		VOL.	PAGE,
A			
ASSEMBLY—continued :—			
Motion made (<i>Mr. Copeland</i>) that Sir Henry Parkes be now heard, 100.			
Motion made (<i>Mr. Thompson</i>) that Sir John Robertson be now heard, 100.			
Motion made (<i>Mr. Garrett</i>) (1) That the Ballot-papers, Electoral District of Young, be laid upon the Table, (2) That the Clerks at the Table examine the ballot-papers taken at No. 2 Booth, Young, and the Speaker report the result—Mr. Speaker ruled that paragraph (2) cannot be put,—amended motion withdrawn, 94.			
Motion made (<i>Mr. Harold Stephen</i>) that the ballot-papers, Electoral District of Young, be laid on Table, and negatived on Division, 278.			
Motion made (<i>Mr. Thompson</i>) that the dignity and honor of this House will be conserved by taking steps to prevent the sale of intoxicating drinks in the Parliamentary Refreshment Room, except at meal-times, and House counted out, 314.			
Motion made (<i>Mr. Heydon</i>) for Committee of the Whole to consider the necessary steps to be taken to make provision in the Estimates for the Payment of Members of the Legislative Assembly, 155; Order of the Day postponed, 175; House in Committee and progress reported, 185; leave given to sit again on "Tuesday" next, after amendment "Wednesday" had been proposed and withdrawn, 186; House in Committee and progress reported, 194; Call of the House to consider the Question, 197, 264, 265(2), 268; House in Committee, Point of Order reported and decided, Committee resumed, and Resolution reported, 265; Order of the Day postponed, 278, 296; resolution received, read 1 ^o , 2 ^o , and agreed to, 333.			
Motion made (<i>Sir Henry Parkes</i>) that the ruling of the Speaker given on Saturday, 10th July, a.m. "is" contrary alike to the letter of the Standing and Sessional Orders and to the practice of Parliament as established by former Speakers of this House, and has a direct tendency to curtail the privileges of Parliament, and to undermine the just protection of minorities,—amendment moved (<i>Sir Patrick Jennings</i>) to omit all words after "is" and to insert in their place—"consistent with the right understanding of the Rules, Orders, and Usages of Parliament; is warranted by precedent; and tends to preserve and protect the due course of Public Business without infringing the rights of minorities; and this House endorses and confirms the ruling accordingly"—amendment and motion as amended carried on division, 389, 390.			
Motion made (<i>Mr. Garrett</i>) that the Resolution agreed to on the 14th July, 1886, in reference to "Mr. Speakers' Ruling—Continuous Sitting," be rescinded, 544; and negatived, 545.			
Motion made (<i>Mr. Foster</i>) that the removal and exclusion of the honorable and learned member for Morpeth from the House by the "Speaker" without the order or resolution of the House, were contrary to the law and usages of Parliament and the privileges of this House; amendment moved (<i>Mr. Waut</i>) to substitute other words after "Speaker," 402; and amendment carried, 403.			
Motion made (<i>Mr. W. J. Fergusson</i>) for Committee of the Whole to consider whether it be referred to the Standing Orders Committee that members serving on Select Committees on Private Bills be paid, and that to provide therefor parties applying for Private Bills be required to deposit an additional £25, 413; Order of the Day postponed, 425, 572, 658.			
Motion made (<i>Mr. G. A. Lloyd</i>), for a Return giving particulars of cost of printing and binding Parliamentary Papers and Hansard, for Session 1883-4, 489.

Presents Appropriation and Public Works Loan Bill to His Excellency the Governor in the Legislative Council Chamber, for assent, 660.			
APPEAL TO PRIVY COUNCIL—CASE OF BARTON v. TAYLOR:—			
Proceedings in, laid on Table, 253	2	13	
CASES TAYLOR v. BARTON AND OTHERS:—			
Motion made (<i>Mr. Abigail</i>) for copies, in detail, of the whole of the costs to the country in, 394.			
REMOVAL FROM THE HOUSE OF THE HONORABLE MEMBER FOR MORPETH BY ORDER OF:—			
Motion made (<i>Mr. Foster</i>) that the, without the Order or Resolution of the House was contrary to the Law and Usages of Parliament and the Privileges of this House,—amendment moved, (<i>Mr. Want</i>) to substitute other words, 402; amendment and motion as amended carried, on division, 403.			
RULING—CONTINUOUS SITTING:—			
Motion made (<i>Sir Henry Parkes</i>) that the ruling given on Saturday, 10th July, a.m. "is" contrary alike to the letter of the Standing and Sessional Orders and to the practice of Parliament as established by former Speakers of this House, and has a direct tendency to curtail the privileges of Parliament, and to undermine the just protection of minorities,—amendment moved (<i>Sir Patrick Jennings</i>) to omit all words after "is," and to insert in their place—"consistent with the right understanding of the Rules, Orders, and Usages of Parliament; is warranted by precedent; and tends to preserve and protect the due course of Public Business without infringing the rights of minorities; and this House endorses and confirms the ruling accordingly"—amendment and motion as amended carried, on division, 389, 390.			
Motion made (<i>Mr. Garrett</i>) that the Resolution agreed to on 14th July, 1886, be rescinded, 544; and negatived, 545.

		VOL.	PAGE.
S			
SPEAKER—continued:—			
RULINGS OF:—			
Motion made (<i>Mr. Thompson</i>) that House dissent from, and negatived, 309.			
That the House ought not to adopt a Report of a Select Committee of a previous Parliament, 51.			
That Resolution—That Ballot-papers, Young, be examined by Clerk, at the Table, and result reported by Speaker to the House—cannot be put, 94.			
That a motion referring to Ministerial advice to the Governor to dissolve Parliament, submitted by Sir Henry Parkes, was not entitled to be regarded as <i>Privilege</i> , 110.			
That an amendment cannot be proposed in Committee of Ways and Means which would increase the burdens of the people without the direct or indirect sanction of the Crown, 249.			
That one Member cannot move the second reading of a Bill for another, with the only exception of one responsible Minister for another Minister, 257.			
That the Title of the Barristers Bill did not correspond with the Order of Leave, and the Clauses of the Bill were not covered by the Title, 257.			
That an amendment submitted in Committee on Payment of Members, and rejected as out of order, was not identical with any proposition already disposed of by the Committee, 265.			
That it should be left for the decision of the House whether a motion in reference to Ballot Papers, Electoral District of Young, be put, 278.			
That an honorable member is not in order in quoting from a speech made in a previous debate of the present session,—motion made (<i>Mr. Thompson</i>) to dissent from the ruling of the Chair, and negatived, 309.			
That the Committee of the Whole (Customs Duties Bill) was properly sitting,—The House, through that Committee being in continuous sitting, and that it was not proper nor incumbent on him to interrupt the still existent sitting by taking the Chair at 4 o'clock p.m., 380.			
That, a clause of the Customs Duties Bill referring to Schedule A being under consideration, the items of that Schedule could not be discussed in anticipation, nor until the Schedule itself was under consideration, 380.			
Upholds opinion of Chairman, that words proposed to be inserted in clause 4 of the Stamp Duties Act Amendment Bill (No. 3) were properly before the Committee, as not imposing a tax or duty but being rather of the nature of a penalty, 457.			
That the Regulation of Factories and Workshops Bill having been brought in by an unofficial Member, and proceeded with by such Member as a Responsible Minister without being accepted as a Government measure, was rather a matter of constitutional propriety than of Order, 502.			
Upholds the opinion of the Chairman as to the inadmissibility, on the ground of inconsistency, of a proposed amendment to clause 6 of the Income Tax Bill, 511(2).			
That the 1st and 3rd Sessional Orders do not come into operation in cases where the House is already sitting at 4 o'clock p.m., and engaged in the despatch of Business, but have reference only to fresh meetings of the House, and not to sittings extending over twenty-four hours, and that it was therefore not right for him to call on the business for the new day, and thus begin a fresh sitting, 533.			
Upholds the opinion of the Chairman that a question (Centennial Exhibition) already decided by the House, during the present Session, cannot be submitted as an amendment upon a resolution before the Committee of the Whole, 567.			
That the Chairman had taken the usual and proper course in proposing the question in Committee of Supply without the Minister in charge moving the resolution, 583.			
That it is incompetent for an Honorable Member, who had already spoken to the main question, to propose an amendment, 593.			
SPECIAL ADJOURNMENT:—			
Motion made for, and passed, 51, 53, 69, 72, 82, 103, 123, 126, 137, 199, 265, 345, 630.			
SPECIAL TRAINS (See "RAILWAYS")			
SPECIFIC DUTIES (See "FINANCE")			
SPIRITS, WINE, AND BEER:—			
Further Return (<i>in part</i>) to Order (Session 1883-4), laid on Table, 116	4	715

Do do and negatived on Division, 143.		
TARIFF (See also "FINANCE").		
PETITIONS PRESENTED FROM:—		
Bootmakers and saddlers, advocating the imposition of a twenty per cent. duty on all goods imported of such industries, 142	3	1105
Residents of the Murrumbidgee Electorate, that the taxation falls unduly on the poor man, 164	3	1151
The New South Wales Farmers Union, disapproving of the financial policy of the Government, and praying for the imposition of a duty on all agricultural products, 177	3	1135
Residents of Orange in opposition to the proposals now under consideration, and in favor of the stimulation of Colonial Industry by a protective tendency, 193	3	1145
Farmers and others of Bowan Park, near Cudal, urging the inclusion of Agricultural Produce in the list of articles for taxation, 205	3	1139
Public meeting at Molong, in opposition to present Tariff, and advocating a system of Protection to remedy the existing depression in the Colony, 232	3	1149
G. Peacock, complaining of the proposed definite duty on Pulp Fruit imported, and that such duty, if carried, will close the large industry carried on by him, sacrificing his manufactory and plant, and throwing a number of men out of employment and praying that he may be heard at the Bar of the House on the subject, 236	3	1157
Amendment moved (Mr. G. A. Lloyd), on going into Committee of Ways and Means, that Counsel be heard at the Bar, and negatived on Division, 246.		
Fruit-growers at Pennant Hills and Castle Hill, against the levying of the proposed duty upon Pulp Fruit, 246	3	1141
Fruit-growers at Ryde and Gladesville, against the levying of proposed duty upon Pulp Fruit, 246		
Persons in the Publishing, Lithographing, Engraving, and other kindred trades, representing that the present Tariff is inimical to their interests, and praying relief, 253	3	1153
Merchants, Traders, Artisans, and others, in opposition to the alterations and amendment proposed in the Tariff, more especially to the <i>ad valorem</i> Duties, and praying that some other scheme may be devised to meet the deficit, 261, 277, 281, 284, 317, 325, 359	3	1113, 1115, 1119.
Chairman and members of the Newcastle Chamber of Commerce, to the same effect, 317	3	1117
Merchants, Traders, and others, in Newtown, Petersham, and elsewhere, to the same effect, 276	3	1113
Do do do in and about Newcastle, to the same effect, 317	3	1117
Public Meeting of Citizens of Sydney, that much injury will be done to the commerce of the country if the alterations and extensions of the Customs Tariff submitted be passed into law, and praying the House not to pass the Customs Act, 268	3	1147
Certain Producers, Traders, Artisans, and others, urging that before new burdens of Taxation are imposed material reductions in the expenditure should be made, suggesting the adoption of a system of direct taxation upon property, and praying the House not to pass any Bill to extend the present Customs Tariff, 281 ⁽²⁾ , 284, 291 ⁽³⁾ , 295, 305 ⁽⁵⁾ , 309, 313, 317, 318, 321, 325, 331, 338, 343 ⁽³⁾ , 349 ⁽⁴⁾ , 373, 402	3	1121
Certain Producers, Traders, Artisans, and others, in district of Molong, with similar prayer, 281, 300.	3	1121, 1123
Do do do Gundaroo do 305.	3	1123
Do do do Yase Plains do 317.	3	1125
Henry Strange Fry, Chairman of Public Meeting at Bulli, with similar prayer, 291	3	1121
Luke Gulson, Chairman of Public Meeting, with similar prayer, 313	3	1123
Electors of The Hume, in favour of the <i>ad valorem</i> and specific duties, and suggesting certain taxes as desirable for raising revenue, 341	3	1107

(REPORT FOR 1884.)

Presented to Parliament by Command.

Charles Oliver, Esq., Under Secretary, to The Hon. J. S. Farnell, Secretary for
Lands.

Sir,

Department of Lands, Sydney, 4th September, 1885.

I have the honor to submit for your information the Fifth Annual Report of the working of this Department, being for the year ended 31st December, 1884.

Schedules I to XXXVIII attached will show in a tabulated form the work to a large extent of the Department during that period, and also the result of the various methods of alienating the Crown Lands by auction, improvement purchase, special purchase, volunteer land orders, and conditional purchase. Schedules XXXII to XXXVI give similar information as regards the leasing of Crown Lands by pre-emptive and auction leases.

A summary of the principal transactions is as follows:—

AUCTION.

	Sold.	Amount realized.	Average price per acre.
	acres.	£	£ s. d.
Town lands	633	32,008	50 11 0
Suburban	2,697	21,476	7 19 2
Country	38,214	72,412	1 17 11

Compared with 1883 the amount of country land sold is somewhat in excess, whilst the price realized per acre is 6s. 1d. per acre higher. The area of town and suburban lands disposed of was slightly less, whilst the average prices per acre realized were greater—the figures being, £48 7s. and £50 11s. for town, and £5 14s. 6d. and £7 19s. 2d. for suburban. The restriction in the early part of 1883 and continued in 1884 of auction sales of country lands will account for the great falling off in this form of alienation compared with 1882 and preceding years.

This, together with the total suspension of the operation of clause 30 of the Lands Act further Amendment of 1880, under which lands passed at auction could be selected at the upset price, has resulted in the guarantee deposit of 6d. per acre required, when making application for survey of lands for auction sale, falling to £47 5s., representing 1,890 acres, as against £2,947, representing 119,880 acres in 1883; and £56,012, representing 2,240,480 acres in 1882. Another effect is the refunding of guarantee deposits to the amount of £38,446 for non-survey and auction sale of lands within twelve months from date of application. This sum

though less by £2,280 than that refunded in 1883, is much larger than during any preceding year. The amount forfeited as a penalty for not purchasing at auction when the lands were offered within twelve months from date of application is very much larger than in the preceding year, but far less than in 1882; thus in 1882, £679; 1883, £2 12s.; 1884, £243 6s.

The number of applications tendered (30) to select land in virtue of Volunteer land orders is less than for many years past, and in all probability this form of alienation will ere long be obsolete. At the end of last year there were sixty-five applications unsatisfied, many of which were made prior to 1884, but owing to the remoteness of the land, in addition to other causes, such as conflict as to precedence, have remained unsettled so long.

IMPROVEMENT PURCHASES.

A noticeable feature in the work of the year is the very large number of applications tendered to purchase under the 2nd clause of the Act of 1875. The following statement in brief will show the number of applications and area for years 1880 to 1884 inclusive:—

Year.	No. of Applications.	Area.
		Acres.
1880	1,912	340,289
1881	1,455	235,045
1882	2,153	441,554
1883	2,544	576,185
1884	6,467	1,416,879

From this it will be seen that, while the area applied for in 1880 was slightly greater than in 1881, there has been an increase yearly; though during the last year the area was unusually large. It may be observed that from the 17th July, 1884,—the date mentioned in sub-section 2 of clause 2 of Crown Lands Act of 1884, after which improvements effected or acquired will not confer a right to purchase—to the 17th October following—the date upon which the Act was assented to,—there were tendered no less than 3,578 applications, covering an area of 611,581 acres, being more than half the total number of applications, and nearly half the total area. From the date last mentioned to the end of the year there were tendered 1,970 applications, representing an area of 1,349,357 acres. Thus while the number of applications tendered during the last quarter of the year was rather more than half of the preceding quarter, the area applied for was more than double. The following statement in tabular form shows the result during the periods mentioned for nine of the principal Land Districts:—

	From 17 July to 17 October, 1884.		From 18 October to 31 December, 1884.	
	No. of applications.	Area.	No. of applications.	Area.
		Acres.		Acres.
Wilcannia	864	71,898	170	11,604
Bourke	315	44,855	244	56,365
Hillston	212	31,219	141	27,155
Wentworth	203	27,149	153	21,142
Hay	175	48,128	75	21,905
Cobar	158	37,953	171	19,290
Deniliquin	152	46,529	85	16,418
Dubbo	128	33,037	41	6,684
Wagga Wagga	120	23,728	76	17,806

The Western Division of the Colony has, it will be seen, furnished by far the largest number of applications. This is no doubt accounted for by the abolition, at the end of the year, of sales in virtue of improvements, consequent upon the change in the Land Law of the Colony, under which all such applications were to be lodged on or before the 31st December, 1884, as also to the provision that at the expiration of leases under the new law no compensation will be allowed for improvements.

The

The actual area sold during the year is 252,127 acres, in 1,191 lots, realizing £302,315, or an average of £1 3s. 11d. per acre. Whilst the price realized may be considered very satisfactory, and worthy of remark, the area sold is greater than during the two preceding years but less than in 1881 and 1880. The sales in virtue of improvements are thus summarised:—

Year.	No. of Lots sold.	Area sold.	Amount realized.	Average price per acre.
		acres.	£	£ s. d.
1880	1,245	237,646	243,026	1 0 5
1881	2,648	474,098	487,694	1 0 7
1882	934	165,030	175,236	1 1 3
1883	658	103,774	116,219	1 2 4
1884	1,191	252,127	302,315	1 3 11

SPECIAL PURCHASES.

Schedule XI, referring to purchases under 9th, 10th, 11th, and 12th clauses, *i.e.*, reclamations, sale of unnecessary roads, &c., &c., shows that 506 acres were sold, realizing £5,125. The area is less by 154 acres than in 1883, while the amount realized is greater by £1,990.

During the year 6,595 acres have been granted or dedicated for public purposes (Schedule XII). This area is larger than for the two preceding years—the principal increases being for Permanent Commons, Recreation Grounds, Public School Sites, Cemeteries, and Show Grounds.

The number of Deeds of Grant prepared (Schedule XIII) was 5,416, against 5,478 for 1883. Whilst there is but a slight falling off in the number of grants the area included therein is less by 274,981 acres. This is accounted for by confining the sales by auction to town and suburban lands, and small areas of country lands in the immediate vicinity of towns. In connection with the work of the Deeds Branch it may be remarked there is still awaiting delivery a large number of grants prepared before the Real Property Act (or Torrens Act, as it is popularly known as) came into operation in 1863. They refer mostly to lands in the County of Cumberland, and in what are called the Old Settled Counties and Towns; and although every effort is made to insure their falling into the hands of those rightly entitled to receive them, there is not wanting evidence to show that on account of the daily increasing value of the land endeavours have been made to obtain possession of them by persons who were unable to prove they had a right to their custody.

LEASES.

In Schedules XXXII to XXXVI are disclosed in detail the various items connected with pre-emptive leases and leases submitted to auction.

During the year the number of applications for pre-emptive leases was 1,754 for 1,345,431 acres, as against 2,897 for 2,638,903 acres in the preceding year; 4,430 for 4,537,181 acres in 1882; and 4,450 for 4,616,168 acres in 1881. Of the pre-emptive leases granted prior to 1884 there were renewed for that year 16,093 for an area of 14,327,884 acres giving an annual rent of £46,232 12s., or $\frac{31}{40}$ d. per acre. This number and area are less than for the two preceding years, but greater than for 1880 and 1881. The annual leases originally purchased at auction were renewed for 1884 in 3,543 cases for an area of 2,372,774 acres, at a rental of £8,384. The Leases advertised for sale by auction as well as those sold were about equal to 1883.

In connection with leases within the control of this Department there were received 218 applications to ringbark 182,167 acres. During the year 171 permissions were granted to ringbark an area of 155,188 acres.

CONDITIONAL PURCHASES.

With the exception of 1879 and 1880, during no year of the last decade has the number of selections taken up and the area applied for fallen as low as in 1884. Between 1882—in which the greatest number of selections were made and the greatest area taken up during any financial year—and the year just closed there has been a falling off of 3,949 selections representing an area of 938,280 acres.

It

It may be somewhat difficult to account for this, but two potent causes may perhaps be considered to be the severe drought through which the Colony has recently passed, and the initiation some three years ago of a radical change in the land laws, fostering the belief in many that under a new policy of disposing of the Crown Lands easier and more favourable terms would be obtained than prevailed under the system then in force. How far that belief prevailed at the latter part of the year may be partly gathered from the fact that of the total number of selections, 10,657 representing 1,453,937 acres, received during 1884, no less than 1,714, representing an area of 243,421 acres were tendered in the month of December alone, fully two-thirds of which were under sections 21 and 22, *i.e.*, as Additional Conditional Purchases, which increase the area of the holding without incurring necessarily residence or improvement conditions.

This result is the more noticeable as there were only three "Land Office" days in that month; and the year's selections and area represented would, if calculated on that experience, far exceed that of any year in the history of the Colony.

Although the total number of selections was only seventeen less than in 1883, there would seem to have been, compared with that year, a great disinclination to incur the residence and improvement conditions required by section 13 of the Act of 1861, whilst there was an appreciable leaning to the enlarging of holdings then in existence by selecting under section 21. A glance at Schedule XVII, in conjunction with the similar Schedule for the preceding year, will show that there were 638 less selections under section 13 (requiring residence and improvement) than last year; while the number of selections under section 21 (residence not required and improvements not essential by reason of both conditions having been fulfilled on the original selection) was greater by 582 than during the same period. From the same returns, showing in detail the Land District in, and the section under, which the applications were made, it appears the demand for land was greater last year than in 1883 in the following districts:—Armidale, Walcha, Macleay River, Scone, Tamworth, Bathurst, Bombala, Cooma, Casino, Glen Innes, Inverell, Manning River, Port Macquarie, and Port Stephens. In the case of the first four mentioned the increase was over 200 per cent. In the districts of Wagga Wagga, Brisbane Water, Coonamble, and Burrowa there has been a marked falling off; whilst a similar result, to a less extent, has been experienced in the districts of Bourke, Brewarrina, Cowra, Dubbo, Gunning, Hillston, Lismore, Molong, and Moree.

During the year 4,715 selections, representing 696,854 acres, reverted to the Crown, either by cancellation, voidance, lapsing, or forfeiture. This number and area are in excess of the two preceding years (though the increase has been regular year by year), a result brought about by renewed efforts to overtake the work of inquiring into the fulfilment of conditions as soon as possible after the close of three years from the date of selection. Of these there were declared lapsed (for non-receipt of declaration as to residence and improvement, or for non-payment of instalment of or interest on the balance of purchase money) 958 selections, amounting to 125,274 acres, being nearly 300 per cent. in excess of the preceding year.

Schedule XVIII discloses that on the 31st December last there stood good in the Registers 139,601 selections, representing 17,247,022 acres, a proportion of which will no doubt be ultimately forfeited. This area, however, includes over 1,000,000 acres the deeds of which have issued, all necessary conditions having been fulfilled.

A reference to Schedule XXVI will show that during the year there were 6,017 transfers, representing an area of 1,525,456 acres. Though the total number of transfers was less by 196 than during the preceding year, the area transferred was nearly 17,000 acres more. There has, however, been an increase over 1883 in the following districts:—Young, Cassilis, Armidale, Deniliquin, Glen Innes, Grafton, Lismore, and Molong, and a decrease in Bathurst, Bega, Burrowa, Coonabarabran, Corowa, Gunnedah, Inverell, Patrick's Plains, Tamworth, Wagga Wagga, and Wyallda.

Conditional purchases to the number of 226, representing an area of 23,454, taken up prior to 1875, were in the year brought under the 8th clause of the Act of 1875, enabling the outstanding balance of the purchase money to be paid off by instalments of 1s. per acre. This number is rather in advance of former years, and makes a total of 5,240, representing 513,790 acres, brought under the operation of that clause, but taken up prior to the Amending Act of 1875.

The

The work done in the field by the Inspectors of Conditional Purchases was about the same as in the previous year, though some 1,500 cases more were referred to them for report as to fulfilment of conditions. The number of cases reported upon by the Commissioners during 1884 was largely in excess of those of the previous year, and as the Inspectors have to attend the Commissioners Court to give evidence, the fact of their (Inspectors) being unable to keep pace with the number of instructions sent them to visit and report upon selections may be thus accounted for. The details of the work done in this direction will be seen by a glance at Schedules XXVII to XXIX.

The total revenue received for conditional purchase under the various items—deposit money, instalments, interest, and balance of purchase money was £952,281, being in the aggregate about £20,000 in excess of the amount received in 1883 from the same sources. Whilst such is the case, however, the amount received for deposits fell £43,414 below the previous year, and £340,000 below 1882; the items standing thus,—1882, £621,617; 1883, £424,968; 1884, £381,550. It may be here remarked though that the great falling off of revenue from this source since 1882, the year in which the largest amount was ever received, may, as before stated, be accounted for, perhaps, mainly by the early prospects of a change in the land laws. Consequent upon the large area selected in 1881 (not far below 1882), there was last year an increase of £15,500 for interest, and £45,800 for instalment over the previous year. There was also an increase of £3,153 received for balances of purchase money. The receipts for the years 1882, 1883, and 1884, are thus epitomised.

Year.	Deposits.			Interest.			Instalments.			Balances.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
1882	621,617	1	11	287,526	13	9	129,921	0	7	109,666	12	5
1883	424,968	0	10	310,676	6	7	137,277	8	9	58,313	10	4
1884	381,550	4	0	326,183	18	9	183,080	19	3	61,466	3	5
	1,428,135	6	9	924,386	19	1	450,279	8	7	229,446	6	2

Owing to the large area taken up in each of the years 1881 and 1882, and the large amount received as deposit money,—far in excess of that of any previous year, there may be fairly anticipated to receive during 1885 a large increase upon previous years in the items “Interest” and “Instalments,” payable at the expiration of three years (or within three months thereafter) of the date of selection.

MISCELLANEOUS.

The authority of the Governor and Executive Council was obtained in 1,358 cases for the revocation of reserves from sale or lease and the notifying of other reserves, together with the alteration of designs of towns, villages, &c.

For railway purposes thirty lots respecting 106½ acres were resumed in accordance with the Railway Resumption Act of 1874. *Vide* Schedule XXXVII. The amount appropriated by Parliament (exclusive of the Survey Branch) to meet the services of the year was £99,415, of which £92,526 18s. 5d. has been expended. Of the remaining balance £3,267 11s. 5d. will in due time be written off under the Appropriation Act, leaving £3,620 10s. 2d. to meet outstanding claims.

£1,139 3s. 11d. has also been paid for advertising out of the vote provided in the Treasury Department, and, £4,530 9s. 9d. for services of 1883 and previous years, which have been met from the balances remaining at the commencement of the year, thus making the total amount expended during the year £98,896 12s. 1d., a decrease of £2,849 0s. 11d. as compared with the previous year.

The Departmental Staff shows an increase of three officers, viz., a chief clerk and two additional clerks. The staff of the Auction Sales Branch was reduced by one half, three of the clerks being transferred to the Lease Branch, and one to the Deeds Branch for which the two additional clerks provided for were also found to be necessary.

It will thus be seen that the staff at the end of the year was about equal in strength to that of the previous year, while it may be remarked that the expenditure thereon during the year now under review was £1,700 less than in 1883.

In

In concluding this report of the last year of the existence of the Land Acts, covering a period of twenty-four years, it may be remarked that the work for 1884 has been reviewed rather in the light of simple results than in that of inferences which would tend to conclusions more or less correct, or of experiences derivable therefrom. The gradual increase in the price realized during the last few years for Crown Lands is also worthy of note. There has been a steady upward tendency as regards all classes of land, culminating with the year just closed. Toward the latter end of the year the work of the Department became somewhat disarranged, though not impeded, by the necessary changes being given partial effect to, in order that the requirements of the Crown Lands Act of 1884 might be met as far as necessary and practicable on its coming into operation at the beginning of 1885.

Attached hereto (Schedule XXXVIII) is a *résumé* of the operation of the Land Laws of the Colony, from which it will be seen that on the 31st December, 1884, the total area of land alienated from the foundation of the Colony, including conditional purchases, the deeds of which have issued, was 21,207,708 acres.

Including 16,363,311 acres taken up as conditional purchases, but the deeds of which had not issued on the 31st December, owing to non-payment of balance of purchase money, or to other causes incident to the law, there remained unalienated at the close of the year an estimated area of 171,567,728 acres.

Appended hereto is the report of the Surveyor-General.

I have the honor to be,

Sir,

Your most obedient Servant,

CHARLES OLIVER,

Under Secretary.

SCHEDULE I.

RETURN of Auction Sales of Town Lands under the 23rd section of the Crown Lands Alienation Act of 1861.

REASONS of Voidance.

Limit of frontage exceeded	194	Through non-residence on freehold	59
Separated from previous selections	124	Application not tendered in person	168
Non-survey within twelve months	321	Non-holder of original purchase	28
Form of measurement applied for objectionable	190	Within population boundaries	274
On account of improvements	163	More than one selection on the same land office day... ..	3
As the land was previously selected	351	Special decisions	33
Land within reserves	272	While area applied for not available	152
Land not available	134	Fee for sub-division not paid	15
Crosses a frontage road	20	Applicant under age	1
Crosses a frontage creek	7	Taken up under wrong name	1
Contrary to Regulations	14	Applied for at wrong land office	49
Full deposit not paid	2	Within thirty days from date of forfeiture	14
Freehold not in applicant's name	3	Joins previous selection at a corner only	11
Original purchase void... ..	78	Taken up under section 13 instead of 14	14
Original purchase lapsed or forfeited... ..	5	Vagueness of description	105
Holds another incomplete purchase	12		
Maximum area exceeded	15	Total... ..	2,847
Within a mineral lease... ..	6		
Applicant being a married woman	5		

SUPPLEMENTARY

Areas increased during the year 1884.

Number of C.Ps. acted on—723.

Area increased by—9,995a. 1r. 26p.

Amount of deposit asked for—£2,453 5s.

Deposits not asked for to the amount of—£70 16s.

Deposits in excess on account of M.C.Ps.—£25 5s.

	£	s.	d.
Miscellaneous amounts authorised for refund during the year...	1,211	3	6
Sub-division fees	593	4	0
Investigation fees	220	0	0
10 per cent. deposit on account of improvements	259	12	0
Deposits for M.C.Ps. sections not charged	96	17	6
Appraisalment fees	31	10	0
Guarantee survey fee	10	0	0

SCHEDULE XXI.

SCHEDULE XXXVIII.

STATEMENT of Area of Land alienated and unalienated in the Colony on the 31st December, 1884.

1. Area alienated in all forms prior to 1861	acres.
2. Area alienated by Auction and after Auction Selection, from 1861 to 31st December, 1884	7,338,539
3. Do by Improvement Purchase during same period	12,655,511
4. Do by Conditional Purchase during same period for which Deeds have issued	2,047,914
5. Do by all other forms during same period	1,088,436
	1,184,022
Area alienated up to 31st December, 1884, including lands set apart for public purposes	24,314,422
6. Estimated area of unalienated land in the Colony on 31st December, 1884	171,567,728
Estimated area of Colony	195,882,150
7. Area conditionally purchased up to 31st December, 1884, exclusive of forfeitures, lapsings, cancellations, and voidances, but for which deeds have not issued*	16,363,311

* This area is included in item No. 6.

REPORT of the Surveyor-General to The Under Secretary for Lands.

Sir,

Surveyor-General's Office, Sydney, 3 September, 1885.

1. In making my Annual Report for 1884, I propose to confine it exclusively to the work done during the year and to any practice divergent from that of other years which may have occurred.

2. Returns giving full particulars as to cost, number, and nature of instructions issued to and dealt with by surveyors of all classes will be found at pages 68 to 73 inclusive.

3. Returns giving particulars of the number and employment of salaried surveyors will be found on page 66.

4. The vacant positions for second-class surveyors, appearing in Estimates for 1884, were filled by the appointment of four licensed surveyors, three of whom were previously employed on temporary salary.

5. A vacancy for a second-class surveyor under the head of General Survey of the Colony was filled up by the appointment of a surveyor previously employed on temporary salary. This appointment was made to take effect from 1st January, 1883.

6. The number of licensed surveyors employed at the end of the year 1884 was 198 against 196 of the previous year; in addition to those six have been transferred to the permanent staff.

7. The following table shows the average cost per acre of measurement by licensed surveyors, from 1873 to the end of 1884, viz.:—

1873	1 5 $\frac{1}{2}$	1877	0 8 $\frac{1}{2}$	1881	1 1 $\frac{1}{2}$
1874	0 11	1878	0 9 $\frac{1}{2}$	1882	0 11 $\frac{1}{2}$
1875	0 10 $\frac{1}{2}$	1879	1 2 $\frac{1}{2}$	1883	0 11 $\frac{1}{2}$
1876	0 8 $\frac{1}{2}$	1880	1 2 $\frac{1}{2}$	1884	1 3 $\frac{1}{2}$

8. In estimating the cost of survey per acre it has been the practice to include in the amount all lineal measurements, some of which, roads and feature surveys for instance, are but indirectly concerned.

9. The increased cost of licensed surveys in 1884 arises from the stoppage of measurements for auction sale. These surveys being generally in blocks are carried out at a cheaper rate than conditional purchases which are more isolated.

10. The licensed surveyors admitted during the year are as follows:—

At the June Examination:—

Messrs. T. M. Stephen
A. B. Wood
P. F. B. Adams
H. V. Haynes
S. F. von Arnheim
P. S. Murray
C. E. Bowler
A. Peake
C. R. Cuninghame
J. F. C. Goodridge
C. A. Martin
J. T. McCann

Messrs. W. B. Bridges

12. On 31st December, 1883, the licensed surveyors had on hand the following instructions, viz.:—

Under six months date...	2,670
Over six and under twelve months	1,067
Twelve months and upwards	615

Total 4,352

On 31st December, 1884:—

Under six months date...	2,869
Over six and under twelve months	637
Twelve months and upwards	261

Total 3,767

13. As licensed surveyors have to meet all expenses, such as labour, horses, forage, equipment, &c., in advance, and to wait for payment of balances of accounts, there is evidently a limit to compulsion in carrying out instructions that can only be executed at a loss; consequently some latitude has been allowed in time when claims for measurement are not pressing. Occasionally, under exceptionally difficult circumstances, the expense of travelling or a charge per diem is allowed, but in either case it is special.

14. The average earnings of the licensed surveyors fell in 1884 to £694 against £770 in 1883, which was considered unremunerative. There is no doubt that many surveyors have only held their districts in hopes of improved circumstances arising out of the new Land law.

OFFICE STAFF—PROFESSIONAL.

15. The number of temporary draftsmen at the end of 1884 was 222. Of this number fifty-two have had less than twelve months' experience; consequently, although the strength of the office is numerically great, it is still weak. The effect of the loss of 121 draftsmen during 1881 and 1882 is still severely felt.

16. In addition to the staff of draftsmen, permanent and temporary, eight permanent and thirty-three temporary clerks are employed in the professional branch, in duties not requiring skill in drawing; they are principally employed in keeping books of entry and despatch of papers, and assisting in various ways, thus saving the time of the professional officers.

Number of draftsmen in office at end of 1884:—

Permanent Staff	109—and 9 litho. draftsmen.
Cadets...	15 paid from "salaries."
			5 paid from "contingencies."
Temporary Staff.			Parish Map Compilation.
Special Class	75
1st	"	...	81
2nd	"	...	32
3rd	"	...	20
4th	"	...	8
5th	"	...	4
6th	"	...	2
			222
			24

Number who have served less than twelve months, 52.

Number who left the office in 1884:—Permanent, 5; temporary, 18.

THE SURVEYOR-GENERAL.

17. During 1884 the whole of the work known as Charting has been dealt with under Geographical Division; the term Charting Branches no longer applies.

18. At the commencement of 1884 the whole of the Colony was divided into thirteen Geographical Divisions, each Division dealing with the whole of the work under alienation.

On the 31st December, 1883, the total undealt with Charting cases in the several Divisions

were 7,632 plans; 14,354 portions; 2,529,995 acres.

Received during 1884 9,857 " 17,694 " 1,820,070 "

Therefore the total to be dealt with in 1884 was 17,489 " 32,048 " 4,360,065 "

The total dealt with during 1884 11,993 " 23,434 " 3,122,777 "

Balance in Geographical Divisions on 31st December, 1884... .. 5,496 " 8,614 " 1,238,288 "

19. By comparing this statement with the report of 1883, folio 38, the decrease of cases received is shown to be 1,561 plans, while the amount of work dealt with compared with the previous year is shown to be an increase of 2,349 plans, containing 4,200 portions and 278,065 acres, and a decrease of the work on hand as compared with the previous year of 2,196 plans and 5,740 portions.

20. Charting cases delayed by being under reference to surveyor for amendment or explanation, 1,217 cases, being 1,992 less than on the 31st December, 1883.

21. Submission cases to Department of Lands of which the plans are with the draftsmen on the 31st December, 1884, 705 cases.

22. The plans delayed on account of being under reference to surveyors being 1,217, and under submission to Lands 705 (plans with Charting Draftsmen), equal a total of 1,922 plans, and deducted from the total undealt with cases on hand on the 31st December, 1884, viz., 5,496 plans, leaves the number that can be progressed with, 3,574 plans.

23. The number of memoranda sent to surveyors on subjects requiring explanation during 1884 was 4,107 memos., a decrease as compared with 1883 of 1,280 memos.

24. The total number of cases requiring submission to a higher authority in 1884 was 9,085 cases, an increase over 1883 of 2,786 cases.

25. The conditional purchase and volunteer land order applications received during 1884 were 9,618 applications, which added to cases in branch on 31st December, 1883, give a total of 10,864, from which if deducted the number dealt with during 1884, viz., 9,592, the remainder, 1,272, represent the total number on hand on the 31st December, 1884.

26. This total in the Geographical Divisions on the 31st December, 1884, may be considered large, but when the facts are taken into consideration that over a thousand applications were received during the month of December in the several divisions, and that the officers had to be taken off their legitimate work to complete the District Surveyors' Office maps, to accord with the maps of this office for working the Land Act of 1884 in the District Offices, I am of opinion that the arrears will be considered sufficiently accounted for.

27. The following tabular statement shows the state of the charting, &c., work in each of the Geographical Divisions on the 31st December, 1884.

CHARTING RETURN ON THE 31ST DECEMBER, 1884.

Geographical Division.	The names of the Heads of the Geographical Divisions.	Cases received during month.	Portions.	Unissued.	Submitted to Lands.	For examination.	Under reference to Surveyor.	Dealt with during month.	Portions.	Miscellaneous Branch at end of month.	Portions.

	Total	1,081	2,002	1,107	1,837

28. The total number of improvement purchase applications remaining in divisions on the 31st December, 1884, may be considered large; but I consider these arrears to be sufficiently accounted for by the fact that a large number of the applications having been made in the western part of the Colony, and not less than 1,290 improvement purchases having been received only during the months of November and December, in Geographical Division No. 9, and 750 in No. 1, and the work having to be laid aside for the urgent necessity of completion of maps for the district offices, in view of the Land Act of 1884 coming into force on the 1st January, 1885. The total number of improvement purchases received during the year in the above divisions have been very great, not less than 2,150 in the former division and 1,230 in the latter division, together about five-eighths of the total number received in all the divisions.

Aggregate total—

On hand, 31st December, 1883	1,958
Received during 1884	15,212
								<u>17,170</u>
Dealt with	15,489
								<u>1,680</u>
Aggregate balance on hand, 31st December, 1884	1,680

32. To meet the influx of work (C.P. certificates) seven description writers by piece-work were employed during the latter part of the year, at a cost of £413 3s. 6d., and an extra examiner for six weeks.

33. DIAGRAM BRANCH.

The total number of diagrams for deeds prepared in duplicate in this branch

during the year 1884	10,874
Do 1883	11,305
								<u>531</u>
Decrease in 1884	531
On hand in Branch, 31st December, 1884	67

34. In addition to the above class of work the Assistant Examiner of Diagrams has been occupied in furnishing necessary information on about 530 plans for description writers.

35. This branch is assisted by draftsmen who, for diagrams or deeds, are employed by piece-work at a cost during the year 1884 of £854 11s.

36. HARBOUR FRONTAGE AND SPECIAL LEASE BRANCH.

Applications received during 1884	1,878
In branch, 31st December, 1883	177
								<u>2,055</u>
Total	2,055
Dealt with during 1884	109 charting.
Do do	1,809 administrative.
								<u>1,918</u>
Balance on hand, 31st December, 1884	137

37. As stated in a previous report the head of this branch supervises the examination of candidates for employment as temporary draftsmen. During the year 1884 the candidates who passed the test examination for employment numbered seventy-six, and a considerable portion of his time is expended in the assessment of plans presented for inspection, and also of plans drawn by candidates under examination. A large number of the plans submitted are not sufficiently good to warrant an examination, and in the case of others, which may be sufficiently good to admit of the applicants being examined, they prove themselves by failing in other subjects necessary to be efficient in, ineligible for employment.

38. He also assists the Chief Draftsman in dealing with applications for professional assistance in the office and field. The head of this branch has also to act in respect to water frontage matters, as Secretary to the Engineer-in-Chief for Harbours and Rivers and Surveyor-General (constituting a Board to report on such matters), and on their behalf to supply information and advice to applicants.

MISCELLANEOUS BRANCH.

39. This branch deals with applications for Public Schools, General Cemeteries, Police Stations, Schools of Art, Post, Telegraph, and Court Rooms, Gaols, Show Grounds, Pounds, Baths, Hospitals, Town Halls, Church Sites, &c., &c., and Railway resumptions.

Miscellaneous cases received during 1884	2,137
Railway resumptions	123
								<u>2,260</u>
Total	2,260
representing 2,795 portions.								
In branch on 31st December, 1883	146

The total number of parish maps charted up during the year was									
...	3,690
The total number of tracings prepared for the Land Board (showing leases) at									
a cost, £426 15s....									
...	9,500

41. In addition to the above, 3,000 applications were examined, but being in right of freeholds within runs, the leases were noted for cancellation and no tracings were prepared.

42. In submitting this report of the Lease Branch I may remark that on the 7th November, in order to meet anticipated applications for conversion of leases under the provision of the "Crown Lands Act of 1884" and the preparation of the necessary tracings required to show boundaries of leases, assistance was sought from the Geographical Divisions for this duty, and about 1,500 cases were transferred to these divisions, but owing to the Geographical Divisions being fully taxed with work, assistance only was given to a very limited extent, and contract or piece-work had to be resorted to, and, as before stated, over 9,500 tracings have been prepared at a cost of £426 15s., besides a large number having to be made in the branch as ordinary work; and between the 19th of November and the 31st December not less than 12,500 leases were cursorily examined with reference to the land in right of which they were granted, and that all possible information appear on the lease maps before the 1st January, 1885, and in readiness to facilitate dealing with applications under the 52nd clause of the "Crown Lands Act of 1884" during the ninety days allowed by that Act, and also in order to chart the leases gazetted during the latter end of December, overtime work had to be resorted to, and the officers of the Lease Branch remained at the duty till 10 o'clock at night, and by that means the required work has been accomplished without addition to the ordinary staff of the branch in a most satisfactory manner, and though there is a decrease on the previous year of the numbers of lease applications dealt with during 1884, nevertheless the large quantity of undefined leases previously to 1880, and the revision of lease boundaries, render it necessary on account of errors in the compilations of old maps, discovered by new compilations on large scale, the draftsmen throughout the year have been heavily taxed with work.

ASSISTANT OFFICER, PROFESSIONAL BRANCH.

43. This branch is of a professional character, under the Deputy Surveyor-General, and reports on cases under the alienation clauses of the Lands Acts.

44. The same duties were performed in this branch during the year 1884, including completion of action in Survey Branch of purchases legalized under the "Crown Lands Purchases Validation Act, 1881," and the preparation of Schedules of Purchases proposed to be legalized under authority of Parliament.

45. The existing duties in this branch are now performed by the Deputy Surveyor-General.

ROADS BRANCH.

46. The Roads Branch of this Department reports in all cases of application for roads through alienated land, under the Act 4th William IV, No. 11; the alignment of streets, under Act 2nd Victoria, No. 2; the alienation of unnecessary roads, under section 10 of 25th Victoria, No. 1; the granting of one road in lieu of another, under section 26, and resumption of land for roads from any conditional purchase, under section 27 of 43rd Victoria, No. 29; and granting of public gates, under 39th Victoria, No. 10. It is under the charge of an officer, who reports for the Surveyor-General to the Department of Mines, and in some cases to the Under Secretary for Lands, and he is assisted by two other professional officers, as heads

heads of divisions, and a staff of draftsmen and clerks, who carry out the necessary action respecting the roads of the Colony, in two divisions, north and south, and in these branches several improvements peculiar to the geographical divisions of the Alienation Branch have been adopted, and the records kept are in a very efficient state.

47. The number of papers received during the year 1884 reached 7,206, and on many of these separate and distinct action had been several times taken. The number of miles of road surveyed was 1,520, delineated by 249 plans, in addition to 40 plans showing 239 streets; 362 applications for roads, deviations in roads, and for alignment of streets have been received; 642 reports from surveyors, irrespective of 289 reports accompanying plans of survey; 380 objections and claims for compensation, which required investigation, and in 26 cases compensation was recommended to be granted by reports from this branch. There are many hundreds of thousands of roads in this Colony, any one of which may form the subject of inquiry, complaint, application for resurvey, dedication, &c., or may be applied for to be purchased under the Crown Lands Alienation Act. On each and every such inquiry or application the necessary information is given personally to the public, or is supplied in the shape of a minute of recommendation to the Under Secretary for Mines, and in some cases to the Under Secretary for Lands.

48. Comparison with the previous returns shows a steady increase of work in this branch.

RESERVE BRANCH.

49. The work performed by the Reserve Branch is as follows, viz.:—Recommending reservations from sale and lease, consisting of water supply, timber, travelling stock, camping, temporary commons, public recreation, &c.; the cancellation and modifications of reserves under the 6th section of the "Crown Lands Alienation Act of 1861," reporting on resumptions for public parks and recreation reserves; reservations for public purposes of all kinds under the 4th section of that Act; and applications in virtue of improvements within reserves; dedications for recreation and permanent common; boundaries for proclamation for new gold-fields under the Mining Act; reserves from sale on account of gold under the "Crown Lands Alienation Act of 1861"; town and suburban boundaries; alterations in designs of same; population reserves; boundaries under the Towns, Police, and Municipal Acts, and modification and alteration in mining and municipal districts. The preparation of electoral registration, school, licensing, and police districts is acted upon by the officer in charge of this branch; also applications to mine under reserves and roads.

50. This branch also carries out the examination of all plans received for auction sale, for the purpose of ascertaining before sending on whether sufficient reservations had been made for public purposes.

51. Reserves for travelling stock, with camping sites at reasonable intervals, have been notified along a considerable number of stock routes; in many instances tracks have been marked, and the boundaries of the reserves defined on the ground.

52. The total area reserved for travelling stock during the year being 1,122,303 acres.

53. 815,900 acres have been reserved along projected lines of railway or lines in course of construction.

54. 1,739,669 acres have been reserved for the preservation and promotion of the growth of timber during the same period.

55. Total area of land reserved from conditional purchase during the year 1884 included an area of 6,933,124 acres.

56. With a view to remove doubt or uncertainty as to the position of reserves, a large number have been defined on the ground.

57. A considerable number of unnecessary reserves have been subdivided for sale.

58. A map of the Colony has been published showing the towns, principal centres of settlement, the railway lines completed and in course of construction, stock reserves or driftways, tanks and wells along the stock routes, with their local names, and the positions and names of railway stations where stock can be trucked. The map will be found of considerable value to owners of stock, drovers, and others engaged in pastoral pursuits.

61. The following table shows the number of cases received and dealt with in this Branch during the years named:—

Year.	Number received.	Number dealt with.
1880	9,743	9,630
1881	11,397	11,528
1882	11,600	11,850
1883	11,652	11,646
1884	12,258	11,561

62. At the end of 1884 there were 953 cases in the Branch.

63. In addition to the above work performed in the Branch, reserves were charted and examined on 11 new county maps, 845 parish maps, and 45 town maps, being an increase of 1 county, and 467 parish, and 8 town, maps, as compared with 1883.

64. A portion of the latter end of the year was occupied in preparing descriptions for reclamations and notifications required in connection with the “Crown Lands Act of 1884.”

LAND DISTRICT MAP BRANCH.

65. The Land District Map Branch continued to provide two sets of maps for each Land Agent during the year 1884.

No. of sets of Land District maps supplied to Land Agents	108
No. of maps included in the above... ..	5,103
No. of newly compiled parish maps on which the Land District boundaries have been charted and certified to	886
No. of maps supplied to Conditional Purchase Inspectors	155
No. of letters and papers dealt with	249

66. Besides the ordinary staff this branch is largely assisted by contract draftsmen, who perform the work under piece-work. And during the year the expenditure in that class of work has been about £1,243 3s. 4d., equivalent to seven second-class draftsmen.

COMPILING AND PUBLISHING BRANCH.

67. In comparing this report with that of the previous year a satisfactory increase in the number of parish maps compiled will be seen, the total number compiled in 1884 being 886, or 504 in excess of 1883, and notwithstanding this increase in the number of parish maps compiled a considerable amount of miscellaneous work has been dealt with in this branch, as shown by the schedule in detail.

68. With the view of pressing on the publication of parish maps with all the most recent information, and also in prospect of the Land Act of 1884 coming into force on the 1st January, 1885, in January last a new or third division of this branch was formed, and in October another or fourth division, resulting in a marked increase in the publication of parish maps; the former of these new divisions is located at the head office, and the latter in the old Survey Office.

69. On reference to the Annual Report of 1880 it will be seen that during the year 1880 1074 parish maps were completed in the compiling and charting division, and that 760 were in office use previously to that year, and the returns of 1881-82 and 1883 show that not less than 2,885 parish maps were placed in office use during those years, making a total to 31st December, 1883, of ... 3,833

And compiled and placed in office during 1884 ... 886

Total in office use on 31st December, 1884 ... 4,719

70. The numbers printed and published during the years 1878 to 1884 inclusive have been 4,280. The total number of counties which have been wholly completed in parish maps to the

31st December, 1884, are ...	61 counties.
Very nearly completed ...	8 „
And in course of compilation ...	40 „
Total...	109

71. The total number of counties in the Colony being 141, the balance of counties not yet in course of compilation in parish maps is shown to be 32; those, with the exception of two counties on the scale of 1 mile to 1 inch, are situate in the Western Division.

72. The following statement gives in detail the work performed by the Compiling Branch during the year 1884 :—

During the year 1884 the number of parish maps compiled in Compiling Branch, divisions Nos. 1, 2, 3, and 4 was ...	718
And in Geographical Divisions ...	168
Total ...	886

During 1883.

Compiled in Compiling Branch, divisions Nos. 1 and 2... ..	268
In Geographical Divisions... ..	114
Total	382

Showing an increase in 1884 of ... 504

In addition to the above the number of parish maps, of which second editions have been prepared ... 87

The number of parish maps in course of compilation in Compiling Branch, divisions 1, 2, 3, and 4, on 31st December, 1884, was ...	179
And in Geographical Divisions ...	36
Total	215

The number of parish maps in course of compilation in Compiling Branch, divisions Nos. 1 and 2, on 31st December, 1883 ...	158
And in Geographical Divisions ...	15
Total	173

Increase over 1883 ... 42

The total number of parish maps printed and published in 1884 was... 682
Do do in 1883 was... 476

Increase over 1883 ... 206

A statement showing progress of parish maps is attached :—

73. County Maps—

County maps compiled during the year on scale of 2 miles to 1 inch ...	4
Do do in 1883 ...	17

In Branch 31st December, 1884	17	"
Do 31st December, 1883	16	"

Miscellaneous Work.

81. Other than tracing and drawing above specified as performed by contractors, performed by the compiling draftsmen during 1884:—

82. Preparing maps of the Goulburn Municipality; map of the Licensing District of Waratah; Colony map, showing different scales of fees paid to licensed surveyors charting trial and railway lines on plans, &c.; work in connection with maps for the Rabbit Nuisance Act; map and diagram showing rainfall throughout the Colony; maps showing land district and surveyors' district boundaries, &c., and maps of the Quarantine Station. Preparing the following village and town maps for office use: Villages of Blayney, Woombah, Currathool West, Loftus, Bateman, Colombo, Booligal, Umaralla, Narromine, Cobborah, Katoomba, Cungegong, Girilambone, Guyra, and Glenbrook; towns of Wellington, Albury, Cooma, Jugiong, Parkes, Wentworth, Bourke; also, sheet five, county of Georgiana, and preparing litho. and reference of county of Cooper.

PLAN RECORD BRANCH.

83. The work of this branch is the custody of all original plans, excepting those kept in Geographical Divisions, and lithographs of auction plans, as records and surveyors' field-books, sketch-books, &c., &c.

Number of plans in Branch	112,590
Do issued and returned during 1884	181,150
Do of new plans received from Charting Branch	5,000
Do plans sent to and received from mounter	25,000
Do exhibited to the public	1,850

84. There are also in the branch 1,760 auction sale lithographs, 1,200 surveyors' field-books, twelve sketch-books, containing sketch-plans, surveyors' descriptions, and Government Gazettes, from the year 1882 to 1883 inclusive.

SALESMAN

SALESMAN OF PUBLIC MAPS.

85. This officer has the custody of all published lithographs and is salesman of the same, and a record is kept by him of the stock in hand, either by purchase, issue, for office, for land agents, or officers in the field and other departments, and forwards each day to the Secretary and Cashier a statement of lithographs sold:—

Lithographs received.	Maps.	Copies.	Value.

Vernon	do	do do
Wakool	do	Complete in parish maps.
Waljeers	Western	Compiled, excepting 17 parishes.
Wallace	Eastern	Complete in parish maps.
Waradgery	Central	do
Wellesley	Eastern	do
Wellington	do	Complete, excepting 4 parish maps in hand.
*Wentworth	Western	9 compiled.
*Werunda	do	Nil compiled.
Westmoreland	Eastern	Complete, excepting 2 parish maps in hand.
White	Central	Complete in parish maps.
*Windeyer	Western	Nil compiled.
*Woore	do	do
Wynyard	Eastern	Complete in parish maps, excepting 1 parish map in hand for compilation.
*Yancowinna	Western	Nil compiled.
*Yanda	do	1 compiled; county not yet subdivided in parishes.
*Yungnulgra	do	Nil compiled.
*Yantara	do	do
*Young	do	do

Note.—Counties marked thus * are in the Western District, in which counties but little or no alienation has as yet taken place.

ACCOUNT AND CLERICAL BRANCH.

92. This branch employed officers both on the fixed and temporary staff—seventeen of the former and twenty-seven of the latter, during the year 1884; the salaries ranged from £62 up to £450 per annum, and the total cost of the branch was £8,542 Os. 2d.

93. The business of the branch is divided into the following heads, viz. :—

Accounts.
Correspondence.
Record of Measurements, &c.
Stores.
Statistics.

94. The duties under the first head may be summarized as follows :—

The total amount of accounts rendered for services of the past year, was	...	£349,612
The amount of balances of licensed surveyors' accounts for 1883 and prior years, passed for payment	28,195
		£377,807
Total amount of salaries and contingencies paid was	354,593
Balance...	£23,214

95. The total number of letters, &c., written, recorded, and despatched during the year was over 21,000 on professional subjects, added to which about 25,000 notices of payment were sent out, and 1,351 on questions requiring Ministerial approval.

96. The number of communications received from surveyors—salaried and licensed—was 33,532.

97. The number of special cases submitted for my decision direct from this branch was about 10,000.

98. The number of returns prepared during the period was eight, which were of a very exhaustive character, and occupied a considerable time in preparation; the number is no criterion of the work involved.

99. At page 68 appears a return showing the cost of each survey district, the number of instructions issued and carried out, the balance representing those transferred or remaining on hand at the end of the year. The number of instructions remaining on hand at the end of the year is no criterion of the energy or otherwise of the surveyor, the number being affected by the return of instructions by other licensed surveyors who resign or change districts. Following this is a similar return respecting the services of the temporary salaried surveyors.

100. The premises occupied by the Department are as follows :—

Head office, Bridge-street.

Trigonometrical, General Survey, Compiling and publishing Branches, Wolfen's Buildings, Bridge-street.

Diagram, Description, and Noting Branches, Exchange Buildings, Bridge-street.

Charting Branches, Sutton's Buildings, George-street.

Charting and I. P. Branches, Foy's Buildings, George-street.

Lease Branch, Gilchrist, Watt, & Co.'s Buildings, O'Connell-street.

Roads and Charting Branches, Gilchrist, Watt, & Co.'s Buildings, Bent-street.

Plan Mounting Branch, &c., Curcier & Adet's, Macquarie-place.

101. TRIGONOMETRICAL BRANCH.

Field staff.

102. The accompanying table shows, in a tabulated form, the work done by the field staff of this branch in the twelve months ending December 31, 1884, and the following remarks are submitted in explanation thereof :—

103. No. 1 18-inch altazimuth has been used by Mr. W. J. Conder, Superintendent of Trigonometrical Surveys, in the astronomical determination of the latitude and longitude of Mudgee, Coonabarabran, Walgett, and Coonamble.

104. No. 2 18-inch altazimuth was employed in measuring the horizontal angles at Warrawolong and Yengo, two of the main stations for extending the triangulation northerly, eventually to join the Queensland Trigonometrical Survey at the boundary of the Colony.

105. The triangulation of the County of Cumberland may now be said to be complete, all necessary stations known to be required having been observed, and the triangles computed and co-ordinates calculated therefrom.

106. In the County of Northumberland three stations are still to be observed in the main series, and thirteen stations in the secondary triangulation. These latter will fix twenty-six intersections or tertiary stations, principally required for due connection of detail surveys. With one exception, the whole of the main stations in County Argyle have been observed, but some of them will have to be re-visited with the small

small instrument to fix sundry new stations for detail work, and, under this aspect, they are classed as secondary stations. There are forty-one stations of this class still to be observed, and they will fix seventy-six intersections, and when these are done counties Northumberland and Argyle may be considered completed, at any rate so far as present requirements are known.

107. In the middle of July the surveyor engaged in the county of Argyle was detached for the survey of meridian circuits, starting at the astronomical station, Coonamble, the meridian of which was as initial, and all lines in the survey were referred, as to inclination, to this meridian. This method adopted of survey has been advised for localities where the natural conformation of the ground precludes ordinary trigonometrical survey operations, and, briefly, it consists, primarily, in the careful measurement of the outside boundaries of a block, referring them carefully to the true meridian by stellar observations at every few miles; and, secondly, in the survey of such subdivision lines (all marked in the most permanent manner) as shall divide this block into suitably small areas. Any portion (isolated or otherwise) which may hereafter be selected within reach of these lines to be surveyed and connected therewith, and thus the meridian circuit survey will furnish the basis of an accurate map or plan of that particular locality, showing not only land to be sold but also lands already alienated, and by means of the initial point the information can be located on a general map of the Colony. (See Appendix for memorandum of an extended system of general survey.)

108. The results of this survey are satisfactory. In the first circuit, where especial care was taken to obtain accuracy, the average closing error is about a fifth of an inch per mile. In circuits No. 2 and No. 3, where some of the lines were measured with just ordinary care, the error is about 14 inches per mile, which, although large comparatively with circuit No. 1, is still sufficiently accurate for all practical purposes. The cost of this survey was rather under a halfpenny per acre. (See Appendix for report, by Mr. W. J. Conder, on meridian circuits.)

109. The astronomical stations previously mentioned are four out of a number of selected places outside the reach of the trigonometrical survey, which require to be fixed as a basis on which to effect on a larger scale than hitherto an accurate compilation of a map of the Colony, and, amongst other reasons, to afford a means for arriving at its area.

110. The Trigonometrical Branch is now fully supplied with all needful instruments for the equipment of at least three parties of astronomical observers. During the year a new transit instrument has been constructed under the joint direction of the Government Astronomer and the Superintendent of Trigonometrical Surveys. This instrument is one of the most powerful portable transit in field use in the world, and is probably the largest in any of the Australian Colonies. It has a double filar micrometer eye-piece, so that it can be used as a zenith telescope for the determination of the latitude, as well as a transit instrument for obtaining time and azimuth. The object glass is $4\frac{1}{2}$ inches, with a focal length of 60 inches, and it is expected that, by its means, the probable errors in the resulting observed latitudes and longitudes will be reduced below their present limits, without in any way increasing the cost, either as to time or money, or the tax on the observer's physical capabilities.

111. Two barrel chronographs for electrical and chronometrical appliances have been added to the equipment of the Trigonometrical Branch, and a contract for the supply of three sets of three chronometers has been partly carried out by the supply of one set. (See Appendix by J. Brooks, F.R.G.S., for a description of the methods of determining latitude and longitude and of the instruments used.)

112. It will be proper here to note the arrival of the new standard bar. Beyond a mere preliminary examination, to see that all was right, it was not deemed advisable to make any comparisons until it had rested for a time on its supports at the Sydney Observatory.

113. The piling overseers have formed 175 new stations; some of these extend the main triangulation scheme northerly, almost to Armidale, and part of them carry the county triangulation down the coast to the south end of the county of Camden. In addition, this number of new stations includes second and third class stations required for the accurate definition of the Newcastle population boundary.

114. During the year fifty-one field books of observations at main and county stations and five of minor work, together with thirteen astronomical books, have been checked, and the results tabulated and entered in duplicate in the abstract and bearing books. Office staff

115. The positions of 137 stations in Cumberland have been fixed, completing the triangulation of that county, together with those of thirty-three minor stations near Port Hacking.

116. The positions of 529 stations in Sydney and suburbs—the majority of which had been fixed from the Harris-street base—have been re-computed from the Richmond base, which has now been adopted as the standard for the triangulation of the Colony; but in order to do this it was necessary to reobserve certain of the stations in the Sydney triangulation. This was done in November and December, and the value of the resulting co-ordinates greatly improved.

117. The altitudes of twenty stations in the main series of triangles and of nine in the diagonal series, which connects the Lake George and Richmond bases, with those of 117 stations in county Cumberland, have been computed.

118. Astronomical observations for latitude and longitude have been made at Mudgee, Coonabara-bran, Coonamble, and Walgett, and reduced in this branch, and the latitude and azimuth of Warrawolong and Yengo have been similarly computed.

GENERAL SURVEY.

119. The system of marking and connecting isolated surveys, with a view to embodying them in a general survey, has been continued during 1884. Sufficient data has now accumulated for the commencement of several additional parish maps on any desired scale, and with a view to their production several surveyors were occupied during the year in filling up gaps. Without any large amount of additional survey this office now possesses the necessary material to map out about one-third of the Metropolitan County.

120. The difficulty of preparing maps for publication by reason of the want of a sufficient drawing staff, has been more than usually felt during the year, owing to the resignation of three draftsmen and computers, whose places it was found impossible to fill, and since the commencement of this year (1885) there have been two further resignations. The disproportion between the office and field staff has been before noticed in my report of last year's operations. However, notwithstanding this thirty-two sheets

of the detail survey of the city and suburbs have been placed in the lithographers' hands for printing, making up to the end of the year a total of fifty-seven of these maps published.

121. The amount of survey work done in the city and suburbs is illustrated by the accompanying map, which shows by the colour the work received from the eighteen surveyors employed.

122. It was hoped to have published a general map of the county of Cumberland on the scale of 2 inches to a mile during the year, but the great press of current work precluded the possibility of doing so, though this map has advanced considerably towards completion.

123. The map of the parish of Botany has been placed in the hands of the lithographers, but as drawing such a plan on the stone takes a considerable time, and as only one lithographer could be spared owing to the press of work in preparation of parish maps, &c., required under the Land Act of 1884, publication has not been made. The maps of this class (scale, 10 inches to a mile) will prove very useful, as, in addition to showing all the Crown grants and every building, fence, road, &c., the scale is sufficient to allow of the various private subdivisions of the original grants being shown.

124. The map of the parish of Alexandria is now being plotted and is in a forward state; and maps of other parishes will be proceeded with, now that the surveys are in so advanced a state. It is hoped, however, that additional drafting assistance will be available during the ensuing year to enable these maps to be produced without delay, as the current work of the examination of surveyors' plans occupies the greater part of the present office staff.

125. The register of the trigonometrical stations around Sydney and suburbs and at Newcastle and in county of Murray has been printed, and copies supplied to the surveyors requiring this information, thereby doing away with a good deal of the clerical labour of copying out these descriptions.

REMARKS.

126. The average earnings of Licensed Surveyors, omitting those who have rendered accounts for less than £100, is £694, being £76 less than the previous year. Many surveyors have evidently worked without profit, but towards the end of the year an increased percentage was allowed on fees to Licensed Surveyors in certain districts to enable the number of surveyors on temporary salary to be reduced and replaced by Licensed Surveyors paid by fees.

127. Consideration of paragraphs 15 to 19 will show a large increase in the working efficiency of the office, notwithstanding that fifty-two draftsmen have less than one year's experience. The explanation lies in the fact that the resignations, &c., have fallen during 1884 to twenty-three, and that the office is recovering from the loss of services in 1881 and 1882 so much complained of in previous reports. Compared with the work of 1883 the increase is from 9,600 to 11,993 cases, and estimating the services of Charting Draftsmen employed in preparation for Land Act to be equivalent to 1,000 cases, the work performed during the year equals 13,000 cases, an amount never before approached.

128. I observe with considerable satisfaction at page 199 of the Report of the Royal Commission on Land Titles and Surveys of Victoria, a very favourable report on the measurements, &c., adopted in the General Survey of New South Wales. The Commissioner, Mr. A. C. Allan, writes as follows:—"I had a consultation in Sydney with the Surveyor-General and the leading officers of his survey staff on the alleged advantages and comparative economy of their new system of chainage, the progress of the development of which I have been familiar with for years; and to thoroughly satisfy myself of its merits, went into the 'field,' saw the whole process, and took a part in the measurements. The results were quite up to the statements made; measurements by the system can be obtained to within 3 inches to a mile, and this for all purposes of a first-class town survey is practically accurate, and beyond the limits of accuracy to which buildings could be erected."

129. With the year 1884 the employment of Mr. W. J. Conder ceases. With him the Department loses services which have been carried out for several years with rare ability. As an Astronomical Observer Mr. Conder's performances have scarcely been surpassed in any country. The loss is regretted by all who have worked with or under him.

130. In my return for 1883 I took occasion to show the extent to which the demand upon my personal services had reached. During 1884 there has been no cessation. On the contrary, I have found myself scarcely able to do more than deal with matters brought under notice, allowing no time for the exercise of that tentative insight into services rendered which is so important in the management of a large department wherein so much authority is necessarily delegated.

P. F. ADAMS.

APPENDIX.

MERIDIAN CIRCUIT SURVEY AT COONAMBLE.

By W. J. Conder.

131. This survey comprises meridian circuit No. 1, being the outside boundaries of a group of five runs known as Coonamble North, Coonamoon, Coonamoon Back, Bulgogar, and Weetahiba, occupied by one lessee, and meridian circuits, Nos. 2 and 3 (combined), being the outside boundaries of six runs known as Opposite Coonamble, Tooloon, Quoonmoon, Coombarrah, Budgegong, and Kialgara, occupied by two lessees.

132. The system adopted in carrying out this survey consists of the establishment of one station as the origin, the meridian at this station being adopted as the initial meridian.

133. All lines in the survey are then described with reference to their inclination to the direction of this initial meridian, and the position of all corners or permanent marks are defined by rectangular co-ordinates therefrom, with this station as the origin.

134. In this instance the position of the origin (a station in the town of Coonamble) was determined, as to latitude and longitude, astronomically; also a permanent meridian mark was left for reference, in the position shown on the plan.

135. The survey was performed with more than ordinary precautions to ensure accuracy. The true azimuth was found at eighteen places at intervals averaging about 6 miles by observations of close circumpolar stars at or near their elongations, and thence the bearings of the lines (allowing for convergence); this value was then compared with that obtained from the survey operations, and any errors, cumulative or otherwise, in the measurement of angles or production of straight lines, were exposed and corrected.

136. For the azimuth observations and angular work an 8-inch theodolite, provided with striding level and micrometer, was used; the production of lines and other parts of work were performed with a 6-inch theodolite.

137. The chainage was made in duplicate with wire ribbands of different lengths, and corrections were applied for variations in temperature; uniformity of extension was secured by the use of spring balances. Great care was exercised in using the ribbands; for instance, marks were made on pegs driven into the ground in lieu of arrows; long grass, brush, and rubbish, were carefully removed from the lines, and the ribbands were frequently compared as to length with standards provided for that purpose.

138. In order that this survey may be available for future reference for an indefinitely long period special attention was paid to the marking, which is as permanent as practicable.

139. At all corners and in long lines at distances not exceeding 5 miles, a bottle filled with concrete has been placed 2 feet below the surface of the ground; standing on this a post 5 x 5 in., projecting 4 feet, has been placed in a hole dug for the purpose 2 feet square, filled in and well tamped with selected earth of a different description, as to color and quality, from that excavated.

140. That part of these posts projecting above the surface has been painted white, and the requisite letters or numbers for identification cut thereon and pricked out with black paint; this is in addition to the ordinary marking of trees, lock-spitting, &c.

141. As to the measure of precision attained in the survey, the small closing error of the circuit furnishes very strong evidence, which, taken in conjunction with the close agreement in the azimuth, determined independently by the method hereinbefore described, together with the slight differences in length shewn by the duplicate measurements, establish beyond reasonable doubt the correctness of the survey, and shew that it is sufficiently reliable to be made use of for reference, as the standard for all surveys within the included area.

142. The errors in closing these meridian circuits are for No. 1 = 0.3 links latitude, 1.4 links departure, or error per mile = 0.026 links. Ditto, 2 & 3 = 40.6; 82.5 or error per mile, = 1.8 links.

143. In the circuit Nos. 2 and 3 for part of the eastern boundary a road survey has been adopted which was not surveyed by Mr. Cameron; the azimuth of this survey was checked at each end, and found correct, and several portions of it were rechaind, to compare the length of the chain used for the road with that used for the circuit; the marking also was found so good that it appeared superfluous to survey this part again; this may perhaps account for the comparatively large closing error. I am however doubtful whether this is due, either to the road survey or to unavoidable small cumulative inaccuracies, and should recommend in this instance that some kind of tie lines should be run through the survey, so as to locate a discrepancy if it exists which might be easily rectified, and in case the error should then appear approximately evenly distributed the range per mile is not so large as to impair the practical utility and accuracy of the survey.

144. The total cost of the survey, allowing 4½% for 5 months wear and tear on £500, the value of instruments and equipment, and all contingent and travelling expenses, amounts to £701 2s.

145. The total length, 126.4 miles (of which there are 21.8 miles of connections), = to £5 10s. 11½d. per mile.

146. The length of the circuit only, 104.6 miles, which cost £580 6s. 1.2d., and includes an area of 293,500 acres at a cost of ½d. per acre.

147. In future surveys the cost per acre must depend chiefly on the area to be included, for double the cost at the same rate per mile may include four times the area. A considerable reduction may also be expected in the rate per mile for future surveys, partly because this was an experimental survey, which necessarily must be a slower process than one in which every detail is known, and every difficulty anticipated and provided for.

148. The cost is also in a very great measure dependent on the degree of precision expected; this should be regulated entirely by the practical requirements, and it should be understood that time and labor expended in the endeavor to attain greater accuracy than this is for all practical purposes wasted. From my own observation and experience I am of opinion that a range of error not exceeding 2 links per mile can be secured with ordinary care and attention; this will necessitate the use of a spring balance and one thermometer, the reading of which should be noted at frequent intervals, but not necessarily for every chain. As this range of error in adjoining surveys may have contrary signs, it will then cause an apparent discrepancy of 4 links per mile between them. The measurements should be in duplicate with tapes of various lengths, and I think the ordinary method of using arrows will suffice in lieu of pegs driven into the ground, and marked at the extremities of each tape (a very much slower and more expensive process).

149. The angular measurements should be repeated four times, and all productions of straight lines made by using the mean of two reversals of the telescopic axis.

150. Azimuth observations should be made at convenient intervals, which must be arranged to suit circumstances only, as a very serious waste of time will occur from confining the surveyor to a definite limit between which such observations should be made; experience will indicate for each officer entrusted with this work when his azimuth requires strengthening in this way, and unless he feels sufficient interest in his work to take this precaution, his results will soon show that he is not fit to be entrusted with surveys of this character.

151. In times of drought, and also during the hottest summer months, I think it is very undesirable that this work should be attempted on the level country in the western division of this Colony. The cost is very much enhanced by the necessity for using forage at famine prices for the horses employed on the work, and the excessive heat must have a very prejudicial effect on the physical and mental conditions of the officers and others engaged thereon.

152. I estimate that this class of survey can be carried out satisfactorily at the rate of £4 10s. per mile, which for a surround of 100 miles, in the form of a square, is equal to 1.08 farthings per acre.

[Memorandum by Surveyor-General of an extended System of General Survey. 13 December, 1883.]

Prefatory.

153. The question as to how legislation, in accordance with the Land Bill now before Parliament, will affect this Department has been frequently asked, and other information is being sought, having reference to the public surveys; and as this is a subject which has had a great deal of consideration at my hands, I take the present juncture as a suitable one to place the results thereof on record. It is assumed that provision for staying selection pending survey operations will be enacted, as it appears in the present Bill, and has already appeared in the Bill previously submitted to Parliament, and without such power it is obvious survey before selection is open to defeat.

Power to stay selection during survey.

Survey systems of other countries.

154. The survey systems of North America, India, the Australian Colonies, and New Zealand have been examined (as far as published results can throw light on the subject), and that of New Zealand appears to approach nearest to our requirements; but being, like the Indian, based upon triangulation, it could not be applied in an emergency even if this country were as well suited to trigonometrical operations as New Zealand, whereas triangulation is only possible in about one-third of it.

155. Survey by meridian circuit is common to the systems of both New Zealand and India, but it has not heretofore been adopted without the help of triangulation, and in this respect the system proposed differs.

North American system.

156. The survey systems of Canada and the United States being based upon actually measured lines, extended hundreds of miles in the direction of the cardinal points, apply well in countries enjoying an equable rainfall, but neither would be applicable in its integrity to this Colony, where stretches of waterless country must be measured across; and, again, as such surveys must be made in the true meridian, they would be at variance with the local magnetic meridians heretofore adopted, and lead to confusion and public inconvenience. Although unsuited as a system of general survey for this Colony, a modification of the American systems may be applicable to the "Western division," where selection before survey is excluded, and in this view I am eliciting information as to where water sufficient for survey purposes exists.

Modification suited to Western division.

Central division.

157. This paper will, however, be confined to operations in the "Central division," in consequence of the importance of the interests existing therein; division of pastoral holdings and selection before survey being important features in the Bill, I shall describe the system as applied thereto. In this view I propose to surround "holdings" or groups thereof, to the extent of some 400 square miles, with surveyed circuits, or, rather, astronomically corrected traverses, laid down with the greatest accuracy that can be attained, in order that they may fit together on county or general maps. This being attained, the further subdivision into individual holdings and halves thereof will follow, and, further on, the resumed half be divided into areas averaging some 6 square miles (3,840 acres), which may be designated traverse circuits; from these maps could be prepared for exhibition at the local land offices, Boards, &c.

System proposed.

Traverses corrected astronomically. Pastoral holdings. Reconnaissance and classification survey. Not arbitrary.

158. The last-mentioned divisions would vary in dimensions, and only be bounded by arbitrary lines where no natural feature or established boundary exists. It should be borne in mind that the smaller divisions of the survey (traverse circuits) are not arbitrary areas or geodetic quantities, as is the case in the North American systems, and that the general survey and surveys for the alienation of land are two distinct functions, the former ending as soon as material has been collected to map and classify the public estate. These maps will show the features, reserves, roads, frontages, and alienated land, and can be prepared rapidly by photo-lithography; and being common data for both local Board and Land Court, will tend to reduce the chances of confusion which I fear will arise out of conflicting information.

Maps.

159. In these maps the public will have before them information as to what the Crown offers for sale; frontages, reserves, &c., being also shown, together with the position of all marks used on the ground.

160. Under the present system the public can, at best, only learn what has been measured or sold whereas under the system now advocated information as to what is unsold is the important feature.

Information supplied to public. Information at present available.

161. Under the system proposed all future surveys may be made to the same meridian. It will provide full information to selectors in describing the land they wish to acquire; it will be of great service in keeping the local Boards, Survey Office, and Land Court in accord, and provides for the classification of the public lands before conflicting interests arise,—an advantage to which I attach much importance; it reduces the chances of conflicting surveys, and the danger now experienced of taking up land exempted from sale, also waste of survey where land is taken up in areas differing from those measured. Capabilities.

162. Should it be determined to lease and not to alienate the public estate, the amount of survey required beyond the traverse circuits would be trifling, and in many cases the lease could be drawn up from the map alone. Facilitates the issue of leases.

163. In estimating the cost of survey under the proposed system it is assumed that the meridian circuits (embracing about 400 square miles each) will adjoin and have common boundaries, although circuits may be measured either separate or collectively. Estimate of cost.

164. In the "Central district" it is estimated that the cost of the general survey, up to the point at which the runs are halved, will probably be under 1d. per acre on the whole area, and the further subdivision into traverse circuits, frontages, &c., would little, if at all, exceed 2d. per acre in addition; therefore the total cost of preliminary surveys for maps of the Colony would be about 3d. per acre, from first to last.

165. In making the estimate no account has been taken of any probability of contribution from lessees of holdings, who may, from want of surveys, be unable to comply with the requirements of the Bill in supplying maps of their runs.

166. A few years since a scheme based on measured meridian circuits without triangulation would not have been entertained by any experienced surveyor, but recent improvements in the measurement of distances, the direction of lines by astronomical observation, and the number of trained surveyors now in the Department capable of conducting these operations, have enabled me to advise the adoption of a scheme based thereon. Practicability.

167. There is nothing in the proposed system to militate against subdivisions, however large, in anticipation of demand and selection, as in such cases the operation of the general survey would end when the boundary of the land to be subdivided was marked. The advantage would be that for about 1d. per acre extra subdivisions and all other surveys could be placed geodetically on the maps in their exact positions, and thereby avoid never-ceasing uncertainty and repeated complications now frequent.

168. If this system of survey meets with favourable consideration, I would advise a trial of it by the survey of three meridian circuits as soon as surveyors may be available.

169. I estimate the number of surveyors who are qualified to lay out meridian circuits at thirty, but they are all at present engaged on important surveys, chiefly in the county of Cumberland, from which it would be impossible to remove them suddenly.

170. The principal drawback to the scheme is conveyed in the last paragraph, but I am unable to devise any other form of standard survey effective from the outset.

171. Although the survey of the meridian circuits may appear to be a simple matter, it would, in the "Central division," occupy thirty qualified surveyors twelve months to define them and cut them up into holdings; but as many surveys of runs exist which could be used in the division of "holdings," it is not expected that the whole would be required at the outset. Magnitude.

172. The present survey practice came into operation under the Land law of 1861, and not being under any general system is unsatisfactory and expensive; for, without power to stay selection during the course of a survey, selectors have power to alter the design with every new selection made, before the survey is officially accepted, and in consequence of this measurement in advance of selection has been practically abandoned.

173. The success of the proposed system will be found to depend upon the exercise of the right to stay selection during survey. If exercised extensively, and if all the surveyors who are qualified could be lent from their present employment for a period, I believe the result would be, on the whole, satisfactory, although much inconvenience would be felt by their removal.

174. The accompanying diagram* illustrates and explains the system of general survey recommended; it represents a meridian circuit embracing three (3) holdings, divided into leased half, and resumed half, and the latter into traverse circuits. The diagram only illustrates the system, and does not show the whole amount of survey involved. I mention this, as an estimate of cost of survey made from the diagram alone would be considerably below the actual cost.

DESCRIPTION OF THE METHOD OF DETERMINING THE LATITUDE AND LONGITUDE OF PLACES IN NEW SOUTH WALES,

By J. Brooks, F.R.G.S.

175. The latitude and longitude of the Sydney Observatory is adopted as initial point, and all places in New South Wales whose positions are astronomically determined are referred to it. The determination of the latitude itself is independent of any observations which may be made at Sydney, but in the case of longitude it is the difference in time between the required place and Sydney which is observed. There are many ways of determining the latitude, but the method known as Talcott's, based on the measurement of small differences of zenith distances, is undoubtedly the best. Chauvenet says that it is one of the most valuable improvements in practical astronomy of recent years, surpassing all previously known methods (not excepting that of Bessel, by prime vertical transits) both in simplicity and in accuracy. Captain Talcott invented an instrument called the Zenith Telescope for this purpose, but it has been shown that a transit or an altazimuth instrument fitted with a micrometer eye-piece may be successfully

* Note.—The diagram is not reproduced in this Report.

successfully used as a substitute for the Zenith Telescope, with the additional advantage that one instrument serves two purposes:—(1st), the determination of the latitude, and (2nd), the true time at, and also azimuth of, the place of observation.

176. The No. 1 altazimuth is so fitted, and, with one exception, it is the instrument hitherto used for the purpose under description. The essential principle of Talcott's method is that the telescope shall make absolutely the same angle with the vertical (or the level) at the observations of both stars of a pair. Two (or more) stars are selected, which culminate at nearly equal zenith distances, one or more south, and the rest north of the zenith. The differences of their zenith distances should be well within the run of the micrometer screw to avoid observations near the edge of the field. The stars' right ascension should be so nearly the same that their transits may occur within a period during which the instrument may be assumed to have remained unchanged, but sufficient time must be allowed between each star for reading the micrometer and level, and for reversing in azimuth. A programme having been prepared, subject to the above conditions, the middle wire of the instrument is brought into the meridian, the vertical circle set to the mean zenith distance of the two stars, and the level brought at or near zero. Having set for the star which culminates first, when the star comes into the field, the assistant starts counting the seconds from the chronometer, and the observer bisects the star as nearly as possible on the middle wire, or, failing in doing this satisfactorily, he bisects it as soon after as possible, and in either case the actual time of bisection is recorded. The level, and then the micrometer, is read, the instrument rotated 180 degrees in azimuth and the second star observed in same manner. This process is repeated with other pairs of stars until a sufficient number of observations have been made, that is from 100 to 120 single observations, or 25 to 30 pairs on four nights. Any error in the declination of a star necessarily lessens the precision of the result, and the uncertainty in the catalogued position of some of the stars, is the only weak point in the method, but the facility of multiplying the number of pairs on account of the simplicity of the observations compensates for this to a great extent. Copies of the actual observations for latitude at Walgett, and the calculated results illustrating this method, are added, Walgett being selected as the most recently determined.

177. The determination of the longitude is a more difficult matter.

178. The method generally adopted in the United States and other countries has been somewhat varied in this Colony, and now it consists practically in causing the clock at (say) Walgett to record on the chronograph at Sydney, whilst the Sydney clock is recording on the same chronograph, and then the Sydney clock records on the chronograph at Walgett, whilst the clock there is recording its seconds. In this way it is possible to get the difference between the two clocks within a hundredth of a second, and the problem is reduced to obtaining the actual clock errors at the time of comparison, and thus the difference of the time at the two places at the same absolute instant, and herein lies the whole difficulty.

179. A site having been selected for the Observatory at the place whose longitude is required, a block of stone is marked and buried for reference hereafter, an annulus of brick and cement built on which to set the steel cone (the stand of the instrument); the altazimuth being duly placed on this cone, is set vertically over the mark in the stone, and adjusted for collimation level and azimuth as nearly as possible. It is rarely that these adjustments are made exactly, and the times of observation are more easily corrected for the small errors by means of computed corrections.

180. The error of collimation is reduced to small limits by bisecting any well defined terrestrial mark, distant a mile or so (the micrometer head having been set at zero), and then rotating the instrument through 180 degrees (using the horizontal circle for this purpose), plunging the telescope and bisecting the mark by means of the micrometer screw. Half the difference of the readings is the collimation correction and the micrometer head is set to this. The instrument is next brought into or near the meridian by computing the mean time of transit of a slow moving star, using an ordinary watch for first approximation, and following it with the telescope until that time. The axis of the telescope is levelled and the transit of a star near the zenith noted on the chronograph using the chronometer. It is evident that any small error in the azimuth will not much affect the time of transit of a star in the zenith. It is only necessary that the telescopic axis shall be as near level as possible. The difference between the right ascension of the star and the chronometer time will be the approximate error of chronometer in sidereal time. The process is now repeated with another slow moving star, this time using the chronometer with its error properly applied. The reading of the horizontal circle will be a close approximation to the meridian reading, and any small deviation is found and allowed for in the observations now to be described. A programme is prepared in groups of three or four stars at or near the zenith, and one or two circumpolar stars, one if possible, being sub-pole. For this purpose those stars only are used whose right ascensions are well determined. The zenith or time stars, and, when possible, the circumpolars are selected from the nautical almanac, otherwise the circumpolars are selected from the Melbourne catalogue. It is necessary that the intervals between the stars should be as short as possible, so as to eliminate unknown variations in the chronometer rate. When possible the level is read, reversed, and read again just before and after each star. The times of transit of the stars over the wires are recorded on the barrel chronograph by the observer pressing the signal-key, every individual second being automatically recorded by the chronometer. The instrument is now rotated through 180 degrees, and another group of stars observed as before; any error in collimation, and also inequality of pivots, is thus eliminated, and a mean of the two corrections deduced from these two groups is the clock correction at or about the middle time of all the observations. This process is repeated with two other groups of stars, and then, if practicable, clock signals are exchanged with Sydney. The observations then proceed in same manner; that is, a group of stars, instrument reversed, another group, instrument reversed, and so on, until, if possible, a second exchange of signals is made, when two or more groups will close the evening's work. A single night's work (says Chauvenet), however, is not to be regarded as conclusive, although a large number of stars may have been observed and the results appear very concordant; for experience shows that there are always errors which are constant, or nearly so, for the same night, and which do not appear to be represented in the corrections computed and applied.

181. Generally signals are exchanged with Sydney on from three to five nights, depending somewhat on the observers good fortune in having clear cloudless nights at both stations.

Description of Instruments.

182. The 18-inch altazimuth is an excellent instrument, by Troughton and Simms. As originally sent Altazimuth. to this Colony, it was provided with two telescopes, one having an object glass of $2\frac{1}{2}$ inches and 26 inches focal length, and two vertical circles attached, one of them being read by two micrometer microscopes, the other by a simple microscope, and used as a pointer; also, a double filar micrometer for measuring small angles in altitude and azimuth and parallactic motion, so that the eye-piece can be moved to view any part of the field distinctly.

183. The other telescope had a 3-inch object glass of 36 inches focus without circles, and with only simple eye-piece. The tube of smaller telescope was afterwards altered by the addition of a truncated cone (properly counterpoised) large enough for the coil and 3-inch object glass; and thus increased optical power was gained in conjunction with all the facilities offered by the micrometer eye-piece.

184. The horizontal circle is firmly attached to the base of the instrument, which consequently has but one vertical axis (therein differing from the smaller instruments in general use, which have an inner and outer axis, the first carrying the telescope, and the second the horizontal circle). This circle is read by four equi-distant micrometer microscopes. Two lamps are used for illumination; these stand on brackets which are removable at pleasure from the standards. By means of prisms and reflectors (added since the instrument left the maker's hands) these lamps illuminate the horizontal circle immediately under the micrometers, as well as supplying the light for illuminating the wires in the micrometer eye-piece. When desired, the prisms can be turned aside, and the vertical circle is then duly illumined.

185. The 18-inch altazimuth is invariably stood upon a triangle (repeating stand) on the top of a truncated cone of sheet steel, which has foot-screws for roughly levelling up. This cone is covered on the outside with felt, the inside being left exposed. The triangle has three screws for moving the instrument bodily, until it is placed vertically over the mark indicating the station. It has latterly been the practice (as soon as the instrument has been properly centred) to place a foundation of cement below and around the lower rim of the steel cone (to relieve the foot-screws), and thus it was rendered almost as firm as solid rock. The excellent quality of this instrument will be apparent by comparing the results obtained with the published records of similar operations. No doubt these results are in a measure due to the possession, by the late superintendent, Mr. W. J. Conder, of an uncommonly keen faculty for observing, as even with the best instruments an ordinary observer will, as a rule, produce only ordinary results.

186. This instrument consists of a cylinder (round which a sheet of paper is wrapped) and clockwork The electric chronograph. to rotate it once in a minute, also two pendulums with a governor to regulate the clockwork. The motive power is a hanging weight. The object of the chronograph is to convert the audible clock beats into visible signals by means of an electro-magnet, which acts upon an arm carrying a glass pen, the point of which rests on the paper.

187. The electro-magnet carriage runs upon two parallel brass rods, and a string having one end fast to the carriage passes over a pulley to a small drum connected with the clockwork; as this drum revolves the carriage is drawn along, and the pen describes a perpetual spiral; and when the paper is removed from the cylinder the successive minutes are found recorded in successive parallel lines. One such sheet will contain the record of about two hours work.

188. The chronometer breaks the circuit at every second, and allows a spring to move the pen laterally for a short distance, but circuit being almost immediately closed, the magnet again attracts the arm and the pen draws a straight line until the next second, when the process is repeated, and so on, until the whole of the paper is filled. Having thus obtained a visible time scale, its application to the exact recording of an astronomical observation is simple. So far the electric current has passed from the battery through the clock to the electro magnet, and thence back to the battery. A signal key is now interposed, so that the current on its way to the battery passes through this key. The observer holding it in his hand, or so that he can touch it, breaks or makes circuit at will. Now whenever the observer taps on his key he will produce on the paper a mark somewhat similar to that made by the chronometer. In order to identify the seconds on the paper, the electrical part inside the chronometer is so arranged that the 60th second does not record, and the observer has only to note the first minute shown, and then to count the seconds. The paper is generally cut off by passing a penknife down the middle of the line of minutes.

The first second is at the left hand, and the 59th second at the right hand edge. The chronometers employed are in sets of three, so arranged that any one of them can be used during observations, and the other two are alternately electrically connected with the first. They record their seconds simultaneously, and in this way any two are used as a check on the third. These chronometers are made by Kullberg, of London, and the electrical appliance afterwards added by Allerdin & Son, of Sydney.

189. A sheet showing the chronographic record of star observations by Mr. Conder is appended.

190. The computations and deduced difference of longitude between Sydney and Walgett are also shown in the Appendix.

Davidson W. R.	Coonabarrabran	16	Peppercorn J. S.	Tumbarumba	60, 132
Duffy J. C.	Grenfell	44	Pratt R. G.	Wagga Wagga	62
Davis H. M.	Marengo	105	Russell F.	Warialda	1
Dawson J.	Ilford	110	Rae W. A.	Forbes	89, 108
Dawson E. H.	Balranald	117	Ronald R.	Glen Innes	119
Dawson S. H.	Montefiores	134, 27, part of	Ryan J.	Trunkay	127
Foikard H.	Inverell	6	Rigaut P.	Narrabri	138
Fisher R.	Coonamble	95	Shoobert W. A.	Vale of Clwydd	88
Farrar W. J.	Nyngan	118	Sellar D. B.	Hillston	68
Garland B. C.	Wagga Wagga	64	Smith J.	Albury	78, 79
Granter J.	Bourke	139	Shaffle G. H.	Bowral	87
Herborn O. A.	Mudgee	22, 23, part of	Solling F. P.	Moree	121
Hosie H. C.	Young	47, 48	Scott W. N.	Euabalong	126
Harper C. A.	Moruya	54	Trickett O.	Warialda	3
Hungerford M. O.	Bombala	58	Turner E. W.	Gunnedah	14, 91
Hunter F. V.	Wardell	115	Torry H. A.	Wellington	21
Holmes H. C.	Glen Innes	93	Tucker J.	Wallsend	37, 103, part of
Hicks J. E. (Tem. Sal) ..	P.O., Camden Haven.....	131	Tozer V. F.	Cootamundra	46
Isaac F.	Goulburn.....	53	Tarrant J.	Wentworth	84
Irby F. W.	Armidale	129	Vernon J.	Seone	33
Jamieson W.	Wilcannia	133, temply.	White H. O'S.	Gresford	32
Jones W.	Dubbo	17	Worth C.	Merriwa	34
King C. W. B.	Bourke	102	Walker J. E.	Oxley	69, 99
			Webb C. E.	Coonamble	141, 142
			Woolrych (Dis. Sur.) ..	Hill-st., Newtown	39

SCHEDULE B.

RETURN of Measurements made by Licensed Surveyors, including those on temporary salary, during the years 1883 and 1884, and the comparative cost of same.

Class of Measurement.	Area, 1883.			Area, 1884.		
	a.	r.	p.	a.	r.	p.
Conditional Purchase	1,493,419	3	37	1,031,348	3	12
Measured for auction	973,564	2	27	181,189	1	29
Government and public purposes	62,110	1	24	67,510	1	21
In right of improvements	240,354	1	5	259,517	0	21
Volunteer Land Orders	2,987	1	0	2,296	0	0
Linear measurements reduced to area by allowing 20 acres per mile, 4,986 miles, 47 chains 59 links for 1883; 4,837 miles 38 chains 48 links for 1884 ...	97,929	0	0	96,749	0	0
Special Leases	1,575	2	14	5,323	1	0
	2,862,218	0	27	1,613,939	0	3
Total amount of accounts rendered	£139,451	13	8	127,256	10	10
Average cost per acre	0	0	11½	0	1	6½

RETURN showing the number and nature of instructions issued to Surveyors for action or

Name.	Where employed.	Date of Appointment to present position.	Instructions issued for action, &c., during the year.											Instructions.		
			Roads.	Reports.	Feature surveys.	Reserves.	Conditional purchases.	Auction.	Government and public purposes.	Improved purchase.	Volunteer Land Orders.	Special Leases.	Total.	Roads.	Reports.	Feature surveys.

NOTE.—There are other claims outstanding against the Department that have not yet reached the head office.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

DISTRICT SURVEYORS UNDER CROWN LANDS ACT.
(POSITION OF.)

Ordered by the Legislative Assembly to be printed, 3 August, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 11th May, 1886, That there be laid upon the Table of this House,—

“A copy of the minute by Mr. Secretary Farnell, and approved by the Cabinet, defining the position of the District Surveyors under the ‘Crown Lands Act of 1884’; and also the subsequent minute by Mr. Secretary Abbott upon the same subject.”

(*Mr. Fitzgerald.*)

No. 1.

Minute by Mr. Secretary Farnell.

I WILL notice the concluding paragraph of the Surveyor-General's memo. first. He expresses his regret that the Minister has permitted a surveyor to return his instructions unacted upon.

In the first place the surveyor referred to was at the date of the Surveyor-General's memo. the Metropolitan District Surveyor appointed under the “Crown Lands Act of 1884”; consequently he was not an officer under the jurisdiction or subject to instructions issued by the Surveyor-General, but he was an officer of the Government, and therefore an officer of the Minister for Lands, for all the purposes of the Land Act of 1884. The instructions referred to were as to keeping a certain diary, which was administrative and not professional. And I learn from an answer to my question that the suggestion for the adoption of this diary originated with some of the district surveyors, of which the Metropolitan District Surveyor was not one.

With regard to the district surveyors it will be seen that section 16 especially provides that they are to be appointed as officers under the Minister for Lands for all the purposes of the “Crown Lands Act of 1884,” and for each district respectively they will be officers under the Department of Lands, and not under the Surveyor-General, and that communications with the Department by these officers must be through the Under Secretary for Lands. The district surveyors will be wholly responsible to the Government, and, consequently, to the Minister for Lands, for the skilful and faithful performance of their professional duties. One of the great objects of the Act is decentralisation. To permit the district surveyors to be subject to instructions by the Surveyor-General would frustrate the object of decentralisation. To allow instructions and communications with the district surveyors to permeate through the Surveyor-General's Office would be the continuance of a system that has heretofore been most unsatisfactory, and has to some extent stopped the progress of the whole Department.

The public loudly protested against the system; even the Parliament itself protested against a continuance of it. As to the position of the Surveyor-General under the Act of 1884 I take it that he is a chief among equals, and that his duties are confined to things professional in a general way, and that his functions will be confined to general matters outside and beyond the things specially contemplated by the Act of 1884; that is to say, that he is the Surveyor-General of the Colony, and should be consulted as such. I have nothing whatever to do with etiquette or the prestige of the officers of this Department. I have a solemn public duty to perform, and no officer in this Department shall stand in my way in perfecting the administration of the Department in the most beneficial way to the public, having at the same time a due regard and respect for the opinions of officers who are worthy of it.

13/2/85.

J. S. FARNELL.

The Cabinet approves of the Minister for Lands course, and of his view of the position of the Surveyor-General.—W.B.D., 13/2/85.

No. 2.

[805 copies—Approximate Cost of Printing (labour and material), £1 16s. 9d.]

No. 2.

Minute by Mr. Secretary Abbott.

I AM sorry that it has so soon fallen to my lot to dispose of so important a matter in connection with the administration of this Department as is raised by the question whether the work under the repealed Land Acts shall be carried on and disposed of in the Surveyor-General's Office in Sydney, or by the several district surveyors in the country. Before I do this I shall incidentally decide another matter, and that is one relating to the position of the Surveyor-General, as the head of the professional staff of the Lands Department. I have read the minute submitted by my predecessor, Mr. Farnell, to the Cabinet, on the 3rd December, 1884, and whilst I fully endorse the views of the Cabinet in that minute, as to the relative position of the Under Secretary for Lands and the Surveyor-General, I see no reason why the Under Secretary should not be regarded as the permanent head of the whole department, and at the same time recognise the Surveyor-General as the head of the professional branch of the same Department, whose duty it must be to communicate with the Minister, through the Under Secretary, who is, and must be regarded as the permanent head of the whole Department.

Recognising the fact that the Surveyor-General must be the head of the professional branch of the Department, it would never do to have throughout the Colony many district surveyors, each the independent head of the professional service in his own district. If each was to be the head of the professional service in his own district there would be in the Colony no such thing as uniformity of professional practice, and I think this is so very desirable that I have no hesitation in stating that the Surveyor-General must be Surveyor-General more than in name. He must be the head of all the service, and all submissions from the district surveyors on professional matters must be made through him to the Under Secretary for the Minister, and if the Under Secretary should deem it to be in the public interests that he should do so, he must offer such observations on these submissions as he may under the circumstances think advisable. The Minister can decide for himself whether further reference to the professional head is then requisite. The district surveyors, whether they send their communications through the Surveyor-General or through the Under Secretary, will still be officers under the Minister, and will still be responsible to him to the same extent as if their communications were directed to himself. As much of the district surveyors' duties must be such as are connected only with the administrative matters, they should on these subjects communicate with the Under Secretary, who will, if he deems it necessary, refer to the Surveyor-General. In like manner the Under Secretary should be perfectly free to communicate with them on subjects of a kindred nature. Notwithstanding all I have written I have no hesitation in stating that the great principle of the Land Act of 1884, decentralisation, must be carried out to the fullest extent, and district surveyors must act upon their own judgment, and not too readily or needlessly refer matters to the head office; nor should the Surveyor-General too readily interfere with them in the discharge of their respective, onerous, and important duties. If these gentlemen are fit to be district surveyors they are entitled to the fullest confidence and freedom in the discharge of the duties of their offices. The object of the Land Act of 1884, in one of its main principles, was to have the work connected with the alienation and leasing of the Crown lands disposed of in the district where the land so alienated or leased are situated, and I see no reason why this principle should not be carried out to the fullest extent, nor why the work, which has to be disposed of under the repealed Acts, should not be also disposed of in the same way as the new work; on the contrary, I see many strong reasons why it should be.

The progress of the new work must be retarded whilst the old work is delayed, or whilst there is any uncertainty about it; whereas, if each district surveyor was cognizant of the old work of his district, he could proceed with it simultaneously with the new work.

The complaint for the last twenty-five years of the delays of the Survey Office in connection with the administration of the Crown lands, have been loud and deep, and my experience has not been that these complaints were unfounded. The present system has been tried for many years, and most certainly failed to give satisfaction, and I venture to predict that no system which can be introduced can in the future give less satisfaction to the public than that which has been tried for so long and with such bad results. In New Zealand the Colony is divided into eleven land districts, each being under the local direction of a Commissioner and Land Board. The Commissioner's office is known as the principal land office, and in each district there is a principal land office, and it is with these land offices the selector has to transact all business, from the first consultation of the maps, the subsequent selection and purchase of the land, to the final receipt of the Crown grant. What is done in New Zealand can, and must be done in this Colony, in reference to decentralisation, and it is the bounden duty of all officers of the Government service to render their free and full efforts to carry out the policy of the Legislature.

J. P. ABBOTT.

2nd December, 1885.

Minute by Mr. Secretary Copeland.

I HAVE read this correspondence, and desire to say that I concur in Mr. Abbott's minute.

H.C., 17/6/86.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REMOVAL OF LAND OFFICE FROM ARMIDALE TO GLEN INNES.
(CORRESPONDENCE.)

Ordered by the Legislative Assembly to be printed, 28 January, 1886.

RETURN (in part) to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 24th September, 1885,—That there be laid upon the Table of this House,—

- “(1.) Copies of all letters, papers, minutes, and other documents having
“reference to the removal of the Lands and Survey Offices from Armidale
“to Glen Innes.
- “(2.) A Return showing—
 - “(a) The cost of repairs to and rent of Lands Offices at Glen Innes,
“and from whom rented.
 - “(b) The total revenue received from sale or lease of Crown Lands at
“Armidale, Glen Innes, Tenterfield, Inverell, and Walcha respectively.
 - “(c) The number of selections made at each of the above offices since
“the passing of the Land Act, to 1st September.
 - “(d) The number of cases dealt with by Local Boards in each district,
“to 1st September.
 - “(e) The number of applications for conditional leases and for con-
“version of pre-leases, to 1st September, in each district.
 - “(f) The estimated area of Crown Lands within each of the above
“districts.
 - “(g) A plan of the Land Districts of Armidale, Glen Innes, Inverell,
“Walcha, and Tenterfield.”

(*Mr. Proctor.*)

REMOVAL OF LAND OFFICE FROM ARMIDALE TO GLEN INNES.

No. 1.

Memorandum by Surveyor-General.

Mr. Houston, Surveyor-General's Office, Sydney, 4 November, 1884.
Mr. Chard states that the only building large enough for Land and Survey Offices at Armidale is the new Telegraph Office, and suggests that it should be borrowed till a new building can be erected.—P.F.A. I have telegraphed for the space in the building now occupied, &c.—P.F.A.

No. 2.

Telegram from Surveyor-General to District Surveyor Chard.

Sydney, 4 November, 1884.

KINDLY send sketch showing space available in line whole building now occupied by District Survey Office, and ascertain if owner is willing to add to it, and on what terms.

No. 3.

District Surveyor Chard to The Surveyor-General.

Sir, Armidale, 4 November, 1884.

In reply to the enclosed telegram I have sent the sketch requested.

The present office occupied by me consists only of the first floor, rented at £50 per annum, four rooms.

The whole building may be rented for £125 per annum, the owner having offered it to me the past few days at that price, and I am to let him know in December.

On the ground floor there are four rooms, each 15 ft. x 14 ft.; on the first floor are four rooms, each 15 ft. x 14 ft., two small attic rooms above, suitable for storing material, two kitchen rooms, about 15 x 14 each.

There are thus ten rooms, besides attics, which I estimate will accommodate twenty draftsmen or other officers, and leaving besides one room for myself and one as a waiting-room for the public.

The place is mortgaged by the owner. I think it is almost unnecessary to ask if they are willing to add to it, as I should be at once met with the query—How long will you take it for?

I shall be in Sydney in about a fortnight, and submit the matter wait till then. I think, however, it would be well to secure it not later than the end of November.

I have, &c.,
J. S. CHARD,
D.S.

Minutes on No. 3.

Mr. Houston,—I do not think the premises now occupied will provide sufficient accommodation. Mr. Chard suggested that the new Telegraph Office should be borrowed till a new building could be erected. Has this been considered?—P.F.A., 6 November.

The premises described by Mr. Chard will quarter the survey staff, assuming them to be satisfactory as to light, &c. Mr. Chard should perhaps be telegraphed to, to ascertain whether suitable additions can be made for the accommodation of the Land Board staff, which would be three rooms of 600, 225, and 400 square feet (superficial space) respectively. He might also be informed that the premises would in all probability be taken for a term of five years.—W. Houston, 6 November, 1884. The Surveyor-General.

No. 4.

Telegram from Surveyor-General to District Surveyor Chard.

Sydney, 6 November, 1884.

PLEASE ascertain whether suitable additions can be made for the accommodation of the local Land Board staff, which would be three rooms of 600, 225, and 400 square feet (superficial space) respectively. The premises would in all probability be taken for five years.

No. 5.

Telegram from District Surveyor Chard to Surveyor-General.

Armidale, 7 November, 1884.

I EXPECT to obtain suitable accommodation for local Land Board; ample space and convenient situation. Intend explaining the matter to you verbally in Sydney next Wednesday.

No. 6.

No. 6.

Telegram from Mr. B. A. Moses to Secretary for Lands.

Armidale, 7 November, 1884.

REPORTED local papers Land Office to be removed to Glen Innes; inhabitants indignant; shall I contradict?

Minute on No. 6.

Reply, it is not contemplated to remove the office to Glen Innes.—J.S.F., 8/11/84.

No. 7.

Telegram from Under-Secretary for Lands to Mr. B. A. Moses.

Sydney, 8 November, 1884.

It is not contemplated to remove the Land Office to Glen Innes.

No. 8.

Memorandum by Surveyor-General.

Mr. Houston,

Surveyor-General's Office, Sydney, 12 November, 1884.

Mr. Chard advises that an offer be made to rent the new Town Hall at Armidale, for Lands and Survey Offices; that allotment 8 of section 7 be resumed and a suitable building erected.

He thinks that £400 would be about the rent of the Town Hall whilst the new building is in erection.

Failing this, the loan of the new Telegraph Office, but it will not be ready for three or four months.

The third course, to borrow and repair (£150) the old Public School, during the erection of Lands building. The school is not large enough, however, to house the whole and provide a Court-room apparently.—P.F.A.

Mr. Chard made a plan of the vacant land behind the Telegraph Office; this should be examined with view to erection of a two-story building.—P.F.A.

No. 9.

Memorandum by District Surveyor Chard.

Sydney, 13 November, 1884.

CONCERNING obtaining offices at Armidale for local Land Board, District Surveyor, and Land Agent, I submit the following:—

1. It would undoubtedly be desirable to have these three offices combined in one building.
2. I understand it is intended to erect suitable buildings within two years.
3. The only building suitable for the three offices is the new Town Hall. Its length is about 70 feet, breadth about 40. In addition, a large stage 30×30 fully; three or four small rooms, about 20×20 , and a small gallery. The light is excellent, the building healthy and new, situation central. I have not made any inquiries as to whether it is obtainable, because the matter would have to go before the Municipal Council. If it will suit the Government—and I think it will be the best arrangement they can make—I would recommend wiring to the Mayor of Armidale offering £400 per annum for two years. It will take some time for them to consider and reply. (Present rent of D. S. Office and C. L. Office, about £100 per annum, will be abolished.)
4. The next suggestion is to obtain permission from the Minister for Education for the use of the old Public School; this contains about 3,200 superficial area, besides kitchen, &c., which could be used for packing up plans, &c. The divisions of the building are shown on sketch; the question arises whether it will contain the three offices. As I know nothing of the arrangements concerning Board I can hardly say, the area being a trifle under my estimate. The building has rather a desolate appearance, and will require the expenditure of about £150 to £175 to renovate and make necessary alterations and windows. It is not what may be called a very healthy building, being somewhat old and fusty and not particularly well drained, but there is nothing absolutely injurious. The situation is about 30 chains from business centre.

The above are the only buildings available that have any approach to containing the three offices in one, unless the Telegraph Department will grant us the use of their new office for twelve months; this building, however, will not be available for perhaps four months.

If the offices remain separate. The Crown Land Agent has already his office centrally situate, though it is small. A Board-room, about 30×20 , could be obtained two doors off, together with some small rooms attached. (Estimated cost, £80 to £130 per annum).

The District Surveyor's Office would then have to remain where it is. It is a suitable building, but $\frac{3}{4}$ of a mile from the Land Office and business centre of town. Four rooms are at present occupied, at a rent of £50 per annum. There are six other rooms available of similar size, and the whole is under offer to me at £125 per annum. There are ten rooms 15×14 ; 2,100 superficial feet, good light. Only objection is the separation from the other offices, which must be central. I do not think this objection is very important as a temporary arrangement. A good office ought to be built as early as possible.

J. S. CHARD,
District Surveyor, Armidale.

Minutes on No. 9.

It is suggested, before further action is taken, that the Mayor of Armidale be invited to submit for the consideration of the Government, as to suitability for offices for the accommodation of the Local Land Board and staff, an offer of the new Town Hall or any part of it that may be available. The Government would desire to be informed if any part of the building is occupied, and if so for what purpose; also, whether partitions could be erected where considered necessary. A sketch plan should be supplied of each floor, showing the dimensions of rooms, &c., situation of doors and windows, &c., together with the usual information respecting the term of lease and rental. It may also be added that an immediate reply is required.—W.H., 14/11/84. Yes.—C.O., 14/11/84. It is suggested that a telegram be sent to Mr. Moore asking him to advise by wire when an answer may be expected to the letter of the 15th instant, as the arrangements must be concluded without delay.—W.H., 20/11/84. The Under-Secretary for Lands. Yes.—C.O., 20/11/84.

No. 10.

The Under Secretary for Lands to J. Moore, Esq., Mayor of Armidale.

Sir,

Department of Lands, Sydney, 15 November, 1884.

It having been suggested, by Mr. District Surveyor J. S. Chard, that the new Town Hall at Armidale is the most suitable building that can be obtained there for the purposes of the working and administration of the provisions of the Crown Lands Act of 1884, I have the honor, by direction of Mr. Secretary Farnell, to invite you to submit, for the consideration of the Government, an offer of the premises mentioned, or any part thereof that may be available for, the accommodation of the local Land Board staff.

2. The Government would desire to be informed if any part of the building is occupied, and if so, for what purpose, also whether partitions could be erected where considered necessary.

3. A sketch plan should be supplied of each floor, showing the dimensions of the rooms, &c., situation of doors and windows, with the usual information respecting the term of lease and rental.

4. I am to add that, in view of the urgency of the matter, the Secretary for Lands is desirous of being supplied with the foregoing particulars as soon as possible.

I have, &c.,

F. H. WILSON,

(For the Under Secretary).

No. 11.

The Council Clerk, Armidale, to The Under Secretary for Lands.

Sir,

Council Chambers, Armidale, 18 November, 1884.

In reply to your letter of the 15th instant to the Mayor, *re* the acquiring the new Town Hall, or any portion thereof available for the accommodation of the local Land Board and staff, I have the honor to inform you that it would be impossible to let the new Town Hall for purposes named; but the old Town Hall adjoining and other buildings would be available; and as they are very spacious, and partitions could easily be erected, it is thought that they would afford ample accommodation. Should they suit your purposes, the matter of rent could easily be adjusted, as the Council would be prepared to make every concession possible to meet your requirements.

I enclose you a plan of the old Town Hall and rooms off same, all of which you could have except the Library and Reading-room as shown on plan. The sizes are given, so that you see there is a large floor space, and temporary partitions could easily be erected. Awaiting reply,—

I am, &c.,

CHARLES WILSON,

Council Clerk.

Minute on No. 11.

Mr. District Surveyor Chard requested verbally to give report on old Town Hall, offered herein.—W.H., 22/11/84.

No. 12.

Telegram from Mr. E. Grover to W. J. Fergusson, Esq., M.P.

(Presented by Mr. W. J. Fergusson, M.P.)

Fitz Evan Chambers, Sydney, 18 November, 1884.

First resolution—"That in the opinion of this meeting, Glen Innes being the most centrally and conveniently settled town in New England, it is desirable to petition the Minister for Lands that the head centre of the Land Board under the Crown Lands Act of 1884, for the land duties of New England, be established at Glen Innes." Second resolution—"That the resolution as read be adopted and forwarded to the Member for the district, for presentation to the Minister for Lands."

No. 13.

Telegram from Mr. E. Grover to W. J. Fergusson, Esq., M.P.

(Presented by Mr. W. J. Fergusson, M.P.)

Fitz Evan Chambers, Sydney, 18 November, 1884.

THAT, in view of the Crown Lands Act of 1884 coming into operation on the 1st day of January next, and of the establishment of local Land Boards thereunder, your Petitioners respectively request that Glen Innes be appointed as one of the centres of such Board.

That

That Glen Innes is situated in the centre of New England Land District, between the Queensland Border and the southern boundary, and is also centrally situated in respect of its eastern and western boundaries.

That it would be a saving of time and expense to those having occasion to attend such Court, if Glen Innes is made the head centre of the Land Board of this District.

That for many miles surrounding Glen Innes is thickly populated with selectors.

That your petitioners are informed and believe that Tamworth will be made the centre of that Land District. Armidale is only 75 miles distant from there, and is accessible by train in a few hours.

That the distance from Armidale to the northern boundary of the New England Land District is about 140 miles, whereas from Glen Innes to the north boundary is only 76 miles, and the distance of Armidale to the south boundary is only 50 miles, and from Glen Innes to the south boundary is 114 miles, which proves that Glen Innes is the most centrally situated town of the New England Land District.

That, in view of the construction of railway lines from Grafton to Glen Innes, and thence west to Inverell, the town of Glen Innes will thus be made the point of convergence, north, south, east, and west, of railway communication, and will thus greatly facilitate the despatch of business, both with the public and the Lands Department.

EDWARD GROVER,
Chairman.

No. 14.

Telegram from J. Moore, Esq., to R. L. Murray, Esq., M.P.

(Presented by Mr. Murray, M.P.)

Inverell, 19 November, 1884.

THE people here think Glen Innes more central than Armidale for Land Court. Meeting to be held here Friday about it.

No. 15.

Telegram from Under Secretary for Lands to J. Moore, Esq.

Sydney, 20 November, 1884.

PLEASE intimate by wire when an answer to my letter of 15th instant may be expected; arrangements must be concluded without delay.

No. 16.

Telegram from J. Moore, Esq., to Under Secretary for Lands.

Armidale, 21 November, 1884.

COUNCIL Clerk replied to your letter of 15th on the 18th instant, enclosing plan of building.

No. 17.

Memorandum by District-Surveyor Chard.

Memo. concerning old Town Hall, Armidale. (See sketch.)

THE Hall is centrally situated.

It is not well lighted, but otherwise good.

Extra room *a* is a good and well-lighted room.

b }
c } Useless, except for stores.
d }

My office must now remain where it is for the present, as there is no other suitable building. It will answer for all my requirements.

For Board Room there is the choice of old Public School, old Town Hall, and room near Land Agent's.

At the old Public School there is ample room for their requirements, but it is separated 20 chains from my office and 40 from Land Office, and 30 from centre of town.

Town Hall is centrally situated for business centre, but is separated 10 chains from Land Agent, and 50 from my office, and the extra rooms are not sufficient.

Room near Land Agent's is only two doors from Land Agent, and 60 chains from my office. The extra rooms upstairs will be pretty warm to work in.

The old Public School, or west part of it, would perhaps be the best choice for the Board-rooms as a temporary arrangement till new offices are built. The site is not far from my office.

24 November, 1884.

J. S. CHARD,
D.S.

Minutes on No. 17.

It appears to be impossible to obtain suitable accommodation at Armidale; and as the probability of doing so very materially affected the recommendation of Armidale as a centre, I now beg to suggest that it would be desirable to endeavour to obtain premises at Glen Innes, as there can be no doubt as to the eligibility of the latter as a centre.—C.O., 24/11/84. Appd.—J.S.F., 25/11/84.

No. 25.

Telegram from Council Clerk, Armidale, to W. C. Proctor, Esq., M.P.

(Presented by Mr. Proctor, M.P.)

Chambers, Pitt-street, 26 November, 1884.

I SEND you following resolutions, unanimously carried at full Council Meeting last night, for presentation by you to Minister for Lands. Do all you can at once in the matter. Council last night offered Minister for Lands new Town Hall for temporary Land Offices, which is only suitable building in Armidale. Act promptly, as great influence is being brought to bear to have it removed to Glen Innes.

Resolutions:—That we view with surprise the undue efforts made by Glen Innes people to have Land Office removed from Armidale to Glen Innes, and we think the following facts clearly show that Armidale is undoubtedly entitled to the Land Office:—

1. Armidale is nearer the geographical centre of Land District than Glen Innes.
2. Walcha alone, which is 40 miles south of Armidale, has more selections than either Glen Innes, Inverell, or Tenterfield, and Armidale and Walcha together have more than double the number of selections contained in all the rest of the land districts put together, clearly showing that a gross injustice would be done to a large majority of the selectors by removing the Land Office from Armidale.
3. Parliament has already voted a large sum of money for new Land Offices in Armidale on a suitable site selected for the purpose.
4. Suitable temporary offices can be obtained in Armidale for the large staff required to carry out the new Land Act, and there are plenty of private houses for the accommodation of the families connected with the staff.
5. We venture to assert that there is neither suitable offices nor private house accommodation to be obtained in Glen Innes.

For foregoing reasons alone, without many others which could be brought forward, we think no Government would do Armidale the gross and palpable injustice of taking the Land Office to Glen Innes.

Above resolutions to be forwarded by wire to Mr. Proctor, for presentation to Minister for Lands.

No. 26.

Telegram from Crown Lands Agent, Glen Innes, to Under Secretary for Lands.

26 November, 1884.

In reply to your telegram, have made all inquiries. Accommodation difficult to procure, but have succeeded in obtaining for your consideration the following buildings, which will make up the required floor space:—Barry Music Hall, situated in Grey-street, opposite Post and Telegraph Office and Court-house. Dimensions: 27 feet by 74 feet inside, two back rooms about 10 by 8; floor-space about 2,158 feet; rent £200 per annum. This rent may seem high, but it is the only place suitable and procurable, and the position is central and convenient. To make up requisite area a four-roomed, two-story building, also in Grey-street, opposite Tattersall's Hotel, each room 17 by 15, also detached kitchen 14 by 10; floor space about 1,160 feet; total, 3,318 feet; rent, £75 per annum. Both buildings are built of brick, and are in good repair. Barry's building is situated about 50 yards and the latter about 200 yards from the Bank of New South Wales.

No. 27.

Mr. J. Barry to W. J. Fergusson, Esq., M.P.

(Presented by Mr. Fergusson, M.P.)

Dear Sir,

Sydney, 26 November, 1884.

I have much pleasure in furnishing you with particulars of the property known as the Music Hall, Glen Innes, which are as follows, viz.:—Dimensions, 75 ft. long; 30 ft. wide, clear inside walls, and 15 ft. high, i.e. from floor to ceiling; 14-in. brickwork throughout; rental, £200 per annum.

I have, &c.,

JAMES BARRY.

No. 28.

The Council Clerk, Armidale, to The Under Secretary for Lands.

Sir,

Council Chambers, Armidale, 26 November, 1884.

I have the honor to send you, under separate cover, the plans of our new Town Hall, by which you will see the exact size of all the rooms. All the buildings shown on these plans you can have. You will observe that there are several large rooms underneath main floor, and also that there is a kind of gallery across one end of hall, with three large rooms upstairs. Partitions, if required, could easily be erected.

The Council will rent it to you for one or two years, or any term required by you.

If the premises suit, a special meeting of the Council will be convened to decide on rent, which will be reasonable, as the Council desires to assist you in every way possible to get suited.

I have, &c.,

CHAS. WILSON,
Council Clerk.

P.S.—Several theatrical companies from Sydney and elsewhere have applied to rent the Hall during next three months, and as soon as we definitely know your decision of course we will decline all such applications, and would therefore like to know as soon as possible.

No. 38.

Telegram from Mr. A. W. Simpson to Secretary for Lands.

Armidale, 2 December, 1884.

THE petition of the inhabitants of Armidale and surrounding district humbly sheweth: First—That Armidale is the centre of settlement in New England, as shown by statistics under; that five hundred and forty-nine different selections were made at Armidale during the past twelve months, whilst at Glen Innes and Inverell together there were only two hundred and sixty-one in same period; that 2,232 selections in the Armidale district are not yet dealt with by the Commissioner, and must come before the Board; that selection has increased greatly in Armidale District during past twelve months, and must continue to increase; that the interest on selections payable at Armidale Office is about twenty thousand pounds annually; that revenue received at Armidale Office far exceeds the amount received at Glen Innes and Tenterfield put together.

Second—That Armidale is established centre of New England District, and great private injury and injustice would be done to many Government Officers established here by a removal of centre to Glen Innes.

Third—That a site has been resumed for Land Office here, and money voted for its erection; that the head-quarters of District Surveyor, Commissioner of Inquiry Courts, and Inspector of Conditional Purchases are established here; that better accommodation is offered in Armidale for Survey Staff, both as to offices and residences, than could be obtained elsewhere.

Fourth—That the Land District has been altered in its configuration so as to make Armidale almost exactly the geographical centre of the district.

Fifth—That for the foregoing, and many other reasons which might be advanced, your petitioners respectfully submit that the Central Lands and Survey Offices be established at Armidale.

And your petitioners will ever pray, &c.

No. 39.

Telegram from Mr. A. W. Simpson to Secretary for Lands.

Armidale, 2 Dec., /84.

FIRST,—That this meeting having heard with great surprise the rumours of the contemplated removal of the Central Land Department from Armidale to Glen Innes, the claims of the former city being paramount, and the accommodation offered for the greatly increased Survey Department, under Act of eighteen hundred and eighty-four, being superior to any obtainable in any other town.

Second resolution,—That the City of Armidale has been recognized by all preceding Governments as the chief centre of New England. That the great land business transacted at and the large revenue derived from Armidale, compared with any other town in New England, as shown by statistics, clearly proves that Armidale has only received justice, and that a gross injustice would be done by establishing the Central Land Department elsewhere.

Third,—That the foregoing resolutions be forwarded by telegram to the Mayor of Armidale, now in Sydney, for presentation to the Hon. J. S. Farnell, Minister for Lands, and Member for the District.

No. 40.

Telegram from Mr. G. R. Gill to Secretary for Lands.

Walcha, 2 December, /84.

At a large and influential meeting held here last night the following resolutions were carried:—

1st,—This Meeting learns with astonishment the proposal of the Government to establish the Central Land Court under the new Land Act at Glen Innes instead of Armidale—the latter being the most central position.

2nd,—This Meeting respectfully begs to point out that such a step would be a great injustice to this important portion of the district.

3rd,—This Meeting desires to draw the attention of the Honorable the Minister for Lands to the fact that the Land Office has only been established at Walcha for a little over seven years, and during that period over one hundred and sixty-one thousand acres have been conditionally purchased, while the revenue during that period from this portion of the district amounts to over one hundred and thirty thousand pounds.

11

No. 43.

J. Moore, Esq., to The Executive Council.

Gentlemen,

Armidale, 4 December, 1884.

We, the undersigned, learn with much surprise the decision arrived at to make Glen Innes the central town of New England, in connection with the local Board and Survey Department under Act of 1884.

We trust that such decision is not irrevocable, and would most respectfully ask that any trusted and impartial officer be sent to the towns of Glen Innes and Armidale, to examine and report upon the accommodation afforded in each place, not only for the Survey Staff and Local Board for the transaction of business, but also as to the possibilities of each town with respect to houses suitable for quarters.

As Armidale has always been the capital of New England, and, in spite of misleading statements to the contrary, can be shown to be nearer to the centre of this large district than any other town, we respectfully submit our request is not unreasonable, and will rest perfectly satisfied with the result of such inquiry and report.

We have, &c.,

JOHN MOORE, J.P., Mayor.

John Tuim, Alderman.

John Bliss, Alderman.

G. Holmes, do

C. Thompson, do

Wm. Butler, do

Wm. Seabrook, do

John Harper, do

C. W. Tompson, do.

And three hundred and eighty (380) other signatures.

Glen Innes, 4 December, 1884.

Telegram from Mr. E. Grover to Under Secretary for Lands.

Will have pleasure in contracting to make alterations required to buildings for Lands and Survey Offices here before first of January next, if ordered at once.

No. 45.

Telegram from J. Moore, Esq., to Secretary for Lands.

Armidale, 9 December, 1884.

Mr. Freeman passed through to-day on return to Sydney. Kindly telegraph him at Murrurundi or Newcastle to return to Armidale and carry out prayer of petition by reporting on accommodation here.

No. 46.

Mr. Chief-Inspector Freeman to The Under-Secretary for Lands.

Sir,

Department of Lands, Sydney, 10 December, 1884.

I do myself the honor to report that, in accordance with your directions, I proceeded to Glen Innes for the purpose of examining premises available for Land Board Offices.

The best accommodation obtainable, Mr. Barry's Music Hall (a brick building opposite the Court-House and Post and Telegraph Office), if subdivided and added to as per design and specification herewith, and used in conjunction with Dr. Segol's wooden building (locally known as the Temperance Hotel), will be sufficient for the purpose. Necessary alterations and additions to the Music Hall can be effected at a cost of £317 10s.; and the Temperance Hotel can be cleaned, repaired, and added to for £110, as per tender of Mr. Edward Grover, a responsible gentleman, at present Mayor of the town. Mr. Barry's hall can be rented for £200 per annum, and Dr. Segol's premises for £100.

The Government having decided to establish offices at Glen Innes, I beg respectfully to recommend that the premises specified be leased; also that Mr. Grover's offer to effect necessary repairs, alterations, and additions for a total sum of £427 10s. be accepted.

Having in view the speed with which the work is to be carried out, and the cost of building at Glen Innes, the amount of Mr. Grover's tender is not excessive.

It is reported that the Government contemplate erecting a new Court-house on a site lately resumed. If this be done the present building should be secured for the Lands Department, as with about two or three additional rooms (space for which is available within the land enclosed for Court purposes), the place will be well adapted for Land Board and Survey Offices.

I would therefore suggest that the temporary offices be leased for a term of three years, with right of extension for a further period of (say) two years, in case the new Court-house be not available at the end of the first term as anticipated.

I have, &c.,

STEPHEN FREEMAN,

Inspector of Land Offices.

Minutes on No. 46.

Submitted for decision.—C.O., 10/12/84. Approved.—J.S.F., 11/12/84. Telegrams accordingly to Dr. Segol, Mr. James Barry, and Mr. E. Grover; copies herewith.—12.50 p.m., 11 Dec., 1884. No. 50.

Statement of the Deputation from Armidale.

It having been frequently stated by Ministers of the Crown that deputations leave no record of their utterances to which the Minister can refer, we, the undersigned members of the Deputation from Armidale, present the following summary of the grounds upon which we protest, in the name of the inhabitants of Southern New England, against the contemplated establishment of the central Land and Survey Offices at Glen Innes.

We respectfully submit that, inasmuch as Armidale is more centrally situated than Glen Innes, is double the size of that town, contains nearly twice as many inhabitants, and has hitherto been the recognized centre, we may fairly ask what advantages Glen Innes has over Armidale to entitle it to be made the centre for the administration of the new Land Act.

We unhesitatingly assert that better office accommodation is offered at Armidale than at Glen Innes, and we present a petition to the Minister from the people of Armidale asking that an unbiased officer, in whom the Government can place confidence, be sent to examine and report upon the accommodation available in the two towns. We are confident that such a report would uphold our assertion; and we venture to remind the Minister that, although an officer was sent to report upon the accommodation at Glen Innes, that officer did not make a similar report at Armidale.

There are many officers connected with the Lands and Survey Departments who have bought property, built houses, and established homes for themselves at Armidale. Unless it be shown that the Land Act can be better administered from Glen Innes as a centre than from Armidale, we think these officers are hardly treated in being compelled to break up their homes and sell their properties; nor is it fair that Armidale should be to any extent depopulated, unless in the public interests.

In several districts, we have observed, the Government have thought it best to establish the central offices in large towns which are not centrally situated, in preference to small towns having that advantage—Tamworth being chosen in place of Gunnedah being a case in point. Armidale can claim the central offices on both counts; it is more centrally situated and far larger than Glen Innes.

Several misstatements have been made with regard to Southern New England, and Armidale in particular, which we desire to correct. It has been said that Armidale is on the extreme southern boundary of New England. The map attached to this document is issued from the Surveyor-General's Office, and the district over which the Land Board for New England will preside is coloured pink. It will be seen by reference to this map that Armidale is almost precisely in the centre of the district. In further refutation of this statement, we may mention that Tumally, Glen Rock, Tibue, Nowendoc, Hanging Rock, and many other places where there is considerable amount of selection, are situated at distances varying between 120 and 60 miles to the south of Walcha. The estimated population in the Armidale and Walcha Land Districts at the commencement of this year was 14,880, not under 10,000 as has been stated.

It may also be advisable to state that there are in the Armidale and Walcha Districts 5,446 selections, embracing an area of 716,305 acres, and that during this year alone there have been 580 selections made at these two places; whilst at Glen Innes, Inverell, and Tenterfield, in the same period, there have been 482, or 98 less than the two first-mentioned towns. Over £43,000 have been collected at Armidale and Walcha Land Offices this year, and there are in these two districts nearly 2,500 selections not yet dealt with, which will have to be referred to the local Land Board.

Telegram from Messrs. Craigie & Hipgrave to Secretary for Lands.

Armidale, 16 December, 1884.

DAILY receiving complaints that there is no accommodation for officers, Lands Department, at Glen Innes. We are aware positively that good provision, moderate rents, obtainable here, whereas most outrageous rents are asked at Glen Innes. Trust you will accept Town Hall, rent free.

No. 52.

Telegram from District Surveyor Chard to Secretary for Lands.

Armidale, 16 December, 1884.

MR. McLEAN informs me that offices at Glen Innes are unsuitable for drafting; dwelling-houses almost unobtainable. Myself and many of the staff will be much harassed.

No. 53.

Telegram from Council Clerk, Armidale, to Under Secretary for Lands.

Armidale, 16 December, 1884.

MUNICIPAL Council will let you have new Town Hall for two or three years rent free for Land Offices.

No. 54.

District Surveyor Chard to The Under Secretary for Lands.

Armidale, 19 January, 1885.

Sir,

The Hon. the Minister for Mines, speaking at Armidale, on 13 January, concerning Land Board Offices, and the delay in treating with Armidale, is reported to have said,—“The correspondence in this case commenced with a memo. by the Surveyor-General, dated 4th November, 1884, reciting that Mr. District Surveyor Chard had stated that the only building in Armidale large enough for Land Board Offices was the new Telegraph Office—the Surveyor-General adding that he had telegraphed for particulars of present office.”

I desire to state that at that time I had made no official report on the subject, the Surveyor-General's telegram of 4th November asking for particulars of present office being the first intimation received by me on the matter.

If the Surveyor-General's memo. was the result of a conversation about the middle of October, I think he has made an incorrect remembrance of what I said, and but for it I should probably have been asked for a full report on the subject on the 4th November, instead of by Mr. Houston about the 12th.

I trust that they will be placed with the papers. Such papers may be asked for at a future time, and I think it only fair to show that the delay has not been caused by me.

I am, &c.,

J. S. CHARD,

District Surveyor.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LAND OFFICES, GLEN INNES OR ARMIDALE.
(REPORTS IN REFERENCE TO LOCATION OF.)

Ordered by the Legislative Assembly to be printed, 22 October, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 29th September, 1886, That there be laid upon the Table of this House,—

“Copies of all reports from the Land Board, or any member thereof,
“District Surveyor, or any other person, in reference to the location of
“the Land Offices at Glen Innes, or their removal to Armidale.”

(*Mr. W. J. Fergusson.*)

SCHEDULE.

NO.		PAGE.
1.	Memorandum from Mr. W. J. Fergusson, M.P., to the Secretary for Lands in reference to the location of the Land Board District at Glen Innes or Armidale. 14 April, 1886.....	1
2.	Mr. District-Surveyor Finley to the Under Secretary for Lands. 19 April, 1886.....	1
3.	Mr. Chairman Blythe to the Under Secretary for Lands. 19 April, 1886.....	2
4.	The same to the same. 22 May, 1886.....	2
5.	Mr. District-Surveyor Finley to the same. 25 May, 1886.....	5

No. 1.

Memorandum from W. J. Fergusson, Esq., M.P., to The Secretary for Lands.

Sir,

Fitz-Evan Chambers, Castlereagh-street, Sydney, 14 April, 1886.

I understand you have asked Mr. Blythe, Chairman of Land Board, Glen Innes, for report as to removal of offices to Armidale. I think it only fair that the Board, as a whole, should be asked for a report. It is well known what Mr. Blythe's report will be before it comes in. Mr. Blythe's residence is still in Armidale.

W. J. FERGUSSON.

No. 2.

Mr. District-Surveyor Finley to The Under Secretary for Lands.

Sir,

District Survey Office, Glen Innes, 19 April, 1886.

I have the honor to acknowledge the receipt of your letter of the 16th inst, requesting me to furnish you with a report as to whether the public interest is best served by the location of the head quarters of the Land Board District at Glen Innes or Armidale. In reply I beg to say that I will furnish you with the report at as early a date as possible. It will take me some little time to obtain all the information you require, and I desire to make a personal inspection of the buildings now being erected at Armidale before reporting.

I have, &c.,

F. G. FINLEY,

District Surveyor.

No. 3.

1021—A

[805 copies—Approximate Cost of Printing (labour and material), £23 4s. 3d.]

No. 3.

Mr. Chairman Blythe to The Under Secretary for Lands.

Sir,

Local Land Board Office, Glen Innes, 19 April, 1886.

86-2,909 Minl.
Glen Innes.
Armidale.
Inverell.
Tenterfield.
Walcha.

I do myself the honor to acknowledge receipt of your letter of the 16th instant, numbered as by the margin, requesting a general report as to whether the public interest would be better served by making Armidale or retaining Glen Innes as the head quarters of the Land Board districts mentioned in the margin, and also which place is most suitable for furthering the work of the Department.

In reply, I beg to say that I will obtain every possible information on the subject and the various matters touched upon in your letter, and at as early a date as possible will furnish an exhaustive report thereon.

I have, &c.,

SYDNEY BLYTHE,

Chairman.

No. 4.

Mr. Chairman Blythe to The Under Secretary for Lands.

Sir,

Local Land Board Office, Armidale, 22 May, 1886.

86-2,909 Minl.
Glen Innes.
Armidale.
Inverell.
Tenterfield.
Walcha.

I now do myself the honor to reply to your letter of the 16th ultimo, numbered as by the margin, receipt whereof was acknowledged on 19th ultimo, in which I am requested to furnish a general report as to whether the public interest would be better served by making Armidale or retaining Glen Innes as the head-quarters of the Land Board Districts mentioned in the margin; also, which place is most suitable for furthering the work of the Local Branch of the Department.

Plan of building
in course of
erection.

I desire to be guided in my report, apart altogether from any personal bias, and will first submit the following Statistics of work done and prospective work in each place.

TABLE NO. 1.

Number of Conditional Purchases applied for from 6th August, 1885, to 31st March, 1886:—

Glen Innes	99
Armidale	237
Inverell	73
Tenterfield	45
Walcha	96

TABLE NO. 2.

Number of Conditional Leases, under 48th clause, applied for during same period:—

Glen Innes	28
Armidale	136
Inverell	28
Tenterfield	16
Walcha	47

TABLE NO. 3.

Number of Conditional Leases applied for under 54th clause, from 1st January, 1885, to 31st March, 1885:—

Glen Innes	33
Armidale	88
Inverell	29
Tenterfield	32
Walcha	10

TABLE NO. 4.

Number of Conditional Lease applications, under 52nd clause (Conversion of Pre-emptive Leases), from 1st January, 1885, to 31st March, 1885:—

Glen Innes	35
Armidale	350
Inverell	229
Tenterfield	86
Walcha	66

TABLE NO. 5.

Cases dealt with by the Local Land Boards, from 1st January, 1885, to 31st March, 1886:—

Glen Innes	257
Armidale	1,147
Inverell	457
Tenterfield	267
Walcha	304

TABLE NO. 6.

Amount of Revenue collected by Land Agents, from 1st January, 1886, to 31st March, 1886:—

	£	s.	d.
Glen Innes	7,899	8	7
Armidale	19,750	5	9
Inverell	11,132	0	8
Tenterfield	4,296	15	4
Walcha	7,844	16	11

TABLE

TABLE NO. 7.

Cases under Repealed Acts, from 1st January, 1881, to 31st December, 1884. The five years having only now matured on the 1st of these, a great proportion of them will come under the review of the Board up to April, 1890:—

Glen Innes	936
Armidale	1,310
Inverell	822
Tenterfield	525
Walcha	384

I submit the figures in the foregoing Tables conclusively show that the public interest (that is the greater number of persons) would be better served by making Armidale the head-quarters.

I am next asked as to the suitability of the Glen Innes buildings for carrying on the work, and whether equally suitable or more suitable buildings are available at Armidale. I have no hesitation in saying that the present temporary buildings in Glen Innes are most unsuitable for the following reasons:—The wooden building, lined throughout with cedar, occupied by myself and clerks as temporary offices, is a most unsafe place from chance of fire (to guard against which requires much care), and being also most inconvenient from its situation at a considerable distance from the Survey Offices, involving constantly travelling backwards and forwards by the clerks, the messenger, the District Surveyor, and myself. Moreover, in addition to the space allotted for draughtsmen, I have been obliged to give up to their use, except during sittings of the Board, the Court-room and Retiring-room of the Board.

That there are no more suitable places in Armidale without an outlay of at least £100, which I could not recommend in view of the accommodation in course of erection. I will deal with this in its proper sequence.

With regard to which place is most suitable for furthering the work of the local branch of the Department, I can only say my frequent necessary absences from Glen Innes cause considerable delay in answering correspondence, signing important papers, such as orders to survey, refund vouchers, &c., which would be to a great extent obviated were the head office in Armidale, as I should then be on the spot where the most work is and could really visit the other towns with greater regularity, while, at the same time, being more constantly at head office and exercising a more strict supervision over its working.

A glance at * map of district herewith will show the relative positions of the various towns, and * Not required. as the work of each Land District is carried on within itself by the Land Agents and different Boards very seldom requiring persons to travel beyond their own district, the question of mere absolute nearness to geographical centre is unimportant.

I now come to the question of the relative character of the accommodation available at each place for residences of the officials, and whether their convenience would be best suited at Armidale, &c. It would be impossible to give a reliable statement of numbers of houses vacant as they might vary each month. I may state generally that house accommodation in Armidale is of a better class than at Glen Innes, while the rents are much lower. Some few of the officers who are now settled in Glen Innes might not desire to remove, but I feel safe in saying that the convenience of the great majority would be best suited at Armidale. I am not, however, prepared to assert that the difference of expense of living in Armidale as compared with Glen Innes would warrant a reduction in the allowances made to officers on their moving up country. The wife and family of the chief draughtsman have not been removed from Sydney; those of the second draughtsman reside in Armidale, and I have not removed my wife and family from the latter place; the other married officials reside in houses or lodgings in Glen Innes.

I submit that the third question, in letter before quoted, as to which place would be most convenient for the greater proportion of the public, and the proportionate number of persons who would be benefited, &c., has already been answered by the statistics quoted.

With regard to the division of the Land Board District into two, having a head-quarters for each, I cannot see that it would be in the interest of the public to recommend it. The probable additional expense would be one extra chairman, one extra district surveyor, certainly one extra chief clerk, and messenger, besides rent or expense of buildings. There would not be sufficient work for two chairmen and two district surveyors were the district divided. The chairman must be in constant communication with the district surveyor, and the latter officer also requires to have his staff constantly under his supervision.

I now come to the last paragraph—whether the buildings now being erected at Armidale could be made suitable? I state unhesitatingly that they can be made perfectly suitable and give infinitely better and safer accommodation than the present temporary places at Glen Innes. I enclose a plan of the buildings and how I would propose to apportion the various offices, giving space for nearly double the number of draughtsmen presently located at Glen Innes.

If any additions should be found necessary hereafter there is a space of 33 ft. wide and the whole depth of the building available, besides other Government land further back on which a building of nearly equal size to the present could, if necessary, be erected.

These premises, I am assured, will absolutely be ready for occupation by 1st October next, and perhaps if it is decided to remove the offices there are some additions ought at once to be made, as erecting a storeroom at the back on space indicated by red dotted lines (say) at a cost of £120; two additional closets; a weatherboard building for the messenger and his wife, if thought necessary, at a cost of about £250, and if hereafter required, a one-storey room for draughtsman, so as not to obscure the light, would easily be added on the space between the proposed messenger's house and Falconer-street.

On looking over the plans and buildings this week with the District Surveyor, he was of opinion that the roof of the upper balcony ought to be raised to admit of more direct light. This, the contractor said, could easily be done. Doubtless, however, Mr. Finley will touch on this matter in his report.

I have, &c.,

SYDNEY BLYTHE,
Chairman, Local Land Board, Glen Innes District.

FREDERICK BURNE,
Crown Lands Agent.

Mr. District-Surveyor Finley to The Under Secretary for Lands.

Report—Location of head quarters of the Glen Innes Land Board District.

Sir,

District Survey Office, Glen Innes, 26 May, 1886.

In accordance with your instructions, conveyed to me by your letter of 16th April, 1886, I have the honor to furnish you with a report on the subject as to whether the public interest would be better served by making Armidale or retaining Glen Innes as the head quarters of the Land Districts of Glen Innes, Armidale, Inverell, Tenterfield, and Walcha.

2. I will deal with the various matters in the order in which they appear in your instructions, and in making the report I may state that I am not actuated in any way by motives of a personal nature. There is evidently a very keen rivalry going on between the towns of Armidale and Glen Innes for the possession of the offices, altogether apart from the question of public benefit, and the inhabitants of both the towns are much interested in the question.

3. The first question you request me to report upon is the suitability of the buildings at Glen Innes, and whether equally or more suitable buildings are available at Armidale. In reply to this, I beg to report that the Glen Innes buildings are not suitable, as the District Survey Office is separate from the Land Board Office. This is a bad arrangement, and has not worked well. The respective offices are some 150 yards apart, and some of the officers are constantly passing to and fro seeking information from either office. So far as the Land Board Office is concerned the space is ample in my opinion for the staff. The District Survey Office buildings are too limited for the staff, which now numbers some twelve officers, and I have been compelled to place two draftsmen in the Court-room; this however has not caused much inconvenience, as the Board has only sat on an average about two days a month since the offices were established. But notwithstanding that the office room is limited the work has gone on smoothly, and the principal defect has been the separation of the offices.

For the purposes of this report I have, in company with the Chairman of the Board, inspected the building now being erected at Armidale, and there is no doubt as to the suitability and capacity of it to accommodate the full staff. I enclose you a sketch plan,* which is explanatory in itself, showing the size of the buildings, &c., and how it can be utilized, giving ample accommodation to the Land Board, District Survey Office, and Crown Lands Agent. This building, which is costing upwards of £3,000, will be completed about the beginning of October of this year, at least so I am informed by the contractor. There will be a necessity for some additions, such as out-houses and a store-room for stationery, &c. I show on the plan where these should be erected; the estimated cost will be £120. * Not required.

If the offices are occupied as suggested on the plan, and as proposed by the Chairman and myself, the Land Board Court must be held in the Court-house as at present. There is not in my opinion any other building in Armidale that it would be judicious for me to recommend for offices in the face of the near completion of those referred to above. There is the old Public School, but a cost of from £200 to £300 would have to be incurred in its renovation, and then it would be a make-shift at best. Considering that the lease of the buildings now occupied at Glen Innes will expire at the end of the current year, it appears to me that it would be extremely unwise to remove the office, if such is contemplated, until about that time, thus avoiding any unnecessary expense, and the new buildings at Armidale would be ready for occupation. I would also point out that the work of the district is just now in its most critical stage, and the immediate removal of the offices would cause serious delay and confusion. To sum up these remarks I therefore give it as my candid opinion, for the above reasons, that the offices should remain where they are until, at all events, near the end of this year.

4. The next question is that of residences for the officials. It must be admitted that house accommodation is more plentiful and of a better description in Armidale than it is in Glen Innes; and I believe house rent is at present cheaper in Armidale also; but of course this would probably increase, so far as Armidale is concerned, if the offices were removed. There are empty houses in both towns, but more in Armidale than in Glen Innes; and I do not consider there is very much to choose on this point between either town. The only officers of the staff who do not reside in Glen Innes are the Chairman of the Board and Mr. McLean (draftsman in this office), who have their private residences and families in Armidale. I consider the cost of living in either town as equal, and I would not feel justified in recommending any reduction on the allowances if the offices were removed. There is one thing in connection with this subject that I would draw especial attention to, and that is the fact that one of the officers under my supervision has purchased land in Glen Innes and erected a house thereon; the removal of the office would therefore be a serious matter to him.

5. The next question I come to is the important one of "as to which place would be the most convenient one for the greater proportion of the public." I believe I am correct in saying that one of the principal improvements in land administration, as carried out under the Land Board system of the Act of 1884, is that the Land Boards go to the people and not the people to the Boards. Taking the Land Board District as a whole, I do not consider it makes any difference to the general public as to where the head office is established; the work of the District Survey Office can be carried out efficiently in either of the towns under reference, with equal satisfaction to the general public, if suitable buildings are provided. If it is a desideratum that the head office be established in the town where the most work is, the figures that follow these remarks will show most conclusively that Armidale is that place. Writing from the standpoint of a district surveyor, I must state that Glen Innes is most conveniently and centrally situated for my work. In order to arrive at an approximation to the amount of prospective work in the district, I have compiled the following statistical information, viz. :—

RETURN showing the number of conditional purchases still in existence, out of those taken up, from 1881 to 1885 inclusive, that will be inquired into by the Land Board :—

Armidale Land District	1,143
Glen Innes	767
Inverell	685
Tenterfield	352
Walcha	311

RETURN showing the number of conditional leases, under the 48th and 54th clauses, applied for during 1885, still in existence, and that will be inquired into by the Local Land Board :—

Armidale Land District	150
Glen Innes	35
Tenterfield	31
Walcha	24
Inverell	15

RETURN showing the number of conditional leases, under the 52nd clause, applied for that are still in existence, and will come before the Land Board for further inquiry, appraisement, &c. :—

Armidale Land District	292
Inverell	194
Tenterfield	79
Walcha	43
Glen Innes	28

RETURN showing grand total of cases in the Glen Innes District from 1881 to 1885 inclusive to come before the Local Land Board for inquiry :—

Armidale Land District	1,585
Glen Innes	830
Inverell	894
Tenterfield	465
Walcha	378

A perusal of these figures shows that Armidale is far beyond any town in the amount of work which will have to be dealt with. On the other hand it will be observed that putting Glen Innes, Inverell, and Tenterfield together, they show a preponderance of work for the northern portion of the district over Armidale and Walcha in the south. There is one other feature in connection with prospective work, and that is future conditional purchase. Any attempt at arriving at an approximation of this must be surmise. I have, however, gone over the maps, and, speaking from general knowledge, I consider that the greater bulk of the land likely to be conditionally purchased lies to the north of Glen Innes. Armidale, with its much larger population, is necessarily a much more settled district, and the demand for land there has been very great. Consequently very much of the available country is disposed of. Extensive reservations have recently been thrown open in the neighbourhood of Glen Innes and Emmaville, and it is probable there will be an increase of conditional purchase in consequence. However, the effect of this will be seen towards the end of the year. It is worthy of note that upwards of 4,000 cases of conditional leases and conditional purchases applied for previous to the end of 1885 remain to be dealt with by the various local Land Boards throughout the district.

The next question to be replied to is whether it would be desirable in the public interest to divide the Land Board District into two, having a head quarters for each. So far as the District Survey Office is concerned, my own opinion is that the division of the district is not altogether an undesirable thing; but I am aware that the opinion of the Chairman of the Land Board is averse to such a course, as he considers that the work in his branch can easily be performed. The survey work in the district is very great, and the large staff of field officers employed and scattered over the entire district is somewhat difficult to supervise. I cannot, however, see my way to recommend a division of the district on several grounds :—The district, although large in itself, is scarcely large enough for two, and the increased cost of maintaining the two staffs would be very considerable. I have made an estimate of what the probable cost would be, and I consider that it would approach the sum of £5,000 per annum. For although the staff of draftsmen and clerks would not require to be augmented to any great extent, all the principal officers would be duplicated, and the furnishing and rent of an additional office would be large. Apart from this I believe there would still be considerable agitation as to the proper place for head quarters, whether at Glen Innes, Inverell, or Tenterfield.

In conclusion, I would like to draw attention to one fact in connection with the removal of the offices. Owing to the uncertainty that exists as to the final location of the offices many of the draftsmen are afraid to establish permanent and comfortable homes for themselves. It will be to the advantage of the Public Service to have the matter finally settled, then the officers generally will work more contentedly.

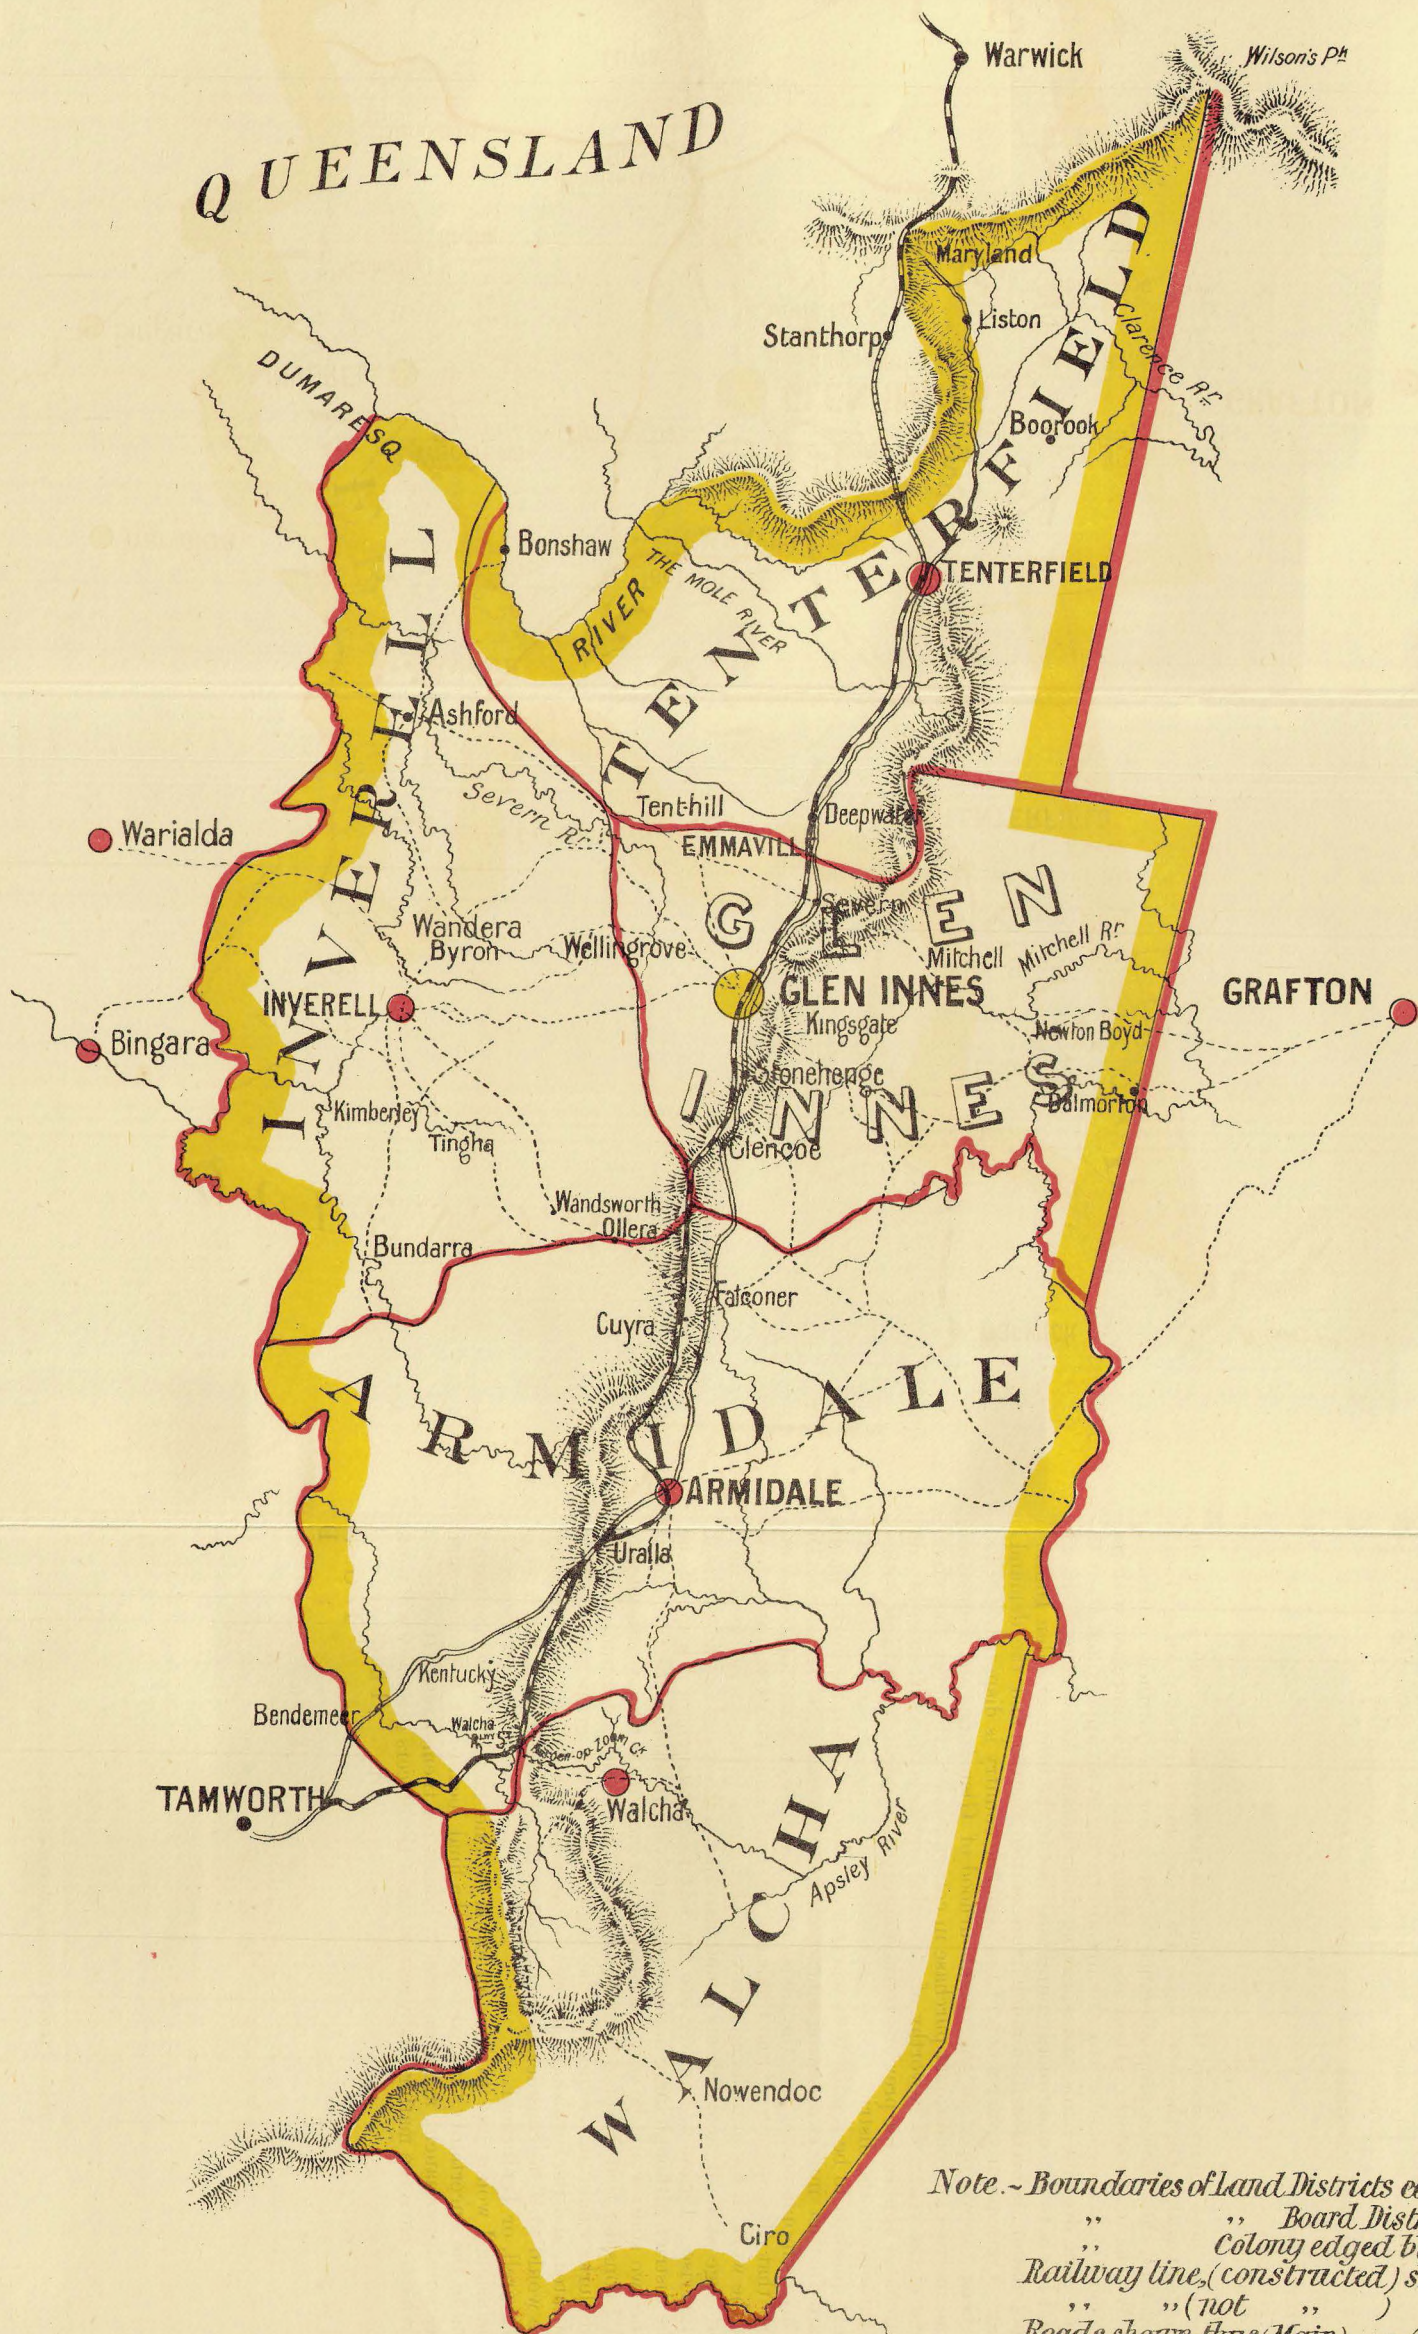

I have, &c.,

F. G. FINLEY,
District Surveyor.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LAND AND SURVEY OFFICES AT BOURKE.

(EXPENDITURE IN AND REVENUE RECEIVED FROM, FOR QUARTER ENDED 31 MARCH, 1886.)

Ordered by the Legislative Assembly to be printed, 18 May, 1886.

RETURN showing the expenditure in connection with the Land and Survey Offices at Bourke, during the quarter ended 31st March, 1886; also the revenue received during the same period.

<i>Land Office.</i>				£	s.	d.
Salaries of Chairman and Officers; fees to Members Local Land Boards, &c., &c...	584	19	4
<i>Survey Office.</i>						
Salaries of District Surveyor and Staff, including fees to Licensed Surveyors	3,071	13	8
Total expenditure	£3,656	13	0

Revenue received for land within the Land District of Bourke, and the districts presided over by the Chairman of the Local Land Board at Bourke ... £15,904 19 6

In the Land and Survey Offices at Bourke all business is transacted in connection with land included in the Land Districts of Bourke, Brewarrina, Brewarrina East, Cobar, and Cobar East. It should also be noted that the principal portion of the revenue is derived from rents of pastoral holdings payable during the last quarter of the past year in advance for the current year, but such amount is not included in this return.

Department of Lands,
18th May, 1886.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LAND OFFICES, ARMIDALE, WALCHA, GLEN INNES,
INVERELL, AND TENTERFIELD.

(BUSINESS AT, FROM 1881 TO 1884.)

Ordered by the Legislative Assembly to be printed, 21 July, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 11th December, 1885, That there be laid upon the Table of this House, a Return showing,—

- “(1.) The number of Conditional Purchases applied for in the years 1881, 1882, 1883, and 1884, at the following Land Offices :—Armidale, Walcha, Glen Innes, Inverell, and Tenterfield.
- “(2.) The number of applications under 52nd clause to convert Pre-emptive Leases into Conditional Leases received from Armidale, Walcha, Glen Innes, Inverell, and Tenterfield, within the ninety days specified in Act of 1884.
- “(3.) The number of applications for Conditional Leases under section 54, made at Armidale, Walcha, Glen Innes, Inverell, and Tenterfield within the said ninety days.
- “(4.) The number of applications for Conditional Purchases under Act of 1884, received from 6th August to 1st December, at Land Offices, Armidale, Walcha, Glen Innes, Inverell, and Tenterfield.
- “(5.) The number of applications for Conditional Leases under section 48, received at each of the said Offices during the like period.”

(*Mr. Inglis.*)

LAND OFFICES, ARMIDALE, WALCHA, GLEN INNES, INVERELL, AND TENTERFIELD.

RETURN No. 1, showing the number of Conditional Purchases applied for in the years 1881, 1882, 1883, and 1884, at the following Land Offices :—Armidale, Walcha, Glen Innes, Inverell, and Tenterfield :—

	1881.	1882.	1883.	1884.

No. 58 of 1877.

Application by John Jackson Thompson for the conditional purchase, without competition, of 560 acres unimproved Crown Land.

Received by me, with a deposit of £140, this 3rd day of May, 1877, at 10 o'clock,—

W. CLARE CARDEW,

Agent for the Sale of Crown Lands at Inverell.

Sir,

3 May, 1877.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 560 acres; and I herewith tender the sum of £140, being a deposit at the rate of 5s. per acre on the area for which I apply.

I am, &c.,

JOHN JACKSON THOMPSON,

Inverell.

To the Agent for the Sale of Crown Lands at Inverell.

Description.

County of Arrawatta, parish of Bukkulla, 560 acres. Commencing at a gum-tree marked R over 3, on the eastern bank of the Macintyre River, being portion of reserve No. 67, gazetted as revoked on March 27, 1877.

[Alienation Act, section 21.]

Application by John Jackson Thompson for the conditional purchase, without competition, of 80 acres unimproved Crown Land, under section 21 of the Crown Lands Alienation Act of 1861.

Received by me, with a deposit of £20, this 17th day of May, 1877, at 11:35 o'clock,—

W. CLARE CARDEW,

Agent for the Sale of Crown Lands at Inverell.

Sir,

17 May, 1877.

Land Agent's Number.	Dates of previous Conditional Purchases.	Area of each Conditional Purchase.
58	3/5/77	560
80	17/5/77	80
Total area..		640

I am desirous of purchasing, without competition, under the 21st section of the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 80 acres, which adjoins my conditional purchase of 560 acres, upon which I am now residing, or upon which I have resided for three years; and I herewith tender the sum of £20, being a deposit at the rate of five shilling (5s.) per acre on the area for which I apply.

This is the first selection made by me in virtue of my conditional purchase of 560 acres.

I am, &c.,

J. J. THOMPSON,

Bukkulla.

To the Agent for the Sale of Crown Lands at Inverell.

Description.

County of Arrawatta, parish of Bukkulla, 80 acres, adjoining on the north my conditional purchase of 560 acres, made 3rd May, 1877, being portion of reserve No. 67, revoked 27th March, 1877.

Minutes on No. 4.

By the Surveyor-General:—Mr. Licensed Surveyor Macharg to measure, if unobjectionable, if first conditional purchase is satisfactory.—D.L. (pro Surveyor-General), 2/7/77. B.C., 6/7/77.

No. 5.

Application by Frederick Wentworth Wright.

M.

District of Warialda.

[Occupation Act, 1861, Lands Acts Amendment Act, 1875.]

Received this 19th day of June, 1877, at 10 o'clock, together with the sum of £1 6s. 10d.

F. CAMERON MACARTHUR,

Land Agent.

Sir,

Bukkulla, 19 June, 1877.

In pursuance of the provisions of the Crown Lands Occupation Act of 1861, and the Lands Acts Amendment Act, 1875, and Regulations thereunder, I, the undersigned, as agent for Frederick Wentworth Wright, do hereby apply to be allowed to lease the sections or portion of Crown Lands hereunder described, at the fixed rent of £2 per section, which I hereby tender.

Tho

5

The land in virtue of which I claim to exercise a right of pre-emption is situated as follows, and is now in my possession, viz. :—

County of Arrawatta, parish of Bukkulla, situated on the Macintyre River, containing 143 acres, being auction purchase, on the 23rd day of March, 1877, by Frederick Wentworth Wright, at Warialda.

I have, &c.,

FREDERICK WENTWORTH WRIGHT,

To the Land Agent for the District of Warialda.

By his Agent, PERCY PHILIP WRIGHT.

Description of the section or portion applied for.

429 acres, adjoining the eastern boundaries of said portion, No. 79-280, as described above.

Minutes on No. 5.

429 acres, gazetted 27 November, 1877.—Approved and Agent informed, 23/1/78.

Objectionable, as the land applied for is under lease to J. J. Thompson (*vide* 34 of 1877, 1,920 acres), and there is no other available land.—A.G., 6/5/79.

No. 6.

Mr. P. P. Wright to The Secretary for Lands.

Sir,

Karoola, Bukkulla, via Inverell, 19 August, 1877.

I have the honor to request that you may see fit to cause to be put up to auction portion No. 84, containing about 80 acres, adjoining the southern boundary of reserve No. 515, parish of Bukkulla, county of Arrawatta, and beg herewith to hand you cheque on Bank of Australasia, Sydney, for £2, at 6d. per acre.

I have, &c.,

PERCY PHILIP WRIGHT.

No. 7.

Mr. Licensed Surveyor Macharg to The Surveyor-General.

Sir,

Inverell, 10 September, 1877.

I have the honor to transmit herewith the plan of one portion of land, containing 560 acres, numbered 82, in the parish of Bukkulla, county of Arrawatta, applied for by J. J. Thompson, under the 13th section of the Crown Lands Alienation Act of 1861, and surveyed in accordance with instructions dated 12 June, 1877, No. 47.

Improvements at date of survey consisted of a bark hut and sheep-yard, worth £12. The applicant was not present during the survey. Water permanent.

I have, &c.,

JOHN MACHARG,

Licensed Surveyor.

Application by Mr. J. J. Thompson.

District of Inverell.

[Occupation Act, 1861, Lands Acts Amendment Act, 1875.]

Received this 29th day of September, 1877, at 12 o'clock, together with the sum of £3.

W. CLARE CARDEW,
Land Agent.

Sir,

Inverell, 29 September, 1877.

In pursuance of the provisions of the Crown Lands Occupation Act of 1861, the Lands Acts Amendment Act, 1875, and regulations thereunder, I, John Jackson Thompson, do hereby apply to be allowed to lease the sections or portion of Crown Lands hereunder described, at the fixed rent of £2 per section, which I hereby tender.

The land in virtue of which I claim to exercise a right of pre-emption is situated as follows, and is now in my possession, viz.:—County of Arrawatta, parish of Bukkulla, situated on the Macintyre River, containing 640 acres, being conditional purchases on the 3rd and 17th days of May, 1877, by John Jackson Thompson, at Inverell.

I am, &c.,

J. J. THOMPSON.

To the Land Agent for the District of Inverell.

Description of the sections or portion applied for.

1,920 acres; starting from the north-east corner of the above conditional purchase back to the Ashford road, thence north along said road.

Minute on No. 10.

1,920 acres, gazetted 27 November, 1877. Charted 1,920 acres, Inverell.—A.G., 4/2/79.

No. 11.

Gazette Notice.

Department of Lands, Sydney, 27 November, 1877.

Approved Claims to Pre-emptive Leases.

It is hereby notified, for general information, that the claims of the undermentioned parties to leases of Crown Lands adjoining their respective freeholds have been approved, pursuant to the Regulations of 27th August, 1875, but subject to such modifications or amendments as may, on further examination, be found to be necessary.

2. Such leases will entitle the lessees to occupy Crown Lands within the limits indicated by the said regulations (extract from which is hereto appended for more convenient reference), or so much thereof as may be open to and not already under lease by pre-emptive right, and may not be exempted from conditional purchase in virtue of improvements, or notified as a reserve.

3. The rent, as hereunder specified, will be for the period from 1st July to 31st December, 1877, and must in each case be paid in full before the lease will have effect. Credit will be allowed for the amounts already paid on deposit of the applications.

4. The leases will be renewable on the ordinary terms by payment of the rent for the ensuing year, between 1st and 30th September.

5. Unless and until other boundaries shall be determined by the authority of the Minister for Lands the boundaries of lands hereafter leased by pre-emptive right shall be held to be as follows:—

- I. Where the purchased land is taken or measured without frontage to any river, creek, road, or intended road, the pre-emptive leasehold shall surround such purchased land, and shall be bounded by lines parallel to the boundaries thereof, and of length equal to twice the length of the sides to which they are respectively parallel and equidistant therefrom.
- II. When the purchased land has any such frontage the pre-emptive leasehold shall surround such purchased land on all sides other than the frontage, and shall be bounded by lines parallel to the boundaries thereof, and the side lines shall be distant respectively from the side lines of the purchased land by one-quarter the breadth of such land, and the back line shall be distant from the back line of such land by the space which would include three times the area thereof.

E. A. BAKER.

No. 12.

The Under Secretary for Lands to Mr. Frederick W. Wright.

Sir,

Department of Lands, Sydney, 23 January, 1878.

I am directed to inform you that pre-emptive lease No. 77-111 of 429 acres, in the district of Warialda, notified in the Government Gazette of the 27th November, 1877, as approved in your favour, has been granted in satisfaction of your application of the 19th June, 1877, for a corresponding area.

The annual rent will be £1 6s. 10d., but, as will be understood from the Gazette notice, only half this amount is required for the tenure of the lease up to the end of the current year. This latter sum is covered by the money, £1 6s. 10d., deposited at the time of application; and the amount, 13s. 5d., paid in excess, has, having regard to the date of approval, been retained as part payment of the rent for the ensuing year. The sum due for renewal, 13s. 5d., must be paid on or before the 27th instant.

For each succeeding year the rent must be paid during the month of September of the year preceding; or, if tendered after this date, must be paid, with the incurred penalty, on or prior to the 31st December.

From the last section of the 12th clause of the Crown Lands Occupation Act it will be seen that, should any part of your lease be absorbed by conditional purchases or other alienations, no other land can be allowed in place of it, and that the remaining area can be held only on payment of the rent charged for the lease as originally granted.

As you will be expected when writing to this Department to state the number of the lease, its area, and the date of notification of approval in the Government Gazette, you will find it expedient to carefully preserve this letter on account of its containing the information required.

I have, &c.,

C. A. BROWN,
(For the Under Secretary).

No. 13.

The Under Secretary for Lands to The Crown Lands Agent, Warialda.

Sir,

Department of Lands, Sydney, 23 January, 1878.

I am directed to invite your attention to the list of approximate claims to pre-emptive leases published in the Government Gazette of the 27th November, 1877, and to request you will be good enough to report to this Department all payments of rent made in common therewith.

Tracings of these leases will be forwarded to you as soon as the conditional purchases have been surveyed and charted on the office maps.

I have, &c.,

C. A. BROWN,
(For the Under Secretary).

No. 14.

The Under Secretary for Lands to Mr. J. J. Thompson.

Sir,

Department of Lands, Sydney, 23 January, 1878.

I am directed to inform you that pre-emptive lease No. 77-34, of 1,920 acres, in the district of Inverell, notified in the Government Gazette of the 27th November, 1877, as approved in your favour, has been granted in satisfaction of your application of the 29th September, 1877, for a corresponding area.

The annual rent will be £6, but, as will be understood from the Gazette notice, only half this amount is required for the tenure of the lease up to the end of the current year. This latter sum is covered by the money (£3) deposited at the time of application. The sum due for renewal (£6) must be paid on or before the 27th instant.

For each succeeding year the rent must be paid during the month of September of the year preceding; or, if tendered after this date, must be paid, with the incurred penalty, on or prior to the 31st December.

From the last section of the 12th clause of the Crown Lands Occupation Act it will be seen that, should any part of your lease be absorbed by conditional purchases or other alienations, no other land can be allowed in place of it, and that the remaining area can be held only on payment of the rent charged for the lease as originally granted.

As you will be expected when writing to this Department to state the number of the lease, its area, and the date of notification of approval in the Government Gazette, you will find it expedient to carefully preserve this letter on account of its containing the information required.

Memorandum by Surveyor-General.

Charting Branch.

MEMORANDUM of subjects requiring explanation or completion in connection with the survey and plan of portion No. 82, transmitted by Mr. Licensed Surveyor Macharg, parish of Bukkulla, county of Arrawatta, letter No. 77-47, of 10th September, and on which Macharg's report in explanation is requested.

Subject.

ATTENTION is drawn to paragraph 45 of Surveyors' Instructions. On the plan of the above portion the off-sets to creek scale as much as 300 links, although the paragraph quoted states that the off-sets must not exceed 150 links.

Mr. Macharg's attention has been frequently called to this matter. He is cautioned to be more careful in the future.

13/4/78.

P.F.A.

Off-sets should be supplied where the river is more than 150 links from the traverse.

13/5/78.

P.F.A.

Report.

I AM sorry the Charting Branch should have considered it necessary to caution me on this subject. I always take great care to comply with paragraph 45, except in occasional instances where the traverse of a minute bend would evidence for the correctness of the work.

No. 18.

Notification by John Jackson Thompson.

K.

[Alienation Act, section 13.]

Notification of alienation of conditional purchase by John Jackson Thompson, in the district of Inverell. I HEREBY notify to you, as the Agent for the Sale of Crown Lands for the district of Inverell, that I have, after a residence thereon of at least twelve months, this day alienated to William Thompson, of Bukkulla, the 560 acres of land situated in the county of Arrawatta, parish of Bukkulla, which I selected at Inverell, as a conditional purchase, under the 13th section of the Crown Lands Alienation Act of 1861, on the 3rd May, 1877, as also the following additional purchase:—80 acres, 17th May, 1877.

Dated at Inverell, this 19th December, 1878.

J. J. THOMPSON,

Bukkulla.

To the Agent for the Sale of Crown Lands at Inverell.

I have duly registered the above notification of alienation in the records of this office.

Land Office, Inverell, 19 December, 1878.

W. CLARE CARDEW,
Agent for the Sale of Crown Lands.

Minutes on No. 18.

Mr. Armstrong,—How is it that the plan shows the conditional purchase survey to be within the Warialda Police District, and the application states Inverell. If it is in the Warialda District, the attention should have been drawn of the Chief Commissioner, with a view of having it altered. It is now a law case, and they are about to compromise it in consequence of the wrong Police District being given in the application.—T.H.L., 17/2/79.

Mr. Neate,—Conditional purchase 77-58 and conditional purchase 77-80 should have been taken up at Warialda, not Inverell.—W. D. ARMSTRONG, 17/2/79. Mr. Lackey,—For alteration of districts.—F.H.W., 5/3/79. Mr. Croft,—Please make necessary alterations in register and return, please.—M.L. 6/3/79.

No. 19.

The Under Secretary for Lands to The Crown Lands Agent, Inverell.

Sir,

Department of Lands, Sydney, 8 February, 1879.

With reference to pre-emptive lease No. 77-34 of 1,920 acres, in the county of Arrawatta, parish of Bukkulla, in the name of J. J. Thompson, I am directed to transmit to you a tracing showing the approximate boundaries of the lease.

I have, &c.,

Sir,

Department of Lands, Sydney, 8 February, 1879.

With reference to pre-emptive lease No. 77-34, of 1,920 acres, in the county of Arrawatta, standing in the name of J. J. Thompson, I am directed to inform you that a tracing has this day been forwarded to the Crown Lands Agent.

I have, &c.,

C. A. BROWN,

(For the Under Secretary).

No. 21.

Gazette Notice.

Approved claims to Pre-emptive Leases.

Department of Lands, Sydney, 11 February, 1879.

It is hereby notified for general information that the claims of the undermentioned parties to leases of Crown Lands adjoining their respective freeholds have been approved, pursuant to the Regulations of 27 August, 1875, but subject to such modifications or amendments as may, on further examination, be found to be necessary.

2. Such leases will entitle the lessees to occupy Crown Lands within the limits indicated by the said Regulations (extract from which is hereto appended for more convenient reference), or so much thereof as may be open to and not already under lease by pre-emptive right, and may not be exempted from conditional purchase in virtue of improvements or notified as a reserve.

3. The rent, as hereunder specified, will be for the period from 1 January to 31 December, 1879, and must in each case be paid in full before the lease will have effect. Credit will be allowed for the amounts already paid on deposit of the applications.

4. The leases will be renewable on the ordinary terms by payment of the rent for the ensuing year between 1st and 30th September.

JAMES HOSKINS.

Extract referred to.

5. Unless and until other boundaries shall be determined by the authority of the Minister for Lands the boundaries of lands hereafter leased by pre-emptive right shall be held to be as follows:—

(1.) When the purchased land is taken or measured without frontage to any river, creek, road, or intended road, the pre-emptive leasehold shall surround such purchased land, and shall be bounded by lines parallel to the boundaries thereof, and of length equal to twice the length of the sides to which they are respectively parallel and equidistant therefrom.

(2.) When the purchased land has any such frontage the pre-emptive leasehold shall surround such purchased land on all sides other than the frontage, and shall be bounded by lines parallel to the boundaries thereof, and the side lines shall be distant respectively from the side lines of the purchased land by one-quarter the breadth of such land, and the back line shall be distant from the back line of such land by a space which includes three times the area thereof.

No. 22.

Mr. H. J. Withers to The Chief Commissioner.

Sir,

79, New Pitt-street, 19 February, 1879.

William Thompson, 560 acres, Inverell, No. 77-58, 13th clause, 80 acres additional conditional purchase, No. 77-80.

On behalf of Mr. Thompson, I do myself the honor to submit the following, and to request that the voucher for refund of deposit may be made at once, my client only waiting to receive it to re-apply for the land at the proper office. As noted in margin, my client selected 640 acres at the Inverell Lands Office. The plan has been accepted by the Survey Office and charted on the county map. A pre-lease was gazetted in his favour, and the Minister has given his final approval. A tracing of it is now at the Inverell Land Office. My client never occupied the pre-lease until it was charted; he then put sheep on it, and the lessee then commenced an action for trespass, damages £500. The case was tried yesterday in the Supreme Court, and my client, for £2, on the advice of his counsel, Sir George Innes, accepted a nominal verdict, for the following reasons:—

1st. That the conditional purchase having been taken up at Inverell, instead of at Warialda, was bad, and that he had, in law, no claim to the land.

2nd. The pre-lease applied for in virtue of the conditional purchase was void, the conditional purchase being illegal. I respectfully ask that instructions may be given for the voucher to be made out at once, so that my client can proceed to Warialda, the right office, and re-select the land on the 27th instant.

The lessee can institute another action against my client unless he can get a better title.

I have, &c.,

H. J. WITHERS.

Minutes on above.

Portion No. 82, parish of Bukkulla, 560 acres, conditional purchase 77-58, J. J. Thompson, and portion No. 83, parish of Bukkulla, 80 acres, additional conditional purchase 77-80, J. J. Thompson, are in the Land District of Warialda. They were taken up in error in the Land District of Inverell.—W.D. ARMSTRONG, No. 14, Charting Branch, 20/2/79.

By Chief Commissioner:—For cancellation.—A.O.M., 20/2/79. Papers sent to Mr. Neate.—W.D.A., 4/3/79. Transferred from Inverell to Warialda.—H.C., 29/3/79.

Mr. Croft,—The selections appear to have been declared void, as the papers have been in Charting Branch to note. They may now, I think, be put away.—M.L.

No. 29.

Application by John Jackson Thompson.

District of Warialda. C. [Alienation Act, section 13.]
Application by John Jackson Thompson, for the conditional purchase, without competition, of
640 acres unimproved Crown Land.

Received by me, with a deposit of £160, this 6th day of March, 1879, at 10 o'clock,—

F. CAMERON MACARTHUR,
Agent for the Sale of Crown Lands at Warialda.

Sir,

6 March, 1879.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 640 acres; and I herewith tender the sum of £160, being a deposit at the rate of 5s. per acre on the area for which I apply.

I am, &c.,

JOHN JACKSON THOMPSON,

To the Agent for the Sale of Crown Lands at Warialda.

Bukkulla, Inverell.

Description.

County of Arrawatta, parish of Bukkulla, 640 acres, portions Nos. 82 and 83: Commencing at a point on the north bank of the Macintyre River, where the portion No. 82, as surveyed, touches that river; thence by a line north, which forms the eastern boundary of Nos. 82 and 83; thence by a line west, which forms the northern boundary of portion No. 83; to the river southerly and easterly, to the point of commencement.

No. 30.

Application by John Jackson Thompson.

M.

District of Warialda. [Occupation Act, 1861, Lands Acts Amendment Act, 1875.]

Received this 7th day of March, 1879, at 10 o'clock, together with the sum of £6.

F. CAMERON MACARTHUR,

Land Agent.

Sir,

Bukkulla, Inverell, 7 March, 1879.

In pursuance of the provisions of the Crown Lands Occupation Act of 1861, the Lands Acts Amendment Act, 1875, and Regulations thereunder, I, J. J. Thompson, do hereby apply to be allowed to lease the sections or portion of Crown Lands hereunder described, at the fixed rent of £2 per section, which I hereby tender.

The land in virtue of which I claim to exercise a right of pre-emption is situated as follows, and is now in my possession, viz:—County of Arrawatta, parish of Bukkulla, situated on Macintyre River, containing 640 acres, being conditional purchase, on the 6th day of March, 1879, by me, at Warialda.

I am, &c.,

J. J. THOMPSON.

To the Land Agent for the District of Warialda.

Description.

1,920 acres pre-lease. Commencing on the eastern boundary of my conditional purchase, and running north along portions Nos. 79, 78, 78; thence west to river Macintyre; thence north; thence east to travelling stock reserve; thence by that reserve round portion No. 28, to point of commencement,—and if not here available, then adjoining my conditional purchase on opposite sides.

Minutes on No. 30.

79/28, 640 acres, correct in applicant's name.—W.T., 30/6/82.

1,920 acres, gazetted 23 May, 1879. Charted 1,920 acres, Warialda.—A.G., 19/7/79.

Mr. Brown,—This application should now be cancelled, as it is found that a conditional purchase of A. M'Donald, 76/33, cuts applicant off from the pre-lease applied for, and there is no other available land. M'Donald's conditional purchase is not yet charted on the office maps, and consequently, at the time of dealing with this and J. J. Thompson's former application, its existence was not known.—A.G., 20/8/79.

1,920 acres, now charted on map.—A.G., 24/2/79.

No. 31.

Mr. H. J. Withers to The Under Secretary for Lands.

Sir,

79, New Pitt-street, 25 March, 1879.

On behalf of J. J. Thompson, I do myself the honor to request that the sum of £450 may be placed on the Additional Estimates to compensate him for expenses in a lawsuit, Wyndham v. Thompson, for trespass on a pre-emptive lease granted by the Lands Department to my client. The facts are as follow:—

Thompson made application for 640 acres of land, under the 13th clause of the Land Act, at the local Land Office, Inverell, at the same time he applied for a pre-lease in virtue thereof. The applications were sent to Sydney, and finally dealt with both by the Conditional Sales and Charting Branches, and my client was informed that he was entitled to 1,920 acres as a pre-lease; the approval was given by the Minister, and a tracing was sent down to the Inverell Lands Office for my client and the public to see the boundaries. Thompson never occupied the pre-lease until the final approval was given, and I obtained a tracing with the length of each line marked thereon. He then marked them out upon the ground, and

Inverell, 77-58,
77-53, 660 acres
and 80 acres,
parish Bukkulla,
county Arra-
watta.

Pre-lease 34 of
1877, 1,920 acres.

went

13

went into occupation by placing some sheep thereon; then the lessee commenced an action against Thompson for £1,000 damages, and obtained a verdict. My client's law expenses, &c., amounted to over the sum now claimed. I respectfully submit that the Charting Branch should never have passed this conditional purchase without getting it transferred from the Inverell Office to the Warialda, the land being just within the police district of the latter. This conditional purchase was passed as correct, my client resided on the land, and now, after two years, he finds himself in the Supreme Court with a debt of £450, through an error made by the Department in granting a pre-lease and representing it as correct, taking rent every year, and thus leading Thompson into the position in which he now stands.

My client is a hard-working farmer, and unless something is done at once ruin will and must come, and caused, not by himself, but by the Government.

I have, &c.,
HENRY J. WITHERS.

Minutes on No. 31.

It has always been the practice of the Department to grant a pre-lease in the district in which the conditional purchase application was made, and to furnish tracings accordingly, which was, as usual, done in this case.

In this instance the conditional purchase appears to have been applied for in the wrong district, and being therefore invalid the pre-lease is of course void.—A.G., 10/4/79.

Conditional Sales Branch,—With respect to the conditional purchase.—C.A.B., 17/4/79.

By Chief Commissioner:—Enclose conditional papers. Urgent.—A.O.M., 17/4/79.

The conditional purchase has already been cancelled at the instance of the applicant's agent. The present matter is a claim for compensation for erroneous action as to the issue of the lease, and is for the attention of the Under Secretary, to whom it is returned.—A.O.M., 19/4/79.

By Under Secretary for Lands:—Immediate. Submitted as to whether the amount is to be placed on the Additional Estimates.—W.W.S., 20/4/79.

By Secretary for Lands:—I am of opinion that before this application can be entertained this Department must be furnished by the applicant with a certified copy of the information laid in the Supreme Court by the plaintiff in the case, together with the evidence given, as well as the verdict of the Jury, and a certified copy of the costs paid by each side, and whether such costs have been taxed.—J.H., 28/4/79.

No. 32.

Mr. E. S. Wyndham to The Under Secretary for Lands.

Sir,

Karoola, Inverell, 14 April, 1879.

Having been informed that an application for a pre-emptive lease has been made by John J. Thompson, in virtue of his conditional purchase of 640 acres, lately made at Warialda, being portions 82 and 83, in the parish of Bukkulla, county of Arrawatta, and that such pre-lease has been applied for to extend over the Macintyre River, opposite the conditional purchase in question, I beg to point out that the land in question has been applied for by me as a pre-lease in virtue of my conditional purchase, being Nos. 31 and 32, parish Wyndham, and gazetted as approved on 11th February, 1879.

I have, &c.,

EDWARD S. WYNDHAM.

No. 33.

Mr. E. S. Wyndham to The Under Secretary for Lands.

Sir,

Karoola, Inverell, 14 April, 1879.

Referring to my application for a pre-emptive lease, gazetted as approved in Gazette of 11th February, and numbered 79-4, district of Inverell, I beg to point out that the land is not available in the ordinary form, and to request that the form of the pre-lease may be amended so as to include the land described in the application being on the opposite side of Waterford's Creek.

I have, &c.,

EDWARD S. WYNDHAM.

Minutes on above.

The pre-lease granted to J. J. Thompson, in virtue of portions Nos. 82 and 83, is No. 34 of 1877, and not the one attached; it does not interfere with Wyndham's pre-lease. Wyndham's pre-lease is now charted.—A.G., 7/6/79.

Mr. Gall,—Application for lease 34 of 1877 now attached. Is the land available?—C.A.B., 15/7/79. The pre-lease applied for by J. J. Thompson, in his late application 48 of 1879, is available, and will not interfere with Wyndham's application 4 of 1879.—A.G., 19/7/79.

No. 34.

The Under Secretary for Lands to Mr. H. J. Withers.

Sir,

Department of Lands, Sydney, 13 May, 1879.

In reply to your letter of the 25th March last, applying, on behalf of Mr. J. J. Thompson, for compensation from the Government for erroneous action on their part with respect to a pre-emptive lease granted to the said J. J. Thompson, in the wrong district, and thereby subjecting him to an action in the Supreme Court, which he lost, I am directed to inform you that the Minister is of opinion that before your application can be entertained you shall furnish a certified copy of the information laid by the plaintiff, together with the evidence and verdict, and a certified copy of costs paid by each, stating whether taxed or not.

I have, &c.,

W. W. STEPHEN,
Under Secretary.

No. 35.

No. 35.
Gazette Notice.

Department of Lands, Sydney, 23 May, 1879.

Approved Claims to Pre-emptive Leases.

It is hereby notified for general information that the claims of the undermentioned parties to leases of Crown Lands adjoining their respective freeholds have been approved, pursuant to the Regulations of 27th August, 1875, but subject to such modifications or amendments as may, on further examination, be found to be necessary.

2. Such leases will entitle the lessees to occupy Crown Lands within the limits indicated by the said regulations (extract from which is hereto appended for more convenient reference), or so much thereof as may be open to, and not already under, lease by pre-emptive right, and may not be exempted from conditional purchase in virtue of improvements or notified as a reserve.

3. The rent, as hereunder specified, will be for the period from 1st January to 31st December, 1879, and must in each case be paid in full before the lease will have effect; credit will be allowed for the amounts already paid on deposit of the applications.

4. The leases will be renewable on the ordinary terms by payment of the rent for the ensuing year between 1st and 30th September.

JAMES HOSKINS.

5. Unless and until other boundaries shall be determined by the authority of the Minister for Lands, the boundaries of lands hereafter leased by pre-emptive right shall be held to be as follows:—

(1.) When the purchased land is taken or measured without frontage to any river, creek, road, or intended road, the pre-emptive leasehold shall surround such purchased land, and shall be bounded by lines parallel to the boundaries thereof, and of length equal to twice the length of the sides to which they are respectively parallel, and equidistant therefrom.

(2.) When the purchased land has any such frontage the pre-emptive leasehold shall surround such purchased land on all sides, other than the frontage, and shall be bounded by lines parallel to the boundaries thereof, and the side lines shall be distant respectively from the side lines of the purchased land by one-quarter the breadth of such land, and the back line shall be distant from the back line of such land by the space which would include three times the area thereof.

No. 36.

Application by Mr. J. Graham.

M.

[Occupation Act, 1861, Lands Acts Amendment Act, 1875.]

To be used in Claiming to Lease adjoining Lands under Pre-emptive Right.

District of Inverell.

Received this 29th day of May, 1879, at 10 o'clock, together with the sum of one pound.

W. CLARE CARDEW,
Land Agent.

Sir,

Karoola, Inverell, 29 May, 1879.

In pursuance of the provisions of the Crown Lands Occupation Act of 1861, the Lands Acts Amendment Act, 1875, and Regulations thereunder, I, John Graham, do hereby apply to be allowed to lease the sections or portion of Crown Lands hereunder described, at the fixed rent of £2 per section, which I hereby tender.

The land in virtue of which I claim to exercise a right of pre-emption is situated as follows, and is now in my possession, viz:—County of Arrawatta, parish of Bukkulla, situated on the right bank of the Macintyre River, containing 80 acres, being conditional purchase, on the 20th day of September, 1877, by John Asimus, at Inverell.

I am, &c.,

JOHN GRAHAM,
(Per P. P. WRIGHT).

To the Land Agent for the District of Inverell,

Description of the Sections or Portion applied for.

240 acres, adjoining on the east the above conditional purchase, No. 81 of 80 acres.

Minute on No. 36.

240 acres, gazetted 15th July, 1879. Objectionable, there being no available land.—A.G., 11/10/79

No. 37.

Application by Messrs. E. S. Wyndham and P. P. Wright.

M.

[Occupation Act, 1861, Lands Acts Amendment Act, 1875.]

To be used in Claiming to Lease adjoining Lands under Pre-emptive Right.

District of Warialda.

Received this 19th day of June, 1879, at 10 o'clock, together with the sum of one pound (£1).

F. CAMERON MACARTHUR,
Land Agent.

Sir,

15

Sir,

Inverell, 12 June, 1879.

In pursuance of the provisions of the Crown Lands Occupation Act of 1861, the Lands Acts Amendment Act, 1875, and Regulations thereunder, we, E. S. Wyndham and P. P. Wright, do hereby apply to be allowed to lease the sections or portion of Crown Lands hereunder described, at the fixed rent of £2 per section, which we hereby tender.

The land in virtue of which we claim to exercise a right of pre-emption is situated as follows, and is now in our possession, viz.:—

County of Arrawatta, parish of Arthur's Seat, having frontage to travelling stock reserve No. 337, containing 86 acres, being selection on the 7th day of January, 1878, by E. S. Wyndham and P. P. Wright, at Warialda.

I am, &c.,

PERCY P. WRIGHT,

(For Wyndham & Wright).

To the Land Agent for the District of Warialda.

Description.

258 acres of Crown Lands, lying to the west and north of and adjoining our portion No. 27 of 86 acres, all in the parish of Arthur's Seat, county of Arrawatta.

Minutes on No. 37.

258 acres, gazetted 16 December, 1879. This case to stand over until J. J. Thompson's pre-lease 48 of 79, Warialda, has been finally decided.—J.T., 5/3/80. Thompson's case not settled.—H.M., 16/4/80.

No. 38.

Gazette Notice.

Department of Lands, Sydney, 15 July, 1879.

Approved claims to Pre-emptive Leases.

It is hereby notified for general information that the claims of the undermentioned parties to leases of Crown Lands adjoining their respective freeholds have been approved, pursuant to the regulations of 27 August, 1875, but subject to such modifications or amendments as may, on further examination, be found to be necessary.

2. Such leases will entitle the lessees to occupy Crown Lands within the limits indicated by the said regulations (extract from which is hereto appended for more convenient reference), or so much thereof as may be open to, and not already under, lease by pre-emptive right, and may not be exempted from conditional purchase in virtue of improvements, or notified as a reserve.

3. The rent, as hereunder specified, will be for the period from 1st July to 31st December, 1879, and must in each case be paid in full before the lease will have effect. Credit will be allowed for the amounts already paid on deposit of the applications.

4. The leases will be renewable on the ordinary terms by payment of the rent for the ensuing year between 1st and 30th September.

JAMES HOSKINS.

(For the Under Secretary).

No. 40.

The Under Secretary for Lands to Mr. J. J. Thompson.

Sir,

Department of Lands, Sydney, 30 July, 1879.

With reference to pre-emptive lease No. 79/48 of 1,920 acres, in the county of Arrawatta, parish of Bukkulla, in the name of J. J. Thompson, I am directed to inform you that a tracing of the approximate position of the lease has this day been forwarded to the agent for inspection.

I have, &c.,

C. A. BROWN,

(For the Under Secretary).

No. 41.

No. 41.

The Under Secretary for Lands to The Crown Lands Agent, Inverell.

Sir,

Department of Lands, Sydney, 30 July, 1879.

I am directed to invite your attention to the list of approximate claims to the pre-emptive leases published in the Government Gazette of the 15th instant, and to request you will be good enough to report to this Department all payments of rent made in common therewith.

Tracings of these leases will be forwarded to you as soon as the conditional purchases have been surveyed and charted on the office maps.

I have, &c.,

C. A. BROWN,

(For the Under Secretary).

No. 42.

The Under Secretary for Lands to Mr. John Graham.

Sir,

Department of Lands, Sydney, 30 July, 1879.

I am directed to inform you that pre-emptive lease No. 79/20, of 240 acres, in the district of Inverell, notified in the Government Gazette of the 15th instant as approved in your favour, has been granted in satisfaction of your application of the 29th May, 1879 for a corresponding area.

The annual rent will be £1, but, as will be understood from the Gazette notice, only half this amount is required for the tenure of the lease up to the end of the current year. This latter sum is covered by the money, £1, deposited at the time of application; and the amount, 10s., paid in excess has, having regard to the date of approval, been retained as part payment of the rent for the ensuing year. The sum due for renewal, 10s., must be paid on or before the 15th September next.

For each succeeding year the rent must be paid during the month of September of the year preceding, or, if tendered after this date, must be paid, with the incurred penalty, on or prior to the 31st December.

From the last section of the 12th clause of the Crown Lands Occupation Act it will be seen that, should any part of your lease be absorbed by conditional purchases or other alienations, no other land can be allowed in place of it, and that the remaining area can be held only on payment of the rent charged for the lease as originally granted.

As you will be expected when writing to this Department to state the number of the lease, its area, and the date of notification of approval in the Government Gazette, you will find it expedient to carefully preserve this letter on account of its containing the information required.

I have, &c.,

C. A. BROWN,

(For the Under Secretary).

No. 43.

The Under Secretary for Lands to Mr. F. W. Wright.

Sir,

Department of Lands, Sydney, 19 August, 1879.

I am directed to inform you that the Colonial Treasurer has been authorized to refund to you the sum of £2 0s. 3d., being the rent paid on the pre-emptive lease noted in the margin for 1878 and 1879. The lease has been cancelled, the land applied for being already under lease.

2. I am to add that when the money is ready for payment notice to that effect will be forwarded to you from the Treasury.

Gazette Notice.

Department of Lands, Sydney, 16 December, 1879.

Claims to Pre-emptive Leases.

It is hereby notified for general information that the claims of the undermentioned parties to leases of Crown Lands adjoining their respective freeholds have been approved, pursuant to the Regulations of 27th August, 1875, but subject to such modifications or amendments as may, on further examination, be found to be necessary.

2. Such leases will entitle the lessee to occupy Crown Lands within the limits indicated by the said Regulations (extract from which is hereto appended for more convenient reference), or so much thereof as may be open to, and not already under, lease by pre-emptive right, and may not be exempted from conditional purchase in virtue of improvements, or notified as a reserve.

3. The rent, as hereunder specified, will be for the period from the 1st July to the 31st December, 1879. Credit will be allowed for the amounts already paid on deposit of the applications.

4. The rents for the year 1880 must be paid within two months from the date of this notice.

5. The leases will thereafter be renewable, on the ordinary terms, by payment of the rent for each ensuing year, between 1st and 30th September.

JAMES HOSKINS.

5. Unless and until other boundaries shall be determined by the authority of the Minister for Lands the boundaries of lands hereafter leased by pre-emptive right shall be held to be as follows:—

(1.) When the purchased land is taken or measured without frontage to any river, creek, road, or intended road, the pre-emptive leasehold shall surround such purchased land, and shall be bounded by lines parallel to the boundaries thereof, and of length equal to twice the length of the sides to which they are respectively parallel, and equidistant therefrom.

(2.) When the purchased land has any such frontage the pre-emptive leasehold shall surround such purchased land on all sides other than the frontage, and shall be bounded by lines parallel to the boundaries thereof; and the side lines shall be distant respectively from the side lines of the purchased land by one-quarter the breadth of such land, and the back line shall be distant from the back line of such land by the space which would include three times the area of thereof.

No. 59.

The Under Secretary for Lands to The Crown Lands Agent, Wairalda.

Sir,

Department of Lands, Sydney, December, 1879.

I am directed to invite your attention to the list of approximate claims to pre-emptive leases published in the Government Gazette of the 16th instant, and to request you will be good enough to report to this Department all payments of rent made in common therewith.

Tracings of these leases will be forwarded to you as soon as the conditional purchases have been surveyed and charted on the office maps.

I have, &c.,

C. A. BROWN,

(For the Under Secretary).

No. 60.

No. 60.

The Under Secretary for Lands to Messrs. E. S. Wyndham and F. J. Wright.

Gentlemen,

Department of Lands, Sydney, December, 1879.

I am directed to inform you that pre-emptive lease No. 79-100, of 258 acres, in the district of Warialda, notified in the Government Gazette of the 16th instant as approved in your favour, has been granted in satisfaction of your application of the 19th June, 1879, for a corresponding area.

The annual rent will be £1, but, as will be understood from the Gazette notice, only half this amount is required for the tenure of the lease up to the end of the current year. This latter sum is covered by the money, £1, deposited at the time of application; and the amount, 10s., paid in excess has, having regard to the date of approval, been retained as part payment of the rent for the ensuing year. The sum due for renewal, 10s., must be paid on or before the 16th February, 1880.

For each succeeding year the rent must be paid during the month of September of the year preceding; or, if tendered after this date, must be paid, with the incurred penalty, on or prior to the 31st December.

From the last section of the 12th clause of the Crown Lands Occupation Act it will be seen that, should any part of your lease be absorbed by conditional purchases or other alienations, no other land can be allowed in place of it, and that the remaining area can be held only on payment of the rent charged for the lease as originally granted.

As you will be expected when writing to this Department to state the number of the lease, its area, and the date of notification of approval in the Government Gazette, you will find it expedient to carefully preserve this letter on account of its containing the information required.

I have, &c.,

C. A. BROWN,

(For the Under Secretary).

No. 61.

Memorandum by Auditor-General.

Wright's Lease 77-11.

7 February, 1880.

WITH reference to the Lands Department blank cover of 15th December last, the Under Secretary for Lands is informed that the refund voucher has been noted as cancelled, and returned to Lands Department on 10th December last.

The case is therefore settled, and these papers are returned for deposit to the Under Secretary for Lands.

C. ROLLESTON.

No. 62.

Mr. H. J. Withers to The Under Secretary for Lands.

Sir,

83, New Pitt-street, 5 January, 1881.

I respectfully request that the pre-lease applied for by J. J. Thompson, at Warialda, and situated in county Arrawatta, may be at once dealt with. My client is very anxious to make use of the ground.

I have, &c.,

HENRY J. WITHERS.

Minutes on No. 62.

Papers herewith dealt with in Charting Branch.—T.F.C., 5 January, 1881.

J. J. Thompson's pre-lease, 480-79, was cancelled on 15th October, 1879, owing to his C.P. being cut off from vacant land by Mr. A. McDonald's conditional purchase 76-33 (*vide* L.A. 79-603). Objection was raised to the cancellation on the grounds that McDonald's conditional purchase was not measured according to description, and that if correctly measured the conditional purchase would not adjoin. It has, however, been decided that McDonald's conditional purchase shall stand as measured, with a road of access left for portion No. 82, as Thompson's conditional purchase does not adjoin vacant land excepting the said road. It is submitted as to whether a pre-lease can be granted. A tracing is herewith attached showing portion of conditional purchases referred to.—A.G., 14/1/81.

The vacant land does not adjoin J. J. Thompson's conditional purchase, unless the road of access between No. 104 and Nos. 83 and 84 is included within the lease submitted for decision.—F.H.W., 17/1/81.

By Under Secretary for Lands:—The decision finally settling this case was given by the Minister, which determined the position of McDonald's conditional purchase. If the pre-lease is now granted it will have the effect of granting a lease connected with the holding, in virtue of which it is applied for, by an existing road.—C.O., 23/1/84.

By the Secretary for Lands:—I wish to be furnished with a tracing showing the exact position of the land applied to be pre-leased by Thompson, as I cannot make out by this tracing, nor by his application, what land he sought to obtain on pre-lease.—J.H., 25/1/81.

By the Under Secretary for Lands:—Amended tracing herewith.—C.O., 29/1/81.

By the Secretary for Lands:—I wish to be informed which is the date when the application was made for the conditional purchase of 76-33, as well as the date when the application was made for Thompson's pre-lease.—J.H., 2/2/81.

Conditional purchase 76-33 applied for on 13th April, 1876. Thompson's pre-lease application dated 7th March, 1879.—F.H.W., 7/2/81.

By the Under Secretary for Lands:—Amended tracing herewith.—C.O., 8/2/81.

No. 63.

Gazette Notice.

Department of Lands, Sydney, 28 January, 1881.

Land Office Districts.

HIS Excellency the Governor, in Council, pursuant to the Lands Act Amendment Act, 1875, has been pleased to alter and vary the limits and areas of the Land Districts of Inverell and Warialda, as set forth in the amended descriptions of such districts hereto appended. This notification to take effect on and after the 17th proximo.

JAMES HOSKINS.

Land

Land District of Inverell.

Embracing part of the pastoral district of New England and Gwydir; and bounded on the east from the northern watershed of the Severn River by a line forming the northerly prolongation of the western boundary of H. Gordon's 160 acres at Strathbogie, and that boundary bearing south to the Severn River; and thence by a line bearing south to the eastern watershed of Arrawatta Creek; thence by the range dividing the waters falling to that creek, King's Plains Creek, Swan Brook, and the Macintyre River from those falling to Cameron's Creek, Wellingrove Creek, and the Beardy Waters, tributaries of the Severn River, southerly to the northern watershed of Clark's Creek; thence by the boundary dividing the counties of Gough and Clarke from the county of Hardinge southerly to the head of George's Creek at a point easterly from the north-east corner of portion No. 44, parish of Everett, county of Hardinge; on the south by George's Creek downwards to the north-east corner of portion No. 73-2 on that creek, parish of Abington; and thence by the boundary dividing the parishes of Abington and Laura, bearing southerly to Barlow or Abington Creek, at the south-western corner of W. H. and G. P. Morse's 320 acres, portion 2-67, at Abington; and thence by that creek downwards to the Gwydir or Bundarra River; thence by that river downwards to King John's Creek; and by that creek upwards to the boundary line dividing the parishes of Darbysleigh and Cameron, at a point about 34 chains southerly from the south boundary of portion No. 32, parish of Darbysleigh; thence by the boundary dividing those parishes bearing west to Baker's Creek, at about 4 chains south from the south-eastern corner of portion No. 12, parish of Drummond; thence by Baker's Creek upwards about 1 mile and 24 chains from the south-east corner of portion No. 12 aforesaid; and thence by the boundary dividing the parishes of Drummond and Cameron, as shown on the map of the county of Hardinge, bearing west to the boundary dividing the counties of Darling and Hardinge; and thence by that boundary northerly to the boundary dividing the counties of Darling and Murchison; and thence by that boundary westerly to a point northerly of the Woolshed Station, on Woolshed Creek, parish of Ironbark, county of Darling; thence on the west by a tributary of Three-waterhole Creek, a tributary of Middle Creek, county of Murchison, northerly to Middle Creek; and by Middle Creek to Reedy Creek, by that creek to Keera Creek, and by that creek downwards to the Gwydir River; and thence by that river upwards to tributary of that river, shown on the map of the county of Murchison, dividing the parishes of Evans and Dingo; thence by the boundary dividing the parishes of Dingo and Stag and Turrawarra from Evans, Durham, and Delungra, as shown on the map of the county of Murchison, northerly to the boundary dividing the counties of Murchison and Burnett, at a point about $\frac{1}{4}$ of a mile west from the north-west corner of portion No. 142, parish of Turrawarra; thence by that boundary easterly to the south-west corner of portion No. 56, parish of Burnett, county of Burnett; thence by the boundary dividing the parishes of Burnett and Gunnee bearing north to Warialda or Reedy Creek; and thence by that creek downwards to the south-west corner of portion 51 of that parish; and thence by the west boundary of that portion bearing north, crossing Boundary Creek, near the western boundary of portion No. 49 of the said parish; thence by that creek easterly and a line east to the south-west corner of portion No. 138, parish of Burnett; thence by the west boundary of that portion and portion No. 134, northerly, and by the southern boundaries of portions Nos. 135 and 136 westerly, and the western boundary of the latter portion northerly, and the northern boundaries of portions Nos. 136 and 135 aforesaid easterly, to the north-west corner of portion No. 134 of that parish; and thence by the boundaries dividing the parishes of Burnett and Gragin northerly to the north-west corner of portion No. 152, parish of Burnett, at the boundary dividing the counties of Burnett and Arrawatta; thence by that boundary westerly to the east boundary of portion of portion No. 52, parish of Graman, county of Arrawatta; thence by the east, the south, and the west boundaries of that portion southerly, westerly, and northerly to its north-west corner; and thence by the western boundaries of the parishes of Graman and Russell, county of Arrawatta, northerly to Cucumber Creek, to its confluence with the Severn River; and thence by the Macintyre River downwards to the boundary dividing the parishes of Severn and Mandoe, at about 1 mile and 45 chains in a direct line below the north-west corner of W. and J. Russell's portion No. 1-67, Eena Run, parish of Severn; thence by the boundary dividing the parishes of Severn and Mandoe bearing east, and the boundaries dividing the parishes of Mandoe, Meriti, Ellis, and Bora from the parishes of Rose, Hetherington, and Texas, as shown on the county map of Arrawatta, to the Dumaresq River, at a point about 1 mile below the north-west corner of P. Callachor's additional conditional portion No. 6, parish of Texas; and thence on the north by the Dumaresq River upwards to the western boundary of the pastoral district of New England; and thence by that boundary southerly to the northern watershed of the Severn River; and thence by that watershed easterly, to the point of commencement.

Land District of Warialda.

Embracing part of the pastoral district of Gwydir; and bounded on the west from the Macintyre River by the western boundary of portion of water reserve No. 895, notified 22nd September, 1879, Carbuckey Run, at Boogoo-you, county of Stapylton, bearing south, and the western and part of the southern boundaries of the parishes of Trinkey and Limebone, county of Stapylton, southerly and easterly to Cropper Creek, as shown on the map of that county at the Surveyor-General's Office, Sydney; and by Cropper Creek south-easterly to the boundary dividing the counties of Stapylton and Burnett; thence by the boundary dividing the counties of Stapylton and Courallie from the county of Burnett southerly to the northern boundary of the county of Murchison; and thence on the south by the boundary dividing the counties of Murchison and Burnett easterly to the boundary dividing the parishes Gunne and Burnett, county of Burnett, at the south-west corner of portion No. 56, parish of Burnett; thence on the east by that boundary bearing north to Warialda or Reedy Creek; thence by that creek downwards to the south-west corner of portion No. 51 of that parish; and thence by the west boundary of that portion bearing north crossing Boundary Creek, near the western boundary of portion No. 49 of the said parish; thence by that creek easterly and a line east to the south-west corner of portion No. 138, parish of Burnett; thence by the west boundary of that portion and portion No. 134 northerly, and by the southern boundaries of portions Nos. 135 and 136 westerly, and the western boundary of the latter portion northerly, and the northern boundaries of portions Nos. 136 and 135 aforesaid easterly, to the north-west corner of portion No. 134 of that parish; and thence by the boundary dividing the parishes of Burnett and Gragin northerly to the north-west corner of portion No. 152, parish of Burnett, at the boundary dividing the counties of Burnett and Arrawatta; thence by that boundary westerly to the east boundary

boundary of portion No. 52, parish of Graman, county of Arrawatta; thence by the east, the south, and the west boundaries of that portion southerly, westerly, and northerly to its north-west corner; thence by the western boundaries of the parishes of Graman and Russell, county of Arrawatta, northerly to Cucumber Creek; and thence by Cucumber Creek downwards to its confluence with the Severn River; and thence by the Macintyre River downwards to the boundary dividing the parishes of Severn and Mandoe, at about 1 mile and 45 chains in a direct line below the north-west corner of W. and J. W. Russell's portion 1-67, Eena Run, parish of Severn; thence by the boundary dividing the parishes of Severn and Mandoe bearing east, and the boundaries dividing the parishes of Mandoe, Meriti, Ellis, and Bora from the parishes of Rosa, Hetherington, and Texas, as shown on the county map of Arrawatta, to the Dumaresq River, at a point about 1 mile below the north-west corner of P. Callachor's additional conditional purchase portion No. 6, parish of Texas; and thence on the north by the Dumaresq and Macintyre Rivers downwards, to the point of commencement.

No. 64.

Memorandum.

On April 13th, 1876, Angus M'Donald applied, under the 13th section, for conditional purchase 76-33 of 150 acres, described as follows:—

Situated on the north bank of the M'Intyre River, adjoining the western boundary of measured portion No. 57, running east; thence north; thence south towards the river.

On May 3rd, 1877, J. J. Thompson applied at Inverell, under 13th section, for conditional purchase 77-58 of 560 acres, and subsequently for 77-80 of 80 acres. These conditional purchases were declared void on the 21st February, 1879, being applied for in the wrong district, the land being in Warialda District. Thompson applied for a pre-lease in virtue of these portions, which was granted as 34 of 1877, of 1,920 acres (edging coloured blue on sketch), which included portion No. 104. This was cancelled on 17th November, 1879, the conditional purchases being void.

On the 6th March, 1879, J. J. Thompson applied at the Warialda office for conditional purchase 79-28 of 640 acres, and on the following day for a pre-lease of 1,920 acres, which was granted as 48 of 1879, in the same position as 34 of 1877, and still including portion No. 104; this was cancelled on the 15th October, 1879, as M'Donald's conditional purchase cut off the pre-lease from the conditional purchase of Thompson.

On June 19th, 1879, John Thompson applied for a conditional purchase, 79-85 of 40 acres, adjoining J. J. Thompson's land, which was refused, the land being included in M'Donald's conditional purchase.

On the 23rd December, 1879, the Deputy Surveyor-General recommended that, as conditional purchase 76-33 had been incorrectly described, a fresh survey should be made, leaving 7 chains between M'Donald's and J. J. Thompson's conditional purchases, to enable the latter to keep his pre-lease. The Chief Commissioner objecting thereto, the Minister decided that only a road of access to portion No. 82 should be reserved (*i.e.*, to J. J. Thompson's conditional purchase), and subsequently, on conditional sales 80-25,781, confirmed his decision.—F.H.W., 14/2/81.

Minutes on above.

The lease appears to have been twice gazetted in the form shown on the enclosed tracing. The conditional purchase in right of which it was originally applied for having been declared void, the lease also became void. The ground of the second refusal having no connection with the conditional purchase, was not in accordance with the present practice of the Department, there being a road of access, which originally formed portion of the lease left. Under the circumstances, it is suggested that the last cancellation be reversed on payment of arrears of rent, and subject to any conflicting interests which may have arisen in the meantime.—C.O., 14/2/81. Approved.—J.H., 15/2/81. Mr. Boot,—Reverse the cancellation of 48 of 1879, and issue slip for payment of rent overdue without fine.—F.H.W., 17/2/81. Mr. Wilson,—Is the pre-lease to include portion No. 104, or any part of it?—A.G., 21/2/81.

J. J. Thompson's pre-lease 48 of 1879 is now charted, and tracing is herewith attached; also Wyndham and Wright's pre-lease 111 of 1877, which, being an undefined lease, was not charted when first dealt with. 111 of 1877 was applied for on the east of portions Nos. 79 and 80, but the form has been modified to admit of 48 of 1879 being granted.—A.G., 24/2/81. Mr. Wilson.

No. 65.

Memorandum by Under Secretary for Lands.

Will the Under Secretary for Finance and Trade be good enough to have the undermentioned lease rent refund voucher cancelled.

J. J. Thompson, £6, authorized on 15 October, 1879, lease 48 of 1879, Warialda.—F.H.W., *pro* Under Secretary, B.C., Department of Lands, Sydney, 18 February, 1881.

Minutes on above.

Under the within authority the refund voucher referred to is to be cancelled. The Paymaster; the Accountant; the Examiner; then the Auditor-General.—G.E., 23/2/81. Refund cancelled.—C.R., 11/3/81.

No. 66.

Mr. H. J. Withers to The Chief Commissioner.

Sir,

83, New Pitt-street, 2 March, 1881.

On behalf of J. J. Thompson, I do myself the honor to direct your attention to the great loss my client has suffered, caused by the action of the Survey Office in passing a conditional purchase that was afterwards shown to be illegal. My client applied at the Inverell Land Office for 640 acres and a pre-lease

pre-lease in virtue thereof. The conditional purchase was surveyed, examined, and charted in the usual way, and my client informed it was all right; the pre-lease was first gazetted, then finally approved by the Minister for Lands, and my client informed that a tracing of it had been sent to the Inverell Land Office. Not until he obtained this notice did Thompson use his lease, but immediately he placed sheep upon it the lessee commenced an action against him which has ruined my client. The case came on in the Supreme Court, Sydney, and it was shown that the proper Lands Office was Warialda, not Inverell. A verdict was taken for £2 and costs, on the advice of Sir George Innes, counsel for my client. Thompson had resided on this conditional purchase for nearly two years, with his son and family, and was doing very well. On his behalf, I obtained a refund of deposit, and he selected at Warialda, and again applied for pre-lease. Both conditional purchase and pre-lease have now been transferred from Warialda to Inverell, the office which caused so much trouble to my client.

I do now respectfully ask that you will cause to be placed on the Estimates the sum of £600 as compensation for law expenses attending at Sydney for defendant and his witnesses, loss of time in residing two years on his selection and then having to commence residence again—in being compelled to sell sheep which he had purchased, not having any land for them to run on, when his pre-lease was declared void. I may inform you that the £600 will not cover the loss my client has suffered; writs have been issued against him, and he has been brought to the verge of ruin from a position in which he was enabled to make a very respectable income. My client has a large family, and not only does he suffer, but also those dependent on him for support.

In submitting this application to the Honorable the Minister, I feel sure he will act justly with a man who in prosperity has been brought low by no action of his own, but who, on the contrary, did all it was possible to do to be certain that his land was legal before going into occupation.

I have, &c.,

HENRY J. WITHERS.

No. 67.

P. L. Murray, Esq., M.P., to The Secretary for Lands.

Sir,

Sydney, 10 March, 1881.

Referring to my conversation with you a few nights ago respecting selection of J. J. Thompson, Inverell (or Warialda), I find that there has been some correspondence going on in the matter, so that it will be unnecessary for me to go into the particulars of the case, but refer you to a letter from Thompson's agent (Mr. Withers) to the Chief Commissioner, of 2nd instant, and beg to state that I am personally acquainted with all the facts set forth. I know that the unfortunate selector, Thompson, is ruined, and that it was through the mistake of the Department, and no fault of his. I trust that you will see your way to place £600 on the Supplementary Estimates as compensation for the loss sustained by him.

I am well aware that that sum is not sufficient to compensate him for the loss sustained, but as he has only asked for that sum, I trust there will be no objection to granting it.

I have, &c.,

P. L. MURRAY.

Minutes on No. 67.

By Chief Commissioner:—Urgent.—Charting Branch will perhaps be good enough to say if the conditional purchase of J. J. Thompson was in the Warialda District when he applied for it at Inverell, and how long it was before the error was corrected.—W.B. (for Chief Commissioner), 15/3/81.

Mr. Long.—At the time that J. J. Thompson conditionally purchased the land in question it was wholly within the Land District of Warialda (*vide* attached tracing taken from the maps then in use by the Land Agents of Warialda and Inverell.) The whole of the parish of Bukkulla, including the land applied for by J. J. Thompson, is now in the Inverell District, amended by Government Gazette notice, dated 28th January, 1881.—G. LONG, 18/3/81.

Thompson's claim for compensation submitted. See letter of Mr. Withers for statement of his claim.—W.B., 21/3/81. Cannot the original conditional purchase papers be got.—W.B., 25/3/81. Very urgent. See separate memorandum.—H.A.F., 25/3/81.

By the Secretary for Lands:—Before I can give any consideration to the case, I require to be furnished with a full report from the Conditional Sales, Survey, and Pre-lease Branches on the statements made in the letter of Henry J. Withers, dated March 2nd, 1881, as agent on behalf of the conditional purchaser, J. J. Thompson. It cannot, of course, be expected that I should receive as correct, and without any official comment or explanation, the statement made by any person making a claim for compensation on behalf of another person. I require to be officially notified whether the allegations made in Withers' letter are correct, namely, that Thompson was allowed, unquestioned, either by the Conditional Sales or Survey Branches, to make a conditional purchase in the wrong district, that the Survey Branch did not call attention to this fact with a view to the cancellation of the conditional purchase, and that the Pre-lease Branch gave a pre-lease for the wrong district, a combination of errors by the various branches of this Department which appears to me to be inexplicable. I also wish to be officially informed if the allegations in reference to the trial are truthful; in short, I require to obtain all the information relative to this case from official and not from private sources.—J.H., 23/4/81.

Charting Branch, in the first instance.—W.B., 25/4/81.

The Surveyor-General:—I invite attention to the Minister for Lands' minute, dated as far back as 23rd April, 1881, in which he requires the report of this office on the matter of J. J. Thompson's conditional purchase referred to in that minute, and this cannot be given without papers 77/35,306-7 Conditional Sales. Several applications and personal search have been made for required papers, and they are not to be obtained. Submitted that the attention of the Under Secretary for Lands be invited to the fact with the view to the papers being found and forwarded to this office.—W. D. ARMSTRONG, 13th May, 1881.

By the Surveyor-General:—Under Secretary for Lands accordingly.—P.F.A., 13/5/81.

No. 68.

Memorandum.

J. J. Thompson's case.

THE facts of this case are as follow :—

John Jackson Thompson, on 3rd May, 1877, applied to the Crown Lands Agent at Inverell for a conditional purchase of 560 acres, describing the land as on the Macintyre River, and forming part of reserve No. 67, revoked 27th March, 1877.

A fortnight afterwards he selected, under section 21, 80 acres north of the previous purchase—again alluding to reserve No. 67.

On 29th September, 1877, Thompson applied to the Inverell agent for a pre-lease of 1,920 acres, the application being gazetted as granted on the 27th November of the same year; and a tracing defining the lease being forwarded to the Inverell agent on the 8th February, 1879.

The whole of the land applied for (conditional purchases and pre-leases) formed part of the Warialda District (and not Inverell) at dates of applications, reserve 67 being a very distinct feature on the county map.

It may be mentioned, in passing, that on the 19th June, 1877 (three months prior to the date of Thompson's pre-lease application), one F. W. Wright applied to the Warialda agent for a pre-lease of 429 acres, and although applied for before Thompson, and at the proper office, and gazetted on the same day, the lease was afterwards cancelled, the reason assigned being interference with Thompson.

On 19th December, 1878, the selections were alienated to W. Thompson.

The measurement of Thompson's conditional purchase was charted on the map, although the selection had been taken up in the wrong district, and, so far as the papers obtainable will show, no action was taken either in the Survey or Lands Departments towards rectifying the errors until 21st February, 1879, when a letter was addressed to Mr. Thompson, care of Withers & Company, voiding the conditional purchases, and giving as the reason for so doing that the selections had been applied for at the wrong office. This was after the conclusion of a Supreme Court action against Thompson.

The Supreme Court records show that Wright and Wyndham, lessees of the run upon which Thompson selected, obtained a verdict against him, on 17th February, 1879, for £2 for trespass, the plaintiff's costs being taxed at £204 5s. 5d.

The defendant's costs, as between attorney and client, including witnesses' expenses, are fixed by his solicitor at £216 8s. 6d., as per certified bill with these papers.

Briefly, the selector's applications were received at the wrong office, and, so far as the records of this Department will show, the land was surveyed and charted without attention being drawn to the error.

A pre-lease was granted in the wrong district, including land previously applied for by another person at the proper office, and no departmental action was taken towards voiding until the Supreme Court had adjudicated. In fact, the selector, by his agent, appears to have been the first person to draw attention to the illegality of the proceedings.—S.F., 18/5/81.

Minutes on No. 68.

Referred to the Surveyor-General in reference to his memorandum of the 13th instant. The missing papers cannot be found.—C.O., 25/5/81.

The case was dealt with in Mr. Armstrong's branch. Perhaps some noting on the plan would show who dealt with the case, or whether the usual action in such cases had been taken, namely, returning papers to Conditional Sales Branch for alteration of district, or throw any additional light upon the case in absence of papers.—P.F.A., 30 May, 1881.

No. 69.

Memorandum.

Conditional Sales, 81-10,174.

THE plan is correctly noted as in the Warialda District. I have examined the draftsman's book and the books in use in the branch for entry of papers, but can find no trace of papers having been sent to Records.

The error in a district is generally pointed out by the draftsman when the case is finally examined, and attention of the Conditional Sales Branch called to it when the case is dealt with.

The published map of the county and returned maps from Land Agent with Mr. Long clearly show the portions to be in the Warialda District; but the map is missing that was in use at the Land Agent's Office in 1877. Probably it was borrowed when the trial referred to in the papers was on at the Supreme Court; the solicitor of plaintiff or defendant might give some account of them.

Until the papers are produced the question in abeyance; whether papers were noted cannot be replied to.

6 June, 1881.

W. D. ARMSTRONG.

Minutes on No. 69.

Under Secretary accordingly.—P.F.A., 9th June, 1881.

There can be no doubt that the Department is responsible for not having detected the error. Indeed it must have been apparent when the conditional purchase was charted. Had the error been discovered by the Department the action for trespass against Thompson would very probably not have been brought.

In view of all the circumstances of the case, which are fully set out in memo. of the 18th May, it would appear that Thompson has a claim for consideration with regard to compensation for loss by reason of the action for trespass. The verdict against him was for £2, but the costs in the suit amount to £420 13s. 11d., being a total of £422 13s. 11d. Mr. Thompson's agent claims £600.

Submitted for directions.—C.O., 25/6/1881.

Department of Lands, 8 September, 1881.

On 3rd and 17th May, 1877, Thompson conditionally purchased, at the Inverell Land Office, two portions of land containing 560 acres and 80 acres respectively, forthwith taking possession of same, effecting improvements, and otherwise complying with the requirements of the law.

In 1879, the Crown Lessees of the run on which these selections were situate, observing that the land formed part of the Warialda District, and not Inverell, as supposed by Mr. Thompson, instituted Supreme Court proceedings against him for trespass, and obtained a verdict for £2, with costs. Mr. Thompson on this drew the attention of this Department to the result of the action, and his purchases were thereupon declared void, the land being only available for conditional purchase on application at the Warialda Land Office (*vide* section 13 of the Alienation Act of 1861.)

Verdict	£2	0	0
Plaintiff's costs taxed	204	5	5
Defendant's costs as between attorney and client, including witnesses' expenses	216	8	6	

I recommend that the sum of five hundred pounds sterling (£500) be placed on the Estimates for 1882 as compensation on account of the losses sustained by Mr. John Jackson Thompson in defending the action brought against him in the Supreme Court.

JAMES HOSKINS.

Memorandum by Secretary for Lands.

With reference to the claim for compensation made by Mr. John Jackson Thompson, for a conditional purchase of 560 acres and 80 acres, as well as a pre-lease for 1,920 acres, being portion of reserve No. 67, gazetted as revoked on March 27th, 1877, conditional purchases 77-58 and 77-80, made at the Land Office, Inverell, on May 3rd and 17th, 1877, and for a pre-lease of 1,920 acres, also made at Inverell, on September 29th, 1877, such claim for compensation having arisen through an action having been brought against him in the Supreme Court by the lessees of the run for trespass, caused by the land embraced in the conditional purchases and the pre-lease having been applied for in the wrong district, namely, Inverell, instead of Wialla, at which the application should have been made.

The Land Agent must send a reply to the communication from this office upon this subject with the least possible delay, as the matter is about to be brought under the consideration of Parliament.—J.H., 9/9/81.

Minutes on above.

By Under Secretary for Lands :—Resubmit on Saturday.—C.O., 15/9/81.

Memorandum by Secretary for Lands.

A claim for compensation to the amount of £600 has been made on behalf of Mr. John Jackson Thompson, on account of the losses he alleges he has sustained through his having had to defend an action in the Supreme Court, brought by the lessees of the run, Messrs. Wright and Wyndham, for trespass, on the ground that the land he applied to conditionally purchase at the Land Office, Inverell, by conditional purchase 77-58 and conditional purchase 77-80, on May 3rd and May 17th, 1877, as well as the land he applied to pre-lease, 1,920 acres, at Inverell, on September 29th, 1877, should have been taken up at the Land Office, Warialda, as the land is in that district.

The claim was brought before the Cabinet Council yesterday, and the members of the Government present considered that the surveyor who measured this land (Maclarg), and the draftsman who charted his plans of this land for the conditional purchases, as well as the draftsman who charted the pre-lease in virtue thereof, are so much to blame for not discovering the fact of this land being in the Warialda District, instead of the Inverell District, long before the action was brought in the Supreme Court, that the question will probably be considered whether deductions ought not to be made from their salaries to compensate Thompson for the losses he has sustained through having to defend his interests in the Supreme Court, mainly through the apparently inexcusable negligence of the officials through whose hands this case passed.

I am therefore required by the Government to request the Surveyor-General to call upon the surveyor, as well as any draftsman through whose hands this matter passed, to explain why they did not report to the Minister for Lands that the conditional purchases and pre-leases were void through having been applied for in the wrong district.

The Government also wish to be furnished with the names of the officials in the Survey Branch, and the salaries paid to each officer respectively, who is responsible for the negligence manifested in this case.

As the claim for compensation is now being pressed, the Government require this information with the least possible delay.—J.H., 9/9/81.

Minutes on above.

By Under Secretary for Lands:—The Surveyor-General.—C.O., 9/9/81. By Surveyor-General:—Mr. Ellis, for inquiry and report.—P.F.A., 9/9/81. Urgent. All the papers referred in this case.—J. W. Ellis, 9/9/81. Report submitted.—J.W.E., 16/9/81. The Surveyor-General.

No. 73.

The Under Secretary for Lands to The Crown Lands Agent, Inverell.

Sir,

Department of Lands, Sydney, 9 September, 1881.

With reference to the claim for compensation made by Mr. John Jackson Thompson, for a conditional purchase of 560 acres and 80 acres, as well as a pre-lease for 1,920 acres, being portion of reserve No. 67, gazetted as revoked on 27th March, 1877 (conditional purchases Nos. 77-58 and 77-80), made at the Land Office, Inverell, on 3rd and 17th May, 1877, and for a pre-lease of 1,920 acres, also made at Inverell, on the 29th September, 1877, such claim for compensation having arisen through an action having been brought against him in the Supreme Court, by the lessees of the run, for trespass, caused by the land embraced in the conditional purchases and the pre-lease having been applied for in the wrong district, namely, Inverell, instead of Wialda, at which office the application should have been made; I am directed by the Secretary for Lands to inform you that the Cabinet require you to explain whether you were not aware of the fact, when this application was made to you by Mr. Thompson, that the land embraced in reserve No. 67, previously revoked, was in the Wialda District, and that the application should have been made at the Wialda Land Office, instead of at Inverell, and why you did not tell Mr. Thompson that he must apply at Wialda for this land.

2. You will be good enough to send a speedy reply to this letter, as the matter is about to be brought under the consideration of Parliament.

I have, &c.,

CHARLES OLIVER,
Under Secretary.

No. 74.

The Crown Lands Agent, Inverell, to The Under Secretary for Lands.

Sir,

Crown Lands Office, Inverell, 12 September, 1881.

I have the honor to acknowledge the receipt of your letter of the 9th instant, No. 81-6,009 Ministerial, with reference to Mr. J. J. Thompson's conditional purchases of 560 acres and 80 acres, made at Inverell, on the 3rd and 17th May, 1877, and a pre-lease of 1,920 acres, made 29th September, 1877, requiring me to explain why the applications were received at this office instead of at Wialda. I beg to report as follows:—

When the first application was made, on the 3rd May, 1877, for 560 acres, being part of reserve No. 67, I informed the applicant, Mr. Thompson, that the land appeared to be in the Wialda District, and that he should apply at the Wialda Land Office for the same. He referred me to the Gazette, No. 105, of the 27th March, 1877, which proclaimed the revocation of the reserve, describing it as in "the New England District, county Arrawatta, Inverell," and he demanded that I should accept his application, insisting that the land was in the Inverell District, notwithstanding my informing him to the contrary. This he cannot and will not deny, for, in a conversation I had with him subsequent to the Supreme Court action, he fully remembered and acknowledged it to me.

I beg to explain that, at the present time, any objection I may see to an application is noted on the form, but at that date the necessity for such a practice was not seen and not required, to my knowledge. The subsequent application depended on the first one.

In the face of the above-quoted Gazette, I was not in a position to state positively that the land was not in the Inverell District, therefore could not peremptorily decline the application, made in the way it was, but I gave Mr. Thompson all the information at my disposal, showing him the county map, and advising him to go to the Wialda Lands Office.

This he declined to do, insisting upon his application being received, thereby taking all responsibility from me on to himself. It was his own deliberate action against my advice.

Trusting this explanation will be deemed satisfactory.

I have, &c.,

W. C. CARDEW,
Land Agent.

Minutes on above.

Submitted.—O.R., 16/9/81.

By Under Secretary for Lands:—It is desirable that the Land Agent should make a statutory declaration as to Mr. Thompson having insisted on making the application, notwithstanding that he was informed by the Land Agent that the land was not in the Inverell District, but in the district of Wialda.—C.O., 19/9/81.

No. 75.

Memorandum.

J. J. THOMPSON's claim for compensation on account of loss in defending action in Supreme Court, caused by the erroneous action of Survey and Lands Department.

The Surveyor-General,

I submit the following report in result of inquiry into the action of Survey Department in respect of J. J. Thompson's conditional purchases 77-58 and 77-80, dated 3rd and 17th May, taken up in the district of "Inverell," instead of "Warialda." I find that the Land Agent at Inverell had a good map of the county of Arrawatta, showing most clearly the boundary of the Inverell District by a red band, and the lettering "Inverell District" filled in in red, in order to make it perfectly distinct. These conditional purchases form part of reserve No. 67, on the Macintyre River, cancelled 27th March, 1877, of which the Land Agent, Warialda, was informed, and not the Land Agent at Inverell. This map shows most clearly the site of that reserve to be within the Warialda District, and to be about 4 miles on the Macintyre below the crossing of the boundary dividing the police districts of Inverell and Warialda, and to be about 2 miles westerly from the nearest point of that boundary, and, therefore, apparently no excuse for the Land Agent accepting the applications, or for the applicant tendering them at that office. The applications, on reaching the Survey Branch, were dealt with by Mr. Temporary Draftsman Hamilton, who ceased to be employed in this office in August, 1878, and who should have observed that the applications had been taken up in the wrong district prior to sending to Mr. Licensed Surveyor Macharg for survey, on the 5th June and 2nd July, 1877, respectively.

The surveys of the above conditional purchases were made in July, 1877, and transmitted under Mr. Macharg's letters 77-47 and 77-48, registered Nos. 77-35,306 and 77-35,307 conditional sales, and received in Charting Branch on 19th October, 1877, and issued to Mr. Temporary Draftsman Middlecoat for charting, 11th April, 1878, and who charted them in April and June, 1878, and were finally examined and dealt with in June and October, and plans by Mr. Armstrong accepted at these dates. Mr. Middlecoat can give no reason for the oversight in not observing that the conditional purchases were not taken up in the correct district, viz., "Warialda," subsequently to the acceptance of the plans by Mr. Armstrong. The plans were issued for tracings for Conditional Purchase Inspector, and, under minute dated 4th December, 1878, the papers, with tracings enclosed, were sent by Mr. Armstrong to Conditional Sales Branch for Conditional Purchase Inspector's report, as the applicant was not resident at time of survey, but no attention was called in that minute to the error of the police district, although the plans at the time would appear to have been noted "Warialda District." It appears that the Inspector was asked to report, 6th February, 1879, and, on 77-3,506 and 77-3,507, it is shown that attention was called by Mr. Armstrong, on the 21st February, 1879, to the fact of the portions or selections having been taken up in the wrong district, but subsequently to the date of the trial at the Supreme Court.

With regard to Charting Draftsman's statement, that "I can give no reason for the oversight in not noticing that the conditional purchase had been taken up in the wrong district," I think it is quite possible that the conditional purchase application, having been accepted by the Land Agent and passed by the Conditional Purchase Branch, Survey, in which branch a clearly-defined guide map of the county, showing the district boundary and the site of the reserve referred to in the application, existed; he accepted the correctness of the district without question, and the county map of Arrawatta in office use at the time being much defaced, the name of the police districts Inverell and Warialda not readily discerned, although the land district boundary could be deciphered on that map in parts readily, and in parts with difficulty (a lithograph in office use since 1871), may be partly the cause of that omission, as well as at the time a press of work in the branch, and a minute of mine to Mr. Willis, in February, 1878, on the subject of the importance of speedily putting into office use a new compilation of the county and parish maps of the county, on that minute being put into the compiler's hands on the following month, 23rd March, confirms me in this view.

A pre-lease, in virtue of the conditional purchase 77-58 and 77-80, was applied for on 29th September, 1877, for 1,920 acres, and gazetted 27th November, 1877, and charted, and finally dealt with by a tracing defining the lease being forwarded to the Inverell Land Agent for general information, which tracing was sent to Land Agent, 8th February, 1879, and applicant also informed at that date. If the Land Agent had compared this tracing with the county map of Arrawatta at his office, which so clearly shows the land district boundary, the error of police district would have been at once by him discerned, and of the conditional purchases, in virtue of which the pre-lease was taken up, that neither conditional purchases nor pre-lease were within his district. Applicant's agent, under letter, Leases 79-1,079, states that the pre-lease was not occupied until the final approval and tracing showing lengths were obtained by him, but papers show that applicant was provisionally informed as over 23rd January, 1878.

Between the date of application for pre-lease, 29th September, 1877, and finally dealing with it, and informing applicant and Land Agent, on 8th February, 1879, a period of 2½ years elapses. On inquiry, I find that the lease was gazetted, 27th November, 1877; reached Survey, 31st January, 1878; and charted by Mr. Draftsman J. J. Callachor, 4th February, 1879, and forwarded by Mr. A. Johnston to Lease Branch, under minute 4th February, 1879, also without it being observed that the pre-lease and conditional purchases in which the lease was taken up in virtue of were each made in the wrong district—Inverell, instead of Warialda. The cause of delay in Survey in dealing with the lease was owing to the press of work in the branch and small staff employed at the time, as will be seen by my report, dated 17th April, 1879, in which it is shown that not less than 2,133 cases, with a staff consisting only of Mr. A. Johnston, head of the branch (in absence of Mr. Sangster), Messrs. Hall, Callachor, Frappell, and Doubleday, cadet; and Mr. Callachor at the time had not less than 807 cases on hand, and the other draftsmen equally heavily charged with work at the time. No other reason can be given for the delay, as the plans, showing conditional purchases of J. J. Thompson, were on the county map, 28th June and 10th April, 1878, but the claim of lease came into existence when it was gazetted, viz., 27th November, 1877. If land was available, and applicant was informed to that effect, 23rd January, 1878, and I find by the papers that an application to pre-lease, in virtue of auction purchase, portions 79 and 80, "Warialda District," for 429 acres, was made by F. W. Wright, dated 19th June, 1877, gazetted 27th November, 1877, and provisionally notified to applicant, 23rd January, 1878, and by Mr. Gall, Pre-lease Branch, reported objectionable, under minute 6th May, 1879, as being land under pre-lease to J. J. Thompson, without

without it being observed that J. J. Thompson's pre-lease had been taken up in the wrong district, and refund accordingly to F. W. Wright on cancellation made, 22nd August, 1879, but that cancellation was revoked, 17th November, leases 79-3,629; J. J. Thompson and F. W. Wright's pre-lease applications being for land in the same locality, and, therefore, before reporting on Wright's pre-lease application, I should have thought it possible that J. J. Thompson's claims would have been examined, but I find the practice of the Branch to be that, unless some subsequent communication is received in the office, referring to any lease once charted, no further reference is made to such application. Mr. Gall's action was therefore taken as consequent on Thompson's pre-lease, &c., being shown charted on pre-lease map.

On letter dated 19th February, a day or two after the trial, conditional sales 79-7,279, J. J. Thompson, through his agent, applies for refund on his conditional purchase, 77-58 and 77-80, with the view of selecting in the correct district, viz., "Warialda," and the conditional purchases were voided and refund order issued, and agent and Treasury informed; and under minute on 77-3,083 leases, dated 17th November, 1879, the lease of J. J. Thompson is shown to be cancelled, and the noting in Conditional Purchase Register Book shows that the conditional purchases have been transferred to the Warialda District, under Nos. 77-193 and 77-194, and declared void, and reselected at Warialda, under conditional purchase 79-28, on 6th March, 1879.

Referring to 79-1,079 lease, applicant, J. J. Thompson, through his agent, applying for compensation, referred for report of Mr. A. Johnston, I find that Mr. Johnston states, "It has always been the practice of the Department to grant pre-leases in the district in which the conditional purchase application was made, and to furnish tracings accordingly, which was, as usual, done in this case. In this instance the conditional purchase appears to have been applied for in the wrong district, and being therefore invalid, the pre-lease is of course void."—A.J., 10th April, 1879. And I find in a minute, dated 6th June, 1881, Mr. Armstrong points out that, "Error in a district is generally pointed out by the draftsmen when the case is finally examined, and the attention of the Conditional Sales Branch is called to it when this case is dealt with." The published map of the county and the returned maps from the Land Agents, with Mr. Long, clearly show the portions to be in the Warialda District, but the map is missing that was in use at the Land Agent's Office in 1877. This map has since been found, and is the map referred to in previous part of this report.

It will be seen by the foregoing that error of Police District, Inverell, instead of Warialda, originated with the Land Agent and conditional purchase selector in not observing the boundary dividing the Police Districts of Inverell and Warialda.

The error should have been observed by Mr. Temporary Draftsman Hamilton, who dealt with the conditional purchase prior to sending the application for survey, but it was not observed by him, and the surveys of the conditional purchases were received into Charting Branch, 19th October, 1877, and issued to the charting draftsman, Mr. Middlecoat, 11th April, 1878, for charting, who should have observed the error, as directed in paragraph 2 of instructions to draftsmen, and pointed it out to the head of the Branch directly he commenced the preliminary examination of the plan, to charting on the county map, which was not done, nor at the final examination of the plan by the examiner, Mr. Armstrong; so the error passed until the matter was called attention to after the trial.

Mr. J. J. Callachor, draftsman in the Pre-lease Branch, observing the selections by J. J. Thompson charted on the county map of Arrawatta, when charting the lease in February, 1879, should have observed, on examining the lease application with the map in the Branch and the county map in office use, that the application was taken up in the wrong district, and gazetted also in the wrong district, owing to Lease Branch, Lands, having been misled by the Land Agent, Inverell, and have referred to the conditional purchase application in virtue of which it was taken up, and have pointed out that both conditional purchase and pre-lease had been taken up in the wrong district, but the error of district was not observed by Mr. J. J. Callachor, and therefore lease application, with tracing showing boundaries, was sent forward to Lease Branch, Lands, by Mr. Alexander Johnson, on the 4th of February, 1879, for information of the Land Agent, Inverell, and applicant, as before stated, and the Land Agent was accordingly informed, under letter dated 8th February, 1879. The action throughout in these cases should have been taken as in the Warialda District, and not as in the Inverell District, the conditional purchases and pre-leases being so clearly situated within the Warialda District; and I consider that there are no grounds for excuse either by the Land Agent or conditional purchaser that such was not done, the map so clearly showing the boundary dividing the Inverell and Warialda District. In reference to the portion of the Ministerial minute respecting the officers to blame and their salaries:—

1st. I consider, as I have before said, that the Land Agent at Inverell is much to blame, for the reason that he had a good map in his office for public inspection, showing the boundary of his district, and also showing the site of the reserve referred to in the conditional purchase application, situate about 4 miles down the river, below the crossing of the land district boundary over the Macintyre.

2nd. I consider the conditional purchase selector to blame, for if he had carefully inspected the map at the Inverell office he could have seen that the land he desired was in the Warialda District, and, if in doubt, appealed to the Land Agent.

3rd. I consider Mr. Temporary Draftsman Hamilton is to blame, who dealt with the applications before sending to Mr. Licensed Surveyor Macharg, in June and July, 1877. (Mr. Hamilton is not now employed in this office, having resigned his appointment as a temporary draftsman in August, 1878, and his appointment in Deeds Diagram Branch, 1st July, 1879.)

4th. Mr. Licensed Surveyor Macharg I consider also to blame, to whom the instructions issued to survey, in not returning the application to this office, as directed by paragraph 50 of surveyors' instructions, which states, "That if the application is in the wrong police district it should be returned for cancellation with a statement of the objection." (Mr. Licensed Surveyor Macharg resigned his district in December, 1878, and to whom no instructions to survey have issued from this office since that date.)

5th. Mr. Temporary Draftsman Middlecoat is also to blame, to whom the plans of the conditional purchases were issued for charting, in not discerning the error in police district, and pointing it out to the head of his Branch. Mr. Middlecoat's daily rate of pay is 17s.;—and also

6th. Mr. Armstrong, head of the Branch, who examined the charting, in not observing the error of police district while finally examining the charting. Mr. Armstrong's salary is £400.

7th. Mr. J. J. Callachor is to blame, who charted the pre-lease without observing the error of police district and pointing it out to the head of his Branch, viz., Mr. Alexander Johnson, with the view of having it rectified. Mr. Callachor's salary is £250 per annum.

8th.

8th, and lastly. Mr. Alexander Johnson I consider also to blame, who should have observed the error when examining the charting of the lease, or at least have asked the question if the district was correct. Mr. Johnson's salary is £400 per annum.

It will be observed that every officer dealing with the referred-to cases is to blame, but I think that the error should have been avoided by ordinary care at the Land Office, Inverell.

J. W. ELLIS,

15th September, 1881.

Minute on above.

Land district boundary between Inverell and Warialda amended under notice, 28th January, 1881, to take effect 17th proximo, and since that date J. J. Thompson's conditional purchases have been within Inverell.—J.W.E., 16/9/81.

No. 76.

Memorandum by Surveyor-General.

Surveyor-General's Office, Sydney, 19 September, 1881.

BEYOND stating that the Land Agent had an excellent map in his office at the date of selection, showing in the clearest manner the boundary of the district, and that the map is here for inspection, I have nothing to say as to the fault of that officer.

The first action on the part of this office was by Mr. Hamilton, then in the Conditional Purchase Branch, whose direct duty it was to have looked for and detected such an error; he, however, sent the application to the surveyor to measure, if unobjectionable.

The surveyor, Mr. Macharg, neglected to comply with Instructions to Surveyors, paragraph No. 50, bearing directly on the case; therefore he ought to have returned the instruction.

The third officer who is to blame is Mr. Middlecoat, who neglected Instruction to Draftsmen No. 2.

Then Mr. Armstrong, who examined the charting.

The officers of the Lease Branch appear to have followed the Land Agent, who accepted the application for pre-lease in virtue of a conditional purchase made in the same district.

The two first officers, Messrs. Hamilton and Macharg, are, I consider, guilty in the first degree, but they have both left the Department.

In the second degree, I consider Mr. Middlecoat to blame, who neglected a direct office instruction. He had before him three officers directly charged with the responsibility of finding out the error, and consequently I am prepared to admit that his attention was but little called in that direction, having his own direct duties to perform in connection with charting. The same may be said of Mr. Armstrong, who examined the charting; also the officers of the Lease Branch, who have followed in the track of the others.

This occurred three years since, at a time when the pressure of work was enormous, and higher duties entrusted to officers of shorter experience than would otherwise have been the case. I must therefore leave the matter to be considered by Mr. Secretary Hoskins in as favourable a light as circumstances will permit.

The names, grades, and salaries of the officers implicated will be found in Appendix to this report.

P. F. ADAMS.

[Enclosure to No. 76.]

APPENDIX to the Surveyor-General's minute of 19th September, 1881, showing names, grades, and salaries of officers in the order in which they are mentioned in the Chief Draftsman's report herewith.

Name.	Grade.	Salary.
A. P. D. Hamilton	(Resigned position of draftsman; now Crown Lands Agent.)	
J. Macharg	Licensed surveyor (has not been employed since December, 1878.)	
W. T. Middlecoat	Special first-class temporary draftsman	17s. per diem.
W. D. Armstrong	First-class draftsman, permanent staff	£400 per annum.
J. J. C. Callachor	Second-class draftsman, permanent staff	£250 per annum.
A. Johnson	First-class draftsman, permanent staff	£400 per annum.

No. 77.

Telegram from Land Agent, Inverell, to Under Secretary for Lands.

19 September, 1881.

SINCE writing my report of twelfth instant *re* Thompson's conditional purchase, have carefully examined boundaries, with assistance District Surveyor Finley. We find that Thompson's purchase, parish Bukkalla, is undoubtedly within old Inverell Land District. The western boundary New England Pastoral District was there clearly the boundary between Inverell and Warialda. Please compare description boundaries of these Police Districts and that of Pastoral District New England. I submit approximate boundary marked county map is greatly out

W. C. CARDEW,
Land Agent.

Minutes on No. 77.

Mr. Ellis,—The report in Thompson's case should be recalled at once, and the old map sent with it to Under Secretary; also check the gazetted boundary of the district, which may not agree with the old map.—P.F.A., 19/9/81. Urgent.

Reply submitted under separate cover.—J. W. ELLIS, 20/9/81.

No. 78.

Telegram from Under Secretary for Lands to Lands Agent, Inverell.

19 September, 1881.

It is desirable that you should make a statutory declaration as to Mr. Thompson having insisted on making the application, notwithstanding that he was informed by you that the land was not in the Inverell District, but in the district of Warialda.

CHARLES OLIVER,
Under Secretary.

No. 79.

Memorandum.

J. J. Thompson's Conditional Purchases 77-58 and 77-80, taken up at Inverell.

THE Surveyor-General, in reply to the enclosed telegram from Inverell to the Under Secretary.—The boundary defining the Land District of Inverell previously to 28th January, 1881, is described "as the fall of the western extreme of the table-land of New England," and which boundary was sketched many years ago by the late Mr. McLean, in consultation with Mr. Moriarty, Chief Commissioner Crown Lands, myself being present; and the boundary as sketched has been so shown on the maps sent to the Land Agents at Warialda, Glen Innes (prior to subdivision of Police District of Wellingrove into Glen Innes and Inverell), and Inverell since that subdivision and identical with the boundary shown on county map of Arrawatta, published by the Government in 1871, and I enclose the map of Arrawatta that was with the Land Agent, Inverell, at the date when Thompson's conditional purchases were taken up in 1877, a tracing of that county returned from the Inverell Land Agent in December, 1876, a tracing prepared for the Land Agent at Warialda, 19 October, 1875, and sent, and a tracing of much earlier date. On all the above maps the boundaries are identical, and show the site of the cancelled reserve referred to in Thompson's conditional purchase application, and the Land Agent should have been solely guided by the boundary shown on the maps sent from this office for the use of the public.

J. W. ELLIS,
20 September, 1881.

Minutes on above.

Report submitted.—P.F.A., 21/9/81. Under Secretary for Lands. Submitted.—O.R., 22/9/81.

No. 80.

The Crown Lands Agent, Inverell, to The Under Secretary for Lands.

Sir,

Crown Lands Office, Inverell, 20 September, 1881.

I have the honor to forward the attached statutory declaration, as required by your telegram of yesterday's date. With reference to the same subject (Mr. J. J. Thompson's claim for compensation), I, yesterday, believing the matter to be urgent, sent you the following telegram, viz.:—"Since writing my report of 12th inst., *re* Thompson's conditional purchase, have carefully examined boundaries, with the assistance of District Surveyor Finley. We find that Thompson's purchase, parish of Bukkulla, is undoubtedly within old Inverell Land District. The western boundary of New England Pastoral District is there clearly the boundary between Inverell and Warialda. Please compare the description of the boundaries of these Police Districts and that of the Pastoral District of New England. I beg to submit that the approximate boundaries shown on county map is greatly out."

This would open out a different aspect of the question altogether, quite apart from my dealings with Mr. Thompson at the date of his application. I have only to lay it before you for consideration.

I have, &c.,
W. C. CARDEW,
Land Agent.

Minutes on No. 80.

This explanation and the declaration within fully exonerates the Land Agent in the matter of Thompson's conditional purchase.—C.O., 24/9/81. By Secretary for Lands:—Mr. Murray, M.P. should be informed that the Government cannot undertake to place a sum of money on the Estimates to compensate Mr. J. J. Thompson.—J.H., 29/9/81.

[Enclosure to No. 80.]

I, WILLIAM CLARE CARDEW, of Inverell, Agent for the Sale of Crown Lands, do solemnly and sincerely declare that on the 3rd day of May, 1877, Mr. John Jackson Thompson did, at the Inverell Land Office, make an application to me, under the 13th section, for a conditional purchase of 560 acres, county of Arrawatta, parish of Bukkulla. I informed him that the land appeared to be in the Warialda District, and that he should apply at the Warialda Land Office. After arguing the matter for some time, he insisted upon making his application, notwithstanding I had shown him by the office map that the land was not in Inverell District, but in that of Warialda. He would not accept this statement. He strongly objected taking the extra journey to Warialda. He said he believed the land to be in the Inverell District, and he (Thompson) made his application at his own risk; this he thoroughly understood. And I make this solemn declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

Made and signed before me, at Inverell, }
this 20th day of September, 1881,— }
H. MUNRO, J.P.

W. C. CARDEW.

No. 81.

The Under Secretary for Lands to The Crown Lands Agent, Inverell.

Sir,

Department of Lands, Sydney, 3 October, 1881.

With reference to your letter of the 20th ultimo., on the subject of J. J. Thompson's conditional purchase of 560 acres, in the county of Arrawatta, I have to inform you that your explanation, and the declaration transmitted therewith, are considered sufficient to exonerate you from blame in the matter

I have, &c.,
CHARLES OLIVER,
Under Secretary.

Under Secretary.

No. 84.

Declaration by Mr. J. J. Thompson.

In the Colony of New South Wales.

I, John Jackson Thompson, of Eastholm, near Inverell, in the Colony of New South Wales, grazier, do solemnly and sincerely declare:—

1st. That, on the third day of May, one thousand eight hundred and seventy-seven, I conditionally purchased from the Crown, under the thirteenth section of the Crown Lands Alienation Act of one thousand eight hundred and sixty-one, at the Land Office at Inverell aforesaid, five hundred and sixty acres of land, situated in the county of Arrawatta, and parish of Bukkula, being portion of reserve number sixty-seven, gazetted as revoked on twenty-seventh day of March, one thousand eight hundred and seventy-seven.

2nd. That, on the seventeenth day of May, one thousand eight hundred and seventy-seven, I purchased from the Crown and the Land Office at Inverell aforesaid, an additional conditional purchase, under the eighteenth section of the said Act, eighty acres of land, situated in the county and parish aforesaid, adjoining on the north the aforesaid conditional purchase, and being the residue of the said reserve.

3rd. That notification of my pre-lease of one thousand nine hundred and twenty acres by virtue of the said purchases was published in the Government Gazette bearing date the twenty-seventh day of November, one thousand eight hundred and seventy-seven.

4th. That, previous to my making the aforesaid purchases, I observed that the said reserve number sixty-seven was described in the Government Gazette as being situated in the county of Arrawatta, Inverell, and forming part of Bukkula Run; I concluded, therefore, that Inverell would be the proper place at which to apply to purchase the same after the revocation of the said reserve.

5th. I distinctly remember, when I handed my application for the said five hundred and sixty acres of land, together with the amount of deposit in part payment of the same, to the Local Land Agent (Mr. W. C. Cardew), on the said third day of May, one thousand eight hundred and seventy-seven, no conversation whatever took place between us as to either Inverell or Warialda being the proper place to apply for the said land. A person named Ross was present during the time, and would be able to declare the same, as I heard this person say to Mr. Cardew immediately after my application and deposit were received, "I wish to take up portion of reserve number sixty-seven," and Mr. Cardew said to him, "It has just been applied for."

6th. No conversation whatever took place between Mr. Cardew and myself on the occasion of my taking up the additional conditional purchase as aforesaid relative to Inverell or Warialda being the place to make application for the same, and it was not until the month of February, one thousand eight hundred and seventy-nine, that I became aware the said conditional purchases were forfeited.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Subscribed and declared at Inverell, this fourth

J. J. THOMPSON.

Presented by R. L. Murray, 8th October, 1881.

[Enclosure to No. 84.]

Description of cancelled reserve.

No. 67. 640 acres, Main Camp, county of Arrawatta, Inverell: Commencing at a gum-tree marked R over 3, on the eastern bank of the Macintyre River, about $\frac{1}{2}$ mile above the junction of Bannockburn or Waterford's Creek, near the upper end of a long waterhole; thence by a line north 1 mile; thence by a line west about 1 mile to the river; thence by the river upwards to the starting-point.

Forms part of Bukkula Run.

No. 85.

No. 85.

Mr. E. O. Smith to The Under Secretary for Lands.

Sir,

Sydney, 5 October, 1881.

On the 8th October, 1879, I addressed you, asking for the reversion of cancellation of F. W. Wright's pre-emptive lease of 1,920 acres, in the county of Arrawatta, parish of Bukkulla, being No. 111 of 77, district of Warialda, which request I understood was complied with, but it now appears that some subsequent action has been taken, of which I (as representing Messrs. E. S. Wyndham and F. W. Wright) have had no intimation, and knew nothing until just informed that J. J. Thompson claims the lease.

I shall be much obliged if you will cause me to be informed whether Thompson is authorised by your Department to occupy Mr. Wright's lease, and if so, upon what ground.

Early attention to this matter will very much oblige.

I have, &c.,

ERNEST O. SMITH.

Minutes on above.

Urgent.—C.O., 6/10/81. The papers in this case are now with the Under Secretary.—S.F., 14/10/81.

No. 86.

H. J. Withers & Co. to The Under Secretary for Lands.

Sir,

11, Bridge-street, 10 October, 1881.

We are in receipt of your letter dated 4th instant, informing us that the Government cannot undertake to place a sum of money on the Estimates to compensate Mr. Thompson, it having been clearly demonstrated that he took up the selections at Inverell though warned by the Land Agent there that he should apply at the Land Office at Warialda.

We must deny that the Land Agent said one word to our client about the Warialda Lands Office; and supposing, for the sake of argument, that he did, then he must be much to blame in forwarding the application and allowing it to be acted upon, surveyed, and charted without directing attention to the fact of its illegality. It is a very unusual practice, and not another agent in the country would have acted in such a careless manner. In the matter of compensation we have nothing to do with either Land Agent or conditional purchase. Our client asked the Minister for Lands to grant him a pre-emptive lease of 1,920 acres; this application was examined, charted, approved, and gazetted in the usual way, and a tracing showing the boundaries was sent to the Inverell Lands Office, and Thompson was informed by you that he could inspect a tracing of the land granted to him at that office. Our client cannot be held responsible for this mistake, which was the cause of action. It seems to us very singular that your officer at Inverell should receive all these notifications, knowing them to be illegal, without communicating with you. The Land Agent and squatter appear to have been the only persons knowing about the illegality of both conditional purchase and pre-lease. Little consideration has been shown Thompson in accepting a statement made by the Land Agent without giving an opportunity for reply. Our client is quite prepared to furnish a declaration that no such warning was given.

In conclusion, we respectfully request that you will recommend a reconsideration of this case, and that the sum of £600 may be placed on the Estimates to compensate our client for expenses incurred in defending his right to a lease which you had informed him he could hold, and which lease the Minister had the power to grant or refuse; but having granted, we maintain, as an act of right and justice, you should support our client in defending your power to grant such lease when questioned.

We have, &c.,

HENRY J. WITHERS & CO.

Minute on above.

By direction of the Under Secretary these papers are now forwarded to Mr. Curry in order that action may first be taken in a late letter from Mr. E. O. Smith. When this has been done the letter of Withers & Co. may be considered.—S.F., 14/10/81. Urgent.

No. 87.

H. J. Withers & Co. to The Under Secretary for Lands.

Sir,

11, Bridge-street, 17 October, 1881.

Upon receipt of your letter *re* compensation to J. J. Thompson, we wrote to him asking for particulars of what took place when he applied for his selection at Inverell. (Copy of our letter and his reply herewith.)

So many years having elapsed the Land Agent may not remember what actually took place. We do not think the agent would intentionally make a statement contrary to what he believed to be the case, but any person situated as he is, receiving applications every week, cannot be expected to remember everything that is said. Our client has always spoken of the agent in very high terms, and ready at all times to give information and assistance in pointing out land.

We again respectfully ask that the compensation may be given as applied for.

We have, &c.,

HENRY J. WITHERS & CO.

Minute on No. 87.

Lease Branch to place this with previous papers.—T.B., 18/11/81. Further correspondence with statutory declaration of J. J. Thompson now submitted, also Gazette of 27 March, 1877.—S.F., 1/11/81.

[Enclosure A to No. 87.]

A. J. Withers & Co. to Mr. J. J. Thompson.

Dear sir,

11, Bridge-street, Sydney, 4 October, 1881.

Will you kindly inform us who it was went to the Land Office, Inverell, and applied for the conditional purchase which should have been taken up at Warialda; also state plainly what took place between you, or the person who went with the application, and the Land Agent.

Did the Land Agent know at the time you applied that it was in the wrong district? Please reply to this by return.

We have, &c.,

HENRY J. WITHERS & CO.

[Enclosure

[Enclosure B to No. 87.]

Mr. J. J. Thompson to Messrs. H. J. Withers & Co.

Gentlemen.

Eastholm, Inverell, 10 October, 1881.

On Wednesday, the day before I selected, I went to the Land Office, Inverell, to get a form, and asked the Land Agent what district reserve No. 67 was in. He said he thought Warialda; and when I referred him to the Gazette he thought other ways, and that is all the information I could get. The Land Agent could not tell me. I made my application next day, Thursday, with written application, and there was nothing said further; no one applied for land as I know of. There was a man of the name of Ross looking over a map, and when I was leaving the office I heard him say he wanted to select part of reserve No. 67. However, I made an affidavit to all that passed, and sent it to R. L. Murray, M.P., which I hope will be sufficient for all. I do not understand these questions; there are some bad designing people who would do or say anything over this selection I believe. Sir, I wish you would take a note of what reports are lodged against me, and from whom; it may be useful. I think these parties will be doing harm to themselves. No doubt the Minister will see the whole. Trusting I have, &c.,

J. J. THOMPSON.

No. 88.

Memorandum.

WRIGHT's application 111 of 1877 is an undefined lease, and was not charted at the time it was dealt with; it, however, was applied for on the east of portions Nos. 79 and 80, and would therefore extend to portion No. 52 if granted entirely on the east. In my memorandum of 30 December, 1879, where I state a modification must be made, I of course was guided by Wright's description, which includes all the land between portions Nos. 79 and 80, and 52.—A. GALL, 19/10/81.

Minutes on above

Mr. Burt.—It appears that if Mr. Wright's description were closely followed his lease would sever that of Mr. Thompson.—H.C., 19/10/81. Wright's description is vague, inasmuch as it does not state how far easterly he wished the pre-lease to extend, but the pre-lease could have been charted to accord with the description, and prevented Thompson from getting more than 550 acres for a pre-lease.—J.B., 20/10/81.

No. 89.

Memorandum.

THE letter received from Mr. E. O. Smith, of the 5th instant, invites attention to the leases in the case, the principal facts of which, so far as they are concerned, it may not be undesirable to relate. J. J. Thompson, in May, 1877, selected, at Inverell, portions Nos. 82 and 83, parish of Bukkulla, and on the 29th September applied for a lease of 1,920 acres in right of them. The lease was approved by Gazette notice of the 27th November, as 77-34, but on account of the conditional purchases having been declared void was cancelled on the 17th November, 1879. Having, on the 6th March, 1879, reselected the portions at Warialda, the proper Land Office, he, on the 7th of that month, preferred a second claim, and lease 79-48 was, on the 23rd of the following May, granted to him. This second lease was also cancelled, on the 15th October, as the conditional purchases were, by the measurement of A. McDonald's selection 76-33, severed from the vacant Crown Land. Upon full discussion of the matter it was, however, decided that a means of access should be afforded by a road; a re-adjustment was accordingly made, and action was commenced to formally reverse the cancellation. This action was, apparently, however, interrupted, or only partly carried out, for although instructions issued to the Treasury for the cancellation of the refund voucher, there is nothing to show that either the lessee or the Land Agent was communicated with. The rent for the years 1880, 1881, and 1882 was paid into Suspense Account on the 29th ultimo (*vide* leases 81-4730).

The lease of Mr. F. W. Wright, to which Mr. E. O. Smith refers, 77-111, and which plays an important part in the case, was applied for on the 19th June, and gazetted on the 27th November, 1877. It was cancelled on the 22nd August, 1879, as it interfered with Thompson's first lease, 77-34, and the cancellation was reversed on the 17th November, 1879, when it was found that Thompson's lease was illegal. The rent upon it has been fully paid up. The lease was applied for on the east of portions Nos. 79 and 80, and if carried out fully in this direction would (what it may be suspected was intended) sever Mr. Thompson's lease, and consequently confine him to a comparatively small area. Being an undefined lease it was not, it seems, charted when approved, but placed in the position shown upon the enclosed tracing, in order (as it appears from a memorandum on 79-4982 and 81-786) to admit of Thompson's lease being granted. It is not apparent, however, that this arrangement received or was submitted for ministerial sanction; and what must be looked upon as an unfortunate circumstance, it does not seem that Mr. Wright was made acquainted with the action taken. He might possibly, therefore, say that he understood, when he received intimation on the 23rd January, 1878, that his lease was provisionally approved, that his description had been closely followed, and that, although informed on the 22nd August, 1879, of its cancellation, and on the 17th November, 1879, of reversal of cancellation, he received no subsequent communication which would lead him to think differently. This plea would, perhaps, receive some support from the fact that his claim was of prior date to the one of Thompson, thus leaving a way open for it to be urged that he should not be asked to give place to a subsequent applicant. As this suggestion has been made merely with a view to admit of the matter being fully considered, it may be, at the same time, pointed out that the second lease of Thompson was approved before the first one was cancelled, and that, having regard to an opinion recently given by the Attorney-General, the junction of the lease with the conditional purchase by what appears to be a road might not now be considered admissible. These facts are, however, apparently of minor importance, and so far as the latter point is concerned the objection could not be insisted upon, when it is remembered that McDonald's conditional purchase was measured without strict reference to his description, and on the understanding that its position would not affect the lease.

It will be now for the Secretary for Lands to decide whether Mr. Wright's lease shall be charted as designed to prevent the division of that of Mr. Thompson, and the rent paid into Suspense Account carried to revenue. And in support of this course, which, by the decision on 81-786, has, perhaps, already been partially approved, it may be mentioned that Mr. Wright does not seem to have been directly informed that the boundaries of his lease had been determined, and therefore any opinion he might say he formed upon the matter would start from mere inference.—H.C., 19/10/81.

Minutes on No. 89.

Forward a tracing to Mr. Wright showing the pre-lease 77-111.—C.O., 19/10/81.

No. 90.

The Under Secretary for Lands to Mr. E. O. Smith.

Sir,

Department of Lands, Sydney, 20 October, 1881.

With regard to your communication of the 5th instant, I have the honor to forward you here-
with a tracing which shows approximately the position which Mr. F. W. Wright's pre-emptive lease
77-111, in the district of Warialda, occupies.

CHARLES OLIVER.

No. 91.

Mr. R. L. Murray to The Secretary for Lands.

Sir,

Sydney, 11 November, 1881.

I have the honor to enclose a statutory declaration of William Ross and other documents
relating to the selection of J. J. Thompson, at Bukkulla, and to request that you will be pleased to recon-
sider this case.

If you will do so I have no doubt but you will see that even in case he did select at the wrong
Land Office, that would in no way affect the pre-lease which was granted to him by the Department.

I have, &c.,

R. L. MURRAY.

Minute on above.

The Under Secretary,—These letters should be registered and placed with the papers in this case,
and afterwards returned to me.—J.H., 14/11/81.

[Enclosure A to No. 91.]

In the Colony of New South Wales.

Declaration.

I, WILLIAM ROSS, of Rose Valley, near Inverell, in the Colony of New South Wales, farmer, do solemnly declare as follows:—

1. That, on the third day of May, one thousand eight hundred and seventy-seven, I attended at the Land Office,
Inverell, for the purpose of conditionally purchasing from the Crown 640 acres or thereabouts of land, situate in the county
of Arrawatta, and parish of Bukkulla, and being a portion of reserve number sixty-seven, gazetted as revoked on the twenty-
seventh day of March, one thousand eight hundred and seventy-seven.

2. That John Jackson Thompson, of Bukkulla, selector, and myself were both waiting at the said Land Office at the
same time, and at 10 o'clock on the morning of the said third day of May, one thousand eight hundred and seventy-seven, we
both entered the Land Agent's room immediately after the door was opened and tendered the deposit money for the said land
to the Land Agent, who then and there accepted the said John Jackson Thompson's money, and refused mine, for the reason
that the said John Jackson Thompson had the necessary application prepared, whereas I had not.

3. The said Land Agent gave the said John Jackson Thompson a receipt for the deposit money, and I then left the
office with the said John Jackson Thompson.

4. During the whole of the time the said John Jackson Thompson was in the said Land Office the said Land Agent
did not in my hearing say one word about the said John Jackson Thompson's application being made at the wrong office, or
about the land applied for being in another district.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an
Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition
of oaths and affirmations taken and made in various Departments of the Government of New South Wales and to substitute
declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Subscribed and declared at Inverell, this 1st day of
November, 1881, before me,—

WM. ROSS.

H. MUNRO, J.P.

[Enclosure B to No. 91.]

Mr. J. J. Thompson to The Secretary for Lands.

Sir,

Bukkulla, 5 November, 1881.

Since I made and sent in my affidavit, I am informed that a statement previously made by the Crown Lands Agent
at Inverell contradicts my sworn statement. I protest against any statement (by the Land Agent or any other person) being
entertained as evidence against me unless such statement is sworn to and a copy forwarded to me for a reply.

I want the matter cleared up with a view of proving the truth, and if the Land Agent's statement contradicts mine in
any particular way let him swear to it, and then I will have an opportunity of clearing it up. You know that in getting up my
case I have not power to call for men and papers to prove it.

I have, &c.,

J. J. THOMPSON.

No. 92.

Messrs. H. J. Withers & Co. to The Under Secretary for Lands.

Sir,

9, Macquarie-place, 29 November, 1881.

I do myself the honor to forward you declaration made by Mr. William Ross, that no warning
was given to Thompson by the Land Agent at Inverell when my client applied for the land.

I have, &c.,

H. J. WITHERS & CO.

(Per E.W.E.)

[Enclosure to No. 92.]

I, WILLIAM ROSS, of near Inverell, farmer, do solemnly and sincerely declare as follows:—That I was in the Lands Office, Inverell,
during the time that Mr. J. J. Thompson was there, and saw him give an application to the Land Agent, which he (the Agent)
received without warning or protest. I was standing so near both that neither could speak without my hearing what was
said. The date upon which the application I now refer to was made was the 3rd day of May, 1877. And I make this solemn
declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth
year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of Oaths and Affirmations
taken and made in various Departments of the Government of New South Wales and to substitute declarations in lieu thereof
and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

Declared at Inverell, this 25th day of

WILLIAM ROSS.

November, 1881, before me,—

H. MUNRO, J.P.

No. 93.

Messrs. H. J. Withers & Co. to The Under Secretary for Lands.

Sir,

9, Macquarie-place, 2 December, 1881.

We do ourselves the honor to request that the Treasury may be authorized to transfer the rent on pre-lease noted in margin, now held in Suspense Account, to Revenue Account.

J. T. Thompson
Warialda, 79-48
area 1,920 acres.

We have, &c.,

H. J. WITHERS & CO.,
(Per E.W.E.)

No. 94.

Mr. E. O. Smith to The Under Secretary for Lands.

Sir,

Sydney, 7 December, 1881.

I am in receipt of your communication of the 20th October last (Leases 81-4,967) enclosing a tracing of F. W. Wright's pre-emptive lease 111 of 77, being 429 acres at Warialda.

I have to ask your attention to your letter (79-4,086 Leases) addressed to me on the 15th November, 1879, respecting this lease, and to point out that this lease, without any reference to or communication with the lessee, has been very much altered and interfered with; not only so, but a gazetted pre-lease, 100 of 1879, held by Wyndham and Wright, in virtue of portion No. 27, parish of Arthur's Seat, appears to have been entirely ignored by your Department; and further, an application for a pre-emptive lease, in virtue of portion 81 of 80 acres, formerly Graham's, now Wyndham's, was refused on the ground that no land was available, and yet it is now sought to give Thompson land in the same position, in virtue of his conditional purchase, which is entirely separate from the land in question.

Upon reference you will find that Macdonald's (now Hutchison's) conditional purchase of 150 acres, being portion No. 104, was applied for as joining Wyndham's portion No. 84 of 77 acres, and so at present appears on the ground; but, from the tracing, it appears that the position of that conditional purchase has been shifted so as to leave a road 2 or 3 chains wide between it and portion No. 84, by which, no doubt, access is given to Thompson's conditional purchase, and this is the mode by which your Department seeks to enable Thompson to exercise pre-emptive right over land which in no way adjoins or is connected with his, and part of which had previously been refused to Wyndham, though it adjoined his land, and another portion thereof had been granted to Wright in 1877, or four years ago; and this, as previously stated, has been done without any reference or intimation to Wyndham and Wright, the persons most concerned, and whom you informed in November, 1879, that their holding would not be interfered with, in belief of which they have entered into engagements which Thompson has threatened to interfere with, under cover of your Department having given him possession of a large portion of Wright's lease.

I have to point out that my clients have never sought to exercise any right over land in the locality under notice, excepting the numerous portions purchased and leased by them and described by surveys and Gazette notices, and that they have been in such a position for some years, and are fully aware that there is no precedent for the granting of a pre-emptive lease of the shape, and under the circumstances, of that sought to be given to Thompson; indeed, no surveyor or other officer of the Department would have submitted such a project, as he would know that it could and would not be entertained for a moment.

It is the intention of my clients to continue the occupation of their pre-emptive lease as gazetted in 1877, and confirmed in November, 1879; and they desire to express their surprise and regret that your Department has endeavoured so seriously to interfere with their interests, and trust that Thompson may at once be informed by you in terms of your letter to me of the 15th November, 1879, thus averting the probability of vexatious and expensive litigation which must ensue if your office does not confirm my client in his rights.

I request that you will be good enough to give this matter your earliest attention, so as to relieve Messrs. Wyndham and Wright from the serious inconvenience and annoyance which they now so unjustly suffer.

I have, &c.,

ERNEST O. SMITH.

No. 95.

Memorandum.

Thompson & Wright.

THE settlement of this matter would appear to depend entirely on the form of Wright's pre-lease, No. 111 of 77, and the interpretation of his description, viz.: "Adjoining the eastern boundary of portions Nos. 79 and 80."

Being an undefined lease, it was never delineated on the map till apparently the 24th February, 1881 (Leases 81-786). When Thompson's lease was first charted it erroneously included 111 of 77, and it was apparently only when the whole matter became ventilated that Thompson's was amended, and Wright's charted, in the form shown on tracing A herewith.

Though originally Thompson's lease was applied for three months subsequently to Wright's, both were gazetted on the same date, and would consequently be dealt with concurrently. Such being the case, the leases would no doubt have been charted so as to admit of both claims being satisfied, and would, in all probability, have been approved by the Minister, but, as has been pointed out, Ministerial approval of the form was not obtained.

Thompson had to make a second application, on the 7th March, 1879, and being caused through no fault of his, he may be deserving of some consideration, otherwise Wright has almost two years' precedence in the date of application, and it may be held that he had an undoubted claim to have his lease charted so as to extend easterly to the travelling stock reserve.

In the event of this, I have prepared a tracing (B) showing how the land must be disposed of to the different applicants. The red lines show Wright's lease of 111 of 1877; the blue lines show all the land available for the satisfaction of Thompson's claim (437 acres); and the yellow lines show pre-lease No. 79-100, provisionally gazetted 16th December, 1879, and referred to in Leases 81-6,584. If

If it be decided that the leases are to remain as shown on tracing A, then the action of the Department in refusing Graham's application for pre-lease for portion 81 is correct. Thompson's being of prior date, and the lease No. 79-100 (only provisionally gazetted), referred to by Mr. Smith, will have to be cancelled, as 48 of 1879 severs the portion (No. 27) from contact with Crown Land.—J.B., 21/12/81.

No. 96.

Memorandum.

THE question in regard to the leases in this case are now submitted for decision.

The leases referred to are 77-111, 79-48, 79-20, and 79-100. Of these, the first two have called for special attention, and the leading facts in regard to them have already been set forth in a previous memorandum of the 19th October last. The following schedule shows the dates upon which the four leases were claimed, and the dates upon which they were notified as approved in the Government Gazette:—

Lease.	Area.	Applicant.	Date of Application.	Date of Gazette.
	Acres.			
77-111	429	F. W. Wright.....	19th June, 1877	27th November, 1877.
79-48	1,920	J. J. Thompson	7th March, 1879	23rd May, 1879.
79-20	240	J. Graham	29th May, 1879	15th July, 1879.
79-100	258	Wyndham & Wright.....	19th June, 1879	16th December, 1879.

The case hinges upon the question whether Mr. Wright's description covers land running from the eastern boundaries of portions 79 and 80 to the west boundary of travelling stock reserve 337, and involves the question whether, assuming that it does, the Government have a right to grant the lease strictly in accordance with the description. The history of the case, so far as its practical bearings are concerned, dates from lease 77-111, as this lease was (without regard to any invalid claim) the first applied for. The claimant's description is 429 acres adjoining the eastern boundaries of said portions Nos. 79 and 80.

The question whether the Department has a right to grant a lease without regard to the claimant's description seems to admit of a reply in the affirmative, and indeed it would appear that the advancement of a claim without any description whatever would not render it open to much objection. A description of the land is, however, desirable, as in a case where the land in several directions is available the Department might have no objection to grant it to suit the requirements of the applicant, and it may be presumed that this consideration led to provision being made for a description in the form of application. If it be conceded that a description is not imperative, it seems to follow that when one has been furnished it need not necessarily be followed even when the land is available; and this appears to have been arranged for by the 36th clause of the Act of 1875, which "provides that a lease shall be taken, occupied, and held subject to the several conditions prescribed in the Occupation Act, and to the boundaries thereof, being defined as provided therein, or by any regulations." The regulation which bears on the subject is No. 1 of part 11, and it sets forth that the land "shall be taken where practicable in a block of rectangular form, of which the external lines shall be directed to the cardinal points by compass, except in such cases as it is found that existing lease boundaries, alienated or reserved land, or other obstacles, render such a course inadvisable or impracticable."

The question, however, has first to be determined—whether Mr. Wright's lease would, if charted in accordance with his description, extend to the travelling stock reserve, and this question is by no means free from doubt. Had the matter of charting come forward without reference to Thompson's lease 79-48, it would be safe to say that the lease would have been located in this manner, but the description is sufficiently vague to admit of a modification such as has already been made being carried out. It might not, however, be desirable to refine too much in a case of this nature; but, at the same time, it is pointed out that although the lessee has described the land to the east, he has not stated how far in that direction he wished to go. In any circumstances, after having extended in that direction, it would have to extend to the north or the south to make up the area, and as in the position shown on tracing A it extends to the east and north, the question seems to be whether it should extend fully in the direction described before diverging in any other. This point is, of course, a somewhat nice one. The circumstances most strongly in favour of Wright is that his is the first claim; but, on the other hand, his lease has only recently been charted, no tracing has been forwarded to the Land Agent, and he cannot therefore say (whatever he may urge in reference to his description) that the position of it has been departed from. In view of these considerations, and having regard to the fact that if lease 77-111 be charted fully up to the reserve Thompson will be confined to a comparatively small area, there appears sufficient reason, it is submitted, to take advantage of any ambiguity of description, and allow Thompson's lease to stand. The question as to lease 79-48 being connected with the land in right of which it was granted by only a road, and being separated by McDonald's conditional purchase, does not call for special comment, as that purchase was measured without reference to the description, and Thompson has (what has already been conceded) no right to suffer through it. The other leases in question are 79-20 and 79-100, and both being of subsequent date to 77-111 and 79-48, are dependent upon them. Lease 79-20, claimed in virtue of portion 81, has been cancelled, and this action was correct, as the vacant land was absorbed by Thompson's prior lease 79-48; and, as pointed out by Mr. Burt, 79-100 will have to be cancelled if Thompson's lease should remain intact, as that lease will cover any adjoining land; but should lease 77-111 be extended to the reserve the land to the north of portion 27, in right of which 79-100 has been claimed, will of course become available.

H.C., 22/12/81.

Minutes on above.

By the Under Secretary for Lands:—A glance at tracings A and B should, I think, be sufficient to decide this case. I am satisfied that had Wright's lease 77-111 been charted when granted it would have been defined as shown on tracing B, and having been so defined would have prevented J. J. Thompson's lease 79-48 being granted, as shown on tracing A. The explanation of the present position of the two leases

leases is apparently this: Mr. Thompson's application having been received, it was thought desirable to comply with it, and with this view the first attempt was made to locate Mr. Wright's lease. It then became evident that there was only one way of charting it if Mr. Thompson's lease was to be complied with, and that was as shown on tracing A. It will scarcely be asserted that the form of lease shown on tracing A is a very reasonable interpretation of Mr. Wright's description, and certainly not as reasonable as that indicated by tracing B. In addition to facts just stated, it is pointed out that Mr. Wright applied for the land when there were no conflicting interests, and can fairly claim that the lease granted should embrace the land which I think it may be maintained he applied for.

It is to be regretted that this case should have remained undetermined for so long, but I see no other course to pursue than to recommend that Mr. Thompson's lease be confined to the area south of lease 77-111, as shown on tracing B.—C.O., 23/12/81.

By the Secretary for Lands:—Wright, I understand, to have been the first applicant for a pre-lease. He therefore should have the land applied for, which is east of his eastern boundary. There does not appear to be 429 acres available where he applied for it; therefore I think he should have what is available, and lying east of his land.—JOHN R.

Pre-lease No. 77-111, F. Wright, regazetted as 320 acres, 10th March, 1882, in accordance with the above decision. Pre-lease No. 79-48, J. J. Thompson, has also been regazetted, same date, as 460 acres. Amended tracing of both leases herewith, for transmission to Land Agent.—J.P.P., 17/3/82.

No. 97.

Mr. Henry J. Withers to The Secretary for Lands.

Sir,

9, Macquarie-place, 27 December, 1881.

The case of J. J. Thompson is again to be submitted to you, to decide whether the lessee of the run, Mr. Wright, shall be permitted to have his pre-lease granted in such a way that it will prevent my client getting the full area of his lease.

It appears to us objectionable to allow either squatter or selector to take a pre-lease in a way that prevents another receiving the full area when there is plenty of available land to satisfy both applications. In this case I applied some time ago to have Wright's application so amended that both could get the full area, and a tracing was submitted by the Survey Branch to you, showing how it was proposed to grant them. You approved of the design upon a letter in which I protested against Hutchinson's conditional purchase being allowed to bar Thompson's right to a pre-emptive lease.

The lessee's agent has now urged that because Mr. Wright applied for his land in a certain form that it must be so granted. In reply to that, I respectfully submit that it is optional with you, sir, to either allow it as applied for, or to so amend it that all the available land can be leased. Had the law or practice of the Department supported Mr. Wright I would not protest, but in all cases where it was evident that the application had been described with the purpose of preventing a selector having a lease the Department has recommended, and invariably the Minister has approved, that as land was available both should be allowed. By reference to the papers you will have evidence of the trouble Thompson has been put to. Messrs. Wyndham and Wright did their best to ruin him, and now they are trying to reduce his lease to the smallest possible area.

I may mention that in this case the only approval given to either of these leases was when the tracing was submitted to you, showing how it was proposed to grant them; therefore the attempt now made by Mr. Wright is to alter that approval, and allow him to block Thompson from getting his. A tracing was sent to the Land Agent, I believe, and, according to the register, Thompson was informed of the approval, and the cancellation of lease reversed, rent for which is in Suspense Account. We submit that interests of the country will be best served by the Minister retaining to himself the right of amending any description given for a pre-lease.

The action now urged by Mr. Wright, and if acted upon, will form a bad precedent, and enable others to extend leases from freeholds in long strips, thereby preventing the settler obtaining what is of more value to him than his selection for grazing.

In conclusion, I must ask you to take into consideration what my client has gone through since 1877. He has complied with the Act in every way, so far as he knew; also, that the design for these leases will not matter to Mr. Wright, except that by allowing him to retain it as described he keeps himself what Thompson would get if an amendment was allowed, viz., about 1,400 acres of land.

I have, &c.,

HENRY J. WITHERS.

Minute on above.

No. 98.

Mr. J. J. Thompson to The Under Secretary for Lands.

Sir,

Bukkulla, 9 January, 1882.

Last March I sent £12 5s. to be paid into the Department as rent on my pre-lease to my conditional purchase of 640 acres, county of Arrawatta, near the boundary of parishes Bukkulla and Arthur's Seat. The money was to have been paid in by Mr. Withers, Land Agent, and I have got no notice or receipt from Withers or the Department whether the rent has been paid in. Sir, please to let me know if the rent has been paid into the Department, as it would endanger my claim to the pre-lease if the rent has not been paid in.

I have, &c.,

J. J. THOMPSON.

Minutes on above.

Lease 79-48, cancellation revoked, *vide* 81-1, 149 leases; attach papers quoted and connect.—C.H., 28/1/82. Carry on papers and forward to Mr. Burt.—H.C., 3/2/82. Urgent.

The Under Secretary for Lands.—H.W., B.C., 13/1/82.

No. 99.

Messrs. Henry J. Withers & Co. to The Under Secretary for Lands.

Sir,

9, Macquarie-place, 1 February, 1882.

On behalf of J. J. Thompson, we do ourselves the honor to request that the sum of £600 may be placed on the next Estimates as compensation for law expenses applied for some time ago.

Our client has been nearly ruined in this matter, and only asks now for money actually expended in defending the action brought against him.

We have, &c.,

HENRY J. WITHERS & CO.

No. 100.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Sydney, 2 February, 1882.

Has the Minister for Lands finally approved of the description of Angus M'Donald's conditional purchase as now measured and shown on the map, and has he notified the approval of the conditional purchase (clause 14, Act of 1875)? Please to give a written answer to the above.

I have, &c.,

COLIN MACDONALD,
(*Pro J. J. THOMPSON*).*Minutes on above.*

The writer should be requested to give further particulars of the purchase (area, district, and date of selection).—J.W., 8/2/82. Mr. Thompson should be requested to state whether his letter refers to the conditional purchase of Angus M'Donald's conditional purchase 76/33, Warialda, 13th April, 1876, 150 acres, in parish of Bukkulla, and if so, informed that the purchase has not been finally approved.—C.N., 22/9/82. By the Chief Commissioner:—There is no necessity for writing again.—A.O.M., 30/9/82.

No. 101.

The Under Secretary for Lands to Mr. E. O. Smith.

Sir,

Department of Lands, Sydney, 17 February, 1882.

Having reference to your communication respecting Mr. F. Wright's pre-emptive lease, 77/111, in the district of Inverell, I have the honor to inform you that your client's claim has, in conjunction with the claim of Mr. J. J. Thompson, been taken into consideration by the Secretary for Lands, who has decided that, as Mr. Wright applied for land to the east of portions 79 and 80, parish of Bukkulla, his lease shall be charted in that direction, without deviating in any other way. It will therefore occupy a position extending from the eastern boundary of the portions mentioned to travelling stock reserve 337, and, as the boundaries have been limited, will comprise only 320 acres, and not 429 acres, as applied for. At an early date the lease will be regazetted, together with the lease held of Mr. Thompson, who, on account of the intervention of your client's lease, will be confined to an area of about 460 acres.

I have, &c.,

CHARLES OLIVER,
Under Secretary.

No. 102.

Mr. C. Macdonald to The Secretary for Lands.

Sir,

Breeza, 24 February, 1882.

I am going to Sydney to act as Thompson's agent. Thompson's case has been under notice in the Department for the last three years, and is undecided. Thompson knows little or nothing of the documents, letters, or evidence that is opposed to his claims, and my object is to see these, and, if necessary, to get them; and I would respectfully request that the papers be got ready so that they can be found when I am there. If possible, I start on Monday next. The cases have no doubt been a great deal of trouble to the Department, as well as Thompson. Hoping you will see that the papers are in these places, as I have to go to Sydney specially to see them,—

I have, &c.,

COLIN MACDONALD.

[Enclosure]

[Enclosure to No. 102.]

Sir, I hereby authorize Colin Macdonald to act as my agent in my claim against the Government for compensation, and my claim to a pre-lease to my 640 acres, the latter claim being disputed by Messrs. Wyndham and Wright, of Karoola.

Bukkulla, February, 1882.

I have, &c.,

J. J. THOMPSON.

No. 103.

Mr. C. Macdonald to The Secretary for Lands.

Sir,

Sydney, 8 March, 1882.

As agent for J. J. Thompson, I respectfully request that Frederick W. Wright's pre-lease should be cancelled. It is a dummy pre-lease. Percy Wright applied for the pre-lease in favour of F. Wright; and I know for a fact that Percy Wright and E. S. Wyndham used the pre-lease the same as the rest of the run, their sheep, in care of a shepherd, occupying the land. Percy Wright applied for another dummy pre-lease in favour of John Graham; and I know for a fact Wyndham and Wright's sheep, in charge of a shepherd, occupied part of Graham's selection, and Graham did not require a pre-lease. I believe he had only a horse, and no other stock. I also submit that pre-leases must be applied for by the person who holds the land; and the pre-lease must also be occupied by the same party.

I have, &c.,

COLIN MACDONALD.

P.S.—Pre-leases are only available when applied for by the person who holds the conditional purchase, or auction purchase (*vide* clause 36 (Act of 1875)).

Minutes on No. 103.

Mr. Macdonald may be informed that the law does not enjoin that an application must be made in person; and that it calls upon the Department to inquire whether the lease is occupied by the registered lessee or another person.—H.C., 9/3/82.

By the Under Secretary for Lands:—Inform.—C.O., 13/3/82. Mr. Burt, 14/3/82.

Mr. Curry,—Leases 77-111 and 79-48 have both been re-gazetted, 10th March, 1882. Amended tracings herewith for Land Agent. By the decision on leases 82-1,011, lease No. 79-100 can be charted. Tracing is therefore enclosed, which might be forwarded to Land Agent.—J.B., 17/3/82.

Mr. Curry,—Leases 77-111 and 79-48 both stand in Warialda in the books, and should, perhaps, be transferred to Inverell prior to sending the tracings. Lease 79-100 is paid up for 1882, and has been transferred to Inverell already; the tracing may, perhaps, be forwarded. The rent in arrear on 79-48 may also, perhaps, be credited for 80 and 81 on original area, and for 1882 on reduced area; fines for 1880 and 1881 to be deducted, and the balance refunded.—C.H., 27/3/82.

Mr. Burt,—Leases 79-48, and 77-111, and 79-100 were in the district of Warialda when applied for it appears. Are they all now in the district of Inverell?—H.C., 20/4/82. Yes.—J.B., 20/4/82.

The action suggested in the memorandum of the 27th May, it is submitted, be carried out. But it may be thought desirable to refund the rent paid in excess, not from the date of re-gazette, but the original notification, and accept the rent for 80 and 81 without fine, seeing that the cancellation of lease 79-48 was not formally reversed, and the rent was paid into Suspense in September, 1881.—H.C., 21/4/82.

By the Under Secretary for Lands:—The course suggested may be pursued.—C.O., 22/4/82.

No. 104.

Gazette Notice.

Defined Pre-leases.

Department of Lands, Sydney, 10 March, 1882.

It is hereby notified, for the information of all persons concerned, that the pre-leases enumerated in the subjoined list, which have been approved under the Lands Acts Amendment Act of 1875, and Further Amendment Act of 1880, subject to modifications or amendments, have been, on further examination, modified or amended.

2. The amounts mentioned are the rents for one year, and date from the original notification. All subsequent payments, as renewals of rent, must be made in the month of September of the year preceding.

3. Tracings may be seen at the different local Land Offices.

Abstract No. of lease, 111-77; date of original notification, 27 November, 1877; lessee's name, Frederick Wright; address, Bukkulla; area of purchase in virtue of which lease is granted, 143; area, 320 acres; rent, £1; county Arrawatta, parish Bukkulla, district Inverell; office No. of application and papers, L.A. 77-2,040.

Abstract No. of lease, 48-79; date of original notification, 23 May, 1879; lessee's name, J. J. Thompson; address, Bukkulla; area of purchase in virtue of which lease is granted, 640 acres; area, 460 acres; rent, £1 8s. 9d.; county Arrawatta, parish Bukkulla, district Inverell; office No. of application and papers, L.A. 79-603.

No. 105.

The Under Secretary for Lands to Mr. C. Macdonald.

Sir,

Department of Lands, Sydney, 14 March, 1882.

I have the honor to acknowledge the receipt of your letter of the 8th instant, requesting that Mr. F. W. Wright's pre-emptive lease 77-111, in the district of Warialda, might be cancelled; and, in reply, to state that the reasons you have urged in support of your request would not warrant such a course, as the law does not enjoin that an application for a pre-emptive lease must be signed alone by the applicant or tendered in person; nor does it require this Department to inquire whether the land comprised in the lease is occupied by the registered lessee or another person.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

No. 106.

No. 106.

Mr. J. J. Thompson to The Secretary for Lands.

Sir,

Bukkulla, March, 1882.

I respectfully submit Frederick W. Wright cannot hold a pre-lease to portions 79 and 80, parish of Bukkulla, because Frederick Wright has not applied for one; *vide* Act of 1875, 36th clause, and clause 16 of the Crown Lands Alienation Act 1861, and ditto, clause 10, part 5. The Act does not enable Percy Wright to apply for a pre-lease in favour of Frederick W. Wright, to be occupied by Percy Wright and E. S. Wyndham, as has been done in this instance. To enable Frederick Wright to get a pre-lease, he would have to apply personally for it, and then he himself could hold and occupy it, but no one else.

2. I also submit that my claim should be submitted to arbitration, as Wright's description is vague, and does not specify how far east it extends, and if it extends far enough to interfere with my claim (even if Wright's application was a *bona fide* one, and not a dummy claim, as I maintain it is); *vide* Crown Lands Alienation Act of 1861, and 6th clause, ditto, clause 12, part 6. All pre-leases being held under Crown Lands Alienation Act of 1861, clause 12, part 5, and clauses 16 and 18 (*vide* clause 36 of Act 1875). My claim should be submitted to arbitration, because it is not stated in Lands Act whether selections must be taken in the police or pastoral district. I believe my selection is on the Inverell side of the pastoral district, and the question arises, do I not hold the pre-lease back to the date of my first application, and then Wright's pre-lease would be subject to an existing claim which I previously had upon it (*vide* clause 36, Act 1875). My first pre-lease was not forfeited, but cancelled, and the one granted to Wright was also cancelled. I hope you will see that the Act never intended pre-leases to be dummied and applied for, held, or occupied by any other person but the purchasers, as I can prove has been done in this case. Please to put this with the papers connected with my case; it may be called for in Parliament.

I have, &c.,

J. J. THOMPSON.

No. 107.

Mr. C. Macdonald to The Secretary for Lands.

Sir,

Brecza, 21 March, 1882.

I beg to draw your attention to the fact that the signatures to the application for a pre-lease (alleged to have been made by John Graham, on the 29th May, 1879, parish Bukkulla) has the signatures pasted on. I had a genuine signature of John Graham's, and compared it with the one on the application, and I am satisfied they were not written by the same person; the one on the application is written in a tolerably clear and steady hand, very much like the signature of Percy Wright (underneath it). The signature which I have (and which I can prove to be genuine) is written in a very bad, cramped, and irregular hand, very much worse than the writing of Percy Wright. It can be proved that Percy Wright had possession of documents connected with John Graham's conditional purchase. Percy Wright paid John Asimus the price of the selection, and John Asimus signed the transfer and handed it to Percy Wright. John Graham (the alleged purchaser) was not present, and made a bargain with John Asimus about the conditional purchase. R. L. Murray, M.L.A., has instructions to ask if this letter has been received, and get a reply either officially or through Parliament. I may add that Wyndham and Wright used a portion of John Graham's selection as part of their run, and that I believe John Graham had no stock except one horse. With regard to the pre-lease alleged to have been applied for by F. W. Wright, it is an application for three times the area (not part) of his purchased land on the east from the said purchased land. I respectfully submit that there is plenty available land to give him the full area by granting him a pre-lease on the east a little wider than the purchased land, and, if he is a *bona fide* applicant, he will not want a smaller pre-lease than applied for; and by granting the pre-lease in this form it would not interfere with J. J. Thompson, as a small space could be left to adjoin it to the rest of his pre-lease. I may suggest that the Department should write to Frederick W. Wright to know if he has any reasons for wanting a smaller pre-lease than he applied for before granting him a part only. F. Wright's application does not state that the pre-lease is to be no wider than the purchased land; no particular width is stated, nor is the depth it is to have (easterly) stated; and there is plenty of available land to give a pre-lease as large as the applied for, and the pre-lease would be to the east of the purchased land, and his application complied with to the very letter, without interfering with Thompson's claim. Wright's application cannot be complied with to the letter without granting him the area applied for when the land is available, and as he did not specify any particular width or depth. I do not know if there are any letters from Wright or Mr. Smith, Wyndham and Wright's agent, requesting to reduce the size of the pre-lease alleged to have been applied for by F. Wright. If there is such a letter, I did not see it; and such letter, if it existed, would form an interesting public document, well worth printing by the Government in the interest of the public. I know Thompson or his agent did not write to have it reduced. Whatever flaws there are in Thompson's claim to the pre-lease were caused by Wyndham and Wright taking advantage of mistakes of the Department. I respectfully submit that, as F. Wright's claim to a pre-lease (that would interfere with Thompson's) is not clearly established, that both should be allowed the full area of their claims submitted to arbitration (*vide* 6th clause, Crown Lands Office Act 1861), as all pre-leases are held under this Act. The course I have suggested above would do justice to Thompson and no injustice to F. Wright.

I have, &c.,

COLIN MACDONALD.

P.S.—Supposing that F. Wright's claim to a pre-lease is a good one, there are no obstacles to its being granted in rectangular form (as shown on the tracings the western end is not rectangular); and even if his description was clear, it is still left to the Minister's discretion whether it is advisable to grant it in the form applied for (first pre-lease regulations, and I believe pre-lease regulations are law—Crown Lands Alienation Act, 36th clause); and even if F. Wright's alleged pre-lease did adjoin the travelling stock road as proposed, I submit for your decision whether the part of the road which would intervene between one part of Thompson's pre-lease and the remainder should be a bar to his getting the whole area applied for (clause 36, Act 75). I hope you will excuse my mentioning classes, &c.; but, as every point has been used against my client, I wish to do the same to protect him. Please to put this letter with the papers connected with Thompson's case.

I have no objection to this being read or copied by Wyndham and Wright, or their agent.

COLIN MACDONALD,

(Pro J. J. THOMPSON).

No. 108.

No. 108.

Mr. Colin Macdonald to The Under Secretary for Lands.

Sir,

Breeza, 17 April, 1882.

When I was in Sydney, as Thompson's agent in the compensation case, you stated that you were my opponent*, and I have long ago concluded it was useless for my client to appeal for justice to his opponents when they were virtually his judges as well. I advised him to appeal to Parliament, and to draw up a statement of his case for that purpose. Although we are opponents, it is useless for either party to raise points which cannot materially affect the case in the end. One point raised against my client (the evidence of the Inverell Land Agent) will, if persisted in, only have the effect of giving trouble to the Department and myself, and no benefit to either. I consider his statement too absurd to require refuting, and if it did, Ross's last declaration does so effectually.

In the first place, Cardew declares "he told Thompson Warialdi was the place," implying that Cardew referred to the point, and this in the face of the fact that Cardew has been accepting applications wholesale which were out of his district before and after this application. The Land Agent states that "Thompson persisted, and that he (Cardew) could not reject the application in the face of the description in the Gazette," implying that if the Gazette had been right he would have rejected it; and yet this was the only one of the numerous selections taken wrongly in which he had that excuse, and he did not reject them. Cardew does not state whether it was Wednesday or Thursday on which the discussion as to district took place, and by suppressing that tries to make it appear that Thompson was careless, and incurred the responsibility himself by neglecting the warning Cardew was so careful to give. Cardew omits to state whether the point had been previously raised in Inverell, and whether by himself or selectors. The real truth is, the point was raised by selectors before either Cardew or Wyndham and Wright raised it, and Cardew's practice of accepting applications in that locality had the effect of causing not only Thompson, but also the first party in Inverell who drew attention to the district boundary to go to the wrong office to select. The party who raised the doubt in Thompson's mind as to the proper district went to Inverell the same day to select the same land; and Thompson went to Cardew the day before selecting to clear a doubt which, if Cardew could clear up, would have saved Thompson from great loss and the Department some trouble. Among the large number of selections taken in that locality some two or three were taken in the right district previously, but they have to thank their own carefulness, not Cardew. Look on the map (county Arrawatta, on the Warialdi side, on the Karoola, Arthur's Seat, Bannockburn, Denton Vale, Graman, and Elsmore Runs) and see if Cardew has not made a practice of accepting applications in the wrong district, in an enormous number of cases, between 1861 and 1878, and if you look to the descriptions you will see the absurdity of Cardew trying to put the responsibility on the only selector who lost a Supreme Court action by it.

There are other runs on which the selections are taken in wrong district, such as the Bukkulla, Egerton Runs, &c., &c. The Land Agent is suppressing the fact that Thompson was almost (if not) the only person who went to inquire as to the proper district at the Inverell office, and that he would not have gone to Inverell to select only for the erroneous practice of Cardew in taking applications without referring to the map and the mistake in the Gazette. I intend drawing up a statement of Thompson's case to be submitted to Parliament, and inviting Thompson's opponent (the Minister) to refute any part of it. You have ample evidence in the descriptions of conditional purchases, &c., &c., that Cardew's evidence is absurd. If you let me know that you do not intend to challenge Thompson's statement on this point, I can then avoid raking up mistakes in other cases on this point, otherwise I cannot. Please let me know one month before Parliament meets.

I have, &c.,

COLIN MACDONALD.

Minutes on above.

This is an extraordinary letter throughout, but the portion marked * is untrue.—C.O., 19/4/82.
Submitted.—C.H.G., 28/4/82. Mr. Freeman,—The other papers in the case were recently forwarded to you.—H.C., 3/5/82—10/5/82.

No. 109.

Declaration by John Jackson Thompson.

I, JOHN JACKSON THOMPSON, of Bukkulla, in the Colony of New South Wales, do solemnly and sincerely declare as follows:—That I requested Surveyor Blunt to leave a vacant space and a road between my 640 acres and Hutchinson's land, and the said surveyor surveyed Hutchinson's land and joined it to mine without leaving any road to my land; that I know it to be true, and can declare to it. That by joining Hutchinson's land to mine the surveyor excluded some good black soil from Hutchinson's selection and included some bad land. And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Subscribed and declared before me, at Edger-

JOHN JACKSON THOMPSON.

ton, this 20th day of April, 1882,—

W. F. FITZGERALD, J.P.

No. 110.

The Under Secretary for Lands to Mr. F. W. Wright.

Sir,

The Under Secretary for Lands to The Crown Lands Agent, Inverell.

Sir,

Department of Lands, Sydney, 27 April, 1882.

I am directed to invite your attention to a notice in the Government Gazette of the 10th March, 1882, from which you will see that the area of Mr. Frederick Wentworth Wright's pre-emptive lease, No. 77-111, in the county of Arrawatta, approved on the 27th November, 1877, has been reduced from 429 to 320 acres; and I am, at the same time, to forward you, for public inspection, a tracing which shows approximately the position which the lease at present occupies.

The rent in excess and fine consequent upon the reduction now made (calculated from 10 March, last) has been authorized for refund; and, in order that you may enter full particulars in your register, the several amounts which form the sum to be returned have been clearly shown in the marginal schedule.

I have, &c.,

H. CURRY,

(For the Under Secretary).

Inverell, C.P.
79-48, 460 acres
23 May, 1879.

I am directed to request that you will be good enough to refund to Mr. J. J. Thompson, of Inverell, the sum of £4 11s. 3d., credited at the Treasury on the 3rd April, 1879, being the rent over-paid on the pre-emptive lease particularized in the margin, for 1879. The lease has been reduced from 1,920 to 460 acres.

I have, &c.,

H. CURRY,

(Pro Under Secretary.)

No. 124.

The Under Secretary for Lands to Messrs. E. S. Wyndham and P. P. Wright.

Gentlemen,

Department of Lands, Sydney, 27 April, 1882.

With reference to pre-emptive lease No. 79-100 of 258 acres, in the county of Arrawatta, parish of Bukkulla, in the name of E. S. Wyndham and P. P. Wright, I am directed to inform you that a tracing showing the approximate position of the lease has this day been forwarded to the Crown Lands Agent.

I have, &c.,

H. CURRY,

(For Under Secretary.)

No. 125.

The Under Secretary for Lands to The Crown Lands Agent, Inverell.

Sir,

Department of Lands, Sydney, 27 April, 1882.

With reference to pre-emptive lease No. 79-100 of 258 acres, in the county of Arrawatta, standing in the name of E. S. Wyndham and P. P. Wright, I am directed to transmit to you a tracing showing the approximate position of the lease.

I have, &c.,

H. CURRY,

(For Under Secretary.)

No. 126.

The Under Secretary for Lands to Mr. F. W. Wright.

Sir,

Department of Lands, Sydney, 27 April, 1882.

I am directed to inform you that the area of your pre-emptive lease, specified in the margin, was, by notice in the Government Gazette of the 10th March last, reduced from 429 to 320 acres; that a tracing showing approximately the present boundaries of the lease has been forwarded for public inspection to the Local Crown Lands Agents; and that the Under Secretary for Finance and Trade (to whom any communication respecting the money should be addressed) has been requested to refund you the sum of 7s. 7d., being the amount of rent and fine in excess (consequent upon the reduction in area that has been made) for the year 1882.

I am to explain that the action has been taken as the Secretary for Lands has decided that, having regard to the description in your application, you are entitled to only so much land as is included in lines running east of the portions in virtue of which the lease was granted to travelling stock reserve No. 337, notified 31st July, 1874. The effect of this decision has been to reduce the area of Mr. J. J. Thompson's lease 79-48 from 1,920 to 460 acres. As your lease, as now charted, severs a large part of the land which Mr. Thompson desired to hold from that to which he has been limited, I have to add that, owing to the boundaries of the Warialda District having been altered since the date of your application, your lease is now situated in the district of Inverell, and that any future payments should be made to the Crown Lands Agent at that place.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

No. 127.

The Under Secretary for Lands to Mr. J. Thompson.

Sir,

Department of Lands, Sydney, 27 April, 1882.

I have the honor to inform you that the cancellation of your pre-emptive lease, specified in the margin, has been reversed, and the area represented by it reduced from 1,920 to 460 acres. This latter action has been taken in view of a claim made by Mr. F. W. Wright, on the 19th June, 1877 (prior to the advancement of any recognised claim of yours), to a pre-lease which was granted on the 27th November, 1877, as 77-111, and which the Secretary for Lands has decided shall occupy an area of 320 acres, starting from the eastern boundaries of portions Nos. 79 and 80, in the parish of Bukkulla, county of Arrawatta, and extending east to travelling stock reserve 337, notified 31st July, 1874. The lease has been located in this position as it was described to adjoin the eastern boundaries of the portions mentioned, and the effect of it has been to sever a large part of the land you desire to lease from that to which you have been limited. The Under Secretary for Finance and Trade has been requested to refund you the sum of £18 5s., being the amount of rent paid in excess consequent upon the reduction in area which has now been made.

I have to add that, owing to boundaries of the Warialda District having been altered since the date of your application, your lease is now situated in the district of Inverell, and that all future payments should be made to the Land Agent at that place.

A tracing showing, approximately, the boundaries of your lease has been forwarded to the Land Agent at Inverell.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

No. 128.

Mr. J. J. Thompson to The Secretary for Lands.

Sir,

Eastholm, Bukkulla, 5 May, 1882.

I am informed that my late agent, Mr. H. J. Withers, states in his letter that I ask for £600 compensation. I beg to correct this statement. I simply requested Withers to try and get compensation for my loss, and I could not estimate my loss, as I never got any copy of the law costs; and Mr. Withers asked for £600 under the impression that it was hopeless to try to get compensation for the sheep I lost, and decrease of wool, &c., &c. I intend to appeal to Parliament for full compensation.

I have, &c.,

J. J. THOMPSON.

Sir,—I beg to ask you to have my letters put with the papers concerning my case.—J.T.

No. 129.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Breeza, 7 May, 1882.

I received yours of the 28th April, and forwarded it to Thompson. You state that Thompson's pre-lease has been reduced "in view of claim made by Frederick Wentworth Wright." You are aware that Percy Wright tendered the application, but perhaps you have not noticed who Mr. Ernest Smith claimed it for. If you look I think you will find he has been urging the claims of his "Clients," and that these clients were the lessees, Messrs. Wyndham and Wright. As I have no notes, I trust to memory for this quotation. I have a letter in my possession from Mr. Ernest Smith in which he states, "I am acting for and representing Messrs. Wynaham and Wright especially in connection with the pre-emptive lease right with which Thompson endeavoured to interfere; the matter, however, has now been definitely settled by the present Minister giving my clients a large portion, though not all, of the land to which they are entitled. You know Thompson did not object to them getting it, as there was plenty of land to satisfy both claims."

How could F. W. Wright claim a pre-lease by an agent who "acted for and represented Wyndham & Wright," the lessees of the run. If you have any doubt that I have the letter alluded to, just let me know, and I will satisfy you that I have the letter alluded to; just let me know, and I will satisfy you that I have the letter, and that it is genuine.

A part of Thompson's pre-lease was granted by John Graham, on the 15th July, 1879, and the application for it (with two signatures pasted on it) was tendered on the 29th May, 1879. This was an illegal document, and should not have been received by the Land Agent.

I submit that by recognizing applications not personally made you have no guarantee that the parties ever saw them. I hope you will look over the papers to see if anyone else, besides Thompson or F. W. Wright, claimed 77-111, or if anyone else urged to have it reduced to 320 acres when the whole was there and the description did not require it.

I have, &c.,

COLIN MACDONALD.

No. 130.

Mr. C. Macdonald to The Secretary for Lands.

Sir,

Breeza, 16 June, 1882.

The lessees of Karoola Run have served Mr. J. J. Thompson with a notice of an action to be brought against him in the Supreme Court. The following is copied verbatim:—

"Sir,

Karoola, 31 May, 1882.

We hereby give you notice, that unless you at once give up making a roadway through our fence, and abandon all claim to any land within the same, we intend to bring an action against you in the Supreme Court, for trespass, with a view to recover possession of the 640 acres on our run of which you are in occupation illegally by virtue of your conditional purchase made in 1879."

This is part of the letter, and they state they can prove there was £40 improvements on the conditional purchase when taken. The land Thompson is asked to abandon all claim to is the 460-acre pre-lease lately gazetted to him. The roadway he is asked to give up is his own road, passing through his own pre-lease. The fence is one that includes the land pre-leased to Thompson and his road. It is impossible for Thompson to get on the main road without cutting the fence or trespassing. Thompson does not intend to give up his 460-acre pre-lease to the lessees of the run unless it is taken from him, the same as his 1,920-acre pre-lease was. Thompson's 640 acres now contain over £320 worth improvements. I respectfully beg to say that, under clause 5, Crown Lands Alienation Act, you have power to prevent a pastoral tenant from getting possession of land that contains improvements which belong to another person, and that by going through the form of cancelling the lease of the said land, in the Gazette, before the action is entered, you could probably stop the action, if you wish to do so. The letter before mentioned, from lessees, states that the land pre-leased to F. W. Wright is "our land." I have already pointed out that no one but the lessees made a claim to a pre-lease that would interfere with Thompson's. Herewith I send a rough but tolerably correct sketch of the pre-leases and the fence; the fence is marked blue. You will see that Thompson is surrounded by the river in front, and completely fenced in and no opening left at the back.

I have, &c.,

COLIN MACDONALD.

P.S.—Thompson will make no reply whatever to the letter from the lessees. If you decide to cancel the lease of Thompson's 640-acre selection before the action is commenced, the lessees will have no lease by which they could rob Thompson of his land and improvements. The Attorney-General can advise you whether the cancellation after proceedings were commenced would be good in law. I need not enter into any details to show that the lessees have selected land in their names which contained much more than £1 per acre improvements at the date of selection, or that they had land selected in the Inverell Office and deprived Thompson of his selection and pre-lease for selecting there. Some light will be thrown upon this at an early date. Thompson will not send the original letter for your perusal, as it may be required as documentary evidence in the Supreme Court, if the action is commenced. The particulars of this case have been brought under the notice of the Department so often that I need not repeat them.—C. McD.

Minutes

Minutes on No. 130.

Mr. Burt,—Has not Thompson access to the main road by a road running along the south boundary of portion No. 45 and the eastern boundary of that portion and portion No. 105?—H.C., 30/6/82. Yes.—J.B., 30/6/82.

Will the Under Secretary for Mines be good enough to state who are the lessees of the Karoola Run.—H.C., *pro* Under Secretary, Lands Department, B.C., 30/6/82. Will the Chief Officer please supply the information required at his earliest convenience?—H.W., Under Secretary, B.C., 30/6/82.

Karoola North and Karoola South Runs, New England District, Edward Sandford Wyndham and Percy Philip Wright, lessees.—T.D., for the Chief Officer, 30/6/82.

Both parties may be communicated with, and the existence of the road pointed out. The case may be referred to the Conditional Sales Branch as to the C.P., and returned to Ministerial Branch for action.—H.C., 30/6/82.

Inform, and add that the request to have the land embraced in the conditional purchase withdrawn from lease is receiving consideration.—C.O., 3/7/82. The withdrawal from lease of land embraced in Thompson's conditional purchase would perhaps be advisable.—C.O., 10/7/82. Let it be done.—JOHN R.

No. 131.

The Under Secretary for Lands to Mr. C. Macdonald.

Sir,

Department of Lands, Sydney, 3 July, 1882.

Having reference to your letter of the 16th ultimo, in which you, on behalf of Mr. J. J. Thompson, complain that he has been threatened with legal proceedings by Messrs. Wyndham and Wright, on account of his having made a roadway through a fence erected by them with a view to gaining access to the road apparently situated within travelling stock reserve 337, in the county of Arrawatta, and complaining that the boundaries of his pre-emptive lease 79/48, in the district of Warialda, are so situated as to compel him to take such a course, I have the honor to state that, in the absence of full and authentic information in regard to the matter, the position of your client in relation to Messrs. Wyndham and Wright cannot be understood; but I may point out that Mr. Thompson can, it seems, have access to the road referred to by the road which skirts the south boundary of portion 45, and extends along the east boundary of that portion and portion 105, in the parish of Bukkulla, towards the travelling stock reserve previously mentioned. I may mention that existence of this road has been pointed out to Messrs. Wyndham and Wright.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

P.S.—Your request to have Mr. Thompson's conditional purchase withdrawn from lease is receiving consideration.

No. 132.

The Under Secretary for Lands to Messrs. Wyndham and Wright.

Gentlemen.

Department of Lands, Sydney, 3 July, 1882.

I have the honor to inform you that a communication has been made to this Department, on behalf of Mr. J. J. Thompson, the holder of pre-emptive lease 79/48 of 460 acres, in the district of Warialda, to the effect that you have threatened him with legal proceedings on account of his having, according to your representation, made a roadway through your fence with the object of gaining access to the road situated apparently in travelling stock reserve 337, in the county of Arrawatta, and to point out that while this Department is perhaps not aware of the state of the case, so far as your position in relation to Mr. Thompson is concerned, a road exists which skirts the south boundary of portion 45 and the eastern boundary of that portion and portion 105, in the parish of Bukkulla, and which affords Mr. Thompson access from his lease to the travelling stock reserve in question.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

No. 133.

Minute-paper for Executive Council.

Recommending reserve from lease.

Department of Lands, Sydney, 10 July, 1882.

It is recommended to His Excellency the Governor and the Executive that the within-defined area of 640 acres, in the county of Arrawatta, parish of Bukkulla, be withdrawn from lease, under the 5th section of the Crown Lands Occupation Act of 1861.

JOHN ROBERTSON.

The Executive Council advise the land herein described be withdrawn from lease, in terms of the 57th section of the Crown Lands Occupation Act of 1861.—ALEX. C. BUDGE, Clerk of the Council.

Ministerial, 87/33, 18/7/82. Confirmed, 25/7/82. Approved.—A.L., 18/7/82.

Minutes on No. 133.

Charted plans noted, &c.—A.B., 20th August, /82. Noted.—J.B., 17th August, /82. Mr. Curry.

Examined.—G.B., 10th August, /82.

No. 134.

The Under Secretary for Lands to The Crown Lands Agent, Warialda.

Sir,

Department of Lands, Sydney, 31 July, 1882.

I am directed to invite your attention to a notice published in this day's Government Gazette of the reservation from lease of 640 acres, in the county of Arrawatta, parish of Bukkulla, and to impress upon you the necessity of taking every precaution to prevent the land, or any portion of it, being conditionally purchased.

Should

Should an applicant insist on his application being received, you must caution him in terms of paragraph 39 of the Instructions to Crown Lands Agents.

A tracing showing the reserve will be forwarded with as little delay as possible, and on receipt it must be charted, as directed by paragraph 148 of the Instructions before referred to.

I have, &c.,

F. H. WILSON,
(For the Under Secretary).

No. 135.
Memorandum.

Surveyor-General's Office, Reserves Branch.
The attention of the Lease Branch, Survey Office, is directed to reserve from lease No. 186, New England District, county of Arrawatta, parish of Bukkulla, gazetted on the 31st July, 1882, a description of which is enclosed for their information.

G. LEWIS, *pro* G.B.,
10 August, 1882.

Mr. Burt, Lease Branch.

[Enclosure to No. 135.]

Gazette Notice.

Department of Lands, Sydney, 31 July, 1882.

Reserve from Lease.

It is hereby notified, for general information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to withdraw from lease the portion of land hereinafter described.

JOHN ROBERTSON.

New England District.

No. 186. County of Arrawatta, parish of Bukkulla, portions Nos. 83 and 82, area about 640 acres. The Crown Lands within the following boundaries: Commencing on the eastern side of the McIntyre River, at the north-west corner of portion No. 83; and bounded thence on the north by the north boundary of that portion east to its north-east corner; thence by the east boundary of that portion and of portion No. 32 bearing south to the aforesaid river; and thence by that river westerly and northerly, to the point of commencement.

No. 136.

Memorandum by Surveyor-General.

A LITHOGRAPH is enclosed showing reserve No. 186 from lease, notified 31st July, 1882, county of Arrawatta, parish of Bukkulla, for the information of the Crown Lands Agent at Inverell.

G. LEWIS,
(For the Surveyor-General).

Minute on above.

The Under Secretary for Lands, B.C., 10 August, 1882. Dealt with in Reserve Branch. After informing the Land Agent, the papers should be forwarded to Mr. Burt, Lease Branch.

No. 137.

The Under Secretary for Lands to The Crown Lands Agent, Inverell.

Sir,

Department of Lands, Sydney, 12 August, 1882.

I am directed to transmit herewith, for your information, a description, with tracing, showing certain land in the county of Arrawatta which, by notice in the Government Gazette of the 31st ultimo, has been reserved from lease, under the 5th section of the Crown Lands Occupation Act.

I have, &c.,

F. H. WILSON,
(For the Under Secretary).

No. 138.

Mr. Colin Macdonald to The Chief Commissioner.

Sir,

Breeza, 31 August, 1882.

I may point out that no reply has been received from the Department to my request that a copy of Thompson's costs should be sent to me. I respectfully beg to inform you that this document was placed in the Lands Department without Thompson's sanction and unknown to him, and I consider this document to be Thompson's property. It is intended to submit his case to Parliament, and the costs are essential in preparing an estimate of his loss. After the action, Thompson applied to his lawyer, Mr. Hindmarsh (who was agent for Leader and Forster, who conducted the case), for the copy of taxed costs, and it appears the copy of taxed costs was placed in the Lands Department instead of sending them to Thompson, as he requested. I have written to you for a copy and got no reply.

I went to Sydney, and spent nearly a fortnight, to see and copy the papers connected with this case, and was prevented from completing this.

All that is asked for is the total amount of the plaintiff's costs, also the total of defendant's costs, and the total amount of each witness's costs separately, and the total amount of the plaintiff, defendant, and witnesses' costs added together.

The witnesses' costs are required separately, as Thompson and his son are unpaid witnesses.

Under the circumstances, I respectfully submit that you should send the costs at once. Parliament is now in session, and you have been written to for costs long ago. If this is not attended to promptly I will probably have to take another trip to Sydney to see about it. You must admit that this would be an injustice, especially when you are informed that this document was placed in the Department contrary to Thompson's instructions, and also without his knowledge, sanction, or authority.

By withholding this copy you are delaying the final decision of the case, and after more than three years it should be delayed no longer.

Five minutes would be ample time to write the copy asked for.

Yours, &c.,
COLIN MACDONALD.

No. 139.

No. 139.

Mr. Colin Macdonald to The Chief Commissioner.

Sir,

Breeza, 31 August, 1882.

The declaration I sent in was made under clause 30, chapter 2, of Crown Lands Regulations. This clause provides for inquiry into any breach of the conditions. Under clause 25, Lands Amendment Act, the inquiries are confined to breaches of the conditions as to residence and improvements. Of course you are aware that both these clauses are "valid law." Any inquiry about my declaration under clause 25 would be useless. The declaration I allude to is the one concerning the conditional purchase originally selected by John Asimus, parish of Bukkulla. As E. S. Wyndham has now selected a part of Thompson's pre-lease by virtue of this conditional purchase, Wyndham's title to the original and additional will probably have to be tested in the Supreme Court. In the meantime the £10 I paid in may lie in the Department for an indefinite period, owing to the difficulty before mentioned.

I have, &c.,

COLIN MACDONALD.

No. 140.

Messrs. Hindmarsh & Mayne to The Colonial Treasurer.

Dear Sir,

Inverell, 20 September, 1882.

At the request of Mr. John Jackson Thompson, we enclose herein Bank-draft for the sum of £6, in payment of rent for 1883 of his pre-lease of 1,920 acres, county of Arrawatta, parish of Bukkulla. Please forward receipt to us.

I have, &c.,

HINDMARSH & MAYNE,

Solicitors.

Minutes on No. 140.

Mr. Curry,—Particulars of the lease should perhaps be asked.—C.H.G., 4/10/82.

Yes.—H.C.,

4/10/82.

No. 141.

Mr. Colin Macdonald to The Under Secretary for Lands.

Sir,

Breeza, October, 1882.

There is a statement in the papers in Thompson's case that he asks £600 as compensation. This statement is unfounded: Thompson never asked for any particular sum. He simply asks compensation for his loss, and that is all he ever did ask. The statement was made by Withers, as he thought it useless to try and get full compensation. As the statement made by the Inverell Land Agent is distinctly contradicted by Ross, I need not say more about it, except that there is, or ought to be, unquestionable evidence in the Lands Office to prove that the agent did not adhere to the boundary of "Inverell District."

Yours, &c.,

COLIN MACDONALD.

Minute on above.

By the Under Secretary for Lands:—Register.—C.O., 3/10/82.

[Enclosure to No. 141.]

Mr. Thompson's claim for compensation.

This case is printed for the following reasons:—1st. Because the Minister for Lands opposes or tries to reduce these claims, not because they are unjust, but because he considers himself duty bound to defend his Department, and protect the Treasury. 2nd. By putting the case (which is a very long one) in this form, honorable members will have an opportunity of forming an opinion on the merits of the case, and the Minister will have an opportunity of refuting the statement that that Department caused this loss, and of opposing any item in the claim which he may deem unjust. It must be distinctly understood that the above does not refer to any particular Minister for Lands.

In 1877 Mr. J. J. Thompson selected 640 acres in the parish of Bukkulla, and applied for and was granted a pre-lease of 1,920 acres by virtue of this selection. In 1879 a Supreme Court action for trespass was brought against Thompson (by the lessees of the run) for using this selection and pre-lease. Thompson lost the action through mistakes of the Lands Department, and had to pay £2 damages and costs. In 1877 this land was gazetted as being in the county of Arrawatta, Inverell, and shown on some of the Government maps as being in the "Warialda District," and on others as being in the "Inverell District"; and in 1882 this land was gazetted as being "New England District." Thompson's selection and pre-lease were cancelled on the ground that it was not applied for in the Warialda office, and only available for conditional purchase when applied for there. In 1879 Thompson selected the same land in the Warialda office, and applied for and was granted a pre-lease of 1,920 acres, and this pre-lease was afterwards cancelled. From 1877 up to the present about half a dozen different decisions (affecting the whole or part of Thompson's pre-lease) have been arrived at by the Department, and then reversed. There are, or were, official documents in the Lands Department in which it was officially admitted that Thompson's loss was caused by the Department, and there should be ample and unquestionable evidence in the Department now to prove that his loss was so caused. When Thompson selected at Inverell in 1877 he was guided by the Government Gazette and the previous practice of the Department. Although the Department have refused, and still refuse, to recognise Thompson's claim to the selection he took at Inverell, yet they have recognised, and do recognise, selections held by the lessees of the run, which are taken in the wrong district if Thompson's was. The lessees of the run took possession of Thompson's pre-lease a few weeks after it was granted to him in 1877, and they have kept possession of it ever since. Thompson was deprived of the use of his pre-lease, and this was owing to the mistakes of the Department. Thompson's loss for want of the use of the pre-lease, as shown by his books and accounts, is as follows:—

	£	s.	d.
In March, 1878, Thompson had about 2,036 sheep, net proceeds of wool	324 11 11
March, 1879, about 3,424 sheep, net proceeds of wool	239 6 9
Loss through starving the sheep on half their run	65 5 2
March, 1880, about 1,840 sheep, net proceeds of wool	206 5 9
Loss in decrease of wool as compared with proceeds for 1878	28 6 2
March, 1881, about 1,500 sheep, net proceeds of wool	153 18 11
Loss in decrease of wool as compared with proceeds for 1878	165 13 0
March, 1882, about 1,450 sheep, net proceeds of wool	207 15 8
Loss in decrease of wool as compared with proceeds for 1878	116 16 3

If Thompson had had the use of his pre-lease between the years 1877 and 1882 the increased returns for wool would have amounted to more than £200. In 1877 Thompson's average increase of lambs was more than 800 annually, and he killed about 150 annually for home use, and he only sold 300 between 1877 and 1882, so that in those years he should have had an increase of more than 2,700, and the actual decrease added to this makes a total loss of ——— an increase of 3,186 sheep, which, at 5s. per head, amounts to £821 10s.

The

The Lands Department has been changing its decisions about Thompson's pre-lease from time to time, and he kept his sheep in hopes that justice would be done to him, and that he would get his pre-lease, and lost a great many sheep in consequence. In 1880 he had to kill more than 600 lambs to save the ewes. In consequence of the mistakes of the Department, Thompson had to employ a land agent (Mr. H. J. Withers) in 1877, and paid him about £25. Mr. Withers attended to the case until 1882, and if any compensation is obtained Mr. Withers is to get a further sum of £55. The loss which Thompson incurred in legal damages and witnesses' expenses (including his own and his son's) amounts to £466 1s. 11d. This case caused a great deal of trouble and some expense to Thompson and a private unpaid agent for the last three years, and for this they ask nil.

For loss through having to use an enormous number of postage stamps (about £5). For loss of the pre-lease in future if Thompson fails to establish his claim to it, nil. Mr. Thompson's son gave up his selection to be sold in order to help his father to bear the loss incurred by the Supreme Court action, and he also contributed money for the same purpose. In May, 1882, the lessees of the run threatened to bring a Supreme Court action against Thompson with a view of taking his selection from him, on the ground that it was improved when he last selected it. Thompson then sold all his other selections and all his sheep in order to be prepared to defend his rights. Thompson has a large family (15), and supported them by agriculture and sheep-farming combined, and his 640-acre selection is too small to support his family without the pre-lease. His pre-lease consists of medium and inferior land, and therefore valuable to him, as he is not likely to be deprived of it by *bona fide* or other selectors.

As Thompson's sheep were attended to by his own family, the use of his pre-lease would involve little or no extra expense. Mr. Thompson appealed to the Lands Department for justice, and was officially informed that they were his opponents; and he now appeals to Parliament, and hopes to get justice, as Honorable Members are disinterested, and can therefore deal impartially with the case. Will bring the case before the House, and move that it be placed on the Estimates to compensate Mr. Thompson for his loss.

No. 142.

The Under Secretary for Lands to Mr. J. J. Thompson.

Memorandum.

Department of Lands, Sydney, 4 October, 1882.

WITH reference to the sum of £6 forwarded by you to the Treasury on the 20th September last for lease rent, I am directed to inform you that it is absolutely necessary that you should forward to this Department, without delay, full particulars of your lease, namely,—abstract numbers, area, name of Local Land Office, and date of approval, which, if not in your possession, can be obtained from the Land Agent of the district.

H. CURRY,

(For Under Secretary for Lands).

Name of lessee, J. J. Thompson; area, 1,920 acres; abstract number, 179-49; date of approval, 25 May, 1879, and in 1877; district, try the Land Agent.

COLIN MACDONALD,
(Pro J. J. THOMPSON).

No. 143.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Breeza, October, 1882.

On the papers in this case it is said that "Thompson asks for £600." This is not correct. Mr. Withers asked for that sum, believing that compensation for the whole loss would not be allowed. Thompson has not yet asked for any particular sum.

I have, &c.,

COLIN MACDONALD.

No. 144.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Sydney, 6 October, 1882.

I respectfully submit that Thompson's selection never has been cancelled. A conditional purchase can only be cancelled for a breach of the conditions. There has been no breach. The selection was taken in the right office. I intended to have inserted *nil* for loss of the pre-lease if Thompson failed to establish his claim to it. But although I insert nothing for my own time, I will not omit the other item. If there is any doubt about Thompson having a case against the lessees that would secure the future issue of the pre-lease to him, please to consider this, and see me on Monday or Tuesday.

I have, &c.,

COLIN MACDONALD.

No. 145.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Sydney, 9 October, 1882.

Will you please to let me know what grounds there were for gazetting the selection of Mr. J. J. Thompson as being cancelled?

This selection was taken in 1877, and situated in the parish of Bukkulla.

If this selection is illegal, please to point out why it is so.

I have, &c.,

COLIN MACDONALD.

Minutes on No. 145.

By Under Secretary for Lands:—Urgent.—C.O., 9/10/82. Mr. Macdonald may perhaps be informed that Thompson's conditional purchase was declared void as being in the Warialda District, whereas Thompson's application was made to the Inverell Crown Lands Agent.—S.F., 16/10/82. By Under Secretary for Lands:—Inform.—C.O., 17/10/82.

No. 146.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Sydney, October, 1882.

The Government have power to put the conditional purchases and pre-lease of J. J. Thompson beyond dispute. The point about the proper district probably applies to more than a thousand selectors. A validation Bill would decide this.

If Thompson's pre-lease is given to Wyndham and Wright, Mr. Proctor is instructed to insert the item for future loss. The pre-lease is worth quite as much to Thompson as the conditional purchase.

I have, &c.,

COLIN MACDONALD.

Minutes on above.

Mr. Burt,—Please quote the number of the lease referred to, also name of the district.—J.R.S., 19/10/82. 48-79 district of Inverell.—J.B., 23/10/82. Mr. Curry.

No. 147.

The Under Secretary for Lands to Mr. C. Macdonald.

Sir,

Department of Lands, Sydney, 20 October, 1882.

In reply to your letter of the 9th instant, asking on what grounds the selection of J. J. Thompson, taken up in 1877, and situated in the parish of Bukkulla, was cancelled. I have the honor to inform you that the conditional purchase in question was declared void as being in the Warialda Land District, whereas Thompson's application was made to the Inverell Crown Lands Agent.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

No. 148.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Breeza, 26 October, 1882.

You stopped Wyndham and Wright from taking Thompson's conditional purchase in Bukkulla, by reserving it under clause 5, Crown Lands Alienation Act; you can also stop them from taking his 1,920-acre pre-lease in the same way, by withdrawing the 1,920 acres, not from lease, but from the Karoola Run. There is a sheep-yard on the 1,920 acres belonging to Thompson (*vide* words, "improvements belonging to," &c., Crown Lands Alienation Act, clause 5), and clause 5 provides for withdrawing land from a run; as well as for reserving land from lease. By doing this you will save the country from having to pay Thompson for the future use of his pre-lease, that is if he is to be paid for loss which the Department caused. This would enable him to use his pre-lease safely, except F. W. Wright's 320-acre pre-lease, and I have no doubt that Thompson will not think it worth while to trouble about that part of his pre-lease if he is not robbed of the rest of it in a legal way. See the words "withdrawn from any old run or run any lands," clause 5, Crown Lands Alienation Act. Withdraw this land from the run only, and it will be still open to lease as a pre-lease already granted to J. J. Thompson.

I have, &c.,

COLIN MACDONALD.

No. 149.

Mr. C. Macdonald to The Secretary for Lands.

Sir,

Breeza, 31 October, 1882.

There are hundreds, perhaps thousands, of selections that are illegal, and in danger from Supreme Court actions, owing to being taken in the wrong district, and this is because the Department did not and could not adhere to the districts. A special Bill of one clause is required to enact that no conditional purchase which has been or may be taken shall be held to be invalid on the ground that it was not applied for in the right office; but any Crown Lands Agent may reject any application for a conditional purchase if the land applied for is not within his district. It would not be necessary to gazette the conditional purchases (as proposed in clause 23 of the new Bill), except in cases where two parties claim the land—one taken in the right office, and the other taken before in the wrong one; if there are any such claims there is no occasion to delay this by making clause 23 a part of the new Bill. I asked one party to bring in a Bill of one clause to settle it, and he was willing, but could not do it without permission to bring it in. You do not require this, and there is no reason to defer it until the new Bill passes, or to prevent it from passing if the new Bill does not.

I have, &c.,

COLIN MACDONALD.

P.S.—If you look over the papers about these pre-leases and the Karoola Run you will find that the widow's pre-lease (Mrs. Walsh) and Thompson's are offered for sale as secured land. You will also find that F. W. Wright's is a dummy pre-lease, and now offered for sale with run. If Mrs. Walsh is instructed to put improvements on the pre-lease (5s. worth would do) it can be withdrawn from the run, under clause 5, Crown Lands Alienation Act, without withdrawing it from lease, and then could use it safely. Thompson's is improved,

COLIN MACDONALD.

Minutes on above.

The writer of the enclosed letter suggests that a special Bill be introduced by the Government to legalize all conditional purchases that have been applied for at the wrong Land Office, or that may be hereafter so applied for. The remainder of the communication is not intelligible, and appears to refer principally to the case of J. J. Thompson's application for compensation for losses incurred by him through his having been ejected from a conditional purchase taken up by him in the wrong district. The lessees of the run sued him for trespass, and won the case on that point.—E.H.S.

By the Under Secretary for Lands:—What are these papers submitted for?—C.O., 7/11/82. Mr. Curry.—S.F., 13/11/82.

[Enclosure]

[Enclosure A to No. 149.]

WEDNESDAY, NOVEMBER 8.

Valuable Grazing Property in the noted Inverell District.

GRIFFITHS & WEAVER are instructed by Messrs. Wyndham & Wright to sell by auction, at the Exchange, Sydney, at noon on above date, this very choice grazing property, Karoola, situated in the Gwydir District, about 23 miles from Inverell. The area is about 23,000 acres, including a large extent of valuable river-flats, which are secured by reserves and by about 3,000 acres of freehold and conditional purchase lands.

The property is fenced and divided into eight cultivation and grazing paddocks, and is otherwise highly improved with good head-station and outbuildings, stockyard, &c.

The run has a long frontage to the permanent water on both the Macintyre River and Waterford Creek. To be sold with about 1,200 cattle—a highly bred Hereford herd; about 2,000 sheep, including 950 lambing ewes, fifty horses, stores, plant, &c.

This desirable run being for absolute sale to close accounts, inspection is particularly invited. For further particulars, apply to Griffiths & Weaver, Sydney.

[Enclosure B to No. 149.]

Selectors threatened with Supreme Court actions if they do not give up their pre-leases.

In 1879 a Supreme Court action for trespass was brought by Messrs. Wyndham and Wright to evict a selector named Thompson from his selection and pre-lease. Thompson lost the action, and his selection and pre-lease were cancelled, because his land was taken up in the same office as selected land, which the plaintiffs and many others now hold without being cancelled. No selector could bring an action to evict the plaintiffs. Thompson reselected the land in the so-called right office, and improved the land to the extent of £320 (10s. per acre). The plaintiffs now want the land, and write as follows:—

“Mr. J. J. Thompson,

“Sir,

Karoola, 31 May, 1882.

“We hereby give you notice that unless you at once give up making a roadway through our fence, and abandon all claim to any land within the same, we intend to bring an action against you in the Supreme Court for trespass, with a view to recover possession of the 640 acres on our run, of which you are in occupation illegally, by virtue of your conditional purchase made in 1879.”

Thompson's road passes through his own 460-acre pre-lease, which was recently gazetted. The plaintiffs had fenced in a considerable part of this pre-lease and stopped the road completely. Thompson's first pre-lease was 1,920 acres, and he was deprived of the rest of it thus:—Percy Phillip Wright tendered what purported to be an application for a pre-lease by Frederick Wentworth Wright, and it was signed thus: “Frederick Wentworth Wright, per Percy P. Wright.”

The plaintiffs, P. P. Wright and E. S. Wyndham, occupied and held possession of the land, and P. W. Wright was relieved of the trouble of applying for or occupying it. He might have been within 300 miles of the office when the application was made, but I don't think so. Percy P. Wright tendered what purported to be an application for a pre-lease (of the land Thompson is asked to “abandon all claim to”) by John Graham, and signed thus:—“John Graham per Percy P. Wright.”

These signatures were pasted on the application. The pre-lease was granted, and then cancelled, as Thompson's second application was made prior to it. Graham owned one dilapidated old horse, and brought no sheep or cattle on the run. The reason Wyndham and Wright give for not bringing the action before is that they had not “any desire to do so.” They avoided the risk and publicity of trying it in the Court of Inquiry or the Supreme Court; and urged the Minister for Lands to cancel Thompson's conditional purchase a second time. They state they can prove Thompson's conditional purchase contained “over £40 worth of improvements” when reselected. These improvements were his own. A selection held by the overseer of Karoola was forfeited, and contained a slab house, with an iron roof, and some fencing and ringbarking. The selection was unimproved by removing the house to Karoola head-station. This was done by one of Wyndham and Wright's servants, and the same person afterwards selected the land, and it is now transferred to Wyndham and Wright. The action they are going to bring is to protect themselves from further encroachments. Pre-leases which are applied for and used by Wyndham and Wright do not encroach on the run, even if they are in other people's names. A widow had just lost her husband, and nearly lost her selection for want of means to improve it, and she then had a visit from Wyndham, and an offer to forbear from evicting her, “like Thompson,” if she would give up her pre-lease. She has not urged her claim to it since. Her selection was taken in the wrong office, if Thompson's and Wyndham and Wright's were. Her selection is about 400 acres, and the pre-lease would “encroach” about 1,200 acres. A short time ago I saw the widow's deposit receipt for the pre-lease, but she dare not urge any claim to it.

COLIN MACDONALD,

Brcza.

No. 150.

Declaration by Mr. J. Graham.

I, JOHN GRAHAM, of Bukkulla, in the Colony of New South Wales, do hereby solemnly and sincerely declare as follows:—I am informed that a document has been sent in to the Lands Department which purports to be an application for a pre-lease, and that a signature which purports to be mine is pasted on to it. I am also informed that Percy Phillip Wright tendered this document. I did not apply for a pre-lease, nor did I authorize Percy Phillip Wright, of Karoola, or anyone else, to attach my signature to an application for a pre-lease. I am informed that the alleged application was made on the 29th of May, 1879; and I was not aware that any such application was sent until I heard of it in 1882. And I make this solemn declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, “An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits.”

JOHN GRAHAM.

Made and signed before me, at Inverell, this 13th }
day of November, 1882,— }

H. MUNRO, J.P.

Minute on No. 150.

The Under Secretary, Department for Lands.—W.W.S., B.C., 2/1/83.

No. 151.

Declaration by John Graham.

I, JOHN GRAHAM, of Bukkulla, in the Colony of New South Wales, do solemnly and sincerely declare as follows:—That I am informed that a document has been sent to the Lands Department (dated the 15th of July, 1880) which purports to be a transfer of my selection to Edward Sandford Wyndham, of Karoola.

I did not sell or transfer my selection to Mr. Wyndham, nor was I aware that any such transfer was sent in until I heard of it in 1882. I sold and transferred my selection to Mr. J. J. Thompson in 1882, but I never sold or transferred it to anyone else. And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Made and signed before me, at Inverell, this }
13th day of November, 1882,— }
H. MUNRO, J.P.

JOHN GRAHAM.

No. 152.

Declaration by Colin Macdonald.

I, COLIN MACDONALD, of Breeza, in the Colony of New South Wales, do solemnly and sincerely declare as follows:—That I examined a document in the Lands Office dated the 29th of May, 1879, which purports to be an application for a pre-lease (in the parish of Bukkulla) by Percy Philip Wright, of Karoola, as agent for John Graham, also of Karoola. John Graham's name was pasted on the document. I procured an authentic signature of Graham's to compare with the pasted one, and I also compared several other genuine signatures of Graham's, and I am satisfied that John Graham never did or could write his name as clearly or in such a steady and regular hand as the pasted signature. It also appeared to me that John Graham's name and Percy Philip Wright's (on that document) were both written alike. And I make this solemn declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Made and signed before me, at Sydney, this }
18th day of November, 1882,— }
W. FRASER MARTIN, J.P.

COLIN MACDONALD.

Minutes on No. 152.

As the lease (79-20) to which reference is made in statutory declaration has been cancelled the matter, so far as that lease is concerned, scarcely deserves comment, but the Attorney-General may perhaps be desirous of again seeing the declaration and communicating with Mr. Macdonald. Mr. Macdonald may be asked whether the £6 paid into Suspense on the 25th September last is not intended for lease 79-48. There is no doubt of this, but as he is solicitous to criticise any action taken, he may as well be asked the question. Before reference to the Attorney-General the declaration referring to a conditional purchase transfer will require some action apparently. After action in this Branch the papers (which have been separated from a Gunnedah case in which Macdonald is interested) may be forwarded to the Conditional Sales Branch for necessary action in the various conditional purchase matters involved and papers carried on.—H.C., 30/3/83.

By the Under Secretary :—Yes.—C.O., 31/3/83.

No. 153.

Mr. C. Macdonald to The Chief Commissioner for Conditional Sales.

Sir,

Breeza, 22 December, 1882.

I respectfully submit that the Government should appeal to the Privy Council, and submit the following points:—

1st. That all selections taken up under the Crown Lands Alienation Act of 1861 are taken on condition that the conditions of the Act are to be complied with to the satisfaction of the Minister, and therefore the Supreme Court has no jurisdiction, and cannot decide whether the conditions are or are not complied with (*vide* the 18th section of the Act).

2nd. That all selectors who took up land under the amended Acts of 1875 and 1880 did so on conditions that any dispute or question concerning their claim to a 'grant' shall be referred to a Commissioner who has been appointed, and therefore their claim to a grant cannot be referred to the Supreme Court, and therefore the Supreme Court has no jurisdiction in these cases (*vide* the 25th clause of the Act of 1875).

I have submitted the second point to a lawyer, and he holds that the point is a sound one, assuming that it is Thompson who was entitled under the Act to have his claim submitted to the Commissioner. Thompson maintained (and does so still) that he was conditional purchaser, and Wyndham and Wright affirmed that he was not. The "*onus probandi*" lays with the party who affirms, and Thompson was, and entitled to be, considered a "conditional purchaser" until Wyndham and Wright prove that he is not; and they must do that in the Court provided by the Act for the purpose, viz., the Court of Inquiry, therefore the Supreme Court had no jurisdiction.

If you think I am right, and think advisable to defend and appeal to the Privy Council and make a test case of it, as in the case *Pearson v. Stevens*, I will be very glad; and if the case is reversed, then Thompson's claim against the Government will be reduced in the item of costs. I will try and bring the case before the House as soon as possible. The case was suppressed for the last two years. The petition never was presented.

I have, &c.,

COLIN MACDONALD.

58

No. 154.

The Under Secretary for Lands to Mr. C. Macdonald.

Sir,

Department of Lands, Sydney, 31 March, 1883.

I have the honor to request that you will be good enough to state whether the sum of £6, paid by Messrs. Hindmarsh & Mayne into the Treasury on the 20th September, on behalf of Mr. J. J. Thompson, is intended to cover the current year's rent on his pre-emptive lease, 79-48, of 460 acres, in the district of Inverell. In your reply to the letter addressed to Mr. Thompson, on the 4th October, 1882, you referred to the lease upon which the amount was paid as 79-49.

I have, &c.,
CHARLES OLIVER,
Under Secretary.

No. 155.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Breeza, 24 September, 1883.

Herewith I enclose £6 (gone on to Treasury), being the amount of rent due on Mr. J. J. Thompson's pre-lease of 192 acres, parish Bukkulla, gazetted 23rd May, 1879. I am aware that the Department states that a pre-lease, said to have been claimed by F. W. Wright, cuts off most of Thompson's lease, but I will not insult your common-sense (or Farnell's) by supposing that you believe Percy Wright acted as agent for a man who applied for a lease out of the Karoola Run.

You have Mr. Ernest Smith's letters to prove that he (Smith) tried to get the pre-lease for lessees of run, and his letters prove that Percy Wright was a principal, not an agent; I have one of Smith's which does so, but then, of course, you did not suppose Percy Wright was so foolish as to do this. Although, for political reasons, Ministers claimed the power to grant pre-leases when applied for in other people's names (nominally as agents), still the Act gives them no such power. The reason given for cancelling Thompson's conditional purchase, after the Supreme Court action, was, that it was taken in the wrong office. You have not established this, or proved it, and until this is done you have no power to cancel the conditional purchase. A conditional purchase can only be cancelled for a breach of the conditions—*vide* ruling of the Supreme Court. You have not shown that the conditional purchase was taken in the wrong office, nor is it possible for you to do so. Until you show a breach of the conditions you cannot cancel the conditional purchase.

The Supreme Court simply gave a verdict for trespass, without deciding that the conditional purchase was taken in the wrong office or not. You know, as well as I do, that it is impossible to show that the pastoral district is the wrong one, or that the police district did not include the conditional purchase.

By sending the rent Thompson is simply complying with his part of the bargain, although he is completely deprived of the use of his pre-lease.

I am, &c.,
COLIN MACDONALD,
Unpaid Agent for J. J. THOMPSON.

When searching records in the Supreme Court I was unable to find that the Court decided that J. J. Thompson was not a conditional purchaser.

A map which purported to show "Karoola North" was handed in, and a verdict returned that a trespass was committed on "Karoola North." I could not find that the Court decided the conditional purchase and pre-lease were part of the run, but that a trespass was committed on some part.

The Court did not decide that Thompson's conditional purchase and the conditional purchase of John Asimus also (included in map of the run) were part of the run.

If you can show that the Court did so, you must get access to records not shown to me. The records shown to me showed that verdict for trespass was given without deciding whether such trespass was on the land claimed by Thompson or some other part of the run.—C.M'D.

No. 156.

Mr. C. Macdonald to The Under Secretary for Finance and Trade.

Sir,

Breeza, 27 September, 1883.

Herewith I enclose Post Office Order for £6, being the amount of rent due on Mr. J. J. Thompson's pre-lease of 1,920 acres, parish Bukkulla, county Arrawatta, gazetted 23rd May, 1879.

I have, &c.,
COLIN MACDONALD,
Agent for Mr. J. J. THOMPSON.

P.S.—The Post Office Order is payable to you.—C.M.

Minutes on above.

Lease 79-48, county Arrawatta, parish Bukkulla. Can it be stated in the absence of the papers whether there are any conflicting interests, and whether the case is such a one as would now be granted. Please quote the numbers of conditional purchases forming the leases.—C.H.G., 20/3/84. Mr. Muller.

250 acres within the lease have been selected, and the only access from the conditional purchase to the lease is by a reserved road through one of the selections, otherwise there are no objections to the renewal of the lease.—M.M., 26/3/84. Mr. Curry.

Can it be stated in virtue of what conditional purchase or conditional purchases the lease was granted, please? It seems desirable that a reference should be made to the Conditional Sales Branch to find out their state.—C.H.G., 9/4/84. Mr. Muller.

Granted in virtue of conditional purchase 79-28.—M.M., 16/4/84. Mr. Curry. Please report as to conditional purchase 79-28, as to present holder and state.—H.S.F., 18/4/84. Conditional Sale Branch.

Conditional purchase 79-28, Warialda, now Inverell, stands in name of J. J. Thompson. Declaration accepted 7th April, 1884.—C.O., 28/4/84. Lease

Lease 79-48, now Inverell, formerly Warialda, stands paid to 1882 only, in name of J. J. Thompson, but forfeited 17th August, 1883. £6 has been paid to Suspense Account, 1st October, 1883. As Thompson is the holder of the conditional purchase 79-28, in right of which the lease was granted, and as the conditional purchase appears (from Conditional Sales Branch) to stand good, perhaps forfeiture may be reversed, and the balance of money over and above that held in suspense may be credited.—H.S.F., 26/4/84. Mr. Curry.

[Enclosure to No. 156.]

Memorandum.

Account of moneys paid and to be paid on pre-lease No. 79-48, in the county of Arrawatta, district of Inverell, formerly Warialda, held by J. J. Thompson, gazetted on 23rd May, 1879, 1,920 acres, rent £6. Regazetted on the 10th March, 1882, 460 acres, rent £1 8s. 9d. Notified as forfeited on the 17th August, 1883.

Schedule to above.

Lease fully paid up to the year 1882 inclusive.

Amounts paid according to Register.	Year for which paid.	Date of credit.	Amount suspended.	Date of suspense.	
£ s. d.			£ s. d.		£ s. d.
1 8 9	1881.	2 May, 1882.	4 11 3 excess for 1879, refunded 24th April, 1882.
1 8 9	1882.	2 May, 1882.	

No. 157.

Mr. C. Macdonald to The Under Secretary for Lands.

Sir,

Breca, November, 1883.

You wrote to say that J. J. Thompson's conditional purchase (parish Bukkulla) was declared void, as it was taken up in Inverell instead of Warialda. Be good enough to prove that the Warialda office was the right one, and that the Inverell office was the wrong one. It is utterly useless to say that the office is wrong or right without establishing the statement. As you have declared the conditional purchase void for a breach of or want of compliance with the 7th section of the Act of 1875, it is to be assumed that you can do this. Please reply in writing before noon on Friday next.

I have, &c.,

COLIN MACDONALD.

No. 158.

Questions by Dr. Ross, M.P.

LEGISLATIVE ASSEMBLY, WEDNESDAY, 30 APRIL, 1884.

Question:—

(3.) Selections on Karoola Run:—Dr. Ross asked the Secretary for Lands,—

(1.) Was reserve No. 67, in the parish of Bukkulla, gazetted as containing 640 acres; and was it surveyed by Surveyor Macharg, so as to contain about 1,200 acres, and thereby include the conditional purchase of one John Asimus?

(2.) Did Surveyor Macharg afterwards begin the survey of John Asimus's conditional purchase from portion No. 80, parish of Bukkulla, and not from the starting-point, and thus leave about £20 worth of improvements on reserve No. 515; and was that reserve made two years after Asimus's conditional purchase was taken up?

(3.) Did Percy Philip Wright, one of the lessees of the run, apply for a conditional purchase between the conditional purchase of John Asimus and reserve No. 67, and did he afterwards obtain a refund of his deposit on the ground that the selection was on reserve No. 67?

(4.) If such selection was taken up by Mr. Wright, was it taken up in an office which Messrs. Wyndham and Wright afterwards maintained (in the Supreme Court) was the wrong one?

(5.) Did Wyndham and Wright, of Karoola, succeed in getting the Lands Department to declare Mr. J. J. Thompson's selection void for being taken in the wrong district, without having their own conditional purchase, taken and situated in the same district, declared void for the same reason; and if so, why?

(6.) Has the Lands Department ever proved that Mr. Thompson's selection was not situated in the Inverell District, or given any reasonable grounds for supposing that it was not in that district?

(7.) Has the Department ever given any reasons of any kind for supposing that Mr. Thompson's selection was not taken in the right district; and if so, when, and what were the reasons given?

(8.) Has it ever been shown that Mr. Thompson failed to comply with any or all of the conditions of the Act; and if so, by whom has it been proved; or has it ever been decided that Mr. Thompson failed to comply with the conditions of the Act, and if so, by whom has it been so decided, and when?

(9.) Is there a single one of the selections taken up by Percy Philip Wright on the Karoola Run on which the conditions have been complied with and completed, or declared to have been completed?

(10.) Is there a single one of the selections taken up by Percy Philip Wright on the Karoola Run for which he did not get a refund of his deposit; and if so, which one was it; and how many times has he applied for or taken up selections on that run?

(11.) Is there a single one of the selections taken up by Percy Philip Wright on the Karoola Run that was never reported on by Surveyor Macharg for being unimproved or non-resident?

(12.)

(12.) Did Surveyor Macharg resign, and did the Surveyor-General afterwards pronounce him guilty in the first degree, and state that he could not be punished because he had resigned?

(13.) Did Surveyor Macharg afterwards come to Sydney and get employment in the Lands Department as a Temporary Draftsman; and has he recently got an appointment as a Surveyor and Inspector of Church and School Lands?

(14.) When will the papers moved for by Dr. Ross on 6th December last, in the case of J. J. Thompson, on Karoola Run, be laid upon the Table of the House; and why is the production of the papers being so long delayed?

Answer:—

Mr. Farnell answered,—

(1.) Yes, as 640 acres. Its actual area was, by survey, found to be about 860 acres, the excess arising from two sides of the reserve being river frontages. The surveyor had no option in the case, being bound by the lines given in the Gazette notice. The reserve included the selection of Asimus.

(2.) Yes. There is no record as to the starting-point mentioned in the description. Mr. Macharg made the survey to include the improvements, without leaving a narrow strip of land between portion No. 80 and the land selected by Asimus. In his subsequent conditional purchase, Asimus applied for the selection as measured. The date of notification of reserve No. 515 is 29th December, 1876, twenty months after the first selection of Asimus, and nine months prior to the second selection.

(3.) Yes; conditional purchase 75-152, Inverell. Yes.

(4.) Apparently so.

(5.) No. The selection of J. J. Thompson was declared void, on the request of his own agent, to admit of his applying afresh at the proper Land Office.

(6.) There is no reasonable doubt that the land applied for is not in the Inverell District.

(7.) Yes; the applicant was so warned by the Land Agent on reference to his maps at the time of application.

(8.) The question of how far the conditions of Thompson's selection were fulfilled has not been decided, the selection having been declared void at his own instance, as already stated.

(9.) Yes. A selection taken up in January, 1880, has been transferred, with its additional, to E. T. Wyndham, who has made due declaration, and was reported resident and fulfilling conditions.

(10.) Yes. The selections mentioned in the reply to the last question, and a selection made on the 31st January, 1876, which was declared lapsed—four selections in all, but one in the parish of Karoola.

(11.) Yes. Mr. Macharg reported the applicant non-resident upon the conditional purchase taken up in 1876.

(12.) Yes. The Surveyor-General, in reply to a question as to who were the officers to blame for not reporting the fact of a conditional purchase having been received in the wrong district, stated that Mr. Macharg was guilty in the first degree, and had left the Department. The question of punishment did not arise, for prior to this case the legality of a conditional purchase made in a wrong district had never been challenged.

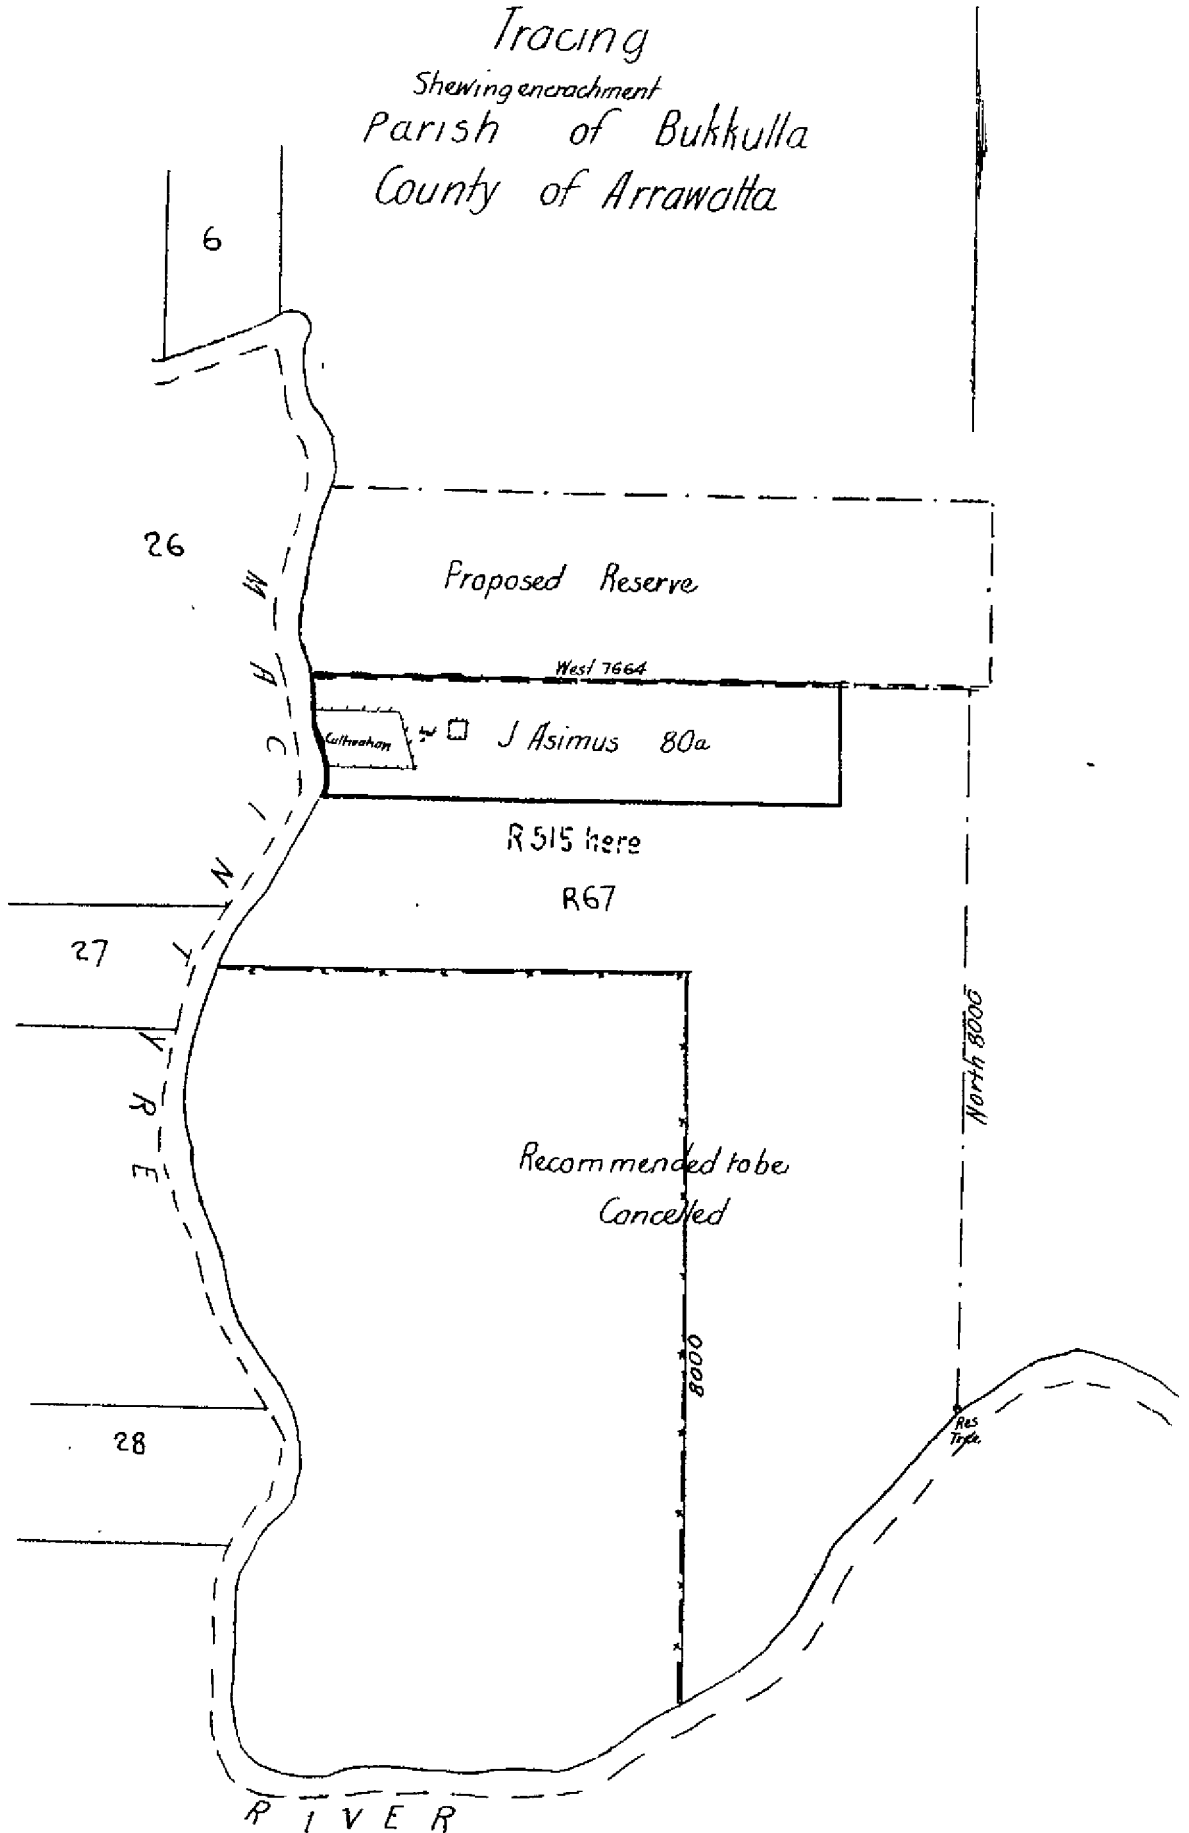

(13.) Mr. Macharg was not employed as a Temporary Draftsman in the Department of Lands, but is now understood to be employed in the Department of Public Instruction.

(14.) The papers are in course of preparation, and will be ready for presentation in a week. They are exceedingly voluminous.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS.
(CONDITIONAL PURCHASES ON PERICOOTA RUN.)

Ordered by the Legislative Assembly to be printed, 10 September, 1886, a.m.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23rd June, 1886, That there be laid upon the Table of this House,—

“All papers and other correspondence relating to the selection of lands on the Pericoota Run, in the district of Moama, in the month of January, 1882.”

(*Mr. Chanter.*)

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-10.)

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Ley Row, made at Moama on the 12th January 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the “Lands Acts Amendment Act of 1875,” held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—

His agent admits abandonment by the selector, as stated in the letter of 7th March last (signed L. C. Row). Licensed surveyor values improvements, £557 15s., on 550½ acres in March, 1879.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 550.—Letter from claimant intimating abandonment of conditional purchase is with proceedings, also one from his agent waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. Ley Row informed, 9/5/83.

[*Enclosures.*]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Ley Row, who applied for a conditional purchase on the 12th January last at Moama, conditional purchase No. 82-10, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will dispense with any formal notice being served on him.

We have, &c.,

H. H. BROWN & CO.

Ley

885—A

[805 copies—Approximate Cost of Printing (labour and material), £27 13s. 6d.]

Ley Row.

GEORGE HENRY HOLMES, sworn, states: I am agent for Ley Row, who selected on 12 January, 1882, 550½ acres, county of Cadell, parish of Benarca, which I am now authorized to state he has abandoned, as notified in his letter of 7th March last.

Taken and sworn at Moama this 4th November, }
1882, before me, H. J. BOLDING, Commissioner.

G. H. HOLMES.

Mr. L. C. Row to The Chief Commissioner.

Sir,

Moama, 7 March, 1882.

I have the honor to inform the Department of which you are the head, that I have abandoned the selection applied for by me at Moama on the 12th January last, viz., 550½ acres, being surveyed portion 87, parish of Benarca and county of Cadell.

I have, &c.,

L. C. ROW.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Mr. Ley Row to the Crown Lands Agent, Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

LEY ROW.

Minutes on Application.

Portion 87, parish of Benarca, county of Cadell, of 550½ acres, formed part of reserve 93A, which was notified the 22nd December, 1865, and cancelled the 1st August, 1881. Portion 87 also formed part of reserve 2,846, notified the 24th August, 1881, part of which including the above portion was cancelled on the 12th December, 1881. During the currency of reserve 93A, the following improvements were effected by the lessees on this portion:—Fencing worth £167 15s., erected in October 1877, and in February and March, 1878; and tank, £390, excavated in September 1877: total, £557 15s. The above portion is therefore fully improved, and has been applied for (by this application) as a conditional purchase under the 12th section Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisalment of the improvements be at once taken; also, for report of conditional purchase inspector.—CHAS. ED. FINCH, for Surveyor General, 15/8/82. Approved.—JOHN R.

[Alienation Act, section 13.]

District of Moama.

No. 10 of 1882.

Application by Ley Row for the Conditional Purchase, without competition, of 550 acres 2 roods, unimproved Crown Land.

Received by me, with a deposit of £137 12s. 6d., this 12th day of January, 1882, at 10 o'clock; also, £55 1s. on account of improvements under section 12, Act of 1880.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 550 acres 2 roods; and I herewith tender the sum of £192 13s. 6d., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of the value of improvements. I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I am, &c.,

LEY ROW,

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarca, 550 acres 2 roods, being measured portion No. 87.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-11.)

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of James Foley, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.: His agent admits the selector has abandoned these 210½ acres, as stated in the letter of 30th October last.

Improvements in March, 1879, were worth £332, as appears by surveyor's tracing.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 12.

Sec. 13, Ac. 210½.—Letter intimating abandonment of conditional purchase from agent of claimant, also one waiving claim to usual seven days' notice to attend inquiry, with proceedings. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83.

For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. Jas. Foley infd., 9th May, 1883.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. James Foley, who applied for a conditional purchase on the 12th January last at Moama, conditional purchase No. 82-11, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & Co.

James Foley.

GEORGE HENRY HOLMES, sworn, states: I am agent for James Foley, who selected on the 12th January, 1882, 210½ acres, county of Cadell, parish of Benarca, which I am now authorized to state he has abandoned, as notified in the letter of his agents, H. H. Brown and Co., of 30th October last.

Taken and sworn at Moama, this 4th }

G. H. HOLMES.

November, 1882, before me,— }

H. J. BOLDING, Commissioner.

Messrs. H. H. Brown and Co. to The Chief Commissioner.

Sir,

21, Exchange Buildings, Pitt-street, 30 October, 1882.

We are requested by our client, Mr. James Foley, to advise you that he has abandoned the selection made by him at Moama on the 12th January last for 210½ acres, parish of , county of Cadell.

We have, &c.,

H. H. BROWN & Co.

Notice of abandonment, for Commissioner.—31/10/82.

Mr. J. Foley to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

JAMES FOLEY.

Minutes on Application.

Portion 84, parish of Benarca, county of Cadell, 210½ acres, formed part of reserve 93a, which was notified the 22nd December, 1855, and cancelled the 1st August, 1881. Portion 84 also formed part of reserve No. 2,846, notified the 24th August, 1881, part of which including the above portion was cancelled on the 12th December, 1881.

During the currency of reserve 93a the following improvements were effected by the lessees on this portion:—Fencing, £48; ringing and clearing, &c., £84; sheep yards, £200: total, £332. These improvements were effected in March, 1878, and since March, 1879. The above portion is therefore fully improved, and has been applied for as a conditional purchase (by this application) under the 12th section of the Lands Acts Further Amendment Act. It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisalment of the improvements be at once taken; also, for report of Inspector.—CHAS. ED. FINCH, for Surveyor-General, 15/8/82.

Approved.—JOHN R.

C.

No. 11 of 1882.

Application by James Foley for the Conditional Purchase, without competition, of 210 acres 2 roods, unimproved land.

Received by me, with a deposit of £52 12s. 6d., this 12th day of January, 1882, at 10 o'clock; also, £31 2s., one tenth of improvements under Section 12, Act of 1880.

L. S. DONALDSON,
Agent for the Sale of Crown Lands at Moama.

Sir,

January 12, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 210 acres 2 roods; and I herewith tender the sum of £83 14s. 6d., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of the value of improvements.

I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I am, &c.,

JAMES FOLEY,

To the Agent for the Sale of Crown Lands at Moama.

Moama.

Description.

County of Cadell, parish of Benarca, 210½ acres, being measured portion No. 84.

Mr.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-12.)

REPORT of an Inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of James Boaden, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—

His agent admits that the selector has abandoned these 395 acres, as stated in the letter of 30th October last.

Licensed surveyor's tracing shows improvements on this land worth £400 in March, 1879.

I have, therefore, to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 395.—Letter of abandonment from agent of claimant is with proceedings, as also one waiving claim to the usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83.

For forfeiture.—A.O.M., 1/5/83. Jas. Boaden informed.—9/5/83.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. James Boaden, who applied for a conditional purchase on the 12th January last, at Moama, as C.P. 82-12, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have &c.,

H. H. BROWN & Co.

James Boaden.

GEORGE HENRY HOLMES, sworn, states: I am agent for James Boaden, who selected 395 acres, county Cadell, parish Benarea, which I am now authorized to state he has abandoned, as notified in the letter of his agents, H. H. Brown & Co., of 30th October last.

Taken and Sworn at Moama, this 4th

G. H. HOLMES.

November, before me,

H. J. BOLDING, Commissioner.

Messrs. H. H. Brown & Co. to the Chief Commissioner.

Sir,

21 Exchange Buildings, Pitt-street, 30 October, 1882.

We are requested by our client, Mr. James Boaden, to advise you that he has abandoned the selection made by him at Moama, on the 12th January last, for 395 acres, parish of , county of Cadell.

We have, &c.,

H. H. BROWN & CO.

Notice of abandonment, for Commissioner.—31/10/82.

Mr. J. Boaden to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

J. BOADEN.

Minutes on Application.

Portion 86, parish of Benarea, county of Cadell, of 395 acres, formed part of reserve 93A, which was notified the 22nd December, 1865, and cancelled the 1st August, 1881. Portion 86 also formed part of reserve 2846, notified the 24th August, 1881, part of which, including the above portion, was cancelled on the 12th December, 1881.

During the currency of reserve 93A, portion 86 was improved by the lessees as follows:—Fencing, £108, erected in October, 1877, and in February and March, 1878; sheep yards, £250, erected in February 1878; house not completed, £42 (ultimate probable valuation £65), erected in March, 1879: total, £400. These improvements are reported to be of a permanent and fixed character, and of benefit to the occupation of the land. The above portion is, therefore, fully improved, and has been applied for (by this application) as a conditional purchase under the 12th section of the Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the improvements be at once taken; also, for report of Conditional Purchase Inspector.—CHAS. ED. FITCH, for Surveyor-General, 15/8/82.

Approved.—JOHN R.

C.

District of Moama.

No. 12 of 1882.

Application by James Boaden, for the Conditional Purchase, without competition, of 395 acres unimproved Crown Land.

Received by me, with a deposit of £98 15s., this 12th day of January, 1882, at 10 o'clock; also, £40, being one tenth of supposed value of improvements under Act of 1880.

L. S. DONALDSON,

Agent for the sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Lands hereunder described, containing 395 acres; and I herewith tender the sum of £138 15s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of value of improvements. I am willing to purchase the improvements and pay for them the amount fixed by appraisalment.

I am, &c.,

JAMES BOADEN,

Moama.

To the Agent for the sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarea, 395 acres, being measured portion 86.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-13.)

Report of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Annie Wedgwood, spinster, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the Lands Acts Amendment Act of 1875, held by me in pursuance of the reference notified in the Gazeite of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts, bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence, viz.:—

Her agent admits abandonment, as stated in her letter of 7th March last.

Licensed surveyor values improvements, £480 10s., on 480½ acres.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 480½.—Letter from claimant intimating abandonment of conditional purchase is with proceedings; also one from her agent waiving claim to usual seven days' notice. Presuming such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 22/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. Annie Wedgwood informed, 9th May, 1883.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Miss Annie Wedgwood, who applied for a conditional purchase on the 12th January last at Moama, as conditional purchase 82-13, to advise you that she is desirous of your holding an inquiry into the conditions of her residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & Co.

Annie Wedgwood.

GEORGE HENRY HOLMES, sworn, states: I am agent for Annie Wedgwood, who selected on 12th January, 1882, 480½ acres, county Cadell, parish Tataila, which I am now authorized to state she has abandoned, as notified in her letter of 7th March last.

Taken and sworn at Moama, this 4th }
November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Miss A. Wedgwood to The Chief Commissioner.

Sir,

Moama, 7 March, 1882.

I beg most respectfully to state that I have abandoned my claim to the selection or conditional purchase which I made at Moama on the 12th January; the area I applied for was 480½ acres, being surveyed lot No. 115, parish Tataila, county Cadell.

I remain, &c.,

ANNIE WEDGWOOD.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Miss

Miss A. Wedgwood to the Crown Lands Agent, Moama.

Sir,

Moama, 12 January, 1882.

I respectfully request that you will allow me to withdraw the application made by me this day, on the grounds that, as I did not succeed in obtaining the whole of the area applied for, viz., portions Nos. 115 and 116, the former portion is not sufficient to meet my requirements. Parish Tataila, county Cadell, portions Nos. 115 and 116, 620 acres.

I am, &c.,

ANNIE WEDGWOOD.

Copy of Minutes on back of Conditional Purchase Application.

Portion 115, parish Tataila, county Cadell, of 480½ acres, formed part of the Murray River forest reserve No. 1,794, notified the 18th August, 1871, part of which including the above portion was cancelled on the 12th December, 1881.

During the currency of this reserve, portion 115 was improved as follows by the lessees of the Run:—Tank, £267, excavated November, 1877; fencing, £103 10s., erected in February, 1878; clearing, £110, effected in July, 1877: total, £480 10s.

The above portion is therefore fully improved, and has been applied for (by this application) as a conditional purchase under the 12th section of the Lands Acts Further Amendment Act.

Applicant having paid 10 per cent. on the supposed value of improvements, further steps should now perhaps be taken in regard to the appraisement, unless it be considered that she is entitled to the refund asked for, and for the reason stated in the accompanying letter; also, for report of Conditional Purchase Inspector.—CHAS. ED. FISCH, for Surveyor-General, 15th August, 1882.

As the full area conditionally purchased is not available, the request of the applicant for the refund of the deposit is in accordance with law, and is submitted for approval.—A.O.M., 25/9/82. Approved.—JOHN R.

C.

[Alienation Act, section 13]

District of Moama.

No. 13 of 1882.

Application by Annie Wedgwood for the Conditional Purchase, without competition, of 480½ acres unimproved Crown Land.

Received by me, with a deposit of £120 2s. 6d., this 12th day of January, 1882, at 10 o'clock; also, £48 1s., being one tenth of supposed value of improvements under Act of 1880.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the 13th section of the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 480 acres 2 roods; and I herewith tender the sum of £203 1s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of the value of improvements.

I am willing to purchase the improvements and pay for them the amount fixed by appraisement.

I am, &c.,

ANNIE WEDGWOOD,

To the Agent for the Sale of Crown Lands at Moama.

Moama.

Description.

County of Cadell, parish of Tataila, 480½ acres, being measured portion No. 115.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-14.)

REPORT of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of John Slocombe, jun., made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—His agent admits abandonment of this land by the selector, as stated in his letter of 15 February last.

Licensed surveyor values improvements, £306 10s. on 306½ acres.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 306.—Letter intimating abandonment of conditional purchase from claimant is with proceedings; also, one from claimant's agent, waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 22/4/83.

For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. J. Slocombe, jun., informed, 9th May, 1883.

[Enclosures]

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. John Slocombe, jun., who applied for a conditional purchase on the 12th January last, at Moama, as conditional purchase 82-14, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & CO.

John Slocombe, jun.

GEORGE HENRY HOLMES, sworn, states: I am agent for John Slocombe, jun., who selected on 12th January, 1882, 306½ acres, county Cadell, parish Tataila, which he has now abandoned, as notified in his letter of 15th February, 1882, and as I am now authorized to state.

Taken and sworn at Moama, this 4th }
November, 1882, before me, }

G. H. HOLMES.

H. J. HOLMES, Commissioner.

Mr. J. Slocombe, jun., to The Chief Commissioner.

Sir,

Moama, 15 February, 1882.

On the 12th January, 1882, I applied at Moama for a conditional purchase of 306½ acres, parish of Tataila, county Cadell, surveyed, and measured portion No. 118. I have abandoned my claim to this land, and beg to inform you officially of same.

Yours, &c.,

JOHN SLOCOMBE, JUN.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Copy of Minutes on back of Conditional Purchase Application.

Portion No. 118, parish of Tataila, county Cadell, of 306½ acres, formed part of Reserve No. 95, notified the 18th February, 1863, and cancelled the 12th December, 1881. Portion No. 118 also formed part of the Murray River Forest Reserve No. 1794, notified the 18th August, 1871, part of which, including the above portion, was cancelled the 12th December, 1881. During the currency of those reserves the following improvements were effected on the above portion by the lessees of the run:—Tank, and indifferently constructed dam, and protecting fence, £202, excavated in February, 1878; fencing, £40, erected February, 1878; clearing, £64: total improvements, £306 10s.

The above portion is therefore fully improved and has been applied for by this application as a conditional purchase (82-14), under the 12th section of the Lands Acts Further Amendment Act.

Applicant having paid 10 per cent. on the supposed value of the improvements, further steps should now perhaps be taken in regard to the appraisalment of same; also, for report of Conditional Purchase Inspector.—F.W.W., 26 July, 1882.

Approved.—JOHN R.

C.

District of Moama.

Application by John Slocombe, jun., for the Conditional Purchase, without competition, of 306 acres 3 roods, unimproved Crown Land.

Received by me with a deposit of £76 13s. 9d. this 12th day of January, 1882, at 10 o'clock; also, £30 13s. 6d., one tenth of supposed value of improvements under Act of 1880.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 306 acres 3 roods; and I herewith tender the sum of £107 7s. 3d. being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of the value of improvements. I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I am, &c.,

JOHN SLOCOMBE, JUN.,

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Tataila, 306 acres 3 roods, being measured portion No. 118.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-15.)

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Duncan Leitch, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—

His agent admits the selector has abandoned this selection. Improvements, valued at £542 5s., on tracing in August, 1879.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited. I have, &c.,
H. J. BOLDING.

Sec. 13, Ac. 542½.—Letter intimating abandonment of C.P. from claimant is with proceedings. Also, letter from agent of claimant waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83.

For forfeiture.—A.O.M., 1/5/83. Appd.—J.S.F., 3/5/83. D. Leitch informed, 9/5/83.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Duncan Leitch, who applied for a conditional purchase on the 12th January last, at Moama, as C.P. 82-15, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & CO.

Duncan Leitch.

GEORGE HENRY HOLMES, sworn, states:—I am agent for Duncan Leitch, who selected, on 12th January, 1882, 542½ acres, county of Cadell, parish of Tataila, which I am now authorized to state he has abandoned, as notified in his letter of 7th March last.

Taken and sworn at Moama, this 4th day of {

November, 1882, before me,—

H. J. BOLDING, Commissioner.

G. H. HOLMES.

Mr. D. Leitch to The Chief Commissioner.

Sir,

Moama, 7 March, 1882.

With reference to the selection of land containing 542 acres 2 roods, and which I entered an application for at the Crown Lands Office, Moama, on the 12th January ultimo, I have the honor to state I have abandoned the same. Measured portion 120, parish of Tataila, county of Cadell.

I am, &c.,

DUNCAN LEITCH.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Mr. D. Leitch to the Crown Lands Agent, Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application, lodged this day.

D. LEITCH.

Copy of Minutes on back of Conditional Purchase Application.

Portion 120, parish Tataila, county Cadell, of 542½ acres, formed part of reserve No. 95, notified 18th February, 1863; it also formed part of the Murray River forest reserve No. 1,794, notified 18th August, 1871. The parts of the above reserves included within portion 120 were cancelled on the 12th December, 1881.

During the currency of these reserves the following improvements were effected on portion 120:—Tank, worth £363, excavated in January, 1878; clearing, £126, effected in November, 1877; fencing, £53, 5s., erected in February, 1878. Total, £512 5s.

The above portion is fully improved, and has been applied for (by this application) as a conditional purchase, under the 12th section of the Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisalment of the improvements be at once taken; also, for report of C.P. Inspector.—CHAS. ED. FINCH, for Surveyor-General, 15th August, 1882. Approved—JOHN R.

C.

[Alienation Act, section 13.]

No. 15, of 1882.

District of Moama.

Application by Duncan Leitch for the Conditional Purchase, without competition, of 542 acres 2 roods unimproved Crown Land.

Received by me, with a deposit of £135 12s. 6d., this 12th day of January, 1882, at 10 o'clock; also, £54 5s., being one tenth of supposed value of improvements under Act of 1882.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

12 January, 1882.

Sir,

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 542 acres 2 roods; and I herewith tender the sum of £135 12s. 6d., being a deposit at the rate of 5s. per acre on the area for which I apply, 10 per centum of proportion of value of improvements. I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I am, &c.,

DUNCAN LEITCH,

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Tataila, 542½ acres, being portion No. 120.

Mr.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-16.)

REPORT of an Inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Frederick St. George, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts, bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence, viz.:—His agent admits abandonment of this land as stated in selector's letter of 16th March last.

Licensed Surveyor valued improvements, £526 on 526 acres in January, 1879.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 526.—Letter intimating abandonment of conditional purchase from claimant is with proceedings. Also one from his agent, waiving claim to usual seven days' notice to attend inquiry. Presuming that case is properly before Court, and that notice can be dispensed with, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 22/4/83.

For forfeiture.—A.O.M., 1/5/83.

Approved.—J.S.F., 3/5/83.

F. St. George infd., 9/5/83.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Frederick St. George, who applied for a conditional purchase at Moama on the 12th January last, as conditional purchase 82-16, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & CO.

F. St. George.

GEORGE HENRY HOLMES, sworn, states:—I am agent for Frederick St. George, who selected, on 12th January, 1882, 526 acres, county Cadell, parish Wamboota, which I am now authorized to state he has abandoned, as he states in his letter of 16th March last.

Taken and sworn at Moama, this 4th }
November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Mr. F. St. George to The Chief Commissioner.

Sir,

Moama, 16 March, 1882.

I beg most respectfully to notify to you, as Chief Commissioner of Conditional Purchases, that I have abandoned the selection of land composed of measured portion 50 (526 acres), parish Wamboota, county Cadell, and which I applied for at Moama Land Office on the 12th January last.

I have, &c.,

FREDERICK ST. GEORGE.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Mr. F. St. George to The Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

FREDERICK ST. GEORGE.

Copy of Minutes on back of Conditional Purchase Application.

Portion 50, parish Wamboota, county Cadell, of 526 acres, formed part of reserve 92A, notified the 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of reserve 92A, the following improvements were effected on this portion by the lessees of the run:—Fencing, £150, erected in February, 1878; tank and fence, £376 (tank excavated in December, 1877); total improvements, £526.

The above portion is therefore fully improved, and has been applied for by this application as a conditional purchase (82-16), under the 12th Section of the Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisal of the improvements be now proceeded with; also, for report of Conditional Purchase Inspector.—CHAS. ED. FISCH, for Surveyor-General, 15th August, 1882.

Approved.—JOHN R.

[Alienation Act, section 13.]

District of Moama.

No. 16 of 1882.

Application by Frederick St. George for the Conditional Purchase, without competition, of 526 acres unimproved Crown Land.

Received by me, with a deposit of £131 10s., this 12th day of January, 1882, at 11.30 o'clock; also, £52 12s., being one tenth of supposed value of improvements under Act of 1880.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 526 acres; and I herewith tender the sum of £184 2s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of value of improvements. I am willing to purchase the improvements, and pay for them the amount fixed by appraisement.

I am, &c.,

FREDERICK ST. GEORGE,

Moama.

To the Agents for the sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Wamboota, 526 acres, being measured portion No. 50.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P., No. 82-17.)

REPORT of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Thomas Norman, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—His agent admits the selector has abandoned this land, as stated in the letter of 31st October last.

No tracing or surveyor's report.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 320.—Letter of abandonment bearing same signature as application, viz. Thomas Norman is with proceedings. Letter herewith from Norman's agent waiving claim to the usual seven days' notice. Presuming that such notice can be dispensed with, and that case is properly before court, agent of claimant gives evidence of abandonment, and it is submitted conditional purchase be brought forward for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved J.S.F., 3/5/83. Thos. Norman informed, 9th May, 1883.

Mr. T. Norman to The Chief Commissioner.

Sir,

13 March, 1882.

I desire to acquaint you that I have abandoned the selection of 320 acres applied for by me at Moama on January the 12th, 1882.

The land referred to is measured portion 20, parish Tamar, county Cadell, Moama district.

I am, &c.,

THOMAS NORMAN.

Minutes on above.

Portion 20, parish Tamar, county Cadell, of 320 acres, formed part of reserve 92A extension, notified 10th January, 1873, and which reserve was cancelled on the 12th December, 1881. During the currency of this reserve, and since July 1876, fencing to the value of £120 was placed on the above portion.

In view of the above it is submitted whether conditional purchase application 82-17 for portion 20, taken up at Moama, on 12th January 1882, be declared void in accordance with recent decision (Supreme Court) in Bernholt's case, the only circumstance to distinguish the present case from that mentioned being that the improvements were effected during the currency of the reserve.

Clause 12 Act of 1880 does not apply to this case, the improvements being less than £1 per acre.

The improvements mentioned cannot be embraced in a measurement of 40 acres or upwards, according to Regulations to contain a pound's worth to the acre.

By memo. attached to the application, applicant requested to be allowed to withdraw his conditional purchase.—CHAS. ED. FINCH, for Surveyor General, 24/3/82.

Conditional Sales Branch, Lands.—The applicant having given notice of abandonment, the above question does not, it is submitted, arise.—For Commissioner.—A.O.M., 9/10/82. Approved.—JOHN R.

[Enclosures.]

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

[Alienation Act.]

(C. P. No. 82-18, Moama.)

Declaration of Conditional Purchaser under the 18th section of the Crown Lands Alienation Act of 1861.

I, JAMES MCKINDLAY, JUN., of Wamboona, do solemnly and sincerely declare, that I am the lawful owner, by conditional purchase, under the 13th section of the Crown Lands Alienation Act of 1861, of the land hereunder described, and that improvements consisting of fencing, house, tank, clearing, and to the value of £200, have been made on such land; and I declare further, that the said land has been the *bona fide* residence, continuously, of myself from the period of selection and first occupation to the present date. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Taken and declared at Moama, this 18th }
day of March, 1885, before me,— }

JAMES MCKINDLAY, JUN.

LESTER S. DONALDSON, J.P.

Description.

County of Cadell, parish of Benarca, 280 acres, at Benarca, being conditional purchase No. 18, of 1882, in the district of Moama, now Deniliquin, made on the 12th January, 1882.

Mr.

Mr. C.-P. Inspector Carne to The Chief Commissioner.

(C.P. 82-18, section 83, portion 83.)

REPORT by T. B. Carne, Inspector of Conditional Purchases, respecting the Selection of James McKindlay, made at Deniliquin, on 12th January, 1882.

Sir,

Deniliquin, 1 February, 1885.

I have the honor to report that I visited and inspected the above-described conditional purchase, on the 3rd January, 1885, and that I found the selector then resident upon his selection.

The land, which consists of forest, and comprises 280 acres, is occupied and used by the selector as grazing land; and the selector, who follows the avocation of grazier, had at the time of my visit made the improvements hereunder particularly described, the value of which I estimate at the sums respectively stated, viz. :—

Half small hut	£4 0 0
100 chains fence, part wire and part chock and log	68 15 0
						£72 15 0

From the appearance of the land, and the circumstances stated in the following remarks, I am of opinion that the selector has been continuously resident upon the selection.

Resident. The improvements enumerated were erected by applicant since selection; no part of them were on the land previously.

I have, &c.,

T. B. CARNE.

Copy of Memos. attached to Conditional Purchase Application.

Mr. J. McKindlay to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1862, the portion of unimproved Crown Land hereunder described, containing 480 acres; and I herewith tender the sum of £120, being a deposit at the rate of
per acre on the area for which I apply.

I am, &c.,
NEIL M'KINDLAY,

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Mars, measured portion No. 101.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-20.)

REPORT of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of John Quilliam, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875" held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant having been duly served with notice of the time and place of holding the inquiry was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—His agent admits the selector has abandoned this land as stated in his letter of 15th June last. Licensed surveyor values improvements £573 in March last.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,
H. J. BOLDING.

Sec. 13, Ac. 573.—Letter intimating abandonment of conditional purchase from claimant is with proceedings; also, one from his agent, waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. J. Quilliam informed 9th May, 1883.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been requested by our client, Mr. John Quilliam, who applied on the 12th January last, at Moama, for a conditional purchase, as conditional purchase No. 82-20, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,
H. H. BROWN & Co.
J.

J. Quilliam.

GEORGE HENRY HOLMES, sworn, states: I am agent for John Quilliam, who selected on 12th January, 1882, 573 acres, county of Cadell, Parish of Benarea, which I am now authorized to state he has abandoned, as notified in his letter of 15th June last.

Taken and sworn at Moama, this 4th }
November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Mr. J. Quilliam to The Chief Commissioner.

Sir,

I have the honor to state that I have abandoned the conditional purchase of 573 acres, made by me at Moama on 12th January last, and known as surveyed portion 94, parish of Benarea.

Moama, 15 June, 1882.

I remain, &c.,

JOHN QUILLIAM.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Mr. J. Quilliam to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application made this day.

JOHN QUILLIAM.

Copy of Minutes on back of Conditional Purchase Application.

Portion 94, parish of Benarea, county of Cadell, of 573 acres, formed part of reserve 94A, notified the 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of reserve 94A portion 94 was improved by the lessees as follows:—Fencing, £183, erected in 1877; tank, £390, excavated in September, 1877: total, £573. The above portion is therefore fully improved, and has been applied for by this application, as a conditional purchase under the 12th section of the Lands Acts further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisal of the improvements be at once taken; also, for report of Conditional Purchase Inspector.—CHAS. ED. FINCH, for Surveyor-General, 15th August, 1882.

C.

[Alienation Act, section 13.]

District of Moama.

No. 20 of 1882.

Application by John Quilliam, a minor, 19 years of age, for the Conditional Purchase, without competition, of 573 acres, unimproved Crown Land.

Received by me, with a deposit of £143 5s., this 12th day of January, 1882, at 10 o'clock; also, £57 6s. on account of improvements under section 12, Act of 1880.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 573 acres; and I herewith tender the sum of £143 5s. being a deposit at the rate of 5s. per acre on the area for which I apply; also, 10 per cent. of improvements making a total of £200 11s.

I am, &c.,

JOHN QUILLIAM,

Altcar, near Moama.

To the Agent for the Sale of Crown Lands at Moama,

Description.

County of Cadell, parish of Benarea, 573 acres, block 94 (ninety four).

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P., No. 82-21.)

REPORT of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Albert Quilliam, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant having been duly served with notice of the time and place of holding the inquiry was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz:—

The agent admits the selector has abandoned this land, as stated in his letter of 15th March last.

Licensed surveyor values improvements, £602 on 600 acres in March last.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 600.—Letter from claimant intimating abandonment of conditional purchase is with proceedings; also, one from his agent waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court; claimants' agent gives evidence as to abandonment. Submitted for forfeiture. W.B.—21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved, J.S.P., 3/5/83. A. Quilliam informed, 9 May, 1883.

[Enclosures.]

[Enclosures.]

Messrs. H. H. Brown, & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been requested by our client, Mr. Albert Quilliam, who applied for a conditional purchase on the 12th January last, at Moama, as conditional purchase 82-21, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. Brown, & Co.

Albert Quilliam.

GEORGE Henry Holmes, sworn, states : I am agent for Albert Quilliam, who selected on 12th January, 1882, 600 acres, county Cadell, parish Benarca, which I am now authorized to state he has abandoned, as notified in his letter of 15th June last.

Taken and sworn at Moama this 4th }
November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Mr. Albert Quilliam to The Chief Commissioner.

Sir,

15 June, 1882.

I beg respectfully to inform you that I have abandoned the selection made by me at Moama on the 12th January last, comprising 600 acres, in the parish of Benarca (surveyed portion 89), county Cadell.

Yours, &c.,

ALBERT QUILLIAM.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Mr. Albert Quilliam to the Crown Lands Agent, Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application made this day.

I have, &c.,

ALBERT QUILLIAM.

Copy of Minutes on back of Conditional Purchase Application.

Portion 89, parish of Benarca, county Cadell, of 600 acres, formed part of reserve 94A, notified the 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of reserve 94A, portion 89 was improved by the lessees as follows :—Fencing, £190, erected in January, 1879; tank, £192, excavated in February, 1879; ringing and clearing, £220, effected in January, 1879; total, £602. The above portion is therefore fully improved and has been applied for (by this application) as a conditional purchase under the 12th section of the Lands Acts further Amendment Act. It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisal of the improvements be now taken; also, for report of Conditional Purchase Inspector.—CHAS. District of Moama.

No. of 18 .

Application by Albert Quilliam, a minor, sixteen years of age, for the Conditional Purchase, without competition, of 600 acres, unimproved Crown Land.

Received by me, with a deposit of £150, this 12th day of January, 1882, at 10 o'clock; also, £60 on account of improvements, under section 12, Act of 1880.

L. S. DONALDSON,

Agent for the sale of Crown Lands at Moama.

12 January, 1882.

Sir,

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 600 acres; and I herewith tender the sum of £150, being a deposit at the rate of 5s. per acre on the area for which I apply; also, 10 per cent. of improvements, making a total of £210.

I am, &c.,

ALBERT QUILLIAM,

Altcar, near Moama.

To the Agent for the sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarca, 600 acres, marked 89.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-27).

Report of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Stephen Mappin, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant having been duly served with notice of the time and place of holding the inquiry, was, by agent, present thereat.

The following facts, bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence, viz. :—

His agent admits this land has been abandoned, as stated in selector's letter of 22 March last.

Licensed surveyor states, improvements are worth £505 in January, 1879.

I

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,
H. J. BOLDING.

Sec. 13, Ac. 505.—Letter intimating abandonment of conditional purchase from claimant is with proceedings; also one from his agent waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. Stephen Mappin informed, 9 May, 1883.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Stephen Mappin, who applied for a conditional purchase on the 12th January last, at Moama, as conditional purchase 82-27, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,
H. H. BROWN & CO.

S. Mappin.

GEORGE Henry Holmes, sworn, states:—I am agent for Stephen Mappin, who selected on 12 January, 1882, 505 acres, county Cadell, parish Tamar, which I am now authorized to state he has abandoned, as notified in his letter of 22 March last.

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of William James Dalzell, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—

His agent admits that the selector has abandoned these 462 acres, as stated in the letter of 26th October last.

Improvements by surveyor's tracing, valued at £462 in January, 1879.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 462.—Letter intimating abandonment of conditional purchase from agent of claimant is with proceedings, as also one waiving claim to the usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. W. J. Dalzell informed, 9th May, 1883.

I wish to withdraw my conditional purchase application lodged this day.

W. J. DALZELL.

Copy of Minutes on back of Conditional Purchase Application.

PORTION 41, parish of Wamboota, county Cadell, of 462 acres, formed part of reserve 92A, notified the 22nd December, 1865, and cancelled 12th December, 1881. During the currency of reserve 92A, the following improvements were effected on this portion by the lessees of the run:—Fencing, £184, erected in February 1878; tank and protecting fence, £258, (tank excavated in October 1877); ringed timber, £20, effected in November, 1878: total improvements, £462. The above portion is therefore fully improved, and has been applied for, by this application, as a conditional purchase (82-30) under the 12th section of the Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisalment of the improvements be now proceeded with; also, for report of Conditional Purchase Inspector.—CHAS. E. FINCH (for Surveyor General), 15/8/82. Approved JOHN R.

C

[Alienation Act, section 13.]
No. 30 of 1882.

District of Moama.

Application by William James Dalzell, for the Conditional Purchase, without competition, of 462 acres unimproved Crown Land.

Received by me, with a deposit of £115 10s., this 12th day of January, 1882, at 11:30 o'clock.

L. S. DONALDSON,
Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.
I am desirous of purchasing without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 462 acres; and I herewith tender the sum of £161 14s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum value of improvements.
I have &c.,
W. J. DALZELL,

To the Agent for the Sale of Crown Lands at Moama.

Moama.

Description.

County of Cadell, parish of Wamboota, 462 acres, being measured portion No. 41. I am willing to purchase the improvements, and pay the amount fixed by appraisalment.

Mr Commissioner Bolding to The Chief Inspector.

(C.P. No. 82-31).

REPORT of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of William James Martin, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—

His agent admits the selector has abandoned this land, as stated in the letter of 26th October last. Licensed surveyor reports improvements, £489, on 489 acres in January, 1879.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.
I have, &c.,
H. J. BOLDING.

Section 13, Ac 489.—Letter intimating abandonment of conditional purchase from agent of claimant, and also one waiving claim to usual seven days' notice to attend inquiry, with proceedings. Presuming

Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. W. J. Martin informed, 9th May, 1883.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21 Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Wm. Jas. Martin, who applied for a conditional purchase on the 20th January last, at Moama, as conditional purchase 82-31, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days. We have, &c.,

H. H. BROWN & CO.

W. J. Martin.

GEORGE HENRY HOLMES, sworn, states: I am agent for William James Martin, who selected on 12th January, 1882, 489 acres, county Cadell, parish Wamboota, which I am now authorized to state he has abandoned, as notified in the letter of his agents, H. H. Brown & Co., 26th October last.

Taken and sworn at Moama, this }
4th November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Messrs. H. H. Brown & Co. to The Chief Commissioner.

Sir,

21 Exchange Buildings, Pitt-street, 26 October, 1882.

We are requested by our client, Mr. W. J. Martin, to advise you that he has abandoned the selection, made by him on the 12th January last, for 489 acres, being portion 42, parish Wamboota, county Cadell.

We have, &c.,

H. H. BROWN & CO.

Notice of abandonment, for Commissioner.—W.B., 30/10/82.

Mr. W. J. Martin to the Crown Lands Agent, Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

W. J. MARTIN.

Copy of Minutes on back of Conditional Purchase Application.

Portion 42, parish Wamboota, county Cadell, of 489 acres, formed part of reserve 92A, notified the 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of reserve 92A the following improvements were effected on this portion by the lessees of the run:—Fencing, £156, erected in February, 1878; tank, dam, and protecting fence, £333 (tank excavated in November, 1877): total, £489. The above portion is therefore fully improved, and has been applied for, by this application, as a conditional purchase under the 12th section of the Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action with regard to the appraisalment of the improvements be now proceeded with; also, for report of Conditional Purchase Inspector.—CHAS. L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 489 acres; and I herewith tender the sum of £171 3s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of the value of improvements, £48 18s.

I am, &c.,

W. J. MARTIN,

Moama.

To the Agent for the sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Wamboota, 489 acres, being measured portion No. 42. I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

Mr. Commissioner Bolding to the Chief Commissioner.

(C.P. No. 82-33.)

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Freeman Armitage, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The

The claimant, having been only served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz:—

His agent, Holmes, admits in evidence that the selector has abandoned this land, as acknowledged in his letter of 18th March last.

The Licensed surveyor, on tracing, reports improvements worth £435 in January last—date of selection.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 434 $\frac{3}{4}$.—Letter of abandonment bearing signature of applicant is with proceedings; letter herewith from claimant's agent waiving claim to the usual seven days notice. Presuming that such notice can be dispensed with, and that case is properly before the Court, claimant's agent gives evidence of abandonment. It is submitted conditional purchase is for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. F. Armitage informed, 9th May, 1883.

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Denis Shanahan, made at Moama, on the 12th January, 1882. 13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts, bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence viz.:—His agent admits abandonment by the selector, as stated in the letter of 26th October last.

Licensed surveyor values improvements, £567, on 498 acres.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 498.—Letter intimating abandonment of conditional purchase from agent of claimant, and also one waiving claim to usual seven days' notice to attend inquiry, with proceedings. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitttd for forfeiture.—W.B., 22/4/83. Sir, 12 January, 1882.
 I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 498 acres; and I herewith tender the sum of £164 13s. 6d., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of the value of improvements, £40 3s. 6d. I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

D. SHANAHAN,
 To the Agent for the Sale of Crown Lands at Moama. Moama.

Description.
 County of Cadell, parish of Benarca, 498 acres, being measured portions No. 57 and 59.

Mr. Commissioner Bolding to the Chief Commissioner.

(C.P. No. 82-37.)

REPORT of an inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Reuben Jenner, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,
 I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts, bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence, viz. :—

His agent admits the selector has abandoned these 451 acres, as stated in his letter of 10th March last. Improvements reported on licensed surveyor's tracing, worth £451 in August, 1879.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited. I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 451.—Letter intimating abandonment of conditional purchase from claimant is with proceedings; also, letter from claimant's agent waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B. 21/4/83. For forfeiture. A.O.M. 1/5/83. Approved.—J.S.F. 3/5/83. R. Jenner informed, 9 May, 1883.

[Enclosures.]

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarca, 451 acres, being measured portion No. 58.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-38.)

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the conditional purchase of John Mitchell, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts, bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence, viz.:—His agent admits this land is abandoned, as stated in the selector's letter of 23rd February last.

Licensed surveyor values improvements, £639 on 639 acres in March, 1879.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 639.—Letter intimating abandonment of conditional purchase from claimant is with proceedings; also, one from his agent waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before the Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. Jno. Mitchell informed, 9th May, 1883.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. John Mitchell, who applied for a conditional purchase on 12th January last, at Moama, as conditional purchase 82-38, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & CO.

J. Mitchell.

GEORGE HENRY HOLMES, sworn, states:—I am agent for John Mitchell, who selected on 12th January, 1882, 639 acres, county Cadell, parish Benarca, which I am now authorized to state he has abandoned, as notified in his letter of 23rd February last.

Taken and sworn, at Moama, this 4th }
November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

885—D

Mr.

Mr. John Mitchell to The Chief Commissioner.

Sir,

Moama, 23 February, 1882.

On the 12th January, 1882, I applied for 639 acres of Crown Land at the Moama office, in the county of Cadell, parish of Benarca, surveyed allotment 85, Pericoota run. I take this opportunity of writing to say that I have decided to give up and abandon any interest I have in the same.

I remain, &c.,

JOHN MITCHELL.

Notice of abandonment, for Commissioner.—W.B., 31/10/82.

Mr. John Mitchell to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

JOHN MITCHELL.

Copy of Minutes on Conditional Purchase Application.

Portion 85, parish of Benarca, county Cadell, of 639 acres, formed part of reserve No. 93A, notified the 22nd December, 1865, and cancelled the 1st August, 1881. Portion 85 also formed part of reserve 2,846, notified the 24th August, 1881, part of which, including the above portion, was cancelled on the 12th December, 1881. During the currency of reserve 93A, portion 85 was improved by the lessees as follows:—Fencing, £102, erected in 1874 and 1878; tank, £358, excavated in December, 1877; ring-barking and clearing, £179, effected in March, 1878: total, £639.

The above portion is therefore fully improved, and has been applied for (by this application) as a conditional purchase under the 12th section of the Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that the remaining necessary action in regard to the appraisalment of the improvements be now taken; also, for report of Conditional Purchase Inspector.—CHAS. ED. FISCH, for Surveyor-General, 15 August, 1882. Approved.—JOHN R.

C.

[Alienation Act, section 13.]

No. 38, of 1882.

District of Moama.

Application by John Mitchell for the Conditional Purchase, without competition, of 639 acres unimproved Crown Land.

Received by me, with a deposit of £159 15s., this 12th day of January, 1882, at 10 o'clock.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 639 acres; and I herewith tender the sum of £223 13s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of value of improvements.

I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I have, &c.,

JOHN MITCHELL,

To the Agent for the Sale of Crown Lands at Moama.

Moama.

Description.

County of Cadell, parish of Benarca, 639 acres, being measured portion No. 85.

Mr. Commissioner Bolding to The Chief Commissioner.

(C.P. No. 82-89.)

REPORT of an inquiry held at Moama on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Isaac Harris, made at Moama, on the 12th January, 1882. 13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister of Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—

His agent admits the selector has abandoned this selection. No surveyor's tracing or report.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 507½.—Letter intimating abandonment of the C.P., bearing the same signature as application, is with the proceedings; also, letter from claimant's agent waiving claim to usual seven days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Appd.—J.S.F., 3/5/83. Isaac Harris infd., 9th May, 1883.

[Enclosures.]

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21, Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Isaac Harris, who applied for a conditional purchase on the 12th January last, at Moama, as C.P. No. 82-39, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & CO.

Isaac Harris.

GEORGE HENRY HOLMES, sworn, states: I am agent for Isaac Harris, who selected, on 12th January, 1882, 507½ acres, county of Cadell, parish of Benarca, which, I am now authorized to state, he has abandoned, as notified in his letter of 12th March last.

Taken and sworn at Moama, this 4th }
November, 1882, before me,—

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Mr. Isaac Harris to The Chief Commissioner.

Dear Sir,

12 March, 1882.

I beg to inform your Department that I have abandoned my claim to the conditional purchase I took up at Moama on 12th January last, which conditional purchase contains 507 acres 3 roods, situated on cancelled reserve 93, and may otherwise be described as surveyed block No. 88, in the parish of Benarca, and county of Cadell.

I remain, &c.,

ISAAC HARRIS.

Minutes on above.

Portion 88, parish of Benarca, County Cadell, of 507½ acres, formed part of reserve 93A, notified 22nd December, 1865, and cancelled the 1st August, 1881. Portion 88 also formed part of reserve 2,846, notified the 24th August, 1881, part of which, including the above portion, was cancelled on the 12th December, 1881. During the currency of reserve 93A the following improvements were effected by the lessees on this portion:—Fencing, £160, erected in November, 1877, and March, 1878; tank, £200, excavated in September, 1877; ringing and clearing, £151, effected in March, 1878; total, £511. The above portion is therefore, fully improved, and has been applied for, by C.P. application 82-39, under the 12th sec. of the Lands Acts Further Amendment Act.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that action should probably be taken on this notice of abandonment.—F.W.W., 26/7/82. CHAS. ED. FINCH, for Surveyor-General, 8/9/82. Notice of abandonment for Commissioner, 31/10/82.

Mr. Isaac Harris to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application, lodged with you this day.

ISAAC HARRIS.

C.

[Alienation Act, section 13.

No. 39, of 1882.

District of Moama.

Application by Isaac Harris for the Conditional Purchase, without competition, of 507 acres 3 roods unimproved Crown Land.

Received by me, with a deposit of £126 18s. 9d., this 12th day of January, 1882, at 10 o'clock.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 507 acres 3 roods; and I herewith tender the sum of £177 14s. 3d., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of value of improvements, £50 15s. 6d. I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

ISAAC HARRIS,

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarca, 507½ acres, being measured portion No. 88.

Mr. Commissioner Bolding to the Chief Commissioner.

(C.P. No. 82-41.)

REPORT of an Inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the conditional purchase of William Wilson, made at Moama, on the 12th January, 1882.—13 Sec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—

His agent admits abandonment, as stated in selector's letter of 12th March last.

No report of improvements.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 455½.—Letter intimating abandonment of conditional purchase from claimant is with proceedings; also, one from his agent waiving claim to usual seven days notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives testimony as to abandonment. Submitted for forfeiture.—W.B., 22/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. William Wilson informed, 9th May, /83.

[Enclosures.]

William Wilson.

GEORGE HENRY HOLMES sworn, states:—I am agent for William Wilson, who selected on 12th January, 1882, 453½ acres, county Cadell, parish Benarca, which I am now authorized to state he has abandoned as notified in his letter of 12th March last.

Taken and sworn at Moama, this 4th }
November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21 Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Wm. Wilson, who applied for a conditional purchase on 12th January last at Moama, as C.P. No. 82-41, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & CO.

Mr. William Wilson to The Chief Commissioner.

Sir,

12 March, 1882.

I have the honor to state that I have finally abandoned the conditional purchase of 455½ acres, selected by me at the Crown Lands Office, Moama, on the 12th January ult.

The above land is the north and east part of block No. 93, and 34½ acres adjacent on the west, county of Cadell, parish of Benarca.

I have, &c.,

WILLIAM WILSON.

Minutes on above.

Portion 93, parish of Benarca, county Cadell, of 420½ acres, formed part of reserve 94A, notified the 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of reserve 94A, the following improvements were effected on this portion:—Two tanks, one excavated in November, 1877, value £182, the other commenced in 1877 and finished in 1879, value £239; fencing worth about £113: total, £543. Previous to the notification of the reserve 94A, sheep yards of the value of £34 were erected on this portion. The above portion is therefore fully improved, and has along with portion 75, parish of Benarca, of 32½ acres been applied for, by conditional purchase application 82-41, under the 12th section of the Lands Act Further Amendment Act. It is submitted that applicant's request to withdraw his application cannot be complied with, and that action should probably be taken on this notice of abandonment.—F.W.W., 26/7/82. CHAS. ED. FINCH, for Surveyor-General, 8/9/82. Notice of abandonment, for Commissioner, 31/10/82.

Mr. William Wilson to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application lodged this day.

WILLIAM WILSON.

C.

[Alienation Act, section 13.]

District of Moama.

No. 41 of 1882.

Application by William Wilson, for the Conditional Purchase, without competition, of 455 acres 2 roods, of unimproved Crown Lands.

Received by me, with a deposit of £113 17s. 6d., this 12th day of January, 1882, at 10 o'clock.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 455 acres 2 roods; and I herewith tender the sum of £177 17s. 6d., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum value of the improvements, £64.

I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I am, &c.,

WILLIAM WILSON,

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarca, 455 acres 2 roods, being that portion of measured portion No. 93 not reserved from lease, and 34½ acres to the west, and known as portion No. 78.

Mr.

Mr. Commissioner Bolding to the Chief Commissioner.

(C.P. No. 82-42.)

REPORT of an Inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the South-western Division, respecting the Conditional Purchase of Patrick Condon, made at Moama, on the 12th January, 1882. 13 Dec.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—His agent admits these 409 acres have been abandoned, as stated in the letter of 12th March last.

No report from licensed surveyor.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13, Ac. 409.—Letter of abandonment from claimant is with proceedings, as also one from claimant's agent, waiving claim to the usual 7 days' notice to attend inquiry. Presuming that such notice can be dispensed with, and that case is properly before court, claimant's agent gives evidence of abandonment. Submitted for forfeiture.—W.B., 21/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. Patk. Condon infd., 9 May, 1883.

[Enclosures.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,

21 Exchange Buildings, Pitt-street, 1 November, 1882.

We have the honor to advise you that we have been instructed by our client, Mr. Patrick Condon, who applied for a conditional purchase on the 12th January last, at Moama, as conditional purchase No. 82-42, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,

H. H. BROWN & CO.

Mr. Patrick Condon to The Chief Commissioner.

Sir,

12 March, 1882.

Having selected the following Crown Lands, I have elected to abandon the area included in my application dated at Moama, the 12th January last, county of Cadell, parish Benarca, being measured portion 96 of 409 acres in cancelled reserve 94, Pericoota Run.

I have, &c.,

his
PATRICK × CONDON.
mark.

Minutes on above.

Portion 96, parish of Benarca, county Cadell, of 409 acres, formed part of reserve 94A, notified the 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of reserve 94A the following improvements were effected by the lessees of the run on this portion:—Fencing, £84, erected in January, 1878; tank and dam, £225, excavated in August, 1877; sheep yards, £100, erected in January, 1878: total, 409. The above portion is therefore fully improved, and has been applied for as a conditional purchase (82-42) under the 12th section of the Lands Act Further Amendment Act. It is submitted that applicant's request to withdraw his application cannot be complied with, and that action should probably be taken on this notice of abandonment.—F.W.W., 26 July, 1882. CHAS. ED. FINCH, for Surveyor-General, 8 Sep., 1882. Notice of abandonment, for Commissioner, 31/10/82.

[Enclosures.]

Patrick Condon.

GEORGE HENRY HOLMES, sworn, states: I am agent for Patrick Condon, who selected on 12th January, 1882, 409 acres, co. Cadell, parish Benarca, which I am now authorised to state he has abandoned, as notified in his letter of 12th March last.

Taken and sworn at Moama, this 4th }
November, 1882, before me,— }

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Mr. Patrick Condon to the Crown Lands Agent, Moama.

Sir,

C.

[Alienation Act, section 13.]
No. 42 of 1882.

District of Moama.

Application by Patrick Condon for the Conditional Purchase, without competition, of 409 acres unimproved Crown Land.

Received by me, with a deposit of £102 5s., this 12th day of January, 1882, at 10 o'clock.

L. S. DONALDSON,
Agent for the Sale of Crown Lands at Moama.

Sir,

I am desirous of purchasing without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 409 acres; and I herewith tender the sum of £143 3s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum value of the improvements, £40 18s.

I am willing to purchase the improvements, and pay for them the amount fixed by appraisement.

I am, &c.,
PATRICK X CONDON.
his mark.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarca, 409 acres, being measured portion No. 96.

Messrs. H. H. Brown & Co. to The Chief Commissioner.

Sir,

21 Exchange Buildings, Pitt-street, 30 October, 1882.

We have the honor, on behalf of our client Mr. William Dean, to apply for a refund of deposit on the conditional purchase taken up by him at Moama, on the 12th January last, for 287½ acres, as conditional purchase 82-40, and we would also respectfully request that you will grant a refund at the same time of £20 12s., being the amount paid by our client as 10 per cent. deposit on supposed value of improvements.

This refund is applied for on the grounds that, as the land was not improved to 20s. per acre, it did not come within the meaning of the 12th clause of the Act of 1880.

We have, &c.,
H. H. BROWN & CO.

Copy of Minutes on back of Application.

By attached memo. applicant desires to withdraw this application.

Portion No. 90, parish Benarca, county Cadell, of 287½ acres, formed part of reserve No. 94A, notified 22nd December, 1865, and cancelled 12th December, 1881.

During the currency of reserve No. 94A, the following improvements were effected on this portion by the lessees of the run:—Fencing, £113, erected in 1878; ringing and clearing, £93, effected in March, 1879: total improvements, £206.

In view of the above, it is submitted whether this application (C.P. 82-40) be declared void in accordance with recent Supreme Court decision in Bernholt's case, the only circumstance to distinguish the present case from that mentioned, being that the improvements were effected during the currency of a reserve. Clause 12, Act of 1880, does not apply to this case, the improvements being worth less than £1 per acre.

The above-mentioned improvements cannot be embraced in a measurement of 40 acres or upwards according to Regulations, to contain a pound's worth to the acre.—CHAS. ED. FRICH, for the Surveyor-General, 24 August, 1882.

Void; the land not being open to conditional purchase as applied for.—A.O.M., 25/9/82.

Applicant (ps.), refund order; agent and Treasury informed, and 10 per cent. deposit refunded, 30th October, 1882.

Mr. W. Dean to the Crown Lands Agent, Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application, lodged this day.

W. DEAN.

No. 40, 1882.

District of Moama.

Application by William Dean, for the Conditional Purchase, without competition, of 287 acres 2 roods, unimproved Crown Land.

Received by me, with a deposit of £71 17s. 6d., this 12th day of January, 1882, at 10 o'clock.

L. S. DONALDSON,
Agent for the Sale of Crown Lands at Moama.

Sir,

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 287 acres 2 roods; and I herewith tender the sum of £92 9s. 6d., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum value of the improvements, £20 12s.

I am willing to purchase the improvements, and pay for them the amount fixed by appraisement.

I am, &c.,
WILLIAM DEAN,
Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Benarca, 287 acres 2 roods, being measured portion No. 90.

Messrs.

Messrs. H. H. Brown & Co. to The Under Secretary for Lands.

Sir,

21 Exchange Buildings, Pitt-street, 30 October, 1882.

We have the honor, on behalf of our clients Messrs. Robertson & Wagner, the lessees of Pericoota Run, to respectfully request that you will cause the portion of land noted in the margin being refused conditional purchase of E. C. J. Franklyn, gazetted for auction sale at as early a date as possible.

County Cadell,
parish Wom-
boota. Portion
No. 43, 245½
acres.

We have, &c.,

H. H. BROWN & CO.

The portion was advertised for sale on 18th January last, at £1 8s. 8d. per acre, but withdrawn previous to sale.—R.M., 20/11/82. Mr. Rotton,—For auction at the previous upset price.—F.W.W., 28 November, 1882.

Mr. E. C. J. Franklyn to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application, lodged this day.

E. C. J. FRANKLYN.

Copy of Minutes on back of Conditional Purchase Application.

By attached Memo. applicant desires to withdraw this application.

Portion No. 43, parish of Wamboota, county, Cadell, of 245½ acres, formed part of Reserve No. 92A, notified the 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of this reserve, and since July, 1876, fencing to the value of £45 was placed upon the above portion by the lessees.

In view of the above, it is submitted whether this application (C.P. 82-32) be declared void in accordance with recent Supreme Court decision in Bernholt's case, the only circumstance to distinguish the present case from that mentioned being that the improvements were effected during the currency of a reserve.

Clause 12, Act of 1880, does not apply to this case, the improvements being worth less than £1 per acre.

The above improvements cannot be embraced in a measurement of 40 acres or upwards according to Regulations, to contain a pound's worth to the acre.—CHAS. ED. FINCH, for Surveyor-General, 24th August, 1882. Void; the land not being open to conditional purchase as applied for.—A.O.M., 25/9/82. Applicant with refund order; agent and Treasury informed, 16 October, 1882.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 245 acres 2 roods; and I herewith tender the sum of £65 17s. 6d., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum of the value of improvements, £4 10s.

I am, &c.,

EDMUND CHARLES JONES FRANKLYN,
Avoca Cottage, Bosisto-street, Richmond,
Victoria.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Wamboota, 245 acres 2 roods, being measured portion No. 43.

I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

Mr. Commissioner Bolding to the Chief Commissioner.

(C.P. No. 82-35.)

REPORT of an Inquiry held at Moama, on the 4th November, 1882, by H. J. Bolding, Commissioner for the south-western Division, respecting the Conditional Purchase of William Townsend, made at Moama on the 12th January, 1882.—13 Sec.

Sir,

4 November, 1882.

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 7th December, 1882, in the matter of the above-described conditional purchase.

The claimant, having been duly served with notice of the time and place of holding the inquiry, was by agent present thereat.

The following facts, bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence, viz:—His agent admits abandonment, as stated in the selector's letter of 12th March last.

No report of improvements.

I have therefore to report that I find such conditions not to have been fulfilled, and to recommend that this conditional purchase be forfeited.

I have, &c.,

H. J. BOLDING.

Sec. 13.

Sec. 13, Ac. 364.—Letter intimating abandonment of conditional purchase from claimant ; also, one from his agent, waiving claim to usual seven days' notice, with proceedings. Presuming that such notice can be dispensed with, and that case is properly before Court, claimant's agent gives evidence as to abandonment. Submitted for forfeiture.—W.B., 22/4/83. For forfeiture.—A.O.M., 1/5/83. Approved.—J.S.F., 3/5/83. Wm. Townsend informed 9th May, 1883.

Volunteer Order Selection.

Application by Alexander William Robertson, and John Wagner (Robertson & Wagner), of Pericoota Station, N. S. Wales, for a grant of 50 acres of land, under clauses 44 and 45 of the Volunteer Regulation Act of 1867.

Received with certificate, this tenth day of August, 1883, at 10 o'clock.
EDWD. G. MARKHAM,
Land Agent, Deniliquin.
8 August, 1883.

In virtue of the enclosed certificate, we hereby apply for a grant of 50 acres of unimproved Crown Land, hereunder described.
ROBERTSON & WAGNER,
Pericoota, Moama,
(Per A. M. O'Dwyer, Agent).

The Land Agent, Deniliquin.

Description.

County of Cadell, parish of Benarca, being the western portion of block 53, of 79 acres. Commencing at the south-west corner of portion No. 53 of 79 acres, parish Benarca; thence due north 19 chains 50 links; thence due east along the north boundary of portion No. 53, about 25 chains 50 links; thence due south about 21 chains 9 links to the south boundary of portion No. 53; thence due west about 25 chains 50 links to starting point, to include the area applied for—50 acres.

Being part of forfeited conditional purchase, William Townsend, 364 acres, 12/1/82, forfeited in Government Gazette, 10th July, 1883.

Application made in virtue of certificate No. 2,527, issued to gunner Robert M'Pherson; £2 15s. subdivision fee, paid; applicant warned that 40 acres must be left after subdivision.—EDWD. G. MARKHAM, 10/8/83.

Messrs. H. H. Brown & Co. to the Under Secretary for Lands.

Sir,
21 Exchange Buildings, Pitt-street, 16 July, 1883.
We have the honor on behalf of our clients, Messrs. Robertson & Wagner, the lessees of Pericoota Run, to respectfully request that you will have brought forward for auction sale at as early a date as possible the forfeited selections as per Schedule on other side hereof.

We would point out to you that these selections are all measured portions, and are all very valuably improved to the extent of 20s. per acre and over that sum, and are therefore not open to conditional purchase.

Trusting that our request may be complied with at an early date.
We have, &c.,
H. H. BROWN & CO.

Moama—now Deniliquin.

[Enclosure.]

Messrs. H. H. Brown & Co. to Mr. Commissioner Bolding.

Sir,
21 Exchange Buildings, Pitt-street, 1 November, 1882.
We have the honor to advise you that we have been instructed by our client, Mr. Wm. Townsend, who applied for a conditional purchase on the 12th January last, at Moama, as conditional purchase No. 82-35, to advise you that he is desirous of your holding an inquiry into the conditions of his residence, and will waive any right or claim to a formal notice of fourteen days.

We have, &c.,
H. H. BROWN & CO.
Wm.

Wm. Townsend.

GEORGE HENRY HOLMES, sworn, states:—I am agent of William Townsend, who selected on 12th January, 1882, 364 acres, county Cadell, parish Benarca, which I am now authorized to state he has abandoned, as notified in his letter of 12th March last.

Taken and sworn at Moama, this 4th day of }
November, 1882, before me,—

G. H. HOLMES.

H. J. BOLDING, Commissioner.

Mr. W. Townsend to The Chief Commissioner.

Sir,

12 March, 1882.

I have the honor to advise you that I have abandoned the selection applied for by me at Moama on the 12th January, 1882, viz., being measured portions Nos. 52 and 53, parish Benarca, county Cadell, containing 364 acres.

I have, &c.,

W. TOWNSEND.

Minutes on the above.

Portions 52 and 53, parish Benarca, county Cadell, of 285 acres and 79 acres respectively, formed part of reserve 93, notified the 18th February, 1863. These portions also formed part of the Murray River Forest Reserve No. 1,794, notified the 18th August, 1871, part of which including the above portions was cancelled on the 12th December, 1881. Reserve No. 93 was cancelled the 1st August, 1881. The above portions were also within reserve No. 2,846, notified the 24th August, 1881, part of which including those portions was cancelled the 12th December, 1881. During the currency of reserve No. 93 and the Murray River forest reserve No. 1,794, the following improvements were effected on portions 52 and 53 by the lessees:—On portion 52, tank and well-constructed dam, £190, excavated September, 1877; fence, £38, erected in October, 1877; clearing, £57, effected in December, 1877: total, £285. On portion 53; clearing, £15; fence, £15: total, £30.

Portion 52 is therefore fully improved, and portion 53 improved to the value of £30.

It is submitted that applicant's request to withdraw his application cannot be complied with, and that action should probably be taken on this notice of abandonment.—CHAS. ED. FINCH, for Surveyor-General, 8 Sept., 1882.

Notice of abandonment, for Commissioner.—31/10/82.

Mr. W. Townsend to the Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application, lodged this day.

W. TOWNSEND.

C.

[Alienation Act, section 13.]
No. 35 of 1882.

District of Moama.

Application by William Townsend for the Conditional Purchase, without competition, of 364 acres unimproved Crown Land.

Received by me, with a deposit of £91, this 12th day of January, 1882, at 10 o'clock.

L. S. DONALDSON,

Agent for the Sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Lands hereunder described, containing 364 acres; and I herewith tender the sum of £122 12s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum value of improvements.

I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I am, &c.,

WILLIAM TOWNSEND,

To the Agent for the Sale of Crown Lands at Moama.

Moama.

Description.

County of Cadell, parish of Benarca, 364 acres, being measured portions 52 and 53.

The Under Secretary for Finance and Trade to The Under Secretary for Lands.

Subdivision Fee—Volunteer Land Order.

Sir,

The Treasury, N. S. Wales, 25 August, 1883.

I have the honor to inform you that the sum of £2 15s., being estimated cost of subdivision of a measured portion, mentioned below, was credited on the 15th August, 1883.

District, Deniliquin; names, A. W. Robertson and J. Wagner; area, 50 acres; selected in virtue of V.L.O. No. 78-73; portion 53, 79 acres.

I have, &c.,

W. NEWCOMBE,

(For the Under Secretary).

The Surveyor-General to The Under Secretary for Lands.

Minutes on Alienation, 83-3,716.

The V.L.O. application enclosed (78-73) is for part of portion No. 53, parish of Benarca, county of Cadell, being forfeited conditional purchase of Wm. Townsend, containing 79 acres. As the area applied for (50 acres) if measured, would leave a balance of less than 40 acres, the application is therefore recommended for refusal.—ROB. D. FITZGERALD, for Surveyor-General, 21 April, 1884.

Submitted that subdivision of the portion be refused.—R.H.D., 24/4/84. C.O., 29/4/84. Approved.—J.S.F., 29/4/84. Cancelled. Applicant, with certificate and refund voucher. Land Agent and Treasury informed.—1/5/84.

885—E

H.

Messrs. H. H. Brown, & Co. to The Under Secretary for Lands.

County Cadell,
parish Benarca,
portion 90,
227 acres
2 roods.

Sir,

21, Exchange Buildings, Pitt-street, October, 31, 1882.

We have the honor, on behalf of our clients, Messrs. Robertson & Wagner, the lessees of Pericoota Run, to respectfully request that you will cause the portion of land noted in the margin, being refused conditional purchase of William Dean, to be gazetted for auction sale at as early a date as possible.

We have, &c.,

H. H. BROWN, & Co.

Minutes on above.

The portion was advertised for sale on 18th January last, at £1 19s. 3d. per acre, but withdrawn previous to that date.—R.M., 20 Nov., 1882. Mr. Rotton,—For auction at the previous upset price.—F.W.W., 28/11/82.

Mr. R. Barbour to The Hon. The Minister for Lands.

Sir,

Sydney, 8 August, 1883.

Of the many petitions I have had the honor of presenting to yourself and the Parliament, I never had the pleasure of handling such a thoroughly honest and earnest petition, nor from so thoroughly loyal and patriotic a people, as the one I now present from the people of the Murray electorate in the Moama district.

I commend every line of the petition to your most earnest consideration, and I have to ask, for the sake of the permanent settlement of a most important portion of New South Wales, to withdraw the whole of the forfeited selections from lease for fear that the improvements should be tampered with, and also to reserve the whole from sale for water-supply or other public purposes.

In this way the land will be preserved from passing into the hands of monopolists, and an opportunity will be given for making provision for such cases in the new Land Bill. It may also give a chance for placing thereon a large addition to our population of hardy yeomen.

Truly yours,

ROB. BARBOUR.

(Petition presented by Mr. Robert Barbour)

The Hon. Minister of Lands, Sydney,—

The Petition of the Residents and Farmers of Pericoota and district humbly sheweth:—

That Crown Lands to the amount of 16,000 acres on the Pericoota Run, so far back as 1863 and 1865, was reserved from sale upon the representation of the lessee for the purpose of water reserves: that the said lands commencing on the right bank of the Murray and extending back a distance of from 7 to 10 miles from the river by 1 mile wide, and in some cases only 1 mile apart.

That the public received no benefit from these reserves but the object in obtaining them was to bar settlement by *bona fide* selection contiguously in the district.

That under the different Land Acts of the Colony the lessees have acquired in various ways land to the extent of 80,000 acres in direct antagonism to the settlement of the district. Selection has only obtained 20,000 acres, or one quarter of what has been handed over to the lessees in fee simple, and where selection has taken place it is of a very scattered nature on account of these reserves intersecting the settlement. Children may be seen going to school a distance of 16 miles to and fro.

Notwithstanding the unfavourable report of Messrs. Rankin and Morris, of the Deniliquin settlement, not 2 per cent. of *bona fide* selectors on the Pericoota Run have parted with their holdings.

That, during the years 1877 and 1878, while these lands were reserved from sale, the lessees effected improvements, in defiance of a Government Gazette notice to the contrary, for the purpose of compelling the Government to sell to the said lessees, by virtue of these improvements, thus claiming to buy the land when it was not for sale.

That, during the month of January, 1882, these reserves were revoked and advertised for sale, and that, upon the public attempting to secure a portion of the said reserves, the lands were fraudulently selected by employees, &c., and when inquiry was called for by the public, the only redress we got was the removal of the Lands Office from Moama to Deniliquin, compelling the *bona fide* selectors to travel a distance of 50 and in some cases 70 miles; and, further, we view with alarm the fraudulently selected portions being now revoked, fearing they will fall into the hands of the lessees, and further swell their already overgrown estates.

That these lands are suitable for settlement, and would be taken up by *bona fide* selectors, and improvements paid for if opportunity were granted, and would thereby enhance the prosperity of the district.

That the families of the present selectors and others require the land for settlement, we therefore would humbly ask the Hon. Minister for Lands to reserve these lands from lease and sale until after the passing of the New Land Act.

And your petitioners, as in duty bound, will ever pray.

August 3rd, 1883.

[Here follow 100 signatures.]

Minutes on Misc. 83-15,015.

THE questions for consideration in this case are,—

- (1.) Whether the land is to be offered for auction, as being fully improved it is not open to conditional purchase.
- (2.) It being decided not to do so, whether it shall be reserved from sale and lease as desired by the within petition.
- (3.) If neither of the foregoing courses is taken, whether the run within which the area is situated should not be reappraised, in order that a rental may be obtained for it.
- (4.) Whether, if this be decided upon, the lessees should be cautioned, that while having the use of the improvements, which are the property of the Crown, against removing them, or otherwise interfering with them in such a manner as to depreciate their value—reasonable wear and tear excepted—and informed that no improvements made upon the land, either before or after the forfeiture of conditional purchases will under any circumstances be deemed to confer any privilege of purchase.—C.O., 21/8/83.

For the present the land in question should neither be offered at auction nor reserved from sale.

The

The area may be re-appraised as suggested and the suggestions in the fourth (4) paragraph should be acted upon.—J.S.F., 25/8/83.

R. Barbour, M.P., and Messrs. H. H. Brown & Co., informed 29th August, 1883.

Memo.

THE lands mentioned in the enclosed papers were with one exception, of portion 75, Bernaca, of 32½ acres, advertised for auction at Moama on the 18th January, 1882, but were withdrawn on account of the conditional purchase mentioned.

They formed part of revoked reserves in the neighbourhood of the River Murray; and were improved during the currency of the reserves, in most cases up to and above, one pound per acre.

The selections were taken up on the 12th January, 1882, under clause 12 of the Act of 1880, and have been forfeited for abandonment.

The upset prices in January, 1882, varied from £1 8s. 11d. to £2 11s. 6d. per acre.

It is presumable that even now these lands are improved to the extent of £1 per acre, and if so, it may be a question whether they are now open to conditional purchase under clause 12 of the Act of 1880, or whether that clause having once operated after the cancellation of the reserves, it is not now inoperative, and the lands consequently barred from conditional purchase under any clause by reason of being improved to the extent of £40.—R.H.D., 20/7/83.

Minutes on the above.

Perhaps the upset price for these lands may be fixed at £2 per acre. Total area, 10,591 acres.—J.G.B., 24/7/83.

The lands referred to are forfeited conditional purchases, and being improved, I doubt whether they are open to conditional purchase. The lands were such as came within the operation of the 12th clause of the Act of 1880, and that clause having operated they are now forfeited conditional purchases, and should, I think, be dealt with as such, unless it is thought desirable to allow action to remain in abeyance pending legislation.

The land is of an exceptionally valuable character, and should, I think, not be offered at less than £2 10s. per acre. If offered at this price, the value of the improvements need not be considered.—C.O., 1/8/83.

Messrs. H. H. Brown & Co. to The Under Secretary for Lands.

Sir,

21 Exchange Buildings, Pitt-street, 16 July, 1883.

We have the honor on behalf of our clients Messrs. Robertson and Wagner, the lessees of Pericoota Run to respectfully request that you will have brought forward for auction sale at as early a date as possible the three voided selections mentioned on the other side.

We would point out to you that these three conditional purchases were voided as, according to law the land being part of an improved cancelled reserve and not improved to 20s. per acre was not open to selection.

We have, &c.,

H. H. BROWN & Co.

C.P. 82-82. Moama, now Deniliquin.—E. C. J. Franklyn, 12/1/82, 245½ acres, voided 16th October, 1882, as not being open to conditional purchase.

C.P. 82-40. Wm. Dean, 21/1/82, 287½ acres voided 30th October, 1882, as not being open to conditional purchase.

C.P. 82-34. John Hunter, 12/1/82, 236 acres, voided 30th October, 1882, as not being open to conditional purchase.

Minutes on Aln. 83-3,162.

THE lands herein mentioned, viz., portions 43 and 49, Wamboota, and 90 Benarca, county of Cadell, were advertised for auction sale at Moama on the 18th January, 1882, but withdrawn on account of the conditional purchases mentioned.

They formed part of revoked reserves in the neighbourhood of the river Murray; and with many others were presumed to have come within the scope of Clause 12 of the Act of 1880.

They were advertised for auction at £1 8s. 8d., £1 11s. 6d., and £1 19s. 3d. per acre, i.e., they each contained improvements (put on during the currency of the reserve) over and above £40, but not to the extent of £1 per acre.

The conditional purchases have been declared void for two reasons:—1st, Because the measured portions contained improvements to the value of £40; and 2nd, Because they did not contain improvements to the value of £1 per acre, to bring them within the scope of clause 12 of Act of 1880, i.e., to enable them to be conditionally purchased under that clause.

Submitted, whether the portions are to go to auction; and if so, at what upset price.—R.H.D., 20/7/83.

Suggested portion 43 of	245½ acres at	£2 per acre.
" 49	236	"	£2 "
" 90	287½	"	£2 "

769

J.G.B., 23/7/83.

The only difference between this case and 83-3,163 is that the conditional purchases within referred to have been voided, and those mentioned in the paper quoted have been forfeited. If offered at auction, the lands should be sold in like manner, and offered at a similar upset price to those referred to in paper 83-3,163.—C.O., 1/8/83.

The Minister having decided by minute of 25/8/83 on Misc. 83-15,015 that "For the present the land in question (that referred to in Aln. 83-3,163) should neither be offered at auction nor reserved from sale," but that "the area may be re-appraised." These lands may be treated in a similar manner—they form part of the block.—R.H.D., 1/9/83. F.H.W., 1/9/83. Yes.—C.O., 3/9/83.

Messrs. H. H. Brown & Co. to The Under Secretary for Lands.

Sir,

21, Exchange Buildings, Pitt-street, 31 October, 1882.

We have the honor, on behalf of our clients, Messrs. Robertson and Wagner, the lessees of Pericoota Run, to respectfully request that you will cause the portion of land noted in the margin, being refused

County Cadell,
parish Wamboota, portions
43, 236 acres.

refused conditional purchase of John Hunter, No. 82-34, Moama, to be gazetted for auction sale at as early a date as possible.

We have, &c.,

H. H. BROWN & CO.

Mr. Rotton,—For auction at the previous upset price.—F.W.W., 28/11/82.

Messrs. H. H. Brown & Co. to The Chief Commissioner.

Sir,

21, Exchange Buildings, Pitt-street, 30 October, 1882.

We have the honor, on behalf of our client, Mr. John Hunter, to apply for a refund of deposit on the conditional purchase taken up by him at Moama on the 12th January last, for 236 acres, on the grounds that, as the land was not improved to 20s. per acre, it did not come within the meaning of the 12th clause of the Act of 1880. We would also respectfully request that you will grant a refund at the same time of £7 14s., being 10 per centum deposit paid on supposed value of improvements.

We have, &c.,

H. H. BROWN & CO.

Mr. John Hunter to The Crown Lands Agent at Moama.

12 January, 1882.

I wish to withdraw my conditional purchase application, lodged, this day.

JOHN HUNTER.

Copy of Minutes on Application.

By attached memo. applicant desires to withdraw this application. Portion 49, parish of Wamboota, county Cadell, of 236 acres, formed part of reserve 92A, notified 22nd December, 1865, and cancelled the 12th December, 1881. During the currency of this reserve, and since July, 1876, fencing to the value of £65, and ringing to the value of £12, were effected on the above portion by the lessees of the run. Total improvements, £77.

In view of the above, it is submitted whether this application (conditional purchase 82-34) be declared void, in accordance with recent Supreme Court decision in Bernholt's case; the only circumstance to distinguish the present case from that mentioned being that the improvements were effected during the currency of a reserve. Clause 12, Lands Acts Further Amendment Act of 1880 does not apply to this case. The above-mentioned improvements cannot be embraced in a measurement of 40 acres or upwards, according to Regulations to contain a pound's worth to the acre.—CHAS. ED. FINCH, for Surveyor-General, 24th August, 1882.

Void.—The land not being open to conditional purchase as applied for.—A.O.M., 25/9/82.

Applicant (p.) refund order. Agent and Treasury informed, and 10 per centum refunded.—30th October, 1882.

C.

[Alienation Act, section 13.]

No. 34 of 1882.

District of Moama.

Application by John Hunter, for the conditional purchase, without competition, of 236 acres unimproved Crown Land.

Received by me, with a deposit of £59, this 12th day of January, 1882, at 11:30 o'clock.

L. S. DONALDSON,

Agent for the sale of Crown Lands at Moama.

Sir,

12 January, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 236 acres; and I herewith tender the sum of £66 14s., being a deposit at the rate of 5s. per acre on the area for which I apply, and 10 per centum value of improvements £7 14s. I am willing to purchase the improvements, and pay for them the amount fixed by appraisalment.

I am, &c.,

JOHN HUNTER,

Moama.

To the Agent for the Sale of Crown Lands at Moama.

Description.

County of Cadell, parish of Wamboota, 236 acres, being measured portion No. 49.

Pericoota Holding.

AFTER hearing the statement made by the agent, I am of opinion that the lessee's original proposal may be adopted, as I consider the state will profit more by these highly improved lands being let at a proper rental for which the law provides; as an unsuccessful attempt has been made to settle a population on the land by selection.—F.A.W.

Pericoota Reserves.

THESE papers are now forwarded for action in accordance with the decision of the Secretary for Lands on 83-15,015 Misc., enclosed.—C.O., Under Secretary, Dept. Lands, B.C., 20/12/83. The Under Secretary for Mines.

Minutes hereon.

The land referred to being neither sold nor reserved from lease at time of last appraisalment (1880) was, no doubt, included in that appraisalment.

The area upon which rent is now being paid is twenty-eight sections, and, as several reserves from lease have been made out of the original water reserves, there cannot be even that area now available for lease.

FRANCIS GERARD, 4 January, 1884.

The suggestion of the Under Secretary for Lands concerning a fresh appraisalment of this run seems to have been made under a misapprehension of circumstances.

The

The reserves from sale referred to constituted the area of twenty-eight sections which were appraised in 1880, and for which the yearly rent of £100 is now paid. Any appraisement now made would be upon a reduced area, as portions of the reserves from sale appear to have been withdrawn from lease since the appraisement now in force was made.

It is recommended that fresh consideration should be given to the request preferred under the light of the information now supplied.—T.W.H., Occ. Lands, 10 January, 1884.

Submitted.—H.W., 14/1/84.

Approved.—J. P. ABBOTT, 16/1/84. Submitted, that at present there would seem to be no need to proceed further with this case.—R.H.D., 5/2/84. F.H.W., 6/2/84. In view of the further information there is not. It was previously assumed that the land having been conditionally purchased, a rebate of rent had been allowed.—C.O., 7/2/84. For approval. Approved.—J.S.F., 8/2/84. Mr. Houston,—Are these lands within a "leaschold" or a "resumed area"? If the latter, it might be worthy of consideration whether they should be declared a special area under section 24.—R.H.D., 14/8/85.

Within the leaschold area of Perricoota Holding, Central Division, No. 343, Gazetted 11 July, 1885. Attention is invited to the decision of the Acting Secretary for Lands (copy enclosed) on the question submitted as to whether these lands should be placed in the leaschold or resumed area.—W.H., 18/8/85. Mr. De Low. Put away.—R.H.D., 19/8/85.

Sydney : Thomas Richards, Government Printer.—1890.

[1s. 6d.]

1885-6.

SALE OF GOVERNMENT LAND, CAREENING COVE.

No. 1.

E. M. Lord, Esq., to The Secretary for Lands.

[Crown Lands Alienation Act of 1861—sections 9, 10, 11, and 12.]

Application to purchase under section 12.

Sir,

Town Hall, Sydney, 25 March, 1876.

I have the honor to apply, pursuant to the 12th clause of the Crown Lands Alienation Act of 1861, for the rescission of the reservation of water frontage of the land hereunder described.

Appended hereto is a plan illustrative of this application, together with a receipt showing that the sum of £5 has been deposited in the Treasury on account thereof.

I have, &c.,
E. M. LORD.

Description of land applied for.

IN the grant of land situated on Careening Cove, of 1 acre 1 rood to John Lamb, as per plan accompanying this application.

RECEIVED the above-mentioned sum of £5, on account of the foregoing application.

Colonial Treasury, Sydney, 25 March, 1876.

VICTOR COHEN,
(For the Colonial Treasurer).

[Enclosure.]

SUSPENSE ACCOUNT.

No. 4,784.

RECEIVED from Edward Lord, the sum of £5 sterling, for deposit on application for the rescission of reservation of water frontage, under 12th clause, Land Act 1861.—Careening Cove, county Cumberland.

£5

New South Wales, The Treasury, 25 March, 1876.
VICTOR COHEN,
(Pro Treasurer).

No. 2.

E. M. Lord, Esq., to The Secretary for Lands.

[Crown Lands Alienation Act of 1861—sections 9, 10, 11, and 12.]

Application for special purchase under section 9.

Sir,

Town Hall, Sydney, 25 March, 1876.

I have the honor to apply, pursuant to the 9th clause of the Lands Alienation Act of 1861, for the reclamation and purchase of lands below high-water mark of the land hereunder described.

Appended hereto is a plan illustrative of this application, together with a receipt showing that the sum of £5 has been deposited in the Treasury on account thereof.

I have, &c.,
E. M. LORD.

Description of land applied for.

ALL that portion of land on Careening Cove, in part of the grant of 1 acre 1 rood to John Lamb, more particularly described in plan accompanying this application.

RECEIVED the above-mentioned sum of £5, on account of the foregoing application.

Colonial Treasury, Sydney, 25 March, 1876.

VICTOR COHEN,
(For the Colonial Treasurer).

[Enclosure.]

SUSPENSE ACCOUNT.

RECEIVED from Edward Lord, the sum of £5 sterling, for deposit on application to reclaim and purchase land below high-water mark, under 9th clause, Land Act 1861.—Careening Cove, county Cumberland.

£5.

New South Wales, The Treasury, 25 March, 1876.
VICTOR COHEN,

No. 3.

The Under Secretary for Mines to The Under Secretary for Lands.

Sir,

Department of Mines, Sydney, 30 September, 1881.

With reference to the matter of the extension of High-street, St. Leonards, through the properties of E. Lord and P. Hayes to the waters of Port Jackson, at the point between Careening Cove and Neutral Bay, the usual reservation of 100 feet from high-water mark is contained in the deeds of grants of the land that would be affected should such street be carried out; and as it appears that applications have been made for the purchase of the rescission of that reserve, I am directed by the Secretary for Mines to ask that such applications be not granted until the question of compensation for the land required for such extension has been settled.

I have, &c.,
HARRIE WOOD.

Minutes

Minutes on No. 3.

Mr. Peyton.—H.P., 10/10/81.

Mr. McGuinn,—A list of the applications by Mr. Lord is enclosed. They should probably be referred to Engineer-in-Chief, &c., and Surveyor-General, for further report in connection with this letter, before submitting for the approval of the Secretary for Lands.—S.L.P., 12/10/81. For approval.—J. McG., 14/10/81. F.H.W., 15/10/81. The Engineer-in-Chief and Surveyor-General.—C.O., B.C., 19/10/81.

Mr. Stopps,—For any necessary remarks you will probably remember that I proposed to do what is herein requested, but you directed me to deal with the enclosed applications independently of the road question.—S. L. PEYTON, 12/11/81.

When I stated that the applications referred to might be advanced a stage or two it was not then proposed to open High-street to the water's edge, but to deal with the Whaling Road under a special bill, but when the Mining Department undertook to extend High-street and to compensate Mr. Lord for loss of land, attention was drawn by this branch to the fact that applications from Mr. Lord were in the office to purchase the rescission of the water frontage reserve, and also the right to reclaim, and the Mines have taken action by requesting that such applications may not be granted at present.—A.J.S., 12/11/81.

Mr. Peyton,—In view of this letter I caused the action on the applications to be stayed, but Mr. Stopps' directions to deal with them independently of the road was without qualification, and it might, perhaps, be pointed out that it was proposed to recommend a compliance with applications S.P. 76-46, for the rescission of the 100 feet reservation, and S.P. 76-47, for permission to reclaim (the only ones which could have affected the road), in such a way as not to interfere with it.—S.L.P.

No. 4.

Memo. by Surveyor-General and Engineer-in-Chief for Harbours and Rivers

EDWARD LORD, applying for the rescission of 100 feet reservation, fronting his property at Careening Cove, parish of Willoughby, county of Cumberland.

There does not appear to be any objection to applicant being permitted to purchase that portion of the reserve of 100 feet in the original part which fronts his property at Careening Cove, and which is included within the following boundaries, viz. :—

Commencing on the original high-water mark of Careening Cove, at the south-west corner of applicant's property; and bounded thence on the south-west by the south-western boundary of the said property bearing north-westerly about 134 feet; thence on the north by a line parallel to and distant 100 feet from high-water mark, bearing in a direct line easterly about 213 feet to its intersection with the south-western boundary of High-street; thence on the north-east by a line parallel to the south-western boundary of applicant's property, bearing south-easterly about 101 feet to the high-water mark aforesaid; and thence on the south by that high-water mark bearing westerly, to the point of commencement.

Tracings herewith marked A and B, one of which marked A should probably be forwarded to applicant.
5/10/81. P. F. ADAMS.
E. O. MORIARTY.

Minutes on No. 4.

Forward to Lands.—J.L. Under Secretary for Lands, B.C., 13/10/81.—J.R.

No. 5.

Memo. by Surveyor-General and Engineer-in-Chief for Harbours and Rivers.

EDWARD LORD applying for permission to reclaim and purchase land below high-water mark, fronting his property at Careening Cove, parish of Willoughby, county of Cumberland.

There does not appear to be any objection to applicant being permitted to reclaim and purchase land below high-water mark at Careening Cove, which fronts his property, and is inclosed within the following boundaries :—

Commencing on the original high-water mark of Careening Cove, at the south-west corner of applicant's property; and bounded thence on the west by a line bearing about (true) south about 40 links to the limit line for reclamations, as laid down on plan in the Surveyor-General's Office, catalogued P. 100-574; thence on the south by that limit line (amended) bearing about south 85° west (true) about 298 links; thence on the east by a line bearing about north 6° east (true) about 90 links to the intersection of the aforesaid high-water mark with the south-east corner of applicant's proposed purchase of 100 feet reservation; and thence on the north by the aforesaid high-water mark westerly, to the point of commencement.

Tracings herewith marked A and B, one of which marked A should probably be forwarded to applicant.

5/10/81.

P. F. ADAMS.
E. O. MORIARTY.

Minutes on No. 5.

Forward to Lands.—J.L., 7/10/81. Under Secretary for Lands, B.C., 13/10/81.—J.R. Records as to objections then to Mr. Peyton.—J.B.T., 21/3/83.

Mr. McGuinn,—As it appears that the question of rescinding the reservation of the land which is fronted by this proposed reclamation is under submission, I do not see how further action can be taken by Survey Office on these papers meantime.—S.L.P., 26/4/83. Mr. Peyton,—Can you now act.—J. McG., 5/12/83.

No. 6.

5

No. 6.

Memorandum from Surveyor-General and Engineer-in-Chief for Harbours and Rivers to Under Secretary for Public Works.

Letter of the Under Secretary for Mines, *re* extension of High-street, St. Leonards, through the properties of Messrs. Lord and Hayes, parish of Willoughby, county of Cumberland.

No application by Mr. Hayes has been referred to us for report.

Special purchase applications Nos. 48 and 49 of 1876 by Mr. Lord have been withdrawn, and our recommendation on Mr. Lord's applications S.P. 76/46 and 76/47 have been so framed as not to interfere with the extension of High-street, St. Leonards, as will be seen on reference to enclosed tracing marked C, which might be forwarded to Under Secretary for Mines, who should probably be asked, if in view of these facts, there is any objection to a compliance with the two applications last referred to, *vide* Ms. 81-19,052, and Ms. 81-19,053.

P. F. ADAMS.

E. O. MORIARTY.

Minutes on No. 6.

Forward to Lands.—J.L., 1/3/82. Under Secretary for Lands, B.C., 2/3/82.—J.R. Joint report submitted for approval.—J. McG., 4/3/82. F.H.W., 4/3/82. C.O., 7/3/82. Approved.—JOHN R.

No. 7.

The Under Secretary for Lands to The Under Secretary for Mines.

Sir,

Department of Lands, Sydney, 16 March, 1882.

With reference to your letter of the 30th September last, *re* the extension of High-street, St. Leonards, through the properties of Messrs. Lord and Hayes, parish of Willoughby, county of Cumberland, I am directed to inform you that a report in connection with this matter has been obtained from the Surveyor-General and the Engineer-in-Chief for Harbours and Rivers, and approved by the Secretary for Lands, to the effect that two applications made by Mr. Lord to purchase land under the 9th and 12th sections of the Crown Lands Alienation Act of 1861, have been withdrawn, and the recommendations on his applications to purchase the land shown by red edging on the enclosed tracing have been so framed as not to interfere with the extension of High-street, St. Leonards. And I am therefore to ask if in view of these facts, there is any objection to a compliance with the two applications referred to.

I have, &c.,

CHARLES OLIVER.

No. 8.

The Under Secretary for Mines to The Under Secretary for Lands.

Sir,

Department of Mines, Sydney, 12 April, 1882.

With reference to your letter of the 16th ultimo (with tracing), asking whether this department has any objection to Mr. Lord's application to purchase certain land at Careening Cove, I am directed by the Secretary for Mines to inform you, that there would be no objection on the part of this department to the rescission of the reserve and sale of the land to Mr. Lord to the extent shown on the tracing, upon the condition that, in the event of its being decided at any time to open the Whaling Road, so much of the said land as shall be required for such road may be resumed, on payment to Mr. Lord of the amount paid by him for the portion so required.

I have, &c.,

HARRIE WOOD.

Minutes on No. 8.

Submitted.—In view of this letter that the applications be proceeded with on the conditions named.—J. M. G., 21/4/82. Should be referred back to Engineer-in-Chief and Surveyor-General.—F.H.W., 21/4/82. Yes.—C.O., 21/4/82. The Engineer-in-Chief for Harbours and Rivers and the Surveyor-General.—C.O., 4/4/82. We recommend that the applications be proceeded with on the condition named and to which applicant has given his verbal assent.—P. F. ADAMS, E. O. MORIARTY. The Under Secretary Public Works, 27/29/82. The Under Secretary for Lands, 29/9/82.—J.R. Subject to Mr. Lord's giving his assent in writing, the above recommendation is submitted for approval.—J. M. G., 30/9/82. F.H.W., 2/10/82. C.O., 16/11/82. Approved.—JOHN R., 16/12/82.

No. 9.

The Under Secretary for Lands to E. Lord, Esq.

Sir,

Department of Lands, Sydney, 22 December, 1882.

I have the honor to inform you that the Secretary for Lands has approved of your application of the 25th March, 1876, for the reclamation and rescission of reservation of certain land at Careening Cove, under the 9th and 12th clauses of the Crown Lands Alienation Act of 1861, being proceeded with, provided you give your assent in writing to the condition that, in the event of its being decided at any time to open the Whaling Road, so much of the said land as shall be required for such road may be resumed, on payment to you of the amount that shall have been paid by you for the portion so required.

I have, &c.,

CHARLES OLIVER.

No. 10.

E. Lord, Esq., to The Under Secretary for Lands.

Sir,

East St. Leonards, 27 December, 1882.

Referring to your letter of the 22nd instant, on the subject of my application for the reclamation and rescission of land at Careening Cove, I have the honor to inform you that I assent to the provision expressed

expressed therein,—“that, in the event of its being decided at any time to open the Whaling Road, so much of the said land as shall be required for such road may be resumed, on payment to me of the amount that shall have been paid by me for the portion so required.”

I have, &c.,
EDWD. LORD.

Minutes on No. 10.

Submitted whether further action should not be stayed, in view of the instruction on Ms. 83-3,466 herewith.—F.H.W., 27/3/83. In a month.—C.O., 30/3/83. This case has no connection with the reclamation of Careening Cove, therefore the case may be proceeded with on terms arranged with Mr. Lord as to the leaving of a road.—J.S.F., 26/4/83.

As pointed out by the Minister in his minute of 26 April, 1883, hereon, compliance with Mr. Lord's application will not in any way interfere with the proposed Government reclamation at the head of Careening Cove. These papers should therefore be disconnected from 83-3,466 Ms. respecting proposed Government reclamations Careening Cove and Neutral Harbour, in order that action on Mr. Lord's application may be expedited. Please return 83-3,466 Ms. to me as soon as practicable.—W. FREEMAN, 14/6/83.

Ms. records.—Mr. PEYTON, 14/6/83. The written answer having been furnished as requested, it is submitted that the case be proceeded with.—J.McG., 4/1/83. F.H.W., 5/1/83. Yes.—C.O., 15/1/83. Mr. Peyton,—Records as to objections then to Mr. Peyton.—J.B.T., 21/3/83. Transferred to Mr. Sur. Perdriau.—F. B. W. WOOLRYCH, 30/6/83. Transferred to Mr. Sur. J. B. Mackenzie, as requested by the District Surveyor.—STEPHEN PERDRIAU, Surveyor, 25/8/83.

[Enclosure.]

Memorandum to accompany instructions (to be returned).

Rescission of reservation fronting property of Edward Lord, at Careening Cove, parish Willoughby, county Cumberland.

Surveyor-General's Office, 26 June, 1883.

Mr. District-Surveyor Woolrych is requested, when carrying out the instructions for this survey, to connect the traverse by which he defines the boundaries with trigonometrical station 235, description of which and reference bearings (true) therefrom are attached for his information. One or more of the traverse stations of the survey of Neutral Bay and Careening Cove by Sur. Bullock (plan cat. p. 59-574) should also be connected with.

T. F. FURBER,

(For Surveyor-General).

Drilled hole and triangle on top of irregular rubble boundary-wall on Mr. A. Lord's property, 30 links from end of wall, and 20 links from high-water mark, north side of Careening Cove, shown on p. 59-574:—

F3. Broad-arrow on rock 240° 1' 71½ links from northernmost corner of Jas. Wilson's stone wharf, on south-side of Careening Cove. Shewn on plan cat. P. 61-574.

No. 13.

Memorandum from Secretary for Lands to Surveyor-General.

E. Lord's rescission of reservation at North Shore.

LET this matter be attended to at once.—J.S.F., 30/8/83.

Minutes on above.

The Surveyor-General.—C.O., 30/8/83.

Mr. District-Surveyor Woolrych accordingly.—ROBERT D. FITZGERALD (for Surveyor-General), B.C., 5/9/83.

I would respectfully inform the Surveyor-General that this and other instructions cannot be carried out at once as requested without a large temporary increase of the staff at my disposal. The cost of the surveys would also be greatly enhanced. The instructions now in hand are being systematically, and thoroughly carried out by the present trained staff, which will however bear no further strain upon it.

F. B. W. WOOLRYCH, D.S., 6/9/83.

Dear Sir,

102 Castlereagh-street, Sydney, 11 September, 1883.

What has been done since I saw you about Mr. Edward Lord's matter *re* water frontage? I write as I think you will lose less time in writing a line than in seeing me, to say nothing of the saving to me.

Yours, &c.,

C. W. J. OLIVER, Esq., Department of Lands.

R. P. ABBOTT.

Bearer will wait for reply.

Mr. Abbott may perhaps be informed to the effect of Mr. Woolrych's Minute.—J.E., 11/9/83. Yes.—J.G.B., 11/9/83.

My memo. of the 30th ultimo was, that the survey should be performed at once. If Mr. Woolrych requires assistance, he should have it, in order to expediate the work in hand.—J.S.F., 17/9/83. The Surveyor-General.—J.G.B.

Mr. Woolrych.—As to what survey can be delayed with least probability of complaint, in order that this matter may have attention.—P.F.A., 18 Sept., B.C., No. 83-387. Urgent.

Herewith are attached for the information of the Surveyor-General.—

1. A list of Surveyors in the Metropolitan District, with a statement of the work on which they are engaged.
2. An account of instructions in the hands of Surveyors employed on surveys within the Municipalities of St. Leonards and Victoria.
3. A letter, urging the measurement of Court-house site at St. Leonards.

It will be seen that Mr. Mackenzie is the Surveyor whose work can be interrupted with the least injury to the public interest. He has not, however, that I am aware of, had any experience in reclamation surveys.—F. B. W. WOOLRYCH, D.S., 19/8/83.

Mr.

Mr. D. S. Woolrych will be good enough to direct a competent Surveyor to carry out the service in accordance with the Minister's direction.—ROBERT D. FITZGERALD (for Surveyor-General), B.C., 21/9/83.

Mr. Surveyor Pedriau, who at present holds the instructions, is requested to transfer them to Mr. Surveyor J. B. Mackenzie without delay, giving him such information as he may have respecting surveys in the locality that should be connected with, and giving him also co-ordinates to Time-ball staff, as origin of the nearest convenient traverse station or land-mark.—F. B. W. WOOLRYCH, D.S., 24/9/83. Urgent.

Mr. Surveyor J. B. Mackenzie.—With these papers I forward instructions for survey of Mr. Lord's property for rescission of 100 feet reserve. There is a detail survey of the locality, plan cat. 59-574, sheet 3, drawn to scale of one chain to an inch, and could therefore be traced and transferred. Co-ordinates as above will be forwarded in a day or two, when they are worked out.—S. PERDRIAU, 25/9/83.

No. 13 $\frac{1}{2}$.

R. P. Abbott, Esq., M.P., to The Under Secretary for Lands.

Dear Sir, 102, Castlereagh-street, Sydney, 11 September, 1883.

What has been done since I saw you about Mr. Edward Lord's matter *re* water frontage? I write as I think you will lose less time in writing a line than in seeing me, to say nothing of the saving
Yours, &c.

R. P. ABBOTT.

Bearer will wait for a reply.

Minutes on No. 13 $\frac{1}{2}$.

Mr. Abbott may perhaps be informed to the effect of Mr. Woolrych's minute.—J.E., 11/9/83.
Yes.—J.G.B., 11/9/83. By the Secretary for Lands.—My memorandum of the 30th ultimo was that the survey should be performed at once. If Mr. Woolrych requires assistance he should have it, in order to expedite the work in hand.—J.S.F., 17/9/83. Surveyor-General.—J.G.B. By the Surveyor-General.—Mr. Woolrych, as to what survey can be delayed with least probability of complaint, in order that this matter may have attention.—P.F.A., 18 September, 1883, B.C.

Herewith are attached, for the information of the Surveyor-General,—

*See enclosure A

1. *A list of Surveyors in the Metropolitan District, with a statement of the work on which they are engaged.

†See enclosure B

2. †The account of instructions in the hands of the surveyor employed on surveys within the Municipalities of St. Leonards and Victoria.

‡Not with papers.

3. ‡A letter urging the measurement of Court-house site at St. Leonards.

It will be seen that Mr. Mackenzie is the surveyor whose work can be interrupted with the least injury to the public interest. He has not, however, that I am aware of, had any experience in reclamation surveys.—F. B. W. WOOLRYCH, D.S., 19 September, 1883.

By the Surveyor-General.—Mr. District-Surveyor Woolrych will be good enough to direct a competent surveyor to carry out the service in accordance with Minister's direction.—ROBERT D. FITZGERALD (for Surveyor-General), B.C., 21/9/83.

Mr. Surveyor Perdriau, who at present holds the instructions, is requested to transfer them to Mr. Surveyor J. B. Mackenzie (address Bondi), without delay, giving him such information as he may have respecting surveys in the locality that should be connected with, and giving him also co-ordinates to Time-ball staff as origin of the nearest convenient traverse station or landmark.—F. B. W. WOOLRYCH, D.S., 24 Sept.,/83. Urgent.

Mr. Surveyor J. B. Mackenzie.—With these papers I forward instructions for survey of Mr. E. Lord's property for rescission of 100 feet reserve. There is a detail survey of the locality, plan catalogued P. 59-574, sheet 3, drawn to scale of 1 chain to an inch, and could therefore be traced and transferred. Co-ordinates as above will be forwarded in a day or two when they are worked out.—S. PERDRIAU, 25 Sept.,/83.

[Enclosure A to No. 13 $\frac{1}{2}$.]

NAMES of Surveyors employed in Metropolitan District, and how employed at present.

[Name of Surveyor]	Where camped at present.	Nature of work employed upon.	Remarks.
Adams, W. E.....	Woniara	Engaged in surveys at George's River ...	Services not available for immediate work at North Shore.
Burdett, F. L. .	Manly	Measurement of numerous conditional purchases in the parish of Narrabeen	Must be carried out as soon as practicable. Applicants pressing Government.
Chamier, A. F.....	Ashfield	Surveys for the alignment of streets in Ashfield.	Municipal Council, urgent.
Deering, J. W.	Five Dock... ..	Reclamation surveys, parish of Hunter's Hill.	Not under my supervision.
Ebsworth, E.	Pennant Hills	Engaged on urgent instructions.	Has about fifteen instructions in hand. Must appear as witness in road case at Court of Quarter Sessions, and is obtaining necessary information, and survey required.
Fariola, Ode R. .	Gordon	Has been taken off very urgent work, for more urgent work at Cowan.	Holds instructions two years old, partly finished; about fourteen instructions in all.
Hedgeland, G. C. .	Bondi	Engaged on urgent alignment surveys at Waverley.	Work of too urgent a character to be interrupted at a moment's notice.

SURVEYORS employed in Metropolitan District—*continued*.

Name of Surveyor.	Where camped at present	Nature of work employed upon.	Remarks.	
Knibbs, G. H. . . .	Liverpool	Urgent conditional purchase measurements in parish of Holsworthy, and marking of old grant boundaries adjoining National Park, prior to fencing the latter.	
Lucas, J. H.	Five Dock	Engaged on survey of Balmain Road for alignment and to determine high-water-mark of Harris' grant, 1,500 acres, Five Dock Farm, and Haymarket Permanent Building and Investment Society.	Urgent. Very Urgent. Encroachment in sub-division.	
McCallum, G.	Blayney.....	Left the district, to make alignment surveys at Blayney.	Instructions marked very urgent.	
Mackenzie, R. B. . . .	Waterloo	Finishing detail survey at Waterloo, prior to taking work proposed for him at Richmond.	
Madsen, H. F.	Newtown	Engaged on very urgent alignment surveys at Darlington and Newtown.	Has just returned instructions to District-Survey Office, stating that he has six months' work in hand.	
Nash, W. H.	Petersham	Engaged on alignment surveys at Petersham.	This work should not be interrupted, as there are urgent alignment surveys at St. Leonards which might wait for Mr. Surveyor Nash if no other alignment surveyor can be found in the meantime.	
Park, A. J.	Peat's Ferry.....	Has been taken off very urgent work between Long and Sailor's Bay, for more urgent work in connection with railway at the Hawkesbury.	
Perdriau, W. E.	Military Road, St. Leonards . . .	Engaged in completing road survey on east boundary of Thrupp's grant.	Will be free on the 1st October to survey Post Office site at St. Leonard's or E. Lord's reclamation.	
Pike, H. M. L.	Alignment surveys at Hunter's Hill and re-marking Asylum Reserve at Huntley's Point.	
Richmond, J.	Bulli	Investigation of grant boundaries in the parish of Southend.	Requires assistance to enable him to push on the work.	
Robb, A.	Marking Sydney population boundary, parishes of Narrabeen, Gordon, and North Colah.	Until this is done, position of conditional purchases cannot be determined or measured.	
Scrivener, C. R.	Ryde	Investigation of old grant boundaries adjoining Field of Mars Common.	Urgently required at the Land Titles Office.	
Smyth, P. F.	Minto	Numerous important and urgent instructions, relating chiefly to roads applied for and disputed boundaries.	
Wansbrough, C. H.	South Kingston	Twenty-four reclamation surveys in hand	Has asked for assistance.	
Wilson, T. G.	Lane Cove River	Holds twenty-one instructions in the parish of Willoughby, and is now engaged on a most complicated case, through a careless survey of portions sold by Government, north of Sailor's Bay.	
Ponte, F.	Summerhill.....	Engaged on City Detail Survey	The Chief Engineer, Sewerage Surveys, having made application for surveys for extension of George-street sewer, &c., about six sheets of the City Survey will have to be executed as speedily as is consistent with accuracy.	
Mills, S.	Surveyors engaged on City Detail Survey under the supervision of Mr. Surveyor Ponte.			
Roberts, R. J. A. . . .				
Sim, W.				
Thomas, W.				
Thompson, W. M.				
Stafford, G. M.				
Steuwe, A. J.				
Tuxon, T.				
Thornhill, W.				
Maitland, D. M.	Stammore	Engaged on several important and urgent instructions.	
Pring, T.	Alexandria	Under the supervision of Mr. Surveyor Maitland.	These three surveyors are constantly employed under the supervision of Mr. Maitland, in making necessary surveys for new parish maps of Botany and Alexandria, and other surveys within these parishes that are being urged.	
Mills, W.	Botany			
Chesterman, A. H.	Botany			

Minute on above.

Forwarded to the Surveyor General with my B.C. memorandum in reply to his.—F. B. W. WOOLRYCH, District Surveyor, 19 September, 1883.

[Enclosure B to No. 13½.]

Instructions at present in the hands of Mr. Surveyor Perdriau.

No.	No.	Date.	Applicant.	Remarks.
Mis. 82-737 ...	82-131	8 May	Stuart & Harnett, rescission.....	{ Awaiting marking of roads by Mr. Bullock, partly carried out. Completion will occupy about three weeks.
Mis. 82-1,008 ...	82-170	5 January ...	Do. reclamation	
S.G.O. 81-122½	83-6	4 "	Redefine A. Thrupp's 700 acres	{ Partly finished; plan of boundary road on eastern side will be forwarded about the end of the month of September. Very urgent. About two weeks would be required to complete plan of the whole of Thrupp's grant.
Mis. 82-19,551	82-29	9 February...	Do. do.	
Rds. 83-241 ...	83-174	12 May	Alignment surveys, Borough of Victoria	{ Uncertain; say two weeks.
Mis. 83-3,680 ...	83-223	6 June	Bligh & Grant, reclamation. Date of application, 4th August, 1882	
Mis. 83-4,313...	83-236	19 "	Borough, county of Victoria, reclamation. Date of application, 10th July, 1882....	{ These instructions, including connections with former surveys and triangulation, will occupy about two months.
Mis. 83-5,383...	83-258	27 "	Arthur Walker, reclamation. Date of application, 4th December, 1882.....	
Mis. 82-20,574	83-260	27 "	E. Lord, rescission. 30th September, 1881.	{ This instruction will be carried out after that of survey of site for Post and Telegraph Office, and will be commenced about the middle of next month. Could be commenced about the 16th October, and would probably occupy two weeks.
		(Received at District Office on 30th June.)		
Mis. 83-4,312...	83-259	27 June.....	J. Halstead, reclamation	{ About two weeks.
Rds. 83-342.....	83-334	17 August ..	Alignment of streets, St. Leonards	
Mis. 83-16,558	83-363	7 September..	Site for Post and Telegraph Office, St. Leonards	{ Will proceed with this immediately after completion of plan of boundary road on eastern side of A. Thrupp's 700 acres. These instructions are marked "very urgent" by the Surveyor-General, as Mr. John Rae states that Mr. Wright is anxious to proceed to a close with the matter. Will probably be commenced on the 1st October, and completed by the 15th.
		(Received at District Office on 11th Sept.)		

NOTE.—It will be seen that the three instructions that are being urged by Ministers, or the Municipal Council, would be completed by Mr. Surveyor Perdriau by the end of October, and the work would be reliable. The employment of two new surveyors would hasten the work to completion, but I would not guarantee its correctness, unless they are men of known experience and accustomed to work in connection with the Trigonometrical Survey.

F. B. W. W., D.S.,
19th September, 1883.

No. 14.

The Under Secretary for Lands to R. P. Abbott, Esq., M.P.

Sir,

Department of Lands, Sydney, 12 September, 1883.

Referring to your letter of the 11th instant, on the subject of Mr. Edward Lord's application to purchase the rescission of reservation of certain land at Careening Cove, I have the honor to inform you that Mr. District-Surveyor Woolrych, to whom this matter was referred on the 29th June last, has reported that he is at present unable to carry out this survey at once, as he has so many previous instructions in hand, and only a limited staff to act on them.

I have, &c.,
CHARLES OLIVER.

No. 15.

Memorandum from Mr. District-Surveyor Woolrych to Mr. Surveyor R. B. Mackenzie.

24 September, 1883.

Mr. Surveyor Mackenzie is requested to communicate with Mr. Surveyor Perdriau ("Mimosa," Ben Boyd Road, St. Leonards), respecting measurements which are required in connection with Mr. E. Lord's application for the rescission of water frontage at North Shore, the instructions for which Mr. Perdriau has been directed to transfer to Mr. Mackenzie. This matter is being urged by the Minister, who would have it attended to at once; therefore the surveys at Waterloo, on which Mr. Mackenzie is now employed, must be temporarily set aside.

If Mr. Mackenzie has not had experience in the kind of survey required, he is cautioned against hurrying over the work on account of its urgency, as no allowance is made by the Department for errors committed or imperfect work done by a surveyor, on the plea that it was being urged, and therefore done in haste.

F.B.W.W., D.S., 24 Sept., 1883.

To be returned when instructions are fulfilled.

Minute on above.

Returned accordingly herewith.—R. BAYLIS MACKENZIE, 10 Oct., 1883.

No. 16.

Mr. R. B. Mackenzie to The Surveyor-General.

Sir,

Bondi, 10 October, 1883.

In compliance with your instructions, No. 260, of 27th June, 1883 (issued to Mr. District-Surveyor), I have the honor to transmit herewith the plan and field-notes of a portion of land in the parish of Willoughby, county of Cumberland, applied for under the 12th Clause of the Crown Lands Alienation Act of 1861, by Edward Lord.

Mr. Surveyor Perdriau gave me Mr. Bullock's values to Δ Trig., Stn. No. 235, from Timeball (he not having yet computed down to this point), and from this station my own are carried.

The mean high-watermark is the same now in this particular locality as it originally was at the time of the grant, and has been determined accurately by data supplied by Mr. H. C. Russell, Government Astronomer.

Date of Survey, 2 October, 1883.

I have, &c.,

R. B. MACKENZIE.

P.S.—In an adjoining rescission survey by Mr. Surveyor Knapp, I note there is a difference existing of about 26 links, which may be accounted for through the tide mark not being so accurately determined then as now.—R.B.M.

No. 17.

Mr. E. M. Clark to The Secretary for Lands.

Sir,

North Shore, 15 October, 1883.

We, the undersigned residents of East St. Leonards and its neighbourhood, have heard with feelings of surprise that the Government contemplate selling to Mr. Edward Lord the reserve at the eastern side of his property, situated at Careening Cove; and bounded on the south by Careening Cove, and on the north by Whaling Road, and on the west by a stonewall, the present dividing boundary of Lord's property. And knowing that the alienation of such a valuable public reserve will be detrimental to the privilege of recreation we at present enjoy from the same, we respectfully urge it upon your consideration that for the Government to sell this reserve (upon any terms) that will place it in the hands of a private individual, deprives us as residents, and the public generally, of a recreation spot, the advantage of which is felt and appreciated by all, and will close to us a valuable water frontage, and the public advantages we derive from such approach to and use of the same.

Actuated only for the public good, and by no selfish motives, we thus petition you, feeling assured that the urgency of our petition must receive due consideration at your hands, favourable to the wish of same; and your petitioners will remain and ever pray.

E. M. CLARK, and 78 others.

No. 18.

Question by H. Levien, Esq., M.P., with answer by The Secretary for Lands.

THURSDAY, 25 OCTOBER, 1883.

Question:—

(18.) Reserve fronting Whaling Road, North Shore:—*Mr. Merriman*, for Mr. Levien, asked the Secretary for Lands,—

(1.) Has the Minister received a petition asking him not to sell a reserve fronting Whaling Road and Careening Cove, adjoining Mr. E. Lord's property?

(2.) Has Mr. E. Lord made application to the Minister for the purchase of this land, and is it the intention of the Minister to entertain same?

Answer:—

Mr. Farnell answered,—

(1.) Yes.

(2.) Yes, with a special right to resumption, if the land or any portion of it is hereafter required for road purposes.

No. 19.

Question by H. Levien, Esq., M.P., with answer by The Secretary for Lands.

WEDNESDAY, 7 NOVEMBER, 1883.

Question:—

(3.) Reserve at Whaling Point, North Shore:—*Mr. Melville*, for Mr. Levien, asked the Secretary for Lands,—

(1.) Did he receive a petition from the residents of St. Leonards, requesting him not to dispose of the reserve at the end of the Whaling Road and Careening Cove?

(2.) Is it his intention to sell this land to Mr. Lord, and what is the price offered, and the amount required?

(3.) Has he any objection to lay a plan of the land upon the Table of the House, and all correspondence in connection with Mr. Lord's request to purchase?

Answer:—

Mr. Farnell answered,—

(1.) Yes.

(2.) These questions have not yet been finally determined.

(3.) No; I will do so at an early date.

No. 20.

Question by J. McElhone, Esq., M.P., with answer by The Secretary for Lands.

TUESDAY, 4 DECEMBER, 1883.

Question :—

(5.) Reserve fronting the Harbour at North Shore :—Mr. McElhone asked the Secretary for Lands,—Has he decided to let Mr. Lord purchase the reserve fronting Sydney Harbour at North Shore; if not, is it his intention to allow Mr. Lord to purchase the said reserve?

Answer :—

Mr. Farnell answered,—

I have not yet finally dealt with the question.

No. 21.

B. O. Holterman, Esq., M.P., to The Secretary for Lands.

Sir,

Sydney, 4 December, 1883.

By request of some thirty responsible inhabitants of St. Leonards Electorate, and with reference to a petition handed to you opposing the sale of a small reserve on North Shore by the Crown, to Mr. E. Lord, I hereby beg to bring under your notice that the North Shore has hardly any water frontage for public use. On Blue's Point, we may say there is a pretty fair landing place, but all round Lavender Bay is not accessible by carts, &c. On Milson's Point, only one very steep street, 66 feet wide, and one or two more, but in no way sufficient. In a few years time when all North Shore I hope will be transferred into wharfs, and the busy North, when all and every single foot will be wanted for access to the water. I hope for the benefit of our new electorate you will not comply with Mr. Lord's request, and preserve this reserve for the St. Leonard's Electorate.

I have, &c.,

B. O. HOLTERMAN.

Minutes on above.

Re-submitted.—The papers in this case have been copied and laid before Parliament.—J.M.G., 26/2/84. C.O., 1/3/84. The matter of the reclamation of Careening Cove, having this day been determined, and ample provisions proposed to be made for public requirements, Mr. E. Lord's rescission may now proceed.—J.S.F., 12/3/84. The area approved to be alienated under the 12th clause of the Crown Lands Alienation Act of 1861 (which is 2 roods 6½ perches), having been surveyed, a tracing showing same (marked C) is now enclosed for the appraiser.—T. ELLIS (for Surveyor-General), 10 June, 1884.—Under Secretary for Lands.

No. 22.

The Under Secretary for Lands to B. O. Holterman, Esq., M.P.

Sir,

Department of Lands, Sydney, 19 March, 1884.

In reference to your letter of the 4th December last, respecting petition of certain residents of St. Leonards, protesting against the rescission of reservation fronting his property at Careening Cove, applied for by Mr. Edward Lord, I am directed by the Secretary for Lands to inform you, that as the matter of the reclamation of Careening Cove has been determined, and ample provision proposed to be made for public requirements, the rescission of reservation referred to will now be proceeded with.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

No. 23.

The Under Secretary for Lands to The Crown Solicitor.

Sir,

Department of Lands, Sydney, 20 June, 1884

Portion of land containing 2 roods 6½ perches, parish of Willoughby, county of Cumberland.

I have the honor to forward herewith the papers relating to Edward Lord's application to purchase, under the 12th clause of the Crown Lands Alienation Act of 1861, the land particularized in the margin; and I am to request that you will have the goodness to take the necessary action in the matter with a view to the issue of the customary certificate as to his claim to purchase, in order that the preparation of the deed of grant for the land in question may be proceeded with.

I have, &c.,

F. H. WILSON,

(For the Under Secretary).

No. 24.

The Under Secretary for Lands to E. Lord, Esq.

Sir,

Department of Lands, Sydney, 20 June, 1884.

2 roods and 6½ perches, parish of Willoughby, county of Cumberland.

With reference to your application for permission to purchase, under the 12th section of the Crown Lands Alienation Act of 1861, the land specified in the margin hereof, I am directed to request that you will furnish this Department with a certificate from the Crown Solicitor, showing that your title to the adjoining land is sufficient to warrant the sale to you of the portion referred to.

2. No further action will be taken by this Department in the matter until the required certificate is received.

I have, &c.

CHARLES OLIVER,

Under Secretary.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 30 June, 1884.

In compliance with the request contained in your memo. of the 27th June, I have the honor to return all the papers connected with Mr. Edward Lord's application to purchase, under the 12th clause of the Crown Lands Alienation Act of 1861.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

2 roods 6½
perches, parish
Willoughby,
county Cumber-
land.

No. 27.

Memorandum by Secretary for Lands.

It has been represented that Mr. Lord applied for the whole of the rescission fronting his property, including the triangular portion, or part, which has been excluded. Has it been excluded accidentally, or how has it been excluded?

For Surveyor-General.—C.O., 30/6/84.

J.S.F.,

30/6/84.

Urgent.

It has been excluded advisedly, the minute of recommendation having been framed by the Engineer-in-Chief of Harbours and Rivers and myself (as explained in report Ms. 82-3,596), so as not to interfere with the extension of High-street, St. Leonards; and as bearing on this question attention is invited to the inclosed communications from the Mines Department, B. O. Holterman, Esq., M.L.A., and residents of North Shore.

P. F. ADAMS,

4 July, 1884.

[Enclosure.]

Amended Description.

COMMENCING at a point where the south-western boundary of applicant's property meets the high-water mark of Careening Cove; and bounded thence on the south-west by part of that boundary line bearing north-westerly to a line parallel to and distant 100 feet from high water-mark; thence on the north by that line bearing easterly to the south-west side of High-street; thence on the north-east by that street bearing south-easterly to the aforesaid high-water-mark; and thence on the south by that high-water mark westerly, to the point of commencement.—P. F. ADAMS.

Minutes on No. 27.

I concur in the Surveyor-General's report.—E.O.M., 18/7/84. It would be advantageous if the reason for the recommendation were stated.—C.O., 19/7/84. Let the alienation of the whole proceed.—J.S.F., 28/8/84. Amended description of the reserve applied for now herewith.—L. S. PEYTON (for Surveyor-General), 29/8/84. The Under Secretary for Lands, Ms. 12,882.

No. 28.

Memorandum.

THE previous papers in the case would appear to be with Mr. District-Surveyor Woolrych. Will you please see whether these papers are required to be sent to him also.

J.M.G.

2 Oct., 1884.

[Enclosure.]

EDWARD LORD, applying for permission to reclaim and purchase land below high-water mark, fronting his property at Careening Cove, parish of Willoughby, county of Cumberland.

Description.

Commencing at a point where the south-western boundary of applicant's property meets the high-water mark of Careening Cove; and bounded thence on the south-west by the north-eastern boundary of applicant's purchased reclamation of 2 roods 12 perches, bearing south 30° 15' east (mag.) 53 links; thence on the south-east by a line bearing about north 85° east to the prolongation of the south-western side of High-street; thence on the north-east by that prolongation bearing north-westerly, to the aforesaid high-water mark; and thence on the north by that high-water mark westerly, to the point of commencement.

Tracings herewith, marked A and B, one of which, marked A, should probably be forwarded to applicant.

Minutes on above.

Mr. M. Guinn,—Please see my minute inside, dated 26 April, /83. Joint report on protest (Ms. 84-21,081) was forwarded to the Engineer-in-Chief for Harbours and Rivers for signature 24th ult.—S.L.P., 4/12/84. Submitted. May await receipt of joint report.—J.G.B., 11/12/84. The Minister, on Ms. 84-21,081, decided that the rescission of the reservation of the whole of the frontage to the north-west side of High-street should be allowed. Papers may now be returned.—F.H.W. (for the Under Secretary), 12/12/84. M. Beyton,—As it has now been decided to allow of the rescission of the reservation of the whole of the frontage, it is submitted whether the reclamation should not be allowed for the whole of the frontage too, instead of that previously recommended, which referred to the frontage only of the part of the reservation then proposed to be rescinded.—F.H.W. (for the Under Secretary), 18/12/84. Reclamation for the whole of the frontage may be allowed.—J.S.F., 18/12/84. Tracings and description for Gazette notice herewith.—S.L.P., 19/1/85.

No. 29.

No. 29.

The Under Secretary for Lands to R. P. Abbott, Esq., M.P.

Sir,

Department of Lands, Sydney, 3 October, 1884.

With reference to your personal inquiry respecting Mr. E. Lord's application to purchase the rescission of reservation of 100 feet fronting his property at Careening Cove, I have the honor to inform you that the application to purchase was gazetted for objections on the 19th ultimo, and that when the time prescribed by law within which objections may be received has expired, further steps will be taken in the matter.

I have, &c.,

F. H. WILSON,

(For the Under Secretary).

No. 30.

The Council Clerk, East St. Leonards, to The Secretary for Lands.

Sir,

Council Chambers, East St. Leonards, 8 October, 1884.

I am directed by the Council to give you notice that they desire to state objections against the application of Mr. Edward Lord to purchase rescission of reservation at Careening Cove, county of Cumberland, parish of Willoughby; registration Ms. 84-12,882, *Gazette* No. 491, September 26th, 1884.

The Council are of opinion that such purchase would interfere with the public right of access to the waters of Port Jackson.

I have, &c.,

P. A. TEMPLE,

Council Clerk.

Minutes on above.

The Engineer-in-Chief for Harbours and Rivers and Surveyor-General.—J.G.B. (for the Under Secretary), 21/10/84.

We are of opinion that the protest of the Borough Council of East St. Leonards is well grounded so far as it agrees with our previous recommendation in this case, when our recommendation was similar to that made by us in the case of Mr. P. Hayes.

P. F. ADAMS.

E. O. MORIARTY.

B.C. (for The Under Secretary for Lands). The Under Secretary for Public Works, 1/12/84.

I decided that the alienation of the whole area applied for should proceed. Can a description of the whole area be furnished without further survey? If not, let a survey proceed forthwith. This case has been in this office nearly eight years, and it is time that it should be completed.—J.S.F., 2/12/84. The Surveyor-General.

Mr. Peyton for description.—P.F.A., 2/12/84.

Surveyor-General.—The amended description marked D, was prepared and forwarded to Lands in August, and is still with the papers.—S. L. PEYTON, 3/12/84. Under Secretary for Lands.—P.F.A., 3/12/84. Submitted.—C.O., 4/12/84.

The appraisement may proceed at once.—J.S.F., 5/12/84.

No. 31.

Appointment of Appraiser by The Minister for Lands.

WHEREAS the late Edward Lord (per R. P. Abbott), of 102 Castlereagh-street, Sydney, in the Colony of New South Wales, applied to purchase, under the 12th clause of the Crown Lands Alienation Act of 1861, the crown land specified in the Schedule hereinafter written. Now I, the Minister for Lands, in pursuance of the powers vested in me under and by virtue of the Crown Lands Alienation Act of 1861, do hereby appoint Marshall Bayley, of Pitt-street, Sydney, in the Colony of New South Wales, to be the Appraiser on behalf of the Crown, to appraise the present value of the said land, and to determine the price to be paid for the purchase thereof by the representatives of the late Edward Lord.

In witness whereof, I have hereto set my hand, this 9th day of December, 1884.

JAMES S. FARNELL.

Schedule referred to.

S.P. No. 46. Area 2 roods 6½ perches, parish of Willoughby, county of Cumberland.

I, the within-named Marshall Bayley, do solemnly and sincerely declare, that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matter referred to me under the Crown Lands Alienation Act of 1861.

Subscribed and declared, this 13th day of

December, A.D., 1884, before me,—

M. BAYLEY.

ALF. HILDER, J.P.

No. 32.

The Under Secretary for Lands to The Crown Solicitor.

Sir,

Department of Lands, 9 December, 1884.

I have the honor to forward herewith the papers relating to Edward Lord's application to purchase, under the 12th clause of the Crown Lands Alienation Act of 1861, the land particularized in the margin; and I am to request that you will have the goodness to take the necessary action in the matter, with

A portion of land containing 2 roods 6½ perches, parish of Willoughby, county of Cumberland.

15

with a view to the issue of the customary certificate as to his claim to purchase, in order that the preparation of the deed of grant for the land in question may be proceeded with.

I have, &c.,
F. H. WILSON,
(For the Under Secretary).

No. 32 $\frac{1}{2}$.

The Under Secretary for Lands to the Representatives of the late Edward Lord.

Gentlemen,

Department of Lands, Sydney, 9 December, 1884.

With reference to Edward Lord's application for permission to purchase, under the 12th section of the Crown Lands Alienation Act of 1861, the land specified in the margin hereof, I am directed to request that you will furnish this department with a certificate from the Crown Solicitor, showing that your title to the adjoining land is sufficient to warrant the sale to you of the portion referred to.

No further action will be taken by this department in the matter until the required certificate is received.

I have, &c.,
F. H. WILSON,
(*pro* J. G. BLAXLAND).

No. 33.

The Under Secretary for Lands to The Crown Solicitor.

Sir,

Department of Lands, Sydney, 11 December, 1884.

I am directed by the Secretary for Lands, to request that you will have the goodness to return the papers, Ms. 84-21,081, *re* Edward Lord's 12th clause application, forwarded to your department on the 9th instant.

I have, &c.,
F. H. WILSON,
(For the Under Secretary).

No. 34.

Memorandum by Secretary for Lands.

THE origin of these whaling grants arose out of letters of occupation upon certain conditions. The claims of the parties were referred to the Court of Claims, which Court decided that the conditions had been fulfilled, and that they were entitled to their respective grants. This land being a portion of a grant promised as a special reserve for the formation of a whaling or other mercantile establishment, as stated in the deed of grant—to reserve the water-frontage would be to defeat the object mentioned; but as the printed form of grant makes the usual reservation (used by mistake in these whaling grants), the matter has been proceeded with under the 12th section of the Act of 1861.

In my opinion, the price of the land should not, under the circumstances be more than nominal, or more than that fixed as a minimum by the Act. And I think that this principle should be applied in all cases of the whaling grants.

J.S.F., 12/12/84.

Minutes on above.

Crown Solicitor, B.C., J.McG., 12/12/84.

No. 35.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 12 December, 1884.

In compliance with the request contained in your letter of yesterday's date, without number, I have the honor to return herewith, all the papers in connection with Mr. Edward Lord's application, under the 12th clause Crown Lands Alienation Act, 1861, to purchase the land as in margin.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor (*per* C.E.P.).

No. 36.

Mr. Appraiser Bayley to The Under Secretary for Lands.

Appraisement of Land.

Portion containing 2 roods 6 $\frac{1}{4}$ perches, in the parish of Willoughby, county of Cumberland.—
Appraised at £5.

Sir,

Sydney, 15 December, 1884.

In transmitting the attached award I have the honor to state that the appraisement was conducted on the 13th December, 1884, strictly in accordance with the requirements of the Regulations under the Lands Act further Amendment Act, 1880, and that fourteen day's notice in writing of the date I had fixed to inspect and determine the price of the land was given to R. P. Abbott, representative of late E. Lord, who was not present on the occasion.

The prescribed declaration was made before the appraisement was entered upon, and my letter of appointment is herewith returned.

I have, &c.,
M. BAYLEY,
Appraiser.

[*Enclosure.*]
Award.

To all to whom these presents shall come,—

I, Marshall Bayley, of 19 Bridge-street, Sydney, in the Colony of New South Wales, send greeting:—

Whereas on the ninth day of December, in the year of our Lord one thousand eight hundred and eighty-four, I was duly appointed by the Minister for Lands, in the Colony of New South Wales, as the appraiser to affix and determine the price

price or value to be paid by representatives of the late Edward Lord, for the purchase of portion containing 2 roods 6½ perches, in the parish of Willoughby, county of Cumberland. And, whereas I have entered upon the consideration of the value of the said land, and have heard and considered the evidence produced before me; Now, I, the said Marshall Bayley, do hereby declare the sum of five pounds to be the value of the said land, and do appraise and fix that sum as the amount to be paid for the purchase thereof from the Crown.

In witness whereof, I have hereto set my hand, this 16th day of December, 1884.

M. BAYLEY,
Appraiser.

No. 37.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 6 May, 1885.

I have the honor to return herewith, the papers relating to an application made by the late Edward Lord, to purchase a portion of land at Careening Cove, under the 12th section of the Land Act of 1861, and to state that Messrs. Abbott and Dodds, solicitors, have forwarded to me an abstract of Mr. Lord's title, from which I find that by indenture of date 31 March, 1873, registered No. 509, book 137, Frederica Feez, widow, conveyed to Edward Lord, *inter alia*, 1 acre 1 rood of land at Careening Cove, parish of Willoughby, originally granted to John Lamb by Crown grant, dated 1 June, 1841.

Mr. Lord, by his will dated 22nd day of August, 1882, devised all his real estate to the trustees, and upon the trust mentioned in his said will.

I think, therefore, it would be advisable, provided the reservation sought to be purchased adjoins the 1 acre 1 rood granted to Lamb, to issue the grant in Mr. Lord's name under section 26 of 26 Vic., No. 9, and section 3 of 36 Vic., No. 7.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

[Minutes on No. 37.]

From Mr. Surveyor Mackenzie's plan (Cat. C. 496-2,030) it would appear that the reservation sought to be purchased adjoins the 1 acre 1 rood granted to John Lamb, as referred to by the Crown Solicitor. It is however pointed out that the appraiser was directed to appraise only the 2 roods 6½ perches measured and first proposed to be sold, thus omitting the additional area of about 21½ perches, afterwards approved. It is therefore submitted, whether in view of the appraisement made being only £5, and the additional 21½ perches appearing comparatively unimportant, the alienation now approved may proceed without further appraisement.—J. W. ELLIS (for Surveyor-General), 9 July, 1885. The Under Secretary for Lands. Submitted.—J.E., 10/7/85. F.H.W. (for the Under Secretary), 15/7/85. Let the nominal sum cover both lots.—J.S.F., 16/7/85.

No. 38.

Gazette Notice.

Application to reclaim and purchase land.

Department of Lands, Sydney, 24 June, 1885.

NOTICE is hereby given, that application has been made by the party hereunder mentioned, to reclaim and purchase, under the 9th clause of the Crown Lands Alienation Act, 1861, certain land in front of his property, particularized in the annexed description; and all persons interested are invited to state, within one month from this date, their objections (if any) to the proposed reclamation.

F. A. WRIGHT.

Registration No.	Applicant.	Description.
Ms. 84-27,394	Edward Lord	County of Cumberland, parish of Willoughby: Commencing at a point where the south-western boundary of applicant's property meets the high-water mark of Careening Cove; and bounded thence on the south-west by the north-eastern boundary of applicant's purchased reclamation of 2 roods 12 perches, bearing south 30 degrees 15 minutes east (magnetic) 53 links; thence on the south-east by a line bearing about north 85 minutes east to the prolongation of the south-western side of High-street; thence on the north-east by that prolongation bearing north-westerly to the aforesaid high-water mark; and thence on the north by that high-water mark westerly, to the point of commencement.

No. 39.

Council Clerk, East St. Leonards, to The Secretary Lands.

Sir,

Council Chambers, East St. Leonards, 11 July, 1885.

I have the honor to forward you the following resolutions passed at a special meeting of the Council on the 10th instant, concerning the application to reclaim and purchase land in Careening Cove, adjoining High-street in this Borough.

1. That in the opinion of this Council, the sale of the right of reclamation of land in Careening Cove (Gazette No. 256, June 24, registration number 84-27,394) to the representatives of the late Edward Lord, will be opposed to the interests of the ratepayers of East St. Leonards, and to the public interests generally, being at present the only available water frontage suitable for the erection of a public wharf free from the interference of private owners—a difficulty this Council has to contend with in all its available water frontages in other portions of the Municipality.

2. That this Council take steps to acquire the reclamation sought to be purchased by the representatives of the late Edward Lord, and fully described in *Gazette* notice, date 24 June, as a special reserve for Municipal purposes.

17

I am directed to point out the serious inconvenience already resulting through the adjoining frontages of our present public wharf (Eastern Wharf Road), blocking it completely in, there not being room to berth any but a very small vessel without overlapping their adjoining frontages.

Also, to bring before your notice the fact that a wharf at the end of High-street would be the most easy of access on the North Shore, the gradients therefrom being very slight.

The reclamation in question could be utilized for wharfage purposes at a small expense, owing to the great depth of water and its natural formation; and in consequence of it adjoining the foot of High-street, its usefulness to the public would be incalculable.

I have, &c.,

P. A. TEMPLE,
Council Clerk.

No. 40.

The Council Clerk, East St. Leonards, to The Colonial Secretary.

Sir,

Council Chambers, East St. Leonards, 11 July, 1885.

I have the honor, by direction of the Council, to bring under your notice the objection lodged by it against the proposed sale of the right of reclamation of land in Careening Cove (*Gazette* No. 256, June 24th, registration No. 84-27,394) to the representatives of the late Edward Lord. (See copy of letter herewith to the Hon. the Minister for Lands in explanation).

Any assistance you will be pleased to render to the Council in this matter will be taken as an esteemed favour.

I have, &c.,

Minutes on No. 44.

The Surveyor of Public Parks.—J.H.D.W., 20/7/85. Department of Mines.

Careening Cove.—It would appear from the terms of the *Gazette* notice alluded to in Mr. Temple's letter of 11/7/85 that the matter objected to by the Council of East St. Leonards is the right of reclamation adjoining a right already purchased.

2. I do not know that this Department has any *locus standi* in the matter as it is not proposed so far as I know to devote the land in any case to purposes of recreation; but I have ascertained that the question is to be brought before the Executive Council to-day, and that the papers are with Mr. Budge accordingly.—W. M. COOPER, Surveyor of Public Parks, 27/7/85.

No. 45.

Minute Paper for Executive Council.

Department of Lands, Sydney, 25 July, 1885.

THE application specified in the Schedule annexed, for the purchase, under the 12th clause of the Crown Lands Act of 1881, of certain land, the value of which has been appraised as by law required, is recommended for the approval of His Excellency the Governor and the Executive Council, the claim being regular and in accordance with the provisions of the Act referred to.

The Executive Council advise as herein recommended that the application set forth in Schedule, to purchase the portions of land at Careening Cove, herein described, be approved.—ALEX. C. BUDGE, Clerk of the Council. Approved.—A.L., 28/7/85. Min. 85/25, 18/7/85. Confirmed.—25/8/85.

No. 46.

Memorandum from The Metropolitan and Coast District Surveyor to Under Secretary for Lands.

Edward Lord, reclamation Careening Cove, 9th Section Crown Lands Alienation Act of 1861.

No. 879, 17th September, 1885.

In view of recent correspondence from the Borough Council of St. Leonards, and the circumstance that the applicant has been permitted to purchase the whole of the rescission fronting his property, I am of opinion that he should be permitted to reclaim the area marked ABDE; and that the Borough Council, upon application, should be permitted to reclaim the area marked ABC, as shown upon tracing herewith marked B. The latter reclamation will be a valuable means of access to High-street, and will probably meet the wishes of the Council.

JOHN W. DEERING,
Metropolitan District Surveyor.*Minutes on No. 46.*

For reference to the Engineer-in-Chief for Harbours and Rivers.—F.H.W. (for the Under Secretary), B.C., 22 September, 1885. B.C., Mr. Williams for report (for E.O.M.).—W.V., 23/9/85.

Reclamation not commenced.—I can see no possible objection to this reclamation being carried out.—A.W., 10/10/85.

I concur.—E.O.M., 27/10/85. B.C., Under Secretary for Public Works. Forward to Lands. The Under Secretary for Lands, B.C., 30/10/85.—J.R.

No. 47.

No. 47.

Mr. Forest Ranger McKeown to The Under Secretary for Lands.

Sir,

Petersham, 28 October, 1885.

I have the honor to report that Mr. Robert Scott of Nicholson-street, Balmain, contractor, is now engaged with several of his men driving piles upon Crown Lands, below high-water mark, fronting Mr. Lord's property at Neutral Bay, near foot of High-street, for purpose of erecting a jetty.

Mr. Scott informed me that he is erecting the jetty by direction of the North Shore Steam Ferry Company.

I am not aware of any authority having been granted for the occupation of the Crown Lands above referred to, either by the erection of a jetty or otherwise.

Awaiting instructions,

I have, &c.,

JAS. McKEOWN,
Cumberland Ranger.

Minutes on No. 47.

Application for special lease has been made to the Local Land Board for permission to erect a jetty in the locality named. Evidently from this report the erection of the jetty is being proceeded with without any authority from the Crown, and thereby rendering themselves liable to the penalties under the 133 Section of Crown Lands Act of 1884. The paper is submitted that in view of an application to lease having been made, no proceeding in trespass be taken.—E.L., 30/10/85.

Submitted.—C.O., 31/10/85. Persons ought not to be allowed to act as if it was imperative on the Department to grant a lease. When they do so they often make it afterwards an excuse for pressing the claim for lease.—J.P.A., 2/11/85.

No. 48.

The Chairman of the Neutral Bay Steam Ferry Company (Limited), to
The Secretary for Lands.

Sir,

Commercial Chambers, Bond-street, Sydney, 3 November, 1885.

As representing a large portion of the travelling public of Neutral Bay, North Shore, we respectfully draw your attention to the construction of an extensive jetty now being rapidly proceeded with at the extremity of High-street, by the North Shore Ferry Company (Limited)

We would also urge that as statutory notice of application has appeared in the *Gazette*, no opportunity has been offered for stating objections to the above-mentioned works.

I have, &c.,

P. HAYES,
Chairman.

On behalf of the Directors of Neutral Bay Steam Ferry Company (Limited).

Minutes on No. 48.

Papers.—C.O., 4/11/85. I have already given instructions that this work is not to proceed until the lease is granted, and steps are to be taken to stop it.—J. P. ABBOTT, 4/11/85.

No. 49.

Mr. T. Summerbell to The Under Secretary for Lands.

Sir,

North Shore Steam Ferry Company (Limited), Sydney, 6 November, 1885.

I beg to acknowledge the receipt of your letter of the 4th instant, *re* instructions from the Minister that the work (*i.e.*, erecting jetty at the south boundary of High-street, Neutral Bay) is not to be proceeded with.

I most respectfully ask the Minister to revoke this order, inasmuch as a contract with Mr. Scott has been entered into for the sum of £140—such contract is nearly completed. That a stoppage of the work will demand compensation by the contractor, and consequently entail serious loss to the Company.

Believing that the jetty was urgently needed—as per Council report of East St. Leonards, which set forth that 183 residents had petitioned the Council for such a convenience (they, the Council having refused to comply with the petition)—this Company thus obtained the consent of the occupant of Mr. Lord's land to erect a jetty extending a few feet outside the rocks, made an application to the Lands Department for permission.

Please lay this statement before the Minister at your earliest convenience and pray that my request may be granted.

I have, &c.,

THOMAS SUMMERBELL,
Manager.

Minutes on above.

Submitted.—C.O., 6/11/85.

Approved.—J. P. ABBOTT, 6/11/85.

No. 50.

The Under Secretary for Lands to Mr. P. Hayes.

Sir,

Department of Lands, Sydney, 10 November, 1885.

Referring to your letter of the 3rd instant, respecting the jetty now in course of construction at the south boundary of High-street, Neutral Bay, I am directed to inform you, that Mr. Secretary Abbott has rescinded his former order for the stoppage of the work, and has issued instructions that the erection of the jetty referred to is to be allowed to proceed.

I have, &c.,

CHARLES OLIVER,
Under Secretary.

No. 51.

The Under Secretary for Lands to Mr. T. Summerbell.

Sir,

Department of Lands, Sydney, 10 November, 1885.

Referring to your letter of the 6th instant, respecting the jetty now in course of construction at the south boundary of High-street, Neutral Bay, and requesting the Minister to revoke his previous order for the stoppage of the work, I am directed to inform you, that Mr. Secretary Abbott has decided to grant your request, and has given instructions that proceedings instituted in the matter by Mr. Ranger McKeown be stayed.

I have, &c.,

CHARLES OLIVER,
Under Secretary.

No. 52.

The Under Secretary for Lands to R. P. Abbott, Esq., M.P.

Sir,

Department of Lands, Sydney, 10 November, 1885.

I am directed to call your attention to the notice in the *Government Gazette* of the 11th instant, from which you will perceive that the representatives of the late E. Lord will be allowed to purchase, under the 12th clause of the "Crown Lands Alienation Act of 1861," portion containing 2 roods and 27½ perches, in the parish of Willoughby, county of Cumberland; and I am to request that you will be good enough to pay into the Colonial Treasury the sum of £6, being the price at which the land has been appraised, inclusive of the deed fee.

Under the 8th clause of the Regulations of the "Land Acts further Amendment Act of 1880," the amount stated must be paid in the manner pointed out within three months from the notice in the *Government Gazette*, under a penalty of an addition of 10 per cent. to the price; and should the price, together with such penalty, not be paid within a further period of three months, the claim to purchase will lapse.

The deposit of £5, paid on the application, will be credited as part payment of the purchase money.

I have, &c.,

R. H. DE LOW,
(For the Under Secretary.)

No. 53.

The Under Secretary for Lands to Mr. Forest-Ranger McKeown.

Sir,

Department of Lands, Sydney, 10 November, 1885.

Referring to your report of the 28th ultimo and my letter of the 4th instant, respecting the jetty now in course of erection at the south boundary of High-street, Neutral Bay, I am to request that you will be good enough to stay any proceedings which you may have instituted in the case, as the Minister for Lands has rescinded his previous order for the stoppage of the work in question.

I have, &c.,

CHARLES OLIVER,
Under Secretary.

No. 54.

Gazette Notice.

Department of Lands, Sydney, 11 November, 1885.

It is hereby notified that the persons hereunder referred to will be permitted to purchase, under the 12th clause of the "Crown Lands Alienation Act of 1861" the portion of land mentioned in the following Schedule.

2. The purchase money must be paid into the Colonial Treasury, Sydney, within three months from the date of the publication of this notice, under a penalty of an addition to the appraised value of 10 per cent.; and should that increased price not be paid within a further period of three months, the claims to purchase will lapse.

Mr. T. Summerbell to The Under Secretary for Lands.

Sir,

North Shore Steam Ferry Company (Limited), Sydney, 11 November, 1886.

I acknowledge the receipt of your letter of 10th instant, received even date, re jetty at south boundary of High-street, Neutral Bay, with many thanks.

I have, &c.,

THOMAS SUMMERBELL,
Manager.

21

No. 56.

The Council Clerk, East St. Leonards, to The Secretary for Lands.

Sir, Council Chambers, East St Leonards, 11 November, 1885.

I accordance with a resolution of the Council passed at a general meeting held on the 22nd October last, I have this day made an application for a lease of the water frontage to High-street, in this Borough, for the purpose of erecting a public wharf thereon.

I am directed to state, that the Mayor is surprised to find that a jetty has been erected on the said frontage to High-street, by the North Shore Ferry Co., without permission, no notification having appeared in the *Gazette* or other newspapers. The North Shore Ferry Co., recently asked permission of the Council to erect a jetty at this street, which was refused, it being pointed out at the time that the Council intended erecting a public wharf there.

The jetty now erected will spoil the scheme the Council intended carrying out, that of a large wharf for the use of the public.

I have, &c.,
P. A. TEMPLE,
Council Clerk.

Minutes on No. 46.

Submitted.—E.L., 12/11/85.

It is understood that the wharf does not front High-street, but adjoins it. No interference with the project of the Council need be permitted, as the lease to be granted to the North Shore Ferry Co., would be made to terminate on the completion of the public wharf by the Council.—C.O., 11/11/85.

Approved.—J. P. ABBOTT, 14/11/85.

No. 57.

The Under Secretary for Lands to The Council Clerk, East St. Leonards.

Sir, Department of Lands, Sydney, 14 November, 1885.

Referring to your letter of the 11th instant, respecting your application on behalf of the St. Leonard's Municipal Council, for a lease of the water frontage to High-street, for the purpose of erecting a public wharf thereon, I am directed by the Secretary for Lands to inform you, that as it is understood that the wharf does not front High-street, but adjoins it, no interference with the project of the Council will be permitted, as the lease to the North Shore Ferry Company could be made to terminate on the completion of the public wharf by the Council.

I have, &c.,
CHARLES OLIVER,
Under Secretary.

No. 58.

The Council Clerk, East St. Leonards, to The Secretary for Lands.

Sir, Council Chambers, East St. Leonards, 17 November, 1885.

I beg to acknowledge the receipt of your Under Secretary's letter of the 14th instant, re application for a lease of the frontage at the foot of High-street, for a public wharf, in accordance with the plan submitted with the application.

I am directed by the Council to protest against the wharf at the foot of High-street, recently erected by the North Shore Ferry Company, unlawfully, this Council having had no opportunity to object to its erection.

I am directed to refer you to a letter forwarded to the Minister for Lands on 11th July, 1885, copies of which were forwarded to yourself, the Hon. The Colonial Secretary, the Hon. The Colonial Treasurer, the Hon. W. B. Dalley, and I. E. Ives, Esq., M.L.A., protesting against the sale of the right of reclamation of the land whereon this recently erected wharf is situated, adjoining High-street, to the representatives of the late Edward Lord, pointing out particularly that if the public were restricted to the base frontage of High-street for a wharf, such would be almost useless.

Upon these facts, the portion alluded to, adjoining High-street, was actually reserved from sale, thereby making a proper approach to High-street.

Your Under Secretary's letter states that the lease to the North Shore Ferry Company could be made to terminate on the completion of the public wharf by the Council, but I am directed to point out (as in my last letter) that the wharf erected by the North Shore Ferry Company (if allowed to remain) entirely prevents the erection of the proposed large public wharf over the frontage to High-street, with the piece of land adjoining, resumed for that purpose. See sketch with the application.

Therefore if a lease is granted to the North Shore Company, this Municipality cannot proceed with their proposed improvements for the public benefit.

I have, &c.,
P. A. TEMPLE,
Council Clerk.

No. 59.

Memo. from Metropolitan and Coast District Surveyor to Under Secretary for Lands.

Borough Council of East St. Leonards, complaining of jetty at foot of High-street, erected by the North Shore Steam Ferry Company.

(No. 1,462)

20 November, 1885.

I HAVE personally inspected this jetty and seen the alignment of High-street.

2. The jetty has been erected alongside the extension of the building line of High-street, and is upon land, which in my report No. S79, of 17th September last, upon Edward Lord's proposed reclamation (Misc. 85-13,634) I recommended to be reserved as a means of access to High-street. I am not aware of the decision in that case.

3. It appears to me that the only encroachment upon the frontage waters of High-street, and which is the only area the Council can claim, is the small portion of jetty marked A B C D upon Council's tracing herewith.

J.

4 A special lease No 85-77, for a public wharf and general wharfage is now with me for report. The area applied for is as colored brown upon enclosed tracing, and it embraces nearly the entire jetty of the Steam Company.

JOHN W. DEERING,
Metropolitan District Surveyor.

No. 60.

Mr. T. Summerbell to The Under Secretary for Lands.

Sir, North Shore Steam Ferry Company (Limited), Sydney, 21 November, 1885.

However desirable it may have been for a deputation from this Company to wait upon the Minister, it is now rendered unnecessary at this stage, on account of the equitable decision he has given (as per *Herald's* report in this day's issue).

I ask sir, that in the event of the Minister permitting any of the East St. Leonard's deputation being present when the surveyor is sent to report (or what would be infinitely better, the Minister's own inspection), that I may have the same privilege accorded me.

I have attended the Council's discussions *re* jetty, and can say a few things, and at their last meeting held on the jetty at 7 a.m. on the 18th instant, I said as follows (exact words from my pocket book):—"That the end planks are over the alignment in the same way that a house built with a chasm before it, put planks out for ingress to road for its inmates. That when they commence their wharf we will remove any encroachments when proved to be wrong by the judge."

I have, &c.,

THOMAS SUMMERBELL,
Manager.

No. 61.

The Under Secretary for Finance and Trade to The Under Secretary for Lands.

Sir, The Treasury, New South Wales, 25 November, 1885.

I am directed to inform you that the representatives of the late Edward Lord paid into this office on the 24th instant, the sum of £5, being the amount of purchase money for land at parish Willoughby, county Cumberland, containing 2 roods 27 $\frac{1}{4}$ perches, under the 12th clause of the Land Act of 1861.

2. The fee on deed £1, has also been paid.

I have, &c.,

W. NEWCOMBE,
(*Pro* Under Secretary).

Minute on above.

Deeds Branch, for preparation of deed.—R.H.D., 8 December, 1885.

No. 62.

The Council Clerk, East St. Leonards, to The Under Secretary for Lands.

Sir, Council Chamber's, East St. Leonards, 18 December, 1885.

Referring to the jetty recently erected at the foot of High-street, illegally by the North Shore Ferry Company, I am directed to inform you, that the Council will protect its rights against spoliation, and will move for an injunction to restrain the granting of a lease of said wharf to the Company.

I have, &c.,

P. A. TEMPLE,
Council Clerk.

No. 63.

Memorandum.

Lord's reclamation at Careening Cove, and North Shore Steam Ferry Company's Jetty at the foot of High-street, St. Leonard's East.

[Memo. specially submitted]

THE reports of Mr. District-Surveyor Deering are submitted, from which it may be advanced as follows, in conjunction with the previous instructions in these cases, in view of protest of Borough Council of East St. Leonards:—

1. That Lord's reclamation (S.P. 76-47, Misc. 84-27,394) be restricted to lines marked A B D E on tracing, with Mr. Deering's report of 17 September, 1885.—18,488, Ma.

2. The North Shore Ferry Company's lease or permission to erect a jetty or to occupy the water frontage at foot of High-street, be restricted to the term mentioned in the Under Secretary's minute of 13/11/85, on Occ. 85-2,725, viz., that the lease or permission to the North Shore Ferry Company, could be made to terminate on the completion of the public wharf by the Borough Council.

This would leave clear for separate action, the application 85-77, special lease of the Borough Council, to lease for public wharf and general wharfage, see Occ. 86-2, the area shown by brown tint on tracing, with Mr. District-Surveyor Deering's report 1,462 of 20 November, 1885.—R.H.D., 4/1/86.

No. 64.

F. Abigail, Esq., M.P., to The Secretary for Lands.

Sir, Sydney, 13 January, 1886.

I have the honor to draw your attention to the enclosed paragraph cut from the *Sydney Daily Telegraph* of the 12th instant. It is a statement of a transaction said to have been sanctioned by Mr. Abbott just before he left office, but it is of so monstrous a character that I have declined to accept it unless it be confirmed by the reply to this. Should it be true, I strongly urge upon you not to give effect to

to what will be a scandalous act of spoliation, more especially when you consider that a Select Committee appointed to inquire and report upon the Whaling Road, brought up a request that the road which includes this very land should be resumed for the people, and but for the death of Mr. Holtermann, the chairman, the report would have been adopted.

Awaiting the favour of a reply.

I have, &c.,
F. ABIGAIL.

[Enclosure.]

A case for inquiry.

Just before Mr. Abbott retired from the Lands Office, he gave his sanction to the sale of a piece of land situate in the Borough of East St. Leonards, and known as the Whaling Reserve, being a water frontage with an area of three-quarters of an acre, and valued at £1,800 to £2,000. We are informed that the hon. gentleman sanctioned the sale of the land to the executors of the late Mr. Edward Lord for the sum of £6, including a deed fee, although it had been previously promised to the Borough of East St. Leonards by Mr. Farnell, as a permanent reserve. The Council concerned, entered a strong protest against the transaction, and communicated with Mr. Ives, by asking him to investigate the matter. Mr. Ives replied to the Council that he thought there must have been some oversight on the part of the Government appraiser, as in many other cases of this sort which had come under his notice, as he never heard of such an absurdly low price for so large an area. He also promised to inquire into the details of the land case at the Lands Office when Ministers were available. The following was the letter received by the Council from Mr. Ives:—"I am in receipt of yours of the 19th instant, drawing my attention by direction of your Council to the circumstances in connection with the sale by the Government to the executors of the late Edward Lord, of a portion of land between his property and low-water mark, which your Council alleges contains an area of nearly three-quarters of an acre, and is worth £1,800 to £2,000, but was sold to Lord's representatives for the sum of £6, including survey fee. If the facts are as stated by you, I should think there must have been an oversight on the part of the Government appraiser, as in many other cases of this sort which have come under my notice."

No. 65.

The Mayor of East St. Leonards to The Secretary for Lands.

Sir, Council Chambers, East St. Leonards, 14 January, 1886.

As representing the Municipal Council and the inhabitants of this Borough, I do myself the honor to submit the following remarks for your serious consideration.

In the *Government Gazette*, dated 24 June last, the announcement appears, signed by the Secretary for Lands, that the executors of the late Mr. Edward Lord had applied for a right of reclamation over a certain portion of foreshore within this Borough in Careening Cove.

It has recently come to our knowledge, that the department over which you preside has made arrangements to make the concession applied for, subject to a trivial modification professedly made in favour of our municipal requirements.

On behalf of the Council and the resident ratepayers, I am authorized to give you distinctly to understand that we emphatically protest against such a violation of public and municipal rights as will be perpetrated if this claim is conceded.

In spite of a protest repeatedly urged by this Council, a large portion of harbour reserve, public property set apart for the public welfare, situated behind the proposed reclamation, measuring 2 roods 27½ perches, was sold to the same applicants, namely, the executors of the late Mr. Edward Lord, as appears by a *Gazette* notice published on the 11 November last.

Previous sales and concessions of a like nature granted to private individuals by various governments, have made away with almost every inch of water frontage and other public land within the built and occupied portion of the Borough, until at present the inhabitants can neither leave the streets, nor land on their shores from a boat, without incurring the risk of being prosecuted for trespass.

If the Circular Quay and the Botanical Gardens were sold secretly by the Minister for Lands to private persons through the influence of politicians and land agents, then Sydney would be in the position to which East St. Leonards has been brought.

From past records it appears that almost every Ministry has taken part in the spoliation of public property and municipal privilege on the North Shore, and we fear that our position will always be precarious so long as harbour frontages can be dealt with secretly, and while the Minister for Lands retains a right of discretionary action, which, as far as our interests are concerned, has been systematically abused.

In one exceptional instance we succeeded in obtaining temporary protection for a large portion of unoccupied frontage, but we are fully aware of the slight security on which the public rights in this case are based, and that the land in question may any day cease to be national property. As it is, the temporary protection which we secured was due entirely to an exceptional concurrence of circumstances; but for this the Minister for Lands of the day would have sold to Mr. James Milson three-fourths of a mile of harbour frontage reserve, being a large part of Robertson's point, commonly known as Cremorne, a position in the harbour, in intrinsic value and natural advantages second to none.

But while acknowledging our obligations to certain members of the Ministry of July, 1885, for their countenance in this instance, we have to record our regret that in the case of the Careening Cove Reserve, which was duly represented to them, the good will of these honourable gentlemen proved of no avail, as it turned out that the retired Minister had previously pledged the Government to give the land to Mr. Lord's executors.

It is our earnest wish to address the head of the Lands Department in becoming terms, and to grant to each Minister as much respect as he personally may merit, but we would not wish to lead you sir, to suppose for a moment, that as a community, as a municipality, or individually we will scruple to speak our minds plainly as to the infamous jobs and intrigues, through which the frontages and foreshores of East St. Leonards have been despoiled, in order to enrich persons favoured by various Ministers for Lands.

As Mayor, I desire now to hand you, sir, the deliberate determination of the body which I represent.

I am, &c.,
EDWARD M. CLARK,
Mayor.

P.S.—I may mention the case of the Whaling Road in this Borough. The road was aligned and confirmed on the 7th July, 1873, from the western boundary of the Whaling allotments to the waters of Port Jackson in Neutral Bay—40 feet in width. See *Gazette* No. 178, 18 July, 1873, but almost the whole of the road is now closed and claimed by private owners, the public being thus deprived of one of the most important public thoroughfares on the North Shore. E.M.C.

No. 66.

The Mayor of East St. Leonards to The Secretary for Lands.

Sir,

Borough of East St. Leonard's, 25 January, 1886.

As respecting the inhabitants of this municipality, I beg to submit for your perusal the documents herewith:—

They relate to a long standing abuse—the spoliation of the public lands within this Borough, more especially the harbour reserve frontages and foreshores.

An early Government of the Colony decreed that a reserve of public lands fronting the harbour 100 feet in depth, should be maintained for public wants, but for long, one Minister for Lands after another has aided and abetted the transfer of these frontages to private persons in disregard of the policy so professed.

In like manner the foreshores—being the lands situated between the high-water and low-water levels, have in defiance of public necessities been conveyed to private persons and speculators.

In common with other districts, the inhabitants of this Borough expected that the local administration provided by the Land Act of 1884, would protect them for the future against secret jobs and abuses of the kind; but it turned out that the frontage lands of the Metropolitan District were by law specially exempted from administration by the District Board, and were left in the Minister's hands to be dealt with as he might in his discretion determine.

The consequence has been that since the Act of 1884 came into operation, the appropriation of frontage lands, with the aid of Ministerial complicity, has gone on as before.

The papers herewith will disclose the fact that one very gross attempt was for the time thwarted through an unusually fortunate concurrence of circumstances, and that another attempt has been carried out successfully in spite of repeated protests made by this Municipality.

In common with other communities occupying the shores of the harbour, we believe that our interests in these frontage lands will meet with no consideration so long as the same can be dealt with secretly by land agents and politicians infesting the Minister's office.

We trust that the perusal of the documents enclosed will influence your action as a member of the Legislature; first, in giving your aid to prevent the alienation of the reserve on Robertson's point; second, in saving lands in Carcening Cove from confiscation; and last, in bringing the harbour frontages under public local administration, as is successfully done with the other lands of the Colony.—On behalf of the Borough and community of East St. Leonards.

I have, &c.,
EDWARD M. CLARK,
Mayor.

 GEORGE DOUGHERTY'S CONDITIONAL PURCHASE.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 30th March, 1886,—“*with power to send for persons and papers, to inquire into and report upon the matter of the forfeiture of George Dougherty's conditional purchase made at the Lands Office, Gunnedah, on 18th May, 1876, and to whom was referred, on the same date, the Report from the Select Committee of Session 1883-4 in reference to this matter,*”—have agreed to the following Report:—

1. Your Committee having carefully considered the Report and Evidence referred to them, find as follows:—

1. That on the 18th day of May, 1876, George Dougherty applied to purchase, under the 13th section of the Crown Lands Alienation Act of 1861, 317 acres of land situate on the Bando Run, being measured portion No. 60, County Pottinger, parish Calala.
2. That, consequent upon the report of Mr. H. V. Geary, Inspector of Conditional Purchases, an inquiry was held at Tambar Springs, by Mr. Commissioner Delaney, as to fulfilment by the said George Dougherty of the condition of residence on the said conditional purchase, when the evidence of the said George Dougherty and Henry Vincent Geary, and that of James W. Jones and William Grace, the superintendent and sheep overseer respectively of the said Bando Run, was taken, and the said Commissioner reported that he found condition of residence not to have been fulfilled, and therefore recommended that the said conditional purchase should be forfeited.
3. That the recommendation for such forfeiture was approved on the 3rd December, 1878.
4. That the statutory declaration of fulfilment of conditions of residence and improvements, as required by section 18 of the Crown Lands Alienation Act of 1861, was duly made and lodged at the Lands Office, Gunnedah, by the said George Dougherty, on the 25th day of June, 1879, and the first instalment of £15 17s. on account of the said conditional purchase paid by him and credited at the Treasury.
5. That a further inquiry into the fulfilment of the condition of residence by the said George Dougherty was held at Tambar Springs, before Mr. Commissioner Delaney, on the 31st July, 1879, when the only evidence taken was that of John Smith and John Sharp, and the Commissioner reported as follows:—“I respectfully submit there is nothing in the evidence to warrant me altering the recommendation in my report of the 5th September, 1878; and I have therefore to report that I find such conditions of residence not to have been fulfilled, and to recommend that this conditional purchase be forfeited.”
6. That no action appears to have been taken by the Department upon such further report until the month of December in the following year, when the recommendation that such forfeiture should be adhered to was approved.

7. That no intimation appears to have been given Dougherty that it had been decided that the purchase should be brought forward for forfeiture until the 7th February, 1880.
8. That the said George Dougherty paid his annual instalments of £15 17s. on account of the said conditional purchase, for the years 1879, 1880, and 1881.
9. That in consequence of a letter from Messrs. H. H. Brown & Co., praying for a rehearing of the case, the same was referred to Mr. Commissioner Delaney for that purpose.
10. That an inquiry by way of a rehearing was accordingly held at Tambar Springs, before Mr. Commissioner Delaney, on 1st December, 1881, when the evidence of the said George Dougherty and James William Jones, and that of Robert Sharp, W. Ryan, and John Pryor was taken, the whole of which indicated the fulfilment of conditions of residence and improvements by the said George Dougherty, and the Commissioner reported as follows :—"I have therefore to report that I find such conditions * * * * * to have been fulfilled, and to recommend that this conditional purchase be . . ."
11. That notwithstanding such evidence and report, the forfeiture originally decided in 1878 was approved, and the land subsequently sold by the Crown to the Messrs. White, the owners of Bando Run.
12. That Mr. Commissioner Delaney, when examined by your Committee, explained that he made no recommendation as to forfeiture or otherwise in the report of the last inquiry, as it had to be decided by the Minister, and not by him. And further, that with reference to his last inquiry, if that had been the only occasion it had come before him, considering the evidence given by Dougherty on that occasion, he should have recommended that the selection be allowed.
13. That, in addition to the payment of the deposit of £79 5s. on application for the said conditional purchase by the said George Dougherty, he effected improvements on the same valued at £340, and further paid three annual instalments of £15 17s. each, on account of the said conditional purchase, making in all a sum of £466 16s.; and further, that he the said George Dougherty valued his said conditional purchase at upwards of £2 per acre.

2. Your Committee are of opinion that the conditions of residence and improvements in respect of the said conditional purchase were complied with by the said George Dougherty, and therefore recommend his case to the favourable consideration of the Government.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MR. HENRY ARTHUR HOUGH.
(PETITION OF.)

Received by the Legislative Assembly, 14 May, 1886.

PETITION of the undersigned Henry Arthur Hough to the Legislative Assembly of New South Wales, in Parliament assembled.

Wherein your Petitioner, who came to this Colony in May, 1875, to select land as a home for himself and family, humbly sheweth the grievous trouble, litigation, and expense he has been put to for the past ten years—and is not yet at an end—through having to defend two Supreme Court actions for £2,000 each, for trespassing on land which your Petitioner had selected on Tarramiah Run (owned by one Henry Tarlton Whitty and John Charles Whitty), and which land had been surveyed before selection, but which survey had afterwards been found to encroach on two reserves, numbered respectively 296A and No. 98, in respect of which two portions so encroaching, not having previously been taken from the lease of the run, your Petitioner was sued as aforesaid for trespassing on his own land for which he held the Government receipts; but which did not prevent his being compelled to defend the said two actions, and involved him in costs amounting to over £500, and extended over a period of two years, necessitating his almost continual absence from his home and business in Albury, Sydney, or Melbourne, whereby his business was utterly neglected and his health very much impaired; and your Petitioner would humbly direct your attention to the significant fact that at a Supreme Court trial held in Sydney, in June, 1883, in which he was defendant, the barrister employed by Whitty admitted in open Court that Whitty never thought to get the £4,000 damages from him, but was determined to issue writ after writ to harass him with continuous litigation and compel him to sell his land. Your Petitioner was compelled to borrow money at high interest to meet the vexatious losses and expenses he was put to through this treatment; but in order to avoid further trouble your Petitioner (by Whitty's solicitation) leased the whole of his selections to Whitty for seven years in August, 1880, thereby hoping to have peace and recruit his health, which was very much impaired through the continual trouble and worry he had been put to. The lands in dispute, however, were afterwards legalized by a special Act of Parliament, passed on the 10th day of August, 1881, and called "The Validating Titles Act." Your Petitioner would further point out the grievous loss and trouble he was afterwards put to through selecting 140½ acres of land on Tarramiah Run, on the 15th May, 1879 (afterwards made freehold on the 5th day of March, 1883), and which land formed part of the lands leased by your Petitioner to Whitty, but which piece, on account of certain improvements thereon, was the subject of a special clause in the lease, providing that rent was only to be paid to him in the event of the said land being duly vested in and legalized to your Petitioner by the Government of New South Wales. A Court of Appraisement was held in Mulwala, on the 22nd day of October, 1882, to inquire into and value the improvements, the decision of which Court was to be final and binding as provided for by the Land Act of 1880. Said decision was ultimately given in your Petitioner's favour, as shown by a parliamentary report printed in April, 1884, and a circular letter of the Lands Department forwarded to your Petitioner. Relying on this title, and no rent whatever being paid for two years, your Petitioner was induced, after much opposition on his side, to sue Whitty in the Supreme Court in Sydney for the rent, then amounting to £40, your Petitioner's lawyer stating that the District Court, in which your Petitioner wished it tried, as being much less expensive, had no jurisdiction. After much delay and numerous journeys to Albury and Sydney to consult his lawyer and barrister, and several adjournments, the case came before the Supreme Court, Sydney, in June, 1884, and resulted in a verdict for your Petitioner, by consent, on the lease alone, no evidence being taken. A point of law, however, was reserved for argument by the full Bench, which took place on the following August 12th, 1884, before Sir James Martin, Sir George Innes, and Justice Windeyer, who decided that the Lands Department had no power to sell conditionally any surveyed land containing improvements over £40 in value, and that the Minister of Lands had acted illegally and *ultra vires* in awarding him the land after the recommendation by the Court of Appraisement in 1882 (October 22nd), as the improvements exceeded £40 in value, and the land was surveyed and marked on the ground and numbered 90; that therefore your Petitioner had no claim to 140½ acres in question nor to 68 acres adjoining it, an original conditional purchase in virtue of which the 140½ acres was selected. Moreover, your Petitioner had to pay all costs in that action, amounting to

£1,000. Immediately on receipt of news informing him of the decision of the Full Bench your Petitioner wrote to Mr. W. J. Lyne, M.P., on the case, which was brought under the notice of the Minister of Lands, Mr. Farnell, who was greatly surprised at the ruling, and on searching the survey records found out the verdict was entirely wrong and against facts, as the land at time of selection, viz., 15th May, 1879, was not an approved measured portion, not having received the signature of the Surveyor-General or that of the Minister, which was not affixed till the 2nd June, 1880, but was surveyed on 13th June, 1878, thereby clearly establishing it to be Crown Lands unimproved at date of selection, 15th May, 1879. Moreover, Mr. Farnell, through Mr. Lyne, sent a telegram informing your Petitioner that if he paid the balance of purchase money due on the 68 acres he, Mr. Farnell, would issue the Crown Grant for the whole allotment of 208½ acres, the same never having been subdivided, but comprising one lot, No. 90. Your Petitioner followed this advice, and obtained the Crown Grant on November 27th, 1884, but was not enabled to obtain a reversal of the verdict, as time to appeal, viz., fourteen days, had elapsed before the error was found out; nor could he take it to the Privy Council in England, as no new evidence could be admitted. To make things more complicated still, your Petitioner, acting under the best legal advice, sought to recover the rent owing for five years, amounting with interest to £117 11s. 5d., in the District Court, Corowa, on the 30th day of June, 1885, but was non-suited on a technical point. The same case came before Judge Forbes on the 14th November, 1885, who dismissed it, as he had no jurisdiction, in spite of your Petitioner producing his Crown Grant and bank book showing that Whitty had actually paid rent for three half-years on the 68 acres forming portion of 208½ acres named, since the verdict of Full Bench on August 12th, 1884, thereby clearly admitting your Petitioner's title to the whole lot of 208½ acres, as it was legally impossible for one part to be good without the whole being good, the Crown Grant covering all, and every preliminary condition fulfilled, as parliamentary report shows.

Your Petitioner would further point out that, had he have been in possession of the actual facts in connection with this piece of land, he might have been spared the ruinous loss and trouble he has been put to, for the parliamentary reports hold him blameless all through; and after the Court of Appraisement deciding in his favour and accepting purchase money and promising grant should issue, he naturally thought the land was his and all the rights pertaining thereto; but on his seeking to assert them in a lawful manner the disastrous and unforeseen results herein occurred. And your Petitioner would humbly point out, before concluding this Petition, that the money losses named herein do not nearly represent his actual losses, such as sacrificing stock to raise money, long absence from home on law business, the loss sustained from not being able to cultivate land for want of horses and machinery for the past ten years, and being compelled to pay high interest on loans to meet law costs, besides the expenses incidental to a mortgage of his property; also of worry and anxiety of mind, quite unfitting him for his business. Your Petitioner is at an utter loss how to recover the rent due to him, as apparently no Law Court has jurisdiction (from the ruling at Corowa District Court by Judge Forbes), a fact irreconcilable with the Supreme Court twice having had jurisdiction in said case, and Whitty through his lawyer having since paid three half-years' rent on one portion of the aforesaid land, absolutely taken from your Petitioner by the Full Bench, and pleading through his lawyer that the ruling of the Full Bench had not been reversed, which facts taken together place your Petitioner in a most extraordinary and unprecedented dilemma, from which he humbly prays that your Honorable House will take his case into your merciful consideration, and cause justice to be done to him for the heavy losses he has sustained.

And, as in duty bound, your Petitioner will ever pray, &c.

HENRY ARTHUR HOUGH.

MR. HENRY ARTHUR HOUGH.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 11th June, 1886, to whom was referred "*the Petition of Henry Arthur Hough, with power to send for persons and papers for inquiry and report,*"—have agreed to the following Report:—

Your Committee having examined the witness named in the margin,* whose evidence will be found appended hereto, find as follows:—

* Mr. Henry Arthur Hough.

That the Petitioner has proved the allegations of his petition which may be briefly stated to be: That the Petitioner selected 1,280 acres, consisting of four lots of 320 acres each, on the Tarramiah Run, two lots of which land had been previously surveyed and were represented by that survey as being available for selection, and that he occupied and improved the said selections.

That subsequently it was discovered that they encroached on Reserves 296 A and No. 98 on that Run, and that immediately upon that discovery actions were commenced by Messrs. H. T. and J. C. Whitty the lessees of the run, for trespass; and the Petitioner was consequently cast in damages and costs amounting to £526 10s.; that subsequently these Reserves were to the necessary extent cancelled and the selections legalized.

That the total loss and expenditure of this Petitioner in respect of the said mistake in the survey amounted to £526 10s.

That the Petitioner, in August, 1878, selected 68 acres, and on the 15th May, 1879, by additional conditional purchases, 140 $\frac{3}{4}$ acres of land (on the same run), the two areas forming together a block which had been surveyed comprising in all 208 $\frac{3}{4}$ acres.

That the Petitioner was greatly harassed by the Messrs. Whitty, and ultimately agreed to lease the selections, including the 140 $\frac{3}{4}$ acres, to those gentlemen by a lease, a copy of which is attached hereto; that the Messrs. Whitty refused to pay rent for the 140 $\frac{3}{4}$ acres, and the Petitioner had to sue for it in the Supreme Court, and the evidence given by the Crown Lands officers in that case went to show that the said land formed part of a "measured portion" of 208 $\frac{3}{4}$ acres on which were improvements to an amount of £40, and the Court thereupon decided that such selection was invalid, and the Petitioner was further cast in damages and costs to the amount of £1,433 16s. 5d., inclusive of £106 15s. paid to make 140 $\frac{3}{4}$ acres freehold by legal advice in 1882.

That it was subsequently discovered that the 208 $\frac{3}{4}$ acres was not a "measured portion" within the meaning of the Act, and on payment of the balance of purchase money a grant of the land was issued to the Petitioner.

That it is proved that the land was properly taken up as a selection and that the judgment should have been for the Petitioner; but the discovery was not made in time to set aside the erroneous judgment, and consequently the Petitioner is left without remedy.

That the Petitioner's expenditure and costs in respect of such selections amounted to £2,140 6s. 5d., including £150, being six years' rent owing on the 140 $\frac{3}{4}$ acres but not paid, and £30 at least through absence from home.

Your Committee, in view of the extreme hardship of the case, recommend the claim of Henry Arthur Hough to the most favorable consideration of the Government.

A. H. McCULLOCH, JR.,
Chairman.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

PETITION OF HENRY ARTHUR HOUGH.

WEDNESDAY, 23 JUNE, 1886.

Present:—

MR. CHANTER,
MR. DAY,MR. McCULLOCH,
MR. O'SULLIVAN.

A. H. McCULLOCH, JUN., ESQ., IN THE CHAIR.

Mr. Henry Arthur Hough called in and examined:—

1. *Chairman.*] You presented a petition to the Legislative Assembly on the 14th May last? Yes.
2. You are a selector? Yes, on Tarramiah Run.
3. Who are the owners of that run? Henry Tarleton Whitty and John Charles Whitty—father and son.
4. What land did you select? First of all, on the 20th May, 1875, I selected 320 acres for myself and 320 acres for my three children.
5. There was no difficulty about those selections? Yes; the first difficulty arose in March, 1878, when it was intimated to me by the Government that two of the surveyed lines were wrong, whereby 100 acres on my son Charles's selection encroached on a reserve, No. 296, and my own selection encroached on another reserve, No. 98, to the extent of 52½ acres. At the same time the Lands Department officially informed me that they would rectify the mistake; but in the meantime I received a writ for £2,000 damages from Messrs. Whitty for trespassing on the land I had selected, which was all fenced in and the improvements completed. I placed the matter in the hands of Fleming and Bradley, solicitors, Albury, and the result was they compromised the action without my consent or instructions. That involved me in law costs to the extent of £166, besides other expenses.
6. Were these costs incurred in any way in consequence of the wrong action of the Government? Purely.
7. Now tell us what the action of the Government was? They said the land was surveyed before I took it up, and after I had been living there three years they found it encroached on reserves Nos. 296 and 98, whereby they made me legally but not morally a trespasser.
8. Had the land been surveyed? One portion was surveyed before selection, the other after. Besides the £166 I have mentioned I paid my lawyer £20, and court fees £10; and then I had to come to Sydney, which cost me £15, and I went to Melbourne likewise, which cost me £5; I was also repeatedly in Albury and Corowa on this business, at a cost of £10; and I had to sacrifice my stock and pay interest on money, besides neglecting my business, which I estimate at £150—making the total loss on the first action of £376. Then a second action was immediately entered for £2,000 for trespass on the 52½ acres encroaching on reserve No. 98, and the expense of that action was £150.
9. What is the total amount of loss you estimate that you have sustained? The amounts are particularised in the paper I now hand in. (*See Appendix A 1.*)
10. *Mr. O'Sullivan.*] What is the total amount you claim as compensation for the loss inflicted on you through the maladministration of the Land law? £1,959 5s. 9d. Then we come to the measured portion of 140½ acres, selected on the 15th May, 1879. This was part of a surveyed portion marked and numbered

Mr.
H. A. Hough.
23 June, 1886.

Mr.
H. A. Hough.
23 June, 1886.

- numbered 90, and containing in the whole 208½ acres. Sixty-eight acres were taken up as an original selection, and the Department intimated to me that should I take up the balance of 140½ acres it would save me the expense of a subdivision fee, so I took it up as an additional C.P. Immediately after this Whitty made overtures to rent the land, and I agreed; but the 140 acres being claimed by him as part of a measured portion he refused to pay rent for it, and a clause was inserted in the lease stating that the rent was only to be paid in the event of the land being legally vested in me, which has been done.
11. *Chairman.*] I think you had better give us a copy of that clause, or a copy of the lease? This is the original lease (*produced*), and I will hand in a copy. (*See Appendix A 2.*)
12. Do you swear that all the statements in your petition of the 18th November, 1885, presented to the House on the 14th May, 1886, are absolutely true? I do solemnly.
13. You have recently taken Mr. Darley's opinion on your position in this matter? Yes.
14. You had better hand in the case and opinion? I produce the original, and will hand in a copy. (*See Appendix A 3.*) The only thing to add to make it complete is, that as regards the land mentioned in the lease I am as badly off as ever, although it is freehold, because I cannot get the rent; there is nearly six years' rent owing, and I cannot get one farthing.
15. The whole of the papers connected with this matter of the 140 acres have been printed in return to an order of the Assembly, made on the 18th December, 1883, on the motion of Mr. Lyne? Yes.
16. *Mr. Chanter.*] The 140 acres were made freehold, you say in your petition, on the 5th March, 1883? Yes.
17. You hold the grant? Yes, I hold the grant, but it is of no use to me, as there has been an adverse verdict of the Court, and the land has been used by Whitty for nearly six years, and I cannot recover anything for it, as it is the subject of an adverse verdict, which has never been reversed, through failing to file an application in time. I paid the balance due upon the land; the Government gave me the grant, and now it is no good to me.
18. *Chairman.*] Have you vouchers for all these payments set forth in the paper you have handed in? No, I cannot say I have vouchers.
19. *Mr. O'Sullivan.*] I suppose you are prepared to swear to the truth of these items? Yes; the bulk of them are here in my bank-book.
20. *Mr. Chanter.*] I presume that at the time you entered into the contract to lease the 140 acres to the Whittys you had possession,—and you gave them possession? Yes.
21. And that possession they are now using against your grant? Yes. I may say that I never would have let it to Whitty at all only that my health was very bad, and he threatened to ruin me by law expenses.
22. Have you made any overtures to the Whittys to recover possession? Yes, repeatedly; I have their replies here.

APPENDIX.

Henry A. Hough to Henry T. Whitty, Lease and Memorandum, dated 18th August, 1880.

THIS INDENTURE made the eighteenth day of August in the year of our Lord one thousand eight hundred and eighty between Henry Arthur Hough of Tarramia in the Colony of New South Wales farmer (hereinafter called the lessor) of the one part and Henry Tarleton Whitty of Tarramia aforesaid grazier (hereinafter called the lessee) of the other part witnesseth that in consideration of the rent hereinafter reserved and of the covenants hereinafter contained and on the part of the lessor to be observed and performed He the lessor doth hereby grant demise and lease unto the lessee his executors administrators and assigns all those pieces or parcels of lands and hereditaments described in the Schedule to these presents together with the messuages buildings fences erections and improvements thereon together also with all rights easements and appurtenances belonging thereto to have and to hold the said pieces or parcels of land hereditaments and premises hereby demised or expressed so to be unto the lessee his executors administrators and assigns from the seventeenth day of August instant for the term of seven years thence next ensuing yielding and paying therefore during the said term the yearly rent of two hundred and twenty-seven pounds six shillings and sixpence payable half-yearly at the Bank of New South Wales Corowa on the seventeenth day of February and the seventeenth day of August in every year without any deduction (except in the cases hereinafter mentioned) the first of such half-yearly payments to be made on the seventeenth day of February next and the lessee doth hereby for himself his heirs executors administrators and assigns covenant with the lessor his heirs and assigns That he the lessee his executors administrators and assigns will (except as hereinafter provided) pay the said rent on the days and in manner hereinbefore mentioned Provided always that the lessor duly pays or causes to be paid all interest and instalments due or to become due to the Crown within fourteen days of the days or respective days appointed or to be appointed for payment thereof in respect of the unpaid balance of the purchase money of the lands hereby demised or intended so to be or any part thereof rendered necessary by the "Crown Lands Alienation Act of 1861" or "The Lands Acts Amendments Act of 1875" or "The Lands Acts further Amendment Act of 1880" or the regulations thereunder or any other Act or Acts or regulation or regulations hereafter to come into operation in New South Wales And provided that should the lessee be evicted from or disturbed in the possession of all or any of the lands sixthly seventhly and eighthly described in the said Schedule the said yearly rental shall be reduced by an amount to be computed at the rate of three shillings per acre for each and every acre that the lessee may be so evicted from or disturbed in the possession of such reduction to commence from the date of such eviction or disturbance and the covenant to pay rent hereinbefore contained to be thereby proportionately affected and no right of action for breach thereof to accrue to the lessor his heirs or assigns in any such case And the lessee doth hereby for himself his executors administrators and assigns covenant with the lessor his heirs and assigns that he the lessee will from time to time during the said term keep all houses fences and other improvements on the lands hereby demised in good and sufficient repair (reasonable wear and tear and damage by fire except as to fences or tempest excepted) And that in case any of the fences on the lands hereby demised shall be destroyed by fire he will before the expiration of the said term duly replace and rebuild the same the cost of such replacing and rebuilding to be deducted from the seventh years' rental less half the value of the fences so destroyed at the date of destruction which half value the lessee hereby covenants to pay and will at the expiration or sooner determination of the said term quietly deliver up to the lessor his heirs or assigns possession of the premises hereby demised (save and except such portion or portions thereof as he may be disturbed in the possession of or evicted from) in such good and tenantable repair as aforesaid except as aforesaid Provided always and it is hereby declared that if the said yearly rent hereby reserved or any part thereof respectively (except as hereinbefore provided) shall be in arrear for the space of one calendar month next after any of the said days whereon the same ought respectively to be paid as aforesaid whether the same shall or shall not have been legally demanded or if there shall be any breach of any of the covenants hereinbefore contained and on the part of the lessee his executors administrators and assigns to be observed and performed then and in any of the said cases it shall be lawful for the lessor his heirs or assigns at any time thereafter into and upon the said premises or any part thereof in the name of the whole to re-enter the same to have again repossess and enjoy as in his or their former estate And the lessor doth hereby for himself his heirs executors administrators and assigns covenant with the lessee his executors administrators and assigns that he the lessor his heirs executors administrators or assigns will duly pay all interest or instalments or other moneys due or to become due to the Crown in respect of the unpaid balance of the purchase money of the lands hereby demised rendered necessary by the "Crown Lands Alienation Act of 1861" or the "Lands Acts Amendment Act of 1875" or the "Lands Acts further Amendment Act of 1880" or the regulations thereunder or any Act or Acts or regulation or regulations hereafter to come into operation in New South Wales within fourteen days of the days or respective days appointed or to be appointed for payment thereof and that in default thereof and so often as the same shall occur it shall be lawful for (but not obligatory upon) the lessee to pay all or any of the said interest instalments or other moneys due or to become due to the Crown as aforesaid and that the amount or respective amounts thereof may be deducted from the then next accruing rent and shall be considered as rent received And that the lessee his executors administrators and assigns paying the said yearly rent hereby reserved in manner aforesaid (save as aforesaid) and observing and performing all the covenants hereinbefore contained and on his and their part to be observed and performed shall and may peaceably and quietly possess and enjoy the lands firstly secondly thirdly and fourthly and fifthly described in the said schedule during the said term without any eviction or disturbance by the lessor his heirs or assigns or any person or persons lawfully or equitably claiming by from under or in trust for him them or any of them Provided always and it is hereby agreed and declared that if any dispute or difference shall arise between the lessor his heirs or assigns or any person or persons claiming as aforesaid and the lessee his executors administrators or assigns touching the construction of these presents or as to the eviction of the lessee his executors administrators or assigns from or disturbance in the quiet possession of any of the lands hereby demised or as to the liability of the lessee his executors administrators or assigns to repair or replace the said fences or as to the value thereof if burnt or otherwise as to the rights and liabilities of either party under these presents or in anywise relating thereto such dispute or difference shall be referred to two arbitrators one to be named by each party and in case of their disagreement then to an umpire to be chosen by the arbitrators previously to entering upon the consideration of the matters referred to them and in case of either of the parties neglecting to name an arbitrator for the space of seven days next after a notice so to do shall have been given to him or them by the other party or shall name an arbitrator who shall refuse to act then the arbitrator named by the other party may make a final decision alone And every such arbitration shall be subject to the provisions as to arbitration contained in an Act passed in the session of the Parliament of the said Colony held in the thirty-first year of the reign of Her present Majesty intitled "An Act to make Arbitrations more effectual" except where the same are hereby expressly varied and the submission may be made a rule of the Supreme Court of the said Colony of New South Wales on the application of either party In witness whereof the said parties to these presents have hereunto set their hands and seals the day and year first above written.

The Schedule before referred to—

Firstly—All that piece or parcel of land in the said Colony of New South Wales containing by admeasurement two hundred and sixty-seven acres and two roods (more or less) situate in the county of Denison and parish of Tarramia being the land conditionally purchased by the lessor at Albury now Corowa on the twentieth day of May one thousand eight hundred and seventy-five under the provisions of the thirteenth section of the "Crown Lands Alienation Act of 1861" as three hundred and twenty acres but which was subsequently reduced by the Minister for Lands to the above area on twenty-seventh March one thousand eight hundred and seventy-eight.

Secondly—All that piece or parcel of land containing by admeasurement one hundred and twenty-eight acres (more or less) situate in the Colony county and parish aforesaid being the land conditionally purchased by the lessor at Corowa aforesaid on the sixteenth day of March one thousand eight hundred and seventy-six under the provisions of the twenty-first sections of the said Act.

Thirdly—All that piece or parcel of land containing by admeasurement sixty-four acres (more or less) situate in the Colony county and parish last aforesaid being the land conditionally purchased by the lessor at Corowa aforesaid on the sixth day of April one thousand eight hundred and seventy-six under the provisions of the twenty-first section of the said Act.

Fourthly—All that piece or parcel of land containing by admeasurement one hundred and twenty-eight acres (more or less) situate in the Colony county and parish last aforesaid being the land conditionally purchased by the lessor at Corowa aforesaid on the thirtieth day of March one thousand eight hundred and seventy-six under the provisions of the twenty-first section of the said Act.

Fifthly—

Fifthly—All that piece or parcel of land containing by admeasurement sixty-eight acres (more or less) situate in the Colony county and parish last aforesaid being the land conditionally purchased by the lessor at Corowa aforesaid on the fifth day of September one thousand eight hundred and seventy-eight under the provisions of the thirteenth section of the said Act.

Sixthly—All that piece or parcel of land containing by admeasurement two hundred and twenty acres (more or less) situate in the Colony county and parish last aforesaid being the land conditionally purchased by one Charles Cooper Hough (one of the infant sons of the lessor) at Albury now Corowa aforesaid on the twentieth day of May one thousand eight hundred and seventy-five under the provisions of the thirteenth section of the said Act as three hundred and twenty acres but which was subsequently reduced by the Minister for Lands to the above area on the twenty-seventh day of March one thousand eight hundred and seventy-eight.

Seventhly—All that piece or parcel of land containing by admeasurement three hundred and twenty acres (more or less) situate in the colony county and parish last aforesaid being the land conditionally purchased by one Sarah Ellen Newman Hough (one of the infant daughters of the lessor) at Albury now Corowa aforesaid on the twentieth day of May one thousand eight hundred and seventy-five under the provisions of the thirteenth section of the said Act.

And eighthly—All that piece or parcel of land containing by admeasurement three hundred and twenty acres (more or less) situate in the colony county and parish last aforesaid being the land conditionally purchased by one Annie Emilie Gertrude Hough (one of the infant daughters of the lessor) at Albury now Corowa aforesaid on the twentieth day of May one thousand eight hundred and seventy-five under the provisions of the thirteenth section of the said Act.

Signed sealed and delivered by the said HENRY ARTHUR HOUGH in the presence of H. T. WHITTY.

Signed sealed and delivered by the said HENRY TARLETON WHITTY in the presence of WALTER JHONSON, Solicitor, Corowa.

MEMORANDUM made this eighteenth day of August one thousand eight hundred and eighty between the within-named lessor of the one part and the within-named lessee of the other part whereby it is mutually declared and agreed between the parties hereto that the lands hereinafter described shall (if and when they shall have been duly vested in and legalised to the said lessor by the Government of New South Wales) be held by the said lessee upon the terms and conditions and subject to the covenants of the within lease he the said lessee paying rent therefore at the rate of three shillings per acre as for the lands firstly hereinafter described from the date hereof during the term granted by the within lease and as to the lands secondly and thirdly hereinafter described from the date of such vesting or legalising during the residue of such term and such rent or arrears of rent for the lands firstly described to be paid on the half-yearly days next succeeding the time of such vesting or legalising and as to the lands secondly and thirdly described as from the time of such vesting or legalising on the then next succeeding half-yearly days as aforesaid. Firstly—All that piece or parcel of land containing by admeasurement one hundred and forty acres three roods (more or less) being the land conditionally purchased by the said lessor at Corowa 15th May 1879 under the twenty-first section of the "Crown Lands Alienation Act of 1861." Secondly—All that piece or parcel of land containing by admeasurement fifty two acres two roods (more or less) being the reduction referred to in the first description in the within schedule. Thirdly—All that piece or parcel of land containing by admeasurement one hundred acres (more or less) being the reduction referred to in the sixth description in the within schedule.

In witness whereof the said parties hereto have hereunto set their hands and seals the day and year first hereinbefore written.

HENRY ARTHUR HOUGH.
H. T. WHITTY.

Signed sealed and delivered by both parties in the presence of—
WALTER JHONSON Solicitor Corowa.

A 3.

Re Hough and Whitty.

Counsel's opinion *re* the 140½ acres.

On the 5th September, 1878, H. A. Hough selected 68 acres of Crown Lands on Tarramiah Run, being portion of a surveyed lot containing 208½ acres. On 26th April, 1879, Hough was informed by Department of Lands (A. O. Moriarty) that the 68 acres applied for by him was portion of measured portion "90," containing 208½ acres, and that if the balance of 140½ acres was taken up by Hough no subdivision fee would be necessary. In accordance with this advice Hough took up the balance of 140½ acres on the 15th May, 1879. The 68 acres contained no improvements, the 140½ acres contained some improvements. Meantime, on 18th August, 1880, Hough leased the 68 acres, and his other lands adjoining, to Whitty, and a lease was prepared costing Hough £6 6s. However as Whitty objected to pay rent for the 140½ acres, as containing improvements sufficient to bar selection, a special clause was endorsed on lease referring to this and other lands of Hough's which had been wrongly surveyed, providing that no rent was to be paid on the 140½ acres in question until said 140½ acres was legally vested in Hough. A Court of Appraisement was held and subsequently Hough was informed by circular letter from Lands Office on 22nd May, 1882, that the selection would be allowed to hold good to Hough, adding a proviso that it was at Hough's risk should any proceedings be taken against him by Whitty as to improvements on measured portions. No proceedings were taken by Whitty. On being applied to Whitty failed to pay rent, taking no notice of the demand. Hough would have distrained but his then solicitor, Mr. Nagle, of Albury, advised against it, saying there was a question of title. Nor would he sue in the District Court but he issued a writ in the Supreme Court against Whitty. Hough was dissatisfied with his adviser on account of vexatious and unnecessary delays, and transferred the matter to Mr. Burcher. Hough was compelled to pay Mr. Nagle's cost, amounting to £78, and he did so under protest by p. n. at two months date in order to get his papers, lease, &c., withheld by Nagle. * After great delay the case was tried in Sydney in June, 1884, when a verdict by consent was entered for Hough on his title and lease. The amount of verdict was £100; of this £42 only was for rent, the remainder being, as Hough supposed, damages for non-payment of rent at the specified time. A point of law was however reserved for argument before the Full Court as to the improvements, they being over £40 and land said to be and always spoken of as measured portion 90. On August 12, 1884, the Full Court met and Mr. Pilcher appeared for Mr. Hough, instructed by Mr. Burcher, who had all papers in connection with the case, showing that the land was not a legally measured portion, but the attention of the Court was not directed to these papers; consequently the former verdict was reversed and the 140½ acres and the 68 acres were declared void. Whitty had paid rent on the latter portion regularly. This trial entailed an expenditure by Hough of £320 11s. and £235 odd for costs. Hough wrote to the Minister at once; after waiting a few days for a reply the Minister for Lands wrote, saying that Full Court had given a wrong decision. The land not being a measured portion and the survey not having received Surveyor-General's signature till long after Hough's selection, and that if Hough paid up the balance of purchase money on the 68 acres (the 140½ having been already paid for) he would issue a Crown Grant to him for the whole block. Hough replied, asking the Minister to get the judgment reversed. He then came to Sydney and procured the grant not in time however to appeal. This law-suit cost Hough nearly £1,000, including costs, travelling expenses, and other incidental expenditure. Whitty has always paid rent for the 68 acres but not one penny for the 140½ acres. Hough sued him in the District Court and was non-suited with costs† through an error in the summons, and on a second occasion Judge Forbes said that he had no jurisdiction as the lease provided that the dispute must be settled by arbitration. Hough declined to submit to arbitration and has letters from Whitty admitting that this course is unnecessary. Hough is unable to obtain payment of rent. Whitty is still in possession. The Crown Grant is dated November 27, 1884. Counsel will please advise: 1st. Is Hough now in a position to sue Whitty for rent, interest, and damages? 2nd. Can he distrain for rent? 3rd. Can he succeed in an action against Whitty for damages for breach of covenants in lease *i.e.* non-payment of rent from the date of Whitty's first entry whereby all these losses have been occasioned?

Mr. Darley's Opinion.

I AM of opinion that Mr. Hough is now in a position to sue Whitty for the rent in respect of the 140½ acres reserved by the endorsement upon the lease, and is entitled to recover for all rent due since the 27th Nov., 1884. I fear that the decision of the Court of Hough-Whitty prevents Mr. Hough from recovering any rent previous to that date, but now that it has been discovered

* Mr. Darley says not all. This is a misapprehension. The amount of the verdict was £42 6s. See 5, Supreme Court Reports, 271.

† Summons and service.

discovered that the decision was based upon an error in the facts, and as Mr. Hough has obtained a Crown grant, I think he is in a position to say that the lands have been duly vested and legalized in him and may therefore proceed for the rent. I am further of opinion that Mr. Hough is not precluded from suing consequent upon the arbitration clause. Such a clause does not oust the jurisdiction of the Court (See *Scott v. Avery*, 5 H.L., Cas., 811). I also think that Mr. Hough may distrain for the rent due but this is a course which I do not advise. It is far better for Mr. Hough to be plaintiff in an action to recover the rent than to be a defendant in an action for trespass. It is also open to Hough to bring an action of ejectment upon the right to re-enter for breach of covenants contained in the lease but this course again I do not advise. In the action Mr. Hough will be entitled to recover the rent due from the date of the grant and interest thereon but nothing more; he cannot in any action recover damages for the great and serious loss he has sustained. The persons to blame for this loss are the Government officials, and this should weigh much in any application he may make for reimbursement, but he has no redress at law.

Wentworth Court, 25 May, 1886.

FREDK. M. DARLEY.

Ex parte Hough.

In re Whitty—In re Government.

COUNSEL will please refer to the report of the case of *Hough v. Whitty*, N.S.W. Law Reports, vol. v., part iii, page 269. It will be observed that the decision in that case rested entirely on the point* that the land selected was part of a measured portion. The information that it was a measured portion† was supplied by the Land Office on several occasions in a formal and official manner. As a matter of fact it now turns out that the 208½ acres was not a measured portion within the meaning of the Land Act then in force as it had not been approved of by the Minister unless the recognition of the measurement by his Department and the official numbering of it could be construed into an approval of it. The Lands Department have treated the selection as perfectly good and have now accepted the balance of the purchase money, and issued a grant of the whole 208½ acres to Hough, who is now in the peculiar position of having a decision of the Supreme Court declaring his selection void, and of having been thereby deprived of rent for his property, and he has been put to enormous expense in litigation which has nearly ruined him, while he has now a Crown grant of the land issued to him, which is it is contended an unquestionable certificate that the land has been his for five years previously to the issue of the grant. The decision of the Court rests solely on the point that the land in question was a measured portion, and it is now discovered that such was not the case. The information was conveyed to the Court by Whitty, and on that information that decision was obtained. Hough could not contradict it as the Lands Department informed him that Whitty's statement was correct, and it was not until long after the time for appealing against the decision of the Court had elapsed, even if what would really be fresh evidence could be given under that proceeding, that it was discovered that Whitty's representation was incorrect.

Counsel will please advise as to Mr. Hough's position. Can he now take any proceedings to obtain a reversal of the decision of the Court? Can he take any proceedings against Whitty at Law or in Equity to obtain from him damages or retribution for the injury he has sustained in consequence of Whitty's misrepresentation, wilful or otherwise, of the facts of the case? Can he recover from the Government compensation for his injuries which were occasioned by the wrong information supplied by its officers.

Mr. Darley's Opinion.

I HAVE read carefully the case of *Hough v. Whitty*, 5 N.S.W. L.R., 269, and think that upon the facts before the Court the decision could not have been otherwise. It now appears that the Court was misled in supposing this land to have been a measured portion. So far as the case of *Hough v. Whitty* is concerned I see no means of re-opening it, nor can any action be brought against Mr. Whitty that I am aware of for making the representations he did. If he innocently misled the Court he is not liable, and if on the other hand he stated the land to be a measured portion, knowing at the time such statement to be false, then he is liable to be indicted for perjury. But this can scarcely be the case. There can be no doubt but that Whitty has been himself misled. It must however be borne in mind that under the 39 Vic. No. 13, sec. 13, it is not the Minister who approves of measured portions, but such portions are not considered to be measured until the plan of measurement shall have been approved of by the Surveyor-General, the evidence of which is either the signature of the Surveyor-General upon the plan, or the signature of some officer deputed by him to sign the plan. This is what must be looked to. If the plan of the measurement of this 208½ acres bears the signature of the Surveyor-General, or the signature of some officer of his Department deputed by him to sign plan, then it was a measured portion, otherwise not.

The decision of the Court in *Hough v. Whitty* will not however affect the right of Mr. Hough to hold this land if the land was not a measured portion. In fact that decision will not prevent his bringing an action of ejectment to recover the land from any person occupying it hostilely to him, or if he be in possession he may maintain trespass against any person even though it be Mr. Whitty who enters upon his possession.

It may be that if Mr. Hough can establish that he has suffered so much injustice and has been put to so great an expense, consequent upon a mistake of the officer of the Lands Department, that Parliament upon being petitioned may grant relief by placing a sum of money upon the Estimates. I am unable to see in what other way relief can be obtained.

Wentworth Court, 28 May, 1885.

FREDK. M. DARLEY.

* That is so.

† The measured portion does not require the approval of the Minister. The plan of measurement requires the approval of the Surveyor-General.

1885-6.

CLAIM OF CHARLES STEVENS.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 21st May, 1886,—“*with power to send for persons and papers, to inquire into and report upon the matter of a claim made by Charles Stevens, and arising out of the action Pearson v. Stevens, tried in the Supreme Court, and to whom was referred on the same day the Report from the Select Committee of Session 1883-4 in reference to the said Claim,*”—have agreed to the following Report:—

1. Your Committee having carefully considered the Report referred to them, find as follows:—

- (1.) That on the 26th October, 1880, Charles Stevens, junior, a minor, selected two blocks of land, Nos. 76 and 100, containing 640 acres, on the Wonjagong Run, near Forbes, such blocks having been gazetted for thirty-one days previously as open for selection.
- (2.) That Charles Edmund Pearson, the lessee of the said run, had previously held these blocks by virtue of purchase at a Sheriff's sale, without residence.
- (3.) That the said Charles Edmund Pearson entered an action against Charles Stevens, junior, and Charles Stevens, senior, for trespass upon the said land.
- (4.) That the result of the trial was that the forfeiture of the land by the Crown was upheld, and the right claimed by the lessee of the run to hold land by virtue of purchase at a Sheriff's sale, without residence, was declared null and void.
- (5.) That the said Charles Stevens, senior, in defending his son's title to the said conditional purchase, virtually settled, on behalf of the Crown, a most important point in the administration of the Land Law, and incurred an expense in so doing of £624 2s. 11d.

2. Your Committee, therefore, in view of the extreme hardship of the case, recommend the claim of Charles Stevens to the most favourable consideration of the Government.

R. M. VAUGHN,
Chairman.

No. 3 Committee Room,
Sydney, 6th August, 1886.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 17 JUNE, 1886.

MEMBERS PRESENT:—

Mr. Vaughn, | Mr. Day.

In the absence of a quorum, the meeting called for this day lapsed.

FRIDAY, 6 AUGUST, 1886.

MEMBERS PRESENT:—

Mr. Vaughn, | Mr. Barbour,
Mr. Stokes.

Mr. Vaughn called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, and referring Report from Select Committee of Session 1883-4, read by the Clerk.

Committee deliberated.

Printed copies of the Report before the Committee.

Motion made (*Mr. Barbour*), and question,—That the Report brought up by a former Committee, and dated 23rd April, 1884, be the Report of this Committee,—put and passed.

Chairman to report to the House.

MR. E. H. BARTON'S CONDITIONAL PURCHASE, COUNTY OF
NARRAMINE, PARISH OF TRANGIE.

(PETITION FROM JOHN CAMPBELL IN REFERENCE TO.)

Received by the Legislative Assembly, 23 September, 1886.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of John Campbell, of Trangie, near Dubbo, in the Colony of New South Wales, conditional purchaser,—

SHOWETH:—

That on the 21st December, 1882, Edward Hugh Barton, a licensed surveyor, conditionally purchased at Dubbo, 320 acres of Crown Lands, in the county of Narramine, and parish of Trangie, under the 13th section of the "Crown Lands Alienation Act of 1861."

2. That previous to the 12th June, 1883, the Honorable James Squire Farnell, the then Minister for Lands, required the said Edward Hugh Barton (he being a licensed surveyor) to consent to have his said conditional purchase declared void, which consent the said Edward Hugh Barton gave by letter to the Department of Lands on or previous to the date next hereinafter mentioned, and thereupon received a voucher for the refund of his deposit.

3. That on or before the 14th June, 1883, the said conditional purchase of the said Edward Hugh Barton was duly declared void by the Department of Lands, in pursuance of the direction of the Minister above referred to, and such voidance was duly communicated by letter from the head office of the Department, in Sydney, to the Crown Lands Office at Dubbo, by letter dated the 22nd June, 1883, and such voidance was, on the receipt of such letter, duly noted by the Crown Lands Agent at Dubbo, in the books of the Department there. That this is the only voidance of the said conditional purchase of the said Edward Hugh Barton contained in the books at Dubbo.

4. That on Thursday, the 28th June, 1883, your Petitioner attended at the Crown Lands Office at Dubbo, and on enquiry was informed by the Crown Lands Agent there that the said conditional purchase of the said Edward Hugh Barton had been duly declared void and was open to selection. And that your Petitioner thereupon, on the said 28th June, 1883, lodged an application at the Crown Lands Office at Dubbo aforesaid, for the said 320 acres as an additional conditional purchase, adjoining his original conditional purchase, under the Crown Lands Acts then in force, and paid the deposit of £80.

5. That your Petitioner has always resided upon and improved his original conditional purchase as by law required, and has made improvements on his said additional conditional purchase of 320 acres, to the value of about £1,400. And that your Petitioner has leased on building leases for terms of years several portions of his said additional conditional purchase of 320 acres.

6. That some considerable time after your Petitioner made his application for the said 320 acres, the Honorable James Squire Farnell, the then Minister for Lands, declared his your Petitioner's application void, on the alleged ground that it was made during the legal existence of the said Edward Hugh Barton's said conditional purchase; whereas, in fact, the said Edward Hugh Barton's said conditional purchase was declared void on or before the 14th June, 1883, and such voidance was communicated to the office in Dubbo, on the 22nd June, 1883, and your Petitioner did not make his application until the 28th June, 1883.

7. That since the 28th June, 1883, your Petitioner has always had and now has possession of the said 320 acres, either in person or by his tenants.

8. That by notice in the Government Gazette some considerable time after your Petitioner made his application, the said 320 acres was declared a village reserve, and has, notwithstanding the protestation of your Petitioner, been divided into allotments, some of which, containing your Petitioner's improvements, have been advertised for sale by auction on the 24th September instant.

9. That if it be contended, as it has been, that your Petitioner's application for the 320 acres is void because under the law the Honorable the Minister for Lands had no power or authority to declare the conditional purchase of the said Edward Hugh Barton void, even with his consent, then the said conditional purchase of the said Edward Hugh Barton is still in existence, as it has never been legally forfeited by the mode prescribed in the Crown Lands Acts, and the proclamation of the said lands as a village reserve is therefore void, and the sale advertised for the 24th September instant, consequently illegal.

10.

10. That the Honorable the Minister for Lands refuses to recognize the claim of your Petitioner to the said 320 acres of land, or to compensation for the loss of it and value of the improvements which he has made or caused to be effected.

11. That through the action of the Department of Lands in declaring the said conditional purchase of the said Edward Hugh Barton void, your Petitioner was induced to make application for the said 320 acres, and to hold and improve same as above mentioned.

12. That your Petitioner humbly prays that your Honorable House will take into its favourable consideration the above circumstances, and will afford him such relief as the merits of the case seem to warrant.

And your Petitioner, as in duty bound, will ever pray, &c.

Trangie, 16th September, 1886.

JOHN CAMPBELL.

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACT.

(REVENUE UNDER, FROM 1 JANUARY, 1885, TO 31 MAY, 1886.)

Ordered by the Legislative Assembly to be printed, 22 June, 1886.

RETURN (in part) to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 28th May, 1886, That there be laid upon the Table of this House, a Return showing,—

- “(1.) The amount of revenue derived under the ‘Crown Lands Act of 1884,’ from the time of its coming into operation up to the present date.
“(2.) The cost of administering the said Act during the same period.”

(Mr. Wisdom.)

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

MEMORANDUM BY THE UNDER SECRETARY FOR LANDS IN REFERENCE TO RETURN OF REVENUE AND EXPENDITURE, UNDER.

Ordered by the Legislative Assembly to be printed, 16 July, 1886.

MEMORANDUM by the Under Secretary for Lands in reference to Return of Revenue and Expenditure under the "Crown Lands Act of 1884," moved for by Mr. Abigail, and ordered to be laid upon the Table of the Legislative Assembly.

I HAVE to report, for the information of the Minister, that the books of the Treasury are not kept in Land Board Districts, and it will be therefore impossible, without special compilation, to give the information as to revenue in the form asked for by Mr. Abigail.

With respect to expenditure it has already been stated (*vide* answer to question No. 11 of 16 June, 1886), that the expenditure cannot be stated as the business is being conducted concurrently with that remaining under the repealed Acts and by the same staff.

A return was prepared in response to a motion by Mr. Wisdom, showing the revenue, and laid upon the Table of the House on the 22nd ultimo; perhaps a similar return would answer the purposes of Mr. Abigail; if not it will be necessary for the Treasury to distribute the amounts collected, so as to show it according to Land Board Districts. This will be a very considerable undertaking and will occupy some length of time in preparation. It will necessitate a scrutiny of the Conditional Purchase Registers to ascertain the payments made upon selections under the repealed Acts and which have been brought under the provisions of the present law as regards payment, and though only a small portion of the information sought it will engage the attention of several officers for a long time.

Again, the rents of pastoral leases and occupation licenses will need to be allotted to the Land Board Districts. To ascertain this it will be necessary to prepare a large return in itself, and it could only be furnished by this office at considerable expense and delay to current business.

C.O.,
1/7/86.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(REGULATIONS FOR THE GOVERNMENT DOMAINS, BOTANIC GARDENS, AND GARDEN PALACE GROUNDS.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 145.

Colonial Secretary's Office, Sydney, 23 October, 1885.

Hrs Excellency the Governor, with the advice of the Executive Council, has been pleased, under the 106th section of the Crown Lands Act of 1884, to make the following Regulations for the Government Domains, Botanic Gardens, and Garden Palace Grounds.

P. A. JENNINGS.

GOVERNMENT DOMAINS.

REGULATIONS.

1. No person shall climb any of the trees, or climb or jump over the seats or fences, or shall stand or lie on any of the seats therein.
 2. No person shall cut or deface any of the trees, shrubs, plants, seats, gates, posts, or fences, or write thereon, or shall affix any bill or stencil mark to any tree, seat, gate, post, fence, wall, pillar, or to any building or other erection, or on any pavement or footway therein.
 3. No person shall walk on the grass-edging bordering any path therein.
 4. No person shall ride or drive within the Domains except on the roads laid out therein.
 5. No cart or waggon used for heavy loading shall be allowed within the Domains unless by permission of the Director.
 6. No person, unless authorized by the Director, shall offer or expose any article for sale therein.
 7. No person shall engage in or train for any race or game, or throw any stone or other missile, or deposit therein any bottle, broken glass, fruit-skins, bones, paper, cast-off clothing, or litter of any kind; and no person shall light fires therein or annoy visitors.
 8. No person in a state of intoxication or of reputed bad character shall enter or remain within the Domains; and no person shall behave in a disorderly or offensive manner, or use any bad language, or commit any act of indecency therein.
 9. No person shall depasture any horses, cattle, sheep, or stock of any kind in the Domains without proper authority.
 10. All goats or poultry found therein may be destroyed by any employé or police constable.
 11. No performance or entertainment of any kind shall be permitted in the Domains, nor shall any charge be made for admission to the Domains, or money be collected at the gates or elsewhere therein, without the authority of the Colonial Secretary.
 12. No person, in addressing a public meeting or assemblage of persons in the Domains for any purpose, shall be permitted to do so in violent or unseemly language, calculated to inflame the minds of the hearers or cause a breach of the peace; and if, in the opinion of the Director, such is being done, he may order the removal of the person so offending from the Domains.
 13. Every person offending against these Regulations shall be liable to a fine of ten pounds or not less than five shillings, and may be forthwith removed from the Domains.
- The employés and police on duty in the Domains are enjoined to enforce the foregoing Regulations, and visitors are requested to bring under the notice of the Director any breach of the same coming under their observation.

BOTANIC GARDENS AND GARDEN PALACE GROUNDS.

REGULATIONS.

1. No person in a state of intoxication, or of reputed bad character, or who is not cleanly and decently dressed, shall enter or remain within these Gardens; and no person shall behave in an improper or offensive manner, or use bad language, or commit any act of indecency therein.
2. No children under twelve years of age shall be allowed within these Gardens unless accompanied by some adult, whom they shall not leave while therein.

3. No person shall engage in any race or game therein, or throw any stone or other missile, or deposit therein any bottle, broken glass, fruit-skins, bones, paper, cast-off clothing, or litter of any kind; and no person shall light fires therein, or smoke, or annoy visitors, or carry any flowers into these Gardens.

4. No person shall climb any of the trees or shrubs therein, or climb or jump over the seats or fences, or shall stand or lie on any of the seats, or lie on the grass near to any of the walks therein.

5. No person shall bring any dog into these Gardens; any dog found therein without an owner shall be forthwith expelled. All goats or poultry found therein may be destroyed by any employé or police constable.

6. No person, unless authorized by the Director, shall offer or expose any article for sale therein.

7. No person shall walk on the grass-edging bordering any path therein.

8. No person shall cut or deface any of the statuary, trees, shrubs, plants, seats, gates, posts, or fences, or write thereon, or shall affix any bill or stencil mark to any tree, seat, gate, post, fence, wall, pillar, or railing therein.

9. No person shall take or injure any of the plants, flowers, or fruit therein; or shall interfere with the trees, shrubs, flowers, vases, labels, fountains, fish, birds, animals, or other property therein.

10. No public meeting of any kind, or assemblage of persons together to the number of twenty or more, for any purpose, shall be allowed: Provided always that this regulation shall not extend to any meeting or assemblage notified by authority, or which shall be holden for any purpose by the written permission of the Colonial Secretary.

11. Every person offending against any of these Regulations shall be liable to a fine of twenty pounds or not less than ten shillings, and may be forthwith removed from the Gardens.

12. The Botanic Gardens shall be open from 6.30 o'clock a.m. until 7 o'clock p.m. daily in summer; and from 7 o'clock a.m. until 5 o'clock p.m. in winter. Any person found in the Gardens during unauthorized hours shall be liable to a fine of one pound or not less than five shillings, and shall be forthwith removed therefrom.

The employés and police on duty in the Gardens are enjoined to enforce the foregoing Regulations, and visitors are requested to bring under the notice of the Director any breach of the same coming under their observation.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATION—DOMAINS AND PUBLIC GARDENS.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 145.

Colonial Secretary's Office, Sydney, 10 December, 1885.

REFERRING to the Notice published in a Supplementary Government Gazette of the 23rd October last, His Excellency the Governor, with the advice of the Executive Council, has been pleased to make the following amended Regulation, relating to the Botanic Gardens and Garden Palace Grounds.

P. A. JENNINGS.

BOTANIC GARDENS AND GARDEN PALACE GROUNDS.

REGULATIONS.

7. No person shall walk on the grass-edging bordering any path, or on the embankment therein.
-

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATIONS FOR THE GOVERNMENT DOMAINS, BOTANIC GARDENS, AND GARDEN PALACE GROUNDS.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 145.

Colonial Secretary's Office,
Sydney, 8th February, 1886.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased, under the 106th section of the Crown Lands Act of 1884, to make the following Amended Regulations for the Government Domains, Botanic Gardens, and Garden Palace Grounds.

JOHN ROBERTSON.

GOVERNMENT DOMAINS.

REGULATIONS.

1. No person shall climb any of the trees, or climb or jump over the seats or fences, or shall lie on any of the seats therein.
2. No person shall cut, break, or deface any of the trees, shrubs, plants, seats, gates, posts, or fences, or write thereon, or shall affix any bill or stencil mark to any tree, seat, gate, post, fence, wall, pillar, or to any building or other erection, or on any pavement or footway therein.
3. No person shall walk on the grass-edging bordering any path therein.
4. No person shall ride or drive within the Domains except on the roads laid out therein.
5. No cart or waggon used for heavy loading shall be allowed within the Domains unless by permission of the Director.
6. No person, unless authorised by the Director shall offer or expose any article for sale therein.
7. No person shall engage in or train for any race or game, or throw any stone or other missile, or deposit therein any bottle, broken glass, fruit skins, bones, paper, cast-off clothing, or litter of any kind; and no person shall light fires therein or annoy visitors.
8. No person in a state of intoxication or of reputed bad character, shall enter or remain within the Domains; and no person shall behave in a disorderly or offensive manner, or use any bad language, or commit any act of indecency therein.
9. No person shall depasture any horses, cattle, sheep, or stock of any kind in the Domains without proper authority.
10. All goats or poultry found therein may be destroyed by any employé or police constable.
11. No performance or entertainment of any kind shall be permitted in the Domains, nor shall any charge be made for admission to the Domains, or money be collected at the gates or elsewhere therein without the authority of the Colonial Secretary.
12. No person, in addressing a public meeting or assemblage of persons in the Domains for any purpose, shall be permitted to do so in a violent or unseemly language, calculated to inflame the minds of the hearers or cause a breach of the peace, and if in the opinion of the Director or his appointee such is being done, he may order the removal of the person so offending from the Domains.

13. Every person offending against these Regulations shall be liable to a fine of ten pounds or not less than five shillings, and may be forthwith removed from the Domains.

The employés and police on duty in the Domains are enjoined to enforce the foregoing Regulations, and visitors are requested to bring under the notice of the Director any breach of the same coming under their observation.

BOTANIC GARDENS AND GARDEN PALACE GROUNDS.

REGULATIONS.

1. No person in a state of intoxication, or of reputed bad character, or who is not cleanly and decently dressed shall enter or remain within these Gardens; and no person shall behave in an improper or offensive manner, or use bad language, or commit any act of indecency therein.
2. No children under twelve years of age shall be allowed within these gardens unless accompanied by some adult, whom they shall not leave while therein.
3. No person shall engage in any race or game therein, or throw any stone or other missile, or deposit therein any bottle, broken glass, fruit skins, bones, paper, cast-off clothing, or litter of any kind; and no person shall light fires therein, or smoke, or annoy visitors, or carry any flowers into these gardens.
4. No persons shall climb any of the trees or shrubs therein, or climb or jump over the seats or fences, or shall stand or lie on any of the seats, or lie on the grass near to any of the walks therein.
5. No person shall bring any dog into these gardens,—any dog found therein without an owner shall be forthwith expelled. All goats or poultry found therein may be destroyed by any employé or police constable.
6. No person, unless authorised by the Director, shall offer or expose any article for sale therein.
7. No person shall walk on the grass-edging bordering any path, or on the embankments therein.
8. No person shall cut or deface any of the statuary, trees, shrubs, plants, seats, gates, posts, or fences, or write thereon, or shall affix any bill or stencil mark to any tree, seat, gate, post, fence, wall, pillar, or railing therein.

9. No person shall take or injure any of the plants, flowers, or fruit therein; or shall interfere with the trees, shrubs, flowers, vases, labels, fountains, fish, birds, animals, or other property therein.

10. No public meeting of any kind, or assemblage of persons together to the number of twenty or more, for any purpose, shall be allowed: Provided always that this Regulation shall not extend to any meeting or assemblage notified by authority, or which shall be holden for any purpose by the written permission of the Colonial Secretary.

11. Every person offending against any of these Regulations shall be liable to a fine of twenty pounds or not less than ten shillings, and may be forthwith removed from the gardens.

12. The Botanic Gardens shall be open from 6.30 o'clock a.m. until 7 o'clock p.m. daily in summer; and from 7 o'clock a.m. until 5 o'clock p.m. in winter. Any person found in the gardens during unauthorised hours shall be liable to a fine of one pound or not less than five shillings, and shall be forthwith removed therefrom.

The employes and police on duty in the gardens are enjoined to enforce the foregoing Regulations, but this must only be done through the Director or in his absence his appointee, and visitors are requested to bring under the notice of the Director or in his absence his appointee, any breach of the same coming under their observation.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATIONS FOR THE GOVERNMENT DOMAINS, BOTANIC GARDENS, AND GARDEN PALACE GROUNDS.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 145.

Colonial Secretary's Office,
Sydney, 7th April, 1886.

His Excellency the Governor, with the advice of the Executive Council, has been pleased, under the 106th section of the Crown Lands Act of 1884, to make the following Amended Regulations for the Government Domains, Botanic Gardens, and Garden Palace Grounds.

JOHN ROBERTSON.

GOVERNMENT DOMAINS.

REGULATIONS.

1. No person shall climb any of the trees, or climb or jump over the seats or fences, or shall lie on any of the seats therein.
2. No person shall cut, break, or deface any of the trees, shrubs, plants, seats, gates, posts, or fences, or write thereon, or shall affix any bill or stencil mark to any tree, seat, gate, post, fence, wall, pillar, or to any building or other erection, or on any pavement or footway therein.
3. No person shall walk on the grass-edging bordering any path therein.
4. No person shall ride or drive within the Domains except on the roads laid out therein.
5. No cart or waggon used for heavy loading shall be allowed within the Domains unless by permission of the Director.
6. No person, unless authorised by the Director shall offer or expose any article for sale therein.
7. No person shall engage in or train for any race or game, or throw any stone or other missile, or deposit therein any bottle, broken glass, fruit skins, bones, paper, cast-off clothing, or litter of any kind; and no person shall light fires therein or annoy visitors.
8. No person in a state of intoxication or of reputed bad character, shall enter or remain within the Domains; and no person shall behave in a disorderly or offensive manner, or use any bad language, or commit any act of indecency therein.
9. No person shall depasture any horses, cattle, sheep, or stock of any kind in the Domains without proper authority.
10. All goats or poultry found therein may be destroyed by any employé or police constable.
11. No performance or entertainment of any kind shall be permitted in the Domains, nor shall any charge be made for admission to the Domains, or money be collected at the gates or elsewhere therein without the authority of the Colonial Secretary.
12. No person, in addressing a public meeting or assemblage of persons in the Domains for any purpose, shall be permitted to do so in a violent or unseemly language, calculated to inflame

the minds of the hearers or cause a breach of the peace, and if in the opinion of the Director or his appointee such is being done, he may order the removal of the person so offending from the Domains.

13. Every person offending against these Regulations shall be liable to a fine of ten pounds or not less than five shillings, and may be forthwith removed from the Domains.

The employés and police on duty in the Domains are enjoined to enforce the foregoing Regulations, but this must only be done through the Director, or in his absence his appointee, and visitors are requested to bring under the notice of the Director, or in his absence his appointee, any breach of the same coming under their observation.

BOTANIC GARDENS AND GARDEN PALACE GROUNDS.

REGULATIONS.

1. No person in a state of intoxication, or of reputed bad character, or who is not cleanly and decently dressed shall enter or remain within these Gardens; and no person shall behave in an improper or offensive manner, or use bad language, or commit any act of indecency therein.
2. No children under twelve years of age shall be allowed within these gardens unless accompanied by some adult, whom they shall not leave while therein.
3. No person shall engage in any race or game therein, or throw any stone or other missile, or deposit therein any bottle, broken glass, fruit skins, bones, paper, cast-off clothing, or litter of any kind; and no person shall light fires therein, or smoke, or annoy visitors, or carry any flowers into these gardens.
4. No persons shall climb any of the trees or shrubs therein, or climb or jump over the seats or fences, or shall stand or lie on any of the seats, or lie on the grass near to any of the walks therein.
5. No person shall bring any dog into these gardens,—any dog found therein without an owner shall be forthwith expelled. All goats or poultry found therein may be destroyed by any employé or police constable.
6. No person, unless authorised by the Director, shall offer or expose any article for sale therein.
7. No person shall walk on the grass-edging bordering any path, or on the embankments therein.

8. No person shall cut or deface any of the statuary, trees, shrubs, plants, seats, gates, posts, or fences, or write thereon, or shall affix any bill or stencil mark to any tree, seat, gate, post, fence, wall, pillar, or railing therein.

9. No person shall take or injure any of the plants, flowers, or fruit therein; or shall interfere with the trees, shrubs, flowers, vases, labels, fountains, fish, birds, animals, or other property therein.

10. No public meeting of any kind, or assemblage of persons together to the number of twenty or more, for any purpose, shall be allowed: Provided always that this Regulation shall not extend to any meeting or assemblage notified by authority, or which shall be holden for any purpose by the written permission of the Colonial Secretary.

11. Every person offending against any of these Regulations shall be liable to a fine of twenty pounds or not less than ten shillings, and may be forthwith removed from the gardens.

12. The Botanic Gardens shall be open from 6 o'clock a.m. until 7 o'clock p.m. daily in summer; and from 7 o'clock a.m. until 5 o'clock p.m. in winter. Any person found in the gardens during unauthorised hours shall be liable to a fine of one pound or not less than five shillings, and shall be forthwith removed therefrom.

The employes and police on duty in the gardens are enjoined to enforce the foregoing Regulations, but this must only be done through the Director or in his absence his appointee, and visitors are requested to bring under the notice of the Director or in his absence his appointee, any breach of the same coming under their observation.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.
(AMENDED REGULATION UNDER.)

Ordered by the Legislative Assembly to be printed, 3 December, 1885.

Department of Lands, Sydney, 20 November, 1885.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulation 28, under the "Crown Lands Act of 1884" published on 2nd January last, being amended as hereunder.

JOSEPH P. ABBOTT.

28. Every application for a conditional purchase (except as mentioned in the next Regulation) must be tendered by the applicant in person, together with the required deposit and declaration, to the Land Agent of the District, on any day notified in the Gazette as a Land Office Day for that purpose, not being a public holiday, during the hours specified in Regulation 12. Not more than one application for an original conditional purchase shall be made on the same day by the same applicant: Provided however, that nothing herein shall prevent any person whose application shall have been rejected after determination by lot as prescribed by Regulation No. 31 from making another application during lawful hours on the same day, or shall limit the number of applications to be made by the same applicant on the same day, for additional conditional purchases: Provided the area applied for, together with the original and any prior additional conditional purchases, held in virtue of such original purchase, shall not exceed the limit allowed by law.

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(FURTHER AMENDMENT OF REGULATION NO. 28 UNDER.)

Ordered by the Legislative Assembly to be printed, 25 March, 1886.

Department of Lands, Sydney, 18th February, 1886.
It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulation 28, under the Crown Lands Act of 1884, published on 2nd January, 1885, and an amendment of which was published in the Government Gazette of 20th November, 1885, being further amended as hereunder.
[Ml. 86-1,267]

GERALD SPRING.

REGULATION NO. 28.

Every application for a conditional purchase (except as mentioned in the next Regulation) must be tendered by the applicant in person, together with the required deposit and declaration, to the Land Agent of the District, on any day notified in the Gazette as a Land Office Day for that purpose, not being a public holiday, during the hours specified in Regulation 12. Not more than one application for an original conditional purchase shall be made on the same day by the same applicant: Provided, however, that nothing herein shall prevent any person whose application shall have been rejected after determination by lot, as prescribed by Regulation No. 31, from making another application during lawful hours on the same day, or shall limit the number of applications to be made by the same applicant on the same day for additional conditional purchases; but not more than one application may be tendered in virtue of the same conditional purchase or series of conditional purchases until the first application is disposed of: Provided the area applied for, together with the original and any prior additional conditional purchases held in virtue of such original purchase, shall not exceed the limit allowed by law.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATION, No. 32.)

Presented to Parliament by Command.

Department of Lands, Sydney, 31st December, 1885.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulation 32, under the "Crown Lands Act of 1884," published on 2nd January last, being amended as hereunder.

GERALD SPRING.

32. If the land intended to be applied for is unmeasured and does not adjoin a measured portion, the intended applicant shall, previously to sending in his application, mark one corner of such land, either by a conspicuous mark upon a tree standing at such corner, and by cutting an L trench 6 feet long and 9 inches deep, or by a post 6 inches in diameter, projecting above the surface not less than 3 feet, set in an L trench of the dimensions aforesaid. In standing water the corner may be marked by a tree or post as aforesaid without the trench, and in rocky country by a mound of stones, and such post as aforesaid fixed therein, and projecting 3 feet above the mound; and such post or boundary mark shall be kept erected until survey of the intended selection shall be made. Should the land adjoin a measured portion it will be sufficient instead of marking a corner as aforesaid, to specify as the starting-point of the description one of the corners of the measured portion, if the same can be found, but if not a corner must be marked by the intending applicant in the manner described. Unless a subdivision is applied for measured Crown Lands must be taken in portions as measured, and must be so described, but both measured and unmeasured land may be taken together, provided that the area in either case be not less than 40 acres.

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATION NO. 41 UNDER)

Ordered by the Legislative Assembly to be printed, 25 March, 1886.

Department of Lands, Sydney, 25th February, 1886.
 It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulation No. 41, under the Crown Lands Act of 1884, published on 2nd January, 1885, being amended as hereunder.

[MI. 86-1,468]

GERALD SPRING.

REGULATION 41.

If any part of the land applied for contains improvements for which payment has to be made under section 41 of the Act, the conditional purchaser shall pay the first annual instalment of one quarter of the appraised value of such improvements to the Colonial Treasurer, or the Land Agent of the District, on or before the expiration of three months from the date of confirmation of the application, and the balance thereafter in annual instalments of an equal amount in each of the three following years: Provided that the full amount of such appraised value may, at the option of the conditional purchaser, be paid within the first period of three months aforesaid: Provided, further, that the applicant may, with the consent of the Board, amend his application so as to omit therefrom any area containing improvements as defined by the next regulation, if such omission do not reduce the area of land applied for below 40 acres; and the Board shall, after the expiration of twenty-eight days from the day when their decision is given, if no notice of appeal be lodged, issue a certificate of confirmation for the land stated in the amended application.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATION No. 128.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18.

Department of Lands, Sydney, 26 May, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulation No. 128, under the Crown Lands Act of 1884, published on 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

REGULATION 128.

Should the rent of a Homestead Lease be appraised at a higher rental than the minimum sum deposited, the balance due shall be paid to the Colonial Treasurer within one month after notification in the *Gazette* of approval of the issue of a lease; and subject as aforesaid all rents shall be paid yearly in advance to the Colonial Treasurer; if the abovementioned amounts are not paid on the day on which the same are due the additional sums mentioned in section 96 of the Act will be payable.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATION No. 164.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18.

Department of Lands, Sydney, 4 June, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulation No. 164, under the Crown Lands Act of 1884, published on 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

REGULATION 164.

Ringbarking.

Persons desirous of ringbarking trees on their leased land must make application on form 58, with all the particulars thereby required, correctly filled in, accompanied by a sketch of the locality, and a separate application must be made for each detached area for which permission is sought; such application shall be addressed to the Land Agent, accompanied by a fee of £2 for each 1,920 acres or portion of that area; should the cost of inquiry exceed the sum so deposited, the difference must be paid to the Land Agent prior to issue of the permit; if otherwise, the balance (if any) will be refunded.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATIONS Nos. 144, 145, 146, 148, AND FORM No. 54.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18.

Department of Lands,
Sydney, 4th August, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 144, 145, 146, and 148, under the "Crown Lands Act of 1884," together with form No. 54, published on 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

REGULATION No. 144.

144. Whenever it is intended to let by tender any pastoral leases, occupation licenses, homestead leases, special leases, or annual leases, notice thereof shall be inserted in the Gazette at least thirty days before the date up to which tenders may be lodged, which date shall be specified in the notice, together with the minimum rental or license fee. A tracing, showing the boundaries of the land to be let, shall be exhibited at the office of the Land Agent of the District in which the land may be situated, and also at the head office of the Land Board District including such Land District. Tenders for such leases or licenses shall be made to the Under Secretary for Lands, and may be deposited by the tenderers or their agents in a box to be kept for that purpose at the Department of Lands, or may be transmitted by post, and any tenders so transmitted will be placed in the box unopened. Tenders must be sealed and endorsed "Tender for Annual Lease," or as the case may be, together with the name of the Land District in which the land is situated.

REGULATION No. 145.

145. At the expiration of the time specified for lodgment of tenders, the tender box shall be sealed by an officer duly authorized in that behalf, and on the following day, or as soon thereafter as possible, the box shall be opened, and the tenders examined by a Board of Officers appointed for that purpose. A list giving particulars of all tenders found in the box, with the respective amounts offered as rent or license fee, shall be made by such Board and transmitted to the Minister, together with such tenders.

REGULATION No. 146.

146. If there be only one tender for any land the tenderer shall be entitled to the lease or license of the same, if the rent offered be not below the minimum specified. If there be two or more tenders for the same land opened on the same day the lease or license shall be granted to the person whose tender contains the offer of the highest rent, but if no one tender be higher than all the others, a fresh day shall be named, on or before which the persons making the highest tenders shall be at liberty to send in fresh tenders, which shall be dealt with as hereinbefore provided. But, notwithstanding anything to the contrary in this Regulation, for sufficient reasons, any tender may be rejected and fresh tenders may be called for if deemed necessary.

REGULATION No. 148.

148. Particulars of all tenders opened by the Tender Board shall be recorded in a tender book, to be kept for that purpose; and upon the acceptance of any tender the same shall be notified in the Gazette.

FORM 54.

Crown Lands Act of 1884—(Part IV).

Tender for (a)

(a) "Pastoral Lease,"
"Occupation License,"
"Homestead Lease,"
"Annual Lease," or
"Special Lease," as
the case may be.

(b) "A Pastoral
Lease," "an Occu-
pation License," "a
Homestead Lease,"
"a Special Lease," or
"an Annual Lease,"
as the case may be.

(c) "Rent," or
"License Fee."

(d) "Land Agent" or
"Treasury."

NOTIFICATION having been published in the Government Gazette of 188 , that it is intended to let by Tender the land specified in Schedule hereto, as (b) I hereby offer an annual (c) for (b) of the said land.

Herewith is a receipt, showing that the sum of £2 10s. has been paid to the (d)

at as deposit hercon.

SCHEDULE.

No. of Block, Portion, or Resumed Area.	Date of Gazette notice.	Area.	County and Parish.	Rent or License Fee offered.	Remarks. (Further particulars, such as will lead to identification of land tendered for.)

Dated at this day of 188

(Signature of person tendering)

To the Under Secretary for Lands,

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATIONS Nos. 30, 31, 87, 94, AND 147.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18.

Department of Lands,
Sydney, 17th August, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 30, 31, 87, 94, and 147, under the "Crown Lands Act of 1884," published on 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

REGULATION No. 30.

30. Every applicant for a Conditional Purchase who has previously held a Conditional Purchase under the Act shall produce to the Land Agent, with his declaration, a certificate from a Local Land Board that he has fulfilled all the conditions of the law with reference to such former purchase, or that through adverse circumstances he has been compelled to abandon the same.

REGULATION No. 31.

31. When more than one application and deposit for a Conditional Purchase of the same land, or any part thereof, is tendered at the same time, the Land Agent shall, unless all applications but one be withdrawn, forthwith determine in manner following which application shall be received; the Land Agent shall write on tickets of equal size the names of the several applicants, which tickets shall be placed by the parties (should they desire to do so) in the box supplied to the Land Agent for the purpose, and the Land Agent shall, without looking, and in the presence of the parties, draw one ticket from the box, and the application to be received shall be that of the applicant whose name may be on the ticket so drawn, and the deposit paid by the remaining applicants shall be forthwith returned. And in the event of the same land or any part thereof being included in two or more applications for Conditional Purchase or Conditional Lease tendered at the same time or partly in one and partly in the other, only one ticket shall be placed in the box by each applicant, in lieu of a ticket for each of such applications, and the application or applications to be received shall be that or those of the applicant whose name shall be on the ticket so drawn.

REGULATION No. 87.

87. Applications for Conditional Leases shall be in the Form 32, and must be tendered to the Land Agent, together with a sum equal to the minimum amount of the rent for one year of the land applied for; and should there be more than one application for the same land, or any part thereof, tendered

at the same time, such applications shall be dealt with as provided by Regulation 31. And any person whose application for a Conditional Lease shall have been rejected after determination by lot, as provided by Regulation 31 aforesaid, shall not be debarred from making another application or other successive applications during lawful hours on the same day, subject, however, to the like conditions and limitations as are imposed by Regulation 28 on applications for Additional Conditional Purchases similarly made: Provided that no such application for a Conditional Lease, if tendered at any time later than the application for a Conditional Purchase or Additional Conditional Purchase in virtue of which it is made, shall have priority over any application for Conditional Purchase or Additional Conditional Purchase previously made for the same land or any part thereof.

REGULATION No. 94.

94. The land to be comprised in any Conditional Lease shall, where practicable, be measured in combination with the land in virtue of which the Conditional Lease is applied for, in such manner as to give a figure of the shape mentioned in section 59 of the Act: Provided that measured Crown Lands shall, upon being conditionally leased, be taken in portions as measured; but if the area applied for be less than a measured portion, or in the aggregate exceed one or more measured portions, and embrace a part of another measured portion, such portion may, on approval by the Local Land Board, be subdivided, but in that case the applicant shall pay the cost of survey for such subdivision.

REGULATION No. 147.

147. Tenders shall be made in the Form 54, and shall clearly describe the land applied for in terms of the notice calling for tenders, and shall be accompanied by a receipt showing that a sum of £2 10s. has been paid to the Land Agent or Treasury as a deposit thereon. The deposit paid by the person whose tender may be accepted shall be credited on account of the first year's rent or license fee; all other deposits will be refunded.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FROM LANDHOLDERS AND OTHERS, SUGGESTING AMENDMENTS IN.)

Received by the Legislative Assembly, 28 January, 1886.

The Honorable the Speaker and Members of the Legislative Assembly of New South Wales.

We, the undersigned landholders and others, humbly petition that you will take into consideration, as early as possible, the following clauses in the present Land Act which we desire to see embodied; and also with a view to their amendment and a settlement of the lands on a permanent and equitable basis.

Clauses 24 and 48. That the area in the Eastern Division be extended to 2,560 acres—conditional purchase and leasehold.

Clause 33. Fencing; amendment—the same to be extended to five years.

Clause 49. Rent; amendment—conditional lessees to pay the same as the run they are located on, and to have the same right of appeal.

Clause 52. Amendment—that the terms of converted pre-emptive leases under this clause be altered to five years for fencing, with right of purchase; minimum rent, 1d. per acre.

Your Petitioners also pray that, in all places where the land is available, where pre-emptive leases were held prior to the passing of the present Act, and applied for as conditional leases, such leases should be granted to the maximum area of 3,840 acres, or any smaller area which applicant may have held.

Your Petitioners also pray that selectors on the leasehold area be allowed to extend their area to 640 acres, and that in all cases the selector must be a *bonâ fide* resident on the land which he desires to add to, and that the leaseholder of the run be allowed acre for acre in the resumed area for that which he may lose in the leasehold area.

And also, that a clause applying to mineral areas or reserves, as nearly similar as possible to clause 45 of the Land Act, applying to purchases on gold-fields, should be brought into operation.

We would also respectfully call your attention to the fact that the decisions of the local Land Board, in depriving selectors, under the repealed Acts, of their rights to conditional leases by reason of creeks, minor roads, travelling stock reserves, &c., being made frontages, is against the spirit and intention of the Act.

Also, that the rents of conditional leases be reduced to the minimum rent of (1d.) one penny per acre, before the 31st December, 1885.

And your Petitioners humbly pray that your Honorable House will take the foregoing circumstances into favourable consideration, and grant such relief as may to your Honorable House seem most expedient.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 101 signatures.*]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—INHABITANTS OF NEW ENGLAND.)

Received by the Legislative Assembly, 4 February, 1886.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned landowners and inhabitants of New England,—

RESPECTFULLY SHOWETH :—

That several clauses in the Land Act of 1884 are detrimental to the interests of the Colony, and are arbitrary and unjust to the conditional purchasers in particular.

We therefore pray that you will take into consideration as early as possible the following clauses with amendments as suggested, with a view to the settlement of the land question in a fair and equitable manner, and on a sound and permanent basis :—

1. Clause 22, Volunteer Grants—That Volunteer Grants be taken on the leasehold areas if held by the squatting lessee.
2. Clauses 24 and 48—To extend the area of C.P., together with conditional lease in the Eastern Division, to 2,560 acres.
3. Clause 33, Fencing—Same to be extended to five years.
4. Clause 42—Residence of five years on original C.P. to be sufficient for the additional.
5. Clause 49, Rent—Selector to pay the same rent as the lessee of the run they are located on, and to have the same right of appeal.
6. Clause 61, Auction Sales—That no lands be sold by auction except town and suburban lots.
7. That sub-section 4 of clause 75 be altered to read as follows :—If it shall appear to the Minister that, by reason of insufficient area of any run held as one holding on the 25th June, 1884, division is inexpedient, the Governor may declare the whole area thereof a resumed area.
8. Clause 130—Conditional purchasers and lessees to have the same rights and privileges as the pastoral lessees, as regards trespass, damages, impoundings, &c.
9. That the reserves on the resumed areas, be thrown open for selection.
10. That the term of conditional leases under clause 52 be extended to ten years, and time for fencing to five years, lessees to have the right of conditional purchase of the whole or any part, 40 acres or over, at any period of the lease, maximum rent the same as the run they are located on
11. That the selector who is situated on the leasehold area be allowed to extend his area to 640 acres, and also to get his proportionate conditional leases.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 341 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FROM CERTAIN FARMERS OF MOLONG, IN REFERENCE TO PAYMENT OF ANNUAL
INSTALMENTS ON SELECTIONS.)

Received by the Legislative Assembly, 2 March, 1886.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The petition of the undersigned farmers of Molong and surrounding district.

HUMBLY SHOWETH :—

That your petitioners have sustained heavy pecuniary losses through the continued and disastrous drought, from which the Colony has of late been suffering, a drought which has brought many of us almost to the very brink of ruin arising from the failure of crops, the low price of farming produce, together with the high railway rates charged on the same when sent to market.

The year 1885 above all others, has been one of the most trying, disheartening, and ruinous, of all seasons to our industry. Painful to state in the present season of 1885, many settlers have not reaped so much as even 3 bushels per acre, while others again have had to turn their stock into the parched and famishing crops in order to save them from starvation. The agricultural returns for the district, and which has recently been compiled for the present year, shows a decrease in the yield of wheat alone of no less than 321,670 bushels in 1884, to 133,119 in 1885, being a decrease of 188,537 bushels, which is equivalent to $6\frac{1}{2}$ bushels per acre, or a loss in cash of £40,000.

We most respectfully desire therefore to point out to your Honorable House, that in many instances owing to the all but complete failure of crops many farmers this year in this district are now left almost helpless and penniless and unable to meet their usual engagements, but especially the annual instalments on their selections, and therefore your petitioners pray that your Honorable House may take such steps, whereby the payment of the said annual instalment thereon for 1886, may be postponed to those at least of such selectors and farmers especially, who from the failure of crops are unable to pay the same during the present year, or else so modify or amend section 38 of the Land Act of 1884, by extending the period of forfeiture to "twelve months" in place of "three" for nonpayment of instalment, that is to say to provide for the mitigation of the penalty of absolute forfeiture to which occupiers are now liable, by authorising the Government to accept to payment of a fine (in lieu of absolute forfeiture), and allow a further extension of time, say of twelve months within which to comply with such conditions of payment "in deserving cases of hardship," the rent of which now involves forfeiture.

Your petitioners therefore pray that your Honorable House may take the foregoing premises into your most favourable consideration, and grant such relief as in your wisdom may seem best fitted to save a large portion of the industrious farming community, the yeomanry of the soil from absolute ruin.

And your petitioners, as in duty bound, will ever pray.

[Here follow 205 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—LANDHOLDERS AND MEMBERS OF THE WENTWORTH LAND AND INDUSTRIAL ASSOCIATION.)

Received by the Legislative Assembly, 24 March, 1886.

To the Honorable the Members of the Legislative Assembly of New South Wales.

May it please your Honorable House,—The humble Petition of the undersigned landholders and members of the Wentworth Land and Industrial Association,—

SHOWETH:—

That the disadvantages and injustice under which your Petitioners labour, from the administration of the "Crown Lands Act of 1884," in the Western Division, compel them to seek redress from your Honorable House.

That the Local Land Board having recommended that no conversions of pre-emptive leases into conditional leases shall be granted where travelling stock or other reserves intervene, your Petitioners therefore pray that these reserves shall be no bar to the granting of the said leases in their entirety, and that your Petitioners shall have the same advantages enjoyed by pastoral and homestead lessees regarding travelling stock reserves.

That your Petitioners would respectfully submit the great injury and injustice which will be done to applicants for these leases if the recommendations of the Land Board are carried out, the boundaries of these pre-emptive leases having already been approved of by the Lands Department and in most cases surveyed, fenced, and otherwise improved at the expense of the applicants. And your Petitioners would further point out that in many cases the greater part or even the whole of these are being cancelled, and where as is the case 1,500 acres are taken out of a lease of 1,920 the remainder is no use at all to the holder.

That the tenure of pre-emptive leases converted into conditional leases be extended to fifteen years, the same as pastoral and homestead leases.

That in the event of the said conditional leases being finally refused or so modified as to be useless to the holder, that compensation shall be made to the holders thereof for all improvements that may exist thereon.

That where a conditional purchaser has converted his selection into a freehold by payment of the balance of the purchase money that he shall not be debarred from converting his pre-emptive leases held in virtue thereof into a conditional lease under the present Act.

That the rentals on all converted pre-emptive leases in this division be fixed on the same basis as pastoral and homestead leases.

That in the case of applications for homestead leases upon which there are improvements, that the Government purchase the same, and charge the lessees not more than five per cent. per annum on the value of the same, so as to enable men with moderate means to settle the country, and that in case of improvements being valued at a higher rate than the applicants may consider reasonable, that the value of the same be decided by arbitration.

And your Petitioners would further pray that all leaseholders, conditional, homestead, and pastoral, shall, at the expiration of their leases, receive compensation for any permanent improvement they may effect during the tenure of the said leases.

And your Petitioners, as in duty bound, will ever pray, &c., &c., &c.

[Here follow 189 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—MEMBERS OF THE GLEN INNES LAND LEAGUE AND RESIDENTS OF GLEN INNES.)

Received by the Legislative Assembly, 24 March, 1886.

To the Honorable the Speaker, and the Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Members of the Glen Innes Land League, and of the undersigned residents of the District of Glen Innes,—

HUMBLY SHOWETH:—

That certain provisions of the "Crown Lands Act of 1884" have been found to act prejudicially to the interests of your Petitioners and of the Colony generally, and that the said Act requires amendment accordingly in the following particulars:—

Clause 24.—That whereas the Eastern Division contains a large area of inferior pastoral land for the profitable occupation of which a larger area of one thousand two hundred and eighty acres is required, the principle of classification already established in regard to special areas should be extended so as to permit application to be made for two thousand five hundred and sixty acres as a conditional purchase, and lease of land described as "inferior pastoral land," provided that such applications be subject to the approval of the Local Land Board, and shall not include lands within twenty miles of any existing railway or Municipality.

Clause 33.—That an alternative be allowed to the conditional purchaser and conditional lessee of erecting improvement of a fixed and durable nature upon his holding instead of fencing, such improvements to be of the value of ten shillings per acre, of which one half shall be expended during the first three years of the term, and the balance within five years from the date of the issue of the certificate by the Local Land Board.

Clause 49.—Whereas the appraisalment of rents is placed absolutely in the hands of the Local Land Board, of which the majority usually consists of officers receiving Government salary, and whereas no appeal is provided from the decision of such Board, your Petitioners desire that two Members of the Board shall be elected by the landholders in each district, or that three persons shall be so elected to act with the Local Land Board in Courts of Rent Appraisalment only.

Clause 52.—Whereas the conditional lease of a reduced area for five years is not sufficient compensation for the pre-leases which were attached to the conditional purchases under the repealed Acts, and whereas the condition of fencing renders conditional leases for so short a term practically untenable, your Petitioners desire that the holders of conditional leases under the 52nd clause shall have a preferent right of purchase at the end of five years, without further residence, provided that such right shall not be exercised by any person in respect of more than one conditional lease.

Clause 54.—That holders of conditional leases under this clause who shall exercise a preferent right of purchase may have the alternative of erecting improvements in lieu of fencing as proposed above in reference to clause 33, or that a ring fence enclosing the whole property of one owner or his family may be deemed sufficient compliance with the conditions of fencing clauses 52 and 54. That resident selectors under the repealed Acts, who through ignorance have not availed themselves of the provisions of these clauses, be allowed to secure conditional leases. That resident selectors on leasehold areas be entitled to extend their holdings up to six hundred and forty acres at least by additional conditional purchase or lease out of adjoining Crown land, the lessee of the leasehold to be compensated by adding to his holding an equal area of Crown lands on the resumed area of the run if available. That all doubt regarding the legality of conditional leases upon leasehold areas be set at rest by a declaratory Act of Parliament. That application for conditional leases which have been refused by Local Land Boards on account of the interference of reserves, creeks, and roads, be reconsidered and granted, except where any reserve may be reported on as required for public purposes.

Clause 130.—That instead of this clause a provision be substituted withholding from all occupants of unfenced land the right of impounding only. That auction sales be abolished, except upon application to and recommendation by the Local Land Board.

Your Petitioners therefore pray your Honorable House to amend the "Crown Lands Act of 1884," in accordance with the principles hereinbefore specified.

And, as in duty bound, your Petitioners will ever pray, &c.

[Here follow 168 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FROM THE COMMITTEE ON BEHALF OF THE WANDSWORTH LAND LEAGUE.

Received by the Legislative Assembly, 8 June, 1886.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned Committee on behalf of the Members of the Wandsworth Land League,—

RESPECTFULLY SHOWETH:—

That several clauses in the Land Act of 1884 are injurious to the interest of the Colony, and arbitrary and unjust to Conditional Purchasers in particular.

We therefore pray that you will take into consideration the following clauses, with the suggested amendments.

Clauses 48-54 and 52 be amended to allow of 2d. being the maximum.

Also, that the rents of all scrubby, broken, ridgy, swampy country be reduced to the minimum of $\frac{1}{2}$ d. per acre.

That clause 52 give a right of purchase.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 13 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—RESIDENTS OF WENTWORTH DISTRICT.)

Received by the Legislative Assembly, 16 July, 1886.

To the Honorable the Speaker and the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the residents and others interested in the Wentworth District, urging the necessity of recognizing the following resolutions in regard to the present Land Bill.

MAY IT PLEASE YOUR HONORABLE HOUSE,—

Feeling the importance of the proposed amendments in the present Land Law of the Colony, your Petitioners would respectfully bring under your notice the following resolutions which were carried unanimously at a large meeting of the inhabitants of the town of Wentworth, and trust the same may receive the support and approval of your Honorable House.

Your Petitioners view with great anxiety and concern the fact that owing to the instructions laid down by the Honorable the Minister for Lands for the guidance of the Land Board, there is a probability that rents of all Crown Lands may be fixed at such a high rate as will completely crush the ruling industry of this part of the Colony.

Resolution No. 1,—

That this meeting views with alarm the disastrous effect of the present Land Bill in this district, as since its inception there has been an entire cessation of all improvements, and, as a consequence, hundreds of men have been thrown out of employment.

Resolution No. 2,—

That this meeting is of opinion that the minimum rent of one penny per acre and two pence per acre is far in excess of what occupiers of Crown Lands can afford to pay, and must result in the ruin and displacement of that class which the Government are so desirous of fostering on the land.

Resolution No. 3,—

That this meeting is of opinion that converted pre-leases into conditional leases under the 52nd clause should, in the Western District, have a fixed lease of 15 years, and that the minimum rental be similar to homestead leases.

Resolution No. 4,—

That this meeting is of opinion that a fair compensation should be allowed for all genuine improvements at expiration of lease.

Resolution No. 5,—

That fences 4 feet high of six wires should be substituted by fences 3 feet 2 inches high of five wires, which is not only sufficient for all pastoral purposes but more in keeping with present fences and the class of timber obtainable.

Resolution No. 6,—

That the true and equitable basis of assessing pastoral properties is to be found in the direct relationship which rainfall bears to the carrying capacity of the land.

Resolution No. 7,—

That lessees of all classes whose rents are fixed over the minimum should have the right of appeal.

Your Petitioners would further draw the attention of your Honorable House to the fact, that owing to the great distance between Sydney and this portion of the Colony, many very erroneous and exaggerated opinions have grown up respecting it, and the true facts require to be prominently brought forward at a time like the present, in order that our real position and just claims may receive the full and fair consideration of your Honorable House.

The law in its present form tends to bring misfortune and ruin upon a class that have been using capital and years of incessant labour, at great personal hardship, in developing what was up to a very recent date a vast expanse of dry arid country, incapable in its natural state of sustaining animal life, and useless to the State as a source of revenue until the capital of the resident lessees had been expended on the country in the conservation of water and other improvements, and the large outlay on such works has, up to the present time, in most cases made little or no return.

This,

This, we submit, ought to be recognized in any Legislation which may apply to this part of the Colony. The labour market has been greatly affected by the new law.

Numbers of contractors and others hitherto constantly employed are now out of work, and have either gone or are making preparations to leave the Colony.

Improvements have come to a standstill, and on all sides are business men complaining of the depressed state of trade, which, at the present, is not one quarter of what it formerly was.

These evils have followed the introduction of the Bill, and unless the amendments suggested by your Petitioners receive the favourable consideration of your Honorable House, all improvements will be permanently at an end, and such a state of things must result most disastrously to the Colony.

Notwithstanding the great assistance given by the Government, your Petitioners would also point out that all occupiers of Crown Lands in this district are put to very great expense in coping with the rabbit pest.

The expenditure thus incurred, in many instances, has almost doubled the ordinary expenditure, and renders the profitable occupation of pastoral holdings in this district almost impossible.

And your Petitioners pray that your Honorable House will take the before-mentioned resolutions into your favourable consideration, and cause such action to be taken as your Honorable House may consider proper in the premises.

And your Petitioners will ever pray.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—LESSEES IN THE WESTERN DISTRICT.)

Received by the Legislative Assembly, 21 July, 1886.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Lessees and occupiers of Crown Lands in the Colony of New South Wales,—

SHOWETH:—

1. That under authority of the "Crown Lands Act of 1884," clause 78 and its sub-clauses, the new leases in the Western Division are to commence at the mean date of determination of the old leases.

2. That the rent of the new leases for the said Western Division it is enacted shall apply to the first period of five years of such new leases.

3. That notwithstanding this distinct enactment the Lands Department, we humbly submit in opposition to the terms of the Act, is proceeding with the new appraisements in the said Western Division with the avowed intention to collect increased rents with arrears for part of the year 1885, and for the whole of 1886, before the mean date of determination of the old leases, in many instances, has expired.

4. That with respect to pastoral rents and occupation license fees the right of appeal against minimum appraisements under clause 100 of the aforesaid Act is restricted to cases where the inferior grazing capabilities of the land alone can be urged.

5. That in the said Western District and in parts of the Central District a large majority of the Crown tenants are far removed from the benefits of railway communication, and are thereby placed at great disadvantage compared with other tenants more favourably located, in the cost of transit of their wool and other produce to and from the seaboard.

6. That the liability of the Western and main part of the Central Divisions to prolonged and disastrous droughts, the uncertainties and the expensive character of artificial water supply, the reduction of grazing capability in consequence of the prevalence of rabbits, and the additional burdens imposed in the extermination of the pest, especially in scrubby localities, are also factors that should receive special attention in the determination of the new rentals.

7. That in the remote parts of the said Western District the new rentals, even at a minimum, would range from three to ten times more under the present Act, as contrasted with the old assessment.

8. That your Petitioners understand it is the intention of the Government to introduce into your Honorable House during the present session a Bill to amend the Land Act of 1884.

Your Petitioners therefore pray that your Honorable House will be pleased to grant in the promised Amending Act the right of appeal in open Court to the Minister in respect of all rents and occupation fees to all Crown tenants alike, and the right to produce evidence in support thereof.

That amendment of the Act be also granted with regard to the proposed charge of rent in the Western Division prior to the expiration of the mean date of determination of the old leases.

That the period intended to be embraced in the words the mean date of determination, clause 78, sub-section 1, both as to its commencement and its termination, may be authoritatively defined, and thus obviate the uncertainty and ambiguity that are now said to exist, to the prejudice of your Petitioners.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 672 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION—INHABITANTS OF NYMAGEE, GILGUNNIA, AND SURROUNDING DISTRICTS.)

Ordered by the Legislative Assembly to be printed, 3 August, 1886.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled
Gentlemen,—The Petition of the undersigned inhabitants of Nymagee, Gilgunnia, and the surrounding districts,—

HUMBLY SHOWETH :—

That your Petitioners respectfully wish to bring under the notice of your Honorable House the disabilities under which the pastoral interest is suffering in this district ; deeming the present a suitable time, as the Government appraisers of land have been sent out, and some amendments of the Land Act are soon coming before your Honorable House, your Petitioners would humbly suggest that your Honorable House would cause the Government appraisers of land to be instructed to report on the boundaries of the area overgrown with pine scrub, so that your Honorable House may be able to ascertain the area, this course being we humbly suggest a more satisfactory one.

We have no hesitation in stating that in the present condition of the country within a considerable radius of Nymagee and Gilgunnia, owing to the rapid growth of pine scrub within the past few years, it is not capable of supporting a sheep to a very large area (many of the sheep now upon it being fed on scrub which is being cut for them), and also that the minimum rent provided by the Act we consider is excessive, but if the country were cleared of pine scrub it would soon grow a little grass and herbage, and increase the stock carrying capabilities of the district. Should this be done it would benefit the whole of the Colony, by increasing the amount of wool and stock, augment the railway revenue, and provide labour for the unemployed now being supported by the Government.

It is a well known fact that since the present Land Act was past the runholders have been unable to carry on improvements, thereby throwing large numbers out of employment and seriously affecting the prosperity of this large and important district.

Our position is being seriously jeopardised by the unprofitable condition of pastoral matters, and we pray that you may not wreck us at this time when so many troubles are oppressing us. We have only to mention the low price of wool and stock, and the spread of rabbits, which latter trial should perhaps be placed first, as, if more effectual means are not adopted for their destruction, and the scrub which shelters them destroyed, they will take possession of the country and render it utterly valueless.

Your Petitioners would humbly pray that your Honorable House would alter the scrub leases from their present impracticable form so as to enable the leaseholders to immediately commence the work of clearing, and convert this scrubby desert into a property which will be of value to the State at the termination of their leases, and that all *bond fide* improvements (not including ringing and clearing) should be paid for by the incoming tenant, as we consider the present provisions of the Act prevent any further improvements being effected.

And your Petitioners, as in duty bound, will ever pray.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

PETITION FOR AMENDMENT OF—TANK-SINKERS, CARRIERS, MECHANICS, AND OTHERS IN THE
WESTERN DIVISION.)

Received by the Legislative Assembly, 27 September, 1886.

To the Honorable the Speaker and the Honorable the Members of the Legislative Assembly of New South
Wales, in Parliament assembled.

The Petition of the tank-sinkers, carriers, mechanics, and laborers in the Western Division of the
Colony of New South Wales,—

HUMBLY SHOWETH:—

1. That since the passing of the present Land Act the improvements on stations in this division have come to a standstill and as a consequence our valuable plants, teams, and work-shops have remained idle to our serious loss and in many cases complete ruin, whilst the employment of labor in every branch has entirely ceased. Those of us settled here with our families and unable to leave are now living on our previous savings, whilst those not possessing any means have had to migrate in large numbers to other districts, or leave the Colony.

2. That cessation of navigation for the past eighteen months, and the absence of direct Railway communication with the metropolis in the greater part of the division, have been the cause of a scarcity of supplies and increased the cost of the necessaries of life to such an extent as to press heavily on our already narrowed means. In consequence of this lamentable state of things we beseech your Honorable House to consider the condition of your Petitioners and speedily to make such just amendments in the Land Act (after as this division is concerned) as will restore employment to labor and bring back that prosperity which in the past was characteristic of the Western country.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 2,883 signatures.*]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—MERCHANTS, TRADERS FORWARDING AGENTS &C. IN THE WESTERN DIVISION.

Received by the Legislative Assembly, 27 September, 1886.

To the Honorable the Speaker, and the Honorable the Members of the Legislative Assembly of
New South Wales, in Parliament assembled.

The Petition of the undersigned, merchants, traders, forwarding agents, hotel-keepers, and others,
doing business in the Western Division of the Colony of New South Wales,—

HUMBLY SHOWETH:—

1. That in consequence of the operation of the Land Act of 1884 (as affecting the pastoral tenants of the Crown in the Western Division of the Colony by the professed increased rental which in the best seasons they are unable to pay, and the fact that compensation for their improvements on the public estate is not provided for) the employment of labor in further developing the country has ceased, and the men who have hitherto been the support of the towns are now either idle and destitute or have left these districts and found their way to the larger centres of population or the other Colonies,—trade has become stagnant, and ruin brought upon many.

2. That under the Land Act of 1861 and subsequent Amendment Acts, in contrast to the present condition of things immense sums of money were expended in the struggle to render vast waterless tracts of country in this Division productive, and hundreds of hands were employed on every station who under similar circumstances would still be occupied in the excavation of tanks, sinking of wells, and the construction of other works with the object of rendering the still unimproved country capable of bearing stock.

3. That the supplying and forwarding the material and the necessaries of life required on the various stations during the period of active development referred to, constituted the main portion of our business, but since the present state of inactivity has set in our trade has dwindled to one fourth of its former dimensions to our serious loss individually, and to that of the revenue of the State.

4. That unless inducements to capitalists to invest money in reclaiming the still enormous unimproved area of country in this Division and rendering it fit for profitable occupation, are held out, such as provisions for gradual resumption only of the holdings and compensation for improvements, most of the present resumed areas must be surrendered by the licensees as valueless to them.

5. That if these resumed areas are abandoned by those who hold improved country adjoining as a base of operations from which the work of development can be carried on, it will be impossible for others (not in possession of like facilities for initiating the improvement of the country) to occupy such at a high rental and only a yearly tenure; wholesale injury to the interests of the State will result, as these large areas will be left in a state of desert, rabbits, unless kept down at an enormous public expense, will multiply on these unoccupied tracts to such an extent as to render the adjoining country eventually untenable; the value of property (already declined from 50 to 60 per cent.) will still further diminish, and what have been thriving and prosperous townships will be almost deserted and the inhabitants for the most part ruined.

6. That in addition to the unfavourable operation of the present Land Act the want of railway communication with the metropolis has been seriously felt by us in many parts of the Division, as most of the stations in the north-western portion have been doing business with South Australia owing to the excessive cost of obtaining supplies from Sydney.

Your Petitioners would humbly point out to your Honorable House that the Western Division comprises nearly one-half of the entire area of the Colony of New South Wales, that the land generally is of so poor a character and so subject to drought that it will be found necessary to deal with the question of its occupation in a most liberal spirit, in order to induce the employment of capital in a fresh conflict with the natural disadvantages of the country in the effort to render it productive.

That prompt extension of railway communication would not only be of benefit to the inhabitants of this Division but to the Colony at large. The improvement and stocking of the immense tracts of what

is now waste country would create traffic, increase the revenue, and open a large field for every branch of labour, give a stimulus to business, and (with more railways) the whole trade of this Western country would centre in the metropolis. This would naturally benefit the Eastern portions of the Colony by opening up a fresh market for their produce, and ourselves by affording us a cheap and certain means of transit.

Your Petitioners therefore pray that your Honorable House will take immediate steps to amend the present Land Act in such a manner as to offer those special inducements in the way of moderate rent, fair compensation for improvements, and a reasonable security for those effected in the resumed areas to warrant a return of capital and enterprise into their former channel, and thus cause a renewal of trade and prosperity to ourselves and advantage to the State.

And your Petitioners, as in duty bound, will ever pray. &c.

[Here follow 87 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—TENANTS OF THE CROWN IN THE WESTERN AND CENTRAL DIVISIONS.)

Received by the Legislative Assembly, 6th October, 1886.

To the Honorable the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.

The Petition of the tenants of the Crown in the Western and portions of the Central Division of the Colony,—

HUMBLY SHOWETH:—

Your Petitioners are squatters, graziers, and leaseholders, occupying Crown lands in the said Western and Central Divisions of the Colony, under the Act of Parliament, entitled, "The Crown Lands Act of 1884."

Your Petitioners are much distressed in mind in consequence of the Land Act of 1884 having forfeited the valuable improvements erected by them on their holdings, and the high rentals fixed by the said Act of 1884 for the use and occupation of the Crown lands, which are being given effect to by the Land Boards now holding Courts in various parts of the district.

Your Petitioners desire to state that previous to the passing of the Land Act of 1861 a very large proportion of the Crown lands in the Western and Central Divisions of the Colony had never been occupied at all in any way, and the Legislature, in order to induce persons to occupy and improve such Crown lands, passed the Land Act of 1861, offering these lands at a rental of two shillings (2s.) per square mile, with a promise of a lease for five years, and a renewal for a further period of five years at the same rental, if, by the adoption of artificial means, the carrying capacity of such lands had been increased to the extent of 50 per cent.

Under the promises and inducements thus held out your Petitioners took up a large extent of these waste lands of the Crown, and in many cases, not having sufficient capital of their own to fully develop the said lands, borrowed the money from the banks and other financial institutions, who lent it on the security of the improvements such advances would create upon lands held at a low rental, and the promise made by the Act of 1861 of a ten years' lease, on condition these improvements were made.

Your Petitioners affirm that several millions of money were thus expended by them in the employment of labor, required in the erection of fences, conservation of water, and the necessary buildings requisite to work such an additional extent of country, and that for such outlay your Petitioners have up to the present time received little or no remuneration at all.

Your Petitioners further affirm that these previously unoccupied Crown lands are now carrying a very large number of sheep and other stock, which they certainly could never have done had it not been for the energy of your Petitioners, and the very large sums of money expended by them in developing these hitherto useless dry lands, and which would have remained in the same state until this day but for the promises and inducements made by the Legislature in the Land Act of 1861.

Your Petitioners beg most respectfully to lay the foregoing averments before your Honorable House, and to state the Land Act of 1884 not only sets aside the clear and distinct promises created by the Act of 1861, to let certain Crown lands at a rental of 2s. per square mile for ten years; and, though these leases have in many cases not yet expired, yet rents, varying from a minimum of 53s. 4d. up to £8 per square mile, can now be fixed upon your Petitioners' holdings; and the said Crown Lands Act of 1884 also forfeits to the State all the improvements made and erected in good faith by your Petitioners.

Your Petitioners are thus completely crushed and paralysed by the Crown Lands Act of 1884. Their stations and property have become unsaleable, their credit seriously injured, and all their improvements having been forfeited to the State financial companies are unwilling to render them further assistance; and if such assistance could be obtained, it would be impossible to pay even the minimum rent fixed by the Crown Lands Act of 1884.

Your Petitioners therefore most humbly and respectfully pray your Honorable House will repeal such portions of the Crown Lands Act of 1884 as relate to the forfeiture of improvements, and the rentals of the Crown lands in the Western and Central Divisions of the Colony, and thus put it in the power of your Petitioners to further develop the country.

Your Petitioners, having in view the importance of the pastoral industry, which they believe produces three-fourths of the total exports of the Colony, hope every encouragement and inducement will be held out for the continuance and further development of so great a source of national wealth; and having given the matter their most thoughtful and serious consideration, your Petitioners venture, with the utmost respect for your Honorable House, to suggest that an amending Land Bill, based on the following principles, would tend to restore that confidence in the pastoral industry which the Land Act of 1884 has so severely shaken, viz :—

That all lands shall be assessed according to their average grazing or carrying capacity—that is, at per head of sheep such land will carry, calculated on its average carrying capacity over a series of years.

That a rental of 2d. per sheep be fixed for all lands that require ten acres and upwards to carry one sheep.

That a rental of 4d. per sheep be fixed for all lands that require over six and under ten acres to carry one sheep.

That a rental of 5d. per sheep be fixed for all lands that require three and up to six acres to carry one sheep.

That a rental of 8d. per sheep be fixed for all lands that require under three acres to carry one sheep.

That rentals on the above basis be fixed on all Crown lands in the Western and Central Divisions of the Colony, stocked or unstocked.

That such rents be fixed as dating from the commencement of the Crown Lands Act of 1884, without any reference whatever to the mean determination of any lease or promise of lease previously made by any Act of Parliament.

That leases for twenty-one years on the above basis be issued for all Crown lands in the Western and Central Divisions of the Colony, dating from the commencement of the Crown Lands Act of 1884, such rents to be paid half-yearly in advance.

That on the expiration of such leases all improvements erected thereon be appraised at their then value, and such value be paid by the incoming tenant to the outgoing tenant.

In support of the preceding suggestions, your Petitioners desire most humbly and respectfully to state that the Government appraisers, in their sworn evidence before the Land Boards now sitting in the Western and Central Divisions, estimate from three to twenty-five acres as being requisite to carry one sheep; a sheep having to travel over so large an extent of poor, sandy country to find sufficient food to maintain it, produces wool of an inferior, light, harsh character, containing a quantity of sand, and the expenses of working such lands become heavier in proportion to the decrease in the weight and value of the wool produced, and in proportion to the acreage required to carry a sheep.

Your Petitioners in conclusion desire further to aver, though they have had considerable practical experience in the expense of developing lands in the Western and Central Districts of the Colony, and are well acquainted with its arid climate, limited rainfall, very inferior character of its soil, and great distance from markets, yet are still willing to pay a fair and just rent for the use and occupancy of the Crown lands of the Western and Central Divisions, if such rentals are coupled with security of tenure and compensation for all improvements as set forth in this their Petition.

Your Petitioners therefore pray your Honorable House will take the statements and averments made herein into your most favorable consideration, and grant such relief, or cause such inquiries to be made, as your Honorable House in its wisdom may deem fit.

And your Petitioners will ever pray.

[Here follow 107 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS ACT.

(PETITION FOR AMENDMENT OF—SELECTORS AND CONDITIONAL LEASEHOLDERS OF THE
EASTERN AND CENTRAL DIVISIONS.)

Received by the Legislative Assembly, 18 October, 1886.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The humble Petition of the undersigned selectors and conditional leaseholders of the Eastern and
Central Divisions, near Wellington,—

RESPECTFULLY SHOWETH:—

That the delay in permitting selectors to take possession of their land is very injurious to
their interests and in many cases ruinous.

That the minimum rent fixed for conditional leases is far too high, and tends to interfere with the
progress of this district.

That it is not necessary to fence in the roads passing through lands the property of any one person,
where a gate would suffice, and that the fencing of unnecessary roads be dispensed with.

That in family selections, or a person taking up more than one series, one outside fence be
sufficient.

That at the expiration of a lease, in the event of the lessce giving up possession, all permanent
and substantial improvements shall be paid for by the incoming tenant.

That persons holding pre-leases under the repealed Acts, the same being converted into conditional
leases under the present Act, where all conditions have been complied with, should have the same right
of purchase as persons taking up land under the present Act.

That the attention of the Minister for Lands be especially drawn to the excessive rents fixed on
conditional leases at the Land Courts recently held at Wellington and Dubbo.

Your Petitioners therefore pray that your Honorable House will take the foregoing premises
into consideration and afford them such relief as on a full deliberation you may deem permissible.

And your Petitioners will ever pray.

[*Here follow 196 signatures.*]

CROWN LANDS ACT OF 1884.

(GAZETTE NOTICES SETTING FORTH THE MODE IN WHICH IT IS PROPOSED TO DEAL WITH THE DEDICATION OF CERTAIN LANDS, IN ACCORDANCE WITH THE PROVISIONS OF THE 105TH SECTION OF THE ACT 48 VICTORIA NO. 18.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 105.

PROPOSED RESUMPTION OF PART OF THE PERMANENT COMMON AT TUMUT FOR ROAD PURPOSES.

Department of Lands, Sydney, 18 November, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of part of the Permanent Common at Tumut, with the view of the land being set apart for road purposes.

JOSEPH P. ABBOTT.

DESCRIPTION.

Area 1 acre 2 roods 29 perches of the Permanent Common at Tumut, parish of Tumut, county of Wynyard, dedicated 15 August, 1879: Commencing at a point on the western boundary of recreation reserve, dedicated 18 November, 1870, bearing south and distant 4 chains 14 links from the north-west corner of the recreation reserve; and bounded thence on the south-east by a line bearing south 54 degrees 35 minutes west 9 chains 24 links; thence on the south-west by a line bearing north 67 degrees 26 minutes west 7 chains 60½ links to the north-western boundary of the Permanent Common, dedicated 15 August, 1879; thence on part of the north-west by part of that north-western boundary of the Common, bearing north 53 degrees east 1 chain 16 links; thence on the north-east by a line bearing south 67 degrees 26 minutes east 6 chains 46 links; thence on the remainder of the north-west by a line bearing north 54 degrees 35 minutes east 9 chains 40 links to the west boundary of the recreation reserve aforesaid; thence on the east by part of that west boundary south 1 chain 23 links, to the point of commencement.

Shown on plan catalogued M. 339-1,834, Surveyor-General's Office. [Ms. 85-18,656]

PROPOSED RESUMPTION OF SITE FOR MECHANICS' INSTITUTE AT BOURKE.

Department of Lands, Sydney, 2 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the site for Mechanics' Institute in the town of Bourke, hereunder described, another site having been granted in lieu thereof.

[Ms. 85-18,857]

JAMES S. FARNELL.

DESCRIPTION.

3 roods, county of Cowper, parish of Bourke, town of Bourke, allotment No. 1 of section No. 17. Commencing at the north-western corner of the section; and bounded thence on the north by Merlin-street easterly 2 chains and 50 links; on the east by the western boundary-line of allotment No. 2 southerly, at right angles to Merlin-street, 3 chains to a lane; on the south by that lane westerly parallel with Merlin-street 2 chains and 50 links to Glen-street; and on the west by that street northerly 3 chains, to the point of commencement.

PROPOSED RESUMPTION OF PRESBYTERIAN BURIAL GROUND AT SEAHAM.

Department of Lands, Sydney, 2 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the Presbyterian Burial Ground at Seaham, hereunder described, with a view to the land being included in an area proposed to be dedicated as a site for General Cemetery at that place.

[Ms. 85-18-856]

JAMES S. FARNELL.

DESCRIPTION.

DESCRIPTION.

1 acre, county of Durham, parish of Seaham, town of Seaham. Commencing on the southern side of Sinclair-street at a point where the western side of Grape-street meets it; and bounded thence on the north by Sinclair-street, bearing west 5 chains; on the west by a line bearing south 2 chains; and on the south by a line bearing east 5 chains to Grape-street; and on the east by that street bearing north 2 chains, to the point of commencement.

PROPOSED RESUMPTION OF THE PERMANENT AND TEMPORARY COMMONS AT MUSCLEBROOK.

Department of Lands, Sydney, 6 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication and reservation of the Permanent and Temporary Commons at Musclebrook, hereunder described, with a view to the alienation of the land, a Common in lieu thereof having been purchased by the Crown.

[Ms. 85-19,259]

JAMES S. FARNELL.

DESCRIPTIONS.

Permanent Common, Musclebrook, dedicated 25th August, 1865.

County of Durham, parish of Rowan, area 1,187 acres: Commencing on the south boundary of portion No. 19, parish of Russell, at a point bearing westerly and distant 6 chains 60 links from its south-east corner; bounded thence on the north by a line partly part of the south boundary of that portion and the south boundaries of portions Nos. 21 and 17, same parish, bearing south 89 degrees 27 minutes west 73 chains 40 links; thence on the west by the east boundary of H. Dumaresq's portion of 680 acres, parish of Rowan, bearing south 50 minutes east 162 chains 55 links to the north boundary of Musclebrook Temporary Common, notified 15th November, 1867; thence on the south by part of that north boundary east to the north-east corner of the Common; thence on the east by a line partly forming the west boundary of portion No. 13 bearing north 1 degree west, to the point of commencement,—shown on plan catalogued D. 147-1,557, Surveyor-General's Office.

Temporary Common, Musclebrook, notified 15th November, 1867.

County of Durham, parish of Rowan, area 1,321 acres, near Musclebrook: Commencing on the western boundary of E. Sparke's 2,000 acres, at the north-eastern corner of G. Bowman's 603 acres; and bounded thence on the south by a line partly forming the northern boundaries of that land and G. Bowman's 614 acres bearing west 1 degree 3 minutes north 159 chains 80 links; on the west by a line bearing north 39 degrees east 1 chain 63 links to the south-eastern corner of E. S. Dumaresq's 837 acres, and by the eastern boundary of that land bearing north 15 minutes east 80 chains 52 links; on the north by part of the southern boundary of H. Dumaresq's 2,180 acres and the southern boundary of H. Dumaresq's 680 acres, bearing east 45 minutes north 84 chains 58 links to the south-eastern corner of the last-mentioned land; and thence by a line bearing east to its intersection with the northerly prolongation of the western boundary of E. Sparke's 2,000 acres aforesaid; and on the east by that prolongation and part of that boundary, being in all a line bearing south 1 degree east, to the point of commencement.

PROPOSED RESUMPTION OF PART OF THE CANDELO RECREATION RESERVE AND DEDICATION AS A SITE FOR COURT-HOUSE.

Department of Lands, Sydney, 6 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of that part of the Recreation Reserve at Candelo hereunder described, with a view to the land being dedicated as a site for Court-house.

[Ms. 85-19,258]

JAMES S. FARNELL.

DESCRIPTION.

County of Auckland, parish of Candelo, town of Candelo, being section No. 31, area 2 acres 1 rood 39 perches, exclusive of road: Commencing at the intersection of the south side of Queen-street with the east side of William-street; thence bounded on the west by that side of William-street bearing south 6 chains to the north side of Gordon-street; thence on the south by that side of Gordon-street bearing easterly 5 chains to the west side of Bega-street; thence on the east by that side of Bega-street bearing north 6 chains to the south side of Queen-street aforementioned; and thence on the north by that side of Queen-street bearing west 5 chains, to the point of commencement,—but exclusive of the road 1 chain wide from Bombala to Merrimbula.

Plan catalogued C 11-1,906, Surveyor-General's Office.

PROPOSED RESUMPTION OF CEMETERY AT JUGIONG.

Department of Lands, Sydney, 6 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the Cemetery at Jugiong, dedicated on the 7th January, 1879, and hereunder described, it being intended to dedicate another Cemetery in lieu thereof.

[Ms. 85-19,257]

JAMES S. FARNELL.

DESCRIPTION.

7 acres 2 roods, county of Harden, parish of Jugiong, at Jugiong: Commencing on the eastern side of a road 1 chain 50 links wide, at a point bearing south 89 degrees 13 minutes east, and distant 1 chain and 50 links from the north-eastern corner of portion No. 34 of 22 acres 2 roods 28 perches; and bounded thence on the west by that road dividing it from part of that portion bearing south 47 minutes west 8 chains; on the south by a line bearing south 89 degrees 13 minutes east 10 chains 38 links; on the east by a line bearing north 47 minutes east 8 chains; and on the north by a road 1 chain wide dividing it from part of portion No. 33 of 106 acres 2 roods, bearing north 89 degrees 13 minutes west 10 chains 38 links, to the point of commencement,—exclusively of the road 1 chain wide passing through this land in a southerly direction, the area of which has been deducted from the total area.

PROPOSED

PROPOSED EXCHANGE OF TOWN HALL AND TELEGRAPH OFFICE SITES AT GOULBURN.

Department of Lands, Sydney, 30 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the Town Hall site at Goulburn, viz., allotment No. 16 of section No. 2, containing 1 rood 1 perch, and the reservation of the Telegraph Office site at that place, being allotment No. 14 of section No. 2, containing 1 rood, with a view to the first-mentioned allotment being reserved for Post and Telegraph Office site, and the latter dedicated for Town Hall site.

[Ms. 85-20,878]

JOSEPH P. ABBOTT.

PROPOSED RESUMPTION OF CEMETERY AT MARULAN, AND APPROPRIATION FOR POLICE PURPOSES.

Department of Lands, Sydney, 30 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the General Cemetery at Marulan, hereunder described, with a view to the land being set apart for Police purposes.

[Ms. 85-20,879]

JOSEPH P. ABBOTT.

DESCRIPTION.

8 acres, county of Argyle, parish of Marulan, at Marulan: Commencing on the southern side of a road 1 chain wide, at a point distant 1 chain south from the south-eastern corner of a measured portion of 100 acres; and bounded thence on the north by that road dividing it from part of that portion bearing west 8 chains; on the west by a line bearing south 10 chains; on the south by a line bearing east 8 chains; and on the east by a line bearing north 10 chains, to the point of commencement.

1885-6.

NEW SOUTH WALES.

CROWN LANDS.

(GAZETTE NOTICES OF INTENDED DEDICATION OF CERTAIN LANDS UNDER 105TH SECTION OF 48 VIC.
No. 18.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 105.

Department of Lands,
Sydney, 31st December, 1885.PROPOSED RESUMPTION OF NATIONAL SCHOOL
SITE AT JEWNEE AND DEDICATION FOR
PUBLIC SCHOOL SITE.

It is hereby notified, for public information, that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the National School Site at Jewnee, hereunder described, it being intended to dedicate portion No. 190, also hereunder described, as a site for a Public School in lieu thereof.

[Ms. 85-22,486]

GERALD SPRING.

DESCRIPTIONS.

NATIONAL SCHOOL SITE—TO BE RESUMED.

2 acres. County of Clarendon, parish of Jewnee, town of Jewnee, allotments 1 and 2 of section 30: Commencing at the north-western corner of the section; and bounded thence on the north by Stephen-street easterly 4 chains; on the east by a line crossing the lane forming partly the western boundaries of allotments 3 and 8, southerly, at right angles to Stephen-street, 5 chains and 30 links to White-street; on the south by that street westerly, parallel with Stephen-street, 4 chains; and on the west by a line northerly, at right angles to White-street, 5 chains and 30 links, to the point of commencement,—exclusively of the existing lane, 30 links wide, passing through this land in a westerly direction parallel with Stephen-street, the area of which has been deducted from the total area.

PUBLIC SCHOOL SITE—TO BE DEDICATED.

2 acres 0 roods 1 perch. County of Clarendon, parish of Jewnee, at Jewnee, portion 190: Commencing on the north-western side of the road 3 chains wide at the south-eastern corner of portion 154 of 20 acres 2 roods 16 perches; and bounded thence on the south-east by that road dividing it from part of portion 191 of 13 acres 3 roods 32 perches bearing south 26 degrees 2 minutes west 4 chains 98 links; on the south by a line bearing west 3 chains 39½ links; on the west by a line bearing north 4 chains 48 links; and on the north by part of the southern boundary of portion 154 aforesaid bearing east 5 chains 58 links, to the point of commencement.

173—

Department of Lands,
Sydney, 22nd January, 1886.PROPOSED RESUMPTION OF PUBLIC PARK IN THE
PARISH OF CONCORD, COUNTY OF CUMBER-
LAND, AND DEDICATION OF PUBLIC PARK IN
LIEU THEREOF.

It is hereby notified, for public information, that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the Public Park in the parish of Concord, county of Cumberland, dedicated on the 7th January, 1879, and hereunder described, with a view to the dedication in lieu thereof of an area of 66 acres 2 roods 15 perches, also hereunder described.

[Ms. 86-987]

GERALD SPRING.

DESCRIPTIONS.

For Resumption.

County of Cumberland, parish of Concord, area 17 acres 0 roods 12½ perches: Commencing on the north side of the Parramatta Road, at the south-west corner of the Longbottom Pound site; and bounded thence by that side of that road, being lines bearing south 87 degrees 40 minutes west 13 chains 53 links, and north 86 degrees 35 minutes west 1 chain 15 links to the south-east corner of the Wesleyan Church land; thence by the east boundary of that land bearing north 2 chains 6 links; thence by the north boundary of that land bearing west 1 chain 94½ links to the south-east side of Stockade-street, as resumed 24th November, 1881; thence by that side of that street bearing north 20 degrees 11 minutes east 11 chains 18½ links to the south-west boundary of Police Paddock, as resumed 24th November, 1881; thence by that boundary of that land bearing south 75 degrees 38 minutes east 15 chains 5½ links to the west boundary of Dr. Harris' 1,500 acres; thence by that boundary of that land bearing south 6 degrees 43 minutes west 6 chains 76 links to the north-east corner of the pound site aforementioned; thence by the north boundary of that site bearing south 87 degrees 40 minutes west 85 links; thence by the west boundary of the said pound site bearing south 6 degrees 43 minutes west 1 chain 60 links, to the point of commencement.

The above was dedicated 7th January, 1879, and is shown on plan catalogued L. 21-1,252, in the Surveyor General's Office.

For Dedication.

County of Cumberland, parish of Concord, area 66 acres 2 roods 15 perches: Commencing on the northern side of the Great Western Road, at the south-western corner of the Longbottom Pound site; and bounded thence on the south by that side of that road, being lines bearing south 87 degrees 30 minutes west (magnetic) 13 chains 55 $\frac{1}{2}$ links, and north 86 degrees 46 minutes 10 seconds west (magnetic) 1 chain 15 links to the south-eastern corner of allotment No. 3, as shown on plan catalogued C. 631-730; thence on the west by the eastern boundary of that allotment bearing north 12 minutes west (magnetic) 2 chains 6 links to its north-eastern corner; thence again on the south by the northern boundaries of allotments Nos. 3, 2, and 1, as shown on said plan bearing south 89 degrees 51 minutes west (magnetic) 1 chain 92 links to the south-eastern side of Stockade-street; thence on the north-west by that side of Stockade-street, being lines bearing north 20 degrees 3 minutes 3 seconds east (magnetic) 11 chains 17 links north 16 degrees 17 minutes east (magnetic) 1 chain 2 $\frac{1}{2}$ links to the north-eastern side of Gipps-street; thence on the south-west by that side of Gipps-street bearing north 76 degrees 13 minutes 38 seconds west (magnetic) 11 chains 74 $\frac{3}{4}$ links; thence again on the north-west by a line bearing north 19 degrees 33 minutes 12 seconds east

(magnetic) 9 chains 67 $\frac{2}{3}$ links to the south-west side of Stanley-street; thence on the north-east by that side of that street bearing south 70 degrees 11 seconds east (magnetic) 9 chains 54 $\frac{1}{4}$ links; thence again on the north-west by a line bearing north 19 degrees 30 minutes east (magnetic) 19 chains; thence again on the north-east by lines bearing south 70 degrees 30 minutes east (magnetic) 6 chains 25 links, and south 68 degrees 36 minutes east (magnetic) about 1 chain 50 links to the shore of Hen and Chicken Bay; thence by that shore of that bay easterly to the north-western corner of Dr. Harris' 1,500 acres grant; thence on the south-east by the north-western boundary of that land, being lines bearing south 10 degrees 20 minutes 2 seconds west (magnetic) 22 chains 20 $\frac{1}{4}$ links, and south 6 degrees 32 minutes 39 seconds west (magnetic) 11 chains 82 $\frac{3}{4}$ links to the north-eastern corner of the Longbottom Pound site aforementioned; thence again on the south by the north boundary of the said pound site bearing south 87 degrees 30 minutes west (magnetic) 85 links to the north-west corner of that land; and thence again on the south-east by the north-western boundary of that pound site bearing south 6 degrees 32 minutes 39 seconds west (magnetic) 1 chain 60 links, to the point of commencement,—as shown on plan catalogued C. 55-2,063, in the Surveyor General's Office.

CROWN LANDS ACT OF 1884.

(DEDICATION OF CERTAIN LANDS UNDER.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 105.

Department of Lands,
Sydney, 5th March, 1886.**PROPOSED RESUMPTION OF WATER RESERVE IN
THE CITY OF BATHURST, AND DEDICATION
FOR CATTLE SALE YARDS AND PUBLIC
RECREATION.**

It is hereby notified, for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the reserve for water supply in the City of Bathurst, hereunder described, with a view to a portion thereof, containing 6 acres 3 roods 39 perches, also described below, being dedicated as a site for cattle sale yards; and the remainder, 2 acres 0 roods 23 perches, as defined by description herewith, being dedicated for public recreation.

HENRY COPELAND.

Water Reserve proposed to be resumed.

County of Bathurst, parish of Bathurst, City of Bathurst, area 8 acres 2 roods 39 perches. Commencing at the intersection of the north-east side of Russell-street with the south-east side of Acheron-street; and bounded thence by that side of the latter street bearing north-easterly to the south-west side of Howick-street; thence by that side of that street bearing south-easterly to the north-west side of Pearl-street; thence by that side of that street bearing south-westerly to the aforesaid north-east side of Russell-street; and thence by that side of that street bearing north-westerly, to the point of commencement,—exclusively of Queen Charlotte's Vale Creek, passing through this land, and of the two lanes, each 30 links wide, the areas of which have been deducted from the total area, being section No. 103, as shown on plan catalogued B. 150-824 in the Surveyor-General's Office.

The above was dedicated for water supply, 13th March, 1877, and vested in the Municipal Council of Bathurst.
[Ms. 86-3,003]

Proposed Cattle Sale Yards.

County of Bathurst, parish of Bathurst, City of Bathurst, area 6 acres 3 roods 39 perches. Commencing at the intersection of the south-east side of Acheron-street with the north-east side of Russell-street; and bounded thence by that side of the latter street bearing south 50 degrees 4 minutes east 10 chains 10 links to the north-west side of Pearl-street; thence by that side of that street bearing north 39 degrees 56 minutes east 4 chains 90 links to the left bank of Queen Charlotte's Vale Creek; thence by that bank of that creek downwards to the south-west side of Howick-street; thence by that side of that street bearing north 50 degrees 4 minutes west 2 chains 30 links to the south-east side of Acheron-street aforesaid; and thence by that side of that street bearing south 40 degrees 23 minutes west 10 chains 53 links to the point of commencement, being part of section No. 103, as shown on plan catalogued B. 25-2,382, in the Surveyor-General's Office.
[Ms. 86-3,003]

Proposed Reserve for Public Recreation.

County of Bathurst, parish of Bathurst, city of Bathurst, area 2 acres 0 roods 23 perches. Commencing at the intersection of the north-west side of Pearl-street with the south-west side of Howick-street; and bounded thence by that side of the latter street bearing north 50 degrees 4 minutes west 6 chains 30 links to the right bank of Queen Charlotte's Vale Creek; thence by that bank of that creek upwards to the north-west side of Pearl-street aforesaid; and thence by that side of that street bearing north 39 degrees 56 minutes east 3 chains 82 links to the point of commencement,—being part of section No. 103, as shown on plan catalogued B. 25-2,382, in the Surveyor-General's Office. [Ms. 86-3,003]

Department of Lands,
Sydney, 12th March, 1886.**PROPOSED RESUMPTION OF THE PERMANENT
COMMON AND PART OF THE TEMPORARY
COMMON AT WALCHA, AND DEDICATION FOR
PERMANENT COMMON AND PUBLIC RECREA-
TION IN LIEU THEREOF.**

It is hereby notified, for public information, that in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the Permanent Common at Walcha, and the reservation of that part of the Temporary Common at that place, hereunder described, with the view to the dedication in lieu thereof of 806 acres for Permanent Common and 100 acres for public recreation, also hereunder described.

[Ms. 86-2,999]

HENRY COPELAND.

Permanent Common at Walcha proposed to be resumed.

County of Vernon, parish of Walcha, area about 806 acres. Commencing at the south-west corner of A. Nivison's 160 acres; and bounded thence on part of the east by the west boundary of that portion and a line bearing north 21 chains to the south-west corner of portion No. 292; on part of the north by a line partly forming the south boundary of portion No. 293 of 42 acres 3 roods bearing north 89 degrees 43 minutes west 16 chains 14 links to its south-west corner; again on the east by part of the west boundary of that portion bearing north 17 minutes east 11 chains 25 links; on the north by a line bearing west 92 chains; on part of the west by a line bearing south 5 chains; on the remainder of the north by a line bearing west 4 chains; on the remainder of the west by a line bearing south 72 chains 46 links; on the south by a line bearing east 112 chains 10 links to a point south of the south-west corner of A. Nivison's 160 acres aforesaid; and on the remainder of the east by a line bearing north to that corner, the point of commencement.

Dedicated 6th December, 1867.

The Permanent Common proposed to be dedicated this date is in lieu of the above.

Portion of the Temporary Common at Walcha proposed to be revoked.

County of Vernon, parish of Walcha, area about 120 acres. That part of the Temporary Common at Walcha, notified 17th January, 1868, within portion No. 118, measured for public recreation, and the Permanent Common at Walcha, both proposed to be dedicated this date.

Plan catalogued N. 133-1,834, Surveyor General's Office.

Permanent Common at Walcha proposed to be dedicated.

County of Vernon, parish of Walcha, area 806 acres. Commencing at the south-west corner of portion No. 293 of 42 acres 3 roods; and bounded thence on part of the east by part of the west boundary of that portion bearing north 17 minutes east 11 chains 25 links; on part of the north by a line bearing west 92 chains; on part of the west by a line bearing south 6 chains; again on the north by a line bearing west 4 chains; again on the west by a line bearing south 52 chains 58 links; on part of the south by a line bearing east 35 chains; on the remainder of the west by a line bearing south 30 chains 25½ links; on the south-west by a line bearing south 37 degrees 58 minutes east 16 chains 6½ links; again on the south by a line bearing east 30 chains 97 links; again on the east by a line bearing north 23 chains 5 links; on the remainder of the south by a line bearing east 38 chains 43 links; again on the east by a line bearing north 44 chains 14 links; again on the north by a line bearing west 318 links; on the remainder of the east by a line bearing north 22 chains to the south-east corner of portion No. 293 aforesaid; and on the remainder of the north by the south boundary of that portion bearing north 89 degrees 43 minutes west, to the point of commencement, but exclusive of reserved roads, as shown on plan catalogued N. 133-1,834.

NOTE.—The above is in lieu of Permanent Common proposed to be revoked this day.

Proposed Recreation Reserve at Walcha.

County of Vernon, parish of Walcha, area 100 acres. Commencing on a south boundary of the Permanent Common proposed to be dedicated this date, at a point 2 chains east from the east boundary of portion No. 409, E. B. Boulton's 65 acres 2 roods; and bounded thence on the west by a line bearing south 30 chains 77 links; on the south by a line bearing east 32 chains 50 links; on the east by a line bearing north 30 chains 77 links; and on the north by a line bearing west 32 chains 50 links, to the point of commencement.

To include portion No. 118.

Plan catalogued N. 133-1,834, Surveyor General's Office.

Department of Lands,
Sydney, 19th March, 1886.

**PROPOSED RESUMPTION OF PUBLIC SCHOOL SITE
AT ROCKY PONDS AND DEDICATION OF
ANOTHER SITE IN LIEU THEREOF.**

It is hereby notified for public information, that, in accordance with the provisions of the 105th Section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the Public School site at Rocky Ponds, viz., portion No. 37, in the parish of Rocky Ponds, county of Gordon, containing 2 acres, with a view to an area of 2 acres in the locality mentioned, viz., portion No. 46, being dedicated as a site for Public School in lieu thereof.

Sydney, 9th July, 1886.

PROPOSED RESUMPTION OF BEGA MARKET RESERVE AND DEDICATION FOR SHOW GROUND AND PUBLIC RECREATION.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the market reserve at Bega, area about 17 acres, being section No. 49, dedicated on the 22nd November, 1870, and hereunder described, with a view to the dedication in lieu thereof of allotment No. 1 of section No. 49, area $8\frac{1}{2}$ acres, for Show Ground for the use of the Bega Agricultural, Pastoral, and Horticultural Society, and allotment No. 2 of the same section, area about 7 acres 2 roods 22 perches, for Public Recreation.

HENRY COPELAND.

DESCRIPTIONS.

Market Reserve, proposed to be Resumed.

About 17 acres. County of Auckland, parish of Bega, at Bega, section No. 49. Commencing at the intersection of the southern side of Upper-street with the eastern side of Parker-street; and bounded thence on the north by Upper-street bearing south 89 degrees 35 minutes 30 seconds east 17 chains 18 links to East-street; on the east by that street bearing south 1 degree 9 minutes west 10 chains $3\frac{1}{2}$ links; on the south by the northern boundary of R. Tooth's portion No. 83 of 38 acres bearing north 89 degrees 25 minutes 30 seconds west 17 chains 18 links to Parker-street; and on the west by that street bearing about north 1 degree 9 minutes east 10 chains 5 links, to the point of commencement.

Show Ground, proposed to be Dedicated.

8 acres 3 roods. County of Auckland, parish of Bega, at Bega. Allotment No. 1 of section No. 49. Commencing at the intersection of the southern side of Upper-street with the western side of East-street; and bounded thence on the north by Upper-street bearing north 89 degrees 25 minutes 30 seconds west 9 chains 18 links; on the west by a line bearing south 1 degree 9 minutes west 10 chains $5\frac{1}{2}$ links; on the south by part of the northern boundary of R. Tooth's portion No. 83 of 38 acres bearing south 89 degrees 35 minutes 30 seconds east 9 chains 18 links to East-street; and on the east by that street bearing north 1 degree 9 minutes east 10 chains $3\frac{1}{2}$ links, to the point of commencement,—exclusively of a road 50 links wide passing through this land along the southern boundary, the area of which has been deducted from the total area.

Recreation Reserve, proposed to be Dedicated.

About 7 acres 2 roods 22 perches. County of Auckland, parish of Bega, at Bega, allotment No. 2 of section No. 49. Commencing at the intersection of the southern side of Upper-street with the eastern side of Parker-street; and bounded thence on the north by Upper-street bearing south 89 degrees 35 minutes 30 seconds east 8 chains; on the east by the western boundary of allotment No. 1 bearing south 1 degree 9 minutes west 10 chains $5\frac{1}{2}$ links; on the south by part of the northern boundary of R. L. Tooth's portion No. 83 of 38 acres bearing north 89 degrees 25 minutes 30 seconds west 8 chains to Parker-street; and on the west by that street bearing about north 1 degree 9 minutes east 10 chains 5 links, to the point of commencement,—exclusively of a road 50 links wide passing through this land along the southern boundary, the area of which has been deducted from the total area.

Department of Lands,
Sydney, 9th July, 1886.

PROPOSED RESUMPTION OF PUBLIC SCHOOL SITE AT CHAUCER.

It is hereby notified for public information, that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the Public School Site at Chaucer, viz., portion No. 68 in the parish of Chaucer, county of Bathurst, area 2 acres, dedicated on the 11th July, 1884, and hereunder described, another school site in the same locality having been secured.

HENRY COPELAND.

DESCRIPTION.

County of Bathurst, parish of Chaucer, portion No. 68, area 2 acres: Commencing on the south-western side of the road 1 chain 50 links wide from Canowindra to Carcoar at the most westerly north-eastern corner of portion No. 69 of 20 acres, being a point bearing south 46 degrees 38 minutes east, and distant 5 chains $37\frac{1}{2}$ links from the northern end of the eastern boundary of portion No. 34 of 640 acres; and bounded thence on the north-east by that road dividing it from part of portion No. 25 of 320 acres bearing south 46 degrees 38 minutes east 5 chains and $50\frac{1}{2}$ links; on the east by a western boundary of portion No. 69 aforesaid bearing south 3 chains and 11 links; on the south by the northern boundary of that portion bearing west 4 chains; and on the west by an eastern boundary of that portion bearing north 6 chains and 89 links, to the point of commencement.

Department of Lands,
Sydney, 9th July, 1886.

PROPOSED RESUMPTION OF PARTS OF THE
WILBERFORCE COMMON.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to resume the portions of the Wilberforce Common, area about 2,190 acres and 3,200 acres respectively, in the county of Cook, parish of Wilberforce, hereunder described, with a view to the alienation of the areas in question.

HENRY COPELAND.

DESCRIPTIONS.

County of Cook, parish of Wilberforce, area about 2,190 acres: Commencing on the left bank of the Hawkesbury River, at the northern corner of Wm. Burgess' 50 acres; and bounded thence on the south-east by the north-western boundary of that portion and its continuation bearing south-westerly to the north-eastern corner of Wm. Hopkins' 34 acres; thence by the northern boundary of that 34 acres bearing westerly to north-eastern boundary of D. Brown's 90 acres; thence by part of that boundary north-westerly to the north-eastern corner of that 90 acres; thence on the south-east by the north-western boundary of that portion bearing south-westerly to its north-western corner; thence by the south-western boundary of the portion bearing south-easterly to the north-eastern corner of W. Wairing's 30 acres; thence by the north-western boundaries of Wairing's 30 acres aforesaid, F. Fowkes' 30 acres, and James Baker's 30 acres bearing south-westerly to the north-eastern boundary of D. Dunstan's 100 acres; thence by part of that north-eastern boundary bearing north-westerly to the north-eastern corner of the portion; thence on the west by a line bearing north about 105 chains; thence on the south by a line bearing west about 63 chains to Currency Creek; thence by that creek downwards in a north-easterly direction about 50 chains; thence by a line bearing north-easterly about 28 chains to the southern boundary of William Hall's 1,230 acres; thence on the north by a line partly forming the south boundary of that 1,230 acres and the south boundaries of portion No. 20 of 1 acre 1 rood 4 perches, and portion No. 19, Thos. Kemp's 40 acres, exclusive of road, bearing easterly to the north-western corner of John Howe's 100 acres; thence by a line forming the western boundaries of that 100 acres, James Davison's 100 acres, and Owen Cavanagh's 100 acres bearing southerly to the south-western corner of the last-named portion; thence by the south boundary of Cavanagh's 100 acres bearing easterly to the left bank of the Hawkesbury River aforesaid; and thence by that bank of that river upwards, to the point of commencement.

County of Cook, parish of Wilberforce, area about 3,200 acres: Commencing at the north-west corner of W. Singleton's 92 acres grant; and bounded thence on the south-east by the north-west boundary of the grant bearing north-easterly to its north-east corner; thence on the west by part of the east boundary of the said grant bearing southerly to the north-west corner of Henry Baldwin's 100 acres; thence again on the south-east by a line partly forming the north-west boundaries of Henry Baldwin's 100 acres aforesaid, Thomas Gosport's 100 acres, Thomas Reilly's 100 acres, and E. Reynold's 30 acres bearing north-easterly to the north-west corner of J. Coberoff's 50 acres; thence by the north-western boundary of that 50 acres and its north-easterly continuation bearing north-easterly to the west boundary of M. Lock's 50 acres; thence by a line partly forming the south-west boundary of M. Lock's 30 acres bearing north-westerly to the north-west corner of the portion; thence by the north-west boundary of that 30 acres bearing

north-easterly to its north-east corner; thence on the east by a line bearing north to Currency Creek; thence by that creek downwards in a north-easterly direction to a point due south of the south-east corner of John Buckland's 640 acres; thence again on the east by a line bearing north to that corner; thence on the north by a line partly forming the southern boundaries of John Buckland's 640 acres aforesaid and portion No. 3 of 40 acres bearing westerly to the north-east corner of J. R. Hatfield's 50 acres grant; and thence on the west by a line partly forming the eastern boundaries of that 50 acres grant, D. Sweeney's 40 acres, the Benovolent Society's 500 acres grant, G. Ycoman's 60 acres, T. Gosport's 60 acres, T. W. Farr's 100 acres, H. Baldwin's 100 acres, and M. Reilly's 100 acres grant bearing southerly, to the point of commencement.

Department of Lands,
Sydney, 9th July, 1886.

PROPOSED RESUMPTION AND RE-DEDICATION OF
RECREATION RESERVE IN THE VILLAGE OF
WEEKES, BELLINGER RIVER.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke and re-dedicate for public recreation allotment No. 4 of section No. 5, in the village of Weekes, Bellinger River, area 4 acres, and hereunder described, an amended plan of the allotment in question having been furnished.

HENRY COPELAND.

DESCRIPTION FOR RESUMPTION OF DEDICATED RECREATION
GROUND, VILLAGE OF WEEKES.

County of Raleigh, parish of South Bellingen, area 4 acres: Commencing at the south-west corner of allotment No. 3 of 2 acres 0 roods 2 perches, section No. 5; and bounded thence on the south-west by a line bearing north 69 degrees 57 minutes west 4 chains 53 links; thence on the west by a line bearing north 10 chains 75 links; thence on the north by a line bearing east about 104 links to the north arm of the Bellinger River; thence by that river downwards to the north-west corner of allotment No. 3 aforesaid; and thence by the west boundary of that allotment bearing south 1 degree 45 minutes east 7 chains 55 links, to the point of commencement,—to include allotment No. 4 of section 5, as shown on plan catalogued M. 10-1,834b, Surveyor General's Office.

The above was dedicated 29th July, 1884.

DESCRIPTION FOR DEDICATION FOR A PUBLIC RECREATION
GROUND, VILLAGE OF WEEKES.

County of Raleigh, parish of South Bellingen, area 4 acres. The Crown Lands within the following boundaries: Commencing on the right bank of the north arm of the Bellinger River at the north-western corner of allotment No. 3 of 2 acres 0 roods 3 perches; bounded thence on the east by the western boundary of that allotment bearing south 7 minutes east 7 chains 34 links to a 1-chain road from Boutharbour to Kempsey; on the south-west by a north-eastern side of that road bearing north 68 degrees 12 minutes west 4 chains 87 links; on the west by a road 1 chain wide dividing it from part of Alex. Nicholson's (now F. Bennett's) portion No. 33 bearing north 30 minutes east 10 chains 75 links; on the north by a line bearing south 89 degrees 30 minutes east 1 chain 4 links to the right bank of the north arm of the Bellinger River aforesaid; on the north-east by that bank downwards, to the point of commencement,—to include allotment No. 4 of section No. 5, as shown on plan catalogued R. 3-2,378, Surveyor General's Office.

1885-6.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(PROPOSED DEDICATION OF CERTAIN LANDS UNDER.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18, sec. 105.

Department of Lands,
Sydney, 23rd July, 1886.PROPOSED RESUMPTION OF WESLEYAN CHURCH
SITE AT COPELAND, AND DEDICATION IN LIEU
THEREOF FOR THE SAME PURPOSE, AND FOR
HOSPITAL SITE.

It is hereby notified for public information, that in accordance with the provisions of the 105th section of the Crown Lands Act of 1864, it is proposed to revoke the dedication of the site for Wesleyan Church at Copeland, viz., allotment No. 5 of section No. 5, area 1 rood 30 perches, dedicated on the 21st April, 1880, and hereunder described, with a view to the dedication in lieu thereof of allotment No. 3 of section No. 10 for the same purpose, and allotments Nos. 4 and 5 of section No. 5 as a site for Hospital.

HENRY COPELAND.

DESCRIPTIONS.

Site for Wesleyan Church, proposed to be Resumed.

1 rood 30 perches. PROPOSED RESUMPTION OF EXTENSION TO THE
PERMANENT COMMON AT TAMWORTH, AND
DEDICATION IN LIEU THEREOF.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the extension to the Permanent Common at Tamworth, area 1,075 acres, dedicated on the 6th January, 1880, and hereunder described, with a view to the dedication in lieu thereof of 1,450 acres in the same locality, for the purpose mentioned, the latter area having been found to accord with the survey of the land.

[Ms. 86-14,903]

HENRY COPELAND.

Extension to Permanent Common, proposed to be Resumed.

County of Inglis, parish of Tamworth, area about 1,075 acres. The Crown Lands within the following boundaries: Commencing at the north-east corner of the Permanent Common at Tamworth, as dedicated on the 22nd October, 1866; and bounded thence on part of the south by the north boundary of that common bearing west 140 chains 32 links; thence on part of the east by part of the west boundary of the permanent common aforesaid bearing south to the north-east corner of portion 67; again on the south by a line partly forming the north boundaries of that portion and portions 68 and 69 bearing west to the east boundary of portion 71; thence on part of the west by part of the east boundary of that portion north to its north-east corner; on the remainder of the south by a line partly forming the north boundaries of the last-named portion and portions 72, 73, 74, and 75, bearing west to the east boundary of George Jenkins' 612 acres; on the remainder of the west by part of the east boundary of that land north to north boundary of the Tamworth population reserve, per Census of 1861, being a point due west of the south-west corner of portion 59, parish of Woolomol; thence on the north by part of that population boundary, being a line partly forming the south boundaries of the last-named portion and portions 68 and 67 of same parish, bearing east to a point due north of the point of commencement; and on the remainder of the east by a line south to that point.

Extension to Permanent Common, proposed to be Dedicated.

County of Inglis, parish of Tamworth, containing an area of about 1,450 acres. The Crown Lands within the following boundaries: Commencing at the north-east corner of the Permanent Common at Tamworth, as dedicated on the 22nd October, 1866; and bounded thence on part of the south by the north boundary of that common bearing west 140 chains 55 links; thence on part of the east by part of the west boundary of the permanent common aforesaid, bearing south to the north-east corner of portion 67; again on the south by a line partly forming the north boundaries of that portion and portions 68 and 69 bearing west to the east boundary of portion 71; thence on part of the west by part of the east boundary of that portion north to its north-east corner; on the remain-

der of the south by a line partly forming the north boundaries of the last-named portion and portions 72, 73, 74, and 75, bearing west to the east boundary of George Jenkins' 612 acres; on the remainder of the west by part of the east boundary of that land north to its north-east corner; thence by a line bearing north 89 degrees 45 minutes east 72 chains and 73 links to the south-west corner of portion 59, parish of Woolomol; thence by the south boundary of that portion to its south-east corner; thence by a line bearing north 89 degrees 49 minutes east 54 chains and 32 links to the south-west corner of portion 68, parish of Woolomol; thence by the south boundaries of that portion and portion 67, in the same parish, and their prolongation due east, in all 72 chains and 20 links, to a post marked broad-arrow over 20 over 1880; thence on the east by a line south to the point of commencement.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS TITLES AND RESERVATIONS VALIDATION BILL.
(PETITION FROM JOSEPH TARRANT, OF SYDNEY.)

Received by the Legislative Assembly, 31 August, 1886.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.
The humble Petition of Joseph Tarrant, of No. 100, Castlereagh-street, Sydney, gentleman,—

RESPECTFULLY SHOWETH :—

That a certain Company, called the “Redhead Coal-mining Company (Limited),” was duly registered in 1875, under the “Companies Act of 1874,” with a nominal capital of 15,000 £1 shares, paid up on issue to 6s. per share.

That in the year 1882 the capital of the said Company was increased to £30,000.

That the registered shareholders in the said Company, along with the number of shares held by each shareholder, are as follows :—

Shareholders.	Number of Shares.
Flood, Hon. Edward, M.L.C....	6,300
Brown, Alexander, Pyrmont ...	5,650
Hutchison, W. A., Sydney ...	4,249
Humphrey, C. H., Burwood ..	3,700
Ireland, J., Newcastle...	2,000
Steel, W. R., Sydney ...	2,087
Morris, William, Dr. ...	1,333
Butchart, J. H. ...	1,000
Piddington, W. T., Tamworth	164
Owen, W. R. ...	666
Stokes, C. F., Newcastle ...	768
Sweetland, C., Newcastle ...	268
Steel, M., Lambton ...	668
Ramsay, F. B. ...	130
Wise, G., Tamworth ...	200
Vickery, E., Sydney ...	367
Lewis, M. A., Tamworth ...	100
Brown, A. K., Sydney ...	300
Executors Alexander Brown ...	50

That the said Company has for the last thirteen years held under lease from the Crown over 2,000 acres of Crown lands, within the population area of the city of Newcastle, in the Colony of New South Wales.

That the said Company has not paid any rent in respect of the said lands for some nine years past, and that the rent thereon now due to the Government is about £4,500.

That though the said lease was granted by the Crown, subject to the express condition that £5 per acre should be spent upon the land within the first three years, the said Company has not expended any money whatever upon the said land.

That the said Company, on the 18th day of November, 1875, upon one and the same day and at the same time, purported to conditionally select for the purpose of mining, other than gold-mining, certain other lands near Newcastle, to wit, 4,199 acres of Crown lands.

That the said Company obtained grants from the Crown of the same lands in virtue of having conditionally selected the same as aforesaid.

That your Petitioner, being advised and believing that the said lands, conditionally selected as aforesaid, were illegally selected by the said Company, and that the said Company had no right or title to the same, duly applied, on the 18th day of December, 1884, to conditionally purchase, for the purposes of mining, other than gold-mining, a certain portion of the said lands.

That your Petitioner, in order to establish the illegality of the title of the said Company to the said lands, and so to obtain the revocation and repealing of the Crown grants as aforesaid, presented a Memorial to the Honorable the Attorney-General, asking him to grant his fiat to the issue of writs of *scire facias* in the name of the Queen, calling upon the said Company to show cause why the said Crown grants should not be cancelled and repealed, as it was only by a legal proceeding in the name of the Queen that your Petitioner could obtain the repeal or revocation of the said grants.

That your Petitioner obtained the said fiat on entering into an approved bond for the payment of all costs and expenses which might be incurred in respect of the said writs.

That the said writs of *scire facias* alleged three grounds for cancelling and repealing the said grants :—

1. That the Company, being a Corporation, was not a person within the meaning of the Crown Lands Acts, and could not conditionally select Crown Lands.
2. That more than one selection had been applied for by the said Company on the same day.
3. That the area of land (four thousand one hundred and ninety acres) conditionally purchased as aforesaid by the said Company, was in excess of the area allowed by law, *videlicet*, six hundred and forty acres.

That the said writs were duly issued and served on the said Company, who appeared to the same.

That the said Company then applied to the Supreme Court in Banco on the sixteenth and seventeenth days of August instant of this year, to set aside and quash the said writs.

That the Supreme Court thereupon refused to set aside the said writs, holding that they had been properly issued, and also that the first ground alleged, as aforesaid, for repealing the said grants, that a Corporation is not a person within the meaning of the Crown Lands Acts of 1861 and 1875 was a good one, and that on that ground alone (without deciding the other grounds) the grants were bad and ought to be cancelled and repealed.

That your Petitioner is aware that a Bill for the validation of certain mineral conditional purchases has since the said decision of the Supreme Court been introduced in your Honorable House.

That your Petitioner has incurred great expense in selecting the said lands, and in prosecuting the said writs of *scire facias* and otherwise.

That your Petitioner has been advised that the said Bill, in its present shape, will entirely deprive him of his rights to the said lands now in dispute as aforesaid.

Your Petitioner therefore humbly prays that the said Bill, and more especially the last clause of it, which does not protect proceedings already instituted by the Crown (as in the present case) from the operation of the Bill may be so amended by your Honorable House as to fully preserve to him his rights to the lands now in dispute as aforesaid, and so as not to interfere with any proceedings he may take to substantiate his claim to the said lands.

And your Petitioner further prays to be allowed to be heard at the Bar of your Honorable House by Counsel in support of this Petition.

And your Petitioner will ever pray, &c.

JOSEPH TARRANT.

1885-6.

ANNUAL REPORT.

TO THE HONORABLE JAMES FLETCHER, Esq., M.P., SECRETARY FOR MINES, &c., &c.

Sir,

I do myself the honor to submit to you the following Report upon the working of the Department under your charge, and also upon the progress of Mining and the results of our Mining during the year 1885.

As indicating, in some degree, the amount of work performed in this Department, I beg leave to submit the following statement:—

STATEMENT OF THE NUMBER OF PAPERS REGISTERED AND OF LETTERS DESPATCHED BY THE VARIOUS BRANCHES OF THE DEPARTMENT OF MINES.

Branch.	Papers registered.	Letters written.
Mines	15,146	7,477
Forests	10,829	3,265
Rabbit	10,194	4,059
Stock	9,698	3,000
Drills	9,290	1,944
Public Watering-places.....	4,865	2,447
Roads	3,858	2,660
Parks	1,034	530
	64,914	25,382 *

* Exclusive of printed circulars, notices, &c., &c.

The number of applications to lease Crown lands for mining purposes during the year 1885 was 2,059, being an increase of 282 as compared with the number of such applications made in 1884.

Of the 2,059 applications so made, 820 were for auriferous land, and 1,739 for mineral land.

The number of applications dealt with during 1885 was 1,814, which, compared with the number dealt with in 1884, shows an increase of 391. I have not abated my efforts to reduce the time occupied in dealing with such applications; and I am pleased to be able to record the fact that the officers in charge have cheerfully seconded my efforts in this direction. This is specially noticeable in regard to the working of the Survey and Charting Branches.

Of the 1,814 applications dealt with in 1885, 503 were for gold-mining leases, comprising an area of 3,828½ acres; and 1,311 were for mineral leases, comprising an area of 45,027 acres. The number of applications dealt with in 1885 was less by 245 than the number lodged during that year. But, though we have not kept pace with the influx of work, it must, I think, be conceded that our record of work done during the year is creditable.

The area of auriferous land applied for under lease in 1885 is not so great as that applied for in 1884 by 1,072 acres, but the area of mineral land applied for in 1885 exceeds the area applied for in 1884 by 11,140 acres.

The following table shows the quantity of land applied for to lease during the year 1885, and the minerals to be mined for therein:—

	a.	r.	p.
Diamonds	880	0	0
Tin and diamonds.....	3,310	0	0
Tin	3,978	0	1
Tin and bismuth.....	250	0	0
Tin, silver, and copper.....	20	0	0
Tin and silver.....	170	0	0
Silver	20,218	0	14
Silver and copper.....	140	0	0
Silver and lead	26,981	2	28
Silver, lead, and copper.....	580	0	0
Silver and antimony.....	202	0	0
Silver, lead, and bismuth.....	900	0	0
Copper	240	0	0
Limestone	80	0	0
Marble	20	0	0
Wolfram	40	0	0
Antimony	180	0	0
Manganese	135	0	0
Graphite	40	0	0
Gold	2,012	1	8½
	60,377	0	11½

The

The increase in the area of mineral land applied for is chiefly due to the applications to lease land for mining silver and lead ores.

The following table shows the area of land held under application to lease on the 31st December, 1885:—

	a.	r.	p.
Gold	2,317	2	8
Silver	21,911	0	20
Silver, manganese, cobalt, and copper .. .	120	0	0
Silver, tin, and lead	120	0	0
Silver, lead, and copper .. .	152	0	0
Silver and tin	535	3	1
Silver and bismuth	80	0	0
Silver, copper, and tin ..	120	0	0
Silver and lead	28,550	0	28
Silver, lead, and asbestos.....	40	0	0
Silver and antimony	40	0	0
Silver and copper.....	932	0	0
Kerosene shale .. .	640	0	0
Bismuth	20	0	0
Slate	100	0	0
Coal	1,990	0	0
Manganese	200	0	0
Coal and shale	3,722	0	0
Marble	20	0	0
Wolfram	40	0	0
Lead	120	0	0
Graphite	40	0	0
Galena	40	0	0
Limestone	620	0	0
Tin	4,790	1	0
Tin and diamonds	1,050	0	0
Tin and bismuth	120	0	0
Diamonds	820	0	0
Copper	540	0	0
	69,790	3	17

The aggregate area of land held under application to lease on the 31st December, 1885, is greater than the area so held on the 31st December, 1884, by 27,020 acres. This increase is mainly due to the quantity of land applied for to lease for silver and lead mining.

The following table shows the area of land held under lease, and the minerals to be mined:—

Mineral.	Mining Act, 1874.	Mining Act Further Amendment Act 1884.	Gold Fields Act, 1900.	Crown Lands Occu- pation Act, 1861.	Total.
	a. r. p.	a. r. p.	a. r. p.	a. r. p.	a. r. p.
Gold	3,057 3 39½	4 0 0	21 0 4*	30,830 0 3½
Antimony	220 0 0	220 0 0
Bismuth.....	25 0 0	25 0 0
Coal	2,849 3 0	4,514 0 0	7,368 3 0
Cobalt	40 0 0	40 0 0
Copper	1,008 0 34	120 0 0	1,128 0 34
Copper and tin.....	20 0 0	20 0 0
Coal, shale, and iron.....	100 0 0	100 0 0
Diamonds	947 0 0	240 0 0	1,187 0 0
Diamonds and tin.....	20 0 0	20 0 0
Kerosene shale	640 0 0	640 0 0
Manganese.....	85 0 0	85 0 0
Slate	252 3 0	60 0 0	313 3 0
Shale, copper, &c.....	40 0 0	40 0 0
Silver	3,976 2 17	320 0 0	4,296 2 17
Silver and lead	9,358 0 27	9,358 0 27
Silver and copper	340 0 0	340 0 0
Silver, lead, and copper.....	968 0 19	968 0 19
Silver, lead, copper, and tin...	80 0 0	80 0 0

Silver, lead, and tin.....	238 0 14	238 0 14
Tin	8,307 3 30	875 2 17	1,180 0 0	10,363 2 7
Not specified	20 0 0	137 1 33	157 1 33
	32,648 3 14½	1,519 2 17	21 0 4	5,951 1 33	40,140 3 28½

* 2,684 yards river-bed.

The aggregate area of land under lease for mining purposes at the end of 1885 exceeds the area so held at the end of 1884 by 10,638 acres 1 rood 10 perches. The increase is due to the large area of land occupied for the purpose of mining for silver and lead.

The number of applications for authorities under section 28 of the Mining Act to mine under reserves received during 1885 was 116, being a decrease as compared with the number in 1884. The number of such applications dealt with in 1885 was 207, being less than the number dealt with in 1884 by 216.

The

The following table shows the areas of reserves, &c., comprised in authorities granted under section 28, during 1885, and the minerals to be mined thereunder:—

	a.	r.	p.
Coal	4,102	0	0
Coal and shale	22,659	0	0
Coal, iron, &c.	1,280	0	0
Tin	669	0	0
Silver.....	329	0	0
Silver and lead.....	11	0	0
Copper	190	0	0
Manganese	10	0	0
Gold	116	0	0
	29,366	0	0

In the bulk of the cases the authorities in respect of the above areas had not actually issued prior to 31st December last.

The aggregate area comprised in the authorities granted in 1885 is less by 3,043 acres than in 1884.

The following table shows the areas comprised in authorities issued under section 28, prior to 1885, and still in force, and the minerals to be mined thereunder:—

	a.	r.	p.
Coal	81,376	3	0
Coal and shale	11,570	0	0
Shale	8	2	32
Tin	133	2	2
Copper	22	3	12
Copper and silver.....	2	2	16
Limestone	10	0	0
Bluestone and gravel ..	12	0	0
Cobalt and nickel	45	2	0
Marble	5	0	0
Gold	310	1	21
	93,497	1	3

The following table shows the areas comprised in authorities which were in force on 31st December, 1885, and the minerals to be mined thereunder:—

	a.	r.	p.
Coal	83,737	3	0
Coal and shale.....	22,149	2	33
Tin	539	2	11
Copper	128	2	34
Copper and silver	5	1	28
Silver	302	2	16
Silver and lead	7	3	35
Limestone	10	0	0
Bluestone and gravel.....	12	0	0
Cobalt and nickel	45	2	0
Marble.....	5	0	0
Gold.....	320	3	38
	107,265	0	35

The aggregate area held under such authorities in force at the end of 1885 exceeds the area under such authorities at the end of 1884 by 9,797a. 3r. 0½p.

A return of the holdings under the 28th section of the Mining Act to the end of 1884 has been published in pursuance of an order of the Legislative Assembly.

In the months of January, May, and July, of 1885, particulars of gold and mineral leases in force in the several mining districts were published in the Government Gazette, and copies thereof forwarded to the several Wardens' and Registrars' offices throughout the Colony, in order that the public may know what lands are so held, and the conditions attached to such holdings. The Wardens have been urged to take steps to report all cases of non-work, and the Inspector of Mines has aided as far as practicable in this work. Such encouragement as could be has been given to miners to report cases in which lessees are failing to observe the conditions of their respective leases in regard to the employment of labour, and all complaints of non-work have been inquired into with the least possible delay consistent with fairness to the lessees.

The foregoing tables do not represent all the land occupied for mining purposes, as they do not include holdings under miners' rights or mineral licenses on Crown Lands, nor the areas mined under mineral conditional purchases. There are also large areas of private lands upon which mining operations are conducted which are not included in these tables.

GEOLOGICAL SURVEY.

I cannot speak too highly of the manner in which the Geological Surveyor in charge (C. S. Wilkinson, Esq., F.G.S., F.L.S.) and the staff under him perform the important duties devolving upon that Branch of this Department, and the ready and valuable assistance he at all times renders in furthering the interests of mining.

The

The Geological Surveyor in charge, during the year, inspected various parts of the Colony, including the Singleton, Molong, Clyde, Forbes, Parkes, Tomingley, Temora, Young, Nundle, and Hanging Rock Districts.

An application had been made for boring for water near Singleton, but on examination of the locality the formation was found to consist of shales and sandstones belonging to the lower coal-measures in which a supply of good water is not likely to be found; boring operations were, therefore, not undertaken. The same description of strata as those of Rix Creek, containing coal-seams and lenticular beds of iron ore, occur on the Dulcalmah estate, about 10 miles S.E. from Singleton.

In the Molong District, the silurian sedimentary strata, embracing large beds of marble limestone, have been upheaved by masses of porphyritic trap-rock, which appear at the surface, over considerable areas. This rock is traversed by numerous lodes of gossan, containing galena, which have been more or less extensively prospected, and found to contain both gold and silver, but not as yet in payable quantity. Copper Hill, which many years ago was worked for copper, also consists of this trap-rock, the joint fissures of which contain irregular masses of earthy carbonates and other ores of copper, sometimes associated with quartz, but not in regular lodes, and therefore the ore, though of rich quality, is difficult to mine for.

The seams of coal and kerosene shale recently discovered at the head of the Clyde crop out in a ravine 600 feet deep, which has been eroded through the Hawkesbury sandstone formation and into the coal-measures. Two seams have been opened—one 4 feet 9 inches thick, and the other 3 feet—and the coal is of good quality. The kerosene shale found is not of commercial value. The coal formation occupies a large area in this district, and it is believed that the seams will eventually be worked, and the coal shipped either at Jervis Bay or at Ulladulla.

The Western Gold-fields were examined chiefly in connection with the selection of the sites for prospecting for deep alluvial gold-deposits. The sites chosen were upon formations which are usually of a gold-bearing character; but the prospecting operations in no case resulted in the discovery of payable deposits. However, good service has been done in that the different sites have been tested once for all.

Mr. Wilkinson's report upon the geology of the Nundle and Hanging Rock Gold-field is of much interest, as showing that both the gold-reefing and alluvial resources of the field are far from being fully developed. The bed-rock formations are siluro-Devonian slates and sandstones, serpentine, and intrusive diorites, traversed by gold-bearing quartz-reefs, besides containing lodes of chromic iron, manganese, and copper. The ancient valleys crossing these formations have been filled with a great thickness of tertiary gold-bearing gravels overlaid by basalt. These gravels form the so-called "cement leads," which have already been profitably worked for gold when water has been available; but, owing to the drought which has prevailed during the last few years, alluvial mining has, with one or two exceptions, been almost at a standstill. The Geological Surveyor points out that there is a large extent of the gravel deposits yet to be worked, and that water for mining purposes could be brought on to the ground from the eastern falls of the Main Dividing Range, so that the future prospects of this gold-field are encouraging.

The Mining and Geological Museum of the Department has during the year received many additional specimens, both of practical and scientific interest, which are being arranged by the Curator, Mr. J. E. Carne. The number of specimens registered is 16,710. It was expected that the Museum would have been opened to the general public, but this was found impossible, as Mr. Wilkinson and Mr. Carne have had, in addition to the usual departmental work, to prepare the mineral and geological collections for the Colonial and Indian Exhibition in London, 1886; also to arrange for the display of the mineral exhibits of the private exhibitors, which the Department undertook to do at the request of the New South Wales Commission. The collections well represent our varied mineral resources, and particular attention has been given to the minerals of commercial value, especially to those for which efficient methods of treatment are desired. Some of the minerals have been sent in large bulk samples.

Mr. David, Geological Surveyor, has been chiefly engaged upon the completion of the map and sections of his geological survey of the Vegetable Creek tin-fields. These, together with his descriptive report, which treats exhaustively of the tin-bearing deposits, both from a geological and also practical mining point of view, are now in the printer's hands, and will shortly be published. Mr. David also inspected the country between Byrock and Bourke, and reports that the cretaceous formation, in which artesian water is likely to be found, extends for about 27 miles along the railway line, S.E. from Bourke. In the neighbourhood of Byrock the palæozoic rocks come to the surface and occupy an extensive area, and it is probable that within this area gold and other metalliferous deposits will be discovered.

Mr. David has furnished a description of the Wombeian Caves, which will shortly be published as a guide-book to these interesting caves.

The

The keeper of the Jenolan Caves reports that the number of visitors during the year at the caves was 770. To the Wellington Caves there were a great number of visitors, and to the Wombeian Caves.

Besides numerous mineral samples which miners have submitted to the Geological Survey Branch for general report as to value, &c., assays have been made of 1,428 samples, particulars of which are given in this report, under the heads of the several minerals.

MINING SURVEYS.

During the year ending December 31st, 1885, 1,702 surveys were made under the supervision of the Chief Mining Surveyor (E. F. Pittman, Esq.), comprising 1,172 mineral lease portions, 324 gold-mining leases, 91 mining tenements, 82 mining permits, and 32 tenants' leases and public-watering places.

Twenty-five surveyors were employed, and of these thirteen were paid partly by salary and partly by fees, the remainder being paid by fee only. Three surveyors (paid by salary and fees) have been kept employed in the Northern, Western, and Southern Districts of the Colony respectively, and I have thus been enabled to deal, within a reasonable time with the isolated applications for leases of small areas which are being continually made, and which have hitherto caused great delay by reason of their being too scattered to pay surveyors for the time consumed in surveying them.

In the years 1883 and 1884 the numbers of mining surveys made were 620 and 1,188 respectively. It will thus be seen that a large and progressive increase has occurred. This is owing to a considerable extent to the discovery of silver-bearing lodes at Silverton, Sunny Corner, Eamaville, Rockley, and other places, where the demand for leases of mineral land was so great as to render prompt measurement a matter of considerable difficulty.

Towards the end of the year the surveys under the Public Watering-places Act were placed under my supervision, and I recommended the appointment of three surveyors (paid partly by salary and partly by fee) whose duties are to survey a tenant's lease and a public watering-place (reserve) at each of the tanks or wells recommended by the Chief Inspector of Public Watering-places. By these means areas of the most suitable description for leasing under the Act are being surveyed as rapidly as possible.

The work performed in the Charting Branch during the year cannot fail to be regarded as satisfactory, showing, as it does, a marked improvement upon previous years. Thus, while 1,889 applications for gold-mining and mineral leases were received in the Branch during the twelve months, 1,881 were charted and finally dealt with, in addition to a large number of miscellaneous papers, the preparation of twenty-four parish and gold-field compilations, and the continuous charting of locality maps for the Wardens' Clerks' Offices.

The following is a list of the maps compiled and published during 1885.

Map of the parishes of Boyd, Bald Nob, Bloxsome, and part of Severn, in the Peel and Uralla Mining District.

Office compilation of gold leases, Black Range Gold-field.	
" gold leases at Walgett and Irralong, in the Gloucester Gold-field.	
*Diagram of ear-marks, Forbes District.	
The above list does not include locality maps charted up for local offices.	

The record of work in this Branch is in the highest degree satisfactory, and reflects great credit upon the Chief Mining Surveyor, the Chief Draftsman, and the gentlemen employed under them. In view of such results, I feel justified in hoping that the limit of time within which, in my opinion, leases should be granted will soon rarely be exceeded except in special cases.

DIAMOND DRILLS AND WATER AUGERS.

During the first part of the year the drills and augers were worked under the supervision of Mr. W. B. Henderson, but that gentleman resigned his position in the month of September. Since then they have been worked under the supervision of the Inspector of Mines (Mr. W. H. J. Slee). When Mr. Slee took charge there were twelve drills in the field. Of these, six were boring, four were in difficulties, and two were idle; and one was in the store. Since then eleven drills have been actively engaged in boring. The aggregate depth bored during the year was 11,325 feet 11 inches (581 feet 11 inches more than was bored in 1884), at a cost to the Department of £9,619 18s. 6d., including wages, diamonds, materials, wear and tear, carriage, and other field expenses, but exclusive of office expenses, equal to 16s. 11½d. per foot, or of £10,811 3s. 9d., inclusive of all expenses, equal to 19s. 1½d. per foot. The cost to the persons for whom the boring was performed was £9,235 13s. 11d., equal to 16s. 3¾d. per foot, the Minister having, under the regulations, granted reductions upon the prices contracted for to the extent of £406 6s. 7d. The table published with the Superintendent's report shows that the average cost per foot from the 1st January, 1885, to the 12th September was 17s. 7½d., and from the 14th September to the end of the year the cost per foot was 15s. 7½d. The management of these drills under Mr. Slee has been highly satisfactory, and the zeal with which

which he has performed his duties is beyond all praise. In justice to that gentleman, I trust I shall be pardoned for so far anticipating events as to quote from a report recently furnished showing the result of the operations of the drills for the quarter ending 31st March, 1886. This report shows that the total cost of working the drills, including office and all other expenses, for the quarter (except interest on the capital invested) was £1,571 18s. 2d., while the earnings of the drills during that period was £1,583 10s. 10d. The aggregate depths bored during the quarter was 1,913 feet 6 inches, consequently the cost to the Department was 16s. 5d., whereas the cost to the public was only 16s. 6½d. per foot, which is much below the price that would have to be paid to private contractors for such work. From these facts it may be seen that by means of these drills the work of developing the mineral resources of the Colony is being materially aided without cost, or with very trifling cost, to the State. These drills have hitherto been chiefly employed in proving the coal-measures, which is an important work, as it is most desirable this Colony should retain the premier position in the export of coal, and that ample provision be made for the rapidly increasing demand for coal both at home and abroad, as each new colliery opened affords another field for the employment of labour. I am aware it has been urged that the original intention was that these drills should be employed in developing our auriferous and metalliferous deposits, and that the working miners, as well as the Colony generally, would be thereby benefited to a greater extent than by piercing the coal-measures for capitalists. This may be quite true, but I think it must also be conceded that though collieries must almost necessarily be opened up by capitalists the Colony generally, and the operative miners specially, derive advantage from the development of our coal deposits, and that up to the present time there are scarcely any known auriferous deposits that could be advantageously prospected by means of the diamond drill. For the purpose of prospecting deep alluvial leads which underlie deposits of basalt, they are specially valuable, and there may, it is to be hoped, yet be found employment for them in that description of work, but hitherto there has been no demand for them in that direction. For the purpose of prospecting lodes there has been comparatively no demand, and it may be questioned whether they would prove a valuable aid in this kind of prospecting, because, though they might readily prove the existence of the lode to or at a given depth, the core obtained might afford no certain indication of the richness in mineral of the lode pierced.

During the year eleven augers have been employed in the search for water, with the result that twenty-five bores have been sunk on stock routes for the Government to an aggregate depth of 3,161 feet 7 inches, the total cost per foot being £1 18s. 0½d. Thus it will be seen that the aggregate depth bored in 1885 exceeded the depth bored in 1884, and the cost per foot was less. In four of these bores fresh water was obtained, namely: In one bore on the Bourke and Wanarring line, at a depth of 427 feet, the quantity being 4,320 gallons per diem; in two at Goodooga, at 68 feet and 67 feet respectively, the quantity in each bore being 24,000 gallons per diem; and in one on the Hay route, from 84 feet to 200 feet, the quantity being 3,600 gallons per diem. In addition to these, good stock-water, to the extent of 1,440 gallons per diem, was obtained on the Wilcannia route, at 110 feet to 145½ feet, and brackish water, considered fit for stock, was obtained on the Wilcannia and Silverton route, at 290 feet 293 feet respectively, the quantity in each bore being 2,000 gallons per diem; and it was also obtained in a third bore, at 49 feet, quantity not reported. Four bores were sunk for private persons, to an aggregate depth of 683 feet, at a cost to the Government of 9s. 8½d per foot, and to the persons for whom they were sunk of 8s. 1½d per foot. In four of these bores fresh water was obtained, namely, at 158 feet 9,792 gallons per diem, at 182 feet 12,672 gallons per diem, at 150 feet 12,000 gallons per diem, and at 173 feet 17,280 gallons per diem. These bores are all on the Gorian Station. The tables attached to the Superintendent's report contain interesting details of the work performed by the drills and augers. The water-map contains a large amount of additional information, and will in course of time become a valuable compilation.

The report of the Inspector of Mines gives the number of fatal and non-fatal accidents in mines other than coal-mines, and, as usual, contains important information concerning the numerous localities inspected by him during the year.

The Prospecting Vote for 1885 has, I regret to say, been expended without any satisfactory result so far, except that in every case work has been done for the money expended.

ROADS, STREETS, AND GATES.

The officers of this Branch have, under the supervision of Mr. G. E. Herring, the Chief Clerk of the Department, performed their work in a most expeditious and satisfactory manner. As will be seen from the following statement, the amount of work disposed of was less in 1885 than in 1884, but in consequence of the death early in the year of Mr. W. C. Bell the Branch was deprived of the services of a most efficient officer, and owing to the great pressure of work in other Branches of the Department it was not possible during the year to supply his place.

The

The following is a comparative statement of the work done in the Roads and Gates Branch :—

	1883.	1884.	1885.
Number of papers registered	5,260	5,520	3,858
Number of letters written	2,502	2,695	2,660
New roads and streets	320	263	133
New gates	70	87	42
Number of plans sent to the Executive Council	359	249	186
Tracings and book of reference sent for exhibition	354	273	168

Besides the above, the returns for Parliament, the preparation of papers for laying on the tables of the Houses of Parliament, supervision of advertisements, distribution of papers and stores, the time of Mr. Ormiston and Mr. Bransby, both officers of this Branch, is frequently occupied upon miscellaneous work of an urgent necessity, on account of their efficiency and promptitude.

I have much pleasure in again acknowledging the able assistance so readily afforded me by Mr. Herring (the Chief Clerk), Mr. Binny (the Registrar, who, I regret to say, is absent on sick leave), Mr. Farr (the Accountant), and the heads of Branches generally. I also gladly acknowledge my indebtedness to the Geological Surveyor in charge, the Chief Mining Surveyor, the Inspector of Mines, and the Wardens, for their valuable assistance.

MINERAL PRODUCTS.

The aggregate value of our mineral products to the end of 1885 is £66,843,759 8s. 3d., the value of the output for the year 1885 being £2,775,175, showing a decrease, as compared with 1884, of £228,656, mainly due to the reduced value of copper, which has led to a reduction in the output. The decrease in the output of tin is also considerable, though the prospects of the tin-fields have improved. As regards silver and silver ores, it will be noticed that the quantity of ore exported in 1885 is very much less than in 1884; but the quantity of fine silver is very much greater; this, of course, is due to the fact that at the principal mines the ores are being smelted on the ground. On the whole the output from our silver-mines in 1885 is not so much in excess of that of 1884 as might have been expected.

The following table shows the aggregate value of minerals the produce of New South Wales for the years 1884 and 1885 respectively compared :—

Minerals.	Quantity.	Value.	Quantity.	Value.	Increase in value.	Decrease in value.
	1884.	£ s. d.	1885.	£ s. d.	£ s. d.	£ s. d.

Notwithstanding the decrease in the value of our mineral products for 1885 it still exceeds the decennial average by £295,891; and I venture to think that, even should the depression in copper-mining continue, the output from other mines during 1886 will help us to recover lost ground.

GOLD.

I regret to have to notice a further decrease in the yield of gold. That for 1885, as compared with 1884, shows a decrease in value of £16,626 12s. 2d. Judging from the reports of the officers stationed on the gold-fields, this may be attributed wholly or mainly to the drought. I had hoped that the provision in the Mining Act Further Amendment Act of 1884 for the granting of special leases of worked auriferous land, might have led to the reworking of some of our abandoned gold-fields, which would probably prove remunerative if worked on a large scale with system and economy. So far, however, little advantage has been taken of this important provision, probably owing, in some degree, to the scarcity of water for mining purposes. The following extracts from the reports furnished by the Wardens and Mining Registrars affords some indication of the state of mining in the several districts, and the causes of the depression.

In the Bathurst District the Wardens and Mining Registrars report:—In the Bathurst Division there is no alluvial mining worth mentioning, and no sluicing owing to the scarcity of water. At Cook and Co.'s battery, at Dark Corner, a trial crushing of 400 tons of quartz yielded 292 oz. of gold; the reef is 3 feet wide at a depth of 100 feet—500 tons yielded 1,100 oz. of gold. At Oberon a payable reef had been found, and a small battery erected; a trial crushing gave £350 worth of gold. At Blackman's Swamp a rich leader has been discovered, which, though small (1 to 6 inches wide), has given some good returns, the last crushing of 5 tons yielding 51 oz. At Mount M'Donald only 100 men are now regularly employed, and there has been a falling off in the yield of gold, the output for 1885 being about 4,000 oz.; 1,642 tons of quartz crushed yielded 2,861 oz. 7 dwt. 17 gr., giving an average of 1 oz. 14 dwt. per ton, the highest yield being 3 oz. 1 dwt. per ton, and 1,014 oz. was obtained from a re-crushing of a parcel of tailings. At Trunkey the yield of gold in 1885 exceeded that of 1884 by over 400 oz. The rainfall in the division was quite insufficient for sluicing purposes. At Pharo's Point, on the northern bank of the Abercrombie River, some miners worked during the last six months of the year and obtained nice gold. The Pine Ridge Co. crushed 2,725 tons of quartz for 432 oz. of gold; the deepest level is 120 feet. The total quantity of gold won in the Trunkey Division during the year was 718 oz. 12 dwt. 5 gr.

In the Carcoar Division the yield of gold in 1885 was less by 2,966 oz. than the yield for 1884, the decrease being due to the scarcity of water. From the Brown's Creek mine about 1,500 oz. of gold was won; no new finds of any importance reported during the year. The mines at Gally Swamp appear to be payable. The quantity of gold sent from this division during the year was 9,073 oz. 6 dwt. 3 gr., which probably includes the gold won at Mount McDonald. In the Tuena Division 400 oz. 10 dwt. of gold was won during the year, viz. 300 oz. from alluvium, and 100 oz. 10 dwt. from quartz. In the Orange Division, Ophir continues to attract attention. The Bluff Amalgamated Gold-mining Company is pushing on operations which must result in developing a locality on which so many have been speculating for years past. In sinking their several shafts good gold has been procured; they have a shaft down 80 feet, and expect to meet the tunnel in about 250 feet. About 200 yards from this shaft they have sunk another 60 feet, and have a large body of quartz ready for stoping, which will average 9 dwt. per ton. The engine and battery are in good order, and crushing will be commenced shortly. At the Belmore, two men are working with prospects of success; they have a large quantity of stone at grass, which

Iron, Antimony, Asbestos, and Bismuth produced in the Colony of New South Wales during the last ten years:—

which it is thought will pay well. The alluvial mines are paying moderately, but no startling finds have been reported. Lucknow maintains its reputation under the able management of Mr. Newman. Bonanzas continue to be unearthed, and the ores which are exported for treatment yield a satisfactory return. At Forest Reefs the claims are being worked with varied success. The Old Lumpy Lead shaft is down 200 feet, and payable gold is found in the wash with fossil nuts, leaves, and woods.

In the Mudgee District the Wardens and Mining Registrars report:—The yield of gold in this district in 1885 shows a falling off of some 1,500 oz. as compared with the yield for 1884, which may be ascribed to the drought. At Gulgong some hopes are entertained that the Nil Desperandum and Britannia mines will prove successful. In the former claim a seam of payable wash has been cut in the main drive from which some thousands of tons payable wash will probably be raised. The claims on the Black Lead are not progressing satisfactorily. In Stott's paddock, Mayes and party's claim has been payable from the commencement. The quantity of gold sent to Sydney by the banks was 1,017 oz. from Gulgong and 3,148 oz. from Mudgee. At Tomingley mining has somewhat improved; the yield of gold from quartz reefs during the year exceeds that of the preceeding year by about 1,000 oz., although only about fifty-five men are now employed; this is mainly due to the success of Messrs. Moore, Mooney & Co., at No. 1, North Myall, who obtained 666 oz. of gold from 300 tons of quartz. The battery at Myall crushed during the year 1,050 tons of quartz for 1,551 oz. of gold. The battery at Tomingley crushed 1,166 tons for 593 oz. 13 dwt. 5 gr.: Total for the Tomingley Division, 2,144 oz.

In the Tambaroora and Turon District the Wardens and Mining Registrars report:—Sofala Division: At Spring Creek, 96 tons of quartz were crushed for 21 oz.; the depth of the shaft is 284 feet, and the deepest level 275 feet. At Solitary Reef, 448 tons of quartz were crushed, yielding 143 oz., 8 dwt.; the depth of the shaft is 400 feet, and the deepest level 370 feet. A trial crushing of 10 tons from Quart-pot Reef yielded 5 oz. 11 dwt. per ton. The total yield for the division was 3,815 oz. 0 dwt. 20 gr., viz. 2,015 oz. 0 dwt. 20 gr. from alluvium, and 1,800 oz. from quartz. In the Hill End Division the yield from quartz was 2,540 oz. 1 dwt., and from alluvium 1,363 oz. 9 dwt. 10 gr. Total yield for the division, 3,903 oz. 10 dwt. 10 gr. At Ironbarks, Messrs. Liddell have struck a really good reef, at a depth of 90 feet. Many of the abandoned reefs have been taken up lately with the object of testing them at a depth. Two Companies have been at work at the Mookerawa junction of the Macquarie River during the year. One has been engaged in cutting races and opening the mine, the prospects of which are good; the plant consists of an engine 100 h.p., and two large pumps capable of throwing 78,000 gallons per hour. The other Company is not working at present, but expect to start shortly. At Spring Creek, on the Macquarie, near Burrendong, a nugget weighing 62 oz. was found. The quantity of gold won from alluvium was 1,046 oz. 11 dwt. 12 gr., and 97 oz. 11 dwt. from quartz. Total for the division, 1,144 oz. 2 dwt. 12 gr.

In the Lachlan District the Wardens and Mining Registrars report:—A fair amount of prospecting has been done throughout the district, but no discoveries of importance were made. The only drawback to the progress of mining in the Parkes Division was the want of water. Some very handsome returns have been obtained from a line of reef which appears to be an offshoot of the Buchanan, on which several claims are working; the shoot of gold appears to be rich and extensive. This discovery should encourage prospectors, as the reef is in the centre of ground which had been worked for years, and abandoned over and over again. From the Buchanan reef, 1,081 tons of quartz yielded 4 oz. to the ton. From Scrubby Plains 220 tons yielded 3 oz. per ton. It is estimated that seventy men are working on the old alluvial leads, and 110

on

on the reefs. The total quantity of quartz crushed in the division was 2,947 tons, yielding 5,777 oz. 11 dwt.; the total quantity of alluvium was 545 tons, yielding 129 oz. 17 dwt. 12 gr. At Bald Hills a considerable amount of money has been expended in labour and machinery without success, though the owners of the mines are still sanguine. The lead is patchy—in places payable, and even rich, but in other places very poor. At Strickland's reef, between Forbes and Parkes, no work is being done for want of a battery on the ground. The reef is large, but the stone is not sufficiently rich to pay for carting it some 12 or 13 miles. The yield of gold in the Forbes Division was 1,200 oz. 3 dwt. 12 gr. At Grenfell there are numerous reefs extending nearly 3 miles that have yielded payable stone to a considerable depth, and are thought by experts likely to prove permanently payable if tested to greater depths. Of these, O'Brien's reef is said to have yielded gold to the value of £100,000, the Homeward-bound to the value of £80,000, the Britannia to the value of £50,000, and the Enterprise to the value of £30,000. Several parties of miners are working old alluvial ground, which they say pays wages. On the Enterprise reef Pettet and party crushed 83 tons for a return of 1 oz. 14 dwt. per ton, and they have 40 tons equally rich at grass. Lawson and party raised 60 tons from Lawson's reef, estimated to yield 1 oz. 10 dwt. per ton, but not crushed. Mathews and party crushed 47 tons from the Homeward-bound reef for 14 dwt. per ton, and have about 180 tons ready for crushing. At Cargo there is only one mine, the Ironclad, at work; 90 tons of quartz from this mine yielded 154 oz. At Canowindra there are several reefs being worked, but there is a great deal of mineral in the stone which requires special treatment. 343 tons of quartz crushed yielded 303 oz. 14 tons of stone from the London reef, Boney's Rocks, gave a yield of 32 oz. 11 dwt. of gold. At Young mining is at a very low ebb. A Company has been formed to work the lead at Possum Flat on a large scale. They have large and complete plant on the ground. The claim comprises 42 acres. The Company is at present sinking a third shaft and erecting machinery. The lead is 80 feet deep, with a heavy underground flow of water. The mine will shortly be in complete working order, and great results are anticipated, as the former Company obtained some rich wash. The quantity of gold purchased by the Banks was 253 oz. 6 dwt. 19 gr. At Murrumburrah the New Cuningar Quartz-mining Company, on the Marshall McMahon reefs, has opened a reef 4 feet wide, well-defined. Fully 20,000 tons of quartz is visible and ready for stoping, besides 1,200 tons at grass ready for treatment, estimated to yield 2 oz. per ton of gold, and from 2 to 10 oz. of silver. The shaft is 212 feet deep. The plant, including a Campbell Probert smelter, treats 20 tons per day, and saves 90 per cent. of the gold and silver. At Blind Creek about 100 miners are making wages. The few miners at Wombat and Little Wombat get excellent returns. At Barmedman the prospects are improving, owing to the reported discovery of payable gold in reefs supposed to be almost valueless. In the Jackson Company's mine the tributors have obtained good results by driving at the 79-foot level. In No. 2 North Ada reef several excellent crushings have been obtained from leaders varying in width from a few inches to many feet. Two miners obtained payable gold at the Hard to Find. 2,741½ tons in this division yielded 1,797 oz. 14 dwt., the highest yield being 2 oz. 12 dwt. 8 gr. per ton, and the lowest being 4 dwt. 7 gr. Crushing operations had to be suspended during part of the year owing to the scarcity of water. At Temora about 25,000 loads of wash-dirt was puddled, the yield therefrom being 4,500 oz. of gold, equal to 3 dwt. 14 gr. per ton. Buckley and party obtained good returns from some old ground, including one nugget weighing 50 oz., and several smaller ones, the particulars of which cannot be furnished by the Warden, but the following are the weights of some, viz:—1 oz., 11 oz., 17 oz., 5 oz., and 9 oz. One party obtained a patch of nuggets varying in size from 2 oz. to 20 oz.; the Warden estimates the aggregate weight at 250 oz. The largest quantity of gold got in one patch was found at Upper Temora (part of this gold was purchased for the Colonial and Indian Exhibition consisting of three specimens containing 308·35 oz. of gold, valued at £1,233 8s.) the value of the patch was £4,300, besides some specimens still on hand. This was obtained from a claim that had been idle for months. The shaft is 90 feet deep, and the reef is 2 feet wide. Nuggets are not confined to any particular part of the lead or leads but all of them were found within an area of 3 miles. The South Australian Company crushed 1,516 tons of quartz for 1,131 oz. of gold. They also crushed 40 tons from other claims, which averaged 1 oz. per ton. From the Homeward-bound mine 115 tons of quartz were raised, 90 tons of which were crushed, yielding 156 oz. of gold, when work was stopped under an injunction. From the Evening Star mine at Sebastopol 650 tons of stone were crushed, yielding 10 dwt. per ton; 150 tons still at grass; the shoot of gold is 9 feet wide, and is visible 45 feet along the reef. The yield of gold in the Temora Division was 6,222 oz., being 5,111 oz. less than the yield for 1884. In the Junee Division scarcity of water has retarded mining operations. 77 tons of quartz crushed yielded 1 oz. 2 dwt. 6 gr. per ton. The yield of gold was 65 oz. 12 dwt. 5 gr. from alluvium and 85 oz. 15 dwt. from quartz. A parcel of quartz, 19½ tons, from Cowabec about 45 miles from Temora, between Junee Junction and Narrandera, a new and promising locality, was crushed at Barmedman, for a yield of 51 oz. 13 dwt., equal to nearly 2 oz. 13 dwt. per ton. Prospecting was carried on at Temora during the year under Government supervision. Seventy shafts were sunk, varying in depth from

7 feet to 152 feet, the aggregate depth about 4,000 feet. In most of the shafts slight traces of gold were found, but although the ground was also tested, in such cases by driving, gold in payable quantity was not discovered.

In the Cobar district the Warden reports:—At Cudgellico the Griggs Gold-mining Co. has stopped work, owing to some dispute amongst the claimholders. Up to the time of stopping 186½ tons of quartz had been crushed for a yield of 94 oz. 6 dwts. 12 grs. of gold.

In the Albert district the Warden and Mining Registrar reports:—In the Milparinka division the rainfall for 1885 was exceptionally heavy, whereby the mining industry has been benefited, the miners being enabled to clear off all their accumulated heaps of wash-dirt; it also led to the opening up of a deep lead at Billygoat Hill, Mount Brown, by McKenzie and party, who struck payable gold at a depth of 55 feet, the wash being 18 inches thick, and averaging 2 oz. per load. Three other parties found the lead at greater depths, and obtained payable gold, average yield from 1 oz. to 2 oz. per load. Several other shafts were sunk along the course of the lead, which was found to be dipping towards the west so rapidly that at 210 feet no bottom could be touched, but water of excellent quality was found, and the quantity was so great that it could not be overcome by the miners' ordinary appliances, consequently work was suspended, and some of the claims have been abandoned. The yield from the claims on this lead has averaged about 1½ oz. per load, and several nuggets have been found weighing from 1 dwt. to 3 oz. At the One-mile, Mount Brown, the lead of gold that was found under the cement has been picked up again 400 yards further to the south, and two parties are on payable gold at a depth of 56 feet, the yield in one case being 4¼ oz. to the load. One puddling machine has been steadily at work upon surface dirt, and has realized 1½ dwt. per ton. At Good Friday the gold is found in patches from the surface to a depth of 18 feet, but the few parties working these have been only moderately successful. At the Reefs on Warratta Creek, the Wittabreena Co.'s crushing machine has been intermittently at work, the yield being ½ oz. per ton. Some prospecting is being done on other lines of reef with promise of success, gold being seen freely in the quartz. At Tiboburra the puddling machines have been steadily at work, and have averaged about 1½ dwt. per ton. Nuggetty Gully still continues to support a few miners. The yield of gold in this division during the year is estimated at 2,100 oz. In the Wilcannia division several parties were prospecting for gold during the year, but their operations were restricted to a limited area, as they had to depend on the station tanks for water.

In the Tumut and Adelong district the Wardens and Mining Registrars report:—In the Gundagai division there was a larger area being prospected during the year than for some time past, and there are some indications of a revival in gold-mining. Some large ventures—notably the Great Victoria at Tarrabandra, the Bongongolong at Burra, and another company at Mitta Mitta, are about commencing operations. In the Queanbeyan division the difficulty of extracting the gold from the stone in Blatchford's mine at Captain's Flat by the ordinary process has been found by assay to be due to the presence of silver and lead in paying quantities, and a Pacific water-jacket smelter is now being erected for the purpose of treating the ore by smelting. The furnace is expected to be in blast shortly, and the assay furnace is nearly completed. Montgomery and party raised from their mine 924 tons of stone, which yielded 239 oz. of gold. During the last six months of the year work was suspended owing to want of water. In the Tumbarumba division the sluicing at the Burra Company's claim has paid moderately well, but the other sluicing claims have scarcely paid wages. The Isabella Reef, at Ouric, has been steadily worked with improving prospects; the stone contains an appreciable quantity of silver. As far as known 1,560 oz. of gold was sent from this division during the year, besides 1,341 oz. of bullion from the Isabella Reef, worth 28s. per oz. At Kiandra there are five companies at work, but want of water caused some of them to suspend sluicing operations, and has seriously retarded all mining works. The past year was the worst for water during the past 20 years. At the New Chum Hill Claim work was carried on almost continuously, the yield being 1,065 oz. 19 dwt. 1 gr. This company intends to build a dam at the Three-mile and to increase the dimensions of their race in order to provide for working two nozzles. At the Nine-mile claim hydraulic sluicing was carried on for 238 hours, yielding a return of over 40 oz. of gold; total yield at Kiandra, about 1,773 oz. The report of the Inspector of Mines contains some interesting information concerning the Kiandra Gold-field. In the Adelong division the great Victorian Company stopped work in the early part and did not start again till late in the year, consequently the quantity of stone crushed was less by 1,000 tons than the previous year. Some prospecting was done during the year which resulted in the discovery of some gold-bearing leaders. The tributors in the Curragong Mine crushed 192½ tons of quartz for a yield of 430 oz. 11 dwt.; from Gibraltar Hill, 32 tons crushed yielded 72 oz. 12 dwt.; from Mount Ardrah 120 tons crushed, yielded 216 oz. 17 dwt.; from Tarcutta one parcel of 11 tons yielded 50 oz. 2 dwt. The quartz-reefs have been pierced to a depth of 1,000 feet in three different places. Amongst the alluvial mines a good deal of work has been done, especially on Shepard's lease, with satisfactory results; the monthly yields varied from 320 oz. to 350 oz.

3,030 tons of quartz crushed in the division yielded 2,568 oz. 2 dwt., and 5,253 oz. 2 dwt. 18 gr. were won from alluvium; total yield for the division, 7,821 oz. 4 dwt. 18 gr., were won from alluvium, and at Reedy Flat 616 oz. At Yarrara the Rangatira Company during the year crushed 700 tons for a yield of 800 oz.; depth of shaft, 208 feet; deepest level, 200 feet; width of reef, 15 inches; 50 oz. obtained from alluvium. In the Albury division there was very little mining in old workings. There were three new finds—one at Black Range, another at Splitters' Creek, the third at Hawk's View Estate; both the latter in private property. The Soudan Company at Splitters' Creek have erected first-class machinery, and are busy crushing stone taken from a face 20 feet wide, there being no defined reef to a depth of 45 feet. The stone is estimated to yield 10 dwt. per ton right through. The find at Hawk's View is in old ground and appears likely to turn out well. Weyland and party's claim at Black Range was discovered in November. They obtained some 15 oz. of gold almost on the surface.

In the Southern District the Wardens and Mining Registrars report:—In the Braidwood division 700 oz. of gold was won from alluvium at Major's Creek; 25 tons of quartz from the Risc and Shine Mine yielded 36 ozs. of gold, and 27 cwt. of mundic produced 3 oz. 16 dwt. of gold; 5 tons of refuse mundic tailings from Darguc's Reef were treated, from which 11 oz. 3 dwt. of gold were smelted. At Little River, owing to the drought, alluvial mining was restricted to river-bed workings. In quartz-mining the Daydream Company raised 174 tons from above water level, and crushed 74 tons for a yield of 92 oz. 10 dwt. From the adjoining mine a trial crushing of 6 tons gave 52 oz. The yield at Little River for the year was alluvium, 900 oz.; quartz, 144 oz. 10 dwts. At Nerriga a large quantity of wash-dirt is stacked waiting for water to sluice—yield from alluvium for the year, 500 oz. In the Nowra division the Homeward Bound mine has furnished nearly the whole of the gold won, the yield being from 1 to 7 oz. per ton, the quantity crushed being 851 tons, and the yield 2,410 oz. of gold. There is still a large quantity of stone ready to crush which is estimated to contain 3 oz. to the ton. The stone is obtained from a large cavern near the top of the hill, 200 or 300 feet above the water. This Company would have crushed more but for the scarcity of water. The Pioneer Company crushed 95 tons for 77 oz. The Pinnacle Company, 20 tons for 5 oz. The Seek and Find Company, 95 tons for 7 oz. 6 dwts. Total, 1,061 tons for 2,502 oz. 16 dwt. Work has been resumed at the shaft which was being sunk at the junction of the Shoalhaven and Kangaroo Rivers, and the bottoming of it is awaited with some anxiety. Mr. Moss has been boring on the Nine-mile Beach, near Coolangatta, and has obtained some coarse gold, but the boring has been stopped by a quicksand 4 or 5 feet below the surface; it is now proposed to sink a shaft, lining it with pine boxes. In the Araluen division the severe drought interfered with mining operations; some of the claims frequently could not be worked for want of water. The quantity of gold won from alluvium was 4,962 oz., and from 247½ tons of quartz crushed the yield was 219 oz. 7 dwts., from 26 cwt. of pyrites 4 oz. 14 dwts. of gold; yield for the division, 5,187 oz. 9 dwts. At Eurobodalla 480 oz. was won from alluvium. Moruya, yield from alluvium 421 oz. 9 dwt. 4 gr. In the Wagonga division scarcity of water has prevented the crushing of stone to some extent. Another reef has been discovered half-a-mile from the Belle of Australia line and was being tested but had not been proved. At Nelson Creek, Tanja, a reef and some alluvium containing fair prospects have been discovered. At Tin Pot, on the Turon River, fair prospects have been obtained from a quartz-reef. At Montreal very rich stone or rather specimens have been taken from a shaft.

In the Hunter and Macleay Districts the Wardens and Mining Registrars report:—The Copeland gold-field has been gradually declining till it is supposed to have reached the lowest point. The causes are, in the first place the drought, which has prevented the crushing machines from working, except at intervals, when a passing shower gave a temporary supply of water; in the second place, want of capital seriously militates against the systematic and only mode of profitably working this field. At present the miners simply pick out the richest shoots of gold, leaving the poorer stone behind; this is a most expensive mode of working and destroys the value of the mine, but miners without capital cannot afford to break down the whole face of quartz and cart it to the machine. It is estimated that only seventy miners were working during the year, and the value of the gold won was £3,498 17s. 6d. At the Rainbow machine 480 tons of tailings were treated merely by the ordinary battery appliances, and a yield of 5 dwt. per ton obtained. From this it may be inferred that a considerable quantity of gold has been lost on this field. Again, 50 tons of refuse stone crushed yielded 10 dwt. of gold per ton. These facts indicate the careless way in which the claims have been worked, and may to some extent account for the want of success attending the Companies who owned them. The Centennial and Baal Gammon Co. continue to push forward its tunnel at the two creeks to cut the old Centennial Reef. This reef paid handsomely till work had to be discontinued owing to the impossibility of keeping down the water. It was decided to cut the tunnel for the purpose of draining the ground and working, at a less expensive and more effective mode of working the reef than erecting pumping machinery at the summit of the hill. The tunnel is now 671 feet into the hill, and it is expected the reef will be cut in another 100 feet. The Boramel Reefs have been worked with just sufficient labour to keep them going. None of the stone has yielded

yielded less than 4 oz. per ton in crushings of 15 to 20 tons, but as the nearest battery is 8 miles distant over mountainous country the cost of carting is too great to leave a profit even on such a yield. At the Bowman the only Company at work is now on good stone. The quantity of stone crushed in this division was 1,333½ tons, and the yield 1,007 oz. 5 dwt. 2 gr. Two claims were worked in the Bulladelah division on the Coolongolook Reefs; from one a large quantity of stone was sent to Sydney for treatment. The Warden does not know the result, but he saw gold in every piece of stone he picked up. At the other a large amount of work has been done in retimbering the shaft and getting rid of the water.

In the Peel and Uralla district the Wardens and Mining Registrars report:—At Fuller's Reef, in the Scone division, 205 tons of quartz was crushed by Williams and party for a yield of 196 oz. of gold. At 400 feet from the surface stone has recently been found which yields 1 oz. per ton. One or two new reefs have recently been discovered, the stone from which looks remarkably well. 94 tons of quartz from the Boozer's Reef yielded 100 oz. The total quantity of stone crushed at Moonam Brook was 325 tons, yielding 315 oz. of gold. At Stewart Brook 300 tons of quartz raised and crushed yielded an average of 1 oz. per ton. In the Nundle division a very decided improvement in quartz-mining was observable during the year; several mines are being worked vigorously, and some are paying. Alluvial mining has been almost at a standstill for want of water. Rich gold has lately been found at Spring Gully, near the Hanging Rock, the depth of sinking being 40 feet. An assay of ore from the Mount Pleasant copper-mine showed that it contained gold at the rate of 12 dwt. to the ton. The gold won in this division during the year was 2,647 oz. At the Marquis of Lorne mine, 126 tons of quartz crushed yielded 259 oz. 15 dwt. of gold. From the Princess Louise mine, 300 tons crushed yielded 100 oz. At Mount Pleasant 2,500 tons of cement crushed yielded 179 oz. 15 dwt. 7 gr. From alluvium 2,107 oz. 9 dwt. 17 gr. was obtained. In the Armidale division the small yield of gold is attributed to the dry season, to want of machinery, and the paucity of capital. The Eleanor G. M. Co. crushed 2,340 tons of quartz for a yield of 1,499 oz. 1 dwt. 22 gr. of gold. The Isabella Co. have raised 250 tons of quartz ready for crushing, but work has been suspended owing to defective machinery. At the rush to Tilbuster, now named the Duval Gold-field, about 6 miles northerly from Armidale, good prospects were obtained in shallow ground near Sandy Creek, and in the bed of the creek over 100 men are at work and appear disposed to give the place a fair trial. No very rich finds have been reported, though it is alleged gold is now found in payable quantities. It is difficult to ascertain the quantity of gold won in the division, but as far as reported the quantity is about 2,760 oz. In the Uralla division the yield of gold was 1,148 oz.; want of water restricted mining operations and especially sluicing. In the Barraba division most of the miners were idle during a great part of the year owing to scarcity of water; Fletcher and party were breaking down good-looking quartz; and Duke and party struck rich stone in Opossum Gully; 181 oz. 9 dwt. 16 gr. was obtained from alluvium, and 51 oz. 8 dwt. 12 gr. from quartz during the year. In the Bingera division mining operations were almost suspended owing to the limited rainfall. At Bobby Whitlow some of the reefs are showing good stone. The yield from quartz was 400 oz., and from alluvium 100 oz. In the Glen Innes division there has been an increase in the production of gold caused by the settlement of about 60 Chinese on the old gold-fields at Oban, in consequence of their inability to procure employment on the Vegetable Creek tin-fields. Under the Act to further amend the Mining Act a special lease has been applied for, and capital to the extent of £3,000 is being expended in cutting through a granite bar, for the purpose of draining a flat with a view to working the underlying deposit of gold. At Glen Elgin also a special lease has been applied for and capital is being expended in working a portion of a river-bed. All the gold found in this division contains a large percentage of silver.

In the New England district the Warden and Mining Registrars report:—In the Tenterfield division a steam engine has been employed at Boonoo Boonoo in pumping, by means of which some new land has been successfully worked, and another steam engine is being erected, and will possibly open up a large extent of ground which formerly could not be worked in consequence of the underground water. At Timbarra extension machinery is being erected on the Surface Hill Mine, to test by crushing the hard granite and the dykes of decomposed granite in which the gold is found. Ground and hydraulic sluicing paid well on this mine so long as water was available. Mr. Horton is working a similar deposit at Poverty Point by crushing, with satisfactory results. This stone is obtained from a quarry at the side of a hill; the yield brings 9 or 10 dwt. per ton. About 500 oz. has been won from the reefs at Pretty Gully during the year. At Solferino some very rich specimens were found; 300 lb. treated at the Mint yielded 78 oz. 10 dwt.; numerous other parcels have been found during the year. From alluvium 135 oz. 4 dwt. was won, and 251 oz. 18 dwt. from quartz. At Dalmorton about 150 oz. has been won during the year.

In the Clarence and Richmond district the Warden and Mining Registrars report:—In consequence of the drought very little work was carried on in the district. At Nana Creek 46 tons, crushed for Cooper and party, gave 60 oz. From the Advance Australia Mine some rich specimens have been

been obtained; 8 tons crushed yielded 2 oz. 7 dwt. 12 gr. From the Nymboi Mine 40 ton crushed gave 48 oz. Some alluvial gold has been found in the vicinity of the Little Nymboi River, the depth of the deposit varying from 2 to 14 feet. The prospectors obtained 3 oz. of shotty gold as the result of two men's work for five days; 407½ tons of quartz were crushed for 333 oz. 11 dwt. 9 gr.

The following information has been kindly furnished by R. Hunt, Esq., F.G.S., the Deputy-Master of the Royal Mint.

QUANTITIES of gold, the produce of New South Wales, received into the Royal Mint, Sydney, during 1884 and 1885 compared.

SUMMARY.

District.	1884.	1885.
	oz.	oz.
Bathurst	18,473.83	15,570.10
Tambaroora and Turon	11,297.01	5,879.15
Mudgee	4,321.33	3,552.49
Lachlan	20,452.33	12,360.52
Albert	2,031.84	1,536.17
Southern	7,862.38	3,478.86
Tumut and Adelong	14,061.96	9,445.21
Peel and Uralla	1,883.97	1,234.16
Hunter and Macleay	2,916.21	1,069.82
Clarence and Richmond	591.11	608.55
New England	690.96	488.37
Localities unknown	20,349.85	38,766.96
	104,932.68	93,990.36

From the above statement it appears that the quantity of gold sent to the Mint in 1885 was less by 10,942.32 oz. than the quantity sent in 1884.

The

The following table is compiled from information furnished by the Collector of Customs :—

EXPORT OF GOLD—1885.

Gold.		Quartz Tailings and Pyrites.		Total.	
Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
oz. dwt. gr. 18,478 11 1	£71,539.	{ Tailings, 1,965 pkgs. Pyrites, 661 cwt.	{ £7,901 £3,225 }	oz. dwt. gr. 21,260 1 1	£82,665.

The quantity of gold sent to the Mint, added to the quantity exported, was 115,250·41, valued at £423,467 6s. 11d.; but deducting from the gold exported the portion thereof which the Deputy Master of the Mint reports has been included in the return of gold received at the Mint, the quantity of gold won during 1885 appears to be 103,736·36 oz., valued at £378,665 0s. 3d., which, as compared with the output of 1884, shows a decrease of 3,462·64 oz.

According to the returns furnished by the Mining Registrars the output of gold for the year would appear to be less by 10,474 oz. than the quantity sent to the Mint, and less by more than 20,000 oz. than the quantity of gold won as shown by the Mint and Customs' returns.

RETURN of Gold for 1885 from Mint and Mining Registrars compared :—

District.	Mint.	Mining Registrars.	Excess.	Deficiency.
	oz.	oz.	oz.	oz.
Bathurst	15,570	16,157	587
Tambaroora and Turon	5,879	9,374	3,495
Mudgee	3,552	6,402	2,850
Lachlan	12,361	16,616	4,255
Albert	1,536	1,712	176
Southern	3,479	11,331	7,852
Tumut and Adelong	9,445	12,294	2,849
Peel and Uralla	1,234	6,490	5,256
Hunter and Macleay	1,070	1,017	53
Clarence and Richmond	609	988	379
New England	488	1,135	647
Localities unknown.....	38,767	38,767
			38,820	28,346
			28,346	
The quantity sent to the Mint exceeds the returns by the Mining Registrars by ..			10,474	

The return furnished by the Mining Registrars of the gold won in 1884 and 1885 respectively shows that the output for the latter year is less by 29,071oz. than the output for the former year. I regret to say this indicates the very defective character of these returns, due no doubt in a great measure to the reluctance on the part of the miners to furnish accurate returns, but I fear to some extent attributable to want of care or zeal on the part of some of the Registrars.

MINING Registrars' Returns of Gold for 1884 and 1885, compared :—

District.	1884.	1885.	Increase.	Decrease.
	oz.	oz.	oz.	oz.

New England	1,105	1,135	30
			1,248	30,319
Less increase	1,248
Decrease in yield for 1885	29,071

The following table shows the results obtained from the treatment of certain parcels of alluvium during 1885 compared with the results obtained in 1884. The very small proportion of the alluvium treated during the year which is included in these tables deprives them of the value for purposes of comparison which they would otherwise serve. Of course I am aware that it would not be possible in some cases

cases to furnish a return of the quantity treated, but there are a large number of mines in respect to which such information could be supplied if the officers would use their influence with the owners. Such a table, if full, would convey a better idea of the value of the deposits in any given district than any number of pages of written matter.

COMPARATIVE statement of Average Yields from Alluvial Mines for 1884-85.

	176,494	0 0 3 66	1,346 19 10		39,061	0 2 21 92	5,690 1 19

The following table showing the yields obtained from certain parcels of quartz crushed is highly satisfactory as regards the average yield, but unfortunately the quantity of quartz treated, included in the return, is very much smaller than last year. The returns from the Bathurst district include a very small quantity of quartz; this is probably due partly to the drought and partly to the attention devoted to the search for and testing of the numerous silver lodes in the Bathurst district, and it may be to some extent due to deficiency in the returns collected by the Mining Registrars.

COMPARATIVE Statement of average yields from Quartz Mines for 1884-5.

The number of miners engaged, more or less, regularly in gold-mining during 1885, is returned by the Mining Registrars at 5,911 (which is some 600 less than in 1884); of these 5,031 were Europeans and 880 Chinese; 4,009 were engaged in alluvial mining and 1,902 in quartz.

Taking the quantity of gold won and dividing it by the number of miners employed, we obtain the following results:—Dividing the quantity of gold as returned by the Mining Registrars the result is 14.13 ounces per man, valued at £51 4s. 4.15d. for the year. Dividing the quantity of gold sent to the Mint and exported the result is 17.55 ounces, valued at £64 1s. 2.65d., representing according to this mode of estimating the average earnings of each man for the year.

During the year the department has caused the following assays for gold to be made by Mr. C. Watt, the Government Analyst:—

GOLD.

Locality.	Description.	Per ton.		Per cent	
		Gold.	Silver.	Lead	Copper.
		oz. dwt.	oz. dwt.

Wellington	Copper and iron pyrites in quartzose claystone	0 4½	1 12½		

COAL.

The output of coal for 1885 exceeds that of 1884 in quantity by 129,754 tons, and in value by £37,135 13s. 8d., and, of course, largely exceeds that of any previous year. There is a considerable increase in the export of coal to Foreign Ports, and also in the Home consumption, but the export to Colonial Ports is a shade less than that of 1884. The growth of our coal trade is most satisfactory, and indicates the necessity for making provision for meeting the gradually increasing demand which will probably, in the near future, reach very large proportions. The average price per ton last year was about 2d. per ton less than the preceding year, and about 7d. per ton less than the average price since 1858.

By the aid of the Diamond Drills a considerable amount of useful work has been done during 1885 in proving the coal-seams in various localities. The aggregate thickness of the coal-seams bored through during the year was 257 feet 4½ inches, as compared with 156 feet bored through in 1884.

The Warden at Dubbo reports that although little progress has been made during 1885 in proving the coal-seams in that locality there is reason to believe operations will be commenced in earnest at an early date. Mr. Coghlan, who tested the land by means of the diamond drill, has abandoned his holdings on account of the seams therein not being sufficiently thick to pay for working. The Dubbo coal-mine at Ballimore, on the Talbragar River, consists of 980 acres, on which 3 shafts have been sunk—No. 1, 98 feet deep, No. 2, 130 feet, No. 3, 207 feet; these shafts are a quarter of a mile apart. The same seams of coal have been cut in each, the largest seams being 5 feet 10 inches thick, the others 2 feet, 3 feet 6 inches, and 3 feet 8 inches respectively. These seams have small bands running through them. About 50 tons of coal have been raised from No. 1 shaft, of which 25 tons have been tested by the Railway Department, and proved satisfactory. Operations have been temporarily suspended pending arrangements for laying a line of railway to connect the mine with the Great Western Railway. The Warden reports that there is a general impression that there is plenty of coal in the division, but all attempts to open up the deposits have been abandoned. The search for coal at Rocky Mouth, on the Clarence River, has not been abandoned. Nothing has yet been done towards opening up the coal-seams in the Vegetable Creek district, but if the silver lodes in that locality be extensively worked a demand for the coal may arise. In consequence of a sample of coal from near Gunnedah sent to this department for analysis proving to be of excellent quality, Mr. Geological-Surveyor David was sent to report upon the seam from which it was taken, in order that, if found to be of workable thickness, the Crown Lands in the vicinity might be reserved from sale. Mr. David found that two seams of coal, one 6 feet 4 inches thick, and the other about 7 feet thick, had been discovered at depths of 72 feet and 93 feet respectively below the surface, while sinking wells on Mr. J. Prior's selection and on Mr. J. Darcey's selection, about 5 miles from the railway line. The coal is of excellent quality for steam, household, and gas purposes, and as it occurs so near the railway line, and about 120 miles beyond the nearest colliery now working, it will prove of great advantage to the Railway service on the Great Northern Line north of Murrurundi.

From the following statement it will be seen that there has been an increase in output and value in each of the three coal districts, but the increase in the output was proportionately larger in the Western than in the other districts, while the decrease in price was greater in that district than in any other. In the Northern district the average price in 1885 was 9s. 9.29d. per ton, as compared with 9s. 10.16d. in 1884. In the Western district the average price per ton was 4s. 11.15d. in 1885, as compared with 5s. 5.22d. in 1884. In the Southern district the average price per ton was 10s. 1.9d. in 1885, as compared with 10s. 4d. in 1884.

QUANTITY and value of Coal raised from the opening of the Coal-seams to 1857 inclusive:—

The number of coal and shale mines under inspection during 1885 was 38 in the Northern District, 15 in the Southern District, and 14 in the Western District—total, 67, and 11 opening out while in 1884 the number was 64 under inspection and 22 opening out. Two collieries were worked out and abandoned, and work suspended in one.

During the year there were 51 accidents in collieries; of these, 11 were fatal, and 40 non-fatal.

During the year the Department caused the following analyses to be made:—

COAL.

Locality.	Description of Mineral.	Analysis.	Coke %	Sulphur %	Specific Gravity.

For further information concerning the composition of the coals of this Colony, see the report of Mr. W. A. Dixon, F.C.S., F.I.C., &c., &c., in the Annual Report of this Department for the year 1880.

SHALE.

The discovery of kerosene shale in various parts of the Colony has not so far led to the opening up of any new mines. The New South Wales Shale and Oil Company at Hartley, and the Australian Kerosene Oil and Mineral Company at Joadga Creek, are the only Companies working this mineral. The latter Company made large additions to their works during the year. The quantity of shale raised during the year was less than the preceding year, but the price per ton was higher than any year since 1878.

The following table shows the quantity and value of Kerosene Shale produced during the years 1865 to 1885.

Year.	Quantity.	Average price per ton.	Total Value.
	Tons.	£ s. d.	£ s. d.
1865	570	4 2 5·47	2,250 0 0

TIN.

The export of tin during 1885 was much less than that of the preceding year, but the export of tin ore was considerably larger. The value of our exports under this head is smaller than any year since 1880. The decrease appears to be due mainly to the drought, but also in part to the fact that this branch of mining has not recovered from the depression caused by the low price of tin, and in part to the fact that many of the shallow deposits in the older fields are exhausted, and that the deeper deposits and the lodes have not yet been developed. In the Bendemeer division, at Watson's Creek and Giant's Den, there is a probability of tin-mining being ultimately carried on with success. The Perseverance Co. raised 5 tons of tin ore valued at £287. The other Companies in that locality have been engaged on preliminary work during the year. The discovery of stream-tin in the Bendemeer division has been reported, but the deposit was not worked on account of the scarcity of water. The insufficiency of water for sluicing purposes seriously reduced the output of tin ore in the Maryland and Wilson's Downfall mines. The value of the output in these localities was £15,550.

In the Glen Innes division the output of tin ore in 1885 exceeded that of 1884 by more than 400 tons. This increase was pretty evenly distributed between the shallow, deep, and lode workings, and was mainly due to the more abundant rainfall of the year, and the advance in the price of tin in the Home market. Capital and labour were freely expended in prospecting the deep ground underlying the basalt; but in many instances the result has been disheartening, not even a trace of tin ore being found. As some compensation for these repeated failures, the continuation of the famous Wesley lead has been discovered by Messrs. Bailey and party, at a depth of 140 feet, and proved to extend a considerable distance. The lead is about 40 feet wide, between abrupt walls of granite. In lode-mining: A large amount of money was expended in the effort to establish this branch of mining, but the result has not been satisfactory, as it is reported that, notwithstanding the promising surface indications that are to be met with in various parts of the district, no lodes have yet been proved to be of a permanent character. In the Ottery mine near Tent Hill, the lodes are found from 4 to 8 feet in width, but the stone is of poor quality, rarely exceeding 3 per cent. of black tin. The Dutchman and Torrington lodes are reported to be much richer, but not so regular in formation. Several parcels of 100 tons from these mines are said to have yielded 20 per cent. of black tin. A much larger output of ore from lodes is anticipated, and a very complete reducing plant has been erected. The output of ore in this division is reported to be as follows:—

	tons.	cwt.	qr.
Vegetable Creek—Deep Leads.....	945	7	2
Lode.....	352	2	3
Shallow	1,184	14	3
Glen Innes—Shallow workings.....	160	0	0
Total.....	2,642	5	0

which, at £53 per ton, gives a value of £140,039 5s.

The Manager of the Tent Hill Smelting Works reports a total of 1,328 tons 18 cwt. 3 qr. 2 lb. of tin ore received for reduction during the year, and that the quantity of refined tin sent away was 885 tons 18 cwt 1 qr. 17 lb. Of the ore raised in the district, 110 tons were forwarded to Brisbane for smelting. During the year a new discovery (known as the Racecourse Lead) was made. It seems to follow the imperfectly defined dividing range between the Mole and Severn Rivers. The wash-dirt in this lead is white, while the next furrow south of it carries red iron-stained drift-sand only. This is very apparent in some spots where the lead is worked—the red and white wash-dirt standing side by side with only an inch of neutral tint between them. The ore on the Racecourse lead is pure oxide, assaying 75 per cent. streamed in a box. That in the red drift and red wash-dirt in the southern furrow is cleaned by hydraulic pressure; when taken from the sluice-box, it rarely assays higher than 72 per cent.—The Willoughby cleaner brings it up to 75 per cent. The report of the Mining Registrar at Emmaville contains a large amount of detail information concerning the principal mines in his division.

Some complaints were made during the year that the Regulations made under the Mining Act Further Amendment Act were not satisfactory, in so far as they imposed a royalty upon the mineral won. It was also found that such Regulations operated prejudicially to the miners who were working as tributors. They have therefore been repealed, the royalty abolished, and the rent increased from 2s. per acre to 5s. per acre, the same as is charged on Crown lands.

TABLE

TABLE showing the quantity and value of Tin exported from, and the produce of, the Colony of New South Wales, since the opening of the Tin-fields in 1872.

Marool Creek	Stream tin drift from foot of a range of hills at Broken Dam, Merool Creek	52·3	
Oban	Black sand containing tin-stone, limonite, spinel, &c., from near Oban, New England	63·70	
Tenterfield	Tin-stone in lode stuff from 7½ miles from Tenterfield, on the road to Ballandore	40·35	
Tingha	Black tin and iron sand with a little quartz from about 10 miles north of Tingha	44·50	

COPPER.

The low price of copper has had a most depressing effect upon this branch of mining—in fact all but the very best mines may be said to have suspended work in consequence, and numerous promising ventures have been for the present at any rate abandoned. The quantity of copper exported in 1885 is certainly less than during 1883 and 1884, but with the exception of those two years it is larger than the export of any previous year. The value of the copper sent away is, however, less than for any year since 1879, and considerably less than the decennial average.

TABLE

TABLE showing the quantity and value of Copper, the produce of the Colony, exported from the Colony of New South Wales, from 1858 to 1885.

Year.	Ingots.		Ore and Regulus.		Total.

The Wardens and Mining Registrars report:—The Burruga copper-mine was working all the year. 150 men were employed. There are four smelting furnaces and refining furnaces connected with this mine. The lode is as rich, if not richer than ever; width of lode, 6 feet; the shaft is 228 feet deep; the deepest level, 125 feet; 4,215 tons of ore raised produced 440 tons of fine copper, valued at £22,500. The low price of copper deters capitalists from working the numerous rich lodes in the Carcoar division. Work was suspended at the Frogmore mine, in the Burrowa division, at the end of January, 1885, in consequence of the low price of copper. Prior to suspension of work 60 tons of ore was raised from a depth of 300 feet, which yielded 2 cwt. 1 qr. of copper per ton. The Coopera Curraba copper-mine, at Nowendoc, in the Walcha division, has started three shafts. The main shaft, 45 feet deep, is sunk on a lode which, at bottom of the shaft, is 4 feet 6 inches wide and well defined, the ore having improved from 8 per cent. to 14 per cent. Another shaft is sunk 12 feet on a lode 14 feet wide, which looks well. At the Belara copper-mine, in the Wellington division, 1,000 tons of ore have been raised, which produced 640 tons of regulus. The depth of the shaft is 160 feet; deepest level, 140 feet; width of lode, 8 inches to 8 feet. The Girilambone mine and the Great Central mine were not worked in consequence of the low price of copper. For the same reason work was suspended at the new Mount Hope mine, after having raised 3,795 tons of ore, which produced 635 tons of fine copper. Notwithstanding the low price of copper, the Great Cobar mine employs 500 men and boys. The deepest shaft is 564 feet; the deepest level, 420 feet; the width of the lode, from 2 to 50 feet. The ores consist of carbonates, oxides, and sulphides. The quantity of ore raised during the year was 23,300 tons, which produced, when smelted, 2,135 tons of copper, valued at £106,750.

The Nymagee mine, which is about 50 miles south-east of Cobar, employs 350 men and boys; depth of shaft, 528 feet; deepest level, 516 feet; width of lode, 4 to 12 feet. The quantity of ore raised during the year was 15,773 tons, which produced 1,804 tons of fine copper, valued at £80,000. The ores consist of sulphuret and carbonates, the average percentage of copper being 11·42.

The

The following assays have been made during the year :—

Locality.	Description of Mineral.	Copper.	Per ton.	
			Gold.	Silver.
		Percent	oz. dwt.	oz. dwt.
Barrier Range	Ferruginous quartz, with red oxide and green carbonate of copper	27.40
"	Oxide of iron, with sulphide and carbonate of copper	31.05
"	Carbonate and sulphide of copper, in quartz, from 12 miles N.E. of Mount Gipps	25.60
"	"	22.40
"	Iron ore and green carbonate of copper from ditto	26.51
"	Sulphide, oxide, and carbonate of copper, from near Mount Gipps	43.95	...	1 12½
"	Grey sulphide and green carbonate of copper	4.66
"	Red oxide and carbonate of copper, from 12 miles S.W. of Pinnacles	26.80
"	Red oxide and carbonate of copper	3.40
Burrowa	Ironstone and sulphide of copper, from parish Harden	10.90	...	2 9
Binalong	Carbonate of copper in red hematite	1.05
Braidwood	Porous green carbonate of copper	42.45	...	29 8
Condobolin	Red oxide and green carbonate of copper, in quartz veinstone, from Melrose Road	10.60	...	1 12½
"	Ferruginous quartz, with green and blue carbonate of copper	3.75
Ennawille	Fahlerz, from Little Plant	31.50
Glen Innes	Carbonate of copper and iron ore	31.25
Gumble	Earthy blue and green carbonate of copper, in brown earthy lode stuff, from Gumble, near Molong	14.85	...	6 10½
Ironbarks	Copper pyrites and oxide of iron and copper, from Boreell, near Ironbarks	20.10
Kiama	Porphyritic diorite, with native copper, from near Kiama	42.00
Rockley	Gossan with green carbonate of copper, from about 10 miles from Rockley	17.85
Tucua	Carbonate of copper and lead	20.30	...	22 17
"	"	38.60
Wellington	Iron ore, with oxide and green carbonate of copper, from Garryowen	30.60

SILVER AND LEAD.

The export of fine silver during 1885 largely exceeds that of any previous year. The excess over the export of 1884 was in quantity 700,513 oz. 15 dwt., and in value £139,407. If, however, the export of ore (that is to say silver and lead ore) be taken with the silver the value of the output of our silver mines in 1885 exceeds that of 1884 by only £5,093. It must of course be borne in mind that sufficient time has not yet elapsed since the first opening of our silver-mines to allow of any large number of them being brought into full operation, but we may fairly anticipate a large increase during 1886. The Inspector of Mines says the so-called quartz-reefs, which are in reality gossan lodes, at Captain's Flat, in the Queanbeyan district, are several feet in width, and can be traced a considerable distance. These lodes contain carbonate of lead, sulphate of lead, galena, chloride of silver, and various copper and iron ores, and they will at a depth become silver or copper lodes. At the time of his inspection the principal mine was Montgomery's, situate on a range about 500 feet above the western bank of the Molonglo River. The lode has been sunk upon to a depth of 70 feet, but on the 40-feet level the lode has been worked for 230 feet in length, and from 10 to 20 feet in width. The crushing stuff, out of which the gold is extracted, consists of very small quartz-veins, &c., &c. 1,633 tons of this stuff have been crushed, and 360 oz. of gold obtained therefrom. The gold contains a high percentage of silver. The lode is soft, and is worked without explosives. About ¼ of a mile south from Montgomery's is Blatchford's mine, which is in similar formation, from which some thousands of tons of stuff have been taken. The country from Molonglo Plains to Captain's Flat appears to be highly metalliferous. Several new discoveries of silver have been made throughout the Colony. A very promising lode was opened about 12 miles from Newbridge, on the road to Rockley. The Warden and Mining Registrar in the Glen Innes division report:—Though eighteen months have elapsed since the discovery of the silver lode at Little Plant Creek, no work has been done on any of the land taken up, except the Prospectors, to test the value of the lode. An association has been formed to work this land. They have employed sixteen miners upon the land, with a result that has every appearance of returning a profit upon the outlay. Some 525 feet of sinking and 25 feet of driving have been done. One shaft has been sunk 104 feet, but at that depth the water was too heavy to be kept down by hand. Two shafts were then sunk on higher ground to a depth of 90 feet; and on driving to test the lode it was found to be in one place 14 feet wide, assaying 55 oz. to the ton, and at another place, some distance away, the lode was 6 feet wide, with an average of 75 oz. per ton. The principal silver-bearing ore is fahlerz, associated with galena. Machinery to treat the ore cannot be placed on the ground till a road, which is being formed, has been completed. At Pye's Creek the silver-bearing lodes have assumed an importance beyond the promise of their opening, and indications seem to warrant the miners' belief in their permanent productiveness and value. A considerable number of claims have been taken up, and assays from various trial shafts give very satisfactory and encouraging results. The ore in

Hamilton's

Hamilton's (one of the principal mines) is fahlerz, picked samples assaying as high as 3,000 oz. of silver per ton. Mason's lode consists of carbonate and sulphide of lead, some of which assay as high as 310 oz. of silver per ton. The Sunny Corner consists of sulphide of lead, and assays up to 100 oz. per ton. The field is an extensive one, and prospecting is being vigorously carried on. In the Burrow mine a shaft has been sunk about 40 feet. The reef continues to carry good ore all the way. The lode is about 7 ft. wide. About 12 tons of the ore was being sent to Melbourne for treatment. Doolin and party have a lode 5 feet wide, an assay of which gave 72 oz. per ton. To the north of the Burrow the lode is about 7 ft. wide, with well-defined walls, and the ore seems very rich. In the Bathurst district the Wardens and Mining Registrars report:—During the year a large area of silver-bearing country was opened up, which is supposed to extend from Parr's Range, near the Turon, by Sunny Corner, Tarana, Wiseman's Creek, Essington, and continues south towards Peelwood. At Back Creek, near Rockley, very rich silver ore has been found; the ore is also rich in gold; this find is quite distinct from the line of country referred to above. The Warden considers the lodes near Peelwood, known as Hydes and M'Guire's, are equal to any in the district. These lodes have been sunk upon to a depth of 100 feet, where the width is upwards of 13 feet, and every appearance of being permanent. Good prospects have been obtained along the lode at Wiseman's Creek as far south as the old Essington copper-mine. At Mitchell, the Sunny Corner mine, consisting of 205 acres, upon which £40,000 has been expended on furnaces and appliances for treating the ore locally, employs about 512 men; deepest level, 120 feet deep; total output of ore, 25,000 tons; yield of silver during the year was 20 tons 8 cwt. 0 qr. 24 lb.; estimated value, £160,000; the gold contained in the silver from this mine brings the value up to 5s. per oz. The Silver King Company leases 80 acres; employs sixty-five men; deepest level 60 feet; have raised 15,000 tons of ore ready for treating. One furnace, Gafford and Hogue patent, has been erected, and one is in course of erection. A start has been made with one smelter, and 500 lbs. of silver run out. The furnaces and dams when complete will cost about £7,000. The Nevada Company commenced smelting, but owing to the refractory character of the ore operations were suspended, but have been resumed. The Mitchell Company have erected at a cost of £2,000 a smelter, Icke patent, for the purpose of treating ores for the public. This furnace works well, but the colonial-made bricks will not stand the great heat. A number of other Companies are engaged in prospecting works. On the Great Western and Victoria mines fine gossan has been found. Limestone is plentiful in the district. At Green Swamp several shafts have been sunk on lodes showing indications of silver. Within 2 miles of the Burrage copper-mine a lease was taken up for silver-mining; two lodes run through the ground underlying towards each other. No. 1 shaft has been sunk on the western lode 90 ft., No. 2 shaft on the eastern lode 70 ft. deep. The assays from these lodes give 20 to 40 oz. of silver per ton, 7 to 30 per cent. of lead, and $4\frac{1}{2}$ dwt. of gold. At the South Wiseman's Creek mine preparations are being made to work the silver lodes in a systematic manner. Some of the assays are said to indicate that the ores in this mine are very rich. Very little work has been done on the silver lodes in the Tuena division. In the Southern District some silver-bearing lodes were discovered at Burragorang and near Towrang in the Berrima division during the year. The ores have not yet been tested, except by assay. As regards the deposits at Towrang, no results are yet known, but from the character of the country there is reason to believe payable ores will be found there. The ores from the lodes at Burragorang are said to have assayed from 60 to 2,000 oz. per ton. At Guy's silver-mine, at Moruya, the lode is 2 feet wide, is rich in gold, but the ore is difficult to treat. 10 tons are to be sent to Germany for treatment by way of test. In the New England district the silver-mines at Boorook have suspended work. The lodes have not, in the opinion of the Warden, been thoroughly tested. Only two leases have been worked, and they have not been developed to any great extent (the deepest shaft is 300 feet), though large quantities of silver ore have been obtained from these mines, and a considerable quantity of silver extracted. In the Albert district immense progress has been made in the Silvertown division during the year. Smelting operations have been commenced under great disadvantages, the district being destitute of fuel and sparsely supplied with water. At the Pinnacles a considerable quantity of ore was smelted, it is said with satisfactory results, but owing to scarcity of water the furnaces were cooled down some months back, and have not been in blast since. The quantity of ore raised was 2,000 tons, valued at £16,000; three tons sold realized £56 7s.; 514 tons smelted yielded 16,234 oz. of silver. The Barrier Ranges Company erected one smelter, which was running about five months, giving every satisfaction. During some weeks over 150 tons of ore were treated, the average yield of silver since starting being about 12,000 oz. of silver per week; but, in consequence of the inferior quality of the bone-dust supplied, the refining process could not keep pace with the smelting, and the Company have therefore been sending the silver lead in bars to Melbourne for final treatment. Another smelter of larger size has been erected and started since the beginning of 1886. The Barrier Ranges Company have during the year worked and prospected several of their properties, more particularly the Day Dream (which was turned over to a separate Company during the year), the Apollyon, and the Gipsy Girl. From the Day Dream 4,000 tons of ore was raised, valued at £3,000; the silver

smelted from 1,800 tons of ore was valued at £54,000. Several shafts were sunk varying from 80 feet to 147 feet vertical; the deepest level was 420 feet; on the underlie the width of the lode varied from 1 foot to 12 feet. From the Apollyon 30 tons of ore, valued at £1,000, was raised. Depth of shaft, 357 feet; deepest level, 275 feet; width of lode, 1 foot to 10 feet. From the Gipsy Girl 500 tons of ore was raised, valued at £5,000. Depths of shafts, 90 feet and 140 feet; deepest level, 148 feet; width of lode, 1 foot to 5 feet. At the Broken Hill work was pushed on steadily during the year. The Broken Hill Company have nearly 2 miles in length of the lode which is visible on the surface, in some places projecting fully 50 feet above the surface. Nine shafts have been sunk to depths varying from 30 feet to 212 feet, the width of the lode being 20 feet. The lode has been tested in various places to depths varying from 100 feet to 212 feet. Recently a cross-cut into the lode discovered ore of extraordinary richness. It has been penetrated 14 feet without reaching the other wall of the lode. Chlorides are distinctly visible in the ore, the whole bulk of which is estimated to yield 1,000 oz. per ton. The quantity of ore in the mine appears almost unlimited, and some idea of its value may be gathered from the fact that bulk sample of 48 tons sent to Melbourne for treatment realized £7,442 12s. 11d. The work done during the year has been purely preparatory, no ore having been stoped out, yet the manager's report shows that 3,000 tons of ore was raised, which is valued at £42,866 (the actual returns obtained generally exceed the estimates of value). Preparations were being made for the erection of two large smelters. The Umberumberka mine was worked and thoroughly developed during the year with satisfactory results. 916 tons of first-quality ore and 400 tons of second-quality were raised, valued at £26,588. Depth of shaft, 305 ft.; deepest level, 254 ft.; width of lode, 4 ft. The Treasure turned out some remarkably rich ore. During the year 11 tons of first-quality and 30 tons of second-quality ores were raised, and are still on the mine, valued at £12,500. Depth of shaft, 175 ft.; deepest level, 175 ft.; width of lode, 6 to 18 inches. From the Maybell South mine, near Thackaringa, 100 tons of ore, valued at £5,000, was raised during the year. Depth of shaft, 158 ft.; deepest level, 158 ft.; width of lode, 3 inches to 2 ft. From the Maybell North mine, near Mount Gipps Station, 50 tons of ore, valued at £5,000, was raised. Depth of shafts, 60 ft. and 40 ft.; deepest level, 60 ft.; width of lode, 2 to 10 inches. From the Christmas mine, near Purnamoota, 18 tons of ore was raised, valued at £2,546. Of this, 11 tons 16 cwt. was sold for £526 15s. 6d. Depth of shaft, 111 feet; deepest level, 75 feet; width of lode, 6 inches to 2 feet. From the Mount Gipps mine, near Purnamoota, 200 tons of ore was raised, valued at £2,126 (22½ tons sold for £710 9s. 10d). Depth of shaft, 115 ft.; deepest level, 57 ft.; width of lode, 2½ ft. From Ellis mine, at Purnamoota, 12 tons of ore was raised, valued at £1,200. Depth of shaft, 80 ft.; width of lode, 1 to 3 ft. From Terrible Dick mine, 15 tons 9 cwt. 25 lb. of ore was raised, valued at £1,006. Depth of shaft, 55 ft. and 85 ft.; width of lode, 2½ to 3 ft. From the Purnamoota mine 21 tons of ore was raised, valued at £840. From the Bird-in-hand mine 20 tons of second-quality ore was raised, valued at £200 (21 cwt. sold for £72, and 5 cwt. smelted realized £9). Depth of shaft, 100 ft.; deepest level, 60 feet; width of lode, 3 ft. From the Pluck-up mine 19 cwt of ore raised, which produced 691 oz. and 2 gr. of silver, valued, £126 5s. 10d. Depth of shaft, 84 feet; deepest level, 72 ft.; width of lode, 8 inches to 2 feet. All over the field small chloride veins are being worked by miners; these veins are generally not more than 2 or 3 inches thick, but exceedingly rich. The various mines extend over an area of about 80 miles by 30 miles. The population of the field is fully 5,000, of whom 2,000 reside in Silverton. The Warden considers the permanence of the field is firmly established. The Customs Officer at Silverton has furnished to the Warden the following figures concerning the quantity and value of silver and ore sent away :—

Refined Silver.....	47,521 oz.	value	£9,503
Silver Lead	190½ tons.	„	£25,650
Ore	1,623½ tons.	„	£73,128
			£108,281

The following assays have been made during the year :—

Iron.

The Esk Bank Iron Works made during the year bars and rails to the value of £23,972 14s. 9d., and castings to the value of £1,820 5s. The number of men and boys employed at these works was 180.

The quantity and value of iron exported during the year was 141 tons 14 cwt., valued at £1,288, and oxide of iron, 449 tons 19 cwt., valued at £1,569.

The

39

The following analysis was made during the year :—

Peroxide of iron.....	% 53.44											
Protoxide „	6.40											
Alumina	10.38											
Gangue.....	25.80											
Moisture, trace of Mg. &c.											

ANTIMONY.

The output of antimony during the year was considerably less than during 1884, which is mainly due to the low price in the Home market. The Eleanor Company, in the Armidale division, reports that during 1885 they raised 28 tons of ore, valued at £196. If the price should improve the output would be largely increased, as the deposits are said to be inexhaustible.

The following assays were made during the year :—

ANTIMONY.

Locality.	Description of Mineral.	Per cent.	Per ton.	
		Antimony.	Gold.	Silver.
Armidale	Sulphide and oxide of antimony and a little quartz	46.9	oz. dt.	oz. dt.

Rocky River	Oxide and sulphide of antimony from Rocky River, New England	11.6		

ASBESTOS, BISMUTH, MANGANESE, COBALT, ZINC, &c.

No details have been reported respecting the working of these minerals during 1885, due no doubt to the very limited extent to which they have been worked.

The following assays have been made during the year :—

BISMUTH.

Locality.	Description.	Per cent.	Silver per ton.
Deepwater	Ferruginous quartz and metallic bismuth from 40-acre block adjoining Hamilton and party's lease, Pye's Creek.	66.8	oz. dt. 35 8½
„	Ferruginous quartz and metallic bismuth and carbonate of copper from do.	3.9	200 18
„	Ferruginous sand and galena and a little carbonate of copper from do ...	13.3	166 12

MANGANESE.

Capertee	Ironstone grit, containing manganese oxide, from 10 miles from Capertee, on Mudgee Road.	2·10	
Goulburn	Manganese oxide in sandstone, from 4 miles from Goulburn	1·66	0·35
		1·21	1·32

ZINC.

Locality.	Description.	Metallic Zinc. Per cent.	Per Ton.	
			Silver.	Gold.
Deepwater	Blend from No. 1 Reef, from prospecting claim, parish Parkes, county Gough, Deepwater District.	20·05		

SLATES.

The Australian Slate Company, at South Gundagai, were still working with energy. They lately opened a deposit of roofing slate, said to be of superior quality. None of the other Companies have been reported as working in 1885.

DIAMONDS.

The Australia Diamond Company, at Bingera, during the year, curtailed their operations to merely testing their claim. The last washing of eighty-seven loads yielded 1,134 diamonds, weighing 209 carats. The other diamond-mines at Bingera suspended operations, partly, perhaps, in consequence of the drought. Deposits of diamondiferous wash have been found in the Tingha division, and some very good samples of diamonds have been obtained. One parcel, consisting of 285 diamonds, weighing 104½ carats, from Mr. W. Brown's Crown Jewel diamond-mine, was purchased for the Colonial and Indian Exhibition. Of these stones 280 ranged from ⅓ to 1 carat each in weight, and five from 1 to 1½ carat. They varied in colour from pale straw yellow to clear crystals of "first water." The miners experience some difficulty in finding a satisfactory market for the produce of these mines, which somewhat retards their operations. Four diamonds, weighing from 1 to 1½ carat each, were purchased from Mr. Brown's mine for use in the diamond-drills.

BARYTES.

Twelve tons of barytes, reported to have been raised from the old alluvial workings at Coloola Creek, valued at £43 2s. 9d.

MISCELLANEOUS ANALYSES.

The following analyses were made during the year :—

Locality.	Description of Mineral.	Analysis.
Norfolk Island.....	Volcanic tuff from Phillip Island 3 miles south of Norfolk Island.....	Moisture..... 10·73
		Combined water..... 4·08
		Lime..... 1·06

Norfolk Island.....	Compact coral rock from water-level, Emily Bay.....	Hygroscopic moisture..... 0.22 Carbonate of lime..... 86.65 Carbonate of magnesia..... 8.72 Oxide of iron and alumina..... 1.10 Silica..... .90 Phosphoric acid (P ₂ O ₅)..... trace Alkalies and undetermined..... 2.41 100.00
Port Stephens.....	Pitchstone.....	Loss on ignition..... 8.18 Silica..... 73.45 Alumina..... 13.25 Ferric oxide..... .95 Lime..... 2.85 Magnesia..... .52 Alkalies, &c..... .80 100.00
Yalgogan.....	Saliferous substance from soil excavated for a tank	Sulphurate of lime..... 54.13 Chloride of sodium..... 27.44 Carbonate of lime..... 12.39 * Undetermined..... 6.04 100.00

* Consisting of moisture, alumina, oxide of iron, water of hydration, alkaline, carbonates, and nitrates.

WATER.

Well-water from Silverton :—

Total solid matter in solution	40.5 grains per gallon
Which loses on ignition	1.5 " "
Contained chlorine	22.4 " "
Free ammonia	0.12 parts per million
Aluminoid or organic ammonia.....	0.13 " "

This water shows no signs of nitrates, and contains a little sulphate of calcium in solution; but the major part of the solids are present chiefly as chlorides, being those of sodium and magnesium. The smallness of the sample has precluded a more detailed examination, but enough has been done to show it a fairly good well-water. The quantity of aluminoid, ammonia, and chlorine would condemn a water in England, but here the chlorine counts for very little in a well-water, so much of the soil of the Colony being more or less salt; and water is seldom seen here containing less than '1 per million of aluminoid. Poisonous metals were proved to be absent.

Water from soakage, Barrier Range :—

Total solid matter in solution.....	3.75 grains per gallon
Which loses on ignition	1.48 " "
Contained chlorine	1.30 " "
Free ammonia.....	0.02 parts per million
Aluminoid ammonia	0.32 " "

This sample contains a trace of sulphuretted hydrogen (and therefore the water cannot contain any poisonous metals), and the water has a slightly nauseous taste and smell. For this reason, and from the high rate of aluminoid, it would be unadvisable to use this water for alimentary purposes if other can be obtained; but, if it has to be so used, the use should be preceded by boiling.

On the other hand, this water is much better suited for washing or for use in boilers than the previous well-water, on account of the smaller quantity of solids in solution.

Water from Sodawater Spring, Rock Flat, 10 miles east of Cooma :—

Total Solids.	Soluble Solids.	Insoluble Solids.	Chlorine.	Equivalent in Common Salt.
134.02	59.96	74.06	29.51	48.60

APPEARANCE.—Slightly turbid.

REMARKS.—This water was found to contain carbonic acid, and when heated had a slightly sweetish odour. The insoluble solids consist of carbonate and sulphate of lime, silica, and some carbonate of iron. The soluble solid matter consists chiefly of chloride and carbonate of soda. The total solids may be regarded as somewhat excessive in considering its adaptability for domestic purposes. Although a very hard water, much of the hardness may be removed by boiling.

From bank of Sodawater Creek, Rock Flat, 10 miles east of Cooma :—

Total Solids.	Soluble Solids.	Insoluble Solids.	Chlorine.	Equivalent in Common Salt.
133·98	62·77	71·21	14·78	24·35

APPEARANCE.—Turbid suspended matter.

REMARKS.—This sample also contained a good deal of free carbonic acid, and in many respects is similar in composition to the previous water. It has, however, only half the amount of chloride of sodium, and is still a very hard water. The residue left on evaporation did not blacken when heated in a platinum basin, showing a comparative absence of organic matter. No attempts were made to estimate the amount of organic matter, owing to the manner in which the samples here were submitted to analysis.

Water from spring, near Mittagong, on the property of the Mittagong Land Company :—

Total fixed residue.	Chlorine.	Sulphuric Acid.	Ferrous Oxide.
11·2 grains per gallon.	2·67 per gallon.	1·55 per gallon.	1·5 per gallon

REMARKS.—No exception can be taken to this water on account of the total fixed matter it contains. The quantity of iron, however, is excessive, and if used for drinking in some cases would be injurious. As the sample was received in a jar which seemed to have been previously used, and did not appear to be clean, it was not thought advisable to examine for organic impurities.

Water from a spring on the Mittagong Coal and Iron Company's Estate, Fitzroy :—

No objection can be taken to this water on account of the total fixed matter it contains. The water fairly corresponds to the previous sample, and is remarkably free from organic impurity. The same objection, however, applies with this case as with the previous sample, namely, that the amount of iron is excessive ; and should the supply prove valuable, the iron could be removed by running the water into tanks and adding a small quantity of lime or charcoal.

The sample, when received, contained a good deal of suspended matter, which was due chiefly to iron, and was probably deposited since the water was drawn.

Water from Avoca Station, near Wentworth :—

The water was clear, but contained a considerable amount of suspended matter. The taste was strongly saline, and on analysis gave the following :—

Saline ammonia	·018 parts per 100,000
Organic ammonia	·016 " "
Chlorine	189 grains per gallon
Total solid matter	1,504 " "

With such a large amount of saline matter the water is unfit either for stock or domestic purposes.

In conclusion, I have much pleasure in submitting the following summary of the mineral products up to the end of 1885, the value of which exceeds sixty-six and three-quarter millions sterling :—

SUMMARY.

	Quantity.	Value.	Total Value.

Department of Mines,
Sydney, 3rd May, 1886.

HARRIE WOOD,
Under Secretary for Mines.

WARDENS' AND MINING REGISTRARS' REPORTS.

BATHURST DISTRICT—TRUNKY, TUENA, BURRAGA, ROCKLEY, MOUNT M'DONALD, BATHURST, OBERON,
AND MITCHELL DIVISIONS.

(*Mr. Warden T. A. Smith, P.M., Trunkey.*)

I AM glad to be able to report, for your information, that, notwithstanding the dryness of the past year, a very large quantity of gold, silver, and copper has been won by this district. Unfortunately there has been no alluvial mining worth mentioning. Although the rainfall was, up to 1st instant, $24\frac{1}{2}$ inches, the creeks and rivers never flowed for more than a few days at a time, consequently sluicing has been impossible.

Quartz-mining has also been neglected. Early in the year many of the miners rushed from the quartz districts to Silvertown and Sunny Corner. I do not think they benefited by the change.

During the year a very large area of silver-bearing country has been opened. There can be no doubt but that a belt of silver country extends from Parr's Range, near the Turon, by Sunny Corner, Tarana, Wiseman's Creek, Essington, and continues south towards Peelwood. At Back Creek, near Rockley, very rich silver ore has been found; the ore is also rich in gold. This find is quite distinct from the line referred to above.

I am of opinion that the lodes known as Hyde's and M'Guire's are equal to any in the district, and I cannot conceive any reason why these properties have not attracted the notice of experts and men of capital. These properties are near Peelwood, and about 40 miles from Newbridge railway station, Western line. The roads are excellent from Newbridge to the mines via Trunkey and Tuena. Carriage probably would not exceed 40s. a ton each way. Shafts are sunk in each of these properties, which are $3\frac{1}{2}$ miles apart, to a depth of 100 feet. The lodes are upwards of 13 feet thick at the bottom, and are A shaped. The walls are clean, and have every appearance of being permanent. The assays of small lots ($1\frac{1}{2}$ cwt.) have given returns equal to any other mines in the division.

Some years ago a large area of land was taken up at Wiseman's Creek, between Brewonglo and Rockley, for copper-mining. Some leases, known locally as North Wiseman's, were worked, but the venture was not remunerative. Some persons sent for assay samples taken from the heaps of refuse about the shafts, and got good returns for silver. This caused fresh excitement. A large number of leases were applied for, and good prospects obtained along the line as far south as the old Essington copper-mine. A village was quickly formed at the junction of Wiseman's Creek. I hope that when the next report is written furnaces will be working profitably at these mines.

I will now give you particulars in detail of the most prosperous mining in the division.

Sunny Corner, or, as it is called by the postal department, Mitchell, is about 16 miles from the Rydal railway station, Western line, and 8 miles from Piper's Flat, on the Mudgee line, but all traffic is between Mitchell and Rydal. There are thirteen mining Companies on this field, the first in importance being the Sunny Corner Silver-mining Company. The area of land held by this Company is 205 acres, leased from the Crown. This was the first Company to erect furnaces to treat silver ores in the Colony, and have expended £40,000 on furnaces and appliances to enable them to treat the ores locally. About 512 men are employed. The total yield of silver during the year has been 20 tons 8 cwt. 0 qr. 24 lb., of an estimated value of £160,000. The shares in this Company are 20s., and 12s. 6d. has been returned in dividends. The Silver King is the next Company of importance. It is to the south of the Sunny Corner mine, and adjoining. Its area is 80 acres, leased from the Crown. Sixty-five men are employed on this property, and 15,000 tons of ore have been raised ready for treatment. Two furnaces are in course of erection. In fact, one has made a start, and run out 500 lb. of silver. The furnaces, when completed, will cost about £6,000, and the dams fully £1,000 more. I have no doubt this Company will, during 1886, send away silver by the ton, as the Sunny Corner Company has done.

The Silver Queen Company has an area of 80 acres, 40 being leased from the Crown, and employs sixty-eight men. The 40 acres of freehold is being cleared and surveyed for sale as a village site.

The Nevada, being a Company formed to work two 20-acre leases of Crown Lands, machinery was erected to the value of £5,000, but when smelting began it was found that the ore contained large percentage of refractory metals, and the whole thing nearly collapsed. The mine is, however, being worked again, and I hope the difficulty has been overcome.

The Great Western Company holds an area of 60 acres under lease, and employs twelve men prospecting.

The Mitchell has 140 acres under lease. Upon this property is erected a public smelter, the cost being about £2,000, Mr. Ickee being the owner. This furnace works well as long as the bricks last, but unfortunately the Colonial-made bricks will not bear the great heat, and are worn out in forty-eight hours. Forty men are employed on this property.

There are nine other Companies, viz.—

- Honest John, employing four men.
- General Gordon, six men; area 60 acres.
- Silver Star, four men; area 40 acres.
- Cornstalk, four men; area 40 acres.
- Silver Hill, six men; area 60 acres.
- Ton Kin, eleven men; area 20 acres.
- Central, six men; area 20 acres.
- Garland's, four men; area 20 acres.
- Bulldog, six men; area 60 acres.

Upon these properties a great deal of prospecting has been done, and prospects are reported fair.

Two hundred and twenty-two applications have been lodged for mineral leases during the last year, the area being 8,247 acres. A large proportion of these applications are for land at Parr's Range, 9 miles

miles north-west of Mitchell. Fortunately, if silver ore is found, there is plenty of limestone of excellent quality near at hand. It is from Purley's quarry in this neighbourhood that the Sunny Corner Company gets the limestone it uses.

Eighteen gold-lease applications have also been lodged at Mitchell during 1885 for an area of 120 acres.

Shepherd & Hurley and Murray & Co have done a great deal of work. Cook & Co. were satisfied with their prospects, and erected a small battery. The trial crushing of 400 tons of stone gave 292 oz. gold. Among the gullies and hills a great many have been prospecting and fossicking, but only 800 oz. of gold have been sold locally.

The population of the field is about 3,500 persons.

The village has among its buildings a public school, two churches, a hospital, post and telegraph office, two banks, and police quarters, usually called the court-house. Coaches run regularly to and from Rydal, also to and from Bathurst. The only drawback to the place seems to me to be the want of pure water for domestic purposes.

The extract herewith, taken from the *Tribune*, gives more particulars than I can. Please use it:—

SUNNY CORNER SILVER MINES—The Silver King Smelting Furnaces.

(From our Special Reporter.)

The two smelting furnaces on the Silver King mine, one of which was started on Wednesday last, and has since worked faultlessly, were built by Hudson Bros., Limited, and erected by Messrs. Gafford and Hogue, the patentees. Their capacity is from 20 to 25 tons per day each, and they are known as water-jacket smelters. The water-jacket principle has in them a new, or rather an extended, application. The term water-jacket is applied to outer and inner sheets of iron, around which cold water circulates for the purpose of keeping the plates of the furnace cool, thereby preventing injury by the tremendous heat necessary for melting the ore. It is customary to have these water-jackets only carried to a height of 4 ft. 6 in. from the bottom of the furnace, and above that height the furnace is usually encircled with brickwork. In the new smelters the jackets are continued right up to the feeding-hole, and it is claimed that by the adoption of this principle a furnace can be kept continuously at work for three years. It is a noticeable fact that the Sunny Corner smelters have to be shut down at intervals to have the brickwork renewed. The public smelter recently erected at Sunny Corner, because of the extended application of brickwork without water-jackets at all, may be described as a partial success. I was informed that this furnace had never had a longer run than five days without relining the interior with bricks, and I was given to understand that the average run was not more than three days. The explanation is very simple: a heat that is sufficient to melt the ore is also sufficient to consume the bricks; in fact the ironstone in the ore feeds on the silica in the bricks. Various kinds of bricks have been tried, but none so far used have stood the fierce heat of the furnace capable of putting through an unusually large quantity of ore in twenty-four hours. Hence every few days the furnace has to be shut down to be rebricked, and thus it is that the public smelter has not yet put through the 500 tons of ore which the owners purchased from the Sunny Corner mine to commence operations. I believe the extended water-jacket principle has been extensively used for copper-smelting in the United States, but never, to the knowledge of Messrs. Gafford and Hogue, applied to the smelting of silver ores. In nearly all respects the smelters resemble in the process of treatment of the ore those erected by the Sunny Corner Company. The new smelters are, however, a vast improvement in respect to the discharge of fumes. These are diminished very effectually by the application of live steam in the funnel. This deadens the fumes and drives a great deal of the lead and arsenic contained in them back into the furnace. The value of this invention is immeasurable. The Sunny Corner Company, in a praiseworthy effort to carry the fumes off a great distance, and to extract the bullion in their transit, expended about £3,000 in the construction of nearly half a mile of immense fluming; yet the anticipated success has not been attained. Either the fluming—big as it is—or the chimney at the terminus, is of insufficient capacity to carry away these poisonous fumes. That they are deadly poisonous I have abundant evidence. Much of the ore contains 2 per cent. of arsenic, and 100 tons of ore smelted a day means the distribution of 2 tons of pure arsenic. Arsenical fumes are bad, but lead poisoning is infinitely worse. In smelting large quantities of lead are used, much of which goes away in fumes, killing all the vegetation in the vicinity of their distribution, and, I have reason to believe, seriously affecting the health of those brought into close contact with the poisonous matter. The public smelter is the worst in this respect, and the sight of a man feeding the furnace with his mouth covered made me suspect that it was only a matter of time when such work would kill the strongest man alive, and that it was also only a matter of time when these furnaces would, in the interests of public health, have to receive the attention of the Government.

The water used by the Silver King smelters is forced from a dam about a mile distant, and delivered into a reservoir capable of holding some 20,000 gallons, from which it gravitates into the furnace jackets. When it has reached a certain degree of heat, it is discharged into three large wooden tanks, and is thence pumped back into the large body of cold water in the reservoir, and, excepting that lost by evaporation, is used again and again. There is fully three months' supply in the dam.

The composition of the ore so varies that samples are constantly being taken for analysis preparatory to fluxing, the most refractory substance in the ore being alumina. The flux is almost exactly the same as used in the Sunny Corner smelters, as the ore is from the same lode. It consists of various proportions of lead, limestone, coke, and slag to each barrow of ore.

The contract accepted by the patentees was for the erection of two of these smelters, with all the necessary driving, pumping, blowing, and refining machinery, and other accessories, for £5,800, and to run all the works for thirty days after starting. Besides the two smelters, they have erected an engine, 14-horse nominal, by Tangye Brothers, of Birmingham; two 25-horse power boilers, made by Hudson Brothers, Limited; a powerful blower, by Baker, of America; a Tangye pump, capable of raising 5,000 gallons an hour; stone-breakers, refining laboratory, and other necessary smaller appliances.

After running the furnaces one month they will be handed over to Mr. Anderson, a smelter of American experience, and more recently engaged at the Sunny Corner works. The refinery is under the charge of Mr. R. Mynott, who has been for some fifteen years engaged as a silver refiner in the most famous silver-mines of America. In an interesting interview with that gentleman on silver-mines of America, I learned for the first time that it was not an infrequent occurrence for the refineries on the Comstock and other fabulously rich mines to be closed down because there was no Newcastle (N.S.W.) coal available. It was prized so much above any other coal that it was the practice to await its arrival rather than use any other. He is an enthusiast in his work, and thinks New South Wales the richest country in the world in minerals. Mr. G. H. Cossins, the recently appointed assayer of the Company, brings for application many years' experience gained at silver, copper, and gold mines in England, South Australia, and Victoria.

The wonderfully successful working of one of the smelters has already been described, and now the result of the treatment of the bullion in the refining department after they are enriched up to 600 oz. to the ton by the furnaces, is alone awaited.

Tuena.—Only about 110 men are just now working here, and with the exception of two parties, M'Guire and Unsworth, are seeking for gold. M'Pherson's venture, erecting a battery at Scrubby Rush, was not remunerative; there were too many interested parties. The Company soon collapsed, but close by this property another Company has been formed with a fair capital. I hope it may pull through. At Bombah, which is north, but across the Abercrombie River, from Scrubby Rush, good alluvial has been worked, but the deposit is of limited extent. Only 512 oz. of gold have been sold locally. This represents not more than one-third of what has been obtained. Thirty-three mining-lease applications for 870 acres have been lodged at Tuena this year; also applications for twenty-one gold leases, area 110 acres. Value of machinery on the field, £2,300.

Burrage.—This mine has been kept working all the year. Although the price of copper is so low, 150 men are employed. The value of the furnaces, &c., here is £6,000. The value of the copper sold during 1885 was £22,500.

Oboron.—

Oberon.—This field was apparently dead for several years, but during the past year a party of working men left Burrage to prospect the old reefs, and found what they considered payable stone. They erected a small battery, and have had a trial crushing that returned them £350. These men are quite satisfied. At Oberon 753 acres of Crown lands have been applied for as mineral leases, also 25 acres as gold leases.

Rockley.—Applications have been lodged at this office for ninety-six mineral leases, representing 3,518 acres of land, and one gold lease of $4\frac{1}{2}$ acres. I firmly believe that during 1886 furnaces will be erected in several localities in this district for treating silver ores, and that good returns will follow, more particularly at Back Creek.

Bathurst.—Only three gold lease applications have been lodged at this office, being for 22 acres of land, near the old Napoleon Reef, at Glanmire. 14 mineral lease applications have been lodged during same period for 300 acres at Yetholme. About 159 men are working as miners.

Mount M'Donald.—A great falling off has taken place upon this field, both in the number of men working and the return of gold. Only 100 men are now regularly at work. The return of gold obtained has been about 4,000 oz., but of this quantity fully one-fourth has been got by recrushing the tailings. Only 33 oz. of alluvial gold was got during the year. The principal returns are as under:—

	No. of tons.	oz.	dwt.	gr.
Grant's	190	396	19	4
Butcher's	143	452	16	8
M'Court's	109	147	9	16
Eureka	709	693	8	1
Adclong	58	127	1	23
Balmoral	88	243	13	4
Jonathan	96	236	11	14
Woman's	98	204	11	13
From sand	1,014	6	14

Nine applications for gold leases were lodged for the year; 101 miners' rights issued; also twenty business licenses. The population of the village is 500 persons. The value of the machinery on the field is £12,000.

Trunkey.—For the want of water everything has been at a standstill. The Bathurst Company's lease has been retaken, and is being worked.

Wilson's property at Pine Ridge has given two or three good crushings, but the country has slipped, and fully 5,000 tons of dirt has fallen into the mine, almost destroying the property. Several leases have been applied for both for gold and other minerals. The value of the machinery on the field is £10,000.

Recapitulation.

Value of Silver from Sunny Corner	£150,000
" Gold	3,000
" " Tuena	2,000
" Copper " Burrage	22,500
" Gold " Bathurst	4,000
" " " Mount M'Donald	15,000

N.B.—The value of the gold given in this paper is below the quantity won. When I could not get actual returns, I refused to take sums guessed at.

BATHURST DISTRICT—ORANGE DIVISION.

(Mr. Warden J. T. Lane, P.M., Orange.)

ALTHOUGH the expectations of a year ago have not been realized, the circumstances surrounding our gold-fields are by no means discouraging. The perseverance manifested by the "stickers" in the different localities is an evidence of a hope we trust will some day be fully realized. This circumstance is fraught with importance, seeing there must be a something to warrant the confidence thus evinced.

The parent gold-field in the Australias—Ophir—continues to attract interest. The Bluff Amalgamated Gold-mining Company is proceeding with operations which must result in developing that spot upon which so many have been speculating for years past—The Bluff. In sinking the different shafts good gold has been procured. They are down 80 feet, and expect to meet the tunnel in about 250 feet. The distance from No. 2 to No. 3 shaft is about 100 feet. About 200 yards from the above workings the Company have sunk and logged a shaft 60 feet deep, and have some 4 feet of quartz ready for stoping, which will average 9 dwt. to the ton. The engine and battery are in good order. On the whole the prospects are encouraging. The crushing, which is soon to take place, is looked forward to with considerable interest.

There are two men working at the Belmore—now Lady Mary—with prospects of success. They have a large quantity of stone to grass which is thought will well pay to put through a battery.

The Little Belmore (Mr. Spencer's) has struck a vein, and taken out some nice specimens.

At Lucas' Gully tenders are invited for putting in a tunnel 200 feet. This is considered a promising claim.

The alluvial miners are making a living, but we hear of no startling finds.

Lucknow continues its even course towards that position which it is destined some day to reach, under the able and indefatigable management of Mr. Newman. The "bonanzas" continue to be blown out of their long resting places, and the ores which are sent home yield a satisfactory return. I will not go into figures, as reports of the operations appear in the papers from time to time. The discovery *re* the cost of treating these ores in Germany will be a great consideration.

The Frederick Valley Gold-mining Company has nearly completed the erection of the machinery. The diamond-drill is down some 240 feet in pure serpentine, and they hope to go 800 feet ere they stop.

The Great Extended and other claims at the Forest reefs continue operations with varied degrees of success. The Old Lumpy lead shaft is down some 200 feet, and they are procuring payable gold amongst fossil nuts, leaves, woods, &c., &c. On the whole the prospects are not without encouraging features.

There is nothing that I know of being done in the mining world in other directions in my division of the district.

BATHURST DISTRICT—CARCOAR DIVISION.

(*Mr. Warden Connelly, P.M., Carcoar.*)

I HAVE the honor to forward my annual report of the Carcoar Division of the Bathurst Mining District.

The yield of gold for the past two years, as shown by the escort returns, was—

							oz.	dwt.	gr.
1884	12,040	3	14
1885	9,073	6	3
							2,966 17 11		

Showing a decrease of 2,966 oz. 17 dwt. 11 gr. on the returns of the previous year, which I attribute mainly to the want of water for mining purposes, and the absence of any fresh enterprise in mining pursuits.

The low price of copper deters capitalists from working the numerous rich lodes of that metal known to exist in this locality, and there seems at present no prospect of an early revival.

A rumour during the past year that silver had been discovered in the Black Hill ranges, about 3 miles south of the Galley Swamp gold-field, has not been confirmed, although it seems not improbable, from the geological formation of the country, that at no distant date important mineral discoveries will be made in that locality.

BATHURST DISTRICT—BATHURST DIVISION.

(*H. H. Hutchinson, Mining Registrar.*)

I BEG to forward my annual report for the Bathurst portion of the Bathurst Mining District for the year 1885.

At Green Swamp several shafts have been sunk on lodes showing indications of silver, but the results have not given sufficient inducement for investing any quantity of capital, and at present there is little, if anything, doing there.

At Blackman's Swamp, near Limekilns, Sinclair and party are working on a rich gold leader, which, though small (from 1 inch to 6 inches), has given some high returns, the last crushing of 5 tons yielding 51 oz. Several other parties are preparing to work leases in this vicinity.

Prospecting continues on Winburndale Creek; and at old Fontana and Napoleon reefs a few miners are at work.

During the year I have received fourteen applications for mineral, and four applications for gold leases, and have issued 160 miners' rights, thirty-nine mineral licenses, and eighty-nine business licenses, the issue of so many of the latter being occasioned by the rush that set in during September to Wiseman's Creek, situated within the Rockley division of the Bathurst mining district.

BATHURST DISTRICT—CARCOAR DIVISION.

(*W. B. Warner, Mining Registrar.*)

THE year now closed has been an uneventful one in this district. No new finds of any importance have been reported, and some of the old mines show signs of exhaustion, notably that of Brown's Creek, which for many years has occupied the premier position among the mines of the district. About 1,500 oz. of gold was obtained in 1885 from this mine, but owing to the smallness of the yield per ton, the amount of labour required, the cost of fuel, &c., the proprietors have for some years received very little benefit from the working of the mine, the labouring men, of whom about seventy are in constant employment, having the lion's share of the produce. The Company are now threatened with an action in the Supreme Court by a neighbouring landowner for injury to his land, and it is generally believed that the mine will be closed, and the plant removed to a distant mine. This will be a serious loss to the locality, not only to the labouring classes, but to the farmers, shopkeepers, and carriers.

The Church and School Estate in this division is still practically closed to the miner. Only those leases taken up before the passing of the new Act, some years since, are working, as no new ground can be leased, no matter how rich the appearances are. For a long time past all our candidates for parliamentary honors make hustings promises that they will do their best to have all Church and School Lands put on the same footing as Crown Lands, so far as the miner is concerned. Nothing, however, has hitherto come of these promises; and, although I frequently receive inquiries from persons anxious to mine on the estate, I can only refer them to the officer in charge, and there the matter ends. The general opinion here is that if the Church and School Lands were thrown open to the miner a large increase of population and wealth would be the result to Carcoar.

At the present time the Gally Swamp gold field is the most constant and payable in my division. There are two small crushing plants which work occasionally, and every now and then nice cakes of gold brought into the local banks prove that both they and the mines are working profitably.

There

There has been a considerable falling off in the quantity of gold raised in any division during the year, as shown in the following table, compiled from the escort returns:—

						oz.	dwt.	gr.
1882	6,599	4	2
1883	9,817	16	12
1884	12,040	3	14
1885	9,073	6	3

The year thus shows a decreased yield of about 3,000 oz., compared with 1884. This may be accounted for in several ways. The dry weather, which for so great a portion of the year prevented sluicing and crushing operations, had much to do with it. Another reason may be found in the fact that a good many miners left their usual work to labour as navvies on the new railway now in progress from Blayney via Carcoar to Cowra, but the principal reason is, I believe, to be found in the fact that no new mines are working to take the place of those that year by year become exhausted on the Church and School Estate.

Considerable interest was felt in this district at the result of an action lately heard in the Supreme Court, viz., that of Lomax v. Jarvis. Defendant is the owner of several water-rights, which run from Flyer's Creek to some alluvial claims of his which are worked by sluicing, after which the water is again turned into the creek. Plaintiff, who has an extensive grazing estate lower down the creek, sued the defendant for destroying the water, and rendering it unfit for the use of his family and stock, and won his case, thus establishing a legal precedence of vast importance to all persons engaged in mining operations throughout the Colony.

In copper practically nothing is doing, the late low prices offering no inducement either to work old mines or to prospect for new ones.

During the year I sold ninety-two miners' rights and nine mineral licences.

BATHURST DISTRICT—TRUNKY DIVISION.

(*W. T. Lee, Mining Registrar.*)

I NOTE with much pleasure the increased yield of gold this year, being over 400 ounces in excess of 1884. The New Bathurst Gold-mining Company's, Limited, works are progressing in a very satisfactory manner. The shaft is to be sunk vertically to a depth of 550 feet, of which they are now down about 52 feet. This property, formerly known as Wilson's Reef, is likely to prove very valuable, as in the old workings at 500 feet, when the water took possession, the stone was constantly improving. Unfortunately, adequate provision had not been made to overpower the inrush of water, which caused stoppage of works.

Since the erection of steam power at Pine Ridge things have very materially improved there. The rainfall (for which I am indebted to J. Ryan, Esq., licensed surveyor) was 24.62, nearly the same as 1884, but quite insufficient to start sluicing-works. During the last six months a good many mines have been working at Pharo's Point, on northern bank of the Abercrombie River, some obtaining nice gold. The works at Trap Rock Hill referred to in my last were not a success. The miners have left the district. Silver occupies a large share of attention, and on the Tuena side likely to be a great success.

During the year I have issued 104 miners' rights, twenty-six business licenses, and six mineral licences.

BATHURST DISTRICT—TUENA DIVISION.

(*M. Jones, Mining Registrar.*)

I HAVE the honor to report ancient mining in this division of the Bathurst mining district for the year 1885 that I have received thirty-three mineral lease applications for an area of 830 acres, and twenty-one gold lease applications for an area of 143 acres. A great rush has taken place this year for silver, nearly all the mineral lease applications being for silver, but up to this date very little work has been done on any of the land taken up; and the same may be said of the gold leases, very little as yet having been done towards proving the value of any of the reefs. And in alluvial gold-mining 1885 has been the worst year for a long period, there not having been any water through the whole year for sluicing purposes, this causing the yield of gold to be very small. I have sold 111 miners' rights, eighteen mineral licenses, and seven business licenses for the year.

BATHURST DISTRICT—COWRA DIVISION.

(*W. G. B. Smith, Mining Registrar.*)

I HAVE the honor to forward herewith my returns for the past year. I regret to state that mining in my portion of the Bathurst division is almost at a standstill. The main reason for this is owing to the scarcity of water. The number of miners' rights issued during the year amounted to twenty-eight. Most of the holders of these have interests in leases.

BATHURST DISTRICT—ROCKLEY DIVISION.

(*T. C. Cromie, Mining Registrar.*)

I HAVE the honor to herewith enclose you my annual report for 1885, from which you will see that, with the exception of the silver rush at Wiseman's Creek, during the months of August and September last, mining in general has been dull.

During the year 1885 I have issued ninety-seven miners' rights, 100 business licenses, and thirty-four mineral licenses, a large increase on the previous year, owing to the excitement at Wiseman's Creek.

During 1885, ninety-eight applications were received here for mineral leases, representing 3,573 acres, and one gold-mining lease of 4½ acres. The mining revenue from all sources amounted to nearly £1,500.

Gold-mining is at a standstill, owing to the continued dry seasons.

Alluvial-mining is almost defunct, as, there being no water for sluicing purposes, plenty of payable ground in this division is now deserted. Cow Flat and South Apsley copper-mines are still idle, and until copper rises in price are likely to remain so. As a Warden's Clerk has been appointed for Burranga since April last, that copper-mine is no longer connected with Rockley. I have been unable to obtain any reliable information as to the yield of silver at Wiseman's Creek. In the South Wiseman's Creek Silver-mining Company a tunnel is now being driven into the hill, and preparations are being made to work the ground in a systematic manner. It is said that some of the silver ore obtained from this land has been very rich when analyzed.

The

The new mining township of Glenburn has been surveyed at Wiseman's Creek. One hotel has been erected there, in addition to one on private property. About 100 allotments have been occupied, and buildings erected there. James Russell, Esq., a well-known mining prospector, has informed me that he has raised over 12 tons of a new mineral in this Colony, at the old alluvial diggings, in Caloola Creek, called "Barytes," which he values at £43 2s. 9d. He seems most hopeful that it will be found in payable quantities about Caloola. I wish to add that the greater part of all the mineral leases was for silver, one for manganese, three for tin, and two for wolfram.

BATHURST DISTRICT—MITCHELL DIVISION.

(T. G. Wright, Mining Registrar.)

DURING the past year there has been a vast improvement at this place in the silver-mining industry. Seven furnaces have been erected on the Sunny Corner mine for treating silver ores, which have turned out a great success. Over 20 tons of silver has been taken from this mine during the past twelve months, with a percentage of gold, making the value five shillings per ounce. This Company alone has £40,000 worth of machinery on the mine. Some thousands of pounds have been expended in making roads and erecting dams for the use of the mine. The prospects of this mine are really good.

The Silver King has erected two furnaces, which ran for a short time with very satisfactory results, but had to stop, owing to the scarcity of water. There is about £7,000 worth of machinery on this mine. The percentage of gold is more in this mine than the Sunny Corner. The prospects of this mine are really good.

The Nevada Silver-mining Company have erected one furnace on their mine, and run for a short time, when it was found the ore could not be treated, and were obliged to stop. The stopping of this mine put a great lull on the place in general. One furnace was erected on the land belonging to the Great Mitchell Silver-mining Company, on a different principle to the other furnaces, at this place, which ran very well for a short time, but owing to the bricks not being of good quality, and would not stand the great heat, the furnace is now idle, the cost of which was about £2,000.

224 mineral leases were applied for during the past year, containing an area of 6,388 acres. Some fine gossan has been found on a great many of them, especially the Great Western and the Victoria, which are adjoining the Sunny Corner and Silver King mines. Also at Bulldog Range and Parr's Range, the latter being 10 miles in a north-western direction from Sunny Corner.

There were eighteen applications for gold-mining leases during the past year, containing an area of 120 acres. There is not a great deal being done with them, the best claim being Cook and party's, at Dark Corner. They have a reef 3 feet 6 inches wide, at a depth of 100 feet, and easily worked. There were 1,500 tons crushed from this reef, yielding over one 1,000 oz. of gold.

During the past year there were 518 miners' rights, 128 business licenses, and 112 mineral licenses issued at this office.

The population of this place is about 4,000, but the want of water is felt very much for domestic uses, the people depending wholly on the water caught from their houses.

BATHURST DISTRICT—MOUNT M'DONALD DIVISION.

(G. A. Gunning, Mining Registrar.)

I HAVE the honor to submit my annual report for the year ending 31st December, 1885, and regret that the gross yield shows a loss of 1,905 oz. 14 dwt. 21 gr. as compared with that of 1884. The total yield for 1885 is 3,909 oz. 11 dwt. 8 gr., against 5,815 oz. 6 dwt. 5 gr. obtained during the previous year. The decrease may be accounted for by several of the claims that were producing good return in 1884 ceasing operations owing to hardness of ground.

There have been 1,642 tons of stone crushed for 2,861 oz. 7 dwt. 17 gr., giving an average of 1 oz. 14 dwt. per ton, which is a slight increase in the average per ton for last year.

The Selection and Balmoral batteries have been recrushing the tailings with very satisfactory results, 1,014 oz. 14 dwts. being obtained from this source, but I cannot obtain the quantity of sand recrushed.

33 oz. 17 dwt. 3 gr. of alluvial gold has been purchased by Messrs. Fox Bros., storekeepers, during the year. This gold is the result of sluicing in the bed of the Lachlan River.

I have issued 101 miners' rights and twenty business licenses and received nine gold lease applications during the year.

The following are the yields from some of the principal claims:—

	No. of Tons.	oz.	dwt.	gr.
Grant's.....	190	396	10	14
Butcher's.....	143	452	6	8
M'Court's.....	109	147	9	16
Eureka.....	709	893	8	1
Adelong.....	58	127	1	23
Balmoral Tribute.....	88	243	13	14
Jonathan.....	96	236	11	14
Woman's.....	98	204	11	13

It is a great pity a Company is not formed to test the field at a depth. Several good claims have stopped work at a depth of about 150 feet, ground being hard the cost of raising has proved too expensive for the means of the working miner. It is the opinion of experienced miners there must be good reefs to be met with at a depth.

BATHURST DISTRICT—BURRAGA DIVISION.

(J. A. Goddard, Mining Registrar.)

BURRAGA COPPER-MINE is not so flourishing as it was a couple of years back, owing to the low price of copper.

From information received, the mine is as rich, if not richer than ever it was. There are at the present time 150 men employed, one 12-horse power engine, four furnaces, and one refinery furnace. The furnaces are about a mile from the mine; a small tram-line is laid between, and horses are employed to truck the ore for smelting.

Within

Within a couple of miles of the copper-mine there is a lease taken up for silver. Particulars herewith, as ascertained—

Two lodes run through the ground underlaying towards each other.

No. 1 shaft, on western lode, underlay to the east, 90 feet sunk on underlay.

No. 2 shaft, on eastern lode, underlay west, 70 feet sunk on underlay.

No. 3 shaft, vertical, to drain the other shafts, 60 feet deep; no lode yet.

Bearings, north and south.

Assay of minerals—From 20 to 40 oz. of fine silver, from 7 to 30 per cent. of lead, and $4\frac{1}{2}$ dwt. of gold.

BATHURST DISTRICT—OBERON DIVISION.

(*J. O'Connor, Mining Registrar.*)

I HAVE the honor to forward you my annual report on mining matters in Oberon district, from which you will see that mining is improving. There has been erected within the last six months, at Blackman's Old Reef, near Oberon, a 12-horse power crushing machine, working ten stamper-heads, and has been working for the last two months, and crushed 140 tons of quartz, which yielded 90 ounces of gold. There are twenty-two men in this Company, and all are sanguine of its turning out good. They are now below the water-level, and the vein carries more gold as they go down. There are several other parties working about the same place, but have not had a crushing. 758 acres of land applied for at this office during the year under mineral leases to mine for silver, 25 acres for gold-mining leases, and 20 acres under the Mining Board Regulations. I anticipate a much larger yield from this field during 1886, as there are several claims with good stone in sight.

TAMBAROORA AND TURON DISTRICT—WELLINGTON AND IRONBARKS DIVISIONS.

(*Mr. Warden R. Hare, P.M., Wellington.*)

I HAVE the honor to forward you the annual report for the Ironbarks Division of the Tambaroora and Turon mining district for the year 1885. As I only entered on my duties as Warden on the 5th January, I have had to trust to others for the requisite information. In quartz-mining I can report little progress during the last twelve months, as most of the Ironbarks reefers have either been prospecting various reefs or otherwise sinking to catch the gold at greater depths, notably Messrs. Liddell, who have just struck a really good reef in one of the newly sunk shafts, at 90 feet deep. It is probable a revival in quartz-mining may take place. Many of the old reefs have been lately taken up by strong parties with a determination to test the value of each, as deep sinking has never been tried. At present it seems likely that some of them should succeed. Capital is certainly wanted, and as there is a prospect of its being introduced in this gold-field, the prospects of the coming year seem brighter than many preceding ones. Scott's machine of twelve head of stampers still remains, is in good order, and at present is sufficient for all purposes. In alluvial mining the amount of gold obtained is small, but the dry weather for the last three years has driven most of the alluvial miners to other parts, but with favourable seasons the Ironbarks would probably return twice the amount of gold now produced. There have been also two Companies at work at the Mookerawa Junction, on the Macquarie River, viz.:—The New Macquarie River Syndicate Gold-mining Company, which till now has been employed in cutting races and opening the mine, the prospects of which look very cheering. The plant consists of one locomotive boiler 100-horse power, and two large pumps capable of throwing 70,000 gallons per hour. At present ten hands are only employed. The other Company is at present at a standstill, but expect to start again shortly. This, named the Macquarie River Gold-mining Company, has a capital plant, and as gold is known to be in the claim in large quantities the prospects of the mine, notwithstanding drawbacks, are good. With regard to gold returns, it is almost impossible to get as correct an account as is desirable, as the banks in Wellington and Orange are continually purchasing from the Ironbarks miners; however, the returns from the stores at Ironbarks show the purchase of 1,134 oz. 2 dwt. 12 gr. for the past year. At Spring Creek, on the Macquarie River, a nugget of gold weighing 62 oz. was unearthed by a miner named James Bell, and sold to one of the banks in Orange. One or two other lots were also disposed of. The locality is supposed to be either or near the same place. Number of miners' rights issued, 158; of business licenses, 26; of gold leases applied for, 5.

TAMBAROORA AND TURON DISTRICT—HILL END DIVISION.

(*Hy. S. Hawkins, Mining Registrar.*)

I HAVE the honor to submit, for the information of the Honorable Minister of Mines, the following report on mining matters in connection with Hill End Division of Tambaroora and Turon gold-fields for the year 1885:—

I regret that I have no fresh discoveries to mention for the last year. Not more than twelve claims have been in proper working. Alluvial digging has been at almost a standstill on account of the dryness of the season. Most of the alluvial digging is done by Chinese.

Quartz.—Carver and party, on the Scandinavian Hill, had to knock off work on account of water.

Schobert and party, adjoining, are similarly situated.

Myers and Northy, at Specimen Gully, still raising stone, but the yield has not come up to expectations.

A number of crushings have been made from other claims during the year, none of which are worthy of note.

Hawkins Hill Gold-mining Company is now under management of Mr. J. W. Marshall. A new line of reef was tried about November, the stone being fair. Most of the claims have been on tribute for the last six months, none of which turned out anything rich. The Company is in possession of good machinery at Tambaroora.

Hancock and party, at Dirt Holes, had a good crushing at the beginning of the year, the stone giving 1 oz. and 5 dwt. to the ton. Through strength of water a Tangye pump had to be erected. The last crushing below water-level was not up to anticipations, 92 tons yielding 72 oz.

Christie and Crombie, on Independent Reef, are still raising passable stone.

Canton

Canton Tributors had a crushing of 65 tons, yielding 50 oz., which does not pay, they having the expense of a Tangye pump; gold is patchy.

Red Hill Gold-mining Company has been idle during the year, and is now under management of Mr. Charlton.

Escort of gold for the year is:—

	oz.	dwt.	gr.
Quartz	2,540	1	0
Alluvial	1,863	9	10
Total.....	3,903	10	10

Decrease on last year of 3,300 oz.

Gold-mining leases applied for	11
Extended claims	22
Water-races	21
Ordinary claims	13
Miners' rights	304
Business licenses	10
Mineral licenses	4

TAMBAROORA AND TURON DISTRICT—SOFALA DIVISION.

(M. Fagan, Mining Registrar.)

I HAVE the honor to submit my report, as Mining Registrar of the Sofala Division of the Tambaroora and Turon Mining District, for the year 1885:—

Spring Creek (Tribute) Company, near Sofala.—Originally a party of thirteen men, afterwards reduced to eight men; have during the short time at work raised about 96 tons of quartz and 21 oz. of gold. The present depth of the shaft is 284 ft., and the deepest level 275 ft. Another party is formed to try the mine at a greater depth (twelve men in the party.) On the ground is a superior 25-h.p. engine, with powerful battery, pumps, and winding gear complete, valued at £2,000.

Wattle Flat.

Solitary Reef Gold-mining Company—(Tribute).—This party of seven men have during the past twelve months raised and crushed about 450 tons of quartz, averaging nearly 7 dwt. per ton. The shaft is sunk to a depth of 400 ft., and the principal working has been on the lower levels—the deepest 370 ft. They are now crushing a large quantity of stone. On the ground there is a powerful engine, with battery, and winding gear, and pumps, at intervals employed in crushing for the public.

Caledonian, Surface Hill.—This wide reef (average 6 ft.), formerly in the hands of the above Company, is now out of work. It is generally believed that with a steam plant on the ground, and a heavy battery of ten stampers in the hands of a party of working men, this reef would prove highly remunerative.

Old Surface Hill.—The small veins in this ground are worked by small scattered parties of two or three men, occasionally having a crushing of a few tons of quartz at Davidson's engine, near the locality; the greater part of the gold is obtained by hand washing and crushing.

Davidson's crushing plant of 12-h.p. engine, with four heads of stampers, engaged in crushing small lots of stone from Surface Hill, O.K., and Whelan's Hill, prospecting parties on the Black Creek, Wattle Flat, and valued at £1,000.

O.K. Line of Reefs.—The only ground being worked on this line is the Frenchman's lease, with a party of four men; been working two veins (about 4 in.) near the surface, averaging 2 oz. per ton, and now about to crush a quantity of stone from the previous workings, at a depth of about 100 ft. on the underlay.

Erskine Flat Gold-mining Company.—Extended claim of 10 acres on the immediate south bank of the Turon River, 1 mile distant from Sofala. Worked many years back; average depth of ground, (33) thirty-three feet; stripping off, 27 ft., leaving about 6 ft. of wash-dirt. Under the present Company the ground has been worked by horse power, but has been in abeyance for nearly six months, on account of the heavy influx of water; about to erect 8-h.p. steam-engine for pumping and box-slucing; will employ (12) twelve men day and night continuously; expect to be in full work in about two months; gold already won, 263 oz.

Box Ridge.—Cole and party of twelve men, owners of the Homeward Bound and Anthony Trollope veins of 2 and 5 acres respectively, have been working latterly on the Homeward Bound, at a depth of 160 feet, on a vein varying from 4 inches to a foot in width. They have raised and crushed about 250 tons, yielding from 5 dwt. to 1 oz. per ton, and bearing gold of a superior quality, realizing as high as £3 19s. 6d. per oz. The party at present are sinking a perpendicular shaft. On the ground is erected a 10-h.p. engine, driving two batteries of five heads each, with pumping and winding gear attached, and valued at £1,000, the same being rented at £1 per week.

Quart-pot Reef, Limekilns.—Several leases have been applied for upon this line of reef. On the 4th December last Sinclair and Co. had a trial crushing of 10 tons of quartz from this claim, which yielded 5 oz. 11 dwt. per ton.

At the Crudine, Palmer's Oakley, Wattle Flat, and Upper Turon there have been several parties of fossickers at work in the various old workings, from whom I have been unable to obtain any information as to the amount of gold won, but it is supposed that the greater number of them have made fair wages during the year. The dry season has prevented anything like a fair trial of sluicing work in this division during the year. The following results have been obtained from several small parcels of quartz raised from various reefs on Wattle Flat during the year:—

		oz.	dwt.	gr.	
Dunleavy and Company	140 tons of quartz	43	10	0	Surface to 80 feet
Ellis and Company	90 "	77	8	0	" 10 feet
Grice and Company	29 "	48	14	0	" 20 feet
Prince and Company	7 "	16	1	0	" 20 feet
Gillard and Company	4 "	2	2	0	" 4 feet
Longford and Company	16 "	6	19	0	" 18 feet
Total	386	194	14	0	

The following amount of gold from all sources has been transmitted from this division by Gold Escort and other means during the year 1885, viz. :—

	oz.	dwt.	gr.
For quarter ended 31st March	514	19	23
For quarter ended 30th June.....	601	5	10
For quarter ended 30th September	759	16	0
For quarter ended 31st December.....	456	8	1
Total by Gold Escort	2,332	9	10
By other means during the year	1,482	11	10
Total	3,815	0	20

Market value of same, £14,306 8s. 1½d.

Miners' rights issued during the year	421
Business licenses " "	19
Mineral licenses " "	31

Thirteen applications for gold-mining leases and twenty for mineral leases have been received by me during the year.

TAMBAROORA AND TURON DISTRICT—IRONBARKS DIVISION.

(*P. Healy, Mining Registrar.*)

I HAVE the honor to forward my annual report of the Ironbarks Division of Tambaroora and Turon Mining District for the year 1885.

In quartz-mining I can report little progress during the past twelve months, as most of our Ironbarks reefers have either been prospecting various reefs or otherwise sinking to catch the gold at greater depths, notably, Messrs. Liddell and Nicholson, who have just struck a really good reef, in one of the newly sunk shafts, at 90 feet deep. I would say a revival in quartz-mining seems to be about taking place. Many of the old reefs, viz., the Monks, the Beehive, the Poorman's, and the famed Perseverance, have been lately taken up by strong parties, with a determination to test the value of each. As deep sinking has never been tried, at present it seems more than likely that something should succeed. Certain it is we want capital, and as it seems about being introduced on this gold-field, I perhaps may say the prospects of this coming year seem brighter than many preceding it.

Scott's machine of twelve-head of stampers, driven by a 12-h.p. power engine, still remains; the owner has it now in capital order, and I would say it is at present sufficient for all purposes. In alluvial mining the amount of gold obtained from such a large and extensive field seems exceedingly small; but for the last three years the continued dry weather has driven most of the alluvial miners to other parts, and for the limited number of miners employed now in this industry I would say the Ironbarks will compare favourably with other gold-fields of the Colony, and would with favourable seasons return twice the amount of gold now produced. There have been also two Companies at work at the Mookerawa Junction, on the Macquarie River, viz., the New Macquarie River Syndicate Gold-mining Co., which till now has been employed in cutting races and opening the mine; hands are being put on, and prospects look very cheering. The plant consists of one locomotive boiler 100-h.p., and two large pumps capable of throwing 70,000 gallons per hour. At present ten hands are only employed; room will be made for many more should prospects remain as good as at present. The other Company is now at a standstill, but expect to start again in a short time. This, named the Macquarie River Gold-mining Company, has a capital plant, and as gold is known to be in the claim in large quantities, the prospects of the mine, notwithstanding the many drawbacks, are exceedingly good. There is also another extensive steam-power plant, that was introduced by J. H. Rowland, in the interests of a London Company. The machinery is peculiar and intricate, and deserving the attention of gold-miners. Great difficulties had to be overcome, as part of the machinery lost, in transit from the Cape, had to be sent for to England. The claim is at Martin's Flat, on the Macquarie River, and I believe everything connected with the machinery works smoothly. The Company waits another pump to commence work, when great things are expected. With regard to gold returns for the past year, it is almost impossible to get as correct an account as I could wish, as the banks in Wellington and Orange are continually purchasing from our miners. However, the returns from the stores at Ironbarks show the purchase of 1,134 oz. 2 dwt. 12 gr. for the past year. At Spring Creek, on the Macquarie River, near Burrendong, a nugget of gold weighing 62 oz. was unearthed by a miner named James Bell, and sold to one of the banks in Orange. One or two other lots were also disposed of; the locality known or rather supposed to be from about the same place. Number of miners' rights issued, 158; number of business licenses, 26; number of gold leases applied for, 5.

TAMBAROORA AND TURON DISTRICT—WELLINGTON DIVISION.

(*W. Carson, Mining Registrar.*)

HEREWITH I have the honor to forward my annual report upon the mining industry in the Wellington Division of the Tambaroora and Turon Mining District for the year 1885.

There has been a marked improvement in mining matter as compared with the preceding year, as will be seen by the accompanying returns. During the year the Belara copper-mine, at Goolma, has been at work, at which thirty men have been employed, the result being that 1,000 tons of ore have been raised; and on the Macquarie River two sluicing claims have been at work continuously. I regret, however, to state that the only quartz-crushing machines in my division (two in number) have been idle, but from what cause I am unable to ascertain. I did not hear of any new discoveries during the year. From inquiry made I find that the amount of gold won was 521 oz. 10 dwt. 19 gr. I may add that nineteen miners' rights and five mineral licenses were granted, and one mineral lease was applied for during the year.

MUDGEES DISTRICT—GULGONG DIVISION.

(*Mr. Warden Snape, P.M., Gulgong.*)

I HAVE the honor to submit, for the information of the Honorable Minister for Mines, my report for the year 1885.

It

It will be observed with regret by those interested in the advancement of this portion of the Colony that the golden yield has fallen off considerably, contrasting with the published yields of last and previous years. The quantity of gold won from all parts of the Mudgee Mining District shows in the aggregate a diminution of the precious metal to the extent of 1,500 oz. The falling off in the yield presented here may be ascribed; in my opinion, to the drought of last year—indeed I may observe the droughts of the previous seven or eight years—affecting very seriously and to an alarming extent every producing interest—the mining, agricultural, and the pastoral. The result of this state of things is that several of our best and most intelligent miners have for the want of water been compelled to abandon for a time mining operations and follow other pursuits elsewhere. A general feeling of depression pervades this community at the present time, arising from the unexpected closing and winding up of some of the large mining properties. In the month of August last apparently everything in connection with mining was progressing in a satisfactory manner, when it was rumoured that some of the mine holders were unable to pay their men's wages. Legal proceedings were resorted to, which, unfortunately, terminated disastrously to some of the claim-holders. The mines—at least some of them—have passed into other hands. If they should succeed in striking any of the leads Gulgong may again become a stirring township. It is to be hoped that the fortunate proprietors of the Nil Desperandum and Britannia mines will succeed in their undertakings, then those requiring work will meet with ready and prompt employment at remunerative rates. The claims on the Black Lead are not progressing as satisfactorily as could be desired. Sweeney and party have not bottomed yet; they appear sanguine of success. In regard to the other claims, Hutton and Mato have not yet struck the reef they have been in search of for the last two years. Nothing daunted, they still persevere, and intend persevering in their arduous undertaking for an indefinite period. There are other claims at work, but nothing deserving of special note has occurred. The Nil Desperandum, late the White Horse claim, and now the property of Mr. Thompson, of Gulgong, who has, I have been given to understand, floated it into a Company, promises speedily to recoup the fortunate owners. It is without doubt a most valuable property. The engine is 30-h.p., with 16-inch cylinder, 4-foot stove and boiler. The whole of the mining plant, formerly the property of a Melbourne syndicate, is most complete in every respect. Twenty men are employed, on wages at the rate of 8s. 4d. a day. Depth of shaft, 200 feet, 10-inch lift of pump. 80 feet of solid rock had to be excavated before the wash was reached. Up to 17th December, 1885, the owners had expended £521. At the 200-foot level a main drive has been put in, which will extend probably some considerable distance. While this was being carried out a seam of preg or wash-dirt was cut, which is calculated will turn out several thousand loads of payable dirt, thus materially enhancing the value of the Nil Desperandum mine.

No. 2 Mayes and party, No. 2 Stott's Paddock.—This claim has since commencing operations been a paying one. The depth of the shaft is 136 feet; length of drive, 42 feet. Four men are employed on the ground. Average yield of gold per load, from 8 to 9 dwts. Only one shaft at work at present. 184 loads of wash-dirt has been raised, yielding 96 oz. and 16 dwt. This claim is situated in Stott's Paddock, at the Canadian.

Previous to bringing this report to a close I beg to state that the quantity of gold transmitted to Sydney by the Gulgong and Mudgee banks amounts as follows, viz:—Gulgong, 1,017 oz. 2 dwt. 4 gr.; Mudgee, 3,148 oz. 2 dwt. 13 gr.

The following miners' rights, business licenses, &c., have been issued during the year 1885:—

<i>Gulgong.</i>	
Miners' rights	292
Business licenses	18
Gold-mining leases	3
Mineral licenses	9
<i>Mudgee.</i>	
Miners' rights	150
Business licenses	10
Gold-mining leases	1
Mineral licenses	7
Mineral leases	6

MUDGEE DISTRICT—DUBBO DIVISION.

(*Mr. Warden W. S. Caswell, P.M., Dubbo*)

I HAVE the honor to forward my second annual report for the Dubbo Division of the Mudgee Gold-mining District. It would be more proper perhaps to call it the fifth annual report, as Mr. Warden Browne had forwarded three reports previous to my taking charge of the district.

Nothing has occurred during the year to damp the most sanguine expectations as to the future development of the mining resources of this large district.

Although the coal Companies and owners of coal-measures have made little progress there are indications that coal-mining in earnest will be commenced at an early date, and I enclose herewith printed and written information of the prospects of some of these interests.

The copper mining Company have suspended operations at Girilambone on account of the low price of this metal in all the markets of the world.

Mining affairs have certainly improved at Tomingley gold-field, as shown by the returns. In 1883 the gold won from quartz reefs, for there are no alluvial workings, amounted, in round numbers, to about £7,000; in 1884 to the same amount; and in 1885, with the small number of fifty-five miners, the value won increased to about eight thousand pounds (£8,000). No doubt much of this success must be attributed to the splendid returns Moore, Mooney, and party (mentioned in my last annual report) obtained from their stone raised from No. 1 North Myall and spare ground—666 ounces of gold from 300 tons of stone.

The population of Tomingley, including Myall, which is only a name given by the miners to the extension of the reefs, remains steady—rather on the increase. It was estimated in 1883 to number 200; in 1884, 200; in 1885, 210; whilst the average attendance of children in attendance at the Public School has risen from 33 in 1884 to 43 in 1885. There are still two public-houses and two stores doing a fair amount of business. There is a butcher and a baker.

The

The water supply for mining purposes is ample at present, though I believe the machines ran short during the spring. The supply for domestic purposes is not what it should be, and travelling stock are much inconvenienced. The promised Government tank has not been constructed.

There are two crushing machines at Tomingley, though only one has worked during the year. The Star United crushed 1,166 tons of stone for 888 oz. of gold. There is a third machine at Myall, which has won 1,551 oz. from 1,050 tons of stone. The prospects of the miners may be judged from the returns of the different claims during the year 1885.

Tomingley Prospecting Claim.—Eight men's ground, with a width of reef of 4 feet, have crushed 68 tons of stone for 16 oz. 16 dwt. 6 gr.

No. 1 North.—Rix and party, four men's ground, with reef 4 feet wide, have crushed 58 tons for 23 oz. 11 dwt. 12 gr.

No. 2 North.—Six men's ground, have crushed 367 tons for 367 oz. 4 dwt., the reef being 3 feet wide.

No. 3 North.—Berry and party, four men's ground, 10-feet reef, have obtained, from 193 tons, 69 oz. 4 dwt.

Myall Prospectors Claim.—Eight men's ground, with a width of reef 2 feet; 129 tons of stone, 36 oz. 8 dwt. 12 gr. Golding and party.

No. 1 South.—Petersen and party, three men's ground, width of reef, 2 feet; 25 tons of stone, 4 oz. 6 dwt. 12 gr. of gold.

Spare Ground.—Quirk and party, four men; reef, 6 feet; obtained from 51 tons, 10 oz. 10 dwt.

No. 1 North and Spare Ground.—Moore, Mooney, and party, twelve men, 1,050 tons of stone, 1,551 oz. of gold, from reef 5 feet wide.

No. 2 North.—Ring and party, four men, 27 tons of stone, 19 oz. 19 dwt. 11 gr. of gold.

No. 2 Block Claim.—Four men, Horl and party, 185 tons, 77 oz. 17 dwt.

Sundry claims.—63 tons, 20 oz. 6 dwt.

It will of course be understood that the labour in the claims was intermittent, and that the crushing machines not fully employed.

I venture to assert that the reefs are thicker and the average of crushings are greater than any other place in New South Wales, and such as would in Victoria yield large returns to big Companies.

Mining Registrar Quinn, deceased, has been succeeded by Constable Farquharson, an intelligent, painstaking officer.

The return of miners' rights issued at Dubbo and Tomingley number 156—138 at Dubbo, and 18 at Tomingley. As there are only fifty-five men working at Tomingley, it is almost unaccountable what became of the men holding these rights. I am informed miners' rights are now used by persons moving about the country to prevent obstruction by runholders. Thirteen business licenses have been issued.

I enclose also table of machinery.

TABLE showing Crushing Machines employed in Dubbo Subdivision of Mudgee Gold-mining District for year 1885.

District Subdivision.	Steam-engines Employed.		Crushing Machines.	Stamp-heads.	Stone in Tons Crushed.	Yield.	Remarks.
	Name.	Horse-power.

In concluding my report I must add that I think there is little to discourage our mining population, and much cause to be hopeful for the future.

NOTE.—There is a slight discrepancy between mill returns and claim returns which I cannot correct, but it is unimportant.—W.S.C.

THE DUBBO COAL-MINES.

The Dubbo coal-mines, situate at Baltimore, were first discovered in 1880, by Mr. F. H. Burslem and Mr. A. Hamilton. These gentlemen, together with a Mr. Samuel Marsden, took up the land under a mineral lease, and subsequently, in the same year, Mr. R. Nancarrow joined in, and work was carried on for a while under the mineral lease regulations; but this was found to be a very expensive way of working the mine, so it was resolved to convert the mineral lease into a mineral conditional purchase. The area at this time was only 120 acres; but after the conversion alluded to the Company increased the area to 300 acres, and as operations became extended more land was required, and eventually the area was enlarged to 980 acres, which takes in the whole of the Baltimore Mountain. The Company then deemed it unnecessary to go outside the mountain, or to extend their possessions further than the outcrops of coal, which are exclusively confined to the mountain, and inside the area of land secured. Mr. R. Nancarrow was appointed manager in 1881, and is still the Company's manager in Dubbo. Mr. T. Meldrum, of Sydney, is the legal manager.

The Dubbo coal-mines are situated about 13 miles from the Great Western Railway, in a north-easterly direction. The property has a frontage of about 1 mile to the Talbragar River, and comprises 980 acres, held under a M.C.P., and is formed into a Company of 80,000 shares of £1 each, which are now fully paid up. The above property is about 18 miles from Dubbo, in an easterly direction.

On this property three shafts have been sunk—No. 1 to a depth of 89 feet; No. 2, 130 feet; No. 3, 207 feet—in a triangular direction from each other, and about a quarter of a mile apart. The same seams of coal have been cut in each of these shafts, the largest seams being 5 feet 10 inches thick, with smaller seams, 2 feet, 3 feet 6 inches, and 3 feet 8 inches respectively. Each of these seams have small bands running through them varying from the eighth to the half of an inch in thickness. At the 74-feet level in No. 1 shaft a tunnel has been put in about 40 feet, and driven on the coal. From this tunnel about 50 tons of coal was taken. About 25 tons were brought to Dubbo, and given to the Railway Department to be tested. The mail train from Dubbo to Nevertire was run with the coal, also the mail train from Dubbo to Bathurst. The coal proved to be equal to the requirements of the engineers, and the Government then sent a practical man from Sydney to test the coal. The test proved very satisfactory,—indeed, so much so, that the Government asked the Company to supply them with the coal from the Dubbo coal-mines.

Besides coal, there is on the property a large outcrop of fireclay of a first-class quality, 15 feet in thickness; also large crops of ironstone and limestone. The ironstone is of a very rich quality, and to be found in almost endless quantities.

The works are in the side of an abrupt hill, which is undoubtedly carboniferous in character, carbonaceous fossils being found plentifully. The strata are almost perfectly horizontal, and composed of, first, large capping of sandstone, followed by numerous bands of shale, fireclay, ironstone, and coal. At present the work is stopped, pending arrangements to be made for the laying of a light railway to connect the Great Western Railway with the mine, a distance of about 13 miles. The country the line would pass through is almost level, and there are no engineering difficulties to contend with. Several small Companies have been formed, and have taken up land in different directions around the Dubbo Coal-mining Company's property, but up to the present they have not found anything worth speaking of. They may find coal on those properties by sinking to a great depth. On Spicer's Creek, about 6 miles from the Dubbo coal-mine, a seam is opened out about 5 feet in thickness, with only one small band. No doubt this seam would be a workable one when opened out farther away from the creek. It is right in the creek, where opened, and soddened with water. We believe some 800 acres of land have been secured at this place for the purpose of working this seam. The Spicer Creek seam is the only one that we have seen outside of the Dubbo Coal-mining Company's property that would likely be a payable one. The Messrs. Yeo Bros., at Elong Elong, have taken up a quantity of land for coal, and it is believed they have a fair show of success, but are too far away. Their property is about 10 miles in an easterly direction from the Dubbo Coal-mining Company, therefore 10 miles further away from the nearest point of railway. No doubt their property will become valuable in time.

At a place called Barbegal some land was taken up for coal by the Dubbo Coal-mining Company, but the indications did not warrant any further outlay.

A bore with the diamond drill was put down 492 feet by the Government, half a mile from Dubbo. At that distance they cut a small seam of coal, about $4\frac{1}{2}$ inches thick. This bore has been abandoned, indications not being sufficient to warrant a further expenditure.

At present a diamond drill, owned by Mr. J. Coghlan, is boring for coal about 5 miles from Dubbo. The hole is now down about 700 feet, and no coal has as yet been found. We are of opinion that no coal will be found in payable quantities west of the Dubbo coal-mines, for the reason that the dip to west is so great at the Baltimore Mountain.

In conclusion, we may state that the Dubbo coal-mines are in the centre of one of the largest ironbark forests in the Colony, from which at the present time all the timber for railway purposes is taken; but no timber is allowed to be cut on the Company's land. A ranger is kept there for the purpose of protecting it, the timber being very valuable. There is a never-failing supply of good water on the property. By sinking to a further depth we believe that much better seams of coal will be found. There is little doubt that the seams already cut are merely the upper seams, and that vast treasures of coal beneath have yet to be reached. The Dubbo coal-mine is one of the best properties, as a coal-mine, out of Newcastle, and all it requires is the railway to make it a success, and also to materially increase the prosperity of the town and district of Dubbo.

MUDGEES DISTRICT—GULGONG DIVISION.

(*H. De Boos, Mining Registrar.*)

No work of any consequence has been done on this gold-field during the past twelve months. The stoppage of the works at Rouse's Paddock, Scully's Prospecting Reserve, and the White Horse Extended Claim, has had a very depressing influence on mining industry in this district. The closing of these extensive works has been a serious drawback to the mining population, as it threw a number of men out of employment, and what was harder still, many of them had to go without their wages in consequence of the alleged insolvency of the Companies employing them.

The Moonlight Lead.—This Company appears to have ceased working for some time. The engine has been removed, and the claim has, I believe, reverted to the original leaseholders.

Scully's Prospecting Reserve has remained untouched for more than a year, nor is there anything to denote that the proprietors intend starting the works again.

The White Horse Extended Claim has again changed hands, and is now at work, and seems likely to prosper.

The Canadian Gold-mining Company has done very little this year. It has had a good many difficulties to contend with, and its operations have been hampered by the want of funds. It is the intention of the present shareholders to increase the capital, and put the Company on a better footing.

The claim known as the "Britannia," near Home Rule has been idle for some months. The Company after erecting expensive machinery, and sinking to within a few feet of the bottom, suddenly stopped work. The property was sold at auction, and bought by a local speculator, who is about forming a fresh Company, and starting to work again as soon as possible.

At the old Gulgong reef nothing of any consequence has been done during the past year.

Towards the end of the year some stir was made over the report that silver and copper had been found in the neighbourhood of Mundooran and at Bungiboema. Some mineral tracts have been taken up, and the ground is now being prospected, but the result has not yet been made known.

In all the other portions of the Gulgong Division mining matters have not much changed. There are still a number of men scattered over the field earning fair wages, and in some cases doing well; but the drought which has prevailed for the last few years has rendered prospecting almost impossible, and consequently no new country has been opened up, and miners have been compelled to take up some other mode of earning a living.

During the past year three gold-mining leases have been applied for. 292 miners' rights and eighteen business licenses have been issued from this office.

The amount of gold sent through the banks during the same period was 1,017 ounces.

MUDGEES DISTRICT—MUDGEES DIVISION.

(*R. H. Acheson, Mining Registrar.*)

I have the honor to submit, for the information of the Honorable the Minister for Mines, my report for the year 1885, upon the mining industry in the Mudgees Division of the Mudgees Mining District.

During 1885, as in the preceding year, mining here has not been very extensively or successfully pursued.

The scarcity of water, I understand, is yet urged as the principal bar to success. From the quantity of gold purchased by the Mudgees banks (3,148 oz.), and the number of miners' rights issued in my office, viz. 150, matters rest at much the same condition generally as at the end of 1884. Mullamuddy, the Merroo, Merrendee, and Grattai still continue to be the only places in the division which the diggers frequent, all of which localities were in earlier days great mining centres.

The

The most important gold workings in the division are carried on by the Rhobardah Gold-mining Company, near Cudgegong. This property, I understand, is held by Mr. Thomas Chappell upon tribute. He has erected a 10-stamp battery, driven by a 14-horse power engine, and constructed an excellent dray-road, 3 miles in length, from the crushing plant, situated on the Cudgegong River, to the top of the hill, some 700 feet high, where the quartz is raised, at one place from a shaft 70 feet deep, and at another from a tunnel following a vein of a width of from 18 to 24 inches. I understand, with regret, that the anticipations of the recent crushings, the quantity of which I have not ascertained, were not realized; the result, however, was payable, and Mr. Chappell is still sanguine of ultimate success.

Convenient also to Cudgegong are the works of the Cheshire Copper-mining Company. This Company suspended operations during 1885 but have within the last few days let the mine upon tribute to a Mr. Jenkins, late of Mount Hope and Cobar.

A lease of 80 acres was applied for during the year at Appletree Flat, by Mr. Edward Clarke, of Mudgee, for silver-mining. The work thereon, so far, is only of a preliminary nature.

I regret that this report does not represent a more interesting state of mining affairs in the district.

MUDGEE DISTRICT—HARGRAVES DIVISION.

(*T. O'Brien, Mining Registrar.*)

In submitting my report, anent mining pursuits in this division for the year 1885, I regret to state that mining matters have been almost at a standstill during that period; but as regards alluvial mining, the want of water for milling, sluicing, or cradling, &c., has totally crippled this industry during the whole of the year. In regard to quartz-mining, I may state that only one of the many leases existing in this division, namely, that of Bond and party, has been worked, who have expended a considerable sum for machinery and labour on their claim, and are still persevering to develop their mine.

None of the other leases have spent one shilling in labour or otherwise on their holdings. Leases (which, beyond a doubt, is the pick of the locality) held in this manner debar the *bona fide* miner from prospecting the ground. I think the lessees should be compelled to comply with the labour clause; and if they should refuse to do so their title should be cancelled. This would give others who are willing an opportunity of testing the ground.

There is very little prospect of any material improvement in mining pursuits until such time as we have a regular rainfall, as without water nothing can be done in this division. I may also state that I sold 138 miner's rights, and fourteen business licenses during the year, being a considerable increase on the previous year.

MUDGEE DISTRICT—TOMINGLEY DIVISION.

(*James Farquharson, Mining Registrar.*)

I HAVE the honor to submit my report for the year 1885. I took office on the 16th April, 1885, which will account for the few miners' rights issued from this office, the miners having been supplied from Dubbo and elsewhere, there being no Mining Registrar at Tomingley.

The prospects of the field are fairly good, and a considerable amount of work has been done during the past year.

There has not been any new discovery; the miners being engaged on the lines previously worked. There are several parties working at Tomingley with fair results.

The Star battery of ten stamp-heads has crushed during the past year for various owners 1,160 tons of quartz for a yield of 888 oz. 2 dwt. 5 gr.

The Dubbo Company's battery of ten stamp-heads has been idle all through the year. Mooney and party at the Myall have erected a 20 stamp-head battery during the past year. Since this battery started they have crushed 1,050 tons of quartz for a yield of 1,256 oz. of gold, which has paid the shareholders handsomely.

There are several other claims being worked at the Myall, but up to the present they cannot be said to have paid.

It is said that a (5) five-head battery is shortly to be erected at the Ten-mile Ridges, but at present the place is deserted.

There has not been any alluvial find discovered.

Work has been completed on (2) two sections reserved for prospecting from Prospecting Vote, but with no results. Work will be started shortly upon the third section, from which a little gold has been obtained by previous prospectors.

The population of Tomingley and Myall, inclusive of men, women, and children, is 210. There has been an average attendance at the Public School of forty-three for the past year.

I am happy to state that there have been no accidents during the past year.

Total yield of gold for the year	Oz.	dwt.	gr.
Estimated value	2,144	2	5
	£7,933	2	11½

Miners' rights issued during the year	18
Business licenses	10
Mineral licenses	Nil.
Gold-mining leases	Nil.

LACHLAN DISTRICT—FORBES, PARKES, AND GRENFELL DIVISIONS.

(*Mr. Warden Sharpe, P.M., Forbes.*)

I HAVE the honor to submit for the information of the Honorable the Minister for Mines, my report on the mining carried on in the Forbes Division of the Lachlan Mining District during the past year.

2. I regret to have to state that I am unable to report that the mining industry has improved during the past year, although a fair amount of prospecting has been done in various parts of the district,

no

no discoveries of any importance have been made. Great hopes were entertained that a reef which was discovered near the Tichbourne, by Messrs. M'Millan and party, and from which the first two or three crushings were very good, the stone yielding as high as 11 ounces to the ton for some 20 tons, would prove very rich and extensive, but although the claim has been profitable to the prospectors, at the present time the gold appears to be exhausted. At Parkes some very handsome returns have been obtained from a reef which appears to be a leader from that known as the Buchanan. Several claims are working on this shoot of gold, which has proved rich and extensive, and their history should be a great encouragement to prospectors, as the reef is situated right in the centre of ground that had been worked for years and abandoned, I am informed over and over again, and yet rich stone in quantity was close at hand. Parkes is the only place in my district where much mining is being carried on, and where any number of miners are at work. At the end of my report I annex a return showing the quantity of gold won from the various reefs at Parkes during the past year, and also a return of the alluvial gold. The number of men working on the old alluvial leads is, as nearly as I can ascertain, seventy; on the reefs, 110.

At Forbes and in its neighbourhood a few claims are at work, but I am afraid the returns so far are not very satisfactory. At the Bald Hills a great deal of money has been expended in labour and expensive machinery on the land known as the "British Standard" mine, but the Company had to be wound up, and the leases are now in the hands of some Sydney capitalists, who seem sanguine that they will fare better than their predecessors. From what I can gather from miners who have worked on this lead, it is patchy, sometimes payable, and even rich, at other times very poor; in fact it is just the sort of mine to encourage the owners of it to persevere in the hope of better wash being discovered. A good many permits have been applied for for areas on the reef known as Strickland's which is situated about 8 miles from Forbes, on the road to Parkes; but I do not think any work is being carried on at the present time, on account of want of a crushing plant. These reefs are large, but poor; and it would not pay to carry the stone some 12 or 13 miles for a possible yield of 7 or 8 pennyweights per ton.

At Grenfell a few claims are working, and it seems strange that more prospecting is not being carried on on reefs that have yielded payable stone to a considerable depth, and that would appear to be permanent to experienced miners. My attention has been drawn to an article published some time ago in the Grenfell local paper, at the request of the Progress Committee at Grenfell, and written by an experienced miner, who gives a clear and concise account of some of the reefs in this district. He states that they extend over a distance of nearly 3 miles, and mentions the Young O'Brien, the Prussian, the Victory, the Homeward Bound, Wilson's, the Lucknow, the Britannia, the Enterprise, the Victory, the O'Brien's, Result, the Welcome, the Band of Hope, Lawson's, and the Golden Point, as having been developed to a certain extent. Besides these may be added several parallel reefs of minor importance, which go to enhance the value of the respective claims in which they are included.

The most valuable of the reefs mined are O'Brien's, Homeward Bound, the Lucknow, the Britannia, and the Enterprise. From these mines gold to the value of £100,000, £80,000, £50,000, and £30,000 respectively has been won, it might be said, by small parties of miners. These returns are a sufficient guarantee that capital should be expended in further prospecting, and it seems strange that these reefs do not attract more attention. O'Brien's reef, now known as the Consols, is mentioned as the most important in the district, and the writer thinks it will be a great source of wealth when opened up at the deeper level. During the working of this mine by the Company a "fault," or in digging phraseology, a "break," occurred at or about the 400-foot level. The reef at this point gave out and no further trace of stone was discovered, notwithstanding that the main or engine shaft was sunk at a great cost to a further depth of 300 or more feet. This disheartened the shareholders, and the mine was sold, and has since been worked by several parties of tributors at the shallow levels, with varied success. The writer goes on to remark that at Grenfell, as in other places, one discovery of payable gold below where the level mining has stopped at, would give it a great impetus, and capital would be as easy to obtain as it is now difficult.

In alluvial there is very little doing in this division. Under date of the 21st December last, the Mining Registrar reports that seven claims, two men in each, have been taken up on the main lead, the prospects being 3 dwt. from five loads. There are between fifty and sixty miners in and about Grenfell, and during the year 158 miners' rights were issued.

Cargo.

The Mining Registrar for this division reports that there is only one mine at work at Cargo, viz., the Ironclad, whose crushing of 90 tons gave 154 oz. of gold. In the neighbourhood of Canowindra different parties are at work on the reefs known as the Queen of the Ranges and the Blue Jacket, and on a reef in Stockyard Gully, which varies in width from 18 inches to 2 feet, but there is a great deal of mineral in the stone which requires special treatment. At Bony's Rocks, Mellon and party are working a claim on the London Reef with payable results, a crushing of 13 tons yielding 32 oz. 11 dwt. of gold, and this is expected to continue. During the past year a crushing battery has been erected at Canowindra, which should encourage the miners to give the reefs in this neighbourhood a thorough trial. In this division the Mining Registrar reports that the yield of gold for the past year has been 363 oz., 303 oz. of gold having been obtained from 343 tons of stone crushed, the balance being alluvial. In 1884 the total yield was only 45 oz. During the year 1885, eleven gold-mining leases were applied for, of which three have been refused; 101 miners' rights were issued, 3 business licenses, and 1 mineral license.

In conclusion, I may be permitted to state that although at the present time mining is in a very depressed state in this district, still I have no doubt that new discoveries will be made in gold, silver, copper, and other minerals from time to time of more or less importance. At least that has been the case during the few years this district has been under my charge. There are several localities, at Eugowra, near Parkes, and at Melrose, for instance, where there are indications of copper lodes which have only been prospected to a slight extent, but which would have capital expended on the land at once if the value of the mineral was not so low. I have omitted to mention that at Forbes, on the south lead, a party of miners are at work on what is known as the Madman's reef. They appear to have great confidence in their mine, which is shared by others, as several leases have been taken up on either end of what may be called the prospector's lease. The difficulty to be got over is the want of a crushing plant, the nearest being at Parkes, 20 miles distant; however, if the prospects are good enough, no doubt capital will be forthcoming. Several leases for silver and tin have been taken up at Manildra, about 14 miles from Molong; and I am informed that shares in these leases have been sold for a very large amount. I have also

also omitted to state that prospecting for alluvial and quartz gold has been carried on during the past year with Government aid at Scrubby Plain, near Parkes, and on Miller's reef, on Bartley's Creek, but up to the present time nothing payable has been discovered.

RETURN of Gold won during the year ending December 31st, 1885, from quartz reefs in the Parkes Division of the Lachlan Mining District.

LACHLAN DISTRICT—YOUNG DIVISION.

(Mr. Warden Robinson, P.M., Young.)

I HAVE the honor to make my report for the year ending 31st December, 1885.

The town and district of Young since first settlement have never before been so prosperous; nor have gold-mining interests ever been at a lower ebb. Notwithstanding this, our future prospects have not been for years past so hopeful as at present.

During the year we issued from this office 399 miners' rights, including seventy taken out at Murrumburrah, thirty-four business licenses, of which four are credited to Murrumburrah, one mineral license, two mineral leases of 40 acres each, and sixteen gold-mining leases comprising an area of 199 acres. As compared with the preceding year, the records of the office show decreases in the issue of miners' rights to the extent of 120, business licenses thirteen, mineral licenses twelve, and an increase of six gold-mining leases. In this item the acreage is greater by 105 acres 1 rood than the acreage leased in 1884. The gold won in 1884 amounted to 1,367 oz. 9 dwt. 21 gr., of the value (say) £5,323 14s. 7d. For 1885, taken from the most reliable sources, the gold won may be put down at 505 oz. 14 dwt. 23 gr., valued at £1,953 12s. 10d., showing a decrease of 861 oz. 14 dwt. 22 gr., of the value of £3,370 1s. 9d. For two or three years past those interested in mining have entertained very sanguine hopes anent the new ground at 'Possum Flat. The old Burrangong Company, who tested their leaseholds last year, have arranged with a Melbourne syndicate, represented by Messrs. Evans and Beeston, to carry forward the works on a very extensive scale. The New Burrangong Gold-mining Co. (now so named) begins with a capital of £17,000, in 35,000 shares of 10s. each. A large and complete plant is already on the ground, the erection of which is under the superintendence of Mr. W. R. Thomas, a gentleman of large and varied experience in every detail of mining operations. Between the old and new Companies £7,500 have, up to date, been spent on the mine. The area belonging to the Company is 42 acres. At present there are fourteen men employed in sinking a third shaft and erecting machinery. It is anticipated that the whole plant will be in working order by the end of the month. These works when finished will be about the most complete of their kind in the Colony. In my last annual report I gave a full description of the ground and works then erected, depth of sinking, &c. It is new ground, and the wash-dirt is reached at a depth of 80 feet, with a heavy underground flow of water. The yield of gold obtained by the old Company was splendid; and, in the opinion of disinterested experts, the prospects of the new Company are equal to the best claims that have been worked on the old Lambing Flat diggings. A still greater stride has been made in the direction of fresh enterprise in the Young District by the new Cunnigar Quartz-mining Company.

The property is known as the Old Marshal McMahon Reef, distant some 13 miles from Murrumburrah. The lode is laid bare, very prominent and well defined. The average width of the lode is about 4 feet. Fully 20,000 tons of quartz is visible and ready for stoping; besides, there are 1,200 tons to surface, estimated to yield 2 oz. of gold and from 2 oz. to 10 oz. of silver to the ton. The shaft is 212 feet deep. The machinery consists of complete winding gear and pumping plant. The furnace or smelter is known as the "Campbell Probert Smelter," which is the only plant of the kind that has as yet been erected in New South Wales. The machinery puts through 20 tons of quartz daily, and saves 90 per cent. of the gold and silver. The Company holds 29 acres, upon which, during the year, it expended £12,000.

At present over 100 men are employed, and the number will be largely increased almost immediately, as an extensive addition to the machinery is now in course of erection.

At

At Blind Creek, Murrumburrah, there are still about 100 diggers at work making fair wages. Wombat and Little Wombat.—The few that are engaged on these places get excellent returns when water is available. The Sherlock quartz-claims are not worked, and for the present have fallen out of notice.

LACHLAN DISTRICT—TEMORA AND BARMEDMAN DIVISIONS.

(*Mr. Warden Baker, P.M., Temora.*)

I do myself the honor to submit my annual report for 1885 concerning the several mining divisions under my charge. The Mining Registrars have furnished reports for their several divisions respectively, and as these reports are from efficient officers I need not repeat the information furnished by them. My report, therefore, will be much shorter than it would otherwise have been.

Temora.

Population.—A very palpable decrease in the number of the population of this division has been going on for several years past, and I regret to say continued during the year 1885. By way of showing this I give the—

Number of Miners' Rights issued at Temora	
In year 1883	989
„ 1884	752
„ 1885	516

I also give the number of—

Miners' Rights issued	
In January, 1883	669
In January, 1884	529
In January, 1885	335
In January, 1886	253

It will be seen that in 1884 there was a decrease of 237 and in the year 1885 a decrease of 236, as against the years 1883 and 1884 respectively, making a falling off of 473 in 1885, as against 1883. It will also be seen that of the miners' rights issued in the years named more than two-thirds of those documents were issued during the month of January of those years respectively. I have given the number thus issued in January because they are very useful in estimating the number of miners on the field at the close of one and at the commencement of the next year. By this rule I roughly estimate the number of miners in and about Temora, including Sebastopol, to be from 350 to 400, including say about a dozen Chinamen. In 1884 there were issued 167 and in 1885 111 business licenses, showing a decrease for the year of fifty-six. It should not, however, be understood that these reductions in numbers of miners' rights and business licenses correctly indicate the actual decrease either of miners or of business people. Many persons hold miners' rights in order to legally hold the land on which they reside. Some also hold business licenses simply to legally hold a business and residence area, and in proportion as these holdings are converted into freeholds there will be a decrease in the number of such documents issued, they not being necessary to hold freehold land. In some of these cases the holders, although residing and doing business at Temora, do not consider a miner's right or business license necessary. But these cases are not very numerous, and the falling off as shown above, clearly indicates a great decrease in the population of Temora.
