be reserved. One portion of the land that was suggested should be sold—on the western side of the Old Botany Road—was found to be part of the Sydney Common; and, to show that the Government knew nothing about it, it was surveyed for sale, and was about being sold, when it was discovered by some person, from some old *Gazette*, that it had been promised to the citizens as a common for pasturage for their cattle.

572. Did you not at that time report that the land you examined, and which is there tinted green, was proper to be reserved for a supply of water for the city of Sydney? I believe we did. I would not be sure about the colours as marked in the map, without reference to our report.

573. That piece which is tinted green runs into the municipality of Waverley? It does.

574. In your evidence before this Committee, the other day, I think you stated that it was absurd to look upon that land as a reserve for water? I did.

575. How do you reconcile that statement with your report in 1862? Because the report you refer to was given with reference only to a temporary supply of water. We knew, when we were examining that locality, that it was only meant for a temporary supply, not for a permanent supply; because we were perfectly well aware that that area would never contain sufficient water to supply the inhabitants of Sydney and the suburbs. I believe that was the object I had in view, and so I believe had the other Commissioners; I know it was Mr. M'Lean's view that this land should be reserved for a temporary supply for the city, until water could be brought from a more permanent source.

576. These are the lands that now supply Sydney with water? They are a part of the lands that now supply Sydney with water.

577. And, to keep the water pure and undefiled, other portions have been reserved? Other portions, south of this, have been reserved. It formed part of our recommendation that all the lands southerly and westerly of this land, as shown in the map annexed to our report, should be reserved. They are not tinted on this map. This map (*No. 2*) does not, I believe, contain all the lands we recommended to be reserved. I think you will find in our report, that all vacant lands along the watershed to the Botany Swamps were recommended to be reserved for the purpose of a temporary supply.

578. This is a copy of your report, is it not? It is. (*Vide Appendix B.*)

579. Does it say anything about a temporary supply? That was our impression at the time;

S. H. Pearce, time; I know it was my impression, and I am satisfied it was Mr. McLean's, and I believe  
Esq., J.P. it was also Mr. Bell's. (*Witness read the report.*) Yes; it shows it was for a temporary  
supply, for the last paragraph but one states that, if these lands and water privileges are  
strictly preserved, they will provide an abundant supply for the next fifty years.

2 Mar., 1869.

580. It is in that light you speak of it as a temporary supply? Yes, the time or period therein stated shows that it was only a temporary measure.

581. Has the supply diminished since that time? Yes, very considerably.

582. Can you say that positively? I can; for the population of Paddington, Waverley, and Randwick has greatly increased, and therefore many more tanks and wells have been made, and the water reserved for their use, instead of running into the Water Reserve as formerly.

583. Is not the water flowing over the weir at Botany in thousands of tons? I am not now speaking of the water at the weir at Botany, but of the decrease in the original supply from Waverley, &c., from the causes above stated.

584. The recent waterworks at Botany are in addition to what you then reported upon? The waterworks at Botany were then or about to be erected, but they were not alluded to as a portion of our report; but, although we did not go beyond the land referred to in our map, as a matter of course, in making our report, we took in the whole Botany watershed, which we knew had been recommended by a former Commission to supply the city. We not only considered the area that had been placed under our cognizance, but the reports of the old Committees on the water question were referred to us also. Looking at the matter as a whole, we thought there was a sufficient area to collect sufficient water to supply the city for the next fifty years.

585. *Mr. Oatley.* Including the whole of the line right down to Botany? Yes, the whole watershed. I have no hesitation in believing and stating that there would be sufficient water stored in that locality, if they could find a retentive bottom so as to make proper dams, to supply the city for the next fifty years; but the great difficulty will be in storing it, by preventing percolation and evaporation.

586. If proper dams were constructed, it could be done? If proper dams were constructed; but I do not believe they can, from the little knowledge I have of engineering. Unless they can find a rock or clay bottom, they will never get the dams to hold water. All the course of that stream, from the Lachlan Swamp to Botany, is, in my opinion, nothing but sand. I believe that the waters of the sea used to run up to the base of the Waverley hills, through that valley—I believe it was originally an arm of Botany Bay; but it has been filled up, and the salt water shut out by the accumulation of sand from the surrounding hills and Botany Bay.

### WEDNESDAY, 3 MARCH, 1869.

Present:—

MR. HILL,

MR. OATLEY.

JAMES HART, Esq., IN THE CHAIR.

Joseph Burdekin Holdsworth, Esq., called in and examined:—

J. B.  
Holdsworth,  
Esq.

3 Mar., 1869.

587. *Chairman.* There is a Bill before the House to amend the boundaries of the city of Sydney, so as to include the lands known as the Sydney Common, the Water Reserve, No Man's Land, and Paddington, and your name has been handed to the Committee as being able to afford information as to some of these portions of land—whether it is desirable or not to annex them to the city; and we wish to know what information you can give upon the subject? The fact of the matter is, that I can give no information, except that I signed a petition for Paddington to be annexed to the city.

588. Did you formerly reside at Paddington? Yes, near the city boundary.

589. And I believe you have property there? I have; I have property in the same neighbourhood in Paddington and in the city; in fact, the city boundary stream passes through it. As it is, we can get nothing done, either one way or the other; the City Council either cannot or will not do anything, and the Paddington Council will do nothing either.

590. *Mr. Oatley.* You mean for sewerage purposes? Yes. That boundary stream, which drains a large district, both in the city and Paddington, wants covering in. The fact is, the drainage and all the filth from the Surry Hills and Paddington come down there now.

591. *Chairman.* The stream divides the city and Paddington? Yes.

592. And you think that, for the purposes of sewerage, it would be desirable to extend the city, so as to enable the sewerage to be carried out? Yes. I think also the water supply will be a great boon.

593. Did you find any inconvenience with regard to water when you resided at Paddington? We had no water laid on from the city then; it is only lately that it has been supplied to a few houses near the boundary. We had a tank on the property.

594. No water was supplied by the Municipality of Paddington? No.

595. At present, I believe, their water supply consists in having three pumps erected in various parts of the borough? Two pumps I think—one at the Barrack wall, and the other at the upper end.

596. For sanitary purposes—preventing the spread of disease, and promoting the public health—

- health—do you think it desirable a greater supply of water should be obtained? I should say it is very desirable.
597. Do you consider that the Municipality of Paddington are able to carry out any extensive waterworks? I should think not.
598. On account of the insufficiency of their revenue? Partly on account of their want of revenue, and partly that I do not see where they could get the water from.
599. They could get no water supply except from the Botany Waterworks? No, not that I can see; except from Busby's Tunnel, by pumping.
600. Have you paid any attention to the working of the Paddington Municipal Council? I have not. I have not been living at Paddington for eight or nine years.
601. Had you any conversation with inhabitants of Paddington, at the time the petition was got up, as to the desirability of annexing the place to Sydney? No.
602. You have no means, then, of forming an opinion as to what the general feeling is upon the subject? No, except that I have heard several of the residents about the lower end of Paddington, where my property is, and the Glenmore Road, speak in favour of annexing to the city. I tell you candidly my sole object in wishing to have it annexed to the city is, to have the boundary stream, which is getting to be a greater nuisance every day, covered over. While it is merely the boundary between the city and Paddington, I do not see any probability of getting it done.
603. *Mr. Oatley.*] Your cottage, the one in which you formerly resided, is supplied from the city at present? Yes; and I have lately got the City Council to extend the water to some other cottages I have there.
604. *Chairman.*] The City Ice Works are within the boundaries of Paddington, are they not? They are on my property, just within the boundary of the city, on the stream. I have ten or twelve acres there, and the stream cuts it in half.
605. Are there any manufactories at Paddington? No, I believe not.
606. Is there not a tannery on the Glenmore Road? Yes, the Old Glenmore Tannery.
607. That is supplied from a dam, is it not? Yes, the water comes down from Woollahra.
608. How are the Military Barracks supplied now? I think from Busby's Tunnel.

J. B.  
Holdsworth,  
Esq.

3 Mar., 1869.

FRIDAY, 12 MARCH, 1869.

Present:—

MR. HILL, | MR. OATLEY,  
DR. LANG.

JAMES HART, Esq., IN THE CHAIR.

Edward Bell, Esq., City Engineer, called in and further examined:—

609. *Chairman.*] Have you read the Draft Report of the Committee, stating the conclusions they have arrived at with reference to this Bill? I have.
610. Have you prepared amended Schedules, in accordance with the recommendations of the Committee? I have.
611. Will you hand them in? I will. (*The witness handed in the same. Vide Appendix, C 1 and C 2.*)
612. Have you also prepared a map, showing the portions of land that are intended to be included within the city boundaries, that is to say, the Sydney Common and the piece known as "No Man's Land"? I have.
613. And you now hand it in? I do. (*Plan handed in, and marked D.*) The entire area within the bounds of the city is tinted pink.
614. What do you consider would be a proper proportion of the tolls now derivable on the Randwick and Coogee Bay Road, to be paid to the City of Sydney, in the event of this Bill passing? I think one-half would be a fair proportion.
615. Is there a larger amount of traffic between the Botany Road and where the toll-bar is about to be erected, than there is between that point and the waters of Coogee Bay? Yes, considerably more, as far as the gate of the Racecourse, and that is where the Randwick Road crosses the boundary of the Water Reserve.
616. It takes far more to keep that portion of the road in repair, than it does the other portion? Much more.
617. *Mr. Oatley.*] From the fact of the traffic? From the fact of the traffic, especially during race time; and also from the fact that, in addition to the Randwick traffic, the Coogee and other roads' traffic passes over this road.
618. Have you included any portion of the municipality of Paddington in this proposed extension? None at all. Where the city comes in contact with the Paddington boundary, we follow the present Paddington boundary exactly.
619. *Dr. Lang.*] In the event of the people of Paddington coming to a better mind in regard to the question of annexation, would there be any difficulty in annexing that municipality to Sydney? None whatever, if a Bill were passed for the purpose.
620. A very short measure would be sufficient? I should think so.

E. Bell, Esq.,  
C.E.

12 Mar., 1869.

# SYDNEY BOUNDARIES AMENDMENT BILL.

APPENDIX.

## B.

(To Evidence given by S. H. Pearce, Esq., 2 March, 1869.)

## SYDNEY WATER RESERVE.

*REPORT of the Commission appointed to determine what portions of Crown Land, and of the Church and School Estates, lying to the east and south-east of Sydney, may be alienated without liability of injury to the purity of the City Water Supply.*

1. Having carried our examination nearly to completion, previously to the discovery of the promise of a grant of Sydney Common, and having examined the land included in that promise, we consider it desirable to place on record the result of our inquiry, in regard as well to this land as to the Crown and other land beyond it, but of course without any desire to express an opinion that any part of the Common land should be disposed of.

2. We have had prepared, in illustration of our report, a map, on which the land under examination has been tinted in various portions, numbered in the order of examination; and we have the honor to report as follows:—

The portion numbered 1 on the map, and tinted red, contains about 227 acres, and will not, if sold and built upon, affect the purity of the water supply for the city and suburbs.

The portion numbered 2 on the map contains about 31 acres, and now drains into that part tinted purple, and numbered 3 on plan, and forms a portion of the basin whence the Botany Waterworks are supplied. This portion might, however, be drained into Dowling-street, at small expense; in which case, buildings erected on it would not injure the purity of the city water supply.

The portion numbered 3 on the map also forms a portion of the basin which supplies the Botany Waterworks. It receives, together with the portion marked No. 2, the rainfall of about 300 acres, and it would be possible to divert the water by a tunnel to the Waterloo Dam Swamp, south of Baptist's Gardens, or to a small isolated basin on Crown Lands near it. The water at present reaches the Lachlan Swamp by filtration, excepting at storm times, when it runs across the Randwick Road, at the southern boundary of No. 3. Were the tunnel made as proposed, and the Randwick Road raised about four or five feet at that part over which the water now escapes, the alienation of the land would not affect the purity of the city water supply; but the quantity of water which this land catches would be diverted from its natural course, and the loss resulting would, in future years, when the consumption of Sydney and suburbs has greatly increased, be severely felt. If block 3 were to be sown with grass and partly planted with trees, instead of being alienated or used as a receptacle for night-soil, &c., it would form a splendid park and recreation ground for the public, and at the same time act most efficiently as part of the catch-water for the Botany Works. £200 expended in drainage would effectually connect it with the Lachlan Swamps, while the drainage by tunnel and canal, as suggested, would cost some thousands.

The portion numbered 4 on the map, including about 685 acres, contains the main Lachlan Swamp, from which the city was for so many years supplied with water, and should be entirely reserved for water supply. It might be planted around the centre basin as park land; and, if a dam and weir were constructed, at a moderate expense, to retain all the water which falls into this basin excepting at storm time, the city supply through the old tunnel would be greatly augmented, and a sheet of water would be formed which would be exceedingly ornamental to the surrounding country.

The portions numbered 5a, 5b, 5c, 5d, and 5e, containing altogether about 173 acres, lie in a portion of the watershed in which so much land has already been alienated; and their drainage, chiefly through the Racecourse, to the main swamp or stream, is so long that, were it practicable to impose a condition that not more than one house should be built on each acre of the land, they might be alienated without endangering the purity of the water supply.

The portion numbered 6, containing 135 acres, might also be alienated, with the condition of one house only being built on each acre of land.

The portion numbered 7, containing 163 acres, should be retained in connection with the city and suburban water supply, as it is very favourably situated for the formation of filtering beds, both for the waters which in rainy seasons flow through the Racecourse and from the main Lachlan Swamp water, which might at small expense be diverted into it.

The portion No. 7a, containing 15 acres, being on the main swamp or stream, must obviously be so reserved.

The portion No. 8, occupying either side of Bird's Gully—one of the principal feeders of the main stream, could not be alienated without risk to the water supply.

All these lands, swamps, and water channels, are now almost in a state of nature; but the time is not far distant when they must be made available to the fullest extent, for catching, storing, and filtering water, and when artificial works must be constructed throughout the watershed, for husbanding the water which falls in wet seasons, as a provision against droughts. There is no area within the city to construct storing reservoirs upon; and if the lands recommended to be reserved be alienated, there will be no alternative, some few years hence, but to go elsewhere in search of an adequate supply of water for the city and suburbs; while, if these lands and water privileges be strictly preserved and applied to that purpose, they will provide an abundant supply for at least the next fifty years.

We beg, in conclusion, to observe, that it is much to be regretted that the land at Waverley, on which the main feeders of the Lachlan Swamp take their rise, and the main channel of that swamp lying to the west of the Racecourse, were so improvidently alienated by Governments of former days. The former lands are being rapidly built over; and, as buildings increase, the injury to the water supply must be very material. The latter forms part of the Lachlan Mills Estate—Samuel Terry's grant of 500 acres—and is now the property of Sir Daniel Cooper. It has been laid out as the township of Epsom; and if it be sold and built upon, it will seriously affect the purity of the water supply. The portion of this estate within the swamp basin comprises about 180 acres, and has two wool-washing establishments upon it, which have, however, been closed since the provisions of the Water Act of 1853 were enforced.

EDWARD BELL,  
City Engineer.

A. G. McLEAN,  
Surveyor General.

S. H. PEARCE.

(To Evidence given by E. Bell, Esq., City Engineer, 12 March, 1869.)

C 1.

BOUNDARIES OF COOK WARD.

The portion of the City of Sydney bounded by the centre of Liverpool-street from its junction with Elizabeth-street to the South Head Old Road along the centre of that road to the north-west angle of Sydney Common thence along the centre of Dowling-street to a point where it intersects the southern boundary of the Borough of Paddington thence by that boundary to its intersection with the southern alignment of the South Head Old Road thence by that alignment easterly to its intersection with a line laid down marked out with stone posts and deemed to be the dividing line between Sydney Common and the Water Reserve thence in a south-westerly direction by the said dividing line to its intersection with the southern boundary of Sydney Common thence by that boundary to the south-west angle of Sydney Common thence in a northerly direction by the western boundary of that Common to its intersection with the centre of Cleveland-street thence along the centre of that street to the centre of Elizabeth-street thence along the centre of Elizabeth-street to the centre of Liverpool-street.

C 2.

BOUNDARIES OF THE CITY OF SYDNEY.

SCHEDULE A.

## MUNICIPAL AFFAIRS, NEWCASTLE.

## No. 1.

THE PRINCIPAL UNDER SECRETARY to THE MAYOR OF NEWCASTLE.

Colonial Secretary's Office,  
Sydney, 9 December, 1867.

SIR,

I am desired by the Colonial Secretary to acknowledge the receipt of your two communications of the 18th ultimo, on the subject of proceedings in the Municipal Council of Newcastle, and to say in reply, that it does not appear that the Government has the power, under the Act, to appoint a person to investigate the affairs of the Council; and that, as to the interpretation of the section alluded to of the Act under which the Corporation exists, it would, it appears to Mr. Parkes, be a fitting course to obtain the further advice of counsel.

I have, &amp;c.,

HENRY HALLORAN.

## No. 2.

## PETITION.

To His Excellency the Governor-in-Chief of New South Wales.

May it please your Excellency:—

We, the undersigned burgesses of the Borough of Newcastle, New South Wales, having good reason to believe that the municipal rate-books, together with the general accounts of the Municipality, have for a series of years been kept in an improper and irregular manner, whereby a considerable amount of inconvenience and annoyance to ratepayers, and of loss to the funds of the Municipality, has been incurred, humbly beseech your Excellency to afford us such measure of relief as may appear to you advisable, under the provisions of the Municipalities Act of 1867.

Your Memorialists beg to submit for the consideration of your Excellency, the following allegations in support of the prayer of their memorial, as the grounds upon which they rely, and as forming fitting subjects of inquiry by competent and impartial persons appointed independent of all party prejudice or of local influence.

That since the year 1863, no arrear of rate-book has been kept properly posted up by the Town Clerk, so as to afford reliable information as to who are defaulters, or of the specific amount of arrears due by each defaulter, many of whom are known to have been so for several years past, to the manifest prejudice of the non-defaulting ratepayers and the general interests of the Municipality.

That the rates for the year 1866 have never been entered in the proper rate-book provided for the purpose; but instead thereof, are merely entered on a number of sheets of paper, in a manner altogether unsuited to the preservation of such important and valuable records.

That in the said sheets of paper, the names of persons originally inserted as ratepayers have been in some instances partially erased, and in others wholly obliterated, and the names of others inserted in their stead; so that, in consequence of this mutilation and disfigurement of these records, any attempt to ascertain with precision who were the *bonâ fide* ratepayers for the time being is rendered almost impossible. These erasures, moreover, scarcely appear to have been casual, but on the contrary, are numerous, as many as from fifteen to twenty of them occurring, in some instances, on a single page.

That in consequence of these irregularities, and the general laxity exhibited in the supervision of the financial affairs of the Municipality, and the fact that for several years there has been no properly constituted "finance committee" as is customary in all well regulated corporate bodies, your Memorialists have just reason to fear that great injustice must necessarily have followed from these and like causes, more especially as the rate-books are the only valid record of the source of income, and their proper keeping the best safeguard against speculation or improper and improvident expenditure.

From a special return made out in compliance with a motion in Council, it appeared that at the commencement of the year 1867 there were arrears of rates due, exclusive of those for the current year, amounting to £4,200, some portion of which had accrued in the first year of incorporation—1859.

On an attempt being made to enforce these arrears under the provisions of the Act of 1858, grave errors were found to have been made by the Town Clerk, in having inserted erroneous amounts in several of the warrants issued; in one of which cases an action was brought against the Corporation and damages recovered, which together with the costs of suit, amounted to a considerable sum of the money contributed by your Memorialists for other and more legitimate purposes.

That

That for these and other irregularities, the then Mayor suspended the said Town Clerk, on the 19th September last, and on the same day the cash-books containing the cash accounts of the Municipality, extending over a considerable period, were abstracted from the Town Clerk's office, and up to the present time have not been recovered; and in consequence of their absence, the last half-yearly returns of income and expenditure made to the Government for the year ending February, 1868, and upon which endowment is claimed, had to be made up in the best way possible under the circumstances, as your Excellency will perceive on reference to the qualified certificates of the Mayor and Auditors appended to those returns as published in the *Government Gazette* of the — February last.

On recourse being had to the rate-books with a view to ascertain the amount of income derived from that source, it appeared that a total sum of from four to five hundred pounds had been received of which there is no record of payment on those books.

Your Memorialists have further reason to believe that the last monthly return of account forwarded to the Government in compliance with the provisions of the Act of 1868, has been made up by the Town Clerk without due regard to the requirements of the case, inasmuch as the temporary cash-book procured to supply the place of those that had been stolen, was not produced to the Auditors when called upon to audit those accounts, although demanded by them, in order that they might assure themselves of the correctness of the data from which the statement of accounts submitted to them by the Town Clerk had been compiled.

For the further information of your Excellency, and in corroboration of the allegations herein contained respecting the deplorable condition into which the municipal records have been brought by a series of delinquencies on the part of the Town Clerk, who has again been reinstated without inquiry having first been made, and in defiance of the protestations of the late Mayor and of a large portion of the most respectable ratepayers, we beg leave to append a report contained in the local papers, of the proceedings which took place at a meeting of the Borough Council, on Monday, 30th ultimo, from which your Excellency will perceive that the books of the Corporation are confessedly in such a state of error and confusion as to defy all legitimate attempts at their rectification.

Extract from  
Newcastle  
Chronicle news-  
paper annexed.

Under all these circumstances, and seeing no probability of obtaining justice from any other source, your Memorialists earnestly but respectfully urge upon your Excellency to exercise the power and authority vested in you by the 184th section of the Act, or to take such other proceedings in the matter as you may be advised; and your Memorialists will, as in duty bound, ever pray.

[Enclosure.]

EXTRACT from the *Newcastle Chronicle* newspaper of the 1st April, 1868.

NEWCASTLE BOROUGH COUNCIL.

The Committee of the whole Council met, pursuant to notice, in the Court House, on Monday afternoon, at 4 o'clock. Present:—The Mayor, Aldermen Bolton, Chapman, Christie, Rodgers, Sparke, Stokes, and Winship.

*Minutes.*—The minutes of the two previous meetings were read, confirmed, and signed.

*Investigation*

*Investigation into the charges against the Town Clerk.*—The Mayor stated he had sent a letter to Mr. Brookes, on Saturday, informing him that a committee of the whole would sit on Monday, at 4 p.m., to proceed with the investigation of the charges against the Town Clerk. No reply had yet been received.—Ald. Rodgers recommended that some plan be laid out for conducting the investigation.—The Mayor asked how the Council were to proceed, if there was no one present to lay the charges.—Ald. Winship asked if there was any objection to let the matter stand over for a week.—Ald. Chapman thought the committee ought to take some measures for proceeding with the investigation. All the parties who voted at the election for Macquarie Ward, between Mr. Bolton and Mr. Rodgers, had paid their rates, and the committee could take the names of those who had voted, and have them posted in the rate-books, and see if they corresponded with the amount paid in by the Town Clerk.—The Mayor said it would take six months to get all the arrears of rates collected.—Ald. Rodgers asked if there was any intention to take proceedings for the recovery of the missing cash-books.—Ald. Bolton: What proceedings?—The Mayor said they had been advertised for, and a reward offered for any information that would lead to their recovery.—Ald. Winship would like to see the matter stand over for a week, as the late Mayor might not have received the notice. He (Ald. Winship) had not received his notice till 10 o'clock this morning.—Ald. Stokes suggested an adjournment till Tuesday afternoon.—Ald. Bolton thought that it would be safe to take the declarations of those who voted in the late election for Macquarie Ward, and paid their taxes and arrears, together with the weekly account of receipts, and that would come within a few pounds of the money paid in. With respect to the other charges, if Mr. Brookes did not attend, he (Ald. Bolton) did not know how they were to proceed, for those who made the charges ought to be there to prove them.—Ald. Christie was under the impression there was no charge of deficiency of money laid against the Town Clerk.—Ald. Bolton did not say there was a charge of that sort against the Town Clerk, but it was due to the ratepayers to see that the amounts they paid were credited to them.—The Mayor moved,—"That this committee stands adjourned to this day week, and in the meantime the finance committee be requested to post up the books, by means of the declarations made on the late election between Aldermen Bolton and Rodgers, and also, by means of the returns furnished by the Town Clerk, of moneys received during the week and laid before the Council, and that all entries made by the finance committee be made in red ink, to distinguish between the original entries; and further, that the late Mayor be informed of the adjournment of this meeting."—This motion was not seconded.—Ald. Bolton was of opinion the committee could not give the finance committee power to alter the books without the consent of the Council.—The Mayor said he was determined to get in the arrears of rates, but he could not do so without the books.—Ald. Christie thought the investigation should go on before touching the books. If Mr. Brookes would not attend, he was of opinion the committee could make him.—At a quarter to 5 a messenger brought a reply from Mr. Brookes, which the Mayor read to the committee. It was as follows:—

"To Mr. John Burrowes.

"Sir,—In reference to a note put into my hands on Saturday morning last, bearing your signature as Town Clerk, and purporting to have been written by the direction of His Worship the Mayor, signifying that a meeting of a certain committee, designated therein 'A committee of the whole of the Borough Council,' will be held on Monday, 30th March instant, to proceed with the investigation of the charges against the Town Clerk, I have to state in reply, that having no knowledge whatever of the existence of any such committee for the purpose specified other than that conveyed to me in your note, I cannot, under the circumstances, recognize its functions, or the authority of His Worship the Mayor, in so far as I am in my individual capacity concerned. There did exist a committee, appointed for some such purpose, of which I had both a knowledge and an experience in my corporate capacity, but that was not a committee of the whole, because the Mayor for the time-being was considerably excluded from its number. And inasmuch as I am now no longer a member of the Borough Council, I am at a loss to conceive any legitimate motive to which I can ascribe this mark of condescension on the part of His Worship the Mayor, in thus seeking, under such favourable auspices, again to make me a party to such purposes. If I had felt so disposed, it would have been deemed discourteous in me to have treated this intimation as a premeditated insult. I may, however, be allowed to state, that it proceeds on an entirely erroneous presumption, which fails to discriminate between my corporate and my personal position in relation to this matter. Under any circumstances, and after what has already transpired, I can only view the proposition for inquiry as a cruel mockery, or, at best, a work of supererogation, since the offences have been arranged and condoned, and the offender reinstated. Thanking His Worship, however, for the distinguished consideration shewn me in reference to this matter, I must decline to avail myself of the proposed favour, or in any way to become a party-man to any such investigation, otherwise than before an impartial tribunal, differently constituted to the one over which he has the privilege of presiding.

"I remain, your obedient servant,

"W. BROOKES."

"Bank Buildings, 30 March, 1868."

Ald. Christie thought that Mr. Brookes ought to be compelled to attend.—Ald. Chapman asked how they could now go on with the charges.—The Mayor said there was now no charges to go on with. Mr. Brookes had been asked to attend, and had refused to come.—Ald. Stokes proposed that the Town Clerk be instructed to post up the books at once.—Ald. Rodgers agreed with Ald. Stokes.—Ald. Christie said it was wrong of the committee to ignore the charges; it was for mistakes the Town Clerk was suspended, and to condone those offences without investigation, in his opinion, was not right.—Ald. Chapman moved: "That this committee do now proceed to post up the rate-books, from the declarations made at the election on the 12th September, and from the fortnightly returns laid before the Council."—The motion was not seconded.—Ald. Bolton remarked that the committee had no authority from the Council to take such a step.—Ald. Rodgers moved: "That a sub-committee of this committee examine the rate-books, and report to the next meeting of the committee, and a recommendation be made to the Council as to the posting of the books."—The motion was not seconded.—Ald. Chapman and Rodgers suggested that the books be examined at once.—Ald. Christie said there was nothing to criminate Mr. Burrowes, unless it could be proved he stole the cash-books.—Ald. Bolton moved: "That this committee are of opinion that the rate-books should be posted by and under the direction of the finance committee, and such corrections made as they may find necessary, after examining all papers and documents relating to the payment of rates as the receipt of money."—This motion also lapsed for want of a seconder.—The Mayor said there was nothing to prevent them going into the investigation, and taking the books and examining them at once.—Ald. Rodgers was prepared to say "have done with the charges," and let the aldermen do their utmost to rectify the errors, as the person who ought to make the charges would not attend.—Ald. Christie moved: "That the next charge in succession be read over and taken into consideration." He wished to see fair play.—Ald. Winship seconded the motion.—The motion was carried by four to three.—The Mayor stated he had not the papers containing the charges with him.—The committee then adjourned to Friday next, at 4 p.m.—Previous to adjournment, the following notice of motion was handed in by Ald. Bolton:—"That the finance committee be instructed to post up the rate-books, and make such entries and corrections as they may consider necessary, after examining all papers and documents relative to the payment of rates or payment of moneys."

## No. 3.

THE PRINCIPAL UNDER SECRETARY to PETITIONERS.

Colonial Secretary's Office,  
Sydney, 5 June, 1868.

GENTLEMEN,

In acknowledging the receipt of your memorial, without date, respecting the accounts of the Borough of Newcastle, I am directed by the Colonial Secretary to inform you that the necessary steps will be taken for the appointment of Special Auditors, in accordance with the "Municipalities Act of 1867."

I have, &amp;c.,

HENRY HALLORAN.

## No. 4.

MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Colonial Secretary's Office,  
Sydney, 8 June, 1868.

FIFTY-SEVEN electors of the Borough of Newcastle having, in consequence of the improper and irregular manner in which they represent the accounts of the Borough to have been kept, and of the loss arising therefrom, prayed for the appointment of Special Auditors, I recommend that William Buyers and William Henry Mackenzie, senior, Esquires, be appointed such Special Auditors accordingly, under the 184th section of the Municipalities Act of 1867; and further, that the expenses attendant upon such special audit shall be borne by the said Borough of Newcastle, as provided for in the 186th section of the Municipalities Act aforesaid.

HENRY PARKES.

MINUTE OF THE EXECUTIVE COUNCIL.

FOR the reasons set forth in the accompanying Petition, and upon the recommendation of the Honorable the Colonial Secretary, the Council advise that William Buyers and William Henry Mackenzie, senior, Esquires, be appointed, in terms of the 184th clause of the Municipalities Act of 1867, Special Auditors for the Borough of Newcastle; also, that the expense attending such audit be defrayed by the said Borough, as provided by the 186th section of the said Act.

ALEX. C. BUDGE,

Clerk of the Council.

Min. 68/24, 9 June, 1868.

Confirmed, 11 June, 1868.

Approved. B.—15/6/68.

## No. 5.

THE PRINCIPAL UNDER SECRETARY to WILLIAM BUYERS, ESQ.

Colonial Secretary's Office,  
Sydney, 18 June, 1868.

SIR,

A petition having been received from certain electors of the Borough of Newcastle, representing the irregular manner in which the accounts of that Borough have been kept, and praying for the appointment of Special Auditors to investigate the same, I am directed by the Colonial Secretary to inform you that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint William Henry Mackenzie, senr., Esq., and yourself, to be such Special Auditors, in the terms of the 184th section of the "Municipalities Act of 1867," and to authorize that the expense attending such audit be defrayed by the same Borough, as provided by section 186 of the Act quoted.

2. I am further desired to invite your attention to the section first above mentioned, and to the two following sections.

I have, &amp;c.,

HENRY HALLORAN.

[A similar letter was, on the same date, addressed to William Henry Mackenzie, senior, Esq., Sydney Exchange.]

## No. 6.

THE PRINCIPAL UNDER SECRETARY to J. B. WINSHIP, Esq.

Colonial Secretary's Office,  
Sydney, 18 June, 1868.

SIR,

With reference to a memorial, signed by fifty-seven electors of the Borough of Newcastle, respecting the irregular manner in which the accounts of that Borough have been kept, and praying for the appointment of Special Auditors to investigate the same, I am directed by the Colonial Secretary to invite you to inform the Petitioners, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint William Buyers and William Henry Mackenzie, senior, Esquires, to be such Special Auditors, in terms of the 184th section of the "Municipalities Act of 1867," and to authorize that the expense attending such audit be defrayed by the same Borough, as provided by section 186 of the Act above mentioned.

I have, &amp;c.,

HENRY HALLORAN.

## No. 7.

THE PRINCIPAL UNDER SECRETARY to THE MAYOR OF NEWCASTLE.

Colonial Secretary's Office,  
Sydney, 18 June, 1868.

SIR,

Referring to a memorial, without date, received from fifty-seven electors of the Borough of Newcastle, representing the irregular manner in which the accounts of that Borough have been kept, and praying for the appointment of Special Auditors to investigate the same, I am directed by the Colonial Secretary to inform you, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint William Buyers and William Henry Mackenzie, senior, Esquires, to be such Special Auditors, in terms of the 184th section of the "Municipalities Act of 1867," and to authorize that the expense attending such audit be defrayed by the same Borough, as provided by section 186 of the Act above mentioned.

2. I am to add, that Mr. J. B. Winship has been invited to apprise the Petitioners of the result of this memorial.

I have, &amp;c.,

HENRY HALLORAN.

## No. 8.

REPORT OF THE SPECIAL AUDITORS.

Sydney, 3 November, 1868.

To the Honorable the Colonial Secretary, New South Wales.

SIR,

Acting upon the appointment conveyed to us in your letter of 18th June, 1868, as Special Auditors, in accordance with 184th clause of the Municipalities Act of 1867, we have the honor to report:—

That we proceeded to the City of Newcastle on 16th July last, and received there every assistance the Worshipful the Mayor could render to us. He likewise instructed the Town Clerk to permit us to have access to all the books and documents belonging to the Corporation, in his charge, and give to us also every information he was able. The Town Clerk complied with these instructions.

We commenced our labours on Friday the 17th July, supposing that our work would have been the auditing of the accounts and books of the Corporation.

We were, however, soon informed that the cash-book was missing, that it had been taken from the Council Office, and although rewards had been offered for it, and every means tried to recover it, it had not been returned.

This cash-book should have contained in it the entries of all moneys received on account of the Corporation from ratepayers, with their names and amount of rate, Government endowment, and all other revenue; likewise, expenditure from the commencement of the Municipality until 20th September, 1867, the apparent time of the discovery of its absence, according to minutes of the Council of 23rd September, 1867.

The absence of the cash-book, and imperfect system of keeping the rate-book, caused great delay to us, in arriving at data on which to commence our audit. This data, prepared by ourselves from the rate-books, bank pass-books, and other documents, commencing from the existence of the Municipality in 1859, enabled us to form a cash-book.

Upon the suspension of the Town Clerk, as per minute book, in September, 1867, the appointed Acting Town Clerk kept a cash-book, from 20th September, 1867, to the

10th February, 1868, but in a very imperfect manner. After that, on the 10th and 11th February, 1868, including amounts entered of £543 13s. 9d., neither names, nor rates, nor numbers, are given.

Having made up the Corporation books, and finished our special audit, we do ourselves the honor to continue our report on the result thereof, as follows:—

That the net value of property, from the 1st July, 1859, to 1868, on which the assessed rate was calculated upon, amounted to ... .. £400,741 8 8

Yielding, at 1/ in the £	...	...	...	£20,037	2	2
Of which we traced the sum paid	...	...	...	16,981	0	0

Leaving unpaid ... .. £3,056 2 2, as per our list of arrears, handed to the Mayor.

That we have examined and searched through all books and documents likely to guide us, to ascertain the amount of rates received as above.

That the amount of rates ascertained by us to have been received agrees with the amounts in the published half-yearly statements, and likewise with the money deposited in the bank, all but the sum of £2 12s. 4d.—£2 10s. of which appears to have been an error during the time Mr. Betts acted as Town Clerk.

That we have examined the vouchers for payments made, and find them to agree with the cheques paid by the bank, as per the bank pass books.

That we have marked the several books belonging to the Municipality, examined by us, according to paper held by us, marked B.

And in concluding our report, we think it desirable to make the following suggestions:—

That the City Treasurer should be a paid officer of the Council, and a separate appointment from the Town Clerk; the growing importance of the City of Newcastle, with the great and rapidly increasing numbers of ratepayers, makes this separate appointment necessary, as very soon the City Treasurer's whole time will be fully occupied in collecting the rates, and avoid arrears.

Should the City Treasurership be continued as at present, by the Manager of the Australian Joint Stock Bank, we consider it prudent that he should keep a duplicate of the cash-book used in the Council Office, to be written up weekly, as a safeguard against a second abstraction, and any future difficulty arising from the absence of so important a book.

That the duties of Town Clerk should be separate and distinct from that of the Treasurer.

That as the 22nd clause of the Municipal By-laws states, "The Town Clerk shall have the custody of, and shall be responsible for the safe keeping of all books, charters, deeds, and municipal documents," we recommend a spacious iron safe should be immediately obtained to keep them in safety; and the contents placed therein should be in the charge of, and upon the responsibility of the officer appointed by the Council to the care of the keys.

That assessment books be always first prepared, and settled and signed by the proper parties, with the Corporation Seal attached thereto, previous to the rate-books being made up, so that no alterations may appear therein; as we consider the present system of keeping the two forms of assessments and rates in one book, subject to alterations, very objectionable.

We have, &c.,

WM. BUYERS.

W. H. MACKENZIE, SENR.

Newcastle, 28 January, 1869.

SIR,

I have the honor to acknowledge receipt of your letter, No. 5, of 12th instant, requesting copies of two letters from the Mayor of Newcastle, dated the 18th November, 1867; and in reply, I beg to inform you that no record of any such communications has been kept in this office.

I am therefore unable to comply with your request.

I have, &c.,  
JAMES HANNELL,  
Mayor.

1868-9.

NOTE.—The above Return is incomplete in certain particulars shown by the Schedule. Much of the information given by different Municipal Bodies is informal in its character, owing to the alleged inability of the Mayors and others to furnish the precise particulars required by the Order of the Assembly. In the cases wherein information has not been given, the parties have been applied to without success.

## No. 1.

## PETITION FOR INCORPORATION OF NUMBA.

To His Excellency the Right Honorable Somerset Richard, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor, and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same, &c.

MAY IT PLEASE YOUR EXCELLENCY,—

We, the undersigned, are desirous that Numba, in the district of Shoalhaven, in the county of St. Vincent, may be erected into a municipal district, to be called the Municipal District of Numba.

The boundary of said Numba Municipal District to commence at the Shoalhaven River, at the eastern boundary of Terrara, the property of the DeMestre family; and the western boundary of 2,320 acres, the property of A. Berry, said boundary to extend south to the Crookhaven Creek, and thence by said creek to its junction with the waters of the harbour of Crookhaven, to be bounded by the said waters to the Greenwell Point Wharf; from thence by said waters, until their junction with the Shoalhaven River by an artificial entrance made upwards of forty years ago; and thence by the Shoalhaven River to the point of commencement.

The boundaries suggested are natural boundaries; and the proposed municipal district contains a population of 750 inhabitants.

And your Petitioners will ever pray, &c. :

## No. 2.

## MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Colonial Secretary's Office,  
Sydney, 20 June, 1868.

A PETITION having been received from 91 persons liable to be assessed for municipal taxes, in respect of property or household residence, and whose signatures to the petition are duly verified, praying for incorporation as a municipal district, with certain boundaries therein described, under the name of the Municipal District of Numba, and stating that there are 750 inhabitants living within the area so described: I recommend that the substance of the petition be published in the *Government Gazette*, in accordance with the 10th clause of the Municipalities Act of 1867.

HENRY PARKES.

## No. 3.

## MINUTE OF THE EXECUTIVE COUNCIL.

At Government House,  
Sydney, 23 June, 1868.

## PRESENT:—

His Excellency the Governor,  
The Honorable the Vice-President,  
The Honorable the Colonial Secretary,  
The Honorable the Secretary for Lands,  
The Honorable the Secretary for Works,  
The Honorable the Postmaster General.

[Extract.]

His Excellency the Governor lays before the Council a Minute Paper by the Honorable the Colonial Secretary, submitting a petition from 91 persons liable to be assessed for municipal taxes, in respect of property or household residence, praying to be incorporated as a municipal district, with certain boundaries therein described, under the style and title of the Municipal District of Numba.

2. As the said petition appears to be regular, the Council advise that the substance and prayer thereof be published in the *Gazette* and in some local newspaper, in accordance with the 10th clause of the Municipalities Act of 1867.

ALEX. C. BUDGE,  
Clerk of the Council.  
No. 4.

## No. 4.

## NOTICE OF THE EXECUTIVE COUNCIL.

Colonial Secretary's Office,  
Sydney, 11 July, 1868.

## Petition for Municipality—Numba.

In pursuance of the Act of the Colonial Parliament 31 Victoria No. 12, His Excellency the Governor, with the advice of the Executive Council, has directed the publication of the substance of a petition addressed to His Excellency, as herein set forth, signed by 91 inhabitants of the district of Numba, and praying for the erection of that place into a municipality, under the name of the Municipal District of Numba.

HENRY PARKES.

The petitioners state that they are desirous that Numba, in the district of Shoalhaven, in the county of St. Vincent, may be erected into a Municipal District, to be called the municipal district of Numba.

That the boundaries of the said proposed municipal district are:—

To commence at the Shoalhaven River, at the eastern boundary of Terrara, the property of the DeMestre family, and the western boundary of 2,320 acres, the property of A. Berry, said boundary to extend south to the Crookhaven Creek; and thence by said creek to its junction with the waters of the harbour of Crookhaven, to be bounded by said waters to the Greenwell Point Wharf; from thence by said waters until their junction with the Shoalhaven River by an artificial entrance made upwards of forty years ago; and thence by the Shoalhaven River, to the point of commencement.

That the boundaries suggested are natural boundaries, and that the proposed municipal district contains a population of 750 inhabitants.

## No. 5.

## PETITION FOR INCORPORATION OF SOUTH SHOALHAVEN MUNICIPAL DISTRICT.

To His Excellency the Right Honorable Somerset Richard, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

The petition of the undersigned humbly sheweth,—

That your petitioners are residents, and otherwise will be rateable, within the boundaries set forth as follows:—

Commencing at the mouth of Nowra Creek, on the Shoalhaven River; and bounded on the west by the creek and a line bearing south along the west boundaries of the Nowra reserves for town extension and for public recreation, to the south-west corner of the last-named reserve; thence on the south by the south boundary of the said reserve, bearing east to its south-east corner; thence by a line, bearing south-easterly, to the south-west corner of James M'Mahon's 37 acres 3 roods, known as Gerald's Yard; thence by the south boundaries of the said lot and three unsold lots of 44 acres 1 rood, 48 acres, and 45 acres 3 roods, bearing east; thence by the east boundaries of the last-mentioned lot, and James M'Mahon's 30 acres, bearing north to the south boundary of M'Kenzie and Wallace's 243 acres; thence by the said southern boundary of the said 243 acres, bearing east to the south arm of the Crookhaven River; thence by that creek and the Crookhaven River, by Greenwell Point, to the Shoalhaven River, by the navigable channel; thence by the south bank of the Shoalhaven River, westerly, to the point of commencement at Nowra Creek.

That such boundaries contain an area of less than 50 square miles, and a population exceeding 1,000 and less than 4,000 souls.

That your petitioners are desirous of having the same incorporated as a municipal district, under the name of the South Shoalhaven Municipal District.

And your Petitioners will ever pray:

Colonial Secretary's Office,  
Sydney, 20 June, 1868.

A PETITION having been received from 162 persons liable to be assessed for municipal taxes in respect of property or household residence, and whose signatures to the petition are duly verified, praying for incorporation as a municipal district, with certain boundaries therein described, under the name of the South Shoalhaven Municipal District; and stating that there are over 1,000 and less than 4,000 inhabitants living within the area so described: I recommend that the substance of the petition be published in the *Government Gazette*, in accordance with the 10th clause of the Municipalities Act of 1867.

HENRY PARKES.

## No. 7.

## MINUTE OF THE EXECUTIVE COUNCIL.

At Government House,  
Sydney, 23 June, 1868.

## PRESENT:—

His Excellency the Governor,  
The Honorable the Vice-President,  
The Honorable the Colonial Secretary,  
The Honorable the Secretary for Lands,  
The Honorable the Secretary for Works,  
The Honorable the Postmaster General.

[*Extract.*]

HIS Excellency the Governor lays before the Council a Minute Paper by the Honorable the Colonial Secretary, submitting a petition from 162 persons liable to be assessed for municipal rates, in respect of property or household residence, praying to be incorporated into a municipal district, with the boundaries therein described, under the name of the South Shoalhaven Municipal District, in terms of the Act 31st Vict. No. 12.

2. As the said petition appears to be regular, the Council advise that the substance and prayer thereof be published in the *Gazette* and in some local newspaper, in terms of the 10th clause of the Act 31st Vic. No. 12.

ALEX. C. BUDGE,  
Clerk of the Council.

## No. 8.

## NOTICE OF THE EXECUTIVE COUNCIL.

Colonial Secretary's Office,  
Sydney, 11 July, 1868.

## Petition for Municipality—South Shoalhaven.

IN pursuance of the Act of the Colonial Parliament 31 Victoria No. 12, His Excellency the Governor, with the advice of the Executive Council, has directed the publication of the substance and prayer of a petition addressed to His Excellency, as herein set forth, signed by 162 persons who would be liable if incorporated to assessment for municipal taxes in respect of property or household residence, and praying that an area therein described may be erected into a municipality, under the name of the South Shoalhaven Municipal District.

HENRY PARKES.

The petitioners state that they are residents, and otherwise will be rateable, within the boundaries set forth, as follows:—

Commencing at the mouth of Nowra Creek, on the Shoalhaven River; and bounded on the west by the creek and a line bearing south along the west boundaries of the Nowra reserves for town extension and for public recreation, to the south-west corner of the last-named reserve; thence on the south by the south boundary of the said reserve, bearing east to its south-east corner; thence by a line, bearing south easterly, to the south-west corner of James M'Mahon's 37 acres 3 roods, known as Gerald's Yard; thence by the south boundaries of the said lot and three unsold lots of 44 acres 1 rood, 48 acres, and 45 acres 3 roods, bearing east; thence by the east boundaries of the last-mentioned lot, and James M'Mahon's 30 acres, bearing north to the south boundary

boundary of M'Kenzie and Wallace's 243 acres ; thence by the said southern boundary of the said 243 acres, bearing east, to the south arm of the Crookhaven River ; thence by that creek and the Crookhaven River, by Greenwell Point, to the Shoalhaven River, by the navigable channel ; thence by the south bank of the Shoalhaven River, westerly, to the point of commencement at Nowra Creek.

That such boundaries contain an area of less than 50 square miles, and a population exceeding 1,000 and less than 4,000 souls.

And the petitioners pray that the same may be incorporated as a municipal district, under the name of the South Shoalhaven Municipal District.

### No. 9.

ALEXANDER BERRY, Esq., to HIS EXCELLENCY THE GOVERNOR AND THE EXECUTIVE COUNCIL.

To His Excellency the Right Honorable the Earl of Belmore, Governor-in-Chief of the Colony of New South Wales, &c., &c., &c. ; and to the Honorable the Members of the Executive Government of the same :

I hereby do myself the honor respectfully to represent, that I am an old settler in said Colony, and the possessor of a large landed property in the district of Shoalhaven.

And to state that I have been grievously oppressed since the passing of the Municipal Act of 1858 ; and also to state the particulars of such oppression, as another attempt has lately been originated for renewing a similar system of oppression against me by the same parties.

Soon after the passing of the above-mentioned Act, the Rev. Dr. Lang, a political clergyman, who was then and still is a Member of the Legislative Assembly, proceeded to Shoalhaven to preach a crusade against my establishment.

On leaving Shoalhaven, he published three highly libellous letters in the local newspaper, containing a series of the most false and malicious libels against myself, for the avowed purpose of exciting my neighbours against me, and of inducing them to seize upon my property as a municipality ; and to use his own words, " to convert into gold diggings for their benefit, and to crush me like a miserable earth-worm."

I was recommended to prosecute Lang for his libels, and retained the Honorable Mr. Isaacs, the present Solicitor General ; but the Attorney General of the Cowper Government would not allow me to prosecute their adherent, Dr. Lang, and turned the case into a mere mockery of Justice and of personal insult to myself.

Lang found an individual of his own disposition to carry his scheme into effect, to wit, a person who had been convicted of arson and subornation of perjury.

The Cowper Government carried the scheme into effect, notwithstanding all my remonstrances to the contrary. I obtained a Committee of the Legislative Council to investigate the circumstances of the case under which the Municipality was constituted, and whether it was duly constituted according to the Act.

The Honorable Mr. Docker, the present Postmaster General, was Chairman of this Committee, which gave a Report in my favour, which Report was confirmed by a large majority of the Council, notwithstanding the strenuous opposition of Mr. Cowper, then a member of that body.

This Report and proceedings speak for themselves. The then Cowper Government treated this Report with contempt and set it at naught.

I then appealed to the Supreme Court, on which occasion the Honorable Mr. Martin, the present Attorney General, was my leading counsel.

The Supreme Court gave a *verdict* that the said *Municipality was illegally constituted according to the Act*.

In the face of this verdict the Mayor and Aldermen of the so-called Municipality gave me notice that they would again distrain upon me for the rates. I obtained an injunction from the Supreme Court to prevent their doing so.

The Cowper Government long afterwards applied to the Privy Council in England for liberty to appeal against this verdict. This was granted. The case was heard, and the Privy Council decided that the *Municipality was illegally constituted*.

From the interpretation of the Cowper Government of their own Municipal Act, it appears that they considered it was a piece of political machinery whereby they could oppress and punish political opponents.

I was a Member of the Legislative Council at the time when they attempted to swamp the House by the introduction of a large batch of people *picked* up out of the streets of Sydney—on which occasion I resigned my seat, with a large majority of the House including the President.

Most certainly, the Cowper Government recklessly expended thousands of the public money in their attempt to oppress me, and put me to an enormous expense in defending myself.

When the Cowper Government began to oppress me, my solicitor, the late Mr. James Norton, earnestly advised me to sell my property and leave the Colony, but I was then unwilling to be HUNTED OUT OF THE COLONY.

I have often since had reason to regret not having taken his advice, as the Colony was then in a healthy monetary state, and I could readily have disposed of my property. It required a certain time before the evil measures of the Cowper Government could tell upon the Colony. Under that Government the public revenue became dilapidated; and ever since, that party has used every effort to prevent the revenue from being reconstructed by the present Government.

I have hitherto cleared and opened up all the roads, both *public* and *private*, on my estate, at my *sole expense*, without assistance from the *Government*, or *application* for the same. And at this moment, I have men employed on the public roads, particularly the main road from Kiama and Gerringong to the southward, which road was marked out by a Government surveyor.

About twelve months ago my tenantry agreed to form themselves into two municipalities for the purpose of keeping said roads in repair—one on the north side of the Shoalhaven River, to be called the Bomaderry and Broughton Creek Municipality; and the other on the south side of the said river, to be called the Numba Municipality. The usual petitions were presented to the Government, and duly published in the *Government Gazette*; but the municipalities were not proclaimed by the Government!!!

As soon as my neighbours on the south side of the river understood what had been done by my tenantry, they also petitioned to be formed into a municipality, and the people of Nowra did the same.

Both parties, however, restricted themselves to their own boundaries. These two petitions repeatedly appeared in the *Government Gazette*; but neither of the municipalities were proclaimed by the Government.

There were no counter-petitions against any of these municipalities; but a few *outsiders*, residing beyond the boundaries of the Bomaderry and Broughton Creek Municipality, made a remonstrance to the Government against that municipality being granted!!!

I have heard that it is a constant saying amongst the outsiders of my property, that no municipality would be *profitable* to them, unless the municipality included my property.

A new Municipal Bill was passed by the Colonial Parliament, and assented to on the 23rd December, 1867. The inhabitants of Bomaderry and Broughton Creek, and the district of Numba, again presented petitions to the Government under the new Act, and both petitions appeared in the *Government Gazette* of the 11th July ultimo. In the same *Gazette* there is also published another petition for a municipality, to be called the Municipality of South Shoalhaven. In this petition it appears that the people of Nowra and of what they called Central Shoalhaven have coalesced; and they describe their boundaries in such a manner as to *gobble up the whole district of Numba* and its proposed municipality, although *there is not the name of a single inhabitant of Numba in their petition*.

This is a distinct renewal of the former conspiracy against me. The person who *verifies the signatures* is a brother-in-law of the individual who formerly carried Dr. Lang's scheme into effect!!

I submit that, if, by any mistake, the district of Numba was incorporated with these petitioners, that the inhabitants of Numba, upon every principle of equity and common sense, would be entitled to separation.

These petitioners are utterly incompetent to manage such an extensive municipality.

I verily believe that none of them have ever done anything for themselves, except to spend Government money on their roads. If the district of Numba was put under their control, they would soon render a valuable district, which has been improved at an immense expense, entirely useless. They have already done it incalculable mischief.

Numba, and part of the other land to the westward and south of my boundary, is of alluvial formation, and subject to most destructive floods.

The main drain of the district is a natural drain, originally navigable, called Crookhaven Creek, which drain forms the southern boundary of the district of Numba. The residents of the south side of said creek have obstructed it in such a way as to have rendered it nearly useless.

Soon after the last flood, when the water was still covering much of the district, a Mr. Lovegrove, Clerk of Petty Sessions, and one of the petitioners anxious to gulp up Numba, who possesses certain landed property, part of the estate of Terrara, west of my boundary, came to Sydney to complain to the Hon. Mr. Byrnes of the distress of the district, on account of the obstructions of this drain (occasioned by himself and others), and to request that he would give him a sum of money, and that he would employ men to remove the obstructions!! I afterwards saw Mr. Byrnes on the subject. My proposal was, that he should use means to compel the parties who had created the obstructions in the creek to remove the same; and that I would remove every obstruction on the northern half of the creek, no matter who had occasioned them.

I could take no steps myself in the matter, as some of the Magistrates are the principal obstructors. Nothing was done. I afterwards, however, employed a gang of men to remove the obstructions on my side of the creek, in order to allow part of the stagnant water to escape.

Lately, this Mr. Lovegrove advocated a plan in the local newspaper to bring the waters, by a new channel, upon my ground, and through it to what he called Salt-pan Creek, instead of clearing out the natural drain, because it contained reeds; and he had the impudence to propose this plan to my brother.

Such

Such is the rapacity of these petitioners, that they include in their petition the island of Goodnight, in the harbour of Crookhaven, which has no possible interest with their Municipality—which island was purchased by my brother, Mr. David Berry, from the Government, for the sum of £693.

It is due to my making a new entrance to the Shoalhaven River (without any expense to the Government) that these people were enabled to enter into the river. This entrance has been, for many years, the deepest part of the Crookhaven, and has enabled the Government to sell all the public land in that locality to great advantage.

The only reward which I have received for so doing has been *abuse* and *injury*.

I humbly pray that the Government will not incorporate Numba with these outside petitioners. It would occasion me the most ruinous consequences, almost amounting to the confiscation of my property; and would involve me in ruinous and endless litigation, without public benefit or advantage to the Government.

And I humbly pray that Numba may be incorporated by itself.

I have, &c.,

ALEXR. BERRY.

Sydney, 20 August, 1868.

#### Appendix.

DURING the discussions of the Legislative Council respecting the Nowra Municipality, the Honorable Mr. Cowper, a Member of that body, asserted, in order to excite a prejudice against me, that I had obtained my property for nothing or almost nothing; and that the people of whom I complained had paid as much for their small holdings as I had done for my large possessions.

Any other man in *his* position would have consulted the documents in his own office, or the charts of the department of the Surveyor General, before venturing to make such an assertion. I, therefore, feel it necessary to state briefly how I obtained my land.

My late partner Edward Wollstonecraft and myself arrived in this Colony in the year 1819, with a cargo of merchandise, for the purpose of forming a mercantile establishment; and, as was customary in those days, from the circumstances of the Colony, brought letters to the Governor from the Secretary of State.

Governor Macquarie, without solicitation on our part, ordered each of us a grant of 2,000 acres as an inducement to remain in the Colony.

I returned to England in 1820, and again arrived in Sydney in November, 1821, in the ship that brought out Sir Thomas Brisbane, who had been appointed successor to Governor Macquarie.

Sir Thomas Brisbane received instructions to use every effort to reduce the expenditure of the Colony. This expenditure was occasioned chiefly by the maintenance of convicts, each of whom cost the Government £16 annually. This part of the expenditure could be reduced only by giving encouragement to free immigrants possessing capital to settle in the Colony, and employ the convicts.

Sir Thomas Brisbane published an ordinance that he would hereafter grant land upon the condition that the grantee should maintain one convict for ten years for every 100 acres so granted.

My partner and myself were the first to approve of these conditions, and we made an offer or tender to the Government to maintain 100 convicts free of expense to the Government, provided they gave us a grant of 10,000 acres on the Shoalhaven River in our joint names. We selected the Shoalhaven, because it was wholly unoccupied, and because all the other immigrants were flocking to the Hunter River, to Bathurst, and Goulburn.

This offer was promptly responded to. The Shoalhaven had been discovered in 1797, by Mr. Bass, a Surgeon in the Royal Navy, in a whaleboat, during the same trip in which he discovered the strait which separates Australia from Tasmania, and which bears his name. The swampy character of the district, however, and the difficult entrance to the river, caused it to remain neglected.

Our enterprise was derided by every one as ruinous.

In the first instance many settlers obtained land on the same conditions, but found these so onerous that they could not fulfil them; so that Sir Thomas Brisbane found it necessary to change the tenure of the grants.

We were the only parties who fulfilled the original conditions of the grant. We had no police but one constable paid by ourselves, and had to manage our convicts by moral influence.

Having provided a suitable vessel to commence the establishment, I proceeded to the Shoalhaven, in May, 1822. On arriving at the mouth of the river, I found that the entrance was impracticable; and the master of the vessel and his mate lost their lives in the attempt to enter.

I then proceeded to Crookhaven—two or three miles to the southward—and made a new channel of communication between that harbour and the Shoalhaven River, which, to the present day, has been the only practicable entrance to the river.

This grant was conditional, subject to the approval of the Right Honorable the Secretary of State for the Colonies.

On the arrival of Governor Darling, the successor of Sir Thomas Brisbane, the grant was still in abeyance. General Darling referred the case to Earl Bathurst, who instructed him to give us the grant.

Many people obtained larger grants at that time without any similar conditions. Such was the anxiety of the British Government to colonize New South Wales, that they gave a grant of 1,000,000 acres to an English Company, at Port Stephens, some years after we had obtained the above-mentioned land, besides a grant of 2,000 acres of the coal fields of Newcastle, containing all the coal mines opened by the Government, as well as all the "plant," and an exclusive right to work the coal fields of the Colony for many years.

After the above-named grants, all the other land which I possess was obtained by purchase from the Government, or from private individuals.

Originally, the proceeds of the Government land sales were applied to the introduction of free immigrant labourers.

About two years ago, there were 2,178 souls on my estate; and I have no doubt that the money paid by me to the Government for land would have been sufficient to have brought out as many statute immigrants as there are now adults on my estate.

I mention this fact because the Rev. Dr. Lang has asserted that my property is a vast solitude!

ALEXR. BERRY.

## No. 10.

### COUNTER-PETITION AGAINST INCORPORATION OF NUMBA.

To His Excellency the Earl of Belmore, Governor-in-Chief, and the Honorable the Executive Council of New South Wales in Council assembled, &c., &c.

WE, the undersigned landed proprietors and householders, having petitioned that South Shoalhaven be incorporated under the Municipalities Act, most respectfully protest against Numba being erected into a separate municipality; and we protest on the following grounds:—

- 1st. Because Numba is but the private property of one person—a portion of his estate; and its incorporation, as such, would be contrary to the spirit, meaning, and intent of the Act; and, with its very limited boundaries, would not be any *public* benefit.
- 2nd. Because we have been given to understand that very many, if not the majority of those who petitioned for the incorporation of Numba, are neither tenants at will, nor leaseholders, but merely occupy the farms on halves, that is, the proprietor receives one-half of all the farm produce—the whole being shipped in his vessel to his agent, and one-half of the net produce returned to the laborer; and, therefore, such occupiers are not liable to be rated.
- 3rd. Because those who have leases on the Numba Estate are specially exempt from the payment of all rates and taxes; the landlord, as we are informed, taking upon himself, by clause in each lease, the payment thereof.
- 4th. Because the boundaries of South Shoalhaven set forth in the petition for incorporation, include Numba; therefore, to incorporate the smaller portion, a mere private estate, as a separate municipality, would defeat the aim and purpose of the Municipalities Act; and would neutralize, if not wholly nullify, the advantages which the public seek to derive from the incorporation of South Shoalhaven.
- 5th. Because to constitute Numba a separate municipality would centralize the whole corporate power in one person; would establish an untoward and unconstitutional precedent to other large landowners to defeat the wise public purposes of the Municipalities Act; and would, in fact, render the Act a dead letter.

For the foregoing reasons, we very earnestly and respectfully pray that your Excellency and Honorable Council will not proclaim Numba a separate municipality:

Alfred Elyard, J.P.  
 Jas. Aldcorn, J.P.  
 J. Morton Richards, solicitor  
 Hy. Moss, storekeeper, Green Hills  
 John Monaghan, farmer, Mayfield  
 Donald McLean, farmer, Crookhaven  
 J. Green  
 John McArthur, storekeeper  
 Geo. Tory  
 David Hyam, innkeeper  
 John Holland  
 James Monaghan, farmer, Green Hills.

Petition against incorporation of Numba as a municipal district.—To the Colonial Secretary.—B.—12/10/68.

## No. 11.

## MINUTE PAPER FOR THE EXECUTIVE COUNCIL.

Colonial Secretary's Office,

Sydney, 16 October, 1868.

A PETITION from certain persons liable to be assessed for municipal taxes, and praying for incorporation as a municipal district under the name of the Municipal District of Numba, has been published in the *Government Gazette* for three months, and in a local newspaper, as required by the Municipalities Act of 1867; and a subsequent petition from certain persons eligible under the said Act, praying for incorporation as a Municipal District to be called South Shoalhaven Municipal District, and embracing the area included in the first-mentioned petition, but with extended boundaries, has also been published as required by law. But taking into consideration the fact that the latter petition was not received until five weeks after the first-mentioned had been forwarded to the Government, and that it is signed by two persons only of the number who signed the first petition, and that it cannot, therefore, be considered in the light of a counter-petition, I recommend that authority be granted for the issue of a proclamation, declaring the area described in the first petition to be a municipal district under the name of the Municipal District of Numba.

JOSEPH DOCKER.

## No. 12.

## MINUTE OF THE EXECUTIVE COUNCIL.

At Government House,

Sydney, 16 October, 1868.

PRESENT:—

His Excellency the Governor,  
The Honorable the Vice-President,  
The Honorable the Colonial Secretary,  
The Honorable the Colonial Treasurer,  
The Honorable the Secretary for Lands,  
The Honorable the Secretary for Works,  
The Honorable the Postmaster General.

[Extract.]

REFERRING to the proceedings on the 23rd June last, when the Council advised that the substance of two petitions from persons liable to be assessed for municipal taxes, 'praying to be incorporated under the designations of the Municipal District of Numba and the Municipal District of South Shoalhaven, should be published in the *Gazette*, as required by the Municipalities Act of 1867,—His Excellency the Governor now lays before them, a Minute Paper by the Honorable the Colonial Secretary, recommending that the Municipal District of Numba should be proclaimed a municipal district in terms of the said Act, and that the prayer of the petition for a municipal district to be called South Shoalhaven should be disallowed for the following reasons, viz.:—

- (1.) Because the petition for the municipal district of South Shoalhaven, embraces the area included within the boundaries of the proposed Municipal District of Numba.
- (2.) Because the first-mentioned petition was not received until five weeks after the petition for Numba Municipal District had been forwarded to the Government, and, as it is signed by only two persons who signed the Numba petition, it cannot be looked upon in the light of a counter-petition.

2. The Council, for the reasons herein stated, approve of the course recommended by the Honorable the Colonial Secretary, and accordingly advise that a proclamation be issued in terms of the Act 31st Vict. No. 12, declaring the area described in the petition from the residents at Numba to be a municipal district under the name of the Municipal District of Numba.

The Council also advise, as herein recommended, that the prayer of the petition for the incorporation of a municipal district, to be called the Municipal District of South Shoalhaven, be disallowed.

ALEX. C. BUDGE,

Clerk of the Council.

THE UNDER SECRETARY FOR LANDS to THE PRINCIPAL UNDER SECRETARY.

Under Colonial Secretary.—B.C., 22nd Oct.—M.F.

THE necessary description defining boundaries proposed in the enclosed petition for Numba, for proclamation under the Municipal Act of 1867, is enclosed. The area defined is included within the limits proposed for South Shoalhaven, the petition for which was published in *Government Gazette* No. 173, 14 July, 1868, fol. 2,074.

P. F. ADAMS,

Under Secretary for Lands.—B.C., 22 October, 1868.

S. G. Office.

*Proposed Municipality of Numba.*

County of St. Vincent, parish of Numba; commencing at the Shoalhaven River, at the eastern boundary of P. DeMestre's 1,300 acres, Terrara, being the western boundary of A. Berry's 2,320; and bounded thence on the west by that boundary, southerly, to the Crookhaven Creek; and thence on the south-west, south-east, and on the east by said creek, to its junction with the waters of the harbour of Crookhaven; thence by the said waters to the Greenwell Point Wharf; and thence by said waters to their junction with the Shoalhaven River, by an artificial entrance made upwards of forty years ago; and thence on the north by the Shoalhaven River, upwards, to the point of commencement.

## PROCLAMATION OF THE MUNICIPAL DISTRICT OF NUMBA.

By His Excellency the Right Honorable Somerset Richard, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same:

WHEREAS the Municipalities Act of 1867 provides for the constitution of a municipality, on receipt of a petition signed by not fewer than fifty persons, who would, upon incorporation, be liable to be assessed for municipal taxes in respect of property or household residence within the area proposed to be so incorporated: And whereas a petition, signed by 91 persons, liable to be so assessed upon such incorporation, has been received by the Governor, praying for a municipality to be styled the Municipal District of Numba: And whereas the substance and prayer of such petition have been duly published in the *Government Gazette*, and otherwise in accordance with the said Act: Now therefore, I, Somerset Richard, Earl of Belmore, the Governor aforesaid, in pursuance of the provisions of the said Act, and with the advice of the Executive Council, do, by this my proclamation, declare that the area hereinafter described shall be, and the same is hereby constituted a municipality, under the name and style of the Municipal District of Numba, viz.:—

County of St. Vincent, parish of Numba: Commencing at the Shoalhaven River, at the eastern boundary of P. DeMestre's 1,300 acres, Terrara, being the western boundary of A. Berry's 2,320 acres; and bounded thence on the west by that boundary, southerly, to the Crookhaven Creek; and thence on the south-west, south-east, and on the east by said creek, to its junction with the waters of the harbour of Crookhaven; thence by the said waters to the Greenwell Point Wharf; and thence by said waters to their junction with the Shoalhaven River, by an artificial entrance made upwards of forty years ago; and thence on the north by the Shoalhaven River, upwards, to the point of commencement.

Given under my Hand and the Seal of the Colony, at Government House, Sydney, this twenty-fourth day of October, in the year of our Lord one thousand eight hundred and sixty-eight, and in the thirty-second year of Her Majesty's Reign.

(L.S.) BELMORE.

By His Excellency's Command,

JOSEPH DOCKER.

GOD SAVE THE QUEEN!

## No. 19.

MESSRS. ELYARD AND ALDCORN to THE COLONIAL SECRETARY.

Shoalhaven, 17 November, 1868.

SIR,

We have the honor to acknowledge Mr. Halloran's letter of the 27th October (68-1847), in which, without assigning any reason, the Municipality of South Shoalhaven is stated to be disallowed. We have been appointed by a public meeting to remonstrate on the procedure in this case; and to request that we may be informed of the reasons why a petition signed by 162 householders should be disallowed, and a petition

petition signed by (91?), for a part of the same, should be allowed. Our petition, presented through Messrs. Roxburgh, Slade, and Spain, was declared by your office to be quite in form, with one exception, which was corrected, and the document re-sent.

No hint was given us as to a probability of refusal, nor any necessity hinted for a counter-petition to Mr. Berry's.

It seemed probable to us that our petition would be allowed, and Mr. Berry's disallowed, under the powers conferred on the Governor by the 21st clause, on the very sufficient ground of inexpediency; for it seems to us in the highest degree inexpedient to put our roads at the mercy of Mr. Berry's mayor, Mr. Berry's aldermen, Mr. Berry's rates, and, in fact, of Mr. Berry, as autocrat. We do not suppose a rate will ever be levied in his domains; and though we certainly cannot blame Mr. Berry for taking his own view of his interests, we feel that public policy was against granting his petition to the exclusion of ours.

It seems to us that there is no remedy, unless we venture to suggest that it was unconstitutional for a Ministry who had resigned four days previously, and whose hold of office, as far as new action, was therefore extinct, to proclaim a municipality at all.

But, in any case, we shall be glad to know the reasons which influence the granting the one petition, and the discourteous disallowance of the other, as a guide to our future proceedings.

Our meeting was adjourned for three months, to enable us to receive your reply, and communicate it with due publicity.

We have, &c.,

## No. 20.

### MINUTE OF THE EXECUTIVE COUNCIL.

At Government House,  
Sydney, 19 November, 1868.

#### PRESENT:

His Excellency the Governor,  
The Honorable the Colonial Treasurer,  
The Honorable the Secretary for Works,  
The Honorable the Solicitor General.

HIS Excellency the Governor lays before the Council two Minute Papers by the Honorable the Colonial Secretary, recommending that Charles Throsby Smith, Esq., J.P., the present Mayor of Wollongong, and Mr. Samuel Potter, of Numba, be appointed Returning Officers at the first election of aldermen for the Municipal Districts of North Illawarra and Numba, respectively, to be holden in the said districts, on Monday, the 28th proximo, at noon.

2. The Council advise that the said gentlemen be appointed Returning Officers at the election of aldermen for the said municipal districts respectively, in terms of the Municipalities Act of 1867.

ALEX. C. BUDGE,  
Clerk of the Council.

## No. 21.

### PROCLAMATION OF FIRST ELECTION OF MUNICIPAL DISTRICT OF NUMBA.

By His Excellency the Right Honorable Somerset Richard, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same:

WHEREAS, by a certain proclamation dated the twenty-fourth day of October, one thousand eight hundred and sixty-eight, and duly published under the provisions contained in the Municipalities Act of 1867, in a Supplement to the *Government Gazette* of the twenty-sixth October, one thousand eight hundred and sixty-eight, a certain district in the said proclamation described and named, and the limits and boundaries whereof were thereby defined, was, by the said proclamation, declared to be a municipality within the meaning and for all the purposes of the said Act, by the name and style of the Municipal District of Numba, and the electors for the time being of the said municipal district, immediately upon such publication as aforesaid, became and were a body corporate under such name and style: And whereas it is by the said Act provided and declared, that the first election of aldermen and auditors for any such newly proclaimed municipality shall take place on a day, at noon, and at a place, to be notified by the Governor, within three months after the incorporation of such municipality; and that the Returning Officer shall, at such first election, be nominated by the Governor, and shall exercise certain powers and perform certain duties in reference to such first elections as in the said Act are prescribed and defined: Now therefore, I, Somerset Richard, Earl of Belmore, as such Governor aforesaid, in pursuance of the provisions

provisions of the said Act, and with the advice of the Executive Council, do, by this my Proclamation, nominate Samuel Potter, of Numba, Esquire, to be the first Returning Officer of the said Municipal District: And I do hereby notify that the said first election shall take place at noon, on Monday, the twenty-eighth day of December instant, in the building known as the Assembly Room, situated in the said Municipal District.

Given under my Hand and Seal, at Throsby Park, this seventh day of December, in the year of our Lord one thousand eight hundred and sixty-eight, and in the thirty-second year of Her Majesty's Reign.

BELMORE, (L.S.)

By His Excellency's Command,

JOHN ROBERTSON.

GOD SAVE THE QUEEN!

## No. 22.

THE PRINCIPAL UNDER SECRETARY to S. POTTER, Esq.

Colonial Secretary's Office,  
Sydney, 8 December, 1868.

SIR,

Referring to the proclamation contained in the supplementary *Government Gazette* of the 26th October last, constituting the Municipal District of Numba, a copy of which is transmitted herewith for your information—I am directed by the Colonial Secretary to inform you, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint you to be Returning Officer for the said Municipal District, for the first election of aldermen and auditors.

2. You will perceive by the enclosed copy of a proclamation to be published in a supplementary *Government Gazette* of to-morrow, that the election is fixed to take place on the 28th instant, in the Assembly Rooms, Numba.

I have, &c.,

HENRY HALLORAN.

## No. 23.

THE PRINCIPAL UNDER SECRETARY to MESSRS. ELYARD AND ALDCORN, J.P's.

Colonial Secretary's Office,  
Sydney, 19 January, 1869.

GENTLEMEN,

With reference to your letter of the 17th November last, remonstrating against the rejection by the late Government of a petition for a municipality intended to be styled the South Shoalhaven Municipal District, whilst an application for a municipality at Numba was acceded to—I am directed by the Colonial Secretary to state, that, even if there were any force in the objection raised by you as to the legal power of a Ministry to act in matters like this, after having tendered their resignation of office, and before the date of the Governor's acceptance thereof, it would not apply to the present case, as the Numba petition was recommended and submitted to the Executive Council on the 16th October last, and confirmed by His Excellency and the Council on the 19th of the same month, while the late Government's submission of resignation took place on or about the 20th or 21st. However, even if it were not so, their legal power to act was, Mr. Robertson thinks, unquestionable.

2. I am further instructed to transmit herewith, for the information of yourselves and of others concerned, a copy of the Minute Paper for, and the Minute of, the Executive Council relative to the creation of the Numba Municipal District, and the disallowance of the South Shoalhaven petition.

I have, &c.,

HENRY HALLORAN.

1868-9.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## SEWERAGE AND WATER SUPPLY.

(TWELFTH ANNUAL REPORT OF MUNICIPAL COUNCIL—1868.)

Presented to Parliament, pursuant to Act 20 Vic., No. 36, sec. 75.

*TWELFTH ANNUAL REPORT of the Municipal Council of Sydney, of their  
Proceedings under the Water and Sewerage Acts.*

THE Municipal Council of the City of Sydney have the honor to submit, for the information of the Parliament of New South Wales, the following Report of their proceedings under the Water and Sewerage Acts, from the 1st January to the 31st December, 1868, together with Statements of the Receipts and Expenditure for the same period.

## WATER.

Two of the engines at Botany have continued to work day and night throughout the year, excepting Sundays, and when signals have been made that the high and low service reservoirs were full. The stoppages on this account, for ten months, occurred on four or five days in every week, varying from two to eleven hours each stoppage, and amounting altogether to fifty-two days, exclusive of Sundays. In the months of November and December, the engines were stopped once or twice only in each week; and in December, one or two of the engines had to work on Sundays. Throughout the year, no more than two engines were employed in pumping at the same time; and it is supposed, from the sudden large increase in the quantity of water registered by the counters as having been pumped in between the 28th November and the 5th December, that one of the pumps was not doing its proper work during that time.

The quantity of water pumped into Sydney and its suburbs, from Botany, during the year, was (according to the register kept at the engine-house) twelve hundred and twenty-two millions, five hundred and forty thousand, two hundred and seventy-two (1,222,540,272) gallons, being about 267 millions more than was recorded for the year 1867.

It may be advisable to state that the quantity of rain which fell in the neighbourhood of Sydney, during the year (as registered at the Sydney Observatory), was 43.64 inches, of which quantity 19.82 inches fell in the months of January and February. The average of the rainfall of the previous ten years was 49.97 inches.

The arrangement of shutting off the supply from the reservoirs during the night-time was not resorted to during the year. The operation of dams Nos. 4, 5, and 6, and the upper mill-pond, which was deepened and completed this year, has, by retaining on the swamp the water which would otherwise have run into the sea, so supplemented the Lachlan stream as to render it unnecessary to limit the supply to the day-time. These dams have done good service during the year, and are in excellent order; and preparations are now being made for the construction of additional dams at the upper part of the stream.

During the heavy rains in the month of February, serious damage was done to the unfinished dams Nos. 1, 2 and 3, in consequence, as it was afterwards discovered, of the sluices having been kept closed instead of open. Preparations are now being made for their repair.

Contracts for the supply of 3, 4, 6, 9 and 12-inch pipes from England,—for the repair of boilers Nos. 4 and 5,—and for the supply of coals, castings, stores, &c.,—have been satisfactorily carried out.

The quantities of new mains laid during the year are detailed in Appendix A. It will be seen that the aggregate length is seven and three-quarter miles, about two and three-quarter miles of which have been laid in the suburbs.

The total length of mains laid down since the year 1858 amounts to upwards of seventy-two miles—forty-nine and a half miles in the city, and twelve and a half miles in the suburbs.

#### SEWERAGE.

The main sewers in the city, constructed under the Sewerage Act, have been in excellent condition throughout the year.

New sewers have been constructed in the undermentioned localities, viz. :—

*Woolloomooloo*.—About 1,540 feet lineal of 6-feet oviform, from William-street, along Sir John Young Road, to Palmer-street.

*New Market-lane*.—A 6-feet oviform from Elizabeth-street to Goulburn-street, a distance of 450 feet lineal.

*Buckingham-street*.—A 3-feet oviform to Little Buckingham-street, about 115 feet lineal.

*Prince Alfred Park*.—About 110 feet lineal of 3-feet oviform.

In the *Valley* from *Brisbane-street* to *Riley-street*.—About 670 feet of 4-feet 6-inch oviform, and 353 feet of 3-feet oviform.

Stoneware pipe drains, of the sizes and lengths described, have been laid in the localities enumerated in Schedule B.

House connections have been made during the year to the number of 625; the total number of branch drains to the main sewers at the end of 1868 being 2,737.

#### FINANCIAL.

Abstracts of the Receipts and Expenditure, in connection with the Water and Sewerage Works for the year, duly certified by the City Auditors, is appended hereto.

CHAS. MOORE,  
Mayor.

Adopted by the Municipal Council of Sydney, this ninth day of March, A.D. 1869.

CHAS. H. WOOLCOTT,  
Town Clerk.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## SYDNEY INFIRMARY BUILDINGS.

(CORRESPONDENCE RESPECTING APPLICATION FOR GRANT OF SITE OF.)

*Ordered by the Legislative Assembly to be Printed, 13 October, 1868.*

THE UNDER SECRETARY TO THE DEPUTATION FROM THE SYDNEY INFIRMARY.

Colonial Secretary's Office,  
Sydney, 22 September, 1868.

GENTLEMEN,

With reference to the interview which you recently had with the Colonial Secretary, in regard to the Infirmary buildings, I am directed by the Attorney General to inform you that the Government have had under their consideration the application made on behalf of the Committee of the Sydney Infirmary for a grant of the land in Macquarie-street on which the Infirmary buildings stand. Previously to 1848 the Committee of the Infirmary occupied, with the permission of the Government, the building now used as a Branch of the Royal Mint. In September in that year, that building being required for Military purposes, the Committee gave it up to the Government, and were then let into possession of the adjacent building, which down to that time had been used as a Convict Hospital. The Committee have continued to occupy that Hospital as an Infirmary to the present time.

2. The Government, in 1847, intimated to the Committee their willingness (if the Home Government approved) to grant to them the buildings then used as an Infirmary, with half the ground between those buildings and the Domain; and on the Committee taking possession of the present buildings, the Government in like manner expressed their willingness to grant to them the land on which these last-mentioned buildings are erected. Since that time, no further correspondence has taken place between the Committee and the Government in reference to this matter.

3. From 1848 to the present time the Infirmary has been supported chiefly by funds voted by the Legislature; the amount of such votes in the twenty years, independently of many thousands of pounds voted for building purposes, being £66,832—the private voluntary contributions not exceeding, it is believed, £24,000.

4. Under these circumstances, I am instructed to state that the Government cannot regard the Infirmary otherwise than as a public institution, partially aided by private contributions, and they therefore do not think that they would be justified in complying with the request which has been made. They are of opinion that the Committee have no just claim upon the Government for the grant which they ask for, and further, that the public interests will be best promoted by retaining the land in question in the hands and under the control of the Government as public property.

5. In making this communication, I am desired to add that the Government have no intention to propose any change in the management of the institution, which, so far as they are concerned, will be carried on as heretofore.

I have, &amp;c.,

W. GOODMAN.  
(For the Under Secretary.)

THE PRESIDENT OF THE SYDNEY INFIRMARY to THE HONORABLE THE ATTORNEY GENERAL.

Sydney Infirmary and Dispensary,  
1 October, 1868.

SIR,

I have the honor to acknowledge the receipt of Mr. Goodman's letter of 22nd ult., written by your direction, on the subject of the grant claimed by the Board of the Sydney Infirmary of the land and premises in its present occupation, informing them "that they have no just claims upon the Government for the grant which they ask for, and that the Infirmary cannot be regarded by it otherwise than as a public institution."

On receipt of this letter, I lost no time in summoning a special meeting of the Board of Directors of the Infirmary, to consider the very important questions which it has raised on the points referred to; and I am requested by them to bring under your notice a succinct narrative of the circumstances under which the buildings and land now occupied by the Sydney Infirmary, and of which *undisputed and undisturbed possession* has been held during the last twenty years, were delivered over to their predecessors—the Board feeling assured, from the terms of the letter under reply, that many of the particulars connected therewith must have escaped the notice of the Government when they arrived at the conclusions above referred to.

As early as the year 1839, application was made by the Committee of the Sydney Dispensary for a grant of the South Wing of the General Hospital, for the purposes of the Dispensary; and on the 23rd April, 1843, formal delivery of the building was given to the Committee, who, in their Report for 1845, observe—"A long correspondence for a suitable site has terminated, through the kind support of His Excellency, in the grant, by the Home Government, of the South Wing of the Hospital."

On the 2nd February, 1847, on application being made to the Government for funds for effecting some necessary repairs to these premises, the Colonial Secretary wrote to the Rev. J. M'Garvie, the Secretary of the Sydney Infirmary and Dispensary, refusing such application, but adding—

"The Governor has, however, been pleased to sanction the issue of an absolute grant for the extent of land proposed by Sir George Gipps, namely, the boundary line being drawn midway between the rear of the building and the wall of the Domain; subject, however, to a question which has arisen as to the propriety of reserving a portion of the ground around the Infirmary, for the purpose of securing free admission to the buildings of Hyde Park.

"After this preliminary has been arranged, and the land measured, the deeds of grant will issue, under the Act of Council 7 Victoria, No. 23."

On the same day (2nd February, 1847), a Board Meeting was held for consideration of this letter, and a Sub-committee was appointed "to prepare a Memorial to His Excellency Sir Charles A. Fitz Roy, regarding the ground at the back of the Infirmary."

In that Memorial (a copy whereof is annexed), the Board aver that they understood, from the correspondence with the Home and Colonial Governments on this subject, that the grant solicited by them included the whole of the premises and grounds attached to the South Wing of the General Hospital; and that the usefulness, as well as the healthfulness, of the place, would be greatly impaired by the suggested curtailment, &c., &c.

To this Memorial an answer was received from the Colonial Secretary, on the 30th July, 1847, couched in the following language:—

"Having submitted this Memorial for the consideration of the Governor, I am directed to inform you that His Excellency thinks that sufficient reasons have been given by the Directors for the extension of the grant to the boundary of the Domain; the deeds will therefore be prepared, to include the whole of the ground attached to the buildings of the Infirmary, with the exception of a small space of 26 feet 7 inches in a line with the north wall of Hyde Park Barracks, to be reserved for the purpose of ensuring the free circulation of air, and access to the latter establishment."

It will be seen, from this correspondence, that a distinct promise (without reservation of any kind) was made by the Government, of an absolute grant of the South Wing of the General Hospital, being the premises now occupied by the Mint.

On the 3rd August, 1847, the Board of Directors passed the following Minute on the subject, viz.:—

"That the thanks of the Directors be tendered to His Excellency Sir Charles A. Fitz Roy, Patron of the Infirmary, for his kind and liberal compliance with the request of the Directors, by granting the land applied for in the Memorial, and for his humane consideration for the best interests of diseased destitute poor persons in Sydney and neighbourhood, for whose benefit this grant is made; and that the Secretary be requested to communicate the same to His Excellency, through the Honorable the Colonial Secretary."

Early in the year 1848, the Government became desirous of breaking up the Convict Hospital in Sydney, established in the buildings *at present* in the occupation of the *Sydney Infirmary*; and a letter was accordingly written by the Colonial Secretary, under date 17th February, 1848, to the Board of the Sydney Infirmary, requesting to be informed whether that institution could accommodate twenty-five patients of the class of free paupers then under treatment in the Convict Hospital, at the expense of the Colonial Government; and further, whether the Board would be prepared to make some permanent arrangement for the future treatment of patients of the above class, and upon what terms.

To

To this letter a reply was sent by the Secretary of the Sydney Infirmary, on the 24th February, 1848, stating that the Board regretted that, solely from want of room in the house, it was not in their power to receive twenty-five additional patients; and he enclosed resolutions upon the subject, the 3rd of which set forth—

"That in the event of the Convict Hospital being made over to the Sydney Infirmary and Dispensary, the Directors were prepared to receive free paupers, upon certain conditions; these being that the rate should vary from time to time, but should not exceed the actual expense incurred by the patient while in the house."

To this letter the Colonial Secretary replied, on the 13th March, 1848, approving of the terms upon which pauper patients were to be received, and stating "that His Excellency approves of the Convict Hospital being, subject to the approval of the Secretary of State, placed at your disposal as a Dispensary and Infirmary, on the wing of the Hospital buildings at present in your possession being given up."

On the 1st July, 1848, the Secretary of the Sydney Infirmary wrote to the Colonial Secretary, asking him when possession of the whole or any portion of the Convict Hospital could be obtained for the use of the Infirmary and Dispensary, and under what conditions His Excellency would be enabled to make a permanent grant of the same.

To this letter the Colonial Secretary replied, on the 19th July, 1848, that possession of the Convict Hospital could be given when it should be no longer required by the Medical Department; but that, as the arrangement must be subject to the approval of the Home Government, a permanent grant could not at present be promised by His Excellency, and that it must be understood that pauper patients and convicts were, as previously stipulated, to be treated in the Infirmary.

On the 18th August, 1848, the Board of Directors of the Sydney Infirmary accepted the conditional surrender of the Hospital, upon the understanding that "in the event of the grant of the Hospital and premises not being confirmed by Her Majesty's Home Government, the Directors will be at liberty to re-enter into possession of the premises they now occupy"; and on the 6th September, 1848, the Colonial Secretary, *repeating the above words*, writes—"and in reply, I am directed to inform you that His Excellency has approved of the transfer being made, on the understanding mentioned."

Accordingly, on the 13th September, 1848, the Infirmary entered into possession of the premises it now occupies, for the twofold consideration of giving up the premises, of which it had the promise of an absolute grant, and of undertaking to maintain pauper patients upon certain conditions, and *upon the distinct understanding* that, in the event of the grant of the Hospital and premises not being confirmed by the Home Government, the Directors had a right of re-entry into the South Wing of the Hospital, being the premises now occupied by the Mint.

No notice has ever been received by the Directors of the non-confirmation by the Home Government of this grant, while, by the Constitution Act, and by the Act of the Imperial Parliament 18 & 19 Vict., cap. 55, the power to fulfil the promises made by the Government of 1848 became vested, in 1855, in the Colonial Government.

Since 1848, the right of the Infirmary to the land and premises it now occupies has never been called in question; on the contrary, it has been admitted in correspondence with the Government, who being desirous, in March, 1855, of removing a boundary wall between the Mint and the Infirmary, and of giving some small portion of land to the Mint, wrote as follows:—"You will have the goodness to inform me whether the Trustees of the Infirmary are willing to appropriate the ground which is necessary for this arrangement, and have any objection to the removal of the wall, and the erection of another as proposed"; and, if any link were wanting to show the absolute right of the Infirmary to a grant of the land which it now occupies, it will be found in the fact that the local Government, in 1855, made over to the Sydney Branch of the Royal Mint the land which it now occupies, and to which, if the present decision of the Government be tenable, the Board of the Infirmary have an undoubted right, under the absolute promise made to them by order of Sir Charles Fitz Roy, as communicated in the letters of the Colonial Secretary of 2nd February and 30th July, 1847, such right having been preserved to them by the letter of the Colonial Secretary, dated 6th September, 1848, previously quoted.

In support of the decision of the Government, you further state that, from 1848 to the present time, the Infirmary has been supported *chiefly* by funds voted by the Legislature—the amounts of such votes in twenty years being £66,832, the private voluntary contributions not exceeding, it is believed, £24,000.

A careful examination of the accounts for that period shows that the Government have left entirely out of sight the arrangement entered into, and stipulated for, in the correspondence of March and September, 1848, previously alluded to, and which made it incumbent upon the Infirmary Authorities to receive pauper patients, upon condition of being reimbursed by the Government the actual cost of the maintenance of such patients.

It can be shown, indisputably, that for the twenty years I have alluded to, the Government have sent to the Infirmary, pauper patients, the cost of whose maintenance has amounted to £47,885 17s. 10d., and that, while the receipts from private sources have amounted to £45,167 10s. 7d., the total annual grants voted by Parliament in augmentation of private contributions, and in actual support of the Infirmary, do not exceed the sum of £21,950 9s. 8d., for the twenty years referred to. The latter amount is exclusive of grants for building purposes *availed of*, during the same period, to the extent of £8,432.

The

The additional accommodation which was then provided, was chiefly rendered necessary by the increased number of pauper patients admitted by order of the Government (under the stipulations made with the Authorities of the Infirmary when the present premises were handed over to them), and which freed the Government of the day from the cost of maintaining a separate hospital for their treatment. In other words, the subscriptions of private individuals and other receipts have amounted to £45,167 10s. 7d., instead of £24,000, and the votes of the Legislature in aid of such contributions to £21,950 9s. 8d., instead of £66,832, as alleged.

These votes had their origin in 1837, when it was thought desirable to supplement the subscription of private individuals to this and kindred institutions, by voting from the public purse a sum equal to such subscriptions. This rule, however, was frequently departed from, as will be evident from the Government aid to this institution having, during the twenty years referred to, not quite amounted to one-half of the contributions from private sources. I desire, however, not to be misunderstood on this point. The Directors of the Institution have been ever ready to acknowledge the munificence of the Government and the Legislature in appropriating these sums in aid of the private subscriptions at the disposal of the Board, and have regarded with the greatest satisfaction and thankfulness this wise liberality of the Parliament, as offering at once an acknowledgment of and a stimulant to the more liberal support of the general subscribers, who have devoted such large sums to the relief of the sick and needy.

I have been induced to quote the above figures, to show that the Government have fallen into an error which completely alters the complexion and the nature of the aid afforded by the Legislature, and which has doubtless influenced them in arriving at the conclusion set out in the fourth paragraph of your letter, viz.—“that the Government cannot regard the Infirmary otherwise than as a public institution partially aided by private contributions.”

In reference to this subject, I desire to state that the Sydney Dispensary was established in 1826 entirely by private charity; that it received no aid whatever from the public funds up to the year 1837; that in the year 1839 it was considered by the late Sir George Gipps in the light of a private charity, as appears from the annexed extract of his letter, written on his acceptance of the office of Patron; that in the year 1843, the Legislature of the Colony, in passing the Act 7 Vict., No. 23, “to enable the Members of a certain Institution in the Colony of New South Wales denominated the Sydney Dispensary to sue and be sued &c.” confirmed this character; that the annual election of the office-bearers by the subscribers, and the undisputed control of the management by such office-bearers, retains to it a character which the Directors would be neither willing nor justified in ceding. They consider that, whatever fault there may have been in their management of the institution, it nevertheless has been such as to have proved eminently useful to thousands of their poor and needy fellow-colonists; and they feel that, in justice to those who originated this charity, and to those who have for years contributed so largely and so liberally to its support, they are bound to uphold the character of the institution as one entirely founded and mainly supported by private charity.

Entertaining these views, it appears unnecessary for me to make any reference to the concluding paragraph of your letter, in which you intimate that the Government have no intention to propose any change in the management of the institution, which, so far as they are concerned, will be carried on as heretofore.

Under the circumstances detailed in this letter, the Board venture to hope that, on reconsideration of the subject, the Government will see no objection to an immediate issue of the grant of the land and buildings now in the occupation of the Sydney Infirmary.

I have, &c.,

E. DEAS THOMSON,

President of the Sydney Infirmary and Dispensary.

P.S.—It seems scarcely necessary to add, that the large amount voted and expended for the treatment of pauper patients admitted into the Infirmary by order of the Government, cannot be regarded in the light of a subsidy or endowment chargeable against the institution. On the contrary, it is in reimbursement of a service rendered by it to the Government and the public, and it is believed, quite as efficiently as it could be provided for in any public establishment, and at a much cheaper rate.

The patients treated in the Infirmary, moreover, enjoy the benefit, *free of any charge*, of the highest medical and surgical skill afforded by its honorary staff of physicians and surgeons.—E.D.T.

[Enclosure No. 1.]

To His Excellency Sir Charles A. Fitz Roy, Knight, Governor, &c., &c., &c.

The Memorial of the Board of Directors of the Sydney Infirmary and Dispensary,—

Showeth :—

That Memorialists beg to address your Excellency in reference to the issue of an absolute grant for the extent of land between Macquarie-street and the wall of the Domain, which they consider indispensable for the benefit of that institution.

That Memorialists, in their correspondence with the Home and Colonial Governments on this subject, understood that the grant solicited by them included the whole of the premises and grounds attached to the south wing of the General Hospital; nor do they observe that any reservation of any portion of the back premises is made by the Right Honorable the Secretary of State or the Lords of the Treasury.

That

That Memorialists would observe that if such reservation is made, and a line of building towards the Domain erected, whose back premises may abut on the Infirmary grounds, the usefulness, as well as the healthfulness, of the place will be greatly impaired, as the remaining space would not leave room for exercise to the convalescent patients, or for airing or drying clothing and bedding.

That Memorialists are apprehensive that the establishment would fail of success by a diminution of that public support which has attended the united institutions of the Sydney Infirmary and Dispensary; and that, probably, the maintenance of the afflicted poor would again fall upon the Government.

Memorialists would further observe that their wards are generally full, 63 patients being now in the house; that they intend to build an operating room, with an apartment for a surgical and medical museum; and also to extend the infirmary to meet the wants of the town population, to classify the inmates, particularly syphilitic, deranged, and female patients.

That Memorialists have always had it in view to make these united institutions the nucleus of a Medical School for educating young persons in the Colony to the Medical Profession, but should this reservation be made, they fear this purpose must be abandoned.

Your Memorialists would therefore pray, that your Excellency would include in the contemplated grant, the whole of the ground at present attached to the building occupied by the Sydney Infirmary.

[Enclosure No. 2.]

EXTRACT of a letter from His Excellency Sir George Gipps to the Board of Directors of the Sydney Dispensary.

Few things are of more importance to a young community than an early attention to institutions of benevolence, and to the principles on which they ought to be conducted. As a general rule, nothing can, I believe, be laid down more safely, than that they are best managed by Committees elected by the subscribers out of their own body; a rule which I am happy to find you have adopted, and which certainly is well justified by the rapid progress which your successive Annual Reports prove your institution to be making.

Expensive endowments, whether given by the State, or derived from the munificence of individuals, are rarely managed with economy; and an indifference to waste is but too prevalent, even where the entire funds, for any purpose whatsoever, are annually supplied from the public purse. In an economical point of view even, it is therefore desirable that the support and management of such institutions should principally devolve on the inhabitants of the districts for whose benefit they are intended; but how much more so is it, when we regard them in a higher point of view, or in relation to their influence on the hearts and affections of men; for all, I think, will allow, that charity, when dispensed by the officers of Government, can never be of that doubly blessed nature, which, like mercy, blesteth him who gives no less than him who takes.

THE ATTORNEY GENERAL to THE PRESIDENT OF THE SYDNEY INFIRMARY.

Attorney General's Office,  
3 October, 1868.

SIR,

I have the honor to acknowledge the receipt of your letter of the 1st instant, and to state in reply, that I am unable to see any reason to justify the Government in arriving at a different conclusion from that which has been already communicated to the Committee of the Infirmary, in reference to the application for a grant of the Infirmary buildings in Macquarie-street.

The Government were aware, when they sent that communication, of the promise which a former Government had made to the Committee of such a grant as that now asked for; but notwithstanding such promise, they could not then, and they do not now, recognize the propriety of issuing it. They regard the promise, not only of the grant now claimed, but also the previous promise of the grant of the building used as a Branch of the Royal Mint, as having been made improvidently and without any consideration. The subscribers to the "Sydney Dispensary" never, so far as the Government are aware, either raised, or bound themselves to raise, any fund which could be made available for the purpose of enforcing the performance of the condition in reference to free paupers, on which the second grant was promised; nor had the Government any tangible guarantee, when the first grant was promised, that the Infirmary would continue to be kept up. From the commencement of the institution its members have been merely voluntary subscribers, who might at any moment withdraw their support.

A "Society" such as this, without permanent funds, without fixed members, without any provision for compulsory contributions, dependent altogether, except as to a few legacies and donations, upon casual subscriptions, and such aid as Parliament might from time to time grant,—liable at any moment to be extinguished for want of funds,—is not, in the opinion of the present Government, a Society of such a character as to make it right or expedient that a valuable public building should be granted to it in the manner contemplated. Neither can the Government see that a promise to a Society, which itself is either under no obligation, or not in a position to guarantee the performance of any obligation, is in any way binding, or can be regarded as anything but *nudum pactum*. The power conceded to the Society to use the buildings in question for the purposes for which they were handed over, so long as they have funds at their disposal, is one thing—the grant in fee of these buildings to the Society is another. With the use of the buildings for the purposes of an Infirmary the Government have no desire or intention to interfere, but they do object to granting them in perpetuity to a body which may at any time cease to be able, from want of means, to afford the "medical and surgical relief to poor and destitute persons" for which they were organized, and for which the buildings were entrusted to them. It is the interest of the public that the Infirmary should be kept up, but it is also the interest of the public that the land on which the buildings stand should remain public property.

It seems to the Government, that you are altogether in error in your estimate of the amount of aid afforded by Parliament to the Infirmary. The sum stated in the communication to which your letter is a reply was taken from the Appropriation Acts for the years referred to. There is no reason for drawing any distinction between the sums voted as contributions and those voted for the maintenance of pauper patients. In either case, the money was contributed for the maintenance and treatment of the persons for whom the Infirmary was kept up. In the preamble of the Act to which you have referred, the object of the Society is stated to be "to afford medical and surgical relief to poor and destitute persons," and there can be no doubt that pauper patients are included under these designations. Moreover, it was stipulated, when the buildings were handed over, that pauper patients should be received in it. Such being the uses to which, in the contemplation of the Society, the Government, and the Legislature, these buildings were to be and have been all along applied, it cannot be contended that the funds granted in aid of pauper patients are not granted in aid of the institution. The institution affords relief to a variety of patients, some of whom are paupers, some of whom are not, but all whom are regularly there; and the cost of their maintenance and treatment amounts to a total sum, the greater part of which has, in each year for the last twenty years, been provided by the Legislature. Without this aid, the Infirmary would not be able to provide for more than a third of the patients now under its care, and the buildings would be too large for its requirements.

The Government are still of opinion that the Infirmary, although in its inception and its management a private, is in substance a public institution; but not a public institution such as that they can interfere with it in the same manner as with a public department. The medical treatment of "poor and destitute persons" was originally undertaken by those who thought fit to subscribe to the Infirmary; but in order that a greater number of persons might be relieved than private subscriptions would allow, the Government were asked to give the use of a costly building, and the Legislature to afford a large annual vote. The Government and the Legislature, by complying with these requests, have become, and for twenty years have been, the chief maintainers of the institution; and consequently, the Infirmary, whatever its origin and management, cannot be regarded otherwise than as a public institution, and one in the maintenance of which the Government and Parliament are at all times likely to take the deepest interest.

The gentlemen who founded this excellent institution, those who manage it, and those who have for so many years given to it their time, thought, money, and professional skill, are well entitled to the gratitude of the public. The assistance which has heretofore been given, the Government are willing, so far as they are concerned, to continue. The buildings which the Committee occupy they have no intention of withdrawing from them, but the grant of the land on which those buildings are erected they feel themselves compelled to refuse.

I have, &c.,  
JAMES MARTIN.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

SYDNEY INFIRMARY BUILDINGS.

(FURTHER CORRESPONDENCE RESPECTING APPLICATION FOR GRANT OF SITE OF.)

*Ordered by the Legislative Assembly to be Printed, 19 January, 1869.*

THE PRESIDENT OF THE SYDNEY INFIRMARY to THE HON. THE ATTORNEY GENERAL.

Sydney Infirmary,  
19 October, 1868.

SIR,

I have the honor to acknowledge the receipt of your letter of the 3rd instant, stating that you are "unable to see any reason to justify the Government in arriving at any other conclusion from that which has already been communicated to the Committee in reference to the application for a grant of the Infirmary Buildings in Macquarie Street."

Having submitted your letter to the Board of Directors of the Infirmary, I have the honor to transmit to you a copy of the Minutes of proceedings, unanimously adopted this day by the Board, protesting against the decision of the Government in refusing to issue a Deed of Grant for the land now occupied by the Sydney Infirmary, and stating the reasons which have induced the Board to make this protest.

I have, &c.,  
E. DEAS THOMSON,  
President of the Sydney Infirmary.

THE President laid before the Board a letter from the Honorable the Attorney General, bearing date the 3rd October, 1868, and stating that he "is unable to see any reason to justify the Government in arriving at any other conclusion from that which has already been communicated to the Committee in reference to the application for a grant of the Infirmary Buildings in Macquarie-street."

The Board having maturely considered this decision and the grounds upon which it is based, deem it their duty, in the interests of the important and valuable institution which they represent, to make the following observations.

The Attorney General states that "the Government were aware, when they sent that communication, of a promise which a former Government had made to the Committee of such a grant as that now asked for; but, notwithstanding such promise, they could not then, and they do not now recognize the propriety of issuing it. They regard not only the promise of the grant now claimed, but also of the previous promise of the building used as a Branch of the Royal Mint, as having been made improvidently and without any consideration."

The Board feel constrained to observe that they have received this intimation of the decision of the Government with the utmost surprise. They conscientiously believe that no precedent can be found of any Government under the British Crown having refused to fulfil a solemn promise made for a lawful purpose under lawful authority, nor can they admit that the grounds of the refusal can be sustained by the plain facts of the case.

It cannot be said with truth that the promise was made improvidently and without consideration, when it can be shown that several thousand pauper patients, admitted by order of the Government, have been annually treated in the Infirmary, in conformity with the stipulation made with the Directors, when the grant was promised to them; and that upwards of £45,000 has, during the last twenty years, been raised by voluntary donations and subscriptions for the support of patients admitted by order of

the subscribers. The Attorney General proceeds to observe "that the subscribers to the Sydney Dispensary never, so far as Government are aware, either raised, or bound themselves to raise, any fund which could be made available for the purpose of enforcing performance of the conditions in reference to free paupers on which the second grant was promised; nor had the Government any tangible guarantee, when the first grant was promised, that the Infirmary would continue to be kept up. From the commencement of the Institution, its members have been merely voluntary subscribers, who might, at any moment withdraw their support."

In answer to these objections, the Board deem it sufficient to observe that, during the twenty years which have elapsed since the promise was made, no less a sum than £45,167 10s. 7d. has been raised by voluntary donations and contributions, and that there can be no reason to doubt that an Institution which has thus been nobly supported during so long a period will continue to receive, as heretofore, the like pecuniary aid from the public.

To urge such a reason as that advanced by the Government in refusing the grant, appears to the Board to be calculated to affect the interests, not only of this Institution, but of every other charity in the Colony, not one of which, it is believed, is supported otherwise than by voluntary donations and subscriptions, supplemented, in certain cases, it is admitted, by Parliamentary grants. It further appears to the Board that the very best guarantee which it could give to the Government for the performance of the condition in reference to free paupers has been its punctual and honorable fulfilment of it for a period of upwards of twenty years; and they are at a loss to conceive why the Government should raise a doubt as to their ability to continue to discharge the obligations under which they were promised the grant.

The Attorney General further states that "a Society such as this, without permanent funds, without fixed members, without any provision for compulsory contribution, dependent altogether (except as to a few legacies and donations) upon casual subscriptions, and such as Parliament might from time to time grant, liable at any moment to be extinguished for want of funds, is not, in the opinion of the present Government, a society of such a character as to make it right or expedient that a valuable public building should be granted to it in the manner contemplated."

It appears to the Board that, in making these observations, the Government have entirely overlooked the fact that the Sydney Dispensary obtained a Legislative recognition and status under the provisions of the Act of the Government and Council 7th Victoria, No. 23—that by clauses of that statute the same were extended to the Society, at all times during its continuance, whether composed of the same or any other members—and that by clause 5 the provisions of the Act were made applicable to the Institution if it should establish a General Hospital for the reception and relief of sick patients. The Board assert, without fear of contradiction, that no such plea for refusing to issue a Deed of Grant to a charitable institution has ever before been urged in this or any other British Possession. On the contrary, it will be found, as far as this Colony is concerned, that the Benevolent Society and Society for the Relief of Destitute Children, which are supported by such subscriptions and Parliamentary grants, precisely in the same manner as the Sydney Infirmary, have each received valuable grants of land from the Crown, as well as large sums from the public funds, for the erection of buildings. The Board consider it peculiarly hard that the Institution which they represent, and which, perhaps more than any other, has for many long years rendered such valuable services to the Government, in the medical and surgical care and treatment of their pauper patients, should be singled out for the establishment of so objectionable and impolitic a precedent.

The Attorney General goes on to say—"Neither can the Government see that a promise to a Society which itself is either under no obligation or not in a position to guarantee the performance of any obligation, is in any way binding, or anything but a *nudum factum*."

The Board must be allowed respectfully to state that they cannot for a moment admit the justice or propriety of refusing to fulfil an engagement solemnly entered into upon such grounds as are here urged. On the contrary, as the Institution has faithfully performed the condition upon which the promise was made, it is no more than justice to require that the Government on their part, should at once recognize their claim.

The Attorney General further observes that "It seems to the Government that the President was in error in his estimate of the amount of aid afforded by Parliament to the Infirmary." The sum stated in the communication to which his letter is a reply was taken from the Appropriation Acts for the years referred to. "There is no reason," the Attorney General further observes, "for drawing any distinction between the sums voted as contributions and those voted for pauper patients. In either case the money was contributed for the maintenance and treatment of the persons for whom the Infirmary was kept up."

The Board do not admit that there was any error in the President's statement. The figures quoted by him were carefully abstracted from the accounts kept by the Infirmary. They shew the following result, namely, that while the private contributions towards the support of the Infirmary amounted in the last twenty years to £45,167 10s. 7d., the votes of the Legislature in aid of such contributions amounted only to £21,950 9s. 8d. It is not denied that the further sum of £47,885 17s. 10d. was voted by Parliament for the maintenance and treatment of pauper patients admitted into the Infirmary by order of the Government; but, as already stated in the President's letter of the 1st instant, this amount cannot with any show of justice be made chargeable against the Institution, but is simply as reimbursement of a service rendered in conformity with the stipulation made with the Board when the Deed of Grant was promised

promised. This service the Board confidently asserts has been performed quite as efficiently as it could have been provided for in any public establishment, and at a very much cheaper rate.

The Board consider that they are fully justified in asserting that the valuable services thus rendered to the Government and the public give a strength to their claim which cannot in justice be ignored.

The Board do not consider it necessary to make any reply to the other portions of the Attorney General's letter. They are in fact substantially answered in the foregoing observations.

The Board cannot conclude this Minute without most respectfully, but firmly, protesting against the refusal of the Government to fulfil the promise made to their predecessors in 1848, and upon the faith of which they have held undisputed and undisturbed possession for the last twenty years of the land on which the present Infirmary buildings stand.

---

THE ATTORNEY GENERAL to THE PRESIDENT OF THE SYDNEY INFIRMARY.

Attorney General's Office,  
20th October, 1868.

SIR,

I do myself the honor to acknowledge the receipt of your letter of yesterday's date. I have nothing to add to the reasons already given for the decision arrived at in reference to the grant asked for by the Committee of the Sydney Infirmary.

I have, &c.,

JAMES MARTIN.

**PUBLIC CHARITABLE INSTITUTIONS.**

(PROGRESS REPORT OF INSPECTOR OF CHARITIES, RESPECTING CERTAIN.)

---

Presented to Parliament, pursuant to Act 30 Vict., No. 19.

---

THE INSPECTOR OF PUBLIC CHARITIES to THE PRINCIPAL UNDER SECRETARY, *forwarding*  
 PROGRESS REPORT on various Charitable Institutions aided or supported by the Govern-  
 ment of New South Wales.

Sydney, 12 October, 1868.

SIR,

I have the honor to forward, for the information of the Honorable the Colonial Secretary, a Progress Report in detail, on some of the Charitable Institutions which I have inspected since my appointment in April last.

In the Appendix marked A, I have shewn the total cost for maintenance of each institution, with the yearly and daily rate for the support of the inmates during the year 1867; and I have given such information respecting these establishments as I consider may, at any future time, be useful as a record, and made such suggestions as I think may be beneficial; but owing to the different manner in which the receipts and expenditures are conducted in the several institutions, and the expenditure being defrayed partly from the votes of the establishment, and partly from general votes, or votes of other departments, I find it is impracticable to prepare statistics in any more detailed form than I have shewn in my return.

On some institutions I have already furnished reports; it will, therefore, be hardly necessary for me again to include such in a general report; but I will at an early date furnish a further report on those establishments I have inspected, and others not yet visited by me.

I have, &c.,

R. C. WALKER,

Inspector of Public Charities.

---

## THE SYDNEY INFIRMARY.

This institution originated in the formation of a Dispensary, as early as 1826, which was carried on at a building in Pitt-street, until June, 1845; and, from the time of opening, up to 1836; it was supported entirely by private contributions; but in that year the sum of £155 10s. 10d. was granted in aid of the institution by the Government, and an amount equal to the annual subscriptions raised has been allowed each successive year.

In July, 1845, the Infirmary was established in Macquarie-street, in the building now occupied as a Branch of the Royal Mint; where it was continued until the 13th September, 1848; and then removed to the present institution, which was erected in 1814, under Governor Macquarie, and used for a Convict Hospital.

On the removal of the establishment to the present building, an agreement was entered into by the then committee to receive from the Government all pauper patients, who were to be paid for at such rate only as would cover the expense incurred on their account. The amount paid to the Convict Hospital was 1s. per head per diem, but the Infirmary was allowed, for part of 1848, and for 1849, 1s. 6d. per head, and for 1850, 1s. 3d.; in 1851, 1s.; 1852, 1s. 3d.; 1853 to 1855, 1s. 6d.; and 1856 to 1857, 1s. 10d. during the time the patients remained in the Infirmary.

I find the following sums have been paid over by the Government to the Infirmary, from 1848 to 1867 inclusive, as under:—

	£	s.	d.
In aid of the institution...	23,677	9	8
For the support of paupers...	48,211	13	2
Medical treatment to immigrants...	1,518	11	8
Patients from the Benevolent Asylum...	305	13	1
Buildings, alterations, and repairs, &c...	14,244	5	9
Total	£87,957	13	4

The amount granted on the Estimates for this year is, £2,000 in aid of the institution, £4,000 for pauper patients, and £5,000 for extensions, &c., to buildings.

By the rules of the Sydney Infirmary, it combines in its plan and objects the three-fold purposes of—

- “1st. An asylum for in-patients afflicted with acute diseases, whereby medical and surgical advice and medicines are gratuitously administered to such persons as are unable to procure the same at their own expense, and are recommended by the governors of the institution.
- “2nd. A dispensary for providing advice and medicines for the less urgent cases as out-patients.
- “3rd. Providing, at their own habitations, advice and medicines for patients within a limited distance of the hospital who may be too ill to attend as out-patients.”

There are now two paid medical officers of the institution, who are always in attendance; five hon. physicians, and five hon. surgeons, who give their services for the in-door patients; and six paid district surgeons, who receive from £60 to £70 per annum for attending to the out-door patients.

Accident cases are received at all times without question, but in ordinary cases it is necessary that the patient be either recommended by a qualified member of the society, or that an order for admission be obtained from the Honorable Colonial Secretary. Occasionally, sailors and other patients who may be in a position to contribute towards their support while they are inmates, are admitted by the committee, when they can be received without excluding more needy patients; but it appears to me that there are patients admitted free who could well afford to contribute to the institution, and yet do not do so; and some of those who go in as paupers really are not in destitute circumstances. Those persons who recommend patients to the Government for orders of admission should, therefore, in justice to the institution, make every inquiry before giving the recommendation. An instance occurred, not long since, of a man who was sent as a pauper, having in his possession £300, when his property and clothes came to be taken from him before entering the Infirmary.

It is a rule that all property belonging to those who enter the establishment be handed over to the superintendent, who makes an entry in a book kept for the purpose, and receipts are taken from the patients when delivered up to them on leaving. Any small sum that may remain from patients who die, is paid into a separate fund called the “Samaritan Fund,” from which destitute patients are assisted when leaving the institution.

The plan adopted for admitting patients is, all applications or orders are presented to the superintendent, and he issues an order for one of the medical officers to examine the patient, who admits, or rejects, on the merits of the case *only*, without knowing by whom they may be recommended. This plan has been lately adopted in order to prevent preference being shewn to any particular subscriber.

In 1858, a new wing was added to the south-east end of the old hospital, which affords accommodation for about seventy beds; and the establishment, as now arranged, is capable, when crowded, of holding 200 beds. There are six wards in the old, and six in

in the new building. A great oversight appears, however, to have been made when erecting this new wing, in not providing suitable closets, bath-rooms, and lavatories; and alterations have been made this year, at considerable expense, to provide every suitable convenience in this respect. Some of the internal walls, forming small, close wards, have also been removed, and a new staircase built outside the wing, by which a large space previously occupied by the stairs will now be made available, the wards will obtain better ventilation, and be freed from any unpleasant consequences arising from the previous bad arrangement of the closets.

In the old building there is great need of similar alterations, additions, and repairs being carried out, in order to meet the requirements and daily increasing demands upon this important institution.

Considerable benefit has been conferred upon the institution, through the assistance afforded by the Government in providing the services of a Lady Superintendent and five trained nurses, who were selected in England by Miss Florence Nightingale. The advantages and economy in having a staff of this kind are not perceptible so much to casual visitors as felt in the institution itself, both by the manner in which they can administer to the comforts of the patients, and the saving that is effected, by having experienced persons who understand how to apply the various articles and comforts ordered for the use of the patients.

A new, handsome brick building is now nearly completed, which has been erected at the north end of the grounds, and is styled the Nightingale Wing. It is to be appropriated entirely for the use of the Lady Superintendent, the Sisters, and all the attendants of the institution. The cost of this structure will be about £7,000, and is provided for by votes of Parliament. The accommodation is very superior, and the building is arranged with all the latest modern improvements for similar establishments. When the officers and attendants are removed to this new wing, it will give room for thirty more beds in the old building, as the space now occupied as their quarters will be appropriated for the use of patients.

There are two dispensers kept at the dispensary of the institution, who make up all the medicine ordered by the medical officers, and the drugs are now imported from England, by which a considerable saving will be effected this year.

All the provisions supplied are of the best kind, and a check is established with the storekeeper, upon the issue of articles from the store, on the diet orders of the medical officers. Every care and attention appears to be bestowed in the cooking and supplying the food to the patients, and great attention has been paid to the dietary department since the arrival of the Lady Superintendent; but the kitchen and out-houses are in a wretched condition, and, as well as the store-room, are not at all adapted for such an institution. It is proposed to pull these down, and, pending some new arrangement, to appropriate a portion of the basement floor of the Nightingale Wing for the purpose.

The number of patients received in the Infirmary during the year 1867 was 1,708. Of these, 294 were accident and urgent cases; 177 remained in hospital from the previous year, and the deaths numbered 202, or at the rate of 10·716 per cent. on the total admissions. The number in the building on the last day of the year was 187.

Under the district surgeons in connection with the Dispensary, the total attendances on 3,926 out-door patients—supplied with medicine and medical advice—numbered 4,896, and of that number, 1,095 were visits made at their own homes.

The admissions are not confined to the inhabitants of the city and suburbs only, as patients are received from all parts of the country.

The daily average number of patients in the Infirmary, during the year 1867, appears from the returns to be 185½, and the net expenditure, £8,842 14s. 10d., which makes the average yearly cost for each in-patient at £47 13s. 4·750d., or about 2s. 7·344d. a day per head. The cost for out-door patients is shewn as £1,127 15s. 9d., or 4s. 7·284d. for each attendance, which includes the cost of medicine.

#### THE PROTESTANT ORPHAN SCHOOL AT PARRAMATTA.

An orphan institution, it appears, was established in the early days of the Colony—when a penal settlement—by some of the charitably disposed persons, in consequence of many children being left without relations or friends able to maintain and educate them, and the aid of the Government was solicited. The first support given by the Government towards this object was on the 15th August, 1803, when a grant of 12,300 acres of land in the District of Cabramatta was made to Mrs. A. J. King (wife of Governor King) Mrs. E. Paterson, the Rev. Samuel Marsden, Thomas Jamieson, John Harris, and John Palmer, Esquires, the then Committee for conducting a Female Orphan Institution of the settlements of New South Wales.

Another grant was made on the 1st May, 1804, of 2 acres 17 rods, in the city of Sydney, at the corner of Hunter and George Streets. On the 10th August, 1806, a further grant was given of 280 acres at Grose Farm, in the District of Petersham Hill. Buildings were erected first at Grose Farm, and afterwards on the city allotment, and at each of these places the institution was at different times carried on by the Committee of Management. Some doubts appear to have been raised as to whether these grants were so technically worded as to convey legal estates for the benefit of the institution; and

and an agreement was therefore entered into, on the 27th day of May, 1823, by the Committee of Management, to reconvey to His Majesty the grants before mentioned; and on the 2nd August, 1826, an Act was passed into law, 7 Geo. IV, No. 4, under Governor Sir Thos. Brisbane, for vesting the Orphan School Estates in the Trustees of the Clergy and School Lands of New South Wales, and for duly governing the children at school and in apprenticeship. All committees or persons were also relieved from further responsibility, upon the passing of their accounts up to the 31st December, 1823.

When the above-mentioned Act came into force, the 280 acres at Grose Farm were given up by the committee, in consideration of another grant being allowed to them, in the county of Roxburgh; and fresh conveyances were made out in the names of the trustees, the Rev. Saml. Marsden, John Palmer, and John Harris, Esquires, giving, for the benefit of the Orphan Schools, the following grants of land:—

12,300 acres in the district of Cabramatta,  
 2 acres 17 rods in town of Sydney,  
 1,000 acres in the county of Roxburgh,  
 600 acres at Cabramatta,  
 60 acres at Arthur's Hill, on the Parramatta River.

Total ..... 13,962 acres 17 rods, for which a yearly quit rent had to be paid of £14 1s.

The management and control of the Orphan Schools, from 2nd August, 1826, was placed under the Trustees of the Clergy and School Lands; but previous to this, the institution appears to have been maintained by private contributions, and any benefits arising from the grants of land given by the Government. On the 4th July, 1834, an Act was passed, 5 Wm. IV, No. 3, proclaiming the Male and Female Orphan Schools as being maintained and supported by His Majesty's Government; power being also given to appoint trustees to apprentice the children under this Act. At the time the Orphan School was first established, it appears the intention was to provide for female children only, but male children seem also to have been admitted. The orphans of soldiers, free people, children of immigrants or convicts, and children from the female factory, were taken in; all denominations being educated in the one institution.

No separate provision appears on the general Estimates of the Colony for these establishments until the year 1832, when £1,700 was voted for the Female, and £1,300 for the Male Orphan School. The latter institution was established on the grant of land near Liverpool, and was carried on first under the direction of the Rev. Dr. Cartwright, and afterwards under Lieut. Richd. Sadler, R.N., until the 17th April, 1850, when the Governor General, Sir Charles Fitz Roy, caused the boys all to be removed to Parramatta, and closed the school. From that time both males and females have been brought up in separate departments in the same institution.

Children are admitted to the Orphan School on the order of the Honorable Colonial Secretary, and all applications for admission have to be made through a clergyman or some person well known to the proper authorities. About a fourth of the children now in the establishment have no parents; the others have either father or mother living. A register is kept for entering the names of all the children who enter the institution; and each child receives a number on admission, the clothes being marked with this number. The age, and all particulars about the child that can be obtained, are also recorded, and an entry is made against the name of any child when they are apprenticed or otherwise disposed of.

A portion of the present building was erected in 1814, under Governor Macquarie, on the sixty-acre grant at Arthur's Hill, which adjoins what was known as the Old Vineyard Farm, but now called Subiaco. Additional grants have, however, since been allotted, and there are at the present time 110 acres belonging to the institution; about three acres are under cultivation as a garden, and a portion is planted with fruit trees. This land is worked by a gardener appointed for the purpose, who is assisted by the boys; and, with the exception of potatoes, sufficient vegetables are grown to provide for the wants of the school, unless the seasons are very bad. There are about a dozen milch cows kept on the grounds, which supply the children with milk. This makes a considerable saving in the expenditure.

The establishment will hold, when crowded, about 250 children. Both boys and girls at suitable ages are apprenticed out, and the applications for them are very numerous; but very few trades-people apply; this may be from the fact that none of the children are instructed in any trade. The girls are taught needlework and household duties, but the boys have no duties to perform other than assisting to keep their rooms neat and clean, cutting wood, and those who are strong enough to work are occasionally employed in the garden. I think that an arrangement might easily be made for instructing the boys in some of the ordinary trades, similar to what is done on board the Nautical School-ship "Vernon." The Trustees who are appointed for apprenticing the children are, the Honorable James Byrnes, C. W. Finch, Esq., and Mrs. Betts, the present Matron. When the children leave as apprentices, they are well provided with clothing. Those children who have parents are allowed to see them on Tuesdays and Thursdays, between 11 and 1 o'clock, in each week, but no child can be removed from the institution without a special order from the Honorable Colonial Secretary. Visitors are allowed in every day, and a book is kept, in which they are requested to enter their names.

The

The building is all constructed of brick, and faces the Parramatta River, running nearly east and west. The centre or main portion of the structure is three stories high, with wings right and left of only two stories. The west side is appropriated for boys, and the south side, including part of the main building, is used for the female department; but the accommodation is not sufficient for the increasing applications. The whole of the establishment I found very much in need of repair; the ceilings in many of the rooms were tumbling down, and the floors in places have given way, especially in the girls' schoolroom; the skirtings were in most parts in a very dilapidated state, and the whole place had a shabby and dirty appearance, for want of paint, colouring, whitewash, and plaster. There is also a great want of ventilation all throughout the building. At the time of my first visit, no repairs except the stopping of a few leaks had been done for a considerable time.

The quarters of the matron, Mrs. Betts, are in the centre of the building, from which she has access to both boys' and girls' departments; she occupies, on the ground floor, a dining-room and two bed-rooms; on the first floor, a large sitting-room with a small room adjoining, and a large bed-room. The master being a son of the matron, occupies only one bed-room, and shares the sitting-rooms with her, so that the quarters of both are included under those of the matron, which may account for the unusually large accommodation appropriated as the matron's quarters. The whole management of the institution devolves upon the matron, who is assisted by the master. A detail of the separate duties have been submitted, in the proposed rules, for all the officers and attendants of the establishment.

Neither the schoolmaster nor the first female teacher reside on the premises; the other teachers are allowed quarters in the building, but the accommodation afforded them is very poor and uncomfortable, and might, at a small cost, be easily altered. There is a separate room allotted for the house servants.

The girls' school-room is on the ground floor in the main building, but it is neither a good nor a suitable room for the purpose; it is badly lighted, and is in shape like the letter L reversed, giving about 30 x 13 in one part, and 15 x 15 in the other. The walls, skirtings, &c., were very dirty and dilapidated, and the floor in such a bad state the desks would not stand firm; and there is a general passage through the room, which is a great objection, as the children are continually interrupted and their attention taken off by people passing through. This might be avoided by a wooden partition being put up with some frosted glass windows, so as not to exclude the light. It was badly furnished, and no clock allowed for the room, which is an article much needed, both for teaching the children how to tell the time of day, and to enable the teacher to regulate her school. The time for school instruction is 9 to 12 a.m., and 2 to 4 p.m.

There are five rooms appropriated for the girls' dormitories—two on the first, and three on the upper floor, in the main building—which are all of a good size, containing from twelve to twenty beds. Some of the bedding was in a ragged state; this was stated to be on account of the delay in furnishing the stores to the institution. It would be an improvement if all the dormitories were numbered, and the number of each room painted on the door, so that they may be more easily referred to. The name and register number of each child sleeping in the room should also be entered on a list, which could be hung up in the room, so that any one visiting the establishment could see at once how many occupied the room, and their names. Some of the beds of the elder children are made of hair and flax, but those used for the younger ones are made of straw. All the rooms are thoroughly cleansed and washed out twice a week, and every care taken to keep them cleanly.

In the east wing of the establishment a nursery is set apart for infant girls and boys, and there are two dormitories above it, one 30 x 18 for girls from fourteen months to three years, the other 30 x 32 for boys of same age—all dining in the nursery, which is on the ground floor, and about 27 x 30, but it is very badly lighted and ventilated, having only one window. In the summer-time it is so hot and close that, unless it is rough or wet weather, their meals have to be served to them under a verandah at the end of the east wing in the playground.

Adjoining this room is the girls' dining-hall, about 32 x 30, which has a stone floor; it contains four tables; about 66 girls dine there daily, and everything is kept very clean. At the back of this is a hall for the servants to dine in, which is also used for weighing and issuing the stores. The store-room adjoins the servants' hall, but has no proper convenience for keeping the various articles of consumption. There is a large bakehouse outside the dining-hall; and a baker of the establishment makes all the bread used, baking five days in each week. The washhouse and laundry is near the bakehouse, and is deficient of proper convenience for doing the work of so large an establishment.

Only one kitchen is used for both the boys and girls' departments; this is a new building detached from the south wing, and communicates with the servants' hall by a covered way; it is within a convenient distance from the girls', but a long way from the boys' dining-room. Everything appears to have been supplied in the way of cooking apparatus, and the food is well cooked and prepared. There is only one female cook, but she is assisted by some of the girls who are appointed for daily household duties.

The provisions supplied for the children are good and wholesome; three times in the week the meat is baked in the bakehouse, and they have a good supply of vegetables; on other days they have soup, which is well made, in a copper kept for this purpose; the soup is made with meat, vegetables, rice, and any bread left from the previous day. For breakfast and supper they have bread, tea, and milk, with which they have an occasional allowance

allowance of treacle, honey, or butter, in accordance with the authorized scale, as under:—

## ALLOWANCES.

No. 1.—The daily ration of provisions authorized to be issued to the Master, Schoolmaster, Drill-master, and Men employed as Servants and Labourers, is composed of the following articles, viz.:—

- 19 ounces flour, 1st quality.
- 16 " meat.
- $\frac{1}{2}$  ounce salt.
- 1 " tea.
- 3 ounces sugar.
- $\frac{1}{2}$  ounce soap.

No. 2.—That authorized to be issued to the Matron, Teachers, and Female Servants, is composed of the following articles, viz.:—

- 16 ounces flour, 1st quality.
- 16 " meat.
- $\frac{1}{2}$  ounce salt.
- 1 " tea.
- 3 ounces sugar.
- $\frac{1}{2}$  ounce soap.

No. 3.—That authorized to be issued to the Children is composed of the following articles, viz.:—

- 13 ounces flour, 1st quality.
- 10 " meat.
- $\frac{1}{2}$  ounce salt.
- $\frac{1}{4}$  " tea.
- 1 " sugar.
- $\frac{1}{2}$  " soap.

$\frac{1}{2}$  ounce of any one of the articles—treacle, honey, cheese, or butter.

On Thursdays and Holidays, raisins or currants and suet are to be supplied and charged for as extras, limiting the quantity to about 35 lbs. raisins or currants and 35 lbs. suet a month, exclusive of holidays. On holidays more will be required.

The holidays are New Year's Day, Easter Day, Queen's Birthday, and Christmas Day.

No. 4.—The daily ration of forage is composed of the following articles, viz.:—

- 8 lbs. of maize or barley, or 10 lbs. oats.
- 4 " of bran.
- 12 " of oat or cultivated grass hay.
- 4 " of wheat straw.
- 1 $\frac{1}{2}$  pint of vinegar are allowed daily for the use of the institution.

The following are the authorized allowances of fuel and light:—

	Summer.	Winter.
Firewood, pounds daily .....	2,000	2,300
Charcoal, bushels " .....	3	3
Candles, pounds " .....	3	3 $\frac{1}{2}$
Oil, gills " .....	8	8

The winter months are June, July, August, and September.

A building has been erected as an hospital near the east wing, just outside the girls' play-ground; it contains three rooms upstairs for females, and two on the ground floor for males. One of the nurses sleep in each department. The rooms do not appear to me well adapted for hospital purposes, being very damp at the south-east end, and badly ventilated. In the boys' room down-stairs the fire-place smokes, and in consequence of a fire having nearly always to be kept there to supply light comforts to the patients, as well as to purify the air, the room is seldom free from smoke, which must be very bad for the children. A dispensary is provided in this building, but the medicines are not made up in it, as drugs will not keep well in so small a quantity as they require for the use of the institution, and the surgeon is supplied with all the medicine he requires from the Government Asylum for the Infirm and Destitute. The bath-room which has been erected for the hospital is unsuitable and inconvenient, being outside the building, at one end of the verandah; it has no bath in it, but a copper has been placed in one corner, which occupies nearly a fourth of the room, and there is no communication with it and the sick wards, unless by going out on to the verandah. At the Roman Catholic Orphan School there is a bath-room with superior plunge and shower baths, and patent closets to each ward, fitted with pipes to convey water to the rooms, and waste pipes to carry away the dirty water, all supplied with proper taps, plugs, and lavatory basins. I see no reason why institutions similar in character and purport should be so differently arranged, and I think it desirable they should be conducted, in every way, on the same footing and principle.

No proper provision appears to have been made for a lavatory. In all the other large public institutions I have visited, a provision has been made for lavatories and bath-rooms, and it appears to me very necessary in an establishment of this kind, as it is hardly possible, without this convenience, to bring the inmates up to proper habits of neatness, cleanliness, and order.

A stone wall has been erected between the play-grounds of the males and females, which effectually divides them; the remaining portion is fenced in with a high paling fence; it is nicely situated, and the children are very healthy. A large shed has been constructed in the middle of the ground, to protect the children in the hot or rainy weather. In this enclosure there is a large tank of 6,000 gallons, raised several feet, to give a fall of water so as to convey it through the pipes which have been laid on to the various parts of the building; this is filled from a creek some 300 yards off, by a force pump worked by a horse mill, but the water in the hot weather becomes unfit for drinking purposes, owing to there being no kind of covering to protect it from the heat of the sun. There are also other tanks under ground, which are filled from the roof of the building.

The children are usually well provided with clothing, but the delay that took place before the supply of material for the year 1868 was issued from the Colonial Store caused them to be very badly off for clothes when I first visited the establishment. All the clothing is made on the premises—except the boots and caps—by the girls and work-women. One person is appointed for the care and mending of the clothes, who has also to superintend the washing of the children.

*Boys' Department.*

The boys' department is all on the west side, or what may be termed the west wing of the institution; the elder boys are instructed by the schoolmaster, and the younger ones by a female teacher; monitors are also selected from the elder or best informed boys to assist the teachers, who receive extra instruction each day for one hour between

between 12 and 1 o'clock p.m. The schoolmaster's duties now are simply to instruct the boys; formerly the teachers had all kinds of menial duties to perform in addition to the daily instruction of their pupils. After school hours the boys are handed over to the special charge of a person appointed under the title of drill-master, whose duties are to look after, and keep them in order at all times when out of school; he drills them three or four times a week—presides over them at meals, at rising, and at bed-time. The boys are consequently very well behaved and proficient in their drill. This appears to me a very necessary appointment for the boys' branch, as it enables them to be kept well under control, making them orderly, and preventing their destroying the clothes. It is quite impossible for boys to have the same attention paid to them by a teacher who has been fatigued with instruction for five or six hours during the day, as they can receive from one whose sole business it is to look after and watch them. A change has lately taken place in the appointment of the male teacher, as complaints were made by the matron of his not working in an harmonious manner while conducting the work of the institution, and the progress of the boys was anything but satisfactory. The alteration appears to be a beneficial one, and an improvement has been effected in the course of instruction.

It may be said the apartments of the boys consist of three distinct buildings:—

- 1st. The west wing, which contains the boys' nursery, two dormitories for some of the elder boys; servants' accommodation, and quarters for the drillmaster, who has charge of that portion of the building at night.
- 2nd. The school building, which is detached, and about thirty yards from the main structure. This was intended, when constructed, for the residence of the male teacher, but owing to the increased number it was found necessary to appropriate it for the boys' dormitories and schoolroom; the latter is on the ground floor, and considering it was not built for this purpose, answers very well. The room was badly provided with books, maps, &c., and those in use were in very bad condition; the desks are also cut and ink-stained, shewing that the conduct of the boys while in school had not been regarded. On the first floor of the building there are three dormitories, which at night are placed under the charge of a blind lad, who has been in the institution a long time; and though somewhat beyond the usual age that boys are kept in the school, he is retained there on account of his affliction, and makes himself useful in various capacities.
- 3rd. A general dining-room for the boys, also detached, and only 25 x 18 feet, having no covered way to it from the main building, and is a long distance from the kitchen; it is not sufficiently large for about 100 boys who have to dine there daily, and they have in consequence to stand at their meals, as there is no room for forms. This, in addition to being uncomfortable, gives the boys a hasty and slovenly way of taking their food. At all other institutions I have visited, the inmates are allowed to sit at their meals. This room is also used for an infant school, and it is unsuitable for that purpose, as there is no gallery, nor any convenience for teaching. All the tables have to be removed on this account, after breakfast and dinner each day, and owing to the short period between the meal and school hours, there is no time for properly cleaning the room, except on Saturdays; consequently, the dining hall, instead of presenting a neat appearance, is necessarily always untidy, and not so clean as it ought to be. Some arrangement might, I think, be made for providing a suitable building to alter this. Every attention is paid to the other portions of the establishment, to keep them clean and in proper order.

The drillmaster is allowed two small rooms, and over his quarters is a large dormitory for boys 11 to 13 years; adjoining that are two dormitories for boys 9 to 11 years; the young children sleep on the lower floor, in charge of the nurses, who have a small room of about 9 x 12 feet boarded off in each dormitory.

In addition to the general garden, a piece of ground is allotted to the boys at the end of their play-ground, which they are allowed to cultivate and make into small gardens for themselves; suitable amusements are also provided, such as swings, see-saws, foot-ball, &c., but their chief game is cricket.

No proper lavatory or bath-room has ever been provided, which is much wanted; the boys wash in basins or buckets under an open shed, away from the dormitories. This place is exposed to the wet and cold weather, and must be very bad for them. A good lavatory and bath-room would greatly assist in training the children to proper habits of cleanliness, order, and regularity.

The daily average number of children maintained in the institution for the year 1867 was 250, and the total expenditure, including all stores, £4,236 6s. 6d., which gives the average yearly cost for each child at £16 18s. 10s. 7d., or about 11s. 14d. a day per head; and for the management and working of the establishment, there are seven officers and fifteen attendants.

A proposition has been submitted to do away with the appointment of a second female teacher, and have instead a house matron, whose principal duty would be to look after and attend to the girls when out of school, in the same manner as the drillmaster does with the boys, which would materially assist the working of the establishment.

On the Estimates for 1868, the sum of £3,572 has been voted for the maintenance of the institution, but this is exclusive of the cost for clothing and general stores, supplied from the Colonial Store Department.

## THE ROMAN CATHOLIC ORPHAN SCHOOL, PARRAMATTA.

In 1837, a School for Roman Catholic Destitute Children was established, under Archbishop Polding, and several members of the Romish Church; it was partially supported by private contributions, and aided by an annual grant from the public revenue. The first aid given by the Government was £600, which was passed in the Appropriation Act for 1837; and a similar grant was allowed each successive year until 1839, when it was raised to £1,000, and in 1840 to £1,500. The school was opened at Waverley House, Waverley, with only twelve or thirteen children, by a Miss Burke, who was appointed as matron of the establishment; but she resigned the charge after a short time to a Miss Smith, who also gave up the management in February 1838, when the appointment was conferred upon a Mrs. Martin, and she retained that position until 1844.

This institution does not appear to have been styled as an Orphan School until that year, but orphan children of immigrants, or passengers who died on the voyage to the Colony, and the orphans of free people, were received and maintained there.

Representations having been made to Sir George Gipps, the Governor of the Colony, by the heads of the Romish Church, he caused what is now a portion of the present institution to be erected for a Roman Catholic Orphan School, and it was completed in the latter part of 1843; but some objections appear to have been raised to the building being handed over to the charge of the then Committee, who could only be appointed for apprenticing children from the Orphan School under the Act 5 Wm. 4, No. 3; but upon the order of Sir George Gipps, the key of the building was handed to Mrs. Martin, who took possession as matron of the establishment, and 113 children were removed from Waverley on the 8th March, 1844. From this time it appears to have been entirely supported by the Government, in the same manner as the Protestant Orphan School; and the orphans of convicts, and children from the Female Factory, were then sent there. Mrs. Martin resigned her appointment in April, 1844, and from that time her successor appears to have been assisted by some of the Sisters of Charity, and in 1859 a number of the Sisters took up their abode in the institution. There does not, however, appear to be any official record to shew on what authority this was done, but on the 1st April, 1859, one of the Sisters was officially appointed as matron of the establishment; and the office of sub-matron and the two teachers are also filled by nuns.

Although the institution was from 1844 entirely supported by the public funds, the management was assumed and carried on by a committee constituted for the time being, for that purpose; but these proceedings appear to have been altogether illegal, as by the Act 5 Wm. 4, No. 3, their powers could only extend to the apprenticing of the children; consequently, on the 24th June, 1867, by a Cabinet Minute of that date, the mode of management was altered, and the full control taken up by the Government.

Children are admitted in the same manner as at the Protestant Orphan School, on the order of the Honorable the Colonial Secretary, and recommendations for admissions are made through the Roman Catholic Clergy. The names of the present trustees for putting the children out as apprentices under the Act are, the Rev. S. J. A. Sheehy, Francis McNab, Esq., James Hart, Esq., Richard O'Connor, Esq., and James Mullens, Esq.

A register is kept for recording the name of each child as it enters the institution, and a statement of any particulars connected with it; an entry is also made when children are apprenticed, or if they are taken out of the establishment, but no child is allowed to leave without a special order of the Honorable the Colonial Secretary. A Visitors' Book is kept for all people to enter their names who go to look at the institution, and parents are allowed to see their children in the same manner as at the Protestant School. There is, however, no room or accommodation set apart for this, and when a number of the parents happen to come at once, the hall is crowded up with women and children.

The building is large and well constructed, partly of stone, and partly of brick; it is situated at the north-west end of the township, and adjoins the Lunatic Asylum; but the site is not so well adapted as that of the Protestant Orphan School. A new wing of four stories high, which was completed in 1867, has, with other additions, been added since the opening of the institution. This wing is built of brick, with stone corners, the main portion of the building being all stone-work; and it provides a fine school-room for the girls on the first floor, with two dormitories above, all about 50 x 18. Under the school-room is the infants' nursery, and girls' bath and dressing rooms. All the new portions of the establishment are well ventilated, and suitably built for the purpose for which they are used.

The institution is divided into two departments; the main portion is used for the girls', and a separate building has been erected at the back for the boys' quarters, which communicates with the main building by a covered way, of about 50 yards long, that divides the playgrounds, and affords a shelter for the children from the sun and wet during play hours; but it would be an improvement if a high fence was erected to separate the yards more effectually.

The dormitories for the girls are arranged in the front building and in the new wing adjoining it, a communication having been made by doorways cut through the main wall, giving four rooms, all about 50 x 18 feet; but the rooms are crowded, and many of the beds are occupied by two children. All the bedding and the rooms are kept in very good order.

Under

Under the school-room is a large bath-room, used for both the elder girls and the infants; there is a large dressing-room adjoining, but no permanent baths are fixed, nor is there any arrangement for washing-basins—at present they have only large tubs.

On the ground floor, at the entrance, are the matron's quarters. Formerly this portion of the building was occupied as a school-room; it has now been divided into a dining-room for the teachers and a small bed-room for the matron, and she has one sitting-room, which is used for the reception of visitors. The kitchen apartments for the matron are on the cellar floor.

All the cleaning of the dormitories, making of beds, &c., is performed, with the assistance of the girls, under the special supervision of the matron, who also has charge of all the stores supplied for the use of the institution. With the exception of boots and caps, all the clothing required for the establishment is made on the premises, by the needlewomen and the girls.

The infant school and dining-room for both boys and girls is, in the boys' department, on the ground floor adjoining the school-room; they have a sloping gallery running the length of the room, and all the necessary arrangements have been made for properly training the children.

Dining-halls are formed for both males and females, by a sloping roof from the north side of the boys' school-house, which is boarded up to a certain distance, and then enclosed with Venetian lights—this affords a comfortable and airy place for the meals. The girls' hall is divided from the boys' by a wooden partition, and they communicate with the kitchen by a verandah running to the end of the building.

The boys' school-room is a long room 60 x 20 feet, not so good or so well ventilated as the school-room in the new wing. It is well furnished with books and maps, but some of the desks are bad and shaky; it would be an improvement if a door was opened into the small garden at the back of the school for ventilation, and a gallery erected at one end for teaching the younger children.

A chapel has been erected on the premises, at the end of the boys' school, which is attended twice a day by the children, for morning and evening prayers, the prayers being usually read by one of the Sisters.

Outside the chapel is a bath-room and lavatory for the boys; there is no covered way to it for protecting the children in wet weather, but the distance is not far from the verandah leading to the school-room. The room is well provided with plunge baths fitted with water pipes from the tanks, and drain pipes to carry off the dirty water, which saves a great deal of labour. The lavatory is fitted with plug basins set over a drain pipe, and taps are provided for filling them with fresh water; roller towels are fixed in the centre of the room, for the general use of the boys; and all is kept in good order.

The boys' dormitories are over the school-room and the infant school apartments, forming two long rooms at right angles with each other; and the second teacher, who resides in the establishment, has charge of the boys at night. The first teacher does not reside on the premises. The bed-rooms, although low, are airy, arrangements having been made to give them proper ventilation, by an opening made in the lining of the roof. There are about 100 beds in the two rooms, and nearly all the boys have single beds. Between the infants' dining-room and the kitchen there is a room used for keeping and mending the clothes for all the boys.

The kitchen adjoins the needle-room, but it is badly situated in one respect, as there is nothing to prevent the children from going into it during play hours, which causes annoyance to the servants and is productive of irregularities; this might be obviated by the place being properly divided off with a fence across the yard, which would also hide it from the roadway. All the necessary arrangements for the use of the kitchen are provided. Adjoining this is a laundry and bakehouse, but the laundry is not in the same order as the other portions of the establishment. All the bread is baked on the premises, by the baker who is appointed for the purpose.

A large tank has been made outside the kitchen apartments in the yard, which is covered over and receives all the water from the roof; at the bottom of the tank a well has been sunk to a depth of 70 feet, which gives an ample supply of water in all seasons. A tank has also been fixed above the roof of the verandah, to give a fall of water; this is filled with a force-pump worked by the boys every morning, and service pipes are laid on to convey the water to the various parts of the building.

An infirmary has been erected about 50 yards from the boys' department, and nearly in line with the school-room; this has been completed about five years, and makes an excellent hospital. There are four wards, holding eight beds in each. It is provided with a dispensary, dining-room, and excellent plunge and shower baths, and a lavatory, to each ward; the water is laid on from the main tank, and supplied to all the rooms, separate taps and plugs being fixed to all the baths and lavatories, provision also being made for carrying away the dirty water through drain pipes; there is a closet to each ward,—making it as complete a building as there is in the Colony.

The arrangement for the yard closets is not good; they are placed in the most conspicuous part of the grounds, near the roadway, with no screen round them.

A farm of 59 acres has been granted to the institution, but very little has been done to it, and it does not supply the vegetables as at the Protestant School; though when under proper cultivation, it will no doubt yield enough for the wants of the establishment. Milk is at present supplied partly by the contractor, and some is procured from a few cows belonging to the institution, which have been purchased by the matron, from the proceeds of pigs reared on the premises and sold—a course which is irregular, as all sums received in public institutions should be paid into the Colonial Treasury, and authorized by Parliament before being expended.

Ample provision is made for both food and clothing of the children, and the provisions are good and wholesome, which are supplied in accordance with the authorized scale, as under:—

A Table shewing the quantity of each article comprising the daily ration authorized to be issued to each person on the establishment, according to the respective scales; the extra rations, the medical comforts, and the articles for the use of the establishment.

General Daily Rations.								
Articles.	No. 1 Ration.	No. 2 Ration.	No. 3 Ration.	No. 4 Ration.	No. 5 Ration.	Total quantity of each article authorized this month.	Total quantity of each article drawn this month.	Quantity over or under drawn this month.
*Meat .....	16 ozs.	12 ozs.	12 ozs.	4 ozs.	8 ozs.			
†Bread (seconds) .....	27½ "	20 "	20 "	15 "	15 "			
Salt .....	½ "	½ "	½ "	½ "	½ "			
Tea .....	½ "	½ "	½ "	½ "	½ "			
Sugar .....	2 "	2½ "	1 "	1 "	1 "			
Soap .....	½ "	½ "	½ "	½ "	½ "			
‡Vegetables .....	16 "	16 "	4 "	4 "	4 "			
‡Milk .....	1 gill.	1 gill.	1 gill.	1 gill.	1 gill.			

EXTRA RATION ON FRIDAYS.

For all on the establishment for whom meat is not drawn.

Butter or cheese and treacle, not exceeding 100 lbs. each per month.

Rice .....

Or fish, in quantities not exceeding the value of the meat authorized.

EXTRA RATIONS ON FRIDAYS AND HOLIDAYS. §

On Fridays, for the children for whom meat is not drawn; and on Holidays, in addition to meat for each child in the establishment.

Bread 5 ozs. or flour 4 ozs., sugar ½ oz., raisins or currants 1 oz., suet 1 oz.

MEDICAL COMFORTS FOR SICK CHILDREN.

In quantities certified to be necessary by the Visiting Surgeon.

Flour, oatmeal, arrowroot, sago, barley, eggs, wine, ale, porter, and lime-juice.

ARTICLES FOR THE ESTABLISHMENT.

In quantities as required, under the certificate of the Chairman.

Common oil, not to exceed 6½ gallons per month.

Vinegar .....

Firewood, charcoal, straw, starch, soda, blue, yeast, blacking, and roach lime.

N.B.—It is to be distinctly understood that the full rations are not to be drawn unless actually required, and when other articles, not included in this table are drawn, they can only be so in substitution for others authorized, medical comforts excepted.

This scale is different from the one in use at the Protestant School, and I see no reason why there should be any difference in the allowance of the two institutions; and I have already recommended, in a report on the subject, that a uniform scale should be adopted.

The daily average number of children maintained in the institution, for the year 1867, was 280; and the total expenditure, including all stores, £4,386 12s. 3d.; which gives the average yearly cost for each child at £15 13s. 3-953d., or about 10-300 pence a day per head; and for the management and working of the establishment there were eight officers and thirteen attendants.

In this institution there are two male teachers, and the duties allotted to a drill-master in the other Orphan School fall upon the second teacher. I believe that the school would be as well conducted, and the boys better managed and trained, by having only one teacher, with monitors selected from the boys, and a person appointed to act in the capacity of drillmaster, whose duty would be to take the care and management of the boys when out of school, and drill them to proper order.

On the Estimates for 1868 the sum of £3,951 has been voted for the maintenance of the institution, but this is exclusive of the cost for clothing and general stores supplied from the Colonial Store Department.

LUNATIC

\* It is optional with the authorities to draw meat or not on Fridays; but, if it be drawn, the "extra rations" must not be drawn also.

† In the ration to children under seven years of age, the best wheat bread may be substituted, in the proportion of 8 ozs. of that for the 15 ozs. of seconds.

‡ When vegetables or milk are produced on the grounds of the establishment, these articles are not to be drawn from the contractor.

§ The holidays are—New Year's Day, Anniversary Day, Easter Day, Queen's Birthday, and Christmas Day.

## LUNATIC ASYLUM, PARRAMATTA.

The Lunatic Asylum at Parramatta is at the north-west end of the township, and adjoins the Roman Catholic Orphan School. It was constructed for a female factory, and used as such for many years during the time the Colony was a penal settlement, and was opened for a lunatic asylum on the 31st December, 1849. All the principal buildings are constructed of stone, and the grounds of the institution are enclosed by a high stone wall.

The entrance is on the north-east side. On the left hand, as you go in, are the superintendent's quarters and offices, the matron's quarters, and the dispensary; but complaints are made that they do not afford sufficient accommodation. On the opposite side are the master's quarters, the store-room for soft goods, and general stores. There is an avenue between these apartments leading to the main building for the inmates. The right-hand portion of the institution is appropriated for the males, and the left-hand for the females. All the patients are allowed out into large airing-yards every day, with keepers to each yard to watch them. The yards are all separated by high division walls, and there are about 6 acres within the walls. The buildings and sleeping apartments are not all connected, as at Tarban Creek, where you can go from one ward into another; some have no covered way or connection with each other. The main building contains six sleeping rooms, one of which is divided off into the female ward; the remainder are appropriated for the males. Each of these rooms will hold from twenty-five to thirty beds, and inmates of a quieter nature than those who occupy the single rooms are placed here. On each landing, between the dormitories, there is a sleeping-place for the attendant; and a lamp is kept burning all night in the wards. The whole place is well washed out daily, and everything kept very clean.

There are four yards appropriated for the males—those who are criminal lunatics being confined to a separate yard in the north-east corner. In this yard there is a long range of cells, all 8 x 6 feet, built of stone, floored, and well ventilated. The structure is two stories high, and contains twenty cells on each floor; but arrangements have been made for building another story on to it, so as to afford an additional twenty cells. A wide passage runs through the building, with an open window at each end, so as to give a thorough ventilation. Only one man is put into each of these cells, and they are not allowed bedsteads, in consequence of the patients all being of a violent character. On each floor one of the cells is occupied by one of the attendants, and a watchman is kept on duty all night. The cells are commodious and comfortable, they have bar windows sufficient to admit plenty of light and air, but out of reach of the patient, and they can be opened or closed as necessary. All the cells are washed out on alternate days, the bedding well aired, and everything is kept very cleanly. The patients are never left in any of the yards without a sufficient number of keepers, and closets are provided to every yard.

At the back of the criminal yard is the main airing-yard of the institution, where the majority of the male inmates take their meals, in a large open shed which has no shelter from the wind or rain. In this, tables and forms are placed; and in dry or hot weather it is very pleasant for them, but in the cold and wet it is very uncomfortable. A doorway is opened from the yard to the kitchen department, which makes it convenient to the dining shed; but as there is no covered way, the meals cannot be served in a comfortable manner in wet weather.

Adjoining this airing-yard is one kept for imbeciles; the hospital is also there, and a large two-story building used for dormitories for ordinary patients. Those inmates who are of uncleanly habits all sleep in a long detached building, on the ground floor, which is flagged. The room is scrubbed out every morning, the beds changed, and the floor whitened over with lime, to keep the place cleanly. There are no sashes or glass fitted in the window openings of these or any portion of the buildings, except the criminal cells; some of the dormitories have simply large round holes, but all are protected with iron bars. In cold or windy weather a piece of bagging is put up to break the draught, and it is considered more healthy than having the rooms closed up, but has not a civilized appearance.

The hospital at the south-west side of the imbecile yard is on an upper story, and will hold about twenty-five patients; it is not, however, a suitable building, having windows only on one side, and is badly situated. There are, however, very seldom many patients confined to the room; but the beds are occupied by sickly inmates; an attendant is always on duty, and a light kept burning through the night.

All epileptic patients are kept in a ward under the hospital, and for security their beds are made on the floor; but in the Establishments for the Infirm and Destitute, and at the Tarban Asylum, they provide low bedsteads with sides to keep them from falling on the ground, and some have padded bedsteads with high sides.

In the imbecile yard a room is appropriated for a general bath-house. It is not fitted up with regular baths, but large tubs are used for the purpose; these have no taps or plugs to let off the dirty water, and they have to be emptied by hand, which entails great labour. All the patients have to take the bath, unless otherwise ordered by the medical superintendent. There is only one small room for the patients to sit in, which is close to the bath-house, and in cold weather a fire is kept there, protected by a strong iron guard.

A plentiful supply of water is procured from the Parramatta River, which runs at the back of the institution, and only about 70 yards from the outer wall. The water is pumped up into a large tank by a horse-mill, which is constructed in the pump-house built in the west corner of the imbecile yard. There is also a hand pump worked by the inmates, to force the water from the main tank to the various parts of the building, through service pipes laid on for the purpose; an oversight has, however, been made in not raising the tank sufficiently high for the water to run to all parts without a second pumping.

On the east side of the institution, between the outer wall and the female cells, is a garden, which is named "the men's green yard." A shed has been constructed there, and several men are placed in this yard every day, and take their meals there in the same manner as they do in the main airing-yard, but, as previously pointed out, there is no shelter against the severe weather.

There is a small library allowed for the inmates, which contains about 200 volumes of interesting tales, journals, magazines, histories, and novels; but there is no place to keep the books except some damp shelves in the waiting-room at the entrance, and many of the books were spoiled with the damp from the walls.

All the stores are issued by the clerk, on requisitions which are made once a week by the master attendant and the matron. It appears to me there should be one person appointed to act specially as storekeeper, who should issue daily all articles required, and assist in the clerical duties; the clerk should check the storekeeper's requisitions and issues, taking stock periodically; a book should also be kept to shew the detail issue of all medical comforts in proper form, which should be signed daily by the superintendent. At present there are two store-rooms—one used for general stores, the other for tea, sugar, flour, tobacco, medical comforts, &c. The store for the latter articles is situated at a very inconvenient distance from the clerk's office, next to the dead-house, outside the entrance to the green yard, which is objectionable. The other store-room is also unsuitable, damp, and much in need of repair. It would be a great improvement if the present offices and store-rooms were pulled down, and a new store-room for all stores and offices built under the north-east wall—shifting the stables, which are now just inside the entrance, to the building next the dead-house; this would, in addition to giving suitable accommodation, afford a good opening to the front of the institution.

The women have two large yards on the south-east side of the institution, with a small portion railed off in one corner for very refractory patients. There is one large dormitory in the main building that holds about thirty quiet patients. Outside this is a range of buildings, running south-west, only one story high, containing a room for silly and idiotic children; the kitchen for females, and the female hospital, capable of holding fifteen patients, besides two nurses who always sleep in the apartment. Adjoining is the wash-house, which appears to me too close to the hospital. The women have to take their meals under an open shed in the same manner as the men. The floor of the shed is cemented over, and tables and forms are placed for them to sit on; but there is no protection whatever against the cold or wet. In the wall on the south-west side there is a large door which opens on to the back grounds of the institution near the river. This land is not fenced in, and thus affords an opportunity for people to look through the gate, causing annoyance to the attendants and the inmates; a fence might be put up at the back to prevent this, and a portion of the land could then be used for a drying ground. At present there is only a small yard at the end of the cells adjoining the airing yard, which is not sufficiently large for the purpose, and very little sun or air can get to it, owing to the high walls of the building.

Four or five attendants are always on duty in charge of the females when they are in the airing yard, and all the patients are well looked after, and the whole of the apartments kept very clean and in good order. The cells used for the majority of the females are those built for the factory, and not so good as the new cells built for the criminal ward on the men's side. The building is three stories high; the ground floor is flagged, and affords thirty-six cells 8 x 5 ft. which will only hold one inmate in each; but on the two floors above there are only eighteen rooms on each floor of 12 x 8 ft., and three patients occupy one room, having more space than on the ground range. All the cells are calculated to afford 576 cubic feet to each person. The attendants sleep at the end of the cells, in separate apartments, and one attendant is always on watch during the night.

A bath-room is provided at the entrance to the cells on the ground floor, and the laundry adjoins it. As on the male side, there are no fixed baths, but large wooden tubs answer for the purpose. The want of some convenience is much felt to convey the water to the upper stories, as all the apartments have to be scrubbed out daily, and the labour of carrying the water to such a height falls heavily on the attendants; an arrangement could easily be made by having a small iron tank and a force-pump from the present tank placed on the top story.

The

## PUBLIC CHARITABLE INSTITUTIONS.

13

The food supplied is plain and wholesome, and is allowed in accordance with an authorized scale, as follows :—

## ALLOWANCES.

The ration of provisions authorized to be issued to the attendants in the Lunatic Asylum, Parramatta, is composed of the following articles, viz. :—

No. 1.		
1	pound bread	} daily.
1	" meat	
$\frac{1}{4}$	" tea	} weekly.
2	" sugar	
1	" vegetables	} daily.
1	ounce rice	
$\frac{1}{2}$	" salt	
1	gill milk	

The following is the scale of diet daily issued to patients in the Lunatic Asylum, Parramatta :—

FULL DIET.		LUNATICS.	
No. 2.		No. 3.

## FORAGE.

## No. 7.

The daily ration of forage is composed of the following articles, viz. :—

8	pounds maize or barley, or 10 lbs. oats
4	" bran
12	" oat or cultivated grass hay
4	" wheat straw

For each horse daily, and half these quantities for each bullock.

In case the entire ration of forage be not required or delivered, the maize, barley, or oats to be reckoned 4-12ths; hay 5-12ths; bran 2-12ths; and straw 1-12th of the full ration.

Fresh beef or mutton to be issued on the order of the Medical Superintendent. The bread to be of the first quality.

The following are the authorized daily allowances of fuel and light, viz. :—

Cotton wick is issued in the proportion of eight drachms for every gallon of oil.  
The winter months are June, July, August, and September.

Two

Two days in each week the meat is baked, and on other days it is boiled and served with soup. For breakfast and tea they have only tea and bread, but the ration of tea and sugar appears small, being no more than allowed to the prisoners; and complaints were made to me by some of the patients that they did not get enough to eat, though they had the full quantity supplied to them, according to the scale, at the time of complaint. Clothing is given to the patients as required, every care being taken to prevent them from destroying their clothes.

A farm of about 26 acres has been granted by the Government for the benefit of the institution; it is situated on the banks of the Parramatta River, across the dam at the back of the building, about a quarter of a mile from the dam. There is an overseer and a labourer allowed for working it, and many of the inmates also render assistance; sufficient vegetables, with the exception of potatoes, are obtained for the establishment. A number of pigs are also kept there and fed from the waste of the garden and wash from the kitchen, and when they are fat are sold for the benefit of the institution; the proceeds have hitherto been laid out on the garden, which is irregular, as the money should pass through the Treasury. Some cows are kept at the farm, but not enough to supply all the milk required for the patients.

Outside the building, at the entrance, is the wood-yard and drying ground, which has a very unsightly appearance; this might easily be shifted to the back of the premises, and an enclosure made there for the purpose, which would prevent the present evil of people congregating round the back gates, and remove an eye-sore from the front of the institution.

A property adjoining the Asylum, comprising about 40 acres of land and a house, has been purchased from Mr. Blaxland, for the purpose of enlarging the institution; but no use is made of it at present, as the house is in a dilapidated state, and the ground is not properly enclosed.

Divine service is performed at the institution, by a clergyman of the Church of England every Wednesday, and by the Roman Catholic clergy on Thursdays in each week.

Under the control of this institution there was an establishment in Macquarie-street kept for British invalids, numbering about thirty. The inmates of this building were not lunatics, but the majority of them decrepit and unable to provide for themselves. Some were men whose sentences have not expired; and, as it was considered undesirable to keep up this additional establishment, the inmates have been removed to the Asylum for the Infirm and Destitute at Liverpool, and the building is available for other purposes.

The daily average number of inmates maintained in the institution for the year 1867 was 571½, and the total expenditure, including all stores, £16,919 17s. 4d., but exclusive of the cost of buildings or repairs, &c.,—which gives the average yearly cost for each patient at £29 11s. 10 3/4d., or about 1s. 7 1/2d. a day per head; and for the management and working of the establishment there were 6 officers and 62 attendants. The number of patients in the building on the 1st January, 1867, was 547; there were admitted during the year 96, and the deaths reached 32, or 4·977 per cent.; the number discharged was 37, or 5·754 per cent. on the total number for the twelve months; and 568 patients remained in the asylum on the 31st December, 1867.

#### LUNATIC ASYLUM, TARBAN CREEK.

When the Tarban Creek Asylum was first established by the Government it was intended to provide for convict lunatics only, but free patients were from an early date admitted. The first inmate appears to have been received there on the 13th December, 1822, and at that time the institution was estimated to hold about 60 patients. Many additions have been made since that date, and there are now over 600 inmates in the establishment, but there does not appear to be proper accommodation for more than 350 to 400 people; consequently, every available space is occupied in order to provide sleeping room for the inmates, and, only for the recent improvements that have been made, by providing spacious airing grounds—completed in January last—for both men and women, it would hardly be possible for so many inmates to be retained there.

The walls surrounding the buildings, and forming the airing grounds, enclose about 32 acres of land; there is in all about 45 acres attached to the institution, and 1 acre is set apart outside the walls for a burial-ground; 5 acres have also been given as a water-reserve, about a quarter of a mile from the establishment. The airing grounds are on the south-east side of the building, and extend down to the edge of the Parramatta River, being enclosed all round with a high stone wall, so as to prevent any one approaching the patients, and to guard against their escaping. The males are divided from the females by an avenue planted with orange trees, leading from the superintendent's quarters to a wharf at the river side, which affords a landing place for parties visiting the institution by the Parramatta River. The stone wall is continued up each side of the avenue, so that no communication can be made between the male and female patients; the south-west portion of the ground is appropriated for the females, and the north-east side for the males. The patients are kept out in the airing grounds from two to three hours daily in fine weather, or as long as circumstances will allow. It is a great boon to this unfortunate class of people to have a place like this, where they can enjoy freedom during the day, and, while getting plenty of fresh air, they can see a little of life outside the walls, as there is a fine view of the river and the surrounding country from the yards; and I am informed that a vast improvement has taken place in the majority of the cases since these yards have been used.

While

While the patients are confined within the wards they have not less than three attendants in each ward, but when they are admitted to the outer airing yards it is necessary to have eight or nine attendants always on duty; there are, however, some patients that cannot be permitted in the outer grounds; these are occasionally taken out under the special charge of the warders. No violent measures are resorted to, but it is found necessary occasionally to confine some of the patients in the cells, when they become violent and unmanageable.

I find that out of the large number of inmates, only 16 of them were paid for by their relations or friends, although the rate charged for their support is only 2s. 2d. per diem, which is the rate fixed by the Government; many of the patients are connections of people in good circumstances, who are well able to provide for their support.

Every care is taken to preserve order and cleanliness; and, throughout the establishment, all the wards, beds, and cells, are kept very clean, but great complaint is made of the state of the closets, which require alteration.

The establishment is all constructed of stone, and the various wards containing the halls and dormitories are built in a series of squares. The superintendent's quarters stand in the centre of the wards facing the south-east; the male patients are at the north-east side, and the female on the south-west side. These quarters were originally intended for the accommodation of paying patients, but on their completion were handed over for the use of the superintendent, there being no other provision made for him. A portion of this building is used for the board-room, visitor's room, dispensary, medical officers' surgery, library, and store-room, &c.

All the buildings, with the exception of the superintendent's quarters, are only one story high, and they are connected one with the other by corridors or verandahs, the entrance to the various wards being well secured with double doors; every keeper is provided with a key for the wards. The single rooms vary in size from—

	ft.	in.	ft.	in.		
	10	3	x	6	3	containing 769 cubic feet.
	10	0	x	6	6	" 1,704 "
	12	0	x	7	6	" 1,080 "
in the male division, and—						
	10	0	x	6	6	" 1,704 "
	12	0	x	7	6	" 1,080 "

for the females; but this room cannot be afforded to the sleepers in the other parts of the building while the number of inmates is so great, every available space being crammed with beds.

On the male side there are five wards, consisting of the refractory, sub-refractory, convalescent, sub-convalescent and hospital wards. The entrance for the patients to the large airing-yard is from the convalescent ward. Owing to the crowded state of the institution, it is not possible to keep the building constructed for the hospital, as such; it is therefore used as a general dormitory, and beds have also to be made up in the dining-halls, and in all the passages and corridors, every night. There is a lavatory and bath-room provided for each ward, with closets for every yard, but the latter are in a bad condition for want of proper arrangements. The epileptic and paralyzed patients are kept separate from the others, and are in most cases provided with low beds having padded sides, which are made expressly for them. No lights are allowed in the dormitories during the night in this institution as at Parramatta, and I think it would be beneficial to have some of the large rooms lighted; the lights could easily be so arranged that the patients could not interfere with them.

On the female side there are only four wards; the refractory, sub-refractory, hospital, and convalescent wards; the last opens on to the airing ground. All these wards are in the same crowded state as on the male side. Each yard is provided with bath-rooms and closets, but the same complaint is to be made here, as previously pointed out in the wards for the men; the places, also, appropriated as dining-halls are too small for the numbers who have to occupy them.

The store-room for small stores, is in the main building at the back of the office, but the provision store is out in the yard, at the back of the kitchen. There does not appear to me sufficient check on the issue of the goods and medical comforts; it will be necessary to introduce some forms, to place a greater restriction upon the issue of these articles. I also think it desirable that the storekeeper should be checked by the clerk, who should have a joint responsibility of all goods received.

No provision is made for checking the issue and receipt of the books in the library, which contains over 1,000 volumes; there is no catalogue nor any record kept of the books bought from time to time, and those lost or destroyed by the inmates.

Only one kitchen is provided for both departments, which does not seem adequate for the requirements of such an institution, and it is in a very dilapidated state; the bricks are all tumbling from the coppers and fire-places, and the floor has given way, from the rats having undermined it. At the Parramatta Asylum they have a separate kitchen appropriated for each department. On account of so many meals having to be provided at the one time, the food is cold before it can be distributed, and it must necessarily be prepared a considerable time before it is required, in order that it may be ready at the appointed hour; in addition to which, it has to be conveyed a long distance to the dining-rooms, so that the patients rarely get a warm dinner. Some arrangement might be made to provide steam plates, ovens, or other apparatus for keeping the meals in such a manner that they can always be served up warm.

The

The food provided for the inmates is of fair quality, and but little complaint is made of the manner in which the articles have been supplied; but the quantity of the tea and sugar allowed by the fixed scale appears to be barely sufficient, and the tea when made is consequently a very inferior beverage for the patients. There is also a difference in the scale of this institution as under, and that in use at the Parramatta Asylum. There appears no reason why this difference is made.

## SCALE FOR TARBAN ASYLUM.

## ALLOWANCES.

Ration No. 1, authorized to be issued to the attendants in the Lunatic Asylum, is composed of the following articles, viz. :—

1	pound fresh beef or mutton	} daily.
1	" bread, first quality	
$\frac{1}{2}$	ounce salt	
1	pound vegetables	} weekly.
1	gill milk	
6	ounces tea	
2	pounds sugar	

The following is the scale of general diet for the patients in the Lunatic Asylum, authorized by the Honorable the Colonial Secretary's letters, addressed to the Auditor General, No. 651, of the 13th October, 1846, and No. 1,304, of 20th October, 1852; and to the Superintendent of the Lunatic Asylum, Tarban Creek, Nos. 251 and 322, of 30th June, and 6th September, 1847; authorized 29th November, 1862 :— $\frac{1}{4}$  lb. bread additional for dinner, five days in the week; 1 oz. barley in lieu of same quantity of rice on soup days. The allowance of potatoes on the days when the additional bread is given to be reduced to  $\frac{1}{2}$  lb.

## RATION NO. 2.—FULL DIET—ON SUNDAYS AND THURSDAYS.

1	pound fresh mutton	$\frac{1}{4}$	ounce tea
20	ounces bread	$1\frac{1}{2}$	" sugar
1	pound vegetables	1	gill milk

## ON MONDAYS, WEDNESDAYS, AND SATURDAYS.

1	pound meat	$\frac{1}{4}$	ounce tea
1	ounce barley	$1\frac{1}{2}$	" sugar
$\frac{3}{4}$	pound vegetables	1	gill milk
$1\frac{1}{2}$	" bread		

## ON TUESDAYS AND FRIDAYS.

1	pound meat	$\frac{1}{4}$	ounce tea
$\frac{1}{2}$	ounce suet	$1\frac{1}{2}$	" sugar
6	ounces flour	1	gill milk
1	pound bread		

$\frac{1}{2}$  pound flour,  $\frac{1}{4}$  pound of raisins, and 1 ounce of suet, on Christmas Day and the Queen's Birthday, in addition to the authorized ration.

To be substituted in cases of sickness, at the discretion of the surgeon :—

## RATION NO. 3.—HALF DIET.

2	pints tea	$\frac{1}{4}$	ounce tea	1	pound bread
		$1\frac{1}{2}$	" sugar	$\frac{1}{2}$	" vegetables
		1	gill milk	1	pint broth
$\frac{1}{2}$	pound meat				

## RATION NO. 4.—LOW DIET.

2	pints tea	$\frac{1}{4}$	ounce tea	$\frac{1}{2}$	pound bread
		$1\frac{1}{2}$	ounce sugar	$\frac{1}{2}$	" vegetables
		1	gill milk	$\frac{1}{2}$	pint broth
$\frac{1}{2}$	pound meat				

## RATION NO. 5.—FEVER DIET.

2	pints tea	$\frac{1}{4}$	ounce tea
		$1\frac{1}{2}$	" sugar
		1	gill milk

$\frac{1}{2}$  pound bread (with sago, arrowroot, pudding, and other extras, as occasion may require).

1 ounce pepper and 25 ounces salt for every 100 full daily rations of provisions to patients.

Ration No. 6.—Forage is composed of the following articles, viz. :—

8	pounds maize or barley, or 10 lbs. oats
4	" bran
12	" oat or cultivated grass hay
4	" wheat straw

For each horse daily, and half these quantities for each bullock.

In case the entire ration of forage be not required or delivered, the maize, barley, or oats to be reckoned 4-12ths; hay 5-12ths; bran 2-12ths; and straw 1-12th of the full ration.

The authorized allowance of fuel and light for the use of the establishment, is as follows, viz. :—

7 fires and 1 oven in kitchen.....	$1\frac{1}{2}$ ton firewood daily throughout the year
25 other fires .....	4,000 lbs. firewood, each, per month, for 6 months
For general establishment.....	35 tons coals per annum
For the office .....	40 lbs. coals daily in winter
For 30 hand lamps .....	$\left\{ \begin{array}{l} 6 \text{ gills common oil, daily, in summer} \\ 10 \text{ do. do. do. in winter} \end{array} \right.$
For 3 hall lamps .....	$\left\{ \begin{array}{l} \frac{3}{4} \text{ gill kerosene, daily, in summer} \\ 1 \text{ do. do. do. in winter} \end{array} \right.$
Assistant medical officer, clerk, and	$\left\{ \begin{array}{l} 13 \text{ lbs. sperm candles, monthly, in summer} \\ 15 \text{ do. do. do. in winter} \end{array} \right.$
matron (for the three) .....	
For general establishment.....	20 lbs. candles (tallow), throughout the year

These quantities include hospital allowances and all other extras of fuel and light.

Cotton wick is issued in the proportion of 8 drachms for every gallon of oil.

The winter months are June, July, August, and September.

Provision

Provision is made, on Tuesdays and Fridays in each week, for cooking the meat into what is called pie, which does not seem to me a suitable kind of food, and as I saw it cooked I could not have eaten it. There is an absence of supervision over the preparation and distribution of the food, and the kitchen department, and some person unconnected with the medical staff should be made responsible for matters of this kind, who might have the whole management of the minor household duties, and check the issue of stores, as it cannot be expected that the medical officer can devote his time to such supervision.

A good supply of water is provided by a number of tanks. There is one in the kitchen yard, containing 48,000 gallons; one in the hospital ward, of 35,000 gallons; one 35,000 gallons in the outer yard, at the south-west corner on the female side; and roof tanks, holding about 11,500 gallons. In addition to which, a raised tank holding 20,000 gallons has been erected at the back of the institution, from which the water is conveyed by service pipes to all parts of the building. This tank is filled about twice a week from a reservoir, on the water reserve; the water is pumped up by a 12-horse power steam-engine, and passes through a charcoal filter as it is forced through the pipes.

In the inner airing-yards, improvements have been made by laying out the ground with paths and beds of turf; trees have also been planted in some, to give a more cheerful appearance to the place. Considerable progress has been made in clearing and levelling the grounds of the outer yards, and many of the loose stones have been removed, but a great portion of the land is still in a very rough state. It would be a great improvement if some seats and sheds were provided for the patients in the outer yards.

Amusements are allowed for the inmates, such as cards, draughts, bagatelle, hand and foot ball; tame rabbits and birds are also kept in the wards, for their diversion.

About three acres, at the east side of the male airing-ground, have been cultivated as a fruit and vegetable garden; in which there are a good number of fine bearing fruit trees. The fruit is grown for the benefit of the patients. There is one gardener allowed for working the garden, who is assisted by two or three of the patients. The ground supplies about four cwt. of vegetables and herbs a week; in addition to which, there is a general ration allowance.

Outside the garden an excellent bathing house has been erected, and an enclosure made for the patients to bathe in, well protected with strong piles.

The daily average number of inmates maintained in the institution, for the year 1867, was 564; and the total expenditure, including all stores, was £15,617 1s., but exclusive of the cost of buildings or repairs, &c., which gives the average yearly cost for each patient at £27 10s. 3d., or about 1/6 0/90 a day per head. For the management and working of the establishment, there were 7 officers and 48 attendants. The number of patients in the building on the 1st January, 1867, was 492; there were admitted during the year, 196; the deaths reaching 38, or 5.523 per cent.; the number discharged was 104, or 15.117 per cent. on the total number for the 12 months; remaining in the asylum on the 31st December, 1867, there were 546 patients.

#### DEAF AND DUMB INSTITUTION, SYDNEY.

This institution has now been open about 7 years, and is conducted by a committee of gentlemen and a visiting committee of ladies—having for its object the education of deaf and dumb children, who can be admitted on the recommendation of two members of the institution, or by a clergyman of the district in which the candidate resides, who is required to fill up certain forms.

The aid given by the Government is granted on condition of an equal amount being raised by private contribution. The first grant was £150, which was placed on the Additional Estimates for 1862; this was continued until 1864, when it was increased to £250, and for this year the sum of £450 has been appropriated.

When I first visited this institution, on the 9th June last, there were 11 girls and 7 boys, and it was carried on in a very unsuitable house in Pitt-street, which was badly in want of repair; it opened on to the street, and it contained only 8 rooms, most of them being small and ill-suited; there was no yard or recreation ground for the children to go to, and they had to be taken out to walk each day, when the weather was fine, as the only means of obtaining air and exercise for them; at all other times they were compelled to remain in the dining-room and school-room, which were on the ground floor close to the street. There were no means of separating the boys from the girls during the play hours. The seven boys had to sleep in one room 12 x 12, with only 3 beds. The matron had one small bed-room on the same floor as the boys, but no sitting-room; the other room on the first floor being used as a board-room and for receiving visitors in. The girls' dormitories were on the upper floor, being the only means of dividing the bed-rooms. The school was first opened in Castlereagh-street, in even a more unsuitable place than this.

A sum of £1,250 has been placed on the Estimates for 1868 for the purchase of suitable premises, on condition of an equal amount being raised by private contribution; but as the committee were not able to accomplish this during the present year, they took a lease of Ormond House, on the Paddington Road, for 3 years, at a rental of £100 per annum; and they are to expend £150 on improvements during the tenancy. The house is commodious, and stands on about 3 acres of ground, affording space for two separate play-grounds. The institution was removed from Pitt-street to this place on Tuesday, the 21st July last, and the number of inmates remained the same as at my first visit, viz., 11 girls and 7 boys. The children are far more happy and comfortable than they could possibly be in their old quarters. The upper portion of the house is divided

into two parts, with a separate staircase to each division. The girls occupy the northern side, and the boys the southern portion, so that they are now kept quite distinct from each other, except at school and dinner time. The matron (Mrs. Ashton) has her apartments between the dormitories, with a door leading into each department, so as to be able to exercise a proper supervision over all. On the ground floor there are four large rooms, which are occupied as board-room, school-room, play-room for the children in wet weather, and a sitting-room for the matron. There are three rooms on the first floor, over the school-room and passage, appropriated for the girls' dormitories, and two at the southern side for the boys; the rooms are neatly and well provided with separate beds and bedding for all. The dining-hall is a flagged room on the basement floor, adjoining the kitchen; there are several store rooms and two large attics. All the back part of the house commands a fine view of the harbour, and affords a very cheerful aspect to the place.

All the inmates have either one or both parents living; there are only two who are paid for by their parents, at the rate of £25 per annum, which is a condition of the school when they are able to do so; but most of them are unable from their circumstances to pay, though some subscribe small amounts and make contributions of clothing. The children are all well provided for by the committee, with both food and clothing—a very liberal dietary scale being allowed to them. The articles of food and clothing are not supplied by contract, but purchased at the lowest rate at which they can be obtained by the secretary and the committee. The matron accompanies the children to church on Sundays, and takes them out to walk during the week.

In the rules of the institution, it states that no child shall be admitted younger than 5 years, nor older than 12 years; but this rule has not been strictly adhered to, as there are now many over 12 years of age in the school. No definite arrangement has yet been made to provide for the children, nor are any trades taught to those who might be desirous of learning them, but this may be done at some future time. The parents, however, mostly remove the children themselves, as soon as they have been taught, and are able to work, and in many instances, they often take them away before they have reaped the advantages they could derive if allowed to remain a proper time, which is much be regretted.

While the income of this institution is so slender, and the numbers small, they cannot afford to have more than one teacher, nor can they separate the boys and girls during the school hours. At present the children are taught by Mr. S. A. Gilder, who does not reside on the premises, but attends daily. From the progress made, he is evidently well qualified for his position, and appears to take a great interest in his pupils. The mode of teaching is by the deaf and dumb alphabet, and by the use of signs, made with the hand, and with chalk upon a black-board fixed at one end of the school-room; they also use picture tables, and each child is known by a sign.

Daily boarders are received at the rate of one shilling per week, but at present there is only one attending the school. One female servant is allowed for the institution, who is assisted by the girls of the school in the performance of the household duties, and they are appointed in their turn to this work every morning; but this is not allowed to interfere with their school hours.

Visitors are admitted to the institution daily (Saturdays and Sundays excepted) between the hours of 10 o'clock a.m. and 3 o'clock p.m.

The total expenditure, as shewn by the balance sheet in the printed report for the year 1867, amounted to £711 5s. 11d., and the daily average number of children is shewn as eighteen, which gives the average yearly cost for each child at £39 10s. 4d., or about 2s. 1-984d. a day.

#### HAWKESBURY BENEVOLENT ASYLUM AND HOSPITAL.

This society was founded as far back as 1818; relief was then only afforded to out-door patients, but in May, 1834, a grant of 1 acre of land was given by the Government, in the township of Windsor, to enable the committee to erect a two-story brick building 34 x 31 for an asylum; a tender having at that time been accepted for the sum of £207, for the construction of the same; the building was not, however, completed until the beginning of 1836. Indoor patients were then received there until 1845, when the institution was removed to the building now in use in Macquarie-street, which was erected under Governor Macquarie, in 1820, for a prison hospital, and used as such until 1841. In 1845, the Government having no further use for this building, it was handed over to the trustees for the society, with the view to the formation of a benevolent asylum and hospital; and at the same time a grant of £200 was allowed by the Government to meet the necessary expenses; this aid is still continued annually, on condition of an equal sum being raised towards the support of the hospital by private contributions.

At present, the institution combines the threefold object of an hospital, an asylum for the infirm and destitute, and relief to the outdoor poor, for both males and females. The daily average number for the year 1867, is stated to be 55 indoor, and 23 outdoor patients; and the number will be about the same for the year 1868. The average cost per head for the year 1867, appears to be £16 17s. 8d. for the indoor, and £2 3s. 4d. for the outdoor patients.

In addition to the aid granted by the Government and voluntary subscriptions, there was during last year an income arising from interest on investments, £4,000, and for rent of land which has been granted from time to time, to the institution, amounting to £262 10s.; also £18 15s. for rent of the old asylum building, still in possession of the society.

The

The land belonging to the society is as follows, viz. :—

In the town of Windsor	...	...	1 acre.
Adjoining do.	...	...	13 acres.
Town of Wilberforce	...	...	10 "
District of Wilberforce	...	...	500 "
Mooki, Liverpool Plains	...	...	1,369 "
Total	...	...	1,893 acres.

They have also two runs near the land at Liverpool Plains, called the Mooki Runs—one comprising about 20,000 acres, the other about 16,000 acres—which are rented by the committee from the Government. In the early period of the institution, contributions were made by many subscribers in horned cattle, for the purpose of forming a herd, with a view of establishing an endowment fund; and these cattle increased until a very good herd was formed, and they were depastured on the Mooki Run; but owing to continued disputes which have arisen with the holders of the adjoining runs for a considerable time about the boundaries, and encroachments having been made upon the run, it involved the committee in arbitration and law costs to such a considerable amount that they found it necessary to sell the stock and lease the runs, which are now rented to a Mr. Price for £450 per annum, including the 1,369 acres of purchased land.

When I visited the institution (on the 3rd August), there were fifty-two inmates, being thirty-five males and seventeen females, nearly all of whom were infirm or destitute people, and not what may be termed hospital patients. All accidents or sick cases, for the whole district, are, however, taken in as they occur. Some of the inmates have arrived at very advanced ages, reaching eighty and ninety years, and one old man stated he had reached the great age of 111 years, and arrived here in the first ship with Governor Phillip.

The building is constructed of brick, and stands on about an acre of ground, facing east; it has four large wards, capable of holding about sixteen beds in each. One of the wards is appropriated for an hospital, and one for the women; the other two are used for ordinary patients. There is a small dispensary at the south end of the building, but only a few simple drugs are kept on hand, all the principal medicines being supplied by contract from the township. No general dining-hall is provided for the inmates, and the meals are served from the kitchen to each room, in all of which there are tables and forms arranged at the foot of the beds; and as there is no other place except the verandah, for the men to sit in, they are permitted to go into the rooms during the day, which is not allowed in the Government Asylums. The yard is covered with ironstone gravel, and from the constant traffic in and out all day, a considerable quantity of dirt is carried into the wards; this, with the dormitories being converted into dining-rooms, creates an absence of order, and prevents the place having that neat and cleanly appearance that an institution of this kind should have.

The men also go into the wards and sit, or lie down on their beds, in the day-time, which ought not to be permitted, as it prevents the rooms and bedding from being properly aired. A dining hall for both men and women might easily be erected, by roofing in the space between the main building and the kitchen, which is only about thirty feet distant; but the want of funds is the great drawback in carrying out any proposal of this kind.

No provision is made for keeping the women apart from the men, beyond their having a separate ward—there being only one yard in common, and one entrance to the wards for both sexes.

There is no regular bathhouse or lavatory, but a portable bath is placed in a building at the back of the kitchen, which is used as a dead-house, and the inmates go there to wash.

The institution is supplied with water from a large tank, built in the yard, underground, which is filled from the roof of the building; and in dry seasons, when it gets low, water is obtained from the river.

The closets were in a very bad state of repair, and filthy for want of some kind of drainage, or urinals being provided; there was also a large open tank in the yard, close to the closets, full of stagnant water, which I was informed would be cleared out and filled up; but the odour from these places must, it appeared to me, be very injurious to the health of the inmates.

A small detached cottage is provided for the residence of the superintendent (Mr. T. Paul), and adjoining it is a store-room, which has been built for keeping the supplies in. The provisions, which are supplied by contract, appeared to be all of very good quality, and the inmates well provided for in both food and clothing.

The scale of rations is—

Sugar...	...	2 lbs. weekly.
Tea ...	...	2 ozs.
Bread...	...	1 lb. daily.
Meat ...	...	6 lbs. weekly.

The superintendent is allowed rations for himself and wife.

In most of the benevolent societies tobacco is allowed to the patients; but about the time of the American war, when this article rose to a very high price, one of the committee made a proposal to abolish this allowance, considering the object of the institution

institution was to provide for the necessities, and not the luxuries of life, which was agreed to, and a saving of between £40 and £50 per annum has been effected ever since in the annual expenditure of the society, as the allowance has not been granted.

Only one warder is allowed for the institution, at a salary of £30 per annum, and one cook is paid at the rate of 5s. per week. All the inmates who are able to work, render assistance in cleaning the wards, cutting wood, &c., for which they receive some small gratuity of tea and sugar, or other articles, but no allowance is paid in money.

Meetings are held by the general committee on the second Wednesday in each month for the transaction of business, and the institution is visited daily by one of the visiting committee. The total receipts of the society for the year 1867 amounted to

£1,114	2	4
The balance in hand on 31st Dec.,/66, was..	113	17 6

	1,227	19	10
The total expenditure was (in gross) ...	1,222	0	2

Leaving a balance of... ..	5	19	8
----------------------------	---	----	---

at the beginning of the year 1868.

The treasurer also held fixed deposits and Government securities amounting to £4,000.

#### PENRITH HOSPITAL AND BENEVOLENT ASYLUM.

The present hospital and benevolent asylum has its origin from the establishment, as far back as 1846, of a district dispensary. A collection was made at the opening of the "Cumberland Order of Odd Fellows," for the purpose of forming a dispensary for the relief of the poor and distressed of the district. At a public meeting held on the 27th October, 1846, a committee was formed, and Dr. Patrick Glissan was appointed as surgeon, for the purpose of carrying on the society under the designation of the "Penrith District Dispensary"; all subscribers of 10s. 6d. per annum being entitled to keep one patient on the books of the society; and considerable relief was afforded in this way to the poor of the district, but it was found insufficient to relieve the wants of the numerous cases of distress, which were daily increasing; and on the 27th of December, 1847, a second public meeting was called, when the designation of the society was changed to the "Penrith Dispensary and Benevolent Society." From that date, food, and other comforts, in addition to medicines, were distributed amongst the poor. In the first report of the district dispensary for the year 1847, it appears that seven cases were visited by the surgeon at their own homes, and nineteen patients obtained relief from the dispensary, the cost for that year being £53 9s. 3d., while the receipts were £64 15s. 2d.; and the expenditure continued at about the same rate until the completion of the hospital in 1857. The society is conducted by a president, vice-president, honorary treasurer, honorary secretary, and a committee of twelve, together with all the clergy of the district.

Until 1855, the society was supported entirely by private contribution, when, on 18th July of that year, the president addressed a letter to the Colonial Secretary, stating they were desirous of erecting an asylum, as the society did not sufficiently meet the wants of the district, and asking aid from the Government to the extent of £500, on condition of a similar amount being raised by private contribution, which request was granted, and Admiral King, who had been a great benefactor to the society since its first establishment, offered to give one acre of land to the society, on his property in the vicinity of Penrith, which offer was accepted, and the present building is erected on this allotment.

In the report of Dr. Clarke for 1855, he states having ridden over a distance of 293 miles while visiting twenty-two patients for the society during the year. At the commencement of the year 1856, a change was made in the appointment of the surgeon, by Dr. Willmott being elected to the office; he was also made one of the building committee for the hospital. The total amount of collections shown up to the 23rd July, 1856, as subscribed for the benefit of the society, amounted to

£369	9	8
And towards the building fund...	207	3 4

Total ... ..	£576	13	0
--------------	------	----	---

On 12th September, 1856, the tender for £1,150 was accepted, the building was proceeded with, and finished on 16th November, 1857. The progress of the society at this time does not seem to have been so good as in previous years, and little appears to have been done with the building until February, 1860, when it was agreed that Dr. Willmott should occupy apartments in the hospital, and that pauper patients be admitted on the orders of subscribers, 1s. 6d. per diem being paid from the funds of the society for the support of each patient, exclusive of medical comforts; and two servants were also allowed for the institution, at the rate of £30 per annum, to act under the medical officer. This arrangement does not appear to have been a good one for the society, so far as the funds were concerned, for the expenditure was considerably on the increase, while the subscriptions were on the decrease; the amount paid for medical aid being more than the position of the funds warranted, as it appears to have absorbed nearly all the amount subscribed; consequently the society became involved. In December, 1864, Dr. Willmott gave notice that he wished to vacate the premises, and be relieved of the position as paid surgeon. Dr. Clarke, who has greatly assisted the institution, was then requested to act in concert with Dr. Willmott—both to give their services gratuitously. To this Dr. Clarke assented, and he also undertook the duties of the honorary secretary, as well as having the general management of the institution vested in him.

The

The funds of the society at this time were very low, but the committee when relieved of the heavy charges for medical attendance, were soon able to clear off the liabilities, and at the end of last year there was a balance to the credit of the treasurer of £158 14s. 1d.

The building is constructed of brick; and, for the money that has been expended, it is a very inferior piece of work, being badly constructed, and no attention paid to ventilation. It is two stories high, with an open balcony, and contains four wards about 25 x 18, capable of holding eight to ten beds in each, but only two of the wards are appropriated for the use of the inmates—one on the ground floor for the men. The second upper ward is appropriated for the warder and matron's quarters, and the other lower ward has been divided into three rooms, affording a board-room, a small dining-room, and a room provided for a dispensary, but it is not used as such now, only a few drugs being kept on hand, which are obtained from Sydney as required. The inmates being few, no contracts are taken for supplies, but they are obtained in such quantities as required, and of good and substantial quality. The accounts are all first approved of by the surgeon, and afterwards by the committee.

There is an out kitchen, and a slab room adjoining, which is used to afford shelter to travellers, or to give a few nights' lodging to those who may not be considered eligible for admission into the building. It is also used as a dead-house. It has been proposed to fit up the remains of an old stable, further from the building, for this purpose, which is very desirable. The institution is supplied with water by two large galvanized iron tanks, which provide for all ordinary purposes; but if in dry seasons they run short, water can be obtained from the Nepean River. The establishment is under the charge of Mr. Allen, who acts as warder, and his wife performs the duty of matron. There is no bath-room, and the building is not well provided with furniture; some of the bedding is very old, many of the bedsteads being in need of repair. Most of these articles have been given at different times as donations to the society, and are not so suitable as those supplied to other institutions.

The hospital is established for persons suffering from severe accidents, or those labouring under diseases that do not admit of their receiving treatment at their own homes. Patients are also supplied with medical advice and medicines, upon their presenting themselves at the hospital.

The institution also affords a home for the old and infirm residents of the district, providing such comforts as their cases may require. Any subscriber who contributes £10 per annum is entitled to have one patient always in the asylum throughout the year; and £5 gives the same privilege for six months; £2 2s. constitutes a member with the right of recommending one patient for indoor treatment and six persons for relief at the hospital.

I find that the Government first contributed towards the maintenance of the society in 1861, when £200 was placed on the Supplementary Estimates for that year; and this amount has been continued each year since, but only a proportionate sum, equal to the amount raised by private contribution, has been paid from the yearly vote.

During the heavy floods in June, 1867, the society were able to afford shelter and food to ninety-four individuals who were rendered homeless through the calamity which befell the district.

A great deal of good has been done, and much distress relieved since this institution was first established, the locality being one in which it is very desirable an institution of this kind should be well supported. At the time of my visit (on the 12th August) there were only two inmates in the establishment under the list of aged and infirm; and one case was admitted to the hospital while I was there.

During the year 1867 there were forty-one male and five female patients admitted, and four males remained in the building from 1866. Thirty-eight males and five females were discharged cured, and five males died, shewing the deaths at 10 per cent. on the total admissions. Two patients remained in hospital at the end of the year; and only one male and two females received out-door relief. The daily average number of inmates at the institution is ascertained to be  $7\frac{1}{2}$ , and the total cost of maintenance for the year, £207 17s. 5d., which will make the annual cost per head £26 16s. 5-250d., or about 1s. 5-636d. per diem for each patient (not allowing for three out-door patients).

The subscriptions only amounted to £93 15s., including £5 11s. for fines from the Police Court, and the amount obtained from the Government was £130 4s., which was paid from a vote of £200, granted on condition of an equal sum being raised by private subscription. There was a balance in the hands of the treasurer at the beginning of this year of £158 14s. 4d.

R. C. WALKER,  
Inspector of Public Charities.

## APPENDIX A.

RETURN of the Cost of Maintenance and Working of various Charitable Institutions aided and supported by the Government of New South Wales; shewing the yearly and daily rate per head for support of Inmates during the year 1867.

LAW RELATING TO LUNACY.

---

PROGRESS REPORT.

---

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 4th March, 1869,—“*with power to send for persons and papers*”—“*to inquire into and report upon the administration and “state of the Law in relation to Lunacy*”—have agreed to the following Progress Report:—

Your Committee have examined the witnesses named in the margin\*, from whose evidence, appended hereto, it appears that further legislation in reference to Lunacy is imperatively called for; but as your Committee was only recently appointed, it has not been found possible to complete the investigation satisfactorily this Session. They would therefore recommend to your Honorable House, that the inquiry be resumed early next Session.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

## LAW RELATING TO LUNACY.

WEDNESDAY, 17 MARCH, 1869.

Present:—

MR. BURNS,  
MR. WILSON,MR. DODDS,  
MR. PIDDINGTON.

JOHN FITZGERALD BURNS, ESQ., IN THE CHAIR.

Thomas Dangar, Esq., called in and examined:—

1. *Chairman.*] You have been a Magistrate of the Colony for several years? Yes.
2. And also for Queensland? Yes, I am a Magistrate for Queensland now.
3. You are aware of the objects for which this Committee is appointed? Yes.
4. You have had several years' experience in the Central Police Office and Water Police Office, in regard to the mode in which lunatics are committed to the asylum? I have.
5. Would you be good enough to describe the process, in so far as the Magistrates are concerned? Very often the friends or relatives of the supposed lunatic apply for a warrant for his apprehension; they swear to an information that they believe him to be dangerous, unfit to be at large, and likely to commit an indictable offence. On that, a warrant issues for his apprehension.
6. Are lunatics or supposed lunatics sometimes apprehended without warrant? Yes, they are sometimes given in charge to constables; or if constables see that their minds are impaired, they apprehend them without any further directions from the Magistrates. It is their duty to do so.
7. *Mr. Wilson.*] They bring them up for protection? They bring them up for protection before a Magistrate, for supposed insanity.
8. *Chairman.*] How are the proceedings in these cases usually conducted before the Magistrates? When the warrants are granted they are handed over immediately—the same day, or the same hour perhaps—to a constable to execute. The supposed lunatic is then brought to the lock-up, where his name is entered on the police-sheet; and then during some part of the day he is brought before the Magistrate or two Magistrates, as the case may be. The constable's evidence is taken as apprehending constable; and if the friends, or the party who applied for the warrant, are not in attendance, the person said to be insane is remanded to Darlinghurst Gaol for the attendance of the surgeon.
9. Is that sufficient, without having the declaration of the surgeon as to the person's insanity? The Magistrate has power to remand the supposed lunatic, merely on the constable's evidence, without even the party being present who applied for the warrant. Generally speaking perhaps, the remand is only for twenty-four hours, that is, until next day, so that the surgeon and the interested parties may be brought before the Court to give evidence.
10. What medical evidence is required by the Magistrates to enable them to commit a person to the asylum? The evidence of two surgeons. Very often, remands take place previous to their committal to the reception-house to be dealt with according to law. I have remanded a supposed lunatic two or three times, and ultimately discharged him; perhaps he has only been temporarily insane from the effects of drink.

Thos. Dangar,  
Esq.  
17 Mar., 1869.

- Thos. Dangar, Esq. 11. If two medical men certify that a person is insane, are not the Magistrates bound to send him to the asylum? Yes, under the second clause of the Act 7 Victoria No. 14.
- 17 Mar., 1869. 12. Do you think it desirable that Magistrates should have no discretionary power in matters of that kind? Magistrates have no discretionary power—they can only expostulate with the surgeons, as with these gentlemen the responsibility rests.
13. Do you think the Magistrates ought to have some discretionary power with regard to committal? I think they ought.
14. Even though two surgeons should certify to the insanity of the person charged? Yes.
15. Do you say you have had to remonstrate with medical men for sending persons to the asylum improperly? Yes. We have refused to decide on the day of inquiry; and, on the next day perhaps, other two Magistrates have carried out the surgeons' opinions, and sent the lunatic to Tarban Creek.
16. When acting as a Magistrate, have you felt satisfied in your own mind that, in some cases in which you have had to commit on the certificate of two medical men, the parties were improperly sent to the asylum? Yes, I do think so; and some of those that have been sent have been very shortly afterwards liberated by the authorities of Tarban Creek—I have seen them walking the streets very shortly after. Perhaps, if the Visiting Board sat oftener they would have been liberated sooner, as it takes some days to procure a warrant from the Executive.
17. Has it occurred to you that certificates from medical men, respecting the insanity of parties, can be obtained with too great facility? Yes, from the loose manner in which the proceedings are conducted by the surgeons. For instance, a lunatic is apprehended at perhaps 11 or 12 o'clock, and brought before the Magistrates; the Police Surgeon, of course, is generally in attendance about 12 o'clock; he picks up a surgeon on his way, or sends for one who comes to assist him as the Act requires two surgeons. They are sometimes not ten minutes examining the patient, and their depositions are very short, and written so as to embrace the words in the Act. I have on many occasions signed warrants for two or three supposed lunatics, on the evidence of the surgeons, in the space of half an hour; and my opinion has been and is now, that from the loose way in which the surgeons examine the patients and fill up the printed form, there is some alteration required in the present law as to examinations of this kind before Magistrates. The Magistrates have no responsibility whatever; they are compelled by the present law to send any person to Tarban Creek, if two surgeons are corrupt or careless enough to give the required certificate. Of course, I do not say they are corrupt.
18. Has it appeared to you that neither of the surgeons on the occasions they have so certified have had sufficient knowledge of the patient's antecedents? They have no knowledge of them whatever in most cases. Neither the Magistrates nor the surgeons have ever seen the party before, as a rule.
19. Do you think that the surgeons have, in many instances that have come under your observation, acted on the representation of the friends of the supposed lunatic? In all cases. There may have been, during the four years I acted, to be within compass, six cases where the surgeons had attended the families and known something of their antecedents—something of their complaints.
20. Six cases out of about how many? I suppose I have sent perhaps a hundred—I have sent as many as three in one day.
21. You are clearly of opinion that in the vast majority of cases the medical men had little prior knowledge of the party whom they certified to be insane? None whatever; and many of the surgeons, possibly, have been in small practice, and the fees have been very encouraging.
22. Inducements to certify? They might not induce them to certify wrongly. There has been some bad feeling, I believe, among surgeons generally, as to favouritism in sending for particular surgeons.
23. Are you satisfied, from your experience as a Magistrate, that persons have succeeded in having parties sent to the asylum as insane who really were not insane, and did so from improper motives? I am certain of it. Myself and a brother Magistrate prevented two very respectable persons from being sent to Tarban Creek. In one case his relatives brought an old gentleman up believing him to be insane, and they swore he was insane; but myself and Captain Scott thought it was done for the sake of getting his property, and we solicited a friend of ours, a solicitor, to take up the case, and it was proved to our satisfaction that the man was perfectly sane.
24. Did the medical men in that case certify that he was insane? They gave evidence, but I am not positive whether they signed the usual certificate.
25. How did you prevent his committal to the asylum? There was a great deal of evidence taken in the case. It is a good while ago, and I do not now remember whether one or two surgeons were examined.
26. Did the promoters of the movement for his committal abandon the case? We dismissed the case, taking the responsibility upon ourselves.
27. Would not your decision be opposed to the law? No, not in that instance.
28. Did not two medical men certify that the person was really insane? I am not quite sure about that.
29. Have other cases come under your observation of the same character? There was one not very long ago, where a sister brought her married sister up for insanity and swore she was insane. The husband of the supposed lunatic assisted in giving evidence as to his wife's insanity; but the case was so glaring that myself and brother Magistrate urged the woman to get a warrant against her husband and sister for conspiracy and perjury. It was proved before us that this married woman was perfectly sane, and they only wanted to get rid of her for some improper purpose.

30. Were any proceedings taken against them for perjury? No, we could not induce the young person to proceed against her husband and sister. Thos. Dangar,  
Esq.
31. Is she still at large? Yes, and has never been before the Court since. 17 Mar., 1869.
32. How long ago is this? Ten or twelve months ago. It was a very glaring case.
33. Could you make any suggestions as to the improvement of the law with regard to the committal of parties for insanity? I believe in the amended law, 31st Victoria, No. 19, the Legislature, have made a great mistake. I believe the object of the amendment was to prevent any supposed insane person from being sent to Darlinghurst Gaol at all. But all persons brought before Magistrates for *delirium tremens*, or any slight supposed lunacy, despondency, or impaired mind, unless two surgeons come forward and certify, are still sent to Darlinghurst Gaol according to the former Act, although the reception-house was built for all supposed lunatics.
34. Do you find from experience that the reception-house has been applied to the purpose for which it was intended? Not at all. I believe it is quite useless, and a great number of servants are kept there with nothing to employ their time; because, when two surgeons certify, the Magistrates have no other power but to commit the parties to this reception-house to be dealt with according to law; and they only wait there perhaps twenty-four hours, or it may be a shorter time, while the proper authorities give the proper order to send them to Tarban Creek.
35. Can you make any suggestion as to a greater safeguard for the liberty of the subject, with regard to the certificates of surgeons in the first instance? I believe all supposed lunatics should be brought before the Magistrates, and remanded to the reception-house, and there examined, not by surgeons brought in promiscuously for the sake of the fee, but by a board of surgeons to be appointed by the Government; and the supposed lunatics should be kept there some days to be watched, and their antecedents inquired into—as to whether any of the family had been insane, whether they had been given to intoxication, and so on. At present, the surgeons are brought in in a hurried manner, and it is impossible for them to know whether the party is insane or not. In fact, I think they have committed perjury in many cases that have been heard before me, because they have no opportunities of judging, from the short time the parties are before them, whether they are insane or not.
36. You think there should be a medical board, or that the surgeons should be better acquainted with the supposed lunatics before the Magistrates are compelled to act upon their certificate? Yes.
37. And then, with regard to the receiving-house, you think they should be detained there, until proper inquiry can be made and the parties' conduct observed, before they are sent on to the lunatic asylum? Yes; and I would suggest, that the depositions taken before the Magistrates, in the first instance, should be sent with the supposed lunatic, and after a proper time for examination at the reception-house there should be a report sent back with the supposed lunatic to the Magistrates for their guidance. It would be impossible for the surgeons to liberate any one proved not to be insane, because the Magistrates' committal would have to go with the proceedings. They could not be liberated at the reception-house, but would have to come back before the Magistrates again, to cancel the warrant or otherwise.
38. The law could be altered in that respect? That was intended, I believe. One of the Legislative members, pleading before me against a lunatic on one occasion, said that it was intended that they should be all sent to the reception-house; whereas, more are sent to Darlinghurst Gaol now than to the reception-house, to be degraded in the gaol. The reception-house is quite useless at present.
39. Are not nearly all the supposed lunatics now sent to Darlinghurst Gaol? All those not certified to be insane by two surgeons. They are remanded to Darlinghurst Gaol, perhaps for seven days, for medical treatment; and, perhaps, when returned to the Police Court, are remanded again for further treatment.
40. Do you not think all ought to be sent to the receiving-house? Yes, all of them.
41. What is the object of the remand generally? They are remanded generally for so many days for medical treatment. That is on the face of the warrant.
42. You think it would be better if that treatment was administered at the reception-house? Yes.
43. It is undesirable that these persons should be sent to gaol at all? Yes; after the reception-house was built, I believe, it was never intended they should be. The first case that came before me, after the passing of the amended Act, I sent to the reception-house on remand, but they refused to take the party in, and the warrant had to be altered. The fees are a great inducement to the surgeons. They get a guinea for the first case, and half-a-guinea for the second and each subsequent case if there are several, on the same day.
44. Mr. Wilson.] From what I gather from your evidence, I think you have stated that certain medical men have granted certificates of lunacy in cases where the parties were proved to be sane? No, they gave evidence to the best of their belief. I do not mean to say that they gave certificates; they swore to the best of their belief that the parties were insane, and myself and other Magistrates have expostulated with them, and they have replied—That we must take the responsibility upon ourselves,—that was their opinion, although it was not ours.
45. Were these cases brought under the Lunacy Act 7th Victoria No. 14? Yes.
46. In these cases, is it not provided by the 31st Vic. No. 19, that "Every medical practitioner signing any certificate under the second third or eleventh sections of the Act of Council 7th Victoria No. 14 shall specify therein the facts upon which he shall have formed his opinion that the person to whom such certificate relates is insane or, is an idiot distinguishing in such certificate facts observed by himself from facts communicated

Thos. Dangar, Esq.  
 17 Mar., 1869. communicated to him by others and no person shall be committed to any Lunatic Asylum or house licensed for the reception of lunatics under any certificate which purports to be founded only upon facts communicated by others." Now, the law prescribes that such a certificate must be given in all cases of lunacy brought up under the Lunacy Act? There is a form which they fill up in all cases. The two surgeons sign their names on the top and fill it up.

47. I understood from you that you were speaking of cases where this certificate had not been given? No.

48. Is the certificate given in the first instance, and the medical men examined by the Magistrates afterwards? We have no other alternative but to commit the supposed lunatics to be dealt with according to law, on that form being filled up and certified by two surgeons, and their giving their evidence that they believe the said parties are dangerous and likely to commit some indictable offence. The party may seem quite sane to the Magistrates' view, and still the surgeons say—"We know better than you," and then have replied to us—"That we must take the responsibility—if anything happens in case we liberate the parties after the surgeons' testimony, and this form being properly filled up."

49. But by the 7th Victoria No. 14, you are not compelled to commit. It says the Justices must be satisfied by the evidence given that the person charged is insane and dangerous before they are bound to commit? I may say, that in many cases I have doubted the surgeons' testimony, and have discharged the parties. At the same time, I have been taunted before doing so by the medical gentlemen.

50. By their telling you that if you did so, you did it on your own responsibility? Yes. In one case a man was brought up for being in the Domain, and calling himself King. He asked the doctor—"Why do you think me insane?" "Because you said you were King, and you were not King." That was all; and the man was sent to Tarban Creek. There are many such frivolous cases as this from the effects of intemperance. Many have been brought before me who, I am quite satisfied, were quite sane; and if they had been remanded to the reception-house, and properly treated for a few days, they might have been returned to society.

51. Do you think Magistrates, sitting in Petty Sessions, are in many cases fit judges, whether a man is sane or insane? No, I do not.

52. You admit that there is great difficulty in determining the sanity or insanity of a person? Yes.

53. You are aware that persons known to be dangerous lunatics, often pretend, and with great tact, to be perfectly sane? Yes, there is great cunning about them.

54. With regard to those persons who, you state, are often brought up suffering from *delirium tremens*—are they in all cases treated under the Lunacy Act? Yes.

55. Why are they not sent to the receiving-house? It cannot be done under the third clause of the 31 Vict. No. 19.

56. This third section gives the Justices the absolute power of committing to the reception-house instead of the gaol? There is a difference of opinion upon that point. The Colonial Secretary, or the authorities here, has been applied to. There was one sent to the reception-house of the description you name, and he was ordered to be sent to Darlinghurst Gaol; the warrant had to be altered.

57. I may state that it is within my knowledge, that the late Attorney General gave an opinion that all parties brought up under the Lunacy Act, and certified by medical men to be insane, ought to be sent to the reception-house and not to the gaol? They are, when they have been brought before two Magistrates, and two surgeons have certified to their insanity; but when the case is not complete—when no surgeon has been examined, or only one—they are remanded to Darlinghurst Gaol. Those sent to the reception-house are committed to be dealt with according to law.

58. Are there not a very large number of cases of persons suffering from *delirium tremens*—would you think it proper to send them to the reception-house, when remanded for medical treatment? Yes; and some very respectable persons are sent to gaol, when two or three days treatment would make them quite right.

59. I question very much whether the Magistrates are bound to take into consideration the respectability of these persons, when dealing with them under such circumstances—all ought to be dealt with alike, poor as well as rich? I think the degradation is very great to a person who may be found in that state, to be sent in amongst a lot of criminals, when the reception-house was built for all supposed lunatics.

60. Have they not degraded themselves sufficiently by going about the country under the effects of drink, and producing upon themselves *delirium tremens*. It seems to me that you are confounding cases of lunacy proper with cases of *delirium tremens*, where people are brought up by the police for protection. Now, in my opinion, the reception-house was never intended for such people. It was only intended for those who, to use the common phrase, have become lunatics by the act of God and through no fault of their own; and not for those who have become temporarily insane from the abuse of intoxicating drink? I have known a great number of cases of confirmed lunatics, in which the parties have been brought up just before the office closed. No surgeon perhaps has been present; and as there are no means of keeping them at the lock-up to prevent them knocking themselves about, the Magistrates have been obliged to remand them to gaol until the proper evidence should be forthcoming. That was never in my opinion intended by the Act.

61. Do you think it would be proper to give power to a single Magistrate to commit a person, as being insane, to a lunatic reception-house? No, not to commit, but to remand for further inquiry.

62. *Chairman.*] You mean that they might be sent to the reception-house until proper inquiry has shown whether they were lunatics or not? Yes.
63. *Mr. Wilson.*] Then, you would recommend that this Act should be so far amended as to give one Magistrate jurisdiction instead of two? Only to remand them to the reception-house, the same as he can now to the gaol. He should have the power to send them to the reception-house instead of the gaol. Mr. Windeyer prosecuted for the wife of a lunatic\* a short time ago before me, and when this was pointed out to him, he, as a member of the Legislature, informed me in the presence of the Bench, that, as he thought, it was intended that all supposed lunatics were to be sent to the reception-house.
64. We now see that, by the 31st Victoria No. 19, all supposed lunatics brought before two Magistrates can be sent to the reception-house—consequently all you would suggest is that one Magistrate should have the power of remanding to the reception-house? Yes. All who may be brought up as being of weak mind.
65. Do you include people labouring under *delirium tremens*? I include all.
66. There are a large number of old women constantly getting drunk and labouring under *delirium tremens*—would you send such parties as these, confirmed drunkards, lying about the streets, to a lunatic reception-house? Generally speaking, they are brought up as vagrants, not as lunatics. In all cases of supposed lunatics, parties must come forward and deliberately swear they are of unsound mind, and likely to commit an indictable offence; and these parties you speak of are quite harmless.
67. You have the power, as I understand you, already to commit all such persons to the reception-house? We have not, unless this form is filled up and affidavits are made by two qualified surgeons who are paid for making these affidavits. What I complain of is, the hasty manner of their examination. They will pass three or four of them in half an hour, only looking at their eyes and perhaps asking a few questions.
68. Are cases of *delirium tremens* entered upon the police-sheet as being of unsound mind? Yes.
69. And you think all such cases as these ought to be sent to the reception-house for lunatics, and not to the gaol? Yes, that is my opinion.
70. You said something just now about the large staff of officers at the reception-house, can you tell the Committee what number of officers are employed there? Only from hearsay; I have heard there is a large staff.
71. You do not know how many are employed? No.
72. You also suggested that it would be necessary or proper, in your opinion, to have a board of medical men to examine these supposed lunatics before they are sent to Tarban Creek? Yes, instead of their being examined in such a hasty manner.
73. Are you aware that there is a board to examine them as soon as they go to Tarban Creek? I have heard so.
74. A board of medical visitors, who are supposed to examine into these cases? Yes; I know that as many as I have sent, the board have discharged them or recommended their discharge to the Executive soon after, because I have seen them walking the streets very shortly afterwards.
75. *Mr. Piddington.*] Is it the general practice of Justices of the Peace to commit alleged lunatics upon the certificate of two medical men? Yes.
76. Are you of opinion that a certificate from two medical men is in all cases sufficient evidence upon which to commit any person as an alleged lunatic? I am not. I may add that sometimes the relatives give evidence as well.
77. Are you of opinion that a board of medical men ought to be appointed for the purpose of examining alleged lunatics? I am.
78. How many medical men do you think should constitute the Board of Examiners of Lunatics? I think three or five.
79. Do you think these medical men ought to constitute a permanent board? I do, considering the number of cases in this Colony.
80. As distinguished from a temporary selection? Yes.
81. Are you of opinion that no alleged lunatic should be committed to any lunatic asylum, unless on previous examination before the Medical Board? I think they ought to be examined by the board before committal.
82. Do you think the report of the Medical Board ought to be submitted to a Bench of Magistrates before a committal to an asylum? As I suggested, I think their report ought to be sent to the Bench of Magistrates.
83. Do you think that, in all cases, the decision of two Magistrates is sufficient security against the risk of a person being committed as insane when he may not be insane? I do not; three Magistrates would be better than two.
84. Then you think it desirable, in order to afford better security against the risk of committing a person to the asylum who may turn out to be sane, that the Bench of Magistrates should not consist of less than three. Yes.
85. And I gather from you, that in all cases you think the alleged lunatic should be examined by a Medical Board, and that the report of the Medical Board should be submitted to the Bench before committal? Yes.
86. Do you think, if all these securities were taken they would form a sufficient security for the protection of persons against erroneous decisions? I think they would.
87. Does it strike you, from your experience, that any other course of proceedings would afford better security against mistake? I have always found the Police Surgeon, and whatever surgeon may be promiscuously sent for, invariably agree. There is never any disagreement in the examination of the patient, which only occupies a few minutes.
- 88.

\* NOTE (on revision):—This person is now discharged from Tarban Creek.

- Thos. Danger, Esq. 88. I want to know whether any other kind of security has struck your mind besides this security; or do you think this so absolutely sufficient that you have not paid attention to anything else? I think that is all that would be required.
- 17 Mar., 1869. 89. It would afford entire security? Greater security than at present.
90. Do I gather from you that the practice is now not to send persons, supposed to be lunatics, to the reception-house recently built? Not unless the form is filled up by the surgeons, and the parties are committed by two Magistrates. But one Magistrate may remand to Darlinghurst Gaol.
91. Should any person be sent to the reception-house who is not suspected of insanity, bearing in mind the object for which that building was erected? I think they all ought to be sent there that are suspected of being of unsound mind. They all ought to be sent there in the first instance.
92. Are they not all sent there who are suspected of being lunatics? No.
93. What class of persons are not sent there? Many are not sent there that are sworn to be of unsound mind and likely to commit an indictable offence, but they are remanded by the Magistrates for want of evidence, and sometimes two or three days elapse before the proper evidence can be brought before the Magistrates. During that time they remain in Darlinghurst Gaol. When they are again brought before the Magistrates, possibly the surgeon says they require further medical treatment, and they are again remanded to Darlinghurst Gaol. In some cases I have remanded a supposed lunatic three times, and ultimately he has been discharged on the certificate of the medical man.
94. Do I understand you to state, that there are two classes of individuals who are directed by the Magistrates to be treated as of unsound mind: one class being sent to Darlinghurst Gaol, and the other class to the reception-house? Those proved before two Magistrates to be insane, on the evidence and certificate of two surgeons, are sent to the reception-house; but where there is no medical testimony—only the constable's evidence possibly—they are remanded for medical treatment, to be brought again before the Magistrates, who then hear the surgeon's evidence; and if he says the party is not insane, he is discharged, after being incarcerated in Darlinghurst Gaol for from seven to ten days or longer.
95. Are these cases where the parties are liable to commit an act of violence? Yes; they are apprehended on a warrant, sworn by some person that may be related or a friend.
96. The only ground on which you commit, is the ground of unsoundness of mind? Yes.
97. And although committed on the ground of unsoundness of mind, they are not sent to the reception-house? In these cases they are not committed but remanded.
98. What is the reason of the distinction between these two cases, both being cases where persons are charged with being of unsound mind? In one case the evidence is complete; in the other the evidence is not complete, because according to the Act it requires two surgeons before you can commit any person to Tarban Creek.
99. Do I understand you, that when these two forms are filled up, the Magistrates invariably commit to the asylum on the strength of these documents? Yes, and they are sent with the warrant.
100. Do the Magistrates commit on the strength of this description of the previous habits of the alleged lunatic, without any further inquiry? They have the certificate and sworn testimony of two surgeons.
101. Do the Magistrates invariably commit on the certificate of two medical men? There have been perhaps two or three cases where the Magistrates have disagreed.
102. What is the result in case of their disagreement? Possibly the same party is brought up before two other Magistrates.
103. You are of opinion that in all cases, without exception, where parties are brought up before the Bench on suspicion of being of unsound mind, they ought to be sent to the reception-house? Yes, and that is the opinion of my brother Magistrates.
104. Was not the receiving-house built for the purpose of receiving all persons of unsound mind? Yes.
105. Would not the receiving-house be a more proper place than a gaol for the treatment of persons of alleged unsound mind? I think so.
106. Could not persons in that unfortunate position receive greater attention and better medical treatment there than in a gaol? Yes.
107. What obstacle do you think exists to the reception of all persons of supposed unsoundness of mind into this reception-house? The very first case under the amended Act we sent to the reception-house on remand, supposing that all such persons were to be sent there for the future; but it was found out a day or two afterwards that we had done wrong, and ever since that all remand cases have been sent to Darlinghurst Gaol.
108. In what respect did you do wrong? We had no power to remand to the reception-house—only to commit those finally decided upon by the surgeons, whom they certified and swore were insane.
109. Do I understand you to state, that the Magistrates have no power to send an alleged lunatic to the reception-house for medical treatment? They suppose so, and it is not done.
110. Are you aware whether the reception-house was not built for the very purpose of affording accommodation for the treatment of persons supposed to be lunatics? I have heard from some honorable members of the Assembly that that was the intention.
111. Is not the question of the sufficiency of evidence, with regard to the condition of the supposed lunatic, one to be determined by medical treatment? It must be determined by medical treatment.

112. Are you of opinion that the reception-house at Darlington is the most suitable place in which alleged lunatics should be treated? Quite so.
113. Without reference to any degradation, is not the reception-house a more suitable place for the treatment of alleged lunatics than the gaol? I think so.
114. *Mr. Dodds.*] I understood you to say you were under the impression that the medical testimony in these cases was very often erroneously given, or from improper motives? I think it is very carelessly and hastily given.
115. I understood you to say it was sometimes given from improper motives? I could not say that exactly. A great deal of suspicion attaches to it at times. Dr. Brown, the Police Surgeon, who is one of the two who give the certificates, is a most careful attentive gentleman, and has taken great pains.
116. Have you ever known a case of a sane person being sent to the lunatic asylum? I have suspected that many were, for this simple reason, that a very short time after myself and another Magistrate sent them to Tarban Creek, I have seen the same parties walking the streets, who have been discharged, on the recommendation of the board at Tarban Creek, through the Executive. That has raised suspicion in my mind; and from the hasty manner in which the proceedings are conducted, and the numerous cases I have had to adjudicate on, I have shuddered at the responsibility, as a Magistrate, that I have had to undertake. But, I believe, the Act is imperative. I think no Magistrate—after two qualified surgeons come forward, fill up this form, and deliberately swear that they think it unsafe to leave the supposed lunatic at large—would be justified in taking upon himself the great responsibility of setting aside their opinion; because they are supposed to know more of the matter than the Magistrates.
117. Are not the medical men employed very often those employed by the friends of the patients? No, they are called in by the Police Surgeon in some cases—needy surgeons very often. I have suggested that in all cases where a supposed lunatic is brought before the Magistrates, the surgeon who has been in the habit of attending the family or the person, before he became in that state, should be the surgeon that should be sent for to give his evidence as to his antecedents. But the surgeons called in are generally the first they can get hold of. In fact the constables are sometimes hunting about the streets for them.
118. One of the medical witnesses is a medical man employed by the Government? He is the Police Surgeon, and he sends for a second one.
119. *Mr. Wilson.*] Are you not talking principally of poor people who have no regular medical attendant? Yes, that is generally the case. But in some cases, it appeared to me, interested evidence was given in order to get the parties away to Tarban Creek.
120. As a rule, where the party has had a medical attendant, his evidence is invariably taken? Yes; but that is very rare. The medical gentlemen in great practice amongst the high families in this Colony will very seldom attend the police office.
121. *Chairman.*] I think you said about one hundred cases had come under your observation where parties had been committed for lunacy? I dare say there were a hundred in about four years.
122. In very many of those cases the parties would be in tolerably good circumstances? Some are in very good circumstances.
123. Do you know whether it is the practice in these cases for the medical man attending the party or his family to be called in to give evidence? I think he is, in these cases.
124. As a general rule, has it not been the practice for the Police Surgeon to call in some other surgeon to assist him to certify? Yes, and they are generally the same names.
125. And you think medical men so called in cannot have sufficient knowledge of the party or his antecedents to enable them to judge properly of his insanity or otherwise? Neither of them can.
126. How are supposed lunatics sent from the Police Courts to Darlington? Until I spoke of it to the Inspector and Captain M'Leir, they were sent in the common police van, with vagrants and drunkards, except in some few cases in which, to appease the friends' feelings, where they have been respectable, I suggested that they should have liberty to employ a Hansom cab and go up in company with a constable. I also went to Captain M'Leir and suggested that all supposed lunatics should be sent to the reception-house in a separate conveyance. I believe they are in some cases sent in cabs; but, if they have not means, they are still sent in the van.
127. Do you know anything of the accommodation in Darlington Gaol for supposed lunatics? There is a padded room, and everything very clean and comfortable.
128. Are you aware whether it is not a fact that as many as fourteen or fifteen supposed lunatics are there at times, and only cells for five or six—Have you heard that the accommodation in the gaol is insufficient? No.
129. Do you know anything of the accommodation at the receiving-house? There is ample accommodation there.
130. Your suggestion is, that in cases where the Magistrates are compelled to remand parties for suspected lunacy, they should have the power to remand to the receiving-house in the first instance, instead of to Darlington Gaol? Yes.
131. With the appliances in the receiving-house, the parties could be better treated than in the gaol? Yes; I understood that was the object of building the receiving-house, and to appease the feelings of the relatives of these weak-minded persons.
132. In answer to Dr. Wilson—you were speaking about persons suffering from *delirium tremens* being entered on the police-sheets as persons of unsound mind—what did you wish us to understand—Did you wish to state that all persons suffering from *delirium tremens* are entered as of unsound mind? Yes.

Thos. Dangar,  
Esq.  
17 Mar., 1869,

- Thos. Dangar, Esq., 17 Mar., 1869. 133. Are these parties treated as lunatics by the Magistrates? Yes, they are remanded, on the testimony of one surgeon who recommends them to be sent for medical treatment; and, after perhaps seven days' treatment in the gaol, they come back, and are often discharged. Some of these persons are very respectable, and I have often suggested to the Police Surgeon whether they could not be received at the reception-house and treated there, which would take away the disgrace from such unfortunate persons.
134. *Mr. Piddington.*] Do I understand you to state that, during the four years you acted as a Magistrate in Sydney, you have committed a hundred persons as alleged lunatics? I used to commit sometimes two, sometimes three a day. I could not possibly recollect the exact number; but I am satisfied there were more than a hundred in the two Police Offices, including those sent to the reception-house and to Darlinghurst Gaol.
135. How many out of the hundred you have committed have turned out to be really insane? I cannot say that.
136. You have not made any record? No.
137. Do you think ten out of the hundred have turned out to be actually insane? More than that; but I have seen a great number about the streets who have been liberated.
138. Do I understand you to say you have remanded five or six alleged lunatics in a week? Yes, for medical treatment.
139. Are you of opinion that all these remands were cases of well-founded suspicion of insanity? No. They presented at the time every appearance of insanity, but many of them were so from intemperance.
140. Is it the practice to treat persons suffering from *delirium tremens*, as the effect of intoxication, as lunatics? Yes; they are inserted in the police-sheet as being persons of unsound mind, and liable to commit some indictable offence.
141. Is there not a clear distinction to be drawn between persons suffering from temporary aberration of mind from intoxication, and cases of really well-founded lunacy? They are all brought up under the same Acts—the 7th Victoria, and the Amending Act.
142. Have you any idea of the proportion of cases, out of about a hundred that you have committed, who were suffering from *delirium tremens*, and the proportion of cases of well-founded suspicion of lunacy? There were a large number of cases of *delirium tremens*—perhaps three or four to one of those remanded to the gaol for medical treatment—who, after a little treatment from Dr. Aaron at the gaol, came back apparently fit to be liberated, and they have been liberated on distinct medical evidence.
143. Are you of opinion that much the larger number of cases of alleged lunacy that come before the Bench are merely cases of temporary delirium? They are the largest number.
144. What is your opinion of the time these cases usually occupy before the patients recover their senses? I think the longest case was one that was remanded for seven days at a time until twenty-one days had elapsed.
145. Upon the average, from your experience, how long does it usually take to bring a patient labouring under *delirium tremens* to his ordinary state of mind? From seven to fourteen days, if he is not confirmed; but some parties affected that way have not recovered at all, and have been sent to Tarban Creek.
146. On the average, how many persons are committed for medical treatment from the various police offices in Sydney in a week? Before October last, there was scarcely a day but what there was one or two cases.
147. Do you think it safe to suppose there were ten or a dozen sent in the course of a week? Sometimes there have been as many as ten in a week from the two places, while I was a Magistrate.
148. If these cases occupied each a week or a fortnight in treatment, would there be accommodation sufficient for them, if all were sent to the reception-house? I am not aware.
149. Do you think cases where parties are only suffering from the effects of intoxication ought properly to be treated as cases of alleged lunacy? I think so; as many have attempted to commit suicide, and some have been committed for trial.
150. In cases of delirium arising from intoxication, do the parties generally recover, or do they generally become confirmed lunatics? The majority of cases of *delirium tremens* recover.
151. *Mr. Dodds.*] Do you think the majority of cases of alleged lunacy that come before the Court arise from intemperance? No, I do not think that; but there are a great number.
152. Is the medical testimony given on oath? Yes; all the evidence is given on oath.

FRIDAY, 19 MARCH, 1869.

Present:—

MR. TIGHE,

MR. FARNELL.

MR. DODDS,

JOHN FITZGERALD BURNS, Esq., IN THE CHAIR.

Alexander Menzies Brown, Esq., M.D., called in and examined:—

A. M. Brown, Esq., M.D. 153. *Chairman.*] I believe you have been for some time past acting as Police Surgeon in Sydney? Yes.

154. For how long? About eleven months.

155. In the absence of Dr. Egan? Yes.

156. Have you had many cases of parties committed for lunacy brought under your observation?

observation during that time? Yes, quite a number; seldom a week passes but there are several. A. M. Brown,  
Esq., M.D.

157. In the course of these eleven months, how many cases do you suppose have come under your observation? Probably about twenty. I am speaking of cases sent to the reception-house. Many more have been sent on remand to Darlington Gaol, and sent from there to Tarban Creek. 19 Mar., 1869.

158. How many persons have been brought up for supposed lunacy during this period? I could not say.

159. You say hardly a week elapses without some persons being brought up? Sometimes there are five in a week—two in a day, perhaps.

160. Have you been called upon in many cases to certify to parties being of unsound mind, in the course of your practice as a surgeon? Yes, very frequently.

161. Has it occurred to you that in many cases in which you have had to give evidence, the surgeon asked to act with you has no knowledge of the case except from yourself or the friends of the parties supposed to be insane? The medical man called in seldom or never knows anything of the case. It rarely happens that he knows anything of the previous history of the case or of the patient, until he sees him at the Court or station-house. It is otherwise in private practice, of course.

162. You know that under the law two medical men must certify to a party being insane before he can be dealt with by the Magistrates? Yes.

163. Does your experience lead you to believe that it in reality turns upon the question whether one medical man is satisfied as to his insanity or not? No doubt the one who knows most of the patient will influence more or less the other in the view he takes. The process is something of this kind. Supposing I am in private practice, and a patient of mine in poor circumstances is unable to go through the usual forms, which are both tedious and expensive; this patient is placed in the hands of the police, and in all probability the family attendant gives evidence in the case. The Police Surgeon knowing nothing whatever of the history of the case, would be influenced more or less by the history of it given him by the family attendant. That frequently happens in cases that come before the Bench in that way.

164. Is it not the practice for a second medical man to be called in suddenly to certify to the insanity of a party who may be in the hands of the police, without having any prior knowledge of the case himself? That is generally the case.

165. Has your attention been drawn to remand cases, where only one surgeon has been brought to give evidence, and the patients are remanded to Darlington Gaol until a second surgeon can be found to certify? Yes, I have recommended many to be sent for protection and medical treatment. More cases of remand have passed through my hands than of permanent insanity, or rather committals to lunatic asylums. The greater number of cases are remand cases, where persons are supposed to be suffering from temporary insanity, and only the testimony of one medical man is taken.

166. Has it occurred to you that in these cases it is desirable that the party should be sent to the reception-house and not to the gaol? That is my view of the matter, and I have urged it very strongly. No cases of insanity, from simple imbecility to acute mania, should be sent to any prison establishment.

167. Do you know anything of the accommodation at Darlington Gaol for lunatics? I have not seen the Darlington hospital; I am not aware what the accommodations are at the gaol for the treatment of lunatics.

168. Is it within your knowledge that they only have two padded cells for lunatics? I am not aware.

169. Do you know anything of the accommodation at the reception-house? Yes, I think the arrangements of that establishment are excellent but too limited.

170. Has your attention been drawn to the way in which supposed lunatics are sent from the Police Office to Darlington Gaol—are they sent in the police van? They seem to be sent in a variety of ways; there is no method or regularity in that respect; I should imagine many of them walk; others, I know, have gone up in cabs with their own friends; and no doubt, in the case of the poor and destitute—those taken from the streets, or sent from the country to be dealt with—they would be sent in the police van with the usual delivery of prisoners.

171. Are not the majority of persons brought before the Police Courts for insanity discharged? Yes, the majority are discharged, after the period of remand has elapsed.

172. Do you think the present mode of having parties sent to the lunatic asylum offers a sufficient guarantee for the liberty of the subject—that there is sufficient care taken, as a rule, to prevent sane persons from being sent there? Yes. I think, as things are at present, under the new Act and the new regulations, there is every guarantee? It is a very troublesome matter to get even eligible cases committed. The trouble is as great, I mean, in evident cases of lunacy as in questionable ones. The trouble is very great since the introduction of the new rules.

173. Do you think the surgeons, as a rule, know sufficient of the parties, of their own knowledge, to be able to certify to their insanity, in cases that come before the Police Courts? At present I exercise every care, whether cases come before me from the Magistrates or may be certified to by surgeons in private practice.

174. I speak of the system? The system I adopt is to exercise every caution and care. I do not know how it may be with others.

175. Do you think the operation of the system is such as may lead to parties being sent to the asylum from improper motives on the part of persons interested? I do not see that the system could be improved. The usual examination before two Magistrates takes place, at which witnesses knowing anything of the person's history are carefully examined.

A. M. Brown, examined, and medical testimony taken as well. I should not imagine that medical testimony goes further to establish the sanity or insanity of a person than the evidence of the relatives or persons connected with him.

19 Mar., 1869. 176. Is it not seldom the case that the medical gentlemen, who testify to a party's insanity, have any personal knowledge of him, beyond the mere conversation they may have with him while making their examination? Generally speaking they have not. The majority of cases are those in which neither of the medical witnesses have seen or known anything of the patient before.

177. Have you ever heard of cases where parties have been sent to the Lunatic Asylum from improper motives on the part of supposed friends? No, I am not aware of any case.

178. Do you think it would be an improvement of the law if there were always a board of medical men to determine the question of sanity or insanity, before any party could be committed to a lunatic asylum? Yes, I think that is very necessary to complete the new system, which is both misunderstood and misapplied. I have taken some interest in the matter, and I think all patients ought to be carefully examined at the receiving-house, before being sent to the Asylum, by a board, who would be guided, of course, by the history of the case while under treatment, received from the superintendent or those in charge.

179. Have you heard whether the board visiting the lunatic asylum, frequently discharge parties shortly after they have been received there? No, the complaint has always been that they have not done so. I have heard it said that parties are frequently detained there who are perfectly sane.

180. Have you not frequently heard that parties who have been sent to the lunatic asylum with the usual certificates, and in due process of law, have been discharged shortly after their reception at the asylum, on the authority of the board there? I have not heard of any cases.

181. *Mr. Tighe.*] I suppose if a person were sent to a lunatic asylum by the Magistrates, upon the testimony of his friends and of two medical men, and was wrongly sent, there would be an immediate remedy from the action of the board at the asylum? The complaint seems to be that the remedy would not ensue with sufficient rapidity—that parties are liable to be detained who are perfectly sane.

182. How long? I have not heard of any specific case since Dr. Manning came; but I have heard that there is trouble sometimes in having patients who have perfectly recovered dismissed.

183. Supposing a man was sent there who ought never to have been sent, how long would that man be kept there before he could get a remedy, with the arrangements in existence? I am not aware. The board meet at certain intervals, and of course a man could not be dismissed until the time of their meeting came round.

184. He could not be detained very long at any rate? Not at present, I should imagine.

185. Do you think it would be possible for a person to be sent to the asylum under the arrangements that now exist, if he were perfectly sane? Yes, I have not the slightest doubt of that. The new Act seems to have been violated continually. I am only aware of one single instance in which a person was discharged who had recovered. Supposing a man has been sent to the reception-house, suffering from violent mania, which may arise from mental excitement, from drinking, or various causes, and he recovers, he is notwithstanding sent on to the lunatic asylum. I understand that under such circumstances they have all been sent on to Gladesville, and have remained there, of course after having perfectly recovered.

186. That is not exactly what I meant. The Chairman made some allusion to the possibility of sane persons being sent to the asylum through the complicity of their friends, and the medical men called in to certify from corrupt motives. I want to know whether under existing arrangements it is possible to carry out such a scheme, if persons are bad enough to attempt it? From the examinations at the Central and Water Police Office, I do not think it possible that such a thing could take place.

187. Do you think that gentlemen who are surgeons, and nothing more than surgeons, are qualified to give an opinion in cases of insanity? I think so, supposing that they are men of ordinary intelligence. I do not suppose it takes a medical man to ascertain whether a man is mentally sound or not.

188. Do you think a surgeon is a better judge than a layman of the same degree of intelligence? I do not see why he should be, unless he may have studied the subject and have had more frequent opportunities of seeing the insane.

189. In that case he would be able to form an opinion because he had studied the subject, but not because he was a surgeon? Precisely. If more conversant with the subject his opinion would be of more value than that of an ordinary practitioner who probably saw a case once in many years.

190. Do you think it advisable that instead of having two surgeons to certify to the insanity of supposed lunatics, it should be confined to persons who had studied medicine? I think it would not be wise to leave the matter entirely to laymen.

191. That is not the question I ask. Do you think it advisable, instead of taking only the testimony of surgeons who may have taken no physician's degree, to insist on having the certificate of at least one person who had studied the higher branch of medical knowledge? No, I do not think anything would be gained by that. I see no reason why a doctor of medicine should be in a better position to give an opinion on such a matter than a surgeon. In their education there is no difference whatever. It is intelligence and experience that are required.

192. Then you can suggest no improvement? Not as regards the medical testimony. I think that has no more weight than the testimony of the relatives and friends; I am certain that it has not.

193. If three or four relatives or friends came forward to testify to a person's insanity, how is the defence managed—who calls witnesses on behalf of the alleged lunatic, to prove that he is not insane—who takes up his case? It is very rarely that any one is in that position. I have not seen a case in my experience in which any one has thought it necessary to oppose an application of the kind. A. M. Brown,  
Esq., M.D.  
19 Mar., 1869.

194. *Mr. Dodds.*] I think you have stated that during the eleven months you have been employed as Police Surgeon, you have sometimes examined as many as two in a day, five in a week, and so on? Yes.

195. Can you state what proportion of these cases arose from intemperance? I stated that the majority of these were remand cases, and I should think most of these remand cases were cases of temporary insanity resulting from intemperance.

196. Then at the end of a week they were discharged? Yes, they are generally remanded for seven days.

197. Can you state what number of cases arose from constitutional insanity or permanent insanity? I could not say for certain. These items are all certified to, and it would be possible, no doubt, to collect very correct data of that kind.

198. Has it come within your knowledge at all that any persons have been sent to lunatic asylums who have been found to be sane? No; and I have been in the habit of giving evidence in lunacy cases for the last fourteen years.

199. You know of no such case? No. I have heard of such cases, of course; but, in my experience, I have not seen them. There have been cases where persons come to me with relatives in custody, and I examine them and send them home again. I have conciliated relations by explaining matters, where, no doubt if they had been dealt with hastily, they might have been sent to the asylum.

200. Have you any knowledge of the working of the Lunatic Asylum at Tarban Creek? No; I have visited the institution only once.

201. Are there many cases sent from the country to the Police Office in Sydney? We occasionally receive cases from the country; but, generally speaking, they are residents in Sydney.

202. Previous to their being disposed of by the Magistrates, what time is occupied by the surgeons in examining the patients—do they make up their minds in a few minutes, or do they take time to consider? It occasionally happens that the surgeon who has attended them in private, or may have been called in, is there with the patient. The Police Surgeon then examines the case with him, and they fill up the necessary forms. When that is not so, any one may be called in, and he examines the patient with the Police Surgeon. It is possible that neither of them have ever seen or heard of him before; but the examination is made with due care, and in the presence of the relatives. The relatives are carefully questioned; and when the surgeons have obtained sufficient information, by conversation or otherwise, they fill up these forms, and the case comes before the Magistrates, who, of course, have depositions taken in the usual way; and I presume the medical testimony simply goes for as much as the testimony of the other witnesses taken together. I should imagine that one case would take at least half an hour, or more, in examination before coming before the Magistrates.

203. You are chiefly guided by the opinion of the medical man, if any, attending the patient? No doubt I am influenced by his statement, as by the statement of any other witness; but it is necessary to judge for one's self. It sometimes happens that the persons brought to me are not of a class that should be sent to the lunatic asylum, and in such cases I invariably send them home. I should imagine that, at least, half a dozen cases have been so treated by me during the time I have been acting as Police Surgeon.

204. How are cases dealt with after they are sent to the reception-house? The treatment there is precisely what it would be in an ordinary lunatic establishment. I understand the medical officer is daily in attendance; and they have padded rooms, and very excellent appliances—baths, and proper accommodation for the restraint and protection of patients. There need be no difference between the treatment at the receiving-house and the treatment at the Lunatic Asylum at Tarban.

205. Then, on the authority of the medical attendant there, they are sent on? On the joint authority of Dr. Alleyne and Dr. Aaron. Dr. Alleyne has to certify with Dr. Aaron. Perhaps I may be allowed to mention what I consider to be a very great hardship; that is, that cases are detained at the receiving-house and not discharged, in accordance with the terms of the Act, on recovery. They are sent on to Tarban Creek instead of being discharged.

206. Have you known any cases where the parties brought up charged with insanity have been dismissed by the Magistrates? I dismiss some cases myself; and, when I do, I, of course, make a statement to the Magistrates that I have examined the person but cannot find any indication of insanity—perhaps it is only drunken fury, or something of that sort. The Magistrates invariably dismiss these cases. I dare say eight or nine such cases have been dealt with in that way during the time I have been acting.

207. *Mr. Tighe.*] You have referred to patients being detained at the receiving-house when they ought to be discharged—who is answerable in such cases? I do not know. The terms of the Act seem very explicit; that is, that they shall be discharged from the receiving-house, as they would be from an ordinary asylum, on recovery. I am not aware of any cases so dealt with, excepting one.

208. What officer keeps them there? I know not. I have spoken to the Superintendent about the matter, but I cannot understand how it has been done.

209. They should be discharged by some person? Yes, in accordance with the terms of the Act.

210. And who should discharge them? I should imagine that if the medical officers are acquainted with the Act, it would be for them to examine and discharge them. They examine

A. M. Brown, examine, before passing on the permanently insane to Tarban, and if they find them not to be insane they should be discharged.

211. Should the head of the receiving establishment discharge the patient himself upon the recommendation of the medical men; or should the Colonial Secretary, or some other official person, do it upon the report of the medical men. Whose duty is it to see the party discharged? The duty of seeing the party discharged would be the Superintendent's; but he would be discharged by the recommendation of the medical officers. Now, I understand that Dr. Alleyne and Dr. Aaron examine cases sent on remand to Darlington; and if, during seven days, they find they are fit subjects for the lunatic asylum, they certify to that effect, and they are forwarded to the lunatic asylum. We hear no more of them at the Police Office. If they recover, they are sent back to the Police Courts and re-examined; we certify to their sanity, and they are discharged. I imagine that the medical officers have all to do with certifying to the sanity or insanity of a patient, either in the receiving-house or the lunatic asylum; and though the Superintendent has to see the instructions carried out, he is in no way responsible for the detention.

212. The Superintendent should discharge them after he has received the report of the medical officers? Decidedly.

213. If he does not do so, does he act contrary to the law? That I cannot say. I spoke to the Superintendent about this, but he seemed quite at a loss. He seemed unable to explain why it was that cases sent to the receiving-house were invariably sent on to Tarban.

214. No matter which way the medical officers recommended? In fact whether they were sane or not.

215. What remedy would you propose for that grievance? I should propose what the Chairman alluded to—the establishment of a board of intelligent men, three or four to meet weekly, and examine the patients sent there. They should certify to those requiring accommodation in the lunatic asylum, and give authority for the dismissal of those who had properly recovered.

216. How many should form the board? The fewer the better.

217. Say five, three to form a quorum. They would be required to meet, I suppose, only once a week? Not seldomer than that.

218. What do you think the probable expense of such a board would be—what fee could they reasonably expect? At present, Dr. Alleyne and Dr. Aaron certify to all these cases of lunacy in the gaol and receiving-house without any special fee. They are both Government officers, and connected with Government establishments. But the police medical officer receives a fee of a guinea; and, in what are called double cases, the one called in receives the same fee.

219. If the Government went to this expense, and made this arrangement, the result, in your opinion, I suppose, would be that some persons who would otherwise be sent to Tarban Creek, and detained there, would be at once discharged? Precisely; and that would be in accordance with the terms of the present Act.

220. *Chairman.* You mean in accordance with the intentions of the Act? Yes.

221. *Mr. Tighe.* Then the Act is imperfectly administered? In that particular it is. I am only aware of one solitary case being dismissed; and, strange to say, it was a case of remand; because the reception-house is only for committals, and they are sent on to Tarban Creek. The most serious and dangerous cases of lunacy at present are not admissible to the receiving-house at all—cases of insanity arising from drinking, where people are bent on murder or suicide. At present, that class of cases are invariably remanded to Darlington, although the object of the Act was evidently to meet all such cases.

222. You think all such cases should be sent to the receiving-house? Yes.

223. *Chairman.* Where they would be better treated than they are likely to be at the gaol—where there are better appliances for their proper treatment? Yes; and where they would not be looked upon as criminals.

224. Have you any further suggestions to offer? I think there is nothing further. I have thought a good deal of the necessity of having this Act altered in one or two respects; but the system seems very simple and excellent, taken as a whole. At present, when the examinations are taken and guided by intelligent medical men, there is no possibility of sending a sane person to an insane establishment. All cases of insanity, from simple imbecility to dangerous lunacy, should be sent to the receiving-house and dealt with there—those who recover to be dismissed; those who appear permanently insane or whose cases are likely to be protracted to be sent on to the asylum. This should be done by the authority of a board of intelligent medical men, so that no case of insanity would enter the gaol. No case of insanity should enter the gaol.

225. So that insanity should not be treated as criminal? Yes.

226. *Mr. Dodds.* Are you aware whether there is sufficient accommodation at the receiving-house for dealing with violent cases? Yes, quite sufficient accommodation.

227. Then, there is no sufficient reason for sending them to the gaol? It is stated that they can only be received at the reception-house when committed, not when remanded. Alter the simple term "committed" so as to include remand cases, and the present Act would meet all that is required, with the exception of the examining board. The Magistrates cannot "remand" to the receiving-house; they can only "commit" those cases that are likely to be permanently insane, so that the most dangerous class of lunatics is excluded, and the intention of the Act set aside.

Mr.

Mr. William Devenish Meares, called in and examined :—

Mr. W. D.  
Meares.

19 Mar., 1869.

228. *Chairman.*] What is your official designation? Clerk of Petty Sessions, Central Police Office.
229. Might I ask, how long you have been Clerk of Petty Sessions at the Central Police Court? About six years.
230. Have any cases of lunacy been brought under your notice during that time? Yes, many.
231. Could you give anything like an approximate statement, from memory, of the average number of cases you have had by the year there? No, I am not able to do that; but I can give an idea of the number we have had since January, 1867, up to the present time. I have not had time, since being called upon to attend here, to look into the matter very fully, and, therefore, this is only an approximation. Since January, 1867, we have dealt with 197 cases. I would not be certain as to two or three, but that is a very close approximation.
232. These were cases where the parties were charged with being dangerous lunatics? Yes.
233. *Mr. Tighe.*] Those who are not charged as dangerous lunatics you have nothing to do with? No; no warrant can be issued, according to our practice, unless the party is charged with being a dangerous lunatic, and likely to commit some indictable offence.
234. *Chairman.*] In what proportion of these cases have the parties been remanded for a time, and afterwards discharged? About 75, out of 168, have been discharged after remand. I do not think any of them have been discharged at the first hearing.
235. Most of those who have been remanded have been sent, for a time, to Darlinghurst Gaol? Yes.
236. There not being sufficient accommodation for them at the station-house? There is no accommodation at the station-house; and the rule is, and always has been, to remand them to Darlinghurst, for a certain time.
237. Even where no charge is made, other than that of being insane, they are treated as criminals, by being sent to Darlinghurst Gaol? I cannot say that we treat them as criminals; they are not looked upon as having committed any offence.
238. But yet they are sent for imprisonment to Darlinghurst Gaol? They are sent to Darlinghurst Gaol, because it is the only place where there is accommodation for them.
239. Did the question arise, after the new Act was brought into operation, whether they could be sent to the receiving-house? It did. There was a case shortly after the Act came into operation. It occurred at the Water Police Office, I think, and I am only speaking from hearsay. I heard that a man had been remanded to the lunatic reception-house, but it was found not to be in accordance with the Act; and since that all the remand cases have been sent to the gaol, and only the commitments to the reception-house.
240. In what way are those people usually sent from the Police Office to Darlinghurst Gaol? In the police van, usually.
241. Is it an open van? No, closed, containing small cells, in which each prisoner is placed by himself. In some cases, where a lunatic has friends who are inclined to pay for a cab, he would be sent in that way in charge of a policeman.
242. Has it not appeared to you desirable that the Magistrates should have power to send all these cases to the reception-house instead of to the gaol? Yes, certainly. It was my impression that that was the intention of the Act, until we came to look into it.
243. All the remand cases, as well as the committals? Yes.
244. You think the Magistrates should have power to send them to the reception-house, until they can receive some temporary treatment and can be properly examined? I should say it is preferable to send them to a place of that kind. Very often their friends have a great dislike to their being sent to Darlinghurst Gaol.
245. Have you been often present when parties charged with insanity have been examined? Frequently I have.
246. Have you been present when the printed forms have been filled up by the medical men, certifying to the insanity of the parties? I have occasionally.
247. What has been the result of your observations as to the system under which supposed lunatics are dealt with? I have often thought it very susceptible of improvement. It has frequently struck me that the examinations were very hurried, and the conclusions arrived at, on what appeared to me, very insufficient grounds. I may state, in connection with that, that the way in which the medical evidence is obtained appears to me to be wrong in principle. It looks like offering a premium to make a man out to be mad. The practice is this: the Police Surgeon first examines the party charged, and if he believes the case is one that ought to be sent on to the lunatic reception-house, a second medical man is called in. They give their evidence before the Magistrates; and if the two medical men give evidence each of them is entitled to a guinea, whereas if only one medical man is examined the practice is that he does not get any fee at all; so that although I believe at present there is no want of care exercised in coming to a conclusion, still the system strikes me as being wrong. I would not like to have it thought that these remarks reflect in any way upon the medical men, as I wish to refer to the principle only.
248. Does it seem to you, in many cases, that the medical men who certify to a party's insanity have not sufficient prior knowledge of the party to be in a position to do so with any degree of satisfaction? As a rule they know nothing at all about them until they are apprehended. The exception is where the medical men who give their evidence have any previous knowledge of the case whatever. As I said before, the Police Surgeon first examines the party —

Mr. W. D.  
Meares.

19 Mar., 1869.

249. The Police Surgeon examines the supposed lunatic at the instance of the friends of the individual? No, after the party has been apprehended, in the course of his duties; and the chances are ten to one that he has never seen or heard anything of the lunatic before.

250. The Police Surgeon calls in any medical man to join in the certificate? Yes, any medical man whose presence he can obtain.

251. Have you ever heard of cases of parties having been arrested for insanity and sent away, or attempts made to send them away, improperly, from interested motives? I remember one case, at our office, of that kind, in which the attempt appeared evident.

252. Was it abandoned? It was abandoned after a lengthened examination; or rather, it was not abandoned, but the party was discharged by the Magistrates. There have been other cases.

253. *Mr. Tighe.*] Did the doctors certify in that case to the man's insanity? No, I think not; I cannot charge my memory positively, but I do not think they did.\*

254. *Chairman.*] How could the case have come before the Magistrates unless there had been some previous certificate from a surgeon? They come before the Magistrates before any certificate whatever is given. They are apprehended on warrant. For instance, a person comes and says he has a brother who is a lunatic, and he is afraid if he is not restrained he will do some harm. He swears to an information, in the words of the Act, that so-and-so is a dangerous lunatic, and likely to commit an indictable offence; and on that a warrant is issued, and the party apprehended. The police surgeon sees him in the lock-up, as a rule; and, if he believes that the patient is likely to recover in a few days, he is brought before one Justice and remanded to Darlinghurst Gaol, for a week generally; but if the Police Surgeon believes he is a dangerous lunatic, and liable to be dealt with under the first section of 7 Victoria No. 14, then he calls in another medical man, and both examine the party apprehended, and they give their evidence before two Justices.

255. They must fill up some forms? They generally fill up the forms at the time they give their evidence. These forms are not connected with the legal proceedings in the case, but are simply for the information of the medical authorities at the receiving-house.

256. If the man is committed, they each draw a guinea? If two of them are examined, they get a guinea each whether he is committed or not. It is only where the Police Surgeon examines by himself that he does not get a guinea. If he calls in another medical man, they both get a guinea no matter what the result is.

257. *Mr. Tighe.*] What process would you recommend in place of the present one? I have thought that something of this kind might be an improvement. In the country districts there is very often difficulty in obtaining the evidence of two medical men. In Sydney the present practice is objectionable, in the way that I say. I fancy that both of these difficulties might be met if power were given to one Magistrate, on the evidence of one medical man, to remand the case to the receiving-house; and then, if the receiving-house were made a place at which petty sessions could be held, and two medical men were paid a salary to examine the lunatics in the reception-house, they would then have the opportunity of studying the case better, and giving a clearer and more decided opinion upon it. The Justices then, sitting in the receiving-house, might either discharge or finally commit, according to their opinion arrived at on the evidence of these two medical men.

258. I suppose you see no objection to a board of medical men? None whatever; the more the better.†

259. If that was done, the inconvenience that at present exists would be entirely avoided? I think so.

260. It would diminish the risk of a sane man being incarcerated? Very much so, I should say.

261. I suppose a person who has never been in gaol before, and not belonging to the criminal classes in any way, takes it very much to heart, being sent to gaol for a week—it grieves and frets him very much? Yes; I have known cases where they have felt it a good deal, and many other cases in which the friends have felt it. Of course, the very word sounds unpleasant in their ears.

262. Under the present Act what you propose could not be carried out—the Government could make no regulation that would have that effect? No, I think not.

263. They must remand to the gaol? They must remand to the gaol, if we read the Act correctly. They can only *commit* to the reception-house.

264. The Act would have to be altered then? Yes.

265. *Mr. Dodds.*] Are there not a number of vagrants of loose character brought up at the Police Office every week, who are made temporarily insane through excessive drinking—would you recommend that they should be sent to the receiving-house? There are not many cases of vagrants so affected. There are a great many cases of people suffering from *delirium tremens*; but they are generally people who have some means or money—publicans and others who have had the means of obtaining drink. What we would call vagrants are dealt with under a different Act, and but few of these are made temporarily insane through drink—they have not the money to get it. Very often we are applied to by people whose friends become deranged, and they try to get rid of them. They generally come to the Police Office, and are told we cannot do anything unless they are prepared to swear that the person in question is a dangerous lunatic.

\*NOTE (on revision):—Upon inquiry, I find that the medical men had examined the man, and had testified to his insanity.

† NOTE (on revision):—Upon reflection, I think three would be better than any larger number.

lunatic. In their anxiety to get rid of them, or have them better provided for, they do not hesitate to swear to their being dangerous; but when we hear the ground on which they form their opinion, we find it is often very slight.

266. *Mr. Tighe.*] How does a lunatic find his way into the asylum? In cases where the party is not a *dangerous* lunatic, the course is rather complicated. I had a case the other day in which I took some interest. There was a poor woman who had an idiot son about eight or nine years old, perfectly unable to feed himself or assist himself in any way. She had an infant at the breast three weeks old; had been deserted by her husband; and had had all her things seized for rent. She was unable to do anything; and she came to our office to make inquiry. I saw it was not a case in which the child could be dealt with as a dangerous lunatic; and the only other course was to proceed by petition. The course was this. The petition was prepared; she had to get two medical men to examine the child separately, and give a separate certificate that each of them had examined him, and that he was an idiot and would be benefited by treatment in the asylum; she then had to take the petition to the Supreme Court to get it signed by one of the Judges, and after that to the Colonial Secretary's Office to get the sanction of the Governor. It took her a week to get it done, and she never could have accomplished it only for the assistance she received.

267. Who would do all that in the case of one having no friends? I do not know. There is a provision in one of the Acts that in cases of that kind, where the party happens to be in custody of a gaoler, he can petition as the guardian.

268. Would any officer of police petition? No.

269. The lunatic, then, would be allowed to go about the streets until he did something that would bring him before the Police Court? Yes.

270. There is a deficiency there? Yes; unless the party can be charged with being a dangerous lunatic; amongst the poorer people they are quite at a loss what to do.

271. *Mr. Dodds.*] Has any case come within your knowledge, at the Police Office, where parties have been improperly charged with lunacy from improper motives, with a desire perhaps to obtain possession of their property? Cases have more than once been brought before the Court, in which, though it did not appear clearly that such was the fact, I certainly came to the conclusion that it was so. That was the impression on my mind at the time, and there was a general impression in the office that that was frequently done.

272. In the case you spoke of just now, did the medical officers testify? I could not say without referring to the case. I am rather inclined to think they did not certify, but gave evidence to the effect that he was insane.

273. Do you think they were improperly biased by the friends? I think they formed an opinion, perhaps, too hastily, without having sufficient opportunity to judge of the man's state. If I recollect aright, neither of them had seen him before.

274. A properly constituted board would be a safe remedy for all that? Yes, naturally it would be. It is the hasty examination that I think so improper.

275. I understand it occupies sometimes not more than ten minutes? A very short time. Dr. Brown, however, seems to be very careful. The impression in the office is, that there is more care exercised now than there was sometime before.

TUESDAY, 23 MARCH, 1869.

Present:—

MR. DODDS,

MR. FARNELL,

MR. WILSON.

JOHN FITZGERALD BURNS, Esq., IN THE CHAIR.

Frederick Norton Manning, Esquire, called in and examined:—

276. *Chairman.*] What appointment do you hold under the Government? Superintendent of the Hospital for the Insane, at Gladesville.

277. You are aware of the objects of this Committee, I believe? Only from what I have learned from the newspapers.

278. Has your attention been drawn to the law relating to lunacy in this Colony? It has, so far as it has come within my duty as superintendent of the hospital to be guided by it; but I have not paid any special attention to it. I have copies of all the Acts on the subject, and of course they regulate my proceedings.

279. Has it appeared to you that the law could in some respects be improved? Yes, in many respects. I think, in the first place, it might be improved by doing away with the present system, under which the greater number of the patients sent to the hospital go through the Police Courts. It has a very bad effect, I find, upon the minds of the insane. They take up immediately with delusions on the subject; and these last, in many cases, the entire time they remain in the hospital. They imagine that they have been committed for a certain length of time. The fact of taking them before the Magistrates has this effect upon them.

280. How would you propose to obviate that? By following out more fully, possibly with some alterations, the system that now is adopted in a small number of cases. By petition, on the certificate of two medical practitioners, a person can be committed to the hospital, under a Judge's order. If, by a similar order from a Judge or a Magistrate, all the cases could be committed to the hospital, instead of taking them personally to the Police Court, it would be a very great improvement.

Mr. W. D.  
Meares.

19 Mar., 1869.

F. N.  
Manning,  
Esq.

23 Mar., 1869.

F. N.  
Manning,  
Esq.  
23 Mar., 1869.

281. Would you not have the persons, said to be insane, brought before the Magistrates at all? No, I would not; I think it a very great pity to do so.

282. How could evidence be obtained as to their insanity? I think that evidence should be obtained from the certificate of the medical practitioner; and the Magistrate's duty should consist in examining these certificates, to see that they are according to law.

283. You would throw the whole responsibility on the medical men? I would. It is on them now in those cases admitted by a Judge's order. The Judge does not see the patient; he sends him to the hospital, on the certificate of two medical men. That applies to people who are generally in better circumstances, who petition for it.

284. Do you think sufficient precautions are now taken to ensure that only insane persons should be sent to the asylum? I think so. I have never admitted any one that I did not consider either was insane at the time, or else had been sufficiently insane to have warranted the certificates on which he had been committed. One or two persons have reached me in a state of sanity, but I have no doubt that, at the time they were examined, they were insane.

285. How long have you been at Gladesville Asylum? Five months.

286. About how many persons have been admitted within that time? Upwards of 60, since the 1st of January of this year—perhaps a hundred altogether.\*

287. From what Courts have you received them? The chief part of them from the Sydney district. They come to me from the receiving-house at Darlinghurst.

288. How many persons have you discharged in that time, whom you have found to be sane, and who have been committed within the same period? Fourteen persons have been discharged sane from the hospital during the last five months, who have entered it within the same period. Of this number, I considered two to be sane on admission, but I think the evidence was conclusive that they were insane at the time the certificates under which they were sent were signed.

289. Have you discharged many parties shortly after admission? I have discharged some within six weeks or two months. One case, I think, I discharged in three weeks.

290. Had the curative means adopted in the establishment made him sane? No; I think he came in sane. In some cases, it has been merely a question of abstinence from intoxication, or something of the kind.

291. You do not think there are many persons sent to the establishment who are really sane? No, I think very few. In some cases, the patients may have recovered before they reached Gladesville; but they have been insane at the time of committal. In the case I mention more particularly, I have no doubt the man was insane at the time the certificates were signed, but it was merely temporary insanity produced by excessive drinking. The necessary formalities, preliminary to his discharge, necessitated my keeping him about a fortnight.

292. I suppose you have full knowledge of the modes in which parties are sent to the asylum? I am not quite clear as regards the different certificates. There are three or four forms of certificate, depending upon how they fall into the hands of the police, I fancy.

293. Have you ever heard that certificates can be obtained with undue facility in Sydney? No. Within the last three months I have applied to the Colonial Secretary to send me the medical certificates, or copies of them, in all cases, my principal reason being, that in many cases I got no particulars of the patients whatever from the Police Courts, which I think is necessary by one of the Acts. I asked, therefore, for the certificates, to see what grounds the medical men had for sending the patients, and to give me a starting-point for treatment. These certificates are very often illegal, or at least informal. They do not certify, as they should do; the reasons for considering the patient insane are not sufficient.

294. Notwithstanding that, you have not, in your experience, found that many parties who have been sent to the asylum have been sane? No, I have not. In those cases in which the certificates go before the Judges, the Judges very carefully examine the certificates; but where they come through the Police Court, the Magistrates consider it sufficient generally to see the patient. They do not seem to examine the certificates, or to take exception to them, though they may be decidedly informal, as, in fact, is the case in many instances.

295. I suppose you know that every week some five or six persons are brought up in Sydney, at the Police Courts, charged with being insane? Yes, I know that is the fact, from the number of admissions we have.

296. Would the alteration you now suggest in the mode of committal provide for so many persons being dealt with? I think so. I do not see why, on the certificate of two medical men, they should not be committed to the reception-house; and whilst there the certificate should be submitted to a Judge, or a Magistrate, who should certify to its legality.

297. Are you aware that, under the present law, it is not in the power of a single Magistrate, or two Magistrates, to commit to the reception-house, unless the certificate is signed by two medical men? Yes, I am aware of that.

298. Do you not think it desirable to have the law altered in that respect? A great deal would depend upon the use to which you put the reception-house.

299. You are opposed to parties charged with insanity being sent to gaol? Yes; very much.

300. Do you think it desirable they should be sent to the reception house awaiting examination? Yes; but I do not think they should be sent there without two medical certificates.

\* NOTE (on revision):—The total number admitted, during the five months, was 114.

certificates. I think, if a case is so serious that it necessitates a man's sequestration in a hospital for the insane, the least you can do, as a first step to that, is to call in two medical men.

F. N.  
Manning,  
Esq.

23 Mar., 1869.

301. Do you think, in a large city like Sydney, you could always get two medical men having sufficient knowledge of the person said to be insane, to be able to certify to his insanity? There are a very large number of practitioners here; and two opinions are better than one in these cases. There seems to be no difficulty in obtaining medical men on the shortest notice here.

302. Supposing a person is violent in his demeanor, and supposed to be insane, would you have him sent to the reception-house to await examination? No, I would have him examined first by two medical men. I am speaking now from what I see is possible in other countries—in England and abroad. The workhouses in England, in fact, serve for some purposes as reception-houses. They always have two medical certificates there, and they seem to have no difficulty in obtaining them. I think if you were simply to use your reception-house as a place where a person could be sent on one medical certificate, you would directly have it filled with cases of *delirium tremens* arising from drunkenness. A medical man finding little difficulty with a patient, would sign a certificate and send him there; and your reception-house, which is not now more than large enough, would be filled directly. In England, many of the public hospitals have rooms in which they receive patients suffering from *delirium tremens*; but I do not think that is the case in Sydney. I know in London the general hospitals are seldom without cases of *delirium tremens* in the wards.

303. Would you have parties committed direct to the hospital for the insane on the certificate of two medical men? Yes, on a Magistrate's or Judge's order, given after examining into the legality of the certificate.

304. Would you recommend that there should be a medical board to meet once a week at the reception-house, to determine which of the parties awaiting examination there should be sent on to the Lunatic Asylum? I think that would be an extremely good thing. In my report I recommended that there should be an Inspector of Lunatic Asylums, one part of whose duty would be to examine the reception-house once a week, in the first place, to see that patients were not improperly detained there; but the board you have suggested now would answer equally well. Either the inspector or the board, whichever may be appointed, should also see that only such cases were sent on as would necessarily require further treatment. I do think it a pity now, in a few cases, that the patients are sent on to the hospital.

305. You think a number of the parties now sent on to the asylum could be cured by being detained for a short time in the reception-house? Yes, I think a certain number might. At the same time it would be necessary to avoid the danger, which always exists, of converting the reception-house, a mere stepping-stone to the asylum, into a place for treatment. The strictest care should be taken that it should not be perverted from its original purpose. In America, the reception-houses, established on the same principle as the one here, gradually degenerated into small asylums of the very worst class; and they have only just now been done away with in the States.

306. How often are examinations held in the asylum over which you preside, with a view to the discharge of patients? Every week.

307. By whom? By the Board of Visitors.

308. How many are there of them? The board consists of three—two medical men and one legal member. The legal member concurs in the recommendations of the medical members of the board, but has no direct right of discharging patients himself. The patients are seen by both of the medical members before they are discharged.

309. Have you any suggestions to make with regard to any change in the law respecting the discharge of patients? I think that under the present law the discharge of patients is unnecessarily difficult. The law requires that the certificates on which they are discharged shall state that they are of sound mind. Now, there are a number—perhaps not a large number—of patients who, though not quite of sound mind, are harmless and able to get their own living; and these, I think, should be discharged on a qualified certificate to that effect, which it is impossible to give them now.

310. *Mr. Farnell.* You have some of that class in the asylum at Gladesville now? Yes, there are five or six that I think might be discharged on a qualified certificate of this kind.

311. Persons to whom you cannot now give a certificate under the law; but if the law were altered you could give a certificate upon which they might be discharged and get their own living? Yes; I think they might be placed more or less under the protection of the police. I will instance one case to show how the law acts at present. There is a man now in the asylum who used to sell fruit about the streets of Sydney. He got into some little row a little before Christmas, and was taken up by the police. I do not suppose that it was anything more than such a row as many people who are sane get into at Christmas time. The man was found to be of weak mind, and was sent to the hospital, and I am obliged to keep him there; but I am quite certain that, if he were supplied with a basket, he could get his own living as he used to do. I trust him in every way about the place.

312. *Chairman.* In that respect you would like to have the law amended, so that you could discharge those patients who, though of weak mind, were not dangerous and could take care of themselves? Yes, I think too the law which obliges all patients who have been committed as dangerous lunatics, and are afterwards discharged to the care of friends, still of unsound mind, to pass out of the asylum under a bond, wants some alteration. Two-thirds of the patients are admitted under a form denominating them dangerous lunatics. It is a mere remnant of by-gone days; but it is distinctly laid down that no person

F. N.  
Manning,  
Esq.

23 Mar., 1869.

person committed as a dangerous lunatic can be discharged, unless his friends will enter into a bond for his peaceable behaviour. This bond, never for less than £50, costs a sovereign; and from its legal and formal character it acts as a direct deterrent to people who would take and keep their own friends, and might fairly be allowed to keep them.

313. Have you any further suggestions to offer? I think these are the two great points in which the law in respect to the discharge of patients needs amendment. I have not yet been long enough in the Colony to see how far it may be advisable—but I cannot help thinking that in certain cases small sums might be allowed by the Government to the friends of the insane who would be willing to take care of them if they received some pecuniary assistance. They cost the Government twelve shillings a week to keep them in the hospital; and though their friends are quite willing to take care of them, they are unable to do so from want of means. It is a question worthy of consideration how far the Government might be justified in giving say from five to eight shillings a week as an assistance to people willing to receive their friends into their own care. They would, of course, have to give certificates of their respectability of character; and it would be necessary that they should get a certificate from a medical man in the district, once in three, six, or twelve months, as the Government might determine, to testify to the continued existence of the person and to his continued insanity.

314. *Mr. Farnell.*] Of course that would not apply to any persons who would be dangerous lunatics? No, only to a peaceable class of weak-minded people.

315. *Chairman.*] Has your attention been drawn to the circumstance that the friends of some of your patients are persons in very good circumstances, and could contribute towards their support? Yes, frequently.

316. I believe there was an effort made by the Government, some short time ago, to induce some of these parties to subscribe something towards the support of their insane friends, or to take them away? That was before I was superintendent.

317. I suppose there are no means of remedying this abuse of a public institution? None, except you attach a police officer to the lunatic establishments, and make it his business to inquire into the circumstances of people admitted into the asylum; and, also, he might be employed in seeing after those persons I have spoken of, who might be discharged.

318. *Mr. Dodds.*] You have a dislike to sending patients to Darlinghurst Gaol or to the reception-house—where would you propose to have them examined? At their own homes. If taken up by the police for some brawl in the street, I would have a practitioner visit them in the lock-up. I am not sufficiently acquainted with the ways of proceeding here to know where they are placed before being dealt with. There are a great many cases taken from their homes and taken to the Police Court as a preliminary proceeding. I think that very bad.

319. Should the medical officers called upon to examine them be appointed by the Government or by their friends? I think the friends ought to pay, and call in any one they choose, as they would in a case of bodily illness. The medical man acting for the friends of the patient might call in any one he chose, as in a case of ordinary illness.

320. *Mr. Farnell.*] You get some patients from other places besides the reception-house? Yes, from the country districts; they come to the hospital directly, in charge of the police.

321. How would you provide for cases in the interior, in order to avoid bringing them before the Police Courts—would you have them conveyed to the reception-house in Sydney, on the certificate of two medical men, or would you have reception-houses established at certain places in the interior? I think there ought to be a reception-house at every gaol. Of course, you could only set apart certain rooms.

322. I suppose you are aware that on their way from the interior, these persons are treated more like prisoners than lunatics? Unfortunately, I know that has been the case. I have admitted one man with heavy irons on his legs. I represented the case to the Colonial Secretary, who instructed the Sheriff to inform all superintendents of gaols, that in future they must do away with these, and now they use mufflers instead. In many cases it may be necessary, and probably is necessary travelling long distances and in public conveyances, that care should be taken; and the muffler is less objectionable than the handcuff, because it is not associated so directly with the gaol. A man that is handcuffed is a prisoner in everybody's mind.

323. *Mr. Dodds.*] Are you able to distinguish many cases where the patient's lunacy has been brought on by intemperance? There are a great many cases in which intemperance has been associated with lunacy; but it is extremely difficult to say how far the intemperance is an effect, and how far it is a cause of insanity. One case I have now in my mind. A man, who has been in the Public Service, bears an excellent character, has never been addicted to drink as far as is known; for some time nothing he has done has been done well, his public duties have been neglected, and eventually he obtained leave of absence to come to Sydney; on the way down he took to drinking heavily, and eventually came to the Hospital for the Insane. In this case I do not consider that the drinking was the cause of insanity, but that the insanity was prior to the drinking. Of course, in the great majority of cases, the drink is the cause of insanity; here it was the effect.

324. *Mr. Farnell.*] Is there any accommodation that you are aware of at any of our gaols, for the treatment of prisoners who may become insane? I know there is no accommodation at Cockatoo. I have never been at Darlinghurst.

325. Do you think it necessary to have some place of that kind established at all our gaols. I think it would be advisable to establish a really good place for observation and treatment in one gaol, and to forward all prisoners who may be under suspicion of insanity

F. N.  
Manning,  
Esq.

23 Mar., 1869.

insanity to that place. That is what is done in England. All convicts who are supposed to be insane are sent there, and the rooms are fitted so that they may be under close observation and it may be determined whether they are really insane or merely malingering. They are kept there three or even six months before they are sent to the Criminal Lunatic Asylum. At Millbank, rooms are specially set apart for the purpose.

326. Are you aware that, some time back, a number of prisoners were removed from the Parramatta Gaol to the Criminal Lunatic Asylum, on the ground of insanity; and that, after they were admitted to the asylum, it was discovered that there was a plot amongst them for making their escape? Yes; I am aware such was the fact.

327. Had there been a place such as you have spoken of for the treatment of such persons, it could have been detected whether these prisoners were insane or not? Yes. There are two prisoners now at Cockatoo upon whom I was called to give my opinion the other day. As an expression of opinion, I do not think they are insane, either of them; at all events, neither of them are so insane as to justify me in giving a certificate of their insanity. I think it necessary they should be kept under observation for two or three months, certainly; and yet there are no places at Cockatoo where they can be examined. They must be either put into cells, where no one can see them, and where the opening of the door is sufficient to put them on their guard, or else they must be put in the prison hospital, where they will get indulgences which will induce them to keep up the sham if they are malingering.

328. You have had a large experience in lunatic asylums? My experience in lunatic asylums is principally embodied in my report. I have never before been in charge of one; but I have interested myself in them, rather from a liking for the study of the subject than as duty.

329. Are you acquainted with the laws relating to lunacy in various countries? I have obtained, and can leave at the service of the Committee, the English, Scotch, and Irish Acts of Parliament, as well as the lunacy laws of France and Belgium, and of the States of New York and Massachusetts.

330. *Mr. Wilson.*] With reference to the admission of lunatics, you state that, in all cases, they ought to be admitted on the certificate of two medical men, countersigned by a Judge? I did not exactly put it in that way. I said I thought some modification might be made in the existing law, which necessitates the taking of a large majority of cases before the Magistrates in open Court and subjecting them to examination. I think, if the Police Magistrate examined the certificates, and made the requisite order thereupon, it would be a much preferable practice. In fact, the less the insane have to do with the police, the better.

331. I suppose you are aware that a large number of persons are brought before our Courts as being of unsound mind, who are simply labouring under *delirium tremens*? Yes, I suppose there are a certain number of people of that kind, but I do not think many of them reach me.

332. Do you not see that there would be considerable difficulty in having all these people sent to the reception-house, instead of to the gaol? Yes, I can see that there may be great difficulty in providing for their treatment there. It seems to me a great pity that provision is not made in the public hospitals for the treatment of cases of *delirium tremens*, instead of allowing them to go to gaol. A large number of cases of *delirium tremens* are treated in private houses in England; and the London hospitals are seldom without one or two cases within their walls.

333. You are aware that we have only one lunatic reception-house in the Colony, at Sydney, though, as a matter of course, there are cases of lunacy in all parts of the country. Have you ever thought of any means that might be adopted to ameliorate the state of these people taken up as insane, in the interior? I have offered suggestions on that point in my report, principally that hospitals for the insane should be erected in certain districts, say at Maitland, Goulburn, and Bathurst. At present, there is very great difficulty in the transit of these people, on account of their insanity, which enhances the difficulty of travel immensely. Another question is of importance, namely, the return of these people to their friends after they are discharged from the hospital. I have now two or three people whom I would willingly discharge, if I knew they would get home again. There is one woman, especially, to whose friends I have written. Her husband does not seem to be in a great hurry to get her back; and it will cost her, to go by mail, some £3 or £4. She wishes to go beyond Dubbo. The only other way is a long journey by a carrier's van, during which she would have to sleep out with the team—not a nice thing for a woman to undertake; and, therefore, she is staying with us, because of these difficulties. The Government does not allow me to give more than a pound, as assistance to persons discharged.

334. Even though hospitals were established in different parts of the Colony, as you have suggested, these unfortunate people would still have to be brought, in many cases, four or five hundred miles; and the rough treatment they are subjected to during the journey must have a very bad effect upon them? Yes, I think it has. The only thing possible is to inculcate upon all having anything to do with them a feeling of kindness, and to provide separate rooms for the reception of the insane in all the gaols. It is a pity they should mix with the other prisoners.

335. *Mr. Farnell.*] Do you not think it would be wise for the Government to pay the expense of sending these persons to their homes, rather than keep them in the asylum after they are cured? Yes, but the difficulty is that we might pay the expenses of some who would be very well able to get back again at their own expense.

336. *Mr. Wilson.*] There might be some law to enable the Government to compel the relatives to pay the necessary money, unless it was certified by responsible persons that they were unable to do so? Yes, that might be done. But there is no doubt you would

F. N.  
Manning,  
Esq.

23 Mar., 1869.

do away with half these difficulties by taking the hospitals to the patients, instead of bringing the patients to the hospitals. I think it is a good thing that they should be within something like reach of their friends.

337. *Chairman.*] It is desirable that the friends of the lunatics should visit them occasionally? Yes; if they do not do so they are liable to get rid of them, and not think so much about them.

338. *Mr. Dodds.*] How would you deal with insane persons who showed an intention to commit violence either to themselves or other persons—would you not have them brought before the Police Court in the usual way, so that the cases might be investigated, because a case might arise where a patient might at a certain time be perfectly sane, and at another time quite insane—would it not be necessary to show that in some way? Absolute remission in cases of insanity is extremely rare. In almost all cases there is more or less insanity at all times during the continuance of the affection. It is difficult to say that a person is insane at one time and sane at another. I think all these people should be dealt with in the same way as other people that are sick. I think we have a strong argument for the little necessity there is for bringing them before the Police Court, from the fact that in England we have no reception-houses, and they are never brought before the Police Courts; they go at once from their homes to the asylums, except in the case of the extremely poor where the workhouse of the district is made the reception-house for the time being. Such a thing is now scarcely known in England as a lunatic being confined in a gaol.

George Alfred Tucker, Esq., called in and examined:—

G. A. Tucker,  
Esq.

23 Mar., 1869.

339. *Chairman.*] I believe you have a private lunatic asylum at Cook's River? Yes.

340. I suppose you are aware of the objects of this Committee? Something with regard to the Lunacy Law, I believe.

341. How many persons of unsound mind have you in your establishment at present? Thirty-four.

342. Yours is entirely a private asylum? Yes, as far as the proprietary goes. I receive patients from the Government, and it is under Government supervision.

343. How long have you had this establishment at Cook's River? Nearly four years.

344. Have you any amendments to suggest in the law relating to lunacy? Yes, there are several. It does not work well I think, and never will work well. It is obstructive in many ways,—with regard to the discharge of patients for instance.

345. Has your attention been drawn to the manner in which parties are first committed to the asylum for insanity? Yes. Formerly, I believe, they were committed to gaol, which was objectionable.

346. You do not think it desirable they should go to gaol at all? Certainly not; nor that there should be any appearance of the gaol in connection with their detention.

347. Did you not understand that the amended Act of 1867 was intended to obviate the necessity of these parties going to the gaol—that they should be sent to the receiving-house instead? Yes.

348. Persons awaiting examination for insanity are not sent to the receiving-house now? I am really not aware whether they are or not. I receive my patients direct on the Governor's warrant. I have not received any through the reception-house.

349. What amendments would you suggest in the law? In the first place, I think the superintendent or medical officer of an asylum should have power to discharge his patients.

350. You cannot now discharge them? I have no power at all to do so, much to the inconvenience of myself, the patients, and their friends. A patient may be kept in an asylum too long; and the interval that now elapses between one opportunity for discharging them and the next is sometimes longer than it ought to be. The official visitors may visit the establishment on or about the first of one month, but may not come again till the last of the next month; therefore nearly two months may elapse.

351. What change would you propose? I think the superintendent or medical officer should have the power of discharging on probation, for one month for instance, so that persons could be returned if necessary during that month, on the same certificate and the same warrant. Of course, in case of their discharge, proper notice should be sent to the Government, as at present. Now, we have to wait for the official visitors, who have to certify; and then there is the Governor's warrant to cancel the first warrant; which all takes up a great deal of time. A great many people object to placing their insane friends in a private asylum on account of the difficulty of getting them out. The difficulty of getting them out is equal to the difficulty of getting them in.

352. Do you think it would be proper to give qualified certificates upon which parties could be discharged, without its being stated that they were absolutely of sound mind—Are there not cases where parties, though not quite sane, are yet sufficiently able to take care of themselves? Yes; the certificate at present given certifies that the patient is capable of being discharged to the care of his friends; and then the friends have to enter into a bond, which is only a formal matter.

353. Do you not think that bond is a difficulty in the way of getting patients discharged? Yes, a great difficulty; the friends object to enter into it.

354. Do you think there is any advantage in having the bond? I do not see that there is, unless the Government carry it into effect.

355. Have you not found great difficulty in getting the friends of patients to sign the bond? Yes.

356.

356. How many patients have you received in all into your establishment during the four years you have had it? Somewhere about eighty.
357. How many have you discharged? There are thirty-four at present in the house; I think four have been forwarded to Tarban, as incurable, and there have been four deaths; the others have been discharged.
358. Do you discharge many shortly after their reception? Yes.
359. Do you think, from your experience, that many parties have been sent to lunatic asylums who were really sane? No, I never met with a case.
360. But you have discharged several shortly after their reception? Yes.
361. Was that in consequence of the treatment in the asylum having restored them? I think a great deal was owing to the rest and quiet, and proper care and attention.
362. Had some of these parties been suffering from over-indulgence in intoxicating drink? Yes; I sent away one last week. The Act does not provide for cases of *delirium tremens*. This gentleman was discharged in ten days.
363. Do you think it would be well to have a medical board to meet once a week at the receiving-house, to determine which of the parties there awaiting examination should be sent on to the lunatic asylum? Yes, I think that would be advisable. They must be sent on to Tarban Creek at present; there is no power of discharging them from the receiving-house. I should think a great number of cases that go into the receiving-house might be discharged from there without the necessity of going to Tarban.
364. Do you know much of the accommodation for lunatics at the gaol? No; but I have been through the receiving-house.
365. How many are provided for at the reception-house? I think sixteen.
366. *Mr. Wilson.*] Have you ever received any patients that have, in the first instance, been sent to gaol? No, I think not.
367. Are you aware that all parties, suffering under *delirium tremens*, taken up by the police, are charged before the Court as being of unsound mind? I believe so.
368. I suppose you are aware that it is the practice of the Magistrates to send these persons to gaol for medical treatment? Yes.
369. Do you think it would be proper to send such cases as these to the receiving-house along with ordinary lunatics? In the first place, I am of opinion that it is wrong to bring them before Magistrates in open Court at all.
370. People with *delirium tremens*? Any person of unsound mind. But if it cannot be altered in any other way, I approve most decidedly of Magistrates having the power to send them to the receiving-house instead of the gaol. I think an official board would be the proper persons to certify to persons going to the reception-house, without taking them into open Court at all.
371. Do you not see very great difficulty in treating, in the reception-house, cases of *delirium tremens* in such a city as this? I do. It would require a much larger place than the present receiving-house.
372. Almost another gaol? Yes, as regards size.
373. Do you think the board you speak of should consist entirely of medical men? I do not think it necessary.
374. Do you think there is anything with regard to the medical profession, taking them generally, that peculiarly qualifies them as judges of insanity more than ordinary civilians? I think not; and I believe any conscientious medical man will tell you the same.
375. Do you think it would be an advantage to have upon the board laymen not connected with the medical profession? I do. In saying this, I may appear partial, as I am not a medical man; but I believe medical men themselves are of the same opinion.
376. Are you aware whether in other countries, boards in connection with lunatic asylums are composed entirely of medical men or not? They are not, to the best of my knowledge.
377. How often do you think this board should be compelled to visit each lunatic asylum? I do not think they should visit less than once a week.
378. At the present time several weeks elapse? Yes. I may also mention that I have to pay the visitors in my case, and I think it would be much better if the money were to pass through the Treasury instead of going to them direct from me.
379. What is the fee? Two guineas.
380. Do you see anything else in the Act which you think requires amendment? What I am going to say more particularly interests the proprietors of private lunatic asylums. In one of the clauses power is given to the Colonial Secretary to remove patients from one asylum to another, or from one licensed house to another, or from a licensed house to an asylum; and that is carried into effect without any communication with the superintendent of such asylum or licensed house, although the parties may be in arrears with their fees, and the only option the superintendent then has is to sue in the District Court.
381. Do you think that before the Colonial Secretary sanctioned any removal he should see that all charges should be liquidated? I do not think the removal should be authorized unless all arrears were paid. I do not speak so much of the discharge of a patient when restored, but of the removal of those who are still of unsound mind.
382. *Mr. Dodds.*] I understood you to disapprove of bringing before the Court, or sending to gaol, any patient of unsound mind, whether the affection were temporary or otherwise. How would you deal with the numerous cases where parties are brought up for protection? I think when the police put them in the lock-up, they might obtain the attendance of two or more members of the board just spoken of, to examine them and certify whether or not they were of sufficiently unsound mind to be committed to the receiving-house, without going into open Court at all.

G. A. Tucker, Esq.  
23 Mar., 1869. 383. Supposing it were necessary to detain a patient for a few days or a fortnight, would you do so on the certificate of two medical men? Experience would soon give the members of the board sufficient knowledge of the indications of insanity to enable them to give all necessary certificates. After a time, they would have greater experience than many medical men could possibly have. It is only practice that can do it. I have many patients that a stranger would not consider insane if he were living entirely with them for a week; so that, in certifying, there is a very great degree of uncertainty. The patient must be very willing to show his delusions, or very violent, for a medical man to be able to certify, if he never saw him before, or had no previous knowledge of the history of the case.

384. *Mr. Wilson.* I presume your remarks with regard to this board apply to the city of Sydney. You have not taken into consideration the advisability of pursuing the same course in other parts of the Colony? I scarcely think the system could extend to other parts of the Colony.

385. Is there anything else in the Act to which you would like to draw attention? Clause 20 provides that no house shall be kept for the reception of lunatics without a license. At the present time I am aware that parties receive patients without a license.

This Act has never been carried into effect with regard to any one else but myself, although of course it was expected that other parties would go into the undertaking. As our lunacy laws stand, every one may take one patient, provided it is not for pay; but there are cases in the Colony now I know where it is beyond that. Then there is another clause preventing the superintendent of any asylum from making any alteration or addition to the house, without first sending a plan and getting permission from the Colonial Secretary. Now, that is obstructive, and would have been so in reference to my own establishment only for the promptness of the Principal Under Secretary. Of course we try to make the establishment as convenient as possible. We are obliged, indeed, to be always doing it, but it becomes very expensive to have a plan each time to forward to the Colonial Secretary; and not only that, but we have to wait sometimes two or three months for his sanction. Since July I have been to the expense of £700 or £800, and have been obliged sometimes to overstep the law by going on with the work without waiting for the Colonial Secretary's approval, owing, I suppose, to the change in the Ministry.

386. Which clause do you refer to? The fourteenth.

387. I suppose you think this restriction might be done away with, and the permission of the visiting board substituted? Yes, that would do, although the board, in many instances, might not see the advisability of carrying out certain conveniences in a certain way. They might wish it done in many other ways. I would not mind sending in for the consent of the Colonial Secretary, provided it could be obtained within a reasonable time; but that is not the case.

388. *Mr. Tighe.* Do you want the clause annulled? I think it would be quite sufficient that the Colonial Secretary should have due notice of any intended alteration, and an opportunity of objecting to it within a certain number of days.

389. What number of days? A week or fortnight.

# REPORT

ON

# LUNATIC ASYLUMS,

BY

FRED<sup>c</sup>. NORTON MANNING, M.D.

---

Presented to both Houses of Parliament, by Command.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

---

1868.

[Price, 7s. 6d.]

## INTRODUCTION.

---

THE commission which this Report is intended to fulfil is thus expressed in the letter of instructions from the Honorable the Colonial Secretary:—

“ You will visit the chief asylums in the United Kingdom, on the Continent, and in the United States. You will direct your inquiries in these visits to the principles on which the buildings have been erected, and the sanitary precautions adopted in their construction. You will carefully observe the different methods of treatment, and obtain statistical evidence of the results in separate cases, so far as is practicable. You will examine the working of different systems of management and discipline, and endeavour to ascertain the effects of the different forms of administrative organization on the condition of the patients, and in relation to efficient supervision and economy of expenditure. In all cases it will be desirable to obtain plans as well as accurate descriptions of the buildings, particulars of the number of inmates allotted to rooms of a given size, and the quantity of pure air considered as indispensable to a given space.

“ You will obtain from the institutions you visit, copies of all regulations, dietary scales, and reports. It will also be within the compass of your duties to procure for the Government, copies of all recent and important statutes, state papers, and departmental reports relating to the treatment of lunatics”; and the end to which all this information is to tend is “ a re-organization of the lunatic asylums of the Colony on the basis of a correct knowledge of the improvements carried out under more favourable circumstances in other parts of the World.”

The inquiries here indicated have a wide scope, and include an examination of the entire system of asylum construction and administration; and, in addition to this, from “ what asylums are” in Europe and America, is to be drawn the conclusion “ what asylums should be” in New South Wales. Before proceeding to the Report itself, it seems advisable to state briefly the steps taken in fulfilling the commission thus set forth—a commission, the duties of which, the instructions further directed, were to be brought to a conclusion, if possible, “ within the period of six months.”

The English Commissioners in Lunacy were first waited upon, and such advice obtained as they could give concerning the asylums best worth visiting at home and abroad.

The following asylums in England were then visited:—

Middlesex County Asylum .....	Colney Hatch.
Essex do. ....	Brentwood.
Sussex do. ....	Hayward's Heath.
Surrey do. ....	Brookwood.
Three Counties (Beds, Herts, and Hunts) do. ....	Hitchin.
Gloucester do. ....	Gloucester.
Worcester do. ....	Powick.
Stafford do. ....	Stafford.
New Stafford do. ....	Lichfield.
Lancashire do. ....	Prestwich.
Derby County Asylum .....	Mickleover.
Lincoln do. ....	Lincoln.
Leicester do. ....	Leicester.
Bristol Borough Asylum .....	Stapleton.

The Coton Hill Lunatic Hospital .....	Stafford.
„ Northampton do. ....	Northampton.
„ Bethlehem do. ....	Southwark.
„ York do. ....	York.
„ Lincoln do. ....	Lincoln.
„ Friend's Retreat do. ....	York.
„ Broadmoor State Asylum.....	Near Wokingham.
„ Earlswood Idiot do. ....	Near Reigate.
„ Camberwell House Private do. ....	Camberwell.
„ Brislington House do. ....	Near Bristol.
„ Fisherton House do. ....	Near Salisbury.

The lunatic wards in the Poorhouses at Leicester, and Chorlton-on-the-Medlock; the Herbert Hospital Woolwich, and the Pauper Hospital at Chorlton-on-the-Medlock, near Manchester, were also inspected. Scotland was next visited; and, after an interview with the Scotch Commissioners—

The Fife District Asylum .....	Near Cupar
„ Perth do. ....	Murthly.
„ Haddington do. ....	Near Haddington,
„ Dundee Royal Asylum .....	Dundee,
„ Edinburgh do. ....	Morningside,
„ Montrose do. ....	Near Montrose,
„ Glasgow do. ....	Gartnavel,
„ Perth do. ....	Perth,
„ Perth Criminal do. ....	Perth,—

and the lunatic wards in the Poorhouses of Edinburgh, Dundee and Perth, were inspected. The limited time at disposal prevented a visit to Ireland; and after the necessary introductions from the Right Honorable the Secretary of State for Foreign Affairs to Her Majesty's Representatives in Europe, and the United States of America, had been obtained, the following American Institutions, among which are the finest and best managed in the Eastern States, were examined:—

The New Jersey State Hospital for the Insane.....	Trenton.
„ New York do. ....	Utica.
„ Pennsylvania do. ....	Harrisburg.
„ Massachusetts do. ....	Northampton.
„ New York City Asylum .....	Blackwell's Island.
„ Philadelphia City do. ....	Philadelphia.
„ Government Hospital for the Insane .....	Washington.
„ Hospital for the Insane .....	Philadelphia.
„ M'Lean Hospital for the Insane.....	Boston.
„ Criminal Asylum .....	Auburn.
„ Asylum for Idiots .....	Near Syracuse.
„ do. ....	Boston.
„ Asylum for Inebriates .....	Binghamton, N. Y.
„ Hudson's River Asylum (in course of erection)	Poughkeepsie.

Subsequently, the following institutions for the Insane, on the Continent of Europe, were inspected:—

#### FRANCE:—

St. Yon .....	Rouen.
Quatre Mares .....	do.
Evreux .....	Evreux.
Bicêtre .....	Paris.
Charenton .....	do.
St. Anne.....	do.
Ville Evrard .....	Near Paris.
Colonie de Fitz Jaques.....	Clermont.
Maison de Santé .....	Vanvres.

GERMANY:—

## GERMANY:—

Illenau .....	Baden.
Frankfort .....	Prussia.
Hamburg .....	do.
Göttingen .....	do.

## BELGIUM:—

Colonie de Gheel .....	Near Antwerp.
Guislain's Asylum.....	Near Ghent.
Asylum for Women .....	Ghent.
Hospice St. Julien.....	Bruges.
Maison de Santé, dite <i>Le Strop</i> .....	Ghent.

## HOLLAND:—

Meerenberg.....	Near Haarlem.
-----------------	---------------

Of all these institutions, reports more or less comprehensive have been drawn up, and such points in the construction and organization noted, as might be useful in remodeling the asylums of the Colony, and so fulfilling the main object of the commission. Copies of plans more or less elaborate were obtained of the—

New Surrey Asylum.....	Brookwood,
Sussex County do. ....	Hayward's Heath
Middlesex do. do. ....	Colney Hatch,
Cheshire do. do. ....	Macclesfield,
Lancashire do. do. ....	Prestwich,
Essex do. do. ....	Brentwood,
Perth District do. ....	Murthly,
St. Anne's do. ....	Paris,
Ville Evrard do. ....	Near Paris,
Evreux do. ....	Evreux,
Illenau do. ....	Baden,
Hamburg do. ....	Prussia,
Göttingen do. ....	do.,
Osnabrück do. ....	do.,
Frankfort do. ....	do.,
Guislain's do. ....	Ghent,
Meerenberg do. ....	Haarlem,—

and most of the American Institutions which were visited, and also of the new Asylum at Auckland, New Zealand.
