Suspension of payment. If, in the opinion of the Engineer, further inquiry is desirable or necessary before payment is made on any certificate, the Engineer shall have power to suspend the payment of all or any part of the amount mentioned in any such certificate for a period not exceeding one month from the date at which, in the ordinary course, the money would have been paid, and no interest shall be due or accruing on any money the payment of which shall have been so suspended.

Certificates without prejudice. No certificate given to the contractor for any purpose whatever during the progress of the work shall prevent the Engineer, at any time before the final payment, from rejecting any unsound material or improper workmanship which may be discovered in the work, or from requiring the contractor to remove or amend at his own cost any work which may be found not to have been performed in accordance with the contract, or from deducting from any money which may be due or become due to the contractor the whole amount which may have been paid to the contractor for such material or work.

No claim without certificate. The obtaining of the Engineer's certificate that all the works under the contract, including those of maintenance, have been finally and satisfactorily executed, shall be a condition precedent to any claim or cause of action in respect of work done, as well as to the final payment to be made hereunder.

#### 19. Arbitration Clause.

1. All questions or disputes which shall arise respecting the true construction or meaning of the drawings or specification, or the quality of the workmanship, or quantity or quality of materials necessary for the whole or any part of the contract, and all questions and disputes respecting the matters next hereinafter mentioned, when the aggregate amount claimed in respect of such last-mentioned matters shall not amount to the sum of one thousand pounds, shall be decided by the Engineer-in-Chief for Roads, Bridges, and Sewerage, whose decision shall be absolute and final.

2. But all questions as to the cancellation of the contract, as to the right of the contractor to extension of time, as to the infliction of penalties, as to the true value of any extra work that has not been previously agreed upon, or as to the value of work omitted from the works specified to be done under the contract, shall, if the aggregate amount of the claims in respect of such matters shall be one thousand pounds or upwards, upon the completion of the works under the said contract, and before payment of the retention money and the money deposited as security for the due carrying out of the contract, be fixed and determined by arbitration as hereinafter provided.

3. If the contractor or the Minister in charge of the Department under which the works in the contract have been or are being carried out considers that he has claims in respect of the several matters mentioned in paragraph 2, as those in which arbitration may be claimed, he shall furnish to the other of them full particulars in writing of such claims, breaches, doubts, disputes, and differences in respect of which he desires arbitration, giving distinct and separate items, and the amount, if any, claimed under each item; and the other party may thereupon furnish particulars of all claims he has in respect of such matters, irrespective of the aggregate amount of such claims; and the party furnishing the same shall be bound by such particulars; and no claim not included in such statement shall be taken into consideration at such arbitration, or become subject of arbitration or action; and the claim or respective claims so made as aforesaid shall be determined by arbitrators, to be appointed as hereinafter provided, that is to say—

4. If the Engineer-in-Chief for Roads, Bridges, and Sewerage and the contractor concur in the appointment of a single arbitrator, then the matter and question aforesaid shall be referred to and decided by such single arbitrator; but if the Engineer-in-Chief for Roads, Bridges, and Sewerage and the contractor cannot concur in the appointment of a single arbitrator, each party, on the request in writing of the other party, shall, by writing under his hand, nominate and appoint an arbitrator, to whom the said questions and matters shall be referred. Every such appointment shall be delivered to the arbitrator, and be deemed a submission to arbitration on the part of the party by whom the same shall have been made, and neither party shall have power to revoke the same without the consent in writing of the other, nor shall the death of either party operate as a revocation.

5. And if, for twenty-one days after the notice in writing by the contractor or by the Engineer-in-Chief for Roads, Bridges, and Sewerage, that the contractor and the Engineer-in-Chief for Roads, Bridges, and Sewerage cannot agree, shall have been served, and for seven days after a request in writing to appoint an arbitrator shall have been served by the one party on the other, such last-mentioned party fail to appoint such arbitrator, then, upon such failure, the party making the request, and having himself appointed an arbitrator, may appoint such arbitrator to act on behalf of both parties; and the arbitrator may proceed to hear and determine the matter or question between the contractor and the Engineer aforesaid, and in such case the award or determination of such single arbitrator shall be final. If, before the matter so referred shall be determined, either arbitrator shall die or become incapable, the party by whom such arbitrator was appointed may nominate and appoint some other person as arbitrator to act in his place; and if, for the space of seven days after notice in writing from the other party for that purpose, he fail to do so, the remaining or other arbitrator may proceed *ex parte*; and in case the matter in dispute shall stand referred to a sole arbitrator in default of the appointment by the other party, and such sole arbitrator shall die, the party by whom he was appointed shall appoint another sole arbitrator in his place; and every arbitrator so to be substituted in either of the cases aforesaid shall have the same powers and authorities as were vested in the former arbitrator at the time of his death or disability.

6. If more than one arbitrator shall be appointed, such arbitrators shall, before they enter into the matter or question referred to them, nominate and appoint, by writing under their hands, an umpire to decide on the matter so referred; and if such umpire shall die or become incapable of acting, they shall forthwith, after such death or incapacity, appoint another umpire in his place, and the decision of every such umpire on the matters referred to him shall be final.

7. If, in either of the cases aforesaid, the said arbitrators shall refuse, or shall, for seven days after request of either party, neglect to appoint an umpire, a Judge of the Supreme Court, upon application made to him by either party, shall appoint an umpire, whose decision shall be final.

8. If a single arbitrator shall be appointed, and he shall die or become incapable to act before he shall have made his award, the matters referred to him shall be determined by arbitrators appointed hereunder, as if the arbitrator so dying had not been appointed.

9. If more than one arbitrator be appointed, and either of them shall refuse or for seven days neglect to act, the person by whom such defaulting arbitrator was appointed shall, within seven days after notice in writing, proceed to appoint another arbitrator to act for the arbitrator so refusing or neglecting, or the other arbitrator may proceed *ex parte*; and the decision of such other arbitrator shall be as effectual as if he had been the single arbitrator appointed by both parties.

10. If more than one arbitrator shall be appointed, and neither of them shall refuse or neglect to act, as aforesaid, then if such arbitrators shall fail to make their award within thirty days after the day on which the last of such arbitrators shall have been appointed, or within such further time as may be granted by a Judge of the Supreme Court on application by either party, the matters so referred to them shall be determined by the umpire appointed as aforesaid.

11. The arbitrators, or any two of them, shall have power to hear, receive, and examine evidence; and the witnesses on any reference herein may be examined on oath or affirmation. Neither of the parties hereto shall be at liberty to appear before the arbitrator by counsel or solicitor.

12. The award of the arbitrator or arbitrators or umpire shall be in writing, ready to be delivered to either party within the time appointed for making the said award. This submission may be made a rule of the Supreme Court. The amount of costs, umpire's and arbitrators' fees, shall be decided by the arbitrators, arbitrator, or umpire; the amount of costs, including arbitrators' and umpire's fees and witnesses' expenses, the items thereof being shown in the account annexed to said award.

13. If upon an arbitration in respect of claims made by the contractor the sum awarded to the contractor shall be less than one-half of the amount of his said claim, all the costs, charges, and expenses of and incident to the said arbitration and award shall be borne and paid by the contractor; but if the amount awarded shall exceed one-half of the amount of the said claim, then each party shall pay his own costs and one-half of the arbitrator's and umpire's fees.

14. It is to be distinctly understood that all claims by the contractor or by the Minister to have any of the matters which under paragraph No. 2 may be submitted to arbitration so dealt with, must be made upon the whole of the work being completed, and before payment to the contractor of the retention money or of the money deposited as security for the due performance of the contract, and that the acceptance by the contractor of payment of the retention money in cases where a bond to secure the completion of the works has been given, and in other cases of the retention money or of any balance thereof, and of the money deposited as security for the due performance of the contract, shall be conclusive proof that the contractor has no such claim or claims.

15. The Engineer shall not be required to defend or answer, or be made a party to, any bill, claim, action, or other proceedings at law or in equity at the instance of the contractor. Engineer no party to lawsuit.

16. The exercise by the Minister, Engineer, or Superintending Officer, of any of their respective powers shall not relieve the contractor from any liability to which he may be subject for any breach of the contract. Liability to remain.

17. None of the clauses or provisions of the specification, or of these conditions, or of any other part of this contract, shall be varied, waived, discharged, or released, either at law or equity, unless by the express consent in writing of the Minister. Provisions not to be varied.

#### 20. Tender, Cash Security, &c.

Tenders to be sent in on a printed form, accompanied by the printed schedule of prices, with all the blanks properly filled in, enclosed in an envelope, and addressed, as directed in the advertisement, calling for tenders. Form of tender.

The approximate quantities only are given as a guidance to intending contractors, and the contract being at a schedule of prices, will be subject to such extensions, extras, additions, deductions, enlargements, deviations, alterations, and omissions as therein provided. The Minister will be only liable to pay for the actual measured quantity of each respective kind of work done and ordered at the rates set forth in the schedule, and if there be no rate in the schedule for any that may be ordered, then at such rate as shall be fixed by the Engineer-in-Chief, whether such measured quantities shall be less or more than the quantity stated in the schedule of quantities and prices. The approximate quantities, as given of each item in the schedule, must be worked out, and a total sum shown in the tender. Schedule rates of contract.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz.:—For amounts up to £500, £5; for amounts exceeding £500 and not exceeding £1,000, £10; for all sums over £1,000, 1 per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the manager of the bank upon which it is drawn, or a bank draft. Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly. Deposit with tender.

All deposits, with the exception of that of the successful tenderer shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed. Returning of preliminary deposit.

Within seven days from the date of notification in writing to any tenderer of the acceptance of his tender by the Minister, the successful tenderer must lodge with the Under Secretary for Public Works the sum named in clause 6 of the special conditions, which sum will be retained as security for the due performance of the contract until after the expiration of the "period of maintenance," and returned to the contractor (if at all) only on the day of final payment, and less any deductions, which hereunder may properly be made therefrom. Cash security.

Within

Signing of contract.

Within three days after lodging the aforesaid deposit, the successful tenderer shall attend at the office of the Crown Solicitor, and execute the contract.

Forfeiture of cash security.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof, or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Fresh Tenders.

Whenever a Tenderer shall fail to proceed with a Contract as aforesaid, fresh Tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another Tender in the same series to be accepted; but the Tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

Defaulting Tenderers.

Full names, &c., to be given.

In submitting a Tender the full Christian name of the Tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the Tender. The omission of this information will render the Tender liable to be declared informal.

Lowest or any tender. Stamps, fees, &c.

The Board shall not be bound to accept the lowest or any tender.

The contractor shall bear and pay all duty stamps, licences, building or surveyor's fees, or other charges or fees whatsoever, legally demanded by any municipal or other authorities, also the amount of all patent rights and royalties due to any patentee.

Commencement of work.

No tenderer will be allowed to proceed with the work tendered for until he shall have signed the required contract.

ROBT. HICKSON,  
Engineer-in-Chief for Sewerage.

Public Works Department, Sewerage Branch,  
Sydney, 14th May, 1891.

These are the General Conditions marked "B" referred to in our annexed Agreement with Her Majesty the Queen, dated the 10th day of March, A.D. 1892.

JOHN CARTER,  
D. G. SNODGRASS.

Witness—V. C. LUMSDAINE.

"C."

SPECIAL CONDITIONS.

Clause 10 of General Conditions.

1. The "date of completion of contract" shall be twenty-four months from the date of acceptance of tender—that is to say, the day of , 1893.

Clause 10 of General Conditions.

2. The sum to be deducted or set off as or for "liquidated damages," shall be £20 sterling a week.

Clauses 2, 10, and 18 of General Conditions.

3. The "period of maintenance" shall be three calendar months from the date of the certificate of the Engineer that all the works under the contract, less those of maintenance, have been fully and satisfactorily completed.

Clause 18 of General Conditions.

4. The "rates of progress payment" shall be 90 per cent. of the value of work actually done, performed, and delivered, as the Engineer may approve of as fit and necessary for the work.

Clause 20 of General Conditions.

5. The "deposit" to accompany the tender shall be as required by clause 20 of the general conditions.

6. The sum to be lodged with the Under Secretary for Public Works as security shall be a Bank deposit receipt, in the name of the Secretary for Public Works, for £2,000 sterling.

Clause 2 of General Conditions.

7. Even after the expiration of the period of maintenance, contractor will still be held liable for all defects in the works which were not visible, or which may have been kept secret, at the time of the works being taken over by the Engineer, since he is, and hereby distinctly agrees to be, *responsible for all faults or neglects of, or all deception practised by, his agent, overseers, or workmen, irrespective of the time at which such faults, neglects, or deceptions may be detected.*

Clause 3 of General Conditions.

8. Although the information in possession of the Government has been freely placed at the disposal of the tenderers, by being noted on the drawing or otherwise, the Government undertake no guarantee whatever regarding the kinds of soil that will be met with; or the firmness or stratification of the ground to be excavated, or the amount of unwatering to be done, or the strength of the timbering that may be required, or the nature and extent of other precautions which may have to be adopted.

Clause 4 of General Conditions.

9. Contractor shall not be entitled to claim or receive any compensation whatever over and above payment for the actual increase of quantities at schedule rates, and where there are no schedule rates, at such rates as shall be determined at the time by the Engineer-in-Chief, for any additions to, deviations from, or alterations of the various designs comprised in this contract. These conditions shall also apply to, viz., variations in manholes, junctions, flushing chambers, &c., and in consequence of meeting with any existing gas, water, or sewer pipes or sewers, as referred to and in accordance with clause 82 of the specification, the position of which it is impossible to ascertain until the ground for the construction of the works comprising this contract is opened up,—

Variations in inclination of slopes and gradients.

" depth, shape, or size of excavation for sewer, &c.

" depth, shape, or size of concrete of sewers, manholes, junctions, flushing chambers, &c.

" internal diameter of pipe sewers.

" alteration or extension of sewer lines.

Any decrease in quantities to be deducted as provided for.

Clause

*Clause 14 of General Conditions, paragraph 6.*

10. Cement is to be brought on the ground in quantities of not less than fifty barrels, provided that this quantity is sufficient for fourteen days' supply, but in no case is less than fourteen days' supply (whatever that may prove to be) to be brought on the ground in one parcel; nor is the supply stored on works to be at any time less than fourteen days' supply.

*Clause 8 of General Conditions.*

11. Suspension of works and non-compliance with clauses 52, 53, 79, 80, 81, 120, and 124 of the specification on the part of the contractor shall constitute a wilful breach of contract.

*Clause 18 of General Conditions.*

12. The acceptance by contractor of the final payment shall be deemed equivalent to a distinct declaration on his part that he has no further demands on the Government in respect to this contract.

These are the Special Conditions marked "C," referred to in our annexed Agreement with Her Majesty the Queen, dated the 10th day of March, A.D. 1892.

Witness—V. C. LUMSDAINE.

JOHN CARTER.  
D. G. SNODGRASS.

*TENDER for Contract No. 79, Sydney Sewerage.*

To the Honorable the Minister for Public Works, Bridge-street, Sydney, N.S.W.

I [We], the undersigned, do hereby tender and offer to construct, completely finish, and maintain the various works for Contract No. 79, Sydney Sewerage, in accordance with the conditions of contract, specifications, and drawings, prepared for that purpose in your Department, for or at the rates particularly entered in the accompanying schedule of prices, and enclose herewith deposit, as required by clause 20 of the general conditions.

Should this tender be accepted, I [we] undertake to lodge with the Under Secretary for Public Works, within seven days from the date of notification of acceptance of this tender, a bank deposit receipt in the name of the Secretary for Public Works for the sum of two thousand pounds sterling, as security for the due performance of the contract.

In the event of my [our] failing to do so, or to sign the required contract within the time specified in clause 20 of the general conditions, I [we] hereby distinctly agree to forfeit to the Queen the sum deposited with this tender.

<b>MAINTENANCE.</b>					
49	Three months' maintenance after formal delivery of works .....	lump sum	.....		
Total .....		.....	.....		

## NOTES.

1. All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in strict accordance with the specification.

2. The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

3. Items Nos. 31, 32, and 33 to include the cost of conveying the Government property from the contractor's store or field office to the various sites of works along line of main and branch sewers, at man-holes, gas-check, and shaft chamber, &c.

4. Prices for items Nos. 36, 37, 38, 39, 40, 41, 42, and 43 are to be for materials in strict accordance with specification, delivered on the works ready for use, and only the actual net quantities ordered and approved of shall be paid for. In case contractor's prices are considered too high by the Engineer at the time such materials may be required, or if the contractor fail to deliver such materials at the time required and ordered, then the Engineer shall have the power to supply the same from any other source, and the contractor shall have no claim for loss or compensation on account of the exercise of such power by the Engineer.

5. Prices for items Nos. 44, 45, 46, 47, and 48 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night work being ordered, it is to be paid for at 25 per cent advance on the time rates set down for day work.

6. The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads crossing over main and pipe sewers, reinstating all road and other surfaces, &c., or any other thing necessary in executing and completing each respective item, in strict accordance with plans and specifications.

302

No. 12.

Mr. F. Punch to The Secretary for Public Works.

Dear Mr. Lyne,

24 February, 1892.

Permit me to thank you for the prompt manner you have settled the North Sydney sewerage contract. I am sure the people in the district will join with me in praise of you for the consideration you have given them on all occasions when your assistance has been asked for the carrying out of public works. Long may you continue in your present place, for I feel sure the country will progress with such men as you at the head of affairs.

Again thanking you, I am, dear Mr. Lyne.

Yours, &amp;c.,

F. PUNCH.

Put with the papers.—J.L., 25/2/92.

Seen.—R.H., 26/2/92.

No. 13.

The Council Clerk, North Sydney, to The Secretary for Public Works.

Sir,

Town Hall, 17 March, 1892.

I am directed to inform you that a resolution has been adopted by the Municipal Council of this borough thanking you for the consideration shown for the interests of the borough by accepting a tender for the construction of the main outfall sewer ending at Willoughby Falls.

I have, &amp;c.,

W. BARNETT SMITH,

Council Clerk.

No. 14.

Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen,

42, Elizabeth-street, 15 March, 1893.

I beg to enclose a list of the shafts on your contract, with sizes of same. You will please understand that neither the excavation for the chambers at the top, centre, and bottom of shaft, nor that for the top pipes, &c., in the shaft, are included. These will be taken out in accordance with drawing, and it will be at your discretion whether you excavate them at the same time as the shaft or operations.

Yours, &amp;c.,

J. DAVIS

(Through Mr. Boys).

No. 15.

Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen,

42, Elizabeth-street, 23 March, 1892.

With respect to the mode of excavating the "solid rock" on your North Sydney sewerage contract, I have to request that for the present 4-inch charges of compressed powder be used.

The excavation in tunnels and shafts done in this way will be paid for under schedule items Nos. 3 and 7 respectively.

Yours, &amp;c.,

J. DAVIS

(Through Mr. Boys).

No. 16.

Supervising-Engineer Davis to Messrs. Carter &amp; Co.

*Minute Paper.**Subject* :—Contract No. 79—Shaft at Falcon-street to be moved.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 13 April, 1892.

It has been decided to build the tramway along Falcon-street, I understand, at once, and as our shaft at that place would be in the way, would Mr. Boys please have the shaft moved into Alfred-street, south of Falcon-street. If it is clear of the southern side of Falcon-street it will do. The contractors can erect their engine on the south side of the shaft.

Take measurements of the work done in the present shaft, so that excavation and filling can be paid for.

J.D.

I have laid out the shaft south of Falcon-street, and 10 feet back from the building line.—  
J. W. F. Boys, 19/4/92. Please put away.—J.D., 21/4/92. Mr. Piper.

No. 17.

The Council Clerk, North Sydney, to The Engineer-in-Chief for Sewerage.

Sir,

Town Hall, 11 April, 1892.

I am directed to forward you copy of a letter received by this Council from Mr. E. Weitzel, in relation to the nuisance caused by blasting operations in connection with the North Shore sewerage works, and to request that, if possible to do so, you will direct the adoption of some such measures as suggested by Mr. Weitzel.

I have, &amp;c.,

W. BARNETT SMITH,

Council Clerk.

For report.—R.H., 12/4/92.

Mr. Davis.—J.W.F.B., 13/4/92.

No. 18

## No. 18.

## Resident-Engineer Boys to Supervising-Engineer Davis.

*Subject* :—Blasting in Alfred-street, North Sydney, Contract 79. Complaint made of blasting all night, and of excessive charges used.

Department of Public Works, Roads and Bridges and Sewerage Branch,  
23 April, 1892.

BLASTING was carried on all night at shafts No. 9 and No. 10, the part of Alfred-street from which the complaints were made.

This was stopped as soon as I was informed, and no blasting has been carried on in this part between the hours of 10 p.m. and 6 a.m. since the 13th. The charges used are the usual 4-inch, and have not been exceeded.

J. W. F. BOYS.

There is no inspector on the night shift, and it was not found out that blasting was being done after 10 p.m. for a few days before the date of the Council clerk's letter. Before, however, the complaint reached me, the night blasting was stopped in the locality in question, so that now blasting is only taking place between 6 a.m. and 10 p.m. I do not think there is any reason for complaint on account of the size of the charges, as the maximum quantity of compressed powder in each shot is only 4-inch. The Council clerk might be informed accordingly.—J.D., 23/4/92. Mr. Bagge. The Engineer-in-Chief.—C. H. O. BAGGE, 25/4/92. North Sydney Council, 25/4/92.

Gentlemen,

79, Pitt-street, Sydney, 9 April, 1892.

On behalf of self and several of my neighbours, notably Messrs. Musgrave, Lenehan, and Anderson, I beg to complain about the nuisance created in our part of Alfred-street through the blasting in connection with the sewerage work. Not only are the shots unnecessarily heavy, but the blasting is at some of the shafts carried on all through the night, thereby disturbing our peace, and I am to ask you if the Council has the power to stop at least this night blasting, and, if so, to be good enough to take the necessary steps to have the nuisance abated.

Yours, &c.,

E. WEITZEL.

The Mayor and Aldermen, Borough of North Sydney.

J. W. F. BOYS, 25/5/92.

No. 20.

Messrs. Carter & Co. to Supervising-Engineer Davis.

Contract No. 79—North Sydney Sewerage.

Sir,

Box No. 10, North Sydney Post Office, 26 April, 1892.

We have the honor to ask you to be good enough to allow us to work three shifts on the above contract in shafts Nos. 2, 3, 4, 5, 6, 7, 8.

Our reasons for asking this are that the ground is both deep and hard, and we would like to point out that the probable hours of working if our request is granted will be from 5 a.m. to 11 p.m. only.

We are, &c.,  
CARTER & CO.

No. 21.

Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

Minute Paper.

Subject:—Contract No. 79—North Shore Sewerage.—Blasting between 5 a.m. and 11 p.m.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 26 April, 1892.

THE contractors ask to have the hours during which blasting is permitted extended an hour in the morning and an hour in the evening at all the shafts except the three in the most thickly populated parts of Alfred-street. Already there have been complaints from residents in Alfred-street, and I do not think it would be advisable to sanction blasting in that street except between the hours specified, viz., 6 a.m. and 10 p.m.

Perhaps the contractors' request might be granted as to shafts Nos. 2 and 3, which are some distance from any houses in the park land near Long Bay.

J. DAVIS.

I quite agree to Mr. Davis' suggestion, until complaints come in. I beg to recommend that a letter be forwarded to the contractor as suggested by Mr. Davis.—C. H. OHLFSEN BAGGE, 26/4/92. Engineer-in-Chief. Write.—R.H., 26/4/92. Carter & Co., 26/4/92.

305

No. 22.

The Engineer-in-Chief for Sewerage to Messrs. Carter &amp; Co.

Gentlemen,

Public Works Department, Sewerage Branch, 26 April, 1892.

In reply to your letter of the 26th inst., asking to be allowed to blast between the hours of 5 a.m. and 11 p.m. at shafts Nos. 2 to 8 on contract No. 79, Sydney Sewerage Works (North Sydney), I have the honor to inform you that as there have already been complaints about the blasting in Alfred-street I cannot sanction blasting in that street except between the hours specified (6 a.m. to 10 p.m.)

But with regard to shafts 2 and 3, which are some distance from any houses, you may blast as requested between 5 a.m. and 11 p.m. until complaints are sent in by the residents, when the hours laid down in the specification will have to be reverted to.

I have, &amp;c.,

ROBERT HICKSON,

Engineer-in-Chief for Sewerage.

No. 23.

Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.**Subject* :—Contract No. 79—North Sydney Outfall Sewer.—Driving of Tunnels.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 19 May, 1892.

THE tunnels from some of the shafts on this contract will be commenced in a few days, and it is, therefore, necessary that it should be settled how they are to be driven, whether with 4-inch charges of compressed powder, 2-inch charges, or without blasting.

With a view of arriving at the method which would give the least annoyance to the residents in the vicinity of the sewer, consistent with economy, I have made comparative estimates.

The excavation by "guttering and gadding" will cost 3s. per cubic yard more than with 4-inch charges of compressed powder, but as it is impossible to drive the tunnel by blasting to the exact size desired, considerably more concrete has to be used in lining when the driving is done by blasting than when done by "guttering and gadding," and taking this into consideration, I estimate it will cost about £1,250 less to do the tunnels without blasting compared with doing it with 4 inches of powder.

The 2-inch charges, with the extra supervision that would be required, would be the most costly of any.

I wish, however, to point out that while it would save annoyance and money to drive the tunnels without explosives, it would take longer to do the work.

J. DAVIS.

Messrs. Carter & Co. have undoubtedly fixed their schedule prices speculatively to increase their profits on the contract as much as possible, and, if so, to the loss of the Department. Mr. Davis seems, therefore, justified in the suggestions made, as they would likely cause a saving of £1,000, and clause 55 of the specification is no doubt a saving clause against speculative prices.—C. H. OHLFSEN BAGGE, 19/5/92. The Engineer-in-Chief.

Ask contractors to see me on Thursday morning.—R.H., 23/5/92. Messrs. Carter & Co., 23/5/92.

While I think the Department would hardly be justified in adopting this unusual method of carrying out the work, it is very clear we should aim at getting our work done as economically as possible. Blasting may, therefore, be allowed on the understanding that the average allowance of 4 inches for concrete packing over and above specified size of tunnels be reduced to 2 inches.—R.H., 26/5/92. Mr. Davis.

Contractors informed. Copy of letter attached.—J.D., 27/5/92.

No. 24.

Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen,

42, Elizabeth-street, 27 May, 1893.

Referring to the conversation which your Messrs. Carter and Snodgrass had with the Engineer-in-Chief respecting the mode of driving the tunnels in your sewerage contract No. 79, and to your verbal agreement that on condition you were allowed to do the tunnel excavation under item No. 3 of the schedule of prices, by blasting with 4-inch charges of compressed powder, you would not ask to be paid for more than 7 inches of lining, such 7 inches to include the 4-inch thickness of cement rendering, I am directed to inform you that the Engineer-in-Chief has approved of the above agreement without prejudice to his right, under clause 55 of the specification, to order the excavation to be taken out otherwise should he deem it necessary to do so.

The cross-sections will be taken in the usual manner, and you will be paid for the excavation ordered, and for a maximum of 2 inches of concrete lining in excess of the excavation ordered.

Would you kindly write, intimating your acceptance of this arrangement.

Yours, &amp;c.,

J. DAVIS.

No. 25.

Messrs. Carter &amp; Co. to Supervising-Engineer Davis.

Contract No. 79, North Sydney Sewerage.

Sir,

Box No. 10, North Sydney, 21 May, 1892.

With reference to the outlet works of the above contract, we request your permission to extend the tunnel excavation from the shaft at \* \* \* along the line of "carrier" for a distance of 85 links, and to cut from this point to high-water mark for the purposes of drainage and disposal of spoil.

We are, &amp;c.,

CARTER &amp; CO.

## No. 26.

## Supervising-Engineer Davies to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

*Subject* :—Contract No. 79, North Shore Outfall—Recommending that excavation be extended 85 links near Long Bay.

Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 26 May, 1892.

THE contractors ask that the excavation in their contract be extended 85 links nearer to Long Bay to give an outlet to the tunnel west of shaft at 0 chains. This length of excavation would have been included in contract No. 79 to enable the surplus material to be conveniently taken to Long Bay where it has to be deposited, but at the time that contract was let the exact line of sewer east of shaft at 0 chains had not been finally settled.

I recommend that the contractors be given this short length of work which will cost—tunnel excavation 40 cubic yards at 60s., £120.

J. DAVIS.

Mr. Davis' statement is quite correct, and since the outlet end of this tunnel has now been decided upon, it will undoubtedly be of great convenience to the contractor to excavate the outlet end of 85 links at a cost of £120.—C. H. OHLFSEN BAGGE, 26/5/92.

The Engineer-in-Chief. Approved.—R.H., 26/5/92. Contractors informed.—J.D., 27/5/92.

## No. 27.

## Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen,

42, Elizabeth-street, 27 May, 1892.

I have to acknowledge the receipt of your letter of the 21st instant, asking to be allowed to extend your tunnel excavation for 85 links east of shaft at 0 chains, and in reply I have the honor to inform you that the Engineer-in-Chief has approved of you doing as you wish, the excavation to be paid for under schedule item No. 3, and the tunnel to be taken out to admit of 4 feet by 3 feet sewer with one ring (5 inches) of mining being inserted.

You may also make a cutting from the point where the 85 links terminate, as shown on accompanying tracing, but this work must be done at your own cost.

Yours, &c.,  
J. DAVIS.

Tracing showing line of sewer for the 85 links extension enclosed.—J.D.

## No. 28.

## Messrs. Carter &amp; Co. to Supervising-Engineer Davis.

Contract No. 79, North Sydney Outfall Sewer.

Sir,

Box No. 10, North Sydney Post Office, 2 June, 1892.

In reply to your letter of the 27th May, we hereby agree to accept the terms of the same, viz. :—That the excavation (tunnel) on the above contract shall be carried out under item No. 3 in the schedule of prices, and that the lining shall be paid for to a maximum thickness of 2 inches over plan dimension, making a total thickness of 7½ inches instead of 7 inches as set down in your letter.

We are, &c.,  
CARTER & CO.

This is according to contract drawings.—J.D., 6/6/92.

## No. 29.

## Resident-Engineer Boys to Supervising-Engineer Davis.

Public Works Department, Sewerage Branch, Lincoln's Inn Chambers, and

Dear Sir,

40, Elizabeth-street, Sydney, 15 July, 1892.

Messrs. Carter & Co. have drawn attention to an error in the areas of excavation for to 4 ft. by 3 ft. and 4 ft. by 2 ft. 8 in. sewers North Shore.

Paper might be put away.—J.D., 15/8/92.

## No. 30.

The Secretary of the Sewerage Miners' Association to Thos. Houghton, Esq., M.P.

Dear Sir,

40, Charles-lane, Woolloomooloo.

Having been requested by my Association to write to the Works Department to obtain particulars whether there is any provision made for miners being provided with air, I done so through the secretary of the Trades Hall, thinking that it would have more effect, but up to the present it is nil.

Although we are a registered association, up to the present we are not recognised by the Board of Conciliation and of Arbitration, though we are looking forward to it, as in all probability we may be the first to use that Board, us being engaged on Government contracts, and our case is a calamity. I urge upon you to act on our behalf at once. *Re* this information, our general meeting is next Saturday, 30th instant.

My reason for being so urgent is this—our men are dying off so fast; I have to report another death no later than last Tuesday. We sent two to Victoria to benefit their health. I am expecting to hear of their death every day, as their case is hopeless. One of our members came to me to-day; he says, "This is terrible; I am dying—lingering in misery"; has not been able to work this six months; a walking skeleton. We have always a large percentage to support out of our pittance, which, God knows, is only an average of 5s. per day. Out of this our fellows subscribe manfully. We are sure our turn is not far off. There is no man following this work who can live long; we all feel the effects—a husky cough, and galloping consumption follows, and our end is not far off. When we apply to the hospital we are sent to Little Bay as incurable. We have to rush smoke and foul air and dust, and work in unnatural positions to obtain even that average wage. I have pay-sheets to prove my statements, and a glance at my books may prove a death-rate that would not be believed,—that is ten per cent.—the result of us rushing this foul air and not being able to eat during working-hours. Our wives has to nurse us and bathe our aching heads at night, as we are at times almost lunatics when we ought to be resting. Our limbs weaken, and we can no longer work. We are forced to accept this death or starve our wives and children, and we do accept death to obtain them bread. There is terrible suffering amongst our members. They are willing to work, but the work is shut down from them. Although the Works Department let the contracts, they are powerless to compel them to employ labour. The North Shore underground sewerage job, Messrs. Carter & Co., has kept their shafts idle for weeks past. Men who sunk the shafts—some as deep as 250 feet odd—has been forced to fill the ranks of the unemployed. They are actually starving us into a death price. Up to the present we have never been provided with air; what air we have had we had to provide ourselves; so hoping you will take steps on our behalf,

I remain, &c.,

JOS. LYNCH,

Sec., S.M.A., Sydney.

Received by me 4/8/92.—R.H., 8/8/92. Will Mr. Hudson please have this looked into at once.—J.B., 2/5/92. T. Houghton, M.P., 2/5/92. Mr. Davis.—F.C.P., 5/8/92.

## No. 31.

Supervising-Engineer Davis to Resident-Engineer Boys.

MEMO.

Will Mr. Boys please let me have report generally upon this letter, with the following particulars, by to-morrow morning:—

1. Description of fans, pipes, &c., used for ventilating each shaft?
2. Whether it is a fact that shafts have been standing for weeks past, and, if so, for what reason?
3. Whether the appliances are sufficient to keep the tunnel in a good state of ventilation, and, if not in any instance, what he recommends?

J.D., 5/8/92.

1. All steam-power fans at present used on 2, 3, 4, 5, 6, 7, 8 with black iron 9-inch pipes.
2. It is a fact in one instance, but that was on account of the water met with.
3. The appliances are excellent in every way, with the exception of No. 12 shaft, and I am informed that a hand-power fan is to be placed there at once by the contractor.

J.W.T.B., 5/8/92.

## No. 32.

Resident-Engineer Boys to Supervising-Engineer Davis.

*Subject*:—Secretary, Sewerage Miners' Association—Want of provision for supplying miners with air, Contract 79, North Sydney, cited as an example.

Department of Public Works, Roads and Bridges and Sewerage Branch,

6 August, 1892.

The Secretary asks whether there is any provision made for miners being provided with air.

Clause 79 of the specification, Contract 79, provides that the contractor shall provide suitable apparatus for clearing the tunnels.

The contractors have provided fans and pipes to nearly all the principal shafts on this contract, namely, at 2, 3, 4, 5, 6, 7, 8. These fans are of approved make, and are driven off the winding engines at each of these shafts. The pipes are excellent, and are 9-inch diameter, and made of black iron, well tarred inside and out, preventing leakage at the joints.

I have heard no complaints on the score of bad air from any of the miners, with the exception of those at No. 12 shaft.

The

The following describes the means of working each shaft, and the time each was idle :—

No. 1 is at work, but was idle for a week, miners asking more pay for driving. The air is good, and no fan required, owing to there being an open end.

No. 2. Miners finished sinking shaft on 12th July. A fan and hose was put in this shaft after the first 100 feet was sunk, and this was also the case at 3, 4, 5, 6, and 7. These fans were driven off the winding engine. Since the 12th, 9-inch black iron pipes have been permanently fixed.

No. 3 was stopped for a week to enable air-pipes to be fixed permanently.

No. 4 was bottomed on 8th July, and driving started 26th July. During this time air-pipes were fixed. There was a disagreement about the price of driving, and old gang refused to continue the work.

No. 5. No stoppage at this shaft beyond shifting position of shaft.

No. 6. No stoppage.

No. 7. No stoppage.

No. 8 was idle for three or four days after sinking. The fan and air-pipes and pump were fixed to this shaft after the sinking was completed. Depth of shaft, 104 feet.

No. 9. No provision made for extra air. A few days stoppage on account of change of men.

No. 10. No provision made for extra air. There was a stoppage for a few weeks. Contractors, reasons were given that they wished 9 and 11 to be sunk the same time, so as to start the driving together.

No. 11 stopped for about four weeks—11th June to 6th July—on account of large amount of water met with. Contractors waited to see if it would take up. This shaft is now down to full depth. No provision for extra air.

No. 12. No provision made as yet for extra air. Shaft has been stopped for the last ten days. The men complain of bad air and the smoke hanging for a long time. This is the only case of bad air, and I am informed that the contractors are about to put a hand-fan at this shaft, which is 95 feet deep, and the drive is 44 feet in.

The appliances on the work are in good order, and quite sufficient wherever steam power is used, namely, at shafts 2, 3, 4, 5, 6, 7, 8.

It will soon be necessary to have air driven into 9 and 10.

Nos. 9, 10, and 11 are shallow shafts, and the drives between them are not long. Hand-power fans will be sufficient for these shafts, but are not necessary just yet.

No. 12 shaft should be supplied with a fan at once.

J. W. T. BOYS.  
6/8/92.

### No. 33.

Resident-Engineer Rudolph to Supervising-Engineer Davis.

*Subject* :—Want of provision for supplying miners with air.

Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 8 August, 1892.

*Re* the provision of supplying miners with air on contract No. 80, I have to report that nothing has been done yet. I spoke both to Mr. Farley and his foreman about this subject repeatedly, and was assured on one occasion that windsails had been ordered, and on another occasion I heard Mr. Farley give instructions to find out if Carter & Co. had any blowers for sale suitable for his work, but up to the present nothing but the bends for down-pipes are on the ground. Our drives in most instances have not been too far away from the face of the shafts, but now there is no doubt but it becomes a necessity to have ventilation provided at every shaft, and it will be still more wanted if the weather should get warmer. I therefore beg leave to recommend that the contractor be instructed to provide such means as are wanted to send fresh air into the drives, and that his attention may be specially called upon to have the air blown right into the faces where men are employed in gadding out the work, to help as much as possible for the quick setting down of the stone-dust in these places.

H. RUDOLPH,  
Resident Engineer.

### No. 34.

Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

*Subject* :—North Shore and Darling Point Sewers—Ventilation of Tunnels.

Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 8 August, 1892.

THE only tunnelling which is at present being done in this branch is at North Sydney and Darling Point, and as the Secretary of the Sydney Miners' Association makes general statements with reference to the lack of fresh air supplied to miners, I have obtained reports from the resident engineers who are in charge of these two sewers which I enclose.

There are twelve shafts on the North Sydney works, and of these seven are provided with blowers driven by steam power, three do not require artificial ventilation at present, and at the remaining two, fans are necessary at once. Where the ventilation is done by steam power, it is all that can be desired, and the contractors, I understand, are making arrangements to supply the two shafts with the fans necessary.

Mr. Lynch states what is certainly not a fact, when he says that shafts at North Sydney have been idle for weeks past on account of a lack of adequate ventilation. Messrs. Carter & Co. have made excellent progress with their work, and, with the exception of one shaft (which was not standing for bad ventilation), the rate of progress has been far more than provided by the contract.

At Darling Point the shafts are shallow, and there is not, therefore, the same necessity as at North Sydney for steam power for driving the fans. Hand-fans will meet all the requirements, and now that the tunnels are being driven, the contractors have been requested to provide means of artificial ventilation, which they have promised to do.

Miners'

Miners' work is clearly and unhealthy occupation, and no doubt they must feel the effects of the class of work they do. I do not think, however, that more can be done at North Sydney, except in the case of the two shafts referred to above. At Darling Point hand-fans, or some such contrivance must be adopted for forcing the air into the tunnels.

There is a clause in each of these tunnel contracts binding the contractors to provide "blowing machine with ventilating fans \* \* \* capable \* \* \* of removing the foul air in one minute after blasting at each working-face."

J. DAVIS.

Mr. Houghton might be sent a copy of these reports, and informed that the Department will exercise its full powers as regards compelling all our contractors to provide suitable ventilating appliances.—R.H., 8/8/92. *Minute Paper.*

*Subject* :—Deputation—Grievances of Sewerage Miners employed on Works at North Shore and Darling Point.

Department of Public Works, Sydney, 29 August, 1892.

A DEPUTATION representing the Sewerage Miners' Association, accompanied by the Secretary of the Trades and Labour Council of New South Wales (Mr. Riddell), waited upon the Minister this morning to represent certain grievances of the miners employed on the sewerage works at North Shore and Darling Point.

It

It was pointed out that the miners were deprived of air in the underground workings in consequence of the contractors failing to keep the air-courses clear of mullock; that sometimes the miners had but a space of 20 inches to crawl through, on account of mullock not being cleared away, and that no matter how much air were pumped into the courses the smoke to be found therein could not escape unless the courses were kept quite clear.

Reference was made to a minute written by Mr. Bruce Smith authorising the contractors to sublet in connection with the contract for the sewerage work at North Shore.

The Minister said there might be some special arrangement in connection with the contract in question giving the contractors power to sublet; but subletting was not allowed unless the consent of the Department were obtained. In this case the contractors (Messrs. Carter and Company), he discovered, had been allowed to sublet. It appeared that unless objection were raised contractors were allowed to do so. In this particular case the contractors had been allowed to sublet by consent.

The deputation explained that the men were all on piecework on the sewerage works in question (No. 79), and that the contractors would not give daywork. They wished to ask whether the Department could not compel the contractors to give daywork. Figures they had proved that some of the men made only 5s. 4d. a day on piecework, while the average wages had been but 6s. 6d. per day since the work was started—under the piecework system—and yet the contractors were progressing under their contract time.

It was contended that the minute empowering the contractors of the works at North Shore to sublet had had the effect of causing the miners to work under very unhealthy conditions. The unhealthy conditions had seriously affected the health of the men. One miner had died the other day, and they expected two more deaths. The conditions under which the miners were working were killing them. No matter what their wages were the conditions were exceedingly unhealthy, and almost intolerable, all on account of the contractors neglecting the air-courses, which were almost blocked up in places with mullock, which they ought to clear away.

They could not work under such conditions; could not make a fair day's wage, and the result was that they had to stand up for higher wages, and as the contractors had refused to increase the rates the men had struck, and had been out on strike for three weeks. The contractors would not pay a reasonable price. The work was offered by the cubic yard; it had been going on for years, and the contractors knew exactly what could be done, and cut the men down as low as possible.

It was represented that the mullock was not cleared away from the air-courses because it would involve extra expense for the contractors, and the deputation attributed this state of things to the practice of subletting, which they desired the Department to prohibit.

The Minister said that so far as subletting was concerned he could not interfere, as the contractors had the power to sublet. He could not interfere more than the conditions would allow him, but he would certainly send to the contractors' foreman with reference to the ventilation of the underground workings, because they certainly ought to keep the men supplied with sufficient air. He had a right to speak on that point, for the health of the men was endangered.

The deputation pointed out that if such high deposits in connection with contracts were not required, they could carry out the work at the same rates as the contractors, and do just as good work.

The Minister said that it was his desire to avoid too much supervision in connection with public works.

It was pointed out that the contractors of the North Shore works left much in the hands of the men—they did not give them any centres or levels, but only marked the work out. They desired to explain this to the Minister to show that there was not much supervision required in connection with some of their work; their association had the tools to do such work if the Department would but give it to them, and it would save all the trouble created by the practice of subletting. Their object was to ask the Minister to stop the practice.

The Minister said it would be a pretty rough thing to do to say to a contractor that they would accept his contract at a certain price, but would not allow him to sublet. He felt that at the present time he would not be justified in taking any action to prevent subletting. He thought it would be just as well to inform the contractor of the North Shore works of the representations the deputation had put before him; he would take good care that he should know. With regard to the system of payment, he might say that he would rather be more liberal in paying for piecework than for daywork, for it encouraged the men to work with a will. He supposed that if the contractors of the North Shore works had given a little better pay they would not have had the trouble and loss of time attending a three weeks' strike. He would make no promise as to the conditions of future contracts; but after hearing what they had said he would send for the contractor, and talk the matter over with him, and let him know what he thought about the matter. It might have a salubrious effect if he told the contractor what his intentions were as to future contracts.

The deputation pointed out that they had no chance of competing with established contractors in this class of work on account of the deposits being so high. If the Department would accept bondsmen instead of cash they could compete with anyone.

The Minister repeated that it was his desire to avoid too much supervision in connection with contracts. He thought that large contracts of (say) £60,000 could fairly be cut up into sub-contracts, but in smaller works it only increased the supervision unnecessarily. He would, however, see the contractor of the North Shore works, after which he would be in a better position to say whether any improvement could be effected on the present system. He did not think it would be a good thing to prohibit subletting altogether, because there were cases where the system of subletting might be very advantageous. The more legitimate course would, he thought, be to advise the contractor that in case of trouble arising through the practice of subletting, the power on the part of the contractor to sublet would be cancelled; but in this case he could not interfere with the contractor.

The deputation pointed out that so far as the underground work at North Shore was concerned the Department could do nothing to improve the conditions under which the miners were working unless the contractors were compelled to keep the air-shafts clear.

The Minister replied that he had a perfect right to take action with respect to that matter for the sake of the public health. He would take very good care that proper air was supplied to the miners, or he would take action to have it supplied.

With

311

With reference to the representation that the men on the North Shore works were not supplied with an ycentres or levels, the Minister said he was glad the deputation had pointed that out to him, and he would make inquiries concerning the matter, as the Department had been put to considerable trouble with a contractor named Rochester through a similar omission, which was a serious matter.

Mr. Hickson.—J.B., 1/9/92. Seen.—R.H., 2/9/92.

No. 40.

Resident-Inspector Boys to Supervising-Engineer Davis.

Public Works Department, Sewerage Branch, Lincoln's Inn Chambers, and 40, Elizabeth-street,  
Sydney, 7 September, 1892.

Sir, I beg to inform you that the Contract 79, Messrs. Carter & Co., is being proceeded with. The men started yesterday afternoon, the 6th instant.

Yours, &c.,  
J. W. T. BOYS.

For the information of the Engineer-in-Chief.—J.D., 7/9/92. Seen.—R.H., 8/9/92.

No. 41.

T. J. Houghton, Esq., M.P., to The Under Secretary for Public Works.

Dear Mr. Barling, Parliament House, Sydney, 28 September, 1892.

I enclose a letter I have just received from the Secretary of the Sewerage Employees Union, and would feel obliged if you would kindly have the matter attended to at once, and let me know the result.

Yours, &c.,  
T. J. HOUGHTON.

Mr. Hickson.—J.B., B.C., 29/9/92. Urgent. For report.—R.H., 31/9/92. Mr. Davis.  
Report herewith.—J.W.T.B., 4/10/92.

[Enclosure.]

Sir,

I am directed by our Association to once more trouble you to visit the Works Department *re* the ventilation of No. 10 shaft on Carter & Co.'s sewerage contract, North Shore.

There is a hand-fan erected on the shaft, and pipes are connected to the bottom of the shaft only, and the drives are in from 60 to 80 feet.

The contractor refuses to connect any pipes into the drives where the men are at work; also refuses to put labour on to pump the supply of air. Therefore our men are working under deplorable conditions, and the inspectors insist that they cannot act on our behalf. Hoping you will see to this.

I remain, &c.,  
JAS. LYNCH, Secretary,  
Sewerage Miners' Association.

T. J. Houghton, Esq., M.P.

No. 42.

Resident-Engineer Boys to Supervising-Engineer Davis.

*Minute Paper.*

*Subject* :—Complaints *re* ventilation of Shaft No. 10, Contract 79. (See letter 92-2,160, 30th September.)

Department of Public Works, Roads and Bridges and Sewerage Branch,  
North Sydney, 4 October, 1892.

THERE is a hand-power fan and pipes in this shaft, and the pipes are within 30 feet of the face in the north drive. This is as near to the face as practicable.

In the south drive the pipes are in 16 ft. 6 in., and there are plenty of pipes ready at the shaft to be joined in when required.

The contractors state that by their arrangement with the men the contractors supply pipes and put them in to the bottom of the shaft, and fix a T piece on, and that the men are supplied with pipes.

The men fix the pipes in the drives and supply the labour for driving in the air as required.

The inspector reports to me and to the contractors whenever the men require anything, or have any complaints to make, and the men themselves have never made any formal complaint to me.

The inspector states that it is necessary to blow the fan continually now to keep the drives fresh, but at present the men only blow out the smoke after firing.

J. W. T. BOYS.

No. 43.

Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

*Subject* :—Contract No. 79, North Shore Outfall—*Re* ventilation of Shaft No. 10.

Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 4 October, 1892.

I HAVE seen the contractors with reference to Mr. Lynch's complaint, and I have also obtained a report from Mr. Boys, which I enclose. It appears that the miners by arrangement have undertaken to fix the air-pipes in the drives, and that, therefore, if there was delay in these pipes being put in position it was due to the miners themselves. Since Mr. Lynch wrote his letter they have fixed the pipes from the shaft to within about 30 feet of the face of north drive, and within about 50 feet of the face of south drive, and pipes are available, so that this last drive can be ventilated in the same way as the north drive. If the pipes are carried within 30 feet of the face, it is as near as they should be, as they would be damaged by the blasting if taken nearer.

The

The contractors state that the price paid for excavating the tunnel was to include the cost of turning the hand-fan. At present it is only being turned immediately after a shot is fired, but this is not sufficient. Arrangements should be made for the fan to be kept in motion the whole time miners are engaged in the tunnels.

I would suggest that the contractors be written to in terms of the draft letter attached.

J. DAVIS.

See letter written to contractors. It appears, however, that it is really the miners' own fault that sufficient air is not supplied.—R.H., 5/10/92. Under Secretary. Inform.—J.B., 5/10/92. T. J. Houghton, Esq., M.P., 10/10/92.

#### No. 44.

The Engineer-in-Chief for Sewerage to Messrs. Carter & Co.

Gentlemen,

4 October, 1892.

It is reported to me by the resident engineer that the ventilation at shaft No. 10 is not at all satisfactory. The air-pipes are only fixed a short distance from the shaft in the tunnel which is being driven in a southerly direction, and there is about 45 feet of the drive without pipes, and that the hand-fan is only being turned immediately after shots are fired, instead of being kept constantly going. I have, therefore, to draw your particular attention to clause 79 of the specification, and to request that immediate steps be taken to lay additional air-pipes, and also that the fan be kept in motion the whole time miners are engaged in the tunnel.

I have, &c.,

ROBT. HICKSON,

Engineer-in-Chief for Sewerage.

#### No. 45.

Messrs. Carter & Co. to Supervising-Engineer Davis.

Contract No. 79, North Sydney Sewerage.

Sir,

Box No. 10, North Sydney, 1 November, 1892.

Understanding that the main outfall sewer has to be eventually extended south from shaft No. 12 on the above contract, we request your permission to drive the tunnel in that direction, at our schedule rate, until the drive is through between shafts Nos. 11 and 12, or to such distance as you may determine.

Trusting that our application may meet with your approval.

Yours obediently,

CARTER & CO.

Messrs. Carter & Co. might be allowed to drive half-way (about 3 chains) between their end shaft in Mount-street and the future next shaft in Whaling Road, as per tracing. This would be about 70 cubic yards at 60s., equal to £210. C. H. OHLFSEN BAGGE, 7/11/92. The Engineer-in-Chief. Approved.—R.H., 8/11/92. Carter & Co., 10/11/92. Mr. Davis to note.—F.O.P., 12/11/92. Noted.—J.D., 14/11/92.

#### No. 46.

The Engineer-in-Chief for Sewerage to Messrs. Carter & Co.

Gentlemen,

Public Works Department, Sewerage Branch, 10 November, 1892.

In reply to your letter of the 1st instant, asking permission to extend the tunnel of the main outfall sewer, North Shore, southwards, until the drive is through between shafts 11 and 12, at schedule rates, contract No. 79, I have the honor to inform you that you may extend the tunnel from 1 mile 25·3 chains for a distance of 3 chains to 1 mile 28·3 chains, including excavation and lining, at schedule rates, contract No. 79, and on the understanding that the conditions laid down in Mr. Davis's letter of the 27th May last apply equally to the extension now granted.

I have, &c.,

ROBERT HICKSON,

Engineer-in-Chief for Sewerage.

#### No. 47.

Resident-Engineer Boys to Supervising-Engineer Davis.

Public Works Department, Sewerage Branch, Lincoln's Inn Chambers, and 42, Elizabeth-street, Sydney, 21 November, 1892.

ENCLOSED please find information of shafts and drives requiring checking on contract 79.

When the officer who is going to check this work is ready I will go over the ground with him and point out all points made use of on top.

J. W. T. BOYS.

The shafts on this contract are deep, and some distance apart, and I think, therefore, it would be advisable to have the lines and levels checked. Could Mr. Peake be spared to do this work? If so, he might be instructed to come to me, and I will give him particulars.—J.D., 22/11/92. Mr. Bagge.

It may be judicious to allow Mr. Peake to check these alignments on account of the great depths of the shafts.—C. H. OHLFSEN BAGGE, 22/11/92. Mr. Mollison. Mr. Peake.—R.H., 22/11/92. Noted.—A.P., 22/11/92. Instructions carried out and returned.—6/1/93.

## Resident-Engineer Boys to Supervising-Engineer Davis.

Public Works Department, Sewerage Branch, Lincoln's Inn Chambers, and 40, Elizabeth-street,  
Sydney, 10 November, 1892.

It is reported by the men working at No. 6 shaft that a boy living in the house nearest that shaft has blown himself up with a cap on Tuesday evening after the men had finished their work. On Wednesday the father of the boy brought two caps over to the men at this shaft.

It is not known whether the boy actually got the caps out of the box there, or on the work at all. The only thing to point to such a conclusion is that the caps are the same as used on this work. Inspector Parsons will try and find out more about this at once, also the name of the people. I asked the doctor attending, but he refused to give me any information beyond that the boy was seriously hurt, and that the people wish to keep it quiet.

J. W. T. BOYS.

For the information of the Engineer-in-Chief.—J.D., 11/11/92. Engineer-in-Chief. Seen.—R.H., 11/11/92.

No. 49.

## Resident-Engineer Boys to Supervising-Engineer Davis.

Public Works Department, Sewerage Branch, Lincoln's Inn Chambers, and 40, Elizabeth-street,  
Sydney, 13 December, 1892.

HEREWITH is a memo. from Messrs. Carter & Co. in reference to stoppage at shaft No. 6. I should recommend the Department to allow this piece of work to be idle, as proposed, until the new year, as it will not retard the general work on this contract; and the boy is in such a highly nervous state that the shock of the blasting is likely to do him a permanent injury. The contractors must be held responsible for the delay.

J. W. T. BOYS.

This boy was seriously injured by explosives which he is believed to have taken from the miners' box. As the delay at this shaft will not retard the completion of the contract, I recommend that it remain idle until the beginning of the new year, when further inquiries can be made.—J.D., 14/12/92. Engineer-in-Chief.

Approved.—R.H., 14/12/92. Mr. Davis to see.—F.C.P., 15/12/92. Seen.—J.D., 16/12/92. Mr. Boys, for further report after holidays.—J.D., 16/12/92. Mr. Boys. This shaft (No. 6) started to work on 3rd January, 1893.—J.W.T.B., 5/1/93. Might be put away.—J.D., 6/1/93.

Public Works Department, Sewerage Branch, Lincoln's Inn Chambers, and 40, Elizabeth-street,  
Sydney, 8 December, 1892.

Memo. to Messrs. Carter & Co., contractors, Contract 79.  
SHAFT No. 6 has been idle since 11th November. When will this work be continued?

J. W. T. BOYS.

Work will be resumed at the above shaft in about a fortnight from date.

The boy whose injuries necessitated the stoppage of the shaft in question is now recovering, and will be removed from the vicinity before the end of the year.

CARTER &amp; CO.

No. 50.

## Supervising-Engineer Davis to Resident-Engineer Boys.

*Minute Paper.**Subject:—Contract No. 79.*Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 22 December, 1892.

TRACING of section of portion of main outfall sewer, North Sydney, forwarded herewith for the information of the Resident Engineer.

The invert levels of extension of sewer from shaft at junction of Mount and Alfred Streets, as finally decided upon, are figured in red.

For Mr. Boys, through Mr. Davis.—J.S.M., 23/12/92.

It is rather late in the day to "finally decide" upon invert levels of the sewer on the south side of the shaft at Mount-street, seeing that work has been in progress over nine months, and a matter of 50 feet of this tunnel has been driven from the centre of that shaft. Moreover, in addition to sewer being lowered 0'17—the size of the sewer has been reduced from 4 ft. x 2 ft. 8 in. to 3 ft. 3 in. x 2 ft. 2 in. As the instruction does not appear to have come from Mr. Bagge, and as he possibly has not seen the proposed change, I return the paper to him for his instruction.—J.D., 23/12/92. Mr. Bagge.

This should have been arranged at the time, but by some oversight the matter has been delayed. I think, however, that it would be better to do the work as shown on section if it does not incur much expense.—C. H. OILFSEN BAGGE, 28/12/92. Mr. Davis.

Mr. Boys to make arrangements to reduce size of sewer and work to levels given from present face of tunnel, and make an estimate of the cost of extra excavation and concrete necessary in the length of tunnel already driven.—J.D., 29/12/92. Mr. Boys.

Noted.—J.W.T.B., 31/8/94.

No. 51.

Surveyor Peake to The Assistant Chief Engineer for Sewerage.

Check Surveys—Contract No. 79, North Sydney.

Sewerage Construction Branch, Lincoln's Inn Chambers,

Elizabeth-street, 6 January, 1893.

Sir,

I have the honor to transmit herewith a table and diagram, showing the results of my check survey of the alignments and levels upon contract No. 79, North Sydney.

My alignments were obtained, with few exceptions from one set of observations of the wires at each shaft.

In the case of shaft No. 4, where the curve commences, the wires were dropped twice, and the mean of the results was taken as a base for the underground survey.

I consider that the check work done would point out any grave discrepancy in the alignment, if such existed, and is sufficient at the present stage of operations.

I have, &c.,

ALG. PEAKE.

These check alignments and levels agree fairly well, but I think that further check should take place where the differences are the greatest.—R.H., 9/1/93. Mr. Bagge. For the information of Mr. Davis.—C.H.O.B., 9/1/93.

Mr. Peake does not quite agree with Mr. Boys at two or three of the shafts. The chief difference is at the curve at shaft No. 4. Will Mr. Boys please check his work, and report.—J.D., 9/1/93. Mr. Boys.

The work at shaft No. 4 was checked on 28th January, 1893, and alterations made. Mr. Boys has also consulted with Mr. Peake on the matter, and they have struck an average for the plugs in the curve.—J.W.F.B., 2/2/93.

No. 52.

Messrs. Carter & Co. to Supervising-Engineer Davis.

Contract No. 79—North Sydney Sewerage.

Sir,

Box No. 10, North Sydney, 24 January, 1893.

Seeing that the lower and shallower portion of the above contract will be completed many months before the upper portion, we hereby request your permission to work three shifts in the deeper ground.

The drives on this length are now in some considerable distance, and we do not think any serious annoyance will be caused to the residents in the vicinity through our working the three shifts.

We may mention that we have personally interviewed a number of the people in the neighbourhood who are agreeable to the extension of our working hours.

We are, &c.,  
 CARTER & CO.

These

315

These shafts being deep, and the whole of the tunnels being driven some distance from the shafts, I think the contractors might be allowed to work three shifts; of course, with the distinct understanding that should the residents complain the present arrangement to be reverted to, viz., from 6 a.m. to 10 p.m.—J.D., 25/1/93. Mr. Bagge.

Contractor might be informed accordingly. Engineer-in-Chief.—C.H.O.B., 25/1/93. Approved.—R.H., 25/1/93. Contractors informed.—J.D., 31/1/93.

---

No. 53.

Supervising-Engineer Davis to Messrs. Carter & Co.

Gentlemen,

Department of Public Works, Sydney, 31 January, 1893.

I have to acknowledge the receipt of yours of the 24th instant, asking to be allowed to work three shifts in the deep tunnels, and in reply, I have to inform you that the Engineer-in-Chief has approved of your doing as you wish, but it is to be distinctly understood that should the residents complain of the nuisances arising from the blasting, the present working hours are to be reverted to.

I have, &c.,

J. DAVIS,

Supervising Engineer.

Through Mr. Boys.

The Under Secretary for Public Works to Messrs. Carter & Co.

Gentlemen,

Department of Public Works, Sydney, 7 March, 1893.

As the Bank fixed deposit receipt for £2,000 held in respect of your contract for the main outfall sewer, North Sydney, will mature on the 10th instant, I am directed by the Secretary for Public Works to ask whether you wish the deposit to be renewed, and if so, for what period?

I am also to ask that you will be good enough to say what action is to be taken in regard to the interest which will accrue under the present deposit.

I have, &c.,

J. BARLING,

Under Secretary

(Per D.C.M'L.)

No. 57.

The Agent for Messrs. Carter & Co. to The Secretary for Public Works.

Sir,

5, Spring-street, Sydney, 23 March, 1893.

Referring to contract now in course of construction by Messrs. Carter & Co., sewer construction, North Shore, I have the honor to direct your attention to the fact that the retention money now held by the Government is in excess of the amount originally lodged with tender, and that such amount is adequate security for the Government to ensure the just and proper fulfilment of the contract.

I have, therefore, on behalf of my clients, to apply for a return of the deposit of £2,000 held by the Crown.

I have, &c.,

W. ARMSTRONG,

Agent for Carter & Co.

B.C. Mr. Hickson for report.—J.B., 23/3/93. Mr. Bagge.—F.C.P., 24/3/93. Mr. Davis.—C.H.O.B., 24/3/93. Report herewith.—J.D., 24/3/93.

## No. 58.

## The Engineer-in-Chief for Sewerage to The Secretary for Public Works.

*Minute Paper.*

*Subject*:—Contract No. 79, North Sydney Outfall Sewer.—Contractors ask that fixed deposit be returned.  
Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 24 March, 1893.

THE tender for this contract amounted to £39,890, of which £20,709 14s. worth of work has been executed, or about half the total quantity. The fixed deposit in all cases is held until the completion of the work, as a guarantee for the due fulfilment of the contract, and I do not think in this instance an exception should be made. On some occasions the Minister has approved of retention money being returned after the amount in hand, including the fixed deposit, has reached 10 per cent. of the amount of the tender, but as much of the work remaining to be done is put down in the schedule of prices at very low rates, and the work finished, in some instances, at high rates, I could not recommend that any of the retention money be returned.

At present the Department holds the following:—

	£	s.	d.
Fixed deposit ... ..	2,000	0	0
Retention money ... ..	2,070	19	5
Total ... ..	£4,070	19	5
10 per cent. of tender would amount to ... ..	£3,989	0	0

J. DAVIS.

For the approval of the Engineer-in-Chief.—C. H. OHLFSEN BAGGE, 25/3/93.

All that contractors would be entitled to if the new general conditions were in force would be £70 19s. 5d. As these are not yet in force and contractors have good prices for work done, whereas work to be done is put down at low figures, I cannot recommend that their application be granted.—R.H., 25/3/93. Under Secretary.

List to refuse.—J.B. 27/3/93. Approved by Minister, W.J.L., order No. 867.—D. M'L., 11/4/93. J.B. Roads, B.C., 12/4/93. Seen.—J.D., 14/4/93. Armstrong informed, 17/4/93.

## No. 59.

## The Engineer-in-Chief for Sewerage to The Agent for Messrs. Carter &amp; Co.

Sir,

Public Works Department, Sewerage Branch, 17 April, 1893.

In reply to your letter of 25th ult., applying, on behalf of Messrs. Carter & Co., for return of deposit money on contract money No. 79, North Shore Sewerage, I have the honor to inform you that it is a rule of this Department to hold the "fixed deposit" until the contract is finished, and in this case no exception can be made. Moreover, as the "fixed deposit and retention money do not amount to more than 10 per cent. of the tender, at present no portion of the retention money can be returned.

I have, &amp;c.,

ROBERT HICKSON,

Engineer-in-Chief for Sewerage.

## No. 60.

## Supervising-Engineer Davis to Inspector Rowney.

*Minute Paper.*

*Subject*:—Contract No. 79, North Shore Outfall.—Check of curve north of shaft No. 4.  
Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 17 April, 1893.

Mr. Boys' chord-pegs were checked by Mr. Rowney during his absence on leave, and, as he did not agree with the work done by Mr. Boys, I thought it advisable, so that there might be no doubt in the matter, to ask Mr. Bagge to allow Mr. Peake to continue his survey to the T.P. at the north end of the curve in question. This he has now done, and the result is shown on sketch marked A. Mr. Peake's work does not quite coincide with Mr. Rowney's, but I think, as he comes between Mr. Boys and Mr. Rowney, the tunnel beyond the T.P. should be driven to Mr. Peake's line.

J.D.

Mr. Rowney to note. Noted.—G.H.R., 18/4/92. Noted.—J.W.F.B., 2/2/93.

## No. 61.

## The Agent to Messrs. Carter &amp; Co. to The Secretary for Public Works.

Sir,

5, Spring-street, Sydney, 21 April, 1893.

I have the honor to ask reconsideration of your refusal to allow a return of part of the retention money held on account of contract No. 79, North Shore Sewerage, and to point out that in addition to deposit of £2,000; retention money now amounts to £2,000, and that Messrs. Carter have plant and machinery on the contract amounting to £3,500, and also materials to the value of £800, making a total of security value of upwards of £8,000.

I respectfully submit that the Department will hold very ample security after a deduction of £2,000 from the retention money.

I have, &amp;c.,

W. ARMSTRONG.

Mr. Hickson.—D.C.M'L. (*pro* U.S.), B.C., 21/4/93. Mr. Davis, 21/4/93. Please attach previous papers.—J.D., 21/4/93. Papers herewith.—F.C.P., 22/4/93. A voucher has been signed to-day for work done amounting to £1,453 9s.—R.H., 27/4/93.

*Minute Paper.**Subject*:—Main Outfall Sewer, North Sydney.

Bonds and Contract Branch, Department of Public Works, Sydney, 3 August, 1893.

MEMORANDUM herewith duly signed by the contractors, Messrs. Carter & Co., agreeing to repay advances made from time to time on material not on the contract site.

The original agreement is also sent herewith.

HAROLD F. NORRIE.

Seen.—R.H., 4/8/93. Mr. Davis to note.—F.C.P., 4/8/93. Noted.—J.D., 4/8/93.  
Accountant to note.—F.C.P., 4/8/93. Noted.—O.C., 4/8/93. Final return forwarded to Treasury for payment this day. Bond 92-538 and agreement 93-974, attached herewith, may now be filed with the papers.—O.C. (*per* E.H.), 13/12/94.

MEMORANDUM.

IN consideration of the Minister for Public Works in and for the Colony of New South Wales advancing to us the sum of £1,360, and of any future advances to be made to us, we hereby agree to repay to the said Minister for Public Works the said sum of £1,360 and future advances, together with interest at the rate of £6 per centum per annum on such sums respectively from the date of advance on demand. And we hereby charge all moneys due or payable, or becoming due or payable, to us under a certain contract for the construction of the North Shore main outfall sewer from near Long Bay to Mount-street, in the said Colony, entered into by us with the Government of the said Colony, also all cement, building materials, and every other thing already used or to be used in connection with our said contract with the repayment of the said sum of £1,360, and any future advances and interest at the rate aforesaid. And we hereby undertake to give, whenever called upon to do so, a valid bill of sale to the said Minister for Public Works over the said cement, building materials, and every other thing used in connection with our said contract now stored in our premises at Alfred-street, North Sydney, in the said Colony, or elsewhere, such bill of sale to contain a power of sale and such other powers, provisoes, and agreements as the said Minister for Public Works may be advised. Also, further undertake to give immediate possession of same to the said Minister, or any person appointed by him for that purpose, whenever called upon to do so.

As witness our hands, at Sydney, this 3rd day of August, A.D. 1893.

Witness,—

HAROLD F. NORRIE, J.P.

H.F.N., 3/8/93.

JOHN CARTER.

D. G. SNODGRASS.

No. 65.

Messrs. Carter &amp; Co. to Supervising-Engineer Davis.

Sir,

Box No. 10, North Sydney, 10 August, 1893.

Referring to our letter of 2nd June, 1893, in which we accept a maximum thickness of 2 inches over plan dimension as the quantity to be paid for lining tunnel on contract No. 79, North Sydney sewerage; we beg to state that this was agreed to on the supposition that the ground would admit of such dimension being practicable.

In this contract, as in some others of a similar character, notably contract No. 53, Waverley sewerage, the ground met with is of such a nature as to render it impossible to keep within the usual limits.

The 2 inches referred to was fixed as being 2 inches less than usually works out as an average cross-section, but owing to the foregoing reason, and to unavoidable errors in the alignment, we ask to be allowed cross-sections equal to those of contract No. 53, less the 2 inches which was intended to be deducted.

We are, &amp;c.,

CARTER &amp; CO.

Register and connect papers.—J.D., 9/8/93. Previous papers 92/1,216 herewith.—F.C.P., 10/8/93.

No. 66.

## No. 66.

## Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

*Subject* :—North Sydney Outfall Sewer, Contract No. 79—Contractors write asking that the question of thickness of lining in tunnel should be reconsidered.

Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 14 August, 1893.

IN June of last year, at the time the tunnelling was commenced on this contract, the contractors undertook, if they were allowed to do the excavation under item No. 3 of the schedule of prices, they would not require payment for more than  $7\frac{1}{2}$  inches lining or a margin of 2 inches over the cross-sections of the tunnel excavation ordered.

The tunnel excavation is nearly finished and the first length of about 18 chains of lining is in progress.

The contractors now write asking that the question of the thickness of the lining to be paid for should be reconsidered.

They allege that the ground met with in the tunnels was of an exceptional nature, and similar to that on the Waverley and Woollahra branch sewer (contract No. 53), and they, therefore, desire that they be allowed cross-sections equal to those paid for on that contract, less 2 inches.

The rock in the tunnels at Waverley and North Shore, is certainly alike, and a number of "floors" and "faces" were met with at both places which materially increase the area of the tunnels. The cross-sections as a consequence were unusually large at Waverley, the average margin of the lining over the excavation ordered being about  $5\frac{1}{2}$  inches. Difficulties of the same nature have been experienced at North Shore, and the cross-sections are likely to work out equally as large as the Waverley ones.

The papers show that when the agreement was made it was thought that there would be no exceptional difficulties to be encountered in the driving, and that the lining would not exceed the cross-section of excavation by more than 4 inches. On this understanding, Messrs. Carter & Co. offered to forego 2 inches of the lining if they were allowed to do the excavation as they desired. The question now arises whether (seeing that the rock has proved to be similar to Waverley), they should have the agreement modified so as to be paid on the basis of that contract.

It was evidently the intention of the Engineer-in-Chief for the contractor to bear the expense of 2 inches of lining, and the contractors ask that by regarding Waverley and North Shore as parallel cases this should be done.

I, therefore, beg to recommend that the 2 inches to margin of tunnel-lining be increased to  $3\frac{1}{2}$  inches in thickness.

J. DAVIS.

The 2 inches was decided upon on the assumption that the average allowance for concrete-packing was 4 inches. As it is now stated this really works out at  $5\frac{1}{4}$  inches. Mr. Davis' suggestion is only fair and equitable, and may therefore be adopted.—R.H., 15/8/93.

For the consideration of the Engineer-in-Chief.—C. H. OHLFSEN BAGGE, 15/8/93. Messrs. Carter & Co. informed.—J.D., 21/8/93.

## No. 67.

## Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen,

Department of Public Works, Sydney, 21 August, 1893.

I have to acknowledge the receipt of yours of the 10th instant, stating the nature of the ground through which the tunnels have passed is not what is was anticipated, and that therefore the maximum thickness of 2 inches over the cross section ordered for, the excavation (see my letter, 27th May, 1892), is not sufficient, and asking that as the nature of the rock is similar to that passed through in the tunnels of the Waverley and Woollahra Branch Sewer, the cases be regarded as parallel, and that you be allowed the cross sections equal to those on that contract less 2 inches.

In reply I have to inform you that the Engineer-in-Chief has decided, on account of the nature of the rock, to modify the agreement, contained in my letter of 27th May, 1892, to the extent of increasing the margin of 2 inches thickness of lining, over the cross section of excavation ordered, to a maximum of  $3\frac{1}{4}$  inches. Otherwise the terms of the letter to remain unaltered.

It is also to be understood that this additional allowance in the lining is to cover the cost of any extra concrete, which will be required through unavoidable errors in the levels and alignments of the tunnels, including those between shafts Nos. 3 and 4.

Will you please accept this modification of the agreement previously made respecting the lining of the tunnels in writing.

I have, &c.,

J. DAVIS,

Supervising Engineer.

## No. 68.

## Messrs. Carter &amp; Co. to Supervising-Engineer Davis.

Sir,

Alfred-street, North Sydney, 28 August, 1893.

We have the honor to acknowledge your letter of 21st August re maximum of lining to be allowed in tunnels on contract No. 79, North Sydney Sewerage, and to inform you that we agree to accept the same according to the terms of your letter.

We have, &c.,

CARTER & CO.

Please put with other papers.—J.D., 30/8/93.

319

No. 69.

Resident-Engineer Boys to Supervising-Engineer Davis.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Dear Sir,

Sydney, 23 August, 1893.

I find that in section 88 of specification, bluestone concrete packing is to be used in the shafts behind the brickwork, but as we have always used sandstone packing, with the exception of that used round the pipes in the high drop shafts, will you advise me if it is right to pack with the sandstone packing, as we are just starting the brickwork in shafts 4 and 12; and also will you be so good as to define what thickness of bluestone concrete is to be used round the pipes, if you decide to use sandstone in the shafts.

The joints in the brickwork are specified to be "struck," but as we usually have them "cut and struck," will you order this if you think it necessary; it would improve the work very much. I should be glad if you could come over for half-an-hour to-morrow if you have time, as there are a few little points which would be better for settling.

And I should be glad if you could send me another inspector or two, as the work is increasing rapidly.

I have, &amp;c.,

J. W. T. BOYS.

The clause referred to does not comprise the packing, but merely the chambers which are of course to be built with bluestone concrete. The shafts are to be packed as usual with concrete sandstone packing with 6 inches of bluestone concrete round down pipes in the body of the shaft. I will see Mr. Boys to-day *re* inspectors and also joints.—J.D., 25/8/93. Mr. Boys.

Noted.—J.W.H.B., 31/8/94.

No. 70.

The Chief Clerk to The Commissioner for Roads.

Main Outfall Sewer, North Sydney—Carter &amp; Co., contractors.

Public Works Department, Sydney, 4 September, 1893.

The bank fixed deposit receipt for £2,000, held in respect of the above contract, will mature on the 20th instant. Should it be renewed?

D. C. M'L.

(Pro U.S.)

Mr. Davis, F.C.P., 4/9/93.

Contract time does not expire until the beginning of March of next year, and the work will certainly not be finished before that date. I should, therefore, think the deposit should be renewed for another six months.—J.D., 4/9/93. Engineer-in-Chief.

Recommended.—R.H., 5/9/93. Mr. Mitchell, 6/9/93. Messrs. Carter & Co. asked to say for what period deposit is to be renewed, 7/9/93.

No. 71.

The Under Secretary for Public Works to Messrs. Carter &amp; Co.

Gentlemen,

Department of Public Works, Sydney, 7th September, 1893.

As the Bank fixed deposit receipt for £2,000, held in respect of your contract for the construction of the main outfall sewer at North Sydney will mature on the 10th instant, I am directed by the Secretary for Public Works to ask whether you desire the deposit to be renewed, and, if so, for what period?

I am also to request that you will be good enough to say what action is to be taken in regard to the interest which will accrue under the present deposit.

I have, &amp;c.,

J. BARLING,

Under Secretary

(Per D. C. M'L.)

No. 72.

Messrs. Carter &amp; Co. to The Under Secretary for Public Works.

Fixed Deposit Receipt, Contract No. 79—North Sydney Sewerage.

Sir,

Box No. 10, Alfred-street, North Sydney, 18 September, 1893.

Referring to your letter *re* the above, we have the honor to ask you to be good enough to renew the same for a further period of six months, and to pay the accrued interest to credit of "Carter & Co., North Shore Contract," with the Bank of New Zealand, Pitt-street.

We have, &amp;c.,

CARTER &amp; CO.,

Mr. Mitchell.—D.C.M'L., 19/9/93.

Receipt for renewal to Bank of New Zealand, 19/9/93.

No. 72A.

The Under Secretary for Public Works to The Manager, Bank of New Zealand.

Sir,

Department of Public Works, Sydney, 19 September, 1893.

I am directed by the Secretary for Public Works to forward herewith, for renewal for six months from the 10th instant, fixed deposit receipt No. A 21,807 for the sum of £2,000 issued by your Bank and lodged in connection with Messrs. Carter & Co.'s contract for the construction of the main outfall sewer, North Sydney.

I am to ask that the interest which has accrued under the present deposit may be placed to the credit of "Messrs. Carter & Co., North Shore Contract."

I have, &amp;c.,

J. BARLING,

Under Secretary

(Per D. C. M'L.)

No. 73.

## No. 73.

The Manager, Bank of New Zealand, to the Under Secretary for Public Works.

Sir,

Bank of New Zealand, Sydney, 21 September, 1893.

I have the honor to hand you our fixed deposit receipt No. A 21,821 in your favour for £2,000, being renewal of No. A 21,807 for a like sum issued in connection with Messrs. Carter & Co.'s contract for the construction of the main outfall sewer, North Sydney.

The interest accrued on the old receipt has been credited to "Messrs. Carter & Co., North Shore contract," as requested by you.

I have, &c.,

R. B. RIGG,  
(Pro Manager).

Mr. Mitchell.—D.C.M'L., 22/9/93.

## No. 74.

The Under Secretary for Public Works to Messrs. Carter & Co.

Gentlemen,

Department of Public Works, Sydney, 22 September, 1893.

I am directed by the Secretary for Public Works to inform you that, in compliance with the request contained in your letter of the 18th instant, the fixed deposit receipt for £2,000 held in respect of your contract for the main outfall sewer, North Sydney, has been renewed for a period of six months from the 10th instant.

I am to add that the Bank states that the interest which has accrued under the original deposit has been placed to the credit of the account "Messrs. Carter & Co., North Shore contract."

I have, &c.,

J. BARLING,  
Under Secretary,  
(Per D.C.M'L.)

## No. 75.

Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

*Subject*:—Contract No. 79, North Sydney Outfall, Ernest-street Branch Sewer.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 19 October, 1893.

A LENGTH of 33 feet of the Ernest-street branch sewer was included in the above contract. The levels of the remaining 568 feet could not be fixed at the time the contract was let, as the details of the reticulation draining to Ernest-street had not been worked out. The reticulation carried out is shown on attached plan in thick blue line, and that for which plans are ready in thin blue lines. At present the sewage from the pipes, and from the houses in the district, is draining into a creek, which crosses Walker-street near Ernest-street, and as there are great complaints from the residents of the serious nuisance caused thereby, it is most desirable that the sewage should be diverted into the outfall sewer as soon as possible. If the balance of the Ernest-street branch is constructed simultaneously with the outfall sewer, then, on the completion of that sewer (which will be in about six months), and the outfall works (designs for which are ready), the whole of the sewerage of the district referred to and shown on plan attached will be provided for.

By carrying out this branch in conjunction with contract No. 79, a shaft, which is estimated to cost £160, which otherwise would have to be sunk and built, can be saved.

I recommend that Messrs. Carter & Co. be asked to do the work in question at their schedule rates for contract No. 79, amounting to £1,220.

J. DAVIS.

As Mr. Davis has explained, it will be a saving of £160 if this Ernest-street branch sewer is constructed now, while the work for the main sewer is in progress, and by the time the main sewer is completed, the drainage of the Holterman and Berry Estate (which is ready for tendering) can be at once discharged into the main sewer through this branch. I beg, therefore, to submit Mr. Davis' recommendation for favourable consideration.—C. H. OLSEN BAGGE, 19/10/93. Engineer-in-Chief.

Recommended. It would be a most desirable thing, from a sanitary point of view, to let this work be done now as an extension of the existing contract. Funds are available.—R.H., 20/10/93. Under Secretary.

List for approval.—J.B., 21/10/93. Approved by Minister. W.J.L. Order No. 3,737.—D.C.M'L., 28/10/93. J.B. Roads.—B.C., 30/10/93. Seen. Mr. Davis to note.—R.H., 31/10/93. Contractors informed.—J.D., 27/11/93.

## No. 76.

Supervising-Engineer Davis to Messrs. Carter & Co.

Gentlemen,

Department of Public Works, Sydney, 27 November, 1893.

I have the honor to inform you that the Minister has approved of your executing the Ernest-street branch sewer, as shown on the accompanying plan, in connection with your sewerage contract No. 79, at your schedule rates for that contract.

I enclose a schedule in which is given the probable quantities of the different kinds of work in this branch sewer.

Will you please sign this schedule, undertaking to do the work at the rates referred to above, and given in the schedule.

Yours, &c.,

J. DAVIS,  
Supervising Engineer for Sewerage.  
(Through MR. BOYS).

## Explanation of Messrs. Carter &amp; Co.'s Bill attached.

7 December, 1893.

		1892.	£	s.	d.
Labour at 5A shaft, 13 days, at 10s.	...	...	6	10	0
Paid for in voucher dated 12th May, 1892. This was for shifting timber work and re-erecting on altered position of shaft, Falcon-street and Alfred-street, out of way of tram-line.					
		1893.			
August 7—Cement, B Bls., 5 at 16s.	...	...	4	0	0
This cement went to Bondi.					
August 28—Additional B Bls., 2 at 16s.	...	...	1	12	0
Sent to Bondi.					
August 28—Single team, Newtown, 1 day	...	...	1	0	0
Do freight (mean ferry)	...	...	0	1	6
Sent for ironwork required on contract 79.					
August 28—Mechanic cutting pipe, $\frac{1}{2}$ day	...	...	0	6	0
September 2—do do $\frac{1}{4}$ day	...	...	0	3	0
These pipes were cut for No. 12 shaft, water cushion chamber, and also for 9A shaft.					
September 5—1 sheet galvanised iron	...	...	0	5	0
Screws and washers...	...	...	0	1	0
For the Inspector's office roof was injured, and permission granted for repairs.					
September 5—Mechanic cutting pipe, $\frac{1}{2}$ day	...	...	0	6	0
At Mount-st. shaft, inlet chamber.					
September 5—Single team, shifting office, $\frac{1}{2}$ day	...	...	0	10	0
Extra horse, $1\frac{1}{2}$ day	...	...	0	15	0
Shifting office from Neutral Bay out of sand, and placing at low-level road, Alfred-street, near No. 9 shaft.					
September 14—Mechanic cutting pipe, $\frac{1}{2}$ day	...	...	0	6	0
Fitting pipes at first W. cushion, No. 4 shaft, Ernest-street.					
September 14—Single team, Newtown, 1 day	...	...	1	0	0
Freight (means ferry)	...	...	0	1	6
Bringing remainder of ironwork for contract 79.					
November 1—Mechanic, cutting pipe, $\frac{1}{4}$ day	...	...	0	3	0
November 4—do do $\frac{1}{2}$ day	...	...	0	6	0
November 20—do do $\frac{1}{4}$ day	...	...	0	9	0
Cutting pipes for water cushions in No. 4 shaft, Ernest-street.					
I have had great difficulty in getting the contractors to send in their account, hence the delay.					

J. W. F. BOYS.

J. Davis, Esq., Supervising Engineer, Sewerage Contract.

Mr. Boys to include what has not been paid in next progress return. If there are other items which Mr. Boys cannot certify to will he please let me have a list to send on to Inspector Wagg.—J.D., 14/12/93.

Mr. Boys,—The fines had better be returned under the item of dray, &c., in schedule.—J.D.

Department of Public Works, Roads, Bridges, and Sewerage Branch,  
North Sydney, 19 December, 1893.

J. Davis, Esq., Supervising Engineer, Sewerage Contract,—

Dear Sir,

Am I to place the account cartage to Bondi, in Messrs. Carter & Co.'s account, to contract 79, or make a separate voucher for it?

I am, &amp;c.,

J. W. F. BOYS.

In contract No. 79 voucher.—J.D., 20/12/93. Mr. Boys.

Sewerage Branch, Public Works Department.

Dr. to Carter &amp; Co.

		£0 7 6		

## No. 78.

## Messrs. Carter &amp; Co. to The Engineer-in-Chief for Sewerage.

Sir,

North Sydney, 28 December, 1893.

Our tender for contract No. 69, Western Suburbs Sewerage, having been accepted with the provision that payment shall be made for the same in funded stock, a condition to which we have agreed, we have to ask you to be good enough to assist us in our financial arrangements by paying the retention money (£2,000) held on contract No. 79, North Sydney Sewerage, on our next progress certificate for the same.

The balance of the work to be completed on this contract will not exceed £4,000, against which you have our fixed deposit for £2,000 as security.

We find that some trouble will be experienced in making satisfactory arrangements for the disposal of the stock which will be paid to us during the first few months, and we, therefore, hope that you will be good enough to grant our request.

We are, &amp;c.,

CARTER &amp; CO.

There

There is about £4,000 worth of work yet to be done to complete the contract, and as the Department holds a fixed deposit of £2,000, in addition to £1,988 19s. 7d., retention money, and as I consider the fixed deposit is sufficient to ensure the due completion of the contract, I recommend that the retention money, amounting to £1,988 19s. 7d., be returned to the contractors.—J.D., 3/1/94. Commissioner-in-Chief for Roads, Bridges, and Sewerage.

Recommended. These contractors have taken up the eastern branch extension sewer. £46,000 payment to be made in funded stock. Every consideration, therefore, should be shown to men who thus show their willingness to meet the Department.—R.H., 4/1/94. Under Secretary.

For approval.—J.B., 4/1/94. Approved.—W.J.L., 5/1/94. Mr. Hickson,—J.B., 5/4/94. Seen.—R.H., 5/1/94. Noted.—J.D., 5/1/94. Accountant. Noted voucher to Treasury this day.—O.C. (*per* E.H.), 8/1/94.

### No. 79.

Mr. Henry Stuart, St. Leonards Labour Electoral League, to The Secretary for Public Works.

St. Leonards Labour Electoral League,  
1, Beaconsfield-terrace, Walker-street, North Sydney, 3 February, 1894.

Sir,

I have been instructed by the above branch of the Labour Electoral League to draw your attention to a system of sweating that is taking place in connection with the North Shore Sewerage Contract. It has been alleged that a number of men, although working hard, are unable to earn enough to keep their families supplied with the bare necessities of life, and complaints have appeared in the Press with regard to same.

The majority of the members of this branch of the League feel confident that if you—yourself personally—can help put a stop to such a nefarious condition you will do so. Consequently, I am directed to request you to cause inquiries to be made as to the allegations, and sincerely hope you will do so.

I have, &c.,

HENRY STUART.

Say inquiry will be at once made, then ask Mr. Hickson to look into matter without delay.—J.B., 5/2/94. Mr. H. Stuart informed, and told that on receipt of report a further communication will be made to him.—5/2/94. Mr. Hickson.—D.C.M.L. (for U.S.), B.C., 5/2/94. Report as to Messrs. Carter & Co. work herewith.—J.D., 9/2/94. Engineer-in-Chief. Mr. Davis for report. I understood the miners on 79 are making good wages, and that they informed one of our officers that they had nothing to do with this complaint, and would strongly object to being put on at day work.—R.H., 7/2/94.

### No. 80.

Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage

*Minute Paper.*

*Subject:—Alleged "sweating" on North Shore Sewerage Contract.*

Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 9 February, 1894.

THERE are at present two contracts in progress at North Shore,—the outfall sewer, which is being constructed by Messrs. Carter & Co., and the reticulation of M. Holterman and Berry's Estates, which is being done by Messrs. Butcher Bros.

So far, I have concluded my inquiries on Messrs. Carter & Co.'s works. As these gentlemen expressed their willingness to allow their books and pay-sheets to be examined by an officer of this Department, I deputed Mr. Weedon to do this work. The result of his investigations I attach.

The miners at present employed are earning 15s. per day (see R. Stevens' statement), and the rate of wages, extending over a period of twelve months, have ranged from 8s. to 15s. per day, according to the nature of the work and class of workman.

I am satisfied, as far as Messrs. Carter & Co.'s workmen are concerned, that they have been very justly, and even liberally, dealt with, and that there has been no "system of sweating."

I have not concluded my inquiries as to Messrs. Butcher Bros. contract, but hope to do so in a few days.

J. DAVIS,

Supervising Engineer for Sewerage.

Submitted for the information of the Minister. As Messrs. Carter & Co. are looked upon as the *North Shore Sewerage Contractors*, they would be glad if the result of this inquiry, as far as they are concerned, was made public. A further report will be submitted as to the Messrs. Butcher & Co.'s contract, which, from all I know, will not be of such a favourable character.—R.H., 10/2/94. Seen by Minister.—J.B., 19/2/94.

STATEMENT made by R. Stevens (miner), who had just come to the surface after firing:—

I made an average of about 15s. a day whilst working in No. 4 drive—(memo. this work is that given under "Curnow and mates," and this statement agrees with the average there obtained).

I have been working for the last three months in Ernest-street, and our party have made an average of £3 to £3 5s. per week per man.

I also worked in No. 5 shaft last year, and averaged about 10s. per day whilst there.

R. STEVENS.

Witness—S. H. WEEDON, 8th February, 1894.

With reference to the wages paid by Messrs. Carter & Co., I find upon examining their wage sheets that no man has been paid under 8s. per day. The ruling rates per day being:—

For Boys.....	6s. to 7s.	For Plasterers.....	11s.
Ordinary labourers .....	8s. to 9s.	Engine-drivers .....	10s.
Concrete mixers.....	9s.	Minors.....	9s.
Smiths and carpenters .....	11s.	Foreman.....	12s. to 15s.
Bricklayers.....	13s.		

S.H.W., 8/2/94.

No. 81.

Inspector Fowle to Engineer Weedon.

Contract 79, North Sydney,  
19 February, 1894.

Sir,

I beg to report that on several occasions I have had to complain about the time the sandstone concrete is mixed for packing brickwork in shafts. To-day two 20-foot mixings were made up at 2 p.m. at No. 5 shaft. This concrete will not be put down shaft for use till 5.30 p.m. I have instructed Connors (foreman), who has charge of this work, not to have the concrete mixed so long before being used. He states to me that he has to take his instructions from the firm. I saw Mr. Snodgrass last Friday and complained to him about this matter, when he promised it should not be mixed until one hour before it is required to be used. I spoke to Reid (contractors' representative) to-day, and he states that they shall mix the concrete when convenient for themselves.

Inspector Reid informs me that on Saturday last, 17th February, about 1 p.m., at No. 6 shaft, it required half mixing 10 feet of sandstone concrete to finish brickwork packing in shaft. Henderson, bricklayer working in shaft, was on mixing board, and started to assist labourer gauge the stone. Inspector Reid instructed Henderson to use the fork in place of shovel in filling gauge-box, as the stone, which is broken close to the mixing-board, is not free from refuse. Inspector Reid asked Henderson the second time to use fork. Henderson replied that it did not want forking. Connor's foreman came on the scene and said to Henderson, "Go on; do not take any notice of him, he's only a damned big buck navy."

I have, &amp;c.,

G. A. FOWLE,

Inspector.

Correct.—R. G. REID.

When I first observed mixed concrete on the board at mouth of shaft No. 5, and found from Inspector Reid that it would not be used before evening, I pointed out to him that this was too long for it to stand, for though mixed dry, the stone had been soaked with water and the sand wetted by the rain. He told me the matter had been inquired into and settled by yourself and the contractors. I am still of opinion that it is detrimental to the strength of the concrete for the cement to be mixed for hours with the other wetted materials before going into the work. I beg to point out that such friction, as is evident by this report, between our inspector and the contractors' men should be put a stop to at once by removing the offending party from the works, as no satisfactory work can be done under the strained conditions obtaining at present.—S.H.W., 20/2/94. Mr. Davis.

Ask Carter &amp; Co. to see me.—R.H., 31/2/94.

The Engineer-in-Chief decided that Connor was to be removed from the North Shore contract, and that Reid was to leave when the work in contract No. 79 was finished. Inspector Reid is also to go from contract No. 79. I have already instructed Mr. Weedon to let Inspector Reid change places with Inspector Eyre.—J.D., 22/2/94. Mr. Weedon.

Accordingly.—S.H.W., 23/2/94. File.—J.D., 26/2/94.

No. 82.

The Chief Clerk to The Commissioner for Roads.

Main Outfall Sewer, North Sydney—Carter &amp; Co., Contractors.

Public Works Department, Sydney, 24 February, 1894.

The bank fixed deposit receipt for £2,000, held in respect of the above contract, will mature on the 10th proximo.

Should the deposit be renewed, and if the security is to be returned, should it be handed to Messrs. Carter & Co.?

D.C.M'L. (*pro* U.S.)

24/2/94. Mr. Davis.—R.H., 27/2/94.

It will probably be two months before the whole of the work on this contract will be finished, after which there will be the three months maintenance. The contractors might be asked if they wish to renew the deposit (say) for another three months.—J.D., 28/2/94. Engineer-in-Chief.

Deposit should be renewed for three months.—R.H., 28/2/94. Under Secretary. Mr. Mitchell, 28/2/94.

No. 83.

The Under Secretary for Public Works to Messrs. Carter &amp; Co.

Gentlemen,

Department of Public Works, Sydney, 1 March, 1894.

As the bank fixed deposit receipt for £2,000 lodged as security for the due performance of your contract for the main outfall sewer, North Sydney, will mature on the 10th instant, I am directed by the Secretary for Public Works to ask that you will be good enough to inform me whether you wish the deposit renewed; and, if so, for what period?

I am also to request that instructions may be given as to the disposal of the interest which will accrue under the present deposit.

I have, &amp;c.,

J. BURLING,

Under Secretary

Supervising-Engineer Davis to Resident-Engineer Boys.

*Minute Paper.**Subject* :—Contract No. 79.—Extension Shaft at Whaling Road.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 24 April, 1894.

MR. CLARK, M.P., called and asked if the shaft at Whaling Road could not be moved a few feet towards Milson's Point, as it would greatly inconvenience a butcher and others if it were sunk where shown on the drawing. Upon inquiries I find there are no inlets in that shaft, so that it can be moved without any difficulty to 1 m. 32 chains. I understand the contractors were seen by Mr. Clark, and they were agreeable to this alteration. Will Mr. Boys please make the alteration?

J.D.

This shaft has now been set out in new position.—J.W.T. BOYS, 27/4/94. File.—J.D., 28/4/94.

No. 87.

Messrs. Carter &amp; Co. to The Engineer-in-Chief for Sewerage.

Contract No. 79—North Sydney Sewerage.

Sir,

North Sydney, 1 May, 1894.

Some additional work (Ernest-street branch) in connection with the above having been added to the original contract, we have found it impossible to complete the same within the specified time, *viz.*, 10th March, 1894.

We have therefore to ask you to be good enough to extend the date of completion for a period of four months—that is, to the 10th July, 1894.

We are, &c.  
CARTER & CO.

Recommended. It was, of course, never intended to increase the work and not extend the time for completion.—R.H., 2/5/94. Under Secretary. List.—J.B., 3/5/94. Approved by Minister, W.J.L.; order No. 1,826.—D.C.M'L., 7/5/94. J.B. Mr. Hickson, B.C., 8/5/94. Seen. Inform.—R.H., 9/5/94. Mr. Davis.—F.C.P., 10/5/94. Messrs. Carter & Co., 14/5/94. Mr. Boys to note.—J.D., 15/5/94. Noted.—J. W. T. Boys, 16/5/94. File.—J.D. 16/5/94.

No. 88.

The Engineer-in-Chief for Sewerage to Messrs. Carter &amp; Co.

Gentlemen,

Public Works Department, Sewerage Branch, 11 May, 1894.

I have to acknowledge the receipt of your letter of the 1st inst., asking for an extension of four months to enable you to complete your contract No. 79, North Shore Sewerage, and in reply I have the honor to inform you that the Hon. the Minister for Public Works has approved of the extension asked for being granted.

I have, &amp;c.

ROBERT HICKSON,  
Commissioner and Engineer-in-Chief for Roads, Bridges, and Sewerage.

No. 89.

Resident-Engineer Boys to Supervising-Engineer Davis.

Contract No. 79—Ernest-street Sub-main.  
 Department of Public Works, Roads, Bridges, and Sewerage Branch,  
 North Sydney, 9 May, 1894.

The following shows the difference in cost of concrete in Ernest-street sub-main :—

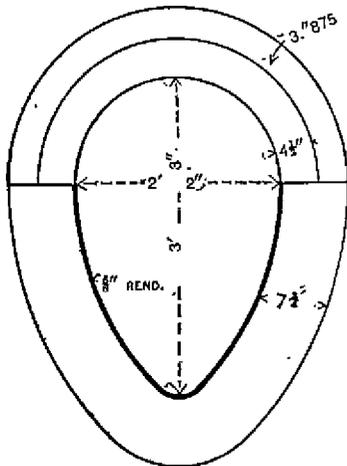

Length of sewer, 590'44 sq. feet.					
(1.) Concrete as per original agreement :—		£	s. d.	£	s. d.
Sandstone concrete, 35'97 cub. yd., 37s. 6d. ... ..		67	8 11		
Bluestone " 88'57 " 56s. ... ..		247	19 11		
				315	8 10
(2.) Concrete as per actual section :—					
Sandstone concrete, 69'54 cub. yd., 37s. 6d. ... ..		130	7 9		
Bluestone " 108'47 " 56s. ... ..		303	14 4		
				434	2 1
(3.) Total difference between agreement and actual section ...				£118	13 3
(4.) Difference between sandstone concrete in (1) and (2) :—					
(2.) Actual section ... ..		130	7 9		
(1.) Agreement ... ..		67	8 11		
Difference ... ..				£62	18 10
(5.) Difference between bluestone concrete in (1) and (2) :—					
(2.) Actual section ... ..		303	14 4		
(1.) Agreement ... ..		247	19 11		
				£55	14 5

J. W. T. BOYS.

The Ernest-street branch sewer was taken by the contractors as an extension to the original contract after the agreement was made relative to the margin to be allowed for lining over the cross-section of tunnel ordered. The difference of the cost of the lining, if it is paid on the basis of the agreement referred to (see 93/1,074), and the actual lining put in is £118 13s. 3d. Will the Engineer-in-Chief please say if the Ernest-street branch is to be paid on the same basis as the main sewer, or treated differently and the actual lining paid for? I consider it would hardly be fair to expect the contractors to take out the small cross-section in Ernest-street with the same margin as the larger cross-section in the main sewer, although I think the margin in very high, viz., an average in the former of 6 inches over what was ordered.—J.D., 9/5/94. Engineer-in-Chief.

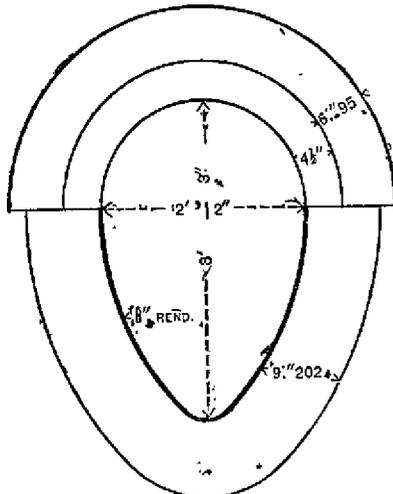

Appd.—R.H., 11/5/94. Mr. Boys to note.—J.D., 11/5/94. Noted.—J. W. T. BOYS, 14/5/94. File.—J.D., 16/5/94.

CONTRACT 79.—ERNEST-STREET SUB-MAIN.

Section as per agreement.

Sandstone concrete .....	1'64 sq. feet.
Bluestone ,, .....	4'05 ,,

Actual section.

Sandstone concrete.....	3'18 sq. feet.
Bluestone ,, .....	4'06 ,,

Length of sewer, 590'44 feet.

## No. 90.

Messrs. Carter, Gummow, &amp; Co. to The Under Secretary for Public Works.

Sir,

Box No. 10, North Sydney, 21 May, 1894.

Having been informed that future payments for work done on contract No. 79, Sydney Sewerage, will be made in cash in lieu of funded stock as heretofore, we have to ask you to be good enough to arrange that we may receive payment in the said funded stock to the amount of £9,000, in addition to that already paid us, we having sold this value of stock in advance, under the impression that our payments in the same would continue.

We are, &amp;c.,

CARTER, GUMMOW, &amp; CO.

Can this be done.—J.B., 23/5/94. Mr. Kirkpatrick. Submitted.—F.K., 23/5/94. The Under Secretary for Public Works.—F.K., 23/5/94. The sale having been absolutely stopped, it cannot be reserved except by Executive authority.—J.S., 23/5/94. Mr. Norrie to see U. Sec. I understand that this matter has been settled.—H.M., 29/5/94. The Under Secretary.—How?—D.C.M'L., 30/5/94. I am told by contractors that special arrangements have been made to let them have the stock applied for.—W.M., 3/7/94. Mr. McLachlan. R.Y.

## No. 91.

Extracts from Votes and Proceedings of the Legislative Assembly.

Votes and Proceedings of the Legislative Assembly, No. 55, dated 30th May, 1894.

- (6.) Sewerage Contract at North Sydney:—Mr. Black asked the Secretary for Public Works,—
- (1.) Is it a fact that the sewerage contract on North Shore is let to Carter and Gummow at schedule price, or about £3 15s. a cubic yard for sinking?
  - (2.) Is it a fact that their employees are paid 10s. per cubic yard for the first 20 feet of sinking and 15s. per cubic yard after that depth is reached?
  - (3.) Is it also a fact that these miners have also to find powder, fuse, candles, &c., while 6d. per week insurance money is deducted and 10 per cent. held back until the completion of the work?

Mr. Lyne answered,—

(1.) The original contract was at a schedule rate; an extension thereof was given at a lump sum, based on the schedule rates of the original contract. There is no item in the schedule exactly corresponding to the amount named by the Honorable Member. The prices, however, range from £3 3s. to £3 18s. per cubic yard, according to the nature of the ground dealt with.

(2 and 3.) I am unable to give any further information on this subject than that contained in my answer to a somewhat similar question asked by the Honorable Member on the 23rd instant.

Votes and Proceedings of the Legislative Assembly, No. 53, dated 23rd May, 1894.

- (9.) Sewerage Contracts at St. Leonards:—Mr. Black asked the Secretary for Public Works,—
- (1.) Is Carter and Gummow's sewerage contract at St. Leonards executed by day-work or sublet?
  - (2.) If the latter, what is the contract price per cubic yard?

Mr. Lyne answered,—I am informed that some portions of Messrs. Carter & Co.'s contracts are sublet, but at what rate I do not know.

## No. 92.

The Chief Clerk to The Commissioner for Roads.

Main Outfall Sewer, North Sydney—Carter &amp; Co., Contractors.

Public Works Department, Sydney, 9 June, 1894.

The Bank fixed deposit receipt for £2,000 held in respect of the above contract will mature on the 10th instant.

Should the deposit be renewed, and if the security is returnable, should it be handed to Carter & Co.?  
D.C.M'L. (*pro U.S.*), 9/6/94.

Mr. Davis.—R.H., 12/6/94. This deposit might be returned conditionally on Carter & Co. making a deposit of £650 on the extension of this contract.—R.H., 13/6/94. Under Secretary. List to return on the conditions named.—J.B., 15/6/94. Approved by Minister, W.J.L.; order No. 2,097.—D.C.M'L., 16/6/94. J.B. Write, 18/6/94. Messrs. Carter & Co., 19/6/94. F.D.R. £2,000 handed to Carter & Co., as per receipt No. A 286,882, 20/6/94; F.D.R. £650 has been received.—W.F.M., 21/6/94.

## No. 93.

The Under Secretary for Public Works to Messrs. Carter &amp; Co.

Gentlemen,

Department of Public Works, Sydney, 19 June, 1894.

I am directed to inform you that the Secretary for Public Works has approved of the return to you of the Bank fixed deposit receipt for £2,000, held as security for the due performance of your contract for the construction of the main outfall sewer, north Sydney, on condition that you lodge security to the extent of £650, in respect of the works in extension of the contract referred to.

I have, &amp;c.,

J. BARLING

(Per D.C.M'L.),

Under Secretary.

329

No. 94.

Inspector Fowle to Supervising-Engineer Davis.

Contract No. 79.

Sir,

North Sydney, 19/6/94.

I beg to report that I have made inspection of main outfall sewer from outlet No. 1 shaft to end of contract No. 12 shaft, and find the following items in connection with the works require attention :—

- Small hollow patch about midway between Nos. 4 and 5 shafts.
- Weep-holes in bottom of all shafts left running.
- Bolts to fasten ladders to holdfasts in Nos. 8 and 12 shafts.
- Flaps to be hung on gas-check at No. 10 shaft.
- Spindle at penstock chamber, bottom of No. 12 shaft works stiff.
- Repairs to asphalt around No. 11 shaft surface.
- Plastering in No. 4 shaft and Ernest-street in progress.

G. A. FOWLE,  
Inspector.

For the information of Mr. Boys. Will he please see that the matters herein mentioned are attended to.—J.D., 20/6/94. Mr. Boys. Noted.—J. W. T. Boys, 20/6/94. Filed.—J.D., 22/6/94.

Contract No. 79.

North Sydney, 10 March, 1894.

## LIST OF WORKS REQUIRED TO BE DONE.

*Bluestone concreting.*

- Inlet chamber from Ernest-street, and top dome at No. 4 shaft.
- Top dome at No. 5 shaft.
- Ernest-street extension.

*Brickwork.*

- From vertical outlet, 9-inch pipe at inlet from Ernest-street to top dome No. 4 shaft.
- Ernest-street extension.

*Rendering.*

- Drop-water cushion chamber, side-walls, out-let at bottoms, concrete column, three intermediate water-cushions, inlet chamber from Ernest-street, and top dome at No. 4 shaft.
- Side-walls, bottoms, and top dome, at No. 5 shaft.
- Bottom and top dome at No. 6 shaft.
- Inlet chamber at No. 9 shaft in progress.
- Dirt-box at top of ventilating pipe, No. 11 shaft.
- Ernest-street extension.

I have tested rendering from No. 1 shaft to down-stream side of No. 4 shaft, and from up-stream side of No. 6 shaft to end of contract No. 12 shaft, three small hollow places, which I cut out between Nos. 1 and 4 shafts.

The bottoms I could not examine, as the sewer has not been properly cleaned out yet, in places where I could examine I found in good condition.

Weep-holes at bottom of all shafts remain running.

Black spots in places will require to be picked out, and plastering repaired.

*Excavation.*

- Between No. 4 shaft and working shaft, Ernest-street, about 45 feet to drive.
- Between working shaft and No. 4A shaft about 8 feet to drive.
- Surfaces around Nos. 2, 3, 4, 5, 6, 7, 8, and 9 shafts require to be levelled off.
- The bolts to fasten holdfasts and ladders at Nos. 4, 8, and 12 shafts will require to be seen to.

G. A. FOWLE,  
Inspector.

I omitted to send this report to Mr. Boys. It was made at the time Mr. Fowle was transferred to Camden-street. Mr. Boys will please see that the matters referred to herein are attended to.—J.D., 15/6/94. Mr. Boys.

Noted.—J. W. T. Boys, 20/6/94. File.—J.D., 22/6/94.

No. 95.

The Council Clerk, North Sydney, to Supervising-Engineer Davis.

Sir,

Borough of North Sydney, Town Hall, 31 July, 1894.

Referring to the conversation between yourself and the Mayor yesterday with respect to the removal of ballast from the sewer shafts at North Sydney, I am directed to request that instructions may be given to the contractor to remove this surplus ballast to such places in the borough as may be pointed out by the Council. This ballast is extremely valuable to the borough, and for some time past the Council has been removing and using it for municipal purposes. This has been done by arrangement with the contractor, the Council being unaware that, in terms of his contract, the contractor had to remove it where directed; and the rates paid by the Council for such removal have been 7½d., 10d., and 1s. 3d. per load.

The Mayor understood, during his conversation with you yesterday, that your department had also paid the contractor for removing it, and if such be the case it would appear reasonable that the Council should be refunded the amount of £123 9s. 4d. which it has also paid for the work.

258—2 T

This

This, however, is not put forward as a claim, but the Mayor will be glad if you can inquire into the matter, and if, upon consideration, you think it a fair suggestion, that you will allow the amount to be refunded to the Council.

Having now ascertained the exact position of the contractor in this matter, the Mayor has directed that no more material be removed at the cost of the Council, and he will feel obliged if instructions can be given to the contractor to remove all such surplus material to places to be pointed out by the Council, and which will be within reasonable distance of the works.

I have, &c.,  
W. BARNETT SMITH,  
Town Clerk.

Register.—J.D., 3/8/94.

On the 30th ultimo the Mayor and another gentleman called upon Mr. Bagge with reference to this question of the spoil, and I was asked to see them. I told them that in accordance with the terms of the contract the contractors (Messrs. Carter & Co.) had to remove the surplus material from the shafts to such places as they were ordered, and that they were paid at the rate of 1s. per cubic yard. I do not see what we have to do with any private arrangement which the contractors may make for its removal. We do not require the spoil, and Carter & Co. have disposed of it as they have thought proper, and I was not, therefore, aware that they were receiving payment from the local Council. The question that now arises is whether the request of the Council can be complied with. We have full power under the contract to ask the contractors to deliver to such places as the Council may point out to us from time to time, and it would not entail any extra cost to us, provided the tip was within half-a-mile of the shaft or open cutting, as the case might be. It will give a little trouble, but I am inclined to think that the Council's request should be acceded to.—J.D., 6/8/94. Commissioner and Engineer-in-Chief for Roads, Bridges, and Sewerage.

The Mayor of North Sydney did call here respecting this matter, when I called Mr. Davis in, and his suggestions I beg now to recommend to the consideration of the Engineer-in-Chief.—C. H. OHLFSEN BAGGE, 6/8/94. Engineer-in-Chief.

#### No. 96.

The Engineer-in-Chief for Sewerage to Supervising-Engineer Davis.

*Minute Paper.*

*Subject* :—Council Clerk, North Sydney—Application for Surplus Material.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 7 August, 1894.

INFORM Council as no application was made for the surplus material, and as it was not required by the Department, contractors were allowed, as is usual in similar cases, to dispose of it as they thought proper, no questions, of course, being asked as to payments for same.

Before contractors can be instructed as to placing material in situations suggested by the Council it will be necessary for the Council to specify the exact spots where the material is required, as the Department will not pay a greater distance than the minimum specified, viz.,  $\frac{1}{2}$  mile.

R.II., 8/8/94.

Contractors and Council Clerk informed, 8/8/94. Mr. Weedon to see.—J.D., 9/8/94. Seen.—S.H.W., 11/8/94. File.—J.D., 11/8/94.

#### No. 97.

The Council Clerk, North Sydney, to The Engineer-in-Chief for Sewerage.

Sir,

Borough of North Sydney, Town Hall, 10 August, 1894.

I am directed to acknowledge the receipt of your letter, dated 8th instant, on the subject of ballast from sewer shafts, North Sydney, and to inform you that a further communication will shortly be made to you, this being merely an intimation that your letter has been received.

I have, &c.,  
W. BARNETT SMITH,  
Town Clerk.

#### No. 98.

The Council Clerk, North Sydney, to The Engineer-in-Chief for Sewerage.

Sir,

Borough of North Sydney, Town Hall, 14 August, 1894.

In reply to your letter, dated 8th instant, with reference to the surplus material from sewer contract in this borough, I am directed by the Mayor to thank you for your attention to the matter, and to request that the material may be deposited at the junction of Arthur-street and Lavender-street, or in Miller-street, opposite St. Peter's Presbyterian Church, subject to the conditions mentioned in your letter.

With reference to the suggested refund of £123 9s. 4d, I am directed to point out that this money was not paid to the contractors, as you seem to consider, but to men specially employed by the Council.

The Mayor will feel obliged if you can, therefore, see your way clear to refund to the Council the amount in question.

I have, &c.,  
W. BARNETT SMITH,  
Town Clerk.

Arthur and Lavender Streets would be within half-a-mile of all the shafts, and Miller-street, opposite St. Peter's Presbyterian Church, also, excepting the shaft in Campbell-street, the material from which could be taken to Arthur and Lavender Streets. The contractors might be instructed to deliver the

331

the surplus material to these places. The Council appear to have made special arrangement with Messrs. Carter & Co., draymen, to deliver the surplus material where they required it. I cannot see what power we have to call upon these men to repay the money to the Council, even supposing it would be advisable to do so, which I very much question.—J.D., 17/8/94. Engineer-in-Chief.

Approved.—R.H., 17/8/94. Mr. Weedon to see that the surplus material is delivered to the places named.—J.D., 21/8/94. Mr. Weedon.

The contractors are stacking the balance of the spoil from tunnel for purposes of refilling. It is doubtful whether there will be any more surplus material on this contract.—S.H.W., 22/8/94. Mr. Davis.

Seen. File.—J.D., 24/8/94.

No. 99.

Resident-Engineer Boys to Supervising-Engineer Davis.

Department of Public Works, Roads, Bridges, and Sewerage Branch,

Dear Sir,

Sydney, 10 August, 1893.

The contractors are ready to concrete chamber at shaft No. 12, 1 m. 2,520 lks. It will be necessary to put in a length of concrete and brickwork up stream from this shaft for the 3 ft. 3 in. by 2 ft. 2 in. section. I propose to put in a 10-foot length on the bottom and step-back, so that the future extension can be properly connected to it. Please say if this is correct.

I am, &amp;c.,

J. W. T. BOYS.

Is the sewer on the up-stream side of this shaft to be altered to a 3 ft. 3 in. by 2 ft. 2 in.? Will Mr. Bagge please say?—J.D., 11/8/93. Mr. Bagge. Yes; 3 ft. 3 in. by 2 ft. 2 in. will be commenced from that shaft.—C.H.O.B., 11/8/93. The proposal will do very well.—J.D., 11/8/93. Mr. Boys. Noted.—J.W.T.B., 31/8/94.

No. 100.

Messrs. Carter &amp; Co. to Supervising-Engineer Davis.

We wired to Hoskins for a 4-ft. by 2-ft. 8-in. gas-check for shaft No. 4, North Shore contract, yesterday and he replies saying it has not been ordered. Would you mind looking into this, as we are practically at a stand-still in that shaft.

J. CARTER.

Leave this gas-check out, and build chamber without it.—J.D., 22/8/93. Mr. Boys. Noted.—J.W.T.B., 31/8/94.

No. 101.

Supervising-Engineer Davis to Resident-Engineer Boys.

Contract No. 79.—Plates required for Shaft No. 8.

Department of Public Works, Roads, Bridges, and Sewerage Branch,

Sydney, 27 September, 1893.

As these two plates shown on drawing No. 10 are all that is required in the way of ironwork, perhaps the best way would be for Messrs. Carter & Co. to provide them, and we will pay through them for them. The weight of the plates will be about 1½ cwt. Will Mr. Boys please arrange and report.

J.D.

Noted. Carter & Co. will supply.—J.W.T.B., -/10/93. 3/8/94.

No. 102.

Resident-Engineer Boys to Supervising-Engineer Davis.

*Minute Paper.**Subject:—Contract 79.*

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 31 August, 1894.

PLEASE register papers and return to Mr. Davis.

J. W. T. BOYS.

Mr. Adams will require these papers when he is checking the quantities for this contract.—J.D., 1/9/94. Mr. Adams.

The quantities have now been checked, and prove to be substantially correct. There is, however, a slight error in excavation in road surfaces at shaft No. 9, which reduces the quantity by 892 cubic yards (see measurement book, page 94). The results of the check calculations will be found entered in the proper column in the measurement book.—W. E. ADAMS, Quantity Surveyor, 13/11/94. Mr. Davis.

Will Mr. Boys please let me have report of present conditions of the work, and generally as to the way the work has been executed, and at the same time a certificate from Council as to road surfaces?—J.D., 20/11/94. Report and paper attached.—J.W.T.B., 20/11/94.

No. 103.

## No. 103.

The Borough Engineer, North Sydney, to The Sewerage Department of Public Works.

North Sydney, 24 November, 1894.

THIS is to certify that the streets along which contract No. 79 has been constructed are in good order and repair.

JNO. HENDERSON,  
Ac. Borough Engineer.

Register and return.—J.D., 24/11/94.

## No. 104.

Resident-Engineer Boys to Supervising-Engineer Davis.

*Minute Paper.**Subject:—State of Contract 79.*

Department of Public Works, Roads and Bridges and Sewerage Branch,

North Sydney, 29 November, 1894.

I BEG to report that this contract is complete, with the exception of two sets of bluestone pitchers—one set for shaft No. 4, Ernest-street; one set for shaft No. 4A, Ernest-street. These two sets were ordered, but were delivered on the Marrickville contract in error.

Two off-let valves were on, but as the valves are made of timber, they swelled, and I had them taken off to be cased and the worm gear cleaned.

The contractors are replacing these to-day, and I will inspect this work when finished.

I think it would have been better for the Department to have put this gear back when the sewer is in use, as I am certain that it will get very rusted if left unused for long.

A little rock excavation has to be done at the outlet at Long Bay. The contractors are doing this.

The work in this contract generally has been faithfully carried out, and is, I think, a credit to everyone concerned.

Attached is the certificate of the satisfactory condition of the streets, from the Borough Council, North Sydney.

The maintenance time for this work expires 10th October, 1894.

J. W. T. BOYS.

I beg to submit statement of final settlement for this contract. The work has been satisfactorily performed. Two manhole covers require to be pitched, but I do not think the final certificate need be kept back for this —J.D., 7/12/94. Approved.—R.H., 7/12/94. Mr. Davis. Accountant.—J.D., 9/12/94. Voucher for £531 10s. 6d. to Treasury this day. Papers may now be filed.—O.C. (*per E.H.*), 13/12/94.

## Contract No. 79A.

### No. 1.

E. M. Clark, Esq., M.P., to The Under Secretary for Public Works.

Sir,

Legislative Assembly, New South Wales, Sydney, 6 March, 1894.

As the portion of the North Shore sewerage works contained in Messrs. Carter & Co.'s contract is now nearly completed, I desire to bring under the notice of the Minister for Works that this work will be perfectly useless until that portion connecting Milson's Point at Jeffrey-street is completed, and to urge upon him the necessity for at once carrying out this part of the work. I may point out that it will serve a very large population, besides assisting to get rid of the offensive matter now finding its way into the harbour through the storm-water sewer at Careening Cove and other places becoming more offensive every day, and a source of very numerous complaints. I understand that Messrs. Carter & Co. having the plant would be able to carry out this work on very advantageous terms, to provide work for a large number of men now employed on their present works, who will otherwise be thrown on an overcrowded labour market by the completion of their present contract. As this work is absolutely necessary to the completion of the North Shore sewerage scheme, I would urge it put in hand at once.

Yours, &c.,

EDWARD M. CLARK.

Commissioner for Roads.—D. C. M'L. (*pro*. U.S.), B.C., 7/3/94.  
Report herewith.—C. H. OHLFSEN-BAGGE, 15/3/94.

For report.—R.H., 9/3/94.

### No. 2.

The Principal Assistant Engineer for Sewerage to The Engineer-in-Chief for Sewerage.

NECESSITY for doing that portion of the North Shore Sewerage Works which connects Milson's Point at Jeffrey-street.

THE present contract, No. 79, comprising a length of 1 mile 25·3 chains, of the main North Shore outfall sewer from Willoughby Bay to junction of Alfred and Mount streets, is the first section of the North Shore sewerage works.

The second section should be "the outlet works," and the third section, which might be proceeded with simultaneously with the outlet works, would be the extension of the main outfall sewer now asked for, from junction of Alfred and Mount streets southward to the junction of Campbell and Jeffrey streets, being (including some minor branches) a total length of about 76·90 chains.

By way of comparison, I have prepared an office estimate of the cost of this extension, according to present prices, amounting, as per detail statement attached, approximately, to £12,831 19s. 6d., and an estimate of the same work in accordance with contract prices of Contract No. 79 of the main outfall sewer in progress, which, as per detail statement attached, amounts, approximately, to £16,307 17s. 8d.

The detail plans of the outlet works are unavoidably very intricate, and it will take at least another month (if no other works come between) to complete the quantities.

The designs of the main outfall sewer extension, between Mount and Jeffrey streets, excepting general plan and section, have not yet been commenced.

C. H. OHLFSEN-BAGGE, 15/3/94.

There is no reason why this extension should not be gone on with at once. I cannot, however, see my way to recommend that it be carried out as an extension of the existing contract, which, at schedule rates, would amount to £16,307 17s. 8d., whereas the office estimate is £12,831 19s. 6d. The greater part of this difference lies in one item, "Excavation in shafts," which, in present contract, owing to their great depth, carries a very high price, viz., 78s. per cubic yard. This Messrs. Carter and Co. are prepared to reduce to 40s. per cubic yard, which would reduce the total cost to £13,700, or about £1,000 above the office estimate. I believe, however, if tenders were invited we could get the work done under the office estimate.—R.H., 22/3/94. Under Secretary. Submitted.—J.B., 28/3/94.

Referring to the Minister's intimation this morning, that he was prepared to let Messrs. Carter and Co. carry out this work as an extension of their present contract, provided they agreed to do so for the departmental estimate of £12,831 19s. 6d., no claims whatsoever to be made for extras, and all payments to be made at the allowed schedule rates. I have had an interview with Mr. Carter, who is prepared, on the part of his firm, to comply with the Minister's decision. Submitted for formal approval.—R.H., 29/3/94.

For approval.—J.B., 30/3/94. Approved.—W.J.L., 30/3/94. Accept.—J.B., 30/3/94.

### No. 3.

The Under Secretary for Public Works to Messrs. Carter & Co.

Sirs,

Department of Public Works, Sydney, 16 June, 1894.

I have the honor, by direction of the Secretary for Public Works, to inform you that your tender, dated this day, is accepted for contract No. 79A Sydney Sewerage Works, at the sum of twelve thousand eight hundred and thirty-one pounds nineteen shillings and sixpence (£12,831 19s. 6d.), subject to the following special condition, viz.:—If it shall be represented to the Secretary for Public Works at any time during the progress of this contract, that an undue number of men are being employed thereon, who have not been domiciled in this Colony for six months previously to such employment, and such allegation be proved to his satisfaction, the Minister shall have the power to call upon you to discharge

any

any or all such men, and on such direction being conveyed to you under the hand of the Under Secretary for Public Works, you shall discharge such men forthwith; and in the event of your non-compliance with any such direction, the Minister shall have the power to declare this contract to be cancelled as if this stipulation had been expressly set out in the cancellation clause of the general conditions relating to this contract.

The work is to be carried out in strict accordance with the several contract exhibits relating to this contract, and to be completed within sixteen months from this date.

The security required on this contract will be a fixed deposit receipt, in favour of the Secretary for Public Works, for the sum of £650.

I have to refer you to the Commissioner and Engineer-in-Chief for Roads, Bridges, and Sewerage, for further information, and to request that you will call upon the Officer-in-charge of Bonds and Contracts at this office, for the purpose of executing the necessary documents for the due observance of your contract.

I am, &c.,

J. BARLING,

Under Secretary.

#### No. 4.

#### Departmental Estimate for Contract No. 79A.

CONTRACT No. 79A.—Extension from Mount-street to Junction of Campbell and Jeffrey Streets, with Branches.

SCHEDULE of Prices referred to on which Progress Payment will be made.

No. of Item.	Description of Works.	Unit.	Rate.
1	Excavation in tunnels, in hard rock, for sewer, branches, pipe sewers, junctions, curves, &c., as specified in clauses 38, 42, 45, 48, to 68, including sub-ducts, timbering, unwatering, and removing the excavated materials beyond actual site of works, as viz. :—	cubic yard	72/-
2	Excavation in hard rock where gadding only is permitted.....	"	63/-
3	Excavation in hard rock, where charges of powder 2 inches in length by 1½ inch in diameter, and such depth of bore-holes as shall be directed, only are permitted .....	"	55/-
4	Excavation in hard rock, where charges of powder 4 inches in length by 1½ inch in diameter, and such depth of bore-holes as shall be directed, only are permitted .....	"	6/-
5	Excavation in shafts, shaft chambers, and sumps, as specified in clauses 39, 52, 53, 71, and 72, including timbering, unwatering, and removing the excavated materials beyond actual site of the works, as viz. :—	"	40/-
6	Excavation in road surfaces, sand, soil, clay, pipeclay, shale, and soft rock only .....	"	34/6
7	Excavation in hard rock, where gadding only is permitted.....	"	30/-
8	Excavation in hard rock, where charges of powder 2 inches in length by 1½ inch in diameter, and such depths of bore-holes as shall be directed, only are permitted .....	"	1/3
9	Excavation in hard rock, where charges of powder 4 inches in length by 1½ inch in diameter, and such depths of bore-holes as shall be directed, only are permitted .....	"	2/-
10	Filling in round brick and concrete work of ventilating and intercepting shafts and chambers, man-holes, and into all shafts as specified in clauses 40, 41, 42, 43, 71, and 72, including withdrawing of timber, depositing in layers, replacing road and other surfaces, ramming, &c. ....	lineal yard	3/6
11	Timber ordered in writing to be left in tunnels, shafts, as specified in clauses 36 and 37, including all iron used in fixing same .....	cubic yard	4/-
12	Sub-duct in hard rock, with tile covers, as specified in clauses 76 and 77 .....	"	30/-
13	Hand-packed stone filling, 4-inch gauge, as specified in clauses 17, 69, 76 to 78, over sub-ducts, and when ordered, round sewers and pipe sewers, in tunnels including depositing, packing, and ramming.....	"	50/-
14	Sandstone concrete, any shape, form, and thickness, in shafts, tunnels, sumps, round stoneware pipes and where ordered in any situation in the construction of these works, as specified, clauses 26, 27, 93 to 109, including washing dry surfaces, wetting and grouting complete.....	"	60/-
15	Bluestone concrete, any shape, form, thickness, arched, circular, or otherwise, in sewer, curved junctions, arches, manholes, &c., as specified in clauses 24, 27, 93 to 109, including washing dry surfaces, wetting and grouting complete.....	squareyard	2/6
16	Brickwork in cement in sewer, shaft junctions, chambers, circular, curved, arched, or otherwise, any shape or form or thickness, as specified in clauses 110 to 113, including wetting, flushing, grouting, collar joints, pointing where ordered, &c. :—	cubic yard	50/-
17	Of one ring or portion of ring .....	"	60/-
18	Cement facing in two thicknesses, ½ inch thick, when finished, as specified in clause 114, to all internal (and external, where ordered) surfaces of sewer, junctions, shaft chambers, culverts, manholes, and where ordered in any situation in the construction of these works .....	squareyard	2/6
19	Bluestone concrete, any shape, form, or thickness, arched, circular, or otherwise, in shafts, over shaft-chambers, as specified in clauses 93 to 109, including washing dry surfaces, wetting and grouting complete.....	"	60/-
20	Brickwork in cement, circular, arched, curved, or otherwise, any shape, form, or thickness, as specified in clauses 110 to 113, in shafts, over shaft chambers, including wetting, flushing, grouting, pointing (where ordered), collar joints, &c., complete .....	squareyard	2/6
21	Cement facing in two thickness, ½ inch thick when finished, to all internal and external surfaces of shafts where ordered, as specified in clause 114.....	"	60/-
22	Providing, laying, and jointing glazed stoneware plain pipes, in trenches and where ordered, including fixing discs as specified, and including bed joints in mortar where required :—	lineal foot	3/-
	12 inch diameter .....	"	2/-
	9 inch .....	"	2/-
SURPLUS MATERIALS.			
21	Removal of surplus materials from the various excavations throughout this contract as tunnels and open trenches, including sub-ducts, shafts sumps, &c., as specified in clauses 40, 42, 43, and 45, as viz. :—	cubic yard	1/-
GOVERNMENT PROPERTY.			
22	Placing, building-in, fixing, and jointing only, any metal work, as cast-iron oval and circular pipes, junctions, branches, flanged and with spigot and faucet ends, gas checks, ventilating grates, lamphole boxes, manhole covers, staples, step-irons, earthenware covers, &c., supplied by the Government, including carriage, as specified in clauses 91, 121, 131 to 133 complete .....	ton	60/-

## AT MESSRS. CARTER AND CO'S. PRICES.

Proposed Contract No. 79, extension from Mount-street to Junction of Campbell and Jeffrey Streets, with branches.

SCHEDULE of quantities and prices for constructing and completing 76.90 chains, more or less, of the main outfall sewer extension, North Shore, branch and pipe sewers, shafts, junctions, &c., subject to omissions, extras, extensions, additions, enlargements, deviations, or alterations, as provided by the conditions of contract at contract No. 79 prices.

The quantities in this schedule are not guaranteed as correct, but are merely given for the guidance of intending contractors, this being a schedule of Prices Contract.

No. of Item.	Description of Works.	Unit.	Probable Quantity.	Rate.	Amount.
	Excavation in tunnels, in hard rock, for sewer, branches, pipe-sewers, junctions, curves, &c., as specified in clauses 33, 42, 45, 48 to 63, including sub-ducts, timbering, unwatering, and removing the excavated materials beyond actual site of works, as viz. :-				£ s. d.
1	Excavation in hard rock, where gadding only is permitted .....	cubic yard	305	63/-	960 15 0
2	Excavation in hard rock, where charges of powder 2 inches in length by 1½ inch in diameter, and such depths of bore-holes as shall be directed only are permitted .....	"	305	61/-	930 5 0
3	Excavation in hard rock, where charges of powder 4 inches in length by 1½ inch in diameter, and such depth of bore-holes as shall be directed only are permitted .....	"	1,220	60/-	3,660 0 0
	Excavation in shafts, shaft chambers, and sumps, as specified in clauses 39, 52, 53, 71, and 72, including timbering, unwatering, and removing the excavated materials beyond actual site of works, as viz. :-				
4	Excavation in road surfaces, sand, soil, clay, pipeclay, shale, and soft rock only .....	"	50	78/-	195 0 0
5	Excavation in hard rock, where gadding only is permitted .....	"	160	83/-	664 0 0
6	Excavation in hard rock, where charges of powder 2 inches in length by 1½ inch in diameter, and such depths of bore-holes as shall be directed only are permitted .....	"	200	79/-	790 0 0
7	Excavation in hard rock, where charges of powder 4 inches in length by 1½ inch in diameter, and such depths of bore-holes as shall be directed only are permitted .....	"	940	78/-	3,668 0 0
8	Filling in round brick and concrete work of ventilating and intercepting shafts and chambers, manholes, and into all shafts, as specified in clauses 40, 41, 42, 43, 71, and 72, including withdrawing of timber, depositing in layers, replacing road and other surfaces ramming, &c. ....	"	750	1/-	89 0 0
9	Timber ordered in writing to be left in tunnels, shafts, as specified in clauses 36 and 37 including all iron used in fixing same .....	cubic foot	700	-/1	2 18 4
10	Sub-duct in hard rock, with tile covers, as specified in clauses 76 and 77	lineal yard	67	-/1	0 5 7

	Total .....	.....	.....	.....	16,307 17 8

**NOTES.**

1. All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in strict accordance with the specification

2. The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

3. Items Nos. 31, 32, and 33 to include the cost of conveying the Government property from the Contractor's Store or Field Office to the various sites of works along line of Main and Branch Sowers, at manholes, gas check, and shaft chamber, &c.

4. Prices for items Nos. 36, 37, 38, 39, 40, 41, 42, and 43 are to be for materials in strict accordance with specification, delivered on the works ready for use, and only the actual net quantities ordered and approved of shall be paid for. In case Contractor's prices are considered too high by the Engineer at the time such materials may be required, or if the Contractor fail to deliver such materials at the time required and ordered, then the Engineer shall have the power to supply the same from any other source, and the Contractor shall have no claim for loss or compensation on account of the exercise of such power by the Engineer.

5. Prices for items Nos. 44, 45, 46, 47, and 48 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work

6. The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, dams, fluming, temporary bridges, roads, pumping, gaskot filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads crossing over main and pipe-sewers, reinstating all road and other surfaces, &c., or any other thing necessary in executing and completing each respective item, in strict accordance with plans and specifications.

## OFFICE ESTIMATE.

Proposed Contract No. 79, extension from Mount-street to Junction of Campbell and Jeffrey Streets, with branches.

SCHEDULE of quantities and prices for constructing and completing 76-90 chains, more or less, of the main outfall sewer extension, North Shore, branch and pipe sewers, shafts, junctions, &c., subject to omissions, extras, extensions, additions, enlargements, deviations, or alterations, as provided by the conditions of contract.

The quantities in this schedule are not guaranteed as correct, but are merely given for the guidance of intending contractors, this being a schedule of Prices Contract.

## NOTES.

1. All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in strict accordance with the specification.

2. The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

3. Items Nos. 31, 32, and 33 to include the cost of conveying the Government property from the Contractor's Store or Field Office to the various sites of works along line of Main and Branch Sewers, at manholes, gas check, and shaft chamber, &c.

4. Prices for items Nos. 36, 37, 38, 39, 40, 41, 42, and 43 are to be for materials in strict accordance with specification, delivered on the works ready for use, and only the actual net quantities ordered and approved of shall be paid for. In case Contractor's prices are considered too high by the Engineer at the time such materials may be required, or if the Contractor fail to deliver such materials at the time required and ordered, then the Engineer shall have the power to supply the same from any other source, and the Contractor shall have no claim for loss or compensation on account of the exercise of such power by the Engineer.

5. Prices for items Nos. 44, 45, 46, 47, and 48 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

6. The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads crossing over main and pipe-sewers, reinstating all road and other surfaces, &c., or any other thing necessary in executing and completing each respective item, in strict accordance with plans and specifications.

## No. 5.

## Agreement executed by Messrs. Carter &amp; Co., with Annexures.

*Minute Paper.*

*Subject* :—Contract No. 79A, Sydney Sewerage Works.

Department of Public Works, Bonds and Contract Branch, Sydney, 22 June, 1894.

The agreement herein duly prepared has been executed by the contractors, Messrs. Carter & Co., and stamped, and might now be forwarded to the Engineer-in-Chief for Sewerage. The tender and all other papers herein are sent herewith.

The Under Secretary.

HAROLD F. NORRIE,

Officer-in-charge.

Mr. Hickson.—D.C.M.L. (for U.S.), B.C., 22/6/94. Messrs. Bagge and Davis to note and return.—F.C.P., 22/6/94. C.H.O.B., 23/6/94. Prepare copies of schedule and three specifications.—J.D., 23/6/94. Mr. Bowes. Bond forwarded to Acc. Roads, 8/8/94.

AGREEMENT made this 20th day of June, in the year of our Lord 1894, between John Carter and David Graham Snodgrass, of North Sydney, in the Colony of New South Wales, contractors, carrying on business together under the name, style, or firm of "Carter & Co." (hereinafter styled or referred to as "the contractors"), of the one part, and Her Most Gracious Majesty Queen Victoria of the other part.

WHEREAS the contractors made the tender hereunto annexed, marked "E," to construct, completely finish, and maintain the various works for Contract No. 79A, Sydney Sewerage Works, in accordance with the supplementary specification, specification, special conditions, and general conditions hereunto annexed and marked respectively "A," "B," "C," and "D," and with the six several drawings relating thereto now in the office of the Engineer-in-Chief for Sewerage. And at or for the price or sum, and within the time in the said tender mentioned. And whereas the said tender was accepted by the said Minister, and such acceptance was duly notified to the contractors on the 16th day of June, 1894 (a copy whereof is hereunto annexed and marked "F"). And whereas the contractors have deposited the sum of £650 in the Bank of New Zealand, Sydney, in the said Colony, in the name of the Under Secretary for Public Works, at interest upon fixed deposit No. A22097, dated the 19th day of June, 1894, for twelve months, and has handed the receipt for same to the said Minister, to be held by him as such Minister, or the Minister for Public Works for the time being of the said Colony, on behalf of Her Majesty, as security for the due performance of this contract, and all other matters and things herein contained, and which, on the part of the contractors, are to be done and performed: Now this agreement witnesseth that, in consideration of the premises, the contractors do hereby, for themselves, their heirs, executors, and administrators, covenant with and to Her said Majesty the Queen, her heirs and successors, that they, the contractors, shall and will perform the various works required in and about the full and proper construction, erection, and completion of the said sewerage works in accordance in all things with the said supplementary specification, specification, special conditions, general conditions, and drawings within the time and at or for the price or sum in the said tender mentioned. And it is hereby agreed and declared between and by the said parties hereto that the said supplementary specification, specification, special conditions, general conditions, tender, and copy acceptance of tender, marked as aforesaid, all being hereunto annexed as aforesaid, shall be read as incorporated in, and forming part and parcel of, these presents in like manner as if the same had been herein written and set forth at length, and that the said supplementary specification, specification, special conditions, general conditions, tender, copy acceptance of tender, and the said drawings, and these presents shall together be taken to be the contract between the said parties in respect of the said works, amplified in manner following—that is to say, that the said general conditions shall at all times be read and construed as if the stipulation contained in the said acceptance of tender as to the discharge of men (not domiciled in this Colony for six months previously to their employment on the said works) employed on the said works when called upon to do so, and the penalty for non-compliance therewith had been expressly set out in the said general conditions. And that the progress payments shall be made at the rates set out in the schedule of prices annexed hereto and marked "G," but that such schedule of prices shall not further or otherwise relate to this contract or the works to be done thereunder.

In witness whereof the said parties to these presents have hereunto set their hands and seals, the day and year first before written.

Signed, sealed, and delivered by the said John }  
Carter, in the presence of,— } JOHNS CARTER.  
HAROLD F. NORRIE, J.P.

## "A."

## CONTRACT No. 79A.—SUPPLEMENTARY SPECIFICATION.

The printed specification attached to this supplementary specification shall be held binding in all matters relating to this contract as far as the Engineer-in-Chief may deem the same applicable.

*Description of Contract.*

The description of contract and clauses 1, 2, and 2A of the specification do not apply, and are to be treated as surplusage.

This contract comprises the provision by the contractor of all labour, machinery, tools, plant, and everything that may be necessary for the construction of the Main Outfall Sewer Extension, from Mount-street to junction of Campbell and Jeffrey Streets, with a branch 33 feet long (excavation only) at Junction-street,

Junction-street, a branch along M'Dougall-street to Brisbane-street, a branch along Willoughby-street to Carabella-street, and a branch to Glen-street, as described in detail in the specification, supplementary specification, special and general conditions, and as shown on the following drawings:—

- No. 1.—General plan and longitudinal sections.  
 „ 2.—Details of shafts and junctions.  
 „ 3.— „ „  
 „ 4.— „ „  
 „ 5.— „ „  
 „ 6.—Details of shafts, junctions, and cross-sections of sewers.

*Working Faces.*

Clause 127 of the specification does not apply, and is to be treated as surplusage.

The working faces available in this contract for excavating and constructing the main sewer and branches, consist in twelve working shafts with two faces each, and four working shafts with one face each.

*Surplus Materials and Surplusage.*

The second paragraph of clause 42 of the specification, and the whole of clauses 4, 47, 76, 77, and 78 do not apply, and are to be treated as surplusage, unless where otherwise directed, and clause 9 of the special conditions and clause 4 of the general conditions shall also be treated as surplusage.

*Dimensions of Shafts.*

Under item 71 of the specification, the 24-ft. x 17-ft. sectional area of shafts does not apply, and is to be treated as surplusage. All shafts to be sunk of the full dimensions and cross-sections shown on drawings and as shall be ordered.

*Numbers of Shafts, Chambers, Junctions, &c.*

Under clause 88 of the specification the numbers of gas-check, inlet, shaft, and junction chambers, shafts, &c., does not apply, and is to be treated as surplusage.

Sixteen ventilating shafts with chambers, three junction chambers, seven inlet chambers at heads of drop-pipes, &c., to be built as shown on longitudinal sections, general plan, and detail drawings, and as shall be directed.

*Symbols.*

The symbols No. 2 in clause 34, No. 7 in clause 49, No. 7 in clause 57, Nos. 1 and 2 in clause 71, of the specification, do not apply, and are to be treated as surplusage.

*Completion of Contract.*

The time allowed for completion in clause 1 of the special conditions shall be read sixteen months.

*Deposit.*

The deposit in clause 6 of the special conditions shall be read as £650 sterling.

This is the supplementary specification marked "A," referred to in our annexed agreement with Her Majesty the Queen, dated the 20th day of June, A.D. 1894.

Witness,—HAROLD F. NORRIS, J.P.

JOHN CARTER.  
D. G. SNODGRASS.

"B."

SYDNEY SEWERAGE, CONTRACT NO. 79A, MAIN OUTFALL SEWER, NORTH SHORE.

SPECIFICATION of the several works required in the construction of the Main Outfall Sewer, North Shore commencing at 0 chains near Long Bay, and extending under private land to Grassmere-street, near the eastern boundary of Cammeray Park, under Cammeray Park to corner of Alfred and Ernest Streets, and along Alfred-street to Mount-street, where it terminates, being a total distance of about 1 mile 25·3 chains; together with shafts, branches, &c., connected therewith, in accordance with the accompanying drawings, with such extensions or omissions at both ends and throughout the length of the contract as may be ordered in writing, viz.:—

*1. Description of Drawings.*

1. Drawing No. 1.—General plan.  
 „ No. 2.—Longitudinal section.  
 „ No. 3.—Details of shafts at Falcon-street.  
 „ No. 4.—Detail of shafts.  
 „ No. 5.— „ „  
 „ No. 6.— „ „  
 „ No. 7.—Cross-sections of sewer, &c.

*2. Extent of Contract.*

2. The works comprised in this contract consist in the necessary amount of earth and rock excavation, puddling, shoring, timbering, under-pinning, centering, scaffolding, unwatering, concrete, brickwork, pipe-laying, carpenter's work, ironwork (with exception of the materials supplied by Government, as set forth in clause 131), pitching, paving, ballasting, metalling, masonry, leading surplus materials to spoil, embankment, &c., required in the construction of the Main Outfall Sewer, North Shore, in tunnels through rock, as shown on longitudinal section, and as shall be directed, with all gas-checks, penstocks, junctions, curves, shafts, inlet chambers, pipe-sewers, ventilating shafts, sub-ducts, road-making, &c., and all other works in connection with those herein enumerated, and the maintenance of the whole of these works for a period of three months after they have been formally taken over by the Engineer.

2A. The contractor must include in his Schedule, rates for excavation, the cost of clearing and forming a temporary roadway from Ernest-street to shaft at 27.5 chains in Cammeray Park; and also the cost of providing a tramway or roadway from the shaft at 0 chains to Long Bay, for conveying the surplus materials from this shaft to the Long Bay.

### 3. Site.

3. Access to the site of the works to be had along its centre lines where such are shown to be along lines of streets, and along all public roads which cross the centre lines of the Main Outfall Sewer, North Shore.

4. Access to shaft in Cammeray Park will be given along a strip of land from Ernest-street, and access to shaft at 0 chains from the Long Bay will also be provided along a strip of land 66 feet wide.

5. For the purpose of sinking, working, and building shafts on lines of streets, and on private ground, when ordered, the contractor to have temporary possession of an area of 24 ft. by 17 ft. over the mouth of each shaft, unless otherwise directed.

6. All areas of strips of land round mouths of shafts hereinbefore referred to, to be set out by the Engineer, to whom written application for their temporary possession must be made by the contractor two weeks prior to the time the said land is required by him.

Such possession, however, not to be exclusive, but subject to the right of entry of the Engineer, his officers, and other persons, carts and horses, &c., required for any purposes of the Government at any time.

7. Any other lands required by the contractor for temporarily depositing materials, erecting winding engines, or for any other purposes in connection with the contract, he will have to procure at his own cost, in strict accordance with clause 6 of the conditions of contract.

8. The contractor shall provide and erect all necessary fences, temporary bridges underneath foot-paths and streets, hoarding-barriers, &c., wherever directed to do so, and all fences, walls, railings, walks, or streets, metalled, grassed, paved, pitched, or asphalted surfaces, to be left by the contractor at the completion of the works in the same order as they were before the commencement of the works, at his sole cost, in strict accordance with the various stipulations and terms contained in clause 41 of this specification, and clause 2 of the conditions of contract, to the entire satisfaction of the city municipal authorities and of the Engineer-in-Chief.

### 4. Lines, Levels, and Setting-out Work.

9. The centre line of sewer is shown on general plan, drawing No. 1, by a full line, which will be marked on the surface of the ground, the same as on plan, as the works proceed.

After setting-out, the centre line of the works is to be preserved solely by reference to the iron nails, pegs, and other marks and signals which may be placed, fixed, and erected for the purpose of these works along its centre line.

The gradients and levels of the works are to be preserved by reference to any bench-marks which the Engineer may deem necessary to establish along the lines of works during the progress of the contract, subject to check and adjustment, as shall be directed, from other bench-marks established beyond the site of the works.

### 5. Materials.

10. All materials, as brick, stone, cement, timber, iron, sand, stoneware pipes, clay, lead, &c., which are to be supplied by the contractor, are to be of the best quality and description of their respective kinds. Samples of each kind to be submitted for the approval of the Engineer, and retained in office; and on approval having been obtained, they are to be delivered on the works ready for use, as per sample.

11. The contractor shall inform the Engineer of the sources whence the various materials are supplied, or of the places of their manufacture, and afford him every facility to inspect their supply or manufacture at any stage of the same.

12. The contractor to make and provide proper and approved gauges or scales for measuring or weighing all materials supplied, whether specified to be broken or delivered to special sizes and mixed together in stated proportions or not.

13. Bricks to be of well-mixed material of approved quality and uniform fineness; to be new, sound, hard, well-burnt kiln bricks, free from cracks and all other defects, truly rectangular, with sharp arrises, of approved dimensions and form; to be specially moulded where required for arching inner and outer rings of sewers and circular or segmental shafts, and equal to sample brick to be seen at the Engineer's office, and which must be sealed by the contractor and acknowledged as a sample of the bricks to be used throughout the works. Bricks used in these works will be subjected to the following tests, viz. :—

- (a) *Tensile strength*.—The tensile strength to be tested, in the departmental testing machine, by laying the brick horizontally on its base of 3 inches, between supports 7 inches apart, and the strain applied across the centre of the brick and distributed over a width of  $1\frac{1}{2}$  inch. An average breaking strain of twelve bricks to be taken, which must not be less than 8,000 lb.
- (b) *Porosity*.—Bricks immersed in water for twenty-four hours must not increase in weight more than 3 per cent.

Should the twelve bricks fracture under the foregoing average strain, or prove more impervious to water than 3 per cent., then the Engineer may reject the whole stack of bricks from which the twelve bricks were taken. The whole of the expense incurred in testing the bricks shall be borne solely by the contractor.

14. In the event of the contractor delivering quantities of bricks on the site of the works for the contract of a mixed description and quality, the officer in charge shall have the power to require of the contractor to have those bricks which in his opinion are suitable for the works picked out and stacked where directed, and those defective or unsuitable removed from the site of the contract; and in the event of the contractor refusing or failing to comply with such request within twelve hours from the time it has been made, then in all such cases the superintending officer shall have the power of rejecting the whole of the bricks so delivered by the contractor.

15. Stoneware pipes to be of well ground and mixed material, of tough, tenacious, impervious quality, well burnt, sound, hard, uniform in thickness, true in section, straight longitudinally, uniformly glazed both inside and outside, free from fire or other cracks, flaws, and ash-holes, the collar perfectly joined

joined to the barrel, and in every way equal to sample pipe to be seen at the Engineer's Office. Paving tiles to be of the same materials as the stoneware pipes, to be uniformly glazed on all sides and of approved size and form.

Pipes to be of the following thicknesses and depth of collar, namely:—

Pipes, inside diameter, 9 in. ; thickness, $\frac{1}{2}$ in. ; depth of collar, 2 in.						
Do	do	12 in. ;	do	1 in. ;	do	2 in.
Do	do	15 in. ;	do	$1\frac{1}{4}$ in. ;	do	$2\frac{1}{4}$ in.
Do	do	16 in. ;	do	$1\frac{3}{8}$ in. ;	do	$2\frac{1}{2}$ in.
Do	do	18 in. ;	do	$1\frac{1}{2}$ in. ;	do	$2\frac{1}{2}$ in.
Do	do	21 in. ;	do	$1\frac{3}{4}$ in. ;	do	$2\frac{3}{4}$ in.
Do	do	24 in. ;	do	$1\frac{3}{4}$ in. ;	do	$2\frac{3}{4}$ in.

All parcels of pipes used in these works will be tested in the departmental testing machine, and submitted to the following crushing strains applied in the centre of the pipe:—

24 inches diameter pipe at 110 lb. per square inch of bearing surface.					
18	"	"	100	"	"
16	"	"	100	"	"
12	"	"	100	"	"
9	"	"	100	"	"

If the Engineer deems it necessary, the pipes will also be tested for porosity. Should the pipes fracture under the foregoing strains, or not prove impervious to water, then the Engineer may reject the whole of parcel from which the pipes were taken. The whole of the expense incurred in testing the pipes shall be borne solely by the contractor, and all pipes injured or broken by the testing shall be immediately replaced by sound pipes, subject to the foregoing tests, at contractor's cost.

16. *Stone*.—All stone used in the construction of these works for pitchers, or masonry, unless where otherwise specified, to be sound, solid, hard sandstone of the best description, free from all defects, and as per sample approved.

17. Broken stone for ballast to be sound, solid stone, as specified in clause 18 ; to be broken to a size to pass freely with its largest dimensions through a ring of  $\frac{1}{4}$  inches in diameter. Broken stone for packing round sewer lining, above drains, &c., to be sound and solid, and obtained from rock excavation, and broken to the same size as ballast.

18. Broken stone for bluestone concrete to be of basalt or other similar hard stone of approved quality ; to be broken by hand or crushing machine, of a size to pass freely with its largest dimensions through a ring of  $1\frac{1}{2}$  inch in diameter ; the whole of the metal to be free from dirt, quarry refuse, &c. ; to be screened through a sieve of meshes  $\frac{1}{4}$  inch apart, and then to be washed with fresh water until approved, before it shall be deemed fit and suitable for these works.

19. Sand to be sharp quartz sand, of approved quality, free from all earthy, loamy, clayey matter, &c., and washed perfectly clean whenever the Engineer deems it necessary.

20. *Cement*.—The cement to be used throughout these works to be well packed in strongly-made casks, to be the best Portland cement, of approved brands and manufacture, delivered in thoroughly sound condition, fit for immediate use, and without requiring seasoning or air-slacking, to be free from any symptoms of staleness, caking, damage to the packing, hard or set lumps ; and no barrel or portion of same to be used until it has been examined and approved by the Engineer. Samples taken from various casks (not exceeding six in number), and mixed together from each parcel brought on the works, to be submitted for testing:—The weight per struck bushel not to be less than 100 lb., and each cask shall contain not less than 387 lb. weight of cement, exclusive of weight of cask and packing. The specific gravity not to be less than 3.10. The cement, when passed through a wire sieve of 2,500 meshes per square inch, to leave a residue of not more than 10 per cent. ; through a sieve of 5,800 meshes, not more than 25 per cent. ; and through a sieve of 14,400 meshes, not more than 40 per cent. The cement when mixed neat with water, to give a tensile strength of not less than 250 lb. per square inch after three days' setting in water, 450 lb. after seven days, and 550 lb. after twenty-eight days. The cement is to be "slow-setting," and when gauged with water to a stiff paste must set in a damp atmosphere of between 60° and 90° F., in from one and a half to six and a half hours. Neat cement of the consistency above mentioned to be made into pats kept in moist air until set, and then immersed in water at a temperature of between 60° and 80° F., and also placed in Faija's moist-heat and warm-bath apparatus at a temperature of 90° F., as to symptoms of blowing, or any alteration or variation of form or volume. The cement when mixed in the proportion of one of cement to three of standard sand (washed, dried, and sifted through a sieve of 400, and retained upon one of 900 meshes per square inch), and about 10.0 per cent. of the total weight of water, to give a tensile strength of not less than 150 lb. per square inch at seven days, and 230 lb. at twenty-eight days, the briquettes having been kept in a damp atmosphere, put in water twenty-four hours after they were made, and left in water at a temperature of between 60° and 80° F. The tensile strength will be ascertained in the departmental testing machine, with the load increasing at the rate of 200 lb. per minute, and the average breaking weight of six briquettes will be taken for each test. Should the sample fail in any or all of these tests, or not show a proper progressive increase in strength with age of briquette, then the Engineer may reject the whole parcel from which the sample was taken, and the contractor shall at once remove the said parcel of cement from the site of the works at his own expense ; failing which, the Engineer may have it removed at the contractor's cost without further notice. Empty casks to be destroyed, as provided in clause 14 of the general conditions. To facilitate the gauging of cement throughout the contract, cement casks will be taken as equal to holding  $\frac{1}{4}$  cubic feet, otherwise the contractor to provide and make approved gauge-boxes, holding exactly  $\frac{1}{4}$  cubic feet, for measuring cement. Cement of a lighter weight than herein stipulated, but otherwise equal to the specified test, may be permitted to be used in the works, subject to the decision of the Engineer-in-Chief, and provided that the deficiency in weight is made up in quantity.

21. *Mortar*.—The mortar to be used in these works to be composed of one part of Portland cement and of two parts of clean washed sharp sand, as described in clauses 19 and 20, the proportion of each to be correctly ascertained by measurement, the whole to be mixed with fresh water, as may be directed, to be well incorporated, and to be used fresh. Any mortar which has become hard or set to be at once rejected. All mortar to be mixed upon approved sawn timber platforms close to where it is required.

22. Special mortar, composed of one part of cement and one part of sand, and prepared as before described, to be provided and used in all portions of the work where especially specified and directed.

23. *Grout*.—The grout to be made of mortar as described in clause 21, to be mixed fluid in tubs close to where it is required, and to be used fresh.

24. *Bluestone Concrete*.—The concrete to be used in these works to be composed of one part of Portland cement, two parts of sand, and four parts of bluestone metal.

25. Special concrete, if required, to be composed of two parts of Portland cement, three parts of sand, and seven parts of bluestone metal.

26. Sandstone concrete, where ordered to be used in these works, to be composed of one part of Portland cement, two parts of sand, and five parts of sandstone (as specified under clause 16) metal, free from dirt, quarry refuse, sieved (as specified in clause 18), washed, and of a size to pass with its largest dimensions through a ring of 2 inches in diameter. All materials to be mixed in the same manner as hereinafter specified for concrete.

27. All concrete to be prepared close to where it is required on a sawn timber plank platform; all proportions to be correctly ascertained by measurement; the metal to be well washed when put on the platform and levelled at top, the sand to be placed in a level layer above the metal, and the cement to be placed upon the sand, after which all materials to be carefully mixed and turned twice over, and then the whole to be mixed with fresh clean water, and thoroughly turned over twice, and oftener if required, until, in the opinion of the Engineer, it shall be well incorporated and fit for the work before it leaves the platform; it shall then be at once conveyed to the works as shall be directed, and to be used fresh.

28. If the concrete is made by machinery, all materials to be prepared as previously described, then to be mixed dry, and afterwards with fresh clean water, as may be directed and as shall be approved of; to be used fresh.

29. Puddle to consist of the best clay to be obtained in the district within a radius of 5 miles; to be carefully turned over and mixed with fresh clean water, as shall be directed, until the clay, in the opinion of the Engineer, has become of one even and uniform colour and plasticity.

30. Hardwood timber to be ironbark, blue or red gum, box, or other approved colonial hardwood, of the best description, sound, straight, free from sap, wanes, shakes, gum veins, cores, or other defects; to have clean sharp arrises, and to be of the fullest dimensions shown or specified; in round timber the diameter given is to be measured at the smallest end, exclusive of bark.

31. *Wrought-iron*.—All wrought-iron work to be of the best description, quality, and workmanship, with square arrises, and of the exact dimensions and forms shown on drawings. All wrought-iron to be double H or BB Crown brand, and all ironwork, when finished, to be heated and then dipped in or coated with gas tar.

32. *Bluestone road-metal*.—The stone used for metalling to be basalt or other similar hard stone of approved quality; to be broken to angular fragments of a size to pass freely with their largest dimensions through a ring  $2\frac{1}{2}$  inches in diameter, and to be free from dirt, quarry refuse, &c.

33. *Bluestone*.—All bluestone used in the construction of these works for pitchers or masonry to be of the best description of basaltic bluestone obtainable, free from honeycomb and all defects, and as per sample approved.

#### 6. General.

34. Earth-borings have been taken along or close to the main line of sewer, the results of which are described on drawing No. 2; but no guarantee is given that the ground to be excavated will be free from subsoil water, or that the proportion of materials will correspond with that shown on longitudinal section.

35. *Diverting surface water and unwatering*.—The prices set forth in schedule accompanying tender for the works comprised in this contract to cover and include the cost of all materials and labour, and everything that is necessary for executing the works of every description required for the proper and effectual deviation of all surface and subsoil drainage from the sites of the works; in constructing temporary coffer or other dams across the low-lying ground above and below the site of the works, in diverting said subsoil and surface water, from time to time, as the progress of the contract may require; in providing and constructing adequate and secure fluming for conducting undisturbedly all freshets across the site of the works on or near lines of lowest ground; in providing and finding all necessary pumping apparatus; in keeping all trenches and excavations constantly unwatered, and in preventing any injury to the same by floods or any other cause.

36. *Shoring, Timbering, and Temporary Bridges*.—During the excavation for sewers, headings, branch sewers, and pipe-sewers, in tunnels, for shafts, junctions, gas-check chambers, curves, crossings over or underneath existing gas, water and sewer pipes, and oval or circular brick sewers, &c., the contractor to adopt every precaution and provide all materials, as planking, strutting, shoring, timbering, &c., and labour, and carefully execute and construct, at his own cost, wherever considered necessary by the Engineer, and to his entire satisfaction, temporary bridges, underneath lines of streets or footpaths, so as to ensure during the period of the contract, the undisturbed traffic along said streets, &c.; and execute approved strong and secure shoring and strutting and underpinning where the sewer passes underneath buildings existing pipes and brick sewers, and in sandy or loose soil close timbering, or any other work that may be required to prevent any buildings over and adjacent to the line of sewer, and all other super-structures, road-surfaces, earth, rock, or other materials at top and sides of excavations from settling, cracking, being shaken, slipping, or falling in.

37. As the works proceed, all shoring, timbering, temporary bridges, &c., shall be withdrawn, except in cases where, in the opinion of the Engineer, the withdrawing of the same is impracticable, or would endanger the safety of the works and buildings, existing pipes, sewers, &c., streets, and other surfaces, over and adjacent to same, when the contractor must obtain an order, signed by the Engineer-in-Chief, to the effect that shoring, timbering, &c., may be covered up, with a statement of the quantities, which shall be measured before being covered up, and paid for at schedule rates.

38. The different materials met with in excavating main outfall sewer and branches, junctions, sub-ducts, &c., in tunnel, as hard sandstone or other rock, to be measured and paid for under items Nos. 1, 2, or 3 of the schedule as "Tunnel excavation in solid rock," subject to the conditions contained in clauses 52 and 53.

39. The different materials met with in excavating shafts and sumps, as road-metal, wood-paving, made ground, sand, shale, ironstone, clay, watercharged in places, pipeclay, soft sandstone (water-charged more or less), sound hard rock, &c., to be measured and paid for under items Nos. 4, 5, 6, or 7 of the schedule as "excavation in shafts and sumps," subject to the conditions contained in clauses 52 and 53.

40. *Removal of road-metal, pitching, and wood-paving, &c.*—Prior to commencing any excavation for shaft, junctions, branch sewer, &c., in open cutting (in accordance with the various stipulations and conditions contained in this specification, and in clauses 6 and 11 of the conditions of contract), the sites for each work to be prepared by the removal of all road-metal, ballast, pitching, wood-paving, concrete, asphalt, flagging, turving, &c., where such occurs, as shall be directed. The materials so removed in the first instance to be laid and stacked aside, as the Engineer may direct, in different spoil-banks; and as the works proceed, the said materials, if approved of, to be used in reinstating the metalled, pitched, and paved road or other surfaces, as the case may be, and those not approved of to be carted away to such places as shall be ordered, and to be paid for as lead.

41. All sods, road-metal, pitching, ballast, wood-paving, concrete, &c., removed under the conditions of the two foregoing clauses, and damaged, injured, or otherwise not approved of as fit for relaying, placing, setting, and fixing in the reformation and reinstatement of the various road and other surfaces, to be replaced by contractor with new, sound, and approved materials of their respective kinds, and therewith to reinstate and maintain, during continuance of contract, the various road and other surfaces, at his sole cost, as provided in clause 8, in a sound and satisfactory manner, in accordance with clause 11 of the general conditions of contract and to the entire satisfaction of the municipal authorities and of the Engineer-in-Chief.

If required by the Engineer the contractor shall, at the termination of the period of maintenance, procure certificates from the municipal authorities concerned, that the roads, &c., in their respective districts are in a satisfactory condition.

42. *All soft or loose soil, clay, soft and hard rock, and other materials* obtained from tunnels, subducts, sumps, shafts, &c., if approved of shall, in the first instance, be put aside in separate spoil-banks beyond the site of the works, subsequently to be used in refilling round and over pipes, and all concrete, masonry and brickwork, and into all excavations, as hereinafter specified, and as shall be directed at the time; and the surplus not so required shall be cleared away and removed by the contractor from the sites of all the works, and from the surfaces, streets, channels, and footpaths surrounding the same, and disposed of by the contractor, or carted to such places as shall be ordered, and paid for as lead.

The surplus material from shaft at 0 chains is to be conveyed to the Long Bay, and deposited and spread below high-water mark, as shall be directed, and paid for under Schedule Item No. 29.

43. *Areas at mouth of shafts.*—It is to be distinctly understood that when sinking shafts on lines of streets, and, when ordered, on private ground, &c., the materials excavated and raised, on their arrival at level of staging above mouth of shaft, are to be at once removed from off the streets or other surfaces, as the case may be; and when building material, &c., are to be conveyed through shafts to the tunnel works, that all such materials on arrival at mouth of shafts must be at once conveyed to the works underground, as permission cannot be given to contractor to disturb and impede the usual traffic in the streets, or the usual occupation of the ground by the owners, as the case may be, beyond the possession for the time of an area not exceeding 24 ft. x 17 ft., or less if ordered, over the mouth of each shaft, unless where otherwise determined and directed by the Engineer-in-Chief during the progress of the contract.

44. *Diversion of sewage of existing sewers during the construction of the works.*—During the construction of the works in general, and of all points of intersection of existing and new sewers, and until completion of all works connected therewith, the contractor to provide all materials and labour and everything that may be necessary; and execute all the works of every description required to prevent (and be solely responsible for) all damage and injury which may occur to private property or to the existing or new works by floods, flooding with sewage, choking and bursting of sewers in consequence of insufficient and inadequate pumping apparatus, tanks, dams, fluming, &c., or any other cause; and erect and construct suitable tanks, pumps, watertight temporary dams across existing sewers, above and below points of intersection, and watertight, adequate, and secure fluming, for the purpose of conveying constantly the whole of the sewage which may flow in said sewers at any time across said points of intersection, at his sole cost, to the entire satisfaction of the Engineer-in-Chief.

45. *Measurement of excavation, refilling, and spoil.*—The excavation throughout these works to be measured the net dimensions only of the various cross-sections shown on drawings, or determined at the time by the Engineer, and, where timbering has been ordered, the net dimensions only to the outside of said timbering. All refilling of above described excavations to be measured the net dimensions of same, less the actual net displacement of the permanent works. The whole of the surplus materials to be measured the actual net excavation less the actual net refilling as ascertained in accordance with the foregoing stipulations.

#### 7. *Main Outfall Sewer, North Shore, in Tunnels, through Rock, &c.*

46. The works comprised under the main outfall sewer, North Shore, in tunnels, through rock, &c., consist in the whole of the works of this contract as enumerated in clause 2, and as shown on drawings, and any details which the Engineer may provide during the progress of the contract.

47. The internal dimensions of the main outfall sewer are—

From 0 chains to 50 chains	...	...	4 ft. x 3 ft.
" 50 " to 1 mile 25-20 chains	...	...	4 ft. x 2 ft. 8 in.

48. The excavation in tunnels, requiring shoring, timbering, and close timbering, the same is to be executed as specified in clause 36, and the unwatering is to be executed as specified in clauses 35, 44, and 60.

49. The cross-sections of sewer in tunnels to be as shown on drawings No. 7, to vary in the quantities and thicknesses of brick and concrete work according to the depths, nature, and solidity of the ground, and position under streets, &c., as shall be directed during the progress of the works.

50. The excavations for the works enumerated in clause 46, to be executed to the various depths, level, or inclined planes, gradients, steps, widths, batters, slopes, curves, longitudinal and cross-sections, &c., as shown on drawings, and any details which the Engineer may provide during the progress of the contract, and to such lesser or greater depths and widths as the Engineer-in-Chief shall direct and approve of from time to time during the progress of the works.

51. Wherever the solidity of the ground permits it, the excavation to be taken out with vertical or curved sides, as the case may be, the net dimensions only of the various cross-sections of the works, as shown on drawings and ordered.

52. *Precaution.*—In all cases at excavations of open trench, and shafts, where rock occurs, and blasting may facilitate such excavations, and in tunnels through rock, the contractor to use every precaution and carry on such operations with such limited charges of powder only, or other approved explosives, as will loosen the rock without shattering the same, and to employ all necessary means, as temporary bridges, staging, chains, rope-nets, fagots, or mats, &c., to prevent effectually and thoroughly all stones and fragments of same, or other materials from being shot or thrown out of said trench, tunnel, and shaft excavations, as he shall be held solely responsible for any accident, damage, and injury resulting from such blasting to any persons, works, or buildings, over the line of sewer or in the neighbourhood of same, &c., and as provided in clause 11 of the conditions of contract under the heading "Liability for Accidents, &c." Blasting will not in any case be allowed between the hours of 10 p.m. and 6 a.m., nor after 1 p.m. on Saturdays, except by the written authority of the Engineer; every hole drilled for blasting purposes will be measured by an inspector, and charged under his supervision, and the work shall be carried on under such further regulations, in conformity with paragraph 7 of clause 14 of the general conditions, as the Engineer may make and shall consider necessary as the contract proceeds.

53. As regards the charges of powder required on the various portions of this contract to loosen the rock without shattering the same, and in order to minimise as much as possible the risk of injuring or damaging buildings over or in the neighbourhood of the line of sewer; it is to be distinctly understood that only powder, or other explosives, of approved quality shall be used, and, when ordered in writing, by the Engineer, in charges of powder not exceeding 2 inches in length by  $1\frac{3}{8}$  inch in diameter, and not exceeding 4 inches in length by  $1\frac{1}{2}$  inch in diameter respectively. If other explosives are permitted to be used, the quantity and weight of such explosives relatively to powder to be carefully ascertained by the Engineer, and the respective charges made equivalent to those used in the case of powder.

54. The schedule of quantities and prices provides for the excavation of this contract being executed as follows, viz.:—

"Tunnel excavation in solid rock," subdivided under items—"Hard rock excavation, where gadding only is permitted." "Hard rock excavation, where blasting is permitted with charges of powder not exceeding 2 inches in length and  $1\frac{3}{8}$  inch in diameter." "Hard rock excavation, where blasting is permitted, with charges of powder not exceeding 4 inches in length, and  $1\frac{3}{8}$  inch in diameter."

Excavation in shafts and sumps, subdivided under items—"Hard rock excavation, where gadding only is permitted." "Hard rock excavation, where blasting is permitted, with charges of powder not exceeding 2 inches in length, and  $1\frac{3}{8}$  inch in diameter." "Hard rock excavation, where blasting is permitted with charges of powder not exceeding 4 inches in length and  $1\frac{3}{8}$  inch in diameter," and "excavation in road surfaces, sand, soil, pipe-clay, soft rock only."

55. No guarantee is given as to the relative quantities of excavation which may be found under the abovenamed items of the schedule in the execution of the work, and they shall be paid for as they occur. The contractor shall not be entitled to claim any compensation for loss or damage in consequence of any alteration, change, increase, decrease, or omission, as the Engineer may order in writing, of any of the respective quantities under the abovenamed items beyond the actual respective rates per cubic yard named in the schedule of quantities and prices for such excavation "in solid rock," with 2 in. or 4 in. charges of powder or no explosives respectively.

56. The excavations for sewer, branches, &c., as before described, may therefore vary from those shown on drawings, but the exact cross-sections will be determined by the Engineer as the works proceed.

57. *A heading of 4 ft. x 3 ft., exclusive of timbering,* to be driven for all lines of pipes. The timbering to be executed as specified in clause 36. In good bearing material, all pipes to be laid on solid ground, as hereinafter specified, after which the open trench or heading, as the case may be, to be filled in with approved earth, as specified in clause 69. In less solid soil, where ordered, the pipes are to be laid and jointed on a layer of concrete 9 inches thick, and then to be surrounded with a concrete relieving arch 9 inches thick, as shown on general cross-section, drawing No. 7.

58. The excavation for tunnels is assumed to be sandstone rock, varying in hardness and solidity, and less compact material. In strong compact rock,  $4\frac{1}{2}$  inches concrete and brick lining will be requisite, and, as the materials occur less compact, two or three rings of brickwork or brick and concrete lining, as shall be determined by the Engineer as the heading proceeds, may be required.

59. The excavations for the tunnels in rock, to be taken out to the exact form of the tunnel, leaving just room for the lining ordered. Great care to be taken in gadding or in blasting the rock, so that no portion of the sides, soffit, or invert of tunnel be removed beyond the exact dimensions determined on. In no case shall the excavation be taken out in advance of the brick and concrete lining in excess of internal dimensions of sewer, until the thickness of the lining of the succeeding length has been determined by the Engineer.

60. All water which, during the progress of the work, may accumulate in these excavations to be properly, effectually, and continually pumped out, and the whole to be kept dry until after the completion, setting, and hardening of all brick and concrete work; and the greatest care to be taken to prevent running water passing over any of the brick, concrete, and pipe-work until it has set perfectly hard; any concrete, mortar, and cement jointing exposed to wash of water must be taken up at once, and replaced by fresh concrete, mortar, and jointing at contractor's expense.

61. Great care to be taken while timbering that no portion of end faces, sides, floor, roof, or front faces of excavation in tunnel, or open trench, as the case may be, be removed, or fall in, beyond the exact dimensions determined on; and the contractor to provide and execute at his own cost whatever may be required to prevent such removal or falling in of the excavation, and the wet or dry material surrounding the timbering from being shaken, running, or forced through the joints of the poling-boards and open spaces between the wedges which keep the poling-boards in position; and to provide and have constantly in readiness, close to where they are required, all appliances and materials such as straw, bags, asphalted felt, tarred gasket, puddle, &c., and with the same carefully and securely close up and pack against the outside of the timbering, all such joints and open spaces wherever they occur; and caulk open joints if so directed; and attend to, execute, and maintain the said timbering till completion of the sewer works to the entire satisfaction of the Engineer-in-Chief.

62. In advancing the end faces of excavation in tunnel, particular precaution to be taken by the contractor that such advance is made in a careful, secure, and safe manner, by means of shoring, planking, poling-boards, props, and wedges, together with all packing and caulking materials.

63. In withdrawing timbering from shafts, the same shall be commenced from bottom of excavation, or as the Engineer may direct, from lowest practicable portion of same, and continued upwards; the contractor to exercise every precaution by means of intermediate shoring, planking, props, &c., and the filling in around and above sewer to be carried on simultaneously with the withdrawing of the timbering.

64. Throughout the excavation and timbering of tunnels and shafts, the contractor to take all due precaution against accidents, &c., during the progress of the works, whether arising from insufficient strength of timbering, bad workmanship, breakage of machinery, and plant, inefficient caulking or packing of open joints and spaces, flood, or any cause whatsoever, as he shall be held solely responsible for all damage, injury, or loss that may be occasioned during the progress of the works to the buildings, bridges, railways, tramways, streets, and other surfaces, above and adjacent to the excavations, to persons employed by the contractor, by Government, or otherwise, and to his own or other works; and the cost of all such damage, injury, and loss, shall be valued at the time by the Engineer-in-Chief (whose decision shall be held final and binding on the contractor), and shall be deducted from any money or security held by the Government, and due to the contractor on account of his contract.

65. If the contractor has exceeded the sectional area of excavation as ordered, in consequence of injudicious timbering, gadding, blasting, slips, falling in of sides of excavation, or any other cause, which in the opinion of the Engineer should have been prevented by careful gadding, blasting, timbering, pumping out water, diversion of water, or by any other means, then the contractor shall remove such extra excavation, and make good and fill in same with concrete described in clause 26, at his sole cost, the actual cubic contents only of the excavation and of the concrete work or brickwork shown on drawings, and ordered for each special length of sewer, shall be paid for.

66. If, under the written authority of the Engineer, any portion of the excavation in tunnel has been enlarged or widened out for timbering or other purposes named in such instructions, then the contractor shall fill in such excess of excavation with concrete or brickwork in the manner herein described, and the extra excavations, concrete, or brickwork so built in, shall be paid for at schedule rates.

67. In all cases where a greater thickness of lining, or a greater cross-section area of tunnel is ordered to be executed, from whatever cause, after the length of tunnel in question has been excavated to the profile ordered in the first instance, the excess of excavation so ordered shall be paid for at schedule rate. If such extra excavation, in the opinion of the Engineer, shall require special timbering and shoring, the same shall be dealt with in strict accordance with clause 36.

68. No concrete or brickwork shall be commenced until the portion of sewer excavation in tunnel to be operated upon has been cleaned and levelled, and until the Engineer has examined and approved of same.

69. *Filling.*—The materials obtained from all excavations to be dealt with as specified in clause 43. The most approved materials, as shall be directed, to be used in filling in the spaces between sides of concrete work of sewer, brick, and pipe-shafts, &c., in level layers, spread 6 inches thick, each layer to be rammed and watered, if directed, until approved of, before the succeeding layer is put on. This filling to be carried up to a height of not less than 5 feet above top of sewer; and the filling from this level round ventilating shafts up to surface of ground, to be carried up in level layers, spread 9 inches in thickness, each layer to be rammed and watered, when directed, until approved, before the succeeding layer is put on. The spaces between the excavation (poling-boards) and the brickwork or concrete of sewer in tunnels, to be filled in, unless where this is directed to be done with concrete, with hand-packed broken stone, as specified in clause 17, or other approved materials, in 6-inch layers, each layer to be well rammed until approved, before the next layer is put on. The filling and packing to be carried on simultaneously with, and as the construction of sewer, brick, and pipe-shaft, &c., proceeds, and as the Engineer may direct at the time. Only iron-shod rammers of not less than 10 lb. weight, of approved pattern, to be used, and one man to be employed in ramming to each man to be employed in filling.

70. *Maintenance of Streets.*—The contractor shall maintain the surface of the roads, streets, &c., where the streets, roads, &c., have been broken up or injured during the progress of the work, during the period of the contract time, and afterwards during the period of maintenance, and shall from time to time make good any sinkings in the surface, and shall provide any additional metal, ballast, or other material that may be necessary during these periods, in accordance with clauses 8 and 41.

71. *Shafts.*—Shafts are to be sunk at the various sites shown on longitudinal section and on general plan, drawings Nos. 1 and 2, or, in lieu of those shown on plan, at such other sites as the Engineer from time to time may determine. Wherever shafts are ordered, they are to be sunk truly plumb, and of the full dimensions, 24 ft. x 17 ft. sectional area (or of such other sizes as may be ordered at the time), clear of timbering; the latter to be provided and fixed wherever considered necessary by the Engineer, in strict accordance with clause 36. On completion of concrete, brickwork, &c., in shafts, the spaces between the rock, and earthsides and outer face of brickwork or concrete to be filled in in 9-inch layers, well rammed (and watered where directed) with materials provided for in clause 42, great care being taken in lowering the materials to the bottom of each respective layer, so that stones do not fall on top or against sides of pipe-shafts, brick or concrete lining, that stones are put in in alternate layers with the earth or clay, and that at least 12 inches of earth be placed nearest and round the brick or concrete lining of pipe-shafts, well rammed.

72. Shafts not required as manholes or ventilators, but ordered by the Engineer, to have, on completion of contract, or when directed, all timber withdrawn; and they are at the same time to be carefully filled in as specified in clause 69, with material provided for in clause 42, the first 5 feet over sewer with specially selected and approved materials. The sinking, filling in, &c., of such shafts to be paid for at schedule rates.

73. *Temporary Shafts.*—If the contractor desires, to suit his own convenience, to sink temporary shafts, they are to be sunk only at approved places, and on completion of work to be filled in, as specified in clause 72, to the satisfaction of the Engineer. The cost of sinking, timbering, unwatering, &c., and of filling in, withdrawing, or covering up timber of such shafts, to be defrayed entirely by the contractor.

All temporary shafts to be sunk of the dimensions specified, or directed, clear of timber.

74. All shafts, temporary, or permanent, to be provided and fitted during their construction and completion, or during the progress of the contract, if deemed necessary by the Engineer, with approved winding engines and steel-wire ropes capable of resisting a strain equal to six times that of the working maximum strain, with cages and such other winding arrangements, ladders, staging, &c., as shall be directed and approved of by the Engineer.

75. *Sumps.*—Sumps are to be sunk at the bottom of every shaft, 6 feet deep below invert of sub-ducts, and on completion of the works to be filled in with concrete, as specified in clause 26. Where shafts are ordered to be sunk, the cost of sinking sump-holes and filling same in with concrete to be paid for at schedule rates, and the removal of the excavated material to be paid for as lead.

Any other sumps which the contractor may think fit to sink on line of sewer trenches for his own convenience during the construction of these works, are to be filled in with concrete, as specified in clause 26, and the cost of sinking, timbering, unwatering, and filling in with concrete and removing the materials, &c., to be defrayed entirely by the contractor.

76. *Sub-ducts.*—Sub-ducts to be constructed, when decided on, along lines of tunnels, commencing on each length midway, or thereabouts, between the working shafts or faces, 33 inches below invert of sewer, branches, &c., or as shall be directed at the time, and having a fall towards each working shaft of such gradients as may be determined at the time, after the thickness of sewer-lining required for each length between shafts or faces has been ascertained and ordered. Sub-ducts of 9 inches, or of a greater or less internal diameter, if directed, to be laid immediately underneath the timber floor of tunnel or open trench, or at sides of sewer, in hardwood boxes varying in size and dimensions as shown on drawing No. 7. Said boxes to be laid straight and true to levels decided upon, and the pipes to be laid therein, upon, and surrounded by sandstone chippings and quarry refuse. Dry stone packing to be put over pipes, as specified in clause 17.

77. In solid compact rock, the sub-duct to be excavated true to cross-section, drawing No. 7, of not less than 9 in. x 7 in. internal dimensions, to be covered with 12 in. x 6 in. x 2 in. paving tiles, laid dry on rock faces prepared and dressed for the purpose. The filling above tiles up to concrete lining of invert of sewer to be executed with dry stones, 4-inch gauge, hand-packed, carefully rammed, and as shall be directed.

78. In disintegrated rock the excavation for sub-duct to be executed as shown on cross-sections, drawing No. 7, and as shall be directed, and the sub-duct to consist of glazed stoneware spigot and faucet pipes of 9 inches internal diameter, more or less, as the case may be. The pipes to be jointed dry, and the filling above same up to underside of sewer, to be of dry stone, hand-packed, as above described. The Engineer may also, if he deems it necessary, order the pipes to be jointed altogether, or in part with tarred gasket, 1½ inch deep, and cement mortar, 1¾ inch deep. The mortar to be prepared of one part cement to two parts of sand.

#### *Rock-boring Machines and Progress of Excavation.*

79. The excavation of the various tunnels to be commenced from not less than twenty-three different faces simultaneously within nine months, unless otherwise directed, after the date the contract has been signed, to be carried on and continued without interruption, by day and night shifts, unless otherwise directed, as specified in clause 51, and to be completed in the most careful and accurate manner. All rock in tunnels to be taken out as specified in clauses 52 and 53, and where blasting is permitted, by means of compressed air, percussive, or other rock-drill, and blowing machines with ventilating fans, &c., complete, of approved pattern and manufacture, capable of excavating at each working face not less than 12 feet length of tunnel during every working week, and of removing the foul air in one minute immediately after blasting at each working face. *If required, all charges to be fired by means of electric fuse.*

80. The excavation of shafts, where sunk in rock, to be executed in the same manner as specified for tunnels in clauses 52 and 53, and by means of the same appliances and machines as those specified to be used at the driving of the tunnels.

81. The whole of the tunnel excavation, with sub-ducts, shafts, sump-holes, &c., to be carried on as hereinbefore specified, in a manner that the total average progress made at all working faces during every day of twenty-four hours, shall not be less than 46 feet length of tunnel excavation complete.

82. *Existing Gas, Water, or Sewer Pipes, and Sewers.*—During the excavation and construction of these works, the contractor is to take every precaution to prevent damage or injury to existing gas, water, or sewer pipes, and sewers. Such pipes and sewers on being met with at sides, over, or crossing the excavations of these works, to be carefully and securely protected and supported, as the case may require, by chains, timbering, strutting, and underpinning, &c., to prevent said pipes or sewers from being shaken, bent, or broken, and the contractor to provide all materials, plant, and labour required for said timbering, strutting, and underpinning, &c., and maintain the same at his sole cost, until, in the opinion of the Engineer, the refilling of excavation and the general progress of the works render further precaution unnecessary. All damage to existing water, gas, or sewer pipes and sewers, to be repaired at once by contractor at his own cost, to the satisfaction of the Engineer.

#### *Sewer.*

83. As the cross-section area of each respective length of tunnel has been determined, excavated, cleaned, and approved, and after the cross-section and depth of trench for each respective length of sewer has been excavated, cleaned, and approved, the egg-shaped sewers, &c., of the internal dimensions specified in clause 46, to be built therein with such pipes and with such concrete and brick-lining, and backing, and walls round pipe-sewers, and of such thickness, as shown on the various drawings referring to each respective length of sewer, and as shall be determined by the Engineer whenever the excavation of sewer in tunnel has advanced sufficiently to enable him to do so.

84. In very wet ground and under buildings the lining of tunnel to be executed of an extra thickness, and in brickwork only with concrete backing where required right up to timbering or rock, as the case may be, as shall be directed.

85. In dry and compact rock excavation the concrete lining to be filled in solid between internal surfaces of sewer (less ½-inch space required for cement rendering) and of tunnel.

86. Under all shafts, when ordered, relieving arches of brick or concrete to be built of a thickness, form, and width as shall be directed at the time of occurrence. Under temporary shafts excavated by contractor for his own convenience, the extra brick and concrete work to be at the contractor's cost.

87. The thickness and description of the lining, whether concrete only, of brick and concrete, or of brick only, required for the different portions of tunnels depends upon the nature of the ground through which they are driven, and shall be determined by the Engineer as the excavation of external cross-section of sewer for each respective length of tunnel advances.

88. Three gas-check chambers, two junction chambers, eleven shaft-chambers for ventilating shafts, one shaft-chamber for ventilating pipe-shafts, eleven ventilating shafts, one ventilating pipe-shaft, six inlet chambers at head of drop pipes, where ordered, spaced as shown on longitudinal section and general plan, and as shall be directed, to be built in connection with these lengths of sewer of concrete, brickwork, freestone, bluestone, stoneware pipes, &c., of the exact sizes, heights, shapes, forms, curves, and dimensions as shown on drawings. All brick shafts to be built, unless where otherwise directed, of 9-inch and 14-inch brickwork and bluestone concrete, with four vertical or battered corners, as the case may be, and curved sides between same, with freestone caps at tops, pierced and prepared for seat of cast-iron frames of ventilating grates, &c.

89. Junctions for branch pipe-sewers, as shown on drawings, to be constructed in concrete, where ordered, to enter the sewers at such level above the invert, with such radius and longitudinal fall as shown, or as shall be determined at the time. All inlet openings of branch and intercepting sewers, unless otherwise directed, to be securely closed for the time being with earthenware, cast-iron, or other covers, set in cement mortar all round, or as shall be directed, and left water-tight.

90. Cast-iron, flanged, circular, or otherwise straight, junction, bent, plain, and faucet and spigot pipes, or other castings, sluice gates, wrought-iron ladders, gratings, &c., gas-check frames, man-hole covers, saddles, stop-board grooves, &c., to be walled and built in, as shown on drawings, at points of intersection, branch junctions, gas-check or other chambers, pipe ventilating shafts, where ordered, &c.

91. Step-irons to be built into side walls of shafts, and anchor bolts for fixing wrought-iron ladders, gratings, and cast-iron frame for gas-check, to be built in as shall be directed. Trapped junction blocks to be built in where ordered and directed. Permanent putlog holes in shapes of reveals, for temporary staging, are to be left in walls of gas-check, shaft-chambers, and shafts where directed; and, in all cases, unless otherwise ordered, the reveals are to be built round of the same thickness of brick or concrete, as shown on walls of shafts or chambers at the places referred to. Putlog holes to be included in the schedule price for brickwork. Stop-board grooves to be formed in concrete, and cement faced, as shall be directed.

92. In the event of it being deemed necessary by the Engineer during the progress of the works (see clause 10 of the Special conditions) to omit, alter, or change any of the shafts, chambers, arches, pipe shafts, and other works connected therewith, and construct and carry out other works of different design and construction instead, or fewer, or additional shafts, chambers, arches, pipe shafts, &c., where ordered in any situation in connection with these works, then the contractor shall be bound to omit or carry out, as the case may be, and execute any such works with the materials and *workmanship* so required at the various schedule rates referring to such items of works, *and as shall be directed and specified hereinafter.*

#### *Concrete Works.*

93. The concrete to be used in foundations of sewer, and in arching and building round stoneware pipes, packing over brick arch in tunnels, where ordered, and in sumps, to be of sandstone concrete of the quality specified in clause 26. The concrete to be used for all other works in sewers, junctions, chambers, shafts, manholes, &c., unless where otherwise directed, to be bluestone concrete of the quality specified in clause 24.

94. The contractor to find, provide, and make at his own cost, all concrete boxes, centres, staging, shoring, planking, &c., of the exact forms, shapes, curves, &c., required, in a proper, secure, and substantial manner, due allowance being made for  $\frac{3}{4}$ -inch thick cement facing over all internal exposed surfaces of concrete work; and great care being taken that all centering and concrete boxes can easily be withdrawn, except where otherwise directed. The designs for centering, concrete boxes, &c., are to be approved by and to the entire satisfaction of the Engineer. After completion of any portion of the concrete or brickwork, the concrete boxes and the centering, as the case may be, shall not be removed until the Engineer or his Superintending Officer has given written permission to that effect.

95. The concrete, after it has been approved of, to be conveyed to the work as may be directed, and as shall be approved of, and tipped into same and upon the surface of each layer from a height not exceeding 18 inches. Commencing at each part of the work at lowest level of excavation, the concrete to be brought up in horizontal and even layers, and on lines of sewer, branch and pipe sewers, junctions, gas-check and shaft chambers, inspecting chambers, &c., unless where otherwise directed, in even layers parallel with specified longitudinal gradients of works; each layer, when spread, to be 9 inches thick throughout before ramming, and, after spreading, to be quickly and evenly rammed all over until approved of, and then allowed time to set before the succeeding layer is put on.

96. After the concrete has been carried up to the level of springing, all concrete arches to be commenced at both walls or abutments simultaneously, and carried on towards centre line in radiating parallel strips, spread 9 inches thick, of the whole width of arch, or in lengths as specified in clause 107, as shall be directed at the time, and rammed as before described, and, where the arch is thicker than 9 inches, the lower layer to be always completed throughout, 12 inches in advance of the upper succeeding layer, and then allowed time to set and harden before the succeeding layer is put on.

97. After completion of the brick closing-arch, all bluestone concrete work above springing of same, at sides of arch, in manhole chambers, gas-check chambers, shafts, &c., to be carried up in the same manner as specified in clause 95, and of exact dimensions, curves, and thicknesses, &c., as shown on drawings.

98. No portion of the concrete work described in the previous clauses (unless otherwise directed in writing) to be covered up with earth or brickwork until it has been examined and approved of by the Engineer. Any leakage that may appear in each layer to be carefully attended to and be made good and repaired at the time, as shall be approved, before each succeeding layer is put on.

99. All end faces of layers of concrete to be stepped back at each respective length of sewer or other work, as shall be directed, to be carefully washed clean with fresh water, and then to be grouted prior to each layer of the adjoining length being commenced and joined on to the same.

100. After the lower layer has set to the satisfaction of the Engineer, its top surface to be carefully washed until approved, and then to be grouted all over prior to each succeeding layer of concrete being put on.

101. In the event of any stoppage occurring to the work, from whatever cause, or in anticipation of rainfall, the contractor, before temporarily stopping work, shall finish it off at whatever level the work may be raised at the time, by thoroughly grouting the whole of the surface with cement grout.

102. In all cases where a layer at mid-day or at evening is left incomplete, the said layer shall not be continued after any stoppage until the surface of the lower and the end of the upper layer have been washed clean and then grouted with cement grout.

103. At the sites of all gas-check and sluice-gate frames, cast-iron manhole covers over stop-boards, branch junctions, and all circular or bent pipes, covers, &c., after the concrete has been built to the exact height and gradient (leaving sufficient space for jointing), the whole of the cast-iron work, after having been washed clean with fresh water, is to be truly laid and jointed or set perfectly plumb or otherwise, as the case may be, and as shall be directed, in the exact positions, lines, and gradients, on fillets of mortar; and as the concrete rises against and around the castings, leaving a space of not less than  $\frac{1}{2}$  inch all round between the concrete and the iron, this space round the invert, or underneath bottom of plates, as the case may be, to be filled in with special grout, or mortar, as shall be directed at the time, whilst above the springing line the outer surface of the castings to be grouted with special grout, and then to be covered with a coat of special mortar,  $\frac{1}{2}$  inch thick, before the concrete is built on to and around said pipes, castings, and frames.

104. All anchor-bolts in connection with cast-iron frames to be placed in the exact positions required, to be washed clean, wetted, bedded upon, and surrounded with special mortar in each case before the concrete is built round same.

105. All stoneware pipes, where they are shown to be, or ordered to be, surrounded with concrete, to be clean washed with fresh water, to be truly laid and jointed in the exact lines and gradients on fillets of mortar, and to be grouted all round with special grout as the concrete is being built all round same.

106. On completion of concrete work, and after the boxes and centering have been removed, the outer faces shall present compact, solid, even, plain surfaces. All faulty portions, cavities, holes, or other defects shall be at once repaired by the contractor, at his own cost, with concrete or mortar, as the case may require, to the satisfaction of the Engineer. The centering shall not be removed until the Superintending Officer has given written authority to that effect.

107. The concrete and brickwork of sewer in tunnel to be commenced, in accordance with clause 79, in the different lengths of tunnels, and to be carried on in each from each end simultaneously, in not less than three continuous lengths of 16 ft. 6 in. each—that is to say, when the arching of the first 16 ft. 6 in. commences the next 16 ft. 6 in. length must be in progress from height of invert up to the springing of arch, the third 16 ft. 6 in. length must be in progress between floor of tunnel and level of invert of sewer, and in the fourth 16 ft. 6 in. length the excavation and timbering of tunnel must at this time be completed and ready to receive concrete foundation of sewer.

108. When a length of arch is completed the same must be protected from the influences of the weather and sun by bags, or other approved means, and kept constantly moist until it has been examined and ordered to be covered up.

109. The whole of the concrete work of branch, pipe-sewers, including all ventilating shafts, chambers, gas-check chambers, junctions, &c., to be completed in strict accordance with specification and drawings, and of the exact shapes, forms, and dimensions shown thereon, and as shall be directed.

#### *Brickwork.*

110. The brickwork required in lining tunnels, branch sewers, sewers in open trenches, and shafts, to consist of the materials and mortar described under clauses 13, 19, 20, and 21. All circular work and arches of shafts, or elsewhere, to be built of radiating bricks, unless otherwise directed. All bricks to be thoroughly soaked in clean fresh water for not less than five minutes, immediately before being used. All work to be built with whole bricks, and all walls in English bond, with  $\frac{1}{2}$ -inch joints, in alternate courses of headers and stretchers, each brick to break joint with the one above and underneath, and to be set full and rubbed in cement mortar. Every course to be carefully and thoroughly grouted, and well wetted before the succeeding course is put on. All work, wherever directed, to be finished on all outside and inside faces with a neatly struck joint. The brickwork of tunnel lining, branch sewers, sewers in open trenches, &c., to be of the thickness, dimensions, curves, and gradient shown on longitudinal and cross-sections, and as shall be determined and directed from time to time by the Engineer as each different portion of tunnel or open trench excavation becomes ready for concrete or brick lining. Wherever brick lining for sewer is ordered, it shall be built in radiating courses in  $4\frac{1}{2}$ -in. rings, each brick to be set full, and rubbed in cement mortar, with joints not exceeding  $\frac{1}{2}$  inch in thickness, in approved bond, the bricks of each course to break joint over the centre of those of the adjoining course. Where the brickwork consists of two or more rings, said rings to be built simultaneously, the lower ring to be always completed throughout  $4\frac{1}{2}$  inches in advance of the upper succeeding layer of each ring of brickwork, to be carefully and thoroughly wetted and grouted, and then covered with a coat of cement mortar, collar-joint  $\frac{1}{2}$  inch thick, to ensure the thorough bonding of the joints and the different rings of brickwork. At completing any length of brick lining, the courses at end of same to be stepped back as shall be directed, and the end face of each ring or course to be well wetted and then grouted prior to each ring of the succeeding length being commenced.

111. The brickwork of sewer in tunnels to be carried on in conformity with clause 107, and in such a manner that when the arching-in of one length of 16 ft. 6 in. commences the lining of invert of the next 16 ft. 6 in. length must commence at the same time, and as the arching-in of one length is completed the adjoining length must be completed up to springing of arch.

112. Wherever concrete is to be built on to and against brickwork, or brickwork on to and against concrete, the latter in each case to be well wetted and grouted, and then to be covered with a coat of cement mortar, collar joint  $\frac{1}{2}$  inch thick, before the concrete or brickwork is built against it.

113. Prior to commencing any concrete or brickwork which has to be built on to and against rock faces, all shaken and loose rock to be removed, all rock surfaces to be well cleaned, washed, and wetted, and all beds, open joints, and spaces between concrete or brickwork and rock faces to be carefully filled in with cement mortar, and flushed and grouted every course as the brickwork proceeds; and the cost of thus preparing rock faces, washing, grouting, flushing, &c., to be included in, and covered by, the Schedule price per cube yard for the concrete and brickwork herein referred to.

114. *Cement Coating*.—The whole of the internal and external surfaces of sewers, man-holes, chambers, &c., where such is shown on plans, and where directed, to be protected by a cement coating, to be put on in two thicknesses, consisting of mortar of one part of cement to two parts of clean sharp sand. The coating throughout, when finished, to be  $\frac{5}{8}$  inch in thickness.

115. *Pymont Sandstone*.—Pymont sandstone ashlar of the quality specified in clause 16 to be provided for top courses of all ventilating shafts, or where ordered in any situation in the construction of these works, to be worked, pierced, dressed, picked to the exact sizes, dimensions, forms, and shapes as shown on drawings or as may be directed, to be set full upon and in cement mortar, and to be finished, when directed, with a neatly cut and struck joint.

116. *Bluestone Ashlar*.—Bluestone ashlar, of the quality specified in clause 33, to be provided in blocks or otherwise, when ordered, in any situation in the construction of these works, to be worked, pierced, grooved, picked, axed, and dressed to the exact sizes, dimensions, forms, and shapes, as shall be shown on detail drawings, or as may be directed; to be washed clean and well wetted before setting, and to be set in the exact positions required, truly level, full upon and in cement mortar, and as may be directed at the time, after which all joints between stones, and between stones and concrete, to be filled in with grout. All joints to be  $\frac{5}{8}$  inch wide, to be carefully raked out  $\frac{1}{2}$  inch deep, and filled in solid with special mortar, neatly pointed, finished flush with exposed faces of stones.

117. *Bluestone Pitching*.—Contractor to provide and find, where ordered, squared bluestone pitchers 9 inches deep throughout, no stone to be less than 9 in. x 9 in. x 9 in., but to be larger and longer, curved and radiating, as shall be directed, to be worked, fitted, and set in sand, one ring round all man-hole covers, with  $\frac{1}{2}$ -inch joints between pitchers and cast-iron frames, as ordered.

#### *Pipe-sewers.*

118. After the foundation layer of concrete has been filled in or the ground excavated, as the case may be, to the exact depths, levels, and gradients (leaving sufficient room for jointing), glazed stoneware pipes of the quality specified in clause 15, and of the required diameter, to be laid thereon, along such lines, curves, and inclinations, as shown on general plan and longitudinal section, as may be ordered at the time, true, straight, and solid (for all vertical branch pipe-sewers and ventilating pipe-shafts, the pipes to be set true, straight, and plumb), and to be jointed, viz. :—

119. The 6-inch pipes with tarred gasket  $\frac{1}{2}$  inch deep after setting, and special cement mortar  $1\frac{1}{4}$  inch deep within socket of pipe; the 9-inch pipes with tarred gasket  $\frac{1}{2}$  inch deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe; the 10-inch pipes with tarred gasket  $\frac{1}{2}$  in. deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe; the 12-inch pipes with tarred gasket  $\frac{5}{8}$  inch deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe; the 15-inch pipes with tarred gasket  $\frac{5}{8}$  inch deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe; the 16-inch pipes with tarred gasket  $\frac{1}{2}$  inch deep after setting, and special cement mortar  $1\frac{1}{2}$  inch deep within socket of pipe; the 18-inch pipes with tarred gasket  $\frac{3}{4}$  inch deep after setting, and special cement mortar  $1\frac{1}{2}$  inch deep within socket of pipe; the 24-inch pipes with tarred gasket  $\frac{3}{4}$  inch deep after setting, and special cement mortar 2 inches deep within socket of pipe.

120. After the tarred gasket has been placed in position and set tight round the pipe, and after the joint above has been cleaned and wetted, stiff cement mortar to be packed in solid, splayed off outside and finished with a carefully struck and cut joint, after which the inner joints between two pipes to be likewise carefully filled with cement mortar all round, neatly wiped off as a finish. Each pipe length when thus finished to be carefully cleaned out before another pipe length is added.

121. All spigot and faucet vertical cast-iron 9-inch and 12-inch diameter ventilating and sewer-pipes to be jointed with well caulked  $\frac{3}{4}$ -inch diameter New Zealand flax spun-yarn and soft pig lead. The spun-yarn to be tightly laid round spigot-end, so as to fill the socket of 9-inch pipe to a depth of 3 inches, and the 12-inch pipe, to a depth of  $3\frac{1}{2}$  inches, after setting up, leaving for the lead joint a depth of  $1\frac{1}{2}$  inch all round for the 9-inch pipe, and a depth of  $1\frac{3}{4}$  inch all round for the 12-inch pipe; the lead joint to be made with one running, and when cold to be set up with proper setting irons to one smooth even plain surface all round the pipe and  $\frac{1}{2}$  inch within socket of same.

#### 8. *Power to get Bricks elsewhere, or substitute Concrete.*

122. Should the contractor, at the commencement or during the progress of the contract, at any time fail to provide the specified bricks in any or in such quantities as in the opinion of the Engineer shall be deemed necessary to ensure the progress of the works as stipulated in clauses Nos. 107, 111, and 128, then in all such cases the Engineer shall have the power to supply the same from any other sources, and all additional costs and charges thereby occasioned over and above the contract prices for brickwork shall be incurred solely by the contractor, who shall only be paid for the net quantity of brickwork actually ordered at schedule rates, less the cost of the bricks so delivered on the works by the Engineer; and the contractor shall have no claim for loss, damage, or compensation on account of the exercise of such power by the Engineer.

123. In the event of the specified bricks not being provided by the contractor, and not being procurable by the Engineer from other sources, at any time they are required in the construction of the works, then in all such cases the Engineer shall have the power, whenever he may deem it practicable and suitable to do so, to substitute concrete instead, as described in clauses Nos. 24 and 26, excepting in the case of the  $4\frac{1}{2}$ -inch brick-lining to intrados of sewer, wherever such are shown on the drawings, which must be adhered to; and the contractor shall have no claim for loss, damage, or compensation, on account of the exercise of such power by the Engineer; and he shall be only paid for the net quantity of concrete so ordered in any situation of the work at schedule rates.

#### 9. *Order of Works.*

124. The contractor shall, immediately after he gets possession of the ground or any part thereof respectively, commence the various works comprising this contract and proceed to execute the same.

125. Contractor shall provide at his own cost and charges (except where otherwise specified) all materials, labour, tools, plant, tackle, cordage, machinery, scaffolding, staging, planking, timbering, centering, concrete boxes, and everything necessary for the proper construction, erection, execution, and completion of the several works comprising this contract, all of which are to be approved before being used.

126. No excavation to be commenced on any portion of the contract, particularly in tunnels through earth, clay, &c., underneath buildings, streets, &c., until, in the opinion of the Engineer, sufficient quantities of timbering, shoring, staging, scaffolding, cement, bricks, sand, or other materials are ready for immediate use, together with the necessary appliances and plant to ensure the speedy and uninterrupted progress and continuance of the works after they once have been commenced at any locality, without any delay or stoppage. Delays and stoppages in the progress of the works, arising from disputes as to the quality of materials and insufficient supply of any materials, plant, &c., and any damage or injury caused to buildings, to the works of this contract, and adjoining or adjacent works and buildings, or streets, tramways, lands, fences, &c., in consequence of such stoppage and delay, and be entirely and solely at the risk and cost of contractor.

127. Working faces—The working faces available for excavating and constructing the main outfall sewer, North Shore, &c., unless otherwise directed during the progress of the contract, are as follows, viz.:—One working face from shaft at 0 chains; two working faces from shaft at 16·05 chains; two working faces from shaft at 27·5 chains; two working faces from shaft at 38·83 chains; two working faces from shaft at 49·88 chains; two working faces from shaft at 61·22 chains; two working faces from shaft at 72·12 chains; two working faces from shaft at 1 m. 2·63 chains; two working faces from shaft at 1 m. 8·5 chains; two working faces from shaft at 1 m. 18·9 chains; two working faces from shaft at 1 m. 19·5 chains; two working faces from shaft at 1 m. 25·2 chains. The shaft at 0 chains will not be available for constructing sewer, only for excavation.

#### *X.—General Progress of Works.*

128. The whole of the works as excavating, tunnelling, unwatering, timbering, with all sub-ducts, sumps, shafts, pipes, chambers, temporary headings, filling, concrete, brickwork, masonry, pitching, road-making, fencing, temporary bridges, carting surplus materials to spoil, &c., required in constructing of the main outfall sewer, North Shore, intercepting branches, and all other works connected therewith, shall be executed as hereinbefore specified, and carried on in a manner as viz. :—

That after the working faces are opened up, the average total progress made during one working week with the sewer in tunnel at all working faces, shall not be less than 276 ft. in length of the main outfall sewer, North Shore, complete, as above described.

#### *XI.—Power to make use of parts of Work.*

129. The Engineer-in-Chief shall have the power, at his discretion, without vacating this contract, to enter upon, by himself or his agents, and make use of any part or parts of the work comprised under this contract, and his doing so shall in no wise be held as a waiver of the responsibility of the contractor in respect to his contract, except in so far as any injury may accrue to such work so entered upon by reason of any proved carelessness of any employé of the Government, in which event the contractor shall be free from liability on account thereof, but not otherwise.

#### *XII.—Maintenance.*

130. The contractor will be bound to maintain the works for a period of three months after their final completion and use by the Government; and if any part should within that period show signs of weakness or of giving way, or should any defective workmanship or materials be detected, the contractor, when called upon to do so, shall make good same at his own cost, to the satisfaction of the Engineer-in-Chief, before the reserve balance will be paid. It is to be distinctly understood that the Government shall have the full, free, and unrestricted use of the said works, without any interference whatever on the part of the contractor, during the currency of this period of maintenance; and such use of the said works on the part of the Government shall not be held as relieving the contractor of any liabilities or obligations whatever in respect of his contract.

#### *XIII.—Government Property.*

131. All iron and other metal work in gas-checks, anchor-bolts, ladders, gratings, landings, platforms, staples, manhole covers, ventilating gratings, lamp-hole boxes, sluice-gate, oval and circular, straight and bent pipes, branches, junctions, step-irons, and all earthenware covers for branch sewer junctions, trapped junction blocks, &c., to be supplied by the Government as the works proceed and when required, and to be delivered to the contractor free of charges within the resumed land, or, if approved of, at the site set apart as the contractor's yard or store.

132. For each article so delivered the contractor shall give a written receipt, after which he shall be held solely responsible for same, and shall refund to the Government, out of any moneys that may be or may become due to him on account of this contract, the cost of anything (as ascertained and valued by the Engineer) that may be lost, stolen, damaged, or destroyed of said articles during the term of this contract and the period of maintenance.

133. All Government property which, at the completion of the contract, by direction of the Engineer, has not been built or permanently fixed in the works, shall be conveyed by the contractor, as may be directed, to the site of the Field Office, and there to be dealt with in accordance with clause 15 of the general conditions.

#### *XIV.—Notice for Inspection.*

134. The contractor shall give notice to the Engineer of the commencement or completion of the undermentioned work, and formally submit it for inspection before proceeding to place, execute, or cover it up, viz. :—

- Excavation of trenches, shafts, and tunnels in rock or earth.
- Excavation for foundations.
- Withdrawing of timber in tunnel, shafts, &c.
- Laying of foundation.
- Laying of pipes or sub-ducts.
- Placing centering in position.
- Keying of arches.
- Striking of centres.
- Shifting of concrete boxes.
- Filling in round branch and pipe-sewers into man-holes, sumps, &c.

*XV.—Conditions of Contract.*

135. The special and general conditions attached to this specification shall be held binding on all matters relating to this contract as far as the Engineer-in-Chief may deem the same applicable.

This is the specification marked "A" referred to in our annexed agreement with Her Majesty the Queen, dated the 20th day of June, A.D. 1894.

Witness—HAROLD F. NORRIS.

JOHN CARTER.  
D. G. SNODGRASS.

## "C."

## SPECIAL CONDITIONS.

*Clause 10 of General Conditions.*

1. The "date of completion of contract" shall be twenty-four months from the date of acceptance of tender—that is to say, the day of , 1893.

*Clause 10 of General Conditions.*

2. The sum to be deducted or set off as or for "liquidated damages," shall be £20 sterling a week.

*Clauses 2, 10, and 18 of General Conditions.*

3. The "period of maintenance" shall be three calendar months from the date of the certificate of the Engineer that all the works under the contract, less those of maintenance, have been fully and satisfactorily completed.

*Clause 18 of General Conditions.*

4. The "rates of progress payment" shall be 90 per cent. of the value of work actually done, performed, and delivered, as the Engineer may approve of as fit and necessary for the work.

*Clause 20 of General Conditions.*

5. The "deposit" to accompany the tender shall be as required by clause 20 of the general conditions.

6. The sum to be lodged with the Under Secretary for Public Works as security shall be a Bank deposit receipt, in the name of the Secretary for Public Works, for £2,000 sterling.

*Clause 2 of General Conditions.*

7. Even after the expiration of the period of maintenance, contractor will still be held liable for all defects in the works which were not visible, or which may have been kept secret, at the time of the works being taken over by the Engineer, since he is, and hereby distinctly agrees to be, *responsible for all faults or neglects of, or all deception practised by, his agent, overseers, or workmen, irrespective of the time at which such faults, neglects, or deceptions may be detected.*

*Clause 3 of General Conditions.*

8. Although the information in possession of the Government has been freely placed at the disposal of the tenderers, by being noted on the drawing or otherwise, the Government undertake no guarantee whatever regarding the kinds of soil that will be met with, or the firmness or stratification of the ground to be excavated, or the amount of unwatering to be done, or the strength of the timbering that may be required, or the nature and extent of other precautions which may have to be adopted.

*Clause 4 of General Conditions.*

9. Contractor shall not be entitled to claim or receive any compensation whatever over and above payment for the actual increase of quantities at schedule rates, and where there are no schedule rates, at such rates as shall be determined at the time by the Engineer-in-Chief, for any additions to, deviations from, or alterations of the various designs comprised in this contract. These conditions shall also apply to, viz., variations in manholes, junctions, flushing chambers, &c., and in consequence of meeting with any existing gas, water, or sewer pipes or sewers, as referred to and in accordance with clause 82 of the specification, the position of which it is impossible to ascertain until the ground for the construction of the works comprising this contract is opened up,—

Variations in inclination of slopes and gradients.

" depth, shape, or size of excavation for sewer, &c.

" depth, shape, or size of concrete of sewers, manholes, junctions, flushing chambers, &c.

" internal diameter of pipe sewers.

" alteration or extension of sewer lines.

Any decrease in quantities to be deducted as provided for.

*Clause 14 of General Conditions, paragraph 6.*

10. Cement is to be brought on the ground in quantities of not less than fifty barrels, provided that this quantity is sufficient for fourteen days' supply, but in no case is less than fourteen days' supply (whatever that may prove to be) to be brought on the ground in one parcel; nor is the supply stored on works to be at any time less than fourteen days' supply.

*Clause*

*Clause 8 of General Conditions.*

11. Suspension of works and non-compliance with clauses 52, 53, 79, 80, 81, 120, and 124 of the specification on the part of contractor shall constitute a wilful breach of contract.

*Clause 18 of General Conditions.*

12. The acceptance by contractor of the final payment shall be deemed equivalent to a distinct declaration on his part that he has no further demands on the Government in respect to this contract.

These are the Special Conditions marked "C," referred to in our annexed Agreement with Her Majesty the Queen, dated the 20th day of June, A.D. 1894.

Witness,—HAROLD F. NORRIS.

JOHN CARTER.  
D. G. SNODGRASS.

"D."

## GENERAL CONDITIONS.

1. *Interpretation of Terms.*

WHENEVER the terms, hereafter explained in the present clause, occur in the conditions of contract in the specification, they shall be held to mean, and shall mean as follows:—

- "Minister" shall mean the Secretary of Works of the Colony of New South Wales for the time being or any other person legally acting for him.
- "Engineer" shall mean the Engineer-in-Chief duly appointed by the Minister to have principal charge of the works.
- "Assistant Engineer" shall mean the person duly appointed by the Engineer-in-Chief to act in his behalf.
- "Superintending Officer" shall mean any person who may from time to time be notified to the contractor by the Engineer-in-Chief as being entrusted with the local superintendence of the works.
- "Overseer" shall mean any person who may from time to time be appointed by the Engineer-in-Chief, to supervise the works or any part thereof under the immediate direction of the Superintending Officer.
- "Contractor" shall mean "Contractors" when two or more persons have tendered or contracted jointly for the work.
- "Special Conditions" shall mean the "Special Conditions" hereto attached and forming part of the contract; such Special Conditions shall be deemed to be, and shall be, incorporated with the General Conditions.
- "Schedule Price" shall mean the rate which the contractor has offered and agreed to execute the kind of work under consideration.
- "Contract Sum" shall mean the sum total resulting from the finally certified quantities, ascertained in the manner provided in clause 16, and calculated at the schedule rates or arranged prices.
- "Drawings" shall mean and include any plan, section, general or detail drawing, sketch, or illustration referring to the works and explanatory of, or supplementary to, the specification.
- "Extra Work" shall mean any kind or description of work not comprised in the "Schedule of Prices," and other than those the distinct mention of which may have been inadvertently omitted in the specifications or drawings and for which provision is made in clause 3 of these conditions.
- "Labour."—All cartage and haulage and work done or to be performed by machinery shall be included in the term "Labour."
- "Plant" shall mean and include all tools, utensils, stores, sheds, timber, scaffold, centres, moulds, templates, coffer-dams, cordage, chains, tackle, boats, punts, rafts, sleepers, rails, waggons, trucks, trollies, engines, water and air pumps, boring and ventilating apparatus, signals, lights, diving bells and dresses, and every other thing necessary for the security, proper execution, completion, and specified maintenance of the several works.

2. *Extent of Contract.*

The contractor shall, except in so far as the specification may expressly state to the contrary, provide at his own cost and expense all labour, material, and plant, and everything else necessary for the proper and complete performance of the contract. Supply of labour, material, and plant.

All works described in, or implied by, the specification, or shown in any of the drawings, or set forth in any lists or tables thereon or attached thereto, as well as those expressly herein provided for under clauses 3 and 4, are to be made and executed in every detail conformably to the several drawings, already prepared, or that may be prepared hereafter for the purpose of this contract, in strict accordance with the provisions of the specification and conditions, both general and special, and to the entire satisfaction of the Engineer. Execution works.

Should any work be not so executed, it shall be at the sole risk of the contractor, and shall be immediately altered and amended at the contractor's cost and expense.

The contractor shall, at his own expense, set out accurately and to the satisfaction of the Superintending Officer, all the works comprised in this contract, in strict accordance with the drawings and specifications, and shall be solely responsible for their being so set out and executed, and that notwithstanding the Superintending Officer or Overseer may have assisted the contractor in setting out the same. Setting out Contractor

Contractor shall also at his own cost and expense at any time—by day or by night, either on working days or on Sundays or holidays—render all such assistance, and supply all such labour, plant, and lighting, as the Engineer or Superintending Officer may require to check such setting out, or to inspect any portion of the works, which must for that purpose be left clear and free from any obstruction or impediment. During and for the performance of those operations contractor shall be obliged to suspend any or all of his work, if required to do so by the Superintending Officer, and without having any claim for loss or damage on account of such temporary suspension.

Protecting and maintaining signals and marks.

All bench marks, pegs and signals on the surface, and all alignments and level marks underground, put in by the Engineer or Superintending Officer for the purpose of checking the contractor's work, will be pointed out to the contractor and confided to his care. He shall, at his own expense, take all proper and reasonable precaution and care to preserve and maintain them in their true positions; in the event, however, of their being disturbed or obliterated by accident or from any other cause whatever, they shall be replaced by the Engineer or Superintending Officer at the contractor's expense, and the cost thereof deducted from any moneys, then or thereafter due to the contractor.

Junction of different Contracts.  
Maintenance.

If two different contractors execute simultaneously two adjoining sections of the works, they shall be held jointly and severally responsible for effecting a proper junction of the sections.

During the whole time of construction and during the "period of maintenance," referred to in clauses 10 and 18 hereof and more particularly described in clause 3 of the special conditions, contractor shall keep and maintain in good and sufficient repair all the works, executed or in course of execution, and make good all injury or loss, which may happen or occur to them, or to any materials, or plant, or anything else in connection with the works under this contract.

### 3. Specification and Drawings.

Specification and Drawings to explain each other.

The specification and the drawings (if any), referred to in the specification, shall be taken to explain each other; and anything contained in the specification or in any of the drawings shall be equally binding on contractor, as if it were contained in all.

Written dimensions to be preferred to scaling.

Any dimensions, written or figured on the drawings, shall usually be taken in preference to measurements by scale; but in cases of doubt in this respect, or in case of any discrepancy between the drawings, specifications, and conditions, or any ambiguity or defective description in them, such doubt, discrepancy, ambiguity, or defective description shall not invalidate the contract, but shall be rectified by the Engineer if he deem it requisite, and the contractor shall have no claim for compensation for damages on account of such discrepancy, ambiguity, or defective description.

Omission of minor parts.

If neither specification nor drawings contain any mention of minor parts or works, which are reasonably and obviously necessary for the satisfactory completion of the works, such parts are to be provided, made, and executed by the contractor, without any extra charge, as if they were specially mentioned, and shall be deemed to be, and hereby are, included in the several schedule prices.

Errors of information at Contractor's risk.

It is hereby expressly understood, that the contractor is bound to completely and thoroughly inform himself of every circumstance connected with, or relating to, the work, and of the correctness or otherwise of any information contained in, or supplied by, the drawings or specification, as he shall have no claim on account of any errors, omissions, or inaccuracies, that may be found in those documents after the contract shall have been signed, and since he has to provide in his tender for every contingency that may arise.

Supply of Drawings and Specifications.

A copy of the conditions, specifications, and drawings will be furnished to contractor free of charge, but he must himself compare the same with the original, as no claim will be allowed for any errors therein.

All copies of drawings, &c., supplied to contractor are to be returned to the Engineer on completion of contract.

### 4. Increase or Decrease of Works.

Quality.

The contractor is to execute in like manner and with the same quality of materials, as provided for the works, expressly mentioned in specification and drawings, any extensions, additions, deviations, alterations, or extra works, which the Engineer may require by an order in writing.

Quantity.  
Prices of extra works.

The work, executed under this clause, will be measured up and paid for at schedule rates in the same manner as provided for the other works under this contract; and if it comprises any work not specified in contract and in schedule of prices, a special agreement shall be made between the Engineer and the contractor, and signed at the time of giving the order for such work.

If value cannot be agreed upon.

In case the above-named parties shall be unable to agree on the value of such extra work, the Engineer shall be at liberty and fully authorised to have it executed by whomsoever he may think fit.

No extra work, extensions, or any additions, deviations, or alterations whatever, which may be claimed by contractor, will be recognised or admitted under any circumstances, if done or executed without, or contrary to, an order in writing from the Engineer as aforesaid, and the production of such order shall be a condition precedent to contractor receiving payment for them.

Omission of portion of the work.

The Minister, or the Engineer, acting on his behalf, may from time to time by writing under his hand require the omission of any particular portion or part of the works, described in the specification or shown on drawings; and the contractor shall have no claim for loss or profit, sustained damage, or other compensation on account of any such omission.

### 5. Possession of Lands.

Lands to be provided by the Minister.

The Minister shall, within one month from the date of the signing of the contract by the contractor, put the latter in possession of such parts of the land, required for the execution of the permanent works or access to same, as in the opinion of the Engineer may be necessary for their commencement. And the Minister shall also from time to time put contractor in possession of such other parts of the land, as may, in the opinion of the Engineer, be necessary for the vigorous prosecution and timely completion of all the works.

Land to be provided by Contractor.

The contractor must, however, procure for himself all other land, which he may deem requisite for any temporary purposes or for his own convenience; but the Minister will, at the expense of the contractor and only to the extent of any legal powers possessed by the Governor or Minister, assist the contractor in procuring such land or in procuring materials, suitable for the construction of the works, from any adjoining lands.

Should

Should any delay take place in giving to the contractor possession of any land required for the construction of the works aforesaid, such delay shall not be deemed a breach of contract, or give contractor any claim for compensation, but the contractor shall be entitled to a commensurate extension of time for the completion of the whole works. Delay in getting possession.

Nothing herein contained shall at any time prevent the Minister or any person duly authorised by him from entering upon and making use of such lands or any portion thereof for any purpose whatever. Possession not exclusive.

#### 6. *Trespass.*

The contractor shall not enter upon any lands outside the limits of the lands, defined by, and held in possession by him under clause 5 hereof for the construction of the works or for any purpose whatever in connection with this contract, without the distinct consent in writing of the occupier and owner of such lands, and shall not, without the permission in writing of the Engineer or Superintending Officer, remove any trees or structures within the limits of the lands defined in said clause 5 hereof. Private lands.

Nor shall he open or throw down any part of a fence without making sufficient provision by temporary fences, gates, or other necessary accommodation, to be erected and maintained at contractor's cost, for preventing persons or animals from trespassing or straying from, or into, any enclosure, affected thereby. Cutting of trees.

Nor shall he interfere with any private or public road without making proper temporary provision for the convenience of owners or users thereof. Roads.

Any costs or damage incurred by the Government through any legal process on account of any trespass caused by the act or negligence of the contractor or his workmen, shall be considered as payment made to the contractor under this contract, and shall be deducted accordingly at the time of final payment to him. Damage caused.

Should the contractor refuse or neglect to erect and maintain, either or both, any such temporary fences or other necessary accommodation, it shall be lawful for, but not obligatory on, the Engineer, after having given to the contractor twenty-four hours' notice in writing of his intention to do so, summarily, and without further process, to cause any such temporary hoarding, fences, gates, bridges, or other accommodation to be erected and maintained, which he may deem necessary for the proper protection either of such lands or of the adjoining lands, or for the safety of the property of the owners and occupiers thereof or of the general public, and the cost of so doing shall be deducted as provided hereinabove. If not fenced by contractor, Engineer to have power to do so.

#### 7. *Sub-letting, Assigning.*

The contractor shall not sub-let any portion of the works, nor enter into any sub-contract for the execution thereof or any portion thereof, nor shall he assign all or any of the moneys payable or to become payable under the contract, or all or any part of any other benefit whatsoever arising to him or which may arise under the contract, without the consent in writing of the Minister; and no assignment without such consent shall have any effect or be in any way recognised. No sub-letting or assigning.

#### 8. *Progress of Works.*

It shall be lawful for, but not obligatory on, the Engineer or Superintending Officer to direct in writing the contractor to carry out the works in such order and in such manner as he shall deem fit; and If the contractor shall fail to make such progress with the works as the Engineer or the Superintending Officer shall deem sufficient to insure their completion within the specified time; or If he refuse or fail in the opinion of the Engineer or Superintending Officer to use due diligence in carrying out any particular part of the work, which the Engineer or Superintending Officer shall have directed him in writing to carry out forthwith; or If he shall use or employ bad or insufficient material, or shall execute any work in an imperfect manner or not to the satisfaction of the Engineer or Superintending Officer; or If he shall fail or neglect to take down or remove such work, or to rectify any such work for seven days after being required to do so in writing by the Engineer or Superintending Officer; or If he shall fail to employ what in the opinion of the Engineer or Superintending Officer is a sufficient number of men on the works; or If he shall suspend work without the Engineer's order or sanction in writing; or Work to be carried out under the direction of the Engineer.

If the contractor shall in the judgment of the Engineer commit a wilful breach of the contract; Then, and in any of such case, it shall be lawful for the Minister to do at his option any of the following things, that is to say:—

(a) The Minister or the Engineer may, on giving written notice to the contractor of his intention so to do, forthwith cause additional men to be employed and additional materials and plant to be purchased, and the cost of so doing may be deducted from any moneys, then due, or which may thereafter become due to the contractor. (a) employing additional men.

(b) Or the Minister may, by notification in writing under his hand, delivered to the contractor, absolutely determine this contract without further process; and from and after the delivery of such notice as aforesaid, the contract shall be absolutely determined, and on such determination the money, which shall have been previously paid to the contractor under the contract, shall be deemed to be the full value of the work executed, and shall be taken and accepted by the contractor in full payment and satisfaction of all claims and demands under the contract; and the balances retained, including amount deposited as security, together with all materials and plant, then being in or near or upon the works for the purpose of being used or employed in or about the same, shall remain the absolute property of Her Majesty, and may be disposed of as the Minister may think fit. (b) absolute determination of contract.

#### 9. *Bankruptcy.*

If the contractor shall become bankrupt or insolvent, or shall make an assignment of his estate for the benefit of his creditors, it shall be lawful for the Minister, on behalf of Her Majesty, by notice in writing under his hand, to determine the contract by such notice, and for Her Majesty either to carry on the works under the Engineer's direction or to recontract with another contractor to proceed with and complete Bankruptcy.

complete the same upon such terms, stipulations, and conditions as shall be deemed expedient by the Minister; and all the then remaining materials and plant may be used in and applied for the purpose of the works; and on the final completion of the works the surplus of such materials and plant shall be delivered to the contractor's assignees or trustees, but without any payment or allowance for any loss or diminution, wear, tear, or injury they may have sustained in the meantime; and any losses, damages, costs, or expenses which shall, in the opinion of the Engineer, have been sustained by Her Majesty by reason of the premises, shall be deducted from the deposit money and the balance retained after payment of the progress payment; and the residue of such deposit money and percentages (if any), or any securities in which the same may be invested (but without any interest thereon), shall belong and be paid or delivered to the said assignees or trustees; and if there should be no residue, but a deficiency, the amount of such deficiency may be proved for as a debt against the estate of the contractor.

#### 10. *Suspension and Completion.*

Completion

The whole of the works under this contract shall be completed on or before the day set forth in clause 1 of the special conditions as the "date of completion of contract," and formally delivered up to the Engineer in perfect order and repair, and to his entire satisfaction.

Extension of time.

In the event of any alterations, deviations, additions, or extra works being required to be executed by contractor, or in the event of any delay arising under this clause, or under clauses 5 and 15 hereof, the Engineer may allow such an extension of time (if any) as he shall think adequate for the proper carrying out of such alterations, deviations, additions, or extra works, or for the delay caused (if any).

Liquidated damages.

The Minister, on behalf of the Queen, shall be entitled to deduct or set off for each and every week's delay after the date mentioned as the date of completion of contract, or after the expiration of the "extension of time" (if any) allowed under this clause, as and by way of liquidated damages, the sum mentioned in clause 2 of the special conditions.

Such damages shall be deducted from the final balance and the cash security lodged by the contractor in accordance with clause 20 of these conditions and with clauses 5 and 6 of the special conditions, or at the option of the Minister, from any other moneys payable to the contractor under this contract.

Suspension.

On receiving a written notice to that effect from the Engineer, contractor shall suspend the whole or any portion of the works, as may be directed in such notice. He shall have no claim for loss or damage on this account, unless the suspension exceeds one month, and such suspension shall in no wise vitiate the contract, but a commensurate extension of time for completing the works will be granted to the contractor.

Testing.

When, in the judgment of the Engineer, the whole of the works appear to be completed, they shall be tested or examined as may be provided in the specification; if the result of the test or examination be satisfactory, they will be formally taken over by the Engineer, who will issue a certificate to that effect, whereupon the period for maintenance shall begin.

Maintenance.

#### 11. *Safety of Works and Persons.*

Reinstating defects.

Contractor shall be liable for the reinstating or making good of any thing whatsoever which may be removed, displaced, damaged, or destroyed during the performance of the works, or by reason of the same; and he shall also be solely responsible for all defects to, and failures in, the works during the whole time of construction and the period of maintenance, whether the said defects arise from insufficient foundations, defective construction, bad materials, or any other cause within the contractor's control, or from the inclemency of the weather, landsprings, or similar cause.

Hoardings, roads, &c.

Contractor shall also provide and maintain all hoarding-barriers, night-lights, and properly-ballasted temporary roads required by any municipal or other authorities having charge or control of streets or roads, or which may be required for the convenience or safety of the public; and he shall also make all arrangements by temporary roads or bridges or otherwise, which may be required by any local authorities or by the Engineer, to prevent stoppage or delay of public traffic or any avoidable inconvenience to the public.

Liability for accidents, &c.

During the whole time of construction of the works, and during the period of their maintenance, contractor shall be liable for any accident, damage, or injury whatsoever to the public or to any individual, which may be caused by his operations or his neglect, and also for the safety of any adjacent roads, streets, cellars, vaults, pavements, walls, houses, buildings, or other structures, and shall be bound to erect, fix, secure, or remove any scaffolding, timbering, &c., as occasion may require or when ordered by the Engineer to do so; and in case of emergency or probable danger to life or property the Engineer, without notice to contractor, may provide or employ, at contractor's cost, such labour, materials, and plant as may be necessary to meet the exigency, of which the Engineer himself shall be the sole judge. All such cost to be deducted from any sum then or thereafter due to the contractor under this contract.

No opening is to be made in any street until a sufficient quantity of approved material and plant are on the ground to complete the length to be opened. Should any delay or dispute arise as to the supply of any material, the Engineer shall have power to direct any opening made to be filled up and the surface restored at contractor's cost, amount to be deducted from any money due to the contractor.

#### 12. *Agency, Notice, Right of Entry.*

Agency.

When the contractor is not personally present on the works he must at all times during their progress have a responsible agent on the ground, who shall be deemed to be, and shall be, authorised to represent him for all purposes of this contract.

In case the contractor or his responsible agent shall not be immediately available at any point of the works, the instructions given by the Engineer, in writing, to any overseer, foreman, or workman employed on the works by contractor, shall have the same effect as if they were given to the contractor or his authorised agent.

Delivery of notices.

Any written instrument or notice to be given or delivered to the contractor under this contract shall be deemed to have been so given or delivered when it is given or delivered to the contractor or his representative on the works, or left at the contractor's usual or last known place of abode or business.

Entry on work.

The Engineer and any other person duly authorised by him shall have power at all times to enter upon all or any portion of the works; and to travel by any engine, lift, cage, carriage, truck, trolley, or other vehicle which the contractor may be using on, or near, or in connection with the works; and to make examination

examination of any work, fixed or unfixed, or in any state of progress, and of any materials or plant in use or intended to be used for the purposes of this contract; and the contractor shall give or afford facility for the exercise by the Engineer and other duly authorised persons of the powers given under this clause, and shall for that purpose cause the motion of any vehicle, engine, or other machinery to be arrested when requested so to do.

Due notice shall be given by contractor to the Superintending Officer or overseer before any piles are swung and commenced to be driven; on the completion of all excavations for foundations, or otherwise, and before any foundations are laid therein; when foundation rings for wells are to be laid, or cylinders to be sunk, and before the sinking commences; before the filling in of the wells, cylinders, or other structures, or of sewer or pipe trenches is proceeded with; before centres are struck; before and after tunnel soles are laid; and at such other stages of progress of the works as may be specially directed in the specification. Progress notice.

### 13. *Dismissal and Mode of Payment of Men.*

The Engineer or Superintending Officer may, for incompetency or misconduct, or inattention to orders, or other sufficient cause, require the dismissal within twenty-four hours by the contractor of any agent, overseer, foreman, workman, or other person employed by him on the works; and in the event of the contractor refusing or neglecting to comply with such requisition all further payments on account of the contract may be stopped until such dismissal is carried out. Dismissal.

The workmen, tradesmen, and labourers of every class or kind employed on the works under this contract shall be paid their wages or other earnings in full in money, current coin of the Colony, at least once in every fortnight, and no ticket or other system of payment by goods of any sort, provisions, or liquor will be allowed on any pretence whatever. Cash payment.

Nor shall the contractor or any person employed by him, or in any way connected with him, establish any shop for the supply of liquors, provisions, or goods, nor shall the contractor cause or oblige his workmen to take their necessaries or goods of any kind from any person in particular. Truck system.

The workmen or labourers of every kind or class shall be paid on the works (if it be possible) or in some building adjoining; and in no case shall they be paid at a public-house or other place where spirituous or fermented liquors or refreshments are sold.

Before the payment of any money to the contractor, the Minister may require from the contractor a statutory declaration that the tradesmen and labourers of every kind employed on the works to which these conditions refer have been paid their wages and claims of every kind in full money, the current coin of the Colony, and to the latest date to which such wages or claims are due; and the Minister may withhold the payment of any money that may be due, or may become due, to the contractor until such declaration shall have been made and delivered to him. Statutory declaration.

### 14. *Material.*

All approved materials, plant, and prepared work brought upon the ground for use in or on the works shall be considered, and shall be, the property of Her Majesty the Queen until completion of contract; and contractor shall not take away, remove, or dispose of any such material or plant or prepared work without the written authority of the Superintending Officer. Ownership.

All materials supplied by contractor for, and used in, the works shall be the best of their respective kinds, and in conformity with any further particular directions that may be contained in the specification. Quality.

Due notice shall be given by contractor to the Superintending Officer and overseer when any material is brought on the ground, all of which must be neatly stacked in regular heaps, submitted for approval, and approved of in writing by the Superintending Officer, before it may be used in the works; none but that so approved shall be used. Arrival on ground. Approval.

The contractor, if so directed, shall remove entirely off the ground any inferior or improper material, or alter or remove any improper or unworkmanlike work at his own expense within twenty-four hours after a written notice in that behalf shall have been served upon him by the Engineer or Superintending Officer. Removal.

After the expiration of the time stated in such notice, it shall be lawful for, but not obligatory upon, the Engineer or Superintending Officer at any time to remove and, if necessary, to destroy any such material, or to pull down or alter any such work, and to replace or rebuild the same. The expense of so doing shall be deducted from any moneys then due, or that may thereafter become due, to the contractor under this contract.

Cement is to be brought on the ground in quantities of not less than fifty barrels, at least ten clear days before it is intended to be used in the works, and kept in weather-tight sheds under lock and key. After having been tested and approved of, the approved barrels will be marked on the outside, and their contents may be used. After they are empty, they shall, in the presence of the Superintending Officer or any person deputed by him, be broken up, and thereupon removed off the works. Storing.

The use by the contractor on the works of blasting powder or any other explosive material shall be confined strictly to the limits, which will be set by an order in writing of the Engineer as to locality, time, quantity, particular kind of material, and precautions to be taken during its use. Explosives.

In any case no larger quantity of explosive material shall be taken underground than is likely to be used during any current shift. Quantities.

Storing of explosive material underground shall be, and hereby is, absolutely prohibited; and for its storage on the surface special directions will from time to time be issued by the Engineer in accordance with the provisions of the Act regulating storage and conveyance of explosives. Storing underground prohibited.

Should contractor exceed the limits of such order, or not strictly observe the special directions in regard to use of explosives, the Engineer shall have power to appoint, at the contractor's expense, inspectors of powder, in whose presence alone the explosives may be made use of, and who shall have entire charge of all matters connected with their storage or supply to the works. Inspectors of powder.

If the contractor shall be found to have supplied materials or executed work not in accordance with the true intent and meaning of the specification and conditions of this contract, and if the Engineer shall elect to allow such materials to be used or such executed work to remain, he shall have power to fix the price to be paid for any such material or work, and contractor shall be bound by the Engineer's valuation. Reduced prices.

15. *Government Property.*

Delivery.	Should the Minister furnish to the contractor for the purposes of this contract any materials, or plant, or other articles of value, all of which are hereafter in this clause and in the specification included under the term "Government property," the contractor shall give a detailed receipt in writing to the Superintending Officer at the time of delivery and before taking possession thereof.
Protecting.	If required to do so by the Superintending Officer, contractor shall erect, at his own expense, sheds or other covering to protect such property from the weather or from theft.
Repairs.	He shall likewise make good any loss or injury which may happen to them from any cause whatever, and shall keep them in good and sufficient repair, and renew all moving and working parts which may have become worn out, to the satisfaction of the Engineer or Superintending Officer, during the whole time they are under his care.
Returning.	On the completion of the contract, all such property shall be returned to the Engineer, unless otherwise directed in the specification; and for that purpose it shall be removed, after having been put into a thorough state of repair, to the place or places mentioned in the specification, and there neatly stacked or arranged, as the Superintending Officer may require.
Discharge.	The latter shall thereupon give a detailed receipt in writing for everything so returned, and until such receipt shall have been given the property shall be deemed to be, and shall be, under the care of the contractor.
Delay in delivery.	Should any delay occur in supplying contractor with any drawings, or specifications, or any Government property which may be specified to be supplied or delivered to contractor by the Minister, the contractor shall have no claim for compensation for any such delay other than that (if any) particularly set forth in the specification; but the contractor shall be entitled to such reasonable extension of time for the completion of the works as shall be fixed by the Engineer.

16. *Measurements, Quantities, and Accounts.*

Net measurements.	Except in cases for which the specification distinctly prescribes another method or rule of ascertaining measurements or weights, the <i>net</i> measurements, according to the actual dimensions or weights, will always be taken, notwithstanding any custom to the contrary. The surplus materials to be removed from excavations shall be calculated as equal to the space actually occupied by the permanent works.
Surplus soil. Quantity.	
Lead.	The distance of lead shall be measured from top of shaft or end of open cutting to centre of spoil-bank or other place of deposit. The schedule price for excavation shall cover all haulage in tunnels or cuttings, unless otherwise specified.
In contractor's presence.	The contractor shall be present at all measurements, and, if required, assist in making the same. If he fail to attend after twenty-four hours' notice in writing has been delivered to him of the Superintending Officer's intention to take measurements, and clearly setting forth the locality of such intended operation, the measurements made by the Superintending Officer shall be binding on the contractor.
Time.	On the satisfactory completion of any part or portion of the works, and at all other suitable times, the dimensions of such piece of work shall be measured by the Superintending Officer, recorded on drawings, kept or to be made for the purpose, and the quantities ascertained therefrom and entered into a quantity book, to serve as the basis for arriving at the cost of contract on completion of same.
Check accounts.	Within forty-eight hours of such measurements having been effected, contractor shall furnish to the Engineer an account of the work thus intended to have been finally measured up, showing in detail the dimensions, quantities, prices, and value, specifying day of measuring, in whose presence measured, and signed by contractor.
Progress measurements.	For the purpose of making progress payments, the dimensions of still unfinished portions of the work will be measured in a summary way monthly, or as near as may be, but without prejudice to the ultimate acceptance or rejection of such portions of work.
Monthly accounts.	On the day following the conclusion of such summary measurement, contractor shall furnish to the Superintending Officer an account of all completed work and of work done during the preceding month, giving detail quantities, prices, and approximate value of each.
Final account.	Any final account to be presented by the contractor must be on similar form, and under the same heads as the printed tender form, with additional items at foot of same.

17. *Jobbing.*

Jobbing.	When desired by the Superintending Officer so to do, contractor shall furnish to said officer any skilled artizans, labourers, or carts with horses and drivers, for the performance of such services as the aforesaid officer may desire to be performed in connection with, for, on, or near the works under the contract.
Paid monthly in full.	Contractor shall supply those artizans, labourers, &c., with the necessary plant and lighting, and shall be paid for all services thus rendered the full amount provided therefor in the schedule of prices, under the head of "jobbing," at the end of every month, or as nearly as may be thereafter. The accounts for this "jobbing" shall, however, be rendered by contractor to the Superintending Officer or overseer in half-weekly intervals, that is to say, during the forenoon of every Monday and Thursday, failing which he shall lose all claim to payments for the jobbing performed by him during the preceding three days.
Half-weekly accounts.	

18. *Progress and Final Payments.*

Monthly progress payments.	No payments shall be legally due to contractor until after the entire completion of the contract; but progress payments on account, subject to all deductions herein provided for, will be made monthly, or as nearly so as may be, during the continuance of the contract, on the certificate in writing of the Engineer, at rates not exceeding those stated in clause 4 of the special conditions.
Balance.	The balance of the moneys due for works executed under this contract, less 5 per cent. and less the deductions properly to be made hereunder, will be paid within thirty days, or as nearly as may be, after the Engineer shall have certified under his hand that all the works under the contract, less those of maintenance, have been fully and satisfactorily completed, and that such balance, less the 5 per cent., is due to contractor. Provided

Provided that if the amount for maintenance, as entered by contractor in his tender, shall appear to the Engineer to be insufficient, the Minister may retain, on the declaration to that effect in writing by the Engineer, either the whole or any part of the sum otherwise deemed payable to contractor, till all the works under the contract, including those of maintenance, shall have been finally and satisfactorily executed.

Insufficient balance.

The said five (5) per cent., together with the "cash security" provided for in clause 20 of these conditions, will be retained until after the expiration of the "period of maintenance" more particularly described in clause 3 of the special conditions, and shall be paid to contractor (less the costs of any repairs or defects, should the contractor fail to execute the same) on the production of a certificate from the Engineer that all the works under the contract, including those of maintenance, have been finally and satisfactorily executed.

Final payment.

No progress payments will be made after the date specified for the completion of the contract until the whole of the works shall have been properly completed to the satisfaction of the Engineer.

No progress payment after expiration of contract time.

If, in the opinion of the Engineer, further inquiry is desirable or necessary before payment is made on any certificate, the Engineer shall have power to suspend the payment of all or any part of the amount mentioned in any such certificate for a period not exceeding one month from the date at which, in the ordinary course, the money would have been paid, and no interest shall be due or accruing on any money the payment of which shall have been so suspended.

Suspension of payment.

No certificate given to the contractor for any purpose whatever during the progress of the work shall prevent the Engineer, at any time before the final payment, from rejecting any unsound material or improper workmanship which may be discovered in the work, or from requiring the contractor to remove or amend at his own cost any work which may be found not to have been performed in accordance with the contract, or from deducting from any money which may be due or become due to the contractor the whole amount which may have been paid to the contractor for such material or work.

Certificates without prejudice.

The obtaining of the Engineer's certificate that all the works under the contract, including those of maintenance, have been finally and satisfactorily executed, shall be a condition precedent to any claim or cause of action in respect of work done, as well as to the final payment to be made hereunder.

No claim without certificate.

#### 19. Arbitration Clause.

1. All questions or disputes which shall arise respecting the true construction or meaning of the drawings or specification, or the quality of the workmanship, or quantity or quality of materials necessary for the whole or any part of the contract, and all questions and disputes respecting the matters next hereinafter mentioned, when the aggregate amount claimed in respect of such last-mentioned matters shall not amount to the sum of one thousand pounds, shall be decided by the Engineer-in-Chief for Roads, Bridges, and Sewerage, whose decision shall be absolute and final.

2. But all questions as to the cancellation of the contract, as to the right of the contractor to extension of time, as to the infliction of penalties, as to the true value of any extra work that has not been previously agreed upon, or as to the value of work omitted from the works specified to be done under the contract, shall, if the aggregate amount of the claims in respect of such matters shall be one thousand pounds or upwards, upon the completion of the works under the said contract, and before payment of the retention money and the money deposited as security for the due carrying out of the contract, be fixed and determined by arbitration as hereinafter provided.

3. If the contractor or the Minister in charge of the Department under which the works in the contract have been or are being carried out considers that he has claims in respect of the several matters mentioned in paragraph 2, as those in which arbitration may be claimed, he shall furnish to the other of them full particulars in writing of such claims, breaches, doubts, disputes, and differences in respect of which he desires arbitration, giving distinct and separate items, and the amount, if any, claimed under each item; and the other party may thereupon furnish particulars of all claims he has in respect of such matters, irrespective of the aggregate amount of such claims; and the party furnishing the same shall be bound by such particulars; and no claim not included in such statement shall be taken into consideration at such arbitration, or become subject of arbitration or action; and the claim or respective claims so made as aforesaid shall be determined by arbitrators, to be appointed as hereinafter provided, that is to say—

4. If the Engineer-in-Chief for Roads, Bridges, and Sewerage and the contractor concur in the appointment of a single arbitrator, then the matter and question aforesaid shall be referred to and decided by such single arbitrator; but if the Engineer-in-Chief for Roads, Bridges, and Sewerage and the contractor cannot concur in the appointment of a single arbitrator, each party, on the request in writing of the other party, shall, by writing under his hand, nominate and appoint an arbitrator, to whom the said questions and matters shall be referred. Every such appointment shall be delivered to the arbitrator, and be deemed a submission to arbitration on the part of the party by whom the same shall have been made, and neither party shall have power to revoke the same without the consent in writing of the other, nor shall the death of either party operate as a revocation.

5. And if, for twenty-one days after the notice in writing by the contractor or by the Engineer-in-Chief for Roads, Bridges, and Sewerage, that the contractor and the Engineer-in-Chief for Roads, Bridges, and Sewerage cannot agree, shall have been served, and for seven days after a request in writing to appoint an arbitrator shall have been served by the one party on the other, such last-mentioned party fail to appoint such arbitrator, then, upon such failure, the party making the request, and having himself appointed an arbitrator, may appoint such arbitrator to act on behalf of both parties; and the arbitrator may proceed to hear and determine the matter or question between the contractor and the Engineer aforesaid, and in such case the award or determination of such single arbitrator shall be final. If, before the matter so referred shall be determined, either arbitrator shall die or become incapable, the party by whom such arbitrator was appointed may nominate and appoint some other person as arbitrator to act in his place; and if, for the space of seven days after notice in writing from the other party for that purpose, he fail to do so, the remaining or other arbitrator may proceed *ex parte*; and in case the matter in dispute shall stand referred to a sole arbitrator in default of the appointment by the other party, and such sole arbitrator shall die, the party by whom he was appointed shall appoint another sole arbitrator in his place; and every arbitrator so to be substituted in either of the cases aforesaid shall have the same powers and authorities as were vested in the former arbitrator at the time of his death or disability.

6. If more than one arbitrator shall be appointed, such arbitrators shall, before they enter into the matter or question referred to them, nominate and appoint, by writing under their hands, an umpire to decide on the matter so referred; and if such umpire shall die or become incapable of acting, they shall forthwith, after such death or incapacity, appoint another umpire in his place, and the decision of every such umpire on the matters referred to him shall be final.

7. If, in either of the cases aforesaid, the said arbitrators shall refuse, or shall, for seven days after request of either party, neglect to appoint an umpire, a Judge of the Supreme Court, upon application made to him by either party, shall appoint an umpire, whose decision shall be final.

8. If a single arbitrator shall be appointed, and he shall die or become incapable to act before he shall have made his award, the matters referred to him shall be determined by arbitrators appointed hereunder, as if the arbitrator so dying had not been appointed.

9. If more than one arbitrator be appointed, and either of them shall refuse or for seven days neglect to act, the person by whom such defaulting arbitrator was appointed shall, within seven days after notice in writing, proceed to appoint another arbitrator to act for the arbitrator so refusing or neglecting, or the other arbitrator may proceed *ex parte*; and the decision of such other arbitrator shall be as effectual as if he had been the single arbitrator appointed by both parties.

10. If more than one arbitrator shall be appointed, and neither of them shall refuse or neglect to act, as aforesaid, then if such arbitrators shall fail to make their award within thirty days after the day on which the last of such arbitrators shall have been appointed, or within such further time as may be granted by a Judge of the Supreme Court on application by either party, the matters so referred to them shall be determined by the umpire appointed as aforesaid.

11. The arbitrators, or any two of them, shall have power to hear, receive, and examine evidence; and the witnesses on any reference herein may be examined on oath or affirmation. Neither of the parties hereto shall be at liberty to appear before the arbitrator by counsel or solicitor.

12. The award of the arbitrator or arbitrators or umpire shall be in writing, ready to be delivered to either party within the time appointed for making the said award. This submission may be made a rule of the Supreme Court. The amount of costs, umpire's and arbitrators' fees, shall be decided by the arbitrators, arbitrator, or umpire; the amount of costs, including arbitrators' and umpire's fees and witnesses' expenses, the items thereof being shown in the account annexed to said award.

13. If upon an arbitration in respect of claims made by the contractor the sum awarded to the contractor shall be less than one-half of the amount of his said claim, all the costs, charges, and expenses of and incident to the said arbitration and award shall be borne and paid by the contractor; but if the amount awarded shall exceed one-half of the amount of the said claim, then each party shall pay his own costs and one-half of the arbitrator's and umpire's fees.

14. It is to be distinctly understood that all claims by the contractor or by the Minister to have any of the matters which under paragraph No. 2 may be submitted to arbitration so dealt with, must be made upon the whole of the work being completed, and before payment to the contractor of the retention money or of the money deposited as security for the due performance of the contract, and that the acceptance by the contractor of payment of the retention money in cases where a bond to secure the completion of the works has been given, and in other cases of the retention money or of any balance thereof, and of the money deposited as security for the due performance of the contract, shall be conclusive proof that the contractor has no such claim or claims.

15. The Engineer shall not be required to defend or answer, or be made a party to, any bill, claim, action, or other proceeding at law or in equity at the instance of the contractor.

16. The exercise by the Minister, Engineer, or Superintending Officer, of any of their respective powers shall not relieve the contractor from any liability to which he may be subject for any breach of the contract.

17. None of the clauses or provisions of the specification, or of these conditions, or of any other part of this contract, shall be varied, waived, discharged, or released, either at law or equity, unless by the express consent in writing of the Minister.

#### 20. Tender, Cash Security, &c.

Tenders to be sent in on a printed form, accompanied by the printed schedule of prices, with all the blanks properly filled in, enclosed in an envelope, and addressed, as directed in the advertisement, calling for tenders.

The approximate quantities only are given as a guidance to intending contractors, and the contract being at a schedule of prices, will be subject to such extensions, extras, additions, deductions, enlargements, deviations, alterations, and omissions as therein provided. The Minister will be only liable to pay for the actual measured quantity of each respective kind of work done and ordered at the rates set forth in the schedule, and if there be no rate in the schedule for any that may be ordered, then at such rate as shall be fixed by the Engineer-in-Chief, whether such measured quantities shall be less or more than the quantity stated in the schedule of quantities and prices. The approximate quantities, as given of each item in the schedule, must be worked out, and a total sum shown in the tender.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz.:—For amounts up to £500, £5; for amounts exceeding £500 and not exceeding £1,000, £10; for all sums over £1,000, 1 per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the manager of the bank upon which it is drawn, or a bank draft. Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

All deposits, with the exception of that of the successful tenderer shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Within seven days from the date of notification in writing to any tenderer of the acceptance of his tender by the Minister, the successful tenderer must lodge with the Under Secretary for Public Works the sum named in clause 6 of the special conditions, which sum will be retained as security for the due performance of the contract until after the expiration of the "period of maintenance," and returned to the contractor (if at all) only on the day of final payment, and less any deductions, which hereunder may properly be made therefrom.

Within

Engineer no party to lawsuit.

Liability to remain.

Provisions not to be varied.

Form of tender.

Schedule rates of contract.

Deposit with tender.

Returning of preliminary deposit.

Cash security.

Within three days after lodging the aforesaid deposit, the successful tenderer shall attend at the office of the Crown Solicitor, and execute the contract. Signing of contract.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof, or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony. Forfeiture of cash security.

Whenever a Tenderer shall fail to proceed with a Contract as aforesaid, fresh Tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another Tender in the same series to be accepted; but the Tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President. Fresh Tenders.

In submitting a Tender the full Christian name of the Tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the Tender. The omission of this information will render the Tender liable to be declared informal. Defaulting Tenderers.

The Board shall not be bound to accept the lowest or any tender. Lowest or any tender.

The contractor shall bear and pay all duty stamps, licenses, building or surveyor's fees, or other charges or fees whatsoever, legally demanded by any municipal or other authorities, also the amount of all patent rights and royalties due to any patentee. Stamps, fees, &c.

No tenderer will be allowed to proceed with the work tendered for until he shall have signed the required contract. Commencement of work.

Public Works Department, Sewerage Branch,  
Sydney, 14th May, 1891.

ROBT. HICKSON,  
Engineer-in-Chief for Sewerage.

These are the General Conditions marked "D," referred to in our annexed Agreement with Her Majesty the Queen, dated the 20th day of June, A.D. 1891.

Witness,—HAROLD F. NORRIE.

JOHN CARTER,  
D. G. SNODGRASS.

"E."

TENDER FOR CONTRACT NO. 79a, SYDNEY SEWERAGE WORKS.

To the Honorable the Minister for Public Works, Bridge-street, Sydney, N.S.W.

We, the undersigned, do hereby offer to construct, completely finish, and maintain the various works for Contract No. 79a, Sydney Sewerage Works, in accordance with the supplementary specification, specification, special conditions, general conditions, and drawings, prepared for that purpose in your Department, for the sum of £12,831 19s. 6d. sterling, within sixteen months from the date hereof.

Should this offer be accepted, we undertake to lodge with the Under Secretary for Public Works, within seven days from the date of notification of acceptance of this tender, a bank deposit receipt, in the name of the Secretary for Public Works, for the sum of £650 sterling, as security for the due performance of the contract.

We hereby undertake to execute the required contract when called upon to do so.

JOHN CARTER.  
DAVID GRAHAM SNODGRASS.

16 June, 1891.

This is the tender marked "E," referred to in our annexed agreement with Her Majesty the Queen, dated the 20th day of June, A.D. 1891.

Witness,—HAROLD F. NORRIE.

JOHN CARTER.  
D. G. SNODGRASS.

"F."

LETTER OF ACCEPTANCE.

Sirs,

Department of Public Works, Sydney, 16 June, 1891.

I have the honor, by direction of the Secretary for Public Works, to inform you that your tender, dated this day, is accepted for Contract No. 79a, Sydney Sewerage Works, at the sum of twelve thousand eight hundred and thirty-one pounds nineteen shillings and sixpence (£12,831 19s. 6d.), subject to the following special condition, viz. :—

If it shall be represented to the Secretary for Public Works at any time during the progress of this contract that an undue number of men are being employed thereon who have not been domiciled in this Colony for six months previously to such employment, and such allegation be proved to his satisfaction, the Minister shall have the power to call upon you to discharge any or all such men, and on such direction being conveyed to you under the hand of the Under Secretary for Public Works, you shall discharge such men forthwith, and in the event of your non-compliance with any such direction the Minister shall have the power to declare this contract to be cancelled as if this stipulation had been expressly set out in the cancellation clause of the General Conditions relating to this contract.

The work is to be carried out in strict accordance with the several contract exhibits relating to this contract, and to be completed within sixteen months from this date.

The security required on this contract will be a fixed deposit receipt, in favour of the Secretary for Public Works, for the sum of £650.

I have to refer you to the Commissioner and Engineer-in-Chief for Roads, Bridges, and Sewerage for further information, and to request that you will call upon the officer-in-charge of bonds and contracts at this office, for the purpose of executing the necessary documents for the due observance of your contract.

I am, &c.,

J. BARLING,  
Under Secretary.

Messrs. Carter & Co., Contractors, North Sydney.

This is the copy acceptance marked "F," referred to in our annexed agreement with Her Majesty the Queen, dated the 20th day of June, A.D. 1891.

JOHN CARTER.  
D. G. SNODGRASS.

Witness,—HAROLD F. NORRIE.

No. 6.

Resident-Engineer Boys to Supervising-Engineer Davis.

Contract 79A.

Department of Public Works, Roads, Bridges, and Sewerage Branch,

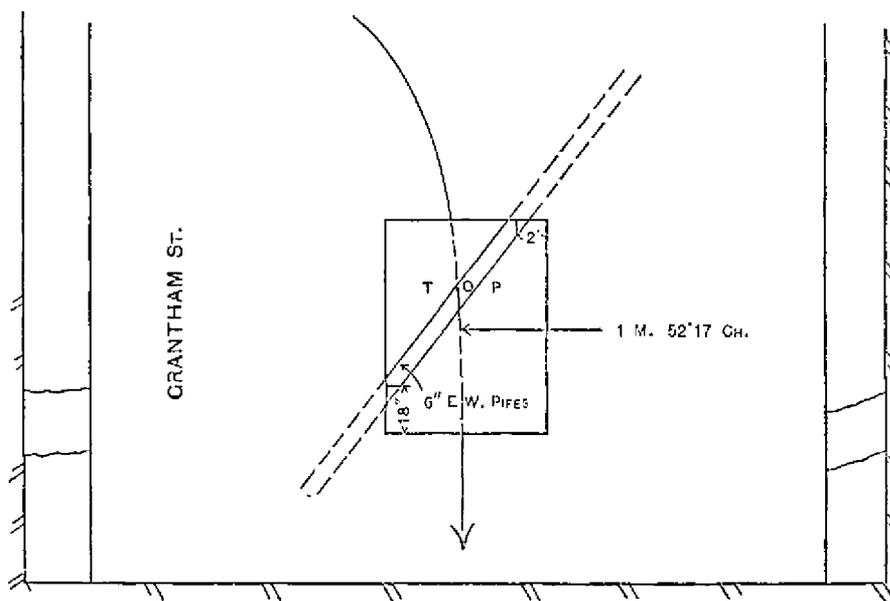

North Sydney, 4 May, 1894.

Dear Sir,

A line of 6-in. drain-pipes cross the shaft diagonally at 1 mile 52'17 chains, Grantham-street.

Will you be good enough to instruct the contractors, Messrs. Carter & Co., to shift these out of the way, as it will be more inconvenient to alter position of shaft.

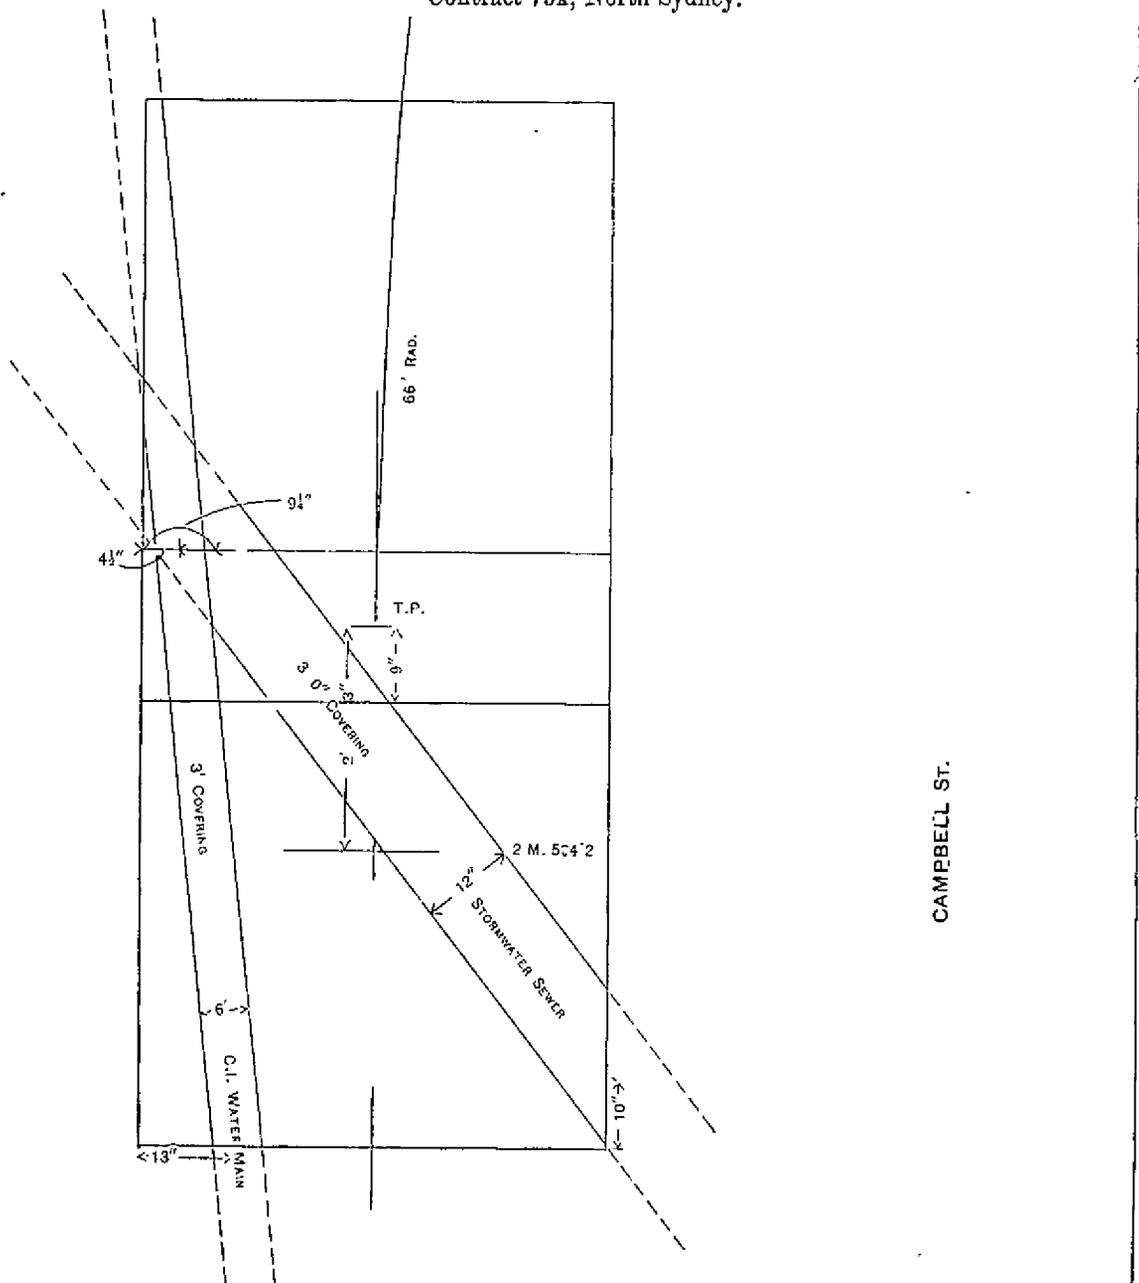

Sketch herewith.

I am, &c.,  
J. W. T. BOYS.

This being a lump sum contract, I should like the Engineer-in-Chief's decision as to whether work of this description will be included in the lump sum.—J.D., 7/5/94. Commissioner and Engineer-in-Chief for Roads, Bridges, and Sewerage. No.—R.R.P.H., 7/5/94. Noted.—J.W.T.B., 8/5/94. File.—J.D., 9/5/94.

No. 7.  
Resident-Engineer Boys to Supervising-Engineer Davis.  
Contract 79A, North Sydney.

This sketch shows the pipes met with in shaft at 2 miles 5042.

I propose to shift the shaft to the position shown in red, and if agreed to, please give the necessary orders for diverting the 12-in. storm-water sewer.

J. W. T. BOYS,

Contract 79A, N. Sydney.

This alteration can be made. I have consulted with Mr. Bagge. The contractors to mould the 12-in. E.W. pipe, and be paid day labour for it.—J.D., 18/5/94. Mr. Boys. Shaft set out in new position.—J.W.T.B., 23/5/94. File.—J.D., 28/5/94.

No. 8.  
Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

Department of Public Works, Roads and Bridges and Sewerage Branch, Sydney, 26 July, 1894.

*Subject*:—Contract No. 79A, North Shore—Recommending that advance be made on approved cement. The contractors have asked that an advance be made on approved cement on this contract. It is usual for this to be done, and I recommend that the request be complied with to the extent of 75 per cent. of the amount of the fixed deposit (£485), at the rate of 75 per cent. of the value of the cement on the ground, on condition that the contractors sign the usual agreement.

J. DAVIS.

Approved.—R.R.P.H., 26/7/94. Mr. Davis.—F.C.P., 26/7/94. Seen. Mr. Norrie for usual agreement.—J.D., 27/7/94. Who are the contractors, and where is the cement stored?—H.F.N.B., 27/7/94. Sewerage. The contractors are Carter & Co., and the shed is in Alfred-street, opposite to the Town Hall.—J.D., 30/7/94. Mr. Norrie. Memorandum herewith, duly signed and stamped. Original agreement also sent herewith.—H.F.N., 7/8/94. The Commissioner-in-Chief for Roads, Bridges, and Sewerage. Seen.—R.R.P.H., 8/8/94. Mr. Davis to note.—F.C.P., 8/8/94. Seen. Agreement.

## MEMORANDUM.

In consideration of the Minister for Public Works in and for the Colony of New South Wales advancing to us the sum of £485, and of any future advances to be made to us, we hereby agree to repay to the said Minister for Public Works the said sum of £485 and future advances, together with interest at the rate of £6 per centum per annum on such sums respectively from date of advance on demand. And we hereby charge all money due or payable, or becoming due or payable, to us under a certain contract for sewerage works, called or known as contract No. 79A, Sydney Sewerage Works, in the said Colony, entered into by us with the Government of the said Colony, with the repayment of the said sum of £485 and any future advances and interest at the rate aforesaid. And we acknowledge that we now hold all cement now stored in our shed in Alfred-street, opposite Town Hall, Sydney, in the said Colony, or elsewhere, and plant, materials, and every other thing already used or to be used in connection with or under the said contract, for and on behalf of the said Minister for Public Works, as representing the said Government. And also further undertake to give immediate possession of same to the said Minister, or any person appointed by him for that purpose, whenever called upon to do so.

As witness our hands, at Sydney, this 6th day of August, in the year of our Lord 1894,—

JOHN CARTER.

Witness to the signature of John Carter,—

HAROLD F. NORRIE, J.P.

## No. 10.

## Resident-Engineer Weedon to Supervising-Engineer Davis.

Contract No. 79A, North Sydney.

Sir,

16 October, 1894.

A portion of this contract at the end near Campbell-street was shown on the section to be taken out in "open cutting." This length was tunnelled and about 40 feet of it had to be timbered. The sewer in this length should be constructed of two-ring work, and I write for authority to instruct the contractors to that effect.

I am, &amp;c.,

STEPHEN H. WEEDON,  
Resident Engineer.

Will Mr. Weedon please give reduced chainages of the proposed two-ringed work?—J.D., 17/10/94. Two miles 4 chains 24·28 feet to 2 miles 4 chains 61·28 feet.—S.H.W., 18/10/94. Mr. Weedon please hand attached letter to contractors.—J.D., 18/10/94. Accordingly.—S.H.W., 24/10/94. File.—J.D., 26/10/94.

## No. 11.

## Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen,

Public Works Department, Sewerage Branch, 18 October, 1894.

In consequence of the nature of the ground between 2 miles 4 chains 24·28 feet and 2 miles 4 chains 61·28 feet, it will be necessary to have the sewer lining 10 inches thick. Will you please arrange for this to be done?

I have, &amp;c.,

J. DAVIS,  
Supervising Engineer for Sewerage.

## No. 12.

## Messrs. Carter &amp; Co. to Supervising-Engineer Davis.

Contract No. 79A, North Sydney Sewerage.—Construction of Shafts.

Sir,

North Sydney, 17 November, 1894.

Referring to our conversation with you *re* the above, we desire to confirm the offer then made to construct the shafts in brickwork in lieu of concrete, with a view to the more expeditious completion of the work.

We are, &amp;c.,

CARTER &amp; CO.

On condition that no extra price is to be paid for the brickwork, I recommend that it be substituted for the bluestone concrete shown on contract drawings.—J.D., 21/11/94. Appd.—R.R.P.H. 21/11/94. Messrs. Carter & Co., 22/11/94. Mr. Weedon to note.—J.D., 22/11/94. Noted.—S.H.W., 23/11/94. File.—J.D., 26/11/94.

## No. 13.

## Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen,

Public Works Department, Sewerage Branch, 22 November, 1894.

In reply to your letter of the 17th inst., offering to substitute brickwork for bluestone concrete in the shafts on sewerage contract No. 79A, without extra cost to the Department, I have the honor to inform you that the Engineer-in-Chief has approved of your doing as you wish.

I have, &amp;c.,

J. DAVIS,  
Supervising Engineer for Sewerage.

No. 14.

## No. 14.

## Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

*Subject*:—Contract No. 79A, North Sydney. Recommending that 33 feet of the High-street branch be driven in conjunction with this contract.

Department of Public Works, Roads and Bridges and Sewerage Branch,  
Sydney, 22 November, 1894.

In constructing the main sewers it is usual, in order to prevent the concrete and brickwork being damaged by blasting, to drive at least 33 feet of tunnel for the branch sewers at the same time as the tunnel for the main sewer is driven.

In the case of High-street, North Sydney, this appears to have been overlooked when the contract drawings were prepared. The cost of driving 33 feet at schedule rates will be £31 12s. 6d., and I recommend that at least this length should be done. J.D.

Approved.—R.H., 22/11/94. Mr. Weedon to note.—J.D., 23/11/94. Noted.—S.H.W., 26/11/94. File.—J.D., 26/11/94. Messrs. Carter & Co., 28/11/94. Mr. Weedon to note.—J.D., 28/11/94. Previously noted.—S.H.W. File.—J.D., 30/11/94. What will driving alone cost per chain for High-street branch at schedule rates, contract No. 79A?—J.D. The cost of driving alone for sewer 3 ft. 3 in. x 2 ft. 2 in. will be £63 5s. (if 4-inch charges of powder are allowed) per chain.—W.E.A., 21/11/94. Mr. Bagge. The lining is taken at 4½ inches thick, for the excavation, beyond the 3 ft. 3 in. x 2 ft. 2 in. sewer, in rock.—C.H.O.B., 21/11/94. Mr. Davis.

## No. 15.

## Supervising-Engineer Davis to Messrs. Carter &amp; Co.

Gentlemen, Public Works Department, Sewerage Branch, 28 November, 1894.

Referring to the conversation I had with your Mr. Snodgrass relative to doing a portion of the High-street branch in connection with your sewerage contract No. 79A, and to your offer to drive the same at your schedule price No. 3, I have the honor to inform you that the Engineer-in-Chief has approved of this being done. Will you please proceed with the tunnel for at least 33 feet for a 3 ft. 3 in. x 2 ft. 2 in. sewer, allowing for a 5-in lining. I have, &c.,

J. DAVIS,

Supervising Engineer for Sewerage.

## No. 16.

## Messrs. Carter &amp; Co. to The Engineer-in-Chief for Sewerage.

Sir, North Sydney, 10 January, 1895.

Being anxious to complete contract No. 79A, North Sydney sewerage, as quickly as possible, we have to ask your permission to drive the tunnel from No. 12 shaft on contract No. 79 towards shaft No. 13 on contract No. 79A.

As shaft No. 12 is built up in brickwork, we are willing to excavate 33 feet from the end of the drive from No. 12 by guttering and gadding to remove the risk of damage to completed work.

We are, &amp;c.,

CARTER, GUMMOW, &amp; CO.

Register.—J.D., 12/1/95.

## No. 17.

## Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.*

*Subject*:—Contract No. 79A, North Shore Outfall. Contractors write asking that they be allowed to drive from shaft at foot of Mount-street.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 25 January, 1895.

THE shaft at the foot of Mount-street, referred to in the contractors' letter was built under contract No. 79, and 5 feet of sewer lining was put in on the south side of the shaft. The tunnel was driven 50 feet beyond the lining. The contractors ask that they be allowed to continue the drive from this shaft, and undertake to gutter and gad the first 33 feet. I think the request might be granted, as it will greatly facilitate the completion of contract No. 79A, conditionally, however, upon the contractors consenting to use no blasting powder in excavating the tunnel until they have driven 99 lineal feet from the south end of the lining, and further undertake to leave the sewer and shaft constructed under contract No. 79 in the same condition as they are at present. J.D.

Approved.—R.H., 16/1/95. Messrs. Carter & Co., 16/1/95. Mr. Weedon to see.—J.D., 16/1/95. Seen.—S.H.W., 17/1/95. Mr. Davis. File.—J.D., 18/1/95.

## No. 18.

## The Engineer-in-Chief for Sewerage to Messrs. Carter &amp; Co.

Gentlemen, Public Works Department, Sewerage Branch, 16 January, 1895.

In reply to your letter of the 10th instant, asking permission to drive the tunnel from the shaft at the foot of Mount-street, I have the honor to inform you that you may do as you ask, conditionally upon your completing the driving of the tunnel to 99 feet south of the sewer lining without the use of blasting powder, and leave the sewer and shaft constructed under contract No. 79 in the same condition as they are at present. I have, &c.,

ROBERT HICKSON,

Commissioner and Engineer-in-Chief for Roads, Bridges and Sewerage.

No. 19.

No. 19.

## Resident-Engineer Weedon to Supervising-Engineer Davis.

North Shore Main Outfall Sewer Extension from Mount-street to Campbell-street—Contract No. 79A.  
Sir, 9 January, 1895.

I have the honor to inform you that to-day I laid the question of 14-inch brickwork before the contractors for the above contract, and that they elected to build the shafts to the required height (35 feet from surface of ground), with 14-inch brickwork on two sides, and with 9-inch brickwork on the other two sides that touch the sides of the excavation, filling in solid with sandstone concrete between the 9-inch brickwork and the sides of the excavation.

I have, &amp;c.,

STEPHEN H. WEEDON,  
Resident Engineer.

Seen. This involves no extra cost, as the contractors have already asked to substitute brickwork for concrete at their own cost.—J.D., 12/1/95.

No. 20.

## Resident Engineer Weedon to Supervising-Engineer Davis.

North Shore Main Outfall Sewer Extension from Mount-street to Campbell-street—Contract No. 79A.  
Ironwork for Shafts.

Sir,

9 January, 1895.

With reference to the above, I have the honor to point out that the list of ironwork supplied me for the above contract does not clearly imply that for the shaft at 1m. 76c. 517 one complete length of pipe (schedule item 57 contract No. 93), together with a similar pipe shortened by 8½ inches are required, as is the case; the short length is to hand, but the complete pipe has yet to arrive and is required. Whilst on this subject I would like to know if the length figured on the drawing of this shaft for the short pipe is correct.

I have also to apply for the 3-24 inch bell-mouth pipes, item No. 9.

I have, &amp;c.,

STEPHEN H. WEEDON,  
Resident Engineer.

Could Mr. Adams see me?—J.D., 12/1/95. Mr. Bagge.

Another pipe item 151 has yet to be ordered, which will be done at once. The three bell-mouth pipes have been ordered (*vide* order book). The length put on the short pipe referred to is undoubtedly wrong, and is apparently intended for the longer pipe.—W. E. ADAMS, 12/1/95. Mr. Davis.

Mr. Weedon.—J.D., 14/1/95. Could Mr. Smith hasten the delivery of the three bell-mouthed pipes.—S.H.W., 15/1/95. Mr. Davis. Mr. Smith, when will bell-mouthed pipes be delivered?—J.D., 19/1/95. I have asked Cooke and Webb to push on with this work at once.—W.S. Mr. Weedon.—J.D., 23/1/95. Noted.—S.H.W., 24/1/95. Mr. Davis. File.—J.D., 25/1/95.

No. 21.

## Messrs. Carter &amp; Co. to Supervising-Engineer Davis.

Sir,

North Sydney, 1 March, 1895.

Seeing that certain drives on contract No. 79A, North Sydney Sewerage will not be completed for some months, and having gathered from a conversation with you that the length along High-street might be completed to advantage at the present time, we hereby offer to complete such work at the present schedule rates for contract No. 79A.

We are, &amp;c.,

CARTER &amp; CO.

Will Mr. Weedon please let me have tracing and estimate of the High-street branch to open cutting.—J.D., 1/3/95. Mr. Weedon.

No. 23.

## No. 23.

Supervising-Engineer Davis to The Engineer-in-Chief for Sewerage.

*Minute Paper.**Subject* :—Contract No. 72A, North Shore—High-street extension.

Department of Public Works, Roads and Bridges and Sewerage Branch,

Sydney, 12 March, 1895.

THE contractors write offering to construct at their schedule rates for contract No. 79A, 18 chains of the High-street sub-main.

It seems to me that it will be advisable to have this length of sewer constructed as proposed by the contractors. By doing so one shaft will be saved, which will cost £163, in addition to which it will enable the reticulating sewers for a large district to be proceeded with at an earlier date than they otherwise would be.

Although contract No. 79A is a lump sum contract, there is a schedule of prices attached thereto, which would apply to the whole of the work comprised in the proposed extension.

The cost, as per estimate attached, will be about £1,800. The schedule rates are reasonable, and as low as would probably be obtained if tenders were invited.

J.D.

Recommended.—R.H., 14/3/95. Will Mr. Davis please see me.—J.B., 15/3/95. For approval.—J.B., 16/3/95. Approved.—J.H.Y., 18/3/95. Mr. Hickson, B.C., J.B., 18/3/95. Seen.—R.H., 19/3/95. Please hand attached letter and tracing to contractors.—J.D., 27/3/95. Mr. Weedon. Accordingly.—S.H.W., 28/3/95. Mr. Davis. File.—J.D., 29/3/95. Mr. Griffith.—J.D., 8/4/95. Seen. See the contractor is informed.—A.D., 11/4/95. Action completed. File.—J.M.S., 16/4/95.

As I am informed that this contract is limited to work within reclamation limits, and will not be charged to capital debt of the Board, it will come within the arrangement made as to supervision, viz., all works upon which rates will not be struck by the Board to be carried out by Mr. Hickson's department.—M.P., Acting Engineer, 29/4/95.

Mr. Davis to see me.—R.H., 29/4/95. Prepare usual schedule.—J.D., 1/5/95. Mr. Pridham. Schedule herewith.—T.P., 3/5/95. Principal Assistant Engineer for Country Towns Water Supply and Sewerage.

## No. 1.—CARTER, GUMMOW, &amp; CO'S TENDER.

(Bound up with the Bond).

No. 2.—(Tender unsigned; cheque signed by Justin M'Sweeney).

## TENDER FORM.

IN pursuance of advertisement in the *Government Gazette*, I, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by me, at 16 per cent. under the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and I do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and I hereby undertake that I will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and I enclose herewith my cheque for the sum of £        as a preliminary deposit; and I agree that such sum shall be absolutely forfeited if I at any time within thirty days after the said tender is opened withdraw the same, or if in the event of this tender being accepted I fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board regulations, printed on the back hereof, and by which I agree to be bound.

Dated this 24th day of April, 1895.

## TENDER BOARD REGULATIONS.

No tender shall be received after 11 a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive...	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

CONTRACT

CONTRACT No. 118.—This is the Schedule of Quantities and Prices hereinbefore referred to.

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

## No. 3.—J. F. CARSON'S TENDER.

## TENDER FORM.

IN pursuance of advertisement in the *Government Gazette*, I, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about ten chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by me, at  $14\frac{1}{2}$  per cent. under the prices affixed to each item in the Schedule of Quantities and Prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and I do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or if not in Schedule, at a price to be agreed upon at the time; and I hereby undertake that I will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works, a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above-mentioned, and to provide the security required by clause 29 of the said general conditions; and I enclose herewith my cheque for the sum of £131 as a preliminary deposit; and I agree that such sum shall be absolutely forfeited if I at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, I fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which I agree to be bound.

Dated this 24th day of April, 1895.

Witness.—JNO. J. KOONIE.

J. F. CARSON,  
Bay-street, Croydon.

## TENDER BOARD REGULATIONS.

No tender shall be received after eleven a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive...	...	...	...	...	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	...	...	...	...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

29	One additional horse .....	"	"	0 5 6

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

## No. 4.—HOLLOWAY BROTHERS' TENDER.

## TENDER FORM.

In pursuance of advertisement in the *Government Gazette*, we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by us, at  $11\frac{1}{2}$  per cent. below the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and we hereby undertake that we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and we enclose herewith our cheque for the sum of £140 as a preliminary deposit; and we agree that such sum shall be absolutely forfeited if we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which we agree to be bound.

Dated this 23rd day of April, 1895.

RICHARD HOLLOWAY,  
WILLIAM HOLLOWAY,  
LEONARD HOLLOWAY,  
Goulburn.

## TENDER BOARD REGULATIONS.

No tender shall be received after 11 a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive...	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

## TENDER BOARD REGULATIONS.

No tender shall be received after eleven a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive ... ..	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

## No. 6.—GILLIVER AND CURTIS' TENDER.

## TENDER FORM.

IN pursuance of advertisement in the *Government Gazette*, we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by us, at 11·21 $\frac{1}{4}$  per cent. below the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and we hereby undertake that we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and we enclose herewith our cheque for the sum of £135 as a preliminary deposit; and we agree that such sum shall be absolutely forfeited if we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which we agree to be bound.

Dated this 24th day of April, 1895.

WM. GILLIVER,  
CHAS. H. CURTIS,  
Rookwood.

## TENDER BOARD REGULATIONS.

No tender shall be received after 11 a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive...	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

## No. 7.—THOS. WILLIAMS' TENDER.

## TENDER FORM.

IN pursuance of advertisement in the *Government Gazette*, I, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by me, at 9 per cent. below the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and I do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and I hereby undertake that I will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and I enclose herewith my cheque for the sum of £ as a preliminary deposit; and I agree that such sum shall be absolutely forfeited if I at any time within thirty days after the said tender is opened withdraw the same, or if in the event of this tender being accepted I fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board regulations, printed on the back hereof, and by which I agree to be bound.

Dated this 24th day of April, 1895.

THOS. WILLIAMS,  
Islington Terrace, Parramatta-road, Forest Lodge.

## TENDER BOARD REGULATIONS.

No tender shall be received after 11 a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive...	£5	0	0
For amounts exceeding £500 and not exceeding £1,000...	£10	0	0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

## No. 8.—JOHNSTON, O'ROURKE, AND GORDON'S TENDER.

## TENDER FORM.

IN pursuance of advertisement in the *Government Gazette*, we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by us, at 5 per cent. below the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and we hereby undertake that we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works, a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and we enclose herewith our cheque for the sum of £143 as a preliminary deposit; and we agree that such sum shall be absolutely forfeited if we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which we agree to be bound.

Dated this 24th day of April, 1895.

THOS. JOHNSTON, }  
 PATRICK O'ROURKE, } North Sydney,  
 PATRICK GORDON, }  
 William-street, Sydney.

## TENDER BOARD REGULATIONS.

No tender shall be received after eleven a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive ... ..	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

CONTRACT No. 118.—This is the Schedule of Quantities and Prices heretofore referred to.

No. of Item.	Description of Work.	Unit.	Probable Quantity.	Rate per Unit.
	Excavation in open trenches, in more or less hard materials, and in hard rock for main storm-water channel and branches, including removing any pipes, concrete, brickwork, woodwork, and drains, &c., met with, as specified in clauses 3, 6, 8, 9, and 10:—			£ s. d.

29	One additional horse .....	"	"	0 5 6

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming; temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

## No. 9.—PHILLIPS, RHODES, AND BROUGHTON'S TENDER.

## TENDER FORM.

In pursuance of advertisement in the *Government Gazette*, we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by us, at 5 per cent. below the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and we hereby undertake that we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and we enclose herewith our cheque for the sum of £144 as a preliminary deposit; and we agree that such sum shall be absolutely forfeited if we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which we agree to be bound.

Dated this 24th day of April, 1895.

T. S. PHILLIPS,  
B. RHODES,  
A. BROUGHTON,  
335A, George-street, City.

## TENDER BOARD REGULATIONS.

No tender shall be received after 11 a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive...	...	...	...	...	...	...	...	...	...	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	...	...	...	...	...	...	...	...	...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

## No. 10.—R. &amp; S. BUTCHER'S TENDER.

## TENDER FORM.

In pursuance of advertisement in the *Government Gazette*, we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by us, at 5 per cent. above the prices affixed to each item in the schedule of quantities and prices annexed hereto; and to complete the same within eighteen months from the date of the acceptance of this tender; and we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and we hereby undertake that we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works, a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and we enclose herewith our cheque for the sum of £150 as a preliminary deposit; and we agree that such sum shall be absolutely forfeited if we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which we agree to be bound.

Dated this 24th day of April, 1895.

R. & S. BUTCHER,  
Holtermann-street, North Sydney.

## TENDER BOARD REGULATIONS.

No tender shall be received after eleven a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive ... ..	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

## No. 11.—SMITH AND COCHRAN'S TENDER.

## TENDER FORM.

IN pursuance of advertisement in the *Government Gazette*, we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by us, at 5 per cent. under the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and we hereby undertake that we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and we enclose herewith our cheque for the sum of £144 as a preliminary deposit; and we agree that such sum shall be absolutely forfeited if we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which we agree to be bound.

Dated this 23rd day of April, 1895.

Witness,—W. H. TERRY.

SAMUEL SMITH,

JOHN PTK. COCHRAN,

Trades Hall, Dixon-street, Sydney

(Sydney District Council, A.L.F. Co-operative Association).

## TENDER BOARD REGULATIONS.

No tender shall be received after 11 a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz:—

For amounts up to £500 inclusive...	£5	0	0
For amounts exceeding £500 and not exceeding £1,000...	£10	0	0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

CONTRACT

## CONTRACT No. 118.—This is the Schedule of Quantities and Prices hereinbefore referred to.

No. of Item.	Description of Work.	Unit.	Probable Quantity.	Rate per Unit.
	Excavation in open trenches, in more or less hard materials, and in hard rock for main storm-water channel and branches, including removing any pipes, concrete, brickwork, woodwork, and drains, &c., met with, as specified in clauses 3, 6, 8, 9, and 10 :—			£ s. d.

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

## No. 12.—HUGH OWEN'S TENDER.

## TENDER FORM.

In pursuance of advertisement in the *Government Gazette*, I, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by me, at 3 per cent. under the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and I do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or if not in Schedule, at a price to be agreed upon at the time; and I hereby undertake that I will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works, a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and I enclose herewith my cheque for the sum of £150 as a preliminary deposit; and I agree that such sum shall be absolutely forfeited if I at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, I fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which I agree to be bound.

Dated this 24th day of April, 1895.

Witness,—ROBERT AMOS.

HUGH OWEN,  
99, Elizabeth-street, Paddington.

## TENDER BOARD REGULATIONS.

No tender shall be received after eleven a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive ... ..	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

## No. 3.

The Principal Assistant Engineer for Country Towns Water Supply and Sewerage  
to The Engineer-in-Chief for Public Works.*Minute Paper.*

Department of Public Works, Engineer-in-Chief's Office, Sydney, 8 May, 1895.

*Subject* :—Johnstone's Creek Stormwater Channel, Contract No. 118.—Submitting Tenders.

In submitting the tenders for the construction of the Johnstone's Creek Stormwater Channel, I beg to point out that this is a case where, as the channel passes across the proposed reclamation, in accordance with the arrangement made at the time the metropolitan sewerage was taken over by Mr. Darley, the Engineer-in-Chief for Public Works, will supervise the construction. Mr. Darley is, I understand, to supervise the construction of all sewerage works in the metropolitan area, which will eventually be transferred to the Board, but that any works which will not be vested in the Board are to be carried out as usual by the Engineer-in-Chief for Public Works.

The portion of this channel from a short distance below Booth-street is on the reclaimed area, and would, therefore, be carried out by the Engineer-in-Chief for Public Works.

As to the portion above Booth-street, there has a difficulty arisen with the owners of the property signing the usual indemnity. Pending this question being settled, I propose that the work should be proceeded with below the Booth-street bridge, and that the tender should accordingly be accepted with the provision that the work above Booth-street shall only be carried out conditionally upon the necessary authority being obtained from the property owners.

The lowest tender is that of Messrs. Carter, Gummow, & Co., at 20½ per cent. below schedule rates, which I recommend should be accepted, and that in the acceptance it should be stipulated that the work is not to be proceeded with until the contractors receive written instructions to that effect.

J. DAVIS,

Principal Assistant Engineer for Country Towns

Engineer-in-Chief for Public Works.

Water Supply and Sewerage.

I recommend the acceptance of Carter, Gummow, & Co.'s tender at 20½ per cent. below schedule rates, on the above conditions.—ROBT. HICKSON, 8/5/95. Under Secretary for Public Works. For Board.—Jno. P., 8/5/95. The Secretary. Passed.—J.B., 10/5/95.

Submitted to the Board of Reference, May 10th, 1895. The Board concur in the recommendation of Mr Hickson to accept the tender of Messrs. Carter, Gummow, & Co., at 20½ per cent. below schedule rates, under the following special conditions, viz.:—That the work is not to be proceeded with until the contractors have received instructions to that effect.—F. HOLMES, Acting Secretary.

Submitted.—J.B., 14/5/95. Approved.—J. H. Y., 14/5/95. Accept, 14/5/95. What amount of security should be lodged in respect of the contract? Messrs. Carter, Gummow, & Co., Auditor-General, Mr. Norrie, 16/5/95.

## No. 4.

## The Under Secretary for Public Works to Messrs. Carter &amp; Co.

Sirs,—

Department of Public Works, Sydney, 16 May, 1895.

I have the honor, by direction of the Secretary for Public Works, to inform you that your tender, dated the 24th ultimo, is accepted for construction of the Johnstone's Creek Stormwater Channel, Contract No. 118, at 20½ per cent. below the rates set forth in the printed schedule of prices.

It is to be distinctly understood that the work is only to be proceeded with on the part from Booth-street towards the harbour when you have written instructions to proceed therewith.

The work is to be carried out in strict accordance with the several contract exhibits relating to this contract, and to be completed within 18 months from this date.

The security required on this contract will be a Fixed Deposit Receipt, in favour of the Secretary for Public Works, for the sum of £605.

I have to refer you to the Engineer-in-Chief for Public Works for further information, and to request that you will call upon the Officer-in-Charge of Bonds and Contracts, at this office, for the purpose of executing the necessary documents for the due observance of your contract.

I am, &amp;c.,

J. BARLING,

Under Secretary.

## No. 5.

## The Under Secretary for Public Works to Messrs. Carter &amp; Co.

Sir,

Public Works Department, Sydney, 3 June, 1895.

I have the honor, with respect to the acceptance of your tender for Contract No. 118, Sydney Sewerage Works, to remind you that the time limited by clause 29 of the general conditions relating to the contract for the receipt of the necessary cash deposit herein, viz., £605 expired on 30th May, last, and to inform you that if the same be not paid into my hands within seven days from the date hereof, the Minister for Public Works will exercise his rights under the contract.

You will understand that this letter is written entirely without prejudice.

I have, &amp;c.,

J. BARLING,

Under Secretary,

(Per J.P.)

Department of Public Works, Bonds and Contracts Branch, Sydney, 17 June, 1895.

*Subject* :—Johnstone's Creek Stormwater Channel, Contract No. 118.

THE agreement, heroin duly prepared, has been executed by the contractors Messrs. Carter, Gummow, & Co., and stamped, and might now be forwarded to the Engineer-in-Chief for Public Works.

The tender, and all other papers herein, are sent herewith.

HAROLD F. NORRIE,  
Officer-in-Charge.

Acct. to receive—Jno. P. 13/6/95.

## TENDER FORM.

IN pursuance of advertisement in the *Government Gazette*, I or we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by me or us, at per cent. under the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and I or we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rates quoted above, or, if not in schedule, at a price to be agreed upon at the time; and I or we hereby undertake that I or we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above-mentioned, and to provide the security required by clause 29 of the said general conditions; and I or we enclose herewith our or my cheque for the sum of £ as a preliminary deposit; and I or we agree that such sum shall be absolutely forfeited if I or we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, I or we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which I or we agree to be bound.

Dated this day of , 189 .

## TENDER BOARD REGULATIONS.

No tender shall be received after 11 a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive...	£5 0 0
For amounts exceeding £500 and not exceeding £1,000...	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

CONTRACT No. 118.—This is the Schedule of Quantities and Prices hereinbefore referred to.

No. of Item.	Description of Work.	Unit.	Probable Quantity.	Rate per Unit.

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

The necessary plans, specifications, and conditions herewith.—J. DAVIS, 20/5/95. B.C., The Officer-in-charge, Bonds and Contracts.

---

AGREEMENT made this 15th day of June, in the year of our Lord 1895, between John Carter, Frank Moorhouse Gummow, and David Graham Snodgrass, of North Sydney, in the Colony of New South Wales, contractors, carrying on business together under the name, style, or firm of "Carter, Gummow, & Co." (and hereinafter styled or referred to as "the contractors"), of the one part, and Her Most Gracious Majesty Queen Victoria of the other part.

WHEREAS the Minister for Public Works of the said Colony (hereinafter called the said Minister) recently called for tenders, by notice published in the *Government Gazette* (of which notice a copy is hereunto annexed, marked "A"), for the construction of the Johnstone's Creek Storm-water Channel, from Parramatta Road to 10½ chains beyond Balmain Tram-line, this present contract being called or known as Contract No. 118, Sydney Sewerage Works, in the said Colony, as shown in the plans relating thereto in the office of the Engineer-in-Chief for Public Works, and marked "No. 1" to "No. 8," both inclusive, and according to the specification and schedule to specification, and under and subject to the special condition and general conditions, which are hereunto annexed, and marked respectively "B," "C," "D," and "E." And whereas the contractors made the tender hereunto annexed, marked "F," to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of the said storm-water channel, agreeably to the said plans, specification, schedule to specification, special condition, and general conditions, and at 20½ per cent. below the prices affixed to each item in the schedule of prices annexed thereto, and marked "G," and within the time in the said tender mentioned, any additions or deductions to be paid or allowed for at the said rate, or, if not in schedule, at a price to be agreed upon at the time. And whereas the said tender was accepted by the said Minister, with the reservation therein set, and such acceptance was duly notified to the contractors on the 16th day of May, now last past, and has been assented to by them, as they hereby severally admit and acknowledge (a copy of the said acceptance is hereunto annexed, and marked "H"). And whereas the contractors have deposited the sum of £605 in the Bank of New Zealand, at Sydney, in the said Colony, in the name of the Under Secretary for Public Works, at interest upon fixed deposit, No. 422,200, dated the 6th day of June, 1895, for twelve months, and have handed the receipt for same to the said Minister to be held by him as such Minister or the Minister for Public Works for the time being of the said Colony, on behalf of Her Majesty, as security for the due performance of this contract, and all other matters and things herein contained, and which, on the part of the contractors, are to be done and performed. Now this agreement witnesseth that, in consideration of the premises, the contractors do hereby, for themselves, their heirs, executors, and administrators, covenant with and to Her said Majesty the Queen, Her heirs and successors: That they, the contractors, shall and will perform the various works required in and about the full and proper construction, erection, and completion of the said storm-water channel in accordance in all things with the said plans, specification, schedule to specification, special condition, and general conditions, within the time and at and after the rate of 20½ per cent. below the prices affixed to each item in the said schedule of prices as in the said tenders mentioned. It being also hereby declared that any additions to or deductions from the said works mentioned or set out in the said specification or schedule to specification or shown in the said plans, are to be paid or allowed for, as the case may be, at and according to the said rate, or, if not in schedule, at a price to be agreed upon at the time. And it is hereby agreed and declared between and by the said parties hereto that the said copy notice, specification, schedule to specification,

specification, special condition, general conditions, tender, schedule of prices, and copy acceptance of tender, marked as aforesaid, all being hereunto annexed as aforesaid, shall be read as incorporated in and forming part and parcel of these presents in like manner as if the same had been herein written and set forth at length, and that the said several annexures, the said plans, and these presents shall together be taken to be the contract between the said parties in respect of the said works.

In witness whereof, the said parties to these presents have hereunto set their hands and seals the day and year first before written.

#### TENDERS FOR PUBLIC WORKS.

Department of Public Works, Sydney, 5 April, 1895.

TENDERS will be received at this office for the public works specified in the Schedule hereunder up to 11 o'clock a.m. of the various dates set forth in the second column.

All envelopes containing tenders must be addressed to the President of the Tender Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Tenderers may be in attendance when the tenders are opened, and the name of the lowest tenderer will be announced, if possible, before the duties of the Board have terminated.

The following conditions will have to be strictly complied with, otherwise the tenders will not be taken into consideration :—

1st.—Each tender must state the time within which it is proposed to complete the work, and in every instance the full Christian and surname or names of persons tendering.

2nd.—Every tender must contain an undertaking on the part of the person tendering to make the cash deposit provided for in the general conditions and to be answerable for the due performance of the contract in the event of the tender being accepted; and undertaking, in that event, to execute and deliver to the Minister for Public Works a valid legal contract with Her Majesty the Queen for securing such performance.

3rd.—No tender will be considered which shall have been received after 11 o'clock a.m. on the day upon which tenders are to be received, unless there are circumstances which, in the opinion of the Board, render it desirable that it should be received.

4th.—Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive ... ..	£5	0	0
For amounts exceeding £500 and not exceeding £1,000 ... ..	10	0	0

For all sums over £1,000, one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the manager of the bank upon which it is drawn, or a bank draft.

5th.—Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

6th.—In the event of any tenderer failing to take up his tender, complete the contract agreement, and proceed with the contract within the time specified, or withdrawing his tender within thirty days after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account of such contract shall be absolutely forfeited to the Crown, and shall be paid to the credit of the Consolidated Revenue of the Colony.

7th.—Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted, but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

8th.—In the event of any contract being tendered for at a schedule of rates, the approximate quantities as given of each item must be worked out and a total sum shown.

All deposits, with the exception of that of the lowest tenderer, when practicable, will be returned to the persons entitled thereto immediately after the Board shall have adjourned; and the deposit made by the successful tenderer shall be returned to him on executing the contract agreement for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender will not be returnable until the service is satisfactorily completed.

It is to be understood that the Government does not bind itself to accept the lowest or any tender; and no tender will be accepted until the head of the branch under whose directions the work is to be carried out has reported upon the whole of the tenders received.

J. H. YOUNG.

## "B."

CONTRACT No. 118.—Sydney and Suburbs Storm-water Drainage—Johnstone's Creek Storm-water Channel, from south side of Parramatta Road northwards to about 10·50 chains north of centre line of Balmain tramline.

## SPECIFICATION.

1. *Description of Contract.*

THIS contract comprises the provision by the contractor of all labour, machinery, tools, plant, and every requisite for the construction of Johnstone's Creek Storm-water Channel, as described in detail in the specification, schedule to specification, special condition, and general conditions, and as shown on the following drawings:—

- No. 1.—General plan of storm-water channel and branches.
- No. 2.—Longitudinal sections of main channel and branches
- No. 3.—General cross sections of main channel and branches.
- No. 4.—Enlarged details of changes of size of channel, cross sections, &c.
- No. 5.—Details of Lillie Bridge junction and of cross sections of channel.
- No. 6.—Details of Orphan School branch junction, pipe-inlets, and cross sections of channel.
- No. 7.—Details of junctions, inlets, gully-shafts, pipe-sewers, &c.
- No. 8.—Details of junctions and cross sections of channel.

2. *Materials.*

The materials are to be of the description and quality specified in clauses 7 to 22, and 36 to 39 of the schedule to specification.

3. *Excavation.*

The excavation to be executed in accordance with clauses 41, 42, 44, 45, 47 to 60, 62, 63, 66, 67, 69, 73 to 77, 80 and 83 to 87 of the schedule to specification.

The schedule prices for excavation shall include the removal of any pipes, concrete, brickwork, woodwork, &c., thereon, and also the cost of the works comprised in clauses 77, 86, and 107, of the schedule to specification, and clauses 6 and 9.

4. *Filling.*

The filling is to be executed in accordance with clauses 86, 87, 88 to 90, 92 to 97, and 101 to 107 of the schedule to specification.

The schedule price of one (1) cubic yard of filling is to apply to filling in any situation in the construction of the works, as specified in the various clauses herein quoted.

5. *Restoring of Road and other Surfaces.*

All road, path, and other surfaces which have been broken up or injured during the term of the contract, to be restored to the same condition as they were before the commencement of the works, as specified in clauses 101 to 107 of the schedule to specification.

6. *Restoring Buildings, Walls, Fences, &c.*

All fences and works of any description met with on the site of the works, which the Engineer considers necessary to have taken up and removed, are to be carefully taken up, replaced, and re-erected at such places, along such lines, and at such times, as may be ordered, and to be left at completion of works in the same order and condition as they were before the commencement of the works, at contractor's cost, as specified in clause 106 of the schedule to specification.

### 7. *Surplus Materials.*

All surplus materials to be dealt with as specified in clauses 98, 99, and 100 of the schedule to specification, except that in this contract all surplus materials to be led to spoil at one price per cubic yard.

### 8. *Temporary Bridges, &c.*

Contractor to provide and maintain temporary bridges, hoarding, fences, roads, &c., as specified in clause 86 of the schedule to specification.

### 9. *Carpenters' Work.*

The carpenters' work to be executed as specified in clause 127 of the schedule to specification and clause 15.

Where the channel passes underneath the Booth-street road bridge, between two piers, the contractor to adopt such precautions as the engineer may deem necessary for the safety of the existing bridge and preservation of the traffic over said bridge, by underpinning, bracing, and placing piles of piers on sills if directed on completion of channel, and fitting and fixing said piers in the same manner as they were before the commencement of the works. The cost of underpinning, providing sills, braces, and all labour and materials, to be covered by and included in the schedule rates of excavation. The contractor will be held wholly responsible for all stoppages of traffic, delays, accidents, &c., which he or his men may cause during the execution of the works at this bridge.

### 10. *Sewers, Storm-water Channels, &c.*

The various works are to be executed in conformity with clauses 132 to 139, of the schedule to specification. Contractor to provide and construct all pipe junctions for gullies, house, and other drains, as shown, and as shall be directed.

The storm-water channel is to be an open concrete channel throughout, as shown on drawings, with eight changes of sizes of channels, scour channel in centre where shown, and while passing underneath the Parramatta Road bridge, the existing concrete invert to be carefully taken up and removed as specified, and the channel to be lowered to the new gradient, and to the exact cross section shown, by means of picking and gadding only.

The existing concrete invert of the adjoining 7.24 chains of channel to be carefully taken up and removed as specified, and the channel invert for a length of 33 feet, adjoining the northern side of existing stone-bridge, to be carefully lowered to the new gradient, and to the exact cross section by means of picking and gadding only.

Open concrete junctions to be constructed at junctions of main-channel with Gehring's branch, with Orphan School branch, with Taylor-street branch (a pipe drain), and open concrete junction with branch channel leading to end of existing Lillie Bridge grounds covered drain.

The open branch concrete and pipe channels, connecting these junctions with the existing Gehring's Creek drain, Orphan School drain, Taylor-street drain, and the drain from the Lillie Bridge grounds, to be constructed as shown.

If during the progress of the contract, the engineer may deem it necessary to omit or alter any of the sewers, junctions, channels, inlets, or other works shown or described in the clauses herein quoted, then the contractor shall be bound to omit altogether or alter, as may be ordered at the time, any sewers, junctions, channels, inlets, &c., as the case may be, and such omission or alteration shall not entitle him to any claim for loss, damage, or compensation. He shall be only entitled to be paid for the work actually ordered and carried out at the various schedule rates referring to such work.

### 11. *Concrete Work.*

The concrete to be used in the construction of these works to be sandstone concrete of the quality specified in clause 142 of the schedule to specification. The concrete work to be executed as specified in clauses 143, 146 to 149, 152 to 157, 159, 165 to 167, 170 and 171 of the schedule to specification.

### 12. *Cement Coating.*

The cement coating to be executed as specified in clauses 180 and 181 of the schedule to specification, and to be in the proportion of one of cement to two of sand.

### 13. *Brickwork.*

The brickwork is to be executed as specified in clauses 11, 12, 172, 177, and 179, of the schedule to specification. The invert of storm-water channel from the north side of Parramatta Road bridge northwards, for a length of 7.25 chains, to be lined with brick on edge flooring, to be executed as shown, and as herein specified.

### 14. *Pipe-laying and Jointing.*

The providing, laying, and jointing of glazed stoneware pipes to be executed as specified in clauses 13, 14, 137, 170, 189 to 194, of the schedule to specification.

### 15. *Tarring.*

All sawn, adzed, and round hardwood in tenons, mortise holes, braces, uprights of piers, and wall-plates of bridge in Booth-street, to receive two coats of tar, where ordered, as specified in clauses 273 and 274 of the schedule to specification.

### 16. *Schedule to Specification, Special Condition, and Conditions of Contract.*

Notwithstanding that certain clauses of the schedule to specification are specially enumerated, it is to be understood that the schedule to specification, special condition, and the general conditions attached to the specification shall be held binding in all matters relating to this contract, as far as the Engineer may deem the same applicable.

17. *Note.*

Parties tendering are particularly requested to observe that they must name only one rate of percentage above or below all the prices in schedule, and not one rate of percentage upon certain items, and another rate or rates upon others.

This is the specification marked "B," referred to in our annexed Agreement with Her Majesty the Queen, dated the 15th day of June, A.D. 1895.

Witness,—HAROLD F. NORRIE.

JOHN CARTER.  
F. M. GUMMOW.

## "C."

## SCHEDULE TO SPECIFICATION.

*Land required for works.*

1. Access to the site of the works (other than by public roads) to be had by means of such land Access to works. the Engineer may deem necessary.
2. For the purpose of sinking, working, and building shafts on lines of streets, and on private Surface area for shafts. ground, the contractor to have temporary possession of an area of 24 feet by 17 feet at the site of each shaft, unless otherwise directed.
3. For the purpose of excavating open trenches, and for constructing the various works therein, Surface area for open trench. and raising embankments over same, or where ordered, contractor to have temporary possession of such land, of the exact widths and lengths which, in the opinion of the Engineer, is required for these works.
4. The land herein referred to to be set out by the Engineer upon receiving written application Application for land. from the contractor. Such application must be made four weeks prior to the time the said land is required.

*Setting-out work.*

5. The centre lines of sewers, &c., are shown on general plans by full lines, which will be marked on the surface of the ground, the same as on plans, as the works proceed.
6. Contractor shall at his own cost and expense at any time—by day or by night, either on working days or on Sundays or holidays—render all such assistance and supply all such labour, plant, and lighting as the Engineer or Superintending Officer may require, to set out, to check such setting-out, or to inspect any portion of the works, which must for that purpose be left clear and free from any obstruction or impediment. During and for the performance of those operations, contractors shall be obliged to suspend any or all of his work, if required to do so by the Superintending Officer, and without having any claim for loss or damage on account of such temporary suspension.

*Materials.*

7. All materials supplied by the contractor are to be of the best quality and description of their Samples. respective kinds. Samples of each kind to be submitted for the approval of the Engineer, and retained in office; and, on approval having been obtained, they are to be delivered on the works ready for use, as per sample.
8. The contractor shall inform the Engineer of the sources whence the various materials are supplied, Source of supply and manufacture. or of the places of their manufacture, and afford him every facility to inspect their supply or manufacture at any stage of the same.
9. Due notice shall be given by contractor to the Superintending Officer when any material is Notice of delivery. brought on the ground, all of which must be neatly stacked in regular heaps, submitted for approval, and approved of in writing by the Superintending Officer, before it may be used in the works. None but that so approved shall be used.
10. The contractor to provide approved gauge-boxes or scales for measuring or weighing all materials Gauging and weighing. supplied.
11. Bricks to be double-pressed, of well-mixed material of approved quality and uniform fineness; Bricks. to be new, sound, hard, and well-burnt kiln bricks, free from cracks and all other defects, equal in every respect to the sample brick to be seen at the Engineer's office. They are to have sharp arrises, and to be of approved dimensions, form, and colour, and, when ordered, to be specially moulded. Radiating and specially-formed bricks to be provided for all segmental shafts. All bricks to be subjected to the following tests:—
  - (a) *Tensile strength.*—The tensile strength to be tested, in the departmental testing machine, by Tests. laying the brick horizontally on its base of 3 inches, between supports 7 inches apart, and the strain applied across the centre of the brick. An average breaking strain of twelve bricks to be taken, which must not be less than 8,000 lb.
  - (b) *Porosity.*—Bricks immersed in water for twenty-four hours must not increase in weight more than 3 per cent.

Should the twelve bricks fracture under the foregoing average strain, or prove more porous than 3 per cent, then the Engineer may reject the whole stack of bricks from which the twelve bricks were taken.

12. In the event of the contractor delivering bricks of a mixed description and quality, the Defective bricks. Superintending Officer shall have the power to require of the contractor to have those bricks which, in his opinion, are suitable for the works, picked out and stacked where directed, and those unsuitable removed from the site of the contract; and in the event of the contractor refusing or failing to comply with such request within twelve hours from the time it has been made, then in all such cases the Superintending Officer shall have the power of rejecting the whole of the bricks so delivered by the contractor.

13. Stoneware pipes to be of well-ground and mixed material, of tough, tenacious, impervious Stoneware pipes. quality, well-burnt, sound, hard, uniform in thickness, true in section, straight longitudinally, uniformly glazed both inside and outside, free from fire and other cracks, flaws, and ash-holes, the collar perfectly joined to the barrel, and in every way equal to sample pipe to be seen at the Engineer's office.

Pipes

## Dimensions.

Pipes to be of the following thicknesses and depth of collars, namely :—

Pipes, inside diameter, 9 inches ; thickness,  $\frac{1}{16}$  inch ; depth of collar, 2 inches.

"	"	12	"	"	1	"	"	2	"
"	"	15	"	"	$1\frac{1}{4}$	"	"	$2\frac{1}{4}$	"
"	"	16	"	"	$1\frac{3}{8}$	"	"	$2\frac{1}{2}$	"
"	"	18	"	"	$1\frac{1}{2}$	"	"	$2\frac{3}{4}$	"
"	"	21	"	"	$1\frac{3}{4}$	"	"	2	"
"	"	24	"	"	$1\frac{7}{8}$	"	"	$2\frac{3}{4}$	"

## Tests.

All parcels of pipes used in these works will be tested and submitted to the following crushin strains, as applied in the departmental testing machine :—

24-inch diameter pipe,	165 lb. per square inch of bearing surface.
21 " "	165 " " "
18 " "	142 " " "
16 " "	142 " " "
12 " "	142 " " "
9 " "	142 " " "

If the Engineer deems it necessary, the pipes will also be tested for porosity. Should the pipes fracture under the foregoing strains, or not prove impervious to water, then the Engineer may reject the whole parcel from which the pipes were taken.

## Defective pipes, &amp;c.

14. In the event of the contractor delivering quantities of pipes, bends, and junctions of a mixed description and quality, the Superintending Officer shall have the power to require of the contractor to pick out and stack, where directed, those pipes, bends, and junctions which, in his opinion, are suitable for the works, and those unsuitable removed from the site of the contract; and in the event of the contractor refusing or failing to comply with such request within twelve hours from the time it has been made, then in all such cases the Superintending Officer shall have the power of rejecting the whole of the pipes, bends, and junctions so delivered by the contractor.

## Sandstone.

15. All sandstone used in the construction of these works to be hard, sound, and solid, of the best description, free from all defects, and as per sample to be seen in the Engineer's office, and to stand a crushing strain of 6,500 lb. per square inch. A tensile test will also be required; for this six stones must be prepared, 4 in. by 4 in. by 12 in.; these, when laid on their natural beds upon supports 10 inches apart, must give an average breaking strain of not less than 4,333 lb., the strain being applied across the centre of the stone.

## Bluestone.

16. All bluestone used in the construction of these works to be of the best description of basaltic bluestone obtainable, free from honeycomb and all defects, and as per sample to be seen at Engineer's office.

## Sand.

17. Sand to be sharp quartz sand, free from all earthy, loamy, or clayey matter, equal in quality to the sample of Nepean River sand to be seen at the Engineer's office, and to be washed perfectly clean whenever the Engineer deems it necessary.

Cement.  
Condition.

18. The cement to be used throughout these works to be well packed in strongly-made casks; to be the best Portland cement, of approved brands and manufacture, delivered in thoroughly sound condition, fit for immediate use, and without requiring seasoning or air-slacking; to be free from any symptoms of staleness, caking, damage to the packing, hard or set lumps; and no barrel or portion of same to be used until it has been examined and approved. The Engineer may delay approval of any parcel of cement pending tests extending over a longer period than hereinafter specified. Samples taken from various casks, from each parcel brought on the works, to be submitted for testing. Such samples shall be taken out of the package in an equal section, extending from the surface to the centre of the cask. The cement, when gauged with water to a stiff paste, must set in a damp atmosphere in from one and a half to six and a half hours. Neat cement, of the consistency abovementioned, will be made into pats, kept in moist air until set, and then placed in water at a temperature of between 65° and 80° F., and also in Deval's hot bath, at a temperature of 180° F. These test pats will be examined from day to day, and should they show symptoms of blowing, or any alteration or variation in form or volume, or imperfect setting capacity, the whole parcel from which the cement was taken will be rejected. The cement shall weigh not less than 100 lb. per imperial struck bushel, filled from the hopper. Each cask shall contain not less than 374 lb., exclusive of weight of packing. The specific gravity to be not less than 3.00; but cement up to or exceeding the specified degree of fineness, if of a lighter weight than herein stipulated, but otherwise equal to the specified tests, may be accepted subject to the decision of the Engineer, provided that the deficiency in weight is made up in quantity. The cement must be ground so fine that the residue on a sieve of 6,400 meshes per square inch, without rubbing shall not exceed 20 per cent., and on a sieve of 14,500 meshes not more than 30 per cent. For the test for tensile strength, the cement will be gauged with three times its weight of standard sand (viz., sand from crushed sandstone, washed, dried, and sifted through a sieve of 400 and retained upon one of 900 meshes to the square inch), and mixed with an average of about 10 per cent. of their weight of water, and made into briquettes formed in moulds of 1 inch sectional area at the weakest part. Such briquettes to be kept in a damp atmosphere, and put into water twenty-four hours after they have been made, and remain in water at a temperature of between 60° and 70° F., until their tensile strength is tested. These briquettes must bear a tensile stress of not less than 100 lb. per square inch after seven days, and 200 lb. per square inch after twenty-eight days from being moulded. Cement, when tested neat, must bear a tensile stress of at least 300 lb. to the square inch after three days, two of them in water; and 450 lb. after seven days, six of them in water; and 550 lb. after twenty-eight days, twenty-seven of them in water. Briquettes shall also, after being in a damp atmosphere for twenty-four hours, be kept in water at a temperature of 180° F. for six days, when the tensile stress must be equal to that specified for twenty-eight days at normal temperature. The tensile strength will be ascertained in the Government testing-machine, with the load increasing at the rate of 200 lb. per minute, and the average breaking weight of six briquettes will be taken for each test. Any cement which absorbs in proportion more than two (2) milligrams of carbonic acid to three (3) grains of cement shall be taken as containing more than the permissible quantity of free lime or magnesia. Should the sample fail in any or all of these tests, or show irregularity in quality, or not show a proper progressive increase

Weight.  
Specific gravity.

## Tensile strength.

## Hot test.

Rate in loading  
testing machine.

## Free lime.

- Tests of castings.** 31. All castings of every description, before they leave the foundry, to be carefully examined and weighed, to be slung on chains above ground, and to be sounded with a hammer, and they are again to be carefully examined, slung, and sounded with a hammer when delivery of same is taken at the site of the works.
- Tests of pipes.** 32. All straight pipes required in the contract, before delivery of same is taken on the works, shall be, at the foundry or at the site of the works, as shall be directed, duly proved under hydrostatic pressure equal to a column of water of 200 feet, and when under pressure to be thoroughly sounded quickly all over with a hammer of not less than 4 lb.
- Gun-metal** 33. The gun-metal required throughout these works to be an alloy composed of eight parts of copper to one part of tin, unless otherwise specified.
- Cast-steel tests.** 34. The tests for cast-steel shall be as follows:—  
Bars turned to  $\frac{3}{4}$ -inch diameter for a sufficient length to have 5 inches under actual tension, shall have an ultimate tensile strength of not less than 26 tons per square inch, and a minimum elongation of 18 per cent.
- Cost of tests.** 35. The cost of providing the materials and wrought and cast iron works, &c., herein described, required by the Engineer for testing purposes, and the carriage of same to the Public Works testing-room, place of manufacture, site of works, or to the University, as the case may be, and as shall be directed, shall be borne solely by the contractor; and any of the materials, or any part of the wrought-iron and gun-metal work, or any of the pipes, castings, &c., injured or broken by the testing, shall be immediately replaced by new and sound materials at contractor's expense; wrought-iron, gun-metal, cast-iron pipes, or other castings, to be again tested as before described, until the whole have been tested to the entire satisfaction of the Engineer.
- Timber.** 36. Timber to be of the best description, sound, straight, free from sap, large or loose knots, wanes, shakes, gum-veins, pipes, or other defects.
- Hardwood.** 37. Hardwood used in the works to be of approved timber.  
Round timber to be carefully barked, the diameter given on drawing is to be measured at the small ends.  
Hewn timber is to be squared true on all sides, and dressed fair and clean with the adze, so as to show no axe-marks, to be of full dimensions, free from sapwood, and no heart timber must appear on the outside.  
Sawn timber to have clean sharp arrises, to be cut die square, free from heart timber, and of the full dimensions shown or specified.
- Softwood.** 38. Softwood timber to be of the best Baltic or yellow deals, and of the exact dimensions specified when finished.
- Split fencing timber.** 39. Split posts and rails for fencing must be perfectly straight and cleanly split, free from large knots, splinters, and other defects.

#### *Earth-borings.*

40. When earth-borings have been taken the results have been shown on drawings, but the Government undertake no guarantee whatever regarding the kinds of soil that will be met with or the firmness or stratification of the ground to be excavated, or the amount of unwatering to be done, or the strength of the timbering that may be required, or the nature and extent of other precautions which may have to be adopted.

#### *Clearing and Grubbing.*

41. The areas of the sites for all excavations and of all embankments, together with a margin of 10 feet in width beyond all these areas, to be cleared and grubbed of all trees, scrub, stumps, roots (to the depth of same), and dead timber, and the whole of such trees, scrub, stumps, roots, and dead timber thus grubbed and cleared to be removed and cleared away from any lands set apart for the purposes of this contract. The cost of all clearing and grubbing to be covered by and included in the schedule price for excavation.

#### *Excavation.*

42. No excavation to be commenced on any portion of the contract until, in the opinion of the Engineer, sufficient building materials are on the ground, together with the necessary appliances and plant to ensure the uninterrupted progress and continuance of the works, after they once have been commenced, at any locality, without any delay or stoppage.

43. It is to be distinctly understood that, when sinking shafts and driving tunnels, the materials excavated, on their arrival at level of staging above mouth of shaft, are to be at once removed; and when materials, &c., are to be conveyed through shafts to the tunnel works, that all such materials, on arrival at mouth of shafts, must be at once conveyed to the works underground, as the contractor cannot be allowed to occupy a larger area than that authorised by the Engineer.

44. When excavating in open trenches, if ordered, the materials excavated and raised to the surface are to be at once removed; and when materials are being conveyed to open trenches, where they occur in public roads, they must be at once taken into the work, so as not to impede the usual traffic.

45. The road metal, ballast, pitching, wood-paving, concrete, asphalt, flagging, sodding, &c., when they are met with in excavation, are to be carefully removed, put aside, and stacked where directed.

**Cross-sections to vary.**

46. The cross-sections of tunnel excavation are shown on Drawings, but they will vary with the solidity of the ground, and as the Engineer directs.

**Method of excavation in trenches without timbering.**

47. Wherever the solidity of the ground permits it, the excavation in trenches for concrete or brickwork to be taken out with vertical sides to level of springing of sewer arch, and to the exact widths of concrete or brickwork shown on Drawings, and below that level to bottom of trench with curved or vertical sides, as shall be directed.

**Width of trenches where timbering is required.**

48. Where timbering is required, trenches 8 feet deep and under shall have vertical sides, and shall be 1 ft. 3 in. wider to outside of polling-boards than width of concrete or brickwork. Where trenches are over 8 feet deep and require timbering, they shall have vertical sides, and shall be 1 ft. 3 in. wider to outside of polling-boards than the width of the concrete or brickwork for the lower 8 feet. Above that level they shall be 2 feet wider to outside of polling-boards than concrete or brickwork.

49. The excavation for foundation of embankments to be taken out, where ordered, 12 inches below surface of ground, and to such widths and lengths as shall be directed, or as ordered for benching. For embankments.

50. The excavation in solid rock for pipe-trenches shall have vertical sides, and shall be of the following sizes, viz. :— Width of trenches.

For 24-inch diameter stoneware pipe sewers...	...	...	3 ft. 9 in. wide.
21-inch " " " " " " " "	...	...	3 ft. 4 in. "
18-inch " " " " " " " "	...	...	3 ft. 0 in. "
15-inch " " " " " " " "	...	...	2 ft. 6 in. "
12-inch " " " " " " " "	...	...	2 ft. 0 in. "
9-inch " " " " " " " "	...	...	2 ft. 0 in. "

51. When timbering is not required in excavation in all other ground for pipe-trenches, the trenches shall be of the same widths as those in solid rock. Where timbering is required, the excavation for pipe-trenches 8 feet deep and under shall have vertical sides, and shall be of the following sizes to the outside of the polling-boards, viz. :—

24-inch diameter stoneware pipe-sewers...	...	...	4 ft. 0 in. wide.
21-inch " " " " " " " "	...	...	3 ft. 7 in. "
18-inch " " " " " " " "	...	...	3 ft. 3 in. "
15-inch " " " " " " " "	...	...	2 ft. 9 in. "
12-inch " " " " " " " "	...	...	2 ft. 3 in. "
9-inch " " " " " " " "	...	...	2 ft. 3 in. "

52. Where timbering is required, the excavation for pipe-trenches more than 8 feet deep shall have vertical sides, and shall be the widths given in clause 61 for the lower 8 feet and for any depth over and above 8 feet, the trenches shall be of the following sizes to the outside of the 1½-inch polling-boards (unless otherwise ordered in writing), viz. :— Width of trenches.

24-inch diameter stoneware pipe-sewers...	...	...	4 ft. 9 in. wide.
21-inch " " " " " " " "	...	...	4 ft. 4 in. "
18-inch " " " " " " " "	...	...	4 ft. 0 in. "
15-inch " " " " " " " "	...	...	3 ft. 6 in. "
12-inch " " " " " " " "	...	...	3 ft. 0 in. "
9-inch " " " " " " " "	...	...	3 ft. 0 in. "

53. Transverse and other cheeks to be excavated to receive pipe-sockets and junctions, and for the purpose of making the joints. Cheeks.

54. The trenches for the cast-iron pipe-sewers to be excavated to the depths and widths which the Engineer may order. Joint-holes to be excavated to the dimensions specified or ordered by the Engineer. Cast-iron pipe trenches.

55. The excavation of trenches to be carried on in such a manner that they shall be always completed and approved for a length of 48 feet (unless otherwise directed) in advance of sewers or other works. Trenches

56. In ground which, in the opinion of the Engineer, does not require blasting, the excavation is to be carried on by means of picking, and when the ground, in the opinion of the Engineer, is hard and suitable for blasting, charges of compressed powder, not exceeding 4 inches in length by 1½ inch in diameter, shall be used. The Engineer, however, reserves to himself the right of ordering any excavation which he may consider blasting would facilitate, to be taken out by means of charges of compressed powder not exceeding 2 inches in length by 1½ inch diameter, or he may prohibit the use of explosives altogether, when the excavation shall then be done by means of guttering and gadding. If explosives, other than compressed powder, are permitted to be used, the charges thereof will be determined by the Engineer. The use of explosives.

57. When the use of explosives is authorised, the contractor shall use every precaution and carry on such operations with such limited charges of powder only, or other approved explosives, as will loosen the shale, rock, &c., without shattering the same; and to employ approved means to prevent, effectually and thoroughly, all stones or other materials from being thrown out of trench, tunnel mouth, or shaft. Precautions.

58. Blasting will not be allowed between the hours of 10 p.m. and 6 a.m., nor after 1 p.m. on Saturdays, except by the written authority of the Engineer. Working hours.

59. Every hole drilled for blasting purposes will be measured by an inspector, and charged under his supervision. Drilling and charging holes.

60. No larger quantity of explosives shall be taken underground than is likely to be used during any current shift. Storage of explosives.

61. When pipe-sewers are to be laid in tunnels, the dimensions of tunnel to be 4 ft. x 3 ft., exclusive of timbering. Pipe-sewer tunnels.

62. If the contractor has exceeded the sectional area of excavation ordered, he shall remove such extra excavation, and in the case of trenches make good and fill in same at sides of trench with approved materials, and at bottom of trench with concrete described in clause 142, at his sole cost; the actual cubic contents only of the excavation and of the concrete work shown on drawings and ordered for each special length of sewer in open trench shall be paid for; and in the case of excavation in tunnels and shafts the contractor shall remove such extra excavation, and make good and fill in same with concrete or brickwork, in the manner herein specified, at his sole cost; the actual cubic contents only of the excavation and of the brick and concrete work shown on drawings, and ordered for each special length of tunnel or shaft, shall be paid for. Excessive excavation.

63. If, however, in cases where the use of explosives is ordered (and in no other case) the Engineer considers it impracticable to excavate any particular length of tunnel or shaft to the exact sectional area ordered, then he may, according to the nature of the ground, allow a margin of concrete lining not exceeding 3 inches over and above that ordered. Maximum allowance.

64. Unless otherwise directed, the excavation of the various tunnels to be commenced from the different faces described in the specification, simultaneously within the specified time after the date the contract has been signed. Starting tunnel excavation.

65. Ventilating fans or other approved means to be provided and worked by the contractor at all working shafts and tunnel faces where directed by the Engineer. Ventilation.

- Enlarging shaft or tunnel.** 66. In all cases where a greater thickness of lining, or a greater cross-section area of tunnel or shaft is ordered to be executed, from whatever cause, after the length of tunnel or shaft in question has been excavated to the profile ordered in the first instance, or if any portion of the excavation of open trench is ordered to be deepened, the excess of excavation so ordered shall be paid for at schedule rates for tunnel, shaft, or open trench excavation, as the case may be, and as the Engineer shall classify and direct at the time.
- Inspection and approval.** 67. No concrete or brickwork shall be commenced until the portion of sewer excavation in tunnel or open trench to be operated upon has been cleaned and levelled, and until the Engineer has examined and approved of same.
- Shafts.** 68. Shafts are to be sunk at the various sites shown on longitudinal sections and on general plans, or in lieu of those shown, at such other sites as the Engineer from time to time may determine. Wherever shafts are ordered they are to be sunk truly plumb, and of the full dimensions shown on drawings, or as may be ordered at the time, clear of timbering.
- Shafts in open trenches.** 69. All excavation for shafts situated within the lengths of open trenches, is to be paid for as "excavation in open trench."
- Temporary shafts.** 70. If the contractor desires, to suit his own convenience, to sink temporary shafts, they are to be sunk only at approved places, and on completion of work to be filled in, as specified in clause 95, to the satisfaction of the Engineer. The cost of sinking, timbering, unwatering, &c., and of filling in, withdrawing, or covering up timber of such shafts, to be defrayed entirely by the contractor.
- Shaft plant.** 71. All shafts, temporary or permanent, to be provided and fitted during their construction and completion, or during the progress of the contract, if deemed necessary by the Engineer, with approved winding engines and steel-wire ropes capable of resisting a strain equal to six times that of the working maximum strain, or with such other winding arrangements, ladders, staging, &c., as shall be directed and approved of by the Engineer.
- Sumps.** 72. Where directed, sumps are to be sunk at the bottom of shafts not less than 6 feet deep below invert of sewer, and afterwards to be filled in with concrete, as specified in clause 142.
73. Any other sumps which the contractor, for his own convenience, may think fit to sink on line of sewer, in tunnel, or in open trenches, during the construction of these works, are to be filled in with concrete, as specified in clause 142, and the cost of sinking, timbering, unwatering, and filling in with concrete and removing the materials, &c., to be defrayed entirely by the contractor.
- Sub-ducts.** 74. The excavation for sub-ducts in tunnel and open trench to be made below invert of sewer, or as shall be directed, with a fall towards each working shaft or face, and of such dimensions and gradients as may be determined at the time.
- Material for "filling."** 75. Any material obtained from the excavation, which, in the opinion of the Engineer, is suitable for refilling or other works comprised in this contract, shall be put aside in separate spoil-banks beyond the site of the works.
- Classification of material from shafts and tunnels.** 76. In the case of tunnel and shaft excavation, when "solid rock" or "more or less hard material," or "solid rock" and "more or less hard material" occur, provision is made on the longitudinal section and in the schedule of quantities for the materials to be classified under these headings. No guarantee is given as to the means which may be ordered for excavating such work. The actual excavation done in tunnels, shafts, and open trenches will, however, be paid for, not exceeding that ordered or specified.
- Works covered by 1 cubic yard of excavation.** 77. The schedule price for one (1) cubic yard of excavation in any situation shall include the cost of taking out and placing said excavation aside in separate temporary spoil-banks beyond the actual site of work, together with the works comprised in clauses 41 and 107.

#### *Sub-ducts.*

78. Sub-ducts to be constructed, when decided on, along lines of tunnels and open trenches, commencing on each length midway, or thereabouts, between two working shafts or faces, 33 inches below invert of sewer, &c., or as shall be directed at the time, and having a fall towards each working shaft, or face of such gradients as may be determined at the time. Sub-ducts of 9 inches, or of a greater or less internal diameter, to be laid immediately underneath the timber floor of tunnel or open trench, or at sides of sewer, in hardwood boxes varying in size and dimensions as shown on drawing. Said boxes to be laid straight and true to levels decided upon, and the pipes to be laid therein, upon, and surrounded by sandstone chippings and quarry refuse. Dry sandstone packing, 4-inch gauge, to be put over pipes.

79. In solid and disintegrated rock the excavation for sub-duct to be executed as shown on cross-sections, and as shall be directed, and the sub-duct to consist of glazed stoneware spigot and faucet pipes of 9 inch internal diameter, more or less, as the case may be. The pipes to be jointed dry, and the filling above same up to under side of sewer lining, to be of dry stone, hand-packed, as before described. The Engineer may also, if he deems it necessary, order the pipes to be jointed all together, or in part, with tarred gasket, 1½ inch deep, and cement mortar 1¾ inch deep. The mortar to be prepared of 1 part cement to 2 parts of sand.

#### *Existing Gas, Water, and Sewer Pipes, and Sewers.*

80. During the excavation and construction of these works, the contractor is to take every precaution and provide and execute all, which in the opinion of the Engineer is necessary, to prevent the existing gas, water, or sewer pipes, and sewers wherever met with, or that are adjacent to these works, from injury, and to maintain the same at his sole cost, until, in the opinion of the Engineer, the refilling of excavation and the general progress of the works render further precaution unnecessary. All damage to existing water, gas, or sewer pipes, and sewers, to be repaired at once by contractor at his own cost to the satisfaction of the Engineer.

#### *Railway and Tramway.*

81. Before proceeding to excavate underneath or near any railway or tramway, the contractor must give ample notice in writing to the District Railway or Tramway Engineer of his intention to commence operations; and he must adopt such precautions as the said Engineer may think necessary or prudent for the safety or preservation of the traffic over the said railway or tramway. The contractor

will be held wholly responsible for all stoppage of traffic, delays, accidents &c., that he or his men may cause, no matter how brought about, during the execution of the work under or near any railway or tramway.

82. The Railway Commissioners may, if they consider it advisable, place a watchman or watchmen on all work to be executed under or near any railway or tramway, for the purpose of seeing that no danger to the traffic is allowed to occur; but this shall not relieve the contractor of any of the responsibilities set forth in the foregoing clause, and the expense of such watchman or watchmen is to be borne by the contractor.

*Diverting Water.*

83. During the construction of these works the contractor shall, at his own cost, do all work which may be required for the effectual diversion of surface-water, subsoil water, and storm-water across and beyond the site of the works, to keep the trenches free from water during the whole time the works are in progress, and in preventing any injury to the works by floods or any other causes.

*Diverting Sewage.*

84. During the construction of the works in general, and of all points of intersection of existing and new sewers, and until completion of all works connected therewith, the contractor, at his own cost, to execute all the works of every description required to prevent injury to private property or to the existing or new works by sewage, and erect and construct watertight fluming across sites of works for the purpose of conveying constantly the whole of the sewage which may flow in said sewers at any time, to the entire satisfaction of the Engineer.

*Unwatering.*

85. All water which, during the progress of the work, may drain into excavations, to be properly, effectively, and continually pumped out, and the whole to be kept dry until after the completion, setting, and hardening of all brick and concrete work and pipe sewers, at the sole cost of the contractor. The greatest care to be taken to prevent running water passing over any of the brick, concrete, and pipe-work until it has set perfectly hard; any concrete, mortar, and cement jointing exposed to wash of water must be taken up at once, and replaced by fresh concrete, mortar, and jointing, at contractor's expense.

*Temporary Bridges, Roads, Fences, &c.*

86. The contractor shall provide, erect, and maintain all necessary temporary bridges, footways, &c., over rivers, creeks, water-courses, open trenches, and underneath railways, tramways, roads, streets, and foot-paths, so as to ensure that the flow of water or traffic is uninterrupted, as the case may be, during the period of contract. He shall also provide, erect, and maintain all temporary fences, hoarding-barriers, night-lights, &c., necessary to thoroughly protect both the general public, land, and property; and shall also properly ballast the temporary roads which may be required for the convenience of the public, and which the Engineer may order.

In the event of the contractor refusing or neglecting to carry out any of the above work, the Engineer shall have power (after having given twenty-four hours' notice in writing of such intention) to do the same at the contractor's expense, and the cost thereof shall be charged to the contractor on account of this contract.

*Temporary Timbering.*

87. During the excavation the contractor to adopt every precaution, and provide all materials, as planking, strutting, shoring, timbering, piling, sheet-piling; all packing materials, as straw, asphalted felt, bags, tarred gasket, puddle, &c., and carefully execute (unless where otherwise specified) all piling, sheet-piling, timbering, &c., where they are required, and carefully and securely close up and pack against the outside of all joints and open spaces between polling-boards, sheet-piles, or timbering, wherever they occur, and caulk open joints where directed, and execute whatever may be required to prevent any buildings, or other superstructures, road and other surfaces over and adjacent to the line of sewer, from settling, cracking, being shaken, slipping, or falling in, and to prevent any portion of the floors, sides, roofs, and end faces of excavation, beyond the exact cross-sections and dimensions determined on, from slipping, falling, running in, or being forced through joints and open spaces in the timbering and sheet-piling, and maintain said timbering, piling, shoring, &c., where and when directed till completion of the works, to the entire satisfaction of the Engineer and at the contractor's sole cost.

*Filling.*

88. The materials referred to in clauses 75 and 93, to be used in filling in the spaces between sides of excavation, and of concrete and brickwork, over sewers, into headings, filling in abandoned open channels, low ground adjoining channels, into road and other embankments, &c., as shown on drawings and as ordered by the Engineer. Sand only to be used in filling over sewer between copings on lines of aqueducts. All filling, unless otherwise specified, to be brought up in level layers, spread 6 inches thick, each layer to be rammed (and watered if directed) until approved of, before the succeeding layer is put on. This filling to be carried up to the surface of the ground, or to such other level or slope, &c., as may be directed at the time. Embankments to be formed as shown on longitudinal sections, to be finished in horizontal layers 9 inches thick after spreading, to be well rammed (and watered when directed) until approved of before the succeeding layer is put on, with side slopes and top widths, as shown on drawings, or as may be determined at the time; to be finished with such benches and curves as shall be directed. Only iron-shod rammers of not less than 10 lb. weight, of approved pattern, to be used, and one man to be employed in ramming to each man employed in filling.

Embankments.

Rammers.

89. Material only of approved quality shall be used in refilling the spaces between sides of pipes, &c., and sides of excavation, and over pipes, &c. The refilling to be done in level layers, spread 6 inches thick (and watered when directed), each layer to be carefully and separately rammed as hereinbefore specified. The lower layers up to level of top of pipes to be carefully packed and rammed solidly under and at sides of pipes and socket-joints with spades or other narrow tools. The filling to be done as above described, to such a distance below the level of the street, road, path, &c., as the case may be, to admit of the ballasting, metal, or other covering being replaced.

Filling pipe trenches.

90. On completion of concrete, brickwork, &c., in shafts, the space between the sides of excavation and outer face of brickwork or concrete to be filled in in 6-inch layers, well rammed (and watered where directed) with materials provided for in clauses 75 and 93, great care being taken in lowering the materials to the bottom, so that stones do not fall on top, or against sides of pipe-shafts, brick or concrete lining. Where stones are permitted to be used as filling they are to be put in in alternate layers with the earth, and at least 12 inches of earth to be placed nearest and round the pipe-shafts, brick or concrete lining.

91. Shafts not required as manholes or ventilators, on completion of contract, or when directed by the Engineer, to have all timber withdrawn (as specified in clause 95), and to be carefully filled in.

Quarry filling.

92. Where it is found necessary to carry the excavation deeper than the underside of concrete foundations, in order to obtain a compact solid bottom, the portion so excavated to be filled in to the underside of concrete foundation, or as may be directed, with good quarry filling, spread 6 inches thick, rammed and watered until approved. The price per cubic yard for providing and putting in position quarry filling is to be 1 cubic yard of "filling."

Extra material required.

93. All soil, sand, and other materials which the excavations of this contract do not supply, and which it is necessary to obtain for the completion of the embankments and filling of every description, the contractor shall procure, of approved quality, from any other source or land outside the limits of this contract. The cost of providing to be included in the price per cubic yard for "filling."

Timber left in.

94. As the works proceed, all shoring, timbering, staging, temporary bridges, piling, sheet-piling, &c., shall be withdrawn, excepting permanent timbering, as shown on drawings, and in all other cases where, in the opinion of the Engineer, the withdrawing of the same is impracticable, or would endanger the safety of the works, buildings, streets, and other surfaces over and adjacent to the works, when the contractor must obtain an order in writing, signed by the Engineer, to the effect that piling, sheet-piling, shoring, timbering, &c., may be covered up.

Withdrawing timbering.

95. In withdrawing timbering from open trenches and shafts, the same shall be commenced from bottom of excavation, or, as the Engineer may direct, from lowest practicable portion of same, and continued upwards; the contractor to exercise every precaution by means of intermediate shoring, plankings, props, &c., and the filling in around and above sewer and shaft lining to be carried on simultaneously with the withdrawing of the timbering. The cost of withdrawing to be included in the price per cubic yard for "filling."

Measurement of "filling."

96. Refilling into excavation shall be measured, the net dimensions of excavation, less the actual displacement of any permanent works. Any other "filling" shall be measured the actual cross-sections ordered.

Works covered by 1 cubic yard of filling.

97. The schedule price for one (1) cubic yard of filling in any situation shall include the cost of removing the materials from temporary spoil-banks, or from other sources outside the limits of this contract, and the depositing same in accordance with the plans and specification, together with the work and material described in clauses 92, 93, 95, and 107.

#### *Surplus Material.*

Lead on spoil.

98. The excavated material not required, or approved for filling, to be removed off the works to such places as shall be ordered, spread and trimmed, and to be paid for as lead.

Measurements.

99. The surplus materials to be measured, the actual net excavations less the actual net refilling.

Length of lead.

100. The distance of lead shall be measured from top of shaft or end of open cutting to centre of spoil-bank or other place of deposit.

#### *Restoration of Roads and other Surfaces.*

Wood-blocked streets.

101. After the filling in of sewer trenches and shafts has been consolidated and approved, the surfaces of roads, streets, paths, &c., to be at once restored in the manner hereafter described, viz.: In the case of streets which are wood-blocked on concrete, the City Surveyor will replace same on behalf of the contractor, at the rate per square yard stated in specification; in the case of roads or streets which are ballasted and metalled, 9 inches of ballast shall be laid thereon, and after this has been blinded with selected and approved material, the metal put aside, as specified in clause No. 45, shall be evenly spread and rammed until approved; in the case of roads or streets which are ballasted only, 9 inches of ballast shall be laid thereon, and blinded as above; and in the case of other coverings, the surfaces to be restored to the same condition as they were before the commencement of the work. Materials damaged, injured, or otherwise not approved of as fit for reinstating surfaces, to be replaced by contractor with new, sound, and approved materials of their respective kinds, together with any additional ballast which may be required, over and above that found on the site of the excavation and referred to in clause 45. If, however, in the opinion of the Engineer, sufficient hard rock is excavated from the tunnels, shafts, and open cuttings, the contractor will be allowed to break such rock to a 4-inch gauge, and use same for restoring road surfaces.

Ballasted and metalled streets.

Ballasted only streets.

Damaged materials from road surfaces.

4-inch gauge sandstone ballast.

Clearing roads and streets.

102. Immediately the pipes are laid, or concrete and other work in connection with shafts, manholes, lampholes, &c., are executed, and the ground filled in over same in any length of sewer, it is to be distinctly understood that all surplus material is to be carted away, the road cleaned until approved, and the road and other surface to be made good, flush with surrounding surfaces of roads, paths, &c., to the satisfaction of the Municipal authorities and the Engineer, in accordance with the specification; and if the contractor fails to do this, the Engineer shall be at liberty, without further notice, to get the roads cleaned, and the road and other surfaces made good at contractor's cost.

Maintenance of roads, streets, &c.

103. The contractor shall maintain the surface of the roads, streets, &c., after the excavations have been filled in, where the streets, roads, &c., have been broken up or injured during the progress of the work, during the period of the contract time, and afterwards during the period of maintenance, and shall from time to time make good any sinkings in the surface, and shall provide any additional metal, ballast, or other material that may be necessary during these periods.

Cost.

104. The whole cost of work and materials in connection with the restoration of road and other surfaces to be solely borne by the contractor.

Municipal certificates.

105. The contractor shall, at the termination of the period of maintenance, procure certificates from the Municipal authorities concerned, that the roads, &c., in their respective districts are in a satisfactory condition.

*Restoring*

*Restoring Buildings, Walls, Fences, &c.*

106. All buildings, walls, fences, and works of any description met with on the site of the works, that it is found necessary to remove or that may be disturbed, are to be replaced or repaired, at the sole cost of the contractor, and left, at the completion of the works, in the same order and condition as they were before the commencement of the works.

*Trimming.*

107. On completion of all embankments, cuttings, and filling, all top surfaces and slopes to be dressed and trimmed off to the specified inclinations and surfaces, and to such other inclinations, slopes, and surfaces as may be directed at the time, and all materials accumulating after trimming and levelling top surfaces and slopes, &c., shall at the completion of the works be removed, carted away, or spread about, as may be directed by the Engineer; and the schedule rates for filling and excavation shall include and cover all costs for trimming and dressing surfaces, and of removing, carting away, or spreading about all superfluous accumulations at the conclusion of contract.

*Sodding.*

108. On completion of embanking and filling, where ordered, all top surfaces and slopes to be protected by sodding. The surfaces to be sodded are to be boxed out the widths and depths required for the reception of turf-lining. The materials boxed out to be dealt with as provided in clause 107. The sods to be the best obtainable within a radius of 5 miles, of approved quality, not less than 3 inches in thickness and 10 inches square, full cut, with square arrises, to be laid in approved bond on their flat beds, close jointed over all top surfaces of filling or embanking, to be beaten down as the work proceeds with proper tools, as shall be directed, and when finished to present throughout perfectly smooth and plain surfaces. If the season requires it, the turfing to be properly and regularly watered to ensure the grass taking fresh root. The boxing out and turfing to be carried out simultaneously, and no greater area to be boxed out at any time than can be covered with turfing during two working days. The price for sodding to cover all the work described in this clause.

*Soiling and Sowing.*

109. All slopes of embankments, cuttings, and filling, after they have been trimmed, to be covered, when directed, with a layer of surface soil, to be carefully rolled, and when finished to be of a thickness of not less than 3 inches. All slopes, soiled or not soiled, of embankments, cuttings, or filling (where not sodded), after they have been trimmed, &c., and when ordered, to be sown with couch grass seed, as shall be directed, and to be rolled afterwards.

*Piling, Timbering, &c.*

110. Piling to be executed as required and ordered, but the actual quantities required can only be ascertained during the progress of the excavations, and as the trial piles are sunk. Quantities of piling.

111. The whole of the timber which in the opinion of the Engineer is required for each part of the various works, or for such portions of the same as he may determine at the time, shall be cut and delivered on the ground prior to contractor commencing the excavation of such part or portion of said work. All timber, when brought on the ground to be at once properly and carefully stacked on even plain surfaces, and all timbers to lay perfectly straight in the stacks; all timbers bent, split, unsound, or objected to on other grounds by the Engineer shall be removed by the contractor from the ground within twenty-four hours after such objections have been made known to him, and if he neglects to do so they shall be removed without further notice by the Engineer, at contractor's cost; all rejected timbers to be marked by a brand or axe-mark. Delivery. Stacking. Rejection.

112. All timbers required and delivered for each respective part of works, to be, when dressed, pointed, placed, and fixed in position, of the various lengths and dimensions indicated and shown on the drawings referring to such works, or of such other dimensions which the Engineer may deem suitable for the works. Dimensions.

113. All square or round piles shall be sharpened (pointed) at the lower end, the sharpened sides to be cut to a batter of 1 to 6, finished at lowest end with a flatter diamond-cut point, as shown on drawings; the lowest point to be exactly in the straight line of the true axis of the pile, and the sharpened sides to be cut true to the axis of pile to prevent same from twisting and slanting when being driven. Pointing piling.

114. All lower ends of sheet-piles to be sharpened on one side only to an inclined edge as shown on drawings, and as shall be directed, to ensure the pile when being driven to drift towards the pile last driven; all sheet-piles of the same length and thickness within each respective panel to have their ends sharpened exactly the same as regards length of cut surface and inclination of bottom edge. Pointing sheet-piles.

115. All round, square, and sheet piles to be straight-grown timber, and before being driven, all square, angle and guide piles to be faced truly straight on the sides against which sheet-piles are to be driven and finished as shown on plans; all round piles for staging across rivers, against which planked sides for concrete filling are to be fixed, to be finished with a straight adzed face the depth required for reception of said planking. Dressing piles.

116. All sheet-piles to be perfectly parallel, and, before being driven, to be truly faced and fitted to each other within each panel (between each pair of guide-piles), as shown on drawings, forming a straight close joint.

117. All round, square, and sheet-piles are to be hooped with wrought-iron rings at the top, such rings to be of not less than 2 x 1 in. iron for the square and round piles, and of not less than 2 in. x ½ in. iron for the sheet-piles; stronger rings to be provided and used when directed. All piles are to be pointed, as hereinbefore described, and where driven into hard ground, when directed and ordered, the points to be protected by wrought-iron steel-pointed shoes, weighing, except where otherwise directed, 28 lb. each for the main and guide piles, and 8 lb. each for the sheet-piles. All shoes to be provided and made of such shape and workmanship as the Engineer shall approve of. They are to be carefully and truly fitted and fixed on to points of piles, and the lowest points of shoes for the round and square piles to be fixed exactly in a straight line with the axis of each pile. Ringing and shoeing piles.

118. The exact lines and positions of all piles shall be carefully and correctly ascertained and staked out by the contractor, to the satisfaction of the Engineer, and all stakes fixed in water or river-beds

to extend above high-water level before any piles are placed and driven. After the staking out, piles to be placed truly plumb, or to such batters as may be directed, in their respective positions between guide-wales. All sheet-piles to be placed, truly plumb, between each pair of guide-piles, and lowered into their respective positions between two walings, fitted and fixed on both sides of guide-piles, as shown on drawings.

Pile-driving

119. After the excavations for the various foundations have been completed, timbered, and approved, the pile-driving as indicated on drawings, or where ordered, to be proceeded with as follows:— In order to ascertain the lengths of piles required for the foundations of the different piers and abutments, as indicated on drawings, the contractor is first to drive trial piles, in the manner hereinafter specified, in positions required for permanent purposes, one for each alternate pier, or as shall be directed. Any extra expense in connection with trial piles to be borne by the contractor. After the different lengths of piles required for the works have been in this manner ascertained, the permanent piles to be placed in their exact positions, and then to be driven perfectly plumb (or to such batters as may be directed) until tested and approved, as specified.

Weight and fall of ram.

120. Long piles from 25 feet and upwards, of 12 inches and greater diameters, to be driven with a ram weighing from 20 to 30 cwt., having a drop over head of pile of not less than 5 feet, the drop to increase in height as the pile is driven, as shall be directed. Any pile driven with a ram of 20 cwt. or more, as the case may be, falling 10 feet, to be driven until at the last stroke it does not drive more than the specified depth, and any pile not standing this test to be drawn when ordered, and to be replaced by a longer pile. Shorter piles may be driven with a ram of less weight than 20 cwt.; and when rams of lighter weight are allowed to be used over shorter piles, sheet-piles, &c., the height of drop to vary from 12 to 18 feet, as the Engineer shall direct.

Pitching piles.

121. All piles to be pitched of such lengths as will ensure good sound heads at the levels shown on drawings, or as may be given at the time by the Engineer. No pile shall be pitched until measured and marked by an officer of the Department, nor cut off until tested and approved. Tenons, 8 in. x 4 in. x 6 in. deep, to be neatly cut on pile heads. Any pile which may be too short, or which may have been driven out of plumb, or out of the stipulated batter, or which may split below the level of the required height when driven, to be at once drawn, and to be replaced by a sound pile, driven plumb, or battered, as the case may be, of the required length, at contractor's cost. The contractor must be careful not to pitch any pile which he is not satisfied will be long enough. Scarfing of piles is not permitted. The driving of piles to be commenced and carried on in such order of works as specified, and as shall be directed.

Close and sheet-piling.

122. Where close piling is shown on drawings, all angle-piles and guide-piles to be driven first, after which the upper guide-wales are to be fitted and fixed on to heads of main piles, and then the whole of the sheet-piles of one panel, after being prepared and fitted, to be lowered and placed into position for driving, after which they are to be driven each a few feet at a time, so that the whole panel of sheet-piles shall be driven to the specified depth, as near as possible together; in this manner each panel is to be driven, one after another, unless otherwise ordered.

Timbering, framing, staging.

123. As the sheet-piling and excavation between same proceeds, the lower guide-wales to be fitted and fixed together with all transverse, diagonal, and angle struts as shown on drawings, and with such additional and intermediate struts as the Engineer may deem necessary during the progress of the works.

Capsills, transverse sleepers.

124. Capsills to be accurately mortised, placed upon bearing piles, and to bear truly on pile-heads. Transverse sleepers to be spaced as shown, placed upon capsills, halved out  $1\frac{1}{2}$  inch deep at points of intersection; and planks to be laid and close-fitted between sleepers upon the capsills. Sleepers and planks to be secured to capsills with wrought-iron  $\frac{1}{2}$ -inch square 9-inch spikes.

Net quantities

125. The net quantities of all permanent timbering, planking, and piling, as shown on drawing, and where ordered, and of all other shoring, timbering, piling, sheet-piling, which the Engineer has ordered to be covered up, shall be ascertained by measurement before any timbers are covered up, and paid for at schedule rates, which shall cover and include the cost of timber fixed in works, iron used in fixing same, wrought-iron shoes for piles, packing materials, &c.

Measurements.

126. The measurements to be taken to ascertain the net quantities of timber to be paid for under this contract, shall be as under, viz.:—For all hewn and sawn timber where ordered, in any situation in the construction of these works, the width multiplied by the depth and the actual length (tenons included) shall be the net measurement. For round timber, other than piles, ordered to be covered up, the diameter given is to be measured, exclusive of bark, at the smallest end, and the area of such diameter multiplied by the actual length fixed in the works, shall be the net measurement. For piles where ordered, in any situation in the construction of these works, the measurement shall be the actual number of lineal feet (tenons included) of each such pile as placed in position, driven, and fixed in the works.

#### *Carpenter's Work.*

127. The whole of the carpenter's work for girders, planks, working-platforms, railings, &c., to be of the timbers specified or approved, and of the best workmanship, to be framed, fitted and fixed, finished, cleaned off, rough parts sand-papered (where directed), and completed in the best possible manner, in strict accordance with drawings, and measurements indicated and dimensions figured thereon, with all necessary nails, spikes, screw-bolts, drift-bolts, wood-screws, coach-screws, wrought-iron straps, stays, and other fastenings of the best quality and approved workmanship. All holes for bolts, spikes, nails, &c., to be bored with the exact augers, and all mortise holes and tenons, &c., to be cut so as to fit exactly, to prevent timbers from splitting. All timber split during the progress of the work and its term of maintenance to be at once replaced by sound timber. All scantlings requiring scarfing in places are to be joined together as shown on sections, and as shall be directed.

#### *Cylinders.*

128. The cylinders for piers, buildings, &c., to be hoisted up in the necessary lengths, accurately placed in position, lowered, and the sinking proceeded with by weighting as long as cylinders continue to go down, the tops to be finished at same level. As the cylinders are sinking into the ground the materials inside to be removed by such excavating appliances as may be approved. On completing the excavation of each cylinder to secure and approved foundations, the water to be expelled by pressure of air or other approved

approved method, and on having ascertained the cylinder to be perfectly true in position and plumb, the bottom to be thoroughly cleaned and levelled, after which the concrete, as specified in clauses 140 to 145, and 148, to be filled in for the first 6 feet under air pressure, or as shall be directed, till twenty-four hours after having deposited same in position. Above this level the cylinders to be filled in with concrete, as specified, to level of top of cast-iron cap. Concrete filling

129. The sinking of cylinders to be continued, if required, to greater depths than shown on drawings; such additional depths to be paid for at schedule rate, which is to include all charges, except cost of extra lengths of cast-iron cylinder; a corresponding deduction to be made if secure foundations are obtained at lesser depths. Sinking to greater depths.

130. If rock, boulders, dead logs, &c., are met with in an irregular manner, or at one side, while sinking cylinders, the air-lock, or other approved method, must be applied, and the obstructions removed, so as to ensure the cylinders to sink plumb, and to rest on a perfectly flat and solid bottom; no powder or other explosives to be used in the removal of such obstacles. The sinking to be proceeded with as soon as possible after delivery of ironwork, to ensure the erection of bridges, &c., without delay. Rock, &c.

131. After the sinking is completed, making up or fitting lengths are to be provided and cast, at schedule rate, so as to bring the top of the cylinders to the exact level shown on drawings. Fitting lengths.

#### *Sewers, Storm-water Channels, &c.*

132. As the cross-section area of each respective length of tunnel and open trench has been excavated, cleaned, and approved, the sewers, storm-water channels, and other works specified, shown on drawing and determined by the Engineer, to be built therein.

133. In rock and other compact formation the concrete and brick lining to be filled in solid between internal surfaces of sewer, storm-water channel, &c. (less, in the case of concrete,  $\frac{3}{8}$ -inch space required for cement facing), and surfaces of tunnel or open trench. Tunnel lining.

134. Under all shafts, when ordered, relieving arches of brick or concrete to be built of a thickness, form, and width, as shall be directed at the time. Under temporary shafts excavated by contractor for his own convenience, the extra brick and concrete work to be at the contractor's cost. Relieving arches.

135. The thickness and description of the lining, whether concrete only, of brick and concrete, or of brick only, required for the different portions of tunnels and open trenches, depends upon the nature of the ground through which they are driven or excavated, as the case may be, and shall be determined by the Engineer as the excavation advances. Lining

136. In strong compact rock,  $4\frac{1}{2}$ -inch concrete and brick lining will be requisite; and, as the materials occur less compact, two or three rings of brickwork or brick and concrete lining, as shall be determined by the Engineer as the tunnel proceeds, may be required.

137. Junction chambers for sub-main and reticulating pipes, upper inlet chambers in shafts for junctions with reticulating pipe-sewers, drop-shafts, penstock and gas-check chambers, flushing-stations, weir-chambers with storm-water discharge pipes, ventilating shafts, aqueducts on arches, and on wrought-iron girders, syphons, buildings, bridges, culverts, storm-water channel junctions, intersections with existing roads, sewer, and water pipes, branch inlets, man-holes, gullies, road work, &c., to be constructed in connection with main sewers, branch sewers, and storm-water channels of concrete, brickwork, masonry, cement-facing, iron, timber, stoneware, and cast-iron pipes, &c., of the exact sizes, heights, shapes, forms, curves, and with such ornamental red, white, and other bricks, panels, mouldings, piling, &c., as shown on drawings, and as may be ordered and directed at the time. Shafts to be built of concrete or brickwork, at the option of the Engineer, to the thickness and shape shown on drawings, or as shall be directed. Curved junctions for branch, oval, or pipe sewers, as shown on drawings, and where ordered, to be constructed in concrete, to enter the main sewers at such levels above the invert, with such radius and longitudinal fall as shown, or as shall be determined at the time. Junctions and inlet chambers.  
Curved junctions.

138. Cast-iron pipes, landing platforms,  $\perp$  bars, scupper boxes, gully gratings, girders, over weir and shaft-chambers, or other castings, flushing-valves, gas-check frames, penstocks, man-hole covers, saddles, stop-board grooves, &c., to be walled and built in, as shown on drawings; at points of intersection, branch junctions, gas-check chambers, pipe ventilating shafts, where ordered, &c. Cast-iron work.

139. Step-irons, supports to wrought-iron ladders, holdfasts, ends of wrought and cast iron girders, bars, &c., to be built into side walls of shafts, and anchor bolts for fixing cast-iron frame for penstocks, gas-checks, &c., to be built into walls of shaft chambers, as shall be directed. Flap-traps to be built in where ordered. Permanent putlog holes in shapes of reveals, for temporary staging, are to be left in walls of gas-check chambers, shaft chambers, and shafts where directed; and, in all cases, unless otherwise ordered, the reveals are to be built round of the same thickness of brick or concrete as shown on walls of shafts or chambers at the places referred to. Putlog holes to be included in the schedule price for brick-work. Stop-board grooves to be formed in concrete where ordered. Building in wrought-iron work.

#### *Concrete work.*

140. Bluestone concrete used in these works to be composed of one part of cement, two parts of sand, and four parts of bluestone metal. The bluestone metal to be broken to a size to pass freely with its largest dimensions, through a ring of  $1\frac{1}{2}$  inch in diameter, to be free from dirt, quarry refuse, and to be screened through a sieve of  $\frac{1}{2}$  inch meshes, and then to be washed with fresh water until approved. Bluestone concrete.

141. Special concrete, if required, to be composed of two parts of cement, three parts of sand, and seven parts of bluestone metal, prepared as specified in clause 140. Special concrete.

142. Sandstone concrete, where ordered to be used in these works, to be composed of one part of cement, two parts of sand, and five parts of sandstone metal. The sandstone metal to be free from dirt, quarry refuse, sieved (as specified in clause 140), washed, and of a size to pass with its largest dimensions through a ring of 2 inches in diameter. Sandstone concrete.

143. All concrete to be prepared close to where it is required on a sawn timber plank platform. All proportions to be correctly ascertained by measurement, the metal to be well washed when put on the platform and levelled at top, the sand to be placed in a level layer upon the metal, and the cement to be placed in a level layer upon the sand; after which all materials to be carefully mixed and turned over twice, and then the whole to be mixed with fresh clean water, and thoroughly turned over twice, and oftener if required, until, in the opinion of the Engineer, it shall be fit for the work before it leaves the platform; Mixing.

platform; it shall then be conveyed to the works as shall be directed, and be used fresh. Referring to clause 10, the gauge boxes are to be made to the following internal dimensions, viz.:—For stone 3 feet square in plan, and for sand 2 ft. 6 in. square. The depth of each box to be made so as to give the correct proportion of material.

Mixing by machinery.

144. If the concrete is made by machinery, all materials to be prepared as previously described, then to be mixed dry, and afterwards with fresh clean water, as may be directed and as shall be approved of; to be used fresh.

145. The different kinds of concrete described under clauses 140, 141, and 142, as bluestone concrete, special concrete, and sandstone concrete, respectively, shall be used in the various parts of these works as specified, and as may be ordered at the time.

Order of work.

146. After the excavation for foundation of each respective part of the works, and the piling, planking, timbering, staging, &c., for same have been completed, and the bottom of excavations has been cleared and approved, the concrete work to be built thereon to the exact dimensions, and of such forms and shapes as shown on the drawings referring to each respective part of said works.

Boxing, timbering, centering.

147. The contractor to provide, at his own cost, approved concrete boxes, centres, staging, shoring, planking, &c., of the exact forms, shapes, curves, &c., required; in a proper, secure, and substantial manner, due allowance being made for  $\frac{5}{8}$  inch thick cement-facing over all internal exposed surfaces of concrete work; and great care being taken that all centering and concrete boxes can be easily withdrawn. After completion of any portion of the concrete, the concrete boxes and the centering, as the case may be, shall not be removed until the Engineer or his Superintending Officer has given written permission to that effect.

Method of work.

148. The concrete, after it has been approved of, to be conveyed into cast-iron cylinders, shafts, excavations for piers, and other deep foundations, in skips of approved size, and to every other part of the work as may be directed, and as shall be approved of, and tipped into same and upon the surface of each layer from a height not exceeding 18 inches, to be quickly spread out in layers not exceeding 9 inches in thickness. Commencing at each part of the work at lowest level of excavation or surface of work, the concrete to be brought up in horizontal layers or parallel with specified longitudinal gradients of works; each layer, when spread, to be quickly and evenly rammed all over until approved of.

Below springing line.

149. In circular, oval, elliptical, and open channels, the concrete to be filled first into central pads, or, in accordance with the transverse curvature of invert or bottom of channel, into central strips, not exceeding 2 feet in width for wide open channels, then into bottom layer right up to extreme width at sides, and then into the curved sides, as shown on drawings, up to top of side walls in open channels, or to level of springing in closed channels.

Above springing line.

150. After the concrete has been carried up to the level of springing, all concrete arches to be commenced at both walls or abutments simultaneously, and carried on towards centre line in radiating parallel strips, spread 9 inches thick, of the whole width of arch, or in lengths as specified in clauses 157 and 158, and as shall be directed at the time, and rammed as before described. Where the arch is thicker than 9 inches, the lower layer to be always completed throughout 12 inches in advance of the upper succeeding layer.

Above arches.

151. After completion of the closing arch, all concrete work above springing of the same, at sides of arch, in manholes, chambers, shafts, &c., to be carried up in the same manner as specified in clause 148, and of the exact dimensions, curves, and thicknesses, &c., as shown on drawings.

Covering up work.

152. No portion of the concrete work described in the previous clauses (unless otherwise directed in writing) to be covered up with earth or brickwork until it has been examined and approved of by the Engineer. Any leakage that may appear in each layer to be carefully attended to and be made good and repaired at the time, as shall be approved, before each succeeding layer is put on.

Leakage.

Joining lengths.

153. All end faces of layers of concrete to be stepped back at each respective length of sewer or other work, as shall be directed, to be carefully washed clean with fresh water, and then to be grouted prior to each layer of the adjoining length being commenced and joined on to the same.

Injury to work.

154. No traffic shall pass over any fresh concrete work except where such is duly protected against injury by boarding, planks, or any other means approved of by the Engineer or Superintending Officer at the time.

Treatment after any stoppage.

155. In the event of any stoppage occurring to the work, from whatever cause, or in anticipation of rainfall, the contractor, before temporarily stopping work, shall finish it off at whatever level the work may be raised at the time, by thoroughly grouting the whole of the surface with cement grout. The contractor also to provide and have always on hand approved tarpaulins for the purpose of covering all fresh concrete work and brickwork, when ordered, so as to protect the same during all stoppages in the daytime and at night from sun and rain, and during hot or dry weather, to keep said tarpaulins watered to prevent the work from cracking and setting too quickly on the outside.

156. In all cases where a layer at mid-day or at evening is left incomplete the said layer shall not be continued after any stoppage until the surface of the lower and the end of the upper layer have been washed clean and then grouted with cement grout.

Order of work in open trench.

157. The concrete and brickwork in sewers and channels to be built in open trenches, in three continuous lengths of 40 feet each (unless otherwise directed), that is to say, when the arching-in of the first 40 feet commences, the next length of 40 feet must be completed up to the springing of arch, and the third 40 feet length must be in progress, and the latter so timed that the work is raised up to springing of arch by the time the closing-in of the adjoining length commences.

Order of work in tunnel.

158. The concrete and brickwork in sewers and channels on completion of each length of tunnel to be carried on in each length, from the middle towards each end simultaneously, in three continuous lengths of 16 ft. 6 in. each, unless otherwise directed; that is to say, when the arching of the first 16 ft. 6 in. commences; the next 16 ft. 6 in. length must be in progress from height of invert up to the springing of arch; the third 16 ft. 6 in. length must be in progress between floor of tunnel and level of invert of sewer.

Order of works.

159. At all plinths for piers of arches and abutments, piers of arches, abutments, between wings of abutments, pilasters, foundations, of buildings, culverts, &c., unless otherwise directed, each layer to be completed right through the whole length and width of the work before the succeeding layer is put on.

Sundry.

Where concrete has to be walled or filled in against and between brick facings or masonry, the latter in each case to be well wetted and grouted, and then to be covered with a coat of cement mortar  $\frac{1}{2}$  inch thick before

before the concrete is built against it, and it is to be brought up simultaneously with same in layers 6 inches thick after ramming, the brick or masonry facings, however, being always kept 6 inches (or more, as the case may be) higher than the concrete work up to level of string-course or other defined limit, when the work has to be finished level all through.

160. The brickwork, masonry, and concrete-filling between all arches and at sides of end-arches Aqueducts. to be carried up simultaneously over the whole length and width of every aqueduct, building, or other structure (unless otherwise directed), so that all arches or other structures shall be simultaneously and equally weighted as the brick, stone, and concrete work rises against and over same.

161. The concrete in piers of arches of aqueducts, abutments, and approaches to aqueducts to be Aqueducts. carried up in the first instance from bottom of excavations to level of top of plinths; in the second instance to level of top of skewbacks; in the third instance to level of underside of string-course; and in the fourth instance to level of top of coping of aqueducts.

162. When all piers and abutments of aqueducts have been built to level of springing of arches or Aqueducts. to top of skewbacks, as the case may be, the concrete, brick, and stone arches, as specified, to be built one after another over the openings upon centres, cambered as shall be directed, of such number as shall be specified, strong enough in every part to carry the weight of the arch to be built thereon, till all openings of one aqueduct are arched over, after which the whole of the arches shall be allowed two weeks' time to set and harden before the brick and stone facings, and the concrete, &c., between the arches and at sides of end-arches is commenced. In filling in, between arches and at sides of end-arches the various layers of concrete, of the thickness specified in clauses 148 and 159, as the case may be, to be brought up extending on to extrados of arches till the thickness of each layer at its end is reduced to  $4\frac{1}{2}$  inches above extrados, when it is to be finished at the time with a radiating end face before the succeeding layer is put on. The junctions of the storm-water sewers to be constructed with such curves, shapes, forms, flat arches between wrought-iron rolled girders, &c., as shown on drawings. On completion of junctions, or any Junctions. lengths of storm-water channel, as may be specified, to exact level of underside of iron girders, the latter Iron girders. to be laid transversely over side-walls of junctions or channels, bedded in and upon special cement mortar,  $\frac{1}{2}$ -inch thick, truly parallel to each other, and spaced 4 feet from centre to centre, or as may be specified, after which the concrete filling along side-walls, between and over ends of girders, to be completed. The arches of 4-foot span or thereabout, with a rise of 5 inches in centre between the girders, to be commenced from lower end, and to advance to the upper end of the junction or channel in each case (all girders being carefully stiffened and held in position by props, as shall be directed), with not less than twelve centres or as may be directed, of the exact width of junction or channel between side-walls. The arches Jack arches. to be built as specified in clause 150, and on completion to form a level concrete decking 3 inches above level of top of girders.

163. The concrete lining round sewer on lines of aqueducts and approaches (between underside of Lining round sewer on arches string-course and underside of coping, unless where otherwise specified) to be brought up between brick and stone facings (where such occur) simultaneously with same, as specified in clause 159. The concrete to be finished transversely level with underside of copings. This work to be carried on along each line of aqueduct in the manner and in lengths as specified in clauses 161 and 162.

164. In conjunction with the concrete surrounding sewer, where the latter is built upon arches Bond-rods. and in embankments, the contractor to provide, fit, place in position, and wall in with the concrete, longitudinally in each corner at top and bottom of concrete lining  $\frac{3}{8}$ -inch diameter bond-rods in 16-foot lengths. The ends to overlap 12 inches, and tied together with binding-wire, and, transversely,  $\frac{5}{8}$ -inch diameter bond-rods  $4\frac{1}{2}$  inches above soffit of sewer of such lengths as to fit between the outer brick lining, or as shall be directed, spaced 10 feet from centre to centre. The cost of providing, fitting, placing, and walling-in said bond-rods to be included in the schedule price per cubic yard of concrete.

165. Special care to be taken by contractor to prevent the concrete, &c., from cracking at ends of Cracking. each respective and successive length of sewer and channel in any situation in consequence of the draught in same, by providing and carefully closing up ends of sewers or channels with canvas or wooden shields or doors, and by carrying the works on in continuous lengths, without delays and stoppages, so as to prevent air-cracks or shrinkage.

166. Should, however, cracks occur at ends of any length of sewer, storm-water channel, or other Repairing cracks. work, during its construction and time of maintenance, they shall be opened up for their whole length and depth, and of such width as may be directed at the time, and filled in with neat cement mortar and grout by the contractor, at his own expense, to the satisfaction of the Engineer, or he may order such cracked parts of the works to be taken down and rebuilt at contractor's cost.

167. The concrete work comprised in this contract to be completed to the exact dimensions shown Allowance for rendering. on drawings, less  $\frac{5}{8}$  inch at all exposed inner and outer surfaces, and after the boxes and centerings have been removed, all exposed outer and inner surfaces shall present compact, solid, even, plain faces. All faulty and honeycomb portions, cavities, holes, or other defects, to be at once repaired by the contractor, at his own cost, with concrete or mortar, as the case may require, to the satisfaction of the Engineer. No portion of the concrete work to be covered up with earth or brickwork until it has been examined and approved.

168. After the concrete or masonry has been built to the exact height and gradient (leaving Bedding and fixing cast-iron and wrought-iron work. sufficient space for jointing), the whole of the cast and wrought iron work, after having been washed clean with fresh water, is to be truly laid and jointed in its exact positions, lines and gradients, on fillets of mortar; and as the concrete rises against and around the castings, bond-rods, &c., leaving a space of not less than  $\frac{1}{2}$  inch all round between the concrete and iron, this space round the invert, or underneath bottom of plates and rods, as the case may be, to be filled in with grout or mortar, as shall be directed at the time, whilst above the springing line the outer surface of the castings, &c., to be grouted, and then to be covered with a coat of special mortar  $\frac{1}{2}$  inch thick before the concrete is built on to and around said pipes, castings, frames, &c.

169. All anchor-bolts in connection with cast-iron and wrought-iron work, to be placed in the exact Anchor-bolts. positions required; to be washed clean, wetted, bedded upon, and surrounded with special mortar in each case before the concrete is built round same.

170. All stoneware or cast-iron pipes, &c., where they are shown to be or ordered to be surrounded Laying and fixing cast-iron and stoneware pipes. with concrete, to be clean washed with fresh water, to be laid and jointed in the exact lines and gradients on fillets of mortar, and to be grouted all round as the concrete is being built round same.

171.

Building on or  
against rock.

171. Prior to commencing any concrete which has to be built on to and against rock faces, all shaken and loose rock to be removed; all rock surfaces to be well cleaned, washed, and wetted, and all beds, open joints, and spaces between concrete and rock faces to be carefully filled in with cement mortar, and the cost of thus preparing rock faces, washing, grouting, flushing, &c., to be included in, and covered by the schedule price per cube yard for the concrete.

#### *Brickwork.*

Method of work.

172. In executing the brickwork in any situation in the construction of these works, all bricks to be thoroughly soaked in clean fresh water immediately before being used, and all work to be built with whole bricks (except where otherwise directed), of approved shape and dimensions, to ensure the bond of each particular part of the work being executed, in the manner as shown on drawings, and as may be ordered at the time, with  $\frac{1}{4}$ -inch joints, each brick to be set full upon and rubbed in cement mortar, and every course to be carefully and thoroughly grouted, and well wetted before the succeeding course is put on, care being taken to keep the inner and outer faces of work clean by placing fillets of mortar on outer and inner edges before grouting.

Radiating bricks.

173. The brickwork in arches up to 12-feet span to be built as shown on longitudinal and cross sections in radiating courses, with radiated bricks where ordered, in  $4\frac{1}{2}$ -inch rings, in approved bond, the bricks of each course to break joint over the centre of those above or below. Where the brickwork consists of two or more rings, said rings to be built simultaneously, the lower ring to be always completed throughout  $4\frac{1}{2}$  inches in advance of the upper succeeding ring, each brick to be set full upon and rubbed in cement mortar, and each ring to be keyed in centre and to be covered with a coat of cement mortar  $\frac{1}{2}$ -inch thick, to ensure the thorough bonding between the different rings. When completing any length of brick closing arch of main sewer, storm-water channels, &c., the courses at end of same to be stepped back, as shall be directed, and the end face of each ring or course to be well wetted, and then grouted, prior to each ring of the succeeding length being commenced.

Stepping ends.

Arches over 12-  
feet spans.

174. The brickwork in arches over 12-feet span to be built in radiating through-courses, of rubbed and gauged bricks if directed, in approved bond; to be commenced at both abutments simultaneously, the whole width of same, and to be completed in the most perfect manner throughout the full width and thickness of arch, and to be keyed in centre.

Simultaneous  
progress of  
various works.

175. The brickwork in abutments, abutment piers, wings, parapets, pilasters, spandrels, piers, face-walls, &c., to be built of the various heights, thicknesses, and other dimensions, together with all recesses, projections, panelling, &c., and carried up at each special part or length of work simultaneously with the concrete and masonry, in English or other approved bond, in truly level courses or in courses truly parallel with longitudinal gradient of work, and in such other lines and curves as shown on drawings, or as may be ordered at the time. Where directed, all outer and inner faces of walls to be carried up straight, square, and plumb, with perfectly fair and even faces.

Faces.

Weep-holes.

176. Weep-holes of the sizes shown, to be left through the brick walls where directed, and every-thing to be made good where necessary.

Brick inverts in  
storm-water  
channels.

177. The brick-on-edge flooring of inverts of storm-water channels on steep gradients, as shown on drawings, and where ordered, in any situation in the construction of these works, to be laid in approved bond; each brick to be set full upon and rubbed in special cement mortar, after which the whole of the surfaces of the brick-on-edge flooring to be carefully and thoroughly grouted.

Pargetting  
shafts.

178. The  $\frac{1}{2}$ -inch thick mortar covering (pargetting) of outside faces of brickwork or concrete of ventilating shafts, manholes, sewer-chambers, and sewers, as shown on drawings, shall not be measured and paid for as cement facing, but included in the measurement of the brick or concrete work, and paid for as such.

Putlog holes.

179. All putlog holes to be filled in, taking particular care to match the bricks and the mortar. All external faces of brickwork to be thoroughly cleaned, and all joints to be raked (if ordered  $\frac{3}{4}$  inch deep), and pointed with special cement mortar, and to be finished off with a neatly struck and cut joint.

Pointing up.

#### *Cement Facing.*

Thickness.

180. The whole of the internal and external concrete (and brick surfaces, if ordered), where such is shown on drawings, and in any situation in the construction of these works, to be protected by a cement facing to be put on in two thicknesses; the facing throughout, when finished, to be  $\frac{5}{8}$  inch in thickness. All surfaces of concrete or brickwork to be well wetted before the cement facing is put on. The cement facing of all surfaces of works to be finished, as shown on drawings, and, where directed, with joints struck in imitation of ashlar masonry.

Proportions.

181. The different kinds of cement facing with which the exposed surfaces of these works are to be protected, are:—Cement facing, prepared of cement and sand in the proportion of 1 of cement to 2 of sand; and special cement facing, prepared of cement and sand in the proportion of 1 of cement and 1 of sand. The different qualities of cement facing, as above described, to be executed in the various parts of these works as shall be specified, and as may be ordered at the time.

Qualities.

#### *Masonry.*

Method of build-  
ing ashlar.

182. All freestone and bluestone ashlar of the exact sizes, forms, and shapes, to be built in where shown on drawings, and where directed, simultaneously with the concrete and brickwork. Stones to be washed clean and to be well wetted with fresh clean water immediately before being used, to be laid upon their natural beds in approved bond, and set solidly upon and in cement mortar in the exact positions required; after which all joints between stones, between stones and brickwork, and between stones and concrete, to be carefully filled in with grout. Prior to each succeeding course being put on, the surface of the previous course to be well wetted and washed clean. All ashlar stones to be properly lifted by lewisings, or as shall be directed when being placed in position. All beds and joints to be punched, axed, and picked, so as to form  $\frac{3}{8}$  inch joints throughout. All exposed joints of masonry and between masonry and brickwork, &c., to be carefully raked out,  $\frac{3}{4}$  inch deep, and filled in solid with special mortar, neatly pointed, finished flush with outside faces of work. All masonry to be left perfectly clean at completion of works.

183. Freestone ashlar, to be provided in any situation in the construction of these works, of the Freestoneashlar. exact dimensions, moulded, sunk, weathered, throated, checked, grooved, radiated, curved, channeled, fine-axed, battered, hammer-dressed, worked, rubbed where directed, and finished off in the best possible manner, as shown on drawings, and in accordance with any details which the Engineer may provide during the progress of the works. All stones to be in lengths, as shown, and shall be directed, with truly squared and axe-dressed beds, joints, and backs. All joints from exposed surfaces of stones, and from faces of concrete work, as the case may be, to be axed-in 2 inches deep. The plinths, where shown on drawings, to be weathered with 2 inches parallel drafted margin, under edge of weathering and at all external angles of same. All external faces of plinths, skewbacks, abutments, piers, wings of abutments, &c., to be pitched-faced, no part of which to project more than approved of beyond true line of wall, with a true pitched line along each exposed arris, and with 2-inch parallel drafted margin as shown. All capstones over pilasters to be of one stone. Holes for lewis-bolts to be sunk where directed, of the depth and size required. All quoins, of the exact sizes specified, to be set in and out bond to all angles.

184. Bluestone ashlar to be provided in any situation in the construction of these works, of the Bluestoneashlar. exact dimensions, forms, shapes, moulded, weathered, throated, fine-axed, sunk for reception of cast-iron bearing plates; and faces of weir-crest stones to be radiated, and to have vertical bird's-mouth grooves sunk along centre line of joints, as shall be directed; to be built in with the concrete, brickwork, and freestone masonry, as the case may be, and as the latter rises, where shown on drawings and as may be directed, to be lewised and set as specified in clause 182. All stones to be washed clean and to be well wetted before being used. Holes for lewis and anchor bolts to be sunk, where directed, of the depth and size required.

185. Squared freestone rubble masonry, in any situation in the construction of these works, to be Squared rubble masonry. built of squared hammer-dressed throughstones, unless otherwise directed, in from 10 to 14 inch level courses, as may be directed at the time, or on lines of open channels in courses parallel with longitudinal gradient. Said masonry to be built straight, curved, battered, or sloped, every stone to be set full up on and in cement mortar. When the exposed face of wall is battered, the surface of each course to be at right angles with line of batter, the top course to be built of larger stones, level at top and squared at back. All stones to be punched, dressed, and picked to the exact thicknesses, sizes, and forms required, and set in the most approved bond, with joints throughout not exceeding  $\frac{1}{2}$  inch in thickness. All stones to be washed clean and wetted with clean fresh water before being used. Every course to be carefully grouted before the succeeding course is put on. All masonry to be finished with a neatly struck and cut joint as the work proceeds, and to be left perfectly clean on completion.

#### *Squared Bluestone Pitching.*

186. Squared bluestone pitchers, in any situation in the construction of these works, to be set in sand, in regular 9-inch courses, lengthwise across the channel, in the most approved bond, and in single ring or course round manhole covers, &c. All stones to be dressed and picked so as to ensure the joints all through not to exceed  $\frac{1}{2}$  inch in thickness. No stone to be less than 9 in. x 9 in. x 9 in., but to be longer, curved, and radiated if directed.

#### *Squared Freestone Pitching and Channeling.*

187. Squared freestone pitchers, in any situation in the construction of these works, to be set upon their natural beds in sand or in cement mortar, as may be specified, in regular 12-inch courses, lengthwise across the course of the channel, in approved bond, with  $\frac{1}{2}$ -inch wide joints throughout. No stone to be less than 12 inches deep, 12 inches wide, and 12 inches in length, but to be longer, curved, and radiated if directed. If the pitchers are set in cement, all stones to be washed clean and well wetted with clean fresh water before being used, to be set full upon and in cement mortar, and on completion of pitching, all joints to be carefully filled with cement grout. All pitching in road channels to be set in sand in regular courses parallel with kerb-stones, in approved bond, with  $\frac{1}{2}$ -inch joints, no stone to be less than 12 inches wide, 8 inches deep, unless otherwise specified, and 18 inches long, but to be longer, curved, and radiated if directed. On completion of pitching set in sand all joints to be carefully filled in with sand.

#### *Freestone Kerbing.*

188. Kerb-stones in such lengths, picked and axe-dressed to such widths, depths, shapes, and forms, with squared and axed ends, insuring  $\frac{1}{2}$ -inch joints throughout, to be set upon their natural beds in sand, in any situation in the construction of these works, along such lines, levels, gradients, and curves as shown on drawings, and as may be directed at the time.

#### *Pipe-laying and Jointing.*

189. After the trenches have been excavated to the exact depths, levels, and gradients, and after Glazed stoneware pipes. the foundation layer of concrete has been filled in where ordered, as the case may be (leaving sufficient room for jointing), glazed stoneware pipes of the required diameter to be laid thereon, along such lines, curves, and inclinations, as shown on general plans and longitudinal sections, true, straight, and solid; and for all vertical branch pipe-sewers and ventilating pipe-shafts, the pipes to be set true, straight, and plumb.

190. In clay or similar soil the pipes to rest direct and solid upon the soil. In rock they are to be Foundations. laid as shown on drawing, on a 1-inch bed of poor mortar, composed of one part of cement and six parts of sand, the cost of same to be included in items for pipe-laying. In soil liable to be scoured out or easily shifted, they shall, if directed by the Engineer, be laid on sandstone concrete, as shown on drawing.

191. In every case the pipes shall be laid in such a manner that their barrels shall bear firmly and Laying. evenly on their bed, the sockets being entirely free from pressure in the joint-hole, and the spigots concentric with the sockets.

192. The pipes are to be jointed as follows:—The 6-inch pipes with tarred gasket  $\frac{1}{2}$  inch deep after Jointing pipes. setting, and special cement mortar  $1\frac{1}{4}$  inch deep within socket of pipe; the 9-inch pipes with tarred gasket  $\frac{1}{2}$  inch deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe; the 10-inch pipes with tarred gasket  $\frac{1}{2}$  inch deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe; the 12-inch pipes with tarred gasket  $\frac{5}{8}$  inch deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe; the 15-inch pipes with tarred gasket  $\frac{5}{8}$  inch deep after setting, and special cement mortar

mortar  $1\frac{3}{8}$  inch deep within socket of pipe ; the 16-inch pipes with tarred gasket  $\frac{3}{4}$  inch deep after setting, and special cement mortar  $1\frac{1}{2}$  inch deep within socket of pipe ; the 18-inch pipes with tarred gasket  $\frac{3}{4}$  inch deep after setting, and special cement mortar  $1\frac{3}{4}$  inch deep within socket of pipe ; the 21-inch pipes with tarred gasket  $\frac{5}{8}$  inch deep after setting, and special cement mortar  $1\frac{3}{8}$  inch deep within socket of pipe ; the 24-inch pipes with tarred gasket  $\frac{3}{4}$  inch deep after setting, and special cement mortar 2 inches deep within socket of pipe.

**Inner joints.** 193. The tarred gasket to be placed in the faucet and set tight round spigot end of pipe, after which the remaining space in faucet to be cleaned, wetted, and filled in with stiff special cement mortar, packed in solid, splayed off outside to an angle of 45 degrees, and neatly finished off. The inner joints between pipes to be carefully filled with special cement mortar all round, neatly wiped off as a finish. Each pipe length thus finished to be carefully cleaned out before another pipe length is added.

**Junction pipes.** 194. Junction pipes of any desired size are to be laid into the line of pipe-sewers wherever required by the Engineer. The socket ends of all junction pipes, junction blocks, junction holes, ventilating pipes, and dead ends are to be protected against the ingress of foreign substances, and made easily accessible for effecting future connections, by being closed with earthenware discs having a temporary watertight joint all round, the cost of providing and fixing same to be included in items for pipe-laying.

#### *Cast-iron Pipe-laying.*

**Cast-iron spigot and faucet pipes.** 195. After the pipe-trenches have been excavated to the exact depths, levels, and gradients required, cast-iron pipes of the diameters shown or ordered, to be laid along lines (curved or straight), and solid upon the bottom of the trench, or upon a foundation layer of concrete, and the vertical pipes placed as shown, leaving sufficient room for jointing.

**Jointing.** 196. The pipes are to be jointed as follows :—The 6-inch and 7-inch diameter pipes with spun-yarn  $2\frac{3}{4}$  inch and 3 inch deep respectively after setting up, and soft lead  $1\frac{1}{2}$  inch deep after setting up ; the 8-inch, 9-inch, and 10-inch diameter pipes with spun-yarn 3 inches,  $3\frac{1}{2}$  inches, and  $3\frac{1}{2}$  inches deep respectively after setting up, and soft lead  $1\frac{1}{2}$  inch deep after setting up ; the 11-inch, 12-inch, 14-inch, 15-inch, and 18-inch diameter pipes with spun-yarn 3 inches,  $3\frac{1}{4}$  inches,  $3\frac{1}{4}$  inches,  $3\frac{1}{4}$  inches, and  $3\frac{1}{4}$  inches deep respectively after setting up, and soft lead  $1\frac{3}{4}$  inch deep after setting up ; the 20-inch, 22-inch, 24-inch, 26-inch, 28-inch, 30-inch, 32-inch, 34-inch, and 36-inch diameter pipes with spun-yarn 3 inches,  $3\frac{1}{4}$  inches,  $3\frac{1}{4}$  inches,  $3\frac{1}{4}$  inches,  $3\frac{1}{4}$  inches,  $3\frac{1}{2}$  inches,  $3\frac{1}{2}$  inches,  $3\frac{1}{2}$  inches, and  $3\frac{1}{2}$  inches deep respectively after setting up, and soft lead 2 inches deep after setting up.

**Expansion joints.** 197. Should the faucets of pipes used in these works, in places, be of greater or lesser depths than indicated in the previous clause, then the spun-yarn packing is to be of greater or lesser depths as may be required, the depths of the lead joints to remain as specified. Expansion joints to be made in the same manner, but of such special depth of lead joint, with or without spun-yarn packing as shown on drawings and as may be ordered at the time. All curves on lines of pipe-sewers to be accurately formed with the spigot and faucet joints of the pipes without any abrupt horizontal and vertical dip, rise, or bend. The spun-yarn to be tightly platted or laid round each spigot end, so as to fill the socket of each pipe after setting up to the exact depth specified, leaving in each instance the remaining depth of faucet for the specified lead joint, the latter to be made at each joint in the trench with one running, and when cold to be set up with proper irons to one smooth, even, plain surface all round the pipe, and  $\frac{1}{8}$  inch within socket of same.

**Setting up lead joints.** 198. The setting up of all lead-joints to be made with a proper set of setting irons, commencing from outer surface of spigot end with  $\frac{1}{8}$  inch thick setting irons, and continuing towards outer edge of lead-joint, with setting irons advancing gradually by  $\frac{1}{8}$  inch in thickness at the time. Special setting irons to be used for setting up expansion joints. After the pipes have been laid and the joints of every description made, examined, and approved, they are at once to be covered up, but in no case are they to remain longer than twelve hours uncovered after they have been approved of.

**Faulty joints.** 199. Faulty and objectionable lead joints to be immediately and carefully chiseled out (they are not allowed to be burnt out) and fresh lead joints to be made and set up until approved of. Attempts to repair defective joints are under no consideration to be permitted.

#### *Road-making.*

**Width, slopes, gradient, formation.** 200. The different roads shown on drawings are to be formed 30 feet wide between edges of slopes, whether on embankments or in cuttings. The longitudinal gradients of approaches to be at an inclination of 1 in 20, or as shall be directed. All roadways to be formed with a crown, which at the centre line is to be 6 inches higher than the edges.

**Boxing-out.** 201. After the roadway has been formed and approved, it is to be carefully boxed out along centre line, if ordered, for the reception of the road material, 8 inches deep for ballast, and 4 inches deep for metal—12 inches in all, by a width of 24 feet.

**Ballasting and metalling.** 202. After the boxing-out has been completed, its bottom surface to be covered by a layer of 4-inch gauge sandstone ballast, spread 8 inches thick throughout, and then covered with bluestone metal spread 4 inches thick throughout.

**Blinding.** 203. After the metalling has been completed and approved, the whole of its surface to be covered with about one-eighth of its own bulk of bluestone chippings of a uniform thickness, after which the whole road surface to be watered and rolled until approved.

**Quality of metal, size.** 204. The stone used for metalling to be basalt or other similar hard stone of approved quality ; to be broken to angular fragments of a size to pass freely with their largest dimensions through a ring  $2\frac{1}{2}$  inches diameter, and to be free from dirt, quarry refuse, &c.

The prices per cubic yard for bluestone metal and sandstone ballast for road surface to include the cost of providing and spreading blinding.

#### *Tarred Metal Deck.*

205. After the tarring of upper surface of metal flooring, and after the sand-filling over arches and abutments of aqueducts has been completed, levelled, and approved, or in any other situation in the construction of these works, the whole of these surfaces as shown on drawings, to the thicknesses figured or ordered at the time, to be covered with the tarred metal decking, as follows :—

**Stone for tar.** 206. The stone to be basalt, broken to a 2-inch gauge, free from dirt ; the screenings to be crushed from the same stone, and to pass through a  $\frac{1}{8}$ -inch sieve. All stones and screenings to be perfectly clean and

and dry, to be heated before admixture with tar. The tar to be coal-tar, free from all adulterations, and boiled a sufficient time to get rid of the light oils before being used.

The stones and screenings to be mixed with the boiled tar separately; to be then stacked where directed, so as to allow the surplus tar to drain away for at least three weeks before being laid in position. Tarring and stacking.

207. The 2-inch stone to be spread over the whole bridge, upon the concrete filling of roadway, and upon the 7-inch thick sand layer of footpaths, between kerb-logs, to such thicknesses and surfaces, and with such curvature to roadway, when rolled, as shown in drawing, and to be then covered with about one-eighth of its own bulk of screenings. Both layers to be well rolled and cross-rolled with a 30-cwt. roller, having not less than a 3-foot width of face, until they form solid compact surfaces to the required levels and curvature. Laying and rolling.

208. The sides along kerb-logs and all places where the roller cannot work, to be well punned by hand with a flat-faced 42-lb. iron rammer. When approved by the Engineer, the whole of the surfaces to be brushed over with a coat of hot coal-tar, and a layer of heated fine bluestone screenings, with dust left in, spread over it. Punning.

#### *Coke Concrete Deck.*

209. Coke concrete to be provided, placed in position where directed in the manner specified for other concrete, and to be mixed as described in clause 143, but in the following proportions:—16 cubic feet of approved coke broken to a strict 1-inch gauge, 8 cubic feet of sand, and 1 cask of cement.

#### *Fencing.*

210. Fencing is to be erected in such line and situation, and of such description as shall be directed, and as marked out by the Superintending Officer, and of the form and to the dimensions marked on the drawings. Land to be fenced where required.

211. Ordnance fences to be provided, framed, fitted, and erected where ordered, of sawn hardwood timber, unless where otherwise specified, as viz.: Posts 6 in. x 4 in. x 6 ft. 6 in., top rail 4 in. x 4 in., intermediate and lower rails 4 in. x 3 in. Posts spaced 6 ft. 6 in. from centre to centre, sunk in rock not less than 18 in., and into other ground not less than 2 ft. 6 in. deep. On road embankments, where ordered, posts to be 7 ft. 9 in. long, mortised into sills 9 in. diameter x 5 ft. long, secured by 1-inch diameter hardwood tree-nail, stayed to posts by 4 in. x 4 in. struts, secured to posts and sills by  $\frac{3}{8}$ -inch screw-bolts, and  $\frac{7}{16}$ -inch diameter spikes,  $7\frac{1}{2}$  inches long. Angle and end posts, 10 inches diameter at smallest end x 8 feet long, to be sunk 3 feet deep in the ground, mortised 6 inches deep for reception of ends of rails. Tops of round posts to be protected by caps of 6-lb. sheet-lead, secured to posts by lead-headed nails 2 inches long, and wrought-iron 2-in. x  $\frac{1}{4}$ -in. rings, secured each by four 3-inch wood screws. Sawn posts to be notched at top for reception of top rail and halved out for reception of intermediate and lower rails, spaced as shown. Top rail to be laid aris uppermost into notches, secured to posts with 2-in. x  $\frac{1}{2}$ -in. hoop-straps, and four 2-inch long wood screws to each strap. Intermediate and lower rails to be fitted flush with inner faces of sawn posts, and secured to each with two 4-inch wood screws. All sawn timber above ground to be planed, all scarf-joints of rails to be made as directed, over posts only, and all sills, struts, and ends of posts under ground to be charred thoroughly. The ground round posts to be well rammed, and the clearing spaces round ends of posts stepped in rock holes, to be carefully filled in with cement grout. Ordnance fencing.

212. The split timber fencing may be of one or more of the three following descriptions:—

- 1st. Fence consisting of split hardwood posts, two split rails (wired if shown), and round posts where required.
  - 2nd. Fence, consisting of split hardwood posts, three split rails, and round posts where required.
  - 3rd. Fence, consisting of split hardwood posts, two split rails, covered with split hardwood palings, with round posts where required.
- Description of split timber fences.

213. Posts to be 6 ft. 6 in. long, 8 inches broad by  $2\frac{1}{2}$  inches thick, except those for the paling-fence, which shall be 7 feet long, with mortises 6 in. x 3 in., cut square to the gauge shown on the drawings. All posts to be charred for a length of 2 ft. 6 in. from the bottom, sunk 2 feet into the ground, set uniform and upright, and spaced 8 ft. 3 in. apart from centre to centre, and the earth well rammed in round them until the posts stand solid and firm. Posts.

214. Rails to be 9 feet long, the top rail not less than 7 in. x 2 in., and the bottom rail not less than 8 in. x 2 in. in the two-rail fencing, and in the three-rail fencing the centre rail to be not less than 8 in. x 2 in., and the bottom rail 7 in. x 2 in. Tenons to be 6 inches long, carefully adzed to fit closely into the mortises, shouldered square with the saw, and fitted so as to butt close up to the posts. Rails.

215. Palings are to be sound, straight, cleanly split, and free from sap, and of approved timber, 5 feet long, not less than 4 inches wide, and  $\frac{1}{2}$  inch thick. They are to be sawn off square, placed upright, close together, and to a straight line on top, and securely fixed by  $1\frac{1}{2}$ -inch strong wire nails, two nails to every paling in each rail. They are to be further secured along the rails by galvanised hoop-iron of 18-gauge, 1 inch wide, well nailed by  $1\frac{1}{2}$ -inch clout nails at intervals not exceeding 12 inches apart. Palings.

216. At all intersections with existing fences, and at all angles, a round post is to be provided and fixed, 9 inches in diameter, charred for a length of 3 feet from the bottom, and sunk 2 ft. 6 in. into the ground, and the earth well rammed in until the post stands solid and firm. These posts are to be of such length as to leave the top 6 inches above the upper rail. At existing fences the junctions are to be made good and connected with these posts, which are to be mortised for the rails to suit the fence in the same manner as shown on drawing. Round posts.

217. Where necessary, posts, either round or split, are to have a hardwood strut 6 in. x 3 in., checked at upper end into the post, and secured by a 6-in. x  $\frac{1}{2}$ -in. round spike. A hardwood stake, 3 ft. long x 8 in. x 3 in., to be driven close into the foot of the strut, as shown on drawing. Posts strutted where necessary.

218. The crossing of ditches, watercourses, or hollows in the ground, are to be made secure, either by supporting the fence on logs, extra long posts, or as may be directed. Crossing ditches or sudden depressions.

219. The fencing is to be erected to a true line on top, and is not to follow the minor irregularities of the ground.

Fencing wire and  
straining  
brackets.

220. The wire used in fences to be that known as No. 8 "best best annealed drawn," or other approved fencing wire; to be passed through the posts, which are to be bored for the purpose with a quarter ( $\frac{1}{4}$ ) inch auger, and strained tight by means of F. Morton & Co's. or other approved straining bracket, fixed to the straining posts by wood screws or spikes, so as to suit the gauge, as shown on the drawing.

The works and materials comprised in clauses Nos. 217, 218, and 220 to be included in the schedule rates for fencing.

*Wrought-iron Work.*

Wrought-iron  
work.

221. All wrought-iron spindles, bolts, L, T, and U irons, flat and round bar, plates, straps, axles, pins, anchor-bolts, rolled girders, nuts, washers, rods, rivets, holding-down bars, gratings, frames, keys, chains, &c., to be of the exact dimensions and forms shown on drawings. The greatest care to be taken in any welds to ensure perfect soundness, and the contractor to be at the expense of any test which the Engineer shall think fit to submit the welds to. All plates, bars, channel-irons, rods, &c., to be perfectly true and of even uniform thickness; all angle-irons and bars to be sound, uniform, and regular on edges; all joints and edges to be truly planed to the dimensions on drawings; all wrought-iron parts to be rolled or forged out of one piece, unless otherwise specified and directed. Ends of spindles, shackles, &c., to be forged with eye-holes, and holes for male and female joints of the exact forms. All bolts, handles, hand-rails, spindles, keys, chains, pins, axles, bars, crosses, &c., to be forged with protecting necks, and welded with ends of large diameters or otherwise for screw-ends, and made of the exact shapes, forms, dimensions, lengths, widths, and diameters shown on drawings, with angular and square threads, as the case may be, to all bolts, spindles, &c., with the correct pitch, angle, and depth. All portions fastened with screws, bolts, or rivets to fit close together. The chains attached to blades of penstocks, and the whole of the wrought-iron gratings, channel-irons, &c., connected therewith, wrought-iron girders to working platforms, hand-rails to platforms and stairs, to be galvanised before being fixed in the works.

Welds.

Joints.

222. All joints in plate, angle, T irons, &c., to be made only in such positions as shown on drawings and where directed; and all covering plates, wrappers, T, and angle irons to be truly cut at ends to insure a perfect fit.

Screw-bolts and  
screws.

223. All screw-bolts and screws to flanged pipes, penstocks, valves, all other castings and wrought-iron work of every description, to be of the exact diameters and lengths shown on drawings, with hexagon heads and nuts, and to be angular threaded with the correct pitch and angle of the Whitworth screw.

Joints of shafts,  
&c.

224. Joints of shafts, spindles for penstocks, axle shafts for strainers and traveller, engines, &c., to be made by said shafts being truly turned and cut at ends, and cast-iron flanged and turned sockets, with turned spigot and faucet, the internal diameter of socket to be turned exactly, and slightly of less diameter than ends of shafts. Sockets and ends of shafts to be grooved, as shown for steel key. Sockets to be heated and then fitted on to ends of shafts with keys, after which the flanges to be bolted together, forming coupling, as shown on drawings.

Joints and  
working parts.

225. All joints and working parts of wrought-iron on penstocks, valves, strainers, standards, engines, travelling cranes, travellers, gratings, troughs, louvre shutters, brackets, &c., to be turned, scraped, or ground and glazed bright, as the case may require, and as shall be directed.

Handles and  
levers.

226. All handles and levers for working penstocks, valves, strainers, travellers, travelling cranes, &c., to be ground and glazed bright.

Rivets and bolts.

227. The rivets throughout to be made from  $\frac{1}{2}$ -inch,  $\frac{5}{8}$ -inch,  $\frac{3}{4}$ -inch,  $\frac{7}{8}$ -inch, 1-inch, and  $1\frac{1}{8}$ -inch iron respectively, with heads and necks, as shown on drawings. The Engineer may require any holes to be drilled and the bolts turned for same, or he may order bolts to be substituted for rivets, or other changes of the kind, in such places as he may consider necessary, without extra charge.

Holes for rivets,  
bolts, &c.

228. All rivet, bolt, and screw holes to correspond as to diameter and position with the drawings, and to be carefully drilled parallel, and at right angles with face of work. All the holes in booms of main girders, bearing plates, lattice bars, wrought-iron aqueduct pipes, rolled L, channel, T, and flat bar irons to be drilled—the respective pieces being clamped in their proper positions and secured under drill and bored right through; holes in cylinder bracing, cross-girders, and wind bracing girders may be punched. No drifting or rhymering to be done without the consent of the officer in charge, and then rhymering only when the plates can in no other way be made to coincide. Holes which are directed to be punched or drilled at the building site to be about  $\frac{1}{8}$  inch narrower than the diameter of the rivet required, so as to insure a good fit after its being enlarged with the rhymer. Where several holes meet each other in the parts to be united, a horizontal dislocation of not more than 5 per cent. of the diameter of the hole is allowable, the hole then to be made perfectly equal with the rhymer, and not by filing on one side, and rivet-bolts of proportionately large size to be used in holes thus enlarged.

Riveting.

229. All rivets to be inserted at a bright heat, after being carefully freed from scales, into the duly cleared holes, to be quite firm after the head is completed. If not firm, rivets to be at once removed and replaced by others, and of larger size when directed. In putting together parts, care to be taken that none of them are forced into one-sided tension; any portions distorted in riveting the connections to be at once loosened and the faults remedied. All rivets to be finished with cup heads, and when countersunk the sinking to be drilled and the heads to be finished perfectly flush. All rivets and heads of bolts to be countersunk where plates, when fixed, will bear on other work, and where they form the inner surfaces of aqueduct pipes. All riveting to be done in the neatest and most workmanlike manner.

Wrought-iron  
gratings.

230. Wrought-iron gratings to be of the exact dimensions, straight or curved, as the case may be, the bars spaced and riveted as shown, all bars to have rounded-off top surfaces. All hooks, rings, and chains attached to flushing valves, &c., to be galvanised before being fixed in the works.

Wrought-iron  
ladders.

231. Wrought-iron ladders in lengths shown on drawing, and as may be ordered, consisting of  $2\frac{1}{2}$ -in. x  $\frac{5}{8}$ -in. uprights, spaced  $13\frac{3}{4}$  inches apart, and  $\frac{7}{8}$ -inch round bar rungs spaced 12 inches from centre to centre. Joints of uprights to occur only at supports, where directed. Supports, spaced as shown, to consist of two 6-in. x 3-in. x  $\frac{3}{8}$ -in. channel irons fixed to uprights with  $\frac{3}{4}$ -inch screw-bolts, stiffened off at ends, at top and bottom, with  $\frac{1}{4}$ -inch plates varying from 12 inches to  $13\frac{1}{2}$  inches in length, riveted on to top and bottom flanges of channel irons, as shown.

*Cast-iron Work.*

Castings.

232. The whole of the castings to be perfectly sound, free from all cold shuts, honeycomb, holes, or other defects; to be cast in dry sand moulds, unless where otherwise directed.

233.

233. All castings to be true in sectional form, straight longitudinally where shown to be so, or of such shapes, projections, curves, angles, and forms as shown on drawings; and each portion of such castings to be of equal strength and of the specified thickness throughout its respective length. Castings.
234. The external and internal surfaces of all castings to be perfectly clean and smooth and in strict accordance with sections.
235. All cylinders and pipes to be cast vertically, with the socket or flanged end downwards; to be straight longitudinally; all straight pipes with faucet, or flanged, and with spigot ends, to have the latter cast 9 inches longer than shown on drawings; all cylinders to be cast with such head of metal as shall be directed. After the castings have been cleaned and coated, the head of metal over the cylinders, and the 9 inches at spigot ends of pipes to be cut off, so as to leave same perfectly square on section and true and equal in circumference, so as to fit the socket, leaving an equal space all round of the exact thickness shown on drawings for lead joints. Casting cylinders and pipes.
236. The faucet of each pipe or casting to be perfectly square and true, of the exact dimensions shown on drawings, and to be cast with a groove of the size and depth as required by the Engineer. The faucet of large circular and oval pipe for expansion joints to be cast as shown with an inner narrower faucet and projecting rim, and both inner sides of narrower faucet and of projecting rim to be truly turned and polished. Faucet ends.  
Faucet for expansion joint.
237. The feathers and flanges, where such are shown, to be of the exact widths, forms, and thicknesses, and all surfaces of contact to be planed and turned to true and even faces. Feathers and flanges.
238. All spigot ends for expansion joints, where shown on drawings, to be cast with a recessed end for reception of wrought-iron ferrule on inner face, and a corresponding projecting face on the outside; said recessed inner and projecting outside faces to be truly turned and polished to the exact cross-section for reception of lead joint, gun-metal packing ring, and wrought-iron cover-plate, as the case may be. Spigot ends for expansion joints.
239. The thimbles for expansion joints for large, circular, and oval pipes, to be cast with faucets as described in clause 236, and with web-plates, ribs, and bed-plates cored out, with bosses truly bored for heads of anchor-bolts; the whole to be of the exact shapes, forms, and dimensions, as shown on drawings. Thimbles for expansion joints.
240. The flanges of gas-check frames to be provided with a projecting face, planed and turned to true and even faces, of the exact dimensions shown on drawings. Gas-check frames.
241. All holes in hinge-brackets at top of gas-check frames to be truly bored to the diameter required for the reception of hinge-bolts. Boring holes.
242. All bolt-holes to be of the exact sizes, spaced as shown, and to be truly bored and turned. Bolt holes.
243. All flange-joints, unless where otherwise directed, to be made tight with red lead. Flange joints.
244. Frames of penstocks to be of the different parts, and of the exact shapes, forms, and dimensions, with all screw and bolt holes, and the exact circular valve openings, with flanged end at back, projecting rim round opening in front and at sides of same, with cap-pieces on top, upright slide frames, flanged, bolted together, cored out with bosses and web-plates between, to receive front guide-plate, with inner projecting faces screwed into bosses of upright frames. Guide-pieces, with flange and web, faced on surface of contact, with boss in centre, the latter truly bored and turned for reception of brasses and spindle to pass through, fitted with bolt-holes, and screwed on to guide-plates. Penstock frames.
245. All landing and other plates and grates to be complete with ribs, flanges, hinged and other lids, close or ventilating covers, girders of the exact shapes, forms, dimensions, projections, recesses, &c., as shown on drawing. Landing grates and plates.
246. Valve blades to be of the exact diameters, forms, shapes, and dimensions, with circular projecting faces back and front, and vertical projecting faces corresponding with and bearing on projecting faces of guide-plates and framing, and vertical racks or brackets, with eye-holes truly bored for fixing foot of valve spindle, as the case may be. All seatings to be truly faced and bored out to receive gun-metal faces, and all stuffing boxes, glands, foot-step bearings, and journal-boxes, to be bored and turned and polished where directed. Valve blades for penstocks.
247. All girders, brackets, standards, wheels for chains, and balance weights, tubes, boxes, glands, plummer-blocks, and boxes for lifting or turning spindles, as the case may be, foot-brackets for upper spindles, flanged pipes for spindles, street-boxes, &c., of the different parts, and of the exact lengths, forms, and dimensions, to be truly faced, turned, and polished at all joints, bored and turned for reception of screws, nuts, and brasses, with all bolts and screw-holes of the sizes shown, bolted at all joints, and all faces of flange-joints and working parts and other faces, where directed, to be truly planed, turned, faced, and scraped, to the necessary surfaces. Sundry ironwork to be turned and bored.
248. All penstocks, scour-valves, &c., to be carefully and truly fitted and fixed together, with all lifting and turning gear, gun-metal facings, spindles, wrought-iron work, street-boxes, screws, bolts, nuts, &c., complete, in strict accordance with drawings and dimensions figured thereon, and all valves to close watertight. Penstocks, scour-valves to be fitted.
249. The frame and flap-valve of flushing valve, with bracket, pulley, &c., to be complete, with wrought-iron galvanised chain, to be cast of the exact diameter, shapes, forms, and dimensions; the flushing valves to have a projecting rim all round, the inner face truly faced and turned to a "V shape" of the exact dimensions, so that when the flap is placed in position the edge of the V rim to lie exactly against the centre line of the square tuck or lead-packing of opposite groove in frame, planed out to a dovetail for the purpose. Flushing valve.
250. Couplings, flanged, turned, bored, faced, with turned and bored spigot and faucet, and bolt-holes of the exact diameters, to be of the exact forms and dimensions for making joints of valve-spindles, &c. Couplings.
251. Cast-iron frame with 22-inch diameter opening, with non-ventilating lid fitting easily into frame, complete with sawn and tarred ironbark wood-bricks fitted into panels, the whole to be in strict accordance with drawings and dimensions shown thereon. Cast-iron frame.
252. Scupper-pipes, with cistern-heads, and grating-cover for inlets of scupper-pipes, and plain cover-plates over inlets of scupper-pipes, as shown, to be cast to the exact shapes, forms, with the exact openings, and to the dimensions figured on drawings. Scupper-pipes, grating-covers, and cover-plates.
253. All grooves for stop-boards to be cast with a connecting ledge at top, to be cut off when casting is completed. All grooves to be cast true, of the exact dimensions, shapes, and forms; and all working parts of frames and slide-valves, grooves, and stop-plates, to be truly planed and faced so as to fit, but not too tight. All stop-plates to be complete with wrought-iron shackles, 12-foot galvanised chain, hook, and rings. Stop-board grooves.
- Gun-metal*

*Gun-metal Work.*

- Gun-metal tinted yellow. 254. All portions tinted yellow on drawings, as in nuts, bolts, shackles, bearings, and working parts, nuts and naves of wheels, seatings of valves, penstocks, standards, hangers, and brackets, and all other brasses in working and lifting gear, &c., to be made of gun-metal. The gas-check flaps to be of Muntz or delta metal.
- Gas-check flaps. 255. The whole of the castings to be solid and perfectly sound, and free from all honeycomb, holes, or other defects.
- Castings. 256. All spindles to be cast on end, having a riser on top of each not less than 3 feet in height, after which they are to be turned and finished to the exact lengths and diameters; to be straight, and work true in stuffing boxes, nuts, glands, &c.
- Spindles. 257. All screw ends and nuts, unless where otherwise specified and directed, to be angular, threaded with the correct pitch and angle; and all naves of wheels, nuts for lifting gear in standards and for off-let valves, bearing nuts of end brackets for shafts, &c., where shown, to be turned with the square thread and correct pitch, and angle of the Whitworth screw.
- Nuts and screws. 258. All nuts, naves, pins, lubricators, shackles, eyeholes, sockets, hinges, hinge-bolts, guide and other brasses in plummer blocks, brackets, standards, valves, penstocks, &c., to be truly bored, turned, faced, and finished to the exact lengths and diameters, shapes, and forms, and to be straight and work true on all bearings and working faces.
- General directions for finished work. 259. All projecting rims, straps, eye-hole brackets, &c., to be provided and fitted on to gas-check flaps, to be cast of the sizes, shapes, and forms as shown on drawings, to be faced on surface of contact, and to be soldered on to the flaps with zinc, after having been placed truly in position, and then riveted as shown. All gas-check flaps to be of the exact thickness shown on drawings. When the rims and straps for each flap are not cast in one casting, then they are to be cast in parts as shall be directed; and prior to fixing such parts in position, they are to be truly fitted and jointed together. All such joints to be scarfed and braced, as, viz., the edges filed or scraped clean and bright, covered with spelter and powdered borax, and exposed in a clear fire to a heat sufficient to melt the solder, which, for all scarf-joints, to be an alloy composed of four parts of copper to three of zinc. All scarf-joints to be placed where directed. All hinge axles to be truly turned. All links of shackles to be made with one joint, scarfed, brazed, and riveted together.
- Gas-checks. Soldering. 260. At expansion joints of large cast-iron pipes, where shown, a gun-metal packing ring of the size specified, to be provided, placed, and fitted round spigot end of pipe, carefully set up flush with end face of inner recess of faucet.
- Packing ring. 261. All portions of castings, as exposed surfaces of nuts, hinge-bolts, hinges, shackles, rims, straps, brackets, hooks, links, &c., are to be cleaned as they leave the mould, and all irregularities to be removed. All other portions of gun-metal work to be truly faced on all surfaces. All gun-metal facings and fittings to be truly turned and faced on all surfaces, to fit exactly, to be forced into positions, screwed where shown, and to sit perfectly firm and true.

*Wrought-iron Work, Gun-metal Work, and Cast-iron Work.*

- Quality and workmanship. 262. The whole of the wrought-iron, cast-iron, and gun-metal work to be of first-rate quality and workmanship, in strict accordance with the specification and the dimensions and patterns shown on the drawings, and any details which the Engineer may provide during the progress of the contract.
- Weights. 263. Wrought and cast ironwork and gun-metal work not to be more than 3 per cent. below the scheduled weight, and the contractor shall only be entitled to payment of the weights as per schedule, at the various prices set forth therein, and payment will not be made for any excess on such weights.
- Contractor to give a receipt for ironwork supplied. 264. All ironwork and gun-metal work supplied by Government to the contractor to be delivered free of charge at the various sites of the works where they are required. For each article so delivered the contractor shall give a written receipt, after which he shall be held solely responsible for same; and shall, if any such article be lost, stolen, damaged, or destroyed, refund the cost to the Government.
- Surplus iron-work. 265. All ironwork and gun-metal work, &c., provided by the Government, which, at the completion of the contract, by direction of the Engineer, has not been built or permanently fixed in the works, shall be conveyed by the contractor to the site of the Field Office, or to the iron store at Camperdown, as may be directed.

*Painting.*

- Wrought-iron work. 266. All wrought-iron work (except where otherwise specified and directed) before leaving the foundry to be scraped and cleaned, and well coated with boiled linseed oil; and, prior to being fixed in position (excluding internal surfaces of circular and oval wrought-iron tubing, and excepting all working parts) after it has been cleaned and scraped free from scales, &c., and inspected, to receive two coats of anti-corrosive paint over all surfaces, and after being fixed in position, to be finished with two coats of best oil-colour, in approved tints.
- Cast-iron work. 267. All bolt-heads, washers, nuts, straps, and all other exposed ironwork of timber bridges above level of kerbs, ordnance fencing, &c., to be finished with two coats of black varnish instead of oil-colour.
268. The whole of the cast-iron work to be properly cleaned immediately after completion; and, after being inspected, except where otherwise specified, to receive over all surfaces two coats of anti-corrosive paint (except working parts and joints), and to be finished afterwards with two coats of best oil-colour, in approved tints.
- Carpenter's work. 269. All carpenter's work of timber bridges above level of kerbs, and all ordnance fencing above ground, handrails, travelling cranes, &c., to be properly prepared, knotted and primed, and painted with four coats of best oil-colour, finished with approved tints. All tenons, mortises, notches, halvings, joints, scarfs and butting surfaces, to receive two coats of approved paint before being fixed in position.
270. No paint to be applied during or immediately after wet weather, or while surface of timber or metal work is wet; and an interval of forty-eight hours must elapse between each application.

*Tarring.*

- Castings. 271. All cast-iron cylinders, pipes, short lengths, bends, junctions, and any other castings, &c., which will be placed or laid under water, or which are to be covered up in earth, concrete, &c., and all non-ventilating man-hole covers, street-boxes, flushing-flaps and frames, scupper pipes, precipitating tanks, grooves,

grooves, landing plates and frames, grates, cover-plates, gully grates, &c., as soon they have been cast and inspected, to be properly cleaned and then heated, and whilst hot to be dipped or coated twice in hot gas-tar.

272. All flat, segmental, and buckled plates, rolled girders, bulb T irons, &c., before being placed in position, unless otherwise ordered, to receive one coat of tar, and after erection is completed, to receive a second coat; the tar to be coal tar, mixed with kerosene in the proportion of three of tar to one of kerosene, and applied hot. Wrought-iron work.

273. Kerbs, flooring planks, timber in girders, longitudinal stringers, cross-girders, corbels, capsills, sills, piles, pier-bracing, abutment platforms, ends of handrail posts below level of tops of kerbs, to receive three coats of tar and composition; the first coat to be all tar laid on hot, the second and third coats to be composed of seven parts coal tar, four parts of Stockholm tar, and one part of pitch thoroughly melted together and applied hot, the last coat on top of deck to be well sprinkled with a layer of clean sharp sand and lime. All joints and butting surfaces to be well payed with the hot composition before fixing, and in finished work the composition to be poured into interstices and joints. Any timber inaccessible for tarring when fixed, to receive three coats before being placed in position. Timber work.

274. No tar to be applied during or immediately after wet weather, or while surface of iron or timber is wet; and an interval of forty-eight hours to elapse between each application.

#### *Tar Varnish.*

275. The whole of the interior surfaces (working parts and joints excepted) of the wrought-iron circular and oval tubes, cast-iron thimbles, expansion joint castings, short lengths of cast-iron circular and oval pipes, &c., after having been placed in position in the works, to be thoroughly cleaned of all scales, rust, and previous coating of linseed oil or paint, &c., and then to be coated twice with a tar-varnish composed of 30 gal. of coal tar, fresh, with all its naphtha retained, 6 lb. tallow, 1½ lb. resin, 3 lb. lamp-black, and 30 lb. freshly-slacked lime finely sifted; all materials to be approved of, and then to be intimately mixed as shall be directed, and applied hot, like paint. Interior surfaces of wrought-iron work.

#### *Day Labour.*

276. When "day labour" is required by the Superintending Officer to execute any works other than those for which a special price is given in the schedule of quantities and prices, the contractor shall provide the same at the several rates for "day labour" inserted in said schedule. Prices given in schedule.

The price for day labour is to include supervision as well as all tools, lighting, and implements of every kind necessary for carrying on the work, and shall be returned in the usual monthly progress certificate. To include.

277. The accounts for this "day labour" shall, however, be rendered by contractor to the Superintending Officer in half-weekly intervals, that is to say, during the forenoon of every Monday and Thursday, failing this he shall lose all claim to payments for the "day labour" performed by him during the preceding three days. Accounts to be sent in half-weekly.

278. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work. Length of day.

#### *Measurements and Payments.*

279. The contractor shall be present at all measurements, and, if required, assist in making the same. If he fail to attend after twenty-four hours' notice in writing has been delivered to him of the Superintending Officer's intention to take measurements, and clearly setting forth the locality of such intended operation, the measurements made by the Superintending Officer shall be binding on the contractor. Contractor to be present.

280. On satisfactory completion of any portion of the works, and at all other suitable times, the dimensions of such work shall be measured by the Superintending Officer, as specified, and recorded in a book kept for that purpose; and these quantities shall serve as the basis for arriving at the contract sum on completion of contract. When and how measurements are to be made.

281. For the purpose of making progress payments, the dimensions of still unfinished portions of the work will be measured in a summary way monthly, or as near as may be, but without prejudice to the ultimate acceptance or rejection of such unfinished portion of work. Progress payments.

282. The contractor shall sign the measurement book each month, before the monthly progress payments are made, accepting the detailed quantities, prices, and amounts. Should he, however, disagree with the detailed quantities, prices, and amounts, he is at once to state in the measurement book in what particulars he disagrees, and the grounds of his disagreement; and unless this is done it is to be distinctly understood that the detailed quantities, prices, and amounts, as recorded in the measurement book, shall be binding. Contractor to sign measurement book.

283. The final measurements, based upon the measurements made during the progress of the works, will be prepared within thirty days, or as nearly as may be after the completion of the work; and the contractor will be required to accept such measurement before the fixed deposit is returned. Final measurements.

#### *Junction with other Contracts.*

284. If two different contractors execute simultaneously two adjoining sections of the works, they shall be held jointly and severally responsible for effecting a proper junction of the sections.

#### *Suspension of Works.*

285. The contractor shall suspend the whole or any portion of the works, on receiving a written notice to that effect from the Engineer. He shall have no claim for loss or damage on this account, and such suspension shall in no wise vitiate the contract, but a commensurate extension of time for completing the works will be granted to the contractor, as set forth in clause 24 of the General Conditions.

#### *Duties.*

286. In the event of any materials being imported by contractor for use on this contract, no refund will be made of any duties which may be legally chargeable on such materials; and the contractor shall bear and pay all duty-stamps, licenses, building or surveyor's fees or other charges or fees whatsoever legally demanded by any municipal or other authorities. Testing

*Testing the Whole of the Works.*

287. It is to be distinctly understood that, on completion of the works, the Engineer shall have the power of ordering, and having the sewers, or portions of same, &c., closed in such order as he shall direct, and the whole of the sewers and aqueduct tubes, &c., filled with water for such a time as he may deem necessary for the purpose of testing the works; and any injuries, faults of whatsoever description, caused by or detected in consequence of such testing, to the work, shall be at once repaired, replaced by new work, and made good, the whole expense being borne solely by the contractor; and, after the completion of these repairs, replacing with new works, and making good any damages, injuries, faults, &c., the whole of the works shall again be tested, as before described, until they shall be satisfactory to the Engineer.

This is the schedule to specification marked "C" referred to in our annexed agreement with Her Majesty the Queen, dated the 15th day of June, A.D. 189 .

"D."

## SPECIAL CONDITIONS.

*Rates of Wages to be Paid.*

NOT less than the several rates of wages as set out in the schedule herein shall be paid by the contractor (or—in the event of the Minister approving of the sub-letting of any portion or portions of the works—by the sub-contractor) for the various services to be performed under this contract, and, in case of dispute as to the classification of workmen, the decision of the Engineer shall be final; the rates, however, do not include those to be paid to apprentices or boys.

With respect to overtime, the recognised rules of the particular trade then prevailing in the district where the work is situated shall be observed.

If it shall at any time be proved to the satisfaction of the Minister that the contractor or any approved sub-contractor is paying or has paid a lesser rate of wage for services rendered during the progress of the works to any workman employed thereon than is set out in the following schedule, the Minister shall have the option and full power and authority to cancel the contract, as if such breach was and is one of the events mentioned in clause 32 of the general conditions. Any permission to sub-let shall not discharge the contractor from any liability in respect of the rate of wages to be paid under this contract.

In all classes of labour, forty-eight hours shall be considered as a week's work. This rule, however, shall not apply to those workmen, the necessities of whose employment demand that longer hours shall be worked, as in the case of firemen, who usually have to get up steam in readiness for the day's work. The necessity for longer hours of labour in special cases shall be determined by the Engineer, whose decision shall be final.

The following is the schedule referred to :—

Trade.	Rate.
	s. d.
Carpenters .....	8 0 per day.
Masons .....	10 0 "
Bricklayers .....	9 0 "
Plasterers .....	9 0 "
Blacksmiths .....	8 6 "
Boilermakers and riveters .....	9 0 "
Fitters .....	9 0 "
Painters .....	7 6 "
Plumbers .....	8 6 "
Shipwrights .....	9 6 "
Copper and brass workers .....	9 0 "
Moulders .....	7 0 "
Engine drivers .....	7 6 "
Workmen not included in the foregoing list .....	6 0 "

These are the special conditions marked "D" referred to in our annexed agreement with Her Majesty the Queen, dated the 15th day of June, A.D. 1895.

## GENERAL CONDITIONS.

*Interpretation of Terms.*

1. WHENEVER the terms hereafter explained in the present clause occur in these or any special conditions, or in the contract or specification, they shall be held to mean, and shall mean, as follows :—

"Government" shall mean the Government of New South Wales promoting this undertaking.

"Minister" shall mean the Secretary for Public Works of the Colony of New South Wales for the time being.

"Engineer" shall mean the Engineer-in-Chief having the principal charge of the works, or the person acting as such for the time being.

"Superintending Officer" shall mean any person or persons who may from time to time be entrusted with the superintendence of the works on behalf of the Government.

"Contractor" shall mean the person or persons who contracted to execute the works

"Special

"Special conditions" shall mean any "special conditions" hereto attached and forming part of the contract; and such special conditions shall be read with the general conditions as part and parcel of the contract.

"Schedule of prices" shall mean the rates at which the contractor has offered or agreed to execute the contract, where the same is based on a schedule of prices; and be the basis on which the value of any extra works or of any deductions shall be calculated, and progress payments made, whether the contract be one of a schedule of prices or a bulk sum.

"Plans" shall mean and include all drawings referring to the works and explanatory of, or supplementary to, the specification.

"Works" shall mean the works set out in the specification and plans, or, in the event of there being no plans, in the specification only.

"Net claim" shall mean the sum claimed by the contractor after deducting therefrom the sum acknowledged by the Department to be due.

"Net award" shall mean the sum awarded on arbitration, after deducting therefrom the sum acknowledged by the Department to be due.

*Supply of Labour, Materials, and Plant.*

2. The contractor shall, except in so far as the specification may expressly state to the contrary, provide at his own cost and expense all labour, materials, and plant, and everything which the Engineer may consider necessary for the proper and complete performance of this contract. No materials or plant placed on the site of the works shall be removed therefrom, or otherwise disposed of, without the consent of the Engineer.

*Plans, Specifications, &c.*

3. The plans and specifications represent generally the form, dimensions, and description of the several works. Where any discrepancy exists between the dimensions as indicated by the scale and those marked in figures, the figures are to be considered as correct, and are to be taken in all cases in preference to the measurements by scale. Or if there be any discrepancy between the figures or dimensions, or the form of construction, or the material as indicated in the plans, and the dimensions and materials given in the specification, the directions of the specification shall be adopted; and in all cases of defective description, or any ambiguity, the explanation given by the Engineer shall be binding upon the contractor. Also, anything contained in the plans, and not in the specification, or anything contained in the specification and not shown in the plans, shall be equally binding as if it were contained in both. If neither specification nor plans contain any mention of minor parts, which, in the opinion of the Engineer, are reasonably and obviously necessary for the satisfactory completion of the works, such parts are to be provided by the contractor without any extra charge, as if they were specially mentioned, and shall be deemed to be, and hereby are, included in this contract.

All works described in, or implied by, the specification or shown in any of the plans, or set forth in any lists or tables thereon, or attached thereto, as well as those expressly provided for, are to be made and executed in every detail conformably to the several plans already prepared or which may be prepared hereafter for the purpose of this contract, in strict accordance with the provisions of the specification and conditions, and to the entire satisfaction of the Engineer.

*Copies of Plans, &c.*

4. A copy of all plans and specifications required by the contractor for carrying on the works will be provided by the Government, but must be returned before a final certificate for the work can be given. Any additional copies which may be required and are supplied by the Department shall be paid for by the contractor at a rate to be fixed by the Engineer.

*Setting out Works.*

5. The works will be set out—that is to say, all necessary centre lines and levels will be given to the contractor—except in the case of buildings, when, in the absence of setting out, a block plan will be supplied, from which he must work; but the contractor must satisfy himself of the accuracy of the setting out, as no work incorrectly set out or improperly executed will be paid for.

*Protecting and maintaining Signals and Marks.*

6. All bench marks, pegs, and signals on the surface, and all alignments, and level marks underground put in by the Engineer or Superintending Officer for the purpose of checking the contractor's work, will be confided to the care of the contractor. He shall, at his own expense, take all proper and reasonable precaution and care to preserve and maintain them in their true position; in the event, however, of their being disturbed or obliterated by accident or from any other cause whatever, they may, if necessary, be replaced by the Engineer or Superintending Officer at the contractor's expense, and the cost thereof deducted from any moneys then due or thereafter becoming due to the contractor.

*Possession of Ground.*

7. In giving the contractor possession of the site it shall not be deemed that he is to have the exclusive possession, but only a limited possession—that is to say, such possession as will enable him to perform the works comprised in this contract. The Minister may at any time take possession of any portion of the works or ground or intended site of the works for the purpose of carrying on any other works or for any purpose whatsoever. The contractor must procure for himself all other land which he may deem requisite for any temporary purposes, or for his own convenience.

*Access to Works.*

8. The Engineer, or any other person authorised by him, shall have free and uninterrupted access at all times to the works, and during working hours to any workshop or premises, not on the site of the works, where materials may be in preparation or stored for the purpose of this contract. The contractor shall give the Engineer all particulars as to the mode and place of manufacture of any of the materials proposed to be used in connection with this contract, and shall facilitate in every way the inspection of the same.

*Contractor's Risk.*

9. The contractor shall take upon himself the whole risk of executing the works to the satisfaction of the Engineer, and in accordance with the plans, sections, and specifications.

*Contractor to be represented.*

10. The contractor at all times during the progress of the works, when he is not personally superintending them, must have a responsible agent or overseer in charge to receive instructions from the Superintending Officer or Engineer, and to represent the contractor for all purposes of this contract.

Any notice or any written instructions to be given or delivered to the contractor under this contract shall be deemed to have been so given or delivered when given or delivered to the contractor or his representative at the work, or left at the contractor's usual or last-known place of abode or business.

*Order of Procedure.*

11. The Engineer shall have full power to decide in what order in point of time the various parts of the work or works comprised under this contract shall be carried out.

*Power of Entry.*

12. The Engineer shall have the power, at his discretion, without vacating this contract, to enter upon, by himself or his agents, and make use of any part or parts of the work comprised under this contract, and his doing so shall in no wise be held as a waiver of the responsibility of the contractor in respect of this contract, except in so far as any injury may accrue to such work so entered upon, by reason of any proved carelessness, to the satisfaction of the Engineer, of any employee of the Government, in which event the contractor shall be free from liability on account thereof, but not otherwise.

*Instructions to be obeyed.*

13. Should the contractor refuse or neglect to carry out the instructions of the Engineer or the Superintending Officer, the Engineer shall have the power of suspending the usual monthly certificate until such instructions have been complied with.

*Power to Dismiss Men.*

14. The Engineer may require the dismissal, within twenty-four hours by the contractor, of any agent, overseer, foreman, workman, or other person employed on the works, and in the event of the contractor refusing or neglecting to comply with such requisitions, all further payments on account of the work may be stopped until such dismissal is effected.

*Bad Materials or Improper Works to be removed.*

15. The contractor shall be bound to remove, within twenty-four hours, if written notice from the Engineer or Superintending Officer to that effect be given, any materials or work, whether fixed or not, which may appear to the Engineer to be of an inferior or improper description; and, in case of refusal, the Engineer shall have the power to get such materials or work removed at the contractor's expense, and to withhold all payments until such instructions have been complied with.

*Extra Works—Omissions of Works.*

16. If at any time whilst the works are in hand it shall be deemed expedient by the Engineer to order material or work of a different description to that specified, or to increase or diminish the dimensions or extent of any works to be done under this contract, or to alter their situation or vary the form or dimensions of any of the said works, or of any part thereof, or to make any deviation or to substitute one class of work for another, he shall have full power to do so, and to order and direct any such increase, diminution, alteration, deviation, or substitution, and the works involved in any such increase, alteration, deviation, or substitution, shall be executed by the contractor if of the class of works provided for in the schedule of prices, at such schedule prices; and no such increase, diminution, alteration, deviation, or substitution of works shall in any way annul or set aside this contract, or extend the time for the completion thereof, unless the Minister shall see fit to grant such extension; but such additions or alterations shall be measured and paid for, or deducted from the contractor's account, as the case may require, according to the schedule of prices. Provided that if any portion of the works so ordered to be done shall not be, in the opinion of the Engineer, of the same value or class of works provided for in the schedule of prices, the same shall be executed by the contractor at such prices as may be agreed upon with the Engineer; but if the contractor and Engineer cannot agree as to the price to be paid, the Engineer may order and direct the same to be done by such person or persons as he may think fit. Before any extra work, or work of an altered value or class, is undertaken by the contractor, it shall be imperative for him to procure an order in writing from the Engineer for carrying out such extra or variation of work, and the contractor shall not be entitled to any payment for such extras or variations unless he produce the written order for the same, as aforesaid, and he shall not be entitled to plead that the Engineer omitted to give such written order, as it is to be distinctly understood that the onus of obtaining such order shall be on the contractor. The contractor shall not be entitled to any other rate than the schedule rate on any plea that the work was in a different position or of a different class from, or in a more difficult position than that shown on plan or specification, or carried out under circumstances not contemplated in the specification, unless an agreement entitling him to payment by other than the schedule rates shall have been previously made and signed by the Engineer and the contractor.

*Valuation of Omissions.*

17. The Engineer shall have the power to direct the omission of the carrying out of any part or parts of the said works, but not amounting to the omission of the whole; and the value of such work so omitted in such case, calculated at the schedule rates, or in the event of there being no schedule rates, calculated on the basis of the proportionate value which such work bears to the lump sum, as ascertained by the Engineer, whose decision on that point shall be final, shall be deducted from the contract sum, subject, however, to arbitration clauses Nos. 36 to 41.

*Net Measurements.*

18. The whole of the work shall be executed and paid for according to the contract dimensions, and no allowance will be made for any excess of dimensions above those found on the working plans now exhibited, or which may be afterwards supplied, notwithstanding any general or local custom to the contrary, unless such excess has been expressly ordered. In the case of dressed masonry all cubic measurements will be taken at the extremes, and in the case of rock-faced masonry all measurements will be taken to the draft. With regard to timber, all framed work will be paid to extremes, but in no case will scarfs in hewn or round logs be paid for.

*Contractor liable for injury to adjoining Lands, Properties, &c.*

19. The contractor shall not commit any act of trespass, and shall effectually protect all adjoining properties and owners thereof against any loss, damage, or injury that may occur through the carrying on of the works, whether to buildings, goods, property of any kind, or to persons; and in case any such trespass be committed, or any such loss, damage, or injury occur, the contractor shall make full compensation, and shall make good all or any such loss, damage, or injury; and if any such compensation for trespass, or any such loss, damage, or injury be recovered against the Government in the first instance, it may be deducted from any money due or coming due to the contractor under this contract, or may be recoverable from the contractor or his sureties as liquidated damages in that respect incurred.

*Damages, &c., to be paid for by the Contractor.*

20. All damage, injury, or loss that may happen to the works from any cause whatever during their progress must be made good by the contractor at his own expense; and the whole of the works must be delivered up, complete in every respect, according to this contract, and the care and maintenance of all works under this contract shall remain with the contractor until the Engineer shall, by notice in writing under his hand, inform the contractor that he has taken charge thereof; and until such notice shall have been given, the contractor shall be responsible for all accidents, from whatever cause arising, and shall make good all damages thereto.

*Contractor not to Sublet Works or Assign Moneys.*

21. The contractor shall not assign or underlet this contract, or any part thereof, or assign or mortgage, charge or encumber all or any of the moneys payable or to become payable under this contract, or any other benefit whatsoever arising, or which may arise, under this contract, to any person without the consent in writing of the Minister being first obtained. The contractor for each and every breach of this condition shall be liable to pay to the Government the sum of £50 as and for liquidated damages; and the sum or sums payable as such damages may be deducted from any sum or sums due to the contractor under this or any other contract with the Government. And any permission to assign or underlet works to be done under this contract shall not discharge the contractor from any liability in respect of this contract, and shall extend only to the permission actually given, but not so as to prevent any proceedings for any subsequent breach of this condition; and all rights under these conditions shall remain in full force, and shall be available as against any such subsequent breach.

*Truck System not allowed.*

22. The workmen and labourers of every class employed on the works shall be paid their wages in full, in money, current coin of the Colony, at least once in every month, and no ticket or other system of payment by provisions, liquors, or goods will on any pretence be allowed; nor shall the contractor, or any person or persons employed by him, or in any way connected with him, establish any shop for the supply of provisions, liquors, or goods; nor shall the contractor oblige his workmen to take provisions, liquors, or goods of any kind from any person in particular. The workmen and labourers of every class shall be paid on the works if it be possible, or in some building in the vicinity; and in no case shall they be paid at a public-house or other place where liquors or refreshments are sold. The contractor, for each and every breach of this condition, shall pay to the Government the sum of £50 as and for liquidated damages; and the sum or sums payable as such damages may be deducted from any sum or sums due to the contractor under this or any other contract with the Government.

*Power of the Government to pay Workmen and Tradesmen.*

23. Before the payment of any money to the contractor, the Engineer may require from him a statutory declaration that the tradesmen supplying materials for or incidental to the works, and the workmen and labourers of every class employed on the works, have been paid their claims of every kind in full, in current coin of the Colony, and to the latest date at which such wages or claims are due; and the Engineer may withhold the payment of any money that may be due or become due to the contractor until such declaration has been made and delivered to him.

If the contractor shall fail or omit to pay the claims of any such tradesmen, workmen, or labourers, in the current coin of the Colony, it shall be lawful for the Minister or the Engineer, as often as the same shall happen, upon complaint of such failure or omission made by any such tradesman, workman, or labourer, and upon proof to the satisfaction of the Minister or Engineer of such failure or omission to pay the amount of such claim to such tradesman, workman, or labourer, and to deduct the same amount from any money then due or owing, or thereafter to become due or owing, to the contractor under this contract.

*Delay by Minister.*

24. If the contractor shall not be able to obtain possession of any portion of the ground required for the execution of the works to be done in connection with this contract, or if from the non-delivery, or any delay in the delivery to the contractor, of any materials which under this contract the Minister is to supply, or from any cause whatever arising out of the acts or defaults of the Minister, or any officers or servants in his employment, or from any accident happening to the said works during their progress not arising from the neglect or default of the contractor or his servants or workmen, the contractor shall be delayed or impeded in the execution of his contract, the contractor may from time to time within seven days of the happening or occurring of such act, default, or accident, apply in writing to the Engineer for an extension of time on account of such act, default, or accident, setting forth the cause of such application, and the Engineer shall, if the Minister think the cause sufficient, but not otherwise, allow by writing

writing under his hand such an extension of time as the Minister shall think adequate ; and the penalties, sets-off, and deductions to which under this contract the contractor is liable shall not attach until the expiration of such extension of time, but shall attach, and the contractor shall become liable to the same from the date of the expiration of such extended time or times. And unless the contractor shall make such application within the time and in the manner aforesaid, and unless and until the Minister shall allow such extension or extensions of time as aforesaid, the contractor shall not by reason of any delay arising from the cause or causes aforesaid, or any of them, be relieved in any way or to any extent of his liability to finish and complete the works within the time in this contract specified ; and in default of his so doing, to pay and be subject to the liquidated damages, deductions, and sets-off as in these conditions provided ; nor shall the Minister be deprived in any way or to any extent of his right to deduct or recover any sum or sums as liquidated damages, and not as or in the nature of a penalty or to make deductions or sets-off which under this contract he is entitled to make, deduct, set-off, or receive from the contractor for or by reason or on account of any delay in the completion of the work or any portion of the same, nor shall the rights, powers, and authorities by these conditions given to or vested in him be in any way affected.

*Patent Rights to be included.*

25. The contractor is to include in his tender the amount of all patent rights and royalties which may be claimed by any patentee or patentees for the manufacture and use of any portion of this work, and must undertake to liquidate the same when required to do so.

*Free Passes, &c.*

26. No free passes on any of the Government Railways will be granted either to the contractor or his agents, nor will any materials or articles of any description be conveyed free of charge.

*Conditions not to be Waived.*

27. None of the conditions of this contract shall be varied, waived, and discharged, or released, either at law or in equity, unless by the express consent of the Minister, testified in writing under his hand.

*Progress Payments without Prejudice.*

28. No progress payment given to the contractor shall prevent the Engineer from at any future time before the final settlement rejecting all unsound materials and improper workmanship discovered subsequently to the giving of any previous payment ; and notwithstanding any approval given or made by the Superintending Officer that portions or the whole of the works have been satisfactorily performed, the Engineer may require the contractor to remove or amend at any future time previously to the final payment on account of the work, any work that may be found not in accordance with this contract ; and the contractor must remove and amend at his own cost all such work when so required ; and if he refuse or neglect to do so, the Engineer shall have the power to carry out such work, and to deduct the whole cost thereof from any moneys that may be due, or that may become due, to the contractor.

If, in the opinion of the Engineer, further inquiry is necessary or desirable before any progress payment is made, he shall have the power to withhold the certificate on which such payment would have been made, for any period which he may consider necessary for the purpose of such inquiry.

*Security.*

29. Within fourteen days after the notice of the acceptance of his tender shall have been given to the contractor, or posted to the address of his last-known place of business or residence, he shall deposit with the Minister, or at the option of the Minister, in some bank or banks in Sydney, upon fixed deposit in the name of the Minister, a sum calculated at the rate of £5 for every £100 or part thereof on the amount of his tender up to the sum of £100,000, and at the rate of £1 for every £100 or part thereof in addition, for any amount over that sum, to be held by the Minister as security for the due and proper performance and completion of this contract until the Engineer has certified that the whole of the work in the said contract has been completed to his satisfaction, or until this contract has been cancelled by the Minister under the power given to him in that respect under clause 32 of these conditions, in which last-mentioned event happening the money so deposited shall become forfeited to the Crown, and shall be held by the Colonial Treasurer, for and on behalf of Her Majesty the Queen, as liquidated damages. If, however, this contract shall not have been cancelled under the said clause, and if the works comprised in this contract are not completed within the time mentioned in clause 34 of these conditions, the liquidated damages which under the last-mentioned clause are made payable to the Minister may be deducted and taken from the money so deposited.

If the contractor fail to deposit the sum as hereinbefore provided within fourteen days from the acceptance of the tender, or if he fail to execute the contract for the due performance of the works mentioned in the said tender, the Minister shall have the option of and full power and authority to declare such acceptance to be annulled, in which case the amount of the preliminary deposit will be absolutely forfeited to the Crown, as provided by the Regulations of the Tender Board.

No tenderer will be authorised to proceed with the work tendered for until he has made the deposit as aforesaid, and has executed the required contract for the due performance of the said works, it being hereby declared that for all or any work done or materials found and provided by the contractor before the due execution of the said contract, or the said moneys being deposited as aforesaid, he shall not have any right of action, claim, or demand against the Minister.

The contractor will be entitled to receive any interest that may be payable upon the fixed deposit of the money, if the money be placed in a bank at fixed deposit, as such interest becomes payable ; but it is expressly declared that the Minister is not to be held liable or answerable in any way for any loss on the money so deposited, or for any loss of interest from the fixed deposit not being renewed.

*Payments.*

30. Progress payments may be made once in every month, unless the same shall become not payable by reason of anything contained in these conditions, on the certificate of the Engineer, as the work proceeds, in the proportion of 80 per cent. of the value of the work returned, until the sum retained reaches the amount of the deposit provided for in the preceding clause, when no further deductions will be made.

made. The amount of the retention money will be held by the Minister, in addition to the cash security, unless otherwise provided for in the specification, until the Engineer has certified that the whole of the works have been satisfactorily completed, and the period specified for the maintenance of the said works has expired, and all accounts finally adjusted, when the retention money, in addition to the cash security, will be paid to the contractor; and it is expressly declared that until a certificate has been given by the Engineer to the Minister that the work done by the contractor has been executed and completed to his satisfaction, the contractor shall have no right or claim in respect of any work done or materials provided, nor to the payments from time to time to be made under this contract, or to the final payment upon the whole of the works being finished.

*Delay or Bad Work, Bankruptcy, &c.*

31. In case the Engineer shall be at any time dissatisfied with the mode of proceeding, or at the rate of progress of the works or any part thereof, or in case the contractor shall at any time neglect or omit to carry out the instructions of the Engineer, or to dismiss any person employed when required, or shall neglect or omit to remove any materials or work which he is required to remove under condition 15, or in case the contractor shall assign or underlet this contract, or any part thereof, or assign or mortgage, charge or encumber, or attempt to assign, mortgage, charge or encumber, all or any of the moneys payable or to become payable under this contract, or any other benefit whatsoever arising or which may arise under this contract, without the consent in writing of the Minister being first obtained, or in case the contractor shall make default in insuring and keeping insured, in cases where insurance is specified, and depositing the policies and receipts for premiums in accordance with these conditions, or in case the contractor shall become bankrupt, or shall make an assignment of his estate for the benefit of creditors, or shall make an arrangement or composition with his creditors, then and in every such case the Minister shall be at liberty, without vitiating this contract, and without prejudice to any right that may have accrued to liquidated damages under any of these conditions, to take the works wholly or partially out of the hands of the contractor and to employ or contract with any other person or persons to execute the same, and for that purpose to take possession of and use all horses, materials, plant, tools, implements and things on or about the said works, without making any allowances for the same, and all damages and expenses thereby incurred shall be ascertained and certified by the Engineer, and together with any sum payable as liquidated damages under these conditions shall be deducted from any money that may be then due or may thereafter become due to the contractor or may have been deposited by him; and if the money then due, or thereafter becoming due to the contractor, or deposited by him, be not sufficient for that purpose, the balance remaining unpaid shall be a debt due by the contractor to the Minister, and may be recovered accordingly.

*Cancellation of Contract.*

32. In any or either of the events mentioned in the last preceding clause of these conditions, the Minister shall have the option and full power and authority in lieu of proceeding under such clause, and without prejudice to any right that may have accrued to liquidated damages under any of these conditions, to cancel this contract whether there are any works remaining to be done or not; and in such case the moneys which shall have been previously paid to the contractor on account of the works executed, shall be taken by him as full payment for all works done under this contract; and upon notice in writing under the hand of the Minister that he, under the authority of this condition, cancels this contract, being given to the contractor, this contract shall be cancelled, and thereupon all sums of money that may be due to the contractor, or unpaid, together with all implements in his possession, and all materials provided by him, upon the ground upon which the work is being carried on, or adjacent thereto, shall be forfeited, and all sums of money held as security or named as liquidated damages for the non-fulfilment of this contract, within the time specified, shall also be forfeited and become payable to the Government, and the said implements and materials shall become and be the absolute property of the Government, and with the moneys so forfeited and payable as aforesaid shall be considered as ascertained damages for breach of contract.

*Insurance.*

33. The contractor shall from time to time, when required to do so by the terms of the specification, insure the works against loss or damage by fire, in an office to be approved in the name of the Minister for the amount of the full value of the work completed, as determined by the Engineer, and shall lodge with the Engineer the policies and receipts for the premiums for such insurance, and shall continue such policies until possession is given up to the Government; in default of which the Minister shall be at liberty to insure and deduct the amount of the premiums paid from any moneys payable to the contractor, and may refuse payment of any certificate until such policies and receipts are handed in as aforesaid; but this insurance is to be no limit or bar to the liability and obligation of the contractor to deliver up the works to the Minister completed in all respects according to the contract. In case of loss or damage by fire the moneys payable under any such insurance shall be received and retained by the Minister until the works are finally completed, and shall then be credited to the contractor in the final settlement of accounts in the event of the contract not having been previously cancelled under these conditions.

*Time of Completion, &c.*

34. The contractor shall complete the whole of the works comprised in this contract within seventy-eight weeks from the date of the acceptance of his tender, and in the event of their non-completion at the specified times, should the Engineer not have proceeded under clauses Nos. 31 and 32 of these conditions, or either of them, the contractor shall pay, by way of liquidated damages, and not as or in the nature of a penalty, the sum of twenty pounds sterling for every week, or for every part of a week, that shall elapse after such specified time, until their completion, and which sum or sums may be deducted from any money payable to the contractor under this or any other contract. The contractor shall have no right to a certificate for payment after the date specified in these conditions for the completion of this contract until the whole of the works shall have been properly completed to the satisfaction of the Engineer, unless the time for the completion of this contract shall have been extended by the Minister, in which case such extended time shall become the time for the completion of this contract, and it is to be expressly understood that the fact of the time having been so extended shall not in any way be taken as a waiver of this contract,

or

or as annulling or setting aside this contract in any respect, nor be taken as releasing the contractor from any of the responsibilities or obligations of this contract, which, in all other respects, shall remain the same as if the time had not been extended.

The like liability also shall hold good as to the obligation of the contractor in the event of any advance being made to him from the retention money, or on material on the ground and not *in situ*.

#### Maintenance.

35. The contractor will be bound to maintain the works for a period of three months after their final completion and use by the Government; and if any part should within that period show signs of weakness, or of giving way, or if any defective workmanship or materials be detected, the contractor, when called upon to do so, shall make good the same at his own expense, to the satisfaction of the Engineer, before any moneys held by the Government on account of this contract will be paid. It is also to be distinctly understood that the Government shall have the full, free, and unrestricted use of the said works, without any interference whatever on the part of the contractor during the currency of this period of maintenance; and such use of the said works on the part of the Government shall not be held as relieving the contractor of any liabilities or obligations whatever in respect of his contract.

#### Arbitration.

36. The following matters shall be decided by the Engineer, whose decision shall be absolute and final:—(1) All questions or disputes which shall arise respecting the true construction or meaning of the plans or specification, or the quality of the workmanship, or quantity or quality of materials necessary for the whole or any part of the contract. (2) All questions and disputes when the net claim shall not amount to the sum of £500.

37. All questions and disputes not hereinbefore provided for shall, if the net claim be £500 or upwards, upon the completion of the works under the said contract, and before payment of the retention money and the money deposited as security for the due carrying out of the contract, be fixed and determined by arbitration as hereinafter provided.

38. If either party consider that he has claims in respect of any matter in which arbitration may be claimed, he shall, within one month of the date of the final certificate, furnish to the other party full particulars in writing of such claims, breaches, doubts, disputes, and differences in respect of which he desires arbitration, giving distinct and separate items, and the amount, if any, claimed under each item; and the other party may thereupon furnish particulars of all claims he has in respect of such matters, irrespective of the aggregate amount of such claims; and the party furnishing the same shall be bound by such particulars; and no claim not included in such statement shall be taken into consideration at such arbitration, or become subject of arbitration or action; and the claim or respective claims so made as aforesaid shall be determined by arbitration, in the manner as hereinafter provided.

39. If both parties concur in the appointment of a single arbitrator, then the reference shall be to such single arbitrator; but if the parties for twenty-one days after the particulars first mentioned in the last preceding clause shall have been furnished, cannot concur in the appointment of a single arbitrator, the reference shall be to two arbitrators, one to be appointed by each party, or their umpire to be appointed in writing by such arbitrators before they commence the business of the reference; and the arbitration shall, subject to the express provisions herein contained, be made and held pursuant and subject to the Arbitration Act of 1892, or any statutory modification or re-enactment thereof for the time being in force.

40. The costs of and incidental to the arbitration shall be paid or borne by or between the parties in manner hereinafter mentioned, that is to say:—

1. If the sum awarded does not exceed the amount acknowledged by the Department to be due, the contractor shall pay all the costs of and incidental to the arbitration.
2. If the sum awarded shall amount to the sum claimed by the contractor, the Government shall pay all the costs of and incidental to the arbitration.
3. If the sum awarded exceeds the amount acknowledged by the Department to be due, but is less than the sum claimed by the contractor, the costs of both parties shall be added together and the total cost so ascertained shall be paid by the parties in the proportions following, namely:—The Government shall pay such sum as bears the same proportion to the total cost as the net award bears to the net claim, and the balance shall be paid by the contractor.

The award shall direct to, and by whom, and in what proportions the costs shall be paid, in accordance with the provisions hereinbefore contained; but the award need not specify the amount of such costs. Such amount shall, in the event of disagreement, be taxed or settled by the arbitrators or umpire, as between party and party, after the award is made. No costs shall be allowed as between solicitor and client. If either party shall be dissatisfied with the costs allowed by the arbitrators or umpire, the same may be taxed by the Prothonotary or other proper officer of the Supreme Court.

41. It is to be distinctly understood that all claims by either party to have any of the matters which may be submitted to arbitration so dealt with, must be made upon the whole of the work being completed, and before payment to the contractor of the retention money, or of the money deposited as security for the due performance of the contract, and that the acceptance by the contractor of payment of the retention money in cases where a bond to secure the completion of the works has been given, and in other cases of the retention money, or of any balance thereof, and of the money deposited as security for the due performance of the contract, shall be conclusive proof that the contractor has no such claim or claims.

Department of Public Works, Sydney.

ROBT. HICKSON,  
Engineer-in-Chief for Public Works.

## TENDER FORM.

In pursuance of advertisement in the *Government Gazette*, we, the undersigned, do hereby tender to provide the material and perform the various works required in and about the full and proper construction, erection, and completion of Johnstone's Creek Stormwater Channel from Parramatta Road to about 10 chains north of the Balmain Tramline (Contract No. 118), agreeably to the plans, specification, schedule to specification, special condition, and general conditions, which have been inspected by us, at 20½ per cent. below the prices affixed to each item in the schedule of quantities and prices annexed hereto, and to complete the same within eighteen months from the date of the acceptance of this tender; and we do hereby agree that any additions to or deductions from the said works shall be paid or allowed for, as the case may be, at and after the rate quoted above, or, if not in schedule, at a price to be agreed upon at the time; and we hereby undertake that we will, within fourteen days from the date of notification of the acceptance of the said tender, execute and deliver to the Minister for Public Works, a valid legal contract with Her Majesty the Queen, embodying the terms and conditions above mentioned, and to provide the security required by clause 29 of the said general conditions; and we enclose herewith our cheque for the sum of £120 as a preliminary deposit; and we agree that such sum shall be absolutely forfeited if we at any time within thirty days after the said tender is opened withdraw the same, or if, in the event of this tender being accepted, we fail to complete the above-mentioned contract within fourteen days thereafter; and further, that this tender is made subject to the conditions contained in the Tender Board Regulations, printed on the back hereof, and by which we agree to be bound.

Dated this 24th day of April, 1895.

JOHN CARTER,  
F. M. GUMMOW,  
D. G. SNODGRASS,  
Alfred-street, North Sydney.

Witness,—EDWARD M. CLARK.

## TENDER BOARD REGULATIONS.

No tender shall be received after eleven a.m. on the day named for the receipt of such tender, unless there are circumstances which, in the opinion of the members of the Board then sitting, render it desirable to do so.

It shall be the duty of the President, Vice-President, or the senior member present, as the case may be, as soon as the tenders shall have been opened and the necessary particulars ascertained, to publicly announce the number of tenders received for each work and the name of the lowest tenderer; but no tender shall be accepted until the head of the branch, under whose directions the work is to be carried out, has reported upon the whole of the tenders received.

The Secretary shall, as soon as practicable after the Board has adjourned, exhibit in a conspicuous position, in the Public Works Office, a full statement of the tenders received, showing the work, the name of the tenderer, and the amount of each tender.

All envelopes containing tenders must be addressed to the President of the Board, and have legibly endorsed upon them the name of the work for which the tender is submitted.

Every tender must, as a guarantee of good faith, be accompanied by a preliminary deposit, calculated according to the following scale, viz. :—

For amounts up to £500 inclusive ... ..	£5 0 0
For amounts exceeding £500 and not exceeding £1,000... ..	£10 0 0

For all sums over £1,000 one per cent. on the amount of tender up to a maximum deposit of £500. Such deposit to be in the form of a cheque in favour of the President of the Board, endorsed by the Manager of the Bank upon which it is drawn, or a bank draft.

All deposits, with the exception of that of the successful tenderer, shall be returned by the Secretary to the person entitled thereto, as soon as possible after the Board shall have adjourned, and the deposit made by the successful tenderer shall be returned to him on his executing the bond for the fulfilment of the contract. When the contract is for a less sum than £200 the deposit with tender shall not be returnable until the service is satisfactorily completed.

Any tender which may be received without such preliminary deposit shall, unless otherwise directed by the Board, be deemed to be informal, and rejected accordingly.

In the event of any tenderer failing to take up his tender, complete the bond, and proceed with the contract, within the time specified, or withdrawing his tender after it shall have been opened, whether such tender shall have been accepted or not, all moneys deposited by him on account thereof or in connection therewith, shall be forfeited to the Crown, and in such case be paid to the credit of the Consolidated Revenue of the Colony.

Whenever a tenderer shall fail to proceed with a contract as aforesaid, fresh tenders shall be invited at short notice for the work, unless in the opinion of the President there are circumstances which make it desirable for another tender in the same series to be accepted; but the tenderer by whose default such a course has been rendered necessary shall be excluded from the competition, and from any competition for other works, at the pleasure of the President.

In submitting a tender, the full Christian name of the tenderer must be given, or when the offer is in the name of a firm, the names in full of each member. When bondsmen are required, the names in full, occupations, and addresses must be stated in the tender. The omission of this information will render the tender liable to be declared informal.

The Board shall not be bound to accept the lowest or any tender.

The Board-room shall be open for the admission of the public while the tenders are being opened and declared.

This is the tender marked "F," referred to in our annexed agreement with Her Majesty the Queen, dated the 15th day of June, A.D. 1895.

Witness,—HAROLD F. NORRIE.

28	Cart, horse, and driver .....	"	"	0 11 0
29	One additional horse .....	"	"	0 5 6

The quantities are not guaranteed as correct, and are merely for the guidance of tenderers, being subject to omissions, deductions, alterations, and additions.

All work herein enumerated shall be understood as being placed in position where specified and ordered, and in complete working condition, in accordance with the specification.

The above schedule prices include, in every case, continual maintenance of the works during the whole time of construction, and up to the day of their being formally taken over by the Engineer.

Prices for items Nos. 25, 26, 27, 28, and 29 are to be for such as are able-bodied and efficient. The schedule rates per day are for the day of eight hours. In the event of overtime and night-work being ordered, it is to be paid for at 25 per cent. advance on the time rates set down for day-work.

The whole of the foregoing prices to include all labour, tools, implements, plant, machinery, shoring, timbering, centering, concrete boxes, unwatering, coffer-dams, fluming, temporary bridges, roads, pumping, gasket filling, diverting water-courses and surface water, diverting and maintaining the traffic along roads, crossing over pipe-sewers, disposal and removal of surplus materials on completion of contract, reinstating all roads and other surfaces, &c., and any other thing necessary in executing and completing each respective item, in accordance with plans and specification.

This is the schedule of prices marked "G" referred to in our annexed agreement with Her Majesty the Queen, dated the fifteenth day of June, A.D., 1895.

"H."

Sirs,

Department of Public Works, Sydney, 16 May, 1895.

I have the honor, by direction of the Secretary for Public Works, to inform you that your tender, dated the 24th ultimo, is accepted for construction of the Johnstone's Creek stormwater channel, Contract No. 118, at twenty and one half per cent. (20½ per cent.) below the rates set forth in the printed schedule of prices.

It is to be distinctly understood that the work is only to be proceeded with on the part from Booth-street towards the harbour when you have written instructions to proceed therewith, subject to the following special conditions, viz. :—

That if it shall be represented to the Secretary for Public Works at any time during the progress of this contract that an undue number of men are being employed thereon who have not been domiciled in this Colony for six months previously to such employment, and such allegation be proved to his satisfaction, the Minister shall have the power to call upon you to discharge any or all such men, and on such direction being conveyed to you, under the hand of the Under Secretary for Public Works, you shall discharge such men forthwith; and in the event of your non-compliance with any such direction, the Minister shall have the power to declare this contract to be cancelled as if this stipulation had been expressly set out in the cancellation clause of the general conditions relating to this contract.

The work is to be carried out in strict accordance with the several contract exhibits relating to this contract, and to be completed within eighteen months from this date.

The security required on this contract will be a fixed deposit receipt, in favour of the Secretary for Public Works, for the sum of £605.

I have to refer you to the Engineer-in-Chief for Public Works for further information, and to request that you will call upon the officer in charge of bonds and contracts at this office for the purpose of executing the necessary documents for the due observance of your contract.

I have, &amp;c.,

J. BARRLING,

Under Secretary.

Messrs. Carter, Gummow, &amp; Co., Alfred-street, North Sydney.

This is the copy acceptance, marked "H," referred to in our annexed agreement with Her Majesty the Queen, dated the fifteenth day of June, A.D. 1895.

**WATER SUPPLY FOR WYALONG.**

(PETITION FROM RESIDENTS IN THE TOWNS OF WYALONG, WYALONG WEST, AND THE WYALONG GOLD-FIELDS, PRAYING FOR.)

---

*Received by the Legislative Assembly, 11th September, 1895.*

---

To the Legislative Assembly of the Colony of New South Wales in Parliament assembled.

GREETING :—

The Petition of the Residents of the towns of Wyalong, and Wyalong West, and the Wyalong Gold-field generally, humbly sheweth—

1. That owing to the absence of a supply of water it is impossible to satisfactorily carry on the mining operations of this gold-field.
2. That great distress has been and still is caused to your Petitioners by the want of water, in sufficient quantity and of suitable quality, for domestic purposes.
3. That the tanks excavated at Wyalong and Wyalong West, by order of the Government, are useless, as not sufficient rains have fallen to cause water to flow into them.
4. That Petitioners have reason to believe, from the results obtained in sinking shafts for mining purposes, that a plentiful supply of water would be obtained by artesian boring.
5. That there is a large and we believe permanent supply of water in the Bland River about 20 miles from Wyalong.
6. That the rainfall in the Wyalong District is uncertain and droughts are frequent.
7. That a population of about 5,000 souls is resident in or in the vicinity of the towns of Wyalong and Wyalong West.
8. That there are now on the field eight complete quartz-crushing plants, which have all been erected by and at the expense of private individuals and firms, and that in addition to these very extensive chlorination works are now in course of erection for the treatment of stone not only from the Wyalong mines but also from other mines in this Colony and elsewhere.
9. That a large number of the reefs at Wyalong have been proved to be payable at a depth of from 160 to 200 feet, with every indication of continuing payable to great depths, and that in the opinion of eminent geologists and mining experts the field will be a permanent one.
10. That your Petitioners respectfully invite the fullest inquiry into the accuracy of the foregoing statements.
11. That in consideration of the state of affairs as set out herein, your Petitioners pray that immediate steps be taken by the Government to provide a supply of water for the Wyalong gold-field, either by artesian boring or by bringing it from the Bland River, or otherwise as may appear most advisable to the expert advisers of the Government, as such a supply is indispensable if the present population is to be maintained on the field, and if no such supply is provided a large number of the residents will be driven away and deprived of the means of subsistence which they may obtain here.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 875 signatures.]

1895.

NEW SOUTH WALES.

## STATE CHILDREN'S RELIEF BOARD.

## REPORT

OF THE

PRESIDENT, THE HON. SIR ARTHUR RENWICK, K.B., M.L.C.  
&c., &c., &c.,

FOR THE

YEAR ENDING 5 APRIL, 1895.

---

---

Presented to Parliament, pursuant to Act 44 Vic. No. 24, sec. 121.

---

---

SYDNEY: CHARLES POTTER, GOVERNMENT PRINTER.

1895.

The President of the State Children's Relief Board to The  
Colonial Secretary.

Charitable Institutions of New South Wales,  
State Children's Relief Board,  
Central Home, Paddington, 5 April, 1895.

Sir,

In accordance with the provisions of Act 44 Vic. No. 24, I have the honor to submit for the information of the Honorable the Colonial Secretary my Report upon the operations of the State Children's Relief Board for the official year which closed on the 5th April, 1895.

Fourteen years have passed since Parliament adopted boarding-out as the national policy of dealing with State children in this Colony, and the lapse of time has only afforded stronger proof of the wisdom of the system under which the family method of training our dependent children was substituted for that technically known as the "barrack system," under which all the essential conditions of family life and true home influences were, of necessity, ignored. It is not, however, necessary to deal with that phase of the subject here, because boarding-out has long ago passed its tentative stages; but I may fitly refer briefly to the economical aspect of the matter, to which too little public attention has hitherto been directed. From returns recently carefully prepared, it is estimated that since the initiation of the boarding-out system in this Colony, and comparing the annual capita-tion cost of the children dealt with under it with that of the inmates previously trained in the public asylums, it has saved not less than £100,000 to the State, apart altogether from the physical and moral advantages to the children which it has undoubtedly secured. This satisfactory result has only been obtained by careful administration and sustained enthusiasm on the part of the Board and its officials, and the fact that after the first three years of the system the average cost seldom exceeded £14 per child is proof of the closeness of the supervision exercised over every item of expenditure.

The following table shows the rate at which the number of children under the care of the Board has increased annually since the initiation of the boarding-out system in 1881:—

Under control on	Supported by Govern- ment.			Adopted without payment.			Apprenticed.			Total under control.		
	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.

\* This total includes 9 children in Hospital, 140 in Cottage Homes, 10 in Depot, 14 under 3 years paid for at 7s. per week, 45 delicate children at 6s., 1 delicate child at 7s. per week, 16 infants paid for at 8s. per week, and 20 infants paid for at 10s. per week.

† This total includes 29 children who are classed as "Boarders without subsidy," that is, placed with guardians who, as in the case of adopted children, do not receive payment for maintenance.

‡ This total includes 16 absconders, whose names still appear on the books, and 12 children classed as unofficial.

It

It is only possible to account for the very large increase that has taken place in the numbers of young children who have been placed under the control of the Board during the year—as shown in the foregoing table—by attributing it wholly to the continued want of employment, and the consequent depression and poverty of the working classes. There were, in 1895, just 365 more children under control than in 1894, when the numbers were 272 in excess of the previous year. Totalling these two years, it will be seen that the net increase has been 637—the largest increase occurring in any two years since the initiation of the system. Children are not, in any case, boarded out without due care being taken to ascertain that they are in really destitute circumstances, so that there can be no doubt whatever of the necessity for affording relief in every instance. In 1894 there were 1,741 children supported by the State, while there are now 2,094—an increase of 353 in the division for which payment is made. In 1894 there were 2,809 children placed out—there are now 3,174, comprising 1,822 boys and 1,352 girls, for whom suitable homes and approved occupations have been provided under the auspices of the Board.

The total number of children under the care of the Board during 1894 was 2,809, which was an excess of 272 over the previous year, and was made up of 1,606 boys and 1,203 girls. It is gratifying to find that in the great majority of cases satisfactory progress and improvement are being made, and that, with few exceptions, no ground for complaint existed against either the guardians or the children. During the official year now closed there were 1,822 boys and 1,352 girls under control, or a total of 3,174, showing an increase of 365 upon the operations of 1894. The ages of the children varied from a few days—in some cases from the time of birth—up to the age of 17 years, when they are released from control, and being paid the money which has accumulated in the Savings Bank to their credit during the period of their apprenticeship, are permitted to go out into the world and earn their own livelihood. Generally speaking, they are well inclined and well equipped to do so successfully. There were 601 boys and 452 girls, or a total of 1,053 children boarded out during the year, as against 398 boys and 297 girls, or a total of 695 children, so dealt with in 1894, showing an increase of 358 in this branch alone. Nine boys and 10 girls died, in addition to 5 boys who were accidentally drowned in various parts of the country; 140 boys and 111 girls were discharged to relatives, after due inquiry and upon the recommendation of the officers of the department; 4 girls were transferred to the Deaf and Dumb and Blind Institution; 3 uncontrollable boys were sent on board the training ship "Sobraon"; 49 boys were sent to the Boys' Home at Dundas; 5 boys and 5 girls were handed over to the Benevolent Asylum, Sydney; 3 girls were sent to the Newington Asylum; 2 boys were sent to the Imbecile Asylum at Newcastle; 41 boys and 90 girls were sent to the Shaftesbury Receiving Home; 4 boys were transferred to the St. Aloysius' Home; 1 boy was sent to the Ashfield Home; 2 boys were transferred to the St. Joseph's Provident Society; 1 girl was sent to the Consumptive Home at Thirlmere; 18 boys and 2 girls absconded; and 95 boys and 77 girls were discharged from control, they having reached the age of 17 years. Of the 2,094 children who are paid for by the State, 9 are in hospital; 146 are in the Cottage Homes for Invalids at Parramatta and Mittagong; 10 at the Central Home, Paddington; 20 delicate infants are paid for at the rate of 10s. a week; 16 at 8s. per week; 15 at 7s. a week; and 45 at 6s. a week, whilst the whole of the remainder who come into the subsidy division are paid for at the rate of 5s. a week. The other classes are dealt with further on under their distinctive headings.

The expenditure has been carefully supervised and judiciously curtailed wherever an opportunity presented itself of effecting economy without interfering with the usefulness of the system. Deposits amounting

amounting to £36,182 1s. 8d. were received from the Treasury, and to this amount must be added a sum of £1,507 13s. 11d. carried forward to the credit of the Board from the previous year's transactions, making a total of £37,689 15s. 7d. When provision was made for the payment of all accounts due up to the closing of the books, the gross expenditure was £37,475 4s. 10d., which left a credit balance of £214 10s. 9d. to be carried forward to the official year 1895-6. The gross cost of boarding out was £26,859 0s. 4d., or an increase of £3,247 13s. 6d. over the previous year. The daily average number of children placed out as boarders during the year was 1,982, an increase of 326, and the gross average cost per head was £14 6s., as against £14 5s. 2d. in 1894 and £14 5s. 10d. in 1893, or an increase in the capitation cost of 10d. The gross receipts from those parents who contributed something towards the maintenance of their offspring amounted to £1,253 2s. 8d., and after deducting this amount from the gross capitation expenditure, the actual cost per head to the State during 1895 has been £13 18s. 2d., or a decrease of 4d. upon the previous year's transactions. These results are most satisfactory. Full details of the receipts and expenditure will be found among the Appendices. As an indication of the systematic economy which is practised in all divisions I may mention that this capitation charge seldom varies from year to year.

The following is the classification of the guardians' occupations:—  
 Architects, 1; agents, 2; apiarist, 1; attendants, 7; bakers, 7; boot-makers, 9; bricklayers, 2; boot-finisher, 1; butchers, 4; builders, 2; boilermaker, 1; blacksmiths, 5; bank managers, 3; clergymen, 3; carters, 2; coach proprietors, 2; clerks, 8; cook, 1; cabinet-makers, 3; carpenters, 22; contractors, 3; commercial travellers, 2; chimney cleaner, 1; coachbuilder, 1; civil servants, 3; confectioners, 2; chemists, 3; cordial makers, 2; collectors, 2; caretakers, 3; compositor, 1; cooper, 1; cabman, 1; dairy farmers, 65; domestics, 328; dress-makers, 29; dealers, 3; doctors, 3; draper, 1; engine-driver, 1; electrician, 1; engine-smith, 1; engineers, 3; farmers, 983; fruiterers, 2; fishermen, 3; fettler, 1; gardeners, 16; grazier, 41; gunsmith, 1; gatekeeper, 1; grocers, 23; gasfitter, 1; independent, 30; instrument maker, 1; importer, 1; journalists, 2; joiner, 1; labourers, 11; laundresses, 7; lighterman, 1; librarian, 1; miners, 43; merchants, 2; milkmen, 10; moulders, 1; master mariners, 3; messenger, 1; music teacher, 1; monumental masons, 1; nurses, 6; orchardists, 64; organist, 1; plumber, 2; pastoralists, 5; painters, 6; plasterer, 1; poultry farmer, 1; policemen, 3; photographer, 1; pig farmer, 1; postmasters, 2; picture framer, 1; quarrymen, 3; railway employces, 20; school teachers, 27; shopkeepers, 22; shipwright, 1; solicitors, 2; smelter, 1; surveyor, 1; seamstresses, 4; stonemason, 1; settler, 1; storeman, 1; sawyer, 1; selectors, 2; squatter, 1; shipmaster, 1; tailor, 2; upholsterer, 1; undertaker, 1; vigneron, 1; warders, 2. Total, 1,925 guardians.

Under the thorough system of inspection that now prevails, and upon which the present comfort and future welfare of the children mainly depend, the circumstances and condition of the guardians continue to improve. The guardians have been changed in a great many instances during the year, in a few instances because of neglect, but mainly because the homes and localities were found upon experience to be unsuitable, but as a rule no very serious grounds for complaint existed, and wherever it was found necessary to make a change practical experience has shown that it was in the interest of the children. There was an increase of 214 in the number of children placed out with well-to-do farmers throughout the healthy country districts, the total number for 1895 being 983, and the number of girls placed in domestic employ has increased from 287 to 328, whilst in all the other useful trades and occupations by which the children might in time be expected

expected to earn a livelihood satisfactorily, increases have taken place. The number of foster parents has increased during the year from 1,747 to 1,925—that is to say, there are now 178 more guardians than there were in 1894. When all the various classes of useful occupations and callings are taken into account it will be seen that there are now 2,993 children being trained in the hope that when they arrive at years of discretion and maturity they will be equipped for the battle of life and provided with the means of becoming earnest, useful, and contented citizens.

Children are placed out in the undermentioned districts in the numbers stated:—Ashfield, 10; Arncliffe, 2; Annandale, 13; Auburn, 31; Albury, 4; Albion Park, 3; Adamstown, 7; Armidale, 9; Aberdeen, 3; Balmain, 133; Bowning, 1; Berrima, 10; Botany, 6; Burwood, 15; Boggabri, 1; Bexley, 1; Balmoral, 4; Bowral, 23; Ballina, 3; Bundanoon, 4; Bungonia, 1; Braidwood, 10; Bulli, 39; Berry, 19; Bungendore, 6; Bega, 1; Binalong, 2; Brogo, 2; Bathurst, 27; Brewongle, 2; Blacktown, 5; Branxton, 42; Croydon, 17; Camperdown, 13; Canterbury, 3; Campbelltown, 4; Castle Hill, 4; Canowindra, 1; Candelago, 1; Collector, 3; Coraki, 1; Crookwell, 18; Canley Vale, 8; Camden, 27; Cootamundra, 15; Cambewarra, 8; Cargo, 5; Cooma, 3; Cessnock, 1; Coolac, 3; Cudal, 2; Coolaman, 1; Clarencetown, 7; Cooranbong, 2; Deniliquin, 1; Dapto, 11; Dungog, 6; Denman, 1; Douglas Park, 2; Dundas, 3; Dural, 1; Dubbo, 6; Eastwood, 1; Forbes, 13; Glebe, 19; Gladesville, 17; Goulburn, 299; Grabben Gullen, 13; Granville, 76; Guildford, 17; Gunning, 12; Gerringong, 13; Girilambone, 1; Glen Innes, 3; Gosford, 4; Greta, 6; Gunnedah, 1; Gundagai, 1; Gulgong, 3; Hunter's Hill, 16; Hurstville, 8; Hexham, 3; Helensburg, 1; Hinton, 3; Hartley, 1; Hawkesbury, 92; Illabo, 1; Islington, 3; Jugiong, 1; Junce, 8; Jamberoo, 21; Kogarah, 13; Kellyville, 3; Kangaloon, 8; Kiama, 17; Kangaroo Valley, 25; Leichhardt, 76; Liverpool, 9; Lambton, 11; Lismore, 2; Lawson, 1; Manly, 5; Maitland East, 13; Maitland West, 74; Marrickville, 65; Macdonaldtown, 16; Mummel, 14; Menangle, 1; Minmi, 5; Mittagong, 97; Moss Vale, 8; Marulan, 11; Murrumburrah, 7; Milton, 29; Moruya, 5; Mulgrave, 4; Mudgee, 5; Molong, 5; Miller's Forest, 19; Mount Hope, 1; Morpeth, 4; Muswellbrook, 6; Manning River, 2; Macleay River, 2; Murrurundi, 1; Nevertire, 1; Newbridge, 2; Newtown, 55; Nowra, 20; Newcastle, 78; Nelson's Plains, 6; Narrabri, 2; Narrandera, 1; North Sydney, 60; Oberon, 2; Orange, 7; Ourimbah, 3; Pyrmont, 10; Paddington, 38; Parramatta, 175; Petersham, 17; Parkesbourne, 5; Patterson, 24; Picton, 44; Pitt Town, 28; Penrith, 12; Pyree, 1; Parkes, 7; Prospect, 7; Queanbeyan, 7; Quirindi, 1; Rockdale, 11; Rookwood, 33; Redfern, 43; Rydalmere, 2; Ryde, 12; Randwick, 9; Riverstone, 27; Richmond, 2; Rooty Hill, 2; Raymond Terrace, 11; Raglan, 1; Summer Hill, 8; Sydney, 18; Singleton, 19; Surry Hills, 40; Shellharbour, 4; St. Mary's, 5; St. Alban's, 1; Sassafras, 2; Stockton, 1; Scone, 3; Taralga, 4; Tarago, 6; Tumut, 6; Thirlmere, 6; Tilba Tilba, 1; Tamworth, 4; Tirranna, 5; Waverley, 18; Woolloomooloo, 13; Woollahra, 18; Waterloo, 36; Wheeo, 19; Windellama, 3; Watson's Bay, 4; Wagga Wagga, 2; Wollongong, 27; Windsor, 27; Wallerawang, 1; Wentworth, 3; Waratah, 8; Wilberforce, 25; Wellington, 4; Wallsend, 12; Wickham, 2; Woodville, 4; William Town, 3; Wombat, 1; Wilcannia, 1; Warren, 1; Wollombi, 5; Wyee, 1; Yass, 8; Yarra, 5; Young, 2; out of Colony, 4. Total children, 2,993.

A marked illustration of the popularity and success of the boarding-out system is to be found in the very large increase which takes place every year in the number of persons who desired to obtain the control of State children, and the illustration is the more gratifying when it is remembered that the applications are unsolicited in any way and come from all parts of the country. The most careful examination

examination is made by the official visitors into the circumstances of each applicant, in order that only really suitable homes may be selected. The number of applications received during the year just closed was 1,705 as against 1,097 in 1894, or an increase of 608. Of the total, 1,246 were from Protestants and 459 from Roman Catholics. In the former division 1,763 children were applied for as boarders, 228 as apprentices, and 16 for adoption; while in the latter 459 Roman Catholics sought 656 children as boarders, 73 as apprentices, and 6 for adoption. A total number of 2,742 children of all religions were applied for in 1895 as against 1,713 in 1894, or an increase of 1,029 for the year. 1,200 of the total new applications were inquired into and reported upon by the inspectors attached to the Department, with the result that 908 were approved, and 292 refused on a variety of grounds that were considered sufficient by the Board to warrant their approving of the recommendations of the trusted officers of the Board.

There were eleven sittings of the Board during the year, at which the members attended as follows:—The Hon. Sir Arthur Renwick, Kt., M.D., M.L.C., President, 11; Mrs. Garran, 11; Lady Windeyer, 10; Mrs. Goodlet, 10; Lady Manning, 8; Mrs. McMillan, 8; Mrs. Slattery, 4; The Hon. W. J. Trickett, M.L.C., 3; The Hon. L. F. Heydon, M.L.C., 3. Mrs. McMillan was absent in Europe during portion of the year.

The following is the usual list of lady visitors, under whose supervision the homes are placed in various parts of the Colony, and whose voluntary services are so valuable a factor in the working of the system:—Armidale, Mrs. Allingham, Mrs. K. A. Donnelly, Mrs. S. A. Kearney, Miss E. Wormersley; Annandale, Mrs. Arguimbau; Ashfield, Mrs. Holland, Mrs. Wilson; Bowral, Mrs. J. C. Bagot, Mrs. D'Arcy Irvine; Bega, Mrs. Evershed; Balmain, Mrs. J. Dixon, Mrs. Pole; Branxton, Mrs. J. A. Tullock, Mrs. Bercini, Mrs. E. Smith; Bundanoon, Mrs. Osborn; Bathurst, Mrs. Marriott, Mrs. Musgrave, Miss Newman; Berrima, Mrs. G. Shephard, Mrs. Wilshire; Bethungra, Mrs. M. Sawyer; Baulkham Hills, Mrs. W. M. Best; Berry, Mrs. E. Morris, Mrs. English; Boolong, Miss Grant; Burrowa, Mrs. C. Robinson, Mrs. J. H. Boucher; Barraba, Mrs. Kidd; Bulli, Mrs. J. B. Nicholson; Braidwood, Mrs. O'Brien; Cootanundra, Mrs. E. Barnes, Mrs. W. H. Matthews, Mrs. E. G. Webster; Camden, Mrs. Chas. Furner; Cassilis, Mrs. Maria Traill; Cooma, Mrs. Byrne, Mrs. King; Carlingford, Mrs. H. Cox, Mrs. Neil Harper; Cambewarra, Mrs. Brennan; Collector, Mrs. Best; Cessnock, Mrs. M'Donald; Campbelltown, Mrs. J. Kidd, Mrs. J. Loney; Croydon, Mrs. Wilson, Miss Bowman; Deniliquin, Mrs. H. M'Cullough, Mrs. A. H. Noyes, Mrs. Holt; Dungog, Mrs. M. Day; Dalton, Mrs. H. T. Beresford; Forbes, Mrs. Raymond, Mrs. Edwards; Goulburn, Mrs. Ross, Mrs. Oliver, Mrs. Knowlman, Mrs. Arthur Chisholm, Mrs. Spencer, Mrs. Hancock-Burkitt, Mrs. William Chisholm, Mrs. De Lauret, Mrs. M'Killop, Mrs. E. Gillespie, Mrs. Jessop, Mrs. Craig, Mrs. L. Barber; Glebe, Mrs. Munro, Mrs. Graham; Gladesville, Mrs. Lumsdaine; Guildford, Mrs. Gurney; Granville, Mrs. E. B. Docker; Gunning, Mrs. Saxby; Gresford, Mrs. Logan; Gerringong, Mrs. Heighway; Hunter's Hill, Mrs. Bailey; Hay, Mrs. Johnson, Mrs. Lavender; Junee, Mrs. Studds; Kangaroo Valley, Mrs. Samuelson; Kogarah, Mrs. P. Lacey, Mrs. M. Grosvenor; Kempsey, Mrs. Minnet; Kurrajong, Mrs. Garland; Lane Cove, Mrs. P. F. Richardson; Liverpool, Mrs. Tillett, Mrs. Shearman; Maclean, Mrs. M'Innes; Moss Vale, Mrs. Gale; Maitland, Mrs. J. D. Prentice, Mrs. M. Smith, Miss Annie Wolfe, Mrs. W. G. Lipscombe, Miss Alice Hyndes; Menangle, Mrs. Onslow; Morpeth, Mrs. Goddard; Murrumburrah, Mrs. G. Barnes, Mrs. Cutcliffe; Mittagong, Mrs. F. C. Williams, Miss Burke, Mrs. Beaumont; Mudgee, Mrs. Loneragan; Moruya, Mrs. Archibald; Milton, Miss Kendall; Marrickville, Mrs. W. W. Clarke; Molong, Mrs. Alldis, Mrs. Dr. Browne, Mrs. Panton;

Panton; Muswellbrook, Miss Luke; Newcastle, Mrs. Weatherill, Mrs. J. Harris, Mrs. Ireland, Mrs. M'Donnell, Mrs. Cuthbertson; Nowra, Mrs. Morton, Mrs. Wotton; North Sydney, Mrs. T. O'Sullivan; Orange, Mrs. James Dalton; Parramatta, Mrs. Gunther, Mrs. Taylor, Miss Codrington; Penrith, Mrs. F. E. Lethbridge, Mrs. Ewans, Mrs. F. Woodriffe; Picton, Mrs. Gibson, Mrs. W. R. Antill, Mrs. Sheppard; Prospect, Mrs. Remmington; Petersham, Mrs. Dwyer; Pyrmont, Mrs. Gelding; Queanbeyan, Mrs. G. Campbell, Mrs. G. P. Smith, Mrs. Willans, Mrs. Emery; Quirindi, Mrs. Mary Patrick; Redfern, Mrs. Boyce; Raymond Terrace, Mrs. J. Richardson; Ryde, Mrs. Collingridge; Richmond, Mrs. Onus, Miss Onus; Rooty Hill, Mrs. Mackay; Rouse Hill, Mrs. M. Pearce; Randwick, Mrs. Hellicar; Sutton Forest, Mrs. A. G. Stoddart; Stroud, Mrs. Rushforth; Scone, Mrs. A. C. Thomas; Surry Hills, Mrs. Hargrave; Stockton, Mrs. S. W. Smith; Summer Hill, Mrs. W. E. Shaw, Mrs. Holland, Mrs. G. E. Rodd; St. Peters, Mrs. E. D. Madgwick; Stanmore, Mrs. W. Clarke; The Burrier, Mrs. Thompson; Tamworth, Mrs. Middleton, Mrs. Wiseman; Tumut, Mrs. A. M. Brown; Tenterfield, Mrs. Armstrong; Windsor, Mrs. J. B. Johnston, Mrs. Hall, Mrs. W. Dean, Miss Hall, Mrs. Fitzpatrick; Wollongong, Mrs. Finlayson; Woollahra, Mrs. Newton, Mrs. Gerber; Wallsend, Mrs. Neilson; Waverley, Mrs. W. H. Simpson, Mrs. Best, Miss Walker; Wallerawang, Mrs. Abbott; Wagga Wagga, Mrs. G. Coleman; Windeyer, Mrs. Mallon; Wiseman's Ferry, Miss Laughton; Woodville, Mrs. Graham; Wybong Creek, Mrs. Cox; Yarrunga, Mrs. Throsby; Young, Mrs. Dr. Heeley.

The inspections of the homes under the control of the Board—both by the voluntary visitors and the official inspectors—numbered 8,156, which was 166 in excess of the previous year. The voluntary visitors made 1,305 inspections, as against 1,666 in 1894; whilst the official inspections numbered 6,851, as against 6,323 in 1894, or an increase of 528 official visits. There was a falling off of 361 in the visits made by the honorary lady visitors.

The subjoined are the details of the visits:—Honorary Lady Visitors—1889, 1,356; 1890, 1,292; 1891, 1,225; 1892, 1,383; 1893, 1,638; 1894, 1,666; 1895, 1,305; decrease of 361 on previous year. Official visits by Inspectors during year ending 5th April, 1893, 5,969; year ending 5th April, 1894, 6,323; year ending 5th April, 1895, 6,851; or an increase of 528 on the previous year's figures.

The average number of children under supervision for the year ended 5th April, 1895, was 3,044. The total number of visits of inspection was 8,156, or an average of  $2\frac{2}{3}$  visits to each child as against  $3\frac{1}{2}$  in the previous year.

Average number of children placed out during year ended April	
5th, 1895	2,890
Average number of children placed in Cottage Homes, year ended	
April 5th, 1895	154
Total daily average under control	3,044

The Board has as usual endeavoured to reduce the number of children in every house without separating families. The statistics of 1895 show:—

1,239	homes with 1 child.
398	" " 2 children, including 201 with children of one family.
197	" " 3 " " 60 " "
88	" " 4 " " 20 " "
3	" " 5 " " 1 " "

1,925 homes, containing 2,993 children (exclusive of 16 absconders, 9 in hospitals, 146 in cottage homes, and 10 in Dépôt); total, 3,174.

In

In consequence of the adoption of the principle of keeping families of children in the same home, as far as possible, there are thus 282 such families with separate guardians; and exclusive of homes of this character there are—

1,239	homes with 1 child.
197	“ “ 2 children each.
137	“ “ 3 “ “
68	“ “ 4 “ “
2	“ “ 5 “ “

1,643 homes, containing 2,326 children (a little over  $1\frac{1}{2}$  average); last year the average was  $1\frac{1}{4}$ .

#### NURSING CHILDREN.

The experience of years has now fully justified the practice of dealing with delicate young children in a manner distinct from the general run of those who have come under the control of the Board, and has satisfied me that it has been the direct means of saving the lives of a number of puny motherless infants, who would doubtless have succumbed had they not been at once placed in the care of specially selected wetnurses and other creditable matronly persons in healthy country districts, far removed from the often insanitary and nearly always undesirable and unsuitable localities in which they were brought into the world. Special precautions are taken in the selection, not only of the homes and the guardians, but of the districts in which these young children are placed; and it is gratifying to be able to state that so far no difficulty has been experienced in obtaining the services of really good, clean, healthy, wholesome, and experienced women to take care of weakly infants, and up to the present time no occasion has arisen to seriously complain of the way the little ones dealt with in this class are treated. Special payments, varying from 6s. to 10s. a week, are made to really good guardians for the care of very young and very delicate children; and the system of making these larger payments has induced a much better class of women to devote their time and attention to the work. As already explained in previous reports, when once young motherless children are sufficiently improved to be dealt with under the general Boarding-out System, the special payments cease, but the children are not necessarily removed from their old guardians. At the close of the twelve months now under consideration there were 96 such children under control as against 92 in 1894, whilst the daily average throughout the year was 104 and the total cost of their maintenance £2,080, or an average capitation cost of £20.

#### ADOPTED CHILDREN.

There was a small diminution in the number of children who had been adopted without remuneration by prosperous colonists in various parts of the country with the intention of bringing them up as their own children when the official lists closed on the 5th of April; but the falling-off was almost entirely due to the fact that they had, by reason of their increased age, been removed from the official registers, though still with the foster-parents in the great majority of cases. When the year closed there were 124 adopted children under the control of those guardians as against 144 in 1894, and their religious classification was as follows:—Protestants, 39 boys and 65 girls; Roman Catholics, 8 boys and 12 girls; total, 47 boys, 77 girls. At the very lowest estimate a saving of £1,612 was effected during the year by well-to-do citizens accepting the guardianship of these children without remuneration, and the experience of the past few years has shown that their material welfare is enhanced under this particular subdivision of the Boarding-out System. The total saving effected

effected during the last four years was £7,165, which is a substantial economy in considering the yearly increasing expenditure of the Department. The greatest care is taken with regard to the selection of these homes, and as a rule the guardians of adopted children are not only prosperous and respectable, but that precautions are taken under a mutual understanding by which the children are brought up to believe that they are part and parcel of the family circle, and by this means better discipline is maintained, and the little ones ultimately grow up with strengthened feelings of responsibility and self-respecting citizens.

#### APPRENTICED CHILDREN.

Satisfactory progress has been made in the difficult work of providing suitable trades, occupations, and callings for the children as they grow up to useful ages, so that they may be enabled to become artisans and handicraftsmen, and earn honest livelihoods when they reach the years of manhood and look forward to reputable citizenship. There were 905 children under this head when the books were closed at the end of the year, as against 854 in 1894, which shows the satisfactory increase of 51. The girls in this class, who number 327, are all at domestic service, while the 578 boys are apprenticed to the following trades:—Apiarists, 3; baker, 1; boilermaker, 1; blacksmith, 1; bootmaker, 1; brickmaker, 1; butchers, 2; builder, 1; carpenter, 1; carrier, 1; chemist, 1; coachbuilders, 4; clerk, 1; cordial manufacturer, 1; dairymen, 10; dealer, 1; draper, 1; farmers, 477; gardeners, 11; groom, 1; graziers, 4; grocers, 5; gunsmith, 1; lime merchant, 1; orchardists, 23; mason, 1; painter, 1; plasterer, 1; printers, 2; saddlers, 2; storekeepers, 11; sweep, 1; tailors, 3; vigneron, 1.

The number of apprentices discharged during the year was 95 boys and 77 girls, or a total of 172, as against 148 during 1894. The total cost of management in this division was £2,270, an increase of £137 10s., which brought the average cost of the whole of the apprentices under control up to £2 10s. per head—the same as the previous year, when the expenditure under this head was £2,132 10s. This expenditure is very small, when it is considered that the average daily number of apprentices under control was 908, and that 905 were still under control when the year closed. The whole of the total outlay was absorbed in clothing and inspection, the money received from the guardians under the regulations for the services of all apprentices having been paid into the Government Savings Bank to the credit of the children themselves. No complaints of a serious character have been received, either from the guardians or the apprentices, during the year, and the reports of the inspectors speak in a satisfactory way of the manner in which the children are treated.

#### CHILDREN CLASSED AS UNOFFICIAL.

There has been a still further increase—though a small one—in the number of children over the age at which they could be legally brought under the operation of the Act, who have surrendered themselves to the supervision and control of the Board, in the hope of being provided with suitable occupations, and their progress has been very satisfactory. There were 10 such children—4 boys and 6 girls—under control in 1894; there are now 12, and the expense of their care is so small an item in the general expenditure that it is out of proportion altogether to the very large amount of good that results, and is indeed too small a matter to deserve special mention. So far, some 47 children have benefited by the advantages which this particular section confers upon them.

## THE CENTRAL HOME.

The operations at the Central Home, where the children are only temporarily detained whilst the necessary preparations are being completed for boarding them out upon admission, discharging them from control, or transmitting them either to the reformatories, the hospitals, or the cottage homes at Pennant Hills and Mittagong, were nearly doubled during the year that has just closed, and the system is now working so smoothly and satisfactorily in all the branches that the increased work was dealt with without increasing the staff, and with appreciable saving in the item of expenditure. Some 1,703 children passed through the Home in 1895, as against 889 in 1894, or an unexampled increase of 814. The average daily admissions were 12, as against  $10\frac{1}{3}$  in 1894 and 10 in the previous year. The average cost of maintenance was £9 6s. 6d., whilst in 1894 it was £9 19s. 10d., showing a saving of 13s. 4d. per head in favour of 1895. The total cost of maintenance of the children at the Central Home was £111 18s. 1d. for the year, as against £103 4s. 11d. in 1894.

## COTTAGE HOMES FOR INVALID CHILDREN.

The most gratifying results have attended the continuance of the practice of placing invalided and delicate young children under the care of kindly, reputable, and matronly women in neat and comfortable cottages in healthy country districts, and the experience which the Board has gained from the experiments at Pennant Hills and Mittagong strongly emphasises the wisdom of the step, and urges the desirableness of extending the principle as an auxiliary to the crowded children's hospitals in and around the metropolis. The whole of the children sent to these Homes have not only materially benefited by the pure, fresh air and the clean, wholesome surroundings, but no less than 99 were so far recovered as to allow of their being boarded-out, and some 61 others were either discharged to their relatives or sent to other institutions. There were 146 in the Homes on the 5th April, 1895, namely, 44 boys and 109 girls, as against 153 at the end of the previous year. Much of the good results that were obtained was due to the gentle care and motherly attention of the medical and nursing staffs during the year.

The following is the usual table of particulars :—

	Boys.	Girls.	Total.
Total number of children admitted to Cottage Homes to 5th April, 1895	510	610	1,120
Total number of children discharged from Cottage Homes to 5th April, 1895	475	499	974

The total expenditure upon the Homes during the year which has just closed was £3,652 12s. 5d., or £3,000 12s. 5d. for maintenance, management, medical expenses, salaries, &c., and £652, the value of clothing furnished to the inmates from the Central Store at Paddington, and the proportionate cost of inspection. The capitation cost has been £22, or a reduction of 2s. 2d. per head upon the operations of 1894.

#### CONCLUDING REMARKS.

In conclusion, I have much pleasure in conveying the thanks of the members of the Board to Mr. Critchett Walker, C.M.G., the Principal Under Secretary, and to Mr. Fosbery, the Inspector-General of Police, for the valuable assistance rendered to the Department during the year.

I have, &c.,

ARTHUR RENWICK,

President.

## APPENDIX J.

## LETTERS FROM LADY VISITORS.

Mrs. C. E. Archibald, Moruya :—

I am quite satisfied with the results of the boarding-out system here. The children on my list are living in christian homes, and have the advantages of good training, every opportunity of growing up respectable and respected members of the community.

Mrs. Arguimbau, Annandale :—

Has much pleasure in stating that all the children in her district have comfortable homes, are well cared for, and seem well and happy, and thinks the boarding-out system an excellent one. The guardians seem to treat the children as their own, and from my experience, which has been for twelve years or more, cannot speak too highly of them.

Mrs. E. J. Bailey, "The Vicarage," Hunter's Hill :—

I have much pleasure in testifying to the efficacy, as far as my own experience goes, of the boarding-out system for State children. I find, as a rule, a very good feeling prevailing between the guardians and the children, sometimes, on the part of the foster mothers, something nearly approaching maternal affection. The children often come from a class which is very difficult to deal with, and the careful and patient training in many instances bestowed on such children is highly satisfactory.

Mrs. L. Barber, Goulburn :—

My experience, after five years, is that, as a rule, the children are better off than in their parents' homes, and the guardians do well by the children.

Mrs. L. M. Beresford, Dalton :—

I have been again asked to give my opinion regarding the boarding-out system. My experience is limited, having still only one child under my supervision, who is now apprenticed to the farmer with whom he resides. He still attends the village Public School, is a fine healthy boy, and appears perfectly at home. I can only add that I consider the Institution an excellent one.

Mrs. Brennan, Cambewarra :—

I have much pleasure in bearing testimony to the satisfactory working of the boarding-out system in my district. The children and their foster-parents seem thoroughly satisfied with each other.

Mrs. A. M. Brown, Tumut :—

I have visited the children in this district regularly during the last twelve months. Found everything satisfactory; children healthy and happy. The greatest number have been with the same people for years, which speaks well for both parties.

Mrs. A. M. Brown, Tumut :—

I must apologise for not answering your note sooner. During the last quarter I have visited frequently; found everything doing well, except at one home. I was pleased to see the Inspector, who informed me an alteration was to be made there.

Mrs. D. Byrne, Cooma :—

I was asked my opinion on the boarding-out system, and from my experience I consider it works satisfactory. In a great many cases the boys learn useful trades, and from being continually employed they are kept away from bad companions which are to be found even in small country towns, and the girls learn house-keeping, which is very useful to them in after years.

Mrs. E. E. Cox, Wybong Creek :—

In reply to your circular re State children, I am very pleased to say that the two children under my supervision are in happy, comfortable homes, and I consider the system an exceedingly good one.

Mrs. M. Dalton, Orange :—

I have not been able to visit the homes of the boarding-out children as often as I would wish; but, as far as I can judge from surrounding circumstances, I think they have fairly comfortable homes. I know of many poor children in Orange who are living with their parents who are not nearly so well off. Therefore I have much pleasure in stating that it is an admirable thing to have such an institution to take care of those poor children who are left destitute.

Mrs. K. A. Donnelly, Armidale :—

I have much pleasure in stating that the children boarded out in this district are all doing well and giving satisfaction to their teachers and foster parents. The homes in all cases are clean and comfortable and presided over by good Christian men and women, and the children are most attached to their guardians, the latter in all cases fulfilling their duties faithfully.

Mrs. M. Ewan, "Glenleigh," Penrith :—

In reply to your circular of the 13th instant, I have pleasure in stating that I consider the boarding-out system a great success. The children in my district are well cared for and have most comfortable homes.

Mrs. C. Finlayson, Wollongong :—

In compliance with your request for an expression of opinion upon the system of boarding-out children as I find it in this district, I beg to state that in all the cases which have come under my notice the little ones have been most fortunate in the homes provided for them. Most of them are in the little mountain township of Balgownie, a mining community, where the wives are glad to be able to use their leisure in this way. The condition of the children in their care is abundant proof that they do their duty by them. Many of them are mere infants who came only a few months ago puny and ailing and now are looking so happy and well cared for. In the case of Mrs. A., the removal of the child caused almost as much grief as if it had indeed been their own, and I trust you will soon find it convenient to let her have another and for a longer period. In a district like Balgownie, where each one's affairs are more or less everyone's affairs, any kind of neglect or cruelty to these children would be no secret, and in this fact is safety. It is a healthy place—plenty of fresh air, good milk, fruit, and vegetables—and with a fine State school. Mrs. C's home is everything to be desired, and the lad seems happy. It is very cleanly, sleeping accommodation good, and all the influences such as tend to train him to be a useful member of society.

Mrs. Gerber, Woollahra :—

I am pleased to be able to say, from experience, that the boarding-out system is giving general satisfaction. The children are well cared, and their homes are comfortable.

Mrs. Gibson, Picton :—

I have great pleasure in recommending the boarding-out system. The children in my district are a credit to their foster parents.

Mrs. K. Hancock-Burkit, Goulburn :—

In reply to your notice, received this morning, I have much pleasure in informing you that, as far as my knowledge goes, the system of boarding-out State children is a great success, especially when contrasting it with the English barrack schools. The Colonies are far in advance of home in this respect. I speak from personal knowledge of both systems. The children in the homes I have under supervision seem happy and well fed. All the homes are of the respectable artisan class, and the children have good opportunities of growing into self-respecting and self-supporting men and women.

Mrs.

Mrs. S. Kidd, Campbelltown :—

I beg to inform you that the children under my supervision seem to be all in good health, and appear comfortable and well cared for. I visit the children about every two weeks, and always find them as above stated. The district of Campbelltown is exceedingly healthy, and well suited for the children.

Mrs. M. Lumsdaine, Gladesville :—

In reply to your request *re* my experience of the boarding-out system, I have much pleasure in saying that it appears to work admirably in my district. The guardians perform their duties towards the little ones faithfully, and the children seeming healthy and happy. I never hear any complaint either from child or guardian.

Mrs. E. Morris, Berry :—

I beg to state that the children under my control appear to be happy and contented in the homes allotted to them, which are of the very best kind obtainable in this portion of the district; and I feel confident that the guardians are, on the whole, faithfully performing their duties, in every respect, which they have undertaken. The system, in my opinion, works admirably.

Mrs. J. B. Nicholson, Woonona :—

I think the system of boarding out the children is proving in every way advantageous and satisfactory. I meet with no complaints, and all the homes selected have turned out to be happy and comfortable ones, and in many cases both foster-parents and children are sincerely fond of each other; and I know some instances where the guardians would rather forfeit the maintenance allowance than part with the children. I cannot close without a word of praise for the inspectors and all officers in connection with the institution. They are careful and conscientious in the discharge of their duties, having the welfare of the children thoroughly at heart.

Mrs. M. O'Brien, Braidwood :—

All of the children are doing very well, and are in good health. Those who are near the school attend very regularly, and those who have a long distance to go have home lessons. The children all appear well looked after, and are happy and contented.

Mrs. S. Oliver, Coulburn :—

I am very pleased with the homes under my supervision. The children seem cheerful and happy, and I believe the guardians do their utmost for the welfare of the little ones committed to their care. At school, also, I may say the State children, in neatness and cleanliness, compare favourably with others.

Mrs. D. Osborne, Bundanoon :—

In accordance with your request, I forward my statement *re* the boarding-out system, and, as before, cannot but speak very favourably of it. I have not had many for some time: but lately have three children (boys) on the boarding-out system, and on my last visit found them very clean and comfortable, and treated as their own children, and from what I can see are thoroughly cared for. The one that is apprenticed is still giving satisfaction, and treated the same as the guardians' own children. This lad is on a farm.

Mrs. T. O'Sullivan, North Sydney :—

My opinion is still unchanged with regard to the efficacy of the boarding-out system. The children in my suburb appear happy and contented; and I am happy to say that the guardians in most cases take a great interest in their charges.

Mrs. M. Pole, Balmain :—

In reply to your circular of the 14th instant, I have much pleasure in recommending the boarding-out system. The homes, as a rule, have a degree of refinement, and must tell beneficially on the future of the children. Their health is exceptionally good, showing strict attention to cleanliness and other necessary rules, and the almost universal kind motherly care and attention has greatly surprised me.

Mrs. M. Remington, Prospect :—

In reply to your circular of the 20th, I have much pleasure in saying the children under my supervision have comfortable homes. They attend church and school regularly. I often see them at play with their foster brothers and sisters, looking quite happy. They are kept clean and are in good health, also have good home influence. I think the system an admirable one, calculated to develop the affections in many poor little orphans that would otherwise know nothing but coldness and neglect.

Mrs. H. Taylor, Parramatta :—

Once again I have to report upon the "homes" under my supervision, and to say that, as far as I am aware, every kindness has been extended to the children under the care of their foster parents. The State Home is, as well as I can judge, excellently managed, and the whole system is, in my opinion, a most unmitigated success.

Mrs. L. Tillett, Liverpool :—

Owing to the long distances and bad roads to where the children are located, I have not been able to see them as often as I could wish; but those I have visited seem happy and well cared for. So far as I can judge, my opinion is that the boarding-out system is on the whole very successful, and could hardly be improved upon.

Mrs. D. Willans, Queanbeyan :—

It is with much pleasure that I say I cannot speak too highly of the boarding-out system. All the guardians in this district, I truly believe, are faithful to their trust, and some who come immediately under my notice are as fond of the children as if they were their own. It is a great pleasure to me to see how comfortable they are, and their happy faces when they come to see me—for I think you are aware that owing to my age and constant attendance on my dear husband I cannot go and see them; but I have many opportunities of hearing about them, and it gives me pleasure to be able to do anything for so valuable an institution.

Mrs. M. Woodriff, Penrith :—

In reply to your letter, although my experience of the boarding-out system has been both short and limited, I believe it to be most excellent for the children, and, in the generality of cases, most satisfactory. The boys under my supervision are very happy and well cared for.

Mrs. A. T. Simpson, and Mrs. M. A. C. Walker, Waverley :—

Beg to state their experience of another year's work. The classes of homes are sufficiently comfortable in all, but some have superior accommodation, and the children better attended to than in others. In most cases the guardians are really interested in their charges, and become fondly attached to them. We believe this system adopted by the Government to be the best ever planned, as the results are most satisfactory.

Mrs.

Mrs. G. E. Rodd, and Mrs. E. L. Holland :—

Our opinion regarding the boarding-out system is, that great care should be taken that the persons who take the children are not doing so to make a living by them, as we think that in these cases the children are not done justice to, nor always as kindly treated as they should be. Otherwise, we consider the boarding-out system a very good thing.

#### LETTERS FROM SCHOOL TEACHERS.

J.C., Superior Public School, Annandale :—

As far as I can judge, the boarding-out system has worked satisfactorily. The State children who have attended the school under my charge compare favourably with the other children under my supervision.

F.R., Public School, Australia-street :—

In answer to your circular as to result of the boarding-out system, we have State children boarding in two families only, attending this school, and with regard to them, I should say the system is a decided success. They appear to be well cared for, and compare favourably with other children of the school.

J.B.M., Auburn Public School :—

There are eight boarded-out children in my school, and in the majority of cases they compare favourably with other children. I think the system is good, as it brings the children under the direct care of "mother," and surrounds them with "home" influence, which cannot but have a beneficial effect when a judicious selection has been made in the home to which the child has been sent.

H.L., Public School, Auburn North :—

In reply to yours of 11th instant, I beg to state that of all systems yet introduced for the relief of orphans and fatherless children, none in my opinion will compare with the boarding-out system now in force in this Colony. The children lose the appearance of pauperism entirely. They mix with other children of their own age, enter into their pleasures and enjoyments, and seem to forget their unfortunate past. They feel an independence of character, and their equality with those about them. In attainments and the power of grasping knowledge of any kind, I have always found them to compare favourably with other children differently situated. In regard to cleanliness and care bestowed upon them by those whose care they are placed under, I have never had cause to complain.

M.C., Superior Public School, Annandale :—

In the cases of boarded-out State children under my charge, I can say that in both cases the children compare favourably with the other pupils, and appear to have good homes.

W.S., Superior Public School, Annandale :—

My experiences of the boarding-out system under your direction lead me to estimate very favourably its beneficial influences on the children affected by it who have come under my observation.

J.F., Public School, Balgownie :—

In reply to your letter dated 11th instant, inviting a statement of my opinion of the boarding-out system of this Colony, I have the honor to inform you that, as far as my opportunities of judging have enabled me to give an opinion, I think the persons in this locality to whom children have been entrusted are respectable and without exception are doing their duty to the children whom the State has placed in their care. With reference to the four boys attending the school, I am happy to report that they are well and neatly dressed and perfectly clean. With one exception they are regular and punctual in their attendance. In every respect they compare favourably with their fellow-pupils.

D.McL., Public School, Bankstown :—

In reply to yours of 11th instant, *re* State children attending my school, I may state that so far as I can judge they are fairly well cared for. They attend regular, are well behaved, and are generally very neat and clean, and in every way compare very favourably with the other children attending school. I also consider the operations of the system very satisfactory.

J.W., Public School, Baulkham Hills :—

In reply to your circular of the 11th instant, I have the honor to state that the system of boarding-out State orphans appears to have worked well in this district with one exception, and she has been removed from the objectionable people with whom she was living. She previously compared favourably with the other children. The other State child appears to be growing into a good boy.

W.H.T., Superior Public School, Birchgrove :—

In compliance with your request *re* the State children, I beg to state that, so far as I have been able to judge of it, the system appears to work well. The children appear well-fed, well and decently clad, and in all material comforts they compare very favourably with children attending school. The attendance is regular and the conduct of the children good.

J.M.S., Blacktown Public School :—

I have much pleasure in reporting again upon the conduct of the State children attending the school under my charge. I find them neatly dressed, and clean as boys go. Their behaviour is good as a rule, and they evidently are under firm but kind discipline at home.

R.B., Public School, Brawlin :—

In reply to your letter of 13th instant, I beg to state that those children from the Relief Board that have attended this school compared favourably with the other children. They came well dressed, looked clean, and appeared to be well fed, and as far as they were concerned the boarding-out system was to them a decided benefit.

E.B., Public School, Bulli :—

I have had but little experience of this boarding-out system,—but the lad who was enrolled here on the 26th ultimo, has attended with regularity since that date. He is well conducted, well clad, and apparently well cared for and contented. If he can be taken as a fair sample of the results of this system, then they must be all that could be desired.

P.N., Public School, Campbelltown :

In reply to your circular *re* State children, I have the honor to inform you that there are two State children attending this school. They attend very regularly, and have all the appearance of well nourished and well kept children.

T.W.H., Public School, Coomandura :—

Your letter *re* above reached me this morning, and I beg to inform you that during the period of my employment at Bowral Public School—a period of eight years—I considered the system an excellent one. The children in question were well cared for, and apparently lived comfortable and happy lives. They were continually under a teacher's observation at school, and I always found the officer direct from your Department most earnest in his endeavours to get at the real state of the children's home life. As far as mental calibre is concerned, I think the children that have come under my supervision compare favourably with their more fortunate companions. J.

J.C., Public School, Croydon :—

There are five State children attending this school ; they are well cared, and have every sign of comfort in their homes. They are well-behaved and content.

J.C.C., Superior Public School, Darlington :—

In answer to your circular of 13th inst., I beg to state that the children boarded out under the State Children's Relief Department, and attending this school, are clean, tidy, and fairly regular in their attendance, and will compare favourably with the other pupils.

J.W., Public School, Elderslie :—

According to your wish, I have the honor to most respectfully state that the boarding-out system, in so far as the children under my tuition are concerned, is, on the whole, satisfactory ; and their behaviour and appearance at school compare very favourable with the other children.

D.T., Public School, Gentleman's Halt :—

In reply to your memo. of 13th instant, soliciting my opinion on the boarding-out system of State children, I have the honor, most respectfully, to inform you that the results of the system in this district are very satisfactory, and the State children who are under my charge come to school neatly dressed and clean, and, judging from their appearances, I believe that they are well nourished and cared for, and generally kindly treated. At end of this quarter I will furnish you with report of their attendance.

P.L., Public School, Eastgrove, Goulburn :—

In reply to yours of the 13th instant, *re* my observations on the results of the boarding-out system, I beg to state that the children that have come under my notice, with few exceptions, compare favourably with the other children under my supervision.

J.L., Superior Public School, South Goulburn :—

In my opinion the boarding-out system is an unqualified success. It is a means of providing comfortable homes for the children, thus giving them the benefits of home influence and allowing friendships to be formed which may continue through life. The children attending my school come clean and tidy, are apparently well fed, and compare very favourably with the other pupils.

H.L.F., Public School, Gordon :—

In connection with the only State child at present attending this school, I have much pleasure in reporting that she attends very regularly and conducts herself in a very creditable manner. She is always well clad, and appears to receive every attention.

W.S., Superior Public School, Granville :—

There is not much to report further than that the children under your jurisdiction are on the whole as well or better cared for than the average working man's child. Exceptional cases—and they are truly exceptional—when reported to your office are always dealt with promptly, so that, as long as the teachers of the public or other schools which these children attend are in the least degree watchful, it is impossible for a child to be neglected or ill-used.

P.R., Gunning Public School :—

In compliance with your request contained in your circular of the 13th instant, I have much pleasure in making the following remarks in reference to the boarding-out system. At present there are only four State children attending this school. These four attend with great regularity and punctuality. They come comfortably and cleanly clothed and seem well-fed and otherwise cared for. Two live with Mr. A. F. B., and the others with Mrs. P. From their appearance I should say that they are better cared for than many at the school who are living with their parents.

L.H.W., Public School, Hinton :—

I have the honor to state that the present system of boarding-out State children is a distinct advantage to the children themselves. With one exception the pupils of my schools who are State children have been well fed and clothed and compare favourably with ordinary pupils.

W.A.C., Public School, Jamberoo :—

The children alluded to in your circular attend school fairly regularly, are clean and tidy, and on the whole compare favourably with the other children of the school. In one of two instances under my notice the child is exceptionally well cared for, and in the other I think there is nothing to complain of.

W.H.M., Public School, Kellyville :—

I have the honor to acknowledge the receipt of your circular, and, in reply, to state that my experience has been wholly favourable—the children being sent to school regularly in a clean and tidy state, and such children comparing favourably in these three items with others. I am decidedly a believer in the system.

J.R., Kelso Public School :—

*Re* your memo. dated 13th instant, I have the honor to notify you, that there is one State child attending the above-named school ; and I herein state, that he attends school regularly, and is always clean and tidy.

J.M., Superior Public School, Kogarah :—

So far as the boarding-out system has come under my observation, I should infer that the results were satisfactory. The child now in attendance compares favourably with other children in every respect. Up to the present his regularity of attendance has been satisfactory.

C.A.B., Public School, Lambton :—

Only one family are State children. They are clean, tidy, and regular in attendance, and are, in appearance, equal to the other children.

R.H., Public School, West Leichhardt :—

Twenty-four State children attend the above school. They are, without exception, clean and tidy, in good health, and regular in attendance. In these respects they compare most favourably with the other pupils. So far as my experience goes, I have no hesitation in stating that, owing to the boarding-out system, the environment of these children is so changed as to warrant reasonable hope of their developing into useful citizens.

A.J.O., Public School, Maroola, Pitt Town :—

With reference to your memo. of 13th inst., I have the honor to inform you that what I have seen of the boarding-out system, I must speak favourably of. The present system must lead to good results, because the children, distributed as they are throughout the country districts, are less liable to be influenced by bad children with whom they would be brought in contact if necessarily kept at one home. The children under my charge compare favourably with other children under my supervision ; and the majority manifest by their appearance and cheerful dispositions, that they receive that care and love which should be given by parents.

W.B.G., Public School, Mittagong :—

*Re* appearance of State children attending this school, I beg to state that they compare very favorably with the other children in cleanliness and dress, and can hold their own with them in school work.

W.

W.J.A., Public School, Lower Mittagong :—

In answer to your communication of the 13th, I have the honor to report that there are no children under the boarding-out system at present attending the school under my charge; but from my observation of those attending other schools, I feel that I am safe in stating that they compare very favourably with the children of parents of independent means. In my opinion the boarding-out system is a very great success in this Colony.

T.A., Public School, Murrumburrah :—

In reference to your circular of 13th instant, I have the honor to state that from my experience, I believe that the boarding-out system is a great success, and great improvement on the old system. The children who have and are attending the school have always compared favourably with other pupils, and similarly I have noticed in other schools in the district, and I think your system of inspection an excellent one.

E.B., Public School, Macquarie-street, South :—

In reply to your letter of the 13th ultimo, respecting State children attending this school, I beg leave to state that there are three who attend this school, and they compare most favourably in intelligence, appearance, and general conduct with the other pupils of this school. I am of opinion that the boarding-out system is a great improvement on the old or barrack-system, as it is more in accordance with the training and comforts of home life.

J.E., Public School, North Newtown :—

We have only two State children, I believe, in this school at present; we have had a good number from time to time. Such children compare very favourably with others. My impressions are entirely favourable of the boarding-out system, as judged by the children that have come under my notice.

T.E.C., North Rocks, Public School :—

I beg leave to state that the State children under my charge are progressing satisfactorily.

E.G.W., Superior Public School, Nowra :—

In reply to your circular, dated 13th instant, I wish to state that, as far as I can judge, the children under the control of your Department are as well fed and clothed as most children, and that those attending this school come with fair regularity.

J.J.G., Superior Public School, Orange :—

I have only one boy from your Department attending the Orange Superior Public School. He is apparently a very healthy and well-cared for boy. He says he is happy, well fed, and not over-worked. I think he is in excellent hands. His appearance is quite equal to that of other boys attending this school.

J.E.H., Superior Public School, Parramatta North :—

In reply to your memorandum of the 13th instant, I have the honor to inform you that the State children attending this school appear to be well cared for, and compare favourably with the other children.

J.H.S., Superior Public School, Penrith :—

The children under State guardianship attending this school compare not unfavourably with the rest of the pupils. I consider the boarding-out system the best ever invented for supplying the training and amenities of home life to orphans and children deprived from any cause of parental care.

M.P., Superior Public Infants' School, Penrith :—

The State children attending in my department are well clothed, clean, and regular. They will in every respect compare favourably with the other scholars.

D.L., Public School, Pitt Town :—

I have much pleasure in testifying to the neatness and good behaviour of the State children attending this school.

J.D., Half-time Schools, Glen Hill, Oakdale, Picton :—

With reference to the boarding out of State children in New South Wales, I hold a very high opinion. For those with whom I have come in contact compare favourably with other children, and I feel confident, are better, in every respect, in their country homes, where, as a rule, they are well cared for, than they would be were they living all together, for there they, one and all, quickly learn the bad qualities of the other. Whereas, by boarding them out among different classes of people, the bad qualities, if they possess any, often die in them.

J.D., Public School, Queanbeyan :—

One State child attends this school. He is always clean and tidy, and seems to be well cared for. His conduct is good, and he is a very apt pupil.

J.J.W., Public School, Redfern :—

The State boys attending this school seem neat, tidy, intelligent, and well cared for. Generally speaking, I should think they are well fed, and come to school neatly and suitably clothed.

M.A.A., Superior Public School, Redfern :—

In reference to your letter *re* State children, I beg to state that I consider those attending the school under my charge to be well fed, well cared for, and well clothed for the most part, and have no fault to find with their general appearance and behaviour.

B.F.L., Public School, Rouse Hill :—

Your circular of 13th instant is to hand. In reply, I can only restate that which I have written on two previous occasions. The children (State) at Rouse Hill are fortunately situated; they could not be better cared for by loving parents; they are well fed, well clad, and are sent regularly to school, so that, with very few exceptions, they make the best average attendance. If all the other neglected children were as happily placed, they might well wish for no other parents.

F.E.R.C., Public School, Rookwood :—

In answer to your circular dated 13th March, I beg to state that the children attending this school under the boarding-out system are well behaved, tidy, and cleanly in appearance, mostly attend school regularly, and more than favourably compare with many children who have parents to take care of them.

G.H.H., Ryde Superior Public School :—

In reply to your letter of the 13th instant, I have pleasure in stating that the State children who have attended, and who do attend my school appear to be well cared for, and seem to be very happy and contented. In general appearance and regularity at school, they will compare very favourably with most of the pupils. From what I have seen I should pronounce the boarding-out system of this Colony a success.

J.C., Public School, North St. Leonards :—

In reply to your circular of the 13th instant, I beg to inform you that the State children attending the above school seem happy and contented. They are punctual and regular in their attendance; clean and tidy in appearance, and in all respects compare favourably with the other pupils of the school.

A.S.B., Superior Public School, Singleton :—

In reply to your communication respecting the boarding-out system, I beg to state that two children belonging to the State Relief Department are in attendance at this school. They are fairly regular in their attendance, neat and tidy in appearance, and compare favourably with the other pupils.

T.D., Albion-street Public School, Sydney :—

In reply to your letter of 11th instant, in which I am requested to give my views as to the State children under my care, I have the honor to state that there are five State children attending this school, from four different homes; and, as far as I am able to judge, they compare very favourably with any other children in the school. They are, in general, clean, cheerful, regular, and seem quite at home in the families in which they live.

R.A.P., Public School, Taralga :—

I beg to state that my opinions as to the operations of the boarding-out system are very favourable to the Institution. By the system many children will doubtless be made useful citizens; and I am pleased to state that the children with whom I am brought into contact, attend school regularly, clean and tidy as a rule, and that their general appearance will compare favourably with that of the other children attending this school.

W.C., Tighe's Hill Public School :—

In reply to your circular of the 13th instant, requesting a report on the general appearance of the State children in attendance at this school, I have the honor to report that, of six pupils, five are very regular and punctual, the other is fairly regular. They are all neat and tidy in their dress, and also appear well cared for and fed. On the whole they will, in their general appearance, compare very favourably with the bulk of the children in attendance at school.

W.M., Superior Public School, Wallsend :—

In reply to yours of the 13th instant, I have the honor to inform you that the children under the Relief Department, in attendance at the school, are well cared for, well behaved, attend school regularly and punctually, and they compare favourably with the other children under my supervision.

G.L., Public School, Williamstown :—

I have only one State child in my school, and he compares very favourably in every respect with the other children attending school.

N.R.P., Public School, Wilberforce :—

The State children's relief system works well. The State children here compare favorably with other children. They are well cared for and well looked after at Wilberforce.

A.E.C., Public School, Wiseman's Ferry :—

Re the above, I beg to state that the majority of the State children who have come under my personal notice in this locality appear to be as well looked after as the children of those with whom they are placed. They are decently clothed, they appear to be well fed, and they certainly behave at school as though they were quite happy, while in attainments they compare favourably with the average child and in a few instances surpass the average.

H.N.S., Superior Public School, Woollahra :—

In reply to your letter of the 13th instant, desiring an observation of the results of the boarding-out system as exemplified in this school, I have the honor to report that there are four children attending this school who belong to the boarding-out system. They are all regular in attendance and clean in appearance, and bear evidence of good home-treatment.

J.K., Public School, Wollombi :—

I have the honor to inform you that the State children who have come under my notice are well cared for and have good homes; also, that they compare favourably with the other children under my supervision.

1895.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

CHARGES AGAINST DEPARTMENT OF CHARITABLE  
INSTITUTIONS.

(CORRESPONDENCE RESPECTING.)

*Ordered by the Legislative Assembly to be printed, 24 September, 1895.*

The Director of the Government Asylums to The Principal Under Secretary.

Charitable Institutions of N.S.W., Government Asylums Branch,

Sir,

Oxford-street, Paddington, 18 September, 1895.

I notice from the public press this morning, that, in connection with the debate on the Loan Estimates last night, Mr. O'Reilly, M.P., made a number of charges against me which are described in one newspaper as being of "a very grave character." The details are not published; and I am consequently quite unaware of what the charges may be in any particular.

This matter, in my opinion, reflects the greatest censure upon me as the Administrator of the Department under my control, and involves not only the comfort and happiness of upwards of six thousand dependent persons, but also a very large annual expenditure of public funds. May I, therefore, request that on these grounds, and also in common fairness to myself, Mr. O'Reilly may be invited to formulate his charges in writing, in order that they may be dealt with immediately. As this gentleman may hesitate to do so because statements made in such a manner might not be considered privileged, I now undertake to waive any legal rights I may possess, in so far as they may relate to my official administration, in order that there shall be no obstacle to a very full and prompt inquiry.

I have, &c.,

SYDNEY MAXTED,  
Director of Charities.

Mr. O'Reilly, M.P., to be asked to formulate his charges against the Director of Charities in writing, and to be informed in terms of the last paragraph of the Director's letter.—J.N.B., 18/9/95.

The Principal Under Secretary to Dowell O'Reilly, Esq., M.P.

Sir,

Chief Secretary's Office, Sydney, 18 September, 1895.

Adverting to your speech in the Legislative Assembly last night, during the debate upon the Loan Estimates, when you made a number of charges against the Director of Government Asylums, I am directed by the Chief Secretary to request that you will be kind enough to formulate your charges in writing.

2. I am, at the same time, desired to add that, as it is considered you may possibly hesitate to adopt this course, because statements made in such a manner might not be considered privileged, Mr. Maxted has given an undertaking to waive any legal rights he may possess, in so far as they may relate to his official administration, in order that there may be no obstacle to a very full and prompt inquiry.

I have, &c.,

CRITCHETT WALKER,  
Principal Under Secretary.

Dowell O'Reilly, Esq., M.P., to the Chief Secretary.

Dear Sir,

Parliament House, 18 September, 1895.

In reply to a communication from your Under Secretary, I can only refer you to my speech as reported in *Hansard*, which seems to me sufficiently explicit.

I am, &c.,

DOWELL O'REILLY.

[Parliamentary Debates, 17 September, 1895.]

Mr. O'REILLY (Parramatta): I have very great pleasure in endorsing every word which has fallen from the lips of the Colonial Secretary with reference to the scandalous state of our charitable institutions so far as Parramatta is concerned. At the result of the last election, I come back with the fullest local authority to advocate the removal of those plague spots—for so they are regarded there—from the old town. We feel it a personal disgrace that there should be 1,100 old men confined in a building of five storeys—a deserted woolshed, whose old wooden floors are saturated with oil. There are only 10 feet of space between the floor of one flat and the roof, and I have no hesitation in saying that in the event of a fire not 1 per cent. of the inhabitants would escape. When the Colonial Secretary first took office he visited Parramatta.

Mr. O'REILLY: \* \* \* \* \*  
I am here to support every word that the Colonial Secretary has said in regard to the utter inadequacy of the present accommodation; but I am going to oppose the vote—for a reason which I think has not been placed by the Committee.

Mr. McELHONE: [*Inaudible.*]

Mr. O'REILLY: I call the attention of the chairman to the conduct of the Hon. Member for Fitzroy. I may point out to the Committee a singular inconsistency in the charitable administration of the colony. We do everything we can for the proper accommodation of lunatics of all sorts. You will find that at the lunatic asylum at Parramatta, the hospital for insane—I think that the change of name is significant—the inmates are no longer prisoners. They are regarded solely as patients, and they have every luxury of accommodation. I attribute that mainly to the excellent supervision and the splendid control of the Inspector-General of Insane. I regard him as the main cause of the excellent management of these institutions. It is with reference to the control of the asylums that I wish to say a few words now. The necessity of a change is clear to the Committee. No one can doubt that. When the leader of the Opposition assures us that he is not opposing the proposed expenditure, I am convinced that he knows nothing about the real condition of these old men; men whose only fault in many cases is their age and their poverty. If he could see them, as I have seen them, camped on the floor, without any regard for order, his tone would have been different. When the Colonial Secretary visited the institution he found thirty or forty men living on the fifth floor who had been there for some weeks, because they were too feeble to get downstairs and go outside.

Mr. BRUNCKER: Some of them had been there for three years!

Mr. LYNE: I do not know what the condition of the Parramatta Asylum is; but I have been through the Liverpool Asylum!

Mr. O'REILLY: No one with any feeling for suffering could oppose the vote on the ground of the expense; but I will give the Committee a fact which will set Hon. Members thinking. I am going to put from my shoulders, as the representative of the town in which these institutions exist, a large measure of responsibility which will rest upon the shoulders of the Committee and the Government from this day. I will oppose any measure to increase the present accommodation for these old men while Sydney Maxted is at the head of the Charities Department. I think that it is absolutely necessary, in dealing with this matter, to consider the question of management. For some years past allegations, more or less vague and incapable of proof, have been made respecting the administration and the management of the Charities Department. I am here to make no vague accusation. I am here to advance nothing I cannot support, and nothing I cannot challenge a trial upon, and I am perfectly ready to adduce evidence.

Mr. EWING: I would like to ask your ruling, sir, as to whether the Hon. Member is in order. The management of the Charities Department is not now under consideration; we are only considering the erection of buildings of which at some future date the present Director of Charitable Institutions may possibly be the manager. I ask, then, if the Hon. Member is in order in bringing the character of this officer before the Committee?

Mr. O'REILLY: On the point of order, I wish to say that the construction of these buildings is advocated on the distinct recommendation of the officer to whom I am alluding, and I think that the character and ability of that gentleman is open to discussion. I am, of course, speaking of his character in his public capacity. I never attack any man in his private capacity. I have no more to do with a man's private character than he has to do with mine. But it is my right and my duty to discuss his character in his public capacity, inasmuch as the administration and management of this department very closely concerns the wisdom or unwisdom of voting this money.

The CHAIRMAN: I do not think the Hon. Member will be out of order in discussing the management of these institutions. It might be shown that with better management this expenditure would not be required.

Mr. O'REILLY: I think the Hon. Member who raised the point of order, and other Hon. Members also, will sympathise with the stand I am taking on the present occasion, when they have heard me out. I know perfectly well that the Colonial Secretary has no sympathy with —

An HON. MEMBER: This is not the right time to raise the question!

Mr. O'REILLY: The present is always the right time for the correction of a public abuse. I know that I am only strengthening the hands of the Colonial Secretary by publicly calling attention to this officer, and that he will in the future, as I have known him to do in the past, fearlessly follow up any information which is brought before him. I come now to the point upon which I shall leave the Committee and the Government to act. I can bring absolute evidence to prove that the Director of Charitable Institutions, knowingly or unwittingly, has, for years past, had in charge of twenty-four old couples in Parramatta, a woman who is constantly drunk, a woman who has been guilty of the foulest language, and who has been seen coming home in the train alone, and in a state of intoxication, at 12 o'clock at night.

Mr. McELHONE: I rise to order. I should like to know whether the Hon. Member is in order in discussing the question whether the woman to whom he refers is generally drunk or sober?

Mr. HOGUE: I do not think the Hon. Member is in order in making an attack on a public servant upon this motion. It is grossly out of place, and very unfair.

Mr. CHANTER (Deniliquin): I would suggest to the Hon. Member that a proper time at which to bring forward the matters to which he is referring would be when the salary of the Director of Charitable Institutions is under consideration. We are now voting money for a public work with the management of which this officer may, after all, having nothing to do,

Mr.

Mr. DICK (Newcastle East): I think it would be much better if the last speaker kept his advice to himself as to the course Hon. Members should pursue. It would certainly be more in keeping with the Hon. Member's position in this House. This expenditure is a matter which concerns the Director of Charitable Institutions and his administration of his Department, and I submit that the Hon. Member for Parramatta is strictly in order in showing that the Director of Charitable Institutions is not capable of administering the department, and that if he be incapable, it would, perhaps, be inexpedient not to vote this money.

Mr. BRUNKER (East Maitland), Colonial Secretary: I would point out that if the Hon. Member is at liberty to attack the reputation of the Director of Charitable Institutions he has an equal liberty to attack the reputation of every officer in connection with them. Although it is not strictly pertinent to the point of order, I may, perhaps, at this stage, be permitted to say that if these charges had been made to me as the head of these institutions they would have been dealt with in a different manner from that in which they are likely to be dealt with now. I think it is derogatory to the Hon. Member's position that he should make charges against a public servant, whatever may have been his conduct in the management of these institutions, under circumstances when he is utterly unable to defend himself.

The CHAIRMAN: I do not think the Hon. Member for Parramatta would be in order in making specific charges against the Director of Charitable Institutions. He might, perhaps, be in order in showing that the management of the institutions generally was not good; but I think he would be out of order in going into details of the conduct of individuals.

Mr. O'REILLY: I readily bow to the Chairman's ruling, and, at the same time, I, as a young man, can with honesty say that I feel the rebuke of one for whom I have so great a respect as for the Colonial Secretary. My only object in bringing the matter before Parliament was to place it in the hands of Hon. Members, and to take out of the Colonial Secretary's hands individually and personally the grave responsibility of dealing with an officer of the public service.

Mr. BRUNKER: I do not hesitate to deal with anyone if I am called upon to do so, and if they deserve it!

Mr. O'REILLY: With due deference to the opinion expressed by the Hon. Member for Newcastle East, I think there is something in the suggestion put forward by the Hon. Member for Deniliquin, and I can assure Hon. Members that when the salary of the officer to whom I have alluded comes before us I shall have something to say about him. I am sure that in this House any member who fearlessly brings forward a question of this kind will not have his motive misunderstood. I am no personal enemy of the Director of Charitable Institutions.

Mr. GARRARD: Would it not have been fair-play to give the Minister in charge of the department notice of the Hon. Member's intention to refer to the subject?

Mr. O'REILLY: That is a matter of etiquette with which Hon. Members who are older members than myself are probably better acquainted. I, at all events, had no intention to offend the hon. gentleman. I shall oppose this vote at every stage while this unhealthy mushroom growth of charitable institutions, regulated by a boarding-out officer appointed by Sir Henry Parkes a few years ago, remains in its present deplorable state.

Mr. HOGUE (Glebe): I am surprised that the Hon. Member for Parramatta should attack one of the ablest officers in the public service. I venture to say that in the whole service there is not a more able or conscientious officer.

Mr. McELHONE: Is not the Hon. Member out of order in replying to the observations of the Hon. Member for Parramatta which were interrupted by the point of order?

The CHAIRMAN: The Hon. Member is out of order.

Mr. HOGUE: I merely rose to express my surprise at the Hon. Member announcing his determination to vote against this item, and at the same time giving the best of reasons why it should be passed.

Mr. O'REILLY: Not under the present management of these institutions.

Mr. HOGUE: The Hon. Member would drive me into a line of argument in which I should be out of order. The Hon. Member is going to oppose this vote although he knows perfectly well that the expenditure would tend to improve the condition of the old men in these asylums, and that the scheme which is to be carried out had the sanction of the late Government. The arrangement will tend to the comfort and health of these unfortunate persons, and at the same time will relieve the district which the hon. member represents of a condition of things of which it is much ashamed. If the Hon. Member opposes this vote, how will he face his constituents?

Mr. O'REILLY: I will face them?

Mr. HOGUE: The Hon. Member may have to do so. He came here, he says, with full authority to do away with these institutions as they now exist in Parramatta. The Government propose to move them to some other place, and this vote is intended to effect that object. Yet the Hon. Member is opposing it. The Hon. Member for the Belmore Division mentioned the Randwick Asylum. That asylum has altogether outlived its usefulness. It is now practically a private boarding-house. There was really no reason for its continued existence after the State Children's Relief Department came into existence, and it ought to have been wiped out altogether. The persons who are responsible for the management of the institution are carrying it on upon their own responsibility, and they would no doubt be glad to be rid of it now that the institution has become a white elephant. It might be wise on the part of the Government to take over the institution if they can get it at a fair price. The buildings are among the best in the Colony, but they are altogether unsuited to the purpose to which they are now put. I think the hon. gentleman might consider the advisableness of entering into negotiations for their purchase, although of course the proposal made by the Hon. Member for Belmore Division cannot be regarded exactly in the light of an offer. The site is a good and healthy one, and it would be fairly suitable for the purpose suggested.

## Minute of the Chief Secretary.

THE seriousness of the charge preferred by Mr. O'Reilly, M.P., during last night's sitting in Parliament against the Director of Charities demands an explanation.

A further charge is formulated in direct terms against the caretaker of the Cottage Homes at Parramatta, which necessitates immediate investigation for the purposes of testing the truth of the allegations, and determining whether the services of that officer should be any longer retained.

The Director of the Government Asylums.—C.W., P.U.S., B.C., 18/9/95. J.N.B., 18/9/95.  
Explanation and report herewith.—S.M., 19/9/95.

## The Director of Government Asylums to The Principal Under Secretary.

Charitable Institutions of New South Wales, Government Asylums Branch,  
Cleveland-street Rodforn, 19 September, 1895.

Charges made by Mr. O'Reilly, M.P.

## MEMORANDUM.

It appears from *Hansard* report that, apart from Mr. O'Reilly's innuendoes relating to myself, which I have requested may be reduced to distinct charges for the purpose of a prompt inquiry, the only direct charge he has made is that I "knowingly or unwittingly for years past have had in charge of twenty-four old couples at Parramatta a woman who is constantly drunk, a woman who has been guilty of the foulest language, and who has been seen coming home in the train alone, and in a state of intoxication, at 12 o'clock at night." I have ample proof that this charge is without foundation.

I have myself seen the matron on innumerable occasions, and I have never observed anything in her appearance that would justify me in supposing she drank to excess, nor have I ever heard her use foul words. I have questioned the Secretary to the Department, who has frequently seen her at the Cottage Homes and at the head office, and he positively affirms that he has never seen her under the influence of drink; other inspectors, who have visited the homes at uncertain periods, make the same statements; and the Medical Officer who visits the homes on three days a week, and also when specially sent for, and who has seen her at all times of the day and night, gives similar testimony. I may state that Mrs. Gilmore was also for nearly twelve months housekeeper at the head office, where I saw her daily, and she always appeared to be a steady, sober woman. It therefore seems impossible that she could drink to excess without being detected.

During the seven years she has been connected with the Department there have been three occasions on which it was stated to me that she overindulged in stimulants. Twice, at very long intervals, the charges were made by inmates whom she had reported for misconduct. In one case, a man and his wife were expelled for theft and drunkenness; in the other, an inmate, who is still at the home, would have been expelled on several charges\* but for his blindness and other infirmities, which caused his offences to be overlooked; on the third occasion a cabman told me he had been informed that the matron came home late one night in the train under the influence of drink.

On the first occasion I personally held a very searching inquiry, and could not find any evidence whatever to sustain the charge beyond the bare statement of the expelled inmate; on the second, Mr. Wing, then an Inspector in the Department, and now Assistant Superintendent at George-street Asylum, held an inquiry with a similar result; and on the third occasion, Inspector Allen, who is a shrewd and capable officer, could not obtain any proof. I had also questioned Mrs. Gilmore with reference to the occasion on which she was alleged to have come home late in the train. She stated she had been to the theatre with a friend, and was so exceedingly ill that she thought she would have been unable to reach her home, which is only a few yards distant from the railway station. I know that she was in bad health at that time.

My position as a civil servant precludes me from making any comments in this matter, and I therefore have nothing more to say than that I hope the evidence I have presented will be sufficient to convince the Chief Secretary that there has not been any neglect of duty with reference to the only definite charge Mr. O'Reilly has made, and that the charge itself is groundless.

SYDNEY MAXTED,  
Director of Govt. Asylums.

P.S.—I append a medical certificate from Dr. Violette, who to-day verbally stated to me that it was quite impossible for Mrs. Gilmore to be addicted to drink without his knowing it, and that he was sure she was a perfectly temperate woman.—S.M.

[Enclosure.]

Memorandum from the Government Medical Officer, Parramatta, to Sydney Maxted, Esq., Director of Government Charitable Institutions.

Sir, Parramatta, 19 September, 1895.

I have been, on and off, the medical attendant to the inmates of the Cottage Homes, Parramatta, for about six years. During that time I have seen Mrs. Janet Gilmore, the Superintendent, at all hours of the day and night, and I have never seen her suffering from the effects of drink, nor have I observed anything in her conversation or demeanour to lead me to believe that she was addicted to habits of intemperance.

Yours faithfully,  
W. BRADLEY VIOLETTE, M.B.

\* I may state that it is common for inmates to make charges of this character against officials without foundation.

1895.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**MRS. JANET GILMORE, MATRON SUPERINTENDENT  
OF THE COTTAGE HOMES, PARRAMATTA.**

(CORRESPONDENCE RESPECTING, AND REPORT AND EVIDENCE TAKEN BY THE BOARD OF  
INQUIRY.)

*Ordered by the Legislative Assembly to be printed, 14 November, 1895.*

Dowell P. O'Reilly, Esq., M.P., to The Inspector-General of Police.

Sir,

Sydney, 9 October, 1895.

On the authority of the Chief Secretary, I have to request that you will at once obtain for me from Constables West, Carpenter, and Torpy, a full and explicit statement of all they know in respect of (1) the alleged intemperance of Mrs. Gilmore, and (2) her use of bad language in public places.

I am, &amp;c.,

DOWELL O'REILLY.

I wish Mr. Brennan to obtain these constables' statements as promptly as possible for transmission to the Chief Secretary.—E.F., 9/10/95. Inspector Brennan. Forwarded to Mr. Latimer for prompt attention. I wish to receive the statements referred to by first post to-morrow morning.—MARTIN BRENNAN, Supt., 9/10/95. Statements from Constables West, Carpenter, and Torpy, *re* Mrs. Gilmore, herewith.—R. LATIMER, Sub-Insp., 9/10/95.

POLICE REPORTS.

Police Station, Parramatta, 9 October, 1895.

CONSTABLE JAMES TORPY, No. 6,336, respectfully reports *re* the above. The constable begs to state that he was on duty at the railway-station in April last from 6 p.m. to 2 a.m. for the purpose of meeting all trains. The constable saw Mrs. Gilmore arrive by the 12:10 a.m. train one night in that month very much under the influence of drink. She was asleep when the train stopped. She was woke up by Guard Morrison.

JAS. TORPY,

Constable.

Police Station, Parramatta, 9 October, 1895

CONSTABLE WEST, No. 3,711, respectfully reports that he has on several occasions, when on duty at the Parramatta railway station, seen Mrs. Gilmore leave the train in a state of intoxication, the last occasion being in June last, when the night-officer, John Lord, assisted Mrs. Gilmore from the railway carriage to her home. The constable has never heard Mrs. Gilmore make use of bad language.

F. H. WEST,

1st Class Constable.

Police Station, Parramatta, 9 October, 1895.

CONSTABLE WILLIAM CARPENTER, No. 4,304, begs to report that he was on duty at the Parramatta railway station during the month of July last. The constable on two occasions saw Mrs. Gilmore get out of the train in a state of intoxication, but has never heard her make use of any bad language.

W. CARPENTER,

1st Class Constable.

Minute of The Inspector-General of Police.

I beg to submit the attached reports to the Chief Secretary, who will perhaps decide whether or not they should be transmitted to Mr. O'Reilly, M.P.—EDMD. FOSBERY, I.-G.P., 10/10/95. Principal Under Secretary.

The statements are *ex parte*, and, in justice to Mrs. Gilmore, ought to have been taken on oath in her presence, or in the presence of her representative. To afford Mrs. Gilmore an opportunity to defend herself, and in the interests of the institution, a full inquiry must be held. The charges preferred by Mr. O'Reilly, M.P., are serious, and require to be investigated without delay.—J.N.B., 11/10/95.

I would suggest the appointment of two persons who, I think, should be Magistrates, as a Board to inquire into this matter.—C.W., 11/10/95. Dr. Manning and Dr. Goode may be asked to undertake the duty of inquiring into this matter.—J.N.B., 11/10/95.

The Principal Under Secretary to W. H. Goode, Esq., M.D., J.P.

My Dear Sir, Chief Secretary's Office, 11 October, 1895.  
I am desired by the Chief Secretary to ask whether you will, in conjunction with Dr. F. N. Manning, undertake the duty of inquiring into certain allegations affecting Mrs. Gilmore, Matron of the Cottage Homes at Parramatta, which were recently made by Mr. D. P. O'Reilly, M.P., in the Legislative Assembly.

Yours, &c.,  
CRITCHETT WALKER,  
Principal Under Secretary.

The Principal Under Secretary to F. N. Manning, Esq., M.D., J.P.

My Dear Sir, Chief Secretary's Office, 11 October, 1895.  
I am desired by the Chief Secretary to ask whether you will, in conjunction with Dr. W. H. Goode, undertake the duty of inquiring into certain allegations affecting Mrs. Gilmore, Matron of the Cottage Homes, Parramatta, which were recently made by Mr. D. P. O'Reilly, M.P., in the Legislative Assembly.

Yours, &c.,  
CRITCHETT WALKER,  
Principal Under Secretary.

W. H. Goode, Esq., M.D., J.P., to The Principal Under Secretary.

My Dear Sir, 150, Macquarie-street, 11 October, 1895.  
I am willing to undertake the duty mentioned in your letter of to-day, in conjunction with Dr. F. N. Manning.

I am, &c.,  
W. H. GOODE.

F. N. Manning, Esq., M.D., J.P., to The Principal Under Secretary.

My Dear Sir, Gladesville, 14 October, 1895.  
I shall be glad if the Chief Secretary can kindly see his way to excuse me undertaking the duty of inquiring into the charges against Mrs. Gilmore. I have been very much engaged in duties extraneous to my office during the last few months, and my office staff is short-handed. I gather, too, that the charges against Mrs. Gilmore do not involve any purely medical questions, so that there will, perhaps, be no difficulty in entrusting the inquiry to some other officer.

Very faithfully, &c.,  
F. NORTON MANNING.

The inquiry should not occupy more than one day. I shall, therefore, be glad if Dr. Manning reconsiders the matter. Although the subject to be inquired into appears to be at present only of minor importance, I am anxious that it should be placed in capable hands.—J.N.B., 15/10/95.

The Principal Under Secretary to F. N. Manning, Esq., M.D., J.P.

My Dear Sir, Chief Secretary's Office, 15 October, 1895.  
With reference to your letter of the 14th instant, asking to be relieved of the duties of inquiring into certain charges against Mrs. Gilmore, Matron of the Cottage Homes, Parramatta, I am desired to say that the inquiry should not occupy more than one day, and that the Chief Secretary will be glad if you could reconsider the matter.

Although the subject to be inquired into appears at present to be only of minor importance, Mr. Bruncker is anxious that it should be placed in capable hands.

Yours, &c.,  
CRITCHETT WALKER,  
Principal Under Secretary.

The Principal Under Secretary to F. N. Manning, Esq., M.D., J.P.

Sir, Chief Secretary's Office, 15 October, 1895.  
I am directed to inform you that the Chief Secretary has been pleased to appoint you, in conjunction with W. H. Goode, Esq., M.D., to inquire into certain charges preferred by Mr. D. P. O'Reilly, M.P., in the Legislative Assembly, on the 17th ultimo, reflecting on the conduct of Mrs. Gilmore, Matron of the Cottage Homes, Parramatta.

2. I am at the same time desired to forward herewith for your information certain papers in the case.

I have, &c.,  
CRITCHETT WALKER,  
Principal Under Secretary.

The Principal Under Secretary to W. H. Goode, Esq., M.D., J.P.

Sir, Chief Secretary's Office, 15 October, 1895.  
I am directed to inform you that the Chief Secretary has been pleased to appoint you, in conjunction with F. N. Manning, Esq., M.D., to inquire into certain charges preferred by Mr. D. P. O'Reilly, M.P., in the Legislative Assembly on the 17th ultimo, reflecting on the conduct of Mrs. Gilmore, Matron of the Cottage Homes at Parramatta.

I have, &c.,  
CRITCHETT WALKER,  
Principal Under Secretary.

Report

## Report of the Board of Inquiry.

Sir,

Sydney, 4 November, 1895.

We have the honor to report that, in accordance with instructions contained in the letter of the Principal Under Secretary, dated 15th October, we have inquired into certain charges preferred by Mr. Dowell Phillip O'Reilly, M.P., in the Legislative Assembly, on the 17th ultimo, reflecting on the conduct of Mrs. Gilmore, Matron of the Cottage Homes, at Parramatta.

The charges referred to are not stated in the letter of instructions, and we have therefore referred to *Hansard*, and find—1st. That on the 17th September last, Mr. O'Reilly stated that "The Director of Charitable Institutions, knowingly or unwittingly, has for years past had in charge of twenty-four old couples at Parramatta a woman who is constantly drunk, a woman who has been guilty of the foulest language, and who has been seen coming home in the train alone, and in a state of intoxication at 12 o'clock at night"; and 2nd, on the 2nd of October, Mrs. Gilmore is referred to by Mr. O'Reilly as follows: "Over these twelve old couples there is this woman Gilmore. I repeat that it is known to every resident in the neighbourhood, and now it is known to the Government—not to the Colonial Secretary, but to the Government officials who have printed this report against it—that this woman has been repeatedly drunk. She has been seen coming home at 12 o'clock at night in a state of hopeless intoxication, and she has been heard to use the foulest language by numerous residents in the neighbourhood."

In inquiring into these charges we have held seven meetings and examined fifty-six witnesses.

At our first sitting application was made that Mrs. Gilmore might have the assistance of a solicitor to attend the meetings of the Board, and, subject to the directions of the Board, examine and cross-examine witnesses, and as it was further represented to us that Mrs. Gilmore had no friend capable of undertaking this office, and was herself so distressed in mind at the charges levelled against her that she could not properly defend herself, we acceded to the application. Mr. Neville W. Montagu was therefore present at the sittings of the Board at which evidence was taken, and on one occasion the sitting was adjourned as Mr. Montagu was unfortunately unable to attend.

It soon became evident to us that Mrs. Gilmore, from her peculiarities of temperament, was quite unable to conduct her case for herself, and that it was only by means of assistance that the evidence could have been placed fully before us. As it was, the inquiry involved more than one painful scene due to Mrs. Gilmore's excitability, and on one occasion, in an interval between our sittings, Mrs. Gilmore took the very unwise course of visiting the dwelling of an adverse witness and threatening him with violence.

It appeared from the evidence, and from our personal observation, that Mrs. Gilmore is a highly nervous woman, in indifferent health, hysterical, excitable, impulsive, and, in consequence, difficult to deal with officially and otherwise.

It appeared further that she lived in a condition of domestic dissension with her husband, who is at present and has for some time past been without employment, and that these domestic broils and the noise and disturbance attending them were known to Mr. Maxted and Mr. Green, the superior officers of the Department of Public Charities, and had on more than one occasion been the subject of remonstrance by these officers as tending to scandal, and to the subversion of discipline in the Cottage Homes.

The evidence brought before us showed that on the whole Mrs. Gilmore had performed the duties of her office in a satisfactory manner. Dr. Violette, the Visiting Medical Officer, stated that she had "given him all the assistance in her power, been kind to the inmates, and done all she could to make them comfortable. She had looked after them regularly, seen that things were done in a regular manner, and that cleanliness was enforced." This testimony was supplemented by that of other witnesses, and we had ourselves an opportunity of seeing that the cottages were well kept, and that the inmates appeared comfortable and contented. The Director, however, whilst agreeing in the generally satisfactory character of Mrs. Gilmore's supervision, criticised her conduct in several matters of management and discipline; and her ill-health and excitable temperament, which seemed in a measure to unfit her for the duties of her office, appear to have occasioned him so much anxiety, that on more than one occasion he has thought it necessary to discuss the matter with the Chief Secretary.

We have considered it advisable to set forth these particulars as a preliminary to our report on the specific charges.

No evidence was offered that Mrs. Gilmore had ever been seen in any way intoxicated or the worse for drink in the daytime or whilst on duty; indeed the evidence of numerous witnesses, including the officers of the Department of Charities, the Visiting Medical Officers and other medical practitioners was distinctly to the effect that she showed no signs of indulgence in drink.

We are inclined to attach considerable importance to the evidence of the four medical practitioners examined as witnesses, since they saw Mrs. Gilmore at all hours, and were often in close attendance on herself or her children. They all stated unequivocally that they had seen no signs whatever at any time of indulgence in intoxicants, and this would seem to show that over indulgence in drink could not have been habitual.

We regret, however, that we could come to no other conclusion but that Mrs. Gilmore on several occasions within the last eighteen months had been seen more or less intoxicated when returning from Sydney to Parramatta by late trains. The evidence of officials of the Police and Railway Department, given in the first instance reluctantly, and only with the permission of or at the actual request of their superior officers, and supported as it was by other evidence, was to our minds conclusive on this point.

The evidence as to the use of bad language is by no means so convincing. The four members of the Police Force, who give strong evidence as to the charge of intoxication, have not a word to say on this charge, and it is difficult for us to believe that witnesses who gave strong testimony on this point, can remember the exact expressions used months ago, especially as two at least of them admit that they were in the habit of hearing bad language pretty constantly.

Dr. Violette, the present medical officer of the Cottage Homes, who was called on behalf of Mrs. Gilmore, stated, however, that her language was sometimes "not the most refined," and that it was "coarse," though not "indecent and blasphemous." Dr. Walter S. Brown, who had for about three years attended the Cottage Homes as Visiting Medical Officer, and whose general testimony was entirely in Mrs. Gilmore's favour, stated that Mrs. Gilmore's language was "not altogether what it might have been," and that he had heard her use epithets which she should not have used.

On the whole, we are of opinion that Mrs. Gilmore has at times, in moments of excitement and when she had lost self control, and especially during the quarrels with her husband, used expressions which were both improper and unseemly.

Evidence

Evidence was brought before us which showed that owing to rumours which had reached the ears of the Director of Charities, several inquiries had been made during the last two years by the Director, or by officers of his Department, as to Mrs. Gilmore's alleged intemperance, but that no conclusive evidence on this point had been obtained.

We have, &c.,  
F. NORTON MANNING, M.D.  
W. H. GOODE, M.D.

### Minute of The Chief Secretary.

Sydney, 14 November, 1895.

THE evidence taken at the inquiry held by Drs. Manning and Goode only partly confirms the statement made in Parliament by Mr. O'Reilly, M.P.

Mrs. Gilmore has, I think, acted imprudently, exemplified by her conduct whilst returning to her home at Parramatta after occasional visits to Sydney. The statement that she is a woman who is constantly drunk—a woman who has been guilty of the foulest language is not clearly proved.

The evidence given by several members of the medical profession, residents of Parramatta, and constant visitors to the Cottage Homes, proves beyond doubt that in her position as Matron, Mrs. Gilmore, has performed her duties efficiently. This view is strongly supported by the evidence of clergymen who have also frequently visited the Homes, and by highly respectable residents of Parramatta. There does not appear to be any evidence reflecting on the management or conduct of the institution. I find from the records that Mrs. Gilmore's appointment dates from May, 1883, and with the exception of the impropriety of conduct referred to in these proceedings no complaint has been recorded against her.

A careful review of the whole of the circumstances suggests that the interests of the Service will be more fully conserved by the transfer of Mrs. Gilmore to a position where she will be under judicious control and constant supervision.

JAMES N. BRUNKER.

### Evidence.

PROCEEDINGS of the Board appointed to inquire into the charges made by Mr. Dowell Phillip O'Reilly, M.P., in the Legislative Assembly on the 17th September and 2nd and 15th October, 1895, regarding the conduct of Mrs. Janet Gilmore, Matron Superintendent of the Cottage Homes, Parramatta.

THE Board, consisting of Frederic Norton Manning, Esq., M.D. (Chairman), and William Henry Goode, Esq., M.D., met at the reading-room of the Cottage Homes, Parramatta, on the 23rd October, 1895, at 10 o'clock a.m.

Mr. Neville W. Montagu, solicitor, stated that he had been instructed by Mrs. Gilmore, to watch the inquiry on her behalf, and requested the permission of the Board to be present, and, subject to their direction, to cross-examine the witnesses.

*Dr. Manning.*] We have already considered this question, and understanding that Mrs. Gilmore has no intimate male friend who could be with her in this inquiry, we think it right she should be represented by some one, her solicitor if need be, but we should be glad if you would put your questions through us as far as possible.

Mrs. Gilmore was called, and remained present throughout the inquiry.

*Dr. Manning.*] You are aware of these charges? Yes, sir.

And you know they are charges of drunkenness and of using bad language. At the wish of the Chief Secretary we are going into these charges very fully. I am not proposing to take this evidence on oath, there being reasons against that course; but if you will give me a list of the witnesses you wish to appear, I will call them.

Constable Frederick Henry West examined:—

*Dr. Manning.*] What is your name? Frederick Henry West.

You are a first-class constable? Yes.

Were are you stationed? At Parramatta.

You know Mrs. Gilmore? Yes.

You have frequent opportunities of seeing her? Yes.

You have made some statements through your sub-inspector;—will you repeat them to us? It is the duty of the man on duty, between 6 and 2 o'clock, to meet all trains, and I have seen Mrs. Gilmore on frequent occasions, generally between 11 and 1 o'clock, under the influence of drink.

When was the last occasion? In the early part of June last. On that occasion she was helplessly drunk.

Was anybody with you at that time? A cabman, named Morris, was there, but none of my comrades were there.

Did Morris see what occurred? Yes.

And saw Mrs. Gilmore's condition? Yes.

Was any railway officer present? John Lord, the night officer in charge, went to the carriage and almost carried her out. He assisted her, I believe, to her home.

You saw him go to a first-class railway carriage? Yes; Mrs. Gilmore had vomited over the seat and down her dress on one side.

The night officer assisted her out of the carriage and took her out at the door of the railway station? Yes.

And then you saw them go in the direction of these Cottage Homes—in the direction of her residence? Yes.

What was the reason for your considering Mrs. Gilmore drunk on that occasion? Her staggering gait. She was unable to stand up unsupported, and as she passed within 2 yards of me I smelt the fumes of drink distinctly.

And on other occasions why have you thought her drunk? On account of her staggering gait, but I never saw her so helpless before. She bumped against me going through the door.

Have you heard Mrs. Gilmore speak on any of these occasions? I have not, sir, to my recollection.

You

You have never heard her make use of any bad language? No; I have not on any occasion.

Can you fix the hour exactly? I cannot. It was either the twenty minutes to 12 or the ten minutes past 11 train; I am not sure which.

*Cross-examined by Mr. Montagu.*] If this witness saw Mrs. Gilmore in this complete state of intoxication, was it not his duty to take some action in the matter? I would have locked her up had John Lord not taken care of her.

*Dr. Manning.*] On what grounds would you have locked her up? For drunkenness.

*Mr. Montagu.*] Who was on the station with Mrs. Gilmore on this occasion? The other passengers had left the carriage. Mrs. Gilmore remained behind, almost double, on the seat of the carriage.

*Dr. Manning.*] Did anyone call your attention to her? Both I and the night officer saw her. They said, "Hello! here's Mrs. Gilmore," or a remark to that effect.

*Mr. Montagu.*] Did you notice who were the other passengers, and whether they were residents of Parramatta? I did not take enough notice to know who they were.

Did you look into this carriage? I could see it completely from where I stood at the door.

How often have you seen Mrs. Gilmore? I could not say, but on frequent occasions—a dozen times.

How many times have you seen her altogether? During the three years I have been on duty—and I had this duty on one occasion for four or five months together—and I suppose I have noticed her two or three times a month. I have seen her in a perfectly sober state passing my own door.

You have had some experience of people in that condition, I suppose;—will you be prepared to swear that Mrs. Gilmore was drunk on that occasion? I will, readily.

Do you not think it was possible she was suffering from illness? She may have been, but she was drunk.

You know, possibly, that people have been locked up on a charge of being drunk when they have proved to be ill;—is it not quite possible that on this occasion she may have been seriously ill? Yes; but she was also drunk.

How do you fix this occurrence in June last? It was the last month on which I was on that duty. I have ascertained that from the duty record. We do not get that duty but once in four or five months now.

So there was a lapse of time between when you were on this night duty again and the month of June? About three or four months.

Was Mr. Lord the night officer in June last? Yes.

Did Mr. Lord call your attention to Mrs. Gilmore? No; we both looked across at the same time. I was standing on one side of the door, and he was taking the tickets.

Where was the carriage that Mrs. Gilmore was in? Nearly opposite the door—a little to the left. Simultaneously both you and Mr. Lord looked into this particular carriage? Yes.

Did you make a statement about this to anyone? I was asked the question.

By whom? Mr. Dowell O'Reilly. I was asked by him if I had ever seen Mrs. Gilmore under the influence of drink.

As a matter of fact you gave it as your opinion that Mrs. Gilmore was drunk? I am prepared to swear it.

*Dr. Manning.*] Can you fix at all the first time that you saw Mrs. Gilmore? I cannot; it was early after I came here, which was the 5th August, 1892, three years ago.

After the 5th August, 1892, you first saw Mrs. Gilmore in this condition? Yes; but I could not fix it to a week, or month for that matter.

*Mr. Montagu.*] Then I understand you to say that several times prior to June, you saw Mrs. Gilmore in that condition? Yes; but never in such an advanced state of intoxication.

On this occasion in June, did you hear her make use of any bad language? No.

You say you saw her in the carriage, and both you and Lord went across to the carriage? No, I did not; I remained at the door.

Lord went there and helped her out of the carriage? Yes; he put his arm round her, and almost carried her out.

And you say you are satisfied, after the short experience of seeing her taken out of the carriage across the platform and through the door, that she was drunk? The smell of the vomit convinced me.

Constable Carpenter examined:—

*Dr. Manning.*] What is your name? William Carpenter.

You are a 1st class constable, stationed at Parramatta? Yes.

How long have you been stationed here? About a year and five months, this last time.

Do you know Mrs. Gilmore? Yes; I saw Mrs. Gilmore in the month of July last.

Have you seen her frequently? No.

You do not know her well? The first time I saw her was in July last.

You have made some statement to your sub-inspector;—will you repeat that statement to us? In the month of July last.

Can you give us the date? I cannot; I was on night duty and used to attend trains from 10 o'clock until five past 1. I think the first time I saw Mrs. Gilmore was between the 1st July and the middle of the month. I was standing at the station one night on the arrival of the train at ten minutes past 11, or five minutes to 12 o'clock. It was some train between after 10 and the five minutes past 1. I was standing on the platform and saw a rather respectable woman getting out of a carriage a little lower down than the doorway, and I inquired from one of the railway officials who the woman was.

What made you inquire? She was under the influence of drink.

You thought so? Yes.

What were the reasons for your thinking so? From the way she got out of the carriage, and the way she walked up the platform. The reason for my asking was because I did not like to see a respectable woman like her on the street without finding out where she lived.

Who did you ask? I asked a young fellow who is the ticket collector, and who is known as Andy.

What did he tell you? He said it was Mrs. Gilmore from the Cottage Homes.

Did you have any further conversation with him? No; I walked out off the platform, and Mrs. Gilmore came across to her residence here.

Are you sure of that? Yes. I walked after her to see whether she was able to get home. She was in front of me. I kept her in sight, and saw her come into her gate opposite her residence, and then went back.

Did

Did you see her on any other occasion? Yes; one night I happened to be on the platform.

Was this subsequently? Yes; and I saw Mrs. Gilmore standing against a verandah post on the platform, and Morrison, I think is his name, the guard, was speaking to her. They were on the left and I was on the right going into the doorway. I heard Morrison speaking to the night-officer, Lord, about her ticket.

On that occasion, what made you consider Mrs. Gilmore intoxicated? She was worse than on the first time.

What were the symptoms that led you to think she was intoxicated? Her dress appeared as if it had been spewed on, or something like that. She held on to the verandah post unable to walk.

What do you mean by holding on to the verandah post? She was leaning against it with her arms at the side of it.

What else? Nothing more, sir.

Did you follow her out? No; I did not. I did not want to see anything more. I believe they were talking about her ticket, and I did not want to be mixed up in it. I was there if I was wanted. It was nothing to do with me.

Who was there besides Guard Morris? Night-officer Lord.

Did she give her ticket up on this occasion? I do not think so.

*Cross-examined by Mr. Montagu.*] You were telling us just now that on the second occasion Mrs. Gilmore was worse than on the first, but she was not so drunk that you thought it necessary to take her into custody, was she? But for knowing who she was, and where she lived, I would not have left her in the street without protection.

She was not making any noise? No.

What you say is this, that Mrs. Gilmore was leaning against the post and looked in a helpless condition? She was very drunk.

She looked in a helpless condition? Yes.

You say you considered her drunk because you noticed her dress had a stain on it? Yes; and from the way she walked.

You know from your own experience that people sometimes have been locked up on a charge of drunkenness when it has turned out that they were suffering from some internal illness? No.

You have heard of it? I have never seen it.

There are only two occasions you can call to mind? That is all that I have seen the woman under the influence of drink. I have never had anything to say against Mrs. Gilmore at any other time.

*Dr. Manning.*] You did not hear Mrs. Gilmore speak on these occasions? No, sir.

Mrs. Gilmore did not speak? I could not say.

Have you ever heard Mrs. Gilmore making use of bad language? Never in my life.

Have you heard her speak at all? No; I never heard her speak.

Ephraim Haddon examined:—

*Dr. Manning.*] What is your occupation? Cabman.

You have made some statements to Mr. O'Reilly concerning charges against Mrs. Gilmore,—will you repeat them? I simply told him I saw Mrs. Gilmore arrive at Parramatta in the 11:10 train. She appeared to be in a state of intoxication. I saw her assisted from the carriage, and she held on to the verandah post until Mr. Lord, the night officer, assisted to take her home.

Can you fix the date of this occurrence? No, I cannot; I have no idea of the date, but I should think it was somewhere about four or five months ago.

Was that the only occasion? Yes; that is the only occasion on which I have seen Mrs. Gilmore under the influence of drink.

You know Mrs. Gilmore well? Yes; I have seen her frequently.

How long have you been on the ranks at Parramatta? About four and a half years.

Did you hear Mrs. Gilmore speak on that particular occasion? I cannot say that I did.

You did not hear her use any bad language? No; I was outside when the train arrived, leaning over the palisade, and just as I walked round on to the platform Mr. Lord took her away. I heard nothing.

What led you to suppose she was intoxicated? Because they had some difficulty in arousing her and assisting her out of the carriage, by the manner she got out, and by her holding on to the lamp-post.

You saw them rouse her out of the carriage? Yes; I was looking over the fence.

Do you know whether anyone else was present? Yes; Constable West, Morris, and there were one or two porters on the platform, besides the head officer.

*Dr. Goode.*] Was it cold weather at this time? Yes; it was early in the winter.

*Dr. Manning.*] What drew your attention to this first of all? Simply hearing them arousing somebody out of the carriage.

Can you tell us what was said? No; I did not hear any words. I went by the station to see whether there were any likely fares, as I usually go home about that time.

*Dr. Goode.*] Did Mrs. Gilmore go home then? Yes.

By herself? No; Mr. Lord led her home.

*Dr. Manning.*] Did you notice if she was sick on that occasion? No.

You were not near enough to her to detect any smell of liquor? No.

*Cross-examined by Mr. Montagu.*] Who is Morris that you referred to? James Morris, the cabman.

Whereabouts was the carriage that Mrs. Gilmore was in? About the centre of the train.

Would that be near the place where the tickets are taken? Yes, just below; this side of where the tickets were taken.

Would you have to clamber up the palisade to look over? No.

Is it a paling fence? Yes.

Who was engaged in arousing Mrs. Gilmore? The guard of the train.

Was Mr. Lord standing near the door? He was standing lower down; he came up afterwards.

Did the guard get her out of the train? Yes.

He

He left her standing on the platform, and she leant against the post? Yes.

To whom did you first make a statement about this matter? I was asked to do so by Mr. O'Reilly.

He came to you himself? Yes. He had been informed by some of the others that I was on the platform at the time. He asked me what I saw on that occasion and to put it in writing.

Did you write it out yourself? Yes.

That is the only time you saw Mrs. Gilmore as you say under the influence of drink? Yes.

Are you in the habit of being at the station every night? No; lately I have not been stopping late, owing to illness.

How many times used you to be there in June last? Perhaps two or three nights a week.

Did you see Mrs. Gilmore coming home late at night previous to this? I have not noticed her.

Would you have noticed her if she had been in the train? If I had been on the platform I should.

You thought she was under the influence of liquor because the guard had to help her up and you saw her leaning against the post? Yes.

*Dr. Goode.*] Does this train that arrives at Parramatta at ten minutes past 11 stop there? It goes back at 11:25.

[Witness withdrew.]

James Morris examined :—

*Dr. Manning.*] What is your name? James Morris.

You are a cabman residing at Parramatta, are you not? Yes.

How long have you lived at Parramatta? Twelve years.

Have you been a cabman all that time? No; for only about five years.

You are in the habit of going up to the station? I meet all the late trains.

Do you know Mrs. Gilmore? Yes.

Have you seen her very often? Not very often.

How many times altogether? About six or seven times.

Have you seen Mrs. Gilmore in a condition of intoxication at night? Yes.

On how many occasions? About three.

Can you give the dates of those occasions? No; I cannot give the dates at all.

Cannot you fix the dates to within two or three months? As near as I can judge, it was about May that I saw her last.

How long ago is it since you saw her first? It may have been a month before that.

So that all the occasions are within this year? Yes.

Who else was there on one of these occasions? Haddon, and Constable West, and Lord, the night officer at the railway station.

Anybody else? I think that was all.

Will you tell us what you saw on that occasion? They had to take her out of a first-class carriage; she had vomited all over the seat.

Did you see that yourself? I was on the station. There were no other passengers, and Haddon and I went on to the platform. They told her to get out, and she had vomited all over the seat.

You saw the vomit? Yes; and Lord assisted her out and took her home.

Where was the guard? I did not see the guard. He may have been there, but I did not see him.

You saw Lord leave the railway station with her? Yes.

How was he helping her? He had his arm underneath hers.

Did he go towards Mrs. Gilmore's residence? Yes, but I could not say he took her right home.

Did you hear Mrs. Gilmore speak at all? No; I did not.

What led you to suppose she was intoxicated? The state she was in.

You do not think it possible she was in bad health? No; I did not think she was; I would not say. My impression was she was intoxicated.

Were you near enough to smell any fumes of liquor? No, I was not.

What did you see on the other occasions? She staggered a little; that was all.

Did she go home alone? Yes.

Where were you when you saw her? At the station.

And the staggering was the only sign on the other occasion? Yes.

She did not speak then? No; she did not speak to me. I never heard her speak.

Have you ever heard her use bad language? No, never.

*Cross-examined by Mr. Montagu.*] How many times did you see Mrs. Gilmore prior to this night in May? About twice.

Then the reason you say she was drunk on these three occasions was on account of the way she staggered? Yes.

Was Haddon with you on the platform on the other occasions? No; he was not.

Was Lord in the carriage when you came up? Yes.

Did either you or Haddon interfere in any way? No.

You simply saw Lord take her out of the carriage and lead her out? Yes; that was all.

Did you notice where Constable West was standing? No.

Was he on the platform? Yes.

Was he standing at the carriage? He was looking into the carriage.

Did he remain on the platform? I could not say.

Did you notice whether Mrs. Gilmore passed near to West when she was taken out by Lord? I could not say.

You say that West was looking into the carriage? I could almost swear he was looking into the carriage.

You could not swear positively? No.

I suppose you have been talking about this matter with someone? I have, of course.

With Haddon, for instance? I might have.

Have you not been talking with Haddon about what occurred on that occasion? Yes; he may have said she was in a nice state, or something like that.

Hayo

Have you spoken to Constable West about this affair? No.

Or anything about Mrs. Gilmore? No.

Have you had a word with Haddon about it at all? I might have asked him if he had got notice to come here.

Did you ask him if he recollected what occurred? No.

Have you discussed the matter with anybody else? I might have. It is general talk at the station.

Did Mr. O'Reilly come to you? Yes; he came to ask me for a written statement. I did not want to have anything to do with it. He told me I would have to.

I suppose Mrs. Gilmore has employed you on occasions for herself or other people? Yes; once that I can recollect.

You know that cabmen are employed by her? No; I do not.

[Witness withdrew.]

William Morrison examined:--

*Dr. Manning.*] You are a railway guard residing at Parramatta? Yes.

Doing duty on the line between Sydney and Parramatta? Yes.

On what trains are you on duty? I am on a lot of trains, the last is the 12.9 a.m. from Granville.

What are the other evening trains? 5.20, 7.30, and 11 o'clock, Sydney time, and I go back to Granville and pick up the portion of the Campbelltown train.

You have made some statement to Mr. O'Reilly regarding the matter which we are inquiring into to-day, will you give us the gist of that statement? Mr. O'Reilly came to me and asked me for a statement, and I refused to give it to him. I told him I could not do anything of the kind unless I had permission. I asked him to give me his authority. He told me he thought he could get a statement from me. I told him I would not give him any statement unless he had proper authority. He then got permission for me to give him the information. He came to my place and told me, "You will have to tell me what you know, because you will be put on your oath in this matter." I was very sorry he should bring me into the matter, and asked him how he knew that I knew anything about it, and he said that he knew that I was the guard. On the first occasion a gentleman drew my attention to the lady at Granville.

On what date was that? I cannot say; as near as I can remember it was about sixteen months ago.

When the gentleman drew your attention to the lady in the carriage, you had been shunting the train there? Yes; I brought that portion on.

You took charge of the train at Granville? Yes. The gentleman said, "You had better see where she is going; she does not seem altogether right."

Was this in a first-class carriage? Yes. I did not know who the lady was, and I asked her where she was going to. She said Parramatta, and came on here. I asked the night officer who she was, and he told me.

You did not know her yourself? No; that was the first time I knew who she was. I never saw her on any other train but that one. Several times after that I saw her coming up.

What was her condition on this occasion? She was a good deal under the influence of drink, so much so that I had to call out two or three times at Granville to see where she was going. She then said Parramatta.

How did you judge she was under the influence of drink? By her appearance, and the way she looked when she got out and from the way she spoke.

Who was the gentleman who spoke to you? I did not ask him who he was. He went on in the Campbelltown train.

Might it not have been that he called your attention to her, because she was asleep, and might have passed her station? I could not say; she seemed to be asleep.

What happened when you got to Parramatta? She got out; I did not notice anything further.

When she got out at Parramatta, how did she appear? She looked like anybody having had too much. She went out of the door.

She may have been asleep? She may; only by appearance she looked like that.

That was your impression? Yes.

What occurred on the other occasions? After that I saw her two or three times, and she looked about the same. One night in particular, about six months ago, she came up and was in a carriage alone. I called out Parramatta, and she could not get up.

What time was this? The same train, the 12.11.

Can you fix the date at all? It was either at the end of May or commencement of June, because I got an illness just after that. I assisted her out of the carriage, and put her on the platform. I heard something drop, and picked her purse up and gave it to her. I could swear she was under the influence of drink that night; she could not stand up straight.

Did you detect any smell? Yes; there was some spew in the carriage. I gave her her purse, and she went to grab at it and nearly fell down. I had to catch hold of her or she would have fallen. When she went to the door Mr. Lord was there.

At the door? At the door going out where they collect the tickets.

Mr. Lord was at the door leading out of the station? Yes. I said, "You had better get that lady's ticket." I said that because if a ticket is not given at the door we are supposed to report it. If the night officer does not, the guard is supposed to. To see whether it was done I asked him if it was reported, and he said it was.

You are a check upon each other? In a case of that kind at the station.

Did you have any words with Mrs. Gilmore about the ticket? No; I never spoke to her about it.

Do you know what happened when she got to the door to pass through? I heard her tell Lord, who asked for her ticket--I understood she said he might go somewhere and look for it.

She said he might go to hell? Yes, and look for it. I was told afterwards that she sent the ticket over next morning.

Who told you that? Lord.

Did you see anybody else present on this occasion? There were the policemen.

Which

Which policemen? I do not know the names. I think it was the big man. I could not be sure, but he wanted to take her in charge, and I said to Lord, "No; the best thing you can do is to report the matter."

How many times on the whole do you think you have seen Mrs. Gilmore under the influence of drink? What I have fancied to be, but I could not really say. I have seen her several times, but I could not say how many.

You think she was under the influence of drink on several occasions? Yes.

But you are not absolutely certain? I could not tell whether it was or not; only the one time I am certain of that.

Can you give me the dates when these other occasions occurred? I have no idea of the times. I could not give any dates.

*Dr. Goode.*] Was it always by the same train that you saw her? Yes.

*Cross-examined by Mr. Montagu.*] About what time does that train leave Sydney? Half-past 11.

Practically the theatre train? Yes. It is the southern train to Campbelltown. There are two carriages that come on to Granville, which are brought on to Parramatta.

On each of the occasions that you saw Mrs. Gilmore it was by that train? Yes; never by any other train.

How long have you been acting as guard on that train? Over two years.

About how many times during those two years have you seen Mrs. Gilmore come home in that train? It is about sixteen months ago since I first saw her. I have seen her a good many times.

Give me some idea of the number? There are so many people travelling.

You took particular notice sixteen months ago—was it half-a-dozen times? Yes.

*Dr. Manning.*] Half-a-dozen times under the influence of drink? Yes.

How many times altogether under the influence of drink? I could not really say.

About once or twice a month? Yes; quite that. I only run this train every other week.

*Mr. Montagu.*] You have not seen her two or three times in one week? Twice in one week I have seen her.

How many times altogether? About six or seven times altogether.

Under the influence of drink? Yes.

On the platform or in the train? I have seen her in the train, and get out at Parramatta.

At any of those occasions did she make a disturbance on the station? Never—not in the slightest. I never saw her interfere with anybody, nor speak to anybody. On that one occasion is the only time I heard her say anything disrespectful, or use any improper language.

Except on that one occasion, you have always seen her go out of the station of her own accord. You have never seen her taken out? No; I have never.

You judged she was intoxicated on account of the peculiar manner of her walking? There was only one time I could swear to.

The other six or seven times you would not like to swear to? No; I would not.

She has always travelled in a first-class carriage? Yes.

Do you start from Sydney in that train? No; I join it at Granville.

Have you never heard her speak on those other occasions? No.

On this particular occasion about six months ago did she appear to be dozing? She seemed like a person under the influence of drink. I could smell beer—English or colonial I do not know which.

You knew she had been sick? Yes; she was sick in the train.

You are aware that the breath of a person who has been sick is not very good? Yes.

How far were you standing from Mrs. Gilmore when you say she told Lord to go to hell? About 12 feet.

And she called out in a loud tone of voice? No; in the casual way of speaking.

Had Lord been speaking to her before she said this? She was going out of the door as I came up to see whether she gave up the ticket. He blocked her at the door, and said, "I want your ticket."

Was she stopped by Lord? Yes.

I suppose what she said came out pretty quickly—there was no hesitation about it? No; there was no hesitation about it.

And he let her go on through? Yes.

[Witness withdrew.]

John Rutter examined:—

*Dr. Manning.*] Where do you live? Parramatta.

You are a guard on the train between Sydney and Parramatta? Yes.

You are on the alternate shift with Morrison? Yes.

And you bring up the 11 o'clock train from Sydney, and go back to Granville to bring up the 12-9 from there? Yes.

You know the object of this inquiry is with regard to certain charges against Mrs. Gilmore of intemperance and the use of bad language? I have heard about it.

Can you tell us what you know about it? I know very little. Mrs. Gilmore has come up with me on three or four occasions under the influence of drink when we arrived at Parramatta.

What trains was that by? By the 11-41 here, and the 12-13 here.

How do you know she was under the influence of drink? She was asleep in the carriage. I had some difficulty in waking her, and she was hardly able to get out of the carriage without assistance. She could not walk along the platform.

Can you fix the date? No, sir; it is about four to six months ago.

Did these three or four occasions happen near together? In about two months or ten weeks.

And they occurred from four to six months ago? I should think so. I could not say to a few weeks.

Since that time have you still been employed on this particular line? Yes.

And have you seen Mrs. Gilmore since? I have not seen Mrs. Gilmore for the last three months.

Not at all? No.

Not in the train? Not to my knowledge.

Has anybody else been present and seen her on any of those occasions? Night-officer Lord; a cabman was there and policemen.

Which cabman? I could not say.

Is he a tall man? His name is Morris, I think.

Do you remember any occasion on which Mrs. Gilmore was sick? I heard about it; I never saw it.

Have you had any difficulty with regard to tickets? No, sir.

Have you heard Mrs. Gilmore use bad language? I have not.

Have you ever had to assist Mrs. Gilmore out of the carriage? No, sir.

Have you seen anybody else assist her out? I have seen Lord.

What led you to suppose she was intoxicated? I had some difficulty in waking her. On arriving here I called out several times loudly, "Parramatta," and she did not take any notice. Lord went in and called her and woke her up. She did not seem to be able to get up. Lord assisted her, and if he had let her go she would have fallen. She got hold of the verandah post with one hand. Lord took her to the door, and asked her for her ticket. I went away to get some tea. I do not know how they got on.

*Cross-examined by Mr. Montagu.*] You have assumed, then, simply from what you have seen that Mrs. Gilmore on those occasions was the worse for liquor? Yes.

Have you made any statement to anybody in connection with this matter? Only to Mr. O'Reilly. He made it his business to come and speak to me.

Did you tell anyone before Mr. O'Reilly saw you that you could give information? Only Guard Morrison. He told me that Mr. O'Reilly had spoken to him about this case, and said, "You know something about it." I said, "I just know I have seen the lady two or three times under the influence of drink," and he told Mr. O'Reilly, I suppose.

It would not strike you for one moment that the lady was ill from some complaint? No; I do not think so.

You are a pretty good judge of what people are like in a state of intoxication? No; I am not.

Would you take it upon yourself to swear in court that she was drunk on any of those occasions? I believe I could do so.

To swear that she was drunk? Yes; under the influence of drink.

Simply because you happened to see her not able to walk straight on the platform? Yes.

During the last two years you have only seen her on three or four occasions in a condition which led you to believe she was drunk from the reason you have stated? Yes.

[Witness withdrew.]

John Henry Lord examined:—

*Dr. Manning.*] Your position is that of night officer? Yes, at Granville. I was removed there from Parramatta.

How long is it since you left Parramatta? I left on or about the 15th August this year.

As night officer you have to perform the duties of station-master? Yes.

How long were you at Parramatta? Ten years.

Do you know Mrs. Gilmore? Yes.

How long have you known her? By sight for the last three or four years.

Have you seen her frequently during the last eighteen months or two years? Yes, frequently.

You have made a statement to Mr. O'Reilly? Yes.

Will you give us the substance of that statement now? I have repeatedly seen Mrs. Gilmore. She generally used to arrive between the ten minutes past 9 and eleven past 12 trains from Sydney—usually the eleven minutes past 12. On one occasion she came by an earlier train.

What condition was she in when she arrived? Under the influence of liquor.

On how many occasions have you seen her in that state? On several occasions.

During how long? During eighteen months or two years.

Was she a frequent traveller? Generally about two or three times a week—twice a week, I should say.

Did she run any danger by her condition? She ran great risk. On one occasion the guard walked down to the end of the train. I was standing at the door to collect the tickets.

What guard was that? I cannot say. It was a train arriving, to the best of my knowledge, at ten past 11. He said there was a lady asleep in a first-class carriage. I cannot arouse her. With that I went down, after I had collected the tickets; and as I got on to the platform of the car a lady was getting up from the seat and going out of the car at the other end, and before I got to the other end she had turned to the opposite side of the platform, and the engine was running round at the time. I had to make a grab at her and pull her back towards the platform, otherwise she would have fallen underneath the engine.

What did you consider her condition was? She was then under the influence of drink.

May she not have been asleep, and suddenly woke up dazed? No; I could smell the drink very plainly on her on that occasion. She had vomited on the carpet in the car.

Can you fix that date at all? I could not give any dates at all. I did not take much notice of dates at the time. It was on such frequent occasions that I did not take dates whatever.

Was anybody present on the occasion that you rescued her from going over on the opposite side to the platform? No one was on the platform except myself and the guard.

How many times have you seen vomit? Three to four times in the carriages.

How do you know that this vomit came from Mrs. Gilmore? She was the only occupant of the carriage. It was right under the seat where she was sitting. On one occasion it was on her clothing.

Who else was there at the time you saw it on her clothing? I believe there was Constable West on the platform, and, I think, a cabman named Morrison, and another named Haddon.

Will you tell us what occurred on that occasion? This was on the ten past 11 train to the best of my knowledge. She was sitting in the car. I could see her from where I was standing collecting the tickets. I went in and said, "Parramatta, madam." She looked up in my face and said, "Aye." I said, "You want to get out here." She said, "You must assist me." I said, "Very good, madam." With that I took hold of her arm, put my arm round under her other arm. I saw vomit all over the car seat—

on

on the one on which she was sitting—and down one side of her clothing. I said, "You are unable to walk." She said, "I cannot walk." With that I still kept my arm round her and fetched her down to her cottage, and left her at the gate.

Was there any difficulty about the ticket on this occasion? She, I believe, gave the ticket up the next morning, to the best of my knowledge.

The ticket was not given to you? It was not given to me on that occasion.

Had you any difficulty on other occasions in getting her ticket? Yes; I had difficulty on several occasions. You cannot deal with a lady as you can with a gentleman; you can stop him. I have spoken to Mrs. Gilmore, and said, "Please give me your ticket," and she has said, "Damn you and the ticket; blast the ticket; I cannot find it at present." Then she would pull out the ticket and throw it at me and say, "You damned, blasted railway men are too smart." She has got quite annoyed when I asked her for her ticket.

Did you get the ticket? I got the ticket afterwards. She would throw it into my face as she was going from the door.

Was there only one occasion on which you did not get the ticket? On the occasion I assisted her home, I did not get the ticket that night.

And did you report this? I did, to the best of my knowledge, and it was got the next morning.

Of course you know nothing about that? No.

And you say that Mrs. Gilmore travelled about twice a week? On an average, about that.

How often was she intoxicated? I am sorry to say it was very seldom I saw her otherwise.

Have you seen Mrs. Gilmore since you have been living at Granville? Yes; I have seen her at Granville.

Can you tell me on what occasion? On or about the 4th September, I believe, it was of this year.

What occurred then? She came on to the platform about 10:20 to 10:40, in company with another lady.

Where did she come from? From the direction of Sydney Road, through the big general waiting-room on to the platform. It was on the up platform. I was standing talking to two members of the staff—a shunter and porter—in reference to some duties. Mrs. Gilmore came up and said, "Have any of you chaps got 6d. or 3d. to give us, to get a pint of beer with?" I looked round. I was rather taken aback at such a remark. She said, "You had better shout for us; I am very dry." I said, "If you have not got 6d. or 3d. you had better use a penny and go to Parramatta."

What is the fare to Parramatta? 1d., 2nd class; 2d., 1st class.

What else happened? I said, "I have no money, inadam." She was in company with another lady. Do you know who that lady was? I do not.

What else happened? The other lady said, "Come on Mrs. Gilmore." With that, Mrs. Gilmore up with her fist and struck her in the chest.

Struck the other lady in the chest? Yes, and said, "Blast you; how dare you mention my name."

What then? She left the premises then.

She did not go by train? She went away on to the street.

You knew Mrs. Gilmore was a Government official? Yes.

You knew that the existence of this condition of things was not creditable to the Public Service;—did it never occur to you to complain to the head of her Department? I got into trouble over one affair myself, and I determined not to mix myself up in another.

You got into trouble over reporting an officer? Yes, sir. Mr. Wing, I am sorry to say, was well aware—he is at present Superintendent of the George-street Asylum—he was well aware of this carrying on. He came to me on one occasion, and wanted a written statement from me. I refused to give it to him.

That was purely because you had got into trouble already? Yes.

And you consider Mr. Wing knew of this? Yes, sir, he did know of it. He came to me on the platform, and wanted me to give him a written statement.

What date was that? I cannot say when it occurred. It was just before his appointment to George-street. He was then prosecuting in those baby-farming affairs. He asked me about the Cook's River affair—something about a man named Johnson. I refused to give him a written statement.

On the occasions you saw Mrs. Gilmore, what led you to suppose she was under the influence of drink? She could not stand, hardly.

Hardly? She could only stand by supporting herself by the verandah post.

Did Mrs. Gilmore always get home by herself? Except on that one occasion.

She walked home by herself the other evenings? I cannot say. I saw her out of the door. The Night-guard Morrison assisted her from the saloon carriage. She had then vomited all over the car, and she asked him to assist her out on the platform, and she had to cling to the verandah post.

Was that on another occasion? Yes; that was when Guard Morrison assisted her out.

Can you call to mind the date of that? No, sir, I cannot.

Was that after the occasion on which you helped her home or before? Before.

*Cross-examined by Mr. Montagu.*] Mr. Wing, whom you refer to, was then holding an inquiry? Not that I am aware of.

He had been sent up by the department to make inquiries? Not to my knowledge.

When did you first mention this subject of Mrs. Gilmore? I do not remember mentioning it to anyone.

You have made a statement? Yes; a written statement to Mr. O'Reilly. He requested it from me, and I refused to give it unless he got permission from the superior officers of my department.

When Mr. O'Reilly came to you was the first time you mentioned it to anybody? Yes.

Do you know Mr. Ormiston? I do not. I may know him by sight. I do not know the man. I have no idea who he is.

You have never spoken to him in your life? Not to my knowledge.

Have you ever had a conversation with anyone, knowing him to be Mr. Ormiston? No; I have not.

Have you ever had a conversation with Mr. Ormiston and Mr. O'Reilly concerning Mrs. Gilmore? I have had no conversation in the presence of anyone except Mr. O'Reilly, and I do not think, to my knowledge, anyone was present. I have only had conversations with Mr. O'Reilly on two occasions at Granville—once on the up-platform and once on the down-platform. That is quite recently, and never before.

That

That must have been since August last? Yes.

Within the last couple of months? Yes.

Does Mr. O'Reilly live at Granville or Parramatta? He lives at Hayfield.

Do you know Mr. O'Reilly to speak to? Just to pass the time of day. I do not think I have ever spoken to Mr. O'Reilly, only when he asked me for the statement.

That was the first occasion you had to speak to Mr. O'Reilly? Yes.

You said just now you had got into some trouble;—what was that about? It was an affair in reference to a Mr. Norton at the George-street Asylum.

You made some report about him? I did. I was asked by Mr. Wing to substantiate what I had said. He accused the man of arriving home drunk.

Who accused him? Mr. Wing.

Was that on information that you gave him? He saw it himself. I did not give him any information. Mr. Wing was present on the platform, and saw it.

*Dr. Manning.*] Did you speak to Mr. Wing about him, and point him out? No; I did not point him out. Mr. Wing was present on the platform.

Did you give information to Mr. Wing with reference to this man? Yes; I gave him information previous to Mr. Wing seeing him, as Mr. Wing said, drunk. Mr. Wing wanted me to substantiate the evidence of being drunk. I said, "I will not." The man was under the influence of drink. In my opinion, a man drunk is absolutely unable to take care of himself. To be under the influence of drink is different. Mr. Norton waited on me previous to the inquiry, and asked me whether I would give it in writing that he was drunk. I said, "I will give it in writing that I have not seen you drunk, but under the influence of drink, leaving the train."

As a matter of fact, did you not state this "I have seen him under the influence of drink. He showed the effect of drink by his unsteadiness"? I said that at the inquiry.

*Dr. Goode.*] Who was Mr. Norton? He was a wardman at the George-street Asylum at the time.

*Mr. Montagu.*] Although you stated that at the inquiry, did you not make this statement in writing, "I beg to state that I have not seen him drunk at the station when leaving there"? Yes; I say now I have not seen him drunk. A report was circulated that if I said that Mr. Norton was drunk he was going to take an action against me.

So you qualified it by saying you saw him under the influence of drink? I think so.

There was an appeal about that, was there not? That is all I know about it.

Will you please tell us whether you consider Mrs. Gilmore was on the occasions you refer to under the influence of drink;—you will not go so far as to say she was drunk? No.

Because Mrs. Gilmore was unable to stand, and vomited, that is why you say she was under the influence of drink? Yes.

How would you explain it, then, if you were to say she was drunk? I do not know, I am sure.

*Dr. Manning.*] Do you think Mrs. Gilmore was drunk on the occasion you had to help her home? She was greatly under the influence of drink. By the smell of the vomit on the floor there was no mistake, in my opinion.

*Mr. Montagu.*] Do you know Mr. Brackenbridge, brother-in-law of Mr. Ormiston? No; I don't think I have heard the name. They are strange names to me.

When you are on duty you go to the hotel and have a drink? Yes, when I feel inclined; but understand that is during my meal time, from half-past 11 to 12.

You do not leave your duty except at meal times? No; except at meal times, and just previous to going off duty.

At any other time? No; in fact, I take but very little drink.

We have your admission that you have gone off duty to have a drink at the hotel? I consider that nothing to do with the inquiry.

Have you not been found fault with by the station-master for being under the influence of drink? Never. I can prove that.

Has Mr. Watsforth, the station-master, ever complained of you in any way? I asked him at an inquiry that was held whether he ever found me under the influence of drink or indulging in racing or gambling, and he said "No."

That was an inquiry into your conduct? I decline to answer that question.

Did the result of that inquiry end adversely to you;—were you not reprimanded? Yes, both of us; both myself and the station-master were.

It was a quarrel between you and the station-master? Yes.

You were reprimanded? Yes.

*Dr. Manning.*] Was it in consequence of this that you went to Granville? No, sir, the station-master was quite willing to have me at Parramatta. I applied for a shift on account of not being able to agree with one of the present officers there now.

*Mr. Montagu.*] But you were reprimanded by the Department? I was not reprimanded. The Superintendent told myself and Mr. Watsforth that if he heard anything of the kind again he would severely punish both of us, and destroyed the papers and put them in the waste-paper basket.

Have they been destroyed? I don't know. He simply said he would do so.

You are of a quarrelsome nature? No; I do not quarrel with other people.

You have reported other officers? I have had to report men during my life in connection with railway matters, which is my duty to do.

Have you been upheld in those reports? I have been upheld in all those reports.

In all of them? I decline to answer. It is very often a man makes a report, and it may be shown he is in the wrong when he is in the right. If you have several men working under you, you must make them do their duty, and consequently you get disliked.

You said without hesitation just now that on very many occasions you saw Mrs. Gilmore come home drunk? I say that on very many occasions Mrs. Gilmore has come home under the influence of drink.

Would you be surprised to learn that the guards of the night trains have stated that during the last two years they have seen her very few times indeed—one three or four and the other about six or seven? They may not have been the same guards. Mrs. Gilmore never came home by the one train, sometimes the 11:40 and sometimes the 12:11.

You

You told us she usually came home by the 12.11 train? Yes.

The guards have stated they have seen her very seldom? Considering they are on once a fortnight, that would bring it into some months.

Would their statements be correct or incorrect? I dare say between the two they could say they have seen her more than that. One of these guards was for three months on sick leave.

That was a good while ago? Not so long ago—about July. He was often away.

What is his name? Morrison. During that time he was absent to my knowledge between March and July. Previous to July he was absent nearly three months. He suffers a great deal.

Would you swear that this terrible language was used by Mrs. Gilmore? Yes. "Damn and blast it," she said. She threw the ticket in my face, and said, "You damned railway officials are too smart."

You know she is an excitable woman? No; I do not.

Where was the carriage she was sitting in? Very nearly opposite the door.

Could any person sitting in that carriage be seen by anyone looking over the fence outside the railway station? No; they would have to be very tall. They would have to stand 7 feet.

I am talking about the palisading? No; it is right opposite the general waiting-room door. It would be about 30 to 40 yards from the palisading.

How long ago did this conversation at Granville occur? It was on or about the 4th September.

How do you remember that? On account of there being a ball held at the Albert Hall, I believe it is, in Granville.

Were there not other people travelling from Granville from the ball? Sometimes they would go back, sometimes they would not.

*Dr. Manning.*] Were there many people travelling from Granville to Parramatta on that night? There were plenty of people travelling.

Apparently going from the ball in evening dress? There is very little evening dress there. It is only one of those larrikin affairs.

*Mr. Montagu.*] It was not a private ball? It was a larrikin ball—a monthly ball, held by the "Caledonians." It is a very rough affair.

Were there not other people travelling back about the time the ball was over? There may have been.

What time did this conversation occur? About twenty minutes to 11.

Did they get into the train? There was no train.

What became of them? They went across the street.

And did not come back? No.

Did the person you tell us was Mrs. Gilmore go back to Parramatta at all that night? Not by train.

What first drew your attention to her? Coming to speak to me on the platform at Granville.

How did you first come to know Mrs. Gilmore? She was first pointed out to me.

Who pointed her out? I cannot say. The present booking clerk at Parramatta has pointed her out to me as Mrs. Gilmore.

Do you remember what the lady you saw at Granville, and whom you call Mrs. Gilmore, wore that night? A kind of grey dress.

Had she a bonnet? I cannot say.

Did you notice the dress of the other lady? Yes; she had a little black hat on, I think.

Was anybody else present when this language was used? There was Vidler and Shunter North. I was giving them directions as to what they should do.

Where were they standing? On the platform, near to me.

This conversation took place near the ticket-office? Right against the general waiting-room door—the ticket-office is inside.

Was it on the platform of the train going to Sydney or coming from Sydney? Going to Sydney.

[Witness withdrew.]

George Henry Mobbs examined:—

*Dr. Manning.*] You are an auctioneer? Yes.

In Parramatta? Yes.

Some time ago you made a statement to Mr. O'Reilly regarding certain charges against Mrs. Gilmore;—will you tell us what was in that statement? I saw Mrs. Gilmore in the train coming up from Sydney, the 11.30 train, at the Granville Junction. I was coming on from Sydney in that train. When we got to Granville Junction I noticed a lady vomiting in a saloon carriage.

What time was this? I suppose it was about 12 o'clock at night. The porter assisted her to get out of the carriage on to the platform, as near as I can remember. He went to the lady's assistance, but I am not quite sure whether he assisted her or not. The passengers for Parramatta changed from the southern train at Granville. Mrs. Gilmore came on to Parramatta in the same carriage, to the best of my belief in the same carriage. I thought at the time the lady was ill, but when she got out at Parramatta she did not appear to be walking very upright, and I was inclined to think she was intoxicated.

Did she get out of the carriage by herself? I did not notice her in the act of getting out of the carriage.

Did you see her on the platform? No.

You noticed her when she got outside the station? Yes; and she could not walk properly.

Did you speak to her at all? No.

The only evidence of intoxication that you can give us is that she did not walk properly, and that there was vomit in the carriage? Yes.

*Dr. Goode.*] Did you detect any odour of liquor? No.

Was the lady Mrs. Gilmore? To the best of my belief.

*Dr. Manning.*] You know Mrs. Gilmore? Yes.

Have you seen her frequently? Not very frequently.

Do you reside quite close to here? Yes.

Are you quite sure it was Mrs. Gilmore? Yes.

There

There is also something about bad language in the statement you made? All I know about the language is this. Of course I could not swear to the person, because it was inside the house adjoining my property. I heard frequent quarrels of the same people, and only judge by the voice. I have not been in the house to see.

When these quarrels were going on, you have not seen the people? No; I have only heard. I could not say exactly what the language was I heard. I did not take it down, but on one occasion, when I heard something like a bottle smashing and crockery, I heard "bloody dog."

Was that in a woman's voice? Yes.

Have you at any other time seen Mrs. Gilmore intoxicated? No, never; and I cannot swear she was then; it was only the appearance.

Do you often come home in the same train with her? No, very seldom; not more than once in twelve months.

You are very seldom in Sydney at nights? No.

*Cross-examined by Mr. Montagu.*] How long ago was it that you saw Mrs. Gilmore in the train? I could not say positively—as near as I can remember, eighteen months ago. There was a commotion on the platform as if something was wrong. One or two porters were round rendering assistance to Mrs. Gilmore, at Granville.

Were there any other people in the carriage with you? There were other people travelling in that train.

But in the carriage you were travelling in? If I remember rightly there was only one car attached to the engine. That train going along the Southern line we change at Granville to come on to Parramatta.

Was it a saloon car? Yes.

There were other people in the car? To the best of my belief there were.

What do you mean by saying to the best of your belief you thought it was Mrs. Gilmore? Because I was not particularly well acquainted with her then, and as I thought I saw her the next day that made me doubly sure it was the same person.

Did you know Mrs. Gilmore before this? Yes; I had seen her before. In order to make sure on that occasion, when I came out of the railway station walking towards home, I was on one side of the road and Mrs. Gilmore was on the other side, and she came as though she were coming to speak to me. I stepped back and she went on home. I thought at the time I would make sure it was Mrs. Gilmore. I saw her go in the gate and then I saw her the next day.

Why were you so anxious to find out that it was Mrs. Gilmore? I do not know it was any anxiety to me.

What prompted you to ascertain as a fact that it was Mrs. Gilmore? I do not know what prompted me except that I should be positive about it. I had to go through the paddock to see about the horses.

That was pretty late? Ten minutes past 12.

Are you in the habit of looking after your horses at 12 at night? No; but when I return from town I generally take a stroll by the paddock.

Had you had any conversation with anyone about Mrs. Gilmore before? No; not that I remember.

Can you give us no reason why you tried to find out who it was? If you will allow me to refresh my memory, I might be able to find out a reason. I think it was for this reason. I had heard certain things respecting Mrs. Gilmore, and of course I did not know it to be a fact, and frequent quarrelling and so on. That is one reason that brought me to take particular notice of Mrs. Gilmore.

Because you heard quarrelling you wanted to find out whether it was Mrs. Gilmore? I had heard the quarrelling. I had heard reports about drunken habits of the lady in charge of the homes here.

You are living at Mrs. Brown's;—how long have you been living there? Six years.

Mrs. Brown's premises adjoins Mrs. Gilmore's? Yes.

Mrs. Brown keeps a boarding-house, does she not? Yes.

Do you know that there has been a little unpleasantness between Mrs. Gilmore and Mrs. Brown? I heard something about the unpleasantness.

You have only heard reports, you have heard of no outbreaks between them? No.

By what do you consider Mrs. Gilmore was drunk on that particular night? So far as appearances were concerned.

You very often see people drunk in Parramatta, do you judge by that? Yes.

There is not much love lost between Mrs. Brown and Mrs. Gilmore? I think there is an unpleasantness, but it is a slight one.

I think you were one of Mr. O'Reilly's secretaries? I was a supporter.

Were you one of his secretaries at the first election? Yes; I was.

How long ago? A little over two years ago, or rather the election before last, fourteen or fifteen months ago.

About the time that this affair occurred. You have been a prominent supporter of Mr. O'Reilly's? Yes; I have.

Do you not know who it was that prompted Mr. O'Reilly to make this statement in the House? I do not.

Did you make the statement yourself to Mr. O'Reilly? I did not.

When did you first give Mr. O'Reilly any information in reference to Mrs. Gilmore? I think it was about two weeks ago. He asked me if I knew anything. He challenged me to speak in connection with the matter. I told him something, and he came afterwards and told me to give a reply to his request. I sent him a letter.

About two or three weeks ago? I am not positive about that; it is quite recently.

Can you remember Mr. O'Reilly making a speech in the House on the 15th October, and another at the beginning of this month? It was prior to his speech in the House.

You gave him the information you have given us to-day prior to the 1st October? I do not think I stated everything so fully.

On the 1st October he made this speech in the House;—was it before or after that? I think it was just before.

Was it not on your information that Mr. O'Reilly practically based his speech? No.

Not at all? I cannot say; I did not ask him.

You have read his speech? I read something that was said on the last occasion.

You

You did not read his first speech? No; I did not read it. I saw a few lines in the *Telegraph*, I think.

Do you know a person named Orniston? No.

Nor Corcoran? No.

Nor Breckenridge? No.

You have never heard of them at all? No; I do not think I have ever seen them.

With this one exception that you speak of, you have not seen Mrs. Gilmore coming home late at night? No; I have not.

[Witness withdrew.]

Robert Vidler examined:—

*Dr. Manning.*] You are a railway official? Yes, at Granville.

What position do you hold? Porter.

Do you remember the 4th of September last? Yes.

How do you fix that date? There was a ball on that night at the Albert Hall.

Did you see Mrs. Gilmore that night? Yes.

Do you know Mrs. Gilmore? I never knew her before then.

Was anyone with her? She was in company with a young lady.

What time was it? Between 10:30 and 10:40. Mrs. Gilmore, in company with this other person, came in and asked if we would lend her 6d. or 3d.

Who was there besides you? Mr. Lord and Shunter North.

Were you together? Yes, talking.

Who did Mrs. Gilmore address? She asked all of us personally, I am sure.

Each one individually? Mrs. Gilmore came in with this lady, and said, "Will any of you lend us 6d. or 3d. to get a pint of beer?"

What happened then? We refused. She asked if we would give her a penny to fetch her to Parramatta, and we refused also.

Was there any bad language used of any kind? The person in company with Mrs. Gilmore mentioned her name, and she said, "Blast you, how dare you mention my name."

Was that all? I know of nothing else.

She mentioned Mrs. Gilmore's name? Yes; and Mrs. Gilmore struck her on the chest.

Had you ever seen Mrs. Gilmore before? Yes; I had seen her once before.

Where? At Granville, passing through in the train. She changed out of the Southern train, and got into the Parramatta portion.

Have you ever done duty at the Parramatta station? Yes, I did for a short while, but I never saw Mrs. Gilmore.

Can there be any doubt whatever about it being Mrs. Gilmore that night? No.

*Cross-examined by Mr. Montagu.*] What relation is Shunter North to you? My father-in-law.

Have you had any conversation with Lord about this? Yes, I certainly have.

You had a conversation with him between lunch time to-day? I have been speaking to him.

Between 1 and 2 o'clock? Yes.

After he gave evidence this morning? Yes.

Will you undertake to swear, although you only saw Mrs. Gilmore once before passing through Granville, that it was she at the station that night? Yes.

Who pointed Mrs. Gilmore out to you on the first occasion when she was passing through Granville? Mrs. Gilmore had changed, and I heard her name passed several times, but who by I do not know. I have been told it was Mrs. Gilmore.

I suppose a lot of people change at Granville? Yes.

Although you only saw her that once you want the Board to believe you are quite positive that it was Mrs. Gilmore? It was the same person that I saw.

What is your occupation? Porter. I had to attend to the trains and collect the tickets.

You had to get through in pretty quick time? Yes, when the train came in.

How long does the train wait to transfer passengers from Granville as a rule? Two minutes; then there is the Parramatta portion to get away afterwards.

How long afterwards do the Parramatta people get away? About three minutes. There is the engine to be hooked on.

Do you spend your time under those circumstances by keeping your eye on one passenger? Certainly not.

How do you fix the date as the 4th of September? There was a ball on that night.

What night of the week was it—it is only a month ago? I could not swear to the night. It was on or about the 4th.

What sort of a ball was it? I could not tell you the name of the ball.

Where was it held? In the Albert Hall.

You have not the slightest doubt it was the night on which the ball was held? No.

How long have you been at Granville? Over four years.

How far is the hall away from the station? About 150 yards.

Are there several dances held there during the week? No; not several.

Was there more than one that week? I do not remember.

Would you undertake to swear there was not more than one? I would not swear it.

Was the ball a social, an assembly—a monthly ball? It is a monthly ball.

You know it was a monthly ball, and yet you take no interest in it? I have been told it was a monthly ball.

Since when were you told? I knew before that this monthly ball was held.

What was the name of the ball? I do not remember the name. I never took any interest.

And you undertake to state, because there was a ball on that night, it was a monthly ball? Yes.

And you do not know how many balls are held during the month? No.

You made a statement to Mr. O'Reilly? Yes.

Voluntarily? Yes. Mr. O'Reilly never asked me for the statement. I gave it to Mr. Lord.

Mr. Lord asked you for the statement? No, he did not. I gave it to Mr. Lord as Mr. Lord was sending in his, and the two went together. Mr.

Mr. Lord must have told you he was making a statement? He did.

When did you send that statement in? About a fortnight ago.

And you went out of your way to make a statement voluntarily that it was Mrs. Gilmore who was guilty of this supposed offence at Granville Station? I never went out of my way to do it. If anything occurs we take notice of it.

Did you take a written note? No; just observed it.

Did anybody ask you to make that statement? Not that I remember. No one asked me to make a report.

It was only a fortnight ago? Yes, that is all.

You cannot remember whether you were asked at all? Mr. Lord told me he was making a statement, and I volunteered to make one.

Did it not strike you to ask him whether he was making a statement? I knew about it. I knew that such a thing was going on.

When Mr. Lord was making a statement you calmly sat down to write out yours;—you did not discuss the matter? I cannot say that, because we did talk it over.

*Dr. Goode.*] You talked over this occurrence on the platform with Shunter North and Mr. Lord? Yes.

Have you any doubt that the lady who asked for this 6d. or 3d. was Mrs. Gilmore? It was Mrs. Gilmore, I have no doubt.

*Mr. Montagu.*] You say you have no doubt, notwithstanding the fact that you only saw her once before when she was passing through Granville? Yes.

*Dr. Manning.*] You recognise Mrs. Gilmore to-day? Yes.

*Mr. Montagu.*] What platform were the two ladies on? The up-platform, just at the door-way. Can you tell us how long previously to the second occasion it was that you saw Mrs. Gilmore? I could not.

Was it months? Yes; quite three months.

On the first occasion was in the evening? Yes.

*Dr. Manning.*] At the time when the people said it was Mrs. Gilmore, was there anything special which made them refer to her? Mrs. Gilmore was under the influence of drink. She said she would report us owing to having to change.

That was why your attention was attracted to Mrs. Gilmore, and her name was mentioned? Yes.

*Mr. Montagu.*] What was she doing? She was complaining because she had to change out of the southern train to go to the Parramatta train.

Who was she complaining to? Anybody on the platform—just one and then another.

Was she excited? She was under the influence of drink.

Was she excited? I could not say.

Do you know, as a matter of fact, she was under the influence of drink? I could see it by her walk, and she threatened to report us to the Commissioners, and had no cause whatever for doing so.

Do you think she was under the influence of liquor or drunk;—you know Mr. Lord's idea of the difference? A person can be under the influence of liquor and not be drunk. A man when he is drunk is helpless. Mrs. Gilmore was not helpless, she could walk.

That was on the occasion when she said she would complain to the Commissioners? Yes.

She could walk on that occasion? Yes.

She found her way into the train;—she was not helped? No; she was not helped into the train.

She got into a 1st class compartment? Yes, she did.

She must have been very much under the influence of liquor then? There is no doubt about it.

*Dr. Goode.*] That occurred three months before the 4th September? It must have been at least three months.

[Witness withdrew.]

Constable James Torpy examined:—

*Dr. Manning.*] You are a constable? Yes.

You have made a report to your superior officer in regard to charges against Mrs. Gilmore? Yes.

You saw Mrs. Gilmore arriving by the nine or ten minutes after 12 o'clock train one night? Yes.

What date was that? It was some time in the middle of April. I could not say exactly what night it was.

What drew your attention to Mrs. Gilmore on that night? They all got out of the carriage. She was in a 1st class saloon carriage, and remained sitting there.

Were you on duty? Yes, sir.

Is it part of your duty to attend at the railway station? From 6 to 2 the man on duty meets all trains arriving and departing. The guard got into the carriage, and the lady came out.

Who was the guard? Morrison. He picked something up off the ground and handed it to the lady. She walked out and went towards the door without giving a ticket.

What was her condition? She was the worse for liquor.

What were the signs? She staggered a little as she got out of the carriage.

What was it the man picked up off the floor? Her purse he told me. I did not see it.

Why do you think she was the worse for liquor? From the way she came out of the door of the train. She went right towards the door, and walked sharply through it. The night officer said, "I know her, and will settle that in the morning."

Is that the only occasion on which you have seen Mrs. Gilmore arriving by the train? I have never noticed anything of her to attract my attention.

How often have you seen her arriving by the train before? Two or three times before.

How long were you on the beat? For that month. That is the only month during the last eighteen months.

*Cross-examined by Mr. Montagu.*] All you saw was that she got out of the carriage and walked straight through? She came towards me.

Was there anyone else there? The guard, Morrison, in charge of the train.

You did not see much of her on that occasion? No, sir, I did not.

There

There were others in the train? Five or six; they all got out and she remained there. That attracted my attention more than anything else.

Was there any other member of the Police Force there at the time? No; the shunter may have been there, but I could not say whether he was about at the time; there were only Morrison, the guard, the night officer, and myself.

Did you make your statement recently? Yes; I think it was about the 10th or 11th of October.

Was that the only time you noticed Mrs Gilmore? Yes; I have seen her going through here once or twice.

As a matter of fact, you merely assumed she was under the influence of liquor? She put me in mind of a person having had drink.

That might have been caused by other things;—you thought so simply from her bearing? Yes; simply from her manner.

It was pretty late at night? Half-past 11 from Sydney.

You know nothing about Mrs. Gilmore personally? No.

Do you ever come round this way? Very seldom, unless on special business or duty.

How long have you been in the force? Nearly four years—three years and a half in Parramatta.

[Witness withdrew.]

Edwin Gould examined:—

*Dr. Manning.*] You are in a cabinet factory here? Yes.

You made a statement to Mr. O'Reilly the other day;—will you repeat it now? I have passed the residence of the matron of this institution on several occasions. I have heard her use obscene language.

How did you know it came from the matron? I saw her on one particular occasion.

You saw her speaking as well as heard it? Yes.

Do you know her well? Yes.

You know her voice? Perfectly well; I worked in Mrs. Gilmore's house about six years ago.

Doing cabinet work? I had to attend to some drainage underneath the floor.

How often have you heard this bad language? I think at least three times.

Can you fix the date of any one of these occasions? I could not exactly; it is somewhere about twelve months ago.

Are all the occasions somewhere about twelve months ago? Yes.

Were they all close together? Yes; two were in the one week.

And the other occasion? I really forget the date. It is altogether about twelve months ago,—at the beginning of last November; because I went away to Goulburn, and it was previous to that.

Can you tell us any of that language? Yes; I heard Mrs. Gilmore say, "I will cut your bloody throat."

You do not know who it was addressed to? I could not say.

Was that the occasion on which you saw Mrs. Gilmore? Yes.

Where was that? Coming from the kitchen towards a little place she used for storing wood—a kind of out-house.

Have you ever seen Mrs. Gilmore the worse for drink? I cannot say I have. I mentioned in my note to Mr. O'Reilly I was not by myself.

Someone else was with you? Yes; his name is Leon Chessher. I went away to Goulburn on the 9th of November, and it was previous to that.

Does Chessher live in Parramatta? Yes; he lives 100 yards from here. He works for me, and lives with me.

*Cross-examined by Mr. Montagu.*] You have made a written statement, have you not? Yes.

When did you make that? Last Monday week. That was the night I made the statement to Mr. O'Reilly. He came to me on that date.

How did he know you could give information? I do not know how he knew.

How far away do you live from this place? 100 yards.

Are you a supporter of Mr. O'Reilly's? I am not a supporter. I am a poor politician.

You never attended any of his meetings? Yes; I attended both his and Mr. Taylor's.

Were you not on Mr. O'Reilly's committee? No.

Have you not been a good deal about with Mr. O'Reilly? No. The last time I met him was in the cricket field, about four years ago.

From that date until he called upon you you had never spoken to him? Oh, yes, I had.

You are an old friend of his? Yes; I am an old friend of his. I have known him ever since he has been in Parramatta.

That is a good number of years? Yes.

What did Mr. O'Reilly ask you when he came to you? He asked me if I had heard Mrs. Gilmore use any language, or if I knew anything about this scandal.

Was that after he made his first speech in Parliament? He came to ask me for the statement, and said he was going to bring it up in the House to-morrow night—on the Tuesday. He said he demanded the statement from me, as it was my duty to give it.

How did he know you knew anything about this matter? I suppose he thinks all the neighbours know. I pass this place half a dozen times a day, at all hours of the day. It is the main thoroughfare from my house to the town or the railway.

You think this language you heard occurred about November, twelve months ago? Yes; it must have—either at the end of October or the first week in November.

What impressed it on your memory, considering it happened twelve months ago? Because I have heard it on more than one occasion. I have heard disturbances at the matron's residence.

But what impressed it on your memory? It being used by a lady would perhaps impress it more on my memory, and being used by a person I had known for some time.

Has anybody called your recollection back to that time? No.

You never told anyone since that time that you had heard this language? I do not remember mentioning it to anyone.

Can you be positive about that? I do not think I ever did. I may have said something. I would not swear I have not done so.

You know that Mrs. Gilmore is a lady of quick temper? I believe so.

She speaks very rapidly? Yes.

And in very strong accents? Yes.

Who was she addressing this language to? I could not see. I did not see anyone about. It appeared that she was addressing someone in the wood-shed or small out-house.

Was she standing there? She was walking towards the shed.

And she called out to a person in the shed? Yes.

Where were you when you heard this? I was passing home. I was coming from Parramatta somewhere between 9 and 10 o'clock at night.

How can you tell me you saw Mrs. Gilmore? Because the fence is very low in front of Mrs. Gilmore's house, and we heard a disturbance before we reached the fence. There were some strong terms being used.

Were they used by one or two persons? There was a "barney" going on.

Of course there were two people? I should understand so.

She would not have been talking to herself? I should think not. Evidently someone was in the wood-shed.

How can you tell it was her? I saw the woman quite plainly. I know her voice well.

As a matter of fact, you did not see Mrs. Gilmore? I saw Mrs. Gilmore.

You saw a figure and assumed it was Mrs. Gilmore? I am quite certain it was; I saw the woman and knew the voice.

Was she turned towards the wood-shed? She was facing the wood-shed.

And you saw the wood-shed from the road? Yes; from the footpath.

Was the wood-shed lit up? No.

How could you see it at that time of night? It is only a matter of a few feet away.

It would have been dark at 9 or 10 o'clock? It might have been moonlight.

I suppose you would not recollect whether it was raining? It was fine; I am quite sure, or I would not have been walking about.

Do you know Mrs. Brown? Yes, I do; by sight.

Do you know her personally? No.

You know Mr. Mobbs? Yes.

Have you talked with Mr. Mobbs over this case? Never.

The first intimation you received of being requested to make a statement was when Mr. O'Reilly asked you on the Monday? Yes.

Did you decline to make the statement in the first instance? I told him I did not want to have anything to do with it. He said it was a matter of duty, and demanded the statement.

And he demanded from you to say whether you had heard her make use of bad language? He demanded from me anything I may have known in reference to this scandal.

You must have known all about this scandal, otherwise you would not have known to what he was referring? Of course I knew all about it; I read the papers.

You read the report of his speech in the House? Yes—the first speech.

Was what you read in the papers the groundwork of Mr. O'Reilly's speech in the House;—the papers did not go into this matter until after Mr. O'Reilly made his speech? I cannot say. It was something accusing Mr. Maxted about the Charitable Institutions. I do not think Mrs. Gilmore's name was mentioned in the House.

Did he not, in that speech, refer to this place here—the Cottage Homes? He did.

He intimated that this was the place? Yes.

After reading that speech you knew to what this scandal referred? Yes.

Have you been in Mrs. Gilmore's house? Yes; twice in the house.

Have you been about the premises? I have worked in the Cottage Homes.

I suppose you see Mrs. Gilmore about the premises at different parts of the day? Yes.

Can you conscientiously say you have seen her drunk on those occasions? I have already said I have never seen her drunk.

Or intoxicated? Not in the least.

[Witness withdrew.]

Mrs. Annie Johnson examined:—

*Mr. Montagu.*] You are a married woman, are you not? Yes.

Where do you reside? I am staying at the Hotel Metropole.

Do you know Mrs. Gilmore? Yes; I have known her for five years.

Has Mrs. Gilmore been in the habit of visiting you? She has been in the habit of visiting me as long as I have known her.

Has she visited you at night? She has, but during the afternoon as a rule. I have been several times to the theatre with Mrs. Gilmore, and on those instances she has returned late at night, by the 11 o'clock or half-past 11 train.

When she has left you after the theatre to go to the station, in what condition has she been? In the same condition as she is at present.

Has she been perfectly sober? Perfectly. She comes to see me nearly always when she visits the city. I am not always in Sydney. Sometimes I am in Melbourne. Mrs. Gilmore has also been to the theatre with her son. I am generally in Sydney eight months of the year. This time I have been in Sydney since last January, and have seen a great deal of Mrs. Gilmore.

On the occasions you have seen her, can you speak as to her conduct? I have never seen anything in Mrs. Gilmore's conduct that would lead me to believe she was not a most suitable person for the position she occupies.

Has she at any time given you any indication that she is addicted to drink? No; she has certainly not.

Has

Has she been temperate or otherwise? She has been temperate most decidedly. After the theatre I have seen Mrs. Gilmore into the tram to catch the train.

And up to the time of her departure for the train she has always been perfectly sober? Yes.

Do you remember whether, some time in May or June last, Mrs. Gilmore came to see you or whether she went to the theatre? I have my diary at home, and should be able to tell you my movements from that. If I went to the theatre with Mrs. Gilmore during that time I could tell you

If you did go to the theatre with Mrs. Gilmore in either of those months you could say if she were perfectly sober? Yes; I have never seen Mrs. Gilmore in anything but a strictly sober condition.

Did Mrs. Gilmore ever complain to you of any trouble she was suffering from of a personal nature? Yes; I have frequently heard her complain, and she suffered from a nervous complaint and from dyspepsia.

And has she told you she is often seriously inconvenienced by her complaints? She has very often when I have seen her in the city.

Have you been with her when she has been ill from the effects? Yes, I have. She has very often complained of ill health to me.

Can you tell me how it affects her? It seems to cause great excitement.

You have seen that yourself? Yes.

*Request by Mr. Montagu.*] As Mrs. Johnson can ascertain from her diary whether she went to the theatre, and mentions that Mrs. Gilmore always left her in a perfect state of sobriety, would a letter be accepted from her to that effect?

*Dr. Manning.*] We have no objection to receive the letter.

[Witness withdrew.]

Alfred Lake examined:—

*Dr. Manning.*] What is your office? Clerk at the Liverpool Asylums.

How long have you held that office? Since March last.

And previous to that? I was clerk at the Asylums in Parramatta, and doing the clerical work at the Cottage Homes as well.

*Mr. Montagu.*] I believe you have attended at the Cottage Homes very frequently? On an average twice a week.

Did you attend at any particular times? At all times from half-past 8 till 7 in the evening when convenient for me to get away from the other office.

On those occasions you had opportunities of seeing Mrs. Gilmore? I saw her very frequently.

Did she at any time appear to you under the influence of liquor? She never appeared so to me.

Had she been you would have noticed it? Certainly.

Did you ever hear her use any bad language? I never heard her use one word of bad language.

[Witness withdrew.]

Mrs. Jane Kilbut examined:—

*Dr. Manning.*] Have you known Mrs. Gilmore for some time? I have known Mrs. Gilmore for the last two years.

In what way have you known her? I have been to her place several times, doing needle-work off and on.

Have you ever seen her under the influence of drink? I have never seen her under the influence of drink in any way.

What time of the day did you go? In the forenoon and afternoon.

*Mr. Montagu.*] About how often on an average did you go to see Mrs. Gilmore? During the last twelve months I have done needle-work for her, and I have gone three or four times in the month.

You went in the mornings and afternoons? Sometimes in the morning, and sometimes in the afternoon.

Did you ever go in the evening? Yes.

Did you go after tea? Yes; I have been in two or three times after tea.

Did you ever hear Mrs. Gilmore use bad language? No, I have not.

Did you ever see any indication that she was under the influence of liquor? Not in the least.

You have not been employed in the house? No; I have not been living there.

Had you a daughter employed by Mrs. Gilmore? Yes.

How long was she with Mrs. Gilmore? I think about seven months.

[Witness withdrew.]

Alice Kilbut examined:—

*Dr. Manning.*] You have lived with Mrs. Gilmore? I was in Mrs. Gilmore's employ about seven months.

When did you enter on that employ? In the latter end of July, 1894, and I left at the latter end of February, 1895, I think it was.

*Mr. Montagu.*] How were you employed there? As nurse girl.

Would you be up when Mrs. Gilmore came home after being in town in the evenings? I saw Mrs. Gilmore frequently when she came home.

What was her condition? She was always the same as when she left.

You have been looking after the children? Yes.

Would that be late at night? No, early in the evening, when I saw Mrs. Gilmore. I used to go home after that.

*Dr. Manning.*] What time did you go home? About 6 o'clock.

You never saw Mrs. Gilmore after that? No, not after that.

*Mr. Montagu.*] When you saw Mrs. Gilmore come home, did she appear to be intoxicated? No, I never saw Mrs. Gilmore once under the influence of liquor.

If

If she had been, would you have noticed it, do you think? Yes; I would have noticed it. Do you think you could tell whether she was any different then to any other time? Yes. You have been near her, did you ever smell any drink? No, she never smelt of drink. Did you ever see her taking any drink? No, I never saw her taking any at any time.

*Dr. Manning.*] What age are you? Sixteen years.

Was there any drink kept in the house? I never saw any.

Neither beer, spirits, or wine? No.

Not the whole time you were there? No.

*Mr. Montagu.*] You are quite sure there was none kept in the house? Yes.

*Dr. Manning.*] Have you occasionally gone for beer? At lunch times.

You have gone for it? Yes; for a small bottle of stout or ale.

Where did you get it? At Holmes'.

At the hotel? Yes.

*Mr. Montagu.*] Would that be occasionally? Yes.

Would Mr. Gilmore be at home then? Yes.

You know that it was not kept in the house? There was never any kept in the house.

[Witness withdrew.]

Bredthafft Allez examined:—

*Dr. Manning.*] What is your occupation? Accountant.

Where do you reside? Cowper-street, Parramatta.

*Mr. Montagu.*] How long have you been living there? Twelve months.

Is where you live anywhere near the Cottage Homes? A few doors away, in the centre of Cowper-street.

And you have to pass by Mrs. Gilmore's? During the last twelve months I have passed three, four, and sometimes six times a day.

You are accountant for Murray Brothers carrying on business in Parramatta? Yes; in Church-street.

Have you seen anything of Mrs. Gilmore during that time? I cannot say I have ever seen Mrs. Gilmore until last Sunday evening.

You have passed by the house several times throughout the day? Yes.

Have you ever heard any quarrelling or bad language? Nothing of the kind, on the contrary, I have always noticed the nice way in which everything is kept and the orderliness of the place. I have never heard the slightest disturbance.

Everything seems to have been orderly? Especially the private residence.

Have you been by there at night? Yes; but never later than a quarter past 11.

And then have you ever heard any bad language used? No; nothing of the kind.

[Witness withdrew.]

Archdeacon William James Gunther examined:—

*Dr. Manning.*] You have been in Parramatta a great many years? Yes.

How long have you known Mrs. Gilmore? Since she took charge of the Cottage Home—five or six years at least.

*Mr. Montagu.*] Have you visited the Cottage Homes at all? I used to visit frequently at one time.

While Mrs. Gilmore was in charge? Yes; but not so much lately as my curate, Mr. M'Arthur, takes charge of this portion of my work.

How long has Mr. M'Arthur taken charge? Since about the 20th February of last year, conducting regular service. I have been only occasionally since that time.

Have you ever noticed Mrs. Gilmore under the influence of liquor? No; I have never noticed, nor have I heard of such a thing.

I suppose your visits would have been in the day-time, before evening? I do not think I have been in the evening at all.

Do you think if Mrs. Gilmore had been suffering from the effects of drink that you would have noticed it? I think I should, and I think I should have heard of it.

As far as you could see, she went about her work in a business-like way? Yes; and seemed attentive to her duties.

Had there been anything said in the district about her using bad language, you probably would have heard of it? Yes; and if I had noticed it, I certainly would have considered it my duty to take some action.

*Dr. Manning.*] Have you heard any complaint from the inmates? No.

You were not aware that there have been one or two inquiries upon this subject? No; the first I knew of it was from Mr. O'Reilly's statement.

[Witness withdrew.]

Alfred Henry Ferris examined:—

*Dr. Manning.*] You reside at Parramatta? Yes.

What is your occupation? Auctioneer.

*Mr. Montagu.*] I understand you overheard a conversation between a railway porter and a policeman at Parramatta? Yes.

When did it occur? Last Sunday morning week. I was waiting to meet some friends at the station.

Would you know the constable and porter again? I would know them by sight. I cannot tell you their names. The policeman has been here about three or four weeks to my knowledge.

Is he a tall policeman, with a red moustache? Yes.

What did you hear them say? They were talking about this case and the lady who has the management of this institution. The policeman was talking as if he had been fifty years in the place. I knew at the time he knew very little. The policeman was asking the porter's opinion of the case, which he gave.

*Dr.*

*Dr. Manning.*] Can you identify the porter? Yes; I could ascertain his name.

*Mr. Montagu.*] You have no doubt it was a porter? Not the slightest. This porter said he could say a good deal, and other Government officials there—I presume he meant other porters at the station—if they got orders from head-quarters, but without that they were keeping their mouths closed. The porter asked this new constable his opinion about the remarks in connection with the affair, and he said he had every reason to believe they were true.

I suppose this conversation did not take very long? No.

*Dr. Manning.*] This matter has been the subject of a great deal of talk within the last fortnight, I suppose? Yes; there has been a little talk amongst some people here.

*Mr. Montagu.*] You have never heard yourself anything wrong about Mrs. Gilmore? No; I never heard a disrespectful word against her.

You do not live this way? No; but I pass here six or seven times in the week. I knew an inmate here named Hill, and asked him one day what sort of quarters he had, and he spoke very highly of the institution, of the way in which it was conducted, and the treatment he received.

When you have passed have you heard any quarrelling or disturbance? No, never.

[Witness withdrew.]

George Vesey Allen examined:—

*Dr. Manning.*] What is your office? I am an inspector in the Charitable Institutions Branch of the Public Service under Mr. Maxted.

You held an inquiry some time ago into charges against Mrs. Gilmore? Yes.

How long ago was that? I have held four separate inquiries during the last two years. The first was in October, I think, of 1894, into some statements that had been made about the Matron Superintendent of the Cottage Homes having been under the influence of drink. I was instructed by the Director of Government Asylums to inquire into the truth of those statements. The second was in connection with an inmate not getting some clothes that he thought he ought to get; the third was in regard to rations not being of the proper quality; and the fourth was similar to the first, having reference to some remarks about intemperance.

What set you in motion on the first occasion? A report by Inspector Wing, of the Department, who had been instructed by the Director to inquire into remarks made of intemperance on the part of the matron, and he having failed to obtain any satisfactory evidence one way or the other, the matter was forwarded on to me by the Director to finish the inquiry.

What steps did you take? I came here and went through the cottages and saw all the old people in the whole of the cottages. I went to Mrs. Brown, who keeps a boarding-house at the back of the homes. Mrs. Brown was absent, and I saw her daughter. I had a conversation with her, and she told me she had heard some disturbance here between Mr. and Mrs. Gilmore on one or two occasions, but she could not and would not say that she had ever seen or heard of Mrs. Gilmore being drunk. I saw Mrs. Creasy.

Was anything said about bad language? I particularly inquired about bad language, but could ascertain nothing. I saw Mrs. Creasy, who keeps a boarding-house at the corner here, and she satisfied me that she had never seen any misconduct of any kind, and had neither seen or heard of Mrs. Gilmore being under the influence of drink. She had heard some dispute between Mrs. Gilmore and her husband. I also saw Mr. Watsford, the station-master at the Parramatta station, and he could not give me any evidence that would lead me to believe there was any truth in the charges made. I saw Constable Dimond, who is now in Wollongong, and was on night duty at the time here. He had seen Mrs. Gilmore on two or three occasions coming home, but never under the influence of drink, he assured me. I saw Night-officer Lord between 8 and half-past 8 the same night that I came up. I asked him, knowing he had made some statement to Mr. Wing, how they were getting on at the cottages, and he said, "Oh, they are noisy enough." I wanted to know what he meant by that. He said, "You can hear her talking all over the place," meaning Mrs. Gilmore. I asked him if he had ever seen her under the influence of drink. He said, "No; I could not say that." I was satisfied from him, too, that the trouble was bad temper, arising, probably, from domestic difficulties. After making the most searching investigation, I could not get any evidence to substantiate the charges.

That was in October, 1894? Yes; either the end of September or the beginning of October.

And this same charge was the subject of a fourth inquiry? Yes; the fourth inquiry was in consequence of statements made by Mr. O'Reilly, the Member for Parramatta.

On what date was this fourth inquiry held? Quite recently—last month, I think.

Was that before Mr. O'Reilly's speech in the House? It was when he made the statements in the House. I was sent up to see whether there was any truth in the statements that he made. I went round the neighbourhood, but I did not go to Mrs. Brown. Lord was removed from here. I saw Sergeant McGarvey. I went through the cottages, and saw Mrs. Creasy. I had a talk with the station-master, who is on duty in the day-time here, and I came to the conclusion it was the old statement renewed, and therefore I did not go further into it. I reported, saying that I had nothing further to add to the report I had already made. I could not find any evidence of her having been under the influence of drink.

On either of these occasions did you examine a blind man, one of the inmates of the homes? Yes; a quarrelsome old man. I examined all the inmates, and some of them had grievances about their clothing, and their socks being moth-eaten, and little complaints of that kind, but not one of them could say anything as regards intemperance. I had specific instructions from the Director to run the thing down.

This blind man appears to have made charges on one occasion? He made no charges to me, except some grievances about rations.

He appears to have made charges about over-indulgence in stimulants? He did not mention them to me, and I asked everybody in the place.

[Witness withdrew.]

THURSDAY,

THURSDAY, 24 OCTOBER, 1895.

Present: FREDERIC NORTON MANNING, Esq., M.D. (Chairman); WILLIAM HENRY GOODE, Esq., M.D.

Joseph Hart examined:—

*Dr. Manning.*] What is your occupation? Commercial traveller.

Do you reside in Parramatta? Yes.

You made some statements a few days ago to Mr. O'Reilly; will you repeat what you said to him? One night coming from town I heard Mrs. Gilmore making use of obscene language.

Can you fix the date? No; I could not, within a month; I should think it was four or five months ago.

That would bring it to May? Yes; about that, as far as I am able to remember.

About what time of the evening was it? It was close on a quarter to eleven o'clock.

And where was it? In Mrs. Gilmore's house. I was coming down past the Cottage Homes from Parramatta, past Mrs. Creasy's.

How do you know it was Mrs. Gilmore who used the language? I go by the voice; I could not see her. I knew Mrs. Gilmore by sight. I have heard her speak. I have no reason to doubt it was her, but I would not swear positively that it was.

You judge by her voice? Yes.

You have heard her speak? Yes, repeatedly.

What was the nature of this language? It was obscene and blasphemous.

What were the words? "Bloody brains"; "bloody wretch"; I cannot think of anything else. I stopped a few minutes.

You stopped a few minutes near the house and listened to this? Yes.

Do you know whom the language was addressed to? I think it was Mr. Gilmore; I heard a man's voice.

Replying to this? I could not hear what he said; I only heard a mumble. What he said I could not understand.

Did it appear to be a family quarrel? Yes.

Was that the only occasion on which you have heard anything of the kind? That is the only time I have stopped to listen to anything like that. I have heard a noise as though there was a disturbance inside at other times late at night,—as if there were a quarrel.

On those occasions you cannot tell us what words were used? No; I could not.

Your business takes you backward and forward by these cottages frequently? Yes.

Every night? I pass every day in the morning and back at night.

Late at night? No.

How many times have you heard quarrels from this house? That one particular night, and two or three other times.

Only on that one occasion you can testify to any bad language? Yes.

Have you ever seen Mrs. Gilmore intoxicated? No.

Have you seen her very frequently? I have seen her at the place two or three times a week.

Have you seen her in the evening? I cannot say I have. It is very rarely I pass until about 6 o'clock. I should certainly say she had had no intoxicating liquor in the morning when I have seen her.

*Cross-examined by Mr. Montagu.*] Are you living this way? Near Harris Park, at the top of Cowper-street.

How long have you lived there? Eight years.

Are you quite sure it was Mrs. Gilmore who made use of that language? I say it was Mrs. Gilmore by the voice.

Might it possibly have been someone else? It might possibly have been someone else in her house.

Suppose you were told it was a man who made use of that language? I would not believe it.

What opportunities have you had of hearing Mrs. Gilmore speak? I have heard her repeatedly in her own place when passing.

Would she be calling out in the garden? She was giving orders to the men.

Have you been passing many times when she was in the garden during the last eight years? I have seen her there a good many times in the garden and cottage.

When did you make this statement to Mr. O'Reilly? Last Sunday night week.

That was on the 13th October? Yes.

Was that the first time you made any statement of the kind? That was the first time I made any statement to Mr. O'Reilly.

Did you make a statement before that? Seeing the reports in the paper, two or three spoke to me about it.

Who? I think it was Brooks, a butcher at Finlayson's.

Was that before the report appeared in the paper? It was when the correspondence of Mr. O'Reilly appeared in the Parramatta papers.

You never mentioned it to anyone before the correspondence appeared? Not that I am aware of.

Did Mr. O'Reilly come to you? Yes.

Did you ask him how he knew you could make a statement? No; I did not.

Were you prepared for Mr. O'Reilly's visits? No; I thought when he came to me it was on other business that I had written him a letter about.

On private matters? Yes.

Did you offer to make this statement? I did not. He said the matter was a delicate subject that he had come to see me about, and he brought up Mr. Maxted's name and Mrs. Gilmore's name. He said, "You made a statement about Mrs. Gilmore to someone." I said, "I did." He said, "Are you prepared to swear that?" I said, "Yes, I would, and what I said I would not retract."

Mr. O'Reilly referred to a statement you had made to someone else? I made a statement to two or three, not disparaging Mrs. Gilmore or anyone else.

The statement you made to your friends was that on passing her house you heard some language? Yes. I said, from what I could see, Mr. O'Reilly was right in certain things. I had heard it myself going home at night.

I suppose you are used to hearing strong language? I certainly am.  
 Being accustomed to hearing strong language, it is quite possible you may not be quite correct in the words? I could not swear to the words. As near as I can recollect, it was something like that.  
 If you were on your oath you would not like to swear they were the exact words? I would not.

[Witness withdrew.]

[At 10:40 a.m. the Board adjourned to a room at the School of Arts, Parramatta.]

Dr. William Bradley Violette examined:—

*Dr. Manning.*] You are the Government Medical Officer for Parramatta? Yes.  
 And among other duties you visit the Cottage Homes? Yes.  
 How long have you held the position of Government Medical Visitor to the Cottage Homes? Since their establishment, with the exception of a short time when Dr. Brown acted.  
 How long have you known Mrs. Gilmore? About six or seven years.  
 You are in the habit of visiting these homes frequently? Yes.  
 How often? Three times a week regularly.  
 About what time generally are your visits made? The usual time is a little after 9 to half-past 9 in the morning.  
 Do you visit at night? Only in the case of emergency.  
 You have had considerable opportunity of seeing Mrs. Gilmore? I have.  
 Have you ever seen her at any time under the influence of drink? Never.  
 Have you ever heard her using bad language of any kind? I have not heard her using bad language but she has spoken to me of language that has been used to her.  
 By whom? In a sort of quarrel, I understand it was.  
 Between whom? I think it was with her husband.  
 Bad language used to her by her husband in a quarrel? Yes.  
 Did Mrs. Gilmore complain to you of this? You would hardly take it as a complaint. She was in a very excited state, and I asked her how she could account for her state, and she explained to me a quarrel, and then mentioned the language used to her.  
 And said it was by her husband? Yes.  
 Was that the only time she complained to you of her domestic difficulties? She may have on two or three other occasions, but they were slight.  
 Have you ever, in her demeanour or conversation, seen anything to lead you to think she was addicted to drink in any way? Never on any occasion.  
 Have you had any fault to find with the management of the place? Never. She has always given me every assistance in her power, and been kind to the inmates, done all she could to make them comfortable. She has looked after them regularly, and seen that things were done in a regular manner, and that cleanliness was enforced. I have never found her on any occasion under the influence of drink, or given to taking drink.  
 In your opinion, when you have seen her, she has always been fit to conduct the duties of her position? Certainly.  
 Have any charges been made to you by inmates having reference to Mrs. Gilmore being intoxicated? Never on any occasion.  
 When Mrs. Gilmore complained of this bad language, you introduced the subject first of all? Yes; from her appearance she seemed worried and distressed, and very excited. I asked her what was the matter, what had excited her, and she informed me of what I have said.  
 How long ago is this? Nine months, I should think.  
 And the other occasions on which there was some slight difficulties? They were previous to that.  
 You have heard of nothing of these difficulties within the last nine months? No; it may be more than nine months ago.  
*Mr. Montagu.*] Has Mrs. Gilmore ever told you she suffered considerably from hysteria? Yes.  
 Which would probably arise from several causes? Yes.  
 Would vomiting arise from hysteria? In certain conditions.  
 It is quite possible? Yes; hysteria might only be a symptom of the particular complaint.  
 Would it be possible for Mrs. Gilmore to be suffering from hysteria combined with dyspepsia? Yes, frequently.  
 Or biliousness? Well, hardly biliousness.  
 Has she told you she has suffered from those complaints? I have treated her for a complaint in which hysteria and dyspepsia were symptoms.  
 And I understand vomiting might arise from hysteria under those conditions? Yes.  
 This has been going on for some time? At times it is worse than at others.  
 Supposing, for the sake of example, Mrs. Gilmore had taken some stimulant, not feeling well, and she subsequently vomited, would the smell of liquor show under those circumstances? If it were in the vomit it would.  
 It would not necessarily follow that because the smell of liquor was noticed in the vomit, that therefore she was drunk? Not necessarily.  
 It might be mistaken by people who did not understand anything about it? Yes.  
 Were you attending Mrs. Gilmore about two years ago? Yes.  
 I think she was in advanced child? I did not attend her in that case.  
 Is it within the last two years you have been attending on Mrs. Gilmore? Yes.  
 If there anything you can tell me that would throw any light on this supposed over indulgence in stimulants? Mrs. Gilmore's manner might by a stranger be misunderstood. She is very excitable. Her language is not the most refined sometimes you may say. This would cause perhaps a stranger, when she was in a period of excitement, to fancy she had taken something. I have watched her most curiously to find out, and was satisfied it was her manner and expression in these states of excitement.  
 Which struck you as being peculiar, and made it necessary to watch her closely? Yes.  
 And having done so, you are quite satisfied it was not the result of over indulgence? Yes; it was not due to drink. When

When Mrs. Gilmore is like that, does she suffer very acutely? Yes.  
 And is probably prostrated to a certain extent? Yes.  
 These fits of hysteria come on suddenly without warning? Yes.  
 Some people have said they have seen her get out of a railway carriage and lean against a post;—  
 might not that be the result of a sudden illness? It might have followed a sudden illness.  
 To a certain extent it would prevent her having full control over herself? Very temporarily.  
 She would recover shortly afterwards? Yes.  
 When you say that in an excited state she would express herself in a peculiar way, I take it you  
 do not mean she used bad language? No; not bad language—coarse language. Not indecent or  
 blasphemous.  
*Dr. Manning.*] Can you tell me what expressions she used? Speaking of her husband she called  
 him a "lousy cur."  
*Mr. Montagu.*] That might arise from a custom in her own particular part of the country?  
 Quite so.

[Witness withdrew.]

Dr. Walter Sigismund Brown examined:—

*Dr. Manning.*] You are a medical practitioner, residing in Parramatta? Yes.  
*Mr. Montagu.*] Some time ago you were attending the Cottage Homes, were you not? Yes; from  
 February, 1890, to May, 1893.  
 Did you attend pretty often? Three times a week—Tuesdays, Thursdays, and Saturdays.  
 In the day-time? Yes.  
 In the morning, as a rule? In the mornings and afternoons.  
 Did you ever call there in the evenings? Yes; to see the old people.  
 Or to Mrs. Gilmore's cottage? Yes; I have been to the cottage.  
 At night? Yes; I have had calls there at night.  
 At any of these times did you ever notice Mrs. Gilmore under the influence of drink? Not once.  
 Did she appear to be going about her work in a rational way? Yes, as far as I could see.  
 Conducting the homes in a proper and efficient manner? Yes.  
 When you have gone there in the mornings, if Mrs. Gilmore had been drinking overnight, I  
 suppose you would have noticed some change? Yes; I should think so.  
 You have always found her to be the same? I have found her sometimes a little hysterical.  
 Did you attend her professionally? Yes; I have attended her personally within the last two  
 years or eighteen months, though I was not Medical Officer then.  
 Can you tell me for what you attended her? I attended her for dislocation of the shoulder joint  
 I have put it right at least three times. It is rather inclined to come out easily.  
 Did you ever notice hysteria within the last eighteen months? I have.  
 Did she complain to you of suffering from dyspepsia? Yes; I have treated her for that during  
 the last eighteen months.  
 Might the hysteria from which she was suffering bring on vomiting? Hysterical vomiting—yes.  
 Vomiting might arise from hysteria and other causes not connected with drink at all? Yes.  
 Supposing Mrs. Gilmore had taken a glass of spirits if she felt ill, that would be likely to be  
 administered to her? Yes; a little brandy and water would not do her any harm.  
 Assuming that were done would not the vomit under such circumstances smell of liquor? Yes.  
 And anyone noticing the smell might naturally mistake that for over indulgence on liquor? Yes.  
 It would not follow that such was the case? No; she might have had a little brandy and it  
 would be detected in the vomit.  
 I suppose if a person vomited the breath would be affected? Yes.  
 All of which might lead people to believe she was under the influence of drink, if they did not  
 know to the contrary? Yes.  
 When she suffers from hysteria, does it come on suddenly? If she were provoked it would bring  
 it on.  
 It might prostrate her for the time being pretty considerably? Yes.  
 Does she suffer from vertigo? I am not quite certain.  
 When an attack comes on, would it cause her to be unsteady on her feet? Yes; it would make  
 her gait peculiar.  
 It might even cause her to lean against a post or other support? Yes.  
 Who attended Mrs. Gilmore about two years ago during her confinement, you or your father? My  
 father, and he is too feeble to be here.  
 Your father is a medical practitioner at Parramatta? Yes; for the last forty years.  
 [*Mr. Montagu handed in letter (marked "A") from Dr. Walter Brown.*]  
*Dr. Manning.*] Are you quite certain the dyspepsia from which Mrs. Gilmore was suffering was  
 not due to drink? I am certain of that. I have never seen her the worse for drink.  
 You are aware that drink very often causes dyspepsia? Yes.  
 Are you able to make certain that the dyspepsia was not owing to drink? Yes; at the time I  
 prescribed for her I am confident it was not from drink.  
 How was her shoulder joint dislocated? From what I made out, she had been ill-used by her  
 husband. I put it in three times. The first and second times she had been pushed by her husband, and  
 the shoulder went out.  
 Did he provoke her again the last time? Yes, as far as I can say during my attendance, the whole  
 thing is due to her husband.  
 Your attendance has been due to the ill-treatment of Mrs. Gilmore by her husband? That is my  
 opinion during my three years treatment she has been ill-used by him. I advised her some two years ago  
 to get a separation from him. He is a beast, I think.  
 Did Mrs. Gilmore complain to you at the time of ill-treatment? On several occasions she has. I  
 may say the last time he came to me to see his wife, he was as drunk as he could be. He came to me at  
 3 o'clock in the morning to ask me to attend her for this dislocation.

Did

Did the squabble in which this dislocation occurred take place during the night? Yes, the last time. The time before it was about 1 o'clock in the middle of the day.

Was Mrs. Gilmore quite sober the last time? Yes, I am quite convinced she was.

The husband was not sober? He was the worse for drink. He came down to my house and nearly fell over the door-step.

Have you ever heard Mrs. Gilmore use bad language of any kind? When she has been excited her language has not been altogether what it might have been. I have heard her use epithets which she might not have used.

You have heard her speak so to her husband? Yes; she has called him a brute, a wretch, a blackguard.

The language she has used has not been blasphemous or obscene? No; not that I have heard.

But it has been coarse? Yes; I excused her then on account of her being so nervous and highly strung.

When hysterical she is likely to go beyond herself on those occasions? Yes; she has not the best of temper.

Sydney Maxted examined:—

*Dr. Manning.*] You are the Director of Charitable Institutions? Yes.

You are the official head of the Cottage Homes? Yes.

How long have you known Mrs. Gilmore? Over seven years. I knew her first as caretaker of the Government Asylums Office in Sydney, where I had opportunities of seeing her every day for some months up to as late as 11 at night, when I first took charge of the Government Asylums, and was compelled to be late at the office in order to complete the work.

And afterwards? Since then I have seen her at the Cottage Homes, and at the Sydney office on an average of once a fortnight at irregular times.

How long has Mrs. Gilmore been in charge of the Cottage Homes? Over six years.

Was she married at that time? She was in the Department when I came, as caretaker. She was then a widow, and afterwards married one of the officers of the Department, but whether she married before she came to the Cottage Homes or not, I cannot say from memory. It was about that time.

Her husband is not now employed in the Department? Not now.

When did he cease to be employed? About three years ago. He effected an exchange into another Department.

Was that due to Departmental reasons? Yes; I was not satisfied with the way he was doing his work, and his domestic relations began to be rather unhappy. He and Mrs. Gilmore used to come to the office to see me and occasionally strong words used to take place, and I thought it was a very undesirable connection to continue. As officials I had no occasion to find fault with either of them, but I suggested he should effect an exchange, and he did.

Some time ago you held an inquiry into Mrs. Gilmore's conduct, the charge being that she had over-indulged in stimulants. Can you tell us the circumstances which led you to hold that inquiry? Yes; there was an inmate of the Cottage Homes, named King, and his wife. Mrs. Gilmore reported them for being continually drunk, and for being dishonest, and I held an inquiry into that, and had to expel them. I found they had been stealing Government properties. That man made a charge in the first instance.

Can you tell us exactly what the charge was at that time? He told me as I was talking with him, "She has charged me with being drunk, and she gets drunk herself." The charge seemed to me to be very preposterous, from my knowledge of her.

Did he say when she got drunk? He could not fix any period, and knowing what these inmates are I really did not attach much importance to it. I questioned Dr. Violette, and he would not listen to it. He said it was out of the question. The charge, as far as Mrs. Gilmore was concerned, broke down, because there was absolutely no foundation for it.

Can you give us the date? I did not put it on record, for the reason that I did not believe there was any truth in the charge. I went right through the homes.

Can you tell us approximately how long it was ago? About three years.

Under what circumstances did the question of Mrs. Gilmore's sobriety or otherwise subsequently arise? Mrs. Gilmore reported another couple at the Cottage Homes. Her report was endorsed by Dr. Violette. She reported them for being continually dirty and for keeping the homes in a state of disorganization, and for endangering the homes by their reckless use of lights and fire. I knew the couple very well and arranged to have them transferred after consultation with Dr. Violette. The old man made this charge. He used to be very friendly with the other old couple I have spoken about, and he made the charge in the same way. He said, "Mrs. Gilmore ought to look after herself and take less to drink." I said, "What do you mean by that," and he said he only heard it as a rumour.

What steps were taken on that occasion? I made the same inquiries myself. I did not attach any importance to the charge.

Can you give us the date of that inquiry? It is quite two years ago.

On that occasion you were able to satisfy yourself there was no truth in the report? No truth whatever.

The same charge appears to have arisen on a subsequent occasion; can you tell us what led to it then? A man who was in the habit of driving there, spoke to me at the station, and said he had heard from another cabman that this cabman had seen Mrs. Gilmore under the influence of drink, and that some of the neighbours knew of it. I sent Mr. Wing, one of the most trusted officers of the Department, to make a thorough inquiry, and he reported that he could find no evidence of it. I was not quite satisfied with his report, and appointed Mr. Allen, who is most particularly qualified to make inquiries of this kind. I think he made three inquiries. I told him the persons to whom he was to go and to make the fullest inquiry. He made me a very unqualified report, and said he had been unable to find any proof whatever. I suggested that he should go to the neighbours, the police, and the railway officials, and he informed me he had done so.

During the time that Mrs. Gilmore has been an officer of your Department, have you had any reason to think that she over-indulged in stimulants? No, I have not.

There was nothing in the conduct of her Department to lead you to think so? Not the least. I have had occasion to find fault with matters of management, but not such matters as would lead me to think she drank. I never had the slightest suspicion of it. I know she is occasionally hysterical. I have seen her under the influence of temper, and in such a condition that persons who did not know her might think she had been taking drink. I came to Parramatta on Sunday last, and told her the line this inquiry was going to take, and she became very excited. I made this remark to her then: "Anybody who did not know you, and seeing you now, would think you had been drinking"; and in a minute afterwards she was as calm as now.

There has not been lately any falling off in her activity or her management of the institution? Not more than I have had occasion to find fault with for the last year.

I find in *Hansard* a statement that the case of this lady was under consideration, and that a charge against her had been made, and the Director of Charities had called upon her for an explanation. That does not refer to drunkenness at all? Not at all. I have had occasion to expostulate with her for carelessness in receiving rations,—rations which, in my opinion, were not up to the proper standard, and for irritability to the inmates. Her excuse was that the inmates were very provoking. I knew they were, but she was supposed to put up with that kind of thing; and also what I considered to be a disobedience to instructions on one or two occasions. I directed that she should personally receive the rations. She did not do so; she told someone off to do that. At the time that was being done I saw her, and she appeared to be quite as capable of receiving rations as at present. I think that would be all the complaints.

Those were the principal things? Yes. I found it necessary two or three months ago to direct that all the officers in the institution should sign an attendance book, as I found that some were leaving at unauthorised hours. Two or three objected, so I got the Chief Secretary's authority to have it done. Mrs. Gilmore did not sign the book from, in my opinion, simply disinclination to do so. I thought possibly it might have been overlooked.

Was this attendance book drawn up so as to show the absence from the institution of the officers? Yes; and to show when the officer left and when he came back.

Has this book not been kept by Mrs. Gilmore at all? No. Her instructions to keep the book would not have reached her earlier than two months ago. The book had no special relation to Mrs. Gilmore, it was made a general thing.

You have spoken of her irritability to the inmates;—do you put that down to her temperament? Yes, undoubtedly.

Has it been increasing of late? No; I do not think it has increased. I venture to think that if the inmates were called, nine-tenths of them would say she was kind to them.

She is irritable? Yes; the inmates ask unreasonable things, and instead of exercising tact she rubs roughly against them.

Have you heard Mrs. Gilmore make use of any bad language? I have never heard Mrs. Gilmore make use of an improper expression.

Have you ever heard her use any coarse language? No; I have not heard her use any language unbecoming a lady.

Have you been aware of the domestic difficulties that the doctors here have testified to between Mrs. Gilmore and her husband? Yes; for some time. I suggested an arrangement about a year ago, which I thought should be carried out, that Mr. Gilmore should live away from the homes. It was an ill-sorted marriage. I think he went away for a little while, but came back, and I thought things were going on better. Her institution always appeared to me to be in excellent order. It is only people who are conversant of matters of detail who would have noticed the little defects I have spoken of.

On the whole Mrs. Gilmore has conducted the duties of her office in a satisfactory manner? With the exceptions that I have spoken of.

Have you heard of Mrs. Gilmore's shoulder being dislocated on several occasions? No; I do not think I have. I do not recollect it.

*Mr. Montagu.*] You have taken every step to inquire fully into these charges of habitual drunkenness and the use of bad language? Certainly I have done that. I have taken every step that I have just detailed.

With the result that you have told us of? Yes.

You know the charges made in the house? Perfectly.

Are you of opinion that there is no reasonable justification for them whatever? For the charges of drunkenness and foul language, in my opinion, there is no justification whatever. The medical men have had more frequent opportunities of seeing her than I have. I do not mean to say it is impossible for any official to take drink in the middle of the night without my knowing it. I can only judge from her appearance, and the surroundings of the institution.

Has she ever complained to you of being in ill-health? Yes, frequently; in fact I have discussed the matter with the Chief Secretary on several occasions recently.

As to her health? Yes; and as to those matters I have just spoken about, to consider what was best to be done in the matter.

Are there any regulations in regard to Mrs. Gilmore's leave of absence? No; I have told Mrs. Gilmore to be away as seldom as possible in the daytime from the homes during the hours when the necessities of the institution require to be attended to, particularly as there are no other officers there.

Do you think it likely that there is any truth in what has been said about her being in town at night on an average of two or three times a week? I do not think it possible. I have had no opportunity of knowing that. I know she is generally at the homes in the daytime.

I suppose the homes might be inspected at any time without any warning being given to her? She never got warning. None of the officials do.

If she were constantly away at night she would not know but what an inspector might visit the homes? She might not, possibly.

Therefore, it would not be to her advantage to be constantly away at night two or three times a week? No; it certainly would not.

Can you give any suggestion as to the cause of these charges being made? I have no doubt of that, but I do not know whether the Board would consider that it came within the lines of the inquiry. I could prove it if the inquiry took a wider range.

*Dr. Manning.*] We are not inquiring into the causes of these charges; we are only going into the facts of the case.

*Mr. Montagu.*] The charges having been made, and requiring to be supported, might account for certain evidence that has been already given.

*Dr. Manning.*] What Mr. Maxted could tell us on that point would be matter of surmise.

*Witness.*] I am prepared to produce witnesses in the matter.

Have you any regulations as to Mrs. Gilmore leaving home in the evenings? No; she can go if she chooses, so long as she keeps the homes in order.

There are no special duties during the evening? Not at all. The work is done probably after the last rations are in at about 5 o'clock.

*Mr. Montagu.*] She is at liberty to leave after that? Yes; every evening if she likes. I should not interfere with her doing so.

*Dr. Manning.*] You have said that you have had several discussions with the Chief Secretary on this matter. I gather then that the whole condition of things has not been quite satisfactory to you? It has not been quite satisfactory for the last five or six months, and it has troubled me a good deal, but there is nothing I can lay hold of sufficiently tangible to say she should be dismissed. Such a penalty as that would be too severe, in my opinion. In June last Mrs. Gilmore wrote a very strong letter to me, promising that these matters would be attended to in the future.

The facts you had to complain of were minor breaches of discipline, the condition of Mrs. Gilmore's health and her conjugal relations? Her conjugal relations were, in my opinion, making her health worse, and completely destroying her temper. In my position I have had frequently to deal with drunkards in all shapes and forms, and I do not think I should have much difficulty in detecting an habitual drunkard.

*Mr. Montagu.*] In regard to the carelessness in receiving rations, I think you said she promised to be more careful in the future? As far as I could tell she was more careful.

These were lapses of carelessness more than anything else, which might have occurred with any official? Such laxity, in my opinion, should not be permitted, as it might lead to very serious results.

That would not arise from intemperance? Not at all.

It was simply carelessness on her part? I do not think drink had anything to do with it.

[Witness withdrew.]

Dr. James Kearney examined:—

*Dr. Manning.*] You are a medical practitioner in Parramatta? Yes.

For how long? Five years.

*Mr. Montagu.*] How long have you known Mrs. Gilmore? Between two or three years.

You have attended her professionally during that period? Yes; chiefly her children; sometimes herself.

Have you been often at the Cottage Homes? Yes; pretty often. Sometimes early in the morning, and sometimes late at night.

During those visits late at night have you ever noticed any sign that Mrs. Gilmore had been indulging in drink? No; never.

From your personal observation can you say whether she is a person likely to be addicted to indulgence in drink? I had no reason at any time to suspect that Mrs. Gilmore drank. She is a thoroughly neurotic subject; very hysterical at times? When her children were ill she was very anxious about them—too anxious, in fact, no matter how trifling the illness. I always found her most attentive, stopping up at night to look after her children when there was no occasion. I have found her very excited at times.

It has been said that Mrs. Gilmore vomited in the train;—could that not arise from the hysteria from which she was suffering? Yes. She was suffering from dyspeptic troubles in conjunction with hysteria.

In such a way that it might bring on vomiting? Yes.

It might not necessarily, under the circumstances, have been caused through drink? Not at all.

Supposing Mrs. Gilmore had taken some stimulant, feeling ill, and had vomited afterwards, I take it the smell of what liquor she may have taken would have been noticed, and her breath would have been affected? Yes, of course.

Would the hysteria she was attacked with affect her condition of temper materially? Undoubtedly. Some people, who would not know better, might very likely mistake an hysterical attack for drink.

People without experience? Yes; non-professional men, who had not seen a deal of hysteria, might undoubtedly be liable to err in that respect.

Suppose she had staggered at night-time? She might have been quite dazed.

Or leant against a post? She might lose complete control over herself.

When she suffers like that I suppose it is pretty severe while it lasts? It is afterwards she feels the effects of it.

Do you happen to know if she suffered from the effects of the birth of her last child? I cannot say. She has not told you? I do not remember.

You have treated her for dyspepsia;—have you treated her for biliousness? We put that down under the same head.

And this would bring on hysteria? We have frequently dyspepsia and hysteria conjointly. A little excitement is very likely to bring on hysteria. A trip to Sydney might bring on a fit of hysteria.

Have you ever heard, when you have attended at the Cottage Homes, Mrs. Gilmore, when excited, make use of obscene or profane or foul language? Not at any time. I have never heard Mrs. Gilmore make use of any vulgar expression whatever.

During the time you have known her, have you heard any well-founded reports against her want of sobriety? I make it a rule only to be guided by what I see myself.

When you have been there at night-time, she has been perfectly right? At no time have I seen Mrs. Gilmore in any condition that would lead you to suspect she had been drinking.

*Dr. Manning.*] How often have you been at the homes after 10 o'clock at night? As a rule, my visiting times are between 11 and 1 in the morning, from 3 to 6, and occasionally between 8 and half past 9.

You

You have never been after 10 at night? I may have been there once after 10, but not often.

*Dr. Goode.*] When Mrs. Gilmore suffered from these attacks did you advise her not to partake of stimulants of any sort? Yes.

*Mr. Montagu.*] Did you tell her she might take claret and water? I may have; I am not quite sure.

When you told her to avoid stimulants, you did not wish it to be inferred that she had been taking stimulants? Not at all. It was owing to her condition that she suffered from hysteria, and I recommended her not to take stimulants of any kind. I make it a rule in all cases of hysteria to recommend patients not to take stimulants.

[Witness withdrew.]

Rev. James M'Arthur examined:—

*Dr. Manning.*] You are a Church of England clergyman, residing at Parramatta? Yes.

And have the Cottage Homes within your parish or district? Yes.

Have you visited them frequently? Yes; it is my duty to visit them officially once a fortnight, but I am in the habit of going at least once a week.

How long have you been visiting them? One year and ten months.

Do you see the Matron on those occasions? Not always, but frequently.

You see the inmates? I visit the inmates.

Have complaints been made to you by the inmates at any time? No; I do not think I have heard any formal complaints.

As regards their treatment? No; I am certain I never heard any definite complaint.

Have any statements been made to you by the inmates with regard to the sobriety of the Matron? No.

Have you seen anything at any time to lead you to suppose that Mrs. Gilmore was not sober? Certainly not; never at any time.

Have you ever visited the institution in the evening? Yes, at all times.

What was the latest time? I cannot say exactly, but late at night—in the case of a person dying, for example. Perhaps about 10 o'clock at night.

Those have been rare occasions? Yes; I have not gone very often so late.

Did the charges made in the House ever reach your ears before? I have some difficulty in answering that question. You hear so many reports in Parramatta. It is such a gossiping place. I never attach any importance to what I hear.

I gather that some remarks of the kind have reached you? They may have; I cannot say yes or no. I attach no importance to what I hear in Parramatta in the shape of gossip.

Has anything come under your observation to lead you to suspect that any remarks you have heard had any foundation? Nothing in the shape of intemperance. In an institution like the Cottage Homes there will always be some grumblers—some dissatisfied persons—and, therefore, I attach no importance to what I hear. I have heard nothing definite, not more than is customary in the case of such an institution.

*Mr. Montagu.*] Having seen Mrs. Gilmore pretty frequently, have you always found her attentive and regular in her duties? I have always found her at her post.

You have never noticed any sign of her having been either at the time, or previously, under the influence of drink? Certainly not, at any time. Either directly or indirectly, I have not seen the slightest sign of it.

Have you ever heard her using obscene or foul language? No, I never heard of it until I read it in the papers. I have never received anything but politeness and civility when I have seen her, and I have never seen her anything but what was ladylike.

The complaints you heard were just the ordinary grumbling of the old people? Yes; and when you put the question that way, I do not mean to answer in a way to lead you to think I have heard anything definite at all—it has been mere indefinite grumbling.

*Dr. Manning.*] The remarks I spoke of with regard to intemperance I meant to apply to people outside, not the inmates? I never heard a word about intemperance until I saw it announced in the papers, either within the precincts of the Cottage Homes, or beyond.

I understand you have heard no remarks about Mrs. Gilmore being an intemperate person before these charges were made in the House? No; to the best of my recollection, I never heard a word, and most certainly amongst any indefinite whispers I may have heard, I never heard a whisper on the subject of intemperance.

[Witness withdrew.]

Dr. George Henry Phillips examined:—

*Dr. Manning.*] You are a medical practitioner at Parramatta? Yes.

How long have you been in practice here? Thirteen years.

*Mr. Montagu.*] I believe you used to visit the Cottage Homes prior to Dr. Violette? No; I visit for Dr. Violette when he is absent on leave.

Has that been on many occasions? A good many.

When was your last visit? On the 9th of August this year.

And for some considerable period prior to that? For some years when Dr. Violette has been on leave I have done his work.

From your personal observation, can you say whether you have ever noticed Mrs. Gilmore either under the influence of drink or apparently having been under the influence of drink? I have never seen any sign of it whatever when I have paid my visits. She has always been perfectly sober, and I have noticed no signs whatever of drink.

I suppose you would have gone in the morning? At different times in the day.

If she had been drunk over night I suppose you would have noticed something in her demeanour? Yes. I have never seen any signs of drink or of her suffering from drink when I paid the visits to the Cottage Homes.

Did

Did you ever attend Mrs. Gilmore professionally? I prescribed for her once when paying a visit. I think her child was one month or five weeks old. She was complaining of feeling weak, and I prescribed a tonic for her.

Did she tell you she was suffering from dyspepsia? No; simply debility after her confinement.

And the place, as far as you have seen, was always properly conducted? I never heard any complaint from the inmates.

I suppose you never heard any complaint from the inmates with regard to intemperance? They never made any complaint to me.

Did you ever hear any substantial reports in Parramatta concerning Mrs. Gilmore? I never take any notice of any report I hear in Parramatta.

There was nothing tangible of any kind? I never heard any charge; nothing that I should take notice of.

Nothing as regards habitual drunkenness? I never heard of it.

[Witness withdrew.]

Hugh Taylor examined:—

*Dr. Manning.*] You are the late Member of Parliament for Parramatta? Yes.

How long have you resided in Parramatta? Seventy-four years.

*Mr. Montagu.*] You know Mrs. Gilmore? Yes.

How many years have you known her? Between six and seven—since she came to Parramatta.

Have you been often to the Cottage Homes? Scores of times—morning, noon, and night. I take a great interest in the Cottage Homes, and was partly instrumental in their initiation.

I think you have been Mayor of Parramatta? Yes.

And you are still an alderman? Yes.

Have you had occasion to go to the homes officially as an alderman? Yes; about the drainage.

Where does that drainage run from? From the building outside.

From Mrs. Brown's premises? It did at one time; close to the fence.

Did you see Mrs. Gilmore every time you went there? Very nearly.

Did she appear to be conducting herself in a proper manner? Undoubtedly so.

Did she ever give you an idea she had been under the influence of drink, or suffering from the influence of drink? Not the slightest.

Can you safely say, from your personal observation, that Mrs. Gilmore was a person, in your opinion, not likely to be addicted to drink? Yes, I am certain. I heard the inmates complain of something about washing the floors, and they wanted boots, and when I made inquiries Mrs. Gilmore seemed very excited that they should make these charges, but on investigation I found it was the usual thing in all these institutions.

Did you ever hear her using foul or obscene language? No; decidedly not.

You said just now Mrs. Gilmore was excited? Yes; she is very excitable. When she is in the right, and these old people make complaints, she gets excitable, but in five minutes afterwards it is all over.

Her excitement goes down as quickly as it rises? Yes.

Have you seen Mrs. Gilmore returning from Sydney? Yes, when I have been returning from Parliament in the half-past 10 or 11 o'clock trains; but there has not been the slightest sign of drink upon her.

Where did you generally see her sitting? In a first-class carriage.

That would be in the carriage that comes straight through to Parramatta? There is the 11:30 train, where you get out at Granville and stand on the platform, and the carriage goes on to Parramatta after being shunted.

You need not necessarily change out of the carriage? Not now. There are Parramatta carriages in the Campbelltown train.

And you can go straight through from Sydney? Yes.

That has been so for some time past? Yes.

When you have come home on several occasions and seen Mrs. Gilmore in the carriage, has she been comporting herself all right? Yes. Sometimes she had her little son with her.

Never, at any time, did she give you the idea she was suffering from drink? No, never. My wife and daughter used to remark how well Mrs. Gilmore was conducting the places, and the old people used to say how well they were getting on.

*Dr. Manning.*] How often a week used you to see Mrs. Gilmore coming up in the train? Perhaps once a fortnight or three weeks. I did not always come in the same train. In the 10:30 or 11 o'clock train I have usually seen Mrs. Gilmore.

How long have you ceased being a Member of Parliament? Eighteen months.

Have you travelled much since that date? No.

You have not seen Mrs. Gilmore during the last eighteen months? No; only at my house. She used to come down on Government business.

On business? Yes.

At what time? Sometimes at 9 and sometimes at 10 o'clock.

You have not travelled home with her by train during the last eighteen months? No, I believe conscientiously there is no institution of the sort better conducted, except for her excitability and temper when the old people complained to her.

[Witness withdrew.]

Katherine Hutchinson examined:—

*Dr. Manning.*] What are you? A monthly nurse.

Residing in Parramatta? Yes.

*Mr. Montagu.*] You attended Mrs. Gilmore, did you not, in February, 1894? Yes; I went towards the end of February, and left on or about the 23rd March. Had

Had you been to the homes before that? I was there twice to see her before her confinement.  
Have you been there since February, 1894? Yes; I think three times altogether. I am positive in saying three times. I cannot give the exact dates.

Did you ever notice any signs of Mrs. Gilmore taking drink? No; none whatever. There was none kept in the house during the whole time I was there.

Did you ever hear Mrs. Gilmore using bad language? No.

[Witness withdrew.]

Thomas Kelly examined:—

*Dr. Manning.*] What are you? A butcher, carrying on business in Parramatta.

*Mr. Montagu.*] How long have you been residing in Parramatta? About ten or eleven years.

Do you frequently go to Sydney? Yes; until this last couple of months very frequently, coming home by the late train.

Do you know Mrs. Gilmore personally? Only by sight.

You know her to be the Matron of these homes? Yes.

You are not a personal friend of hers? No; I have never spoken to her.

On the occasions you have noticed her was she under the influence of drink? None of her actions ever showed that or pointed to anything in the shape of drink—far from that.

Have you ever noticed her ill in the train? No, never; in any shape or form.

When leaving town about 11.30? I think that was it; and earlier some nights.

During the last two years? Inside the last eleven months.

On all of those occasions she always appeared to be the same as on an ordinary occasion? Yes. There are not many people who get out of the late train—sometimes only one, two, or three, and you would notice particularly.

You have seen her get out at Parramatta? Yes; and change at Granville.

There is one carriage that comes right through from Sydney? Yes; on all the trains. They drop these carriages and the engine comes back and picks them up.

It is quite possible to get in at Sydney and come right up? Yes, as a rule the guard at the station walks along and asks whether you are for Parramatta, and tells you to get into the special carriages.

The probability is that a lady would get into one of the special carriages and remain there the whole time? Yes; if she were acquainted with the train.

That arrangement has existed for some time past? Yes; as long as I can remember in the half-past 11 from Sydney.

Can you tell us anything more about Mrs. Gilmore? No; nothing more.

Have you heard any substantial rumours before this affair was brought up in Parliament? None whatever. I never heard anybody say a bad word against Mrs. Gilmore. I never heard anything wrong against her.

[Witness withdrew.]

Joseph Wing examined:—

*Dr. Manning.*] What is your official position? Assistant Superintendent of the George-street Asylum.

Some time ago you were instructed to hold an inquiry with regard to Mrs. Gilmore's conduct? Yes.

Had you received any information before Mr. Maxted spoke to you as to her habits? No, sir.

Was that inquiry set in motion entirely by Mr. Maxted? Yes—in October, 1894.

You had heard no remarks as to her intemperate habits before that? No; I do not think so; not before that date.

Mr. Maxted asked you to make inquiries because of information he himself had received? Yes.

What was the result of your inquiry? I made inquiries. I heard of these reports from several neighbours, who told me of the quarrels at night between Mrs. Gilmore and her husband.

Or quarrels proceeding from that house? Of course they could not say who, except by the voice. They did not see who it was. They believed it was Mrs. Gilmore.

Was there anything said about bad language on this occasion? Yes; they said the language was bad sometimes.

Did they say it was obscene or blasphemous? No, only bad language, and I inferred they meant bad language for a woman to be using.

Did you report this to Mr. Maxted? I reported that the neighbours were not prepared to come forward to substantiate their statements as to drunkenness. They wished their names kept out of it, and were not prepared to substantiate the statements.

What did you report to Mr. Maxted about bad language? I am not sure that I reported that at all.

As regards drunkenness, you reported to him that you could not get any evidence to substantiate the statements—that the neighbours were not prepared to come forward? They were not prepared to have their names mixed up in the matter.

Did you make inquiries on any other occasion? In January, 1895, I made some more inquiries.

At whose instigation? The papers were handed back to me to make further inquiries, and I did not have an opportunity between October and January to make further inquiries.

The papers in this matter that had been dealt with in October, 1894, were handed back to you to make further inquiries in January? Yes; they were handed to me in the end of December.

With what result? That everything had been quiet. There had been no trouble, and that everything was going on satisfactorily, with the exception of one little quarrel which they themselves had reported at the head office—some private matter. Everything in connection with the homes had been going on satisfactorily.

The

The quarrels had been less frequent? Yes; so far as I could learn. There had been no further quarrels. A slight disturbance had taken place a week before I made the second inquiry, and they had reported the matter.

*Dr. Goode.*] Who were they? Mr. and Mrs. Gilmore.

*Dr. Manning.*] You are not certain that you reported what had been told you in regard to bad language that was heard from this house, to the head of your Department? No.

Either on the first or second occasion? No; I could not substantiate the statements. I held that I had not sufficient to go on to substantiate the matter, consequently it was no use making charges.

Did you not mention in your report anything about the matter? I mentioned that there had been quarrels.

You did not mention anything about language? I do not think I did.

You have come up occasionally with Mrs. Gilmore at night in the same train from Sydney? I have seen her at night.

How often? Not very often—at the outside two or three times.

Within what period? I have lived in Parramatta since May, 1894.

How often have you come back from town with Mrs. Gilmore? Not more than two or three times at night.

What condition has she been in? As far as I could judge she was the same as any other lady. I noticed nothing peculiar. I travelled in the same carriage. I have not spoken to her.

Have your duties led you to have communication with Mrs. Gilmore at other times within the last eighteen months? Yes; when I have inspected the Cottage Homes and been through there.

You have then found Mrs. Gilmore sober? Yes.

There has been no sign whatever of intoxication? Not the slightest.

That has been in the daytime? Yes.

The only occasions that you have seen Mrs. Gilmore at night is when you have come home in the train? Yes.

You have some official connection with the Cottage Homes? I used to be one of the inspectors.

At the present time have the two institutions no official relation? No, sir, none whatever.

Who does the clerical work and storekeeping? McGarvey, of Macquarie-street. Mr. Lake used to do it before McGarvey relieved him.

You said you reported the quarrelling? Yes.

You did not report the bad language? I do not think I did.

*Dr. Goode.*] Did you report that there were rumours of quarrelling, or that the quarrelling actually took place? That the neighbours stated that quarrelling took place, but they were not prepared to come forward and substantiate their statements. They did not wish their names mixed up in the matter.

*Mr. Montagu.*] Did you tell them you were there for the purpose of making an inquiry? I told them I had been sent up by Mr. Maxted to make an inquiry. I asked them to give me a written statement, and they would not do so.

Can you tell me the names of any person to whom you went? I went to Brown's, at the boarding-house.

Did Mrs. Brown make any statement to you? She called her daughter, and the daughter made a statement.

Mrs. Brown did not herself? No.

Is the daughter a young girl? A girl about 18 or 20 years of age.

She made some general statement? Yes; a general statement; she would not particularise anything.

And after that they said they would not come forward to substantiate their statements? They said they did not want their names mixed up in it.

It was principally the inmates of Brown's that you examined? Yes; they are quite close neighbours.

Did you go to Creasy's? No.

As to the allegations made with regard to Mrs. Gilmore being under the influence of drink—did anyone give you any particular dates as to when they saw her in that condition? Lord, the station-master, might have mentioned something. He said he had seen Mrs. Gilmore. He was the only one who made definite charges.

I suppose you took a lot of trouble to make inquiries? Yes; I did what I considered my duty in the matter.

Lord was the only one who made any definite statement? Yes; Lord was the principal one; so far as I could learn, if any quarrels took place in the house, the inmates were not sufferers by it. They were late at night, after the business of the day was over.

They were not so bad as to disturb the inmates? No; there were no complaints from the inmates.

Did you ask the inmates if they had heard any bad language? I asked the inmates. There was one man, I forget his name, who said that there were quarrels. He did not say anything about bad language.

You could not elicit from any of the inmates that bad language was used by Mrs. Gilmore? No; had I done so I should have reported it.

It was because you were unable to get anything substantial that you did not report upon it? I was not in a position to prove it. I have been connected with the Department for nine years, and I have never reported anything that I have had to take back.

In this case there were no reasonable grounds for your reporting? I reported the facts as far as I could—that there were quarrels; that the neighbours reported it.

That was the particular matter you investigated? I satisfied myself on that point, and I reported the matter.

That was the only matter on which you could get anything definite? That did not take place in the daytime.

*Dr. Manning.*] What did Lord tell you on the occasion you were making inquiries? He told me he had seen Mrs. Gilmore; he had to assist her out of the carriage, and assist to take her home.

Did you report that? I do not think I did. It was only his statement for it. I did not report that.

Did he mention that he had seen her intoxicated at other times? That he believed she was.

He did say he had seen her intoxicated on other occasions? Yes.

And

And you did not report this at all to Mr. Maxted? I did not report it, because he did not give me a written statement. He would not. He said he was willing to go before a Commission and state it. He would not give me a written statement.

When was this? About October, 1894. I have had nothing whatever to do with the Cottage Homes since January, 1895.

*Dr. Goode.*] When he objected to give you a written statement, he did not want what he said kept secret? No; he said he was prepared to go before any Commission.

*Mr. Montagu.*] Did he give you any substantial date when he assisted her home? No; he did not. He told me he had to do it. I think he said it was last month, that would be September, 1895.

He could not give you anything more definite? No.

Did you have a long conversation with him? No; not very long.

Where did you see him? At the station.

What were his duties at the time? Night station-master.

Did you make other inquiries at the time? No.

[Witness withdrew.]

Alfred William Green examined:—

*Dr. Manning.*] You are the Secretary to the Charitable Institutions? Yes.

*Mr. Montagu.*] You have known Mrs. Gilmore for some time? Ever since she has been in charge of the Cottage Homes.

In your official capacity you have made frequent visits there? Yes.

I suppose about once a week on an average? I have not seen Mrs. Gilmore more than three times a month.

Have you given notice when you were going? No.

Your visits have been paid without any warning? Yes.

Had you any difficulty in finding Mrs. Gilmore at her post? No.

Have the Cottage Homes been thoroughly well looked after by Mrs. Gilmore? The cottages are always in good order.

Have you ever noticed any sign of Mrs. Gilmore having been under the influence of drink, or recovering from the effects of drink? Never.

Did it ever strike you that Mrs. Gilmore was addicted to intemperance? Never. I have always thought Mrs. Gilmore was sober in every possible way.

She has been in charge about six years? Yes.

Was there any particular times when you made your visits? No; either in the mornings or evenings, when I could get away.

What would be your object in going there? To inspect the cottages.

Did you in the course of your inspection interview the inmates? Yes.

Did any of them complain to you that Mr. Gilmore had been addicted to drink? Never; except a man named Pilcher, who was sent out of the cottages some time ago. An inquiry was held, and his statements were proved to be incorrect. That is some years ago.

Pilcher is the father-in-law of Rutter? I do not know.

Was any complaint made about Mrs. Gilmore having used foul language? No; nor have I heard her using foul language.

You know her temperament? She is irritable to a degree.

When you say irritable to a degree, you do not mean she is in a constant state of irritation? No; she has frequently complained to me about her health. I have spoken to her about being irritable, and I have always put it down to ill-health. I know she has suffered a good deal. I have spoken to one or two of the doctors about it on several occasions.

Has there been any charge of ill-treatment or neglect by Mrs. Gilmore of the inmates? No; there have been minor complaints by these people about not having their little wants attended to at the right time, but after investigation I found they had nothing really to complain of. A person would complain about not getting clothes when I found clothes were not in the store. But really nothing of any consequence.

Is there anything you can tell us about Mrs. Gilmore herself in regard to these charges? What are the charges?

They are that she is habitually intoxicated, and in the habit of using foul language? As far as my experience goes, I have never found Mrs. Gilmore either to be addicted to drink or to the use of foul language.

When these charges were made in Parliament, was it a matter of surprise to you? I heard of the drink before, because we had an inquiry held, but we could get no evidence. We had two inspectors who made inquiries, neither of them could sheet the charge home. All we could do in regard to getting evidence was done, but we failed to get any evidence.

The charge must have arisen from some gossip without foundation? It had no foundation as far as we could find out.

*Dr. Manning.*] Did you have an opportunity of seeing Mr. Wing's report? Yes; I did.

As far as your memory goes, did he mention in that report that he had heard of quarrels and bad language in the house, and also that the night officer had stated that Mrs. Gilmore had been intoxicated? As far as I can remember he mentioned something about the night officer at Parramatta having stated that Mrs. Gilmore was under the influence of drink; but I do not remember anything about foul language.

In his evidence to us to-day he stated he did not mention what Lord had said? I do not remember whether it was in the report, or whether he spoke to me about the matter. The matter of this night officer saying Mrs. Gilmore was addicted to drink came to my knowledge from Mr. Wing, and as Mr. Wing could not find out anything about it, I put another officer on, Mr. Allen, to find out, but he could not sheet it home. I considered Mr. Wing's report unsatisfactory, there was nothing definite about it, and the other officer proved to my mind there was nothing in the statement.

No steps were taken by the Department, as far as you are aware, to make inquiries from the head of the police? I believe Mr. Allen interviewed the police, but we did not get a report from the police. We did not ask Mr. Fosbery to make any inquiries. You

You have been aware of the domestic troubles? Yes; I have spoken to Mrs. Gilmore about them myself, and advised her that it would be well for her husband to leave the house.

*Mr. Montagu.*] You are not sure whether Mr. Wing mentioned in his report about this conversation with Lord, or whether it came to you verbally? I think it was verbal. He could not make any report upon it, because he had not sufficient evidence. He told me he could not prove the charge. The night officer was the only man who had anything to say about it. I think I said I would take it out of his hands and get someone else to do it.

*Dr. Manning.*] Would it not have been a proper thing for him in making a confidential report of that kind to put down everything that came to his knowledge? I think it would. I was not satisfied with Mr. Wing's report when it was received. I said I would put another officer on or do it myself. I found fault with him for not sifting the thing to the bottom, and put on Mr. Allen to do the work.

*Mr. Montagu.*] I think Mr. Allen has reported that he saw Constable Dimond? He saw one policeman I know.

[Witness withdrew.]

John Robert Sanders examined:—

*Dr. Manning.*] What is your occupation? Compositor.

At the Government Printing Office? Yes; temporarily employed there.

Where do you reside? Cowper-street, Harris Park.

Do you know Mrs. Gilmore? Yes; since she has been Matron Superintendent of the Cottage Homes. I cannot say I know her except as the matron by passing by the place.

In going to and from home? Yes. When I have been out of work I might have passed her place eight to ten times a day.

*Mr. Montagu.*] How far do you live away from Mrs. Gilmore's? About 40 or 50 yards.

Have you been living there for long? For the last thirteen years.

You have seen Mrs. Gilmore pretty often? On an average, I might say five or six times a week.

Would that be in the morning or evening? At all times of the day.

Did you ever notice any disturbance going on at the cottage? Yes.

Did you ever notice Mrs. Gilmore in any but a strictly sober condition? No; I have never seen Mrs. Gilmore in any state of inebriation. I have only seen her in a fit and proper state, as a woman ought to be. I have never seen the slightest effects of drink upon her.

I suppose you would not come home late at night? In my business, I at times catch the half-past 10, and sometimes the 11 train.

Did you ever see Mrs. Gilmore in either of those trains? On two occasions I recollect seeing her. I cannot say whether it was the half-past 10 or 11. I recollect two occasions. I fancy it was more than that.

On those occasions, what condition did you notice Mrs. Gilmore to be in? As sober as anyone could possibly be. She passed me as I got to the top of the street, about 60 yards from the station. She bid me good night, and hurried down and went into her home. I was wondering at first who it was, it being rather dark, but when I saw the gate open I took it to be Mrs. Gilmore.

Did you see her get out of the train? No; I saw her go out of the station.

There was no difficulty about her getting home? Not on the occasions that I have seen her.

I suppose you have not been into the cottage at night-time? I have been into several of the cottages. I enjoy having a yarn with the old couples.

Have they ever made any complaint to you? No; I have never heard a word uttered by any of them regarding Mrs. Gilmore.

Can you give me any idea how long ago it is when you saw her on those two particular occasions? I fancy it was last November or December, as near as possible.

Towards the end of last year? Yes.

You were then in employment? I was in the employ of the Government at the time.

Are you in the employ of the Government now? Yes, temporarily.

You are pretty well acquainted with the different people living in the cottages? One or two.

Do you remember a man named Mau? I do.

He was an inmate? Yes.

Can you tell me anything about him? One evening I had occasion to send a parcel to the railway by my two little ones. As they were going back he happened to be outside on the footpath, and the children were running. When they got near he struck my little one right across the side of the cheek. The mark was long there. When I heard of it I saw Mrs. Gilmore. She instantly asked me to take the child to Dr. Violette. He examined her and said she would feel the force of the blow for some days. Mrs. Gilmore advised me to report it to Mr. Maxted, which I did. I got a reply from the office asking me to prosecute the man, but some four or five days having passed before I got the reply, I let the matter go. Mrs. Gilmore ordered the man inside, and said, "You beast, get inside." That was the only expression of the kind I ever heard Mrs. Gilmore use.

*Dr. Manning.*] Was that a blind man? No; he is not blind. I do not believe he is totally blind.

*Mr. Montagu.*] He is not totally blind? No; he gets about the town. I should not think he was totally blind.

He is an old man? He is over 60.

How do you know it was Mau who struck your child? I took my child's word. My wife was half-way up the street. The children were brought up to Mrs. Gilmore. Mrs. Gilmore had seen my wife before I saw her.

Your children told you it was Mau? They pointed him out to me.

Did you ascertain that his name was Mau? I heard it afterwards.

How old was the child that was struck? Between 6 and 7.

Did he ever give any reason why he struck the child? She had a little go-cart, and was making a noise going down the street. It might have irritated the man, but he had no right to strike the child.

[Witness withdrew.]

Charles Mau examined :—

*Dr. Manning.*] Are you quite blind? Nearly; I can see you, but there is like a heavy fog between me and you.

How long have you been an inmate of the Cottage Homes? Seven years on the 12th of April next.

You are living there with your wife? Yes.

Did you a considerable time ago make some charge against the matron of not being sober? No, sir! I never did. I never made any charge against the matron for that.

What charge was it? If I made a charge it was for not being civil—having no manners—not treating people with respect, but never for drunkenness.

Or indulgence in stimulants? No; I never.

You never made any charge of that kind? No; because I never had a chance of seeing her.

Have you ever heard of any charge of that kind made against her? Well, I have heard so many things outside, but most of the information I get from the papers.

You read the papers a good deal? Yes.

Do you remember any inquiry being made of you by Mr. Maxted or anybody else on this subject? I remember Mr. Allen, the Inspector, came a good while ago with regard to a quarrel between Mr. Gilmore and his wife, and asked me whether I knew anything about it, or whether I had heard anything about it. I gave Mr. Allen my answer then.

What did you tell him? I told him I did not hear any quarrel. I was not surprised that it had been, because I knew of a quarrel. I did not know any quarrel on that occasion that he wanted to know.

Is there any other blind person in the homes? No, sir.

*Mr. Montagu.*] Did you ever threaten Mrs. Gilmore at any time? No.

Did you ever take up an axe? No; I have not got an axe in my place.

Did you ever go up to Mrs. Gilmore's house? I did not.

You are not the best-tempered man in the world? I am the best-tempered man in the world.

You are very irritable? No; unless people annoy me or insult me. I am a respectable man, and as such I mean to be treated.

You do get annoyed if people worry you? They have themselves to blame.

They have to take the consequences if they do irritate you? I have not killed anybody yet.

Leon Chesshur examined :—

*Dr. Manning.*] What is your occupation? Polisher.

At a furniture warehouse? Yes.

You are employed with Mr. Gould? Yes.

You have been past the Cottage Homes on several occasions at night? Yes.

Have you ever heard any disturbance there? Yes.

In what part of the Cottage Homes was it? At the top, just below Mrs. Creasy's—at the matron's house.

What was it you heard? One night when passing with Mr. Gould I heard one thing, "I will cut your b——y throat."

Whose voice was it you heard? It was Mrs. Gilmore's.

How do you know? Only by her voice. I know her voice. I had heard it before.

How long have you known Mrs. Gilmore? I do not know her at all except by sight. I have been in Parramatta eighteen months now.

What opportunities have you had of hearing Mrs. Gilmore speak before? I have heard her speaking to Dr. Violette.

It has been merely while you were passing that you heard her;—she has never spoken to you? No.

You believe it was Mrs. Gilmore on the occasion you heard those words? I could not swear it.

But you believe it? Yes.

What time of the night was it? I came from the club-room between 9 and 10, as near as I remember.

Did you only hear such words on one occasion, or more than once? Afterwards I have heard it. I was riding down on a bicycle with Mr. Gould, but I could not see what it was.

You heard an altercation in the house on that occasion? Not in the house; it was outside.

Was the first time outside? Yes; outside.

Whereabouts? There is a little wood-shed there; it was towards that.

Did you hear anybody else talking besides;—was there more than one voice? I did not hear anybody else. I only heard those words.

On the second occasion were there two voices or one? I could not say if there were two.

Were the voices loud on the second occasion? No; I could not say that they were loud.

They were sufficient for you in the street to hear them? Sufficient for me to hear riding past.

*Mr. Montagu.*] Was it before or after the occasion on which you heard that language that you rode past on the bicycle? After.

How long after? I could not say.

Was it this year or last? It was this year.

There is no doubt about that? No doubt.

I suppose these two occurrences were within a week or two? About that.

Was it before or after Easter? I could not say. I did not take that notice. I did not think I would be called here.

What age are you? Nineteen.

What is this club that you belong to? It is a bicycle club.

You are living with Gould, are you not? Yes.

You are quite sure the affair occurred this year? I could not swear it was this year or the end of last year.

You said you were certain it was this year? I could not swear it.

It might have been two years ago? No; I have not been in Parramatta two years.

It might have been six months ago? It might have.

Have

Have you had any conversation with Mr. Gould about this? Yes; when he came home last night and gave me the letter he said, "The only thing for you to do is to tell the truth, and not to say more than what you can really say with truth."

Did you ever have a conversation with anybody about this expression of Mrs. Gilmore's? I might have spoken to Mr. Gould.

You have told Mr. Gould? Mr. Gould was with me. I have spoken of it to Mrs. Gould. We both told Mrs. Gould when we came home.

You, of course, spoke about it last night when you got the letter? Yes.

I suppose you refreshed your memory about the time you heard the bad language? We had a talk about it.

You had a talk with Mr. Gould to compare notes, so that you would not give any wrong evidence? Yes. There was another time I saw Mrs. Gilmore. Someone, I would not say whether it was Lord, the night officer at Granville now (then at Parramatta), was bringing her home. She was the worse for liquor. She did not want to go home; she wanted to go back again. She swore, and said, "Let me go back; I am not going home."

*Dr. Manning.*] Can you say when that was? No; I cannot.

You saw Lord taking her home? I think it was Lord.

What time was it? I could not say for certain; perhaps between 10 and 11 o'clock.

Why do you think it was Lord? Because I have met Lord at Granville. He has whiskers, and as much as I could notice I think it was Lord.

Cannot you fix how long ago it is when this occurred? No; I cannot. I walked from the top of the hill. They were up by Mrs. Creasy's then. I walked behind them.

Watching them? Yes.

*Dr. Goode.*] From the railway station? No; from Mrs. Creasy's.

*Dr. Manning.*] Where did he take her to? He took her to Mrs. Gilmore's gate.

In what way was he holding her? I could not see which way he was holding her.

Was he supporting her? Yes.

With one hand or both? I think he had an arm round her, and one catching her other hand as near as I can say.

Did you hear what was said? I forget what was said. I think it was—but I would not swear it—Shall I spit it out?

Yes; what was said? "F—k you, let me go back; I am not going home yet."

*Mr. Montagu.*] You said just now that this language was mentioned to Mrs. Gould when you got home;—did you or Mr. Gould mention it? I could not say. I think we both chipped in.

You saw a person whom you took to be Mrs. Gilmore near the wood-shed;—where were you standing? I was standing just near the picket fence on the footpath. We came down, looking over the picket fence.

You and Gould? Yes.

How long were you looking over this fence? I could not say how long. We did not stay long. There was a lady coming down (Mrs. Ardwick), and Mr. Gould is not good friends with her. He said, "Here's Mrs. Ardwick coming down; let us go on," and we went on.

Do you know Lord pretty well? No, I do not.

How long have you been living at Gould's? About eighteen months.

That is the time you came to Parramatta? I came straight from school to Parramatta.

Have you seen Mr. O'Reilly about this? No.

Mr. Gould has? Mr. Gould told me Mr. O'Reilly had seen him.

When did he tell you that? Last night.

Was that the first time he told you Mr. O'Reilly had seen him? I think he told me previously to that, and Mr. O'Reilly told him to write in some statements.

When did he tell you that? I could not say—about a week ago.

Had Gould been with you to the club when you heard this language? Yes.

Does he belong to the club? Yes.

You had been there all the evening? From about half-past 7.

This was between 10 and 11? It was between 9 and 10.

You cannot give us an idea how long ago it was? No; I cannot. I did not take that notice.

Is Gould employed at the cottage now? No.

Has he ever done work there? Yes; he has; from what he told me.

You have never done any work there? No.

How many times have you really seen Mrs. Gilmore? I could not say.

Have you seen her a dozen times in your life? I could not say. I have been up and down the street this last eighteen months.

Have you seen her every day, week, or month? I cannot say.

Did you have to climb up the fence? No; we looked over.

You cannot see the wood-house from the fence? Yes; you can.

Was it a dark night? I could not say.

You want us to understand that you cannot tell us whether it was a dark night, and yet you could distinctly see Mrs. Gilmore? I did not say I could see Mrs. Gilmore. I said I heard her voice, and I thought it was Mrs. Gilmore from what I had heard before.

Where did you say you heard the voice coming from? From the wood-shed.

That is some way away from the house? It is not far away—it is only just at the side.

Might it not have come from the cottage? No; it did not.

There was no answer to the remarks? The figure was outside.

You saw the figure? I did not see a figure.

You did not see a figure—what do you mean? I saw something. I could not say it was Mrs. Gilmore. I asked you whether you could see a figure? You asked me whether I could see her figure—I thought you meant her waist, or something like that.

Did you see any person there? I did see a person.

Was that person making use of that expression apparently to someone? I cannot say.

She might have been addressing the moon for all you know? She might have.

No one answered her? I did not hear.

How many minutes were you standing there? I could not say—we were not standing long.

You just put your head over the fence and you heard this expression? We heard it from the high fence first. We walked down to the picket fence and saw a figure.

Are there two fences? Yes; a high fence and a low one.

You were not looking over the fence when you heard this expression used? No; I came down to the fence, and had a look over.

When the expression was used you were not looking over the fence at all? No; I was coming down the pathway.

And when you got to the fence you looked over? Yes.

Did you hear any more language after you looked over? No.

You have made no written statement about this to anyone? No; no written statement.

Are you employed by Gould? Yes.

Regularly? Yes; as soon as I left school, eighteen months ago.

On a salary? Yes.

Is his place a workshop or warehouse? It is a workshop.

In the town? At the back of his house.

Are there any others employed besides yourself? Yes.

There are young men? No; there are no young men.

Women? No; elderly men.

You said that on this occasion that Lord was taking Mrs. Gilmore home, she was under the influence of liquor, did you not? Yes.

It was late at night? Between 10 and 11.

How did you fix the times—you saw something one night between 9 and 10, and another night between 10 and 11? I always made it a practice to get home between half-past 9 and 10. This night I was later.

You cannot tell us when it was? No.

How far were you away? I was quite close, as close as what I am from the table here.

Why do you assume she was under the influence of drink? Because she was staggering, and this man was helping her.

That is your only reason? Yes.

You did not say before that she appeared to be drunk—you said she was under the influence of liquor; as a matter of fact, you did not know whether she was or was not? She seemed devilish like it.

Do you know of your own knowledge that she was drunk? Yes; I know she was.

I suppose you saw her taking the liquor? No.

You say she was under the influence of drink because she was staggering? She was staggering, and he was helping her along. I heard her make that expression or something like it.

You do not remember that expression now? I heard her use some expression.

I suppose you hear a good deal of bad language? Yes; I use it myself sometimes.

You do not know what it was exactly that she said, and you assume she was drunk because she was staggering? [No answer.]

*Dr. Manning.* From what you saw you assumed that she was intoxicated? Yes.

You have no proof that she was intoxicated? Yes.

From what you saw you thought so? Yes.

That is what you mean? Yes.

[Witness withdrew.]

Constable Charles Davis examined:—

*Dr. Manning.* You are a senior-constable in the Police Force? Yes.

Stationed at Parramatta? Yes, for the last nine months.

*Mr. Montagu.* How long have you been here? I came here on the 28th January last.

You know Mrs. Gilmore by sight? I did not know her until I saw her just now.

Now you recollect her? Yes, I have seen her on several occasions. I live in Marion-street. I have occasion to pass the Cottage Homes two or three times a day. I never knew her name was Mrs. Gilmore.

Having seen her to-day, you recollect certain facts in connection with her? Although I can say I have seen the lady at different times, she always appeared as any other person.

Have your duties taken you at all to the railway platform? My duty is to visit the trains. I repeatedly go to the railway station at different hours of the evening until the last train.

Have you on those late trains seen Mrs. Gilmore coming home? I recognise her now. I have seen her.

On this occasion, did she appear to you to be intoxicated? Not at all. I have seen her walk by and give her ticket up the same as any other passenger.

How long have you been in the force? Fourteen years.

In your experience, you know it is quite possible for officers of the force to be under a misapprehension that a person has been intoxicated, when it has turned out they were seriously ill? I have not had any instance myself, but I have heard of such cases.

*Dr. Manning.* How often have you seen Mrs. Gilmore coming home at night? I have a recollection of having seen the lady five or six times.

In how long? During the past nine months. I pass the Cottage Homes at 9 o'clock in the morning, and again at mid-day, and then again between half-past 9 and 10.

You did not know her till to-day? I had never taken any particular notice, and did not know her until to-day.

You do not mean to say you have seen Mrs. Gilmore every time you have passed the houses? No.

When you have passed by the houses you have never heard any disturbance? No, I have never heard anything to attract my notice to look in.

You have not seen Mrs. Gilmore when passing by the homes? I did not know her until I recognised her to-day as the person I have seen several times on the platform.

[Witness withdrew.]

Mrs.

Mrs. Katherine Hill examined :—

*Dr. Manning.*] Are you a resident of Parramatta? No; Neutral Bay.

*Mr. Montagu.*] Are you married? Yes.

And living with your husband? Yes.

What is Mr. Hill? A mining expert.

You have known Mrs. Gilmore for some time? Yes, I have.

How long have you known her? About four years or more.

Is she in the habit of visiting you in Neutral Bay? Yes; frequently.

Spending the evening? Yes.

And has she been doing so for the past eighteen months? Yes.

Has she ever led you to believe that she has been addicted to over-indulgence in liquor? Not at all; on the contrary, when she has dined at my house she has always taken water and tea in preference to wine.

Although you have had wine on the table? Yes, she has always refused it; she has never taken wine at the table.

Have you asked her to take wine? Yes, I have.

Has she given you any reason for her refusal? She said it did not agree with her, she preferred water or tea.

How long ago did she see you last? Quite recently—a few weeks ago.

About how late would she leave your house? About a quarter to 9 or a quarter-past 9.

She would have to come from Neutral Bay? Yes; the boats go at the quarter to the hour and the quarter past. That has been the latest she has left my house.

You are quite certain that during the whole time you have known her she has never at any time given indication of over-indulgence in drink? No; she is very excitable. She has sometimes come and seemed very excitable, very troubled; and speaking about her troubles she would get excited.

Even then would she take anything to drink? No.

Have you ever been out to the Cottage Homes? No.

When she has left you at night I suppose she had told you she was going home? Yes; to catch the next train from Sydney to Parramatta.

She always left you in a perfectly proper state? Yes.

Did you ever hear her make use of any foul language? No, never.

I suppose you thought she was the last person who would? Yes.

*Dr. Manning.*] How often did Mrs. Gilmore come to see you? Several times. I have met her in town, and at other times she has come over to see me.

Once a week? Not always once a week; perhaps once a month when it was my day at home, and sometimes at other times.

Once a month? Perhaps once a month, or it might be two or three times; and then two or three months without coming at all.

*Mr. Montagu.*] At irregular intervals? Yes.

[Witness withdrew.]

Michael Joseph Halligan examined :—

*Dr. Manning.*] You are employed in some public department? Yes; the Railway Department in Sydney.

In what position? Clerk in the Outdoor Superintendent's Office.

*Mr. Montagu.*] You live somewhere near to the Cottage Homes? The next house to the homes on the other side.

You have to pass Mrs. Gilmore's house on the way to the station? I have passed on an average of six times a day the last eighteen months.

Where are you stationed? My occupation is in Sydney. I travel from Parramatta, and then home at night. I then go out with messages, and take a stroll in the evening.

How long have you been living there? Eight months in the present place. Previous to that I frequently passed there visiting a friend's house.

Have you ever heard any quarrelling there, or bad language used by Mrs. Gilmore? From my observation I should form an opinion that Mrs. Gilmore lived a very secluded life. What made me so observant was that before I lived there I heard these rumours, and out of curiosity more than anything else I paid attention to that more than any other dwelling. I often heard my wife make the remark that the rumours must have been unfounded.

*Dr. Manning.*] What rumours? The rumours came from an old lady. I did not take much notice of them.

What was their effect? You could make anything out of the rumours. Their effect was that Mrs. Gilmore had been drinking. I would not say definitely what was meant.

You heard these rumours more than nine months ago? Yes.

Were there any other rumours? I did not pay much attention at the time. I took it as mere gossip.

There were other rumours then? On one occasion this woman said the matron was not a good woman. I remember that distinctly. It was said in the presence of my wife. The lady, I understand, visited the old people at the Cottage Homes. I live in her house, that is how she came to tell me.

*Mr. Montagu.*] Who is this lady? Mrs. Ireland, living in Hunter-street.

*Dr. Manning.*] You had heard these rumours and paid particular attention in passing this house, and you came to the conclusion that they were not correct, and you found the place was quiet, and there was no disturbance there? Exactly so; I have often made the remark to my wife that there must be no foundation for them. As a matter of fact, we never saw the matron. I did not know Mrs. Gilmore until I saw her outside to day. I thought I surely must have heard something of the disturbances if they were so frequent.

*Mr. Montagu.*] Did you say you were living in this Mrs. Ireland's house? Yes, renting the house from her.

You

You said she visited the old people? She is rather a peculiar old lady, and I did not pay much attention to what she said. She visited the old couples; I very often heard her speaking about them.

Mrs. Ireland used to get information from these old people? I did not ask.

She told you she visited the old people? I knew from what she said.

[Witness withdrew.]

Mrs. Mary Inglis examined:—

*Dr. Manning.*] You reside in Parramatta? Yes.

How long have you lived here? Five years.

*Mr. Montagu.*] You are a widow? Yes, of the late Rev. Mr. Inglis, Presbyterian clergyman. We lived for the first year next to Mrs. Creasy's house, near to the homes.

*Dr. Manning.*] Four years ago? Yes.

*Mr. Montagu.*] Do you remember seeing Mrs. Gilmore during that time? The place was very open then. There was a kind of wire railing there, and we saw Mrs. Gilmore at all times. My children were in and out of the homes. I have not seen Mrs. Gilmore much lately.

Did she ever give you the appearance of a lady who drank? No, never.

Did you ever hear her using strong or bad language? Never.

Did you ever notice her excited? I should say she was an excitable woman, but I never had any experience of it. There was never any disturbance while we were there.

Then you moved? We came down here.

Since then have you been to the homes at all? Once or twice, and Mrs. Gilmore was at our house after my husband died. I came out in the train with her a few weeks ago.

Was that in the evening? I fancy we got into the train that gets in about 7 o'clock. I sat and talked to her in the train.

Was she all right then? Yes. I detect the smell of drink pretty quickly. She was always very kind to the old people.

She seemed to take a great interest in her work? Yes.

You have never heard of any charges made against her? No, and I was surprised to see them.

[Witness withdrew.]

Margaret Creasy examined:—

*Dr. Manning.*] You reside in Parramatta? Yes, for the last twenty-seven years.

Where are you living now? In the house I had built close to the Cottage Homes.

How long have you been living there? Eight years last March.

You have been living there ever since? I let it for twelve months after I had been there three years; then I let it again; but I have been back in the house during the last eighteen months.

You have been living for eighteen months in the house near the Cottage Homes? Yes.

*Mr. Montagu.*] From your house you can see into Mrs. Gilmore's, can you not? Yes, I could; but now there is a fence. I can hear and see from the road.

Until the fence was up you could see into the house? Yes.

Have you seen Mrs. Gilmore very often during the last eighteen months? Yes; I saw her when she first came to Parramatta. She stayed at my house. She got married from my place.

You have had ample opportunities of observing Mrs. Gilmore? Certainly I have.

Have you ever noticed her at any time under the influence of liquor? Never. I have seen her take a glass of wine or a glass of ale in the evening in my house, but never the worse for drink. I have seen her pass my place, but not very often, because I do not think she is a person who goes out very much.

You know she is very often at home? She is—looking after the place. She never interferes with any of the neighbours or ever troubles me. If passing by or in the garden she would speak to me, or while walking up and down with the children.

Have you ever seen her at night-time? Yes, I have sometimes. When the children have been laid up with sickness, I have walked in and found her nursing her child.

Late at night? Yes.

I suppose you have always found Mrs. Gilmore in exactly the same condition as usual? I have.

There is not the slightest doubt about that? No.

Have you ever heard Mrs. Gilmore make use of foul language? I have heard her speak pretty loudly, which I think she is accustomed to.

Have you heard foul language? No; I would not call it foul language.

Have you ever heard her use wicked language? No.

Or filthy language? No, not exactly filthy or dirty. I have been down in the yard very often and have heard Mrs. Gilmore speaking—she speaks very loudly—but I have heard nothing out of the way.

I take it you are at home a good deal? I am at home pretty well every day.

Have you people living with you? I have boarders.

And it is necessary for you to be at home? Yes.

If Mrs. Gilmore had been making use of bad language, you would have been the first to notice it? I would.

You would have been in a position to have heard it? Yes.

And you would have recollected it? Yes.

*Dr. Manning.*] The back of the house adjoins yours? Yes, there is just a galvanised fence dividing. You could look in almost.

Have you heard quarrels in the house? I have heard quarrels sometimes.

Those were the occasions on which you have heard the loud language? Yes; perhaps when I have been amongst the poultry I would hear it.

That language has not been bad language? Not extra bad.

Has it been bad at all? I would not remember what it was.

It was nothing to attract your attention? No.

[Witness withdrew.]

Mary

Mary Sheady examined :—

*Dr. Manning.*] You are a resident of Parramatta? Yes; I have resided here for thirty years. Where are you living now? In Cowper-street—about five houses from, and in the same street as, the Cottage Homes.

*Mr. Montagu.*] You know Mrs. Gilmore? Yes. I met Mrs. Gilmore just before she was married at Mrs. Creasy's.

Have you visited the homes much? Yes, I visited the old couples frequently. A few years ago I used to visit them more.

But during the last five years you have frequently visited the old couples? Yes.

Have you ever heard any complaint from them against Mrs. Gilmore using bad language, or of ever suffering from the effects of drink or being intoxicated? Never. I have been speaking to the old couples and they say they are better off there than ever before in their life. I never heard one complain against Mrs. Gilmore.

During the time she has been in charge of the Cottage Homes? No.

Have you seen Mrs. Gilmore herself on those visits? Occasionally passing.

You have no intimate acquaintance with Mrs. Gilmore? I have been twice in her house. Mrs. Gilmore was never in my house. She always seems to me to be attending to her business.

You have seen nothing to show that Mrs. Gilmore has been indulging in drink? No. I keep gentlemen boarders, and they pass that place at all hours of the day and night, and they have told me they never have heard Mrs. Gilmore's voice or saw anything wrong. I have asked them particularly. Some of them come by all trains at night, and they think it very strange if anything took place and they did not see it.

[Witness withdrew.]

Mrs. Lily Le Jeune examined :—

*Dr. Manning.*] Are you living in Parramatta? Yes.

Whereabouts? At the Macquarie-street Asylum.

You are an official of that place? I am the sub-matron at that asylum.

*Mr. Montagu.*] You know Mrs. Gilmore, I think? Yes.

How long have you been sub-matron? Five years.

You have known Mrs. Gilmore during the last five years? Yes.

Have you ever come home in the evening with Mrs. Gilmore from Sydney? I have.

During the last eighteen months? Yes.

You have been fellow-passengers? Yes; in the same carriage.

Have you ever noticed her at any time under the influence of drink in any way? Certainly not. I have met Mrs. Gilmore at the railway-station, and sat with her all the way.

Would that be after the theatre? Yes; by the late train.

When you have been visiting in town? Yes. I generally have certain days off from the institution, and sometimes I remain until the late train.

Have you been over the cottages? At one time I was over the cottages, when Mrs. Gilmore's son was ill. That is the only time.

You know personally that Mrs. Gilmore was not drunk when you saw her coming home in the train? Yes.

That is frequently during the last eighteen months? Yes.

*Dr. Manning.*] Three or four times at the least.

*Mr. Montagu.*] Do you get leave regularly? Two days a month.

One of those two days you go to Sydney? I always go to Sydney, to see my friends. I know very few people in Parramatta.

[Witness withdrew.]

[The Board met at the School of Arts, Parramatta, on Monday, the 28th October, but in consequence of the unavoidable absence of Mr. Montagu adjourned until Thursday, the 31st instant.]

#### THURSDAY, 31 OCTOBER, 1895.

The Board met at the School of Arts, Parramatta, at 10 a.m.

*Present* :—FREDERIC NORFON MANNING, M.D., Chairman; WILLIAM HENRY GOODE, M.D.

Dowell Phillip O'Reilly, M.P., examined :—

*Dr. Manning.*] You are the Member of the Legislative Assembly for Parramatta? Yes.

You have handed to the Board certain papers in connection with the inquiry now being held? Yes.

These contain statements made to you in reference to certain charges? Yes.

And you have also handed to the Board a list of witnesses whom you suggested might be examined to give the Board information on the subject? Yes.

Have you any personal knowledge of the subject of these charges? Absolutely none whatever.

Neither as regards the charge of intoxication nor that of the use of bad language? None whatever.

Have you ever visited the Cottage Homes? On one occasion, about two months after the 1894 election, in company with Mr. Sydney Maxted—an official visit, I may add—and I think on two occasions subsequently I visited an old couple from Newcastle of the name of Donkin.

At the homes? Yes; in one of the cottages.

Did you see Mrs. Gilmore on the first occasion? Yes.

And on the other occasions? I did not see her.

How often have you seen Mrs. Gilmore? The first occasion was on the official visit, and on last Monday I saw Mrs. Gilmore in this room.

When

When you went to the Cottage Homes on that official visit did you look round the homes? I went through the majority of the cottages.

Did you find them all in good order? In excellent order.

And you were generally satisfied with their management and order? Everything was in tip-top order.

When did you first hear that Mrs. Gilmore drank? I heard rumours of it before I was elected to Parliament.

On the occasion of the election in 1894? Yes, before that. The election was in July, 1894.

When did these rumours take more definite shape? They have been gradually accumulating, especially since I have held the responsible position in the town that I have. I presume people felt bound to make some direct representations to me.

Can you inform us who first gave you information? No, I could not inform you of that. The rumours were so broadly distributed that I could not tell you that.

*Hansard* shows us that you first made these charges in Parliament on the 17th September last? Yes.

At that time what information had you? Sufficient information to make the charges on.

Sufficient to convince you that you were justified in making the charges? Amply.

The evidence that you submitted to us was procured subsequently to that? In the majority of cases I think so.

The written statements were all subsequent to that date? Yes.

I understand that you had information that you considered justified you in making these charges, but a good deal of the evidence you collected afterwards? That is so. When you say evidence, you mean documentary evidence?

Yes; at the time you made the charges had you seen any of the witnesses from whom you got evidence afterwards? Yes.

In obtaining this evidence, had you to press the people to give it? On the contrary, I said I had a duty to perform, and so had they. In every case I went to these people and said, "I am taking the initiative in this matter, and you in your lesser position have the same responsibility to act that I have in mine." I must say that in every case they recognised the position and gave me the statement of what they knew in this matter.

In all these cases then it was not volunteered? The documentary evidence was in no case volunteered. In every case I demanded it for my own security.

Having already made the charges and wishing to obtain the evidence so as to justify what you had already said? Wishing to have such documentary evidence to place in the hands of a Board such as this.

Do you know anything of a man named Ormiston? Yes.

Has he communicated with you in regard to these charges? He came to see me on one occasion; but as far as I recollect he never alluded to these charges.

Have you heard anything in reference to these charges from a man named Corcoran? Nothing in regard to these charges.

Or from a man named Brackenbury? I never heard the man's name before. Corcoran and Ormiston came to see me months ago. They had some grievance against the Charities Department. I did not like the cut of the men. They brought me papers, which I looked through. I saw a barrister who was interested in this case on their behalf. I disliked the look of the whole thing, and returned the barrister their papers. They have not had a shred of influence on me in this action.

They have given you no information in regard to these charges? Absolutely none. I must be very careful in this. Absolutely none that I have acted on. I do not know whether their appeals said that Mrs. Gilmore had been guilty of intemperance or not. Absolutely no evidence or statement upon which I have placed any credence whatever.

Of course you were aware that Ormiston and Corcoran said they had a grievance against the Department? Well aware of that.

And that an inquiry was held, and Mr. O'Malley Clarke spoke of their charges as wicked inventions? I recollect they told me that.

Have you had any communication with a man named Meads? Yes. There again I must be careful. He has had communication with me; I have not had communication with Meads. He took the initiative.

Has he given you information at all in regard to these charges? He has given me no information; he has never alluded to these charges at all. I have never seen or communicated with him since I made these charges. He came to see me at my house. I cannot prevent people from calling to see me.

You quite see, Mr. O'Reilly, why we are asking all this? Yes. He came to see me upon some departmental matter outside and unconnected with this inquiry.

Are you aware that he is now suspended and recommended for dismissal? I am not aware that this Meads is suspended.

Have you seen Mr. Wing, an officer of the Charities Department? On several occasions.

Have you ever seen him in connection with this matter? Not to my knowledge.

Did you ask him if he knew anything about Mrs. Gilmore drinking, and did he not tell you he had been appointed by Mr. Maxted to inquire, but could find no evidence with regard to it? I have no recollection of any such statements.

Did you get any information from the Police Force before you did so officially through the Colonial Secretary? I was aware that the police knew of these facts through third persons, but the first official information, which I have not yet seen, was forwarded to Mr. Brunker, through the official routine, by the Inspector-General's request.

These papers were not forwarded to you? I have never seen these papers, nor received any statement from the police whatever.

Have you employed anybody to collect evidence? No one.

Nobody whatever? No.

The question is put to me to ask whether you have ever offered any rewards to people to supply you with information to enable you, as it is said, to help you to kill Mr. Maxted in this inquiry? Do you feel qualified in asking that question?

I think it is advisable to do so? I should never do anything of the sort.

I am not wanting to impugn your motives in any shape or form. I am only giving you the opportunity of saying that you have not? The idea never occurred to me before.

*Mr. Montagu.*] You said just now that you had no written statements prior to the 17th September, when you made the speech in the House;—is that so? Yes.

I may take it that this speech on the 17th September was upon verbal statements given by various people about the district? That is so.

Do you not consider in making a charge of this kind against Mrs. Gilmore on mere verbal statements that you were acting somewhat in advance of your privileges? That is merely for me to decide.

As a matter of fact, you did so in that speech;—you are here to advance nothing you cannot support? No.

And nothing you cannot challenge a trial upon? Nothing.

And you made that statement not having one single bit of written proof? I had evidence that I could rely upon as much as if it were in black and white.

Prior to making that speech, how long did you take to make those inquiries? I first heard the rumour before my first election.

I understand that you have been following up these rumours since your first election? I never said so. They may have been following me up. There is a considerable difference.

Would you be surprised to learn that gentlemen of long residence in Parramatta have given evidence here that they have never heard such rumours? I would not be surprised that 5,000 respectable residents of Sydney never saw Makin poisoning babies. It counts nothing against one creditable witness who saw it.

Will you kindly give us the names of some of the creditable witnesses in this matter? You have them on paper there. I have called no witnesses whose word I would not credit, to the best of my knowledge.

From your intimate knowledge of them, or from their official position? I do not place much credence on any man from his official position.

From your intimate knowledge then? More or less intimate knowledge. I place credence on the word of any man who is prepared to give me a signed statement, and to substantiate it in a Court of Justice if necessary.

Did you ask these people before you made that speech on the 17th September if they would be prepared to sign a statement? I never said so.

First of all you tell us you did not get a written statement before the 17th September, now you say you were willing to take these people's word before they would be prepared to make a written statement? There is a grammatical difference.

I simply want to know how it was that you were prepared in the House to state what you did? I have already stated that the word of these men—I do not say all these witnesses, but certain of them—was quite sufficient for me to go upon and stake my reputation. You know you can find witnesses like that.

Were they people you know personally or did you take their word on account of their official position? Some of them I know personally, all of them I trusted sufficiently to speak on their evidence and act upon their evidence. As I have already stated there was a constantly accumulating flow of evidence, still some of that I did not hear of until after that first speech.

You placed your reliance upon those people's statements not knowing whether they were willing to make written statements? I never knew whether they were willing or not.

You did not ask them? I did not.

Or they did not state to you they were prepared to make written statements? No.

Did not witnesses tell you, as a matter of fact, they did not want to be mixed up in the matter when you asked them for written statements? So far as I can recollect, not one witness whose name I have given expressed any such feeling. Of course I knew, in a way, that they would be disinclined; but if you mean as an argument against being implicated in the matter, I say no.

They said that they did not want to be mixed up in the matter? I never asked them. I did not want to be mixed up in the matter myself.

We have it in evidence that some of the witnesses say distinctly that they did not want to be mixed up in the matter? It is such a trivial thing to me I cannot recollect it.

And that you demanded it from them, and said if they knew anything about this they were bound to give you a written statement. Some of them did demur? I would not have cared whether they demurred or not as a question of duty.

And you forcibly reminded them of their duty?—

*Dr. Manning.*] We will take Mr. O'Reilly's statement with regard to that; he was definite in what his actions were.

*Mr. Montagu.*] Did not Meads have a conversation with you in the train on one occasion;—did you not see him in the train and have a conversation with him about steps being taken to have him dismissed? I have no recollection of such.

You do not recollect any reference to the proposed dismissal of Meads, and saying that if anything of the kind was attempted by Mr. Maxted he was to see you? In this alleged conversation in the train, I cannot recollect anything whatever about it. It is a stupid invention.

Within the last two months? I cannot recollect any such conversation.

No reference was made by Mr. Meads at all in the matter? You are speaking of in the train, none whatever.

Do you recollect any similar conversation anywhere else? I have already told the Board, and is it necessary to reiterate the statement that I had one interview with this gentleman at my own house?

And did not this conversation occur at your own house, that if anything of the kind was attempted by Mr. Maxted he was to see you?—

*Dr. Manning.*] Mr. O'Reilly has already said that was a stupid invention.

*Mr. O'Reilly.*] That stupid invention was with reference to the alleged conversation I had in the train with Meads.

*Mr. Montagu.*] Did that similar conversation occur in your house? Dr. Manning will find on reference to the notes that I told him Meads came to see me on a matter unconnected with this inquiry.

[The Board at this stage ruled that matters unconnected with the particular charges into which the Board was inquiring could not be gone into.] *Mr.*

*Mr. Montagu.*] Since the 17th September you personally have gone to a number of people asking for these statements, have you not? Yes.

Do you know a man named Gould? Yes. I do not admit that I went to him for a statement.

Did you not go to Gould and get a statement? No.

Did you not go to Gould's house, and while there get a statement in writing? I met Gould on the railway station. I spoke to him of this. He told me had heard bad language, and said he would be prepared to support me in my efforts to disclose what he regarded as a public scandal.

You met Gould on the railway station? Yes; Harris Park railway station.

Did Gould tell you he wanted to get a lease of some ground near the Cottage Homes? He never told me anything of the sort; nothing relative to it.

You were not aware that Mrs. Gilmore opposed his getting such a lease? No.

Was it on the Harris Park railway station that he said he was prepared to make a statement? He said he was prepared to make a statement, and I fancy he posted it to me. I am almost sure he did. I have no recollection of going to his house at all.

You would not like to state one way or the other whether you went to Gould's house or not, and whilst there got a statement from him? I really have not the slightest feeling one way or the other. I cannot recollect now. I do not think it would influence my case in any way if I did not go to his house.

Do you know where he lives? I think it is in Cowper-street. I know the locality.

Have you not been in his house? Several times.

Do you know him pretty well? I have known him in cricket for some years. He used to be scorer.

Do you recollect whether you went to see Gould,—on a matter unconnected with this inquiry if you like,—and that at his house you got a statement in writing from him? I have nothing to do now with any visit I may have paid him totally unconnected with this inquiry.

Do you recollect having been to his house since the 17th September on a matter totally unconnected with this inquiry, and whilst there getting this written statement? I have no recollection whatever of it.

You would not like to say you did not do so? Yes; I will state I did not do so. I have no recollection whatever, and I can trust my memory. I said before I think he sent it through the post.

It was a voluntary statement of Gould's at the railway station that subsequently led up to getting the statement from him? I will not go so far as to say it was a voluntary statement. I may have introduced the subject. I remember his distinctly saying, "I shall be prepared to support you in this." I daresay I said, "Will you give me a written statement?"

It is quite probable that you mentioned the matter to Gould? Very probable.

What induced you to speak to Gould about the matter? Seeing he was a resident in the neighbourhood, I daresay I concluded he might know something of this matter.

I think we can generalise it that your reason for going to these people to get this statement was the fact that they were residents near the Cottages? Which people?

Those who have given evidence? A number of them do not reside near.

Some of them do? Yes; but you must not generalise on a question of that sort.

Did you go to any of the cabmen at the station and ask for statements? Yes.

Prior to the 17th September had you any verbal statements from any of those cabmen? No, if you are alluding to the cabmen called in evidence.

I was? You are alluding to Haddon and Morris.

Yes. Did you get any verbal statement from any of the police before the 17th September? I may have had some conversation with them on the subject.

I suppose they were not very searching inquiries—only casual conversations? I have not stated I had any conversations. I may have had

They would be casual if you had? I recognised their official position, and I wanted their statements to go through the official sources. For that reason I went to Mr. Brunker and then to Mr. Fosbery, but Mr. Brunker has thought fit to retain the statements.

Had you any verbal statements from any of the railway officials before you made that speech? Not so far as I can recollect.

You say you have heard rumours against Mrs. Gilmore since July, 1894? Yes.

From whom would those rumours emanate;—can you call to mind any particular individual? No; Parramatta, I should think.

You cannot call any particular person to mind;—do you know Mrs. Ireland? No; not to my knowledge. More know me than I know, and many may think I know them when I do not. I want to be quite clear. I may have spoken to Mrs. Ireland. She may have told me her name, but I cannot recollect it.

You had only some casual conversation with the police before you made that speech? I may have had.

Had you any conversation with Lord before the 17th September? On this matter, no; none whatever.

With Vidler? No.

Mrs. Gregory? No.

Haddon? No.

Mobbs or Morris? Of course. I have known Mr. Mobbs for some time. He has been a personal friend of mine a good many years.

You have had conversation with Mr. Mobbs relative to these charges prior to the 17th September? Yes.

With Hart? No.

With Gould? No; not to my knowledge.

The conversation with him was after the 17th September? Since the initiation of this business.

Of those witnesses, with the exception of Mr. Mobbs, you have had no conversation with them about these charges prior to the 17th September? No.

Can you give us any idea of any person with whom you did have any conversation, irrespective of Mr. Mobbs? Yes, I can; but I will not.

I asked you whether you could tell us the names of people who gave you information before you made that speech, and you said just now you did not recollect who they were? Various sources, gossip, I said.

The rumours were from various people? Whose evidence I choose to reserve at the present moment. You

You did not make that reservation before? I told you Parramatta.

I asked you on what grounds you made that statement in the House, and from who you got the information, and did you not say you could not recollect, that it was simply gossip? I may have said so.

You said it was simply gossip? I may have.

Now you say you do know the names of people who told you these things, but you will not mention their names? My only wish is to give an absolutely clear statement of what I know. I repeat now that I had evidence to go upon before the 17th September.

I want to know whether you are correct in saying you do not recollect from whom you got your information, or you do recollect? When I said Parramatta and rumour, I meant that prior to the time I first thought it my duty to make these inquiries, the evidence was in a more or less nebulous shape. I at once began to make inquiries. I felt it my duty. I went to persons who seemed to be able to give me evidence. Living in a gossiping town you cannot recollect all the sources from which you form an opinion.

And now you qualify it and say you do recollect the names of the people, but will not give them? I will not give the names of the persons before this board of inquiry who first gave me information in this matter.

*Dr. Manning.*] We are quite prepared to think that Mr. O'Reilly may have had this evidence in a nebulous condition at first, and he then obtained evidence sufficient in his mind to justify him in making these charges, and subsequently he got more definite information, but declines, quite within his right, to give us the names of the persons on whose statements he sufficiently relied to make the charges on the 17th of September.

*Mr. Montagu.*] Mr. O'Reilly makes charges in the House, and says he has evidence to make them on. I ask him if he can give us the names of any reliable people upon whose evidence he based that speech on the 17th September, and in answer he said he could not recollect. Now I have referred him to the witnesses who have given evidence, and with the exception of Mobbs he did not have any conversation with these people before the 17th September. I now ask him will he tell us with whom he had conversations, and he says he can but will not give the names. The two answers are not consistent.

You said in the House, did you not, that Mrs. Gilmore had been a habitual drunkard for six years, and that she was a most unscrupulous woman? Did I say six years; I do not recollect it.

You did say she was a most unscrupulous woman? I think I did use that phrase. I am not sure. I should like to see it in *Hansard* before I admit it.

*Dr. Manning.*] The words were that the Director of Charities had for some years past had in charge of the Cottage Homes a woman who was constantly drunk. There was no reference to time.

*Mr. Montagu.*] You charged her with being a habitual drunkard? You have got the words there—constantly drunk.

And all the facts you had then was this nebulous gossip? I never said so.

Did many people make you absolutely direct statements? Several people; that is to say, more than one.

And with the exception of Mobbs, you have not called any of these witnesses to this inquiry? Not at this inquiry—no.

And you decline to tell us the names of any persons who made direct statements to you? I see no necessity to do so.

Might it not be possible—I am only asking your opinion—that some of the witnesses, having read your speech on the 17th September, have assumed that the charges were correct, and made their statements accordingly, believing them to be true? I should never knowingly call a witness who would do a thing of that sort. There is not one witness of whom I can believe anything of the sort.

I suppose you believe everything that Lord told you? He was very careful before he gave me a written statement.

You believe him only because he was careful in giving a written statement? Yes, dealing with me.

Did you not know that Lord had been removed from Parramatta to Granville? Do not I know that every railway official in the service is removed from one place to another?

Did you not know that he was removed to Granville after having been in Parramatta for some years? Yes; I knew that.

He was removed before the 17th September? I believe so.

Did you not know that Lord was removed in consequence of some difficulty between him and the station-master? I never heard of such a thing until you just suggested it.

And you did not know that Lord was reprimanded by his Department? No; I never heard of it.

Did you not know that Mr. Wing, an officer of the Charities Department, had been sent up by the Department to make inquiries into those rumours? Not to my knowledge.

Wing never told you anything of the kind? I cannot recollect his doing so.

He never told you that he had been sent up to make inquiries, and had got nothing definite? I never said he never told me. It was news to me when I read in the report that Wing was one of the men who had made inquiries. If he did tell me it had passed out of my mind when Mr. Bruncker tabled that report.

Did you not ask Wing before you made these charges in the House if he could tell you anything about Mrs. Gilmore? It might assist your inquiry if you will give me the date of this alleged conversation.

I am only asking you if you have any recollection of it? I have no recollection of it at all.

Are you prepared to state positively that neither Ormiston or Corcoran made any reference or remark about Mrs. Gilmore to you in connection with the charges now before the Board? I have no recollection of what these men said to me. From the first I regarded them as worthless characters, and what was said went in one ear and out at the other.

So that you took no notice of what was said? I do not know that they said anything about Mrs. Gilmore. They had their own fish to fry, and wanted me to fry it for them.

Did they tell you that Mrs. Gilmore was a habitual drunkard? These men were in my opinion utterly unreliable. I cannot recollect anything they said to me. I may say I know their papers have been sent to different Members of the House, and all have rejected them in the same way. Their visit produced no impression on me in any way.

Did

Did you consider it your duty to make these charges against Mrs. Gilmore before the House, having before you rumours and statements made by several persons? I had ample evidence to make that speech on the 17th of September before I made it.

And with the exception of Mobbs, not one of the persons have been called here upon whose evidence you relied at that time.

*Dr. Manning.*] We are going over the same ground that has already been gone over.

*Mr. Montagu.*] Mobbs is the only witness you have called upon whom you relied at the time? Is that quite fair, when I could find a harvest of evidence ripe to my hand whenever I chose to reap it.

I want to show that if Mr. O'Reilly had ample evidence, the proper course would be to have that evidence brought here, but the only ample evidence shown was that of Mr. Mobbs.

*Dr. Manning.*] Mr. O'Reilly has not given any evidence here as regards these charges. If he had you would have been perfectly within your right in cross-examining him very fully on it, and I think his examination on the matters referred to has already been full enough.

*Mr. Montagu.*] You said this in the House: "What is easier for this Mrs. Gilmore, when she sees that a patient is obnoxious and getting rebellious, that a patient sees too much, what is easier for this unscrupulous woman—I have not the slightest hesitation in branding her as such—than to lodge a charge against this helpless old patient of misconduct?" Do you remember saying that? I do. The foot-note to that report of Mr. Sydney Maxted's is foundation for that statement. Why is that foot-note put there but to shut me out from calling the inmates in evidence.

If necessary we will call the whole of the inmates to appear and examine every one of them.

And you base your statement that I have just read in regard to Mrs. Gilmore on that foot-note? Yes, I will let that go.

Have you any proof that Mrs. Gilmore has acted in that manner? I never said I had; it is not a statement, it is only a query.

Sometimes these queries are much more serious than direct charges;—do you know of any case? So far as Mrs. Gilmore herself is concerned, no.

You have nothing against Mrs. Gilmore that is suggested there? No.

[Witness withdrew.]

Mrs. Fanny May examined:—

*Dr. Manning.*] You were at one time in the Cottage Homes? Yes.

How long ago was that? About six months, when my husband died.

How long were you there altogether? Close upon five years.

*Mr. Montagu.*] Had you frequent opportunities of seeing Mrs. Gilmore? I had; I lived next door to her for about two years.

During the last two years before you left? Yes.

Did you ever see Mrs. Gilmore under the influence of drink? Never in my life.

Did you ever hear her using wicked language? No, never; I never heard her use a bad word all the time I was there.

Did you ever see her at night-time? No.

Was she always very kind? Always very kind both to me and my husband. She could not have been more kind. I never saw her unkind to anyone.

[Witness withdrew.]

Mrs. Mary Ann Chadwick examined:—

*Dr. Manning.*] Were you at one time an inmate of the Cottage Homes? I was a cleaner.

For how long? From June, 1892, until January, 1895.

What are you doing now? I have been in service, but I am now at Newington. I was taken out of the hospital to come here.

*Mr. Montagu.*] Did you see much of Mrs. Gilmore? When I had finished my work I used to earn an extra shilling at her house.

Would you see her in the morning? All day.

You saw Mrs. Gilmore pretty often? All the time I was up there.

Did you ever hear her use bad language? No.

Did you ever see Mrs. Gilmore peculiar in her manner as if she had taken some drink? No, never. You never saw her take anything stronger than tea or water? Never. I never saw a drop of anything.

You have cleaned out the house occasionally? Yes.

[Witness withdrew.]

Father Thomas O'Reilly examined:—

*Dr. Manning.*] You are a clergyman of the Roman Catholic Church? Yes.

Stationed at Parramatta? Yes.

Do the Cottage Homes come within your district? They do.

Have you visited the homes frequently? For the last seven years I have visited the homes frequently, but not so much for the last twelve months.

During the first six years of your duty you visited them very frequently? Yes; we have no regular service, but we visit the old people, especially when they are sick.

So that you have visited the homes at all times of the day? Yes, and sometimes at night.

On special occasions when you were called for? Yes.

Have you heard any complaint about the matron from the inmates? Never. I did not know the matron. I have never met her, but I have never heard any of the inmates complain of their treatment.

[Witness withdrew.]

James Watsford examined :—

*Dr. Manning.*] You are the railway station-master at Parramatta? Yes.

*Mr. Montagu.*] How long have you been station-master at Parramatta? Twelve years.

You know Mrs. Gilmore? Yes.

I suppose you have had frequent opportunities of seeing her? I have.

It has been stated by Night-officer Lord that he had some difficulty with her one night; she refused to give up her ticket, but he believed it was returned the next day to the station;—would you have cognisance of that? Yes.

Do you know whether that ticket was returned? I believe it was.

Was it returned to you? That I cannot remember. I do not remember whether it was handed to me or to the clerk. I was told it was returned.

Do you remember who told you? No; they simply said Mrs. Gilmore's ticket has been sent up.

Were you informed at the time it was returned that she had refused to give it up, or simply told that she had sent back her ticket? I cannot remember the circumstances.

Was there not some difficulty between you and Lord? Yes.

There was an inquiry? Yes.

And Lord was removed to Granville? He was.

Was it in consequence of that inquiry? No; not in consequence of the first inquiry.

What was it in consequence of? It was a railway matter.

You have had frequent opportunities of seeing Lord? Yes; he was with me for ten years.

He was your subordinate? Yes.

Did you always find him to be truthful? No; untruthful and unreliable during the latter part of his service with me.

Have you seen Mrs. Gilmore come home in the evening? Not often. I am seldom on duty at night.

When you have noticed Mrs. Gilmore was she sober? Yes; always.

Is she in the habit of going two or three time a week to town? I should not think so; I have not noticed her.

You did not notice her going often into town? Not very often.

You say Lord was untruthful;—is that from facts which have come under your notice? Yes.

Lord stated you were reprimanded at that inquiry;—is that true? No; I have not been reprimanded since I have been in Parramatta.

*Dr. Manning.*] What are your hours of duty? From a quarter to 8 in the morning until a quarter to 8 in the evening; but I often remain until the mail train comes in at half-past 8.

After that you are not on duty? No.

What time was it when you have seen Mrs. Gilmore going into town? 10:25 in the morning, I think.

Not in the afternoons or evenings? Seldom.

Is it a usual or an unusual thing for Mrs. Gilmore to retain her ticket and send it up the next morning? Unusual.

Did it occur on more than one occasion? Only once that I am aware of.

Can you tell us if anything further was said about that ticket at that time? Lord may have said something, but I do not remember what it was.

No explanation was offered? I do not like to say. There was not an explanation given to me that I remember. I was told a lady refused to give up her ticket, and that it came to hand the next morning.

Is it your duty to see that tickets are all right? It is brought under my notice.

How long ago is this? I could hardly say.

Can you not fix the date at all? No, I cannot.

[Witness withdrew.]

Father John Martin examined :—

*Dr. Manning.*] You are a Roman Catholic clergyman, doing duty in Parramatta? Yes.

And the Cottage Homes come within your district? Yes.

Are you in the habit of visiting them? Yes; I visit them frequently; sometimes to see a sick person twice a week.

For how long have you visited the homes? The last three years.

At what hours? Generally in the morning; sometimes in the evening, especially if there was a sick person there. In the morning about 11 o'clock.

When people are ill do you visit at night? I have not visited at night later than 4 o'clock.

You are still visiting the homes? Yes.

Do you know the matron? No, I do not; I have never spoken to her.

Do you know her by sight? I do not think so.

Have any of the inmates made any complaint to you in regard to the matron? They never have. Only about four weeks ago a family told me they were very happy and contented, and about twelve months ago they went out of their way in alluding to the way they were treated, and from the general conversation then I was left under the impression that it was excellently managed by the matron.

*Mr. Montagu.*] You never heard any of the inmates state that Mrs. Gilmore was addicted to drink, or of using bad language? I never did, and I am sure I would have heard of it.

If such a thing had occurred you would have heard of it? Yes; patients are generally very communicative, and whenever they spoke—and I remember those two occasions—it was in very high terms of the care taken of them and the general management.

*Dr. Manning.*] Have you always found the places clean and in good order? Yes; very clean.

[Witness withdrew.]

Amy Brock examined:—

*Dr. Manning.*] What age are you? Fifteen.  
Do you live in Parramatta? Yes.  
You have been acting as servant to Mrs. Gilmore at the Cottage Homes? Yes.  
For how long? Six weeks.  
The last six weeks? Yes.  
Are you still there? Yes.  
*Mr. Montagu.*] Is that the first time you have been employed there? Yes.  
What is your position there? To help to do the work.  
Do you sleep there? I sleep at home.  
Have you ever noticed Mrs. Gilmore under the influence of liquor during the last six weeks?  
Never.  
Have you ever heard her use bad language? No.  
[Witness withdrew.]

William M'Garvey examined:—

*Dr. Manning.*] What is your position in the Public Service? Clerk in the Macquarie-street Asylum, Parramatta.  
How long have you held that post? Since March last.  
*Mr. Montagu.*] Where were you before? At the George-street Asylum.  
Had you anything to do with the Cottage Homes? Since March last I have been doing the clerical work there.  
Have you been there often? On an average two or three times a week.  
When do you generally do the work? At irregular hours, between 10 in the morning and 6 in the evening.  
I suppose you have had frequent opportunities of seeing Mrs. Gilmore? On every occasion I have met her there.  
Have you ever noticed her suffering from the effects of drink? Never.  
Did you ever hear her use bad language? No.  
Did she appear to conduct the place properly? Yes; I always thought so.  
Do you go amongst the inmates of the cottages? Yes; frequently I have met some of them there, and have spoken to them.  
Did they ever make any complaint against Mrs. Gilmore? No.  
No charges of any kind? No.  
Either directly or indirectly? None whatever.  
Is there anything else you can tell us? On one occasion, about four or five months ago, I saw Mrs. Gilmore at the Redfern Railway Station, leaving by the 11:30 train.  
Did you come home in the same train? Yes. I did not speak to her; I saw her coming along the platform.  
What condition did she appear to be in? I never noticed anything out of the usual.  
She appeared to be alright? Yes.  
Did she get out of the train alright? I did not see her get out.  
You saw her go to the carriage? I was standing on the platform, and saw her come along past me.  
Have you ever come home at any other time in the same train?  
[Witness withdrew.]

Joseph Wing recalled:—

*Mr. Montagu.*] Did you ever have any conversation with Mr. O'Reilly, the Member for Parramatta, in reference to any inquiry you have made concerning Mrs. Gilmore? Yes.  
Can you tell us when that conversation occurred? Some time after I made the inquiry.  
Before he made his speech in the House? Months before. Before the last election, and after he was first elected.  
Can you remember what was said? He spoke to me of the rumours going round about Mrs. Gilmore. I told him then I had made inquiries, but could not substantiate them. I said the people were ready enough to make statements, but, when they were asked, they would not put them in writing.  
Did he call upon you, or did you meet him accidentally? I met him in the street.  
In Parramatta? Yes. It is a long time ago now.  
You have no doubt about what you told him? None whatever.  
Did he open the conversation about Mrs. Gilmore? Yes, I think so. I could not be sure. I did not pay much attention to the conversation at the time.  
Did you tell him by whom you were appointed to make the inquiry? I did; by the Department, I told him.  
Did he make any complaint about the Department, or about the head of the Department? No. He made the remark he would like to work with Mr. Maxted, but Mr. Maxted did not seem inclined to be friendly. That was the only remark he made.  
I suppose you have seen Mr. O'Reilly on several occasions? I have not seen Mr. O'Reilly to speak to more than three or four times in my life. I am only a new comer in Parramatta, since the last eighteen months.

[Witness withdrew.]

John Minor examined:—

*Dr. Manning.*] You are a cabman? Yes.  
For how long have you been a cabman? This last sixteen years.  
On the rank at Parramatta? Yes.  
I suppose you know everybody in Parramatta? I do.

*Mr.*

*Mr. Montagu.*] Do you know Mrs. Gilmore? I do.  
 Are you on the cab rank at night? Sometimes.  
 You have seen the late trains come in? I have on several occasions.  
 Have you seen Mrs. Gilmore come home by those trains? I have on some few occasions.  
 During the last twelve or eighteen months? Yes.  
 Did she appear to be sober? I never saw anything wrong with Mrs. Gilmore at any time.  
 If she had been under the influence of drink, you would have noticed it? Yes.  
 Do you know Lord? I do, since he came to Parramatta station.  
 He is the night officer? Yes; he used to be formerly at Granville years ago.  
 He would come on duty at night-time? Between 7:30 and 8 I think was his time, and go off in the morning at 8 or 7:30. I have seen him frequently going down to the hotel at night with other cabmen and railway officials. Not only once, but three or four times a night.  
 Can you tell us the names of any of the cabmen? I have seen him have a drink with Morris.  
 With Haddon? He does not drink.  
 Two or three times a night? Yes, while on duty.  
 Have you seen him in the morning? Yes. When I have been out to meet the mail coming down at 10 past 5, he would say "Is Andy's open," that is Holmes' hotel. I have seen him go down with the guard about 10 past 6. On one occasion he had a good drop of drink in one morning, and actually insulted a man just outside the station on railway property, and, had the other cabmen not stuck to Lord, the man would have summoned him.  
 Have you ever driven Mrs. Gilmore out? Yes.  
 In the evening? Yes, between 7 and 8 o'clock. She was calling on some people about some business she had.

[Witness withdrew.]

William Brown examined:—

*Dr. Manning.*] What are you? A carpenter and joiner.  
 Living in Parramatta? Yes.  
 How long have you been here? Nearly ten years, part of the time on the other side of the river, and lately at Harris Park. Part of the time in Cowper-street, and the rest on the other side of the railway line.  
 When in Cowper-street you were near the Cottage Homes? Yes.  
*Mr. Montagu.*] You know Mrs. Gilmore? Yes.  
 Have you passed by her place very frequently? During the time I was living in Cowper-street three or four times a day.  
 Are you in business in Parramatta? I was working for Murray Brothers.  
 Have you passed by there in the evening? Yes, between 7 and half-past in the morning, 12 and 1 dinner hour, and at 5 at night, and occasionally when going down the town.  
 Did you ever see Mrs. Gilmore in any other condition than she is at present? No, never.  
 Did you ever hear her using disgraceful language? Never.  
 Have you ever been in any of the Cottage Homes? Yes; I was there several times during the time I was in the employ of Murray Brothers. For the first eighteen months after the Homes were built, on and off as occasion required.  
 When you were working there, were you ever in Mrs. Gilmore's cottage? Yes.  
 Did you notice anything remarkable about the place? No.  
 Everything seemed to be in good order? Yes.  
 Have you ever had any conversation with any of the inmates of the homes? Yes, I could not help it.  
 Did they ever make any complaint about Mrs. Gilmore? No.  
 Did you ever hear of any tangible complaint against Mrs. Gilmore? No, never. The inmates never spoke to me about it.

[Witness withdrew.]

Constable James Tindall examined:—

*Dr. Manning.*] You are a constable, stationed at Parramatta? Yes.  
 How long have you been in the Police Force? About ten years in this country.  
 How long have you been stationed at Parramatta? Nearly three years.  
 Are you on duty at the railway station at all? Yes.  
 On what occasions? Periodically, generally on one month and off two.  
 So that you are on duty one month out of three? About that, until lately. The last time I was on duty at the railway station attending the arrival of trains was in December last.  
 And for how long before that? For two years back. That shift has been done away with now on account of being short handed.  
 What trains did you meet? All trains from 6 p.m. till five minutes to 1.  
 Do you know Mrs. Gilmore? I do.  
 Have you frequently seen her? I have.  
 Not only at the railway station, but at other times? Yes.  
 Have you ever seen her under the influence of drink? I have.  
 On how many occasions? During December last I saw her come out of one of the trains. I would not be positive which, either the ten past 12 or the twenty to 12. She was very much the worse for drink. Her hair was all disarranged and I followed her towards her home, keeping behind, and saw her go into her gate.  
 Where were you when you first saw her? On the platform. I generally stand at the door to take particular notice of anyone coming up by the late trains.  
 Did you see her get out of the train? I did.  
 What induced you to follow her home? For her safety. I considered she was very much the worse for drink; she could scarcely walk.

Was

Was there anything to make you notice her? Her clothes appeared to be very much disarranged. They were all twisted round; they were not hanging as they ought on a lady in-sobriety.

And having seen her into her own house you left? Yes. Then on that occasion I saw Mr. Gilmore in the street a little before 2 o'clock at night.

What happened? I did not speak to Mr. Gilmore.

Did he go home? I do not know; I went off duty.

Where did you see him? In Church-street.

Your reasons for considering Mrs. Gilmore under the influence of drink were her gait and the disarrangement of her dress? Yes, her general appearance.

Was the station lighted? Yes.

You saw her get out of the carriage? I did.

Who was there? Night-officer Lord was there. There were very few passengers I remember that came out.

Did you hear her speak at all? There was something about a ticket; I could not say whether she gave it up or not.

You have no personal knowledge on the subject? No.

Did you hear what was said by Lord to Mrs. Gilmore? Lord asked for her ticket, and I think she said "Alright."

You heard no bad language or anything of that kind? No, I did not hear any bad language.

Have you ever heard any bad language from Mrs. Gilmore? No.

Is that the only occasion on which you have seen her? I saw her previous to that.

At what time? It was, I think, in October.

Were there more than two occasions? Yes; when I came here I was three or four months running on that duty.

And you saw her then? Yes; I should think about four or five times.

Altogether? Yes.

Within what period? Within two and a half years.

The last two occasions were in October and December? Yes; but I would not be positive. December was the last month I was attending the arrival of trains.

*Mr. Montagu.*] Where were you standing when the ticket incident occurred? Close beside the door going out into the street from the platform.

The platform door or the street door? The platform door.

Who was taking the tickets that night? Night-officer Lord. He always did take those late trains.

How far were you standing from Lord? Just close beside him on the other side of the door.

You said just now there was no bad language? Not to my hearing.

If there had been you would have heard it? Certainly, on that night.

You heard her say, "It is all right," when she was going out? I believe those were the words she used.

She just went straight through? She got out the best way she could.

You never at any time heard her use bad language? Not personally.

And you have stated that you considered her drunk, or under the influence of liquor, because she was unable to walk straight and her hair and clothes were disarranged? That is so.

She was not creating any disturbance on that occasion? No.

You have not seen Mrs. Gilmore come home at night time by train since last December? No; that is the last time I was on that shift.

Since last December you have not seen Mrs. Gilmore in a similar condition to that which you have related? No.

*Dr. Manning.*] You do not know whether Lord got the ticket or not? I do not remember. I know the night-officer asked Mrs. Gilmore for her ticket, and I think she said, "It is all right," and passed through the door.

*Mr. Montagu.*] Unless a person were creating a disturbance you would not arrest them? No, unless they were unable to take care of themselves.

There was nothing else to guide you except that you judged by appearances? Quite so.

[Witness withdrew.]

Donald M'Donald examined:—

(Witness stated that Webster, railway official at Granville, was unable to attend to give evidence.)

*Dr. Manning.*] What are you? Railway clerk at the Parramatta railway station.

How long have you held that position? Nearly five years.

What are your hours of duty? From a quarter to 8 in the morning until 5 at night as a general rule. There are times when I am required to stay on later, but not later than about half-past 8.

*Mr. Montagu.*] Do you know Mrs. Gilmore? I know her, but not to speak to. I was a resident of Cowper-street, adjoining the Cottage Homes, from July, 1891, to February, 1895.

You have frequently passed the Homes then? About three times a day.

Have you been in the cottages? I have been in one, though I have frequently spoken to the old people.

Have they ever made any complaint about Mrs. Gilmore? Not those I have spoken to. They always spoke in a high manner of Mrs. Gilmore.

Did you ever see Mrs. Gilmore there? Yes, frequently about the house.

Did you ever hear her use bad language of any kind? Never.

Do you know Lord, the night-officer? Yes.

Do you come into contact with him much? Yes, on business. I have to look after the checking of his cash and the work performed during the night.

Do you know him otherwise? No.

What opportunities have you had of observing him? Every opportunity of observing his character.

Have you anything to say about him in his transactions? I have nothing to say in his favour. I have always looked upon him as a very dangerous man—as a natural liar in my opinion.

Those

Those are strong words to say against a man;—have you any knowledge of it yourself? Yes; in business transactions I have frequently. I have seen him doing some funny things, which, in my opinion, were not straight working.

Anything in connection with his department? Departmental work.

*Dr. Manning.*] In passing the Cottage Homes have you ever heard any noise in Mrs. Gilmore's house? No.

Never at any time? No.

You have never heard any quarrelling? No.

*Mr. Montagu.*] Do you know whether a railway ticket was returned by Mrs. Gilmore on any occasion? I think there was something about a railway ticket some few months ago? I believe she came up in the train and said she had given up her ticket, or had lost it in some way; and the ticket was sent back the following day.

She said she could not find it, and returned it the next day? Yes. Mr. Lord made some remarks about it at the time.

Do you remember what he said? He said perhaps she was drunk.

Would that be as far back as last December? I do not think it was. About four or five months ago.

*Dr. Goode.*] Do you know whether this ticket was returned the next morning? I could not say for certain. I would not like to say it was returned.

What you know was only hearsay? Yes.

*Mr. Montagu.*] Do you know who it was who told you it had been returned? No; I do not recollect.

*Dr. Goode.*] You do not know yourself whether the ticket was given up the night before? I know it was not given up the night before by the statements of the person who was collecting the tickets.

*Dr. Manning.*] Did he leave a memorandum to that effect? I fancy he did.

[Witness withdrew.]

Mrs. Alice Gregory examined:—

*Dr. Manning.*] You are in an official position in the Railway Service? Yes.

What is that position? Ladies' attendant at the waiting-room at the Redfern Railway Station.

There are three or four others, are there not? Three.

And you take the duty in turns? Yes.

For how long? About eight hours.

You remember an occasion on which you had some difficulty with a lady in a closet at the waiting-room? Yes. I have not seen the lady since, so I do not know whether it is the lady you are referring to.

Would you know her again if you saw her? Yes.

Will you describe her? She was taller than me; not much stouter. She had blue-grey eyes, full red lips, and, I think, dark hair. A woman about 30. That is all I can say.

How was she dressed? In a dark dress, I think, with a white gem hat—a round straw hat, with a veil I know, which I think was brown, but I am not positive.

*Mr. Montagu.*] A sailor hat? Yes; plain, without any feathers on it; just a band.

*Dr. Manning.*] Will you tell us what occurred on that occasion;—what time was it? It was about 5 o'clock in the evening. One of the closets was kept an unreasonable time, and there were a great many people in the general waiting-room. I knocked at the door, and a person answered in a sleepy, drowsy way. I left it for a few moments and went again, and she answered again clearly. And then I went again and the door was open, and to my astonishment it was a well dressed woman—not the kind who usually shut themselves in to take a nap. I asked her if she were going by train, and she said "No." I asked her if she had a ticket, and she said "No"; and I had no right to ask her to see whether she had. Then she commenced in an abusive way; but there was a lot before this. Later on she came out of the W.C. compartment. There was a lot of people about. She was arranging her hair and hat. I was attending to my duties, and she said, "You don't know who I am—you don't know I can get you out of your situation in a minute." This was said in a shrill, hard, horrid way. She kept on. I cannot tell you one-tenth of what she said. Later on she said, "Fetch your officials; fetch your officials." The word official not being mentioned before, and saying that I thought she must be something in the Government. The word official is not often used. She said officials in an insulting way. I went to find an official, but could not see one at the time, and I thought it would be over. She came up close to me, walking close to me in whatever I did in an insulting, quarrelsome way. She was under the influence of drink undoubtedly. Then I went into the station-master's office—he was not there,—and while I was there she got into a great temper. I could find no porter; they were all busy. She said, "You are slinking, are you!" about six times, in a horrid way, and in a high shrill voice. There was a train full of people waiting to go out. I think it was the 10 to 6 train. She said, "Go in and clean up the closets; that is your place," in an abusive way, and walked on then down the platform. Those are the words, I remember perfectly.

Was any bad language used? No; no bad language.

The language was abusive and taunting, but not bad? Yes.

Why do you think she was intoxicated? She smelt very strong of liquor, and had the appearance of it altogether—a flushed appearance.

Do you know where she came from? No.

You did not see her go into the closets? No; I saw her on one other occasion about eighteen months previous to this. When she began in this abusive tone, I recognised her. I am sure she was the same woman.

[Mrs. Gilmore who had not been present during this witness' examination was here called in.]

*Dr. Manning.*] Do you recognise this as the person? I would not swear to her. I am not sure.

You are not sure of the voice? I cannot swear to that either.

Did you make any inquiries afterwards? Yes; it was through the inquiries I made, that I was called here as a witness I daresay. I wanted to find out who she was.

What inquiries did you make? I went to the station-master to complain to him about ten minutes after. Then I spoke to the inspector, and inquired from another inspector. That is all.

Did you find out anything as regards who she was? No.

Nothing as regards her being a matron of an asylum? No, nothing of the sort. When I saw this in the paper, I wondered if it was the same woman.

*Mr. Montagu.*] And then did you make a communication with Mr. O'Reilly? No.

Did Mr. O'Reilly come to you? Yes.

When did Mr. O'Reilly come to you? Two days ago.

Did you make a statement in writing to him? No.

You simply detailed the circumstances as you have told the Board here? Yes, but not so fully.

And upon that you were asked to come here? Then I went to the station-master to make him fully acquainted with the whole thing, and to-day I got word to come to Parramatta.

[Witness withdrew.]

Sydney Rundle Walford examined:—

*Dr. Manning.*] What is your occupation? Brewer.

In Sydney or Parramatta? Parramatta.

How long have you lived here? Twelve years.

*Mr. Montagu.*] Do you know Mrs. Gilmore? I cannot say I do. I live quite near.

You live close to the Cottage Homes? Just on the rise of the hill, about 50 yards away.

I suppose you pass by that way? Yes, a good deal.

Have you been over the cottages? No.

You pass by a good deal? Yes; I daresay I pass by once a fortnight or month.

Have you ever seen any of the people in the cottages? Yes.

Have you heard them make any complaint in any way? No; they have never said anything to me. I have generally given them a few coppers. That is the only intercourse I have had with them.

Have you ever seen Mrs. Gilmore at the cottages? No; I have never seen her. I have never noticed her there.

Have you passed by there in the evening? Very seldom of an evening.

When you have, did the place appear to be orderly? Yes, quite. I have been coming by the late train from the theatre perhaps, but I have never noticed any noise.

Is there anything you can tell us about Mrs. Gilmore? I know nothing. I told Mrs. Gilmore when she came to see me I could say nothing for or against her, except that I have never been annoyed in any way by any noise or rows. I have been living within 50 yards of the place. There is only Mrs. Creasy's between my house and Mrs. Gilmore's, so you would think I should have heard it if there had been any excessive noise.

[Witness withdrew.]

Mrs. Janet Gilmore examined:—

*Dr. Manning.*] You are the matron of the Cottage Homes? Yes.

How long have you held that appointment? Seven years next February.

What appointment did you hold prior to your going there? I was housekeeper at the Government Asylums Office in Pott-street, I think, from the beginning of June until the date of my appointment.

Who appointed you to that position? Mr. Critchett Walker.

Was that before Mr. Maxted took charge of the Department or not? I do not think Mr. Maxted was then really appointed. His name was mooted, but he was not appointed.

You were appointed to the Service before Mr. Maxted was appointed to his present office? Yes.

Mr. Maxted was then in the Service when you were appointed as matron of the Cottage Homes? Yes.

Was that appointment made on his recommendation, do you know? I knew Dr. Tarrant and Mr. Humphery, who went to Mr. Critchett Walker and asked that I should be given this appointment for the sake of my first husband, Major Coote of the 26th Cameronians. He was a Mason and Mr. Humphery was a Mason. Major Coote was a distant relative of Dr. Tarrant's.

Mr. Gilmore is no longer in the Public Service? No.

How long is it since he was? He was in the Harbours and Rivers Branch, and through no fault of his, when the present Government came in at first they retrenched a lot of men in that particular department and he was one amongst the number.

He was originally in the Asylums Department and exchanged into the Harbours and Rivers, and from there was retrenched? Yes.

Has he had any occupation since he was retrenched? Nothing at all.

[Mr. Montagu handed in a letter addressed to Mrs. Gilmore, from Mrs. Tarrant, marked "B" herewith.]

*Mr. Montagu.*] During the whole period of your appointment as matron of the Cottage Homes, Parramatta, have you at any time taken liquor to any extent? No, I have not. I have taken a glass of beer or a glass of stout with my food, but never anything more.

Are you in the habit of keeping liquor in your house? No; we do not keep it in the house.

And on rare occasions when you do take a glass of beer or stout, you send out for it? Always.

And you only take it with meals? I never take it in the morning or evening, only in the middle of the day.

Never in the morning or evening? Never.

And you have been advised by medical men that it is not a good thing for you to take? I could tell by my own feeling that I never wanted it. I have no taste for it. I have only taken it as a help to digest my food; tea does not suit me when I am eating meat or vegetables. That is the only time I take it.

There

There is no truth whatever in the statements alleged against you that you have been constantly under the influence of liquor? No; I can safely say people are quite mistaken in my character in that respect.

You have for some years past, I understand, been suffering from dyspepsia? I have suffered with indigestion and nervous dyspepsia for ten years—ever since I had a shock in Tasmania. I have never recovered it since. I have had a lot of trouble in those cottages. I lost a son there when I came first. I have always felt it very much having to live there. I would have gone away but that my living depended upon it.

*Dr. Manning.*] What family have you now? A son by Major Coote, 18 years old, and two little girls by Mr. Gilmore. I have had seven children, but I have only three living out of the seven.

Does your son live at the Homes? Yes.

*Mr. Montagu.*] Does he live with you? Yes; he is a kind of clerk at Macquarie-street.

I understand you have been on several occasions in the train when these fits of hysteria have come on? I have, once or twice. On one occasion this sickness came on very suddenly. I had some very sad news from home. I had been worrying very much.

You will admit that you are of an excitable nature? I cannot help that; I must have been born like it. I try to control myself as much as I can.

Do you remember going, on several occasions, with friends to the theatre in the evening? Yes, I have gone to the theatre on various occasions—with Mrs. Johnson more than with anybody else.

Mr. Gilmore has not gone with you? Mr. Gilmore does not care to come out. He will not leave the two children. One of them is subject to croup. He does not like to leave the children; otherwise he would come with me.

Allegations have been made against you that you have used bad language, have you done so? No, I am certain I never in my life. I want to make a statement about what Dr. Violette said the other day. He must have made a mistake about the word. He said I called my husband a something cur; but I have never done such a thing. I believe what I did say one day was, when I felt very angry with Mr. Gilmore, who brought it on himself, that he was a loafing cur. The other word I did not use.

Dr. Violette made a mistake in the word? I think I said he was a loafing cur. He does not like hard work. That is what I meant. I am never happy unless I am working about the place. Dr. Violette made a mistake in the word. I felt it very much when he said it. It was not a very ladylike word; even loafing is not a nice word, but it is a Colonial word. Instead of saying a lazy man here you say a loafing man.

What nationality are you? I am Scotch.

You have heard what has been said about creating a disturbance or scene at Granville on the night of the 4th of September;—were you in Granville that night? I have never been in Granville but once in my life, and that is years ago.

Do you recollect having a dispute with Night-officer Lord about your railway ticket? That might have been on the night I felt so terrible sick—the night that I told Mr. Maxted I felt so bad. I might not have been able to find it. That may have been the case; I will not say it is not. At all events, I can conscientiously swear that I never once sent a ticket up to that railway officer. They are telling a falsehood. Not so long ago I came across a half ticket in the drawer; I must have thrown it in there. I destroyed it and put it in the fire. I said to Mr. Gilmore at the time, "That must have been the ticket I ought to have given up." I may not have given up the ticket that night, because I felt too ill to be worried looking for it; but the ticket was never sent up to Mr. Watsford, as Mr. Lord says.

They did not say they knew it was, they were only told so;—that is the only occasion that you recollect? That is the only occasion, decidedly.

Is there any truth whatever in the allegation that you told someone they could go to a certain place? I am positive I never said such a thing in my life to anyone.

You have heard what Chesshur said;—did you use such language? I have never used any strong language that people could speak about me in this way. They may have heard it from someone else in the house; they never heard it from me.

You did not use it? I did not.

I may take it that you have always been attentive to your duties, consistently and conscientiously throughout? I have done my best always. Sometimes it was very hard to do it, and I have had very little support. Some of the inmates have threatened my life, and that has all told on my nervous system and affected me.

I suppose some of the inmates themselves have used very strong language? They have. One man who has gone away now—a Frenchman—if he did not get everything he wanted he would curse and swear and come to my back door and call me fearful names. That was just before one of my children was born—the last one. This man Mau threatened to strike me with a tomahawk. If I had not got out of the gate he would have struck me. He struck the gate as it was. I have had some rough treatment.

Some of the inmates have come to your cottage and used strong language there? They have indeed; this Frenchman particularly.

So that it is quite possible that when witnesses say it was you, they may have mistaken you for someone else—perhaps one of the inmates? They may have done so. I have had no satisfaction. I consider I have been to a certain extent peculiarly illused.

When you went to the theatre in the evening, or to your friends, did you have any liquor of any kind? I might have had a glass of wine with my food when I have had dinner in town.

On the two or three occasions in the train your illness was brought on by your own physical infirmities? Once, I have said, I had had bad news from home and I was thinking about it.

How many times, on an average, do you go to town during the month? I can say I have never exceeded three or four times a month. My allowance is three times a month—two week days and the last Sunday in the month. If I exceeded that I generally mentioned it to Mr. Green. I have to send in a paper to say how often I have been out during the month. If I have exceeded my leave of absence I have to state it in this paper. Then Mr. Maxted gave me directions to keep a book; he said I did not do so. I do not know why I did not do so; it was pure carelessness. I have always sent in the paper every month, and they will show that my leave has not been exceeded.

*Dr.*

*Dr. Manning.*] The times you mentioned are the recognised times that you were allowed to leave the institution? Yes; three times to go to Sydney—two week days and one Sunday. I was not supposed to leave at any other time without consent from the office. I may have gone away more on one or two occasions, but if I have I have always mentioned it to Mr. Green.

Does that refer to absence during the day? It includes evenings.

There is no limit to your going to Sydney at times when you are not on duty in the evening? I have always inferred that I was simply allowed those three days to go to Sydney, and I can honestly say I have never gone at night to Sydney. I have left in the forenoon or afternoon and spent the day in Sydney with friends. I have not left in the evening for years. I have done so years ago on two or three occasions, before our children were born; then Mr. Gilmore and I used to go together.

You considered you were restricted to those days and evenings? Yes.

Mr. Maxted said you were not restricted as regards the evenings? Mr. Maxted knows I have not left in the evenings. Mr. Green would soon hear about it if I had. There are plenty of people who would give him all the news. He knows very well I have not done so.

Your returning home in the evening was the result of your visits paid to town during the day in accordance with your leave of absence? Exactly.

[Witness withdrew.]

## Commission.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen,  
Defender of the Faith, and so forth,—

To our trusty and well-beloved—

The Honorable Sir ARTHUR RENWICK, Knight, B.A., M.D., a Member of Our Legislative Council  
of Our Colony of New South Wales, President;

FREDERIC NORTON MANNING, Esquire, M.D., Inspector-General of the Insane;

ANDREW GARRAN, Esquire, LL.D.; and

JAMES SINCLAIR MCGOWEN, Esquire, a Member of the Legislative Assembly of Our said Colony,—

Greeting :—

KNOW ye, That We, reposing great trust and confidence in your ability, zeal, industry, discretion, and integrity, do, by these presents, authorise and appoint you, or any two or more of you, as hereinafter mentioned, to make a diligent and full inquiry into the conduct and management of the Licensed House for the Insane, at Cook's River, near Sydney, in Our said Colony, known as "Bayview House," and particularly as regards the allegations made in the said Legislative Assembly respecting the treatment of certain patients in the said Licensed House: And we do, by these presents, grant to you, or any two or more of you, at any meeting or meetings to which all of you shall have been duly summoned, full power and authority to call before you all such persons as you may judge necessary, by whom you may be better informed of the truth in the premises, and to require the production of all such books, papers, writings, and all other documents as you may deem expedient, and to visit and inspect the same at the offices or places where the same or any of them may be deposited, and to inquire of the premises by all lawful ways and means: And We do give you the power, at your discretion, to procure such clerical and other assistance as you may deem necessary for enabling you to duly execute this Our Commission: And Our further will and pleasure is that you do, within two months after the date of Our Commission, certify to Us, in the office of Our Chief Secretary, under your or any two or more of your hands and seals, what you shall find touching the premises: And We hereby command all Government Officers and other persons whomsoever within Our said Colony, that they be assistant to you and each of you in the execution of these presents: And we appoint you, the said Sir ARTHUR RENWICK, to be President of this Our Commission, which said Commission We declare to be a Commission for all purposes of the Act 44 Victoriae No. 1, intituled, "*An Act to regulate the taking of evidence by Commissioners under the Great Seal.*"

In testimony whereof, We have caused these Our Letters to be made Patent, and the Great Seal of Our said Colony of New South Wales to be hereunto affixed.

Witness, Our Right Trusty and Well-beloved Councillor, Sir ROBERT WILLIAM DUFF, a Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, Our Governor and Commander-in-Chief of Our Colony of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this eighteenth day of October, in the fifty-eighth year of Our Reign, and in the year of Our Lord one thousand eight hundred and ninety-four.

(L.S.)

R. W. DUFF.

By His Excellency's Command,  
(L.S.) JAMES N. BRUNKER.

Entered on record by me, in REGISTER OF PATENTS, No. 16, page 147, this nineteenth day of October, one thousand eight hundred and ninety-four.

For the Colonial Secretary and Registrar of Records,

(L.S.)

CRITCHETT WALKER,  
Principal Under Secretary.

## LETTER OF INSTRUCTIONS.

The Principal Under Secretary to The President.

Sir,

Chief Secretary's Office, Sydney, 19 October, 1894.

Dated 18th  
October, 1894.

I am directed by the Chief Secretary to transmit herewith a Commission under the Great Seal of the Colony appointing you, in conjunction with the other gentlemen named therein, to be a Royal Commission to make a diligent and full inquiry into the conduct and management of the Licensed House for the Insane at Cook's River, near Sydney, known as "Bayview House," and particularly as regards the allegations made in the Legislative Assembly respecting the treatment of certain patients in that institution.

2. I am desired to add that the Governor-in-Council has also been pleased to appoint you to be President of the Commission.

3. You will be provided with such clerical and other assistance as may be deemed necessary for enabling you to execute the Commission.

I have, &amp;c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Hon. Sir Arthur Renwick, Knt., B.A., M.D., M.L.C., &amp;c., &amp;c.

## EXTENSIONS OF COMMISSION.

WHEREAS it is necessary to extend the time within which the Commissioners are to make their report in the above matter. Now, therefore, I do hereby, with the advice of the Executive Council, extend the time within which the said Commissioners are to make such report for a period of two months—to take effect from the 18th instant.

Given under my hand at Government House, Sydney, this nineteenth day of December, one thousand eight hundred and ninety-four.

R. W. DUFF.

By His Excellency's Command,  
JAMES N. BRUNKER.

WHEREAS the time appointed for the return of the Commission in the above matter was, by an instrument dated the nineteenth day of December last, extended for a period of two months: And whereas it is necessary to extend the same still further, Now, therefore, I do hereby, with the advice of the Executive Council, extend the time within which the Commission are to make their return to and for a further period of one month beyond the time in and by the aforesaid instrument appointed for the purpose—to take effect from the 18th instant.

Given under my hand at Government House, Sydney, this nineteenth day of February, one thousand eight hundred and ninety-five.

By deputation from His Excellency,  
FREDK. M. DARLEY,  
Lieutenant-Governor.

By His Excellency's command,  
JAMES N. BRUNKER.

WHEREAS the time appointed for the return of the Commission in the above matter was, by an instrument dated the nineteenth day of February last, extended for a period of one month: And whereas it is necessary to extend the same still further, Now, therefore, I do hereby, with the advice of the Executive Council, further extend the time within which the Commission are to make their return until the 9th April proximo.

Given under my hand at Government House, Sydney, this twenty-second day of March, one thousand eight hundred and ninety-five.

FREDK. M. DARLEY,  
Lieutenant-Governor.

By His Excellency's Command,  
JAMES N. BRUNKER.

## INTERIM REPORT TO THE HONORABLE THE CHIEF SECRETARY.

Sir, Board Room, Chief Secretary's Office, Sydney, 11 December, 1894.

I have the honor to inform you that the period of duration of the Royal Commission appointed to make a full and diligent inquiry into the working and management of the Hospital for the Insane, known as Bayview House, Tempe, will lapse on the 19th instant. In consequence of the protracted nature of the investigation, we shall, as Royal Commissioners, be unable to present our report to His Excellency the Governor within the time prescribed in the Commission, I therefore beg to request that the time be extended for a period of two (2) months—to a date expiring on February 19, 1895.

From official papers placed at our disposal to aid us in executing the terms of our Commission, we see that, on July 10, 1891, in reply to a letter written by Dr. A. J. Vause on 23rd of the previous month, the then Colonial Secretary approved of the renewal for the further period of three years from 31st December, 1891, of an agreement entered into between Dr. Vause and the Government for the care of fifty insane patients in the Licensed House for the Insane, known as Bayview House, Tempe, at the rate of £1 2s. 6d. per week per patient, with the distinct stipulation that such renewal was granted under exceptional circumstances, and that the Government patients were to be removed on 31st December, 1894.

In a further paper, dated December 1st, 1893, the Inspector-General of Insane reported at length, for the information of the Chief Secretary, on the farming out of the insane at Cook's River Road. Dr. Manning then submitted that there had been no economy, but a greatly increased cost in farming out insane patients, and, incidentally, that by reason of political and other extraneous influences, it had been found difficult for the Government to regain possession of the patients farmed out: It was therefore necessary to point out that the whole principal of farming out insane patients is wrong. This memorandum was submitted to the Chief Secretary, who, after careful consideration of Dr. Manning's report and proposals submitted by Dr. Vause, and personal visits to the Tempe, Rydalmere, and Parramatta establishments, made a minute dated 19th March, 1894, to the effect that he had had the figures of cost at the private establishments and the cost of patients in Government institutions carefully checked, and, in consequence, was led to the conclusion that no further extension of the system of boarding-out of insane should be permitted, and he fully concurred in Dr. Manning's report and suggestions; and furthermore, he desired that all parties be so informed, and arrangements made accordingly.

In the meantime, therefore, while asking for an extension of time, we, as the Commissioners conducting this inquiry, recommend and unanimously approve the steps we understand are being taken by the Government for the removal of the Government patients from Bayview House on the ground of increased economy, as fully explained in the report of the Inspector-General of Insane.

I have, &c.,

ARTHUR RENWICK,  
President.

To the Honorable the Chief Secretary, Sydney.

ROYAL COMMISSION TO INVESTIGATE CERTAIN CHARGES AGAINST BAYVIEW  
ASYLUM.

MINUTES OF EVIDENCE.

FRIDAY, 2 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
Esq., M.D., INSPECTOR-GENERAL OF THE  
INSANE.

ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause attended on his own behalf to hear evidence and cross-examine witnesses.

C. E. Jeanneret, Esq., sworn and examined:—

1. *President.*] This is a Royal Commission appointed to make a diligent and full inquiry into the conduct and management of the Licensed House for the Insane at Cook's River, known as Bayview House, and particularly as regards the allegations made in the Legislative Assembly by you, as Member for Carcoar, respecting the treatment of a certain patient. We see from the copy of *Hansard* in our hands the nature of the charge you then made, and we should like to know if the remarks I am about to read as an extract from your speech contain the real charge you desire to make. These words, taken from your speech, are:—"I think it behoves the Government, upon the statement I have laid before the House, to make full inquiry. The inquiry will prove this: that a gentleman has been for months past—for the last four months to my knowledge—kept from 5 in the afternoon till 7 in the morning, over twelve hours, in a cold stable without even a bed to lie upon, without any water, without any attendant, without any food, having upon his body nothing but his nightshirt." These words, I think, contain the real charge you made to the House on that occasion, and do you still maintain that the charge is valid and a matter of fact? Yes; to the best of my knowledge that charge is true.
2. Of your own knowledge, do you know anything concerning the management of the asylum or of Dr. Vause, or of the general working of the institution? No; I do not.
3. Upon what grounds do you base this charge? I made that charge from information I received.
4. So, then, upon the information given to you, you made that charge in the Legislative Assembly? Yes.
5. We, as the Commission, wish you to tell us all that you think proper of the circumstances which led you to make this charge. Our desire is to get the fullest information possible upon this subject. Therefore, will you tell us what led up to your action in the Legislative Assembly? Some time ago, I think about a month before I took action in the Assembly, a house inspector under the City Corporation, a man named Gearey—I may say, a very reliable man—made a certain statement to me concerning an inspection outside the boundaries of the city. I did not pay much heed to what he said at first. He saw me on a second occasion, and asked me if I had done anything in reference to the first statement he made. I replied, "No, I have not; but I will see Dr. Manning about it." I went to Dr. Manning without further delay. I called at his private residence, but he had gone to Goulburn, I believe. On the next day I was in the company of Mr. Alfred Bennett, Mr. Taylor, and Sir William Manning, at the powder works at Manly Beach, and, in the course of conversation, I asked Sir William Manning if he had heard anything about the reports current relative to case No. 1 at Bayview. Mr. Bennett replied, "I have heard something about them; I have had them investigated, and there is nothing in the charges; I have had a thorough investigation made, and there is nothing in it." A few weeks passed, and Gearey came to me again upon this subject. I said to him, "You seem to take a great interest in case No. 1," and he replied, "I do so because of a very long-standing friendship, and I feel myself under some obligation to him for kindnesses rendered years ago." He then added, "I wish you to take steps in this matter, because all I have told you is absolutely true." I, thereupon, went to Dr. Manning, but unfortunately Dr. Manning was again out, and therefore I did not see him. I was going away to Queensland then for the purpose of being present at the opening of a section of the Tweed railway, and knowing I should be absent some days, I went to Messrs. Allen and Allen, my solicitors, to lay the case before them. I saw Mr. Arthur Allen, of that firm, and after other conversation I suggested that on my return to town we should go to Gearey and ascertain as far as possible the truth of the statement made. That was on the Monday.
6. Do you mean the Monday prior to the day on which you made this speech? No; a fortnight before that. It was then arranged that I should send Gearey to Mr. Arthur Allen. I knew nothing more until I returned from Queensland, which was the day before I brought the matter up in the House. Then I called on Dr. Manning at Gladesville.

C. E.  
Jeanneret,  
Esq.  
2 Nov., 1894.

7. *Dr. Garran.*] You said "we." Do you refer to anyone else besides Mr. Arthur Allen and yourself ;— do you mean another house inspector or some person appointed by the Government? On the Monday night I went to Dr. Manning's house, and ascertained that he had gone away to Goulburn by the 5 o'clock train, and it being the second occasion on which I had attempted to see Dr. Manning on this subject, I thought I would be justified in bringing the whole question before the House. After consultation with a medical friend in Sydney, whose advice I took, I determined to bring it before the House, and I carried out my determination.

8. *President.*] And the charge you made is the same in substance and in fact as the charge I read to you from *Hansard* a few minutes ago? Yes; and further, that when friends of the patient went to visit him at the asylum they were shown into an ante-room, "where they were kept waiting for ten minutes or a quarter of an hour. They were then shown into an elegantly furnished bedroom in which there were two beds, one for the patient and one for an attendant. They saw the patient in clean and comfortable sheets in a good bed; but, will hon. Members believe me when I tell them that, on each of these visits, the patient was brought out from the stable in the yard, where there was not even a mattress for him to lie upon, until one of the attendants in his own time made him one. There was not a blanket or rug of any kind; but there were three pieces of bagging or calico—something of that kind—and the three put together were not sufficient to cover a human being." That, Mr. President, was what I said previously—or the substance of what I said in Parliament.

9. Personally, do you know anything concerning the charges you have made? No. Personally, I know nothing at all about them. I made the charges in Parliament on the evidence of one whom I considered to be a reliable witness. Gearey is the man I mean. I have always found him most reliable, and I believe he can substantiate all I have said. I rely for my charges upon the accuracy of what Gearey told me. I may say I have seen Mrs. Clowdy, the daughter of the Hon. J. F. Burns, and another lady, whose name I forget, a lady who wrote to me from Lithgow, who also made complaints. I have destroyed that letter, but I showed it to Dr. Manning. I also received an anonymous letter, which I handed to Dr. Manning. This lady, who wrote to me from Lithgow, told me of things which confirmed me of the necessity for taking the action I took.

10. Do you know a man named J. J. O'Brien? I have heard of him; but it is mainly on Gearey's statement that I rely.

11. *Dr. Manning.*] Is Gearey an inspector of Chinese houses? Yes; he was a general house inspector; but I think he is now an inspector of Chinese houses.

12. When you called at my house were you given a reason why I could not be seen? Yes; I was informed you had left for Goulburn. I communicated with you on the two occasions named, and I am quite certain that it was my earnest wish to see you.

13. Did you leave your card when you called? No, Dr. Manning; I have called very often upon you during the many years you have been my neighbour, and I do not think I ever left my card at your house.

14. *President.*] You mentioned the name of Mrs. Clowdy? I saw Mrs. Clowdy; she expressed a wish to see me, and I went out to her house and saw her.

15. Where does this lady reside? Mrs. Clowdy resides with her husband, who is a Custom House officer, living at Paddington.

16. Had you any particular reason for making these charges in Parliament? None beyond that I considered it to be my duty as a public man to lay the statements I made before Members of the House.

17. You merely thought it your duty as a public man? Yes; as a Member of the House I considered the action I took was my duty towards the public.

[Witness withdrew.]

Professor Anderson Stuart, sworn and examined:—

Professor  
Anderson  
Stuart.  
2 Nov., 1894.

18. *President.*] As you are aware, this is a Commission appointed to inquire into the conduct and management of the Bayview Asylum at Cook's River. We have before us the report of a visit you made to that institution on the morning of the 20th May last. In that report you say:—

Sir,

As instructed by you on the evening of the 17th instant, I saw Messrs. Allen and Allen on the 18th; and from their Mr. \_\_\_\_\_, as also from H. Gearey, and from Mr. \_\_\_\_\_, son of Case No. 1, both of whom were present, I heard the accounts of the conditions said to be surrounding the patient at the Licensed House for the Insane, Cook's River. In order to further carry out your directions, I concluded that it was necessary for me to visit this establishment in the early morning, so that, if he were accommodated in the place and manner alleged, I should be in a position to verify the same.

On the 19th I completed my arrangements, and, starting from Sydney on the 20th at 5 a.m., I visited the licensed house at 5:50, with the results which follow.

I took with me Mr. Edmund Sager, Secretary to the Medical Adviser to the Government, who should accompany me as a witness of what might occur, H. Gearey and J. J. O'Brien, who had been the means of communication with Messrs. \_\_\_\_\_, and Detective Goulder, as a member of the Police Force, placed at my disposal by the Inspector-General of Police at your request, so that the party visiting a suburban house at such an hour and on a Sunday morning should be free from possible interference by the local police.

I left Goulder at the gate and went straight towards the office, the situation of which I well knew. Just at the office door I encountered an employe, of whom I inquired for the person in charge. He at once directed me to the head attendant round the corner to the left, following Gearey and O'Brien, who had preceded me. Having gone as directed, we found ourselves in a sort of courtyard, where, after a time, we found an attendant, who went to rouse the head attendant. After considerable delay the latter came, and to him I stated my office, authority, and business; but he said he could not let me see any patient without Dr. Vause's direction, and the doctor was at his residence. He then said I should go to the office. Thereupon I said that I had done so, and had been directed to where we then were. He then led me and Mr. Sager to the office, but said nothing to Geary and O'Brien, who therefore remained where they were, standing near a building with the external aspect of having been a stable with hay-loft above it at some previous time, with no windows, but now provided with two separate barred and padlocked doors, each with a small observation hole.

Arrived at the office, great delay occurred ere anyone answered the head attendant's summons by the electric bell. During this time I frequently urged him to take my card to Dr. Vause, or to find someone who would do so, but he declined to do either. Finally a maid-servant came, took my card, and soon returned with an intimation that Dr. Vause would be there in a few minutes, and he, in fact, soon appeared.

I apologised to Dr. Vause for disturbing him at that early hour, but told him that I had been directed by you to see a patient, concerning whom statements had been made, which rendered it necessary that you should take action. In answer to his inquiry as to their nature, I told him the gist of what had been communicated to you and to me. Dr. Vause asked who the patient was, and I now, for the first time, disclosed the name of Case No. 1. Dr

Dr. Vause showed no hesitancy in replying that I should see him, and asked me to sit down, but I requested to be allowed to accompany the doctor, and to be taken to where the patient was directly, so that I might see him as he actually was. I was led across a lobby, through a small dormitory, into a lavatory adjoining, and as we entered at one end of the lavatory, the patient entered at the other end by a door leading from the exterior of the building. The patient immediately addressed himself to us, but, just noticing him, I requested to be taken to where he had come from, and on passing out at the door through which the patient had entered, I was met by Gearey, who said that the patient had just been taken out of the left-hand compartment of the stable-like out-house, the door of which I saw was now again barred and padlocked, but Dr. Vause directed it to be opened.

The compartment was quadrangular, about 12 x 12 feet wide with a very high ceiling, but with no window or means of ventilation or of warming. The wooden floor was at the level of the ground and had been fouled. The odour of the place was most repulsive—a stale urinous odour of considerable standing.

The sole contents of the place were lying upon the floor and consisted of a mattress and three pieces of coarse canvas cloth in single ply. All of them were fouled. The mattress had a coarse canvas tick, and its straw stuffing felt hard and inelastic, as if it had been lain upon for some time. Gearey and O'Brien also saw this interior, and I then directed them to return to the waggonette.

Mr. Sager and I then accompanied the doctor back through the lavatory to the dormitory, where we found the patient sitting, and which we were now told was his room. He seemed to remember me somewhat, for he called me by the name of a medical gentleman in Sydney whom I am said to somewhat resemble (Dr. Scot Skirving). I felt to see what clothing he had on—a flannel shirt, a woollen jacket and trousers.

Dr. Vause said the patient was put in the outhouse when violent and specially ill, but no attendant remained in the outhouse with him, and that no attendant would see him between 10 p.m. and the morning—I presume 7 a.m., since when we first saw him he was being brought into the lavatory for his morning ablutions in the ordinary course of events.

I did not do much by way of an examination of the person of the patient, for it was more his surroundings that I came to inspect. How one of his eyes had become ecchymosed I did not inquire.

I enclose herewith a statement by Mr. Sager and one by Gearey and O'Brien, written down at my request immediately after the transaction and independently of each other.

Sydney, 21st May, 1894.

T. P. ANDERSON STUART, M.D.,  
Medical Adviser.

19. Are the facts stated in this report correct to the best of your knowledge? Yes, they are.
20. Have you anything to add to the statements you there make? I do not know that I have much to add to the statement of fact, but I have ample reasons to give in relation to the statements made. I do not think there is much objection taken to my statement or my report, because Dr. Manning, as far as I can understand him, agreed with it.
21. As a matter of fact, then, you found the patient, into whose case you visited the asylum to inquire, in the circumstances you mention in your report? Yes, exactly so.
22. You say that after seeing Dr. Vause you were taken to where the patient was, being led across a lobby through a small dormitory into a lavatory adjoining, and as you entered at the one end the patient entered at the other end by a door leading from the yard? Yes.
23. Before seeing Dr. Vause, did you leave two men near the building from which the patient was brought out and in which he had slept during the night? Yes.
24. Did you then insist on immediately going with Dr. Vause to the room from which the patient had been taken? Yes.
25. What was your reason for visiting the institution at such an early hour in the morning? I must fully explain to you the circumstances. I had an interview with the then Colonial Secretary, Sir George Dibbs, who informed me that a certain patient was said to be placed in circumstances which seemed to me to be absolutely incredible. I at once said to Sir George Dibbs, after hearing his statement, that so far as I could see there could not be any foundation in fact for the allegations made. I was referred to Messrs. Allen and Allen. I saw Mr. Arthur Allen, and heard from him certain particulars, and I told Sir George Dibbs of my interview with the Allens, with Gearey, and \* \* \*, the son of the patient. Sir George Dibbs said to me, "This affair must receive the fullest investigation, and you will have to make it." I said, "If it has to be done, how is it to be done." Sir George replied, "You must make your own arrangements. The statements say that the patient is being maltreated, and you must ascertain whether they are true or untrue." I realised that I should have some difficulty during the day-time to see the patient actually as he was in the place in which he was supposed to spend his nights. I knew by going later in the day I should not find him in the room in which he was said to have slept. Therefore, I made my visit early in the morning.
26. *Mr. McGowen.*] You say you arrived at the institution at ten minutes to 6 in the morning, but you did not find the patient until ten minutes to 7? Yes; that is so.
27. *President.*] Did not that fact strike you as being something out of the ordinary? It impressed me that it was, to say the least, very irregular. The patients were walking about the yard and grounds.
28. Then the patients did not seem to be under any control? None whatever. They were allowed to go about as they liked during the time we were waiting for somebody to come to us.
29. Referring to the room in which the patient had slept, do you not say that the wooden floor was at the level of the ground, and had been fouled; that the odour of the place was most repulsive—a stale urinous odour, of considerable standing? Yes.
30. Was there excreta lying there? Yes.
31. Were you impressed with the fact that the room had been carelessly cleaned? Yes; it had not been cleaned out after being used by the patient. There appeared to have been an attempt made to half wipe up the filth, and hurriedly make the room decent.
32. Do you think there had been proper steps taken to clean this room after its use as a sleeping apartment by the patient? No. As I say in my report, the contents of the place were lying on the floor, and consisted of a mattress and some pieces of canvas, all fouled.
33. What is your meaning of stale urinous odour, of considerable standing? I could detect it. Fresh urine has one smell, stale has another, and it was stale urine that we smelled on this occasion. More than that, the patient's son has informed me that he has visited the room at between 11 and 12 o'clock in the day, and still the smell was there.
34. Were there any beds in the room? It all depends on what you call beds.
35. You say that there were mattresses in the room? There was a mattress and three pieces of coarse canvas cloth, in single ply, all befouled. The mattress had a coarse canvas tick, and the straw stuffing felt as if it had been lain on for some time.
36. How was the ventilation of this room? It was absolutely insufficient. There was one small window screened, I believe, by a shutter. It was totally insufficient.

Professor  
Anderson  
Stuart.  
2 Nov., 1894.

Professor  
Anderson  
Stuart.

2 Nov., 1894.

37. Did you inspect any other part of the building? I did not; I only saw this one patient. My commission did not extend beyond this, but what I found and stated in my report is perfectly true.

38. *Dr. Garran.*] When you went in you say you had to wait for the head attendant? Yes; my report says so. When we went in we found no one at all; but near the office door, a little later on, we found an employee, a night-soil porter I think he was. He directed me to the head attendant, round the corner to the left. I saw no one at all until an attendant came to us in a sort of court-yard, and I asked him who was in charge. He said that an attendant was. Something took place which led me to believe or to suppose that he was not particularly anxious either to find, or for us to see the head attendant. I told him my name and the nature of my business, and that I must see the patient. He informed me that I could not see any patient without Dr. Vause's direction, and Dr. Vause was at his residence. I and Mr. Sager returned to the office, where we were informed that the head attendant would come down in a minute. We waited a long time, but he did not appear.

39. Then the head attendant was not in charge that night or early that morning? No.

40. Did you hear of or see any immediate attendant whose duty it was to look in upon the patient every two hours during the night? I did not; I only saw two men bringing the patient through the doorway leading from the lavatory.

41. Had you any opportunity of seeing the patient in his room before he was removed? No.

42. What opportunity was there for anyone to go into this room after you first arrived on the premises and before you saw the patient. Could anyone have gone there without being seen? I think not; for Gearey and O'Brien remained where they were while Mr. Sager and myself returned to the office.

43. Could they see anybody who went in that room? Yes.

44. Concerning this smell of which you speak: If a man confined in this room makes water during the night, and the room is well cleaned early the next morning, would the smell remain?

[At this stage Mr. Edmund Barton, Q.C., accompanied by Dr. Vause, appeared before the Commission. Mr. Barton applied for permission to attend during the sittings of the Commission as counsel for Dr. Vause.

Mr. Barton and Dr. Vause having retired, the Commission considered the application and unanimously decided to adhere to their former resolution that no parties to the inquiry should be represented by counsel.

Mr. Barton and Dr. Vause returned, and the President informed them the Commission considered that in the interests of all parties it would be better that counsel should not appear. They had already determined that Dr. Vause might be in attendance to hear every particle of evidence submitted to the Commission, and, furthermore, that he should be empowered to question all witnesses.

Mr. Barton thanked the Commission for their courteous receipt of his application, but at the same time requested that a note might be taken of his protest against the decision of the Commission.

Examination continued.]

45. *Dr. Garran.*] I was asking you about this urinous odour and the bad smell in the room; would there be any difficulty in keeping it free from such smell? I think there might be a considerable abatement. Utensils should be provided, but the difficulty is in making patients use them. The tendency of lunatic patients is not to use them, but they should be made to get up. In some instances they would not use these things, but they should be trained to it.

46. Do you think it possible to make such other arrangements that would prevent the patients fouling the floor? Yes; they should be made to get up two or three times a night if necessary. As a rule they do not like to be disturbed, and this mode of training might have a tendency to make them more cleanly in their habits.

47. Is there any objection to interfering with patients unnecessarily during the night? Yes, but what is unnecessarily—three times a night is not unnecessarily.

48. Do you think patients would want to make water three times a night? Yes; they would if they were roused up. That is part of the training. This frequent rousing is to train their nervous system into the habit.

49. Supposing a patient is opposed to this, do you think it would be better to disturb him than to let him remain? Yes. There is a certain amount of discomfort in getting up in order to evacuate and pass urine, but that is better than letting them do either or both while lying in bed.

50. Do you think it would be better to get them up as many as three times a night? Yes, I do. It would be better still to follow some advice which is given in a work published in 1894, entitled "Lunatic Asylums; their Organization and Management;" by Charles Mercier. His remarks appear to me to be so sensible that I will with your permission read them. Under the heading of "Dirty Habits" the author says:—"Patients who are of dirty habits need constant attention, and are a source of continual trouble in asylums, but, fortunately, by assiduous attention very much may be done to cure them of the objectionable customs." Going on to speak of the treatment, the author of the work I quote says:—"Patients who are dirty from sheer malice and from a desire to give trouble are a very difficult class to deal with. This category of patients is the most objectionable of all. Such patients are always made the tenants of single rooms in which they are for the most part left during the night to their own devices, and discovered in the morning in a condition of indescribable filth, and this cause is in many asylums unavoidable. But in an ideal asylum in which the number of attendants is not limited by necessary considerations of economy, such patients would have a special attendant to remain with them at night, and to prevent their indulgence in such practices. With the first of the two classes into which the patients of this category have been divided the prevention would then be very easy, and with the second it would not be difficult. Whatever the cause of this uncleanness may be every dirty patient should be trained into habits of cleanliness by being compelled to attend the closet, not only at frequent intervals, but, what is most important, at regular times. The nervous system, as a whole, and any special nervous mechanism of these particular functions is much the creation of habit that when once by persistent training the habit is established by exercising these functions at fixed intervals, and at regular times the nervous system will be broken into conformity, and the habit will at length become unmodifiable by the individual. For this reason patients, who are wet or dirty at night, should be taken up at least three times, and always at the same time every night, and given the opportunity of evacuating. \* \* \* \* \* Besides taking these patients out of beds, which should be done every three or four hours, the night attendant

attendant should at each visit—that is to say, every hour—examine their beds to see if they are dry, and if they should be wet they are to be at once changed, dry macintoshes and dry sheets placed upon the bed. Every such patient should be examined by the night attendant before he goes off duty, and every bed should be dry and clean when the day attendants come on.”

Professor  
Anderson  
Stuart.

2 Nov., 1894.

51. Take the case of a person past middle life, whose nervous habits have been formed, would it be easy to break him into new habits while in a demented condition? I think so. Such is my opinion, formed on the extracts I have read relating to such patients.

52. Then we have the alternative of two evils: one of a man being allowed to lie in bed in a state of filth, and the other that of probable annoyance—waking him up to answer the calls of nature? Yes; and I think the latter is the lesser of the two.

53. Do you know of your own knowledge whether it is irritating and possibly dangerous to wake patients during the night? I am of opinion that it is better to let them sleep if they can, but there should be throughout the night an attendant in a room next door; but there was no such attendant here in this case. The room was an outhouse, and the attendant had to come through a court-yard a considerable distance before being in proximity with the patient.

54. Do you know whether the attendant you saw was attached to this particular patient, or to others in the establishment? I do not know.

55. If an attendant were specially appointed to one patient, would it increase the cost of supervision? Yes.

56. You mention in your report that the building in which the patient had spent the night had the appearance of a stable; do you know if it ever has been a stable? I do not know; I did not make any inquiries on that point. Dr. Manning in his report called it an ugly building, and I in mine called it a stable-like outhouse. If the place had been a stable at any time, and had been converted into its present use, I say so much the worse.

57. *President.*] Are you perfectly satisfied that the ventilation is not as it should be—that is not up to standard? I am, unless you take the smell of a urinal as a standard.

58. *Dr. Garran.*] Are there any means by which this odour can be removed? I think so. The floor could be made to slant slightly, and if of wood it could be impregnated with paraffine oil or many other things. The floor might be of asphalt. It should certainly not be allowed to get into the state it was when a little trouble might keep it comparatively sweet.

59. Could this urine pass through the cracks of the floor to the ground underneath? I should think so.

60. Could not this be remedied? Yes; you could put down a floor and fill up the seams, or, as I said before, it might be of asphalt.

61. At the time you saw case No. 1, was he clothed? Yes; he had on a flannel shirt, a woollen jacket, and trousers.

62. Had he had his bath? He had not.

63. Did you know the state he was in when first the attendant went to see him? No.

64. Were you not allowed to go in the room? No; I cannot say that. As soon as Dr. Vause knew what I wanted he allowed me to go in.

65. But was not that after the lapse of a considerable time from your arrival on the premises? Yes; that is it. It was in the hope of seeing the patient in the sleeping room itself, or immediately as he left it, that I paid my visit so early in the morning. I did not see him until he was entering the lavatory. I had almost to force myself in. When I went to the institution I was fully persuaded that the stories I had heard were not true. I went in there in the spirit of one wishing to clear the besmirched character of a professional colleague, but when I reached the place, and saw the place, the facts came upon me as an absolute revelation, and then I said to myself, “It is all true.”

66. With regard to the covering, you say there were three pieces of coarse canvas cloth? Yes; there were three pieces of canvas.

67. Was there any blanket or coverlet? None.

68. Was there enough covering to keep a man warm during the night? No; they were three pieces of hard canvas. Dr. Manning says it was soft canvas.

69. Was it too hard for the patient to tear? It was a good deal too hard for this patient. I may point out that at Callan Park they have as covering a blanket, on both sides of which is stitched pieces of canvas.

70. In your opinion then this patient was not adequately clothed? He was not.

71. Do you know anything about the patient having a cold bath? I only heard something to that effect.

72. Was the weather at that time too severe for a patient in his state to have a cold bath? Yes.

73. Especially after having been cold perhaps the whole of the night? Yes; he should have had a warm bath to clean him.

74. Must you resort to a warm bath to keep a patient with the propensities of case No. 1 clean? Yes.

75. Would the patient have to go into the open to have a bath? Yes.

76. What was the nature of the weather on that morning? It was a bright, cold, frosty morning; and if it had been a wet morning it would have been just the same.

77. Then are your conclusions as follow:—That there should be better provision for passing excreta and micturating? Yes.

78. That the patient had not adequate clothing? Yes.

79. That his bedding was inadequate? Yes.

80. That the ventilation was not as it should be? Yes.

81. That the lighting of the room was insufficient? Yes; there was not sufficient light either for seeing or getting sweetness.

82. *Dr. Manning.*] What is your evidence about the cold bath? My impression is that he had a cold bath, but for certain I do not know of it.

83. Will you kindly give me the pages on which appear the extracts you have read from Mercier's work? Page 165, paragraph 3; 167, last paragraph; 168, second paragraph; and the last paragraph on page 169.

84. Do you think M. Mercier is referring in his work to patients of wet and dirty habits? Yes.

85. Do you think the same opinion would apply to acute maniacs and general paralytics? Perhaps not. It might apply to quiet patients.

Professor  
Anderson  
Stuart.

2 Nov., 1894.

86. Have you any actual experience in the treatment of insane patients? I was born in one, and brought up in two of the largest asylums in the world. I intended to have made a study of insanity, but I changed my mind. I have been, however, an inspector of asylums in various parts of the world, and I have been in many Australian institutions of a similar nature.
87. But in your experience have you been a medical officer at any one? No.
88. Do you think it would be desirable to disturb the rest of an acute maniac or an acute paralytic for the purposes mentioned in the quotations you have read? No; I do not think it would be advisable to disturb acute maniacs or paralytics.
89. *Mr. McGowen.*] In looking through your report I see, when you refer to the external aspect of the room in which you found the patient, you call it a stable-like outhouse, and then you go on to say, "the door of which I saw was now again barred and padlocked, but Dr. Vause directed it to be opened";—what is your meaning in the word "now"; was the door not barred and padlocked when you paid a previous visit? I had only seen it once in my life.
90. You say that the external appearance was stable-like? Yes; I think I said that, going on the assumption that it has been a stable.
91. Do you not also say that you saw the patient come out? I saw him immediately after he came out.
92. Did he look cold? Yes, he did.
93. Was he shivering? Yes.
94. Did he show any signs of great weakness? You must remember he certainly was not in good health. More than that, he is an elderly man, of spare build, but he did not seem very strong.
95. And was not his eye black? Yes, it was.
96. Did you see any indications of other bruises about his face? No; I merely saw that his eye was black.
97. Are you certain as to there being no ventilation, only one window, and no warmth? Yes. We saw it in the grey light of the morning; and what I saw was such a shock to me that it was quite sufficient to verify the facts, and lead me to believe that the story I previously heard was substantially true.
98. Are you satisfied that the odour was stale? Yes: there was more than one distinct odour. I am perfectly satisfied about that.
99. Do you think those in authority were justified in placing the patient in solitary confinement, and do you not think that such treatment would lead to suicidal tendencies? Those are matters of which I have no particular knowledge.
- 99½. Is it not a fact that this solitary confinement intensifies physical suffering and increases the mental malady? These patients are generally under the special care of some attendant, and when necessary to be removed to save annoyance to other patients they are kept by themselves, but not, as a rule, in an outhouse.
100. Do you think, then, that there should have been an attendant? Most certainly, but there was not one here.
101. Do you think that there should be light and warmth in the room? Yes; both absolutely.
102. Suppose the patient were to be destructive during the night, destroy his bed clothes or his night-clothes, would light and warmth be necessary in such cases? In this instance the patient is confined in an outhouse; left within four brick walls.
103. Do you think, then, that the management of this particular room and the treatment of the patient was satisfactory? In this particular case it certainly was not.
104. *Dr. Vause.*] Have you visited the asylum on many occasions? Three times, I think. The first time I saw yourself, the second time I saw a patient in your room, and nothing more.
105. Have you inspected the buildings? Yes; I think I saw the dormitories eight or nine years ago.
106. Had you ever seen the single bedroom in which the patient slept before? No.
107. Do you not think that the shivering appearance of the patient on that particular morning might be only the usual tremor of a paralytic? Yes.
108. Are you quite sure that the odour of which you complain was a smell of longer standing than one night? Yes; I spoke particularly of the urine, and there is a distinct difference between fresh and stale which I recognise.
109. Do you think it must have been there longer than one night? Yes.
110. Now, with regard to the warmth of the room, &c.;—if it were as cold as you say, do you not think that a delicate person would take cold by sleeping there? There is no saying. A person may be exposed to a great deal of cold and not catch cold. Not every person exposed catches cold, but it is for you to prevent such a possibility.
111. *President.*] I take it from your evidence, then, that you found the place in which the patient had been confined during the night in the most unsatisfactory condition? Yes.
112. Did you know anything of this room till you saw it? I did not. I went fully believing that the stories I had heard were absolutely untrue.
113. Then the complete effect of the whole matter on your mind was that case No. 1 was not being properly treated? That is the general effect.
114. Is there any statement you would like to make in connection with your report now before us? No; I wrote my report immediately on the impressions I obtained on my visit, and I arrived at the conclusion that the supply of clothes was inadequate, that the supervision was inadequate, and that there were no means for keeping the patient warm, comfortable, and clean. As to his medical treatment I know nothing.
115. Of course you only looked to the surrounding circumstances of this specific case and the statements made to you in relation to it? Yes; and my report is merely a relation of facts.

[Witness withdrew.]

TUESDAY,

TUESDAY, 6 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
Esq., M.D., INSPECTOR-GENERAL OF THE  
INSANE.ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was in attendance to hear evidence and examine witnesses in his own behalf.

Mr. Henry Gearey sworn and examined:—

116. *President.*] Do you remember visiting the Bayview Asylum on the morning of the 20th of May last? Yes.

117. Did you visit this institution in company with other gentlemen? Yes; with Professor Anderson Stuart, Mr. Sager, J. J. O'Brien, and Detective Goulder.

118. Did you all start together from the Queen's Statue and drive from there to the asylum in the wagonette belonging to the Board of Health? Yes.

119. When you arrived at Bayview Asylum, did you all enter the grounds together? Yes.

120. Did you walk down towards the back of the place where the kitchen is situated? No; only O'Brien and myself walked there; Professor Anderson Stuart and Mr. Sager proceeded towards the front of the building.

121. Did you meet any attendants? Yes; I met a man wheeling a wheelbarrow.

122. Do you know what he was doing with that barrow? He was removing nightsoil, I believe.

123. From any particular department? Not that I know of. I merely met him on the footpath.

124. Had you any conversation with him? I asked him if we were on the right way for the kitchen. He said, "Who goes there?" I said, "Oh, it is all right; we want to see Dr. Vause." We passed some remark about the weather being cold, and said no more.

125. Did he ask you the nature of your business? No.

126. What did you do further? We went round to the place where we found case No. 1 confined.

127. How did you know the locality in which that particular patient was supposed to be? I had been making inquiries for some considerable time, and had some idea as to where he was to be found.

128. Are you interested in the case? I am, most decidedly.

129. Have you known him long? Yes; he is a very old friend of mine, and when I heard that he was being brutally treated, I wished to know the truth or otherwise of the statements made to me. I had been told of his brutal treatment.

130. Who was your informant? I must respectfully decline to tell you, unless I am pressed.

131. Do you decline to answer the question? Yes; I must, unless I am forced.

132. We do not wish to force you, but, as you are aware, this is a Royal Commission appointed to make a diligent and full inquiry into the conduct and management of the Bayview Asylum. It is mainly through the information supplied by you that the charges were made against the institution, therefore it is necessary that we should get the information and know the source from whence you obtained it. Now, have you any objection to mention the name of your informant? No; I will mention the name, but I may say at once that he got his information from another person, and he would not tell me for a long time where he got that information from.

133. Was either of these persons at any time connected with the asylum? Yes; the first one was.

134. Was that first person to whom you refer a discharged servant of the institution? Yes; the first one. The men who gave him the information had never been in the institution, but the man who informed me had been.

135. What induced him to tell you? The whole thing came out in a purely accidental way. Several of us were sitting in my house having a general talk over a few glasses of grog, when this man asked me if I heard about the manner in which case No. 1 was being treated. I said, "What is the matter with him?" He replied that he was at the Bayview House, and he told me such things that I did not believe at the time. I went next day and asked him if what he had said on the previous night was true, and he said, "Yes." Then I asked him if he could prove it. He said, "Yes." Then I asked him if he would give me the name of the man who told him. He replied that it was all perfectly true, but that he could not give me the name of his informant. After making further inquiries I found out who the man was. A letter was produced, but still my informant declined to give me the name of his informant. I ascertained that the man was in the Police Force, and that I could not get any statement from him excepting through the Inspector-General of Police. I found out where the patient was, and I then got him out of the place. That is the substance of the matter.

136. Had you ever been to the asylum before May the 20th? Yes.

137. Was it purely in the interests and welfare of case No. 1 that you took this action? Yes.

138. Now, returning to your visit; after waiting a few minutes, did you see another attendant, who came and asked you what you wanted? Yes; a man whose name is I believe Doherty came to us. We also saw several of the patients—lunatics passing to and fro, and stopping to stare at us. While this was going on, Professor Anderson Stuart and Mr. Sager came back and asked us if we had seen any attendant. We pointed out one to them.

139. Did there seem to be any supervision over the patients then? No; it struck me that it was a kind of go-as-you-please arrangement.

140. What was your object in remaining in that particular part of the premises while Professor Stuart and Mr. Sager were elsewhere? I was acting under the instructions of Professor Stuart to steadfastly keep my eye on the place where case No. 1 was supposed to be confined. I did so, feeling that unless I did there might be some attempt made to smuggle him out.

Mr.  
H. Gearey.  
6 Nov., 1894.

Mr.  
H. Gearey.  
6 Nov., 1894.

141. Is that the reason why you remained there, then? Yes, that was the object and the reason. When I first arrived at the building I could see that there was only one door, and I never took my eyes off that, for I had made an arrangement with Dr. Stuart not to leave that door until he returned.
142. After Professor Stuart and Mr. Sager left you, did you remain in the same place, and was it there that you saw passing to and fro the two attendants you mention? Yes; after Dr. Stuart, Mr. Sager, and the attendant left us, the same attendant came back and asked what patient I wanted to see; I replied, "No one." He then said, "Who are those gentlemen with you?" I said, "You had better go and ask Dr. Vause." The attendant then tried to push me away, and ordered me off the premises. I told him I should not go, as I was there on the order of Sir George Dibbs, and that I intended to remain until Dr. Vause came. He went away and consulted with another attendant, and the two came back with some clothes. They unlocked two doors in the building near which we stood.
143. How do you mean two doors? There were two doors together in one ward; he unlocked them both, and he went in the top door with the clothes.
144. Did those rooms connect with each other internally? No.
145. Then why did he open the two doors? To show me the patient I wanted to see, I suppose, or to see which patient I wanted to see.
146. Was there a patient in each room then? Yes, I believe there was, for I heard groaning and moaning, so there must have been someone in those rooms.
147. Did you see all that occurred during these proceedings? Yes, I believe I did, everything.
148. Did you see Case No. 1 himself inside the room? No, I did not see him until he came outside the door.
149. When he came out was he partially dressed? Yes, he had on a coat, trousers, and flannel shirt.
150. Have you any idea of what state he was in before these clothes were put on him? Yes; he could have had nothing on him at all.
151. Do you mean to say you believe he was perfectly naked in that room? Yes; he might have had a nightshirt on certainly, but if he had not he must have been perfectly naked.
152. Were the clothes he put on in a clean state? No; they were in a very dirty state. I thought they were far too dirty for him to wear.
153. Do you mean that they were merely soiled or particularly dirty? They were soiled and old, and like the clothes of a working man who had come out of a factory.
154. At what time did you see this? At 6:45 a.m.
155. When you saw him come out of that room was he being supported? Yes; on both sides.
156. Did he appear to be cold? Yes; he was shivering.
157. Do you think he was shivering from cold or disease? I think he was shivering from cold.
158. Are you quite sure he was not shivering from excitement? I don't think he was, but he was decidedly shivering, and seemed to dread crossing the yard, for when I first saw him, I heard him say, "I don't want a bath, I don't want a bath." He was expostulating with the attendants, saying, "Don't push me, don't give me my bath." When passing he said to us, "Good morning, gentlemen," and going further across towards the lavatory, I heard him say, "Don't push, I have not got my coat on yet. Good morning, gentlemen. I don't want a bath, I am too cold."
159. Were there any other persons about at this time? Yes; there were people loitering around, both patients and attendants, I think.
160. A few minutes afterwards, when the attendants had taken Case No. 1 across the court-yard, did you again see Professor Stuart and Mr. Sager? Yes; Professor Stuart and Mr. Sager, together with Dr. Vause and an attendant, returned to where Dr. Stuart left O'Brien and myself in the court-yard early in the morning. The door of the room from which Case No. 1 had been taken was then opened by Dr. Vause's instructions. On the arrival of Dr. Stuart and the others I said, pointing to the door, "There is the room," and Dr. Vause ordered the attendant to open the door.
161. Did you see all that was in the room? Yes; I did.
162. Did you examine the room and its contents carefully? Yes.
163. What did you see in the room itself? There was a sort of mattress lying on the floor; it was made of coarse pieces of canvas sewn together, and straw rammed into it.
164. Was it an ordinary made mattress? No; it was pieces of canvas sewn together, and stuffed with straw. There were also three pieces of sheeting made of canvas, measuring, I should think, about 3 feet square.
165. Were these sufficient to cover a man? No; certainly not.
166. In what condition were they? They were in a state of absolute filth, covered with fecal matter, saturated with urine, and stank something abominable.
167. What else did you observe in looking through the room? There was no ventilation.
168. No ventilation at all? Not that I saw. Nothing beyond an observation hole in the door and a shutter high up the wall, and this had not been opened.
169. Was there any light? No; except what came through the door.
170. Did you notice any window in the building? No; I did not examine it for a window; there was no light whatever. There was only a shutter, and that was closed up.
171. Did you notice that there were any ventilating bricks about the place? No.
172. Did you notice any over the door or near the door? No; I did not. To tell you the truth, I was very glad to get out of the room to obtain a breath of fresh air; the smell was most repulsive.
173. Did the floor seem to be damp? Yes, it was damp; it was wet, and there was a very foul smell.
174. Did you notice this foul smell? Yes; it was a smell of stale urine.
175. You say it was stale? Yes, I do. It was stale, and it must have been there for some time.
176. How do you know, or what leads you to that conclusion? My experience as a sanitary inspector tells me that the stench came from an old-standing cause. It must have been stale for the room to be in the state it was.
177. *Dr. Garran.*] Do you say you made other inquiries besides those of which you have spoken in regard to the treatment of this particular case? Yes; I found out and questioned the attendant who attended upon him.
178. From attendants who were in charge of him, or who had been? I got some from one source and some from another.

Mr.  
H. Gearey,  
6 Nov., 1894.

179. Did you notice whether the room in which the patient had been confined was warm or cold? It was cold.
180. But if there had been no ventilation in it at all, and it being a comparatively small room would it not become slightly warm from the breath of the patient? I do not think so; it was a very cold morning, and I do not think the breath of a man would be sufficient to warm a detached building like this.
181. This is not a detached building, is it? The two rooms are detached from the main building.
182. *President.*] Is not what you mean that the two rooms are under one roof? Yes.
183. *Dr. Garran.*] Did you feel the room to be warm or cold? It was cold.
184. Have you any doubt in your mind as to the cause of the patient shivering? No; I believe he was shivering from cold for his face was drawn with pain, and when crossing the yard he looked to me like a man going to execution. He appeared to dread going to his bath, and complained that he was cold, and he was in such a condition that he could not walk without the assistance of an attendant on each side of him.
185. Did you follow him to the bath? No; I did not.
186. Do you know whether the water used was warm or cold? I do not for certain, but I know the attendants could not get warm water in the time I was there.
- 186½. Did you test the water at all? No.
187. Did you see him stripped? No.
188. Did you inform Mr. Jeanneret, then a Member of the Legislative Assembly, of these circumstances? I did; and at the outset he told me he could not believe it.
190. Had you any political reason for giving Mr. Jeanneret this information? No; I had not.
191. Did you hear of, or do you know anything concerning an anonymous written circular signed "Aristides"? Nothing beyond having seen one.
192. Had you anything to do with the authorship of that circular? No.
193. Do you know the writer of it? No; everything I have done in connection with this case, every paper or every line I have written concerning it, bears my own signature.
194. Are you quite sure that there was no window in that room from which the patient was taken? I quite certain about it being pitch dark. If there was a window it was covered up with a shutter.
195. *Mr. McGowan.*] What is your position in the Corporation? That of a sanitary inspector.
196. Therefore by the nature of your position have you not frequent occasion to judge of smells, and for instance can you tell the difference between fresh and stale urine? Yes.
197. Did you examine this room for the purpose of seeing whether it contained any other clothes with the exception of those put upon the patient? Yes, I did. There was nothing in the room besides the mattress and the three pieces of canvas sheeting to which I have referred.
198. Was there any chamber utensil in the room? No.
199. Was there an indiarubber chamber utensil in the room? No.
200. If there was a window there in that cell, had it been put up at all? No; the reason why I noticed this was that there were cobwebs on the shutter, and these cobwebs had not been broken.
201. Do you not say that you received your information from a man who had been an attendant at the institution for some time? Yes; there were two men living in Riley-street, and one of these who had been at Bayview House is now in the police force. This man is named Aleck Mackenzie. He told my informant about Case No. 1. Later on Mackenzie obtained a position in the police force and went to Goulburn, where he is now stationed. He gave the information to a transit officer, who told me, and I said it was of no use going any further unless I was prepared to prove my statements. My informant gave me the source of his information, and said his informant could not supply the proof except through the head of the Police Department. I then made further inquiries, ascertained the name of the warder attending on Case No. 1, and from one source and another I investigated the whole thing. In the course of my investigations I had to meet with many obstacles: in fact from the beginning of my inquiries till now every possible obstacle was placed in my way to prevent me making the fullest investigation into the matter.
203. At first did not Mr. Jeanneret feel disinclined to believe your statement? At first he did not believe me.
204. Was it not after repeated conversation with him that he placed any credence in what you said? Yes, it was. Mr. Jeanneret then referred me to Messrs. Allen and Allen, and asked me to make a statement of the facts to them. I did so.
205. After that did you go to Mr. Munro, of M'Arthur and Company, with Mr. Seymour? Yes.
206. Did you next go to Professor Anderson Stuart? Yes.
207. How did he receive your statement? He did not place any credence in it, and after further conversation said that if my statements were correct, the patient could not possibly live six more months.
208. Was it not from outside pressure only brought to bear by the patient's friends that you obtained permission to visit Bayview House on the morning you did? Yes.
209. Did you know that in taking the action you took you were risking your position as a servant under the Corporation of Sydney? Yes, I did.
210. How long have you been in the employ of the Municipal Corporation? Five years.
211. Still, knowing you risked your position, you determined to go to the room where you knew the patient was confined? Yes.
212. Did you stay in that small courtyard outside the door of that room the whole of the time Professor Stuart and Mr. Sager were away? Yes; I never left the vicinity of that door.
213. With regard to these pieces of canvas covering, do you not say that the largest piece was not more than 3 feet square? Yes.

- Mr. H. Gearey.  
6 Nov., 1894
214. Were they rugs? Certainly not; they were merely pieces of canvas in a filthy state and saturated with urine.
215. Had the patient any clothing upon him before the attendant took his clothes into the room? He had nothing at all, except perhaps he might have had a night-shirt. The clothing taken in was dilapidated and dirty, and looked as if it had belonged to an engineer engaged in a workshop. The only wearing apparel he could have had on his body before these clothes were placed on him by the attendant must have been something very slight indeed. He wore a flannel shirt buttoned up in the front. I could not say if he wore anything under the flannel shirt, as it was buttoned close up to the throat.
216. Did you not consider it your business to make the fullest investigations possible? I considered it to be my business to ascertain whether it was true that the patient was being treated in the manner reported to me.
217. Did you examine his body? I did not. I merely obeyed my instructions to remain outside the room and see all that took place within the range of my vision.
218. *President.*] You spoke a few minutes ago about obstacles;—what obstacles were placed in your way while you were making these inquiries? There were obstacles in this way: Every person I went to see appeared to be under some constraint in the manner of giving information. I had to bring great pressure to bear, and it appeared to me that influence had been at work to prevent my getting what I wished to know. There was an attempt made to pooh-pooh all the allegations I myself made.
219. Then was there reluctance on the part of people whom you saw to give you information? Yes; decidedly so.
220. Have you any reason to assign for this reluctance? I can only suppose that they did not wish it to be found out that certain persons were shareholders in Bayview House, such persons, for instance, as the Hon. Edward Greville, M.L.C., and Mr. Copeland, a former Minister for Lands.
221. Do you know if these gentlemen are shareholders? I do not; but I have heard it reported that they are.
222. Do you think that was one of the main obstacles in the way of you obtaining the information you required? Yes; I heard it said that those gentlemen were shareholders—it was a common report.
223. Did you not say you risked your official position by making inquiries into this matter? I did.
224. What risk did you run? If Dr. Vause had found out that a visit was to be made on that particular Sunday morning, he might have had Case No. 1 shifted into the room he was supposed to occupy. I then should not have been able to prove my case, and should have been regarded on making my visit, if I had been unable to prove what I desired to, nothing less than a meddling fool.
- 224½. Would that have incurred any risk to you? Yes; I should have been shifted from my official position.
225. Then do you believe you would have lost your position under the Municipal Council if your statement had not been substantiated? Yes.
226. *Dr. Garran.*] Do you not say that all the clothes the patient wore on that occasion were coat, trousers, shirt, and boots? Yes.
227. Had he on any singlet? I cannot say.
228. Do you think he had any clothing on during the night? No, I do not think so, for I saw them carry in the clothing he wore when he came out.
229. Might not the patient have worn pyjamas during the night? No; I think not.
230. What did you see the attendants carry into the room? A serge coat, trousers, shirt, and boots.
231. Were there any other clothes lying on the floor of the room? No, none at all.
232. Is it your inference that during the night the patient had nothing on? Yes.
233. Do you believe that he was put into the room naked? Yes.
234. Do you think that when he was placed in that room over night his clothes were taken away from him, and he was left there in a state of nature? Yes.
235. Did you see any torn rags about? I did not. I saw nothing besides the three pieces of canvas.
236. Did you see any blanket inside the room? I did not. There was nothing in the room but the pieces of canvas of which I have spoken. Dr. Stuart counted these pieces of canvas, saying at the time "one, two, three," and put them all in a heap, one on top of the other.
237. *Dr. Vause.*] In what relation does J. J. O'Brien stand to you in the whole of this matter? He is a fellow sanitary officer. When I went to Professor Anderson Stuart I explained to him that in the course of any action I took I should like to be supported. I explained to him that I preferred to take with me one of my mates, a man on whom I could rely, rather than trust to an outsider or even a member of the Police Force. I explained that the man I proposed to take was altogether unprejudiced and knew nothing of the case, but at the same time he was one whom I knew and could rely upon.
238. *President.*] Did you write a report on your visit to the asylum? We did.
239. Does it read as follows:—

To the Secretary of the Government Medical Adviser,—

Town Hall, Sydney, 20 May, 1894.

Sir,

We have the honor to report that this morning at 5 a.m. we left Sydney with Professor Anderson Stuart, Mr. Sager, and Detective Goulder. Arriving at Dr. Vause's, Cook's River Road, at 6 a.m., we entered by the front gate, and not seeing any person in charge proceeded to the back entrance of the establishment.

We met a man wheeling a barrow who said, "Who goes there?" We replied we wanted to see Dr. Vause. After a few minutes Professor Anderson Stuart and Mr. Sager met us and asked if we had seen any attendant. We pointed out one to him. The attendant invited Professor Anderson Stuart and Mr. Sager to come round to the office.

Dr. Stuart, Mr. Sager, and the attendant then left us. We remained in the same place. A short time after this the same attendant came back and said, "What patient do you want to see?" We replied, "No one." The attendant said, "Who are those gentlemen with you?" We replied, "Ask Dr. Vause." The attendant then ordered us off the premises in a very rude manner saying they allowed no loiterers about here, and if we had any business we must go to the office where the other two gentlemen were, seeming very desirous to get rid of us. We replied we were waiting for Dr. Vause, and intended to do so until his arrival.

The attendant then left, and after an absence of a few minutes returned in company with another attendant carrying some clothes. They unlocked two doors, entered one room, and after ten minutes' absence came out of the room (6'45 a.m.) supporting a man between them in a shivering condition.

We recognised this man as Case No. 1. The patient looked at us and said, "Good morning, gentlemen. I don't want a bath. I am too cold." The attendants urged him to a quicker pace through another door. The patient said, "Don't push me, I haven't got my coat on yet."

A

A few minutes later Professor Anderson Stuart, Mr. Sager, Dr. Vause, and the first attendant referred to appeared. The room which the patient was taken from was again unlocked, and we saw the interior. The contents of this room consisted of a straw mattress laid on the floor, and three pieces of some sort of sheeting. The room is of brick, about 16ft. high, about 12 x 12, no windows, no ventilation, having the appearance of an old stable.

Mr. H.  
Gearey.  
6 Nov., 1894.

H. GEAREY.  
JOHN JOSEPH O'BRIEN.

Yes; that is the report we sent to Professor Anderson Stuart.

[Witness withdrew.]

Mr. John Joseph O'Brien sworn and examined:—

240. *President.*] Do you remember the morning of the 20th of May last, when you, in company with others, paid a visit of inspection to Bayview House? Yes.
241. Did you go there on the particular invitation of Mr. Henry Gearey? Yes; I am a brother officer of his, and he asked me particularly to go with him on this occasion.
242. Do you remember all the circumstances connected with your arrival at the Asylum? Yes.
243. Did you remain with Gearey near the building in which Case No. 1 was said to be incarcerated? Yes.
244. Did you see all that took place in connection with that inspection? Yes.
245. Do you remember that a certain door was opened, and that two attendants took clothing into the room? Yes.
246. When that door was opened did you carefully notice what articles of clothing the attendants took inside the room? Yes; they took in a coat, trousers, shirt, and a pair of boots.
247. Did you see them come out? Yes.
248. Did you see any other articles of clothing in the room? I did not. I saw no articles of clothing excepting those that the patient wore.
249. That being so, is it your opinion that the patient must have been put into that room absolutely naked? Yes; that is the only conclusion I can come to.
250. Did you see all that the room contained? I did.
251. What did it contain? A mattress and three pieces of canvas.
252. How large were these pieces of canvas? I should think about 4 feet by 6; they might be 4 feet by 5.
253. Were these pieces of canvas soiled? Yes; they were soiled both by excreta and urine, and were in a filthy condition.
254. How long have you been sanitary inspector? Nine years.
255. In the course of your experience have you had the opportunity of acquainting yourself with different smells? Yes.
256. Can you tell the difference between the smell of fresh and stale urine? Most decidedly.
257. Was there a stale odour in this room? Yes; it was a very stale odour. It was a most sickly smell altogether, and such a one that I was glad to escape from as quickly as possible.
258. Do you think there had been any attempt made to clean the room? All I can say is that the floor was smeared a bit.
259. Do you think there had been an attempt made to wipe up the mess during the interval in which the patient was dressed? Yes.
260. Did you examine the room to see if it was ventilated? Yes; but I saw no means of ventilation.
261. Did you see any window in the room? No; the room was that dark that it looked to me like a cell.
262. If there had been a window, you must have seen any light? I should think so. I did not see any light, and I feel positive there was no window at all.
263. Do you feel positive that there was no window in the room? Yes.
264. Did the air feel cold? Yes; it was a bitter cold morning—so cold that Professor Stuart, Mr. Sager, Detective Goulder, and ourselves had our top coats on.
265. Do you think that a man lying in that room all night would feel the cold? I should think he would, especially at that time of the year.
266. What was the floor of that room like? It was a boarded floor, nearly level with the ground.
267. Was the floor damp? It was wet from urine, and altogether a place not fit to sleep in; at all events, a place I should not like to sleep in.
268. Did you see the patient when he was removed from that room? I did.
269. Did he appear to you to be cold? Yes; he was in a shivering weak condition. He had to be supported by an attendant on each side. His eye was discoloured—black in fact.
270. Had you ever seen this place before? No. Mr. Gearey told me two days before that he specially desired me to go with him on this occasion. He asked me as a special favour to accompany him, and I gave my consent to go. He told me he would rather trust to me as a fellow officer whom he well knew than to a stranger. I therefore agreed to go with him.
271. Did you know, in point of fact, that Case No. 1 was at Bayview House? I did not until a couple of days before I visited the place, and when I was asked by Gearey to accompany him.
272. Concerning these pieces of canvas or anything else inside the room, did you find or see any indication of canvas sheeting or bedding torn to pieces? I did not.
273. Did you see any shreds of torn material about the room? No; I am quite sure of that.
274. Was it not so dark inside that you could not see these details? No; it was light enough for me to see that much.
275. Did you see any blanket in the room? I did not—only the three pieces of canvas.
276. How large are these pieces of canvas? I should think the largest was about 4 feet by 5.
277. Were the other pieces much smaller? I would not like to say. I was more impressed with the smell and general condition of the room.
278. *Dr. Garran.*] When the door was first opened, did you take the opportunity of putting your head inside to see the actual condition in which the patient was? No; I did not like to do so, for I did not know for certain whether he was there.
279. What actually took place while you were waiting outside the room? While Professor Stuart and Mr. Sager were round at Dr. Vause's house, an attendant came along and asked our business. We told him

Mr.  
J. J. O'Brien.  
6 Nov., 1894.

- Mr. J. J. O'Brien,  
6 Nov., 1894.
- him to ask Dr. Vause. He then ordered us off the premises, saying we were only loiterers about the place and had better go out. We answered that we were waiting for Dr. Vause, and meant to stay until the doctor came.
280. Were your instructions from Professor Stuart to wait outside that door? Yes.
281. Did you not look inside the room when the door was opened? No; I did not. I thought it best to strictly obey my instructions.
282. Are you quite sure as to the nature and number of the garments taken into the room by the attendant? I am quite sure it was a serge or part of a serge suit.
283. Are you reasonably convinced that the patient wore nothing more when he came out than was taken in by the attendant? Yes; I paid particular attention to the clothing they carried in, and I saw it was the same clothing the patient wore when he came out.
284. Might not the patient have had pyjamas under these clothes? I cannot say, but I should think not.
285. Was there light sufficient in the room to see cobwebs if they had been there? I did not look for them, so I cannot say.
286. Was there any smell in the room? Yes; there was a lot of mess and a smell of urine in the building.
287. Was the mess in any one particular part only? No; it looked smeared about as if there had been an attempt made to quickly wipe it up.
288. Might the patient have smeared it about? I cannot say.
289. Were the pieces of canvas or the coverlet stained? Yes.
290. Did you particularly examine what we may term the cover? Yes.
291. Was it a blanket? No.
292. Was there any blanket attached to it? No.
293. Was it a piece of canvas on which a blanket had been stitched? No; I am positive there was nothing of the kind.
294. Was it of sufficient length for a patient to lie on or sufficiently long to cover him? No.
295. Were there any signs of torn clothing in the room? No.
296. What other circumstances were there in connection with your visit? When we first went to the place—I mean to the neighbourhood of those two doors—I heard moans inside. The attendant who was with us retired for a moment to speak with another attendant. They then returned and ordered us away. We would not go, and then they unlocked the two doors, took in some clothes, and brought the patient out. When passing across the yard the patient said, "Good morning, gentlemen; I don't want a bath—I am so cold. Don't push me, I haven't got all my clothes on yet." He was then hurried away.
- 296½. Was there another room adjoining that from which Case No. 1 was taken? Yes.
297. Was there a patient in that room? Yes, I think so.
298. Did you follow Case No. 1 and the attendant to the bath-room? Yes, I followed them in that direction.
299. Do you know whether the water used for bathing the patient was warm or cold? I cannot say.
300. Mr. McGowen.] Are you sure that the foul mattress and the three pieces of canvas to which you have referred were the only articles in that room? Yes, I am positive of that.
301. Were there any sanitary arrangements in that room? No, none whatever.
302. Are you sure that there was no gutta-percha utensil in the room? There was nothing of the kind, I am sure.
303. Are you certain there was no utensil of any kind in the room? I am certain there was no chamber at all.
304. Were there any torn clothes about? None whatever.
305. Have you reasonable ground for supposing that the whole of the clothes worn by the patient when he came out of the room where the same clothes you saw taken in by the attendant a few minutes previously? Yes, I am positive of that, for I saw and was able to identify the coat, trousers, and boots.
306. Do you say you saw no window in the room? Yes; the room was quite dark, except for the light which came through the open door.
307. When the door was opened did not a certain amount of light enter the room? Yes.
308. And was that the only light that came within the walls? Yes.
309. Do you know whether there was a window or window-shutter high up the wall, about 18 or 26 inches in length, and 12 in width? Yes, I think there was; but I cannot speak with certainty on this point, as my attention was more particularly drawn to the patient, and the condition in which he was found.
310. Did you cast your eyes round this cell? Yes; I did.
311. Did you notice whether there were any cobwebs on the shutter? I did not pay any particular attention to that.
312. How far were you standing from these two doors? I should think about 12 or 15 feet, and 3 or 4 feet from the water-closets on the other side of the yard.
313. When the attendants came in the first instance carrying the clothes, were both the doors opened? Yes.
314. If you had taken five or six paces then could you have seen inside the room? Yes; but the attendant spoke in a threatening manner, and we did not like to force ourselves into the room. More than that, I did not know for certain in which room the patient was. If I had known I would have made my way there. The attendants, I am sure, desired to get rid of us if possible, and we, acting under instructions, did not like to force our way, and, therefore, we did not know what to do. Now, however, I regret I did not go into the room as soon as the door was first opened.
315. Had you any reason to believe when you were carrying out your instructions that Case No. 1 was in one of these rooms? No.
316. Did not Gearey take you into his confidence and let you know something of the mission on which you were engaged? No, not until two days previously, and then he did not tell me much.
317. From your experience as a sanitary inspector, are you able to detect the difference between the smell of fresh and stale urine? Yes; I am positive on that point.
318. Do you, as a sanitary inspector, have to visit and inspect Chinese dwellings in the City of Sydney? Yes.

319. Have you, in the course of your experience in that capacity, come across dwellings or rooms as bad as this one from a sanitary point of view? I do not think I have, and certainly I have not come across worse. - Mr.  
J. J. O'Brien.  
6 Nov., 1894.
320. If, in the course of your inspection, you had found a room in a similar condition to this, what would you have done? I should have reported it for prosecution, for I should consider it injurious to the health of anybody to remain in that room for a couple of hours.
321. Have you found any sleeping apartments, reported on them, and obtained a conviction in circumstances similar to this? Yes.
322. In cases no worse than this? Yes.
323. In some of the worst cases you have met in the course of your duty as a sanitary inspector, was the smell as bad as this? I never found a worse case, the smell was simply abominable, a nasty, sickening smell.
324. *President.*] Did you make a close examination into this matter generally? Yes.
325. Did you notice the walls of the room? Yes.
326. What were they? Brick walls.
327. Were they level all the way down to the ground? Yes.
328. Were they completely of brick all the way down? Yes.
329. Were they painted half-way down? I do not know, I fancy so. It is such a long time since I was there that I do not exactly remember.
330. Did you notice if there were wooden walls in the room? No, I do not think there were any wooden walls. I am not quite sure; therefore I do not like to say anything about it.
331. *Dr. Vause.*] In course of your evidence you refer to two rooms or two cells;—are you quite sure there was an occupant in each room—Case No. 1 in one room and another person in the other? I can only say I heard moaning in the other room. I am quite certain I heard a moan, and hearing that I came to the conclusion that there was somebody in the room adjoining the one from which Case No. 1 was taken.
332. *President.*] It has been given in evidence that there was a window in that room opposite the door considerably high up the wall, that it was closed and covered by a shutter, and that there were unbroken cobwebs over that shutter;—did you see any cobwebs there? It was a dark morning, not quite daylight, and I am of opinion that with a light thrown into the room through the open door no one could have seen any cobwebs. I feel positive that no one could have seen cobwebs at that time.  
[Witness withdrew.]

Edmund Sager, Esq., sworn and examined:—

333. *President.*] Are you Secretary to the Sydney Board of Health? I am. E. Sager, Esq.  
6 Nov., 1894.
334. Do you remember on the 20th May, in company with Professor Anderson Stuart and other persons, paying a visit to the Bayview House for a certain purpose? Yes.
335. Have you written a report in reference to that visit? I have.
336. Do you make in that report the following statement:—

Sunday, 20 May, 1894.

In accordance with the instructions of the Medical Adviser to the Government, I met him this day at 5 a.m. at the Queen's Statue, top of King-street; and the following is a statement of the occurrences which happened:—

At 5 a.m., at the Queen's Statue, Dr. Stuart, Detective Goulder, two municipal officers, and myself, met by arrangement, and proceeded at once in the Health Department waggonette to the Licensed House for the Insane kept by Dr. Vause, known as Bayview, Cook's River Road.

At about 5:50 a.m. the two municipal officers entered Bayview grounds. At about 6 a.m. Dr. Stuart and myself entered the grounds and proceeded to the office door; just outside the office door we met a man with a wheelbarrow, evidently removing nightsoil. Dr. Stuart asked him who was the officer in charge, and where he could be found. The man replied, "You had better see the chief attendant," and directed us to go round the main buildings to the left, where we would find the kitchen. On arriving at the yard adjoining the kitchen we found the two municipal officers. One of them pointed out a building in the yard resembling from outside appearances a stable, and stated that from the information he had received he believed that to be the building within which the patients slept. This building was situated at the side of a small courtyard, being bounded on one side by the back of the main building, on another by the kitchen block, the third being formed partly by the stable in question and partly by a blank wall; the fourth side was not entirely closed in, being formed by some building, at the end of which was evidently a urinal, and an open space (by which we entered); in this space two newly-dressed but not painted gate-posts had recently been erected, evidently for the purpose of putting up gates to complete the enclosure.

Two or three attendants came out into the enclosure from time to time; one of them was sent for the chief attendant. At about 6:15 a.m. the chief attendant appeared, and Dr. Stuart informed him that he had come by direction of the Colonial Secretary to see a patient. The chief attendant replied that no person was allowed to see a patient without Dr. Vause's permission, and invited Dr. Stuart and myself to go round to the office. This we did, leaving the two municipal officers in the before-mentioned enclosure. Arriving at the office door, the chief attendant rang the bell. It was, however, about twenty minutes before any reply was received; a female servant then appeared, and was directed by the chief attendant to take Dr. Stuart's card over to Dr. Vause, who was then stated to be at his residence, some little distance opposite. Dr. Stuart and I remained on the office verandah. Dr. Vause appeared at about 6:45, and Dr. Stuart informed him that he had come by direction of the Chief Secretary to see a patient whose friends had been complaining as to his accommodation and treatment. Dr. Vause said, "What patient?" Dr. Stuart replied (Case No. 1), and I wish you to take me at once to his room in order that I may see him before he gets up." Dr. Vause said, "Walk inside." We entered a room furnished as a sitting room and followed Dr. Vause through a door opposite the window, across a small lobby and into a room containing three or four beds; we turned to the right out of this room into an oblong room used as a lavatory. As we entered this room at one end the patient entered at the other. He had a black eye, appeared rather feeble and cold, had on a flannel shirt and clothes which did not appear to be clean. He shook hands with Dr. Stuart, and said, "I know you; you are Scot-Skirving." Dr. Stuart, turning to Dr. Vause, said, "I wish you to take me at once to the room just left by the patient." We left the room by the door we had seen the patient enter, and found ourselves in the court-yard before referred to, the two municipal officers being still there. Dr. Vause requested an attendant to open the farthest of the doors of the building resembling a stable—the door was open—and we entered the room, of which the following is a description:—

Size, about 12 or 14 feet square; height, about 16 feet; floor, wooden; no window; no ventilation; only opening, observation-hole in door with shutter.

Sole contents:—Old straw mattress, two pieces of torn and dirty canvas.

Dr. Stuart told the two men in the yard that they might return to the waggonette. We returned with Dr. Vause the way we had come. The patient was found in the dormitory above referred to, and Dr. Vause stated that when he was all right he slept in that room. In reply to questions, Dr. Vause stated:—

1. That the patient was placed in the single dormitory because he was noisy, dirty, and destructive.
2. That when there he had no night attendant.
3. That he was shut up about 7 p.m. and brought out about 7 a.m.
4. That an attendant generally looked to him about 10 p.m.

E. Sager, Esq.  
6 Nov., 1894.

In reply to a further question as to how long the patient had been occupying that room, he stated that he had been there for some little time, as he had not been good.

We wished Dr. Vause "Good morning," and retired, reaching the gates about 7 a.m.

EDMUND SAGER,  
Secretary to the Medical Adviser.

337. Is that a correct statement of the facts of your visit? Yes.
338. Was there any delay before you could attain the object of your visit? There was some delay in the early part, but none after Dr. Vause had met us.
339. Before seeing Dr. Vause, had you any opportunity of traversing the ground and seeing some of the patients? Yes.
340. Did the patients seem to be at that moment under any particular direction or control? No. When we first entered the grounds we met a man with a wheelbarrow. He directed us to go round the main building to the left where we would find the kitchen block. When we got there we saw two municipal officers. We waited there for some little time, and whilst waiting one or two of the patients, I believe, passed by.
341. Were there only one or two? I think there were not more than two; as a matter of fact it was somewhat difficult to tell patients from the attendants. Several passed along; in all, I should think about six persons came along while we were there.
342. On your arrival at Bayview House, did you know for certain in which part of the building Case No. 1 was to be found? No; the facts were not known to me at that time.
343. Were any other members of the visiting party aware of this patient's room? I cannot answer that question. I had not been informed myself, except on the way out from Sydney that morning I heard Gearey tell Professor Anderson Stuart certain things. From his conversation I understood that he expected to find the patient in a detached building, which he called a stable.
344. After you arrived there, and had seen one of the attendants in company with two municipal officers, did one of them point out to you the building in which he supposed the patient had slept and had been found? Yes.
345. Did you observe that building, and its relation to the other buildings? Yes.
346. It has been given in evidence that you went round with Professor Anderson Stuart to see Dr. Vause? Yes. After some delay the attendant in charge came to us, the delay evidently having been caused by him dressing himself. We explained the nature of our business, and the authority under which we visited the Asylum. The attendant informed us that we could not see any patients without the authority of the Medical Superintendent. He asked us to go round and see the Medical Superintendent, and after some little delay a maid-servant came and took Dr. Stuart's card over to Dr. Vause at his residence some little little distance away. In the meantime Professor Anderson Stuart and myself remained on the office verandah. Dr. Vause came later on, and with him we entered the main building. We proceeded to the lavatory, and as we entered at one end Case No. 1 entered at the other.
347. Had you every opportunity of seeing the patient at that moment? Yes.
348. Did he seem cold? Yes.
349. Was he shivering? Yes.
350. Did you then pass on to the vicinity of the room where he is said to have been lying? Yes. As the patient came from the opposite door Dr. Vause was requested to show us the room from which the patient had been taken. Dr. Vause then took us into a court-yard outside the lavatory, the same place where we left the municipal officers, and directed an attendant to unlock the farthest of the two single rooms.
351. Was the other room open at all? It was not then.
352. Did you see it opened at all? Yes, I saw it open when we arrived, before we saw Dr. Vause. I saw an attendant open the door of what I may call No. 2 room and close it again. That was the room next to where Case No. 1 had slept.
353. Had you any opportunity of inspecting that No. 2 room? No.
354. Did you hear any moans come from that room? No.
355. Did you examine the room from which Case No. 1 had been taken? Yes.
356. Did you say it was about 12 or 14 feet square? Yes.
357. Did you go into that room? Yes.
358. Did you make a careful observation of all you saw there? Yes.
359. Did you see any provision for ventilation in that room? I did not. It was about 16 feet high, and looking at the top I did not see any apertures for ventilation or light.
360. Was there any distinct place through which light could enter the room? No.
361. If there had been a window, could you have seen it? I think so, if it had been a means of admitting light. My impression is that if there was a window in the room it must have been covered with a shutter or a blind.
362. We have been told in evidence that there was a window covered by a shutter, and that unbroken cobwebs were on that shutter, and I ask you, could those cobwebs have been seen while you were in the room? It certainly would not be possible to discern cobwebs at that time in the morning and with the light available.
363. If a person then was able to see cobwebs over a closed window shutter, he would naturally be able to see if there were a window in the room? I should think so; all I saw, however, was darkness. I never saw any window or window frame. I have heard of this window since, but when I was there and looked round the room I saw no sign of any aperture whatever.
364. If there had been any window do you think you would have seen it? I think so. I did not see either window, shutter, or cobwebs. My opinion is that it would have been impossible to have distinguished cobwebs in the room, for on looking round I saw nothing but semi-darkness.
365. In looking round the room did you see any provision for the comfort of the patient, such as sleeping accommodation? All I saw was a straw stuffed mattress and two or three pieces of canvas. The canvas was torn and of a dirty colour.
366. Was it soiled? I did not finger it to ascertain, but the whole of the pieces looked to me moist and rotten from dirt.
367. Can you give us any idea of the size of these pieces of canvas? They struck me as being rather small.
368. Can you say exactly what was the size? No.

E. Sager, Esq.,  
6 Nov., 1894.

369. Did the size strike you as being too small to cover a human being? I should imagine they might have just done so if they had been laid out properly.
370. Were all the pieces of canvas the same size? I did not notice; they did not seem to be very large or small.
371. Did you think that they were sufficiently large to have covered a man? I cannot say for certain.
372. Did you hear any conversation between Professor Anderson Stuart and Dr. Vause? Yes.
373. Was the purport of this conversation to the effect that the patient had been placed in this room because of his dirty habits? Yes.
374. Did Dr. Vause make any statement concerning a night attendant visiting the patient? Yes; there was some statement made with reference to that subject. It was mentioned that Case No. 1 was put in the room about 7 o'clock in the evening, and that he was taken out about 6 o'clock in the morning.
375. Was anything said concerning the patient being seen by a night attendant about 10 o'clock? Yes, I think there was.
376. Was anything said to the effect that the patient had a special night attendant? I cannot say that there was any special night attendant, but from the conversation of Dr. Vause I was under the impression that the patient was visited each night about 10 o'clock.
377. Was anything said about the length of time the patient was placed in this dormitory? No, nothing definitely. I think it was said that he had been there for some little time.
378. Are the main facts you stated in your report correct? Yes, they are.
379. Have you anything further to add to what you have there said? No. I was simply asked to go as a witness of facts, and in my report I have stated truthfully what I saw on that occasion.
380. Did you see Case No. 1 on that occasion? I did.
381. What was his condition? He seemed to be trembling; in fact he was trembling.
382. Was he trembling from cold or excitement? I cannot say. He was either trembling with cold or excitement.
383. Did he seem to be properly clothed at this time? If he were going to have his bath he was sufficiently clothed for that purpose. He had on a pair of trousers, a flannel shirt, which was open a little at the top.
384. Had he a coat on? When he first came into the room I do not know, but it struck me that he only had on his trousers and shirt while going across the yard towards the bath. I am not quite clear as to whether or no he had on a coat.
385. Did the clothing appear to you to be clean or dirty? It struck me that the clothing was extremely untidy.
386. Did his clothes strike you as those that would have belonged to a person coming from an engineer's shop, or from the place where a mechanic might work? The clothing in question was dirty, but not of the order to which you refer. That might be called clean dirt. I could not examine the clothing carefully, but, taking a general view, I came to the conclusion that there was something wrong, because the clothing looked unnaturally dirty.
387. *Dr. Garran.*] Did you go into the bath-room? Yes.
388. Did you take the opportunity of seeing whether the water was warm or cold? No; we went straight to the room, but we did not wait to see the patient take his bath.
389. While examining the room from which the patient had been taken, did you notice if the mattress there had been soiled? Yes, I did; but I did not touch it. Professor Anderson Stuart made the examination.
390. Did you notice the state of the floor of that room? Yes; particularly in one place.
391. Did the room appear to you to smell foul? It did smell foul.
392. Did the room appear to you to be warm or cold? It did not strike me eitherwise.
393. Did the air of that room have a close smell? Yes; most certainly.
394. Did the room smell offensively? Yes; there was excreta on the floor, and there was a strong urinal smell.
395. Was there any utensil on the floor? No, there was not. I am quite sure of that.
396. Was there any torn clothing in the room? There was nothing there beyond the mattress and canvas sheeting.
397. Did you examine whether the material to which you refer was sheeting or canvas? It was canvas.
398. Was there any blanket? No; the canvas I saw was single canvas.
399. Was there any blanket stitched to the inside of this canvas? There was no appearance of any such thing.
400. *Mr. McGowan.*] Have you seen people subject to paralysis shaking and making movements of their hands, and also people shivering with cold? Yes.
401. Can you detect the difference between a person shivering from one cause or the other? No.
402. Do you think the patient was shivering from cold or from paralysis? I could not discern whether the shivering was caused by illness or by cold.
403. We have heard it in evidence that there was a window in this room, and that the shutter was down over it;—do you think it would have been possible for anyone to have seen cobwebs on that shutter? I should think it would be very improbable for anyone to see cobwebs there, for it would be as much as an observer could see to notice the shutter itself.
404. *Dr. Manning.*] There has been some little doubt about the clothing worn by the patient on this particular occasion;—can you tell us whether, in addition to the clothing you describe, including the Crimean shirt, the patient wore any singlet? If he did wear one, it must have been so low down that it did not come up within view as high as his neck. A singlet did not certainly reach the throat, but still there might have been one on the lower part of the body.
405. Referring to the patients whom you saw there early in the morning, when you saw them were they in an enclosed court-yard? No; it was enclosed on three sides, and there was being placed on the fourth side some newly-dressed, but not painted, gate posts, evidently intended for the hanging of a gate, which would complete the enclosure.
406. Did this court-yard contain closets? Yes; it was a place easy of access. We walked through the premises to the court-yard without being challenged by any person. There were some closets near one wall of the enclosure, and there were some gate-posts being erected, or had been recently erected, to complete this enclosure.

- E. Sager, Esq.  
6 Nov., 1894.
407. *President.*] When you entered the grounds of the institution through the front gate, did anyone object to your presence, or did any attendant ask you the nature of your business? No; no one besides the man to whom I have referred, who came out through a little gate close to the main office. We walked over to him and asked where Dr. Vause could be found. He directed us to go round the block towards the kitchen.
408. Did he seem surprised to see strangers there at that early hour on a Sunday morning? No; he did not.
409. *Dr. Vause.*] Have you ever been at Bayview House before? I have not. That was the first and only time I visited the institution.

[Witness withdrew.]

WEDNESDAY, 7 NOVEMBER, 1894.

*The Commission met in the Board Room at the Chief Secretary's Office, at 11 a.m.*

Present:—

THE HON. SIR ARTHUR RENWICK, B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING, Esq., M.D., INSPECTOR-GENERAL OF THE INSANE.	}	ANDREW GARRAN, Esq., LL.D. JAMES SINCLAIR TAYLOR MCGOWEN Esq., M.L.A.
---	---	---

Dr. Vause attended on his own behalf to hear evidence and cross-examine witnesses.

Mr. William George Dickson sworn and examined:—

- Mr. W. G.  
Dickson.  
7 Nov., 1894.
410. *President.*] Have you ever been a warder at Bayview House? I was there for a period of six weeks or two months, in or about April or May, 1883.
411. Under what circumstances were you appointed to that position? I was walking down Hunter-street and saw an advertisement on a board, announcing that experienced warders were required at the Bayview institution. I applied for the position, and got it. On arriving there I found there were other warders engaged. I was somewhat astonished at the largeness of the staff. I made arrangements, and was specially engaged to look after Case No. 2. At the time I was engaged this patient had not arrived at the institution.
412. What were your special qualifications for this position? I had experience in the Ballarat Hospital for two and a half years, in the Clunes Hospital for twelve months, in Harcourt's Asylum for twelve months, and the Benevolent Asylum four months, and also in the Melbourne Hospital. Since then I have been following up hospital work.
413. As a matter of fact, then, has your life been devoted to this Hospital work? Not wholly so. My trade is that of a wool-sorter, but years ago I found things slack, and took to this hospital work.
414. What was your special duty when you were appointed to the position in Bayview House? I had no special duty. I never saw any Medical Superintendent when I went out there; I merely saw the head warder. I had no special appointment beyond answering the advertisement and being chosen for the position.
415. Who was the Medical Superintendent of Bayview House at this time? Dr. Vause; but I only saw him about four times during the whole of my stay at the institution.
416. What was the nature of the work you had to perform when you were appointed? At the outset, as far as my recollection serves, I had no special work set out for me; I was doing general odd jobs. One day, some little time after I had been there, Dr. Vause noticed me, and asked me the reason why I was behind in my work. I told him that there were three men in the ground doing no work at all, and that I was doing the whole of it. At the request of Dr. Vause I laid down a plan of work. He asked me to classify the work for the warders, and I did as I was requested.
417. Did you have any distinct engagement for this work when you went to Bayview House? No; I simply saw the head wardsman, but I did not receive any instructions from him or anybody else. The patient I had to look after had not arrived, and my first work, I think, was to clean out two cells. I was just simply engaged there, and started to work on any jobs I was set to do.
418. Did you not see Dr. Vause at all? No, I did not at the time of my engagement. When I went out there I was told that my patient had not come, and that in the meantime I was to do anything that might turn up.
419. Who was your patient? Case No. 2.
420. How long after your arrival at Bayview House was it before this patient appeared there? Some few days; perhaps a fortnight, but certainly not longer.
421. Concerning this particular patient, have you anything to say about his treatment while he was at the institution? Yes, I have. I always found the man to be quiet in demeanour, and there was certainly no necessity to treat him as a refractory patient. He was, however, placed in a dark cell every night in the week.
422. Which cell was he placed in? I cannot remember distinctly, it is so long since. It was somewhere adjacent to the main building.
423. Were these cells in a separate isolated building? Yes.
424. Were there two or three cells? Yes.
425. And were these cells in a separate building outside the chief buildings? Yes.
426. Did you attend this particular patient in this cell? I used to go with him at night with another warder and take his clothes away and put on his pyjamas. He was placed in a room where there was a bed on the floor. I know that room because of the door having an iron bar across it, the ends of which went into catches, one turned one way and the other the other.
427. Do you think you could recognise the cell in which he was placed if you saw it now? Yes; I am sure I could if the cross pieces are there.

428. Did you notice any cell adjoining this one? I think there was an adjoining cell.
429. Can you be positively certain about this? I do not like to be positive, for it is ten years and a half since I saw it, but my belief is that there were either two or three cells.
430. With regard to the treatment of this man, do you think he should have been treated as a refractory patient? Besides being shut up in that cell I think he was in every way treated fairly. In my opinion it was unnecessary to put him there, for I believe it would eventually drive him mad.
431. When you took him into this room had he his pyjamas on? No; we put them on after he went in.
432. What did you do with his clothes? We always took them out.
433. Can you tell us what sort of bedding arrangements there were in the room? He had an ordinary mattress on the floor.
434. Was it a straw mattress? I cannot say. It appeared to me to be an ordinary mattress.
435. Had he any blankets? Yes; there was a fair amount of blankets.
436. Was he a dirty patient or only refractory? He was not dirty, and he was not refractory, and it surprised me he was placed in solitary confinement. He complained to me of this treatment repeatedly, and told me that if it was not stopped it would for certain drive him mad.
437. Was he an excitable patient? No; he used to be very fond of reciting poetry, especially the writings of Burns and several other poets; in fact he always struck me as being sensible in his conversation and intelligent.
438. Was he subject to any periodical outbreaks of violence? No; as a rule he was quiet—beyond this tendency to recite poetry.
439. During the month or six weeks you had him in charge was this patient put in the cell every night? All the while I was there he was placed in the cell, and I had charge of him for fully a month.
440. During that month, then, was he placed in that cell each night? Yes.
441. And what do you say was the season of the year? It was April or May.
442. Do you know if the room was warm or cold at this time of the year? It was a close cell, and I do not think it could have been very cold.
443. Can you recollect any particulars as to how this room was fitted—was it comfortable, and light, and warm? The patient was left in the dark. There was, I believe, one window in the room, but it was always shut. I never saw it open. It was kept closed by a shutter.
444. Have you anything to say about any other patient which came under your observation while you were at Bayview House? Yes; there was Case No. 3.
445. What have you to say about him? When I arrived there he was the first patient I saw. He was strapped in a chair with a strap round his waist and muffs on his hands, fastened to the straps. The sight was quite a shock to me, for I heard, on making inquiries, that he had been sitting in that position from between 8 and 9 in the morning. I said, "That man wants a bath at once," and without consulting anybody I gave him a bath, although I had not been twenty minutes in the asylum. I consulted no one, and no one consulted me; and when I talked to the attendant about this case, before I took the action I did, he said it would be simply loss of time to bath a man like that.
446. What was the condition of this patient when you saw him? I found out that his legs were cramped and that his clothes were saturated with urine, and that when he tried to walk after being unstrapped, he could not do so without my help, as his legs were so cramped. I was not there a month before this patient could walk across the lawn by the aid of me holding him by the sleeve.
447. Was this patient subject to outbreaks? He was a perfect imbecile.
448. Was he a violent patient? No; he was harmless. He was so harmless that I used to laugh at the way they were treating him.
449. What do you mean by that? I used to see a man whom I think they call "Bob," and this man wrote reports about this patient. He used to sit down at night and write all that had been done during the day. I saw this once, and he was then writing about Case No. 3 reciting and so on, and his general conduct. I told him he was a cur for doing that, as I did not think there was anything to report on the case.
450. To whom was he reporting? I suppose he was reporting to the authorities of the asylum.
451. Was he authorised to do this? I believe so. I was under the impression that he had to report to the head warder in writing. He told me that he had to put it in writing, and I said that I would not by writing like that condemn a man for life; that I would rather leave the institution.
452. Would you conceal any facts concerning the condition of the patient? Certainly not.
453. Supposing the patient was suffering from excitement, or anything else, do you not think it would be your duty to report it? Certainly; I would report it verbally, but I think it would be a big mistake, for instance, to put down reciting poetry to undue excitement.
454. Then what is your objection to making this report? I do not think it was necessary. The subject was not worthy of mention, and after I expressed my opinion against such a report being made I seemed to be regarded by the other warders with black looks, and I felt that I did not occupy the same footing in the place as I did previously.
455. Is it not the duty of warders to report on all cases under their care? Yes; they should report to the medical officer in charge.
456. Who was making the report to which you refer? A warder in the institution who I believe had been previously employed as a gaol warder.
457. Was this ex-gaol warder making a report for the purpose of supplying the Medical Superintendent? I cannot say.
458. Was this report in the nature of a charge against a patient? I can only surmise that.
459. What is your general impression concerning the treatment of patients at Bayview House? I am of opinion that the sick and helpless are treated unfairly, and that in reference to these particular patients there is little sympathy between the staff and them. The patients mentally deranged and physically able-bodied are treated fairly well. They are supplied with good plain food, good beds, and have a fair amount of exercise outside on the lawn; but if the patients happen to be helpless and sick there is neglect, and a want of proper nursing.
460. Do you then consider that the warders are incompetent for the position they hold? Yes, I do; for at the time I was there I do not believe anyone of them had been in an asylum before.

Mr. W. G.  
Dickson.

7 Nov., 1894.

- Mr. W. G. Dickson.  
7 Nov., 1894.
461. Were there a sufficient number of warders engaged to carry on the work of such an institution? Yes, as far as numbers are concerned; but of all the attendants there were only two to look after the patients.
462. Do you think there were sufficient as regards numbers? Yes; but there were not enough skilful warders to treat the whole of the patients. The strong and physically healthy patients were fairly well treated, but the helpless and sick had not sufficient supervision. To give you an instance of the strength of the staff, I may say that one night I was attacked by eight patients. I was sleeping in charge of these patients. In another dormitory three warders were sleeping with one quiet man. I was attacked during the night, and there was a great struggle. One patient caught me by the throat, and if I had not used great force in pressing back his fingers and thumbs I might have been strangled. I had great difficulty in getting his hands off my throat. Dr. Vause came in about half an hour after the struggle began. This took place somewhere about 2 o'clock in the morning. After the occurrence two warders slept in the dormitory. This fact alone showed to me that there was some lack of management in conducting the institution.
463. Did Dr. Vause on this occasion come into the room immediately after the disturbance began? Not immediately; it seemed to me about half an hour. There was a great noise going on, and perhaps the time was not half an hour, but it seemed so while I was struggling.
464. Did any other warders come to your assistance? No; the nearest warder was far away at the other end of the building.
465. And did you manage to quieten these eight recalcitrant patients yourself? Yes.
466. *Dr. Garran.*] Who told you to put Case No. 2 into that room? I never put him there myself. I was not authorised to do so at all. When he was put into that room one of the warders came with me always. My being a new man on the premises I was asked to do odd jobs.
467. Did you merely assist in putting him into that room? Yes; I used to go with the other warder to the door. He went inside, and I stood at the door in case the patient made a spring to get out or escape.
468. Did he ever show any objection to being put there? Yes; he did—in a gentlemanly, quiet manner. He used to say that putting him in that room would eventually make him so ill that he would be driven mad.
469. Did you, on any occasion, tell the chief warder that, in your opinion, there was no necessity to put him in that room? Yes; several times I expressed the opinion that this isolated treatment was wrong and unnecessary.
470. Did you ever speak to Dr. Vause on the subject? No, sir; I did not.
471. In your opinion, did Dr. Vause exercise proper supervision over the place? It appeared to me that he did not, for the warders were allowed to do very much as they liked.
472. Did Dr. Vause ask you personally to do what you have told me you did? No.
473. Did you ever have an opportunity of telling Dr. Vause that this patient was immured in this cell? No; I only saw Dr. Vause on four occasions. The first time, I think, was on the night of a ball. I do not remember mentioning his case to him then.
474. Was the patient put in solitary confinement on the order of Dr. Vause or on the action of the chief warder? I suppose the head warder got his instructions from Dr. Vause. If he did not, he should have done so.
475. Do you say that you spoke to the head warder on the impropriety of putting him in that room? I told him it was not fair treatment many a time.
476. Did he say that the patient was placed there on the instruction of Dr. Vause? No, sir.
477. Then you do not actually know if it was done at the instance of Dr. Vause? No.
478. How often did you see Dr. Vause go round the premises for the purpose of inspecting the patients? Only once, I think. Only on one occasion, when I was cleaning boots. I did not like this particular occupation, as I thought it too menial. I complained to Dr. Vause about it, and at the same time told him that his warders simply did as they liked about the place. He said it was not so. After another word or two had passed between us he asked me if I would supervise the work, saying if I did so he would be much obliged.
479. How long was this before you left the institution? That was the first time I had an interview with Dr. Vause, and this was a few days after I got there.
480. Then, after you had been there a few days, did you, at the request of Dr. Vause, rearrange the work of the warders? Yes.
481. Did Dr. Vause make any regular visit or round of inspection at any particular hour? Not that I know of; I only saw him at that time to which I refer, and that was about 9 o'clock in the morning. As a rule, my duties took me away to the lawn with the patients, some short distance from the main building.
482. Did you see Dr. Vause drop upon the warders at any odd times unexpectedly? No; I only saw him on the occasion I tell you of.
483. In your judgment, then, was there any proper supervision over the warders? I do not think there was.
484. Did they do pretty much as they liked? So it seemed to me.
485. Do you think that some of these abuses of which you complain may have been the result of the warders' action, without the knowledge of Dr. Vause? Well, I do not blame the doctor entirely.
486. Was it possible for some of the attendants to place patients under restraint unnecessarily? Well, there was the case of the ex-gaol warder of which I have spoken, and two other cases.
487. Did these warders have power themselves to keep a patient under restraint without orders from the Medical Superintendent? Apparently they did.
488. In your experience, if you found it necessary to put a patient under restraint, and you did so without an order, was it your duty to report the whole of the facts to the Medical Superintendent? Yes, decidedly.
489. Do you think that these instances at Bayview House, to which you have made reference, were reported to Dr. Vause? I do not know; but I do not think they were.
490. Did the other warders know that you had supplied Dr. Vause with a plan or new arrangement for the supervision of the warders? I do not know.
491. Do you know whether your action in rearranging the work created any bad feeling amongst the warders? I do not know. Dr. Vause told me at the time he asked me to rearrange the work that the head warder would be going away before long, and I inferred that this would mean promotion for myself.

492. Why did you leave the institution? I was called into the office one day and told to go. I do not know that there was any charge made against me. Dr. Vause said to me, "Here is your money," and he paid me all that was due, and one week in advance. I went away quietly. I do not know what complaint he had to make, but I know of no wrong-doing on my part.

Mr. W. G.  
Dickson.  
7 Nov., 1895.

493. Did Dr. Vause give any reason why your services were dispensed with? No, he did not give me any reason; that is, no particular reason. He said something, and I replied, "Very well doctor; I was going all the same."

494. *Mr. McGowen.*] At what time of an evening was case No. 2 put into one of these two isolated rooms? Just about dark every night.

495. Would not that be before 6 o'clock? I think it would be between 6 and 7.

496. What time was he taken out of the room every morning? About half-past 7 or 8 o'clock. He used to be given his bath then.

497. Was that room a dark cell? It was a refractory cell.

498. Was there any light admitted into the room in the early morning before you and the other warder took him out? No. There was a small window with a shutter over it, and that shutter was always down.

499. Was that room cleaned out every morning? Yes. I am quite sure of that, for I recollect doing it myself.

500. Was that patient then kept in that room every night between eleven and twelve hours? Yes.

501. Were there any night attendants on duty? No. No one but the other man and myself.

502. What time did the attendants go to bed at night? Ten o'clock.

503. What time did they get up in the morning? They are supposed to get up at 6 o'clock, but sometime they might be a little later.

504. Therefore was there any proper night attendant? No.

505. Did anyone look into that room during the night? No.

506. Did anyone look through the observation hole in the door? I do not think there was an observation hole in the door at all.

507. Then, so far as your knowledge goes, did anyone look in on that patient or any other patient that may have been placed in those rooms from the time they were put in at night until they were taken out in the morning? No, not that I know of. I never looked myself nor saw anyone else.

508. Now concerning case No. 3—was he always strapped in the chair in the manner you describe? Not always.

509. Did he ever have any friends come to see him? I heard that a lady came to see him. I never saw her myself.

510. When she came to see him was he released from the chair? Oh, decidedly no.

511. Do you say that on your arrival at the institution, and when you saw case No. 3 strapped in the chair, you were compelled by a feeling of humanity to take him out of that chair and give him a bath because his clothes were dirty and wet from urine and fecal matter? Yes.

512. Were these dirty clothes kept on him then? I can only recollect the one occasion. He was taken out of my charge after I had given him a bath, and taken him into the house.

513. But were his clothes changed after his friends came to see him? Oh, yes; when his friends came to see him he was on the lawn, and in much better clothes than he was when I saw him first. After he had received better treatment and was kept clean he improved rapidly.

514. *President.*] In reference to Case No. 2, did you hear him complain frequently about being put into this dark cell? He complained very much indeed. He complained when he was going in, and used to say it would drive him mad, and he complained to me on one occasion when he was outside on the lawn.

515. Did he complain to you of being afraid to go into this cell? No, he was not afraid, but he seemed to regard it as ignominious treatment.

516-17. Was he comfortable in that room? Yes, fairly so, except being isolated.

518. Did he say to you that such treatment would eventually drive him mad? Yes; he told me that on several occasions.

519. Do you think he was perfectly sane or insane? I cannot speak with certainty upon that point. I know that he was jolly, genial, and generally good tempered in his manner.

520. Could he read and write? Yes.

521. Did you ever see him out of temper? Never.

522. Did you think he was a sane man? I cannot go so far as to say that; but many a time I thought he had no business there.

523. Did you hear that ten years later he died in the madhouse? Yes, I heard something about it; but at the time to which I am referring my opinion was that he was a persecuted man.

524. Do you think that his treatment at Bayview Asylum had anything to do with his subsequent malady? It might have increased the dose, as it were.

525. Are you under the impression that if he had received other treatment at the time the result would have been different than it was? I cannot say. It would be very hard for me to say that.

526. Did you ever make any such statement? No, never.

527. *Mr. McGowen.*] Was any medicine ever given to Case No. 2 for the treatment of bodily disease? I never saw any.

528. *Dr. Manning.*] Did you ever hear that he recovered, and lived for some years with his family? No; I never heard of that.

529. Did you ever hear he made an attempt to escape from his confinement? I know he offered me £50 to get him out of Bayview House, and I told him I could not do that, and would not listen to him.

530. Did you ever hear that he made his escape from the Reception House? Yes; I heard he made his escape. I think it was by the aid of a key he made himself.

531. Do you know that he was put in this cell particularly owing to repeated attempts to escape in which he perilled his life? No.

532. Do you know that he attempted to get away from Bayview House on more than one occasion? If he had while I was there I think I should have known it; as I said before he offered me £50 to get him away, but I said I could have nothing at all to do with such a proposal.

- Mr. W. G. Dickson. 533. *Dr. Vause.*] Did you ever hear of this patient making a rope while he was at Bayview House? Never.
- 7 Nov., 1894. 534. Where did the attack take place to which you refer? In the large dormitory, where there must have been ten or a dozen beds.
535. And how many patients did you say attacked you? There were about eight, I think. It was early in the morning, and there was a great noise and scuffle.
536. How many attacked you actually? Four made the attack, the direct attack.
537. Was that dormitory on the same floor as the dining-room? It was on the ground floor.
538. In what way was case No. 3 fastened down? He was wearing a pair of ordinary muffs, and there was a strap fastening him round the waist in the chair.
539. Was it not a sheet? No; it was a leather strap, made purposely.
540. Could the patient move while he was in that position? He could move his feet a little, but he seemed cramped.
541. Was that leather strapped there for the purpose of keeping him from falling out of the chair, or was it there for restraining him? It would answer both purposes.
542. How was it fastened? It was loose enough to give him room for slight movement, but he could not get out of the chair.
543. Might it not have been placed there to keep him from falling out, and thus make him secure from injuring himself? I put it down to the laziness of the warder. I have put him in the chair myself and put the strap round him, but I used to leave his hands free, so that he was under no unnecessary restraint.

[Witness withdrew.]

Mr. Alan Farquharson sworn and examined:—

- Mr. A. Farquharson. 544. *President.*] What are you, Mr. Farquharson? I am an employee at the Bayview House Asylum.
- 7 Nov., 1894. 545. Do you know anything about Case No. 1? Yes; I know something about it. It was my duty to attend on that patient throughout the day on every second Sunday.
546. Where you at Bayview House when he was first taken there? No, sir. He was there before I went.
547. Do you remember when this patient was put into a solitary cell? No, I do not remember that.
548. What do you remember about his case? I remember he used to sleep in a detached building, and sometimes I took him out of this place in the morning. He used to be put in the cell about 6 or half-past 6 at night, and when it was my day on duty I have taken him out of that place. Sometimes I would put him in on a Sunday night.
549. When you put him in this cell did you go in yourself? Yes.
550. Was the bedding all right? Yes.
551. Was it clean, and dry, and fresh, and fit for a man to sleep on? Yes. The bedding was taken away every morning and put back at night.
552. Were the patient's clothes taken from him? Yes. He had pyjamas put on him, and his clothes were taken away for he was in the habit of tearing them up.
553. Did you ever see him put into that cell quite naked? Never on any occasion.
554. What clothing did he wear when he was taken into the cell? It was the usual custom to take him from his room—his sitting-room—in his ordinary clothes; to take off his clothes and put on the pyjamas.
555. Did he always have his pyjamas on when he was left in the cell? Yes; they were always put on then. He was never put in the cell naked.
556. Are you perfectly certain about that? I am perfectly certain.
557. How long was he put to sleep in that cell? I do not remember when he was first put in, and I was only there every second Sunday.
558. Do you know if there have been any alterations made in the lavatory since you were in the habit of putting Case No. 1 to sleep in that room? Yes; it has been shifted. Hot water has been laid on and other conveniences have been added.
559. Was the hot water laid on before the complaint was made about the treatment of the patient? No, sir.
560. But it has been laid on since? Yes.
561. And have other things been done? Yes.
562. How did Case No. 1 get a warm water bath before the hot-water service was laid on to the lavatory? Two cans full of hot water were carried there every morning for the patient's bath. I have seen it done myself.
563. And during the time you were there was the patient always placed in a tepid bath? Yes.
564. When on duty there on every second Sunday, did you remain during the night? No; I used to go away at 6 o'clock, after putting the patient to bed. I know nothing of the proceedings that took place at night.
565. *Dr. Garran.*] Did you begin your duty on the Sunday morning? Yes.
566. Did you take the patient out of the cell on those Sunday mornings on which you were on duty? No; not always. He was taken out before I came over.
567. Did Case No. 1 ever complain that he did not want to have his bath? Yes, frequently.
568. Did he ever say it was too cold? I think so.
569. Did you know of him having a cold bath? No; I never gave him one.
570. Did this patient dirty his room? Yes; very badly.
571. Was there a utensil in his room? Yes; I have seen it myself.
572. Would he use it? Never.
573. Did you ever see him use it? No.
574. When you put him into this room did it smell from a stale odour? No; I never smelled one.
575. Did the room smell in the morning? Yes.
576. Was the patient in the habit of tearing his clothes? Yes.
577. Did he ever tear his pyjamas off during the night? Yes; it was a frequent habit. I have seen him tear them off while I have been standing near him, and I have found him naked on opening the door.

578. Did he ever appear to be shivering or suffering from cold on these occasions? He always was very shaky. He was shaky during the day. Mr. A. Farquharson.
579. Do you think this shakiness to which he was subject was the result of disease or cold? I do not know what was the cause of it. 7 Nov., 1894.
580. Did he always have a tremulous movement of his hands? Yes.
581. Did you ever find this sleeping-room early in the morning not in a dirty condition? No, I did not.
582. Was it then in your experience invariably in a dirty state? Yes, it was.
583. *Mr. McGowen.*] How long is it since you received the subpoena to attend here and give evidence before this Commission? I received notice to be present on Saturday afternoon last.
584. How long have you known that a Royal Commission was to sit to inquire into this affair? I cannot say.
585. Have you known it for a week or a fortnight? Yes.
586. Have you had any conversation with Dr. Vause since you have known this Commission was going to sit, or since you received an intimation that you were to give evidence? The only conversation I had with Dr. Vause was that I told him yesterday that I had to go to Court.
587. Did any word pass between you as to the nature of the evidence you were to give here? Not a word; I am quite certain upon that point.
588. Can you say how long it is since Case No. 1 was placed in that room? I cannot say; it may have been six months, but not nine months.
589. Did you also say that his pyjamas were put on him every night? Yes.
590. Did you see them put on on a Sunday night? Yes.
591. How do you know how he was found on Monday morning? Oh, I may have seen him occasionally as I am all over the place.
592. Do you know if any other of the attendants brought him out of that room naked? I do not think they did for I used to take his big overcoat to him.
593. Why did you do that? Because he had to cross the yard.
594. Did you take the overcoat because you thought he would be cold in crossing the yard? No; I used to take it because I thought some of the female attendants might be about.
595. Does your evidence as to finding the patient naked in this place only apply to every second Sunday morning? Yes; I have only seen him once since.
596. Is there a shutter in the room? Yes.
597. Was it nearly always down? No, not always. If it was a cold night I pulled it down; if it was warm I left it up. I used to pull it down by a string from the back.
598. Did you ever notice any rats about the place? Yes, sometimes.
599. Is the place infested with rats? No, it was not what you might call infested, but there are a good many about.
600. Did you ever hear any talk amongst the other warders, or anybody else, as to the treatment meted out to Case No. 1? No, I cannot say honestly that I did hear any particular complaints. I have heard some say that it was a shame.
601. Why did they say it was a shame? I think some of them thought he was cold.
602. How did they make this out? Because he would not keep his clothing on.
603. Did you always find the remains of his pyjamas in the room every morning? Yes.
604. Therefore he would have to have a new suit of pyjamas every night? Yes; nearly every night, as far as I know, he did have a new suit.
605. Do you know anything about night attendants being engaged at the asylum? No, sir.
606. Did you ever hear anything in reference to Case No. 4? Yes.
607. Did he meet with an accident on one occasion? I do not know for certain.
608. Have you not heard that he cut his head open? Yes; I believe he injured the back of his head by falling out of bed.
609. Did you ever hear that the flesh of the cut on the back of his head had been eaten by rats? I heard that rats had eaten it, or some of it; that is simply all I heard.
610. And did you hear that the rats came when this man fell out of bed and cut his head and ate part of the flesh? Yes.
611. Did you hear some of the warders say that the rats had also gnawed the flesh to the bone on the back of his hands? Yes.
612. Will you give the Commission the names of the men you heard say that? It was a man named Copley I heard say it.
613. Where is he now? He has left the institution, and, I believe, he has gone to South Africa.
614. Did you hear any other witness say it? No.
615. Did you ever see Dr. Vause under the influence of liquor? No.
616. Did you ever see him drunk? Never.
617. Lately, have there been a lot of clothes purchased at the institution? I do not know.
618. How do you know that the place is overrun with rats? Sometimes I used to see them.
619. Did you ever find any boots that had received the attention of rats? Yes.
620. Have you seen patients' boots that have been eaten away by the rats during the night? Yes.
621. What sort of a place is the dead-house in connection with the institution? A small, square, wooden building.
622. Are the rats very prevalent in that particular part? I have seen some rats there.
623. In fact, do you think that rats are plentiful all over the building? No; I do not say all over the building; they are mostly about the kitchen.
624. Were there any in the room where Case No. 1 slept? No.
625. Or where Case No. 4 slept? Yes; there were rats there.
626. Have there been many attendants discharged since the 20th of May? No, sir; there have not been many.
627. I want to know particularly, have there been many discharged? Not many; those that have left have gone on their own accord.
628. Do you know the names of the men who have left? Yes.
629. Who are they? There is Copley, Pat, and Mick. I only knew their names as Pat and Mick. They left within a week of one another.

- Mr. A. Farquharson. 630. Can you not give the surnames of these men, Pat and Mick? No. They left of their own accord, and went to the Clarence River.
- 7 Nov., 1894. 631. Do you know John Doherty? Yes.
632. Was he one of the men who was seen supporting Case No. 1 on the morning of the 20th May? I do not know.
633. Do you know a man named O'Brien at the institution? Yes.
634. Do you know if Doherty was a gaol warder at one time? I do not.
635. Can you give me any other names of warders or attendants who have left Bayview House other than those you have mentioned? Those are all I know.
636. Were you about to leave, or likely to be discharged? I think I was likely to be discharged.
637. Why did you stay on? Because I asked Dr. Vause to allow me, and he did so.
638. Did Dr. Vause ask you to stay on? No; I asked him.
639. Have there been many improvements made to the room occupied by Case No. 1 since the morning he was discovered, on 20th May? I think the room has been painted or whitewashed on the outside, but nothing has been done to the inside.
640. Are you positive that an india-rubber utensil was in the room every night you put the patient there? Yes; it was always there.
641. Are you perfectly sure no conversation has taken place between you and Dr. Vause to influence you in your evidence? I am sure there has not.
642. *President.*] Did you attend to the room adjoining the one from which Case No. 1 was taken? No.
643. What was it you say concerning the shutter? The shutter was occasionally pulled up. If it was a hot night I pulled it up, and if it was a cold night I left it down.
644. Do you particularly remember the day on which the inspection was made by Professor Anderson Stuart and others? Yes; that was the morning of the Sunday which was to be my day on.
645. We have had it in evidence that there was no torn clothing in this room on the Sunday morning the inspection was made; we have heard it said that there was not a shred to be found;—what do you know about this? All I can say is that he was taken out early, and I did not take him out.
646. Would you not have expected to find torn garments there.
647. Did you afterwards find any portion or fragments of garments about? Yes. I do not remember one occasion on which I have entered the room that I did not. I always found something torn.
648. *Dr. Garran.*] Did you ever hear of anyone having been attacked by rats? Yes.
649. Did you ever hear of rats having eaten the flesh of a wound on Case No. 4? There was some talk about that.
650. Whom did you hear it from? Copley was the man who mentioned it. I think it was Copley's assumption that the rats did so.
651. Do you think that the house is unusually full of rats? No; I do not think so, for an old building like that.
652. Is there any attempt to keep them down? Yes; traps are set about the place, and there are also cats kept to keep them down.
653. Do you know whether Dr. Vause keeps a certain book for discharged servants to sign, stating that patients, while under his care, are properly treated? No; I do not know.
654. Do you know that if a warder or attendant is about to leave, and he refuses to sign this book, the doctor refuses to give a certificate of character? I do not know.
655. *Dr. Vause.*] Were the pipes laid, and the taps fixed, and everything else done, for the supply of hot water to the lavatory previous to this supposed scandal? Yes; the hot-water service was complete with the exception of supplying the water. Everything was ready for the water supply.
656. When you took the Case No. 1 out on any occasion, did you always find his pyjamas scattered about the place? Yes.
657. Were they soiled? Yes; he was a very dirty patient.

[Witness withdrew.]

Mr. Reuben Alfred Peet sworn and examined:—

- Mr. R. A. Peet. 658. *President.*] What are you, Mr. Peet? I am a painter, employed at Bayview House. I have been there two years. I am there every day, and about every part of the building, painting and repairing.
- 7 Nov., 1894. 659. Do you know some of the patients? Yes; I come in contact with them every day.
660. Do you also know the warders? Yes.
661. And have you always seen everything carried on in a decent and orderly way? Yes.
662. Do you remember Case No. 1 being there? Yes.
663. Did you ever have any conversation with him? Yes.
664. Was he an excitable sort of gentleman? Yes; I have often seen him very excited.
665. Do you remember whether he used to sleep in a room on one side of a small court-yard, and have his sitting-room in the main building? Yes; I believe he slept there.
666. Do you remember his being placed in one of these two cells? Yes.
667. Have you been colouring that cell lately? Yes.
668. Did you ever see him put into that room? No; but I have seen him taken out of it in the morning.
669. Do you remember how long it is since he was first put in there? I have no accurate knowledge of it.
670. Have you ever heard any conversation amongst the patients and warders about it being a hardship to put the patient in that room? Yes.
671. Did they say he was being hardly treated? Yes; the opinion seemed to be that they did not like the idea of a man in his position being in a place like that.
672. Have you seen him taken out on a number of occasions? Yes; when I have been passing to and fro to my work.
673. Have you ever seen him in the room itself? No.
674. Have you been sufficiently near to look into the room? Yes.

675. When you have looked into that room, or when you have seen the patient, has he always had his clothes on? Yes, he was partly dressed.
676. Was he wearing clean clothes? Yes.
677. Was he then on his way to his bath? No, to his sitting room.
678. Was he shivering or shaking? No, not that I am aware of.
679. Have you ever heard any other patients complain about their treatment? No; they all seemed to be quite happy and contented. I have seen some excited occasionally.
680. Was Case No. 4 a patient there during your time? Yes.
681. Did you hear any talk about rats having eat the flesh of the cut in his head when he was wounded? No.
682. Are the rats an annoyance about the place? Not that I know of. I have seen them there, but not in numbers more than one could expect in an old place of that kind.
683. *Dr. Garra.*] Did you ever go into this room occupied by Case No. 1? Yes.
684. Did it smell sweet? Yes.
685. Was there any stale smell about the floor? There was no smell whatever.
686. *Mr. McGowan.*] Do you not say that you went into a room where there is no window, and that it smelt sweet? Excuse me, there is a window.
687. Was it always opened? It was always opened when I went in. I occasionally visited the place, and when I went into the room the window has been partly up.
688. What time did you go into the room? Oh, I get there about 10 o'clock in the morning.
689. Would that be three hours after the patient was taken out? Yes.
690. Have you done any painting in that room, or made any other improvements to it lately? None whatever.
691. What is the name of the patient or attendant who said it was not fair to treat Case No. 1 like this? He was an attendant named Alick Mackenzie.
692. Did you hear anybody else complain? No.
693. Did you ever hear of Case No. 4 falling and cutting his head? I heard of his meeting with an accident, but I do not know how it occurred.
694. Did you ever see him? No, sir.
695. Did you ever hear any remarks about rats coming and eating the back of the man's hands or head? No, sir.
696. How long was Case No. 1 put in this room of a night? I cannot say.
697. Was it for twelve months? No.
698. Was it for nine months? I do not think so.
699. Do you think it was more than eight months? I do not.
700. How long was it then? I think it was between six and seven months.
701. Did you ever see any of his friends on a visit to him at Bayview House? Yes; Mrs. \* \* \* came one day, and saw him in the sitting-room.
702. Did you hear any conversation between them? No, sir.
703. When relations came to see him, did they always meet him in the reception-room? Yes.
704. Did you ever hear or know Case No. 1 to say, "I don't sleep here, I sleep in the stable"? Yes, very often.
705. What did he mean by saying that? I think that was the name he had for the place he had slept in for the six or seven months.

[Witness withdrew.]

Mr. Edward Erickson sworn and examined:—

706. *President.*] What are you, Mr. Erickson? A wardman at the Coast Hospital, Little Bay.
707. Were you ever engaged at Bayview House? Yes, about two years ago.
708. What position did you occupy? That of an attendant.
709. Was Case No. 1 a patient there then? No.
710. How long were you employed there? About two years.
711. Had you every opportunity of seeing the working of the institution? Yes.
712. Had you any similar experience elsewhere? No; that was my first engagement.
713. What were your special duties there? Those of an ordinary attendant, to assist in keeping the place clean, and to look after patients.
714. Had you certain patients relegated to your care? No.
715. Had you any specific duties during the day-time or at night? I slept with thirteen patients, and looked after them during the night-time.
716. Were there any other warders engaged at the same time as yourself? Yes.
717. At what time did you commence work in the morning? Shortly after 6 o'clock.
718. And when did you go to bed? About 10 o'clock at night.
719. Were there certain parts of the institution for the confinement of refractory patients? Yes.
720. Were there any confined there while you were an attendant? Yes.
721. Do you know whether it was the custom at night-time to prepare hot milk, cocoa, &c., for these patients? No.
722. Do you know if night attendants looked in upon these patients? No, sir. When I was an attendant, I generally went to the cell-door at 10 o'clock, immediately before going to bed, and looked through the observation hole to see that all was right.
723. Were there any outbreaks during the night-time while you were there? No.
724. Were the patients generally well conducted? Yes.
725. Do you know anything about rats over-running the place? No.
726. Did you notice any difficulties in connection with the management while you were there? I did not.
727. Were you satisfied with the general management of the place? Yes; I left on my own account. I got a fair discharge, and shortly afterwards went to the Coast Hospital as a wardman.

Mr.  
R. A. Peet.  
7 Nov., 1894.

Mr.  
E. Erickson.  
7 Nov., 1894.

- Mr. E. Erickson. 728. *Dr. Garran.*] While you were at the institution did it strike you as being well conducted or otherwise? It was well conducted.
- 7 Nov., 1884. 729. Did you notice any patients subjected to what you might call cruel treatment? No.
730. Why did you leave? I left on my own account, and never had any disagreement with Dr. Vause.
731. *Mr. McGowan.*] Were you asked previously to give evidence in this inquiry? Yes, and I declined to come.
732. When did you leave Bayview House? In 1892.
733. When you left did you have to sign a book stating that the institution was conducted on proper lines? Yes, I had to sign a form to that effect.
734. Was your signing that form made a condition before you could obtain your reference? I understood it was the usual thing.
735. Was it not made a condition that before you got a reference you must sign a book kept by Dr. Vause to the effect that the institution was properly managed? No, I will not say that as far as the reference is concerned. I could not swear that I had to sign any paper before I got my certificate.
736. What do you mean by saying that signing such a document was the usual thing? People who had been there before told me of it, and I heard something to the effect that if there was anything wrong at the institution some paper could be signed.
737. Do you know if they had to sign this book before they got a reference? I cannot say.
738. Do you know if they had to sign that paper as a condition before they had a certificate of good character? I cannot say that.
739. Do you know if it were necessary that such a paper or statement should be signed? I know it was the custom, or I understood it was the custom that people leaving the Asylum should sign.
740. Was it not possible that people leaving the Asylum might refuse to do so? Of course it was; if I had seen that the place was improperly conducted I should have refused to sign it. In the course of my experience it was not so.
741. Were you ever engaged in that kind of work before? No.
742. How was it that you came to leave the institution? I gave notice to Dr. Vause once or twice that I would leave. I had found out by experience that my nerves could not stand the work. I could not stand sleeping with the patients.
743. Were any of the patients of a refractory nature during your period of service in the institution? No; I cannot say that there was any distinct outbreak, but they disturbed me so that I could not sleep.
744. Do you know the room where these refractory patients were confined? Yes.
745. Do you mean the rooms near the court-yard? Yes.
746. Was there in those rooms good bedding accommodation for the patients? Yes.
747. What was that bedding accommodation? There was a mattress, a couple of sheets, a couple of blankets, a couple of pillows—like any ordinary bed.
748. Was there a chamber utensil? Yes, and a chamber utensil.
749. Were the ordinary day clothes of the patient left in that room? No, they were taken away.
750. Were the patients left to go to bed naked? No; not always. Some were allowed to wear pyjamas, but those who do not possess pyjamas were put to bed and properly looked after before the attendant left.
751. Was it the usual practice of such patients to make water on the floor or on the bed? Yes; as a rule. They were very dirty.
752. Was it the usual practice for these rooms to be kept clean after they had been used by the patients? Yes; they were kept clean. They were cleaned every morning.
753. Were these rooms clean before Dr. Vause made his usual rounds? Yes.
754. Did he make those rounds every day? Yes; as far as I know.
755. Did you notice whether there was an indiarubber chamber utensil in each of these rooms? Yes; but in the room where I slept earthenware chambers were used.
756. Do you think that the patients taken out of these particular rooms early in the morning suffered from cold? They did not seem to suffer.
757. Did they ever complain of cold? No.
758. Do you think the place was very much overrun with rats? No.
759. Did you ever hear any complaints or see where the boots of patients had been injured by rats? No.
760. *Dr. Manning.*] Are there any rats at the Coast Hospital? Yes.
761. *President.*] Did you, while you were an attendant at Bayview House, see anything wrong about Dr. Vause? No.
762. Was he always sober and in his right mind when he was making his rounds? Yes; as far as I know.  
[Witness withdrew.]

Mr. William Little sworn and examined:—

- Mr. W. Little. 763. *President.*] What is your occupation, Mr. Little? I am chief attendant at the Callan Park Hospital for the Insane.
- Nov., 1894. 764. Do you remember Case No. 1 being brought to Callan Park on the 20th of May? Yes; I do.
765. Since then has the patient been under your observation more or less? Yes; he has.
766. In what condition, speaking generally, has he been? Very excited.
767. Have you any previous experience of him? None.
768. How has he been since being an inmate of Callan Park—I mean in his habits? His habits have been wet and dirty, day and night.
769. Have you had to put him under any form of restraint since he has been there? No; not particularly so.
770. *Dr. Garran.*] Does anyone sleep in the same room with him? No.
771. Is he put in a room by himself? Yes; he sleeps in a single room.
772. In what clothing does he sleep? We put him in a night-shirt.
773. Does he show any tendency to tear it? Yes; occasionally.
774. What kind of mattress do you use for his accommodation? Sometimes a straw one and sometimes one made of hair; but he will not have a hair mattress if he can help it. He throws it on one side, and asks for a mattress made of straw.
775. Is he in the habit of dirtying his mattress? Yes.

Mr.  
W. Little.  
7 Nov., 1894.

776. Do you leave a utensil in his room? Yes.
777. Does he use it? Sometimes he does, but he seems to prefer to dirty the floor.
778. Does he dirty that as well as his mattress? Yes.
779. Is he supplied with the ordinary blankets and sheets? It all depends upon the state in which he is.
780. Does the room he occupies smell bad in the morning? Yes.
781. Do any attendants look after him during the night? There is an attendant on watch to see him all night through, if necessary. This attendant remains in a room adjoining. He is there for the purpose of attending to any immediate requirements, and to see that the patient does not get cold during the night.
782. Did you ever have a thermometer in this room? No.
783. Is this room off the corridor? Yes.
784. Is the patient bathed every morning? Yes.
785. What is the temperature of the bath you give him? I do not know for certain; it is about 98°, I think.
786. Does he ever complain about his bath being cold? No; he appears to enjoy it.
787. Does he tear his clothes during the day-time? No; not so much now as he did at first.
788. Do you regard him as a troublesome patient? He is one of the worst in the asylum, and he wants constant watching.
789. Does he show any disposition to destroy his clothes in the day-time? Sometimes he does, but not so much as at night-time.
790. Did you think it necessary that he should be particularly watched, so that he should not destroy his clothes at night? When he arrived at Callan Park at first he was very destructive, and an attendant used to go in and cover him when he had stripped himself.
791. When he was first at the asylum did he frequently undress himself at night? Yes.
792. *Mr. M'Gowan.*] How often has he torn his night-shirt since he was admitted on the evening of May the 20th? Once, twice, and three times a night when he came at first, but he has been better of late.
793. How do you account for this change—that he has been better of late? Because I think he has improved mentally and physically.
794. Did you strip him when he arrived at Callan Park? No. I saw him stripped.
795. What was his bodily condition? I noticed he had a black eye.
796. Did you notice any other bruises on his body? No; I noticed no other bruises at all. I saw him on the following morning, but I did not notice any bruises on his body.
797. What is his general condition now? He seems to be better mentally and physically, and much quieter than he was at first.
798. Does he ever complain of being cold? No.
799. Does he complain of being cold in the morning when he is taken out of the room? No; I have never heard him complain.
800. Does he use the chamber utensil now? He does now, but he would not at first.
801. Therefore do you think there is a marked improvement in his condition now? Yes; he is much better than when he came to Callan Park.
802. *Dr. Monning.*] Do you say Case No. 1 is much better now than he was when he came to Callan Park Asylum? Yes.
803. When he first arrived at that institution was he worse than now? Yes; he was one of the worst patients we ever had to deal with.
804. Has your experience extended over many years? Yes; I have had nearly thirty-two years' experience.
805. Do you say that Case No. 1 was one of the worst patients you ever had to deal with? Yes; he was a most difficult case. He was one of the worst I have known.
806. Do you think it advisable that he should sleep in a single room? Yes, I think it would be advisable; because I believe if he were put where there was any company he would be liable to become more excited.
807. Do you think that under such conditions he would become violent? Yes. He was extremely restless, and appeared to wish to resist. In fact, when people went near him he would throw things at them.
808. Do you think it was best he should be by himself? Yes.
809. Is the single room he now occupies warmed at all? No, sir; not with any special heat.
810. Are any of the single rooms warmed? No.
811. Have you in your charge fully 100 or more of those single rooms? Yes.
812. Have you ever seen any of these specially warm? No.
813. Has it ever been found necessary to warm any of these rooms? No.
814. It has been given in evidence that this patient has destroyed clothing;—have you a list of the clothing destroyed by him? I have not personally, but Dr. Blaxland has a list up to the 9th of September. That was before the patient was able to be dressed.
815. How many weeks elapsed before you were able to dress him at all? I cannot tell exactly. We used to make him sit by the fire in a dressing-gown in the day-room for a considerable time. I do not think we got him out until about August.
816. In your opinion is he actually getting better? Yes.
817. Do you think he is suffering from acute mania? He is suffering from acute mania, I think.
818. Are you aware that sometimes the urine of acute mania is exceedingly strong? Yes.
819. Can you tell whether it is fresh or stale? No; I only know that it is very strong.
820. Are the single rooms occupied by this class of patients as a rule extremely filthy? Yes.
821. Are they worse than what might be expected to be seen by a sanitary or lodging-house inspector in the city? Yes; I do not think the keepers of a lodging-house in the city or anywhere else would ever see rooms in such a state as these.
822. Is this extreme dirtiness a usual occurrence with patients of this kind? Yes.
823. Have you seen many cases of this kind in the asylum? Sometimes I have seen as many as twenty rooms filthily dirty in the course of one morning.
824. Was Case No. 1 in a shaky condition? Yes.
825. Was he shaky when he came to Callan Park? Yes.
826. Is he shaky now? Yes; in his hands and feet.

- Mr. W. Little.  
7 Nov., 1894.
827. Did --- express any regret at the removal of the patient from Cook's River? Yes; she said the removal was against her wish.
828. Are you aware that there are two modes by which cases of this kind are treated—one by placing the patient in a single room and locking him in and visiting him occasionally, giving him night attendants, milk and cocoa, and so forth? Yes.
829. And the other by having someone outside the door to attend to him when necessary? Yes.
830. Was exceptional treatment necessary in case No. 1? Yes; I think it was.
831. Have I ever spoken to you about the patient's treatment? Yes.
832. Have you not said to Dr. Blaxland that it would be much better to shut him in a room by himself? Yes; I thought he was a man who should be kept alone, and constantly watched, because of his irritable manner.
834. Did you think that it would be better to shut him up in a room than that he should be irritated by constant supervision? Yes; I thought so.
835. How many attendants have been constantly waiting upon him? One at night and one in the day. At meal-times sometimes it took two to feed him at first; in fact, it did for the first two or three months, but now it takes only one.
836. In reality, then, has he had practically three attendants waiting on him the whole time? I should think so, on an average.
837. How often did they look in upon him at night? I think they would visit him about every half hour to change his linen if it were dirty, or if necessary for any other purpose.
838. What is the usual custom at Callan Park observed in making night visits? Generally the custom is to visit each hour; that is the usual thing, but every half-hour if necessary.
839. Are you careful at Callan Park in dealing with wet and dirty patients? Yes; we try to give them rest at night, but still we endeavour to train them into good habits.
840. Do you think it would be a proper thing, in the case of an acute maniac, to rouse him from his sleep two or three times a night to get him to go to the tub or to pass water? No; I do not think so; I should rather be inclined to let him sleep.
841. *Dr. Garran.*] In the case of a patient generally suffering from sleeplessness, what do you think is of the most importance—to rouse him for the purpose of keeping him clean, or to let him sleep? I think I would let him sleep, as sleep in such cases does a great deal of good.
842. If you were on night duty would you allow the risk of a patient dirtying his bed rather than disturb him in his sleep? Yes.
843. Do you think that in a case like this the patient should be left all night without any observation? No; I think he should be seen at least every two hours.
844. Do you think his bed should be changed if necessary? Yes.
845. *President.*] From your evidence, then, am I to take it as your opinion that it would be desirable in the case of this patient that someone should see him during the night, and make as little disturbance in doing so as possible? Yes.
846. Since the patient has been at Callan Park has he been kept under such observation at night-time? Yes; we have always had him under observation. We have always kept his sleeping-room door ajar, so that we could see him through it.

[Witness withdrew.]

TUESDAY, 13 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
Esq., M.D., INSPECTOR-GENERAL OF THE  
INSANE.

ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was also present to hear evidence and cross-examine witnesses in his own behalf.

Mr. Alexander Mackenzie sworn and examined:—

Mr. A.  
Mackenzie.  
13 Nov., 1894.

847. *President.*] What is your occupation? I am at present a police constable, stationed at Goulburn.
848. Were you formerly employed as an attendant at Bayview House? Yes.
849. When were you first engaged at this institution? On the 13th of November, 1893.
850. How long were you so employed? From the 13th of November, 1893, till the 1st of March, 1894.
851. Do you remember Case No. 1 being at the institution? Yes.
852. Had you anything to do with the attendance on him? I had.
853. In what respect? I used to attend to him every second day. I used to be with him from the time he left his room in the morning, and I also used to clean out his room every morning.
854. Were you the person who attended on him every second day? On an average I attended him about four days a week, but I had to clean out his room every morning.
855. Which room do you refer to? The one that he used to call a stable.
856. Does your memory serve you sufficiently well for you to recollect for what length of time he was put into that stable,—and do you remember the first occasion on which he was placed there? The first work I had to do there on the afternoon of my arrival was in connection with this room, and all I know is that Case No. 1 was put in that room on that same night.
857. At what time was he put in the room? About 5 o'clock at night, I think.
858. Was that on the evening of the 13th of November? Yes.

859. Was he at this time being placed in that room every afternoon or every evening? Yes, as far as I saw.
860. Did he complain to you at this particular period about being placed there? Yes; as a matter of fact he was always complaining about being put in that room.
861. Do you know whether he was put to sleep in any other part of the building? Not while I was there. He had never been in any other room—that is, in the wards—to sleep while I was there, but he used to be there during the daytime.
862. What do you mean by saying he used to go elsewhere in the daytime? He was allowed to go about the ground and into one room in the main building, across from the court-yard, which divided it from the detached place in which he slept.
863. Was this room upstairs or downstairs—I mean the room he was allowed to use during the day? It was downstairs on the ground floor.
864. While you were there did many visitors call to see him? I think visitors used to come to see him about three times a week.
865. Who visited him on these occasions? I only know personally that the visitors were his wife and son. I think his wife visited him twice a week and his son once a week.
866. When he was visited by these relatives was he taken out of the room he usually occupied in the daytime, or did they see him in that room or in the grounds of the institution? He was always taken into a special room near the office.
867. Was he taken into a room just off the office? Yes.
868. Did you in the course of your duty ever see him at night after he had been placed in this solitary cell? Yes; I may have done so occasionally.
869. Was it partly your duty to watch him at night? No.
870. How was it, then, that you came to visit him occasionally at night? Sometimes before we went to bed at 10 o'clock I used to go there and look through the observation hole to see that the patient was all right. Another attendant, named James Copley, would go with me.
871. Did anyone see the patient after this hour at night? Nobody saw him until the next morning.
872. Are you quite sure of that? Yes, I am.
873. Are you positive that no attendant was on duty to see that patient after 10 o'clock at night? There was not.
874. Was any provision made, supposing the necessity arose, to give that patient, or any other patient a drink of cocoa, or milk, or anything else, if he were restless or hungry, and required nourishment, or the attention of an attendant? No; there was no provision whatever for any emergency like this. The kitchen was locked up every night, and there was no other place where we might make a warm drink or anything else for a patient.
875. Was it then, impossible to get nourishment of this kind during the night? Yes, as far as I know, it was.
876. If there had been any provision to supply these things would you have known of it? I think so.
877. Now, returning to Case No. 1, was he undressed before he was put into this room at night? Yes; I have undressed him myself as many as four nights a week.
878. When you performed this duty did you leave any flannels, or pyjamas, or night clothing of any kind on the patient? No; he had nothing of the kind on, except, I think, on about half a dozen occasions while I was there.
879. On the half-dozen occasions did he wear night clothes? He wore on these occasions a singlet or small flannel shirt, which I left on of my own accord, for mere pity's sake, as he asked me to leave it on because he felt so cold.
880. Are you quite sure that he was not supplied with pyjamas at night? No; well, I never supplied him with pyjamas.
881. Are you quite certain of that fact? Yes.
882. Do you mean to tell us that he was put into that room quite naked? Yes.
883. Quite naked? Yes.
884. Do you mean to say it was always so, except on exceptional occasions, when you took pity on him and left his singlet on him? Yes, I do.
885. Was any indiarubber utensil placed in this room for his convenience? No; never to my knowledge.
886. Are you quite certain about this? Yes, certain. There was only one about the place, and that was used in the next room by Case No. 5.
887. From your observation of Case No. 1, was he, while under your care, of an excitable disposition? It was very seldom that I saw him excited. If he did become excited at all he was never in any way dangerous.
888. On the occasion of these outbreaks did you consider him a dangerous patient? No. As far as I am concerned I would at any time have slept with him without the least fear of being attacked.
889. Were not his general habits very filthy? No, they were not.
890. Not at all? No.
891. Not at any time during the period you waited upon him? No.
892. Were not his habits of a filthy character at all? No.
893. How, then, do you account for the state in which he was found in the morning, when sometimes his body and the room would be covered with excrement, and so on? All I can say is that he was put in there of an evening, and if he wanted to do anything he did it on the floor. The room was quite dark. He could walk about, and it is quite possible he might tumble in the filth. During the whole time I attended to him he was most particular. When I took him to the water-closet he was very particular in his habits.
894. Did Dr. Vause visit him frequently? He used to see him about once a day while on his general rounds about dinner time.
895. But was he not, as Medical Superintendent, fairly attentive to him? What I have told you is all I saw.
896. Was it usual for Dr. Vause to have any conversation with him, and so on? It was usual for him to pass a few words as he was going over to his private house.
897. Was it your impression that Dr. Vause was as attentive to Case No. 1 as you would expect him to be to a patient of his character? I did not think it was right or suitable treatment to shut him up in that place at night.

Mr. A.  
Mackenzie.  
13 Nov., 1884.

Mr. A.  
Mackenzie.  
13 Nov., 1894.

898. Did you ever see Dr. Vause or speak to him as to why he was put in that room? No.
899. Do you say that during the whole of the period from November to March, while you were at the institution, you did not see this patient display any violence or become more than ordinarily excited? There was one day on which he came in and complained about the food. He became somewhat excited and tried to undress himself, and kicked his plate across the place.
900. What happened then? Dr. Vause told me to take him out and lock him up in the room.
901. Had he any clothing on him then? No.
902. Did this happen at dinner-time? Yes.
903. How did this happen? I think there was an attendant named James O'Brien with him, and I believe he was changing the patient's clothes at the time. It was the custom to put on better clothes when it was known that the patient was to be visited by his friends.
904. Is that a rule in the institution? Yes; it was the practice on all occasions during the time I was there.
905. Are you perfectly certain that there is no provision made for the supply of warm milk, cocoa, or any other suitable drink or food for patients during the night? Yes, I am certain.
906. Do you mean to tell us that no attendant looks in upon patients in any case after 10 o'clock at night? None; not on any ordinary occasion.
907. Was there another patient in the room adjoining that in which Case No. 1 slept? Yes.
908. Was he treated in the same way as Case No. 1? Exactly in the same way, as far as I know, excepting he might have been taken out a little earlier in the morning than the Case No. 1 was. The latter patient was never taken out before half-past 8 or 9 o'clock.
909. Have you had any experience in any other institution for the accommodation of the insane besides Bayview House? No; it is the only occasion in which I have been engaged in a lunatic asylum.
910. Do you remember the character of the food that was supplied to Case No. 1 and other patients at Bayview House? Yes, I do.
911. Was the quality of that food good, bad, or excellent? The quality was not good.
912. What had you to object to in the food? The meat was not what it should be, the milk was sour, and, in fact, neither of the commodities was fit for a human being to eat.
913. Do you mean so say that this description applies to the food which was supplied to private patients? Yes; as far as I saw. I can only speak of private patients, for I have no knowledge of the Government patients.
914. Was the same kind of food supplied to the attendants? Yes; it was very little better, and oftentimes we went for a week without tasting good meat.
915. Did you not infer a few moments ago that on the occasion of visitors going to the asylum there was a certain amount of deceit practised, inasmuch as better clothes were placed on the patients when they were taken to see their friends? Yes.
916. Has this practice been in force on many occasions? It was always enforced on every occasion visitors came while I was there.
917. Was this practice followed when the official visitors (the doctors and others appointed by the Government) came to the institution? It was done in Case No. 1. With the other patients it might not be so easy to do it, because they might be down on the lawn at the time; but in the case of this patient he was always specially dressed when the visiting doctors and official visitors appointed by the Government came to the institution.
918. When these visitors came did they see the patients in their own particular room? No; they might see them in the dining-room or in the reception-room.
919. Did they see them in their own rooms at all? No.
920. Do you remember Case No. 6? Yes, I do.
921. Was he a dirty patient? Yes; he could not help it. He could not do anything for himself at all.
922. Did this patient receive any particular attention from the attendant in regard to keeping him clean? No.
923. What attention did he receive in the way of insuring his cleanliness? He got a bath once a week; on Saturday afternoons only.
924. Was it your impression that in the matter of cleanliness this patient was very much neglected? Yes.
925. In your opinion, did this neglect arise from carelessness or oversight? He was a private patient. We never got any orders to bath him, and we had enough to do to carry out our other duties.
926. In other words, then, do you mean to say that, as far as attendance was concerned, you were short-handed at this time? Yes; certainly.
927. Do you remember Case No. 4? I do.
928. Did he on any occasion receive an injury to his head? Yes; I was there when he did it.
929. How did that accident occur? I was attending to him during part of the time I was there. One night I put him to bed about 9 o'clock. After I had taken his clothes off and put on his night-shirt, I left him sitting in the bedroom while I went into an adjoining room for a chamber. He got up and tumbled against the wall and cut the side of his head.
930. What did you do? I sent for Dr. Vause at once when I saw that he had cut the side of his head.
931. Did the wound bleed much? No, it did not. It was a wound about a quarter of an inch long.
932. Did it take some considerable time for that wound to heal? Yes, it did.
933. Do you remember particularly the room in which Case No. 4 slept? Yes, I do.
934. Were there any rats in that room? Yes; I have seen them there myself.
935. Now, I want you to be careful, and remember you are on your oath; it has been given in evidence here that the patient was attacked by rats;—is that a fact? Yes, it is.
936. Within your personal knowledge? Yes.
937. Did you see it? Yes, I did.
938. Did you complain to Dr. Vause about this occurrence? No, I did not; but I complained to the head attendant.
939. Was any attention paid to your complaint? No; not at the time.
940. Will you describe all that took place in connection with this particular instance? Immediately after the accident I could not imagine what was the matter with the patient. He used to jump up and sing

Mr. A.  
Mackenzie.  
13 Nov., 1894.

sing out, "Oh, oh, my head," about every five minutes. In the morning I found that his pillow was covered with blood. I looked at his head, saw a larger wound, but could not see what had done it. The next night he started singing out again. I got up, struck a match, obtained a light, and saw a rat jump out from the back of his head, which was bleeding then. The next morning I told the head attendant of this occurrence, and he told me to close all the doors the next night. I told him that there were some holes in the room through which the rats could come. I closed the doors as I was instructed, but the next night the rats came again. There was a big bandage on the patient's head, but the rats gnawed this open and got at the wound again.

941. Then did the wound become larger because of the attacks of the rats? Yes; it became about this size. [*Witness measuring on his hand a space nearly the size of his palm.*]

942. What size do you say the wound became? It was about 4 or 5 inches in circumference.

943. Was this sleeping room attended to after that? Yes; the carpenter came in the next day and put pieces of tin over the holes the rats used to come through, and after that things were much better.

944. Have you anything further to say with regard to your experience while you were there as to the management of the institution as a whole;—for instance, in your opinion, were there sufficient attendants to maintain good order and management? While I was there I always thought there were not sufficient attendants.

945. Do you think that there was any laxity in the management of the institution? As far as I could see there was no proper system for carrying out the work.

946. Having seen as you say all these defects in the management, and particularly the circumstances in connection with Case No. 4, did you make any complaints to Dr. Vause? No; I did not.

947. To whom did you complain? I made complaints to the head attendant.

948. Who was the head attendant while you were there? John Doherty.

949. And did you make the complaints to him? Yes.

950. Did you complain to Doherty about the treatment of Case No. 1? I did. I told him that there was only a common bag stuffed with straw put in the patient's room. As soon as it was put in there the patient started picking at the bag, and eventually got the straw out. Then he would try to get inside the bag himself, and sleep that way through the night. I told the head attendant about this, and expressed the opinion that it was a shame the patient could not get a better bed. I asked him to get an order from Dr. Vause at his first convenience, and I then, on the first afternoon on which I had an opportunity to go to town, would get some canvas and make a proper mattress on which the patient could sleep. On the first occasion I spoke to the head attendant nothing was done. I asked him a second time, and he said he would tell Dr. Vause. Later on he told me that Dr. Vause had said they had got the canvas in stock, but it would take a sailor or sailmaker to make it up. I told him there need be no trouble about that, as I would make it up myself, if they would give me the money to get the canvas. I believe Dr. Vause consented to get this canvas. I received the money to purchase it. I came into Sydney on one of my afternoons off. I bought the canvas at the American Novelty Store. I took it out to Bayview House, and I made the mattress myself.

951. Prior to this, was not any mattress provided at all? No; only a common bag stuffed with straw.

952. Was it a bag made of the ordinary sacking? Yes.

953. Did you observe if Case No. 1 suffered from cold when he was sleeping in that room previous to you taking these steps? Yes, I went in one night with Copley. I saw that the patient was shivering with cold, and then I said it was a disgrace to the country that he should be put in a room like that.

954. Was it cold or warm in the room on that occasion? It was cold at night, and warm in the morning, when there was a suffocating filthy foul smell.

955. Do you know when and how often this room was cleared out? Yes, it was cleaned out every morning; but in damp weather the boards would not dry, and I considered there was a great fault because the boarded floor of the room was so close to the ground.

956. Was there any window in that room? There was a hole high in the wall, opposite the door, and this had a shutter on the inside and two or three bars on the outside.

957. Do you know how often this shutter was opened? Yes, it was opened every day.

958. Every day? Yes; and in the warm weather sometimes it was left open at night, and that was the only means of ventilation I saw.

959. Did you notice if there were any ventilating bricks in that room? No, I did not see any.

960. Supposing I were to tell you that there are such things there—what would you say to that? That they must have been put there since I was there. Perhaps there were some outside, but they did not come inside.

961. Did you notice whether there was any wooden panelling inside this room? Yes, I did.

962. Was it always in a fair condition? Yes.

963. Concerning the smell in this room—did it always strike you in all times of the day as being offensive? Yes.

964. Was it always the smell of stale urine? Yes, it was.

965. Did you ever try to take the smell out? Yes, I used to try to scald the floor well in dry weather. It was no use doing so in damp weather for the room would not dry, and I attribute this fact to the floor being so close to the ground.

966. Remember you are on your oath, and do you mean to tell us that Case No. 1 was not a dirty patient, and that he kept himself clean? Yes.

967. And if he had the opportunity to do so he would have done so? Yes.

968. But that he was put into a dark room and could not do so? Yes.

969. *Dr. Garran.*] Were you engaged by Dr. Vause himself when you joined that institution? Yes.

970. Did you report yourself to the doctor on your arrival there? Yes.

971. Were you engaged specially to look after Case No. 1? No.

972. Did Dr. Vause set you to do that work? No, he merely handed me over to the chief attendant.

973. Did he put you to work? Yes.

974. What did he specially instruct you to do? Nothing particular on the first day I went there, but he told me to stop with the patient and keep my eye on him, and to attend to him for that afternoon.

975. Had you ever been in a lunatic asylum before? No.

976. Did you know the nature of the work you would have to do? No.

Mr. A.  
Mackenzie.  
13 Nov., 1894.

977. Did the chief attendant give you any special instructions as to your duties? He showed me some rooms that I had to clean out. I had to do most of this dirty work, because the rule of the institution was that new hands should take this work when they came on.
978. Is it usually the case that when an attendant first arrives at the institution he is put to do this kind of work? Yes.
979. Is that regarded as a lower kind of position which the last new comer must occupy before promotion? Yes.
980. When you first attended Case No. 1 was he of an active and restless disposition? I cannot say that he was restless, but he was very active, especially in his walking.
981. Was he able to walk you down? Yes.
982. Had he then plenty of physical vigour? Yes; he had.
983. Did you ever find him disposed, during the daytime, to tear his clothes? Very seldom. He did on one or two occasions tear his trousers. He used to like to work his fingers into the seams and tear the stitches out.
984. Did he show any disposition to undress himself during the daytime? No.
985. You mentioned something in your evidence a few minutes ago to the effect that on one dinner-time he undressed himself and kicked his food away;—can you explain the circumstances of that occasion? Yes; he, with other patients, had come in from the lawn, and they were then going to the dining-room to dinner. I believe he was having his clothes changed, and some patient annoyed him, and he became annoyed and a bit excited.
986. Was anybody in charge of him then? Yes; another warder.
987. Did he see him undress himself? Yes.
988. Were his clothes put on the floor? Yes; he undressed in the public room, and kicked over the plate which was for his food at dinner-time.
989. Now, coming to night-time;—did it usually take two attendants to undress him? No; I always undressed him myself without assistance, and never experienced any difficulty.
990. Were you told to leave the patient in this room without any clothes on? Yes.
991. Who told you to do that? The head attendant.
992. Did you receive definite instructions from the head attendant to leave him in that room naked at night? I did.
993. Do you know whether these instructions originally came from Dr. Vause? I do not know.
994. Did you not ask the chief attendant if Dr. Vause had given these instructions? I do not think so, but he told me, and I understood that these and other instructions were given him through Dr. Vause.
995. Did you ever speak to Dr. Vause personally about this case? No.
996. Did you ever make any report to him? No.
997. Did you report anything to the head attendant? Yes.
998. Do you know whether he was in direct contact with Dr. Vause? No.
999. Do you know whether Dr. Vause knew how Case No. 1 was treated? No.
1000. Did Dr. Vause ever come on the scene when he was being put into this cell? No; the only time I ever saw Dr. Vause was at that dinner-time which I have spoken about.
1001. I want to know if Dr. Vause had any knowledge of his being undressed and put away naked every night into that cell? I cannot say if he had any knowledge.
1002. Did Dr. Vause ever make a round during the evening, up to 10 o'clock at night, when you and the other attendants went to bed? No.
1003. Did he ever go round before the patient was taken out at 6 o'clock in the morning? No; I never took him out at 6 o'clock, it was more often between 8 and 9 when he was removed.
1004. During your experience at the institution was it the custom them to take him out of this cell between 8 and 9 o'clock in the morning? Yes.
1005. When you went into the cell of a morning did you ever see him shivering, as if from cold? Yes.
1006. Was there any mattress on the floor? Yes.
1007. Have you not mentioned in your evidence that he was in the habit of dirtying the floor, then walking about and treading in the ordure? Yes.
1008. Have you any other theory as to how he got into a dirty state? No; I have not.
1009. Concerning that window;—did you ever open it? No.
1010. So that if you did not release the patient until between 8 and 9 o'clock in the morning he would be in the dark in this room from the break of day until he was taken out? Yes.
1011. Was it not your duty to let down that shutter so as to throw some light into the room, say as early as 6 o'clock in the morning? Sometimes I would let it down, and then the head attendant would put it up again.
1012. Did you receive any instructions concerning the opening and closing of this shutter? No.
1013. Were you then left to your own devices? Yes.
1014. While you were attending on Case No. 1, was he in the habit of talking to you? Yes, frequently. Sometimes he would talk to me as often as every two hours. He was very fond of telling me his troubles, and sometimes he would cry and bemoan his fate, and he has said "I was not mad when I came here, but I am mad enough now."
1015. Did he appear to know where he was then? Yes, he did.
1016. So far as you know, was there any attendant told off for night-duty? There was none. We had to work as many as sixteen hours during the day, and there was no one for night-work.
1017. Did everybody in that institution—I mean the attendants, of course—go to bed at 10 o'clock at night? I can speak of the males, and can safely say that every male attendant was in bed by half-past 10 o'clock at night.
1018. Was there no one to patrol the place at night? There was not.
1019. Was not there anyone to give an alarm, supposing a patient were taken ill? No, except those who were sleeping with patients.
1020. Did you not say it was your custom to look in upon patients with Copley before you went to bed at night? Yes.
- 1021.

Mr. A.  
Mackenzie.  
13 Nov., 1894.

1021. Were you instructed to do this? No; we went of our own accord.
1022. Did you on these occasions go into this room where Case No. 1 was confined? Yes.
1022. Was it the custom to find any mess about the floor then? Sometimes.
1024. Did you bath him in the morning? Yes.
1025. In warm water? Yes.
1026. Where did you get the warm water? We used to get it from the pantry.
1027. Did you not tell us that you have seen Case No. 1 shivering and shaking as if from cold? Yes.
1028. Did you ever, while he was shaking and shivering, put him in a cold water bath? No.
1029. During the whole of the time you were there was the patient put into a cold water bath? No.
1030. Did he as a rule dislike the idea of having his bath? Yes; there was some reluctance on his part about the bath. Sometimes he would complain about the cold, and altogether he didn't care about the bath.
1031. Do you know the temperature of the water? No; but the water was warm.
1032. From what you say am I to understand that the patient really did not like a bath? No, he did not.
1033. Or, in other words, he was not a bathing man? No, he was not.
1034. Do you say that it was your duty to clean up the floor of the room in which he slept? Yes.
1035. Do you think it was any fault of yours that this room continued to smell all day? No.
1036. Do you think it continuing to smell all day was because it had not been properly cleaned? No.
1037. Do you think that with ordinary care and cleanliness the smell could be got out of the floor? I do not think so, if a patient had occupied it all night.
1038. Do you know if that room smells now? I do not know; it is sometime since I was at the institution.
1039. Do you think that with proper scrubbing you could make that room clean and keep it sweet? No, I do not, especially, as I said before, in damp weather it is impossible to get it dry, as the floor is too near the ground.
1040. Do you put down the continual smell to the fact that you could not get the floor dry? Yes.
1041. Have you any other reason why you could not get the smell out of the room? No.
1042. Did you scrub it out properly? Certainly I did. Sometimes I scrubbed it out with a hard broom and hot water, and even then I could not get it clean and sweet.
1043. Do you think that room had been previously neglected? Yes, I do.
1044. Are there any other parts of the asylum where the floor gets wetted and dirtied in the same way? That is the only room of its kind I know of where this is done. Case No. 4 used to be in the habit of getting up in the night and making water on the floor.
1045. Was it the custom for this room in which he did that to be scrubbed out? Yes.
1046. And was the urinous smell taken from it? Yes.
1047. Do you think that it was because the room occupied by Case No. 1 became saturated with this filthy matter, and owing to the dampness caused by its position when the weather was not fine, that you could not get it dry? Yes.
1048. And that because you could not get it dry the stale smell was continuous? Yes.
1049. And you say that room was properly attended to? Yes; as well as it could be.
1050. If it was not properly attended to was it through no fault of yours? No.
1051. *President.*] When you were engaged at this institution did you sign any memorandum of agreement? Yes, I do.
1052. Was it to this effect, "That whilst in the employment of the said A. J. Vause of the abovenamed asylum, to report to the said A. J. Vause, or to whom he may appoint, to act on his behalf there within twenty-four hours after the occurrence, any improper or insulting language or violence used by any person towards any patient or patients therein; also any neglect or inattention shown to them or injury sustained by them. That the said \_\_\_\_\_ will keep a watchful care over all such patients; treat them with proper care, attention, and civility, and prevent their escape from the said asylum"? Yes.
1053. Did you at any time record any such occurrence in connection with this memorandum of agreement? No; I never reported any occurrence of that kind to Dr. Vause.
1054. Did you report anything of the kind to the head attendant? Yes, but I got tired of doing so.
1055. Why did you not go to Dr. Vause and make these complaints? Because I did not like to; I did not like to speak to him, as he did not speak pleasantly to me.
1056. How was that? He spoke to me as if I was something beneath him, and as a consequence I never spoke to him only when I went into his office for my wages.
1057. I see there is appended to the memorandum of agreement a statement "that you would solemnly declare that during the time you have been in Dr. Vause's employment every consideration was paid to the care, comfort, and recovery of the patients in the establishment, to the best of your knowledge and belief";—do you remember signing anything of that kind? No; I was asked by his housekeeper to sign something, and I did so once; but after that I would not sign anything more. I said it was not my fault, and I would not sign anything more.
1058. Can you say that you could conscientiously agree to signing that declaration to the effect that every consideration was paid to the care, comfort, and recovery of the patients in the establishment? No.
1059. *Dr. Manning.*] How often was case No. 5 put in the single room? When I went to the institution he slept upstairs. I could not say on which day he was removed from there, but he was placed in that room every night for a good bit.
1060. What do you mean by saying a good bit? It may have been a month or more.
1061. It may have been how long? I do not know exactly; he was there when I left.
1062. What were the circumstances under which you left the institution? I was dismissed.
1063. Do you think you were wrongly dismissed? Yes; I do.
1064. Did you afterwards write to a man named Geary something to this effect: "That you know Case No. 1 was not getting justice, and to see that he got it would be far sweeter to you than any other form of revenge"? Yes.
1065. Had you any previous experience in asylum work? No.
1066. *Mr. McGowan.*] Do you know, Mackenzie, that all you are saying now is said on oath? I do.

- Mr. A. Mackenzie.  
13 Nov., 1894.
1067. Do you also know that if what you say is not true that you are liable to be prosecuted for perjury? Yes.
1068. Do you know that as a constable? Yes, I do.
1069. Has it not been stated that you were dismissed from Bayview House? Yes.
1070. When you were engaged at Bayview Asylum did the person who engaged you examine your testimonials? Yes.
1071. Have you any testimonials with you now? I have not at present.
1072. Do you possess any recommendations of good character? Yes, I do.
1073. Will you mention to the Commission where they are from? Yes. I have one for eighteen months' service under the Gas Company at Townsville, in Northern Queensland. I have others—two or three—from former employers in the old country. I have one from Dr. Sinclair, who was acting for Dr. Vause at Bayview House.
1074. Was that during the time Dr. Vause was recovering from an accident? Yes.
1075. What is the gist of that testimonial? That I was straightforward, trustworthy, sober, and attentive to my duties.
1076. Since leaving Bayview House have you been able to join the Police Force? Yes.
1077. Was it necessary that you should have good testimonials to do so? Yes.
1078. In the course of your evidence do you not say that you complained to the head attendant, not only in regard to the treatment of Case No. 1, but also in reference to other patients; and saying, in so many words, that it was a scandal that such treatment should be allowed? Yes.
1079. And was not the treatment changed when you reported it? No.
1080. When you went to the head attendant, did you complain on several occasions of the way in which certain patients were treated? Yes.
1081. Did you consider that after having received your orders from the head attendant that it was your place to make your complaints to him? Yes.
1082. Did you think it was your duty to go direct to Dr. Vause? No. I thought it was my duty to go to the head attendant, because I feared that I might be charged with insubordination if I went over his head to Dr. Vause to make any complaint.
1083. Have you not said in the course of your evidence that you were in the habit of having conversation with Case No. 1 during the day-time? Yes.
1084. Did he ever say anything to you why he tore his singlet or pyjamas occasionally while confined in that room at night-time? Yes. He said, "As long as I am kept in that damned stable I will tear everything they give me."
1085. Have you not said that sometimes, but on very rare occasions, he became violent and excited? Yes. As a rule he was not very excitable; he would get a bit excited sometimes, but he was never violent to himself or anybody else.
1086. When he became excited did he remain so for any length of time? No; he was soon out of these tempers—sometimes in five or ten minutes.
1087. Do you think that you could have slept in that room with him without any fear? Yes; without any fear of violence.
1088. Do you think he would have attacked you? I am quite certain he would not.
1089. Was he always restless at night? Yes; he was restless, but not violent.
1090. Are you perfectly sure that during the whole four months you were there there was no indiarubber or any other utensil placed in his room? No, there was not.
1091. How many utensils did you see while you were there? Only one.
1092. Where was that? It was usually in the room Case No. 5 occupied, and it was the same room occupied previously by Case No. 7. It was in there when Case No. 7 was there, and Case No. 7 occupied that room when I went there first.
1093. Was he an excitable patient? Yes.
1094. And was the same treatment meted out to him as was meted out to Case No. 1? No; not as far as sleeping accommodation was concerned. He got a mattress, blankets, and sheets.
1095. Do you not say that it was your idea to get a mattress and make it up for Case No. 1? Yes.
1096. Was not this suggested to you by the head attendant? No; I talked to the head attendant about it first.
1097. Did you not suggest in any way that you should be supplied with money to get this mattress? I said that if they would give me the money I would go down town on my day off and get the canvas.
1098. So that you went down town and got this on your holiday? Yes.
1099. What is the rule of the institution about these holidays? We used to get a day every fortnight, from 10 o'clock in the morning till 10 at night. We had an afternoon off once a week, from 5 till 10 o'clock.
1100. And on one of these holidays, in the few hours you had for recreation, did you obtain the material for this mattress? Yes.
1101. Were there any other kind of mattress used in that room? Yes; there was one put there which had been soiled by another patient—a dirty patient (Case No. 6). It was so soiled that case No. 1 would not sleep on it; he said he would sooner sleep on the floor, and he shoved this mattress on one side.
1102. Was that a straw mattress? No; it was a hair mattress.
1103. Was it taken out of the room after this patient refused to sleep on it? Yes; it was taken out the next morning. It was in the room all the night; he had thrown it into one corner, and he told us in the morning that he would not sleep on a dirty thing like that.
1104. Did he try to destroy this mattress? No; he simply threw it on one side.
1105. After you had made the new mattress and filled it with straw, and put it in the patient's room, did he use it? Yes; while I was there he did.
1106. Did you leave it there? Yes.
1107. In regard to the covering used in this patient's room—were there any blankets on the canvas? No.
1108. What was the nature of the covering then? It was some sort of rug made of two pieces of common rough canvas.
- 1109.

1109. Was there any blanket attached to this covering? I think there was a piece of blanket on one breadth of canvas.
1110. Do you not say that after you made this mattress the patient used it while you were there? Yes.
1111. Did you not also say that he used to make water all over the room and often on his bed? Yes.
1112. Did he ever dirty his bed too? He used to do it on the floor.
1113. And did he sometimes do it in his bed? I cannot say. He used to pull his bed from one end of the room to the other, but I think he must have done it sometimes because it looked like that.
1114. During that time the covering, the mattress, and the straw would be soiled with urine and other matter? Yes.
1115. Was it the same during the months you were there? Yes.
1116. How often did you rip that mattress open and take the straw out? Once, I think.
1117. Did you get instructions to do it? No.
1118. In these matters were you left to do as you liked? Yes.
1119. As a matter of fact then, as far as your experience goes, if you liked to neglect certain patients you might do so? Yes.
1120. If you chose to give a patient a cold water bath instead of hot water you might do so? Yes.
1121. If you liked to leave the same filthy straw for the use of the patient, might you do so? Yes.
1122. Was there anyone to supervise you at all? No; it was left to myself to do these things.
1123. Did you ever hear Case No. 1 say that he would be quiet in his department if he were left out of this room? Yes; he has said he would be quiet if they would give him better accommodation. He said he would be quiet if they would put him in what he used to call the satin room. If he were put into that, he said, he would behave himself like anybody else.
1124. Sometimes then would he talk in a sensible manner? Yes; sometimes for an hour at a time, and then he would wander away again.
1125. When his friends came to see him he was put into another room altogether? Yes; always.
1126. Did his friends ever see him in this room which he called a stable? No; they never even saw him in the room he was allowed to occupy during the day. He was always taken on these occasions to a room off the office.
1127. Did you ever get any intimation when his friends were coming to see him? Oh, yes.
1128. Were you well aware of it then? Yes; when his friends came to the institution they were kept in the office, and word was sent over to get the patient ready. He was then taken to them.
1129. Were his clothes changed on these occasions? Yes; they used to change his clothes and take him in.
1130. Were you ever near by when he met his friends? No.
1131. Did you ever hear any conversation between himself and his friends? No.
1132. Did his friends pay regular visits to him at stated times? Yes; I think they did. They used to come about three times a week.
1133. Do you think that the patient knew when his friends were coming? No; not until they came.
1134. Do you know if he looked forward to these visits? At times he used to speak about his wife coming, and there were occasions when Dr. Vause advised the visitors not to see him because he used to get excited. Two or three times, I think, he was got ready to see his friends, and then the message would come along to say it would be better for them not to see him that day.
1135. Did you ever get any information as to when the visiting doctors were about to examine the place? Yes; always.
1136. Did you always, when Dr. Manning, the Inspector-General of Insane, was coming? Yes; he always went to the private house first.
1137. Did you then receive an intimation that the Inspector-General was there? Yes.
1138. Did you also receive a similar information when the visiting doctors were there? Yes.
1139. What did you do then? We used to take up the old carpets, put down new ones, and make other changes.
1140. Was the whole aspect of the asylum changed for these occasions? Yes.
1141. Are you positive you always received this information? I am. Some of the patients used to notice this, and one, Case No. 8, used to say he could see us making arrangements when the visiting doctor came.
1142. Did Dr. Manning ever pay you a surprise visit? No, never while I was there.
1143. Have you not said to the President that the food supplied to the patients was not good? Yes.
1144. Was it the same kind of food that the attendants got? Yes.
1145. What did your breakfast usually consist of—I mean the ordinary one? Sometimes, mostly always, a sort of stewed steak, bread and butter, and sometimes we got chops.
1146. Was it the same thing every morning? Yes, very little change.
1147. Do you not say that this is not good? Well, I thought it was kept in the place too long—kept there until it became unfit to eat.
1148. Did the food seem to smell high? Yes.
1149. Did this occur very often? Yes, very often.
1150. Was any complaint made by the attendants about the state of the food? Yes; we went to the kitchen and complained about it to the head attendant, and he said he would see about these things. After several complaints he told us he could not give us any more, and that we could not get anything else.
1151. Coming to Case No. 4, do you not say that the rats ate flesh from the wound on his head? Yes.
1152. Did he sleep on a bed and bedstead? Yes.
1153. Then must the rats have climbed on to the bed? Yes; and I saw one go from under his pillow one morning.
1154. There is another case mentioned—Case No. 6,—was he so paralysed as to be utterly unable to do anything for himself? Yes; he was even so bad that he could not eat the food when it was put before him.
1155. Do you mean to say that this man, helpless as he was, only got a bath and a change of clothes once a week? Yes.

Mr. A.  
Mackenzie,  
13 Nov., 1894.

- Mr. A. Mackenzie.  
13 Nov., 1894.
1156. And when did he get this attention? On the Saturday afternoon.
1157. Every Saturday afternoon? Yes.
1158. Supposing he might have been suffering from relaxation of the bowels, and was helpless to aid himself, did he receive any special attention? Not necessarily.
1159. Did you ever undress him? Yes.
1160. Were his trousers in a filthy condition then? Yes.
1161. Did you ever dress him in the morning? Yes.
1162. Did you ever put the same trousers on him in the morning that you took off the night before? Yes.
1163. Had you any instructions to do other than that? No.
1164. Had you any other trousers to put on the man? Yes; there were a lot of trousers belonging to him, but the seats were all rotted away by filth. He had two lockers full of clothes, but all the trousers were all alike, rotted away. He had only one clean suit kept for his wear on the occasions when his Mrs. came to visit him.
1165. Was there any provision to afford him fresh clothes under ordinary conditions? No.
1166. Then must he not at times have been in the most frightful state? Yes; we had to change his sheets every morning.
1167. But still did you leave the same pants on him every day? Yes; we used to put a clean pair of drawers on him, but all of those belonging to him were nearly as bad as his trousers, because of their dirty and filthy condition.
1168. *Dr. Garran.*] Do you say that Case No. 1 did not like his clothing changed? It appeared to me that he did not like to be bothered to have his clothing changed.
1169. Had he any preference for better clothes or inferior clothes. He used to like the two pairs of trousers that he had torn. He liked to have his trousers open, and was fond of getting his fingers into the seams.
1170. In these clothes, then, was he decent enough to be taken into company? No.
1171. Did he care to have them changed? No.
1172. Was he in the habit of attempting to destroy his better clothes when they were put on him for the purpose of receiving visitors? No; we used to tell him that he was going to see Mrs. \* \* \*, and then we could get on his clothes right enough.
1173. Would there have been difficulty if he had not been persuaded? I think he would have gone in as he was if we had allowed him.
1174. Was Dr. Sinclair medical officer in charge while you were there? Yes.
1175. Did Dr. Sinclair, while he was at Bayview House, make any special rounds at night? Not that I know of.
1176. Nor at 10 o'clock at night before the attendants went to bed? No; he did not.
1177. Do you mean to say that he, as medical officer in charge, did not make any visit to the room in which a patient like Case No. 1 was kept? Not that I know of.
1178. Was Dr. Sinclair in full charge of the establishment? Yes.
1179. Did he make any general round? Yes.
1180. Did he ask you where Case No. 1 slept? No.
1181. Did you tell us that Case No. 1 said if he got back to what he called the satin room he would be all right? Yes.
1182. Do you think if he had been put back in that room he would then have damaged his clothes? I do not know.
1183. Do you know how long he occupied that room? No.
1184. *Dr. Vause.*] Did you complain to either Dr. Sinclair or Dr. Ramsay in connection with the food? No.
1185. Did you make any complaint through the head attendant? Yes. I know, too, that on one occasion Dr. Ramsay visited the dining-room where there was a cupboard in which food was kept. He ordered bread and butter and other things to be taken outside because he thought the food was affected by flies.
1186. Did you ever hear any complaints made by either of the attendants? No.
1187. Did you not make a stronger mattress for Case No. 1 because he tore up every other thing that had been placed in his room? No; I made him the mattress because I wanted him to be more comfortable than he was before.
1188. Was it a stronger mattress than the one he used before? Yes.
1189. Do you think it would be as comfortable for him as the one he had previously used? Yes; I think so, because it was very much thicker.
1190. Did he tear up the other mattress? Yes; I think he did; but I know he said he could not sleep on it, as the straw punished him by coming through the old bagging and sticking into his skin.
1191. Have you seen any of the members of this Commission before to-day? Yes.
1192. Who have you seen? I have seen Dr. Manning, for one.
1193. Anyone else? Yes; I saw Mr. McGowen last night.
1194. Did you ever go over any of your evidence with him? No.
1195. Did you tell him anything about what you have told us to-day? No; I did not. I spoke to him about things in general, but said nothing as to the nature of my evidence to-day.
1196. What did you talk about while in conversation with Mr. McGowen? About the treatment of the patients generally, and about the treatment Case No. 1 received while there.
1197. Did you speak just in the way of a general conversation, and go over the matters connected with Case No. 1 and other patients? Yes.
1198. Was Case No. 6 cleaned every time he dirtied himself? No.
1199. Were you in charge of him? Yes.
1200. In the day-time? Sometimes.
1201. Did you ever have to clean him? Yes.
1202. Did you ever neglect to do so? No.
1203. How did you know that anyone else did? He must have been neglected, judging by the state in which he was. There were not sufficient attendants to look after him properly.
1204. How many attendants were there? Sometimes three, and sometime not as many regular attendants.

1205. Were there not five attendants besides two outside? No.

1206. Is this your signature [*handing to witness the butt of a book containing the obligations, general rules, and instructions for attendants and others employed at the Bayview House Private Hospital for the Insane*]?

Mr. A.  
Maackenzie.  
13 Nov., 1894.

Yes.

1207. Did you sign this obligation,—“I hereby promise during the period of my engagement to obey the rules of the institution, to promote so far as I am able its objects; to be careful of its property; to avoid gossiping about its inmates or affairs; neither to use nor to have in my possession any intoxicating liquors, and to endeavour generally by my own conduct and demeanour to sustain the reputation of the establishment. I consider myself bound to perform any duty assigned, although not of a nature I usually perform, should I be required to do so by the Superintendent. If anything improper is done in my presence, or to my knowledge, I consider myself bound to report it to the Superintendent. I understand and acknowledge the right of the Superintendent to discharge me without warning for acts of unkindness to the inmates, intemperance, disobedience to orders, incivility to superiors, or any transgression of the rules, my wages being thereby forfeited. This agreement shall be understood to operate in conjunction with the Memorandum of Agreement signed on entering the asylum; also, any Lunacy Act or Masters and Servants Act that is or may be enforced within the Colony”;—do you remember signing that? Yes.

1208. Do you remember reading it before you appended your signature? No; I know I signed it as a mere formality.

1209. Did you know what you were signing when you affixed your name to that document? No, I did not; I thought it was an ordinary agreement.

1210. When you were signing that document was Dr. Vause present? Yes.

1211. Did Dr. Vause read it over to you? Yes.

1212. Are you perfectly sure of that? Yes.

1213. So that you were asked to sign a document, the contents of which you were unacquainted with? Yes.

1214. Did you have put before you a similar paper to this that I hold in my hand—it is known as general rules and instructions for attendants and others? I had a paper of some kind; I do not think it was like the one you hold in your hand. It was a printed paper torn from a book, and about one-third the size of that you show me. It certainly was not the same size as that before you.

1215. Do you know whether the piece of paper you had supplied to you contained the same conditions as those in this one;—I mean to say as far as you could grasp the matter? Yes; I think they were much about the same.

1216. Did you carefully read the paper you then got? Yes, I read it.

1217. Did you make yourself familiar with its contents? Yes.

1218. Did you do your best to carry out the instructions contained in that paper? Yes.

1219. Why were you dismissed from the institution? The only reason I know of was this:—I went to the office every night to see if there were any letters for post. I went there on one wet night with a top coat on and asked as usual if there were any letters or papers to go to the post. I went into the office, but did not take off my hat. Mrs. Gilchrist, the lady superintendent, as I was passing out told me that I had not taken off my hat. I replied to her that I did not think that it was necessary, as I did not see anyone to take my hat off to. I also said, “I consider that I should only take off my hat to my superiors.” I also said to her, “If you will mind your own business I will take care of myself.” I heard nothing more about it. I went to the post next day, and about 2 o’clock on the same day word came to me that I was wanted at the office. I then went round to the private house and I was informed that my services were not required any longer.

1220. Did you not say that you had passed through the office as often as you liked without taking your hat off? No.

1221. Are these the grounds upon which you were discharged from the institution? Yes.

1222. How long have you been in communication with a man named Mr. Gearey? I cannot say for certain, but I think it was about last April—that is the date as near as I can remember.

1223. Do you know if he was given any names of the attendants or nurses connected with the institution? Yes; I think he was.

1224. Do you know if Mr. Gearey was in communication with any of the people whose names had been supplied to him? Yes; I think he was.

1225. *Dr. Garraan.*] Do you admit that you signed a book handed to you without having read what it contained? Yes, I do.

1226. Do you know whether when you signed that you were committing yourself to conform with the introductory clause in that book? I do not know.

1227. Do you know whether that first clause said, “I hereby promise during the period of my engagement to obey the rules of the institution; to promote as far as I am able its objects; to be careful of its property; to avoid gossiping about its inmates or affairs; neither to use or have in my possession any intoxicating liquors, and to endeavour generally by my own conduct and demeanour to sustain the reputation of the establishment”;—did you sign to conform to this? I suppose I did.

1228. Does not the obligation also point out that if you had any complaint to make you should report to the Medical Superintendent? I do not know; I only know that I had to report to the head attendant.

1229. How do you reconcile that you should only report to the head attendant when it is said that it was your distinct duty, according to the rules and instructions, that you should immediately communicate to the Medical Superintendent any peculiarity you might observe in any patient and every instance of neglect? I do not know how it came about. I was told to report to the chief attendant.

1230. Did you not observe that you were to report any abuses or neglect to the Medical Superintendent? If it was in the book I signed I suppose I should have done so.

1231. But does it not state distinctly in the paper that was given to you that you were to report any abuses to the Medical Superintendent? Yes.

1232. And yet do you admit that there were great abuses and that you did not report them to the Medical Superintendent? No, I did not.

1233. Have you got a copy of that document which you signed then in your possession? No, I have not.

1234. Did you read it over when it was given to you? Yes; I am sure I read it over, but I do not think it was of the same nature as that you read to me now.

1235.

- Mr. A. Mackenzie.  
13 Nov., 1894.
1235. *Mr. McGowen.*] Do you not say that your first communication with Gearey was made in or about last April? Yes; as near as I can remember.
1236. Was that date after Case No. 1 had been taken out of Bayview House? No.
1237. How did you become acquainted with Gearey? I got a letter from Gearey through another friend of mine in town. This friend wrote to Mr. Gearey and told him certain things. He then wrote to me.
1238. Was that how you were introduced to Mr. Gearey? Yes.
1239. And did you then find out that Mr. Gearey took a great interest in the case? Yes.
1240. Did you, on Mr. Gearey's solicitation, furnish him with certain particulars? Yes; I did.
1241. And are those particulars the sum and substance of the evidence you have given here? Yes.

[Witness withdrew.]

Mr. Thomas Kernaghan sworn and examined:—

- Mr. T. Kernaghan.  
13 Nov., 1894.
1242. *President.*] What are you, Mr. Kernaghan? I am a warder at Callan Park Hospital for the Insane.
1243. How long have you been at that asylum? I think about two years and two months.
1244. Do you remember Case No. 1 being brought there? Yes.
1245. Have you had experience in the treatment of excited patients during the period as a warder at Callan Park? Yes.
1246. Was Case No. 1 in an excited condition when he was admitted? Yes; he was very excited at the time of his admission, and he was much more so afterwards.
1247. Did you see him undressed for the first time after he had been admitted? Yes.
1248. Were there any bruises on his body? No, sir; not that I am aware of.
1249. Was he in good bodily and physical condition—was he well nourished? I should say he was just about middling.
1250. Was there anything peculiar in his appearance? No; except that he had a black eye.
1251. What was the general character of the patient as regards his habits? There is a great change in him now in this respect. When he first arrived in Callan Park he was very dirty in his habits, but now he shows a marked improvement.
1252. Do you mean to say he is now more cleanly than he was at first? Yes; very much more so.
1253. When he arrived at the institution was he in an excitable condition, and in the habit of tearing his clothes? Yes.
1254. In your experience, have you seen more excitable patients than Case No. 1? Yes; I have at times.
1255. Would you describe him as one of the excitable patients? He was when he was first admitted.
1256. Is he as excitable now? No.
1257. Do you look in upon him at night? Well, not during this month.
1258. Did you when he first arrived at the institution? Yes.
1259. Does he now sleep in a room by himself? Yes.
1260. Does he require to have his bedding or clothing changed at night? He did very often when he first arrived, but not so much now.
1261. *Dr. Garran.*] Do you consider that he has contracted much better habits now as compared with when he first was admitted to Callan Park? Yes.
1262. Does he tear his pyjamas at night? No.
1263. Does he complain about suffering from cold? No.
1264. Do you give him a bath every morning? Yes.
1265. Does he ever show any reluctance to having his bath? No; he will get up at once as soon as I tell him his bath is ready. In fact, he appears to enjoy his bath.
1266. Do you not say that he has grown much quieter of late? Yes.
1267. Do you think that his quietness of late is due to any failure of strength, or that he is more contented and better in health? I think he has grown physically stronger and quieter.
1268. Is he in the habit of taking long walks? No.
1269. Do you think that while he is taking walking exercise he tires the attendant who goes with him? Oh, no; he does not.
1270. Do you consider that he is in better health now than he was when he arrived at Callan Park? Yes, certainly.
1271. Do you think he shows any improvement in his habits? Yes.
1272. Do you say that an attendant looks in upon him on two or three occasions during the night-time? Yes; an attendant sits in front of his door, which stands ajar sometimes, and this attendant throws his lamp upon him during the night, and sees that he is alright.
1273. Is there a special attendant on duty to look after him then? Yes.
1274. I mean is there an attendant at night-time besides the one during the day? Yes.
1275. Does this patient take the entire work of two attendants? Yes.
1276. Are there many patients in Callan Park Asylum who get two attendants to look after their requirements? No; he is the only patient.
1277. Is he, then, exceptionally well attended to? Yes.
1278. Does he show any disposition to tear his mattress, his sheets, or bed-clothes? No; I see no disposition in this direction while I am with him.
1279. Does he try to tear his usual wearing apparel? He is always fiddling with the buttons of his clothes, but I do not see him make any attempt to tear them.
1280. What kind of mattress does he sleep on now? A hair mattress.
1281. Did he sleep on a hair mattress when he was first admitted? No; on a straw one.
1282. Since his admission, then, he having improved in health and habits, he is supplied with a better mattress? Yes.
1283. Is he also supplied with blankets and sheets? Yes.
1284. Is he usually quiet during the night? Yes.
1285. Do you ever notice him being restless, walking about as if he wished to shift his bed? Sometimes he will get off the bedstead and pull the mattress and pillows about.

1286. Does he put the mattress on the floor as if he wished to sleep there rather than on the bedstead? Yes; sometimes.
1287. Does he get a straw mattress sometimes, and does he pull that about the floor? Yes; he seems to prefer a straw mattress to the other one.
1288. Does he grow tired of the horse-hair mattress? Yes. He seems to want a change, and he asks for a straw mattress, because he seems to think there is something electric in it.
1289. Has he asked you to change his mattress at night? Yes.
1290. After it was changed, would he lie down on the floor and go to sleep? Yes.
1291. *Mr. McGowan.*] Did you strip him as soon as he arrived at the institution? Yes.
1292. Did you give him a bath at once? No, sir, we gave him a bath the next morning.
1293. When you gave him this bath, did you discover any discolouration on his body? No; I did not.
1294. During the first four days of his residence at Callan Park—that is, from the 20th to the 24th May, I use these dates just as a matter of fixing the 24th as the Queen's Birthday—how did he behave during the daytime? He was very restless.
1295. Did he tear his clothes? Yes.
1296. Did he show the same disposition in the night-time? Yes. He got blankets, and he used to tear them up.
1297. Was he in the habit, then, of making water on his bed? Yes. He would do so on the bed, on the floor, or on any other place at all, during the first days of his confinement at Callan Park.
- 1298-9. Does he now use the chamber utensil at night? Yes; and in the daytime he will say when he wants to go to the closet? I go with him and unbutton his clothes and button them up again.
1300. So that now, from having been a dirty patient, he is much cleaner and more rational by going to the water-closet in the daytime and using the chamber utensil at night? Yes.
1301. Do you think in his general health he is much stronger? Yes; much stronger.
1302. When he is walking about, do his legs appear to tremble? Yes, a little; but not so much as they did at first. He appears to suffer from paralysis to such an extent that when he takes his food his hands shake. At first it used to take two attendants to feed him.
1303. Is this shaking less now than when he first arrived at Callan Park? Yes.
- [Witness withdrew.]

*Mr. T.  
Kernaghan.*  
13 Nov., 1894.

Mr. Thomas Ramsay sworn and examined:—

1304. *President.*] What is your occupation? I am at present engaged as an attendant at Callan Park Hospital for the Insane.
1305. How long have you been so engaged? For over ten years.
1306. Consequently, then, you have had a considerable amount of experience? Yes.
1307. Do you remember Case No. 1 being brought to Callan Park? Yes.
1308. Where you present when he was undressed? Yes.
1309. Did you see him undressed? Yes.
1310. Did you notice any bruises on his body? No, sir; I did not take any notice.
1311. Did you notice if one of his eyes was black? Yes; one was a little discoloured.
1312. Was he in an emaciated condition when he was admitted? No; I cannot say that he was emaciated. He certainly was thin and in rather poor condition. I do not say that he was even in poor condition, but he was thin.
1313. Was he excited at the time of his admission? Yes.
1314. Did he continue to be so for some little time? Yes, during all the time I had anything to do with him, from the 20th of May to the end of the month.
1315. Was that not about eleven days? Yes.
1316. And while you had to deal with him during that period, was he what you consider to be an excited patient? Yes, very.
1317. Would you class him as one of your most excitable patients? Yes, he was very excitable and troublesome.
1318. Were his habits dirty? Yes, he was what we call a wet and dirty patient.
1319. Was he destructive as well? Yes.
1320. Did you attend upon him at night-time? Yes, while I was on night-duty. It was my duty to see him every hour.
1321. Did he sleep well? Some nights he would sleep a little. Some nights he would not sleep at all. I have known him to go two nights without sleeping.
1322. Was he on those occasions an unmanageable patient? He was not strong, but at the same time he was a hard patient to deal with.
1323. In what way? He was most restless and fidgetty, and he was a wet and dirty patient.
1324. When he was first received did he sleep upon a straw mattress? Yes.
1325. Did he use a straw mattress all the time he was under your care? Yes.
1326. Was he in the habit of tearing that mattress? I do not think he tore the mattress, but I know he tore his bedclothes.
1327. Was he at this time a passionate man? Yes, he would get into a passion about nothing at all.
1328. Do you know if he is much improved now? I cannot say, for I have only seen him twice since the time of which I speak, for I am now working outside.
1329. *Dr. Garran.*] Have you occasionally looked through the observation hole upon him during his restless nights? Yes.
1330. Was he in the habit then of pacing about his room? No, he was not strong enough for that.
1331. How did the restlessness show itself? He was in the habit of tossing about and moaning.
1332. Would he keep his bedclothes over him? No.
1333. Was he in the habit of taking off his pyjamas? Yes.
1334. Would he strip himself? Yes; he would take anything off, and tear up the night-clothes he wore.
1335. Would you then go into the room and reclothe him? Yes.
1336. When you went into the room on these occasions was he quiet in his behaviour? No; he did not seem to like it, and he appeared to wish to get his clothes off.

*Mr.  
T. Ramsay,*  
13 Nov., 1894.

- Mr. T. Ramsay.  
13 Nov., 1894.
1337. Did he, then, object to you putting on his clothes? Yes, at times he did.  
 1338. Do you think he would rather that you should have left him alone? Yes.  
 1339. Would he do this thing more than once, or say two or three times in the night? Yes; he was continually doing it.  
 1340. Did he always tear his clothes off? Yes; he was very destructive at this time.  
 1341. Did he, then, destroy a good many garments? Yes.  
 1342. On other nights when he was not so restless would he remain quiet? Yes; sometimes he might sleep from 11 o'clock to 2 o'clock in the morning, and then he would get on to the floor. Sometimes in the fore part of the night he would be restless and destructive, and then go to sleep.  
 1343. Supposing that in the fore part of the night he soiled the bed clothes or bed, would it be somebody's business to clean up the mess? Yes; there is an attendant whose duty it was to clean it up.  
 1344. If the floor became soiled, would you succeed in taking away the smell? Yes.  
 1345. Could you do so without any difficulty? Yes, without any particular difficulty, for we use particular stuff for that purpose.  
 1346. Do you mean that you use disinfectants? Yes.  
 1347. And by the use of this did you manage to get the urinous smell out of the wood or out of the floor? Yes.  
 1348. Have you rooms at Callan Park which are perpetually soiled in this manner? Yes.  
 1349. And yet do you manage to keep the floors clean and the apartments comparatively sweet? Yes, I think so.  
 1350. Do you ever hear of any complaints of smell of stale urine? No.  
 1351. Are there any rooms in which there is a perpetual smell of this nature which you cannot get out? I do not think so. We might not be able to remove the smell for a few hours or a day, but we do effectually get it out.  
 1352. Does the room which is occupied by Case No. 1 contain a window? Yes.  
 1353. Do you regard him as a restless patient? Yes; I think he would be restless anywhere.  
 1354. Does not this restlessness wear itself out? It lasts for a considerable time. Sometimes in the first part of the night, sometimes in the latter part of the night, and sometimes all night through.  
 1355. Do you then regard him as a most uncertain patient? Yes.

[Witness withdrew.]

Mr. Alexander Robinson sworn and examined:—

- Mr. A. Robinson.  
13 Nov., 1894.
1356. *President.*] Were you once employed as an attendant at Bayview House? Yes.  
 1357. How long ago? I left there on the 7th February, 1890.  
 1358. How long were you employed at that institution? In all about five years, but in two separate periods.  
 1359. Did you leave on one occasion, and then return to the institution? Yes.  
 1360. Why did you leave on the first occasion? I left to improve my position.  
 1361. Why did you leave on the second occasion? Because I disagreed with Dr. Vause. A patient complained bitterly of the food he was receiving, and I, as senior attendant, reported it to Dr. Vause, and Dr. Vause informed me that he thought I was running the place on wrong principles, and that I had better leave. I said, "All right, I will leave"; and I left.  
 1362. Did you ever have any difficulty in appealing to Dr. Vause? No, sir.  
 1363. Could you always go straight to him and tell him of any complaint? Yes.  
 1364. Did any attendant again complain to Dr. Vause at any time while you were there? I think so.  
 1365. Were you asked to sign any document when you left the institution on the final occasion? Yes, I was.  
 1366. In that document was it stated that during the time you had been in Dr. Vause's employment every consideration was paid to the care, comfort, and recovery of the patients in the establishment? Yes.  
 1367. Did you sign that paper? No.  
 1368. Why did you not sign it? Because I could not say conscientiously that the patients had been so treated.  
 1369. Why do you say that? The food was not right, for one thing. Very often the steak was tough, and not sufficient in quantity. When I made any complaint about this by going to the cook in the kitchen, I was only snubbed for my trouble, and when I spoke to Dr. Vause about it he told me I had better leave.  
 1370. Was that the general state of affairs in that institution? Yes. The patients were in a state of rebellion, and when I made a complaint about the matter, and explained to Dr. Vause how things were, he told me it was about time I left, as I was not running the place properly.  
 1371. Do you know anything about the interior working of the institution? Yes.  
 1372. Can you say anything about the beds and bed clothing? I can only say that from outward appearance the beds looked all very well. There were quilts, and sheets, and carpets, but they were only used when inspections were on. They were taken up and taken off after the inspections were over.  
 1373. In other words, do you mean to say that these quilts, and carpets, and sheets were only used for purposes of show during the time of official inspections? Yes.  
 1374. Were these things removed at all other times? Yes.  
 1375. Is it also true that the dresses of patients were made ready for official visits? On the male side the men were always kept badly dressed, but some attention was paid to them on the day of inspection. On these inspection days, when the doctors or official visitors were expected, things were very different.  
 1376. When these visits were made were you aware they were about to take place? Yes; we got word.  
 1377. How did you get word? Word used to be passed along when friends came, saying that Mr. So and So's friends were coming, and see that you get his better clothes put on him.  
 1378. While you were there did you ever administer medicine to the patients? Yes; I used to administer sleeping draughts. These had been previously mixed up by Dr. Vause, measured out carefully so that there could be no mistake.  
 1379. Was everything, as far as the administration of medicines was concerned, carried out satisfactorily? Yes; the only medicines I saw administered were these draughts. 1880.

1380. What kind of night attendance was there on the patients? I never saw a night attendant at all during my time.
1381. What time did you get up in the morning? Usually about half past 5 and from that to 6 o'clock.
1382. Did you remain on duty all day till 10 o'clock at night? Yes.
1383. What attendants saw patients during the night-time? None at all, except in the single rooms.
1384. What attendance was given to the patients in the single rooms? None at all after 10 o'clock at night.
1385. As a general rule, did not an attendant see patients after this hour of the night—not even in exceptional cases? On exceptional occasions, when a patient was noisy, an attendant might go to see him.
1386. Supposing there were to be an outbreak, was there any attendant near to appear on the scenes? None nearer than those sleeping with other patients in the main bedroom of the dormitory some distance away.
1387. Do you remember an isolated building consisting of two rooms kept for the use of patients? Yes.
1388. Do you know if single patients were placed in these two rooms? Yes, they were.
1389. Who looked after them at night? No one.
1390. Supposing there were an outbreak in the night-time, who was the nearest attendant? The one sleeping in the back room nearest to this detached building. I know that on one occasion a patient confined in one of those rooms broke down the wall during the night, pulled the bricks clean out, and made his escape from the room without being heard.
1391. Did this occur in one of the two rooms you have specified? Yes; he was confined in one of these two rooms—the easterly room of the two.
1392. Did he escape from it? He got through the wall all right and into the yard, where he had a pillow-slip over his head. He was discovered by one of the housemaids coming through the yard early in the morning. He asked her for some clothes. She gave the alarm and he was captured.
1393. At what time did this happen? The patient was discovered between 5 and 6 in the morning.
1394. Was there any provision made for supplying hot water, warm milk, or cocoa, or food, during the night? Never in my time.
1395. Supposing a patient had been ill and required such attention was there any attendant on hand to administer to him? No.
1396. What was the name of the patient who made his escape through the wall on the occasion to which you refer? He was Case No. 9.
1397. Do you recollect the date of this occurrence? Not exactly; but it was during the last part of the second period of my time at the institution.
1398. When visitors came to see patients at Bayview House were they taken to the room where these patients generally passed their time? No; the interviews between the patients and their friends always took place in a room near the office.
1399. Do you know of any special cases where patients have been neglected in their treatment beyond those you mentioned while you were there? No; not any special cases, but I have known that patients who were incapable of grumbling had no notice taken of them. Patients who could grumble received attention, but patients incapable of complaining had no notice taken of them at all.
1400. Can you mention one individual who would come under this definition? Yes; there was Case No. 10—very little notice was taken of him.
1401. Why was this? The doctor did not make his rounds. He used to go on to the lawn and see cases there, and if patients were so helpless as to not be able to go on the lawn they would not be seen.
1402. How often did Dr. Vause go his rounds—did he make a daily round? No.
1403. Are you certain that Dr. Vause, as Medical Superintendent of the institution, did not make his rounds at a stated hour? No. On the male side I have heard patients say, "I wonder what has become of Dr. Vause. I have not seen him for a week."
1404. Do you mean to say that for a week at a time you have not seen Dr. Vause make his rounds of the institution? Yes; I do.
1405. *Dr. Garvan.*] Were these solitary rooms much used during your time at Bayview House? Yes.
1406. Were there any destructive and violent patients while you were there? Yes.
1407. Patients who tore their clothes and destroyed their bed clothing? Yes.
1408. Did you ever know of any patient being locked up in any of these rooms without clothing? No.
1409. Did you ever know of patients put into these rooms tearing up their clothes? Yes.
1410. Would such a patient remain unclothed all the night? Yes.
1411. Have you ever seen patients come out without clothing from this room? Yes.
1412. Did they ever complain of being cold? No; I have never heard them complain of cold. Patients like these do not as a rule take cold physically. Mental excitement seems to keep them warm.
1413. Have you ever seen patients come out of that room shivering with cold? No.
1414. Have you seen a good many destructive patients? Yes.
1415. Was there any option but to put them in these single rooms? No.
1416. Do you think it would be safe to leave them in alone, or should somebody be with them? I do not think it would be possible for anybody to stay with them.
1417. Do other patients have attendants sleeping in the same room with them? Yes.
1418. Do you think that when patients are placed in these solitary rooms they should have someone with them? No; I do not think there is any necessity.
1419. Have you ever known anyone put into these rooms uselessly? No.
1420. Has it always been absolutely necessary when they have become destructive to do so? Yes.
1421. Have you ever known patients to be placed in these rooms without a direct order from the Medical Superintendent? No; I think they are never put in without orders.
1422. *Mr. McGowan.*] Do you not say that you were altogether about five years at the institution, and that you finally left in March, 1890? Yes.
1423. Were you head attendant all the time? No. I went there as a junior hand on both occasions, but when I left there I had become, by promotion, senior attendant.
1424. Were you head attendant at any time during the period of your first engagement? Yes.
1425. How long were you there before you were made head attendant? I think, as far as I can remember, I was there about four or five months.

Mr.  
A. Robinson.  
13 Nov., 1894.

- Mr. A. Robinson,  
13 Nov., 1894.
1426. Was it the usual thing that when a man first arrived at the institution he was put to more menial work, and afterwards worked his way up? Yes.
1427. Had you any previous experience in asylum work? Yes; I came from England, where I had had five years' previous experience. I had a reference from the Wadsley Asylum, in South Yorkshire.
1428. How long were you there? About five years.
1429. According to that then you had had five years' previous experience in England as a warder in an asylum? Yes.
1430. And after you had had four or five months at Bayview House, were you promoted from the position of junior attendant to that of head attendant? Yes.
1431. Therefore, in that period would not the men previously over you have been discharged? Yes.
1432. What other attendants were there at the institution during the five months at most you were there? I think there were two others, and I took the place of the head attendant, who left.
1433. Did you leave of your own free will? I did on the first occasion.
1434. Did you get a reference from Dr. Vause when you then left? Yes.
1435. Did you leave with mutual agreement with Dr. Vause? Yes.
1436. Why did you go back to the institution? Owing to the general depression I had great difficulty in getting outside employment, and as I could not work at any calling, I thought I would return to that at which I had had some experience.
1437. Did you, therefore, go to Dr. Vause and ask for re-employment? Yes.
1438. How long a time elapsed between your leaving Bayview on the first occasion and going back on the second? About a year and a half.
1439. Were you satisfied with the mode in which the asylum was conducted when you went there first? I cannot say that I was thoroughly satisfied. I never was thoroughly satisfied with the place.
1440. Were you asked to sign a paper when you left in the first instance, asserting that while you had been in the employ of Dr. Vause that the institution had been properly conducted? Yes.
1441. Did you sign it? Yes.
1442. And did you then get your reference? Yes.
1443. On the second occasion when you returned to the asylum, did you go as a junior hand? Yes.
1444. How long were you there on that occasion? About six or seven months.
1445. Were there two or three attendants above you at that time? There were two above me.
1446. Were you appointed head attendant again before you left on the second occasion? Yes.
1447. Therefore, did these two attendants who were above you leave the institution in the space of these six or seven months? Yes; one was dismissed, and the other left of his own accord.
1448. Did you complain to Dr. Vause with regard to the state of the food, and also tell him that the tea was unfit for use? Yes; I did complain that the meat was very tough, and that there was not a sufficient supply. We would sometimes have chops for breakfast, and sometimes we would get cold meat, and the patients would grumble about this. We could not even get that sometimes. I reported to Dr. Vause the way things were going on, and he told me I had better leave. At the end of the month he handed me a document to sign, affirming that every consideration was paid to the care and comfort of the inmates. I could not sign this, as I knew it was not correct. Then Dr. Vause put my cheque on one side and said, "Very well, I will not pay you."
1449. Did he subsequently pay you? Yes; he sent the money over afterwards, on the next morning.
1450. Did he refuse to pay you? Yes. His brother-in-law, Mr. Bailey, I think, asked me why I did not sign, and further wished to know if I did not think I was acting foolishly. I replied, "I may be acting foolishly, but I am acting conscientiously."
1451. Did any other warders complain of the treatment of the patients and the food;—was it the custom for them to come to you as the head attendant and make these complaints? The attendants very often did so.
1452. Would you have thought that they were passing you by if these attendants had gone direct to Dr. Vause to make these complaints? No. I told them that I thought it would be much better if they took the complaint direct to Dr. Vause.
1453. When you did not get any satisfaction from Dr. Vause in the matter of food, did you ever complain to Dr. Manning, in his capacity as Inspector-General of the Insane? I did not; but when I left the institution I made a report to Dr. Manning.
1454. What did you do? I went to Dr. Manning, and made a similar statement to the one I have made to you to-day. I do not know what followed.
1455. Was there any intimation ever made to you when the visiting doctors arrived at the institution to make any inspection? No.
1456. When the Inspector-General of the Insane, Dr. Manning, came to the institution was any intimation sent to you? No.
1457. When did Dr. Manning generally make his rounds? Between 9 o'clock in the morning and 5 o'clock in the afternoon.
1458. Did you ever complain to Dr. Manning with regard to the difficulty you had experienced in interviewing Dr. Vause? No; but I did complain to Dr. Manning that Dr. Vause had not made a daily inspection.
1459. Do you not say it was the custom to give the patients sleeping draughts at night? Yes.
1460. Did you consult Dr. Vause about this practice? Yes. It would be on my telling him that a patient was restless that Dr. Vause would prepare these sleeping draughts.
1461. Would it be, then, acting on your report as to the condition of a patient that Dr. Vause would mix the medicine, and hand it to you to administer to the patient without seeing the patient himself? Yes.
1462. *Dr. Vause.*] Was not Dr. Vause familiar with the condition of the patient to whom the draught was administered? Yes.
1463. Had he given a similar dose or doses before? Yes.
1464. Are you perfectly satisfied that as far as the administration of medicine is concerned Dr. Vause was careful with the patients? Yes; I have no doubt about that.
1465. Is not your complaint about the tea that it floated on the water when it was in the decoction stage? No; that was not it. The complaint was against its black colour. It was like ink; it was not fit to drink, and there was no taste in it; and the patients said then: "If you do not report this to Dr. Vause we will report you."

1466. Was there any complaint made from any other part of the house? I do not know.  
 1467. Was it not a rule that the patients in the single rooms should be visited every two hours during the night? Never while I was there.  
 1468. Where did you keep the stores, such as tea, milk, and sugar? They were locked away.  
 1469. Were not the stores available during the night if you required any? They were not.  
 1470. Were the daily stores locked away? We did not see any except our daily allowance, and we only got our daily allowance.  
 1471. If you wished to get a cup of tea or milk for yourself or for a patient during the night, could you get it? No: there was nothing left over from the daily stores.  
 [Witness withdrew.]

Mr.  
 A. Robinson.  
 13 Nov., 1894.

WEDNESDAY, 14 NOVEMBER, 1894.

[The Commission met at 11 a.m., at the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.  
 FREDERIC NORTON MANNING,  
 Esq., M.D., INSPECTOR-GENERAL OF THE  
 INSANE. | ANDREW GARRAN, Esq., LL.D.  
 JAMES SINCLAIR TAYLOR MCGOWEN,  
 Esq., M.L.A.

Dr. Vause did not attend this sitting.

Maggie Macleod sworn and examined:—

1472. *President.*] Were you at one time connected with Bayview House Asylum? Yes. I left there about two months ago.  
 1473. How long were you employed there as an attendant? About eleven months.  
 1474. Do you remember the date when you first entered upon your engagement there? On or about the 22nd of last November.  
 1475. When you were engaged did you sign a certain paper? Yes, I did sign a paper; but I did not know what it contained.  
 1476. Was that paper read over to you before you signed it? No, sir, it was not.  
 1477. Was a copy of a printed paper handed to you to read at the time? No; I never received one to read. I was merely sent into the office when I arrived at the institution, and asked to sign the paper put before me.  
 1478. When you left Bayview House did you sign any paper? No, I did not.  
 1479. Why did you not sign one? Well, I would rather not say.  
 1480. But you must tell us your reason. We only want to hear the truth about the whole matter, and you are brought here for the purpose of telling us the truth. You have nothing to fear, so will you tell us the reason you had for not signing it? I had been told that Dr. Vause made people leaving the place sign a paper to say that patients had been well done by. I did not believe they had been well done by, so I did not sign it.  
 1481. Had you had any previous experience in an insane asylum before you took this engagement? I had never had anything of the kind.  
 1482. While you were there were you under some superior officer? Yes.  
 1483. Who was it? A matron named Bridget Morrissey, and also Jessie Fuller, who was acting matron.  
 1484. Did you receive your instructions from these persons? Yes.  
 1485. Was there anyone else besides the persons you name who occupied the superior position? There were these two as matron and assistant matron, and there was also a Miss Jones, who is now deceased.  
 1486. Did that Miss Jones die only a day or two ago? Yes.  
 1487. Did she die since this inquiry commenced? Yes.  
 1488. What were your duties when you first arrived at the institution? I was second in No. 2 ward, and after the head nurse left I was put in charge of No. 2 ward, and occupied that position for about five months. That is, I was head nurse at the Government end. I think I had been in this position somewhere about six months, when one day Dr. Vause sent for me and told me to make arrangements to go. I asked him for what, as in my own mind I knew I had never been found fault with. He told me that I had been giving information about the place. I was some relation, second cousin, to a man named Alick Mackenzie, and I was told that I had been giving information to him.  
 1489. Had Mackenzie left before you were sent for? Yes; some six months before, I think.  
 1490. Was the reason why you were told to leave that you were suspected of giving information? Yes; but when this was first mentioned to me it was a false accusation. I told Dr. Vause it was a false accusation at the time, but he would not listen to me. I have given information since about the working of the place and the treatment of the patients.  
 1491. Did you, when you were at the institution, sleep in a room that has since been turned into a box-room? Yes.  
 1492. Were there any rats in that room? No; I did not see any rats, I think, but there were other things.  
 1493. What other things? It was full of vermin.  
 1494. What vermin? Bugs. From the very first day I entered it I was in a state of misery.  
 1495. Are you sure there were no rats? No; I do not think there were any rats while I slept there.  
 1496. Are you certain about the other vermin you name? Yes; they were everywhere—in the beds and everywhere else.  
 1497. Did you make any complaint about this? Yes; I complained to the matron.  
 1498. What did the matron say? She said it was no use complaining; she could not get the doctor to do anything.  
 1499. But could you not speak to the doctor? No; I only saw him when he came about the place on his rounds.

Maggie  
 Macleod.  
 14 Nov., 1894.

- Maggie Macleod.  
14 Nov., 1894.
1500. At what hour did he make his rounds? He used to come over just before dinner-time, but we would never see him after then.
1501. Do you know those single rooms or cells? Yes.
1502. Did you ever see any patients there? Yes.
1503. Were women locked in these cells? Yes; from half-past 5 or 6 o'clock at night to 6 o'clock the next morning.
1504. Was there any provision made for attendance on these women? Not one of any kind whatever.
1505. Were these nine or ten single rooms or cells rather dark? Yes; there was a slip of a window, and that was all. The place was without an observation hole. There was only just a slip of a window.
1506. How did you look in upon the patients? We never did look in upon them at night.
1507. What time did you begin work in the morning? From half-past 5 o'clock.
1508. And what time did you leave off at night? Sometimes about 7 o'clock; sometimes later. Not till 10 o'clock if there was anything wanted.
1509. Well, then, we will say up to 10 o'clock;—was there anyone watching these cells at all after 10 o'clock at night? No; not in the early part of my engagement. There was some provision made for a night-nurse after Case No. 1 was taken away. One of the day-nurses used to go on night-duty. Then we would take it turn and turn about.
1510. Do I understand that, instead of putting on a special night-nurse, you split up the extra duty and took night-work in turns? Yes.
1511. Was that not done all the time you were there? No.
1512. Was it done prior to the inquiry into Case No. 1? No; there was nothing at all done then, not one single thing.
1513. Were the patients supplied with comfortable bedding? No; they were simply put in on straw. They were stripped and put in their rooms, and a bag of straw would be put in with them.
1514. Do you mean to say they were stripped quite naked? Yes; they were all quite naked, and they only had this straw.
1515. Were they supplied with sheets, or blankets, or any other bedding? They had no sheets or anything else. There were only sheets for two of the patients put into two of these cells during all the five months I had anything to do with them.
1516. Were some of these young women? Yes.
1517. Would it not be very unpleasant for them at particular recurrent times to be put into these rooms in that way? Yes; certainly.
1518. Did you ever complain about this state of affairs? Yes; often and often. I have not only spoken about this, but I have also complained as to the way in which the patients were clothed and fed. It was simply shameful.
1519. Was not the food of fair quality? It was very common, as common as could be.
1520. What did the patients generally get for breakfast? I never saw them get anything but rough chops, cooked badly, on one day, and a rough meat stew put before them the next day.
1521. Did they have any tea? Yes; such as it was.
1522. Were they not supplied with plenty of bread and butter? No; down at the Government end they only used to get dripping or treacle. There were as many as fifty-two patients down there, and they were allowed, so the sub-matron told me, 2lb. of butter a week.
1523. Do you mean 2lb. of butter each? Oh, no; for the whole lot of them.
1524. Was not that absolutely insufficient for them? Yes. We used to scrape and scrape so that they each had a bit.
1525. What did they have for dinner? They used to have a sort of stew made from rough meat, mainly necks of mutton, I think.
1526. Did they have any soup? Yes; they used to be served with soup twice a week, and then it was very poor in quality.
1527. In the evening, what did they have for supper or their last meal? Generally bread and treacle, or bread and dripping—nothing else.
1528. Were they not supplied with bread and butter? No; there was none left for them to have.
1529. Was there not any change so that you might have roast meat one day and boiled meat the next? No; we mainly had boiled necks of mutton. I never saw any other joint there.
1530. Was there not a dietary scale hanging against the wall in the rooms of the institution—a scale showing what food the patients were to have every day? No.
1531. Was there not any systematic arrangement for the proper feeding of the patients and attendants? No.
1532. Were you obliged then to take just what came from the kitchen and distribute it as best you could? Yes; and very often I have gone down to the kitchen and tried to get more, and I was told that Dr. Vause would not allow any more.
1533. Who told you this? The cooks have told me this.
1534. And who gave them their orders? Dr. Vause, I suppose. Things were so bad that on one occasion I saw Dr. Ramsey, who was acting for Dr. Vause, and he gave me an order to get better things, but they were never supplied, although I tried to get them.
1535. Did you tell Dr. Ramsey afterwards about this? No, I had not the chance. He went away suddenly one day, and did not come on duty any more, so I could not tell him.
1536. When the female patients were visited by their friends were these friends sent into the dormitories with the patients, or to any of the ordinary rooms? No.
1537. Where did they meet their friends? Generally the patients were taken into a nice room near the office. Sometimes they would be taken into the new house, upstairs to one of the nice new rooms.
1538. Was there any special preparation made for patients to meet their friends? Yes; they used to be dressed in their best always.
1539. Do you know a patient name case No. 11? Yes.
1540. Did her daughter complain about the state of her underclothing? Yes.
1541. Did her daughter examine that underclothing? Yes. Her daughter gave her quite a trousseau, but in a little while she had not got a good thing left. She had no underclothing fit to wear.
1542. Was it the general rule for all patients to have their clothing changed when they saw their friends? Yes, always.

Maggie  
Macleod.

14 Nov., 1894.

1543. Did you always get notice as to when the friends would make these visits? Yes; we always received notice, and were told to get the patients ready.
1544. Would the patient then be dressed differently? Yes.
1545. In ordinary circumstances was the dress worn by the patient sufficient in quantity? No, for they only had on a gown, as a rule.
1546. Can you tell this Commission whether the ordinary dress supplied to the patient was clean and suitable clothing? Really and honestly it was not. You must know there are some dirty persons, and if we took the soiled clothes off the patients there was nothing to put on them; they would have to go about naked.
1547. Do you mean to say then that there was an inadequate supply of clothing? Yes; quite so.
1548. Are you referring to Government or private patients? I refer to both. We used to change the clothes about. If a Government patient had no clothes we would take them from private patients, and put them on the Government patients.
1549. Was there a room in which the surplus clothing of patients was kept? There was supposed to be one, but there were only a few common print gowns in it, and they were mainly kept for show.
1550. Do you say there were some dirty patients? Yes.
1551. Did you change their clothes when necessary? No; we could not, for they had no other clothes to put on.
1552. What did you do with them then? Just left them as they were.
1553. Do you remember this patient, Case No. 11? Yes.
1554. Was she much neglected while you were there? Yes.
1555. Was her body frequently covered with vermin? Yes.
1556. Where was she kept in the institution? She was put down in the Government end of the yard until the trouble in regard to Case No. 1.
1557. Was she exposed to the rain? Yes; often and often. She used to lie in the yard, and sometimes on the verandah, in all kinds of weathers. She was left to roll about as she liked in her own dirt.
1558. Was she not a private patient? Yes.
1559. Did you not take her out of that? No; and if we made any complaint about her we were sent about our business by Dr. Vause.
1560. Where there frequent changes in the nursing staff while you were there? Yes; constantly changes were being made. There are only three nurses there at the present time who were there while I was there.
1561. With regard to Case No. 11, is it true that on one occasion, when her daughter visited her, a silk dress was put on her body over her dirty clothes? Yes.
1562. Was it on that occasion that her daughter made the complaint? Yes.
1563. Do you remember Case No. 12? Yes.
1564. What were the particulars of that case? She was put in a single room.
1565. Was she there a long time? She got a great amount of shifting about; and she was given draughts made of stuff which caused her to become very stupid. I had to give her a drug every day at tea-time. It was given to me in a bottle, and I measured it out according to instructions, and put it in her tea every night.
1566. Who told you to do it that way? The matron. It used to affect her so that we had to keep the patient on the couch; and she used to lie on the couch in the Government end. She was a private patient, and paid for, but she never slept in the private ward until her father came to see her. She always slept in the Government end.
1567. Did you know Case No. 13? Yes; and she was a private patient, and put in amongst the Government patients; Case No. 14, another private patient, was put there too.
1568. Was it a frequent occurrence for private patients to be mixed up with Government patients? Yes; at all times.
1569. Are you quite certain of what you say, and willing to abide by all you say? Yes, I am; and I say, as I have said before, that it was a disgraceful state of affairs.
1570. Do you regret that you have to serve in a place like that, where the arrangements were so bad? Yes, I am very sorry I ever did. I was glad to get away. I never made any secret of the way in which patients were treated, and I said that if ever I were asked about the place I would not hesitate to say all I have told you.
1571. Did these patients, when they were put into these cells without a window, complain about their treatment? No, they never complained; they were too quiet.
1572. Did they simply submit without saying anything? Yes, mostly, there was only one bad patient that I remember—only one that might be called destructive and violent.
1573. Why then were they put in these single rooms;—do you think it was for the sake of convenience, and to save trouble? Yes; and to save the expense of getting more attendants to look after them.
1574. Did you hold the decided opinion you have expressed to-day when you left the institution? Yes.
1575. And is it, your opinion, now true? Yes; and I have never made any secret about it.
1576. *Dr. Garra.*] Who told you which patients were to be put in these single rooms? The matron.
1577. In putting them in there did you act under her distinct orders? Yes.
1578. Do you know if she got her orders from Dr. Vause? I do not know. When the patients were put in the straw, I believe, Dr. Vause blamed the matron, and said he did not know it was done, and she said it was done with his knowledge.
1579. Do you say that there was only one violent patient who needed to be kept in such confinement? Yes; Case No. 15, and she used to tear her clothing.
1580. Did you have to put the muffs on her? Yes.
1581. Did you put muffs on her during the night-time? No.
1582. Was she in the habit of tearing her clothing at night, or her bed-clothing? No; she had nothing to tear. If she had any clothing she would have torn it.
1583. Do you think that if you had clothed her she would have stripped herself? Yes.
1584. What did the patients do with the straw? They would open up the bag, take the straw out, cover themselves with it, and throw the bag away on one side.
1585. Was that all the covering they had at night? Yes.
1586. Do you mean to tell us that women were put into these cells quite naked, without any night-clothes, and with nothing but straw to cover them? Yes; I am quite certain of that.

- Maggie Macleod.  
14 Nov., 1894.
1587. Did you look in upon any of them at 10 o'clock at night before going to bed? No; I was not on night-duty.
1588. Was it anybody's duty to do so? No; not until a private patient got away.
1589. After that did somebody go round? Yes; I think so.
1590. And when patients were seen at this time of night were they found lying under the straw? Sometimes.
1591. Were there some twenty women in these rooms? No; I think there were only about twelve.
1592. And do you not say they were put in here without any necessity? Yes.
1593. And that they had no covering at night except straw? Yes.
1594. Could you at any time of night, if you had wanted it for yourself or a patient, have obtained a cup of tea, cocoa, or warm milk? No; you could not get it.
1595. Do you mean to say it would not have been possible to make yourself a drink of tea? No; it would not have been possible. There was no convenience for that even if we had provided the tea. There was no fire nor gas by which we could make anything warm either for the patients or the nurses.
1596. Are you quite sure about this? Yes; I am quite certain of it.
1597. Do you say that the women never slept in sheets? I do; there were only two used sheets during the whole time I was there—Case No. 16 and another patient.
1598. Are the sheets on those beds kept only for show then? In my time I always took the sheets off the beds at night; they were folded up and put away. They were put on again in the morning, but never used at night. If they had been used at night they could not have been used for long, as they would not have been sufficient numbers for a change.
1599. What covering did the patients use then? Anything they could get.
1600. Were there any blankets? The quilts were taken off.
1601. What did the patients cover themselves with? A small blanket if there was one, but very often there was only a bit of one, and they covered themselves with anything they could get hold of.
1602. Did they sleep in night-dresses? No.
1603. What did they sleep in then? Nothing. They never had a night-dress in my time.
1604. How many women slept in that ward? Fourteen.
1605. And do you mean to say that they did not wear night-dresses? There was only one had a night-dress until some were made lately. Some coarse brown calico was bought, and Dr. Vause got the coachman's daughter to come in and make it up.
1606. Are you referring now to the Government patients? Yes.
1607. Were the private patients treated better than this? Yes. They would have things of their own and some very few things were supplied by the asylum.
1608. Did they often complain of the cold? Yes, often.
1609. How often were the private patients taken to the bath? Once a week, on Saturday morning.
1610. How often were the Government patients bathed? Once a week on the Saturday afternoon.
1611. So that the Government and private patients had a bath once a week? Yes.
1612. Was the food of the private patients better than that supplied to the Government patients? No; it was even worse, for they never had any change at all.
1613. Had you any previous experience in asylum work, so that you would be able to compare what you have seen at Bayview House with the working of other institutions? No.
1614. Did you ever make any complaints to Dr. Vause personally? No; he would never speak to the nurses.
1615. How often did he come round the institution? He never came round after 2 o'clock, only when the other doctors were there, and then we used to get notice that the visiting doctors were coming.
1616. What notice do you mean? We used to hear about twenty minutes or half an hour before they came to see the patient.
1617. Did the visiting doctors ever drop upon you suddenly? No.
1618. Did Dr. Vause ever visit you suddenly? No; we got all our instructions through the matron. The matron used to let us know when the doctors were coming.
1619. Were any of the patients sufficiently sensible to have made complaints to their friends concerning their treatment? I do not know.
1620. Did you ever hear any of them complain to their friends? No; the only patient I ever took into her friends was Case No. 11.
1621. Was anybody present at these meetings between these patients and their friends to hear what was said? Yes; always the matron and the nurse.
1622. Were the patients then ever left alone with their friends? No; they never were.
1623. *Mr. McGowan.*] Do you know that the evidence you are now giving is given on oath? Yes.
1624. And do you know all you are saying to be strictly true? Yes; it is strictly true.
1625. Have you ever been in service before? I was a dressmaker at one time, and worked in that capacity.
1626. Have you any references of good character? Yes; I have one, from a Colonel of the Permanent Artillery in Victoria.
1627. Have you any other references? I told Dr. Vause I would not take a reference from him.
1628. Why? Because it would have been no use to me, as I never intended to go into a lunatic asylum again. I had quite sufficient experience there.
1629. Were you asked to sign a book when you left the institution? Yes; I told him I would not sign. He refused to pay me my month's money.
1630. Why did he refuse? I don't know.
1631. Did he ever pay you? Well, I summoned him and got it.
1632. Summoned him where—in one of the Police Courts? Yes; I summoned him to appear at Newtown Court.
1633. Did he appear at that Court? No; he sent the money without appearing.
1634. Early in the month of January, 1894, was there a patient, Case No. 17, in No. 1 ward? Yes; she was never in No. 2 ward.
1635. Was she a private paying patient? Yes.
1636. How long was it before she was taken from the private paying patients and put among the Government paying patients? She never was exactly with the Government patients and put in the single rooms as they were.

1637. Was she an excitable woman? Yes; a very excitable woman.
1638. Was her ailment of such a character that you think she ought to have been put in one of those single rooms at night? No; not generally.
1639. Was she placed in one of the single rooms? Yes; she was in the institution before I went there, and she was put in one of the single rooms when I was there.
1640. When these patients were put in those rooms was the window or slip of a window, as you call it, at the back of the building, opposite the door, pulled up in the morning? The rule was that directly the patient was put in the cell the shutter was closed, and was never raised again till the patient came out again in the morning.
1641. Therefore would the room with the shutter closed be dark? Yes; it would be both dark and close.
1642. Was there another window in these single cells over the door, as well as opposite the door? No.
1643. Were windows being put in these rooms over the doors before you left? No.
1644. When case No. 17 was put in that room you refer to did she get any bedding? Yes, she had a straw mattress.
1645. Similar to the others you have described? Yes.
1646. Had she any other covering? No.
1647. Who put her in that room? Another nurse put her in there on the matron's order.
1648. Was she, as well as others, put in there between 5 and 6 at night? Yes; if any of the patients became at all noisy they were locked in these rooms.
1649. Were her clothes taken away from her? Yes.
1650. Did you put some patients in these rooms yourself? Yes.
1651. Did you take their clothes away from them in obedience to the orders of the person in charge for the night? Yes.
1652. Did you take your orders from the matron or the head attendant? The matron was always supposed to give us our orders.
1653. When you put patients in these rooms, were there any utensils left there for their convenience? No, I never saw any there at this time; but lately I believe some have been placed there.
1654. Do you mean that they have been placed there since Case No. 1 was brought before the public? Yes.
1655. But I am talking about January last; were there any there then? There was no utensil at all.
1656. Did you ever see an indiarubber utensil in these rooms? No, not up to the date you name.
1657. Are you satisfied that during your term of office you never saw any utensil of any kind in any of these rooms? No.
1658. Do you also mean to say that you never saw any covering for the convenience of the patient? No; I only saw the bags in which the straw was put.
1659. Did you never see any canvas coverings? No, it was coarse ticking. I think Case No. 1 was the first to have canvas.
1660. Did Case No. 17, object to go into these rooms? Yes.
1661. Was she left there without any clothing from the time she was put in at night until 7 o'clock in the morning? Yes.
1662. Do you say of your own knowledge that no attendant would go round to look at these patients at night-time? No, never.
1663. Did you ever hear tell of case No. 17 having a fit and causing a great noise? No.
1664. Was there any special occasion on which she made a great noise? No; she did not make a great noise; she was only saying her prayers.
1665. Did you ever have any occasion to take her out of this single room, put her near the fireplace, and then send for Dr. Vause? No; not at night-time that I remember.
1666. Did you hear of this woman badly hurting herself? Yes; she used to frequently until she made herself black and blue. When no one was looking after her at times she used to knock herself about terribly.
1667. In the night-time did this happen? Yes; and in the day-time too, if no one was looking after her.
1668. Do you know if any nurse complained to Dr. Vause about this woman injuring herself? Yes; I think there was some complaint, and some of the nurses were going to write to Dr. Manning about the case on the very night she died.
1669. Did she die there then? Yes.
1670. Who was going to write? I think Josephine Mackay and another nurse were about to sign a petition to Dr. Manning complaining how this woman was allowed to hurt herself.
1671. Do you know if they did so? I do not.
1672. Do you know why they did not? No; I don't.
1673. Are you aware that while you were at the institution there were certain gentlemen, officials of the Government, whose duty it was to visit and inspect, and see that the working of the place was properly carried out? Yes.
1674. Do you know who these visiting doctors were? Yes.
1675. Were there there any alterations made in the conditions of the patients when their friends came to visit them? Yes.
1676. Were similar alterations made when Dr. Manning or the visiting doctors came on official inspections? Yes; we always got twenty minutes or half-an-hour's warning, and always had everything prepared when they came.
1677. As soon as you received this warning, what did you do? We used to make up the beds, change the patients' clothing, and make the best of everything.
1678. Did you not make any complaint about this state of things? Yes; I complained to Mrs. Gilchrist about it. I did not approve of such proceedings.
1679. So that when these visiting doctors reached the institution, did you go to extra trouble to make things more presentable? Yes.
1680. Who told you to do so? The matron would give us instructions to make these preparations. She would say, "Go ahead, make haste and get things ready, the visiting doctors are here."
1681. Were these the instructions you received on these occasions? Yes.
1682. You have told us of case No. 17 being bruised and injured;—can you tell us of anyone else who was neglected? Yes; there was case No. 12, who was not looked after properly. There was also case No. 18, who died there.

Maggie  
Macleod.

14 Nov., 1894.

Maggie  
Macleod.  
14 Nov., 1894.

1683. Did Case No. 18 die there then? Yes.
1684. Was she in one of the single cells, and subsequently died? Yes; she was a sick patient, and she died in one of these cells.
1685. Was she very ill? Yes.
1686. Was anyone watching with her the night she died? Yes; the night she died Josephine Mackay was put in with her.
1687. When she died was Miss Mackay with her? I do not know; she was a patient who had been sick for some time.
1688. Do you think that the food was sufficiently nourishing? No; the milk was half water, and sometimes there was no such thing as fresh milk to be had. Condensed milk was used every day.
1689. Supposing a person in your charge were taken sick, would you report the circumstance to the matron? Yes; always.
1690. You would not report it to Dr. Vause then? No.
1691. In your experience did Dr. Vause come to see any of the patients on special occasions? No; he never came to see them except on his daily rounds. He just made his proper round, and these were the only times that he would see the patients.
1692. Did he make up the medicines for them? I never saw the patients get any medicine except sleeping draughts.
1693. Do you mean by that medicine made up for the purpose of sending people to sleep? Yes.
1694. If one of the patients under your charge, for instance, fell sick during the day with pains in her stomach, or sickness of any kind other than their mental malady, would you report the fact to the matron? Yes.
1695. Would she then report it to Dr. Vause, and get a prescription and have the necessary medicine made up? I have never seen any prescriptions made up.
1696. Concerning these sleeping draughts, have you given some of these to the patients yourself? Yes.
1697. Did you receive them from the matron or from Dr. Vause? From the matron.
1698. Did the patients like to take them? I do not think they did.
1699. Why? I believe they had an idea they did them no good, and I thought it was not the right thing that they should take them.
1700. Did any of these patients complain of feeling ill after having taken these draughts? Yes.
1701. Who did so complain? Case No. 18 used to be terribly bad the next morning after taking these draughts.
1702. Do you know whether Case No. 19 is at the asylum now? No; she is not there now.
1703. Was she there in your time? Yes; she was.
1704. Was she placed in one of these single rooms? No.
1705. Was the same kind of treatment meted out to her as to some of the other patients you have described? No; she used to get the best of everything there was to be had. She wrote to the doctors, and complained about the food. She abused the food that was given to her at first, and abused Dr. Vause about the food, and then she received better meals and more attention.
1706. Who did she complain to? She complained to the visiting doctors and to Mr. Robertson, one of the official visitors, but I do not know whether she made any complaint to Dr. Manning or not.
1707. Do I understand you to say that she is not in Bayview House now? Yes; she has been removed.
1708. Was she a Government patient? Yes.
1709. Did you hear her complain to Dr. Vause? Yes; she kept her dinner and showed it to the doctor, and told him it was not fit to eat, or something, and he told her she was a liar.
1710. Do you say that the patients were not properly dressed, except on special occasions? No; they were not.
1711. Did the Government patients wear stockings? No; they had none to put on. That is, the majority of them had not.
1712. Did some of them wear stockings without feet? Yes.
1713. Did the nurses sometimes attempt to repair these stockings to try to make them more comfortable? Yes.
1714. Do you say that they had stockings without feet in them? Yes, often; and then they would try to stick the tongue of their boots in the openings so as to hide their bare feet.
1715. Why did not you complain directly to Dr. Vause about these matters? I always complained to the matron; that was what I considered to be my duty. I did not complain to the doctor because he never spoke to us at all.
1716. Do you know of any other attendant having complained to Dr. Vause? Yes; I have heard of attendants complaining.
1717. And what has happened to these attendants when they have so complained? They were discharged from the institution.
1718. Do you think that if you had reported direct to Dr. Vause you might have been discharged too? No, that did not deter me, for I did not care whether I was discharged or not.
1719. About the 18th of August of last year did a female patient, Case No. 20, break her arm? Yes.
1720. Did she break her arm while she was confined in one of these single cells? Yes, she did.
1721. Was she put into this cell at 5 o'clock on the night on which her arm was broken? No, not on this night. She was not put in the cell till 10 o'clock at night. Up to that hour she was in No. 1 of the Government wards. Earlier in the evening she was noisy and was annoying other patients, and because of her troublesomeness I and another nurse put her in the cell. She was becoming such a nuisance that I asked this night-nurse what ought to be done with her. When I say night-nurse, I mean the nurse who was supposed to sleep in the room. I had to take her place, and as this patient was getting worse in her behaviour, I called to this night-nurse to know what was to be done with her. I got no answer, and ran out to No. 2 ward, and when I returned the woman was fighting with the other patients. We took her out and put her into the single room for safety's sake.
1722. And was that about 10 o'clock at night? Yes.
1723. Was her arm broken then? No.
1724. Did you leave her in that single cell all night? Yes.

Maggie  
MacLeod.  
14 Nov., 1894.

1725. When was she taken out of this room? About half-past 5 or 6 o'clock on the following morning.
1726. Was anybody in the room with her? No.
1727. What was her condition when she was removed from that room? The woman was all over blood. There was something the matter with her arm. I went to the room where she had been sleeping, and the piece of blanket used was covered with blood, and so was the bed.
1728. Might she not have broken her arm, as far as you know, half an hour after she was placed in the room on the previous night? Yes.
1729. Might she not have broken her arm half-an-hour before she was released in the morning? Yes, or at any time between the hours she was locked up and the time she was taken out. There was also blood on the walls as well as blood on the bedding in the room.
1730. From the time you put the woman in the cell at 10 o'clock the previous night until she was taken out the next morning did anyone see her? No, not as far as I know.
1731. Was there any inquiry held into this accident? Yes.
1732. Who were present? Dr. Manning, Dr. Huxtable, and Mr. Nugent Robertson.
1733. Were any of the nurses of the institution examined at this inquiry? Yes.
1734. Were you examined there? Yes.
1735. Did you give the same evidence then? In substance the same as I give to you now.
1736. Did this board of inquiry examine any of the patients also? Yes.
1737. Who were examined? Two patients, Case No. 21 and Case No. 16.
1738. Is it the custom to ask patients to give evidence? I do not know; I never heard or know of Dr. Vause asking patients about anything that occurred.
1739. Was it customary to put Case No. 12 in a single cell at night? Yes.
1740. Was she an excitable patient? No; she was always crying and moaning and groaning about her home. She was not violent in any way.
1741. Would you have been frightened to sleep in the same room with her? No; I should not.
1742. Did you ever hear of her making any attempt to injure herself or anyone else? No.
1743. Was she put in to sleep on the same kind of straw and mattress? Yes.
1744. Was she ever put in with the Government patients? Yes; she was down at the Government end for a few days.
1745. Did this woman ever take any drugs or sleeping draughts? Yes, always at night-time.
1746. Did she not sleep at night? I do not know. I never slept in the same room with her.
1747. Do you say that you always had to give her sleeping draughts, which had been made up by Dr. Vause? Yes.
1748. Did she ever refuse to take them? Yes.
1749. What did you do then;—would you force them down her throat? Yes.
1750. Was her father in the habit of coming to see her? Yes; I believe he came nearly every day.
1751. When her father came to see her did the interview take place in a better room than the one in which she slept? Yes.
1752. Did she wear the same clothes during the interview as she usually wore at other times? No.
1753. Would the clothes be changed then? Yes.
1754. In your opinion, would the father go away under the impression that he saw her in the room she slept in? Yes.
1755. After the Case No. 1 exposure was this particular patient put to sleep in a different room? I think that just after the last time that her father came to see her she was taken up to No. 1 ward, and slept there for two nights; then she was again sent to No. 2 ward, and a few days after that she went home.
1756. Did you sleep in the square room, which is now the box room? Yes.
1757. Before you left the asylum were there a lot of new sheets made? Yes.
1758. Were there new clothes made for the patients? Yes.
1759. And speaking generally, are things at the asylum altogether different now to what they were just before this time? Yes.
1760. Who was sleeping in that small square room? Four or five patients.
1761. Is there a small square room where the pans used in the water-closets are kept? I do not know.
1762. Do you know if there are any patients sleeping in such a room? I do not know; but I know that patients sleep in the room next to the closet.
1763. Do you mean to say that every night a patient is put into each of these single rooms without an attendant? Certainly.
1764. And how many of these single rooms are there? I think there are twelve single rooms.
1765. And every night are the same patients put in these rooms? Always.
1766. *President.*] Referring to this Case No. 20, do you remember the night-nurse taking her to the single room and putting her in there? Yes.
1767. Do you know by whose authority? I do not know.
1768. Do you think the night-nurse had seen the matron on the subject? She might have; I do not know.
1769. Do you think that the nurse put her in that room on her own authority? I think she would have asked the matron.
1770. Do you think the matron would then have consulted Dr. Vause? I cannot tell.
1771. Do you remember giving evidence at the departmental inquiry? Yes.
1772. Did you have an opportunity of speaking to the doctors then? Yes.
1773. Did you make any general complaint to them then and there? No.
1774. Why did you not do so? I do not know.
1775. On the occasion of the visiting officials attending the asylum was there any opportunity of speaking to them? No.
1776. Did the visitors ever speak to you at all? No.
1777. Did they simply go through the different wards without speaking to the nurses? Yes.
1778. Did they ever speak to the patients? No; they would shake hands, pat them on the shoulder, pass an ordinary compliment, and then walk on.
1779. Do you think that any of the patients were sensible enough to make complaints? Yes.
1780. In your hearing were any complaints ever made by the patients to the visiting doctors? Not that I can recollect.

Maggie  
Macleod.  
14 Nov., 1894.

1781. Do you not know that the object of the official inspections is to see that all things are going on as they should go, and to find out if there are any complaints to be made? Yes.
1782. And do you know if that opportunity was ever availed of by the patients? No; I do not know.
1783. Would you not have liked to have spoken? Yes.
1784. Was it because you dare not speak that you remained silent? Yes; well not exactly dare not, but I did not like to.
1785. Had you a feeling of fear to do so? Yes; we were afraid to do it.
1786. In every case did you receive ample notice that the official visitors had come to the asylum? Yes.
1787. On every occasion that you remember? Yes, on every occasion.
1788. On no occasion while you were connected with the institution did the visiting doctors or Dr. Manning come straight into the wards and see the patients without being announced? No; I am quite certain and sure that they never did.
1789. In other words, then, do you mean to say that the place was fully prepared for them? Yes.
1790. Do you mean by that that the beds were put in order—that is, sheets were put on the beds and things were fixed up generally? Yes. As soon as it was known that the doctors had arrived the sheets were put on, and they were taken off again at about 4 o'clock in the afternoon, but they were not put on when the board of doctors did not come.
1791. Referring to Case No. 17, were you present when she had a fit? I never knew that she had a fit.
1792. Did she meet with some accident by striking her head against a fender? Yes.
1793. Was that in the room she was sleeping in? No; that happened in No. 2 ward. She fell and struck her head some time in the day.
1794. Did Dr. Vause come to see her on this occasion? No, not specially. He only saw her when he came on his usual rounds.
1795. Was he specially sent for? No.
1796. In the case of the broken arm, was Dr. Vause sent for then? Yes, at once.
1797. Did he come without delay? Yes.
1798. Was he always attentive in the case of an accident or when a patient was ill? I never saw him come to see the patients only on his usual rounds.
1799. Did you ever see him attend to any special case? No.
1800. Did you have any impression about Dr. Vause's sobriety or otherwise? No.
1801. Did you ever see him under the influence of spirits or intoxicants? No; I never saw him drunk in my life.
1802. As far as you know then, do you think Dr. Vause came to his patients as quickly as he could in cases of emergency and pay the necessary care and attention to them? Yes, as far as I know.
1803. Do you know a man named Henry Gearey? Yes.
1804. Have you had any communication at all with him? Yes: I think I have told him what I thought about the place.
1805. Did you know him before he went to the institution on a certain occasion? Yes.
1806. How did you come to know him? I had a letter from him.
1807. Have you that letter with you? Yes. It reads as follows:—

Miss Macleod,

Brisbane-street, Sydney, 18 July, 1894.

I should be glad if you will call upon me at your earliest convenience. I am always at home between 1 and 2, and will keep any appointment that you may make. My house is next door to Mark Foy's in Oxford-street.

Yours, &c.,

HENRY GEAREY.

1808. Did you receive this letter after you left the institution? No, before; but after the removal of Case No. 1.
1809. Did you tell Dr. Vause that you had received this letter? Yes.
1810. Did you see Gearey at his house afterwards? Yes; I went to see him and had a long conversation with him, and I told him everything that I knew, which amounted to much the same as I have told you to-day.
1811. *Dr. Carran.*] While you were at the institution did you give this information to Gearey? No; I did not do so while I was in Dr. Vause's service.
1812. How soon after you left was it when you saw Mr. Gearey? Two days afterwards.
1813. If you were so willing to give the information to Gearey, why did you not tell Dr. Vause of the things that came under your observation? Because I knew he would not listen to me, and, again, because I thought he did know all that was going on.
1814. Are you of opinion that he did know all that was going on? Yes; I believe he knew as much as I could tell him.
1815. Did you try to tell him of these things on the day that you left? No; I had no chance to tell him, and he knew it too.
1816. Was it a well known fact that he was perfectly well aware that the food was not what it should be, that the patients were imperfectly clothed, that the regulations and rules for the general good management were not obeyed, and that patients were placed in these dark cells; was he aware of all this? Yes.
1817. Do you think, then, that these irregularities were included in the scheme of management of the institution? Yes, certainly.
1818. *Dr. Manning.*] Did you go to Gearey's while you were in the service of Dr. Vause? Yes; I went there to tea one afternoon, but Mr. Gearey was not at home on that occasion.
1819. Did you see him on that occasion? No; and I took another nurse with me so that I should have a witness to all I should have said if I had seen him.
1820. Who was that other nurse? Jessie Urquhart was with me at the time.

[Witness withdrew.]

Rose MacMahon sworn and examined.

Rose  
MacMahon.  
14 Nov., 1894.

1821. *President.*] Were you employed for some time at Bayview House? Yes.
1822. For how long? Between sixteen and eighteen months.
1823. When? From Eight-hour day in 1892 until the beginning of February in 1893.
1824. By whom were you engaged? I was engaged through Mrs. Blue's office in Sydney, and then I went to Bayview House and saw Dr. Vause.
1825. Did he show you a book containing printed forms which made known your duties? Yes.
1826. Did you sign the book? Yes.
1827. Did you ever receive a printed paper containing the general rules and instructions for attendants and others? Yes.
1828. Did you ever read that paper? Yes.
1829. Did you receive any instructions except those stated on that paper? No.
1830. Were all your duties stated there? Yes.
1831. Did you make yourself familiar with what that paper contained? Yes.
1832. When you left Bayview House did you sign a paper stating that the institution was well regulated and so on? Yes.
1833. Did you sign it? Yes, I did.
1834. Did you attend to the female patients on the Government side of the institution? Yes.
1835. Did you have every opportunity of seeing what kind of food they had or was provided for them? Yes: I was in charge of the dining-room.
1836. What was the character of that food? I always found that it was fairly good.
1837. Was there a regular change of food day after day, or did you have the same kind over and over again? We generally had a change.
1838. Do you think a sufficient change of food was given? Yes, I think it was.
1839. Did you have anything to do with ordering the food? Yes.
1840. Did you remove it from the kitchen and distribute it to the patients? Yes.
1841. Did they complain about the food? At times they did.
1842. Do you think they had any grounds for making complaint? No, I don't think so.
1843. Did you, as an attendant, have the same diet as the patients? Not exactly the same; sometimes we had it a little different.
1844. Could you have provided little extras for yourselves if you had wanted, such, for instance, as tea, or cocoa, or coffee, or any little delicacies? Yes, at times we did so. I have done it occasionally.
1845. Coming to the bathing of the patients;—how often did they have a bath? Once a week, on Saturdays.
1846. Were there any very dirty patients? Yes.
1847. How did you manage with them? If they required an extra bath during the week we used to bath them and keep them as clean as it was in our power to do.
1848. Was there always a sufficient supply of clothing for those patients? No, not always.
1849. In what were they deficient? In stockings, dresses, chemises, and so forth. There was nearly always something wrong with these articles.
1850. Did you ever complain to the matron of this insufficiency of clothing? Yes, I complained to Bridget Morrissey.
1851. Was the deficiency made good? She used to get us some clothes out of the store.
1852. Was there an adequate supply of clothing there: could you, for instance, always get a pair of stockings? No, not always.
1853. Supposing a patient was very destructive, and destroyed a good many clothes, could you always get that clothing replaced? Not always from the store, but we could get some sometimes from the laundry.
1854. Speaking generally, do you think there was a sufficient supply of clothing? I do not consider there was a sufficient supply.
1855. If you made a demand for extra clothing could you get it? No, not as much as was required.
1856. Supposing visitors came to see patients, did you make any change in the clothing of those patients? Yes, we always did.
1857. Where did you get the additional clothing then? From the store if there were any there. Sometimes some of the clothing would not be fit to use, and then we would have to do the best we could.
1858. Is your general opinion, then, that the food was sufficient, and the clothing inadequate? Yes.
1859. Did you know when visitors were coming to see a patient? Yes; we always had fully a quarter of an hour's notice that visitors would arrive.
1860. How was that notice given to you? Dr. Vause would send word.
1861. How would you know when the visiting doctors came? One of the nurses or the matron would inform us that the doctors had come.
1862. Suppose that the visiting doctors came very suddenly, would they walk direct to the wards as soon as they reached the ground;—might they not do this sometimes? They never came on us unawares while I was there.
1863. Do you remember a piece of paper being handed round from Dr. Vause giving you notice that the visiting doctors had arrived? I think a nurse told me that Dr. Vause gave a piece of paper to Josephine Mackay saying that the visitors had come.
1864. Was that a usual thing? We were always informed when the visitors came, but I think on this particular occasion the piece of paper was sent so that we could get the patients ready.
1865. Do you know the single rooms on the female side of the institution? Yes.
1866. When women were placed in these single rooms was their clothing taken off? Yes.
1867. And was some straw put into the room? Yes.
1868. Was bedding supplied? Only one patient had loose straw; the others had a straw mattress and a kind of canvas rug. These were put in all the single rooms on the Government side.
1869. Did the patients ever take the straw out of their mattress, and throw the canvas covering on one side? Perhaps so occasionally.
1870. Did you ever notice particularly if they did so? No; they nearly always laid themselves down on the mattress and kept themselves covered.
1871. Did you ever put the patients in these rooms? Yes.

Rose  
MacMahon.  
14 Nov., 1895.

1872. Did you take the clothes entirely off the patients when they were put in these rooms? Yes; off the Government patients.
1873. Did they ever wear chemises or night-dresses? No; there were only one or two who had a night-dress. One was allowed a night-dress, and another a chemise.
1874. Were there any utensils in these rooms? Yes; in two of the rooms, but only two.
1875. How many rooms were there? Nine or ten, I think.
1876. And in only two were there any utensils? Yes, in only two.
1877. Were the patients put into these rooms at 7 or 8 o'clock? Yes.
1878. Who attended to them after that? No one at all, unless they made a noise.
1879. What happened then? A nurse would go to them to see what was the matter.
1880. Would she go there from the bedroom? Yes.
1881. Were the nurses sufficiently near them to hear a noise if one was made? Yes.
1882. Do you ever remember any particular disturbance amongst the patients in these rooms? No.
1883. Was there any provision for making a warm drink such as milk, or tea, or cocoa during the night? No, none.
1884. Suppose you wanted to get a cup of tea for yourself if you were on night duty, was there any place where you could obtain it? No; the kitchen was locked up, and we were not supposed to go near the kitchen.
1885. Suppose you wanted a warm drink or, say, a cordial in a case of emergency, how would you manage? Go and ask for the key of the kitchen and get it.
1886. Was there any actual provision for getting things at night? No.
1887. Were the patients in these dark rooms very troublesome? No; one was troublesome at times. That was Case No. 22.
1888. Was she in the habit of screaming at night? Yes.
1889. Did you ever get up to see what was the matter with her? Yes, frequently.
1890. Did you look through the observation hole to see what was the matter? Yes.
1891. Did anyone else look after her at night? Only the nurse who happened to be on night duty.
1892. Was there any special night duty nurse? No.
1893. Did you ever see Dr. Vause go round the buildings at night-time? On very few occasions; but this was not of frequent occurrence.
1894. Was a clean bed always put into these rooms for the use of these patients? Yes.
1895. Do you think there was always sufficient bed covering;—did they ever complain of feeling cold? They did not complain of the cold, but I do not consider the canvas rugs with which they were supplied sufficient covering for them.
1896. How were these canvas rugs made? Two pieces of canvas sewn together.
1897. Were there any blankets stitched to these canvas rugs? I think so on some, but they were never used in the single rooms. They were merely kept for show.
1898. Where were they kept for show? In the single rooms in the day-time. They were taken out at night in nearly every case.
1899. Have you seen Dr. Vause go about the institution a good deal? Yes; during his usual rounds.
1900. At what time does he generally make his rounds? About 12 o'clock in the day.
1901. Have you seen him before or after that, as a rule? Very seldom.
1902. Would he ask you about the conduct of the patients? He never asked any questions of the nurses.
1903. When making his rounds was he accompanied by anyone? Yes, by the matron.
1904. Did you ever see Dr. Vause examine the Government patients to see if they were going on all right? No, unless something was pointed out to him by the matron.
1905. Have you seen him do this occasionally? Yes.
1906. What was your general impression concerning the management of the institution;—were you satisfied with it? Yes, I was, on the whole.
1907. Have you had any other experience in this kind of work? No; never before nor since.
1908. Whenever the official visitors came was there timely notice given of their arrival? Yes; a quarter of an hour's notice, and then the patients were made tidy.
1909. Were the clothes taken off the patients again after the doctors had gone? Yes, at once.
1910. *Dr. Garran.*] Did you assist sometimes in bathing the patients? Yes.
1911. In the winter-time was the water made warm? Yes.
1912. Where did you warm the water used for bathing purposes? In the bath-room.
1913. Were the patients ever bathed in cold water? No.
1914. In the wards, not in the single rooms, did the patients sleep without sheets on the beds? No.
1915. Do you say that generally in the wards the patients had sheets? Yes.
1916. Government patients as well as private patients? Yes.
1917. Did they also have blankets? Yes.
1918. Always? Yes; but it was only in the dormitories that there were sheets and blankets. In the single rooms they had the canvas rugs.
1919. Did they ever complain about the rooms being cold? No.
1920. Were any of these canvas rugs lined with blanket? The majority had no lining. There was no lining in the blankets used in the single rooms.
1921. Did the patients who slept in these rooms have any other covering at all? No; there were two patients in the single rooms who had some kind of bed-clothes.
1922. Were these two then kept better than the others? Yes.
1923. When the visiting doctors came round, did they ever ask questions of the nurses relative to the condition of the patients or the working of the institution? Not that I know of.
1924. Were you ever asked any question by the visiting doctor? No; not unless I took the matron's place.
1925. Was it only on these occasions that you had any opportunity of speaking to the visiting doctor's? Yes.
1926. Did you ever call their attention to anything you thought was wrong? No.
1927. Do you mean to say that if you wanted hot water at night for making tea or any warm drink, or for any other purpose, that you could only get it by going to the kitchen? Yes.

1928. Was there no gas-ring? No; there was gas in No. 2 bath-room, but it was not lighted. There was some arrangement there for heating the water of the bath.

1929. Supposing there was an urgent case, and you were compelled to get warm water or to make a warm drink, such as a cup of tea, how could you do it? Only by lighting the fire in the kitchen.

1930. *Mr. McGowan.*] Had you any references before you went to Bayview House? No, not from Sydney.

1931. Was that the first place at which you went to work? Yes, in Sydney. I have been at work in the country, and I had references from country employers.

1932. Why did you leave Bayview House? I was discharged.

1933. Did you get a reference when you left? Yes; but it was of no use to me.

1934. Why was it of no use. Because it said almost nothing. It just merely said that I had been engaged in the institution, and that while there my conduct had been good.

1935. Who gave you that reference? It was given to me by Mrs. Gilchrist, but it was of no value.

1936. Did you sign a book saying that the treatment of the patients was satisfactory before you left the institution? Yes.

1937. Was the clothing of the patients changed when the visiting doctors came to the institution? Yes.

1938. Was the bedding in these single rooms altered? Yes; the canvas rugs were put there for show, but they were never used at night.

1939. Do you think that was satisfactory conduct? No, I do not.

1940. Did you ever hear any moans from these single rooms during the night time? Very seldom.

1941. Did anyone—I mean a nurse or attendant—go to the patients in these cells from the time they were put in at night until they were taken out in the morning? Well, we are not supposed to do so, but sometimes we would do it for our own free will.

1942. Do you know if any single cells were furnished? Yes; there was a mattress filled with straw, with a kind of canvas quilt.

1943. When you put these patients into these single rooms did not take their clothes out with you? Yes.

1944. Did you ever know of any utensil being left in these rooms? No, only in two rooms, and they were where there were double bedsteads and better bedding.

1945. What time were these patients put into the cells at night? About 6 o'clock, and they were taken out at about 6 o'clock in the morning.

1946. Did you always know when visitors were coming to see the patients? Yes, we always knew.

1947. Would you change their clothing then? Yes.

1948. And after the friends had gone away were the clothes changed back again? Yes.

1949. Were the patients bathed every Saturday? Yes.

1950. Do you remember the accident happening to Case No. 20? No; I left the institution in February before it happened.

1951. Do you say that you could not get a cup of tea or any other necessary nourishment at night-time without waking up and getting the key where these necessary articles were kept? I could not.

1952. Did any of the visiting doctors or Dr. Vause stay at the institution during meal-times? Yes; on two occasions they stayed to dinner.

1953. Did you notice any difference in the food then? Yes; there was a difference when the doctors remained.

1954. What was the difference? There was more meat and potatoes, and of better quality.

1955. Did you ever hear the patients make any remarks on the improvement of the food on these occasions? Yes; they used to say they wished the doctors would come oftener, as they then got a better dinner.

1956. *Dr. Manning.*] If we have been told that the patients in the dormitories never had either sheets or blankets on the beds, is that correct? No, not that I know of. There might be exceptions with very dirty patients.

1957. As a rule, have the patients both sheets and blankets? Yes.

[Witness withdrew.]

Lizzie Verity sworn and examined:—

1958. *President.*] Were you employed for some time at Bayview House? Yes.

1959. What position did you occupy there? I was an attendant.

1960. On what side of the institution were you employed? For five weeks I was in No. 1 ward. I was in another part of the institution for six or seven months.

1961. When did you join the institution? I went there in January, 1894, and remained until about the end of September.

1962. Why did you leave Bayview House? I was dismissed from there.

1963. Did you sign a book or a certain document when you were engaged? Yes; I was engaged by the lady superintendent, Mrs. Gilchrist; she asked me to sign a book or some paper.

1964. Did you sign it? Yes.

1965. When you left the institution, did you sign another document? No, I did not.

1966. When you were originally engaged, was there handed to you a printed copy of the general rules and instructions to be observed in the performance of your duties? Yes.

1967. Did you make yourself familiar with these rules and instructions? Yes.

1968. While you were at Bayview House, had you much to do with the sleeping arrangements of the patients? I used to sleep in a dormitory with some patients.

1969. Was your attention called to a number of separate cells in which patients were placed to sleep? Yes, I know them.

1970. Have you put patients in these rooms yourself? Yes.

1971. Have you locked them up for the night and left them there? Yes.

1972. Was there any night attendant to look after the requirements of these patients? No, not at that time.

1973. Has there been any change made lately;—since the complaints in connection with Case No. 1? No; I do not think there has been any night attendant appointed. When I went there first

Rose  
MacMahon.  
14 Nov., 1895.

Lizzie Verity.  
14 Nov., 1894.

- Lizzie Verity first there were no night attendants at all, but I think there has been some change made since the affair to which you alluded.
- 14 Nov., 1894. 1974. What change has been made? One of the attendants was relieved from the day work and we that is, the other attendants—did her duties among ourselves. The one relieved had to do a certain amount of work in the morning, and then at night she would take duty. This change was made after the matter in regard to case No. 1 occurred. We took night duty in turns.
1975. When the patients were put in these single cells at night, was it the custom to take their clothing away from them? Yes.
1976. Were the patients all stripped? Yes.
1977. Were they supplied with night dresses? No.
1978. Were they supplied with chemises? No.
1979. What bedding was supplied to these patients? That depended on who the patient was, or what the patient was. In some cases a straw mattress was supplied, and in some cases straw.
1980. In the case where a straw mattress was supplied, would the patient use it? Sometimes. Sometimes they would tear the mattress up and cover themselves with the straw. In two cases that I know, they tore them up to ribbons.
1981. Was there any provision made when you first went to the institution for supplying the patients at night, when necessary, with hot coffee, tea, or milk, or any warm drink, or any other kind of refreshment, during the night-time? No; none at all.
1982. Had you any opportunity of making a cup of coffee, tea, or cocoa for yourself if you wanted one during the night-time? No, sir.
1983. What was your impression concerning the character of the food supplied to the Government patients? In regard to the Government patients, I do not think the food was sufficient in quantity, and the clothing was very bad.
1984. Was there a sufficient supply of clothing? No; not all the time I was there. When I went there, there was not a sufficient supply of clothing for the patients. Perhaps some would have a dress and no skirt, and perhaps some would have a skirt and no dress. If a patient was sick in bed her clothes would be taken and used for other patients who were up and about.
1985. Was that a common occurrence? It was when I went there first, and it continued to be so until the time when Case No. 1 was taken away.
1986. Is it your opinion, then, there was not a sufficient supply of clothing? There was not sufficient clothing.
1987. Were a good many of the patients of dirty habits? Yes; to keep them clean.
1988. To keep them clean would it require a frequent change of clothing? Yes.
1989. How often were the patients bathed? The rule was once a week, but some would be bathed at other times. I could give a patient a bath at any time if she wanted it.
1990. Was there any store in which the clothing was kept? Yes.
1991. Could you get clothes from there for destructive patients? Yes, when there were any to be had, and when we could not get any from the store we used to go the laundry and get them. There were times when there was no clothing in the store. There is a store now, and more clothing in it than there used to be.
1992. Are things much changed now, compared with the time of which you speak? Yes; there is a great deal of change. Blankets and rugs have been supplied, and new sheets and clothes have come in.
1993. Did this change come about immediately after the removal of Case No. 1 from Bayview House to Callan Park was made public? Yes, immediately after that. Before then, if I went to the matron and asked her for extra clothing or anything else, she used to tell me that I could not get it; but directly after the case No. 1 was taken away the matron told me to ask for anything in reason and I would get it.
1994. Has there been any change made in the buildings themselves since May last? Yes; they have been painted up, and the dormitories have been improved.
1995. Have you ever had any opportunity of seeing single cells in the morning after the patients have been taken out? Yes.
1996. In what condition were they;—where they wholesome and clean, or in a state of filth? Well, they were not very nice.
1997. Were any utensils in those rooms? Yes.
1998. Were there any beds? No; it would have been useless to have put them in.
1999. How many utensils were in these ten or eleven single cells? I am not sure, but I think there were five altogether. There were three of india-rubber and two of enamel.
2000. Were those patients ever visited by their friends? Yes, occasionally.
2001. When the patients were so visited were they taken in a disreputable condition to see their friends or relations? No; their clothes were changed always. A decent skirt would be put on a patient if she possessed one; and if she did not have one of her own, better clothing would be taken off one of the other patients and put on that patient who would be going to see her friends.
2002. Supposing the official visitors made an ordinary inspection of the asylum, did you always get a timely intimation of their arrival? Yes; a nurse or someone would come into the wards in a minute, and let us know that the doctors were there; then the attendants in the dormitories would come and assist in getting the patients ready and everything in order.
2003. So that immediately you heard the whisper that the doctors had come, did you all set to work to get the patients into better condition, and make things generally presentable? Yes.
2004. How long a time elapsed between the arrival of the doctors at the institution and when they made their inspection of the patients? About a quarter of an hour.
2005. Did you ever know of an official visitor proceeding direct to the ward without anyone being aware of his presence? No; I have known an official visitor come as far as the verandah without it being known that he was present.
2006. Who was that visitor? I do not know.
2007. When the official visitors came round did they ever speak to you or any of the nurses? No; they never spoke to any of the attendants.
2008. Did not any one of them ever speak to you about the state of the clothing, or anything else? No.
- 2009.

2009. Did the official visitors, when making their inspection, examine the clothing worn by the patients? Lizzie Verity. No; they would merely walk through the wards and along the verandah.
2010. When did you leave the institution? In September last. 14 Nov., 1894.
2011. Before you left did you see a complete revolution in the management of the place? Yes, I did. Immediately after Case No. 1 was removed there was a great change; everything was quite different.
2012. At what time did Dr. Vause make his daily visit of inspection? About noon.
2013. Have you seen Dr. Vause visit the patients on other occasion besides when on his daily rounds? Occasionally—very occasionally.
2014. Did Dr. Vause always seem attentive to the patients—to their requirements, and so forth? Yes, I think so; if his attention was called to the patients he would attend to them.
2015. Otherwise, did Dr. Vause not attend to them? He used to make his daily rounds and see the patients then.
2016. *Dr. Garran.*] Did any of the patients sleeping in these solitary rooms ever complain to you about being cold? No.
2017. In addition to this straw of which you speak, were coverlets used during the night-time? Yes; they had small coverlets.
2018. How many? Two.
2019. Of what material were they—blankets? No; we could not call them blankets. I think the straw they used would be warm enough.
2020. Do you think the patients used the coverlets during the night-time? I do not know.
2021. After shutting them in these rooms at night did the matron or you pay them any visits? Sometimes we would look in, one or the other of us. I have looked in myself.
2022. Did you find the patients, then, all right and covered up with straw? Sometimes, and sometimes they would lie on it. They would please themselves.
2023. Did they ever complain to you of feeling cold? No, sir.
2024. *Mr. McGowen.*] Did you get any reference when you left Bayview House? No. Dr. Vause offered me one, but I refused it.
2025. Why did you refuse it? Because I did not like it.
2026. Were you asked to sign a book or a printed document, saying that during the time you had been in Dr. Vause's employment every consideration was paid to the care, comfort, and recovery of the patients in the establishment to the best of your knowledge and belief? No, I was not asked to sign such a book, and I would not have signed it if I had been asked.
2027. Did you get a reference, then? No, not from Dr. Vause; but I have references from previous employers.
2028. Who were they? I have a reference from Mrs. Massey, from Mrs. Carter, and Mrs. Hollander.
2029. Have you had any previous experience in lunatic asylum work? No, sir.
2030. Do you remember a patient breaking her arm? Yes.
2031. Do you know anything about that occurrence? Nothing beyond the fact that her arm was broken.
2032. Was that arm broken whilst she was confined in a solitary cell? Yes.
2033. Do you know at what time she was put in that cell at night? Yes; about 10 o'clock.
2034. Do you know at what time she was taken out in the morning? About half-past 6.
2035. When she was taken out, was it found that her arm was broken, that her body was covered with blood, and that there was blood on her mattress and bedding? Yes.
2036. Are you sure her arm was not broken when she was put in that room at night? Yes.
2037. As a matter of fact, could she not have broken her arm half an hour after she was placed in the cell, and thus have remained there all night with this broken limb? Yes.
2038. Or could she have broken it half an hour before she was released in the morning? Yes.
2039. Do you know if there was a night attendant on duty then? I think there was.
2040. Do you know if she went to look at the patients? I do not think she looked in when on her rounds.
2041. Previous to May last was it customary for a night attendant to see patients between the time they were placed in these solitary cells at night and taken out the following morning? No. Attendants did not see the patients after 7 o'clock at night, unless they were making a great noise, and if they were doing so we would give them a sleeping draught if we could get one.
2042. Supposing some other witness says there are only two utensils in these rooms, is that statement true? No; there are five—three of indiarubber, and two of enamel.
2043. While you were at the institution was an extra window put in these single cells? They were not there when I went there.
2044. What means was there of admitting light to these rooms? There was only a folding shutter in the wall opposite the door.
2045. As a matter of fact, have considerable changes been made in the institution since the 20th May last? Yes.
2046. Has additional clothing been supplied, including dresses for the patients? Yes.
2047. Was it the usual thing when friends came to see patients that the clothing of the patients should be changed? Yes.
2048. And if one patient had not decent clothes to put on for these occasions would the best clothing available be taken of the other patients and put on the patient going to see her friends? Yes.
2049. Did you see the patients wearing stockings without feet? Yes. Numbers of them like that; but I do not take much notice of that, for you cannot get some patients to keep their stockings on.
2050. *Dr. Manning.*] It has been stated in evidence that the patients in the associated dormitories never sleep in sheets, that the blankets are taken off the beds, and that the patients complained of cold at night;—is that so? The sheets are taken off, and I have heard complaints that the patients in the dormitories are not warm enough.
2051. Were all the sheets taken off the beds at night? Yes.
2052. Invariably? Yes; my experience was that the sheets were taken off. They were supposed to be put on the beds, but there were not a sufficient number.

[Witness withdraw.]

Annie Marshall sworn and examined:—

- Annie Marshall.  
14 Nov., 1894.
2053. *President.*] Were you employed on one occasion at Bayview House? Yes.
2054. Do you remember the date on which you were engaged? Yes; on the 3rd of March, 1894.
2055. How long did you remain? About six months, but I was only six weeks amongst the patients. The remainder of the time I was in Dr. Vause's private residence.
2056. By whom were you engaged? By Dr. Vause.
2057. Did you sign a book at the time of your engagement? Yes.
2058. Do you remember reading over a printed paper informing you of the rules and regulations, and the duties you were expected to discharge? I was given such a paper.
2059. Did you read it afterwards? Yes.
2060. Under what circumstances did you leave the institution? I could not agree with Mrs. Gilchrist, the lady superintendent.
2061. Did you resign your position in consequence? Yes.
2062. Did you get a certificate of character on leaving? Yes.
2063. Was it satisfactory to you? Yes.
2064. Did you sign a book when you left, saying that everything was carried on satisfactorily? I wrote my name on some paper which Dr. Vause handed to me; he said, "Put your name down, and I did so without reading the paper; I thought it was just a statement to say I was leaving the place.
2065. During the six weeks you were with the patients, in which part of the institution were you employed? I was in the bottom ward.
2066. What number of patients was there—twenty-eight Government patients? Yes.
2067. What was your impression as to the nature of the food supplied? It was rather poor, and always the same over and over again.
2068. Have you anything to say about the cooking? I think the meat was good, but it was spoiled in the cooking.
2069. Did the patients complain about this? Some of them did not know any better, and would eat anything.
2070. What was your impression about the clothing? The institution was very bare of clothing.
2071. As a matter of fact, was the clothing changed about from one patient to another? Yes.
2072. How was that? Because there was not sufficient clothing, and I used to say to some of the attendants, "Why don't you ask Dr. Vause for more clothes?" but they did not like to do it.
2073. Did you ever speak to the matron about it? I spoke to Mrs. Gilchrist once or twice, but she did not take any notice of what I said.
2074. When friends came to see the patients, was there a change made in their dress? Yes.
2075. Did you require some little time to get them ready? Yes.
2076. How did you know when visitors came to the asylum? The matron would come round and tell us. We would then take the best dress and make the patient ready. There was a great deal of trouble with the clothes, as many of the patients would be always tearing them to pieces. They would tear anything, even canvas.
2077. When the clothes were torn up, would you get them replaced by others? Sometimes, but not always.
2078. Did the patients go naked then? Well, I cannot say they were exactly naked, but they were sometimes very indecent.
2079. Did you always receive intimation when friends came to see patients? Yes.
2080. When the Government visitors came to make their official inspection, did you always know when they had arrived? Yes. When they first arrived they called at the doctor's residence, and then I would run across and tell the others of their arrival.
2081. Was that so that they might get the patients and place in proper order? Yes.
2082. Did Dr. Vause or the matron ever ask you to let the nurses know that official visitors had come? No, sir; I did it on my own account.
2083. Why did you do that? I was told to do it once when I first arrived, and I always did it afterwards without being told.
2084. Who told you to do it on the first occasion? Dr. Vause told me to just let them know, so that the patients could be put all right.
2085. Did the official visitors always go to Dr. Vause's house before they saw the patients? Oh, yes; before they saw the patients.
2086. Have you ever known them to go to the patients first, and then to Dr. Vause's house? I cannot say.
2087. Have you ever seen the patients put into these solitary cells? Yes; but only the very worst of them.
2088. Were these patients very destructive? Yes, very.
2089. Are they always put into these cells in a naked condition? Yes; they would tear their clothes if they had any on to tear. When they were put into the rooms they would cover themselves up with the straw. They play with the straw, and never seem to want any other covering.
2090. Were these patients visited at night-time? The matron always went her rounds at 7 o'clock.
2091. But was there no night attendant? I think a night nurse has been on duty since Case No. 1 was removed.
2092. Before that event was there a night nurse on duty? No; but we used to be in a position in the wards to hear patients if they were unusually noisy.
2093. Were some of these patients of very dirty habits? Yes, very.
2094. Was any convenience provided for them in these rooms? Nothing; if they had had utensils, they might have killed themselves with them.
2095. Had they no gutta-percha utensils? No; they tore them up.
2096. Would not these rooms be in a frightful condition in the morning? Yes; they were in a very bad state indeed.
2097. *Dr. Garran.*] Supposing you wanted to get a cup of tea or coffee for yourself at night, could you get it? No, sir.
2098. Could you get any hot water, or warm drink of any kind? No, sir.
2099. *Mr. McGowen.*] Did you ever know a nurse cruel to a patient? No; I cannot say that much. I never saw a nurse strike a patient. There was one patient, Case No. 23, whom another patient scrubbed with a scrubbing brush while in her bath.

[Witness withdrew.]

THURSDAY,

THURSDAY, 15 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
Esq., M.D., INSPECTOR-GENERAL OF THE  
INSANE.

ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was also present to hear evidence and examine witnesses on his own behalf.

The Rev. E. D. Madgwick sworn and examined:—

2100. *President.*] This Commission was sitting for the purpose of making full and diligent inquiry into certain complaints and allegations made against the management of Bayview House Asylum. We, as the Commission, understand that you are one of the chaplains visiting the institution, and we should like to hear your evidence upon what you have seen there during your visits. Are you one of the chaplains at Bayview House? Yes; I am the Church of England Chaplain there.

Rev. E. D.  
Madgwick.  
15 Nov., 1894

2101. How long have you been there in that capacity? About two years.

2102. Do you visit the institution regularly? Yes; every Thursday afternoon at about 3 o'clock.

2103. Do you hold religious services there on these occasions? Yes; I hold a service, and then I spend the rest of the afternoon among the patients.

2104. Have you been called to visit the institution suddenly in cases of emergency? No.

2105. Have you ever visited the institution on days excepting those on which you pay your regular visit? Yes; occasionally I think I have, but I have taken no note of the dates.

2106. Did you always visit the institution at regular hours? Yes; my custom was to arrive there at 3 in the afternoon, conduct a service in the chapel first, and then I would go through the whole of the establishment.

2107. What was your general impression formed on what you saw on these occasions of the management of the institution? It was very favourable.

2108. Have you ever heard any complaints made by the patients concerning their treatment? Never; I never heard a single complaint, and I may say here that I was never more surprised in my life than when I read of these charges being brought forward in the Legislative Assembly.

2109. Did you ever have any conversation with the attendants or nurses while on your visits? Yes.

2110. Did they ever complain to you of the treatment of the patients? I never heard a complaint from either patient or attendant.

2111. In your general visitation, after conducting the service, did you inspect minutely the clothing worn by the patients? No; it never occurred to me to make such an inspection.

2112. Have you visited similar institutions elsewhere? Yes; I was chaplain at Callan Park for nearly seven years.

2113. Having visited the two institutions, and having had an opportunity of seeing the management and the patients in both, do you see any great difference between the treatment of patients at Bayview House and those at Callan Park Hospital for the Insane? No; I see no difference, except that the institution at Bayview is more homely and more like a private gentleman's residence. The treatment and discipline at both seems to me to be about the same.

2114. Over what hours of the day did your visits to Bayview House extend? I arrived there at 3 in the afternoon, and generally left at 5. The service occupied about three quarters of an hour, and the rest of the time I spent in going over the institution.

2115. Is it always known and understood at the institution that Thursday and 3 o'clock in the afternoon is your visiting time? Yes; that is the hour fixed by Dr. Vause and myself.

2116. Have you received any special calls to the institution? I think I have been asked to go once from the parsonage to see a certain patient, whose name I forget, but who was at that time sick in bed. Dr. Vause then asked me to go and see that patient, and I went.

2117. When you saw this patient sick in bed did you find him and his surroundings clean, and did you think he was properly attended to in every way? Most certainly I did. I never saw any indication of dirt or untidiness or neglect on any occasion I visited the asylum. The bed-clothing was scrupulously clean, and so were the clothes of the patients themselves.

2118. Did Dr. Vause always manifest a proper interest in his patients? Yes, I thought so. He has always personally taken me to see them.

2119. Did it always strike you that he took interest in these unfortunate people and in his work? It is quite evident to my mind that he did so. As far as my experience goes, I can safely say Dr. Vause always manifested a fatherly interest in the place and in the patients—just such an interest as I should expect from the head of an institution of that kind.

2120. *Dr. Garran.*] Do you think that the time of your visit being fixed everything could be prepared and put in proper order for your visit? I have never heard of it being done, and I do not think special preparation could be made, because I was at liberty to go into every part of the institution.

2121. Did you ever drop upon the place unexpectedly, so as to pay what may be termed a surprise visit? No; it never occurred to me to do so. I never saw anything on my ordinary visits which would lead me to think or suppose for one moment there was any necessity for such watchfulness.

2122. *President.*] When you were making those ordinary rounds, were you ever taken into an isolated building in the courtyard? Yes.

2123. Did you ever see anyone sick lying in this room? No; I saw the room itself—I may say rooms, for there are two.

2124. Did you see these rooms, or either of them, before the complaints were made concerning Case No. 1? I am not quite sure; I think I saw them before; but I know I saw them afterwards.

2125. Did you go, as a matter of curiosity, to see them after the particulars of Case No. 1 had been made public? Yes; I saw the room he occupied.

2126.

- Rev. E. D. Madgwick.  
15 Nov., 1894.
2126. Was it clean and tidy then? Yes.
2127. Had you seen that room before? I think so, but I have no distinct recollection of it.
2128. Were you ever called to administer religious consolation to a dying patient? No.
2129. Have you been called on any occasion to see a female patient in the single cells on the women's side? No; I never rendered any religious service to a sick patient in the isolated wards on the female side. I can speak with the greatest definiteness. I can say with certainty I never had any suspicion of anything being wrong in the management or treatment of the patients.
2130. Did you see Case No. 1 himself while he was there? Yes; I saw him on one of my visits to the institution, and he was then in Dr. Vause's reception-room.
2131. Did you see him in his private apartment? No; only in the reception-room.
2132. *Dr. Garran.*] When you saw him was he sufficiently tranquil to talk rationally? No; he was very excited, exceedingly irrational, and anything but physically strong. Dr. Williams had remarked to me that he thought his case was utterly hopeless, and I could only endorse that opinion after seeing him.
2133. *Mr. McGowen.*] Did you see these ten or eleven rooms, in which the women were kept isolated, before that patient's affair became prominent? I have been through all of these rooms.
2134. Did you examine these rooms before the 20th of last May? Yes; I have been through them frequently before the 20th of last May.
2135. On seeing those rooms before that date did you notice any window in the back wall opposite the door? Yes.
2136. Have you seen any alterations in those rooms since then? No; I have not noticed any alterations.
2137. Did you not notice that there are now two windows in these rooms instead of one? No; my observation of the rooms was not so particular as to enable me to notice whether there were two windows or not. I have a general recollection of the rooms.
2138. *President.*] When you went into the room and saw a window high in the wall opposite the door, do you think if another window had been put over the door you would have noticed the change? I did not notice the change, but I know there have been a good many alterations made in the institution of late.
2139. Do you mean that alterations and improvements are being made to provide additional comforts for the patients? Yes.
2140. Have all these alterations been made since the initiation of this inquiry? No; I do not think so.
2141. Do you infer then that alterations are made from time to time with the sole desire of making the place more comfortable and homely? Yes; ever since I have been chaplain of the institution I have seen workmen about the place making improvements, both in the garden and in the premises.
2142. If, then, you saw an additional window or door being put into any part of the building would it strike you as anything extraordinary? No.
2143. *Dr. Manning.*] Are a good many of the patients who attend the religious services fairly sensible? Yes.
2144. Are some of them quite rational when talking to you? Yes.
2145. Have these patients an opportunity of speaking to you in a quiet way without interference from attendants or any one else? Yes; they very often do speak to me, too.
2146. Do they ever complain to you of their treatment? I have never had a single complaint, and I may add that on the other hand at the time this matter was broached in the Legislative Assembly some of the patients were rational enough to talk the subject over with me, and to ask me to defend Dr. Vause by writing to the newspapers.
2147. Were those Government or private patients? Private patients.
2148. Were there some, then, intelligent enough to be fully acquainted with the facts of the case? Yes; they discussed it with me, as I say, and suggested that I should write a letter to the newspapers defending Dr. Vause. I subsequently did write to the Editor of the *Sydney Morning Herald*, but the letter was not published.
2149. Do you receive any consideration from Dr. Vause for your services as chaplain? Oh, yes; I get £20 a year, and I had more than at Callan Park.
2150. Will you say there was every opportunity for patients to make a complaint to you if they chose to do so? Certainly. Sometimes they would complain in a general way by asking such questions as "Why am I here?" "Why am I not allowed to go home?" These are but natural questions from an insane patient, and I used to try to pacify them by giving some soothing answers. I did not, however, regard these as any complaint against their treatment.
2151. *Mr. McGowen.*] Do you not say that these improvements were going on continually, and yet you did not see that an extra window had been in each of these single rooms? I said I did not take any particular notice.
2152. Did it ever strike you that one window covered with a shutter was a sufficient means of admitting light into these rooms? I do not remember any window being covered with a shutter. In speaking of general improvements, I may say that they are so numerous, or have been so numerous of late, that it was my custom to see work going on in connection with the new dwelling which is being greatly enlarged and improved, and other improvements going on in the old premises. It has never struck me for one moment that any improvement was being made or designed to defeat in any way the present investigation.
- [Witness withdrew.]

The Rev. Edward M. O'Callaghan sworn and examined:—

2153. *President.*] Are you in attendance on the Roman Catholic patients at Bayview House? Yes, it coming within the boundaries of my district.
2154. Are you a paid chaplain? Yes; I get 10s. per visit.
2155. How long have you been in attendance on the patients at Bayview House? Since July, 1889, I think.
2156. During your attendance there to minister to these patients, have you had every possible opportunity of conversing with them and of observing the general management of the institution? I have.
2157. What is your impression, formed from this experience? Very satisfactory; I have never noticed anything I thought to be unsatisfactory, improper, or in any way undesirable. I have been there a good many

- many times late at night, on special occasions, and I have never known anything happen of which I could complain.
2158. Have you paid special visits to sick patients at night as well as your ordinary visitations during the day? Yes.
2159. Have you ever made a general inspection of the institution by going about the grounds, and over the whole of the house? Yes.
2160. Have you been through the wards? Yes.
2161. Can you recollect any occasion on which any attendant has specially complained to you of the neglect or bad treatment of any patient? No; I do not know of any such occasion.
2162. On the whole, then, is it your impression that Bayview House is a well-managed institution? Yes.
2163. Have you had any experience in similar institutions? I have not had exactly the same experience, but I have seen two or three institutions of this nature.
2164. Having been so long associated with this institution do you say you have never been unfavourably impressed with its management? Certainly not; on the contrary, I have always been most favourably impressed—so much so, indeed, that I should be glad to be put there myself if such circumstances were to arise as would force me to seek the aid of my fellow men, as these unfortunates do.
2165. Did you ever have your attention called to a separate cell across the courtyard, away from the main building, in which Case No. 1 was placed? Yes; I know the room you mean. I believe Dr. Hetherington showed it to me on one of my rounds.
2166. Did you ever see a patient in this cell? Yes, I did; I attended one poor old Italian who died there.
2167. Have you ever visited the female patients in the single cells and in the dormitories on the Government side? Yes; I have been in several dormitories.
2168. Do you remember the eleven or twelve separate cells opening on to the verandah? Yes.
2169. Did you ever visit any patients there? I do not remember having visited patients in them.
2170. Did you ever visit patients in them? No; those patients I have visited specially were generally in a dying state.
2171. Were some of these patients fairly intelligent? Yes; some of them.
2172. Did you ever have an opportunity of conversing with them? Yes.
2173. From the information they have given to you did it ever strike you there were any cases which required investigation? No; I never heard anything like a complaint which could form the basis for investigation. I have seen several of the patients separately, spoken with them confidentially, but have never received any complaint.
2174. Were you ever at the institution during meal times? No; I was generally there before meal times.
2175. Did you ever notice anything peculiar about the dress of the patients, or as regards their cleanliness? I saw nothing beyond the fact that they appeared to be dressed comfortably, and they were clean.
2176. Were your visits made to Government or private patients? There was no distinction made in that way. I visited both.
2177. Did you visit under ordinary circumstances at a regular hour—for instance, for the celebration of mass? Yes; generally in the forenoon, at 11 o'clock.
2178. Did you go for that duty once a week? Sometimes; and sometimes once a fortnight.
2179. *Mr. McGowen.*] Did you ever receive any complaints from the attendants or from any particular attendant regarding the treatment of patients? No.
2180. Did an attendant named Josephine MacKay write you a letter? No.
2181. Do you know anything about Case No. 19? I cannot recollect the patients by name.
2182. Was it known at the institution when you would regularly visit the asylum? I think so, for I only went there at stated times.
2183. Was it your usual practice to come for the performance of religious duties once a fortnight? Yes.
2184. On the special occasions when you were sent for to see sick or dying persons, would you go to the establishment in the night-time? Yes.
2185. Did you go straight to see the patient for whom you were sent? Yes.
2186. Have you any knowledge of the room in which Case No. 1 was kept? I may know the room; but I did not know that that particular patient was there, until his removal became public.
2187. Have you specially examined that room since? No.
2188. When you visited the institution on special occasions were you taken direct to the place where the sick patient was? Yes.
2189. *President.*] Are you satisfied with the general management and cleanliness of the institution? Yes.
2190. Was there ever any special complaint made to you about the treatment of the patients? No.
2191. It has been stated to us that when official visitors and clergymen arrived at the institution patients were specially prepared, and the place put in good order for these occasions;—what is your opinion of a rumour or statement of that kind? I think it is utterly valueless.
2192. Did you have every opportunity of making full observation of, and holding free conversations with the patients? Yes.
2193. Have you administered the sacrament to the patients? Yes.
2194. Have you been with patients at confession? Yes.
2195. Do you say that no serious infringement of the rules could occur, and that a patient could not be neglected in any way without the fact being brought fully to your notice? Yes, I do. I know, too, that several have left the institution, and are now living outside in my district, and whenever any allusion is made to Bayview House they always speak most favourably of the institution.
2196. Do you remember administering the last rites of your church to Case No. 17, in December, 1893? I do remember some such case.
2197. Did you administer the last rites to that patient? Yes; in the third bedroom from the end.
2198. Was she on the point of death before you left? Yes; we thought she had already died.
2199. *Dr. Vause.*] Do you know if there has ever been any special preparation made for your visits? I do not know that there has.
2200. Do you sign the visitor's book when you attend the institution? Yes.

[Witness withdraw.]

TUESDAY, 20 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
ESQ., M.D., INSPECTOR-GENERAL  
OF THE INSANE.ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was also present to hear evidence and examine witnesses in his own behalf.

Josephine Mackay sworn and examined:—

Josephine  
Mackay.  
20 Nov., 1894.

2201. *President.*] Were you at one time an attendant at Bayview House? Yes; I was employed there for a year and three months.
2202. At about what time were you employed there? I went in April of last year, and left in May or June of this year.
2203. By whom were you engaged when you joined that institution? By Dr. Vause.
2204. Do you remember signing the book when you were engaged? No; I do not remember that. As far as my memory serves me, I merely received a copy of the rules and regulations of the establishment.
2205. Did you pay particular attention to those printed rules and regulations? Yes.
2206. Did you read them over carefully, and thereby understand the nature of your duties? Yes.
2207. What was your special duty in connection with the institution? I was engaged as an assistant nurse, or under nurse.
2208. What was the nature of the duties devolving upon you in that position? I was engaged in domestic duties, and in looking after some of the patients.
2209. Had you an opportunity of seeing the general management of the institution? Yes.
2210. Did you have an opportunity of seeing what clothing was provided for the patients? Yes.
2211. Was that clothing ample and satisfactory? It was not ample.
2212. Which of the patients were in your charge? I had charge, at different times, of patients on both sides. The first part I was engaged on the Government side of the institution—some five or six months, I think.
2213. Where were you employed during the remainder of your stay? I was employed in the private patients' part of the institution for four or five months before I left.
2214. Did you ever remark that the clothing of the patients was scanty? Yes; I saw that for the Government patients it was scanty, especially in the winter-time. I do not think this was Dr. Vause's fault—I think it was the matron's fault.
2215. Was there an ample stock of clothing in the storeroom? I do not know, but if there was an ample stock in the storeroom we did not see it.
2216. Did you observe that the patients were not properly clothed? The supply of clothing was scanty, especially for the winter climate.
2217. We have been told that some of the clothing was of a poor description—an inferior quality;—was that so? It was of very poor quality.
2218. For instance, the stockings the women had on, what quality were they? A very poor quality.
2219. In what way? They were of the poorest quality, and very often in a ragged state.
2220. Was the amount of food supplied sufficient in quantity and of good quality? The animal portion of the food was sufficient.
2221. Was there a sufficient supply of bread? The bread was not often sufficient.
2222. Do you think the patients had enough to eat? Yes; I consider they did; but I do not recollect all details in connection with the food.
2223. Did they get sufficient to eat at all times? Yes; I think so. Their appetites varied, and some ate considerably more than others.
2224. Was your attention called at any time to the ten or eleven cells on the Government side of the institution? Yes.
2225. Have you seen patients put in those cells at night? Yes.
2226. What state were they put in? They were undressed, and a kind of mattress made of straw was put in the room with them.
2227. Did they have any underclothing put on them at night? No.
2228. Were they always put in these cells naked? Yes; for fear they might injure themselves if they had clothing on.
2229. Were they always put in naked as far as you know? Yes.
2230. Do you know any exception to this rule? Yes; there was one patient, a Case No. 24, who was allowed to wear a nightdress and underlinen.
2231. Was she put in with night-clothes on, and the other patients put in these rooms naked? Yes.
2232. Do you remember seeing a room in a detached building where Case No. 1 was put to sleep at night? Yes.
2233. Have you frequently seen him put into that room? Yes.
2234. Was he undressed and put in in the same way as the female patients? I do not know. I never saw him undressed. It was the duty of the male attendants to look after him.
2235. Did you ever hear any conversation about his treatment? No; all I heard was, however, they used to take away his clothes. They used to undress him inside the room and bring his clothes away.
2236. Were there any night attendants to look after the patients kept in these separate cells? No; if the patients were noisy or very excited an attendant would go down to the cell and give the patient a sleeping draught of some kind.
2237. But did any one attendant go round at night to see that the patients were all right? No; unless we were disturbed by patients being exceptionally noisy, and then a nurse would get up and see what was the matter.

2238. What time did you go to bed generally? We were supposed to retire at 10 o'clock, but very often we were up later than that. All lights were out at 10 o'clock.

2239. Supposing you wanted to get a cup of tea, cocoa, or other refreshment, during the night, was there any provision for obtaining it? No.

2240. Did you ever see any provision for obtaining refreshment of this kind? No.

2241. With regard to the bathing of the patients was that done systematically at stated times? Yes; they were bathed every Saturday afternoon as a general rule, but whenever dirty patients required a bath they got it.

2242. Were the patients then always kept as clean as possible? Yes, certainly, for our health's sake as well as their own.

2243. Were you satisfied, on the whole, with the institution and its management, or have you any complaint to make concerning any irregularity which came under your observation? It is such a long time since I was there that I have forgotten a good deal; I do not remember.

2244. What was the reason of your leaving the institution? A patient chanced to escape. It was the custom for me to keep my keys under my pillow. This patient slept in my ward, but she had a habit of constantly wandering about the room at night. On one night I slept unusually sound, and the string of my keys came from under the end of the pillow. This patient, in wandering about, saw the string and took the keys. When I woke up I missed the keys. We searched all over the place, but could not find the keys. Some time afterwards she made her escape, but I do not know how she escaped.

2245. Were you dismissed for that? Yes. She delivered up my key the day I was leaving. In the meantime she went home for a week. She came back to the institution, and brought a key with her which looked like my pass-key.

2246. Did you report the loss of those keys to Dr. Vause? Yes; I did.

2247. What did he say? He called me to account. I told him I suspected that Case No. 24 had the keys.

2248. Were you dismissed because of these circumstances? Yes; I was dismissed on account of the patient escaping while I was in charge.

2249. Have you seen Dr. Vause passing in and out of the institution? Yes; he always made his daily visits, except when he was ill from his accident.

2250. Before that accident happened did you see him regularly attending to the patients? Yes; he came through the institution every day at dinner-time, and on any other occasion when he was wanted.

2251. Did any accident occur to any of the patients while you were there? Yes; there was one poisoning accident.

2252. Was there any other accident? Case No. 17 used to knock herself about very much.

2253. Did you see anything of a serious character in the way of accidents while you were there? I do not remember anything now.

2254. It would be as well for you to tell us all you know; you need not be afraid; all we desire to know is the truth and the whole truth;—do you remember any other accident? I do not remember any other case. I may remember it later on; I do not remember it just now. I know Case No. 17 was ill for a week or a fortnight.

2255. Were any of the rooms much troubled with rats? No; but there were rats about the yards and in the sheds. The rooms were not troubled with rats; they were troubled with bugs more than anything else. The patients' heads were very much troubled with vermin. They were very much neglected in this way.

2256. *Mr. McGowen.*] Do you know that in the evidence you are now giving you are on your oath? Yes, I do; and I know I am speaking the truth.

2257. Do you say that the patients, in your opinion, were treated properly? It may have been the kind of treatment suitable for the insane, but I should not like to be subjected to it, nor to see any of my friends treated in the same way.

2258. Did you ever make any complaints to anyone about the treatment of these patients? Yes.

2259. Did you ever complain to Dr. Vause about it? No; but I complained to the matron several times.

2260. Did you complain about the food supplied to the patients? Yes.

2261. And about the clothes? Yes.

2262. About the bedding? Yes; I complained that the bed-clothes were not sufficient for winter climate, and they were of a very poor quality.

2263. Did you ever complain to the Rev. Father O'Callaghan by letter? I simply commented on his letter which had appeared in one of the newspapers.

2264. After you left the institution did Father O'Callaghan write a letter to one of the newspapers? Yes.

2265. Did you write to him subsequent to that? Yes.

2266. What did you say in your letter? Just a few words, telling Father O'Callaghan that he had little or no experience of the management of the place. I told him he only came there to celebrate the rites of the church, and that he had little opportunity of seeing anything of the institution and its working.

2267. Did you say in your letter that things were altogether different while he was at the institution on his religious duties to what they were on ordinary occasions? I said something to that effect, but I cannot recollect the exact words I used.

2268. Did you ever write to Mr. Nugent Robertson, one of the official visitors, on the same subject? Yes.

2269. Complaining about the treatment of the patients? Yes.

2270. Did you ever complain to Dr. Manning? No.

2271. Do you say that the women were put in these cells naked? Yes; and with very little covering in the winter time; all they had for covering was a kind of an old rug. The mattresses and rugs put into these rooms in the day-time were taken out at night. Dr. Vause did not know of this at all.

2272. At what time were these patients put in the rooms at night? At about half-past 5, and never later than 6 o'clock.

2273. Did each of these rooms contain a window in the wall facing the door? There was a kind of a shutter.

2274. Did you put the patients in that room? No.

Josephine  
Mackay.]  
20 Nov., 1894.

- Josephine Mackay.  
20 Nov., 1894.
2275. Did you see other nurses do so? Yes.
2276. Did they pull this shutter down when they did that? Yes; to stifle the noise. There was also a little observation hole in the door.
2277. Were these patients put in between the hours of 5 and 7 at night, and did all the nurses go to bed at 10? Yes.
2278. As far as you know, were nurses in the habit of looking through these observation holes unless the patients made a noise? No; they only looked through if there was an unusual noise, and patients were heard knocking themselves about.
2279. How many of these single rooms are there? Six or seven, I think, with a bath-room at the end.
2280. Were patients put in each of these rooms every night? Yes.
2281. Was there a mattress in all of these rooms? There were bags of straw. The mattresses put in in the day-time were taken out in the evening. Some of the patients would not sleep on a mattress. One, Case No. 15, would not sleep in a bed.
2282. Do you say that the mattresses were put in the rooms in the day-time and taken out at night? Yes.
2283. Is it not at night-time that the patients would want to use these mattresses? Yes.
2284. Did the nurse have instructions to take these mattresses away? I do not know. She may have had instructions from the matron.
2285. Did you ever take them out? No; I had nothing to do with them.
2286. Did you ever see any rooms containing nothing but loose straw—no mattress at all? Yes; Case No. 15 would not sleep on a mattress.
2287. Have you been in these rooms in the morning immediately after the patients have come out? Yes.
2288. Did you ever see any utensil in that room at these times? Yes; I saw an indiarubber one in the room of Case No. 24.
2289. Did you see one in any other room? No; not in the rooms occupied by Government patients.
2290. Did Case No. 17, whom you spoke about a minute ago, die at the institution? Yes.
2291. Did you hear that she had her thigh broken? No; but when she was dead I know that her stomach was very much inflamed and discoloured.
2292. Was Case No. 17 very ill before her death? Yes.
2293. For how long? She was ailing for some time. She had a total loss of appetite for from seven to ten days before her death.
2294. Did you give her any medicine? No; I know she had no food during the time I mention. We used to try to force her to eat, but she would not take food.
2295. Did you complain to the matron about this? Yes; the matron knew of it.
2296. Did you give the patient any medicine from Dr. Vause? No; I was not in charge of the woman, except that I was with her three days before she died.
2297. Did you give her any medicine during those three days? No; I was not entitled to give her any.
2298. Did you see anyone else give her medicine? No; I heard she got no medicine.
2299. Do you know a woman named Case No. 23? No.
2300. Did you ever see any nurse in the institution behave cruelly to a patient? I saw Nellie M'Bride hit a patient on the back with a boot.
2301. Did you ever hear or see a scrubbing-brush used on a patient? No; I think I heard something about one patient scrubbing another.
2302. When the visiting doctors come to the institution, do you get any intimation of their arrival? Oh, yes; we always know when they have arrived.
2303. How do you know? We hear from the nurse who admitted them, or from the matron. We then prepare the patients. We undress them, then dress them again in more suitable clothes.
2304. Is it the custom to make the patient ready on these occasions? Yes.
2305. To change their clothes and generally make the appearance of the institution different? Yes.
2306. Was it customary at all times that you should know of the arrival of the visiting doctors at Dr. Vause's residence? Yes.
2307. Did you ever tell the other nurses of their arrival? Yes; sometimes I did.
2308. Did you ever let them know when Dr. Cox came, or did you ever go with Dr. Cox when he came? I saw him there several times.
2309. Did you ever get a piece of paper passed on to you saying that the doctors had arrived, and to make haste and get the patients ready? I do not remember. I think it must have been Jessie Fuller who received this piece of paper.
2310. Did you know Case No. 12? Yes.
2311. Was she ever in the single cells at night? Yes.
2312. Did any of her friends ever come to see her? Yes; her father.
2313. Was he ever shown the room in which his daughter slept? He was not shown the cell.
2314. Was he shown a different bedroom altogether? Yes, by Mrs. Gilchrist, who on that occasion asked me which was the best bedroom, and I told her the one near the door.
2315. Did she show Mr. \* \* \* this bedroom? Yes; I suppose so. I was not in the room at the time.
2316. Did you take Mrs. Gilchrist to account for showing the father this room as if it were his daughter's bedroom? Yes.
2317. While, as a matter of fact, the daughter was sleeping in one of the single cells at the time? Yes.
2318. Did you ever know Case No. 12 to sleep in that room which was shown to her father? No. She was so noisy at night that she was put in one of the single cells as a refractory patient.
2319. Did you ever see any sleeping draughts given at night to noisy patients? Yes; we used to give them bromide of potassium.
2320. Did Case No. 12 get any draughts at all? Yes; she got several.
2321. On one occasion while you were there did Dr. Manning express a wish to see the dinner that was given to the patients? Yes; somebody complained about the food, and Dr. Manning, when on one of his official visits, remained to dinner.
2322. Was there any difference between that dinner and the dinner usually served to the patients? Yes; it was a better dinner on that day.
2323. Much better? Oh, yes.

2324. When the friends of patients came to see them were the patients prepared for the visit by having different clothes put on them? The patients were always made tidy and presentable on these occasions, because they very often disarrange their clothes and became in a state unfit to see anyone sometimes.

2325. *President.*] Did you ever see the clothing taken from one patient and put on another patient to make her presentable when her friends came to see her? I saw this done once but I really forget the name of the patient.

2326. Do you say that you have seen it done? I saw one nurse use the clothes of another patient once.

2327. Did you ever hear any orders given to the effect that no one should see patients until they had been made ready for the interview? Yes, I have heard it. Patients' friends might come at an inconvenient time.

2328. How long after the visiting doctors arrived would it be before you could get the patients ready? I should think about 10 minutes or a quarter of an hour. The visiting doctors generally remain in the office a little while. In the meantime we get the patients ready, and then the doctors would come through the wards and inspect.

2329. Do you say you do not remember any accident occurring to a patient;—do you know Case No. 25? Yes.

2330. Did she get her head cut? Not that I know of. There was a patient, Case No. 15, who had a boil or some eruption on her head, and there was another patient, Case No. 26, who fell while in a fit and cut her head.

2331. In your experience did any patient have her head cut owing to the cruelty of any attendant? I do not know.

2332. Is what you say that the patients should have food and better clothing, that they are not properly clothed, and that they should have sufficient bedding? Yes, the food is better in the private part of the institution, but, speaking generally in regard to the food, I think the cooking is a lot responsible.

2333. Are you sure that you complained to Mr. Nugent Robertson? Yes, and what I said was true.

2334. How did you complain to him—personally? No; I wrote him a letter.

2335. Did you also write a letter to the Rev. Father O'Callaghan? Yes.

2336. What did you say in that letter? I said in effect, that Father O'Callaghan did not know how the institution was managed—that when he came on visits everything was prepared. All he did was to celebrate the rites of the church, and speak a few words to the patients.

2337. Did Father O'Callaghan make any special visits? Yes, and visited patients who were sick and dying. I went for him on one special visit to see Case No. 17; she was just dead when we arrived.

2338. Was she dead when Father O'Callaghan saw her? Yes, she was dead when he came; when we saw that she was about to die I went for him, and when I came back with the priest the patient was dead.

2339. *Dr. Garran.*] When you went to Bayview House had you had any previous experience in asylum work? No.

2340. Were you quite unacquainted with the way insane patients are managed? Yes.

2341. Whatever you had to do in the nature of duties, had you to be taught how to do it by the other attendants or by the matron? Yes, I had to be told; but I had very little to learn.

2342. Had you been a nurse previous to your engagement at Bayview House? No; I had been accustomed to domestic duties.

2343. Did you, as an attendant, have to sleep with the patients in one of the large dormitories? Yes, latterly, but not at first.

2344. Were they quiet patients? I slept in the refractory ward, and the patients there at times were very troublesome.

2345. After you had gained some experience with these women did you think it would have been safe to allow the women who were put in the single rooms to have remained in the large dormitory? Not always, for there were times when the patients were better away from all others.

2346. Do you think it was necessary to put a patient in each of the ten or eleven single rooms every night, or could some of those patients have slept with safety in the large dormitory? Not at all.

2347. What harm would they have done? I dare say, some of them, like Case No. 23, for instance, might not have done any harm.

2348. Would most of them have done harm in the large dormitory? Case No. 15 would have, for she had to wear mits in the day-time.

2349. After you had gained some experience, and had seen what was necessary to be done—supposing you had been in sole charge, would you have felt it necessary to put these women in separate cells at night? Yes.

2350. Do you think, then, that putting them in these single rooms is really necessary? Yes, in some cases.

2351. Do you think women are put in those cells unnecessarily during your time? Some are dirty patients, and are better put in cells by themselves, and some are much more mischievous than others, and would tear up bedding and their clothes.

2352. Did the patients ever tear up the sheets or blankets in the ward? No; I did not see that they did.

2353. What bedclothes did the patients have in your ward? In the summer-time they had a straw mattress—I used to call it a bag made of canvas filled with straw—a pair of sheets, a kind of under blanket, a pair of other blankets, and a counterpane.

2354. Do you say that they had a pair of sheets? Yes.

2355. We have been told by another witness that it was the custom to fold up the sheets about 4 o'clock every afternoon and put them away;—was that the practice in your ward? It was not the practice; but there were a few dirty patients, and their sheets were folded up and put away, but it was not the general custom to remove the sheets from the beds.

2356. Were women of cleanly habits allowed to have sheets at night? Yes, and in the winter-time there were extra blankets. There were twelve extra blankets given out at the Government end. The matron ordered me to take these off the beds in the day-time, to fold them up, but to put them on again at night-time.

2357. Did the patients have the benefit of these extra blankets at night-time? Yes.

2358. Were there any sheets or blankets put upon the beds in the day-time merely for show purposes and taken away at night? I do not think so; but still there were some patients whose sheets were removed because of their dirty habits.

2359.

Josephine  
Mackay.  
20 Nov., 1894.

Josephine  
Mackay.  
20 Nov., 1894.

2359. Do you think that in the winter-time the patients were warm enough during the night? No, not all of them, for some patients would have more clothing than others. Those patients able to complain would get more clothing. There were some so insane as not to know the difference between warmth and cold.
2360. So then the patients who were well enough to know the difference got more bed clothing, and would those not well enough to know have to go short? Yes. I saw them very often cold. I had a double blanket myself, and was warm enough with that supply, but I should have been cold if I had only had a single blanket.
2361. Did the patients seem to be cold in the morning? Yes, some of them were very cold.
2362. Did they complain? Yes, and we could see they were cold.
2363. Do you think they were cold because they had not sufficient clothing at night? Yes, they were shivering.
2364. Are you sure about the patients being allowed to sleep in the sheets at night? Yes, excepting the two or three patients who were dirty.
2365. Did any of the other nurses talk to you about the deficiency in clothing? Yes; Jessie Fuller was always speaking about it.
2366. In the winter-time were the patients allowed to wear warm flannel petticoats? Yes, some of them—those who had them or could get them.
2367. Was there any difference in the clothing then? Yes, in this way: some were well enough to know they were not sufficiently clothed, they would become noisy and get additional clothing, while those who were not well enough to look after their own interests were put upon.
2368. You were speaking about the food—do you think that the fault of the food was in the cooking? Yes, very often; but beyond that there was not sufficient of vegetable diet.
2369. Did you notice while you were there that patients fell away in condition? Very often they fell away, but that may have been due to their complaint.
2370. Regarding these women who were put in the single cells, do you think if the nurses had put on them night-dresses that they would have been torn? Case No. 15 would have torn her night-dress; but I do not think Case No. 23 would have done so.
2371. So far as you observed were any women put into these cells without night-dresses who would have been quiet in their night-dresses? I really forget the patients.
2372. Supposing you had charge of these women and you found that they tore their clothing during the night-time, would you put on fresh clothes? Yes; I certainly should renew the clothing.
2373. If they tore their clothing every night would you renew it? Yes, if necessary; the patient must be clad.
2374. In your sleeping-room was it usual for the patients to throw off the clothing during the night? Some of them would; one patient, Case No. 27, would never get into bed. She had a delusion that the devil was in her bed. She would sit on the floor and take her clothes off—and I have very often lifted her into bed after she had taken her clothes off.
2375. Was it a common thing for patients in your room to take their clothes off? No; nobody would become quite nude.
2376. Was it usual for patients in your ward to tear their clothes? Sometimes they would shred them.
2377. Who was the matron in your time? Bridget Morrissey and Miss Fuller.
2378. In that paper which you signed and read over so carefully at the time of your engagement, does not the first rule say that you personally must complain to the Medical Superintendent of the Institution if anything improper is done in your presence or to your knowledge? Yes, I suppose so.
2379. Did you ever complain personally to Dr. Vause? No.
2380. Notwithstanding the obligations you incurred when you signed that paper? No, I did not.
2381. *President.*] Did you write two letters making complaints? Yes; one to Mr. Nugent Robertson and one to Father O'Callaghan.
2382. Had you an opportunity of speaking to the official visitors? Yes; but the official visitors never gave us any encouragement to speak.
2383. What do you mean by encouragement—did they not speak about the patients? No.
2384. Did they never ask whether the patients were noisy or whether they were improving in health? Never to me.
2385. Were you not in charge, and did you not accompany official visitors on their rounds of inspection? Yes; but I never opened my lips to the official visitors. I thought their visit was only a matter of form, if I may be allowed to express an opinion.
2386. Was it not the common practice for the official visitors to ask the nurses questions about the patients? No; I never heard them.
2387. When friends came to visit patients did it ever fall to your duty to take these patients to their friends? Yes; several times.
2388. Were you present during the interview between the patients and their friends? Yes.
2389. Had you an opportunity then of speaking of the patients to their friends? I never spoke.
2390. Was anyone else present at these interviews? Not very often.
2391. Did you ever make any complaints to the friends of the patients concerning the matters you have referred to to-day while you were in the institution? No; I remained neutral in the matter.
2392. Did you ever report any of these irregularities to Dr. Vause personally? No.
2393. Did you sign any book when leaving? No.
2394. Did you sign the book of obligations, general rules, and instructions? Yes.
2395. Did you read over, or were those obligations ever read over to you? No; I regarded it just as a matter of form.
2396. When you went to the institution did you not read over the rules? At first, when the rules were given to me, I did, and I endeavoured to carry them out to the best of my ability.
2397. Were you ever on night-duty with sick patients? Yes.
2398. How often? Only a few times with Case No. 18, who died there.
2399. On these occasions was provision made for you to obtain during the night the necessary comforts for the sick patient, such as hot coffee, tea or cocoa, or warm milk or water? No.
2400. Was there any gas-stove or fire by which you could warm these things? No. There was no gas in the establishment, except a heater for making water warm in the bath-room.

Josephine  
Mackay.  
20 Nov., 1894.

2401. Could you get into the kitchen? No; it was locked.
2402. If you could not get these necessary comforts if they were wanted, what was the use of sitting up with a sick patient? We sat up in case she died in the night.
2403. Had you any provision made for her comfort? No; there was nothing given to me.
2404. Were there any stimulants in case they were wanted? No; I am quite sure there were none.
2405. Any hot cocoa, coffee, or milk? No.
2406. Was there any stove of any kind for making hot water? No.
2407. Did you ever hear of any other nurse having been on night duty? Yes; Jessie Fuller.
2408. What was the reason of that duty? A patient was sick, and somebody was required to sit up with her in case she died. Dr. Sinclair remarked that it would be advisable to stay up with the patient.
2409. Was Dr. Sinclair in attendance at Bayview House then? Yes.
2410. Did he prescribe any medicine for patients? Yes. Ever since the accident to Case No. 26 the matron always administered medicines; the nurses were not allowed to do so.
2411. What was the nature of that accident? The patient got an overdose of bromide of potassium, and was poisoned.
2412. After this accident, was more care taken in the administering of medicine? Yes; medicine was administered by the matron, and in her absence by the sub-matron. I have received medicine from the matron and administered it according to directions.
2413. Do you know if the patients objected to or preferred sleeping in these single rooms? It was no use objecting; they had to go, like or dislike.
2414. Was it a regulation of the institution that these patients should sleep in a single room? Yes; and very often they were not fit to sleep in a room with other patients.
2415. Did they in the day-time ever say they did not like to go into these rooms, or did they appear to go in willingly and quietly? Oh, no, nothing of the kind; but they had to go in.
2416. Do you know a Mr. Henry Gearey? Yes; I have seen him once; he called on me. He found out my address. He wrote to me, and I called on him by appointment afterwards.
2417. Did you make to him any report about the state of things in the institution? Yes.
2418. While you were a servant at the institution? No; but about a month ago, and I have not seen him since until about half an hour ago.
2419. Have you made any report to any other person except the two letters you wrote while you were in the institution? I spoke to her husband about Case No. 24, saying that I thought it advisable to take her home.
2420. Did you complain to any other person whilst you were in the employment of the institution other than making the complaints you mention? No. I have been often asked questions about the place, but I have said nothing one way or the other.
2421. Did you say anything to anybody about witnesses being paid so much per day for giving evidence in this inquiry? No.
2422. Did you mention to anybody the amount that would be paid to witnesses for giving evidence? No; but I always understood that if a witness were called to give evidence he or she would be paid according to the salary being received in ordinary employment, together with the expenses for the day.
2423. *Dr. Manning.*] What gave you the idea of speaking to Mr. \* \* \* about his wife? I did not have any particular idea; I was not asked to speak.
2424. Had you any idea of taking charge of the woman if she were released from the asylum? No.
2425. *Dr. Vause.*] Did you suggest that she should be removed? Yes.
2426. Did you sign the usual form of obligation. [*Book produced with signature attached*]? Yes; that is my signature.
2427. Did you not by signing that promise as a condition of employment that you would report to the Superintendent anything improper which came under your notice? Yes, and I kept that promise to the best of my ability.
2428. Did you not promise to tell the Medical Superintendent of anything improper that came within your presence or knowledge? Yes.
2429. If you made such a promise, and say that irregularities took place, why didn't you report to me? Because I was repulsed. I reported to the matron instead, thinking that was the proper course. When I went there first I often felt inclined to speak, and should have spoken if I had not known that it was considered my duty to mention these matters to the matron.
2430. Who was the matron at this time? Bridget Morrissey.
2431. If you saw anything wrong taking place, and you did not report it to the Medical Superintendent, would you blame the Superintendent for this occurrence? Certainly not.
2432. Did not a lady patient escape from the institution three days before you left? Yes.
2433. Was she in possession of a pass-key that had previously belonged to you? Yes, it belonged to me.
2434. Did you not have to leave the institution because of this matter? Yes.
2435. Did you not leave the door of the dormitory unlocked on several occasions? No, not that I know of.
2436. Is it not a fact that in consequence of leaving that door unlocked that the patient escaped? I do not know. The patient says so. I did not leave the door of the dormitory unlocked, and my pass-key was gone several months before the patient escaped.
2437. Was there not a padlock on the side of the door for additional security? There may have been, but I never had any instructions to lock that door or use that lock.
2438. When did you first make Gearey's acquaintance? About five weeks ago. He called on me and I visited him by appointment. I understood from him that I could be compelled by Government to give evidence, and that I had better tell him all I knew about this matter.
2439. Before this inquiry began did you learn from any source the rate of payment of witnesses? No.
2440. Did you ever mention to any of your friends or to any person that witnesses would be paid at the rate of 6s. per day and all expenses? No; I did not know the inquiry was going on until I received a summons to give evidence before it. I had no communication with anyone, except Mr. Gearey, up to that time. I have not had any intercourse with anybody since then.
2441. Before this inquiry was instituted, was your intended evidence and that of other witnesses printed or typewritten? I have not seen it printed or typewritten. It could not have been. I only called on Gearey once, and then had about an hour's conversation with him.

Josephine  
Mackay.  
20 Nov., 1894.

2442. Did you give the names and addresses of any persons or person prepared to give evidence adverse to Bayview House and its management? I gave the name and address of Rachel Kelly, a former attendant at the asylum, whose opinion about its management is the same as my own. I have not met her since Case No. 1 became prominent, nor have I heard from her.
2443. Did you visit Mr. Gearey's residence before this inquiry began? Yes; once.
2444. On what date? About two or three weeks ago.
2445. Did you visit Mr. Gearey at his house? Yes; he called on me, gave me his card, and told me to call on him, which I did. His address then was No. 9, Brisbane-street, Surry Hills.
2446. Did you visit Mr. Gearey on the afternoon of Monday, the 29th of October, or thereabouts? I do not think it was on a Monday. I only visited him once, two or three weeks ago.
2447. Did you then see the intended evidence in print or typewritten? No; I have seen Dr. Vause's report, but no evidence of any other kind.
2448. Did you ever urge anyone to go to Gearey who would give evidence against the management of Bayview House? I was under the impression that Gearey was one of the Commissioners to be appointed to investigate these matters. He did not tell me that, but I had an idea he was one of those making an inquiry, or else he was a detective or something of that sort.
2449. Were you informed before this inquiry began that efforts were being made to prevent Dr. Manning from sitting on this Commission? Yes; I was.
2450. Who informed you of this circumstance? Margaret Macleod.
2451. Did you expect a billet or any other reward as a result of your giving evidence before this inquiry? No.
2452. *President.*] Has anyone spoken to you about any position likely to be given you after this inquiry? Yes; Margaret Macleod.
2453. What did she do or say? She said something about the influence of gentlemen engaged on this Commission being sufficient to get me some situation of importance. This was said in the course of conversation.
2454. Did Margaret Macleod say this much to you? Yes; she said there was a possibility of that kind, not so much for me, but for herself.
2455. Did Gearey ever say anything to the effect that, by giving evidence, there was some possibility of your getting a situation? No.
2456. Was it then only loose talk between yourself and Miss Macleod? Yes.
2457. *Dr. Vause.*] Did you ever hold out to anyone a prospect of a billet on account of giving evidence before this Commission? No.
2458. Did you mention such a thing to a person named Rachel Kelley? Yes; I may have said something to her.
2459. Was she formerly an employee at Bayview House? Yes.
2460. Is she now employed by somebody residing at Gladsville? I do not know. She was at Hunter's Hill when I got her address.
2461. Did you ever urge Rachel Kelley to give to Mr. Gearey any information against the institution? She is of the same opinion as myself. I did not give any information because I did not think of that.
2462. Did you ever tell her it would be greatly to her advantage to do so? I believe I did; not so much to give information against the institution, but I said if she would come and give evidence as a witness it might be to her advantage.
2463. Did you ever take her to Gearey with this purpose in view? Yes.
2464. Did you tell her that all her expenses would be paid and that she would be able to secure one of the best billets afterwards? Yes.
2465. Is this your handwriting? Yes. [*Letter handed in as follows*]:--
- My dear Rae, Paddington, 2 Zulu Terrace, Thorne-street.
- I would have written long ago but I lost your address. There is a Royal Committee formed to inquire into the Bayview House, composed of the most influential men in Sydney, and we are all giving information against it. I hope you are still in sympathy with the patients, if so it will be greatly to your advantage, but you must be quick, as the inquiry commences on Saturday or Monday. You will meet us all again, Jessie Fuller, Margaret M'Leod, Bridget, Rose, Alice, and Lizzie Verity. The only friends that Dr. has is Kitty and Nelly. Go at once and see Mr. Gearey, the clerk, or if you come out to me I will take you; do not delay, I am going to-night and our evidence is printed in type. If you come out to me take the tram to Waverley right to the terminus, cross through the Council Chambers gate just at the terminus, and anyone will show the house right opposite the Council Chambers--a little cottage. All our expenses will be well paid, and we will be able to secure the best billets afterwards through the interests of the Committee. They are knocking Dr. Manning off the list; they think he is in favour of Bayview.
- Ever your loving friend,  
JOSEPHINE.
- Wire when you come out. If you do not come they can compel you; there is no court-house business; just appear in the Town Hall before the Committee privately; 6s. a day expenses paid. Call at Gearey's at once.--JOSEY.
2466. How long after writing that letter did you see Gearey? To the best of my knowledge, three or four days.
2467. Did he tell you that he would be able to secure you the best billets? Maggie Macleod told me. When I wrote that letter I was encouraged by what I heard from Maggie Macleod.
2468. Did you enclose in your letter Mr. Gearey's card? Yes.
2469. Is this the card [*produced*]: "Henry Geary, at the side of Mark Foy's, 1 door, 9 Brisbane-street, Surry Hills"? Yes; that is the card.
2470. Did you read the letter Gearey wrote? No.
2471. Did he read the letter you sent to Rachel Kelley? I don't know.
2472. *President.*] When you wrote this letter did you submit it to Gearey? No; as far as I know he never saw it, and knows nothing about it.
2473. With regard to the mattresses taken out of the single rooms, do you know how many mattresses were in each room? There were two in each room every day, but one was taken out at night and one was left in.
2474. *Dr. Vause.*] Were there not two special horsehair mattresses made for quiet patients? Yes.
2475. Did every other patient have an ordinary straw mattress in her room? Yes.
2476. Were these two horsehair mattresses regarded as special mattresses? Yes.
2477. What did you do during the ten months you were there in the way of preparing patients when official visitors or their friends visited the institution? I helped to change the dresses. Sometimes we did not take off the old clothes, but slipped other dresses over the old ones.
- 2478.

2478. Did you have a double supply of clothing for that? Some things were quite new, and we put them over the old.
2479. Was not case No. 12 of an excitable disposition? Yes.
2480. Did she have as many as three straw mattresses in her room? I think she had as many as four to the best of my belief. I know the floor was covered with mattresses to prevent her knocking herself about.
2481. Did not this patient occupy the hospital when she was quiet, and was she not removed on account of her excitement? I do not know.
2482. Did not she return to the hospital after she became quieter in her conduct? No, not in my time.
2483. Did you ever write Mr. Nugent Robertson an anonymous letter? [No answer.]
2484. Was it an anonymous letter that you wrote to Father O'Callaghan? No.
2485. Did you write any other anonymous letters? No.
2486. Was your letter to the husband of Case No. 24 an anonymous letter? No, I do not think it was.
2487. Did you sign your name to it? I do not know; I forget.
2488. *President.*] Did you sign your name, or some *nom de plume*? I cannot recollect. I cannot say whether I signed my name or no.
2489. *Dr. Vause.*] Have you written any anonymous letters to me? No.
2490. Is Case 23 a particularly dirty patient? Yes.
- [Witness withdrew.]

Josephine  
Mackay.  
20 Nov., 1894.

Rachel Kelly sworn and examined:—

2491. *President.*] Where are you employed at present? With Miss Betts at Gladesville.
2492. How long had you been there? I was with her about five weeks, and then I went to Mrs. Makinson, and I am now back with Miss Betts.
2493. Were you ever employed at Bayview House Asylum? Yes; I left there on the 28th of January last.
2494. How long had you been there? Eleven months. I went there on the 28th of February in 1893.
2495. Did you make your original engagement at Bayview House with Dr. Vause? Yes.
2496. Did you sign the usual obligation? Yes.
2497. Did you see a printed paper containing the rules and regulations and instructions to attendants? Yes.
2498. Why did you leave the institution—did you leave of your own accord? Yes.
2499. Did you get a certificate of character from Dr. Vause when you left? Mrs. Gilchrist gave me one for Dr. Vause.
2500. What were your duties while you were at the asylum? I was in charge of the Government patients while I was there.
2501. What is your impression as to the nature of the food and clothing supplied to the Government patients—was it sound and of good quality? Yes.
2502. Was the food well cooked? Yes.
2503. Was the clothing always sufficient? Yes.
2504. Was it always clean? Yes.
2505. Was it ever in a ragged condition? No; the clothing was never ragged, unless it was torn by destructive patients.
2506. Do you know whether the friends of patients came to see them? Yes.
2507. Was any special provision made in regard to patients on these occasions? No, only to make them tidy.
2508. Were any clean dresses put upon the patients? Yes.
2509. Was the clothing taken off some patients and put on other patients about to be visited by their friends? No.
2510. During all the time you were there were you an attendant upon Government patients? Yes.
2511. Have you seen the official visitors come to inspect these patients? Yes.
2512. Did you ever speak to them? No.
2513. Did they ever ask you any questions in reference to the patients, as to how they were cared for and so on? No.
2514. When official visitors came to the institution, were you notified of their presence by Dr. Vause? No. Dr. Vause usually came round with them. The matron used to say generally when visitors had come. She would send word so that we could get the patients together, as sometimes they were scattered about.
2515. Remember now you are on your oath, and we want to know what time elapsed between the matron letting you know the official visitors had arrived and the time they came through the ward? I can hardly tell. Sometimes it was longer than other times.
2516. Speaking generally, what do you think was the length of the interval? I should say about a quarter of an hour or 20 minutes.
2517. Could you get the patients tidied and ready and all together in that time? Yes.
2518. Do you remember the cells in which the patients were put at night? Yes.
2519. Had you anything to do with putting the patients in them? No; I never put them in unless I had instructions.
2520. Was it part of your ordinary duty to put the female patients in those cells at night? No.
2521. Did you have any opportunity of observing the condition of the patients put to sleep in those single rooms? Yes.
2522. Were they as a rule dirty, troublesome, and destructive? Yes.
2523. Were the majority of them of this description? Yes.
2524. Were there any clean and quiet patients at all put in these rooms? Yes, one or two.
2525. What articles of bedding were placed in these rooms with the patients? A straw mattress and canvas rugs lined with blanket.
2526. Were these articles always given to them? Yes, in the main.

Rachel  
Kelly.  
20 Nov., 1894.

Rachel  
Kelly.  
20 Nov., 1894.

2527. Were any patients ever put in the room naked? Yes, I think one or two were.
2528. But as a rule these rugs were given to them to keep them warm and comfortable while they were in the cell? Yes.
2529. On the whole, were you satisfied with the arrangements of the institution? Yes.
2530. Have you any complaint to make about any irregularity while you were there? No.
2531. Did any accidents occur to any of the patients during your time at the institution? Yes; there was the one poisoning case, but I do not remember any other accident.
2532. Were the Government patients, as a rule, quiet patients? Yes. At times some of them might be a little excited. I never found any trouble in managing them.
2533. Do you say that Dr. Vause visited his patients regularly? Yes; daily.
2534. Did you ever send for him hurriedly on account of sickness? No.
2535. When the clergymen came to the institution did they always come at stated times? Yes.
2536. Was everything prepared for their visits—such, for instance, as making the patients clean and tidy? Yes; they were got ready to go to church.
2537. Was there always an adequate supply of clothing for this purpose? Yes; I always got sufficient clothes for them.
2538. With regard to night work;—what time did you go to bed? About 10 o'clock as a rule.
2539. Were you ever on sick duty? Yes; there was a sick patient in the ward I was sleeping in, and I used to get up in the night to give her a drink.
2540. A drink of water? Yes.
2541. Not a drink of tea, coffee, cocoa, or milk? No; not on the Government side.
2542. Was there any provision made for supplying a warm drink at night if it were wanted? No; there was a fire, or the means of making a fire, in the dining-room, but you would have to light it.
2543. Then there was no actual provision for anything of this kind? No.
2544. *Mr. McGowan.*] Do you say that there was a fire laid in the dining-room? Yes.
2545. Could you get a cup of cocoa or coffee if you wanted it? The materials were kept in a cupboard in the dining-room.
2546. Had you a key of that cupboard or the dining-room? No; the girl in charge of the dining-room had that.
2547. Would you have to knock that girl up to get the key, supposing you wanted to get a cup of cocoa or tea? Yes.
2548. Did you ever do that—that is, knock the girl up for this purpose? No; I never had any occasion.
2549. How many Government patients were in your ward? Fifty-two.
2550. Had you any private patients there? No; the private patients were in another part of the building.
2551. Had you any previous experience in lunacy work before you went to Bayview House? No.
2552. Are there not eleven of these single cells used by female patients? Yes.
2553. Was a patient put in each of these rooms every night? Not always. Sometimes a patient would be better, and able to sleep in the large ward. When this was so she was put in there for a change. That might happen occasionally.
2554. Generally speaking, however, were these cells occupied at night? Yes.
2555. Was there much light in these cells? No, not a great deal.
2556. Was the room very dark when the door was shut? Yes.
2557. Would you consider it a dark room in the daytime when the door was shut? Yes; it was dark when the door was closed.
2558. How many windows were in these rooms? One in each, high in the wall opposite the door.
2559. Generally speaking, was there a patient in each of these cells every night, and in nearly all the cases were the clothes taken away? Yes.
2560. Did you ever see any utensils in these rooms? Yes; there were two made of india-rubber.
2561. Were there not more than two? No.
2562. At what time were the patients put into these rooms? Usually a little before 7 o'clock at night.
2563. What time were they taken out in the morning? Between 6 and 7 o'clock.
2564. Did the rooms occupied by dirty patients smell strong in the morning when the patients were taken out? Yes; some of them.
2565. Did you make it a practice to look through the observation holes in the doors of these room before you went to bed at night? No; that was not part of my duty.
2566. Do you know if anybody else did? I think the matron did.
2567. Did you ever see her do it? No.
2568. Do you know any night attendant whose duty it was to go round and see these patients? No.
2569. Were you at Bayview House while Case No. 17 was a patient? Yes; she was a private patient there.
2570. Was she ever an inmate of your ward? No.
2571. Was she ever put in the single cells? I believe she was put in for one night.
2572. When was that? I cannot exactly remember. She may have been put in oftener. I was called on one occasion to assist to put her in.
2573. Were these cells kept for the use of Government patients? It was Government patients who used them as a rule.
2574. Were you at Bayview House when Case No. 17 died? Yes.
2575. Have you any knowledge of the time she died? I cannot say exactly; it was sometime in the evening.
2576. Were you in the room when she died? Not exactly.
2577. Did they send for a clergyman when she was getting near the point of death? Yes.
2578. Was she dead before the clergyman came? I cannot tell you, but the matron said she breathed after the clergyman came. I was not in the room at the time.
2579. Was she very sick before she died? Yes; she seemed to be ailing for a long time.
2580. Would she take her food? I have seen her refuse to take her food.
2581. Do you know whether she got any medicine while she was sick? No.
2582. Do you know a patient named Case No. 12? No, sir.

Rachel  
Kelly.

20 Nov., 1894.

2583. Did you ever put her in a single cell? No, I do not remember.
2584. Do you say that Dr. Vause passed through the institution on a tour of inspection every day? Yes.
2585. At what time? About dinner-time.
2586. Did you ever hear any complaints made to Dr. Vause about patients being treated cruelly? No.
2587. Did you ever hear any complaint in regard to their general treatment? No.
2588. Do you know if any of the patients were treated cruelly? No.
2589. Have you heard any talk amongst the attendants to the effect that case No. 23 had been cruelly treated? No.
2590. Do you consider that placing these patients in these single cells—dark cells according to your own statement—and leaving them there without anyone seeing them for nine or ten hours, is fit and proper treatment? I cannot say.
2591. Did you sign a paper when you left Bayview House affirming that everything was carried on properly at the institution? Yes; and so it was as far as I know.
1592. Do you think it was proper treatment to leave patients in these dark cells all night without anyone seeing them? I cannot say. I do not know why they were not seen. Seeing them was not part of my duty.
2593. As a rule, did all the attendants go to bed about 10 o'clock at night? Yes.
2594. Do you know if there was any night attendant? No.
2595. Had you any idea that anyone went to see these patients in the single cells after 10 o'clock at night? I do not know of anyone having done so.
2596. Do you think that the institution was managed fairly well? Yes.
2597. Was everything satisfactory? Yes.
2598. *Dr. Garrison.*] How many patients were in the dormitory where you slept? I think there were thirteen.
2599. As a rule, were they quiet in behaviour? Yes.
2600. If a patient became particularly noisy or destructive, what did you do with her? When a patient became very bad we would put them in a single room. I never had any occasion to put one of mine there; I generally managed them by speaking to them.
2601. So far as you are concerned, during the time you were there did you have to send a patient from the dormitory to a private cell? No; never.
2602. Had you every opportunity of judging, and do you know, that patients put in single cells were really too noisy or destructive to remain in the general dormitory? Yes.
2603. Were any patients kept in those rooms without there being necessity for such treatment? No.
2604. Do you think there was reasonable cause for them to be put in? Yes.
2605. Do you think there was any cruelty in putting the patients there? No.
2606. Were there any sheets on the beds at night in the dormitories? Yes.
2607. Were you ever instructed to fold up these sheets and put them away so that they could not be used at night? I had nothing to do with the sheets whatever.
2608. Do you know if it was the custom to take the sheets off the beds about 4 o'clock every afternoon, to fold them up and put them away? No. I think there might have been two exceptions where this was done. That was on account of the patients being destructive and dirty.
2609. Were the sheets taken away for that reason only? Yes.
2610. As far as you know, did all the other patients use the sheets at night? Always, in my experience.
2611. While you were at the institution do you know if good mattresses and bed-clothing were displayed merely for show purposes in the day-time and not used at night? No.
2612. So, then, if visitors were to go to the institution in the middle of the day, would they see precisely the same things as were used at night? Yes.
2613. Are you quite sure that the articles visible in the day-time are used at night? Yes.
2614. Did Dr. Vause ever drop upon you unexpectedly—I mean irrespective of his usual daily rounds of the institution? Yes.
2615. Were you never sure that he would not come through the institution at any moment? No; he would turn up at any time.
2616. Would you be sure for three or four hours together that Dr. Vause would not unexpectedly drop upon you? No, sir.
2617. Did any of the nurses, when talking with you, ever say that the women patients were badly treated? No.
2618. Did a nurse named Josephine Mackey ever say to you that the women on the Government side were treated scandalously? No.
2619. Did she ever speak to you about the treatment of the patients? No.
2620. Did she ever say a word to you on this subject? No.
2621. Did she ever complain that the clothing was insufficient in quantity? No.
2622. Or that they had no bed-clothes at night? No.
2623. Or that the food was insufficient or of bad quality? No, she did not make any complaint to me on these matters.
2624. Did she complain about anything else? Several times she remarked that she was dissatisfied with the place.
2625. Do you think that it was merely that she did not like the place? Yes.
2626. Have you ever seen a nurse or nurses cruelly treat the patients? No, sir.
2627. Has anyone spoken to you about the management of the asylum since you left the employment of Dr. Vause, and asked you to give evidence at this inquiry? No, sir.
2628. Have you ever seen a man named Henry Gearey? No, sir.
2629. During the whole of the time you were at the asylum did you see anything sufficiently wrong or mismanaged to justify you in making a complaint to Dr. Vause? No.
2630. As far as you had any opportunity of noticing the matron's conduct was she kind to the patients? Yes.
2631. Was she attentive to their wants? Yes.
2632. *President.*] Do you remember receiving a letter from Miss Mackay? I do.
2633. Did it strike you as being a peculiar letter or peculiar conduct on her part? Yes; it surprised me when I saw it.

- Rachel Kelly.  
20 Nov., 1894.
2634. I suppose it was because of many of the remarks made therein being altogether the reverse to what you now say in evidence? Yes.
2635. I suppose you were quite astonished at the statements made? Yes.
2636. Was your experience at the institution quite the reverse? Yes.
2637. Have you received any letter from Henry Gearey? Yes; I received one the day before I received the one from Josephine Mackay, and I was quite surprised to get it.
2638. What did Mr. Gearey ask in his letter? He told me he would be glad if I would call on him in reference to Bayview Asylum. I think he told me that there was to be an enquiry, and it might be to my advantage to call on him.
2639. What did you say in regard to that letter? I did not reply to it.
2640. Have you ever seen Gearey? No.
2641. Do you know him? No.
2642. *Dr. Vause.*] Had you charge of the Government patients on the verandah? Yes.
2643. Would it be your duty to make any changes in the condition of the patients when the official visitors came if any change had to be made? Yes.
2644. Did you ever put a clean dress on a patient over a dirty one? No.
2645. Did you ever do more than arrange the patients together so that they might be easily seen by the visitors, and while doing this straighten their hoods and put their clothes in general good order? Yes; we always put the bonnets straight and make them as presentable as we could. There would not be any dirty patients, for as soon as a patient was found in a dirty condition she was at once changed.
2646. When the patients were not destructive in their habits, were they not provided with night shirts and chemises? Yes, they always had night clothing left on them if they were not destructive.
2647. Do you know if Case No. 14 was a private patient? I believe the matron told me she was.
2648. Do you think that the patients who had no night utensils would have destroyed them if they had been put in the room? They might have, and they certainly would not have used them.
2649. Was not Case No. 17 very excited when she was placed in the single room? Yes.
2650. Would it have been dangerous not to have put her there? Yes.
2651. Was Case No. 23 a very dirty patient? Yes. She was a helpless patient and exceedingly dirty.
2652. Were there nurses sleeping at both ends of the single rooms, near enough to hear any disturbance that might occur during the night? Yes.
2653. If a patient was sick was she provided with a night nurse? Yes.
2654. *President.*] Some of the evidence you are giving is very different from that which we have heard from other persons—do you mean to say whenever a patient was sick a night nurse was provided? Yes; but there was not a night nurse usually on duty while I was there, except a patient was ill.
2655. Where was the clothing kept? In cupboards in the dining room.
2656. Was it in charge of the matron? The matron had charge of the clothing there, and I had charge of other clothing in the laundry.
2657. Was there any difficulty in getting extra clothes when they were wanted? No. If I could not get the clothing I required from the cupboard I would be able to obtain it from the laundry.
2658. Was there always an ample stock of clothing? I always had sufficient, and the patients were well clothed.
2659. *Mr. McGowan.*] Did you leave the institution on the 29th of January? Yes.
2660. Do you still say there was plenty of clothes there? Yes.
2661. Do you think there would have been any necessity to purchase a large quantity of new clothing in May or June, several months after you left? I cannot say, but I think not; but at the same time I had no idea of what clothing remained in the store.
2662. Can you say whether there would be any necessity to purchase a large supply of clothing three months after you left? I cannot say.
2663. Do you think the patients may have been very destructive with the clothing? Yes; some of them were very destructive at times.
2664. Do you say they always had night clothes on? Yes, except those who would destroy them, and in cases of that kind they were taken off.
2665. How many patients out of the eleven occupants of those eleven rooms would have underclothing on? Four would be the most to have underclothing on.
2666. Would the others be naked? It is so long since, I really cannot tell.
2667. Do you not say that the whole of these rooms were nearly always full;—there are eleven of these rooms, and do you not say that only four of the occupants had underclothing? Yes; four, as near as I can remember.
2668. Did you ever see any indiarubber utensils in these rooms? Yes.
2669. How many? I think about four or five—two in two of the rooms.
2670. Do you also state that you received a letter from Gearey? Yes.
2671. Have you got that letter now? No; I showed it to Mr. Makinson, my employer, and he told me after I had received my subpoena that I must attend and give evidence. He gave Gearey's letter to Dr. Manning. That was the letter Gearey wrote to me, and the one I received from Miss Mackay.
2672. *Dr Vause.*] Would not the ordinary requirements of Bayview House necessitate the frequent purchase of stocks of drapery and dress material? Yes.

[Witness withdrew.]

WEDNESDAY, 21 NOVEMBER, 1894.

[The Commission met in the Board Room, Chief Secretary's Office, at 11 a.m.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
Esq., M.D., INSPECTOR-GENERAL OF THE  
INSANE.ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was in attendance to hear evidence and examine witnesses in his own behalf.

John Doherty sworn and examined:—

Mr.  
J. Doherty.  
21 Nov., 1894.

2673. *President.*] Are you at present employed at Bayview House? Yes.
2674. In what capacity? As an attendant.
2675. How long have you been there? Since the 30th June, 1893.
2676. Are you senior attendant? Yes.
2677. Have you had every opportunity of seeing the nature of the management of the institution, and are you in a position to say whether the patients in your experience have been well or badly treated? Yes.
2678. How were you originally engaged? By Dr. Vause.
2679. Did you, at the time of your engagement, sign the usual agreement in a book stating that you would report all particulars coming under your observation to the Medical Superintendent? Yes.
2680. Do you remember Case No. 1? Yes.
2681. Were you one of the attendants who waited on the patient? Yes.
2682. With any other attendant? Yes.
2683. Whom? We generally took him in turns—all the attendants who were there did so.
2684. Was there not a special attendant allotted to him in order that he might be properly looked after? There was always a special attendant with Case No. 1, but not always the same person. I was not always constantly with him, neither was anyone else.
2685. Was there not a regular fixed attendant whose sole duty it was to look after this patient? He constantly had an attendant, but not always the same person.
2686. Do you remember a visit being made on the 20th May last by the Medical Adviser to the Government, Professor Anderson Stuart, Mr. Sager (the Secretary to the Board of Health), and other persons? Yes.
2687. Was this visit made on a Sunday morning? Yes.
2688. Did you see these visitors when they first arrived? I saw them in the yard shortly after their arrival.
2689. Will you state to the Commission the circumstances in connection with their arrival, the conversation that took place, and what happened generally? I remember going out to see what the business of these visitors was, and I think Professor Anderson Stuart said he wanted to see a certain patient. I invited him or them to go from the yard to the office, and I would send for the Medical Superintendent.
2690. Was that what you always did when visitors arrived? Yes. Professor Anderson Stuart and Mr. Sager went round to the office, but there were two other men who stayed behind in the yard. I rang the bell and took the other two round to the office. I saw one of the girls employed at the establishment, and she went to inform the Medical Superintendent of the presence of the visitors.
2691. Did you then go back towards the courtyard? Yes.
2692. What happened then? I went to the other two men and asked them if they wanted to see anybody. I think they made some reply in the affirmative, and I told them that if they wanted to see any patients they must first come round to the office. They, however, would not move from the courtyard.
2693. Did you ask them the reason why they were staying in the yard? I did not exactly ask them that, but one of them said words to the effect that he knew his duty.
2694. What did you do next? I left them.
2695. Did you shortly afterwards come back for the purpose of moving Case No. 1 from the room in which he had slept? Yes.
2696. Who was with you when you returned? Another attendant named O'Brien.
2697. When you came back to the courtyard with the second attendant did you find the two men standing there still? Yes; they were still waiting.
2698. Was the object of your return to remove case No. 1 for his bath in the usual course? Yes.
2699. Did you do so under any special instructions, or did you do it as a mere matter of routine? Just as a mere matter of routine.
2700. Did you bring with you the patient's clothes? Yes; we brought with us a suit of clothes.
2701. Can you tell us how long he had worn that suit of clothes you took with you that morning? He had not worn it for long. It was a new suit or nearly new—perhaps he had it a week or two, but certainly not a month.
2702. Was the suit soiled—dirty and disreputable looking? No; it was a clean suit.
2703. Do you know who brought that suit to the institution for this patient? I am not sure, but I think his wife brought it herself.
2704. Was it a bad looking suit of clothes? No; it was a good suit.
2705. Did you put the patient into that room on the previous evening? No; I saw him immediately after he was put in though.
2706. But did you put him in yourself? No; and I was not present when he was put in.
2707. Who was present? I do not remember now.
2708. Have you been present and put him in that room under similar circumstances? Yes.
2709. What was the process you generally went through on these occasions? We would take him to the room, take off his clothes, and put on his pyjamas and a singlet, and make his bed comfortably.
2710. What sort of bed did he use? He had a straw mattress, the covering of which was of strong canvas, because the ordinary bedding was of no use to him.
- 2711.

Mr.  
J. Doherty,  
21 Nov., 1894.

2711. Why was that? At the time he was very destructive; he was in the habit of tearing everything up.
2712. When you put him in the cell in this way, did you supply him with blankets? There were strong rugs used, lined with blanket, and he also had a mattress, pillows, and an india-rubber utensil.
2713. Are you sure he was supplied with the utensil? Yes.
2714. Now, remember you are on your oath, and are you perfectly certain that a utensil was supplied? Yes; he always had that.
2715. When you took him out on the occasion of the visit of Professor Anderson Stuart and others, was he supplied with the same clothing as you describe now? The rugs may have been without a blanket lining because I think he stripped the blanket off during the previous night.
2716. Do you think he did that in the night-time? Yes; it must have been done the night before.
2717. Do you think the same practice might have been followed at any previous time? Yes.
2718. Was there any blanket left on the rugs on the morning of that visit? No; not on that morning.
2719. Were these rugs large enough to cover a man? I think they were. They were rugs large enough to cover any man.
2720. What size were these rugs? The rugs were about 6 feet in length by 4 feet 6 inches in width.
2721. Were all the rugs about that size—that is, the three of them? Yes; each rug was large enough to cover an ordinary man.
2722. Did you notice when you took him out on the morning of the 20th of May whether he had on his pyjamas? Yes; they were on him on that morning.
2723. Was the singlet on him too? Yes.
2724. Are you quite certain about that? Yes.
2725. Referring to the suit of clothes you took into the room that morning, did you put a pair of trousers over the pyjamas before you took him to his bath? Yes.
2726. Are you quite satisfied upon that point? Yes; I am quite certain.
2727. Did you detect any great smell about the room from which you took the patient? Yes; there was some smell.
2728. Was there any unusual smell, such as a stale urinous smell? There was nothing beyond the ordinary smell. The room always smells stale in the morning. It was, as soon as the patient left it, scrubbed out every morning, and no smell remained after that.
2729. Whose duty was it to scrub out that room? Some one of the attendants.
2730. Was it always scrubbed out after it had been used by the patient? Yes.
2731. Did you ever notice that the floor of this particular room took a long time to dry after it had been scrubbed? No; it would be dry by between 10 and 11 o'clock in the morning.
2732. Would it always be dry by that time? Yes.
2733. Was there a window in the room? Yes.
2734. Was that window high up in the wall opposite the door? Yes.
2735. Was it the usual custom to put down the shutter when you put a patient in that room? It would be according to circumstances. It depended upon the weather; if it was a cold night the shutter would be put down, if it was a warm night the shutter would be left up.
2736. When Case No. 1 was brought out of that room was he shivering much from cold or from any other cause? He was not shivering at all.
2737. Did you not notice that he was shivering on this occasion? No; he was shaky on the warmest day. He was not shivering from cold when he was taken out on this morning.
2738. Did you notice that the smell of the room on that morning was any different from any other morning on which he had been removed? No.
2739. It has been stated that on this particular morning that there was a distinct smell of stale urine—did it strike you as being so? No; but at the same time I must say that this particular smell might be a little stronger as soon as the door was opened. The patient was in a comparatively speaking small room. He did not use a utensil, and therefore the room might have smelled.
2740. Why did you put a utensil in the room if he did not use it? Because it is the custom.
2741. Did the patient ever object to go into that room? No.
2742. Did you ever hear him say that he did not want to go into a stable at night? He might have said that he was sleeping in a stable.
2743. But did he ever object to go into this place? No.
2744. How long, according to your recollection, was Case No. 1 placed in that room—was he ever sleeping in any other part of the building? Yes, he was.
2745. When was he brought over from the dormitory and placed in that separate cell? I am not quite certain of the date.
2746. Do you think it was eight or nine months before the time he was removed? No, not so long as that.
2747. Was it six months before that time? I think it was between six and seven months.
2748. Was Case No. 1 during this time, a dirty, destructive, noisy, and excited patient? Yes.
2749. Did what I have said embrace his general characteristics as a patient? Yes.
2750. Before he arrived at this stage, what room did he occupy? He occupied a room downstairs, opposite the reception room. Following that, he occupied a room upstairs.
2751. Before the patient was removed into the place he called a stable, did you sleep with him? Yes; I slept with him for a time until he became cross at night, very noisy and destructive. He would put his mattress on the floor and would attempt to get the contents of the mattress out, and then we saw that his was a case for solitary confinement.
2752. Did he ever use violence towards you? Yes, he did; he was often violent.
2753. Did you think that when he arrived at this stage he ought to be put under restraint? Yes.
2754. What form of restraint would you use? We never used any form of restraint while he was in that room.
2755. Is there any doubt about that? No.
2756. Under orders of the Medical Superintendent was the patient removed to a separate cell? Yes; that was an order given within my own knowledge.

2757. Did the Medical Superintendent give that order to you? I heard him give the order.
2758. To whom did you hear him give that order? Dr. Vause told me he was going to remove the patient.
2759. Did Dr. Vause give any particular reason for making the change in regard to Case No 1? Yes; he said he considered that he would be better sleeping by himself, as he was at that time in a very noisy, restless, and excitable condition.
2760. Do you remember his having a black eye? Yes.
2761. How was that caused; was it an accident? One of the attendants took him to the water-closet one evening. After he was there, he got up from the seat and attempted to put his hand down into the pan. When the attendant tried to stop him he became restive, and he bumped his head against the edge of the seat.
2762. When the official visitors came to the institution were the patients on the male side taken into a room away from the main body of the building? Yes.
2763. Did you accompany them? Yes.
2764. Always? Yes.
2765. When friends came to see patients, were the patients made clean and tidy before they were taken from the ward? Yes; we used to wash their faces and brush their hair.
2766. Were fresh clothes put on them? No; except when patients were unable to look after themselves. Nothing was done to the ordinary patients.
2767. Not when official visitors came to the institution? No.
2768. Not on occasions when Dr. Manning, Dr. Cox, Mr. Nugent Robertson, and other gentlemen came? No; it was always the same.
2769. When these official visitors arrived at the institution had you any notice of their coming, between the time that they arrived at the office and when they were present in the main building? Yes.
2770. Did you ever get any notice that the visitors were there in the office while you were in the ward? Yes; sometimes. Word would be sent round that the visitors had arrived.
2771. Did you then put the patients in order. No.
2772. Did you not put the patients right? No.
2773. Did you ever have to do anything like that? I am quite certain we never did anything like that.
2774. When the official visitors came round the institution did they ever ask you how the patients were progressing, or did they enter into conversation of that kind? No, not much.
2775. Did they ever do or say anything of that kind at all,—did they ask you any questions about the patients, or go into the matter of routine as to the manner in which the institution was managed;—were the official visitors accompanied on these occasions by Dr. Vause? They were always accompanied by Dr. Vause, and questions were asked of Dr. Vause, and if the doctor could not answer he would refer to me.
2776. What kind of food was supplied to the patients before this investigation took place, and what is the kind of food supplied since;—has it always been satisfactory according to your idea? Yes, it was always very good food.
2777. Was it well cooked? Yes.
2778. Were you always satisfied in this matter yourself? Yes, quite satisfied.
2779. Do you, as an attendant, receive the same food as the patients? Yes, just the same; except that some of the patients might have a little better.
2780. How does that come about? Perhaps some of the patients would have more variety of food than I would get myself. That is what I mean when I say that patients might have better.
2781. What did the patients generally get for breakfast? They would have chops three or four mornings a week, steak, bread and butter, and jam.
2782. Did they get a plentiful supply of eggs? Not very often. Some of the patients would get bacon and eggs on a Sunday morning. We would not, and that is why I say that some of the patients had more variety of food than we did.
2783. What, as a rule, did you have for dinner? Roast mutton, boiled mutton, roast beef, and boiled beef, alternately.
2784. Was the diet changed about from day to day? Yes. We always had two kinds of vegetables besides the change in meat, as well as soup and pudding every day.
2785. What did you have for supper or tea, whichever you may call it? Sometimes cold meat, and sometimes stew.
2786. Did you have meat three times a day? Always, and there was also a supply of bread, butter and jam.
2787. In your experience was the cooking satisfactory? Certainly.
2788. Did you ever get beef-tea at, say, 11 o'clock in the day? There were two or three patients who got it always.
2789. Do you mean that patients who required it got it? Yes.
2790. Was Case No. 1 specially treated in regard to diet? He always got everything he wanted, no matter the hour; he had cocoa, milk, beef-tea, or anything else.
2791. At what time did you go to bed at night? Generally at about 10 o'clock; that is the rule of the institution, except when I am on night-duty.
2792. Have you ever been on night-duty? Yes.
2793. How often? Latterly on every alternate night.
2794. Does that mean always since you were first engaged at Bayview House? No, only since Case No. 1 was removed.
2795. Does that mean that you have been on night-duty after Case No. 1 was removed to that isolated cell—since then have you been on night-duty regularly? Yes.
2796. Were you on night-duty during the period that Case No. 1 was in that cell? Yes.
2797. How often did you visit him? Every two hours.
2798. Did you do so regularly? I had certain instructions to the effect that if I thought he was asleep I was not to disturb him, but on no occasion was I to leave him for a longer period than three hours, whether he was asleep or no.
2799. Did anybody take this duty on alternate nights with you? Yes, an attendant named O'Brien and other attendants.

Mr.  
J. Doherty.  
21 Nov., 1824

- Mr. J. Doherty.  
21 Nov., 1894.
2800. Were you provided with medical comforts for this patient, supposing he required them during the night? Yes.
2801. Where did you keep these things? In the cupboard in the dining-room.
2802. What were the means for making a cup of tea, cocoa, coffee, or any other warm drink, if such were required? There were every means to do so at a fire in the kitchen.
2803. Was not the kitchen door locked every night? I never found it locked.
2804. Are you quite sure on this point? I always found it open. I am quite certain about that.
2805. During the whole of your experience do you mean to say the kitchen was never locked at night? No.
2806. Was the dining-room locked at night? No.
2807. Were there cupboards open and available to male attendants? Yes.
2808. Was that fact generally known to the attendants? I think so; at all events they ought to know.
2809. Supposing we have had evidence from other witnesses to the effect that there was no such provision for obtaining these things—what would you say? That these witnesses must have been mistaken.
2810. Do you know, as a matter of fact, that attendants on the male side could obtain these things? Yes. There has been always available a supply of tea, cocoa, sugar, and other things which could be procured during the night.
2811. Was anyone in the dining-room looking after these things in the event of any case of sickness? We could always find them in the cupboard.
2812. Was there always a fire in the dining-room by which an attendant required to sit up all night could remain? Yes; there was always a fire in the winter-time, and whenever one was required.
2813. But in the summer-time was a fire required in the dining-room? No; but there was always a fire if we wanted to prepare tea, or coffee, or a warm drink in the kitchen.
2814. Had you always a store of these things ready? Yes; we could always get anything we wanted like that.
2815. Did you ever hear of any cases of accidents in the institution;—do you know of anything in this direction that happened to a patient named the Case No. 4? Yes; I heard something of that.
2816. Do you remember whether this accident resulted in a small wound in his head? Yes.
2817. Was he a poor miserable old gentleman who was unable to look after himself? Yes. He had to be put to bed at night.
2818. Who was his attendant? I think it was a warder named Mackenzie.
2819. Did Mackenzie ever tell you that the patient's head, or a wound in it, had been eaten by rats during the night? Yes; I think he said that rats had been at it.
2820. Did you ever see the wound in his head? Yes, I saw the wound.
2821. Did you notice any difference between the size of the wound on the night the wound was made and the next morning so that you would be able to say if it was likely that rats would have made that wound larger? As far as I am able to judge I can safely say that I saw nothing in the difference in the size of the wound that might not have occurred through the patient rubbing the dressing off.
2822. What was the size of the wound? I think it was about half-an-inch long.
2823. Latterly, after the man Mackenzie told you about the rats being in the building, was the wound any larger than it was at first, and ragged about the edges? No.
2824. Was it a clean cut? Yes.
2825. Was this fact brought specially under your notice? Yes, it was.
2826. Supposing we have evidence to say that a rat was seen to jump from under his pillow; that blood was seen under the pillow;—could that possibly be true, and you know nothing at all about it, if you had charge of this man? I never heard anything at all about it.
2827. Did you ever hear about a rat eating at this wound? No.
2828. Did you ever hear about rats infesting the bedroom at all? No, except that Mackenzie said that he thought a rat had done it. I saw no grounds for such a belief. I simply thought that Case No. 4 had rubbed the dressing off the wound. The wound was dressed again, and it was all right in a very short time afterwards.
2829. Reverting to these single rooms, were they cleaned every morning? Yes, they were.
2830. After they had been properly cleaned, did they smell at all offensive? No, not after they had been cleaned out.
2831. Did Dr. Vause make a round of the institution regularly? Yes.
2832. At what time of the day did he do so? He came round at dinner-time every day.
2833. Besides coming round every day at dinner-time, did he ever drop into the wards unexpectedly? Yes, he would come in two or three times besides.
2834. On these occasions did he walk through to see the institution and ascertain generally how the patients were getting on? Yes.
2835. Has any change been made or has there been any addition to the single rooms since you joined the establishment? No; the single rooms were always the same. There has been no change at all as far as I can see.
2836. Are the shutters in the single rooms drawn up every day? Always.
2837. Supposing we have it in evidence that a witness saw cobwebs on the joints of the shutter or window, indicating that it could not have been pulled up between the time that must elapse before the cobwebs could be made by spiders, do you think that is true? No; it would not be true.
2838. If it has been stated to us on oath that unbroken cobwebs were seen on that shutter, would that be true? No; it could not be true.
2839. Did you ever see any muffs used on patients? No.
2840. Did you ever see any patient put in a chair and fastened down? Never.
2841. Did you ever see a sheet or strap used for any patient of extraordinary violence, or was there any such rule observed in reference to dirty patients? No; I think not. In fact I am quite certain there was not.
2842. How many attendants are there on the male side of Bayview Asylum? There are five.
2843. How many patients are there on that side? The number varies, it is not the same always. On an average there must be fourteen or fifteen.
2844. Besides these five attendants, are there two additional men in the grounds, who can be called upon for assistance at any time? Yes.
2845. Do you remember Case No. 6? Yes, he is there now.

Mr.  
J. Doherty.  
21 Nov., 1894.

2846. Does he receive every necessary attention? Yes.
2847. Is he dirty in his habits? Not so very dirty.
2848. Do you have to take him to the closet regularly, and bring him back, and help him in this way? Yes, he is an invalid. He is taken out of his chair whenever necessary. He is taken to the closet at 10 o'clock in the morning, and 2 in the afternoon, later on in the day, and put on the commode at night. Besides this we have instructions to put on him clean trousers every morning and whenever he wants them; he receives every possible attention.
2849. Have you every opportunity of seeing everything that goes on in the male section of the institution? Yes.
2850. Taking it as a whole, do you know of any reason for raising any objection against the course of treatment adopted generally? No, I have no reason whatever.
2851. *Dr. Garran.* Did you, as an attendant, wait upon Case No. 1 for many months? Yes.
2852. Whilst you were in attendance on that patient did he talk freely to you? Yes, very.
2853. Did you ever hear him describe the room in which he slept as a stable? Yes, he would talk in that manner.
2854. Was he ever put to sleep in what he himself termed the satin-room? Yes, at first he was placed there, but he became so noisy and destructive that he had to be removed.
2855. When he was first removed from what he called the satin-room to the single room did he complain about his removal? I don't know, he may have complained.
2856. Do you distinctly remember whether he complained or whether he did not? I do not remember.
2857. Did you ever hear him say that as long as he was placed in what he called the stable he would tear his clothes? No, I never did, and he was just as bad in tearing his clothes when he was put to bed in what he called the satin-room.
2858. Do you not say that when he slept in the satin-room he was noisy, and that he disturbed the other patients? Yes.
2859. Did he disturb the patients there or only the attendants? He disturbed the other patients.
2860. Was it for the sake of the patients, for his own sake, or for the sake of the attendants, that it became necessary to remove him from the satin-room to the single cell? It was as much for his own sake as anything.
2861. Did he tear his clothes then? Yes.
2862. Did he tear the sheets? Yes.
2863. The blankets? Yes.
2864. The counterpanes? Yes.
2865. Did he pull the mattress to pieces? Yes.
2866. Did he have a hair mattress or a straw mattress? He had a hair mattress and a fibre mattress.
2867. Did you ever sleep in the room with him? Yes.
2868. Was he restless during the night? Yes, very.
2869. Did you have to get up to him often? Yes; he would throw everything about, shout and make a noise, tear up his mattress, and throw the fibre about the room.
2870. Would you on these occasions try to persuade him to lie down again? Yes; and sometimes he would lie down, but not always.
2871. Was it possible for you to get a night's rest while you were with him in that room? No; I did not have much rest on these occasions.
2872. Do you think that being in the room with him was conducive to further excitement and sleeplessness? I think my presence excited him at this time. He could not bear anyone with him at night. In the day-time he did not mind company so much.
2873. Do you feel sure that anyone being in the room with him at night was an irritating influence? Yes, it made him very much worse.
2874. Do you think that it would have been better for him to have been without any attendant? Yes, much better.
2875. Do you remember the occasion on which Professor Anderson Stuart visited the institution? Yes.
2876. Are you absolutely certain that when the door of the room occupied by Case No. 1 was opened on that Sunday morning the patient was wearing his pyjama trousers and a singlet? Yes.
2877. Are you quite certain on that point? Yes.
2878. When he was first put in that single room used he to tear his night-clothes off? Yes; he would throw off everything and refuse to wear anything.
2879. Would he tear his pyjamas to pieces as well? Sometimes he would and sometimes he would not.
2880. During the whole of the time which covered your experience was he supplied with pyjama trousers and a singlet while in the room at night? Yes, as far as I know.
2881. Do you know a man named Mackenzie, who was formerly employed at Bayview House? Yes.
2882. Did Mackenzie put Case No. 1 in that single room at night? Occasionally.
2883. When he put him in did Mackenzie also put a singlet and pyjama trousers on the patient? If he did not he ought to have done so.
2884. Well then, if he did not, did Mackenzie neglect his duty? Yes; it was his duty to leave the patient with sufficient night-clothes.
2885. Did you give him instructions to this effect? I think I did.
2886. Do you ever recollect having given Mackenzie such instructions? It was the custom for Mackenzie to bring the patient his pyjamas.
2887. Do you remember telling him positively to give the patient the pyjamas and singlet? I cannot say positively whether I did so, but it was the rule that the pyjamas and singlet should be supplied.
2888. Do you know whether the patient was left naked in the room at night? I know it was the rule that his pyjamas and singlet should be left there with him whether he wore them or not.
2889. Did the attendant put these articles of clothing on the patient before they left him in that room? They would try to induce him to wear his clothes.
2890. Supposing there was any trouble in putting his clothing on;—would they leave the articles in the room? Yes.
2891. Therefore, would the clothing be there for the use of the patient if he liked to put it on himself? Yes.

- Mr. J. Doherty.  
21 Nov., 1894.
2892. Was he very destructive in his habits? Yes.
2893. So destructive that it became necessary to supply him often with new pyjamas? Yes.
2894. Was he ever left without them, as far as you know? No, he was not.
2895. This is an important point, because of conflicting evidence, and are you certain of the truth of this statement? Yes; as far as I know, Case No. 1 always had night clothing.
2896. That is when he was put in the single room at night? Yes.
2897. Would he, as a rule, have the clothing on in the morning when he was brought out of the room? Yes; I am certain of it.
2898. Were his night clothes soiled in the morning? No.
2899. Was the floor of the room soiled as a rule? Yes.
2900. Well, then, if the floor of the room was soiled, and his pyjamas remained clean, must he not have had his pyjamas off during the night? I cannot say about that, but I don't think they were very much soiled.
2901. Who supplied him with pyjamas? I do not know, but I think it was his wife.
2902. That being so, would there be any economy, as far as Dr. Vause is concerned, in leaving him without clothing at night? There was no necessity whatever, as far as Dr. Vause was concerned.
2903. Did you take Case No. 1 to the bath that morning? Yes.
2904. Did he while on the way to the bath say, "I don't want to go to the bath, I'm cold"? No; if he had said so I should have heard him.
2905. Did the patient take his bath kindly on that morning? Yes.
2906. Was it a cold or warm bath? It was a warm bath.
2907. Did you obtain the hot water for that bath? Yes.
2908. Are you certain upon this point? I am. Case No. 1 never had a cold bath while I was there.
2909. If other people say that the patient was cold when he was walking across the court-yard, and that he said, "I do not want a cold bath," is such a statement true? He never said that.
2910. Are you sure he never said that? Yes, I am.
2911. Was at Mackenzie's duty, when he first arrived at the institution, to clean up the floor of the room in which Case No. 1 slept? Yes.
2912. Did you ever complain that he had not done it thoroughly, and had left a smell in the room? No; I do not recollect that I did.
2913. Was it usual for you to go into the room during the day-time? Yes.
2914. Have you ever noticed in that room a smell of stale urine on the floor? No.
2915. Did you put the patient in the room the night before the Sunday morning on which he was removed—I mean on the occasion of Professor Anderson Stuart's visit? I saw him directly he was put in.
2916. Was there a smell of urine in the room then? No.
2917. Did the smell go off from day to day, and did it only remain offensive early in the morning? There was no smell after the room had been scrubbed.
2918. Do you think any smell arose from the ground immediately beneath the floor? There was no smell.
2919. Does this floor dry better on a warm sunny day than it does on a damp misty day? Yes.
2920. Have you ever seen it damp when the patient was put in? No.
2921. Was it always dry and free from smell when he was put there to sleep? Yes.
2922. On that particular morning—I ask you again to be particular—was there a utensil in that room? There was a utensil in it.
2923. Do you remember noticing it then? Yes, I do.
2924. We have had it in evidence that there was not a utensil there;—therefore I want you to charge your memory, and I ask you again, have you a distinct recollection of seeing one? I say there was one there, and it is of no use saying there was not, because I saw it there.
2925. Was there only one in the two rooms? Yes; there was only an indiarubber utensil in the room occupied by Case No. 1.
2926. Was there a patient in the other room adjoining that of Case No. 1 on that Saturday night? No.
2927. Did you unlock the two doors of these rooms? No.
2928. Did you interfere with the other room at all? Yes, I interfered with it; but I did not unlock the door; I merely pulled the door open and looked in.
2929. If there was no one in that room at night, did you lock the door? No.
2930. Then could there have been a patient in that room? No.
2931. Was there one utensil available for Case No. 1? Yes.
2932. Are you perfectly certain it was put in his room for his use if he liked to use it? Yes.
2933. If the patient on any occasion had said that he did not like the stable, would he have been sufficiently intelligent to know that he had been changed from what he had called the satin-room to what he designated the stable? Yes, I think so.
2934. Did he ever say to you that if you put him back in the old room he would be quiet and cease to tear his clothes? Never.
2935. Did he ever ask to go back to that room? He may have done so.
2936. During his quiet days did you ever try to put him back into the satin-room to see if it would improve his condition? No.
2937. Am I to infer, then, that if once a patient is put into a single room he always has to sleep there? Yes, till he gets better.
2938. To the best of your knowledge, as an attendant, and from the experience you have gained in that capacity, did you think, in this patient's case, that the change from the satin-room to the single room was necessary and advisable? I believe it was; he rested better in the single room.
2939. Do you think he slept better in the single room? Yes, I am sure he did.
2940. Do you think he was any better in the day-time? I think so; but I know that at night he slept better.
2941. Were your orders from the Medical Superintendent to always be kind and considerate to the patients? Yes.
2942. So far as you are concerned, did you always behave as kindly as you could to Case No. 1? Yes, I was as kind as I could be. 2943.

Mr.  
J. Doherty.  
21 Nov., 1894.

2943. Was he once or twice extremely violent? Not much.
2944. Did his violence take the form of attacking the attendants? No; he might be a little rough sometimes.
2945. Would you have been afraid to sleep with him in the single room? I would not have cared to have slept with him.
2946. Did you sleep in the satin-room, or the room where there were three beds, one of which was occupied by the patient? Yes; I slept in one of those three beds; but the patient used to sleep in the little room adjoining the larger one containing the three beds.
2947. Did you sleep in the same room in which the patient was? No; there was a window and an opening in the door through which I could look and see him.
2948. Do you say that the rugs found in the single room on the morning of the 20th of May had blanket stitched on the inside? Yes.
2949. Did you ever see Case No. 1 in the act of picking the blanket off the inside? Yes.
2950. Would it be possible for the rugs to lose a good deal of their power to give warmth, owing to this blanket being picked off? Yes; they would lose some of their power.
2951. Do you remember noticing whether such was the case with the canvas rugs seen on this Sunday morning? No; the patient always tore the blanket out; he preferred the canvas rugs without the blanket.
2952. Do you think he knew what he was doing when he was picking off the blanket while he was in this single cell? I cannot say.
2953. Do you think the rugs might have been originally warmer than they were on that Sunday morning? Perhaps so; they were not quite new then, and he might have picked the blanketing off.
2954. When you visited that room in the morning did it smell very close, as if it was badly ventilated? No; it did not.
2955. Did it strike you as feeling very cold on winter mornings? No; I never felt it so after coming out of a warm room.
2956. Was there a shutter in the room? Yes.
2957. When you pulled that shutter up did it let more air into the room? Yes.
2958. Was there any clasp on the window? No; it was open frame work.
2959. Did you put the shutter up and down to regulate the quantity of warmth in the room? Yes.
2960. In other words, you would pull the shutter down to prevent the room becoming too cold, and pull it up when the room became too warm? Yes.
2961. Do you not say that when on night-duty you looked in on the patient every two or three hours? Yes.
2962. In what state did you usually find him when you saw him on these occasions? He was generally restless.
2963. Was he wearing his night-clothes? Yes.
2964. Did you ever see him lying down with the coverlets over him? Yes. Sometimes he would be lying down, and sometimes sitting up. If he was sitting up when I made my call, I would try to make him more comfortable. I would try and induce him to lie down and cover himself with his clothes.
2965. Did he ever complain to you of being cold during the night? Yes.
2966. Did he ever ask you for anything to drink during the night? Yes.
2967. What did you give him to drink? Whatever he preferred or asked for.
2968. What did he generally ask for? Cocoa.
2969. Have you ever given him a cup of cocoa during the night? Yes, repeatedly, and tea, too.
2970. Did you ever have to light the kitchen fire to do so? No; it was always lighted.
2971. Was it your custom to go to the cupboard and get the cocoa required? Yes; we always had a supply of cocoa inside.
2972. We have had it in evidence that the tea, cocoa, and stock of groceries was always exhausted, and that there could not be any of these things obtained from that cupboard at night;—is that so? That is not true. We draw our stores between 8 and 9 o'clock every morning, and those have to last until between 8 and 9 o'clock on the next morning, after breakfast. So that there were bound to be stores left during the night.
2973. But might not these stores have been used up during the day-time and nothing be left for the night? No.
2974. Was it anybody's business to see that a proper supply of stores was kept for night use? No; we were never short, for, as I explained, we always draw enough to last from one breakfast-time to another.
2975. Did it ever happen to you, when you wanted a cup of tea or cocoa, that you were ever unable to obtain the necessary materials? Never.
2976. How often would you make Case No. 1 a cup of hot cocoa during the night-time? I have done so as often as two or three times a night.
2977. Have you done so twenty times altogether? More than that.
2978. Did you prepare it yourself? Yes.
2979. At the fire in the kitchen? Yes.
2980. When you looked in upon the patient every two or three hours, was it your custom to disturb him at all—for instance, did you open the door? I always opened the door if he was awake or restless.
2981. How did you know whether he was awake or not? Sometimes he was noisy, and at other times I would look through the observation hole and it was then easy to tell. If he was quiet I would leave him alone.
2982. If, on the other hand, he was up and walking about, would you open the door and go in? Yes.
2983. Would you carry a lantern on these occasions? Yes, always.
2984. Did the patient ever attempt to burst out when you opened the door? No, never.
2985. When taking him out in the morning, did it often rain—I mean, did you take him through the rain when crossing to his bath? No; he was never taken out in the rain.
2986. How did you keep him out of the rain while crossing the yard to his bath, supposing it was a wet morning? If it was raining incessantly we would not take him out; he was kept under cover. If the rain was slight he would not get wet in crossing from the single room to the bath-room.

- Mr. J. Doherty.  
21 Nov., 1894.
2987. Was it a regular practice for the patient to make a mess in his room, or did he do it occasionally? He certainly was not a clean patient.
2988. Did you ever find the room clean in the morning when you removed him? Sometimes he would not make a mess.
2989. Do you say that he was taken to the closet three times in the day-time? Yes.
2990. Successfully? Yes.
2991. Did he very often wet the floor of his room, and did you find fæces about? Yes.
2992. Did the patient tear his clothes in the day-time? Yes; very much.
2993. Was it his custom to fiddle about his trousers, and especially the front buttons? Yes.
2994. If a lady came to see him would it be necessary in common decency to change these trousers? Certainly. She never came into the institution to see him. When she arrived at the institution his trousers were changed, and he was taken to her in the sitting-room.
2995. Has it ever been your duty to change his trousers before taking him into the sitting-room? I do not think so.
2996. We have been told that the garments had to be changed because he would be in a dirty suit. We are told that the patient was made presentable, and that he was put into better clothes before he saw his visitors;—is that so? No; I never changed him specially to see his wife.
2997. Did he go straight in to see her wearing the clothes he wore whilst walking about the place? Yes; except that we might put a collar on him, or something like that.
2998. But did you not change his trousers, waistcoat, and coat? No.
2999. Would you take him in in the suit of clothes he had on while in the grounds? Yes; I am quite certain about that.
3000. *Dr. Manning.*] Do you remember my visiting the institution a day or two after Case No. 1 was removed? Yes.
3001. Was I shown the room where he had slept? Yes.
3002. Did I see in that room several rugs? Yes.
3003. Were they the same rugs the patient had in that room during the night before he was removed? Some of them were.
3004. How many were there? There were three.
3005. Was not I told that they were the identical rugs used by the patient on that night? I do not know.
3006. Do you know how many of the three were there? Two of the three were there.
3007. Who dressed the wound on the head of case No. 4? Dr. Vause did so.
3008. Did he do so when the wound was first caused? Yes; I went specially for him and he came at once and dressed it.
3009. Who dressed the wound after some irritation had set in, caused by rats or something else? I did, and I got dressing from Dr. Vause.
3010. Did Dr. Vause see the wound again? Yes.
3011. How often did he see it? Every day.
3012. Did you tell Dr. Vause, at the time of the rumour, to the effect that the wound had been enlarged by rats? Yes.
3013. At that particular time? Yes; I think that I told him Mackenzie had said the wound had been made bigger by rats.
3014. Where did you usually sit when you were up on night-duty? In the patients' day-room.
3015. In the winter-time did you have a fire there? Yes.
3016. Did you ever do any cooking at that fire? We have cooked there.
3017. Have you not said, in the course of your evidence, that Dr. Vause came round at dinner-time, every day unfailingly? Yes.
3018. Does he come round earlier in the day than that? Yes. His regular daily round is made at dinner-time, but he might come in at 7 in the morning and sometimes he would drop in about 7 in the evening.
3019. At what time does Dr. Vause make his evening visit? He does not make any special evening visit, still he is liable to come it at any moment, and more than that he will always come when sent for.
3020. Were you employed at Cook's River on any previous occasion? Yes.
3021. This then is not your first engagement at Bayview House? No.
3022. How long were you there the first time? For two years and nine months.
3023. How long ago is that? I left in March, 1888.
3024. When you came back the second time for employment, was Case No. 1 a patient before your arrival? Yes.
3025. That being so, did you see him in the earlier stages of his case? No.
3026. How long had he been there when you came back? I cannot say.
3027. Were both of these single rooms, one of which was occupied by Case No. 1, ever occupied together? Yes.
3028. How often did this occur? Not often, but still Case No. 5 occupied one on one occasion.
3029. How long did he occupy one of those rooms? I cannot say.
3030. Did he occupy it for two or three days at a time, and then be removed to one of the other rooms? Yes.
3031. What was the longest time, as far you know, that Case No. 5 occupied one of those rooms? I cannot say the exact length of time, but I think the longest time he was in it was after he attempted to attack Dr. Vause with a knife. He was then removed because the other patients objected to sleep in the same room with him.
3032. Was he there for several weeks? Yes; he remained in the single room until he was removed from the institution.
3033. We have heard something about carpets being taken up and fresh carpets being laid down when official visitors have come to the institution;—is that so? I know nothing at all about that. I have never seen carpets put down or taken up when official visitors have come. There has never been anything done in regard to carpets beyond what is done every morning.
3034. *President.*] Has not your experience always been on the male side of the institution, and amongst private patients? Yes.

Mr.  
J. Doherty.  
21 Nov., 1894.

3035. Have you ever heard from the female attendants that changes were made in the bedding and in the arrangement of the dormitories when the official visitors came? No; I never heard any such report.
3036. *Mr. McGowen.*] Had you any previous experience in lunatic asylum work before you went to Bayview House? What is that to do with this enquiry?
3037. *President (addressing witness).*] It is your duty at this inquiry to answer questions put to you by any member of the Commission, therefore you must answer the question asked by Mr. McGowen; that question is: "Had you any previous asylum work before you went to Dr. Vause?" Yes.
3038. *Mr. McGowen.*] Where did you gain your previous experience? In New South Wales.
3039. At what institution? Gladesville. I worked for Dr. Vause first, and then went on to Gladesville.
3040. Why did you leave Gladesville? Because I believe the chief attendant had a "down" on me.
3041. Were you dismissed from Gladesville? Certainly. When he said he had a "down" on me and would make it hot for me I left.
3042. As a matter of fact, were you dismissed, and what is the reason assigned for your dismissal? I cannot say.
3043. How long is it since you were dismissed? It must have been in 1888 or 1889.
3044. Were you not informed at the time of your dismissal why you were dismissed? No.
3045. Did you get any reference when you left Gladesville? [*No answer.*]
3046. Who was the Medical Superintendent when you were dismissed? Dr. Sinclair.
3047. Did he give you any reason why you were dismissed, or do you think it was because the head attendant had some personal spite against you? I might surmise that.
3048. Did you ever try to find out why you were dismissed? No.
3049. Were you ever in the police force here or anywhere else? Yes.
3050. Were you dismissed from that? No.
3051. Were you dismissed as a warder from some gaol? No.
3052. Did you not say in the course of your evidence in chief than Case No. 1 was kept in that single cell for six or seven months, and that previous to that he had slept in another room? Yes.
3053. When sleeping in the other room was it the patient's custom to tear his pyjamas and singlets? Occasionally.
3054. If he tore his night-clothes early in the night would you put fresh clothes on him, or did you ever know him to tear two separate pyjamas in one night? I cannot say that I have; he might and he might not.
3055. Did you ever know him to do it? I cannot say he did.
3056. Was it the invariable custom that if the patient did tear his suit you would put a fresh one on him? Yes; we tried to make him as comfortable as we possibly could.
3057. Supposing we have it in evidence that, shortly after he was taken away from Bayview, he would frequently tear two suits or night-shirts in one night, do you still say you never saw him do so while at Bayview? He might be worse after he left Bayview House.
3058. Did you ever see him tear his clothes the second time in one night? No.
3059. How many suits did he tear during your experience of him at Bayview House while he occupied the single room? I cannot say.
3060. Do you think he tore during those six or seven months half a dozen suits of pyjamas? Yes, he did.
3061. More than that? Yes.
3062. How many more? I don't know how many he tore.
3063. Do you think it was as many as a dozen suits? Yes, it might be.
3064. Do you think he tore more than a dozen suits? I don't know how many he tore.
3065. Was it Mrs. \*\*\*'s place to get fresh pyjamas in the event of Case No. 1 tearing up his supply? Yes.
3066. Do you say that on the morning of the 20th of May when you and O'Brien moved the patient from the single cell he had on his pyjamas and singlet? Yes.
3067. Are you positive on that point? Yes.
3068. Did the singlet come high up the neck or chest? It would not come up very far.
3069. But any distance up the neck? No: it would not come up very high.
3070. When you took the clothing into the patient did you put his trousers and coat over his pyjamas and singlet? Yes.
3071. Supposing we have had it in evidence from other witnesses that they could see no singlet, that his neck and chest were bare, when you and O'Brien were bringing him out of the cell:—is that correct? No. Nobody could see his chest or neck; they were covered up. He had something round his neck.
3072. What did he have round his neck? A necktie.
3073. Was it an ordinary necktie or a handkerchief? It was an ordinary necktie. Besides he had on a woollen shirt also, so that his chest could not be exposed.
3074. Are you also firm in your opinion that there was an indiarubber utensil in that room? Yes.
3075. Was it left in the room when you and two attendants took the patient out? Yes.
3076. Was it still in the room when Dr. Vause, Professor Anderson Stuart, and others went into the room? Yes.
3077. Are you positive it was not taken out of that room? Yes.
3078. Do you say that alternately you and O'Brien were on night-duty watching Case No. 1 in his room, while he was in his cell? Yes.
3079. Did you do so for the six or seven months prior to his being removed from Bayview House? Yes.
3080. Was it your custom, when on duty, to get up at half-past 5 in the morning and work till 10 o'clock at night? Yes.
3081. When you were on night-duty did you work the whole of the next day? No.
3082. When would you go on duty? We need not go on at all, if we didn't like. We would be about the place. We were always there if we were wanted.
3083. After you had been up, say, for every second night on this night duty, would it be your custom to have a sleep the next day? No.
3084. Not after having been on night duty every second night? No.
3085. Who was on duty the night previous to Case No. 1 being taken away? I was.

- Mr. J. Doherty.  
21 Nov., 1894.
3086. How often did you look in on the Case No. 1 through the night of the 19th May? About every two or three hours.
3087. Was this custom only followed as far as that patient was concerned, or was it followed with every other patient placed in these secluded cells? It was followed whenever a patient was sleeping in a single room.
3088. Do you mean to say, that if a patient was put into a single room, someone was always on night-duty and saw this patient or patients, as the case might be, every two or three hours? Yes.
3089. Are you positive about that? Yes.
3090. Could you get cocoa or a warm drink for this patient if it were necessary? Yes.
3091. Was there a fire in the kitchen where you could make it, and was that fire kept alight all night through? Yes.
3092. Both summer and winter? Yes; when there was any occasion for it. In fact there was always a fire in the kitchen summer and winter all night long.
3093. Is there any book kept at the asylum in which an entry is made showing the date on which Case No. 1 was first put into that room? Not that I am aware of.
3094. Did you and Farquharson examine any book to see when the patient was put there? No.
3095. Have you had any talk with Farquharson about the evidence he gave before this inquiry? No; I have had no talk at all.
3096. Did you ever mention it? No.
3097. Have you had any talk with Peet, the painter, on this subject? No.
3098. If you and Peet agree exactly to the month the Case No. 1 was put into that room, and Farquharson gives different evidence as to the time, has he made a mistake? I do not know; I have had no talk with either.
3099. Have you had any talk with Dr. Vause in regard to the evidence you are giving here to-day? No.
3100. Not at all? None.
3101. Did Dr. Vause tell you anything about evidence that had been given here? No.
3102. Are you sure upon that point? I am.
3103. In answer to Dr. Manning have you not said that a day or two after the 20th of May Dr. Manning was shown the rugs which covered Case No. 1 on the night of the 19th of May? Yes.
3104. Do you not say that two out of the three were used on that night? Yes.
3105. Are you positive on that score? Yes.
3106. If it has been sworn that there were no rugs in the cell on the morning of the 20th but only pieces of canvas would that be incorrect? Yes.
3107. What do you take to be the difference between a rug and a piece of canvas? There are specially strong rugs made for destructive patients. They are made with canvas and lined with blanket.
3108. Does that make it a rug, or if it was without blanket would it be a piece of canvas pure and simple? Yes.
3109. Are you sure that there was blanketing fastened to these pieces of canvas? Yes; and Case No. 1 has always been in the habit of having such.
3110. Why did you tell those two men to go away from that room on the morning of the 20th of May? It is the usual thing when a stranger comes about the place for him to go direct to the office, and I thought they should go to the office instead of remaining in the yard.
3111. Did you not say to them roughly you didn't want loiterers there? No; I never said that.
3112. Did you not put your hand on the men's shoulders and tell them to go away? No, I did not.
3113. Did you not do that, knowing who they were, after ascertaining the names of Professor Anderson Stuart and Mr. Sager? I did not know any one of them.
3114. Did you not take Professor Anderson Stuart and Mr. Sager round to the office? Yes, I took them round.
3115. Did you not then come back to the courtyard and order these other two men away, telling them they were trespassers? I volunteered to take them round to the office.
3116. Was it not because you wished to take the patient out of the room that you tried to get them away? No.
3117. Do you think that Dr. Manning, the Inspector-General of the Insane, knew that Case No. 1 was put into this room by himself at night? I do not know.
3118. Do you think the visiting doctors knew of it? I do not know.
3119. Do you think the patient's family knew of it? I do not know.
3120. Did you ever go with the patient when he was visited by his wife or members of family? Yes.
3121. Did you take him into a nice room in the house? We used to take him into the reception room.
3122. Did you endeavour to make the family think he slept in a room where there was a bed, counterpane, sheets, and blankets? During the time the patient occupied the room upstairs I saw his son seeing him in that room, but after he was removed downstairs I don't think the visitors were taken to the room in which he slept. His visitors saw him in the reception-room where all the patients were taken.
3123. Did you ever hear the patient say to his friends, "I don't sleep in this room, I sleep in the stable"? He never said that to his friends.
3124. Do you think his friends knew he slept in this isolated room? I do not know.
3125. *Dr. Manning.*] How long were you at Gladesville? About four or five months.
3126. *Dr. Vause.*] When friends were visiting patients, did you frequently leave them alone together and sit outside the room, so that there should be every opportunity of friends and patients speaking in private? Yes; that is the rule.
3127. If you did sit in the room during the interview, would it be at Mrs. \* \* \*'s request? Yes.
3128. On account of the patient's tendency to expose himself? Yes.
3129. Have not the official visitors gone round the institution without being accompanied by the Medical Superintendent? Yes; I have seen them go.
3130. Has Dr. Manning ever gone round without me? Yes.

[Witness withdrew.]

Mr. James O'Brien sworn and examined :—

Mr.  
J. O'Brien.  
21 Nov., 1894.

3131. *President.*] Are you at present an attendant engaged at Bayview House? Yes.
3132. How long have you been there? About eighteen months.
3133. Was your engagement there your first experience in lunacy work? Yes.
3134. How were you engaged? By Dr. Vause, at the institution.
3135. Did you sign the ordinary book containing your obligations, duties, regulations, and so on? Yes.
3136. Are you still an attendant at Bayview House? Yes.
3137. Are your duties those of an ordinary attendant? Yes.
3138. Do you remember Case No. 1? Yes.
3139. Was he latterly placed in one of the two rooms detached from the main building? Yes.
3140. How long did he remain in that room? About six months, I think.
3141. Do you remember him sleeping in what he used to call the "satin room"? Yes.
3142. Did you ever take care of him then? Not at night. I used to look after him in the daytime mainly.
3143. After the patient had been removed from the satin room to the cell, did you often put him in at night and take him out in the morning? I took that duty in turn with other attendants—Doherty, Mackenzie, and Copley.
3144. When you placed him in that cell at night did he object to go? Sometimes he might object and at other times he would ask to be put in.
3145. When he objected to go to that room, what reason did he urge? He gave no reason.
3146. Was he an excitable sort of patient? Yes.
3147. Was he ever unmanageable? Yes.
3148. Was he sometimes violent? Yes.
3149. Did you ever see him in a violent fit? Yes.
3150. Did he ever try to knock you down? Yes, often.
3151. What was the process you followed when putting him in the single room;—did you take his day clothes off and put his pyjamas and night clothes on? Yes, always.
3152. Did you make a bed for him? Yes.
3153. What sort of a bed? It would be a sort of canvas ticking filled with straw.
3154. What kind of covering did he get for his bed? Canvas sheets lined with blanket.
3155. Do you usually call these rugs? Yes.
3156. Did you always supply him with pyjamas? Yes.
3157. And a singlet too? Yes; but sometimes we had to leave him without a singlet, because he would not wear it.
3158. Was he ever put into that room naked? No, never; not all the time I have been there.
3159. Was there a utensil in his room? Yes.
3160. Always? Yes.
3161. What sort of a utensil was it? An indiarubber one.
3162. Was the room adjoining the one occupied by this patient ever occupied by some other patient? Yes.
3163. Did he have a utensil too? No.
3164. How did you manage, then, with one utensil between two rooms? The other was a clean patient, and we used to give him a commode.
3165. Did Case No. 1 destroy his pyjamas? Yes.
3166. Did you give him fresh ones after he had torn others to pieces? Yes.
3167. At what time, as a rule, do you go to bed? At the usual hour, 10 o'clock.
3168. Did you ever have to go on night-duty on alternate nights for the purpose of watching Case No. 1? Yes.
3169. Did you take it in turns with Doherty? Yes.
3170. Did you ever go into the patient's room after 10 o'clock at night.
3171. Did you do so for the purpose of supplying him with required refreshment, such as anything to eat or drink? Yes.
3172. Did you ever give him warm milk or hot cocoa? Yes.
3173. Did you ever have to cook the cocoa? Yes.
3174. Where did you cook it? At the kitchen fire.
3175. Was there always a fire there? Yes, every night.
3176. Was there any place in the dining-room where you kept stores? Yes; we used to keep milk, bread, cocoa, and so on, in the cupboard in the dining-room.
3177. We have been told in evidence that this cupboard was always locked up;—is that true or not? It is perfectly untrue.
3178. Could people on the female side get the same materials if they tried to? I believe they had a supply of their own.
3179. Did you ever know any female nurse come over to the male side to get supplies of cocoa, milk, and so on, from the place where you kept your provisions? I think I have seen them come, but very seldom.
3180. Were provisions available if wanted? Yes, certainly.
3181. When it was your duty to watch Case No. 1 during the night how often did you see him? Every two hours.
3182. Regularly? Yes, if he was not sleeping.
3183. If he were sleeping did you disturb him? No.
3184. At night-time when you put the patient in that room did you always pull down the shutter in the in the wall opposite the door? That depended upon the state of the weather; I would pull it down on a cold night and pull it up if the weather was warm.
3185. Do you know if the patient shivered much when cold? I do not think so; he was always very shaky on the warmest day.
3186. Did you have to clean out the room after it had been used by him? Yes.
3187. Usually, did the floor take long to dry? As a rule, about two or three hours.
3188. Was the room always sweet when you put the patient in it at night? Yes; I am perfectly sure about that.

- Mr.  
J. O'Brien.  
21 Nov., 1894.
3189. Under whose order was he put in that room? That of the medical superintendent.  
3190. Did you hear the medical superintendent give that order? No.  
3191. Have you any knowledge as to how he was put into that room? No; I saw him put there on the first occasion.  
3192. Have you ever heard either any of the patients or the attendants say it was a great shame that Case No. 1 was placed in a room of that kind? No; I never heard that.  
3193. Have you heard any grumbling at all? No.  
3194. On the morning Professor Anderson Stuart and Mr. Sager went out to the patient, and when you took him out of the room, was he wearing his pyjamas, and did you put his ordinary clothes over his pyjamas and singlet? Yes.  
3195. Are you certain about that? Yes.  
3196. Did you put his ordinary day clothes over the others before you took him to his bath? Yes.  
3197. Was he in a very dirty condition then? No; he was not so dirty that morning.  
3198. How about the smell of the room;—was not that bad? Not so very, for it was not as dirty as usual. I think he had some dirt on his head.  
3199. What were the clothes you took across to the room? A dark tweed suit.  
3200. How long had he been wearing these clothes? A month or two, I think.  
3201. Did Mrs. \* \* \* buy them for him? I cannot say.  
3202. Had he been using this suit until it had become dirty? I do not think so. He had three or four suits to wear.  
3203. Do you know a former attendant named Mackenzie? Yes.  
3204. Do you remember Case No. 4 at Bayview House? Yes.  
3205. Do you remember that he met with an accident, by which his head was cut? Yes.  
3206. Did the attendant, Mackenzie, ever tell you anything of a curious nature concerning this wound? No.  
3207. Did he ever say anything about rats having attacked it? No, sir.  
3208. Was anything said about rats being in the beds? No.  
3209. Did he ever say anything at all to you about rats? Yes; he said there were a few rats in the old building.  
3210. Did you see his head three or four days after he met with the accident? Yes.  
3211. In what condition was the wound? It had been dressed with lint, and he tore the dressing off, it was then dressed again.  
3212. Did you ever hear that rats had gnawed the wound? No; I never heard that mentioned.  
3213. Do you mean to say that you have never heard such a rumour before I put to you this present question? No, sir.  
3214. How often does Dr. Vause see his patients? I have seen him go through the institution as many as three or four times a day; but his regular time is about noon.  
3215. Does he always appear to take a kindly interest in all of them? Yes.  
3216. Have you always been employed in the private part of the institution? Yes.  
3217. Have you ever seen the beds altered on the occasion of the arrival of the official visitors at the institution? No.  
3218. Have you ever seen the patients better dressed on such occasion? No; there was never anything done to them, except to make them clean.  
3219. Did you ever go with the patients when they were taken to see their visiting friends? Yes.  
3220. Did you sit beside them during the interview? Yes.  
3221. Did you ever hear them complain about their treatment at the asylum? No.  
3222. Was it not the general practice for the attendants to sit in the drawing-room during the interview between patients and friends? No; it was not usual. We always sat together, and the attendants heard everything that took place between them.  
3223. Have you ever seen any restraint used amongst the patients—I mean physical restraint? No, sir.  
3224. Did you ever see muffs used, or patients tied down? No; I have never seen muffs, or a straight jacket in the place.  
3225. If it happened at an odd time that a patient became very noisy—I am speaking of when you were on alternate night duty with Doherty—did you administer sleeping draughts? No; they were administered by Doherty.  
3226. Did you notice if good effects followed this custom;—did the patients sleep afterwards? Sometimes they slept afterwards.  
3227. Is the evidence you have given the general result of your experience at the institution? Yes.  
3228. Is this the only experience you have had in connection with such an institution? Yes.  
3229. *Dr. Garran.*] Did you give the Case No. 1 his pyjama trousers and singlet when he was put into that cell? Yes; sometimes he would not wear the singlet.  
3230. Was he occasionally more restless than at other times? Yes, and then he became more destructive.  
3231. Have you known him tear more than one suit of pyjamas at night? Yes; I have known him to tear two.  
3232. When you have found him naked through these destructive habits, would you go inside the room and put on him a fresh suit of night clothes? Sometimes I would when he would let me. I used to use every effort to get him into a more pacified state of mind, and then try to put fresh clothes on him.  
3233. It has been stated in evidence that when he was removed from this single room on the morning of the 20th of May, cobwebs were seen unbroken over the shutter in that room—of course, indicating that the shutter could not have been lifted for some little time;—is that so? There were no cobwebs there.  
3234. Did you pull that shutter up and down at least once or twice a day? It was certainly pulled up once a day, therefore there could not have been any cobwebs there.  
3235. Did that room ever smell very badly when you put the patient in at night? No.  
3236. Was there a smell of stale urine about the place? No.  
3237. If there had been such a smell would you have detected it? Yes; but I have never smelled it in the daytime after the room was properly scrubbed.

3238. How often have you given cocoa or warm milk to this patient during the night? I have done it on two or three occasions, and on one I remember giving him warm cocoa three times in a night.
3239. Did he use to ask for it on his own accord? No; I used to suggest it to him, thinking it might soothe him to sleep.
3240. Did it soothe him at all? Sometimes he would rest after it, and at other times he would not.
3241. While you were on night-duty did you look in upon the patient every two hours? Yes.
3242. Under whose instructions? Those of Dr. Vause.
3243. Did you carry out those instructions faithfully, and never neglect your duties? I am quite sure I did not neglect them.
3244. Did you ever go to sleep yourself all night and leave him alone? Never.
3245. Used you to open the door when you made calls on him during the night? If he was noisy I would, but if he was asleep I would look through the observation hole and refrain from disturbing him.
3246. Did Mackenzie ever tell you that he considered Case No. 1 was shamefully treated while at the institution? No, not while he was there.
3247. *Mr. McGowen.*] Have you had any talk with anybody with regard to the evidence you are giving here to-day? No.
3248. Not with Farquharson? No.
3249. Nor Peet? No.
3250. Nor Dr. Vause? No.
3251. Nor Mackenzie? No.
3252. Have you seen Mackenzie since he left the institution? I have, but I did not say anything to him about the evidence.
3253. Are you sure that on the morning Case No. 1 was moved out of that cell there was a utensil in the room? On that morning I could not say whether it was there or not; I was not in the room.
3254. Do you know whether one had been placed in the room over night? Yes.
3255. Did you ever take it out yourself? Yes, very often.
3256. Did you ever see the patient do anything with it? Yes; when I have been to take him out I have seen him sling it out.
3257. Did you ever give him his breakfast in that room? No; not his breakfast, but I have given him cocoa, or something of that kind before taking him out.
3258. Do you know who gave the order to put him in this single cell? I do not for certain, but I think it must have been the Medical Superintendent. I was not there when he was first put in.
3259. Are you positive the patient was in that room for six months? Yes; for about six months while I was there.
3260. During that period were you on night-duty every second night? Yes; for the six or seven months I speak of.
3261. When you had been up all one night, when did you go to sleep? Oh, generally about 1 o'clock, and sleep through the day until about 10 o'clock at night. I would then get up and go to bed again.
3262. What am I to understand; if you had been up all Monday night, would you go to bed on Tuesday about 1 o'clock and sleep till 9 or 10 at night? Yes.
3263. Would you then go on duty again? No.
3264. Would you go to bed again? Yes.
3265. Were you outside on the morning that this patient was taken out of that room? Yes.
3266. Did you see him come out? Yes.
3267. Had he on pyjamas and a singlet under the coat, trousers, and jacket Doherty had put on him? Yes; I took these things off when we gave him his bath.
3268. Are you sure Doherty ordered the men who were waiting outside off the premises? He did not.
3269. Did you order them away? No.
3270. Supposing we have had it in evidence that when you and Doherty were taking Case No. 1 across the yard that his neck and a portion of his chest were exposed;—is that true? It was impossible.
3271. Was his coat buttoned up then? Yes.
3272. Had he a handkerchief on his neck? I am not quite sure about that. If he had one he tied it round his neck himself.
3273. Are you positive that during the whole time he was in that room either you or Doherty put him there every night? Yes.
3274. Do you know that other patients slept in the single cell? Yes.
3275. Was there always a night attendant on duty when a patient was in a single room? Yes.
3276. Was it the duty of the night attendant to see that patient every two hours to ascertain how he was going on? Yes.
3277. *Dr. Garran.*] On the morning of the 20th May did you hear Case No. 1, as he was going across the yard, say "I don't want to go to my bath; I am cold"? No.
3278. Had you hold of him while he was crossing from the single room to the bathroom? Yes.
3279. Did he resist you while walking across? No, he simply leaned on me.
3280. Did he not say, "I don't want to go"? Not to me, or not that I heard him.
3281. Did he seem specially cold on that morning? No.
3282. Was he more shaky than usual? Yes.
3283. Do you think he was trembling from cold? I do not know.
3284. Did you bath him? Yes.
3285. Was the water warm? Yes.
3286. Who obtained the warm water? I did, from the pantry.
3287. Did the patient ever have a cold bath while there? No, sir; never while I was there.

[Witness withdrew.]

Mr.  
J. O'Brien.  
21 Nov., 1894.

FRIDAY, 23 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, the Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
ESQ., M.D., INSPECTOR-GENERAL OF THE  
INSANE.ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was also in attendance to hear evidence and examine witnesses.

Bridget Morrissey sworn and examined:—

Bridget  
Morrissey.  
23 Nov., 1894.

3288. *President.*] Were you engaged at Bayview Asylum for a considerable time? Yes.
3289. What position did you occupy while there? I was nurse for some time, and matron for a long time.
3290. How long were you at that institution altogether? Very nearly five years.
3291. Do you remember the date on which you first went there? Not exactly, but I remember I left in November, 1893, or perhaps it was about a fortnight before Christmas.
3292. Why did you leave the institution? I left after that poisoning case.
3293. Had you anything to do with that case? I was matron at the time, and in that position was to a certain extent responsible for it.
3294. In consequence of that case did you voluntarily resign or did Dr. Vause ask you to go? After the event to which I have referred I did not like the place. Everything seemed to have become so uncomfortable; therefore I asked Dr. Vause to let me go, and he did.
3295. Did Dr. Vause give you a certificate of character when you left? Yes, a good character.
3296. Did you sign a book to the effect that during your experience of the institution everything that should have been done for the comfort of the patients was done? Yes.
3297. When you were originally engaged did you sign the obligation to obey all the rules and regulations of the institution? Yes.
3298. Was a copy of those rules and regulations given you for your perusal and guidance? Yes.
3299. Did all the nurses get this when they joined the institution? Yes.
3300. While you were matron of the institution had you different female attendants under you? Yes.
3301. If any irregularity occurred in the institution did these female attendants report them to you or to Dr. Vause? As a rule they reported them to me, and I would report to the doctor if necessary; but at the same time they could report direct to the doctor if they wished to.
3302. Are you quite sure on this point, for we have had it in evidence that instructions were issued to the effect that all complaints must be reported to you? All I can say is I never stopped anyone going direct to the Medical Superintendent.
3303. Do not some of the women on the Government side require to be placed in separate cells on some occasions? Yes.
3304. Had you any special provision as to the dressing of these patients, or how did you put them into these cells? That depended on the sort of patient. Some of them would have clothes on; but if the patients were violent or suicidal, we would leave nothing on them.
3305. Who gave you instructions to this effect? I did not receive any instructions; that is the general rule.
3306. At what time did you usually get up in the morning? About 6 or 6.30.
3307. What time did you go to bed at night? While I was matron I would generally do my last round the last thing, and report to the doctor, before I went to bed at 10 o'clock or about 10.30. Sometimes I might be up a little later waiting for some of the girls who had been out to spend the evening at the play or anywhere else.
3308. Was there any provision made for supplying nourishment to patients, supposing it was required during the night? There was always a supply of tea, and milk, and cocoa, and such things.
3309. Was there a night nurse to administer these things? If a patient was sick there was always a night nurse, and when in the dormitories a nurse used to sleep with the patients.
3310. But did a nurse sleep in the single rooms? No.
3311. Were the patients put in these single rooms at night and left there until the morning? Yes.
3312. Did these patients have every comfort suitable for their condition, such as night-dresses and good bedding? Yes; the Government patients had beds and rugs, and private patients took their own clothes in with them from the dormitory.
3313. Supposing one of the patients took ill during the night, how would you become aware of it, and what provisions were made for dealing with emergencies of this kind? We should hear of it very quickly. I know there was always cocoa, tea, milk, and bread and butter.
3314. Was there a fire at which to prepare these things? There generally was a fire in No. 2 dining-room all through the winter-time.
3315. Was there a fire there during the summer-time? No.
3316. How did you manage to attend to these patients when there was no fire in No. 2 dining-room? The nurse would go to the kitchen fire to make the warm drinks.
3317. Was not the kitchen door locked on the female side? It was at one time, but it is not so now.
3318. Could the male attendants all get access to the kitchen? Yes; so could the female until the cross-lock was put on the door.
3319. To get that cross-lock open had you to get a key? Yes; the cook's room was quite close. We could waken the cook and get the key.
3320. Where were these provisions kept? They used to be kept in a place in the old kitchen.
3321. Where is that in regard to the present kitchen? In the yard, just opposite to where the new kitchen is now.
3322. Do you mean to say that you can always get medical comforts, such as milk, or a cup of tea, bread and butter, sugar, and so on, if you want it? Yes.
- 3323.

Bridget  
Morristy.

23 Nov., 1894.

3323. Do you get them from the stores? Yes; the stores are given out every morning in sufficient quantity for the next twenty-four hours.
3324. We have had it in evidence from other nurses that there was no provision of tea or sugar and so on, either for the nurses themselves or for the patients, and in any sudden cases of sickness which might occur during the night-time;—is that so? No; not unless there has been a great change made since I left; there was always plenty of tea and so on when I was there. I know we used to have tea during the night.
3325. Well, supposing one of the female patients became ill during the night, and it was necessary to supply her with certain nourishment, how would you get this nourishment? From our supplies, and if there was no particular nourishment there that we required we would awaken the cook.
3326. Was there any separate supply of stores for these patients? No; unless there was something specially ordered.
3327. Was there any special visitation made to patients in the single rooms during the night—say, for instance, every two or three hours? No, sir.
3328. Did nurses sleep in the vicinity of single rooms? Yes; there was a nurse sleeping at each end.
3329. Was there anyone in control, or were there only the two nurses at the ends of the single room? The two nurses used to sleep there; then the next nearest nurse was the one in charge of the patients in the long dormitory.
3330. How far is that long dormitory away from the patients in a single room? 30 or 40 feet, I should think; fully that.
3331. Supposing a patient in one of the cells kicked up a row during the night, would the nurses sleeping where you say be able to hear it? Yes, they would always hear any outbreak.
3332. Were not these patients noisy at times? Yes, and sometimes they were very quiet.
3333. Supposing five or six of these patients were making a noise together would you go and see what was the matter? We should if we thought it was anything unusual. We always understand and know the nature of the noise coming from these patients, and if it was anything out of the ordinary the nurses would get up.
3334. Do you think the nurses at Bayview House were overworked? Well, they had plenty of work to do.
3335. Had you a good number of dirty patients? Yes.
3336. Did you give them a bath once a week, on Saturdays? Yes; and oftener if they required it.
3337. Did patients get a hot-water bath at any time? Yes.
3338. Did some of the patients prefer sleeping naked in loose straw? Yes; there was one, Case No. 15, in particular. She always tore up the bed-tick and everything else.
3339. Did she appear to be quite comfortable in that, or did she make any complaint? No; she did not complain.
3340. Did any of the others complain? Well, only in this way: A new patient might complain on the first occasion, then she would get used to it, and did not seem to mind.
3341. What utensils were provided for these eleven or twelve single rooms? There were four or five india-rubber ones in my time.
3342. Why was not one supplied for every room? Well, I can only say that they did not generally all have them. They did not get them if they did not ask for them.
3343. What was the general character of the food supplied on the female side—for instance, what kind of meat? I never had any fault to find with the meat.
3344. Was it well cooked? Yes, fairly well.
3345. Had you any fault to find with the meals generally? Occasionally there would be some fault found, perhaps with the dinner, which would be taken back.
3346. Did you usually have the same kind of food as the patients? Yes.
3347. Was it always sufficient in quantity? Yes.
3348. Did the patients always get sufficient? Yes.
3349. Was there always an ample supply of clothing? Well, yes; but sometimes we might run short for a few days, but not very often.
3350. We have heard it in evidence that the Government patients were insufficiently clad;—is that so? Sometimes there might not be much underclothing to spare.
3351. But was there always a sufficient supply of underclothing? Sometimes they might run a little short.
3352. Had you a store of these things? Yes.
3353. Do you mean that the store itself would run short? Yes; perhaps it would for a day or two.
3354. It has been stated in evidence that some of the patients on the Government side would not have stockings on, and that altogether they were scantily clothed? It was this way; It is nothing to find the patients without stockings, for sometimes they pull them off and tear them up. The quieter patients would be better dressed than the destructive ones.
3355. Supposing friends of a patient came on a visit, would the patients be taken from the ward and a change be made in her attire? We would always change them and put them in clean clothes.
3356. Would you take the clothes off one patient and put them on another—that is on the patient going to see her friends? No; perhaps on some occasions, in a hurry, if the stock was low, we might use another patient's dress.
3357. Could you always be certain about the fit? We are not so particular about that so long as the patient is clean and presentable.
3358. Did you have a large number of dresses made in a general way, and use them for these purposes when necessary? Yes.
3359. When the Government visitors came to the institution did you always get a message notifying their arrival, and a request to put the patients in proper order? Yes; we would always know when official visitors came.
3360. Would you get notice sufficiently early to enable you to get the patients ready? Well, not very early; we would have a few minutes to get them ready.
3361. You must have been very clever—how did you manage? We would all help one another.
3362. As a matter of fact in making these changes would you put on the patients nice clean clothes when visitors came? Yes; on the very bad patients we would put on fresh dresses.

- Bridget  
Morrisey.  
23 Nov., 1894.
3363. Did the official visitors ever examine the dresses of the patients? No, I think not; unless Dr. Manning did.
3364. Were the official visitors usually accompanied by Dr. Vause? Sometimes.
3365. When it was not the case, did you report to the visitors about these patients? No.
3366. Did they ever ask you personally about the patients? Not usually. I think Sir Alfred Roberts spoke to me on one occasion.
3367. Do you think the official visitors ever noticed the dresses on dirty patients? They never examined the dresses, or anything at all, that I am aware of.
3368. Do you not know if they took any report from the official in charge in regard to matters of this kind? I do not know anything about that.
3369. Were you on particularly good terms with Dr. Vause? Yes, always, until about the time I left.
3370. In giving your evidence to-day, are you prompted by a desire to speak the truth and not to favour Dr. Vause? Yes; I have never seen Dr. Vause until this morning since I left Bayview House.
3371. It has been said by previous witnesses that some of the patients on the female side possess only one gown;—is that so? I cut the material up for making gowns. We make a lot together at one time, but we make no special suits. As long as these gowns remain in the store they are available for the patients when they are wanted. There are some patients, too, who have fancy dresses, and are fond of dressing themselves up in this way.
3372. Did you ever know of a private patient's clothing being put on Government patients? I think this was done once, as far as I know.
3373. In whose case was this done? That of Case No. 28, who used to be a private patient, but was subsequently a Government patient, and sent to the Parramatta Asylum later on.
3374. Do you remember any other case than that? No.
3375. Did you ever hear of patients being without clothes, and allowed to remain dirty for days? No.
3376. Do you remember Case No. 11? I know she was there.
3377. Do you know whether she was allowed to lie out in the rain in front of the separate cells? I have never seen her do so in my time.
3378. But did you hear of it? Yes; it was talked about by one of the girls outside.
3379. Who was the girl? I think it was Maggie Macleod.
3380. Were you ever aware of your own knowledge of anything of the kind? No.
3381. Do you think it possibly could have occurred without your knowledge? No.
3382. Was that patient's body ever covered with vermin? No.
3383. Did you ever see other patients covered with vermin? No, not covered. Sometimes they would have vermin in their heads; indeed, it was very difficult to keep them clean. There were a few cases very hard to keep clean. I had a lotion specially prepared for use on their heads.
3384. Were there many bugs in the place? We tried to keep them down. We used to kerosene the walls every week during my time as a precaution against these and other vermin.
3385. Did you see many rats knocking about the place? I never saw any in the bedrooms, but I heard them running about on the roof.
3386. Was there always a good supply of disinfectants? Yes.
3387. Was there always an ample supply of mosquito nets on the beds? Yes; they never went to bed without them.
3388. Were these always kept in good repair? Yes.
3389. Was Case No. 11 a very peculiar patient? Yes.
3390. Was one of her peculiarities that she did not like to sleep with anyone else? Yes; and she always used to break the utensils in the associated dormitory. She would also drag other patients out of bed. She was a woman who had delusions.
3391. We have had it in evidence that this woman was allowed to roll about in her own dirt;—is that so? As far as I know, it is not. I have never seen her.
3392. If it occurred would you have known? Yes. As a rule, she was a clean patient; and unless she got bad in her habits—I mean worse than usual—she would not be classed with the dirty patients.
3393. What were her other peculiarities? She was always wanting to kick and fight.
3394. Have you ever known private patients to be placed on the Government side? Yes; if a private patient became very noisy and unmanageable she would be sent down to the Government end.
3395. Do you remember Case No. 13? Yes; she was there in my time.
3396. Where did she sleep? For a long time in the hospital, then after that in the long dormitory. She was not sleeping in the single rooms at all.
3397. Did some accident happen to this patient? No; not in my time.
3398. What is your idea concerning patients being placed in the single cells;—do you think it resulted in economy to the proprietor, such as saving additional nurses and so on? No; I don't think that is the case. It was when patients were very dirty, and became destructive, that they were placed in single cells.
3399. Had you the power to order patients to be placed in these cells? I put them in first and asked the doctor afterwards. This is what I mean: Supposing a patient became suddenly violent and unmanageable, I would order her removal to the single cell, and then immediately report to the doctor.
3400. Supposing there was an outbreak in the night and the patient became violent, would you at once put them in the separate cells? Yes.
3401. And would you report the circumstance to Dr. Vause the next morning? Yes.
3402. Is it the custom for friends of the patients to visit them? Yes.
3403. Are not some of the patients sufficiently intelligent on many points to discuss them with their friends on the occasion of these visits? Yes.
3404. Could they have made a complaint to their friends if they wished to? Yes.
3405. Could they have done so in private without an attendant hearing them? Yes; when nurses took patients from the wards to see their friends in the reception-room they always left the patient if they did not like the attendant to be present.
3406. Was there, then, any impediment whatever placed in the way of a patient making a complaint to her friends if she desired so to do? No; not to my knowledge.
3407. Have you ever heard it said that if patients made a complaint to their friends the nurses used to laugh, and say that what the patient was complaining about was only a delusion? Very likely the nurses would laugh when the patients would tell falsehoods or absurd stories, and then they would explain matters to the friends.

Bridget  
Morrisey.  
23 Nov., 1894

3408. Do you remember Case No. 17? Yes.
3409. Was she occasionally put in a single room? Yes.
3410. When she first arrived at the institution was she bathed? Yes; I bathed her myself.
3411. Were there any bruises on her body at that time? She was very much knocked about, and black and blue in places. She was a very violent patient, and always throwing herself about. At the time I bathed her she was black about the hips.
3412. Did she die while at the institution? Yes.
3413. Shortly before her death did you send for a priest to administer the last rights of the Church? Yes.
3414. Who went for the priest? A nurse named Josephine Mackay.
3415. Had the patient been ill for some time prior to this, and unable to take any food? Yes; for about a month, I think.
3416. When the priest arrived at the institution was she alive or dead? We thought we heard her breathe after the priest arrived, and Father O'Callaghan himself said he thought he heard her breathe.
3417. Did you know when the official visitors arrived at the institution? Yes.
3418. Did you ever hear a nurse say, "Go ahead, make haste, the visiting doctors are here"? Yes.
3419. Did Dr. Vause accompany the official visitors on their tour of inspection, and offer to afford them every information about the patients? Yes, generally.
3420. Did he always appear to take a great interest in the patients? Yes.
3421. Did you always know when he would make his rounds? He used to go in and out at different times besides making his ordinary round, and if there were any patients sick he was always very attentive.
3422. Who administered medicines, such as sleeping draughts and so on? I did.
3423. Did you ever depute this power to anybody else? No, not unless I was going out, and then the next in charge would take my place. I, however, generally gave the medicine to the patients.
3424. Was there at times great difficulty in regard to keeping the stockings on the feet of patients? Yes, there was.
3425. Does the same question also apply to boots? Yes; in some patients we have to lock the boots on their feet. They are always wanting to get them off.
3426. Were any of the nurses dismissed while you were at Bayview House? Yes.
3427. Can you tell me the names of any of those dismissed? I forget the names, but I know there were dismissals.
3428. Do you think they were always dismissed for good reasons? I think so, for Dr. Vause always wanted a very clear explanation about everything.
3429. Was he always particular in seeing that the work was carried on properly, and that the rules and regulations of the institution were strictly obeyed? Yes.
3430. Did any complaint against nurses for disobedience mean instant dismissal? Yes.
3431. Was Dr. Vause most punctilious in the matter of discharge of duty? Yes.
3432. Did you ever hear of a nurse or nurses having been discharged for making a justifiable complaint, such as, for instance, the food being bad, or the clothing insufficient? I never heard of it in my time.
3433. You, in your position of matron, would have, I presume, every opportunity of talking with Dr. Vause about the welfare of the patients, and the management of the institution? Yes.
3434. Whenever there was a complaint or suggestion made to him would he always willingly listen, and if possible, do the right thing? Yes.
3435. Do you know a man named Henry Gearey? Yes, I have met him since I left Tempe. He called on me and he wrote to me.
3436. Where were you living at this time? At Dr. McCarthy's, in Elizabeth-street.
3437. Did Gearey call on you there? Yes.
3438. Did he ask you to call on him at his private house? I think he wrote to me. This is the letter:—
- Miss E. Morrisey, 9, Brisbane-street, Surry Hills, Sydney, October 29th, 1894.  
Would you kindly appoint a time that I can see you again with reference to Bayview Asylum. I called several times, but you were not at home. I should be glad to see you at my house at any time you may appoint.
- Yours truly,  
H. GEAREY.
3439. Did you see him after the receipt of that letter? I saw him on the Saturday afternoon after.
3440. What was the object of this visitation on his part? To gain evidence as far as I knew about the management of Bayview House.
3441. Did he say to you that he had authority to do so? No; not exactly. He said that there was to be some inquiry, and he wanted to know if I could give evidence, as he said it was my bounden duty to do so. I told him I did not care about it.
3442. Did he say it would be an advantage to you to give evidence in this inquiry? Yes; I think he said something of that sort, and added that it would be only the proper thing to do so.
3443. What did you say to that? I said I did not want to get mixed up in the affair at all, and would rather not give evidence unless I was compelled to.
3444. Did you give Gearey to understand that you would be an unwilling witness? I told him that I did not want to have anything at all to say in the matter.
3445. Did he threaten to make you give evidence? No.
3446. Was Maggie Macleod present at any of the interviews between Gearey and yourself? No.
3447. Did you ever see Gearey and Maggie Macleod together? No.
3448. Have you had any talk with Maggie Macleod about this matter? Yes; several times.
3449. Did you both agree as to evidence? Yes, I think, in some things.
3450. What were the things you mentioned—or did she mention to you any charge or neglect against the patients? After some preliminary conversation, she said she had asked for a further supply of butter for the Government patients. She said that Mrs. Gilchrist, the lady superintendent, had cut the butter supply down very short. She said that there were only 2 lb. given out, and I said I thought there ought to have been 6 lb.
3451. When you saw Gearey did he show you any evidence, or the notes of any evidence he had obtained from other persons? No; as a matter of fact I had very little to say to him.
3452. When he found out that you did not care to give evidence, did he press you with the view of obtaining any information in your possession? No; I cannot say that he did. On all the occasions that he saw me or I saw him I gave him very little to his satisfaction.
- 3453.

Bridget  
Morrissey.  
23 Nov., 1894.

3453. Am I to understand from your evidence that, according to your experience, Bayview House was fairly well managed? Yes; as far as I know.
3454. Did you ever have any experience in lunacy work before? No.
3455. Was Bayview House conducted in a comfortable and homely manner? Yes.
3456. Were Dr. Vause and the attendants careful and considerate in dealing with the patients? Yes.
3457. Did you ever see the attendants abuse the power reposed in them? No.
3458. Did you ever see them treat patients inhumanely? No.
3459. While you were there, was everything done that should be done for the welfare of the patients? Yes.
- 3459½. *Dr. Garran.*] Did Mr. Gearey tell you that if you came before this Commission and gave evidence, you would be paid for doing so? I don't remember.
3460. Did he, as an inducement, say that you might get a Government situation afterwards? No, not exactly a Government situation; but he said supposing that Case No. 29 or Case No. 30 were released as a result of the inquiry, I might get something to do looking after them.
3461. I want you to give me a clear answer about the means you had, or the means there are, for getting a cup of tea, cocoa, coffee, or any other warm drink during the night. Can you get that without waking anybody else? No.
3462. Supposing anything went wrong with patients at night and a warm drink was required, could you get it without waking some other official? No.
3463. Had you the same means of access to the kitchen and to the place where the stores were kept as the attendant on the male side had? No; there was a cross lock on the door on the female side. I could, however, go round to the kitchen side and get hot water. I could go to the kitchen side if I wanted to.
3464. Do you know if there was anyone on duty at night in the men's department? I do not know much about the male side.
3465. Supposing that during the night patients became excited in one of the large rooms, would the nurses there have authority to put patients in the single rooms without consulting you? Yes, they could do so.
3466. Could you do so on your own authority without waiting on Dr. Vause? Yes.
3467. For what reasons would you put patients in those single rooms? I would do so if a patient became restless and interfered with the sleep of other patients, or if a violent patient struck any other patient.
3468. When you had to move patients into the single rooms did they always go in willingly? Not always. Sometimes it would take as many as two or three nurses to get them in.
3469. Would any violence be used to put the patients in these rooms? No, not violence; but sometimes we would have to use all our strength before we could get them in.
3470. Was it a usual thing for female patients to have sheets on their beds? Yes. There was only one patient whose sheets were taken away during my time.
3471. We have had it in evidence from other witnesses that it was the regular custom to fold up the sheets and put them away from the beds except when they were required, not for sleeping in, but for show purposes;—is there any truth in such a statement as that? No; not to my knowledge. There was one dirty patient whose sheets were taken away.
3472. Did you, as matron of the institution, ever issue to the nurses orders to fold up the sheets and take them off the beds? No; I never gave any authority to take them off.
3473. Do you know if they have been taken off? Only in the case of dirty patients. One was Case No. 31 and the other Case No. 32.
3474. Do you think the nurses could have done such a thing without your orders or knowledge? No, I do not think so.
3475. Did you ever give any orders for the sheets to be removed? No.
3476. Do you know that Maggie Macleod says most distinctly she always took the sheets off the beds at night, and they were folded up and put away, adding, "They were put on in the morning again but never used at night." Is that the truth? All I can say is Maggie Macleod was only there a fortnight while I was there.
3477. Do you know a nurse named Rose McMahon? Yes; she was in the dining-room and subsequently a nurse in one of the bedrooms.
3478. When you were dressing the patients to receive visitors did you ever put a clean skirt over a dirty one? Sometimes.
3479. Are you quite sure of this one point—that it was only the extremely dirty patients whose clothes you changed? Yes. We would not put a new skirt over a dirty one, but simply make the patient tidy, and some of the patients were able to dress themselves. We would not change the dress at all unless the one being worn looked more than ordinarily shabby, torn, or dirty.
3480. Did the female patients ever complain of cold in the winter time? Very seldom.
3481. Did they ever complain of a want of sufficient bed clothing during the night? I never heard of it.
3482. Did the restless patients throw off their clothes during the night? Yes; and more than that, some of them would insist on sleeping on the floor. We could not keep them in a bed.
3483. Did these particular patients ever complain of cold? No; they had not sufficient sense to complain.
3484. Did those whom you thought had sufficient sense ever complain about an insufficiency of night-clothing? I never heard of it.
3485. Did any of them ever appear to be suffering from cold and complain? No; not that I know of.
3486. Was it the duty of the nurses to complain to you if they thought patients had not enough night-clothes? Yes.
3487. Did any of the nurses ever tell you as much? No.
3488. Did the patients placed in the single cells ever complain of having suffered from cold? No; they never had the sense to do that.
3489. Did you ever ask Dr. Vause for anything that was wanted and meet with a refusal from him? No. Sometimes I might ask him for certain things and have to wait some little time before I obtained them. I could not always get what I wanted immediately.
3490. Did he ever refuse you anything that was properly and necessarily wanted? I have always got everything eventually, but sometimes I would have to wait.
3491. Was it your duty to report all matters to him? Yes.

3492. Did you always report when a patient was placed in a separate cell? Yes, immediately, unless it happened during the night and the doctor had gone to bed. Bridget  
Morrisey.
3493. Looking back and taking a full view of the whole of your experience, do you see anything you could complain about during your time at the institution? Nothing beyond the fact that I think there should have been a night nurse. 23 Nov., 1894.
3494. Do you mean by that there should have been a night patrol? Yes.
3495. How many large rooms are there? There are four.
3496. Would you put a nurse to sleep in each with the patients? No, not if my staff was large enough to supply nurses on night duty.
3497. Do you think that one nurse moving about the whole of the rooms on night-duty would be sufficient? Yes.
3498. Do you think that attendant also should look into the separate cells? She might do so.
3499. *Mr. McGowan.*] Do you know whether these ten or eleven cells on the female side were occupied by patients every night? As a rule, there would be a good many of them occupied—in fact, all full; but sometimes two or three would be empty.
3500. You referred a little while ago to Case No. 17;—do you say that she was ill for a month before she died? Yes, she was.
3501. Do you not also say that she would not take much food? No, she never would take food during that time.
3502. Did you give her any medicine for her particular complaint? We would always try to but the difficulty was that she invariably spat it out.
3503. Did you report her case to Dr. Vause? Yes, frequently.
3504. Did he see her? Yes, he would see her every day; he would feel her pulse, and do what he could during the month previous to her death.
3505. Did he prescribe medicine for her? Yes.
3506. Was there any effort made to make her take this medicine? Nothing beyond giving it her.
3507. Did you report to Dr. Vause the circumstance that she spat the medicine out of her mouth? Yes.
3508. Did you hear of an accident happening to Case No. 25? Yes; I think it arose out of some row with a nurse named Nellie McBride, and the patient got her eye cut.
3509. How was this done? I think she got into some tussle with Nellie McBride. She knocked Nellie McBride down, and in the struggle sustained the injury to her eye.
3510. Was this matter reported to Dr. Vause? Yes.
3511. Did he attend to the injury? Yes.
3512. Did you leave Bayview House in 1893? Yes.
3513. During the six months before you left was there a male attendant on duty near the kitchen through the night, so that you could go to the kitchen in the night-time to get a cup of tea, or any other warm drink for the patient? I do not remember.
3514. Do you think it is possible for a male attendant to have been on duty without you knowing it? I think I should always have known of it if there were one on duty.
3515. *Dr. Manning.*] If the supply of clothing ran short, and you asked Dr. Vause for more, did you get it at once? Sometimes I might, and on other occasions I would wait. If there were any clothing in the house I got it.
3516. How long, as a rule, did you have to wait before you received an additional supply? As a rule, not long; but sometimes for a fortnight.
3517. What things did you run short of? Sometimes one, sometimes another; especially chemises and underclothing. The material would be obtained, then I would assist in making them up.
3518. Do you say that the food was fairly good in quality and plentiful in supply? Yes; it was good, plain food.
3519. Was there generally food left remaining on the Government side after the patients had had their meals? Yes.
3520. Did they always get sufficient and have well filled plates? Yes.
3521. If they asked for more could they get? Yes.
3522. And would there be some left over then? Yes.
3523. What was the supply of vegetables like? It was quite sufficient; there would be potatoes, and sometimes parsnips, carrots, and other varieties.
3524. How much notice did you receive when official visitors came to the asylum? Sometimes we would get a few minutes, but we would never get very long.
3525. Would the time depend upon whether the visitors remained at the office or went direct to the wards? We never knew which way they would go. Sometimes they would go one way, sometimes another. On one occasion straight to the building, and on another they might visit the male division first.
3526. Sometimes would 5 minutes elapse, and sometimes half-an-hour, after the arrival of the visitors before they reached you? Yes.
3527. When you had short notice was it possible for you to do much in the way of changing the dresses of the patients and making them presentable? Well, there were five of us, and we used to help each other. A great many patients we did not change, but some of them we did.
3528. When the official visitors went round, were they accompanied by Dr. Vause? Yes.
3529. Was it the custom of the official visitors, supposing they went round the institution with you instead of the Medical Superintendent, to ask you about the condition of the patients? Yes; they would ask their names.
3530. Have you seen them occasionally checking off the names of patients in the book? Yes; they always did it.
3531. Has it been the custom of the official visitors on the occasion of their visits to speak to the nurses? Yes; but more frequently they would speak to the matron.
3532. Do a good many of the patients show fight when in the single rooms? Sometimes they are violent.
3533. If it were necessary to enter the room of a noisy, troublesome patient at night, would it be safe for one nurse to do it? No.
3534. For instance, would it be safe for one person to open the door and go into a cell occupied by Case No. 15? No. 3535.

- Bridget  
Morrisey.  
23 Nov., 1894.
3535. Are these people in the single rooms in good health? Yes; they were all very strong and healthy.
3536. Can you tell us anything about a nurse named McBride having been rough and cruel in her treatment of Case No. 23? I never saw anything of the kind in my time.
3537. Was any report made to you of such a fact? No.
3538. Was she a very dirty patient? Yes.
3539. Was there only one of these patients who occupied the single room who might be dangerous if the door was opened by one nurse? There was more than Case No. 15; there were some whom you could go near, but there were Case No. 15 and Case No. 33, and others whose names I forget, whom you could not go near.
3540. In these cases if you had given the patients utensils, would they have used them in the ordinary way? Not all of them.
3541. What would some have done with them then? They would have used them to bang the doors, or as weapons of attack upon the nurses when they opened the cell-doors in the morning.
3542. Would it have been safe to have given one of them to Case No. 15 or Case No. 33? No; they would either have used it in the manner I have described or, perhaps, have torn it up.
3543. *Mr. McCowen.*] Since Gearey waited on you in regard to this matter has anyone else other than Maggie Macleod interviewed you upon this subject? No.
3544. *Dr. Garran.*] The witness Maggie Macleod, in her evidence, complained about vermin being in the beds and everywhere else. She says she complained to you as matron, and when she was asked what the matron said, she replied: "She said it was no use, she could not get the doctor to do anything";—did you ever say such a thing to Maggie Macleod? I never recollect having done so.
3545. She also says that "Often and often I have not only spoken about this (that is, referring to the women being placed in the cells naked), but I have also complained as to the way in which the patients were clothed and fed. It was simply shameful";—did she ever complain to you about these things? No; she was not on the Government side for more than a fortnight while I was there. She was not on my side at all.
3546. The witness Macleod also said that the women never slept in sheets; that there were only two who used sheets the whole of the time she was there—Case No. 16 and another;—is that true? No; it was not true in my time.
3547. She was also asked if the patients often complained of the cold, and she replied, "Yes, often";—did she ever tell you that? No.
3548. She was also asked "Did you ever see an indiarubber utensil in these rooms?" and her answer is, "No; not up to the date you name";—do you say there were five in those rooms? Yes; there were five, made of indiarubber.
3549. Do you not see how different her evidence is from yours;—which is correct? I know I saw those utensils there.
3550. The witness Macleod further says, "that there were a lot of new sheets made for the use of the patients just before she left the Asylum, and about the time the facts respecting Case No. 1 became public";—do you know if that is true? No, I was not there then.
3551. Do you know if there was any marked change in the supply of these and other things? No.
3552. *President.*] Was there any necessity at the time you left for an unusually large supply of clothing to be brought into the institution? We could get plenty of clothing when we wanted it, and our instructions were, in the matter of clothing, to be economical and not to be extravagant.
3553. If we had evidence to say that a large supply of clothing was brought in immediately after the case referred became known;—is that true? I do not know, I was not there.
3554. Have you not said in your evidence that some of the patients placed in these single cells become very obstreperous and noisy? Yes.
3555. How many nurses would go in the morning to these cells to release these patients? One for ordinary cases when they did not get obstreperous,
3556. Would it not sometimes require two or three nurses to remove a patient? Not unless they were very violent and attempted to strike the nurses.
3557. Do I understand you to say it would be dangerous for one nurse to open the door of the cell occupied by one of these violent patients? In the night-time it would.
3558. Was it a usual thing for you to be out at night? No. What I mean to say is, it would not be safe for one nurse left alone at night to open the door of a cell containing a violent patient. In the daytime it did not so much matter, for then everybody was about, and assistance could be given if necessary.
3559. *Dr. Fause.*] Were the stores, such as tea, milk, and sugar, available at night? [*No answer.*]
3560. What I mean is, were there not tea, sugar, milk, and so forth in the cupboard in No. 1 and No. 2 dining rooms, between tea-time at night and breakfast-time the following morning? Sometimes there would be some left.
3561. Did you get your stores one day at breakfast-time and in sufficient quantity to last until breakfast-time the next day? Yes.
3562. Would not the breakfast stores for the following morning be in those cupboards all through the night? Yes.
3563. Was there generally sufficient milk? Yes.
3564. Did you get a fresh supply of milk every morning? Yes, we had fresh milk every morning and at dinner-time.
3565. Could you get milk at any time during the twenty-four hours of every day? Yes.
3566. Do you mean to say there were no special stores given to you for night use? Yes. I am a little nervous so you must bear with me.
3567. *President.*] Have you not said that before you could make a warm drink during the night that you would have to waken the cook? Yes. I never had a key of the kitchen.
3568. *Dr. Fause.*] Could you light the fire if necessary during the night in either No. 1 or No. 2 dining-rooms? Yes.
3569. Do you remember there being a kerosene stove provided for the cooking of these things? I do not remember.
3570. Was the long dormitory separated from the single room by a narrow passage? Yes.

3571. Could nurses sleeping in the dormitory hear any disturbance made by a patient in the same room? Yes. . . Bridget  
 3572. Have you heard those disturbances yourself? Yes. . . Morrisey.  
 3573. And do you sleep near to the courtyard? Yes. . .  
 3574. Had you a requisition book which you could sign for any special articles of diet? Yes. . .  
 3575. Was it your duty to order things you wanted by making an entry in the requisition-book? Yes. . .  
 3576. Whenever you wanted anything, did you put it down in the requisition-book? Yes. . .  
 3577. Was there ever a requisition refused? I cannot say that there was one refused, but I had to wait  
 for things sometimes.  
 3578. First, would you run short of things, and then make a requisition for them? Yes.  
 3579. Do you mean to say that clean dresses were put upon dirty patients on the occasion of official  
 visits being made to the institution? Yes; we used to change the dresses.  
 3580. Do you mean to infer then that you, as matron, allowed patients to become dirty in the institution?  
 I cannot say dirty—I mean that some of the dresses would be soiled and old, and we used to change them  
 so as to make the patients appear brighter.  
 3581. Did you ever put clean clothes over a dirty patient? No.  
 3582. Did you keep dirty patients in the place, and put clean clothes over them to deceive the visitors?  
 No. We used to remove old dresses and put better ones on.  
 3583. Did you have any special instructions from me to change the dresses of the patients for the visits  
 of official visitors? It was always done, and I always understood that you knew it was done.  
 3584. Did I ever tell you directly that the patients were to be made presentable when the official visitors  
 came? No, not directly; but it was a customary thing to make them so, and I thought you knew of it  
 and approved of it.  
 3585. Was it not merely the custom to tidy up the patients, and to gather them together, so that they  
 could be seen by the official visitors? Yes, and to change the clothes of those whose clothes wanted it.  
 3586. Could you not change their clothes at any time? Yes.  
 3587. Would you wait for the arrival of the official visitors before you would change the clothes of a dirty  
 patient? No, certainly not.  
 3588. Was Case No. 28, a private patient, who was sometimes on the Government side of the house,  
 possessed of clothing? I do not know what Government patients had except their own uniform. I knew  
 they were supplied with that.  
 3589. *Dr. Manning.*] Was not Case No. 28 for some time a private patient, and then did not her husband  
 cease to pay for her? Yes.  
 3590. At one time did she possess clothes of her own? Yes.  
 3591. And did you put Government clothes on her? No.  
 3592. Was she at Bayview House for some time, and then transferred to one of the Government asylums?  
 Yes.  
 3593. *Dr. Vause.*] Do you think there ought to be a night nurse instead of having nurses sleeping with  
 patients in the dormitory? Yes.  
 3594. Did you ever tell me so? No.  
 3595. *President.*] Did you simply follow out the rule that had been in existence before you occupied the  
 position of matron? Yes.  
 3596. Did you speak to the doctor at all about this suggestion? No.  
 3597. *Dr. Vause.*] Regarding this message about the official visitors—did you understand it to be an  
 intimation that the visitors had arrived, and that you were to get ready to accompany them round the  
 institution? I do not exactly understand the question. I always went to the office to meet the visitors.  
 3598. Do you remember Mr. Nugent Robertson going round as an official visitor? Yes.  
 3599. Do you remember him pulling the beds down and looking at the mattresses? I do not know; I  
 think that was in Mrs. Hankey's time.  
 3600. Have you ever seen him do it? I have seen him turn up the corner and pull the bed on one side.  
 3601. To see if the bed was clean and all right? Yes.  
 3602. Has he done this on several occasions? I cannot say that I have seen him do it several times. He  
 would just put his hand on it and feel it; but sometimes catch hold of the corner of [a sheet, look at it,  
 and put it back.  
 3603. Did he do the same with the single-room beds? Yes.  
 3604. *President.*] With regard to these single rooms;—were you in the habit of changing the things on  
 the occasions when official visitors came, and then putting others in for the use of patients at night? No;  
 this was not done with my knowledge.  
 3605. Supposing we have had evidence to that effect;—what do you say? The custom, while I was there,  
 was for a patient to have the two beds in a room. Sometimes we would take out one and leave the other.  
 These beds were always clean and fresh.  
 3606. What happened to the bedding of the dirty patients? The dirty straw was always changed, and  
 the ticks were washed and filled with clean straw every morning.  
 3607. *Dr. Garran.*] Do I understand you to say that if there had been a night attendant watching Case  
 No. 1 you would have heard him moving about? Yes.  
 3608. Would he have had to go from the kitchen and across the yard in going to and from the single  
 room in which the patient was confined? Yes.  
 3609. How far from him would your bed-room be? My bed-room was on the other side.  
 3610. But how far away;—is it a hundred yards? I cannot say.  
 3611. Would you have been able to hear an attendant walking across the yard? No. I might hear him  
 going down the passage, and I could hear anyone rattling about in the kitchen.  
 3612. Did you ever hear anyone walking about the main building on night-duty? Never.  
 3613. Are you reasonably sure that if anyone had been on night-duty during the time Case No. 1 was in  
 that solitary room you would have been able to hear him moving about? I think so.  
 3614. *President.*] How long was he in that cell while you were matron? I do not know. I know he was  
 in a bed-room for a time.  
 3615. Was he then removed over to the other place? Yes, for three or four weeks, I think, while I was  
 there.

Bridget  
Morrissey.  
23 Nov., 1894.

3616. Do you remember the time exactly when he was taken over to that single room? No. I do not exactly know what goes on on the other side. I know he was over there, because I used to see them taking milk and things to him.
3617. As matron of the institution, do you know that there is complete isolation between the male and female sides? Yes.
3618. In consequence of this many things might go on of which you knew nothing? Yes, that is the case.
3619. *Mr. McGowen.*] Did you see these single cells at night? Yes.
3620. How many women on an average would be put in those cells quite naked? I should think about five in all. In two of the rooms there were bedsteads.
3621. How many of these patients slept on straw? Only one—Case No. 15.
3622. *Dr. Manning.*] Occasionally, have you seen me go into the wards at dinner-time? Yes.
3623. Occasionally, have you seen me go into the kitchen and examine the food there? Yes.
3624. Have I come back again and occasionally remained to dinner, or to see the dinner? Yes.
3625. Had you any knowledge that I was coming back? You came back once when I did not know anything about it.
3626. What I want you to answer is this: Was there any likelihood of special dinners being prepared for my visit? No; we never knew when you were coming.
3627. Was it quite possible to prepare anything specially for a visit of this kind? Yes; but I think one day you were there the dinner was rather better than it sometimes is.
3628. Do you mean then it was better one day than on others, and by good fortune I happened to pounce upon it? Yes.
3629. *President.*] Did Dr. Manning pay a visit one day and after making his rounds come back and stay to dinner? Yes.
3630. Did you know he was going to stay? Yes.
3631. Did you get some extra things for dinner on that day? Yes.
3632. What was it—a better meal altogether;—what was extra? I do not think it was a better meal; the extra was pickles.
3633. Did you ever hear a statement made to the effect that some of the patients had said they were always glad to hear that a visitor was going to stay that day, and they only wished that they would come every day, for then they would get a good meal? I do not know of it.
3634. Would it have been possible to have prepared an extra good dinner on the occasion of the official visitors coming to the institution, when you did not know of their coming until they arrived? No; there would not have been time.
3635. *Dr. Vause.*] Do you think that when you were in your bedroom at night-time you could see or hear anybody going into the kitchen with a passage and a large dormitory between them and you? I do not know.
3636. When you were in your bedroom did you hear anyone in the kitchen? No; not unless they came over to the side where the vegetables were kept.
3637. *President.*] How then can you hear them moving about at night? Sometimes I stay up very late—as late as 12 o'clock,—and then I can hear them if they move about.
3638. If there were anyone in the men's dining-room would you be able to hear him? No.
3639. Would it not be possible for a warder or attendant to go into that kitchen many times during the night without you hearing him? He might do so.

[Witness withdrew.]

Mary Magney sworn and examined:—

Mary  
Magney.  
23 Nov., 1894.

3640. *President.*] Are you employed as a housemaid at Bayview House? Yes.
3641. For what period were you there in that capacity? About two years. I left there on the 24th of last January.
3642. Did you get a certificate of good character when you left? No; I did not leave good friends with Dr. Vause.
3643. How was that? I do not think there was anything particular. I suppose I did not suit him.
3644. Was that on account of you not being familiar with your duties, or had you neglected some duties? I do not know. I know that I did not leave on good terms.
3645. Were you quite familiar with the duties of the nurses, the routine of the patients, and the customs observed in the management of the institution? Yes.
3646. Did you give out the stores? Yes, sometimes.
3647. Was there always an ample supply of food? Yes, I think so.
3648. Was there always an ample supply of clothing? Yes; we had a fresh supply of clothing every Monday morning.
3649. We have had it given us in evidence that some of the patients were not properly clothed, and that there was anything but an ample supply of wearing apparel;—is that so? I never heard of there being an insufficient supply of clothing.
3650. When the official visitors came to the institution to see the patients was there due notice given to the nurses that the doctors had come? I myself would generally tell the matron that they had come, because she was supposed to come over from the building to the office to go round with the visitors.
3651. Do you know if the patients were put in good order when the visitors arrived? I never saw them get patients ready.
3652. Not in the way of fixing up their dresses or putting on a new collar or anything of that kind? No.
3653. Were the patients shown to the visitors in the same clothes as they ordinarily wore, or was the clothing changed? It was not changed to my knowledge.
3654. Do you know a man named Henry Gearey? Yes; he has called to see me at the place where I am staying.
3655. Did he ask you any questions or for any information in regard to the management of, and the patients in, Bayview House? Yes.
3656. Did he ask you to give evidence before this Commission? I think so.
3657. Did he ever say it would be to your interest, or to your future advantage, to give any information on this subject? I do not think so. He may have done.

3658.

3658. Did he say you would be paid any sum of money for giving evidence before this Commission? There was something said about expenses being paid, and some of the other girls told me that Gearey had told them he would get them good appointments if they would give evidence in this inquiry.

3659. Did he ever say anything to you about being able to secure you a billet, and so on? No.

3660. And I suppose you would have scorned the idea if he had offered it to you? Yes; it was never offered.

3661. Did he ask you about Bridget Morrissey? Yes.

3662. Did you give him the information he needed? I did not give him much.

3663. Did he seem satisfied with what you did give? No.

3664. Did he ask you if Dr. Vause was intemperate in his habits? I think he told me he had heard that Dr. Vause took drink, and I said in reply I had been there two years and had never seen it.

3665. Have you ever seen Dr. Vause under the influence of drink? No.

3666. Have you seen him at dinner parties in his own house, when he has been entertaining his own friends? Yes.

3667. And either on or after any of these occasions have you seen him the worse for liquor? No.

3668. Is Dr. Vause always available when his patients require to be seen? Yes.

3669. Is he on these occasions always attentive to the requirements of his patients? Yes, very much so.

3670. Do you give this evidence in his favour, although you had a dispute with him, which ended in your leaving his service? Yes.

3671. Do you give it because you consider it to be your conscientious duty? Yes.

3672. Did you ever see the patients neglected or ill-treated? No.

3673. Was Dr. Vause perfectly attentive to his duties, and could he be seen when required? Yes.

3674. *Dr. Garran.*] Was Case No. 1 an inmate of Bayview Asylum in your time? Yes.

3675. Do you know if a night-attendant waited upon him while he was in the single room? I do not know. I know he received special attention in the day-time, and that Dr. Vause used to send him his meals from his own private table.

3676. Did it come to your knowledge in any way that this patient had a night attendant? No.

3677. *Mr. McGowen.*] How long before you left Bayview House had he been taken from the bedroom upstairs and put to sleep in the single room across the yard? I do not know.

3678. Do you know the names of the official visitors to the institution? Some of them. There are Dr. Cox, Dr. Manning, Sir Alfred Roberts, and Mr. Nugent Robertson.

3679. Do any other regular visitors go round the asylum? No; none other than the official visitors and the patients' friends.

3680. *President.*] When the official visitors come to the institution, do they go first to the office or to the main building? They always went to the office first.

3681. Would they generally remain there for some time? Not for very long—perhaps for 5 or 10 minutes.

3682. Would they then be looking over the books, to see the names and get other particulars of new patients? Yes; and they would be engaged in this for about 10 minutes sometimes.

3683. *Dr. Vause.*] Do you remember if the official visitors have ever gone through by themselves without waiting for me? Yes.

3684. Did they wait very long then? No.

3685. Was it their habit to look at the official books before going round the institution or not? I think they did generally look at the books first.

3686. Did you wait to see if they did? No; I simply answered the door.

3687. Can you say if they looked at the books first or not? I thought they did; that was my idea.

[Witness withdrew.]

Mary Doherty sworn and examined:—

3688. *President.*] Are you employed at Bayview House? Yes, as cook for some time, and I still occupy that position.

3689. We have had complaints made to us to the effect that the food is not properly cooked;—is that the case? No; not that I know of.

3690. Have you ever had any complaints made to you about the cooking? No.

3691. Was the food always of good quality? Yes.

3692. Is it sometimes better than others; for instance, in the height of summer does the meat get bad? No; we always have fresh meat every morning.

3693. What joints are generally cooked for the patients? Perhaps a leg of mutton one day and a shoulder another, and we have roast beef on Sundays, and roast and boiled mutton on Mondays; we have soup three times a week, and roast beef on other days.

3694. Is there a fixed arrangement with regard to your supplies? Yes, we have an arrangement to get the same kind of food on the same days in every week. Beside the roast and boiled mutton, we get roast beef on other days, and sometimes haricot. On the days we have no soup we have two vegetables; on Thursday we get corned beef and dumplings, and mutton on Fridays. Some of them will have fish. Then there are two vegetables, boiled rice and potato pie. On Saturday we get beef again and mutton.

3695. Do they always get a good breakfast in the morning and tea in the afternoon? Yes.

3696. Did you ever tell any nurse that Dr. Vause would not allow any more food on one occasion, when she complained that the amount supplied was not sufficient? Not to my knowledge; there was always plenty of food.

3697. Did any nurse ever complain to you of the food being so badly cooked that the patient would not eat it? Never.

3698. At what hour do you get up in the morning? Five o'clock.

3699. What time do you go to bed at night? Any time after 7 o'clock.

3700. Do you generally go as early as 8 or 9 o'clock? No.

3701. Do you lock the kitchen up? I never lock it.

3702. Is the door always left open? It has never been locked.

3703. Could anyone get into the kitchen at night, either from the male or female side? An attendant could get in on the male side, but not from the female side.

Mary  
Magney.

23 Nov., 1894.

Mary  
Doherty.

23 Nov., 1894.

Mary  
Doherty.  
23 Nov., 1894.

3704. Why is that? Because there is a cross-lock on the door which shuts off the female side.  
 3705. Do you know whether there are kept in the dining-rooms supplies for night use? Yes, there are always supplies there.  
 3706. Both on the male and female sides? Yes.  
 3707. What supplies are kept? The attendants can get what they want.  
 3708. What generally was kept there? There was always bread, butter, milk, tea, and sugar.  
 3709. *Dr. Garran.*] Would any nurse be able to make a cup of tea or other warm drink without waking you? Yes.  
 3710. We have been told in evidence that nurses could not get into the kitchen to the fire at night;—is that so? They always had a fire in the private ladies' dining-room, and there were refreshments too.  
 3711. Could the attendants make a cup of tea or coffee without going to the kitchen? Yes.  
 3712. Are you quite sure on this point? Yes, I am.  
 3713. Do you remember when Case No. 1 was taken from the upstairs room to sleep in the single room in the yard? I do not know when he was removed there.  
 3714. From where you slept could you hear attendants walking about the male side during the night? Yes.  
 3715. Supposing attendants were up at night, watching Case No. 1, could you have heard them walking about? I often heard attendants walking about. There was always somebody walking about.  
 3716. Did you sleep very far from the courtyard? No, not very.  
 3717. Do you know whether night attendants did watch this patient? I do not know, but to the best of my opinion there were.  
 3718. Can you speak positively on this point? I can say I have heard people walking about during the night.  
 3719. *Dr. Vause.*] Is there a diet list hanging up in the kitchen? Yes, there is.  
 3720. Do the patients have fish to eat on Fridays? Yes; as well as meat.

[Witness withdrew.]

TUESDAY, 27 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
Esq., M.D., INSPECTOR-GENERAL OF THE  
INSANE.

ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was in attendance to hear evidence and examine witnesses.

Mrs. \* \* \* sworn and examined:—

Mrs. \* \* \*  
27 Nov., 1894.

3721. *President.*] Had you some relative in Bayview House at one time? Yes. (Case No. 34.)  
 3722. What relation was she? My cousin.  
 3723. Do you remember the time of her admission? I cannot remember exactly. We took her body away on the 28th of May, 1892. I think she was there about a fortnight altogether.  
 3724. Did you pay for her accommodation and maintenance at Bayview House? Yes.  
 3725. Do you remember how much you paid? I really forget; but I think it was four guineas per week.  
 3727. For what reason was she put in Bayview House? I do not know. I certainly think she was not insane; she was very dull at times and suffered from excessive weakness. When she was taken to Bayview House Dr. Vause was away. Dr. Hetherington saw my cousin, and his opinion was that she had no business there at all.  
 3728. Was she troublesome in her behaviour, so troublesome indeed that it was considered by medical men that it was necessary she should be removed to an asylum? I think so. I believe two doctors (one Dr. Alcorn, of West Maitland) advised that she should go there. I do not remember the other doctor's name.  
 3729. Were medical certificates obtained before she was admitted to the institution? Yes, certainly.  
 3730. Do you remember the names of the medical men who gave the necessary certificates? I think Dr. Alcorn was one, but I forget the other.  
 3731. Was the other Dr. Beeston, of Newcastle? I believe he was the doctor; but he had not seen her for some time.  
 3732. Did he not give a certificate saying he had seen her on a certain date; I may as well tell you that we know he gave a certificate, for I have it in my hand now? I know my cousin went away for a change and went to West Maitland, but about the certificate I cannot speak.  
 3733. Do you know if Dr. Beeston had known your cousin for the last twenty-five years? Yes, I think he had.  
 3734. Do you think he was perfectly familiar with the nature of her case? Yes.  
 3735. Do you know that he certifies in this certificate [*Exhibit C. See Appendix*] before me that he has known Case No. 34 for the last twenty-five years; that she is naturally of an active and lively disposition; that of late she has become morose and taciturn; that her appearance is greatly altered, she having become vacant. Do you know these facts are certified to on the 28th of April, 1892, so that Dr. Beeston must have seen her a few days before she was admitted to Bayview House? I do not think he did. She was away; I believe her mother went to Dr. Beeston and stated something about my cousin's symptoms.  
 3736. But here is Dr. Beeston's certificate saying he saw her personally at Newcastle. Might not that have occurred without your knowledge? I do not think so.

3737.

3737. But we have here a certificate saying Dr. Beeston saw her on the 28th of April before she was admitted? I do not know anything about that. Mrs. \* \* \*
3738. Still it occurred, and it is also certified that her mother informed Dr. Beeston that your cousin had latterly become violent and could not be kept in bed, and that she did not recognise her mother nor any others about her;—do you think that is so? I do not. I was constantly with my cousin. I was reared with her, and I never saw any violence in her at all. 27 Nov., 1894.
3739. Was Dr. Alcorn well acquainted with the nature of your cousin's case? I think he knew about it.
3740. Do you know that he saw her on the 14th May, 1892, at West Maitland, before she was admitted to Bayview House? Yes.
3741. Do you know that he says, speaking of your cousin at that time, "She rambles in her talk, and is listless and stupid; at times refuses to speak for hours together; refuses food, has loss of memory, and cannot say how long she has been ill; is dirty in her habits, and attempts to tear her clothes; has delusions, fancying that birds are singing around her bed, and other fancys of that sort";—is this statement in accordance with your experience? I know she was very quiet of late.
3742. Did she refuse to take her food? No, never.
3743. Had she loss of memory to such an extent that she did not know how long she had been ill, and so on? I did not notice this. She was very quiet, and did not speak sometimes for hours together.
3744. Was she dirty in her habits before she was admitted to Bayview House? I never saw her.
3745. Do you not say you were constantly in her company? I do not mean it exactly in that sense. I live in Sydney, she lived at ———, but I used to see her frequently.
3746. How often did you see her? I cannot remember exactly.
3747. Did you see her twice a week? No.
3748. Did you see her once a week? No.
3749. Did you see her once a fortnight? I used to go and stay a week, fortnight, or three weeks at a time in their house, and I never saw my cousin dirty in her habits or violent.
3750. Did you ever hear or know that she occasionally had delusions, fancying that birds were singing around her bed? No, never in my life. She stayed once for seven weeks with me, and I never saw anything or heard anything of the kind.
3751. Would you be surprised to learn, on the opinion of the doctor, that she had been gradually failing in health for over a year? I know that for eighteen months she did fail in health, for she was greatly troubled at the death of her husband. For seven weeks after her husband's death she did not cease to cry.
3752. Would you be surprised to hear that her relatives state that she had fallen into a listless and stupid state; that at times she falls into this listless state and remains staring at something for some time, but does not know anything about it? I would not be surprised at her relations telling the doctor this, but all I can say is their experience is different from mine.
3753. Do you know whether at times your cousin did not know her most intimate friends? No; I know I met her on the railway platform when she was going to the asylum. I was in company with my mother, who said "Do you know me?" She replied "Yes"; and she appeared to know us.
3754. It is also stated that her mother informed Dr. Beeston that your cousin had latterly become violent and could not be kept in bed, and that she did not recognise her own mother, or anyone about her;—is that correct? No, it is certainly not in accordance with my experience.
3755. Did your aunt bring your cousin down from the country and persuade her to go to Bayview House in the hope of her getting better? Very likely, but I never thought she was much wrong.
3756. What is the nature of the complaint you have to make in reference to the treatment of your cousin while an inmate at Bayview House? Dr. Vause was not there when I paid my first visit after my cousin was admitted. Dr. Hetherington was there. On the following Friday morning I and my mother called to see my cousin. We went back again at 9 o'clock at night, and saw Dr. Hetherington, who was rude to us. I said that my cousin was dying then. He said she was not dying. I then said that her mother had come 102 miles to see her daughter. Dr. Hetherington objected to anyone seeing the patient at that time at night. I, feeling sure that my cousin was dying, insisted that her mother should see her, and we were allowed in. She was nearly blind, and we were taken into a dark room, and had some difficulty in seeing the patient. I saw then that the end was near, but Dr. Hetherington said she was not dying. She died on Saturday night or early on Sunday morning. What I complain of is what I consider to be the harsh treatment.
3757. How long was Case No. 34 a patient at Bayview House? Nearly a fortnight.
3758. Had she a private room? No; but we understood she was to have one when she went there. We paid for one.
3759. Did she ever use one? No; there were at least twenty beds in the room she was in.
3760. When you visited the institution were you allowed to see your cousin? I saw her on two occasions.
3761. Did she appear to be well dressed in clean clothes? She was never dressed at all. She was in bed the whole of the time she was there—in bed in one of the dormitories.
3762. Did Dr. Hetherington tell you that she was in no danger whatever? Yes, he told me that on Friday night at 9 o'clock, and she died either on Saturday night or Sunday morning.
3763. Did you afterwards see her body laid out in the mortuary? I call it a stable. There was fodder under my feet, and a couple of bags of fodder in the place. There was no window even, but only an aperture containing iron bars. I call it disgraceful. I spoke to Dr. Vause about it later on. I asked him to see us for the money, and we would expose it. He said he would not sue us.
3764. Did you complain to Dr. Vause? Yes.
3765. What did he say? He seemed to infer that Dr. Hetherington had not done his duty, and he had the place cleaned up.
3766. Did he say anything to you about Case No. 34 being in the habit of taking an excessive quantity of liquor? Dr. Hetherington told us that. I also spoke to the matron concerning her clothes. When she went into the institution she took three boxes well filled with linen, but before she was dead there was no linen left.
3767. What did Dr. Hetherington say concerning your cousin's drinking habits? He said she had taken a great deal too much stimulants.
3768. Did Dr. Hetherington say anything about the certificate of death? No. 3769.

- Mrs. \* \* \* 3769. Nothing at all? Not that I remember. I know I was very much annoyed at the way in which the body was laid out. The matron told me that my cousin had been well looked after, and I told her that if I had a sick pup I would not leave it at such an institution to be nursed.
- 27 Nov., 1894. 3770. Did you understand that the body was laid out in the apartment that was used by Case No. 1? I had some idea of the kind. I went to the office of the *Sunday Times* as soon as the case occurred, thinking to make a statement about our own affair. The editor, however, did not seem inclined to run any risk of libel, so nothing was said.
3771. On the whole, then, you feel very much dissatisfied? Yes.
3772. First, as to the treatment of your cousin? Yes.
3773. Then with the attendants? Very dissatisfied indeed. I told Dr. Hetherington that there was a good home for my cousin whenever she wanted one, and I thought it was a shame she should remain at Bayview House.
3774. Were you dissatisfied because of not being informed of the day or hour on which your cousin died? Yes; they did not tell me she was dead. I went out there thinking to see her and found she was dead.
3775. Are you also dissatisfied at the way in which they laid out the body and prepared it for the funeral rites? Yes; I think the least they could have done would have been to let us know she was dead. We went to call on her on Sunday and found her lying dead. The body was removed from the institution, taken to Newcastle, and buried there.
3776. Who induced you to make a complaint to Mr. Jeanneret, then a Member of the Legislative Assembly? I do not know. I went to the *Sunday Times*, but as I said before, nothing appeared there for fear of a libel action. I said I could substantiate all I said, and that I was not alone when I made my visits to the asylum.
3777. Did you take the precaution of having some one with you? No, not as a precaution, for I did not think that necessary.
3778. Are you very dissatisfied with the way in which you were treated there? Yes.
3779. *Mr. McGowen.*] Did you not say in answer to a question put by the President that you were not surprised at anything your relations at ——— would say about your cousin when the application was made for her admission into the asylum;—what do you mean by that? Well, we are not on very friendly terms; that is what I mean.
3780. Had those relatives any interest in your cousin that might be served by her removal to the asylum? They had an interest this far, that if she was sent there she would spare them perhaps a great deal of trouble. They sent for these doctors, and I think it would have been much kinder to have sent my cousin to her mother. They had a business place, and I suppose they wanted to get rid of her.
3781. Did you ever find out when your cousin did die? No.
3782. Did you visit Bayview House on the Saturday and see your cousin? Yes.
3783. Did you go again on Sunday and find she was dead? Yes. On Sunday my mother and her mother visited the institution, and after waiting about half-an-hour were told by one of the nurses or the matron that my cousin had passed away.
3784. You did not know she was dead before then? No.
3785. When the visitors saw her on Saturday did they think the end was so near? I did, and I think it would have been kinder to have put her in a room and allowed her friends to stay with her. The body was taken away on Sunday afternoon and sent to ———.
3786. Did you see the corpse in the stable, as you call it? Yes.
3787. And was it prepared for burial? It was on a board or door placed on trestles. I think it was prepared for burial as well as they knew how to prepare it.
3788. Did you threaten to expose Dr. Vause in connection with this matter? I asked him to sue me for the money owing.
3789. Did he say anything about making public a statement to the effect that your cousin was addicted to drink if you did sue him? He told me Dr. Hetherington said that.
3790. Had your cousin a sufficient quantity of clothing? The matron said she had not, as her clothes were all gone.
3791. Did you see the boxes of clothes sent to Bayview House for her? Yes, they were brought to my house and sent on from there.
3792. Do you know the name of the matron to whom you complained? I do not.
3793. Was it Mrs. Gilchrist? I do not know. She said she had been there many years. It may not have been the matron but the housekeeper; she had a big bunch of keys, and I think she told me she was the matron.
3794. *President.*] As far as you know, were the original terms on which your cousin was admitted to the institution agreed to? No.

[Witness withdrew.]

Miss \* \* \* sworn and examined:—

- Miss \* \* \* 3795. *President.*] Have you a sister in the Bayview House Asylum? Yes.
- 27 Nov., 1894. 3796. Do you remember how long she had been an inmate? Eight years, I think.
3797. Were you living in England a little over two years ago, and at that time did you receive certain reports about the treatment of your sister? Yes.
3798. Did you in consequence of those reports leave England and come to Australia to look after your sister? Yes.
3799. On whose advice did you take this action? On the advice of my lawyer in England.
3800. Had you letters of recommendation from the captain of the ship? Yes.
3801. Have you had correspondence with him since? Yes.
3802. When you arrived here did you immediately make inquiries about your sister? Yes; a fortnight after my arrival I called to see my sister. I presented myself to Dr. Vause, who was then very polite to me, but at the same time said he doubted whether I was the sister of his patient, Case No. 30. I satisfied him of my identity, and he then allowed me to see my sister. I was accompanied by Mrs. S \* \* \*. After the first interview, which was on July 30th, I went to Bayview House on the 2nd and 3rd of August, 1892. On the 3rd of August I was out all day with my sister, with Mrs. H \* \* \*, and with Mrs.

- Mrs. S \* \* \*. We all went to Manly and spent an enjoyable time, my sister being perfectly quiet and rational. On the 5th, the 12th, and the 16th of August I, accompanied by Mrs. S \* \* \*, visited my sister at Bayview House. On the 20th of August I received a telegram not to go out again with my sister, as Dr. Vause was ill. We had arranged for all four ladies to go to Bondi on that day. About the same time my sister's son arrived from New Zealand, and, with Dr. Vause, put a stop to any further going out. On the 23rd of August—this is all in the year 1892—I again called at the Asylum with Mrs. \* \* \* \*, and she was prevented from seeing my sister. On the following Monday, the 29th of August, I called again, and was most grossly insulted by Dr. Vause, who said, "You shan't see her," and held up his fist to my face. Her window was closed with a double window, so that I could not see her. Dr. Vause said to me, "You are only come for her money." I said, "I have not; I have come for her body." I had a basket of oranges with me, and asked that I might be allowed to give them to her, but was refused. On September 6th I again went with Mrs. S \* \* \*, and we were both grossly insulted by Dr. Vause. Dr. Vause said I could not see my sister then.
3803. Was Mrs. S \* \* \* a friend of yours? I was living with her, and I took her to Bayview with me because she had seen my sister on six previous visits. She felt deeply for my sister in her trouble.
3804. What happened on the 6th of September? I was told by Dr. Vause to wait patiently for a week, as I was only, on the order of her son, to see the patient once in every fourteen days. Dr. Vause pushed Mrs. S \* \* \* downstairs and said she should not see my sister.
3805. Did you consider this anything but nice treatment? Yes, I felt it very bitterly, because there was no cause for it.
3806. Do you think there might have been some misunderstanding in connection with this matter—for instance, you might not understand Dr. Vause exactly? Oh, no.
3807. Do you not think there might have been some particular reason why your sister should not be seen on that day? No.
3808. Might it not have been that your sister was at that particular period a little more mentally deranged than usual? She was all right, for the matron said to me, "You walk up and see your sister."
3809. Did you bring this matter before the Supreme Court, and apply for a writ of *habeas corpus*? Yes, but my sister was never brought before the Judge.
3810. Were her sons there? There was no one there except myself and Mrs. S \* \* \*.
3811. Who opposed your application for the writ? My sister's son. Mr. Crick, my solicitor, said I had gained the day. The son did not appear personally, but he opposed me by affidavit. I saw Dr. Manning about this matter before going to Court. He referred me to several solicitors, and gave me two sections of the Lunacy Act, sections 81 and 90, under which to take action. When I took this action it was opposed, which I think very unjust.
3812. Did the sons oppose your application? Yes, and their opposition was successful. I again wrote to Dr. Manning, but I got no answer to my letter. I then employed another lawyer to go on with the case.
3813. Had you any correspondence with the former Colonial Secretary, Sir George Richard Dibbs? Yes; and I also received a letter from Mr. Brunker, the present Colonial Secretary.
3814. Did you use every opportunity you could to obtain your sister's release? Yes.
3815. Did you ever have anything to do with the management of your sister? Yes; poor dear \* \* \* and myself lived in apartments in Middleton-square, London. She was always very manageable then. I have heard her two sons say that they are firmly resolved that they will never have anything more to do with their mother as long as they live—that they would rather do anything than come in contact with her.
3816. What is the cause of this disagreement between Mrs. \* \* \* and her sons? I cannot tell. They have never behaved properly to her as sons should, and in that respect they are just like the father, for he always treated my poor dear sister badly.
3817. Do you think then that the sons have inherited the dislike of the father to the mother? Yes.
3818. Do you believe that in consequence of this dislike the sons are acting in this particular way towards their mother? Yes.
3819. How do you account for medical gentlemen certifying that your sister should be placed in an asylum? Oh, one of her sons is up to everything. He said he would have her put in. His uncle, writing to me, says, " \* \* \* positively refuses to come in contact with his mother again," and he thinks that is a foolish resolve because he is sure she could not injure him.
3820. What does the uncle say to that? I do not know.
3821. Do you not think when he mentioned his opinion about the mother not inflicting an injury that he must have been at some time or other persuaded there was some danger to be feared from her? I cannot explain.
3822. Coming back to the 6th of September, when you say Mrs. S \* \* \* was roughly treated by Dr. Vause, did Mrs. \* \* \* \*, in consequence of this treatment, take Dr. Vause to the Police Court? Yes, to the Newtown Police Court.
3823. Did she issue a summons against Dr. Vause? Yes.
3824. What was the result? Mrs. \* \* \* \* lost the day. She had no lawyer, and the case was dismissed for want of evidence. Mrs. \* \* \* \* had a different witness in Court to the one who took us upstairs when the interview took place.
3826. Did the stipendiary magistrate make any remarks in connection with this case? I do not know.
3827. Who was the magistrate on this occasion? It was Mr. Giles, the deputy stipendiary.
3828. Did he not remark, after the evidence was given, that the complainant seemed to be a woman who always had a grievance? I do not know.
3829. Did not the magistrate say he had no hesitation in saying that whatever inconvenience she had suffered in the matter was the result of her own misconduct? I do not know.
3830. I am reading an extract from a newspaper report. Do you think it is a true account of the proceedings: It is stated that the two ladies visited the institution together, after Dr. Vause had informed Miss \* \* \* that she was not to bring Mrs. S \* \* \*. The doctor told Mrs. S \* \* \* that she could not proceed upstairs, but she said she would go on, and witness then placed his hand on her shoulder and forced her back. She resisted all the time, flourishing her parasol;—is that the case? I know she never misbehaved herself.
3831. Did the magistrate dismiss the case? Yes.

Miss \* \* \*  
27 Nov., 1894.

- Miss \* \* \* 3832. And did he also censure the prosecutrix for bringing it into Court? Yes, but Miss \* \* \*, who gave evidence, did not see the occurrence.
- 27 Nov. 1894. 3833. Do you know Dr. M'Donagh? Yes.
3834. Did he examine your sister too? Yes.
3835. What is his opinion? He said that my sister is by no means dangerous; that she had been allowed out in my care; and that he considered her removal out of the asylum would be of great benefit to her, and that her state of mind generally would be much improved by such removal. He also said in his report that she might be let out on application for three months under a doctor's supervision and under my care and that of a maid.
3836. Did Sir Alfred Roberts, one of the official visitors, report anything in connection with your sister? Yes; he said he would sanction her release at once.
3837. Do you know that official visitors have the power of discharging patients? I know Sir Alfred Roberts said he would discharge her to-morrow. He would give his sanction for her removal without any hesitation, but that her sons opposed her being taken from the asylum and placed under my care.
3838. But do you know that Sir Alfred Roberts has the power to do this? He referred me to Dr. Manning.
3839. Does Dr. Cox say much the same thing? Yes, but the sons oppose it.
3840. Do you think that natural on the part of the sons, or do you think a sister's love is greater than a son's love? I do not know, but I do not think there is much love in her sons.
3841. Do you know Mrs. M \* \* \*, the wife of Dr. M \* \* \*, late of \* \* \*? Yes.
3842. Did she on one occasion, and in your company, call at Bayview House? Yes, to see my sister.
3843. How was she treated? She was met with a refusal.
3844. In a nice, quiet, gentlemanly manner? No; Dr. Vause said, "You take a chair in the sitting-room." He would not allow her to see my sister.
3845. Was there not something in connection with a bouquet of flowers? My sister was sitting at the public window. I took with me a bouquet of flowers. Mrs. M \* \* \* took them from me and pushed them through the window to my sister.
3846. Do you not think that such an action as this would be sufficient to provoke the temper of the Medical Superintendent;—do you not think it was direct disobedience? I think it was very hard that I was not allowed to see my sister.
3847. What fee does your sister pay per week? She pays three guineas per week to Dr. Vause.
3848. Where does this money come from? It is a pension paid for the services rendered by my sister's late husband.
3849. Is that the whole of the pension money? Yes.
3850. What interest will her sons have in keeping their mother an inmate of the asylum against your will? No interest that I am aware of. The pension goes when she dies; it dies with her.
3851. Would they have any interest of a pecuniary kind in keeping her there? No; they will not sanction her being put under my care.
3852. Are you on bad terms with the sons? No.
3853. How often have you met them? Only twice. I met one of them once in England when he was a boy, and once out here.
3854. Is there any quarrel between the two families? No; the Rev. Mr. \* \* \*, the deceased husband of my sister, always had a great dislike to my papa.
3855. Have the sons ever stated to you the reason why they object to you having charge of your sister? I think they have said I have a fiery temper. I do not think I have. I like to speak plainly and tell the truth.
3856. Is the only object you have in taking care of your sister that which leads you to believe you could attend to her better than she is cared for in the institution? Yes.
3857. Are you satisfied with the manner in which your sister is maintained for the payment of three guineas per week? No; she has always told me that the food was very poor in quality.
3858. Have you seen the food? No.
3859. Do you not think you should see it yourself before making such a charge as this? Perhaps so; but I have heard other people say the same thing.
3860. Do you say that the food is not only plain but also there is no fire in your sister's room during the winter? Yes.
3861. Do you say she only has a kerosene lamp at night—that her room is poorly furnished? Yes.
3862. That she has her meals in her own room? Yes.
3863. That she goes out very little, and, when she does, pays for her own conveyance and for meals for herself and maid? Yes.
3864. Is she always supplied with an ample quantity of clothing? Yes; she seems comfortably dressed.
3865. Is her room, as furnished by herself, fairly comfortable? Yes, I think so. I have only been in it once or twice.
3866. Does she complain to you about anything except that she is detained in the institution? I know she wants to get away, but she has only complained about the food.
3867. Does she complain about the quality of the food or the way in which it is cooked? She does not seem to like it. She has been brought up very delicately and had grown used to Indian life and French cooking. She had been in the habit of having little dainties, and she now misses them.
3868. Do you remember your cousin, Captain \* \* \*, or rather the son of Captain \* \* \*, coming over from \* \* \* to help you in this matter? Yes.
3869. How was he received then? He was received most harshly by Dr. Vause, so much so that he wrote to my lawyer in England complaining of the case generally. He wrote as follows:—

I HAVE much pleasure in introducing myself as \* \* \*, son of the late \* \* \*, of H.M.S. " \* \* \*." My cousin, \* \* \*, wrote to me several times about her dear sister, \* \* \*, now confined in the private asylum at Tempe, so I thought I would come over here from New Zealand and help my cousin, \* \* \*, to try to get \* \* \* released. I may as well tell you that \* \* \* and I called at Bayview House to see \* \* \*, and Dr. Vause refused our seeing her. I asked him the reason. He answered, "That is my business"; so, rather than have any words with a brute of that description, I wished him good afternoon. I now intend getting an order from the Secretary of State to visit all public buildings and institutions. I will also try and get a special order from the Governor to see \* \* \*. In the meantime we have consulted Messrs. Wallace and Robson, solicitors, requesting that this cruel case should be brought before the House of Representatives which is now sitting. I have offered to take charge of

of Mrs. \* \* \* as far as New Zealand, and she is welcome to stay with my family until such time as she wishes to return to England with Miss \* \* \*. I cannot understand any son being so cruel as to keep his mother locked up, who is to my knowledge perfectly harmless, and in such a vile den, and no one being allowed to see her. There is something very underhanded about the whole affair. Her very window is debarred of light. My cousin, \* \* \*, seems to be in great trouble at not receiving her money from you regularly, and I know she suffers therefrom, having been put to a great deal of expense over her sister, Mrs. \* \* \*. Trusting to hear from you, I have, &c.,

Miss ———  
27 Nov., 1894.

To H. Ramsden, Esq.

Sydney, 7/4/94.

3870. Was application made to His Excellency the Governor, Sir Robert Duff, for an order of admission? Yes.
3871. What was the result? Sir Robert Duff referred us to Dr. Manning.
3872. Did Dr. Manning then refer you to Dr. Vause? Yes.
3873. Did you then see your sister? No, sir. Dr. Vause refused our seeing her.
3874. Do you really want to get possession of your sister? Yes; that is my great desire.
3875. Supposing that we were to allow her out for a few months, would you be willing for her to remain under the supervision of a doctor? Yes; certainly.
3876. Do you feel capable of accepting that responsibility? Oh, yes; I have had my sister under my care before. She lived with me in England while we were in apartments. She lived with me for some time before she came out here to see her son.
3877. What means have you? I have got my income.
3878. What does that amount to per annum? Sixty pounds.
3879. Do you think, with your income of £60 a year, you would be able to give your sister the same advantages she is getting now for an expenditure of three guineas per week? No; she would pay for her own board with me from her pension, and then there is additional money under my father's will. That money is now accumulating in the Lunacy Office.
3880. How is it that that is there? I saw Mr. Edwards at the Master in Lunacy's office, and he informed me that he had received money of my father, and that it was accumulating for my sister's benefit.
3881. How much is there in the Lunacy Office? Between £800 and £900.
3882. Have you any share in that? No; that is all my sister's.
3883. So that with your £60, with your sister's pension, and the money likely to come from your father's estate, do you think you could make a comfortable home for your sister? Yes; and such is the patient's own wish. She desires that I should look after her—and always did.
3884. Can you tell me the origin of these feelings entertained towards her by her sons? No; I cannot tell.
3885. Cannot you fathom the reason at all? No; I wrote a most kind and pathetic letter to my sister's son remonstrating him for his harshness. I cannot understand it.
3886. Do you imagine that their minds are warped against their own mother? I really do not know, I cannot understand it.
3887. *Dr. Garran.*] What is the exact amount of this pension money? It is £187 per annum.
3888. How much is paid for your sister's keep at Bayview Asylum? Three guineas per week.
3889. When this is paid then is there much of the £187 left? No; every quarter Dr. Vause gets £40 for her keep and £24 a year for her dress.
3890. Does the whole of this go to your sister? Yes.
3891. When she dies does the pension go on to the sons? No; it dies with my sister.
3892. Would her sons have any pecuniary interest in keeping her there? No; there is nothing beyond, unless there is some interest in the money accumulating under my father's will.
3893. So far as the pension is concerned, would they get anything at all? No; that is for my sister's use solely.
3894. Supposing she is released from Bayview and placed in your care would you put your £60 per annum and your sister's £180 per annum together and live upon the whole? Yes.
3895. Do you also anticipate the accumulated money, amounting you say to between £800 and £900, coming into your sister's possession? Yes.
3896. If your sister were liberated would her sons have any chance of sharing that amount with her? No, that belongs to my sister under my father's will.
3897. Supposing your sister dies whilst at the asylum, how is that £800 or £900 to be divided? That is a question I cannot answer.
3898. But do you not know the contents of the will? The will does not make any provision in that direction.
3899. Has your sister ever made a will? I do not think so. She always said she would give her money to my sister \* \* \*.
3900. Do you think she is capable of making a will now? Yes, certainly. She has her senses about her, and knows what she is doing.
3901. If she were released from Bayview House would she get immediate possession of the money? Yes.
3902. If she died in the asylum how would that money be divided—would it go to the sons or to you, or to your sister \* \* \*? I do not know. It might go to the sons. Some might come back to me; but I suppose it would go into the hands of the Curator of Intestate Estates, and he would divide the money.
3903. Do you say that in your opinion your sister is always quite sensible and understands what she is doing? Yes.
3904. Is she always the same? Yes, as far as my experience goes.
3905. Has she ever been an inmate of any other asylum? Yes; she was in an asylum in Melbourne for a short while.
3906. Was that a Government asylum? No; it was a private asylum.
3907. Was she admitted to that on a medical certificate according to the provisions of the Lunacy Act? Yes.
3908. How long after her arrival in Australia was it before she was admitted into this private lunatic asylum? About a fortnight after she came off the ship. She was taken to the asylum by her son, so she told me.
3909. Was she admitted on that occasion on the certificates of two medical officers? No; she was put in on the certificate of one only—a Dr. Molloy, who is since dead. I have received a letter from the matron of the institution saying it was a most disgraceful thing to put my sister, a sane woman, into that asylum.

3910.

- Miss  
27 Nov., 1894.
3910. Did you take your sister about with you? Yes, frequently.  
 3911. Was she quite quiet in her behaviour? Yes, always.  
 3912. Do you think that Dr. Vause is willingly and wilfully keeping your sister in confinement knowing that she might be with safety let out? Yes, I think so; in fact I believe he is in league with my sister's sons.  
 3913. Do you not say that your sister's sons have no pecuniary or financial motive in keeping your sister in the asylum? Yes, I do say so.  
 3914. What other inducements have they for keeping her there? I really do not know. They surprise me by their action.  
 3915. Do you not say the visiting doctor, Dr. Cox, would agree to your sister's removal? No; I said Sir Alfred Roberts. He said he would sanction my sister's removal from the institution to-morrow, but the sons oppose it.  
 3916. Do you blame Sir Alfred Roberts in any degree for the continued detention of your sister? No, nor Dr. Cox either.  
 3917. Do you think they would be willing to allow your sister to go out? Yes.  
 3918. Do you think Dr. Manning is of the same opinion? No, he always opposed me.  
 3919. Do you think that the four doctors, Dr. Manning, Dr. Vause, Dr. Cox, and Sir Alfred Roberts, all really think that your sister is in a fit state to leave the asylum? Sir Alfred Roberts and Dr. Cox have told me that she was fit to go out, but Dr. Vause and Dr. Manning hold a different opinion. They are not in favour of letting her out.  
 3920. Does Dr. McDonagh say that she should come out? Yes, he signed an affidavit to that effect.  
 3921. *Mr. McGowen.*] In answer to Dr. Garran do you not say that one or two of the visiting doctors have said to you that if they had a sister in that place they would try to get her out? No; not exactly that. Sir Alfred Roberts said that I was a noble sister, using my utmost endeavours to get my sister removed from a place where she ought not to be.  
 3922. *President.*] Am I to understand that your sister was in Crichton Asylum on one occasion? Yes, about twenty-six years ago, and then the celebrated Sir James Cox, M.D., said my sister was a victim of persecution.  
 3923. Was your sister put in that asylum by her late husband? Yes; he took that action while he was in India. My father and others worked hard for six years, and eventually got her liberated.  
 3924. *Dr. Manning.*] Do you know that two or any two of the official visitors, say Sir Alfred Roberts and Dr. Cox, together have the power of discharging any patient from the institution? Yes; I have been told so.  
 3925. Knowing that they possess this power to discharge, and having expressed the opinion that your sister is in a fit state to be removed, does it not strike you as strange that these gentlemen have not exercised this power? No; because the sons oppose my sister's removal.  
 3926. Did you get your sister released from an asylum in Scotland? Yes.  
 3927. Did you live with her afterwards? Yes; I lived with her about a month in Scotland, and then went to England.  
 3928. Did she then come to see her sons in Victoria? Yes; she came to see her sons. Before she left England I said, "Don't go, they will entrap you." I think I was justified in saying that when the son tells his uncle that he will not meet or come in contact with his mother.  
 3929. Do you not say that you have had your sister before? Yes; she stayed with me after papa died for some four years. During that time she was visited by many influential people in London, amongst them being the late Sir Andrew Clarke, the celebrated doctor, who told me my sister was not mad, but eccentric.  
 3930. Do you not say that her son is in league with Dr. Vause to keep your sister at Bayview House? Yes.  
 3931. *Dr. Manning.*] I will now, Mr. President, read a letter which I have received from this son. This letter is as follows:—

18 August, 1894.

Dear Sir,  
*Re Mrs. \* \* \**, Dr. Vause has informed me that \* \* \* continues to cause him much annoyance, and to agitate for the transfer of my mother to her care, also that the idle hope of release which she raises disturbs and deprives her of the calm repose so necessary to her case. \* \* \*, I understand, has given out that \* \* \* is detained at Cook's River by my orders, and not because her state of mind requires she should be there. I am anxious, therefore, to reassure you in writing of that which I have so often told you personally, namely, that my brothers and I have only one wish in our mother's unfortunate case, and that is that she should be made as happy and comfortable as circumstances will permit. My orders are that she is to be indulged to the utmost degree, and to be granted whatever pleasures her heart may desire. Further, should her income be insufficient to supply her wants Dr. Vause has instructions to charge the balance to me. No greater pleasure could be afforded my brothers and me than to know that our mother was able to go into the world again, and a home awaits her in my brother's house or mine in that event as she may elect. In order to facilitate action should a favourable change occur, I have given a power of attorney to Messrs. A'Beckett and Horrocks to act for me in this matter. You will therefore have someone on the spot to refer to should necessity arise. Again, provided my mother's state of mind should warrant the authorities in giving her a trial with a private family preparatory to her transfer to my brother or me, it is my desire that she should be afforded the opportunity of demonstrating that she is fit to be in the world, but I make this stipulation: such trial must be given with a family responsible and favourably known to the authorities. Under no condition is my mother to be given into the care of Miss \* \* \* or to be placed with a family with whom she is acquainted or is likely to have influence. I am satisfied that Miss \* \* \* visits to Mrs. \* \* \* are highly injurious to her case, and I desire that they should be restricted so far as the authorities may deem prudent.  
 Yours faithfully,  
 \* \* \*  
 Dr. Manning,  
 Gladesville, New South Wales.

- The question I want to ask now is: Did you see that Mrs. \* \* \* sons are quite willing and even anxious for their mother's discharge, provided she is in a fit condition? [No answer.]  
 3932. Do you think your sister is quite sane and able to manage her affairs? Yes; she did so in England.  
 3933. Does she know the amount and value of her property? Yes.  
 3934. Is this her writing [*Letter produced*]; Yes.  
 3935. This is what she says in one part of her letter:—

Feeling strong now, and well enough to wend my own way to my fortune of late left to me, an immense sum of money lying dormant and secret in England \* \* \* The Treasury lends me the money and is repaid from England; Money is the bane of life to get all or in part if they can. Out free I should be active to prevent. Buying a lovely site and park grounds in England, building thereon mansion, lodges, cottages \* \* \* My sons to live in the grounds with me; two are rich—the one not with me to stay—a retinue of servants, a young lady companion, lady visitors from time to time, callers, garden parties, &c., leaving the whole to my children twenty years hence.

- Do you recognise that as your sister's handwriting? Yes; it is her handwriting certainly. 3936.

3936. Do you think all this could be done with the £900 accumulated at the Lunacy Office? I cannot tell; but that would be sufficient to get a cottage, and I know well that she does not want a mansion.
3937. Do you say that your visits to your sister have been restricted to some extent? Yes.
3938. Did you not give Dr. Vause a good deal of trouble in one way or another? Never.
3939. Were you not a persistent source of worry to him? Never.
3940. Is it not a fact that you made some arrangement with a man to run away with your sister or to abduct your sister from the asylum? No.
3941. Is it not true that you gave this man the sum of £20 to secure your sister's escape, and that this man is now in gaol for the part he took in that transaction? No; that is all wrong. Judge Coffey gave the decision in my favour. We did not try to abduct my sister. We simply endeavoured to get her out by stratagem.
3942. Is it not a fact that you tried to get her out and that the man who assisted you is now serving a term in gaol for having done so? Yes.
3943. When you came to me did I not give you all the information I could as regards taking legal action for obtaining the writ of *habeas corpus*? Yes.
3944. Did I not do all I could to help you in this matter? Yes, you did, and at the same time brought an affidavit against me opposing my application.
3945. *Dr. Vause.*] On the occasion of the trouble with Mrs. S. \* \* \*, had you not been told previously that she could not see the patient? No, she was not told that. Some man told me that the next time I came I must not bring anyone with me.
3946. Did I give any grounds for refusing to allow you to see the patient? Yes; you said her son forbade it, and that I could not see my sister without the sanction of her son.
3947. What did the closing of the window consist of? It was closed with a double-glazed window shutting out light and fresh air.
3948. Do you know if there were any iron bars there? Yes.
3949. Were these taken away? They were there when I saw her through the window.
3950. Were they taken away subsequently? I do not know; I have not seen the room.
3951. Were not the iron bars removed and substituted by a glass window? I do not know that.
- [Witness withdrew.]

Miss —  
27 Nov., 1894.

Mr. \* \* \* sworn and examined:—

3952. *President.*] What is your name? \* \* \*
3953. Have you a sister (Case No. 35) an inmate of Bayview House Asylum? Yes; I have.
3954. How long has she been there? Since 1884, I think.
3955. Do you remember the circumstances in which she was placed there? Yes. She had been lodging with a widow lady at \* \* \*. She stayed there for a time, then came down to Sydney to see her brother, \* \* \*. She called at his house early one morning, when he said to her, "Sit down, \* \* \*, and wait a while." He then went out, got a cab, and drove her to the asylum.
3956. Did he do so without any medical examination? I think so. She had been examined some years before by Drs. Fortescue and Hodgson. They are since dead.
3957. When did that examination take place—when she was taken away the first time? It was shortly after my mother's death, early in 1884; in February, 1884, I think.
3958. Was she placed there at that time? Yes.
3959. Who gave the certificates on that occasion? There were none at all that I know of.
3960. Had she been at Bayview House before then? Yes; some years before. Dr. Tucker, who kept the place, was a friend of my father's. My father took her out.
3961. Did you in August, 1891, have your sister examined by Dr. Ashwell, of Glebe Road, and Dr. Mark Henry Long? Just about this time I saw Mr. \* \* \*, one of the trustees, and said, "What about \* \* \*—how is she getting on?" He said, "Would you like to take a couple of doctors out, and see whether she is fit to come out?"
3962. Did you try to get your sister out then? Well, I wanted them to go out and give me a report on her condition.
3963. Did you obtain this report from the medical gentlemen? Yes; before my mother's and my father's deaths.
3964. In the year 1891 did you take any action? About that time I entered a suit in the Equity Court, on the advice of Dr. Manning and others. As a result of that Equity suit, she was not released. After the trial Mr. \* \* \* took out fresh orders.
3965. Did you believe she was insane at the time? I am perfectly certain she was not.
3966. Are you confident on that point? She was erratic, nervous, and irritable, but as far as insanity is concerned I think she was quite sensible. While we were talking she could go back for thirty or forty years, and remember dates and places as well as I can.
3967. Do you know Dr. Ashwell, of Glebe Road? Yes.
3968. Do you know that he is a medical practitioner? Yes.
3969. Do you know that when he examined her on the 19th August, 1891, he said she was incoherent, and rambling in conversation—that she is in the habit of accusing her attendants of neglect? No.
3970. Do you know that it was said of her that something had gone wrong in her mind, and that there was something wanting;—do you think that after having made a personal examination and certified that he had discovered these symptoms, that he is correct? I think he is not correct. I think he said this because he was working at the instigation of my mother in company and with Dr. Vause and Dr. Manning.
3971. Have you ever heard that Dr. Mark Long certified that Case No. 35 was, on the 19th August, 1891, "rambling in conversation; constantly changing the subject; very voluminous in her conversation; tells me that Dr. Vause was rude and looked down upon her; and that the late Mrs. Vause accused her of jumping out of the store window; that the food is not good, and that the tea they get in the asylum is gradually poisoning her; got very excited whilst conversing";—do you think that this description made by Dr. Long is correct? No; it is not correct.
3972. Is it correct if her brother \* \* \* informed Dr. Long that she once attempted to empty a kettle of boiling water over her niece? It is all bosh. My brother has six or seven unmarried daughters, and
- at

Mr. —  
27 Nov., 1894.

- Mr. — at my sister's death they will get the whole of her money. It is only since my father's death that this position has been assumed.
- 27 Nov., 1894. 3973. Do you conscientiously believe this statement to be incorrect? Yes, as far as I know.
3974. During the time you have known her, have you on any occasion known your sister in any way to misconduct herself or commit any act that should result in her detention in a lunatic asylum? Not since her father's and mother's deaths. Prior to those events her father thought it advisable to put her away for a time.
3975. Did she get better after her first detention? Yes.
3976. Are you rather suspicious concerning the asylum reports having reference to your sister's case? Yes, because I think they touch them up.
3977. Do some of the attendants report to you on your sister's position and state in the asylum? Yes.
3978. Are you always anxious to have the fullest information about your sister? Yes.
3979. Do you get inquiries made through the attendants? No; only through Mr. Gearey.
3980. How does he know of what is going on in the asylum? He seems to know everything that is going on in connection with Bayview House. For instance, if I go to him this morning and say I want to know what has happened in regard to my sister during the day, he will tell me to come again at 4 o'clock and then he will let me know everything that is going on.
3981. Is he, comparatively speaking, a stranger to you? Yes.
3982. Have you had conversation with him frequently? Yes; now and again.
3983. Can he tell you within twenty-four hours of the time of happening the history of every event in connection with the asylum? Yes; he can tell me all I want to know.
3984. Have you any reason to believe that Gearey has any special means of access to Bayview House? I do not know.
3985. Is he an officer of that institution? I do not think he is. I believe he is an inspector at the Town Hall in Sydney.
3986. Does your sister occasionally ask why she is kept there? Yes; she is sensible enough to ask that question.
3987. Is your sister rather attached to you? Yes; she always was. My brother \* \* \* had not even seen her until I brought him to this country from Africa.
3988. When you had conversations with your sister, did she seem to be perfectly rational, and well enough to be away from any kind of restraint? Yes.
3989. Was there anything at all eccentric in her conduct? No; she always used to ask why she could not come out.
3990. Are you a man possessed of independent means? Yes.
3991. Have you any family at all? No; only myself and my wife.
3992. Do you know through whom your sister's maintenance is paid? That I could not find out until about eight months ago. After the trial in 1890 I went to the Master in Lunacy. I employed a solicitor, as I wished to know the state of the account. I was referred to Dr. Manning, and I never got any statement. Then I entered the suit in Equity.
3993. Does the Master in Lunacy pay for your sister's maintenance at Bayview House? Yes; I presume so.
3994. If he does not, do you know who pays for her? I do not know.
3995. Do you think that your brother \* \* \* has any pecuniary interest in keeping your sister there? Only in this way, that his children will reap the benefit after my sister's death. Up to the time of my mother's death he had no means whatever.
3996. What is about the age of your sister? Fifty-four or 55 years.
3997. At her death does her property go to you and your brother? It goes to my brother and his children.
3998. Under whose will is this decreed? The will of my mother, \* \* \*, who formerly owned, or formerly of, the \* \* \* Estate.
3999. Does your brother get certain special privileges in regard to your sister at Bayview House? Yes, he does.
4000. Are you allowed similar privileges? No; I am not allowed to converse with her except in the presence of attendants. Letters that she has written to me have been perused before I have received them; in fact, in 1891, I wrote to Dr. Vause and demanded twelve letters I had previously written, and which I think my sister did not get.
4001. Is it not an extraordinary thing that letters should be opened before you got them? I cannot understand it; I think my brother understands it, though.
4002. Do you not think that your elder brother, who is connected as closely to you and your mother and your sister as you yourself is to either, has not a prior claim in connection with a family matter of this kind;—do you know that he, by the will of your mother, has been placed in the position of one having a prior claim? It is only recently that he has been appointed a trustee, and that was done by a little bit of manœuvring. I am trying to dispute his right to that position. I know he keeps my sister there because after what has been used for her maintenance he or his children will get the rest. He wants her to be there for her natural life, there is no doubt about that.
4003. Are you satisfied with the treatment your sister receives at Bayview House? No, I am not.
4004. On what points are you dissatisfied? My sister has told me that on frequent occasions Dr. Vause has taken her by the shoulder and pushed her into a room. She says her food was coarse stuff, and that often she was compelled to fill herself with dry bread. She also says that she suffers severely from piles, and gets into trouble for soiling her linen. I believe that since this inquiry began she has been better treated. Dr. Manning shakes hands with her now, but prior to that he would not speak to her, and if she spoke to him he would attempt to put her off.
4005. Has she ever spoken to you or your wife, or has your wife ever spoken to you on the subject of your sister being a victim to any particular disease peculiar to women? Never; I am perfectly sure of that. I am certain on that score. I have reason to go back for some years in reference to that. I can only say that my sister suffered from an ebullition of temper. A medical gentleman of eminence examined her, and the result was he said there was nothing to be feared, and that she was perfectly right.
4006. *Dr. Gárran.*] Are you aware that there is a fixed date on which Government visitors shall inspect private asylums? Yes.

4007. Do you know whether the attention of the visiting committee was ever directed to this case? Not that I know of. Mr. ———
4008. Do you know whether members of the visiting committee, personally, individually, or collectively, examined your sister? No; she tells me they did not. I think, however, Sir Alfred Roberts spoke to her occasionally. 27 Nov., 1894.
4009. Am I to gather from your answers to the President that you accuse Dr. Vause and others as being interested in keeping your sister at Bayview House? Yes.
4010. Do you not think that the visiting committee appointed by the Government is intended to be a powerful protection against anything of this kind? It may be so, but still it may be through their ignorance that there is no protection. I felt compelled to go to the Court on the advice of Dr. Manning and Dr. West, and one or two others. I suppose it never struck us to go any further.
4011. Were you personally persuaded by Dr. Manning? Yes; through Dr. West, Mr. \* \* \* \*, then M.L.A., my wife, and another lady.
4012. What was Dr. Manning's opinion? It is a report in answer to a petition presented to Sir George Richard Dibbs for her release. It amounts to a recommendation that my sister should be kept in custody.
4013. Do you mean to say that from this report Dr. Manning was of opinion that the lady is insane, and not fit to be discharged? Yes.
4014. Except under special care? Yes. Prior to that Sir Alfred Roberts and others reported that this lady was a little peculiar at times.
4015. Supposing that your sister were to be released would you reap any direct pecuniary interest? No, nothing. All that my sister and myself have, in the way of property, would go to my brother and his children.
4016. Do you really believe that your sister is perfectly sane? Yes, I do.
4017. *President.*] Did you bring the whole of this matter before the Supreme Court? Yes, before the Judge in Equity in 1891.
4018. What was the result of the investigation? Well, the release of my sister was refused. I think the whole business was a pre-arranged matter, for I saw my brother and Dr. Manning shaking hands and hobnobbing together outside the Court before the case came on.
4019. Did not the Court decide that \* \* \* \* was an unfit person to have charge of his sister, \* \* \* \*? No, not that I know of. I have been thirty-five years in this Colony, and my character, I think, both domestic and otherwise, will bear as much investigation as that of Dr. Vause or Dr. Manning.
4020. Did you send a petition, or be instrumental in causing a petition to be sent, to Sir George Dibbs, in the hopes of steps being taken to get your sister under your own control? Yes.
4021. Were the reasons which prompted you in doing so purely a desire to benefit your sister? Yes, purely and simply so.
4022. Had you any other object? No. I can get four first-class business men, men of repute to whom I have not spoken, who will with me ask you why my sister is kept in Bayview House. All her friends want her out because, so far as they know, she has never done anything which should keep her in.
4023. Was your sister always particularly sympathetic and attached to you? We were always friends, and she was particularly devoted to my father, who could do with her as he liked; in fact she conducted the whole of his correspondence after he was seized with illness, and while he was lying in bed up to the time of his death.
4024. *Dr. Manning.*] Have you not said that your sister was first taken to Cook's River Asylum in 1884, immediately after your mother's death? Yes.
4025. Have you said anything about your sister having been previously at Gladesville in 1875? My father took her there, and he took her out again. I was not asked the question.
4026. Was she taken out and put under your father's care? Yes.
4027. Did your father again put your sister under safe keeping? Yes.
4028. Were the two doctors whom you sent to Bayview House and paid for, the gentlemen who gave a certificate or certificates for her further detention? Yes, I paid them fees. I saw Mr. \* \* \*, the trustee, and then sent these gentlemen out to the asylum. I also took Dr. Philip out there after a little time. He said he knew Dr. Manning, and would see him. I knew my sister could converse in French, and she did so with Dr. West.
4029. Although you believe your sister, Case No. 35, to be perfectly sane, do you not think she is a little difficult to get on with? Not the slightest; she is as sensible as you or I. She would never agree with my brother's family for a couple of hours together. She never wanted to.
4030. Did you not state that you saw me outside the Court shaking hands and hobnobbing with your brother? Yes. That was when the case was before Judge Windeyer. There was yourself, also my brother and Dr. Hetherington, and then the case by consent was sent on to Judge Owen.
4031. Did I appear before Judge Owen at all? No; not that I am aware of.
4032. *Mr. McGowan.*] When did you enter the suit in Equity in the hope of getting your sister out of the asylum? In 1891.
4033. Do you know in what month of that year? I do not know.
4034. Do you know whether it was previous to the date of August 19th, 1891, when the certificate affirming that your sister was insane and a proper person to be taken charge of and detained under care and treatment was issued? Yes, I am quite sure that the Equity suit both began and ended prior to that date; in fact long prior to that date.
4035. At first was your sister put in an asylum on the wish of your father, and, subsequently, by him released? Yes.
4036. Did she remain for some time at large, and then be placed under restraint again during your mother's lifetime? Nothing of the sort.
4037. Was she again put in the asylum in 1884? Yes, after my mother's death, to get rid of her.
4038. Was that in 1884, after your mother's death? Yes.
4039. And has she been in the asylum ever since? Yes.
4040. On what certificate? Only on the order of Mr. \* \* \*.
4041. Then this certificate had nothing to do with the incarceration of your sister previous to the Equity suit? No.
4042. At the time you entered the Equity suit, were there any orders for your sister's detention? No.

- Mr. 4043. Did you know that under the Lunacy Act, the doctors being dead, there was any necessity for fresh orders? No.
- 27 Nov., 1894. 4044. Do you know on what date you entered the Equity action? In 1891.
4045. Would it be prior to August of that year? Yes.
4046. Did it come out while that Equity suit was proceeding that your sister was incarcerated on the doctors' certificate which secured her first admission to an asylum on her father's application in 1875? I do not know that it did.
4047. Have you any reason to believe that your brother asked your sister if there were any other certificates except those issued on your father's request in 1875? I am sure there were no other certificates.
4048. Do you not say that you have no pecuniary interest whatever in seeking your sister's release? None whatever.
4049. If she were liberated what would you do? I would keep her for nothing; I am able to do it.
4050. Do you not also say that, providing you die before your brother, your brother gets the benefit of your money? Yes; he and his heirs will receive all.
4051. Do you say that you brought him over from \* \* \*? Yes; I lent him money to come here. I went over there and worked my way over here in a sailing vessel, and I lent him £300 to land him here. He landed in Melbourne without a shilling, and I fetched his family over.
4052. Has your brother any motive in keeping your sister at Bayview House? Yes, undoubtedly. Under the will of my mother she takes a considerable interest, and when she dies this goes to him or his children.
4053. Supposing your sister comes out of the asylum would she have any power to deal with any money? I believe her interests are concerned in valuable property under the will, but my brother will not give me any information about this, neither will the other trustee. I am inclined to think that everything belonging to my sister goes to my brother in the case of her death.
4054. Well then, why is it not to his interest to keep her there? I think the Master-in-Lunacy has to be counted with. Everything must go through his hands.
4055. What motive can your brother have in keeping your sister in the asylum if on her death everything goes into his or his children's hands? If my sister was out of the asylum she would possibly live up to her income, but while she is in the asylum there must be funds accumulating. I know that in 1884 or 1885 the other trustees had some hundreds of pounds in hand.
4056. Supposing we were to recommend the release of your sister would you promise to keep her well? I would keep her willingly, and much better than she is kept in the asylum. I have talked about her case to Dr. West. He has known the family for a good many years and his opinion is that my sister is not insane.
4057. Do you think your sister is not insane? Yes; she is as harmless as a child.
4058. Supposing a couple of medical men decide that she is insane, what have you to say? Well, that I can bring half a dozen medical men to say she is not.
4059. *President.*] According to a statement I have before me it appears that your sister was first admitted to Bayview House on May 31st, 1881? I cannot speak about that, I know my father died in 1883.
4060. Were you on particularly good terms and aware of the movements of your family at that time? I do not know.
4061. According to information before us, it appears that your sister had leave of absence from the 20th of December, 1882, until she was readmitted to Bayview House, or in other words that she was not discharged? According to what my father told me she was discharged, and he also told me never to agree to her going in again. My mother also told me never to allow her to go back again.
4062. Was she not discharged on the 20th of the eighth month, 1891, and readmitted on the same day? I suppose that is the date on which the certificate was signed after the Equity suit had been decided in the Supreme Court. I suppose Mr. \* \* \* took it out in order to get her back again.
4063. Do you hold that she was illegally detained until then? I was always under that impression.
- [Witness withdrew.]

WEDNESDAY, 28 NOVEMBER, 1894.

[The Commission met at 11 a.m. in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
ESQ., M.D., INSPECTOR-GENERAL OF THE  
INSANE.

ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was also in attendance to hear evidence and examine witnesses.

Mr. \* \* \* (brother of previous witness) sworn and examined:—

- Mr. —. 4064. *President.*] Have you a sister at present an inmate of Bayview Asylum? Yes.
- 28 Nov., 1894. 4065. How long has she been there? She was readmitted in 1884.
4067. Can you tell us very shortly and to the point the unfortunate circumstances of your sister's case? My father found it necessary to put her in Gladsville Hospital for the Insane as far back as April, 1875. My sister at this time was about 36 years of age.
4068. Did your father have your sister particularly attended to on account of the sad circumstances of her case? Yes; I recollect her in my early life, and then a good number of years elapsed before ever I saw her again. In early life I knew her in \* \* \*. My father came out here and brought my sister and the rest of the members of the family, but at this time I was not with the family as I was in \* \* \*. When I came out here some provision had been made for the treatment of my sister outside my father's house. She was not in his house then. Her condition at this particular time, as far as I could ascertain, was

was that she was extremely quiet, and occasionally had fits of mania, which usually took the form of extreme jealousy. My mother was generally the special object of my sister's distemper, but at times she would fall upon any servant about the place whom she may have got on fairly well with at first. At the same time there was no reason for the change in her demeanour. That was the general course of her conduct for a time; eventually these fits would resolve themselves into attacks upon her father. My good father was deeply devoted to this poor soul—there was nothing he would not have done for her. She would attack him most cruelly, and accuse him of every crime in the calendar. She would wander about the place for hours at a time, and stray away across the paddocks; but, worse than all, she would sometimes disappear from the house for a considerable time. We would know nothing of her whereabouts until, perhaps, she would turn up again at any moment, and just as if nothing at all uncommon had happened. This was such a change from her early life, for as a child she had every possible advantage. She would come home from these rambles without a dress on, and still did not appear to realise that she offended against any law of propriety. This sort of thing went on for some time until it became unbearable, and eventually my father was compelled to take action, and he had her placed at Gladesville.

Mr. —  
28 Nov., 1894.

4069. Who were the doctors that examined her and signed the certificate for her admission to Gladesville? I cannot tell you exactly, but I think Drs. Fortescue and Joseph, who were in charge of Gladesville at the time. Her condition continued to be just the same while she was there. We used to visit her frequently, and her great trouble seemed to be in reference to the treatment she had to undergo. She was very rough in her charges against the place at the time, and we also found out that whenever there was any attempt to control her movements she would resist to the utmost and simply turn round on any and every one.

4070. Was this actual physical violence an unusual thing? I do not know what actually took place, but I do know that she would at times resort to actual violence, even before she went to the Gladesville Hospital for the Insane. I recollect one instance when she attempted to upset a kettle of boiling water over one of my children, a good-sized girl, residing with her grand-parents at the time. I know, too, that on more than one occasion she came in personal conflict with the servants about the place, but I do not think she ever did any absolute harm.

4071. How long did your sister remain at Gladesville? She remained there until December 24th, 1875.

4072. Did she come home on that day? Yes; I presume you observe the day; it was Christmas Eve, and the family in kindness of disposition agreed that we might give her a trial and determined to have her home for the Christmas festivities.

4073. Was she on this application discharged from Gladesville? I think she was, as far as I know, but I am not quite certain as to the process followed.

4074. To the best of your recollection was she discharged? I am not certain whether she was let out on leave or discharged.

4075. How long did she remain at home after her removal from Gladesville? Things went on at home for a while fairly well, and then she became worse again.

4076. Did the same symptoms show themselves? Yes, but in a more aggravated form; besides there was something else. I have a younger brother, and he was causing my parents just as much trouble as my sister. His particular weakness was drink. He was in the habit of coming home at all sorts of hours and in a very deplorable state. My sister would always be about at these unearthly hours to receive my brother, and she seemed to simply rejoice in what was going on. She did not for one moment grasp in the least the seriousness of the position. He, too, would bring her all sorts of presents, and this fact helped so place her beyond the power of our control. My mother and father made arrangements with different parties to take charge of her. She, however, would, as before, disappear from wherever she was placed, and then finally turn up as if nothing had happened. She would go to most extraordinary places and naturally people soon got tired of her. When my father and mother went out of town they would leave her sometimes with me in charge. Then, as a rule, she would become beyond my control. While in these fits her practice was to go up and down the verandah, talking at the top of her voice. I would let her do so until bed-time, and then I would say to her, "Now, \* \* \*, you have to stop this game and go inside; it will be 12 o'clock directly." She would tell me to mind my own business. I would tell her that if she would not do it of her own accord I would take her in. Twelve o'clock would come round, and I would then pick her up and carry her in. Another of her practices was to rub herself against a post, bruise herself if possible, and then pretend that these marks were evidence of my ill-treatment of her on the previous night. This kind of thing went on for some time, and then in sheer desperation my father had her placed in Bayview House.

4077. Was she, comparatively speaking, a young woman when you noticed, or when the members of your family first noticed, these peculiar circumstances in connection with your sister? No; as a girl she was at a boarding-school at Bayswater. At first everybody was very kind to her, and she seemed to be all right. After a while, however, she developed certain eccentricities there. I think jealousy, or something of that kind, was at the bottom of it. She used to think other people better than herself. She would get on some of their clothes. At times she would cut the clothing into shreds, and put it down a certain place.

4078. Up to the time she was taken to Gladesville had she shown any moral or sexual obliquity or anything of that kind? No, not that I know of.

4079. Was it because she was becoming so very troublesome at home that her father placed her again under restraint? Yes; he did so in May, 1881.

4080. Was it not in August, 1881—I want you to be quite sure about this date, for it is rather particular? I think it was about the month of May.

4081. Do you recollect what your father did? He had her placed at Bayview House.

4082. Was this the first time she had been at Bayview House? Yes.

4083. Were the necessary medical certificates obtained for her admission? Yes.

4084. Are you aware of that fact? Yes.

4085. Do you remember what doctors examined her? Not distinctly, but I am inclined to think they were Dr. Hodgson and Dr. Fortescue.

4086. Do you not say that Dr. Fortescue examined your sister before she was admitted to Gladesville? Yes.

4087. Do you think he examined her again? He would have done so, if he were alive when she was admitted to Bayview House.

4088.

- Mr. ——— 4088. Did Dr. Hodgson do so too? I think he had to do with the case.
4089. Did your sister remain long at Bayview on this occasion? Yes, until she was taken out on leave.
- 28 Nov., 1894. 4090. At about what time was she taken out on leave? Some months afterwards. I think a considerable time afterwards.
4091. Was she then taken back to Bayview House again on account of her unsatisfactory condition? Yes; I remember her going back. I know something of the circumstances.
4092. What were they? The circumstances were that after my mother's death—in fact after the death of my father and mother—the trustees under the will of my father, Mr. \* \* \* and Mr. \* \* \*, made similar provision for the treatment of my sister, by placing her in various houses at Waverley and other centres. She left each one periodically after having remained a short while. If she could not escape through the door she would go through the window. On one of these escapades, as soon as she obtained her freedom she visited a hairdresser's shop, and had the whole of her hair cut off. She then disappeared, but after a while we found her. She was then placed with other people at the Glebe, and from there she was taken away by the younger brother to whom I have already referred. The trustees came to me in a state of alarm as they were unable to find her. We went to Parramatta and found her living in what most people would term a bark humpy, where were also her brother and his then wife. It was a very miserable business, and the trustees, after consultation with Archdeacon \* \* \* placed her with a lady whose name I cannot remember, but who was residing at \* \* \*. My sister remained there for a while; eventually she turned up at my house in \* \* \*. From the time she was taken away from \* \* \* until this she went through a very bitter experience.
4093. Was this experience of an altogether unsatisfactory nature? Yes, most disgraceful and most painful.
4094. Did your brother take some action about that time in connection with your sister's case? No; he did not take action until 1891.
4095. What did the trustees do eventually? I am not quite sure about what was done; but I think, after talking the affair over, they came to the conclusion that there was nothing for her personal safety than to place her in confinement in Bayview House again.
4096. Do you remember the occasion of her being taken to Bayview House after this consultation? I ought to recollect all about it, for I really believe I went with her.
4097. Had you a medical certificate when you took her on this occasion? I am not quite sure what was done then in this respect, but I feel certain that everything that was done was done in proper form.
4098. Do you know what particular form? No; but I am convinced in my own mind that what was done was right, although I do not remember the exact process. One of the trustees, the late Mr. \* \* \*, was the solicitor, and he knew the proper course to take, and I feel sure he took it.
4099. Were instructions followed under his advice? Yes, he was acting under instructions.
4100. Did Mr. \* \* \*, the other trustee, take any part in the proceedings other than as a friend of the family, or did he leave the whole matter in the hands of Mr. \* \* \*? Everything was left in the hands of the co-trustee.
4101. Does your memory serve you with regard to the specific particulars? No.
4102. But do you think that everything was done according to law as far as you know? Yes.
4103. Did your sister remain for a considerable time at Bayview House before any further action was taken? Yes.
4104. What was the next step? After various attempts I think the Court was moved.
4105. By whom? By my brother, and I saw from a report in the Press, that the matter had been dealt with by the Court, and that the judges had refused to make some order applied for by my brother.
4106. Did you see the notice that an order had been applied for? Yes.
4107. Was that application made before His Honor Judge Owen? Yes.
4108. Was it decided that your brother was not a proper person to have the custody of your sister, providing she were removed from Bayview House, and that she ought to go back to Bayview House? Yes; I believe that was the effect of it.
4109. Do you remember your brother sending out to Bayview House Dr. Ashwell and Dr. Long to examine your sister about that time? I think that the trustees sent those doctors out.
4110. Your brother had given it in evidence on oath that he sent these medical gentlemen out and paid their expenses? That is not correct, for I was the medium of paying the expenses.
4111. Did your brother then send the doctors out, or did the trustees do so? I think the trustees, desirous of seeing if anything could be done in my sister's behalf, sent the doctors out. I will read you an extract from my diary under date of August 14th, 1891.
4112. What circumstances do you refer to? I will read the extract. It is as follows:—"My brother took two persons out to Bayview this day, August 14, 1891, and as he asserted they were connections, Case No. 35 (who was in a bad frame of mind) was allowed to be seen within doors. Then \* \* \* asked for her to go out with him into the grounds, which was assented to, and he invited the two men to follow. They had previously given their names and addresses to the doctor in charge, but now, staying behind in the office, they confessed to having given false names, &c. One of them, who said he was \* \* \*, editor of \* \* \*, stated they had been induced to accompany \* \* \* on the representation that there was a lady quite sane confined in the asylum against her will, and he (the editor) and a photographer friend had come out to take her portrait and gather information with view to an article of exposure in his paper. He added they had seen at once that Case No. 35 was as mad as a hatter, or something to such effect, and regretted the deception. They left. My brother then spoken to by the doctor about his conduct, said, "Well, they are connections; they are journalists." He then went to 'Cook's Hotel,' treated the bar crowd, and finally wound up with a free fight."
4113. Do you remember that a few days after this two doctors went out to see how things were going on then? I think Drs. Ashwell and Long went at the request of the trustees. I think, also, that my brother had seen Mr. \* \* \* and said something should be done. He then pointed to two gentlemen as doctors, a Dr. De Kempf, or Le Kempf, and another doctor whose name I do not recollect. I know that the trustees requested Dr. Ashwell and Dr. Long to go out, and both were paid through me as the medium. I gave them my cheque, and the trustees afterwards paid me.
4114. Did these doctors give certificates of your sister's condition? Yes.
4115. Did you ever see those certificates? I think I did.

4116. Will you look at these [*Certificates produced. See Exhibits D to G—Appendix*], and see if you Mr \* \* \* recognise them as being the same? I think they are the same.
4117. How do you account for the necessity for documents of that kind in the circumstances you have mentioned to us? I do not know; I cannot account.
4118. Have you not already stated that, to the best of your belief, all the necessary legal formulæ were gone through? Yes.
4119. Do you not see that a fresh set of admission papers have been obtained;—can you account for that I do not know, sir.
4120. Do you not see how to clear up this difficulty? No.
4121. The point is this: Your sister had been a patient for some considerable time. Your brother goes to the institution; he says he sends a doctor there, and he proposes to expose the whole matter in the press. The trustees then take action, and get doctors to go out and certify as to your sister's condition, and then fresh papers are obtained to bring your sister as a confinee of Bayview House under the provisions of the Lunacy Act;—how do you account for that? I cannot account for it. With regard to the date on which the trustees made a special request to certain medical men to go out there and see my sister I am not quite certain; it may have been a little later than \* \* \*.
4122. Do you remember the action being heard in the Supreme Court. Was it not about the same date—that is, the end of \* \* \* or the beginning of \* \* \*? Yes.
4123. Was it in connection with that application to the Supreme Court that these fresh certificates were obtained? Oh, no; I cannot imagine that.
4124. Were not these papers taken out subsequent to the action and determination of the Supreme Court Judge? Yes, apparently, so.
4125. Some fortnight or three weeks later? Yes.
4126. How do you account for this—can you not give any explanation at all? I do not understand it; there must be something of which I know not, but I do not know that the doctors went out at the request of the trustees.
4127. But did they not go out and sign admission orders for a patient already in the asylum? This I cannot remember; my impression is that the visit I have referred to as made by these two doctors is not the particular matter referred to on the other date.
4128. But still were they not the same two doctors? Yes.
4129. And did they not make the visit at about the same time or a little later? I cannot clear it up, and yet I see on this certificate something which identifies myself with it. I have written on the front of it between lines written by the late Mr. \* \* \*, "trustee under the will of her mother."
4130. Was Mr. \* \* \*, the solicitor, with you when you wrote that, or rather when the front page of the certificate was filled in? Yes; most of the words written were in \* \* \* 's handwriting.
4131. Did he ask you to insert those words or did you insert them of your own accord? I cannot say.
4132. Do you recollect the terms of your mother's will? Yes.
4133. Does your mother's will confer the power of trusteeship indicated in that paper? Yes; the trustees were placed in the position of guardians.
4134. As a matter of fact in this whole matter did you act under the advice of the then trustees, and at the time believe they were conducting the business in a legal and proper manner? Of course I naturally thought so.
4135. If there are any imperfections about this are you in any way responsible? I am responsible in this way, that I acted to the best of my belief and my knowledge, and did not act wrongly.
4136. Can you give any explanation for writing in these words? No; I cannot.
4137. Since your sister has been placed under the authority of Dr. Vause I suppose you have visited her frequently? Yes.
4138. Are you perfectly satisfied with the way in which she has been treated? Yes.
4139. Both as regards food and clothing, attendance, and everything else? Yes.
4140. Do you visit her at different hours? Yes; I have had opportunities of visiting her, for which I have every reason to be thankful.
4141. Do you think it would be unsafe for your sister to be removed and placed in charge of some private person? Yes.
4142. Do you think if this course were followed she would go through the same bitter experiences she passed through on previous occasions? I do, sir, most certainly.
4143. Has your brother interfered a good deal in connection with the proposed removal of your sister from the institution? Yes.
4144. Do you think your brother is a fit person to be entrusted with the care of your sister? I can only answer that question in one way. It is painful for me to have to do it, but I will read you some memoranda covering the period between December, 1884, and December, 1892. During that time my brother was charged at the Sydney Police Court five times with drunkenness, and once for being illegally on premises, the last-mentioned charge being made at the instance of his wife. In December, 1892, he was charged with and fined for drunkenness. On another date an information was lodged against him. The police went to his house and found his wife was lying almost in extremity. They tried to ascertain from the doctor attending her what was the matter. The information was refused. I was very anxious and made further enquiries, and learned that my brother had so brutally ill-used his wife that her life was endangered, and if the matter had gone any further his punishment would have been very severe. That is my answer, I am sorry to say. A man who dances on his father's grave is not fit to have charge of an invalid sister. I have kept clear of him myself, and I intend to do so while I live. I may add, that since being a trustee under my mother's will I have rendered to the Master in Lunacy, at frequent intervals, a report on the patient's condition and treatment as a patient at Bayview Asylum. I have a copy of one of my reports, it is marked enclosure No. 4, and is as follows:—The trustees have taken special pains to note Miss \* \* \* 's treatment as a patient at Bayview Asylum, and her mental condition. An arrangement with Dr. Vause, permitting occasional day visits to the household of her eldest brother (the senior trustee), has been continued, and, when circumstances allow, visits are now more frequent. It is understood of these visits that one of the trustees shall be present and responsible for the patient's safe custody and return to Bayview, so that she is free for the time being from official oversight. Usually a day once a fortnight is the time fixed, but there is no restriction as to the frequency of the visits,

Mr. \* \* visits, neither is there as to calls at the asylum to see her. There are, of course, specified days for receiving visitors, but the asylum authorities permit access any day within reasonable hours to one of the senior trustees' daughters. The latter is afforded the fullest opportunity of inspecting the provisions for her aunt's comfort as to residential accommodation, and also as to personal requirements in the way of clothes, &c. She testifies most favourably; also that the lady superintendent at the asylum, (Mrs. Gilchrist) is specially kind and painstaking in supervising Miss \* \* \* 's wardrobe, and seeing that she is kept supplied with every reasonable requirement. Miss \* \* \* 's physical health is excellent; but as regards her mind, the trustees regret to state the most careful observation has failed to reveal any real improvement. Mentally she is neither better nor worse; and there are strong grounds for fearing that were she beyond legal control the eccentricities of conduct and manners to her person that pertained in the past would be found in no degree diminished. When last "on leave" (the second occasion) Miss \* \* \* resided at times with her father and mother; with her eldest brother, and her youngest brother the late Dr. \* \* \*; and also in six other households (not relatives), where the fullest provision was made (by adequate payment) for her comfort and safety. In no instance could she content herself for long. At first all would go well; then a mania of suspicion, jealousy, and revolt—sometimes developing into a degree of violence—would possess her, and, if not watched and prevented, away she would go, whither no one could be certain. Although naturally proud of disposition, she would at such times billet herself in the most undesirable quarters, quite unsuited to her position in life, and in some cases in the fullest sense inconvenient. No designed moral laxity is intended to be conveyed, but all idea of the ordinary conventionalities of life would seem to be lost sight of, and dangers not to be mentioned were, of course, incurred. Sometimes she could be traced easily; at others, weeks would elapse without news, until suddenly she appeared at her father's or some friend's house in the best of humours, and as if nothing out of the way had happened. Usually, little by little, she would in the most matter of fact way, with but apparent innocence of their gravity, relate experiences only too suggestive. It was the utter failure of all efforts to keep Miss \* \* \* within safe bounds that compelled the original trustees to return her as a patient to Bayview Asylum. This step was approved by her only sister, Mrs. \* \* \*, and her husband, Dr. \* \* \*; also by Dr. \* \* \*, youngest, and \* \* \*, eldest brothers. It may also be stated that Dr. \* \* \*,—who is resident in England, but knows the case well,—recently wrote to the senior trustee his advice that, on no account should Miss \* \* \* be allowed to fall into private hands. The total want of understanding of the general fitness of things is still at times a marked characteristic with Miss \* \* \*, and it is the trustees' desire to emphasise as one matter leading up to their conclusion, that restraint is still necessary. Usually her memory is excellent; but is not always used on profitable topics. Sometimes, when sitting quietly at the table with the senior trustee and family, she will suddenly revert to, and relate with circumstantial detail and much gusto, some of the very inconvenient experiences above referred to. Even apart from personal safety and being well cared for, the trustees are convinced that Miss \* \* \* is in reality far happier at Bayview than when she was at large. Nothing could be kinder than the treatment she receives, and this when in a good frame of mind she will admit. Of course she resents control; that she always did; but that is necessary. She is taken to church, for drives, and to concerts when she will go, by the asylum folks. And it seems the only thing further to be done for the present is to increase the frequency of her visits to the house of the senior trustee where there are young people she is fond of, and where at times she meets old friends."

4145. Do you affirm that the statement you have just read is correct? Yes; I do.

4146. In the course of his evidence your brother said he was your sister's favourite brother, and much attached to her, and further that your father specially recommended that your sister should be handed over to his care. Is that so? It is a most utter falsehood. My poor father knew too much to make such a recommendation as that. If I may be permitted, I would say that my father had such an opinion of my brother that he made all settlements on my brother only life interests. My mother in her will also made certain provision for him. There was about £100 provided for him, but in all cases they were only life interests, and all these life interests, in the main, he has managed to get rid of.

4147. Was it that they had such little confidence in him that your father and mother only provided life interests for your brother? Yes.

4148. Your brother told us in his evidence that according to your mother's will all his property in case of his death would fall to you. Is that the case? No, sir; but a portion of my sister's property would fall to me and the other sister jointly.

4149. Is there any special provision in the will making you the recipient of these moneys as they fall in? There is nothing of the kind. If my brother hints at such a thing he is wrong entirely. With regard to the larger portion of my sister's property I must inform you that in case of her death that goes to my children.

4150. Has your brother such a sufficiency of independent means as would lead you to think him to be a proper person to have charge of your sister? No.

4151. As regards money matters would he be in the position to take as much care of your sister as she receives now? No; his total means are very limited. He gets £28 from one property, £45 per annum from another, and that makes, I think, about the sum total of his income. He has a very slight income, and has never done a day's work since he has been in Sydney, and it is his boast that he never will.

4152. This is a somewhat delicate question I am about to put to you; it is, however, necessary that the question should be asked, and you will understand what I mean when I ask you if any members of your family besides your sister have been subject to fits of insanity, either on your father's side or on your mother's side? Yes; on my mother's side I am sorry to say. There is a man now in Sydney a relation on my mother's side who is insane, but it is a harmless kind of insanity. He spent the early part of his life in England, and he is at present decidedly unbalanced.

4153. In giving the evidence you have given to-day regarding the routine followed at Bayview, and the treatment of your sister there, are you solely desirous of doing the best you can for her welfare in her unfortunate position? I trust so. I can imagine no other reason. I may add that at great personal and monetary sacrifice, and on the suggestion of Dr. Vause himself, I went to live, for my sister's benefit, in a house opposite the asylum itself. I did this on purpose to be near at hand whenever I could be of any service; as far as my experience goes Dr. Vause has been most kind in every shape and form. Everything likely to benefit my sister or to add to her comfort has been done, and Dr. Vause has been informed by me

- me that he is to obtain, irrespective of cost, whatever he may deem to be desirable for her benefit. Where Mr. \* \* \* I am living now is my sister's property.
4154. Do you pay rent for that house? Yes; and I have to regularly account to the Master in Lunacy for that rent as an asset in my sister's property. More than all this, Dr. Vause informed me that whenever my sister's condition would permit I could have her across at my own residence, provided I would be responsible for her safe-keeping. From the time I went to live out there my sister, when well enough, has been at my house one day per fortnight. I would receive her myself in the morning, stay with her all day, and take her back to Bayview House at night.
4155. Do you remember having lived in \* \* \* ? Yes.
4156. How long did you live there? About fifteen years.
4157. Did you come over from \* \* \* to Australia as a passenger? Yes.
4158. Who paid your passage money here? I did.
4159. I ask you to remember that you are on your oath, and having done so, will now ask you, supposing your brother stated in evidence, on oath, no later than yesterday, that he paid your passage money over here—is that true, or did he send you the money? The whole statement is cruelly false.
4160. *Dr. Garran.*] Has your brother any direct pecuniary interest in getting your sister out of Bayview House? None other, except what I must assume. If my sister were removed from Bayview House I know adequate provision would be made for her maintenance elsewhere, and supposing my brother had charge of my sister he would, in that sense, be to some extent pecuniarily interested.
4161. Do you think your brother would be able to live better in his own house if he had his sister in his charge? Undoubtedly he would. At present her keep costs at the asylum £100 a year. Dr. Vause has a free hand to spend anything within reason—he can spend what he likes. My sister's income is sufficient to make it worth my brother's while to get possession of her if he can.
4162. So, then, do you mean to say if your sister were released from Bayview House and put under your brother's care, he would be able to live on your sister's income, added to his own, in much better style than he lives now? Certainly.
4163. Have you, as the elder brother, any direct pecuniary interest in keeping your sister at Bayview House? I cannot imagine any.
4164. Does it absorb the whole of her income to maintain her at Bayview House? No.
4164. What becomes of the rest of her fortune? It is in the hands of the Master in Lunacy, who now has some three or four hundred pounds.
4166. Will that accumulation of money ultimately benefit you or your children? That would accumulate, I think, for the benefit of my family.
4167. Amongst how many is that money to be divided? Amongst four, I think—no, three.
4168. What do you estimate your sister's present income at? The portion under my mother's will is £180 per annum.
4169. How much of that income is left after her maintenance is paid for at Bayview House; what I mean is, after the expenses incurred at Bayview House have been paid, how much remains per annum to swell the accumulating funds in the hands of the Master in Lunacy? I think the cost at Bayview is about £125 per annum, and the whole of the amount of my sister's income is £180 per annum, besides a settlement.
4170. And how much is the settlement? It is a half interest in three properties, which yield in gross about 50s. per week, or (say) 40s. per week net. This is derived from a property settled on this sister, and on another sister living in England. That is held by separate trustees, and could not enter into this matter at all.
4171. But how much do you think accumulates each year? I think in all about £110.
4172. *Mr. McGovern.*] We have it in evidence that you accompanied your sister, or put her in a cab, and took her to Bayview House:—have you a distinct recollection of that circumstance? I have some recollection of my sister going with me.
4173. Did you induce her to go. It has been given in evidence that she called upon you, that you asked her to sit down for a few minutes, that you went straight away, obtained a cab, and took her to Bayview House. In answer to the President you said you think you went out with her, but did not know how;—what really happened? I think I went out with her.
4174. If so, is it not likely that you would go out in a vehicle? Yes, I suppose so.
4175. Do you know how she was taken to Bayview House on the second occasion? I do not remember the details, but I certainly had my share in the responsibility of her being taken there.
4176. Had you the responsibility of a trustee then? No; nothing more than the responsibility of her brother.
4177. Did you believe that you were safe in acting on the authority of Mr. \* \* \* the then trustee, and did you believe you were right in the action you took? I took no action beyond going to the asylum as her brother. I simply accompanied the trustee as her brother.
4178. Were the trustees with you and your sister? Yes, undoubtedly.
4179. Do you know that certificates were made out on the opinions of medical men for her admission on that occasion? No; I do not like to charge my memory so as to speak with certainty on that point.
4180. Are you confidently of opinion that on that occasion the trustees obtained the certificates from two medical men, which are required by law before a patient can be admitted to an asylum? I can fully assure you that I had no idea, that I have no doubt now, of the fact that she was put in the asylum in proper and legal form.
4181. Does your statement amount to the fact that in 1875 your father put your sister in Gladesville when Dr. Fortescue was one of the medical men who gave the certificate; that in 1881 your father again sent your sister to an asylum—Bayview House this time, and that Dr. Fortescue and Dr. Hodgson were the medical men who gave the certificate; that she was liberated the same year at your father's request? Yes, I think so.
4182. Did your sister conduct any business for your father during his illness—did she write the whole of the correspondence, or anything of that kind, immediately prior to his death? Not to my knowledge.
4183. Your brother has told us that she wrote the whole of your father's correspondence immediately prior to his decease? That is utterly false; she was mad at the time, even much worse than she is now. My brother was not even permitted to approach my father's house just about this time. 4184.

Mr. \* \* \*  
28 Nov., 1894.

- Mr. \* \* \* 4184. Are you positive that in 1884, when the trustees put your sister in Bayview House, that they complied with all the forms of the Lunacy Act? I cannot say; I am not even acquainted with the Lunacy Act.
- 29 Nov., 1894.
4185. Do you think they obtained the necessary medical certificate? As far as my knowledge and belief are concerned, I am convinced that all proper and legal forms were complied with.
4186. In August, 1891, when your sister had been seven years at Bayview House, after the trustees had put her there in 1884, why did the trustees have to obtain fresh orders of admission? I do not know why it was done.
4187. In July, a month previous to the dating of the order and about the time her brother moved the Supreme Court, did yourself and co-trustees, thinking your sister was not legally detained on the certificates of two medical officers, since dead, get any information which compelled you to take out fresh orders a month later—that is, in August? I do not think so.
4188. I want you to be sure on that point, and I again ask you did anything occur or anything come to your knowledge, as one of the trustees, to the effect that your sister was illegally detained? Certainly not.
4189. Did anything whatever occur which induced you to get a fresh order a month after the Court was moved? I am confident that no intimation reached me or my co-trustee to the effect that my sister was illegally detained.
4190. Therefore, you cannot explain why this fresh order was taken out? I cannot explain. To me it is a peculiar part of the whole affair. There must be something connected with it that I do not understand.
4191. Did anything come out in July, when the action in the Supreme Court was taken, to induce you to obtain fresh certificates? No; I have not the slightest doubt in saying that.
4192. Supposing your brother has stated in evidence that the trustees discovered that your sister was illegally detained, and that they, therefore, obtained fresh certificates to keep her in—is there any truth in that? I do not think so. I do not know of anything, and have never heard of any question of that kind raised before.
4193. If you never heard anything to this effect, why did you get a fresh order for the admission of your sister as a fresh patient, when, as a matter of fact, she had been an inmate of Bayview Asylum from 1884 to 1891, a period of seven years? [*No answer.*]
4194. Do not the certificates show, or does not the evidence show, that the Supreme Court was moved in \* \* \* that yourself and your co-trustee found that the order was not in conformance with the law, although your sister had been in Bayview Asylum for seven years previously, and in August you got certificates from two doctors for the detention of your sister in compliance with the terms of the Lunacy Act? I cannot say; I have no recollection of that kind.
4195. Coming back to this report which you, as a trustee, furnish to the Master in Lunacy, how often do you submit these reports to that official? Every six months. It is only this year that I had anything to do in that matter, and I took the earliest opportunity of rendering a report dealing with the general treatment of my sister.
4196. Can you tell me whether your predecessor, the late Mr. \* \* \*, as a trustee, visited your sister and furnished a report to the Master in Lunacy? I cannot say. I know that both Mr. \* \* \* and his wife visited my sister.
4197. Did you receive any instructions when you took the position of a trustee to furnish these reports? My instructions were from the Master in Lunacy.
4198. To the effect that you should furnish him with a report every every six months? Yes.
4199. Does the Master in Lunacy send out any officer to ascertain how your sister is treated? The Master in Lunacy has charge of my sister's estate, and I suppose he knows what he ought to do.
4200. Did he demand this report from you? Not exactly demand it. I made out the report in view of the uncertainties of life. I did not know but what something might happen to me any day, and I thought I would take an early opportunity of stating in writing my views on my sister's case, and her treatment at the asylum.
4201. I thought you told me that the Master in Lunacy instructed you to report to him every six months? I took it as such, and I have furnished fully half a dozen reports. The Master's instructions were that I should render him all accounts.
4202. But what has this report to do with accounts? You will see that it is marked Enclosure No. 4, and that is one of the first batch sent in.
4203. Do you know whether the Master in Lunacy sends an officer to Bayview House to see whether a report like that is correct? I know nothing about what the Master does.
4204. *President.*] Do I understand from you that you send in to the Master in Lunacy a number of documents connected with your official duties as a trustee, and amongst these documents is this report marked Enclosure No. 4? Yes.
4205. Did you send that one in particularly, although perhaps not exactly officially, merely to supply the Master with this record in case anything happened to you? Yes.
4206. Are you aware that the Lunacy Act provides that official visitors shall look into the matters you refer to in your report? Yes.
4207. Not so much the Master in Lunacy as the official visitors? Yes.
4208. *Dr. Manning.*] Are you aware that Mr. \* \* \* is dead? Yes.
4209. Did you act mainly under his instructions in regard to all official matters connected with your sister's confinement in Bayview House? Entirely.
4210. Are you aware that the certificates on which your sister was confined in 1881 were produced in Court when your brother made application for your sister's removal? I think certain certificates were produced. I did not see the papers, therefore I cannot speak distinctly.
4211. Do you not think if the Court had found that your sister was illegally detained it would have been the duty of the Judge to discharge her? As far as I understood that question was not raised or was not dealt with. She was there properly, and the Court declined to discharge her.
4212. Do you think it would be the duty of the Court to see that the patient was legally there? Yes.
4213. Are you aware that a special point was raised as regards this case—that your father, who had signed a request on which she was admitted, was then dead, and that a difficulty arose as to who was his legal representative? I really did not hear that. I cannot say, for I was not present during the whole of the proceedings.
- 4214.

4214. Was this left to Mr. \* \* \* in the main? Certainly.

4215. Are you aware that new certificates were obtained by Mr. \* \* \* owing to some doubt having arisen relative to the custody of your sister, the person originally signing the certificate being dead? I do not recollect anything about that.

Mr. \* \* \*  
28 Nov., 1894.

[Witness withdrew.]

Eliza Hunter sworn and examined:—

4216. *President.*] Are you engaged at Bayview House? Yes, as laundress.

Eliza Hunter.

4217. How long have you been there in that capacity? For thirteen months.

28 Nov., 1894.

4218. Has there always been an adequate supply of linen for the use of the patients? Yes.

4219. Always? Yes.

4220. Have you ever heard any complaints about there being a short supply of linen? No, not at all.

4221. Do you remember there being some little talk about the removal of Case No. 1 from the institution? Yes.

4222. Have you had since that time an extra amount of work to do? No.

4223. Have you noticed any change whatever in your duties? No.

4224. Has there been a larger number of sheets coming to the wash? No, there have been no more than there usually was.

4225. Is the supply of things passing through the laundry the same now as it was six months ago? Yes, and as it was eight or twelve months ago.

4226. Is the number of strong rugs about the same? Yes.

4227. But are there not a number of these strong rugs destroyed, and sheets torn? Yes, there is always a supply in stock to renew them, so that the number keeps much the same.

4228. Is there the same quantity of under-linen and other wearing apparel as formerly? Yes.

4229. Do you remember a nurse named Maggie Macleod? Yes.

4230. Did you ever fall out with her? Yes, she used to try to keep the work back, she would detain the dirty linen and I complained about it.

4231. Did any other nurse do the same thing? She was the only one I complained about.

4232. To whom did you complain? To the matron, Jessie Fuller, but she did not seem to take any notice of it.

4233. Is there a stock of clothing kept in the laundry for use? Yes.

4234. Has your issue of clothing been the same for the last few months as it was previously? Yes, it has been the same always since I have been there.

4235. We have had it in evidence from several witnesses, that immediately after Case No. 1 was taken away from Bayview House a great change took place, inasmuch as a large supply of under-linen, material for clothing, and bedding was purchased;—if that had been done, must you not have known of it, and I ask you now did you ever know of any such thing? No, I am quite sure of that; there has always been the same supply of clothing coming to and going from the laundry, since I have been there.

4236. Has there been any striking difference in the quantity? No, certainly not.

4237. Do you know the witness Maggie Macleod very well? Yes.

4238. Have you placed every confidence in all that you have heard her say? At one time we did, but we found out that she was very untruthful.

4239. Do you mean she did not often stick quite to the truth? Yes.

4240. Did you complain that she tried to induce the other nurses to keep back the soiled linen? Yes.

4241. Must she not have been a torment to you in this respect? That is just what she was.

4242. Did keeping this linen back lead to a lot of confusion in your work? Yes.

4243. That being the case, how did you keep up the average of supply? I had to try to do it as best I could, but it was hard work to keep it up.

4244. Was that the case six or eight months ago, and prior to Macleod leaving the institution? Yes.

4245. After you had been there for some time I suppose you thoroughly knew the work of a laundry in a large institution of this kind? Yes.

4246. Do you think there was always a sufficient supply of the different articles passing through the laundry? Yes.

4247. Have you been in any large institution besides this? No.

4248. Had you any practical experience of laundry work before? Yes.

4249. Were you engaged for your present position by Dr. Vause? Yes.

4250. Did you sign the book of instructions, obligations, and regulations? Yes.

4251. Did you ever see or hear of cruelty being practised on the patients? No; there never was any cruelty, as I know of or heard of.

4252. Is it a large laundry at Bayview House? Yes.

4253. Does the work of it occupy the whole of your time? Yes.

4254. What time do you go to bed at night? Between 9 and 10 o'clock.

4255. Is it not pretty hard work;—have you any assistance? I have one assistant.

4256. Do you know much about the men's side of the institution? I know nothing about it.

4257. Where do you sleep? At the end of No. 2 ward, and just off No. 1 yard.

4258. Has it been your habit to have a good deal of conversation with other nurses? No; very little. I did not encourage it.

4259. I suppose you had passing through the laundry a large quantity of soiled linen? Yes; there was very much soiled.

4260. Taking it as a whole while you have been at the institution, as far as you can remember, was the same amount of clothing passed through the laundry on an average as there has been passing through lately? Yes.

4261. *Dr. Garran.*] I suppose, of course, there were many other things passing through the wash besides sheets? Yes.

4262. Maggie Macleod gave it in evidence that during her time at the institution she always took the sheets off the beds at night, folded them up and put them away, then put them on the beds again in the morning,

- Eliza Hunter. morning, but never used them at night, because she said if they had been used at night they could not have been used for long, as there was not sufficient for a change;—is that so. I do not think so.
- 28 Nov., 1894. 4263. Could you tell me if this were the practice by the fluctuation in the number of sheets passing through the laundry? I do not know about that; there was always a stock kept in the cupboard.
4264. Did you get more than two sets of sheets for wash from that ward? Yes.
4265. How many pairs of sheets per week did you get from her ward—more than two pairs? Yes, certainly; I got more than a dozen pairs per week.
4266. Then, that being so, must they have been used on the beds? Yes.
4267. If, then, Maggie Macleod says there were only two patients in her ward, during the whole of the time she was there, who slept in sheets at night, must she be saying what is not correct? Yes.
4268. She was asked also if the patients in her ward wore night-dresses. She said “no; that they never had a night-dress in her time; that fourteen women slept in her ward; that only one had a night-dress until some were made lately, when some coarse brown calico was brought, and Dr. Vause got the coachman’s daughter to come in and make it up”; is that true? No; it is not true to say that only one had a night-dress.
4269. Did you get as many as fourteen from that ward? Yes.
4270. Can you say how often clean night-dresses were given out? She could get them whenever they were wanted.
4271. How many per week do you think would be sent to that ward? I did not take particular notice, neither do I know how many were returned from the ward to the laundry.
4272. Did these things come back from the ward in separate bundles? Yes.
4273. Do you think that the evidence given by Maggie Macleod on this particular point is incorrect? Yes.
4274. *President.*] Did you say just now that you had one assistant? Yes.
4275. Do any of the patients assist you besides the one assistant to whom you refer? Yes.
4276. How many? Five or six.
4277. *Mr. M’Gowen.*] Do you know a former nurse of the institution named Lizzie Verity? Yes.
4278. Was she a truthful girl? I did not have many dealings with her.
4279. Do you say that at first you thought Maggie Macleod was reliable in her statements, but that you found out afterwards she was untruthful? Yes.
4280. Have you found out anything in regard to Rose M’Mahon, Josephine Mackay, or Lizzie Verity, to lead you to believe that they are not truthful witnesses? I had not much dealings with these girls at all.
4281. Do you not say in answer to the President that you did not notice any great change in the stock of clothing supplied shortly after the 20th of May last? I did not notice any change.
4282. If these girls, whose names I have mentioned, state that there was a great change, and that a much larger supply of blankets, rugs, sheets, and night clothes were purchased, were they speaking the truth? I cannot say anything about that.
4283. Do you think it could have been true if these girls say it was so? I think I should have known if there had been a great change in this respect by the additional clothing passing through the laundry; but I know it never came through my hands.

[Witness withdrew.]

Nellie M’Bride sworn and examined:—

- Nellie M’Bride. 4284. *President.*] Are you a nurse at Bayview Asylum at present? Yes.
- 29 Nov., 1894. 4285. How long have you been there? A year and five months.
4286. In what part of the asylum are you engaged? I am on the Government side. I take charge of the female patients there.
4287. Of all of them? Of about 122.
4288. Were you engaged by Dr. Vause himself? Yes.
4289. At the time of your engagement did you sign a book which stated your obligations and duties, and saying that if you saw anything go wrong you must report the circumstance either to the matron or Dr. Vause? Yes, I did.
4290. When did you commence your duties? I think it was on or about the 3rd of July, 1893.
4291. Did the Government patients always get a sufficient supply of clothing? Yes.
4292. Were you at the institution on the day that we, as a Royal Commission, paid a visit of inspection? Yes.
4293. Were the patients always as clean and as well clothed as they were on that day? They were always just the same.
4294. Did you make any special arrangement, as far as the patients are concerned, when visitors came to the asylum? We might lace their boots and tie their neckties.
4295. Did you do anything to the patients further than that? No.
4296. Did you put new dresses on patients who were dirty? No; when a patient was dirty she was seen to at once.
4297. We have had it in evidence, that new gowns were put over dirty patients; is that so? No.
4298. Did you always know when the visitors were coming to see you? No; not until they were in the house.
4299. Did the visitors as a rule, come to you first? Sometimes they would be in the adjoining yard before I knew of their presence in the building.
4300. Did they ever go to Dr. Vause first? They would generally come round the institution with him.
4301. Did you ever know of the official visitors going round without Dr. Vause, or without notice being given to the nurses of their arrival at the asylum? I cannot say that.
4302. Do you know the official visitors? Yes.
4303. When they go round the Institution do they carefully examine the patients? I never took particular notice.
4304. Have they ever spoken to you about the patients? No.
4305. Have you ever been asked any special question about any special patient on your side? I may have; I think so.

Nellie  
M'Bride.

28 Nov., 1894.

4306. Was it the usual custom for the patients to be sitting down or standing in a group, and for the official visitors to pass through them? Yes.
4307. Was that all they did? Yes.
4308. How long did these visits generally last? I do not know.
4309. Did you ever receive any intimation that the visitors were in the house, and that you were to get the patients ready? No.
4310. Are you quite sure of this? Yes.
4311. Do you sleep in one of the dormitories? Yes.
4312. With how many patients? Fourteen.
4313. Are there plenty of bed clothes? Yes.
4314. Are there sheets? Yes.
4315. And rugs? No, not in the dormitories, there are blankets and counterpanes.
4316. Is there sufficient clothing on the beds? Yes.
4317. Have you known any cases where Government patients had to wear stockings, which had no feet? I know that the patients always had plenty of stockings.
4318. Do you know anything about the single rooms? Yes.
4319. Did you ever assist in putting the patients in these rooms at night? Yes.
4320. Will you describe the course of procedure in doing so? They would always have their own bedding if they were dormitory patients. There was always plenty of bedding, blankets, counterpanes, and sheets. The other patients would have a bed and pillow, a coarse linen ticking filled with straw, a pillow and two rugs.
4321. What kind of rugs? Canvas on one side and a blanket sewn on the other.
4322. At what time do you go to bed at night? Ten o'clock.
4323. Are you on duty till that time? I am on duty until 7 o'clock at night.
4324. And from 7 until 10 o'clock at night is your time your own for you to do what you like? Yes.
4325. Does a night nurse sit up if there is a sick patient in either of the rooms? There is always a nurse on duty for any special case of this kind. If a patient is sick there is always some one up at night to look after her.
4326. Is there ample provision for making tea or coffee for sick patients during the night-time? Yes.
4327. Where are the necessary materials kept? In the cupboard in No. 1 and No. 2 dining-rooms.
4328. Is there a cupboard in each place? Yes.
4329. Where would you cook coffee or cocoa? There is always a fire in No. 1 dining-room.
4330. Always in winter and summer? Yes.
4331. Were there any means of access to the kitchen at night? No; there was always a fire in No. 1 dining-room.
4332. Did the other nurses know where the provisions were kept? Yes.
4333. Was there always plenty of milk? Yes.
4334. If you wanted to get a cup of tea in the middle of the night, could you get it? Yes.
4335. Did you ever get one? No.
4336. Do you know any other nurse that got one? No.
4337. Have you seen these stores in this place ready for use if they are required? Yes.
4338. Did you always think that there was an ample supply of clothing for the patients in the dormitories? Yes.
4339. Were the patients kept clean in every way? Yes.
4340. Have you ever known a patient being ill-treated since you have been there? No.
4341. Have you ever heard that patients were ill-treated? No; the patients were always treated with the utmost kindness.
4342. Have you ever heard of any patient or patients hurting themselves while in the single rooms? No.
4343. Did you ever take any of the patients out of the single cells early in the morning? Yes.
4344. Did you do it alone? Sometimes, with quiet patients.
4345. Who would go with you if you did not go alone? There has been as many as three or four nurses if the patient was troublesome.
4346. When you have taken patients out in the morning had they always their night-dresses on? Sometimes they had and sometimes they had not.
4347. Were they always provided with night-dresses when they were put in at night? Yes.
4348. How many utensils were put in the ten or eleven single rooms? Seven or eight altogether.
4349. Was every room provided with one? Yes; whenever a patient would use it.
4350. I want you to be careful in answering this question because we have had very different evidence on this point, and I again ask you how many utensils were placed in these single rooms? I am quite sure there were either seven or eight.
4351. Have you seen them yourself? Yes.
4352. Have you seen them clean in the morning? Yes.
4353. Was there always an ample supply of linen available in the laundry? Yes.
4354. Do you know a nurse named Maggie Macleod? Yes.
4355. Do you know that Nurse Macleod has given evidence that is not quite the same as yours? I do not know what evidence she gave.
4356. Would you put any reliance in what she would say? It would all depend on whether she were speaking the truth or not.
4357. Do you imagine that if she was put on her oath and made certain statements that she would not be stating the truth? I cannot say anything about that.
4358. Would you believe her yourself? No.
4359. Do you think that she is not truthful? I do.
4360. What evidence have you got to lead you to such an opinion? I have found out plenty of cases where she has not told the truth. For instance she told me that she put stockings on patients which she never did. I called her attention to this neglect and she told me to mind my own business. She had not done it.
4361. Do you know if that occurred on many occasions? Yes, it did.
4362. Do you remember Case No. 1? Yes

- Nellie M'Bride.  
28 Nov., 1894
4363. Do you remember when that patient was taken away from Bayview House? Yes.
4364. Immediately after his removal do you remember if there was a large supply of linen brought into the institution? I never took any notice of any additional supply.
4365. Was the supply about that time anything unusual as compared with the supply at other times? No; I am perfectly sure about that.
4366. Have you seen any alterations being made in the single cells on the women's side during the last few months? No; there is always some alterations going on. When I first went there the rooms were being painted.
4367. How many windows were in those rooms? There were two rooms which had two large windows; but as far as I can see the rooms are now just the same as they were when I went there.
4368. Has not a small window been placed in each room over the door to let the gaslight in? Yes.
4369. Were these windows for letting the gaslight in there six months ago? No.
4370. Has there not then been a change in the rooms in this respect? Yes; I had forgotten that; but the laying on of the gas and the means for letting the gaslight into the cells during the night is the only change.
4371. *Dr. Garran.*] Do you know the ward in which Maggie Macleod was nurse? Yes.
4372. Maggie Macleod told us "that she always took the sheets off the beds except two; that she always folded them up and put them away; that they were put on the beds again in the morning, but that they were never used at night, and if they had been used at night they could not have been used for long, as there would not have been sufficient for a change";—do you think that is true? I cannot say.
4373. Do you know whether the patients had sheets to sleep in? I know there were always plenty of sheets
4374. Was it usual for you to take the sheets off the beds in your ward? No.
4375. Not in any case? No.
4376. Did you not take the sheets off the beds of dirty patients? No.
4377. Maggie Macleod in her evidence said, "that there were fourteen women sleeping in her ward, and that none of them had night-dresses";—is that true? I cannot say.
4378. Did the patients in your ward wear night-dresses? Yes.
4379. Could you get them washed whenever they required it? Yes.
4380. Could you get them for use when they were required? Yes.
4381. If Maggie Macleod says that these patients never had sheets, or night-dresses, is such a statement true? No.
4382. Was there a stinginess in regard to these things as far as you know? No; there was not.
4383. Was there a night-nurse on duty amongst the female patients? Yes.
4384. Has there always been one since you have been at the institution? Yes; for some time at all events.
4385. Is there a male attendant on duty at night-time amongst the male patients? I cannot say.
4386. *Mr. McGowan.*] Do you not say that your duties commence in the morning at half-past 5 o'clock? Yes, in the summer-time.
4387. Are you up until 10 o'clock at night? I am not on duty till 10 o'clock at night, and generally leave off duty at 7 o'clock.
4388. But still if your services are required after 7 o'clock at night, are they at the disposal of the institution? Yes.
4389. Was there a night attendant regularly engaged before the facts about Case No. 1 were made public? Yes, if one was wanted.
4390. What do you mean by that? I mean that if there was a patient sick, there was always a nurse told off to look after her during the night.
4391. Was there a patient in each of these single rooms, pretty nearly every night? Very nearly; and if a patient became quiet while under separate treatment, we would give her another trial in the dormitory.
4392. As a rule were these eleven separate cells occupied by a patient in each every night? Yes.
4393. What time were the patients placed in these rooms? After tea, between 6 and 7 o'clock at night.
4394. What time were they taken out in the morning? About 6 until half-past 6.
4395. Did anyone look into the rooms from the time they were put in at night until they were taken out in the morning? Yes.
4396. Who did that duty? Different girls; and I would go to the patients myself if they became troublesome.
4397. How did you look in upon the patients? We would look through the open door.
4398. Would you do so before you went to bed at 10 o'clock at night? Yes.
4399. Although your duties would cease at 7 o'clock? Yes; if I was called or heard a noise I and other nurses would go and see what was the matter.
4400. Was it then only in the event of a disturbance that you would look into these rooms, after the patients had been put in between 6 and 7 o'clock? Yes.
4401. Would any of these women be placed in these rooms naked? There were two patients occupying these rooms who would never keep anything on them.
4402. Were there only two out of the eleven patients generally occupying these rooms? Yes.
4403. Were there any other cases where the clothing was taken away? I don't remember.
4404. Did you know Lizzie Verity, Rose M'Mahon, Bridget Morrissey, Josephine Mackay, and Maggie Macleod? Yes.
4405. Supposing all these witnesses say that there were more than two patients put in bed every night naked, would they be making a mistake? Yes; they must be.
4406. During your time at the institution did you ever know of a night attendant or night attendants whose regular work it was to look into these single rooms during the night? Yes; a night-nurse always looked after these rooms.
4407. Was there a night attendant kept on duty every night? Yes.
4408. Was it her duty to look into these rooms? Yes.
4409. Are you quite sure on this point? Yes.
4410. Was there a night attendant of this kind twelve months ago, such as there is at present? No.
4411. Is there a regular night attendant now? Yes.
4412. When you go to look into these single rooms do you take a light? Yes. 4413.

Nellie  
M'Bride.  
28 Nov., 1894

4413. Do you think that the clothing supply for the Government patients is sufficient? Yes.
4414. How long a time elapses from when the official visitors arrive at Dr. Vause's house until they come to the asylum, to where the patients are kept? I cannot tell you that.
4415. Do you think a quarter of an hour elapses from the time of their arrival until they come round the asylum? I cannot say how long it would be.
4416. Have the official visitors ever come through without your having received a quarter of an hour's intimation of their arrival? They have often been upon me before I knew they were in the building at all. I have seen them in the dining-rooms when I have first known they were there.
4417. Is it not a customary thing for some of the nurses to give an intimation that the official visitors have arrived? I never knew of it.
4418. Do you know Case No. 12? Yes.
4419. Was she ever put in a single cell? Only when she became very troublesome.
4420. When she was put in the single cell were her clothes taken away from her? No, she always had a night-dress on.
4421. Do you know anything about an accident happening to Case No. 20? Yes.
4422. Did you take her out of a single room after the accident occurred? Yes; in fact I was there when she was taken out.
4423. Were you with another nurse? I think I was passing by at the time.
4424. Was the patient's arm broken? I did not know it was at the time, but I heard it was.
4425. Was there any blood on it, or on her body? I did not see it, and I did not see her for some time after I took her out, at about half-past 6 in the morning.
4426. Was it so dark then that you could not see the blood on her night-dress? No, it was not so very dark.
4427. Why did you not notice the blood then? Because I think it was on the inside of her arm.
4428. Did you know her arm was broken when you took her out at half-past 6 o'clock? No.
4429. Did she make any complaint? No.
4430. Did you use cold water when you washed dirty patients? There was one patient whom I always bathed in one bath and used cold water. That was Case No. 15.
4431. Did you ever hear of any complaint about a nurse treating a patient cruelly? No.
4432. Did you ever use a scrubbing brush or broom to wash any patient? No, never.
4433. Did an accident occur to Case No. 25? I do not know.
4434. Did she get her head cut? I think there was some accident of that kind. If she did get her head cut it was a mere accident, she was in a violent mood. She caught hold of me, we had a struggle, and both fell together.
4435. Did she bump her head against a door? Yes.
4436. Supposing other witnesses have said it was a customary thing to put women into these cells at night, naked;—is that correct? I never did it. I only know of two cases where women were put in naked.
4437. *Dr. Manning.*] Do you know Case No. 23, a patient at Bayview House? Yes.
4438. Is she always bathed in cold water? No, in hot water.
4439. A statement has been made here to the effect that you roughly used that patient by cleaning her with a scrubbing brush;—is that so? No, I never did it.
4440. Why was Case No. 15 bathed in cold water? Because she was taken to a bath where there was a flexible hose with a rose, which could be used, as she was an extremely dirty patient.
4441. Was she bathed only on one day in this manner? Yes.
4442. *President.*] Was it under Dr. Vause's instructions that this patient was bathed in this manner on this occasion? I do not know that it was anybody's instructions particularly.
4443. *Dr. Vause.*] I knew of the circumstance and was aware that cold water was being used.
4444. *President.*] Who gave you instructions to bathe the patient in this way? I know I was told to do so, but I do not remember who told me.
4445. How often does Dr. Vause go round the institution? Three times a day.
4446. At what time does he go in the morning? Seven o'clock.
4447. When does he next come through? At 12, noon.
4448. When does he come through again? At 5 in the afternoon.
4449. Who administers the medicine to patients when they are sick? The matron, always.
4450. Does Dr. Vause take a great deal of interest in his patients? Yes.
4451. Is he kind and attentive to them in every way? Yes, as far as I know.
4452. Do you report direct to him or to the matron? I report to the matron.
4453. Does she keep a book containing the nature of your report? I cannot say.
4454. *Dr. Vause.*] Do you know that it is your duty as a nurse, and the duty of all nurses, to report any irregularity direct to the Medical Superintendent? Yes, doctor.
4455. Have you seen any bugs while you have been at the institution? No; nothing unusual.
4456. Have you seen every precaution taken to keep the place clean, and in good order? Yes, doctor.
4457. Were not the single-room patients visited during the night whenever the condition of their bodily health required it? Yes, doctor.
4458. Were there not always nurses sleeping quite close to the single rooms? Yes, doctor.
4459. Did you not sleep quite near to them? Yes, doctor.
4460. Could you not have heard the slightest noise amongst the patients during the night? Yes, doctor.
4461. Did you not personally visit the patients in these rooms whenever necessary? Yes, doctor.
4462. Even if you had not been on special night duty? Yes, doctor.
4463. Have you not always had provisions for sick patients during the night-time? Yes, doctor.
4464. Did you think the nursing staff was insufficient for the work to be done? No, doctor.
4465. Did any of the nurses ever complain of being over-worked? No, doctor.
4466. Were sick patients always looked after by a night-nurse? Yes, doctor.
4467. Did night-nurses have ample provision to supply patients with articles of invalid diet, suggested by the Medical Superintendent? Yes, doctor.
4468. In cases of patients not wearing night-dresses, did they wear a chemise during the night? Yes, doctor.
4469. Were patients ever stripped and put in the single rooms without bedding or night-dresses, except Case No. 15 or Case No. 33? No; the other patients always had plenty of bedding or night-clothes.

Nellie  
M'Bride.  
28 Nov., 1894.

4470. Could Case No. 15 be prevailed upon to sleep otherwise than in loose straw? No, doctor.
4471. Did she invariably rip up her mattress, take out the straw, and make her bed in her own fashion? Yes, doctor.
4472. Did she appear comfortable in that way? Yes, doctor.
4473. Does she enjoy good general health;—is not Case No. 15 a strong, robust woman, who makes no objection to having a cold bath? Yes, doctor.
4474. Does she not invariably denude her person of covering during the day? Yes, doctor.
4475. Occasionally does she have to wear a camisole to enable her to be in the grounds with safety during the day? Yes, doctor.
4476. Is it not true that the patients in the single rooms are at first supplied and amply provided with sheets and blankets? Yes, doctor.
4477. Is it not true that these are only changed for stronger coverings when lighter things have been destroyed? Yes, doctor.
4478. Did you ever know of a patient suffering from cold while in a single room? No, doctor.
4479. Is it not true that recent cases placed in a single room for excitement or violence, are provided with three or four mattresses to prevent them lying on or coming in contact with the floor? Yes, doctor.
4480. Do you consider the food is of inferior quality? No, doctor.
4481. Do you think it is deficient in quality? No, doctor.
4482. Did you ever have occasion to complain about the tea? No, doctor.
4483. Was not the same quality of tea provided for each department in the establishment? Yes, doctor.
4484. Do the private patients, Government patients, and nurses all use tea from the same chest? Yes, doctor.
4485. Who orders the bread for the establishment? The matron or the superintendent.
4486. Is it of good quality? Yes, doctor.
4487. And abundant in quantity? Yes, doctor.
4488. Do the Government patients have butter for breakfast and tea on three days a week? Yes, doctor.
4489. Do they get 3lb. of butter on each day? Yes, doctor.
4490. Do they get jam on two days a week? Yes, doctor.
4491. Do they get treacle on one day a week? Yes, doctor.
4492. And dripping on one day a week? Yes, doctor.
4493. Is there always an ample supply of these articles? Yes, doctor.
4494. Were there requisition-books in which you could enter a request for extra diet? Yes, doctor.
4495. Did you ever know of a requisition being refused? No.
4496. Is not the sewing-room under the care of the matron? Yes, doctor.
4497. Do you not have beef and mutton on alternate days in the week? Yes, doctor.
4498. Is the meat not always good in quality, abundant in supply, and well cooked? Yes, doctor.
4499. *President.*] Do you say it is well cooked? Yes.
4500. *Dr. Fause.*] Do you have soup three times a week? Yes, doctor.
4501. Do you have fish once a week? Yes, doctor.
4502. Are the patients specially dressed, otherwise than washing their hands and faces and combing their hair and arranging their dresses, when official visitors arrive? That is all.
4503. Are they got in and specially dressed in clean clothes to receive the official visitors? No, doctor.
4504. Do you know beforehand when the official visitors are coming? No, doctor.
4505. Is it not the rule that the first intimation you have of their arrival is when they are in the house? Yes, doctor.
4506. It has been stated in evidence that some patients, as a rule, only have on a gown;—is that true? That is not true.
4507. Can you state positively that the Government patients are well and adequately clothed? Yes, doctor.
4508. Do you say the same with regard to the private patients? Yes, doctor.
4509. Did you ever hear of any private patients' clothing being placed on Government patients? No, doctor.
4510. Did you ever hear of dirty patients not having clean clothes to wear? No, doctor.
4511. Do you remember Case No. 11? Yes, doctor.
4512. Was she ever in the slightest degree neglected? No.
4513. Was her body ever covered with vermin? No.
4514. Did she for a time only occupy a single room at night? Yes, doctor.
4515. Had that room a bedstead in it? Yes, doctor.
4516. Was it supplied with a horsehair mattress, blankets, sheets, pillows, counterpane and mosquito-nets? Yes, doctor.
4517. Was it on account of her excitement and quarrelsomeness with other patients that Case No. 11 occupied this room? Yes, doctor.
4518. Did she ever complain about it? No.
4519. Was she not brought back again to sleep in the associated dormitory after she became quieter? Yes, doctor.
4520. Did she not say she preferred to sleep in the single room? Yes, doctor.
4521. Do not single room patients require more care and cause greater anxiety to the nurses than the others do? Yes, doctor.
4522. Was this patient ever allowed to lie in the yard exposed to rain? No.
4523. Was she ever permitted to lie about outside in all sorts of weather? No.
4524. Was she left to roll about as she liked in her own dirt? No.
4525. Did she receive every care and attention? Yes, doctor.
4526. Was she not at times a very difficult patient to manage? Yes, doctor.
4527. Was she not very abusive? Yes, doctor.
4528. Would she throw herself down and fight and struggle with her nurses when they attempted to lift her up? Yes.
4529. Was it not on this account that she was occasionally placed in a single room during the day-time? Yes, doctor.
4530. Did you ever know of clean clothes being placed over dirty ones on patients when they went to see their friends? No, doctor.

4531. Did you ever know of a private patient being placed on the Government side of the house without good reason? No, doctor.

4532. Would such a reason be the largeness of the size of the Government dining-room allowing of more freedom of movement to the patient, and at the same time closer observation on the part of the nurses? Yes, doctor.

4533. Would such a reason as this apply to Case No. 13? Yes, doctor.

4534. Was she invariably over in No. 2 or No. 3 dormitory? Yes, doctor.

4535. Is either of these dormitories a Government dormitory? No, doctor.

4536. Do you think that patients were ever placed in the single rooms to save expense? No, doctor.

4537. Or to save the employment of additional nurses? No, doctor.

4538. Do you think the staff of nurses is invariably sufficient? Yes, doctor.

4539. *President.*] How many nurses are there? I forget.

4540. How then can you tell whether there are sufficient in number or not if you do not know how many are employed? I always saw sufficient nurses there.

4541. How many are there on the Government side of the house? Six.

4542. How many patients are there? I think there are fifty patients.

4543. *Dr. Vause.*] Have you not known the official visitors to frequently pull the clothes from the beds in the dormitories when they have been going through? Yes, doctor.

4544. Do you think on these occasions they could see exactly how the beds were made, and whether they were clean or not? Yes, doctor.

4545. *President.*] Did you go round with the official visitors through the dormitories? No, sir.

4546. How then could you tell whether they examined the beds or not? I used to tell by having to go in and put the beds straight afterwards.

4547. Did you actually see them examine the beds? I did not see them, but I have made the beds up again afterwards.

4548. *Dr. Vause.*] Did the medical superintendent ever go through the wards on the occasions of these inspections? Yes.

4549. Have you frequently been present during interviews between patients and their friends? Yes.

4550. Did they have ample opportunity of complaining to their friends? Yes, if they wanted to.

4551. Did you ever hear either Government patients or private patients make any intelligible complaint that did not receive attention? No.

4552. Is it not a fact that as a rule the only complaint heard on these occasions were against detention in the institution? Yes.

4553. Is it usual for more than one nurse to be present at an interview between patients and their friends? No.

4554. Is it not the common practice for nurses to sit in an adjoining room while the patients and their friends hold interviews? Yes.

4555. Do you remember Case No. 17? Yes.

4556. Where did she sleep as a rule? In No. 3 dormitory.

4557. In the event of the patient being sick, would the medical superintendent pay her special visits in addition to the ordinary round? Yes.

4558. Did nurse Macleod have anything to do with the administration of medicine? Not that I know of.

4559. Did Case No. 19 have different food to that supplied to other patients? No; the food was all the same.

4560. Was there any special exception made in her treatment? No.

4561. Did you ever hear Macleod say that the patients were too well treated? Yes, doctor.

4562. What did she say? She said the patients were too well looked after and had too much of their own way.

4563. *President.*] Did she ever say that the food was too good for them? No.

4564. *Dr. Vause.*] How long did Case No. 19 occupy a single room at night? I cannot say.

4565. Were any measures taken to keep patients from removing their clothes, such for instance as boots or stockings? Yes, doctor.

4566. Was every effort made to make patients wear their clothing when they became inclined to remove it? Yes, doctor.

4567. Is it not part of your duty as a nurse to repair the clothing and torn stockings during every afternoon? Yes, doctor.

4568. Do you know if any patients are permitted to wear stockings without feet? No, doctor.

4569. Did you ever hear of any nurse or attendant being dismissed from the institution for making a legitimate complaint to the Medical Superintendent? No, doctor.

4570. *President.*] Concerning Case No. 17, was she cured? No.

4571. Had you the means of observing her? Yes.

4572. Was she a very delicate woman? Yes.

4573. Did she go from bad to worse? Yes.

4574. Do you remember the night she died? Yes.

4575. Was any clergyman present at that time? Yes.

4576. Who? The Rev. Father O'Callaghan.

4577. Who went for him? One of the nurses.

4578. Were you at the bedside of Case No. 17 when he came? Yes.

4579. Was she dead or alive when he arrived? I cannot exactly say.

4580. What is your impression; do you think she was dead? Well, I think she was very near it.

4581. But surely you could tell; did you see her breathe? I did not get close enough to see her before the priest came in. I went to meet the priest; he came back with me to her.

4582. But did you not examine her before then? No, I cannot say that I did.

4583. Did you not find out if she was either on the point of death or dead? I do not know.

4584. Where was Case No. 17 at this time? She was on the private side of the institution.

4585. In one of the associated dormitories? Yes.

4586. Did she receive every possible attention during her illness? Yes.

[Witness withdrew.]

FRIDAY,

Nellie  
M'Bride.  
28 Nov., 1894.

FRIDAY, 30 NOVEMBER, 1894.

[The Commission met in the Board Room of the Chief Secretary's Office at 11 a.m.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
ESQ., M.D., INSPECTOR-GENERAL OF THE  
INSANE.JAMES TAYLOR SINCLAIR MCGOWEN,  
ESQ., M.L.A.

Dr. Vause was in attendance to hear evidence and examine witnesses.

Henry Copeland, Esq., M.L.A., sworn and examined:—

H. Copeland, 4587. *President.*] No doubt you will be aware that this is a Royal Commission appointed to make certain inquiries in reference to the management of Bayview Asylum, and it has been reported to us that you have been in the habit of visiting this institution during the time it was under the control of Dr. Tucker;—is that so? Yes, I did visit the place, but not so very frequently. However, I think I was there about a dozen times altogether.

30 Nov., 1894.

4588. Did you pay your visit merely in a friendly way? Yes, I would sometimes go over on a Sunday afternoon. Dr. Tucker was an enthusiast in making experiments with the microscope. I took some interest in these matters, and used to go over to spend the afternoon.

4589. Have you visited the asylum since it has been conducted by Dr. Vause? Yes, two or three times while Dr. Vause was acting as *locum tenens* for Dr. Tucker. I have not been out there since Dr. Vause has had full charge.

4590. Would that explain an apparent discrepancy in your speeches when you say that you visited the asylum during the time Dr. Tucker had it (Dr. Tucker being a gentleman of considerable scientific attainments), and had interesting conversations with him on scientific matters, and then later on, you said on September 25th, you had not visited Bayview House since Dr. Vause became proprietor? Perhaps so. I do not think I have been there since Dr. Vause was proprietor. Perhaps Dr. Vause himself can tell you whether I have or not.

4591. In any case, as far as your recollection extends, the visits you made there took place during the time Dr. Vause was in charge while he was acting as *locum tenens* for Dr. Tucker, who at that time was away travelling? Yes.

4592. Have you, therefore, some little knowledge of the institution? Yes.

4593. Were you pleased with the manner in which it was conducted, and satisfied with what you saw of it? Yes, I did go through the institution to see the patients, and Bayview House and its grounds always seemed to me just the very place for any person having a friend or relative suffering from mental sickness to send him to. In fact I was very favourably impressed with it.

4594. Did you make any special inspection or inquiry concerning the patients, or just looked round the wards generally? That was all. Occasionally the patients would be round about. I was not interested in any one of them, nor had I even a passing acquaintance there.

4595. Did you ever see anything in the institution while you were going round that would lead you to infer that there was at any time personal violence used towards any patient, or that patients were neglected in their clothing or in any other way? Most certainly not; quite the reverse. The patients were always clean, and everything was as nice as anyone could possibly wish for.

4596. It has been stated that you have a direct personal interest in the institution;—is that so? I never had anything of that kind in any shape or form. I was not so much as one farthing interested, either directly or indirectly. I never contributed one farthing to it. I did not know who owned it, or who owns it now, except that I understand Dr. Vause purchased it from Dr. Tucker.

[Witness withdrew.]

The Hon. Edward Greville, M.L.C., sworn and examined:—

Hon. E. Greville, 4597. *President.*] I suppose you know, Mr. Greville, that we are making certain inquiries concerning the management of the Licensed House for the Insane known as Bayview House, Cook's River Road? Yes.

M.L.C.

30 Nov., 1894.

4598. Looking over the information provided for us in conducting this inquiry, we find that from some original documents in connection with the institution that you are represented as acting as attorney for Dr. Tucker;—did you do so? Yes.

4599. In what circumstances did you so act;—was it during Dr. Tucker's absence from the Colony? I will tell you the circumstances: In the year 1868 I went to reside at Cook's River. My family and that of Dr. Tucker, who was previously unknown to me, became intimate. For a time no business relations existed between us, but on Dr. Tucker leaving for England and America, where he spent some three years, he asked me and the Hon. S. H. Terry, M.L.C., to hold his power of attorney, which we did.

4600. Do you remember about what date the request was made? It was in April, 1882.

4601. How long was that power of attorney in force? For three years—from 1882 till 1885.

4602. Did you in conjunction with Mr. Terry write a long letter to the Government asking for a continuance of the institution as a place for the reception under the Lunacy Act of Government insane patients? We did.

4603. In the letter you wrote did you give a large number of arguments in favour of Bayview House being used for this purpose? I forget the particulars, but speaking generally I believe we did.

4604. In addition to that did you call attention to the absolute necessity of continuing patients there because of the overcrowding of Government institutions as represented by Dr. Manning, the Inspector-General of Insane? Yes.

4605. Did you point out the advantages there would be if the Government continued to send patients to this institution? Yes.

4606. Do the questions I am asking you form a summary of the long and carefully written document you and Mr. Terry sent to the Government? Yes; that was the object of our letter.

4607.

4607. Subsequently did you make further application to the Government? I do not remember that.
4608. For instance, on the 23rd June, 1891, did you make any application on behalf of Dr. Vause? Yes.
4609. Were you then acting as his attorney in connection with the institution? Yes.
4610. So that with the whole history of the institution, since you have resided in Cook's River Road have you taken a great deal of interest in all matters affecting its welfare? I have, both out of feelings of personal friendship, and because there was a pecuniary interest attached to my connection with it in Dr. Tucker's time. Mr. Terry and myself were appointed under a deed, and there was a stipulation to the effect that there was to be paid to us a certain amount as compensation for services rendered. Later on when Dr. Vause went to England another business arrangement was entered into.
4611. Independently of these business arrangements for compensation for services rendered, have you ever had any direct connection as proprietor, for example, with the institution? No; neither directly nor indirectly. All that was done for both parties was done more out of personal friendship and respect than for remuneration.
4612. Have you visited the institution on a great many occasions? Yes, daily, and I still do so sometimes.
4613. Have you had, therefore, every opportunity of observing, in a general way, and perhaps in particular matters, how the institution is managed? I have known the institution and its management intimately.
4614. Have you known it from, or almost from, its commencement? I have known it from the time of my first acquaintance with Dr. Tucker. Prior to that I knew nothing of the institution.
4615. Do you remember a detached building in which there were two separate cells generally used for patients requiring isolation and restraint? I do.
4616. Do you remember when the separate cells were built? No.
4617. Do you know of the circumstances connected with their erection? No.
4618. Are you aware that this building was ever used as a stable? No; I never knew that it was used otherwise than as a receptacle for refractory patients. That is the purpose to which this building has been devoted ever since I have known it.
4619. Have you ever heard Dr. Tucker say that it was a stable formerly belonging to the old house? No; he told me the place you refer to was built for this special purpose. This is impressed upon my mind, because in the early days I knew a refractory patient who was put in there. He used to be placed there every night, and frequently I have heard noises coming from that solitary room when I have been there of an evening.
4620. Did you always understand and believe that Bayview House was a well-managed institution for its special purposes? I always thought it was.
4621. Did you ever hear of any patient receiving an injury while in the institution? No.
4622. As far as you have seen, was every care and attention bestowed upon the patients? I do not think there could have been more sympathetic or more humane men than Dr. Vause and Dr. Tucker. I believe from my own experience that both of these gentlemen did everything in their power to alleviate the sufferings of the patients under their control—certainly.
4623. There has been a certain anonymous document in circulation in which statements are made concerning the asylum. Have you seen a copy of that document? I think I have.
4624. Among other things it is stated in this document that Mr. Greville is another shareholder in the institution. As a matter of fact, have you anything at all to do with it in this respect? Most certainly not, and more than that I am aware from the title deeds that have passed through my hands that no one has any proprietary or ever had any proprietary interest in Bayview Asylum but Dr. Tucker in his time and Dr. Vause now. From the deeds having passed through my hands as a trustee I am able to state that.
4625. There is another charge made in this anonymous document, and I would like to ask you in reference to certain reports appearing in the *Evening News* if ever you saw any reporter of the newspaper and gave him information upon which a certain statement could be based? I cannot recollect anything of the kind.
4626. The statement is to the effect that something has been secured by Mr. Greville, another large shareholder, which leads to the inference that you had a pecuniary interest in the institution;—is there any truth in that? It is absolutely false.
4627. Another statement is to the effect that Mr. Frederick Gannon, with others, is drawing from the poor insane confined at Bayview House a profit of something like £6,000 per annum;—is there any truth in that? Not the slightest that I know of.
4628. Do you know anything about Mr. Gannon and others netting this return? No; nothing at all.
4629. We have had a number of complaints in connection with the institution, regarding the food and various other matters, including the clothing, which is said to be insufficient. As far as you are aware, in your capacity as a trustee, was every provision made for the comfort of the patients in these respects? It was; and further than that it was my duty to see, by virtue of the position I held, both under Dr. Tucker and subsequently under Dr. Vause, that everything was right and proper in these matters.
4630. I will ask you again if you ever heard or knew that the building used for the isolation of refractory patients was at any time used as a stable? Never to my knowledge.
4631. Had it been erected for the special purposes of isolation as far as you know? Yes.
4632. Were there not stables about the property in some place? Yes, certainly.
4633. Where were they? They were originally near to where the seclusion rooms are now, but later on they were pulled down to allow the putting up of new dormitories and kitchens.
4634. Were they on the site of the present kitchen as far as you recollect? Yes.
4635. *Dr. Manning.*] While Dr. Vause was in England were not Drs. Elliott and Hetherington in charge? Yes.
4636. During that time did you visit the institution frequently? Yes.
4637. Did you do so in Dr. Vause's interest? Yes, for I considered that I stood in his shoes as it were. It was my duty to watch over his interests while the others were there temporarily.
4638. Did you give both these gentlemen during Dr. Vause's absence a free hand as far as minor expenditure was concerned? Yes.
4639. Did you stint them in any way while they had the management of the institution? Certainly not. I never heard that they stinted the patients either. If I had heard so I should have considered it my duty

Hon.  
E. Greville,  
M.L.C.  
30 Nov., 1894.

Hon.  
E. Greville,  
M.L.C.  
30 Nov., 1894.

duty to speak. I was frequently among the patients at this time. My position in the institution was well known, and if there had been any complaints against the Medical Superintendent I think they would have been made to me. I think my position was generally recognised there.

4640. Did both of these gentlemen manage the institution to your satisfaction? They did so far as the internal arrangements were concerned. As to their medical supervision, that was no business of mine. I consider if there had been any fault to find it would have been found.

4641. In all your dealings with the Colonial Secretary's Office, with regard to this establishment, were you merely acting as attorney for the then proprietors? Yes; I was acting as attorney during their absence from the Colony.

4642. In addition to that, have you of late taken some interest in the manner in which the place has been conducted—I mean, of course, since Dr. Vause returned? Yes; but that interest has been out of friendship for Dr. Vause—purely as a friend.

4643. Are you aware that an application was made for 300 additional patients to be sent to Bayview House? I am.

4644. Did you take any steps in connection with that application? Yes; I think I did speak to Sir George Dibbs upon the subject.

4645. What was your action in doing so prompted by? By mere friendship only.

[Witness withdrew.]

Mr. \* \* \* \* sworn and examined:—

Mr. \* \* \* \* 4646. *President.*] How are you employed at present, Mr. \* \* \* ? I am in Mr. \* \* \* office.

30 Nov., 1894. 4647. Was not your father, Case No. 1, for some time an inmate of Bayview Asylum? Yes.

4648. Did you have frequent opportunities of visiting him while there? Yes; I saw him every Sunday.

4649. Do you remember how much was paid for your father's maintenance while he was an inmate of that institution? It was either £5 or £5 0s. per week.

4650. What did you expect in return for that payment? Dr. Scot-Skirving went out to see Dr. Vause, and he arranged what was to be done. But Dr. Vause continually told us that my father always had two men with him, and that he was never left for a moment alone. We always told Dr. Vause that if the patient wanted anything it was possible to get, we would only be too willing and happy to get it, or to buy anything that money would buy.

4651. Did your father have a sitting-room, and did he sleep in the dormitory? He had a sitting-room at first, and the first time I saw him at the institution he was sleeping in a room opposite the sitting-room. After that he went upstairs to a long room; then I believe there was some difficulty in getting him upstairs because he was becoming so weak. He was brought downstairs again, and Dr. Vause always told us that he slept in the room opposite the one I saw.

4652. Did he ever make any reasonable or rational complaint regarding his treatment while in the institution? The only thing we asked him about was where he slept, and then he said he used to sleep in a stable.

4653. Did he say so latterly when you saw him? He said so for some months before he was removed.

4654. What did you understand to be his meaning when he said he slept in a stable? I was uncertain, so I asked Dr. Vause what he meant, and Dr. Vause replied that what my father said amounted to nothing more than the mere ramblings of an insane person.

4655. Did your father make this statement on more than one occasion? Yes; he said it when we asked him where he slept.

4656. Was Dr. Vause always present during the interview or did you speak to your father alone? I think I saw my father in the presence of Dr. Vause several times, but I had frequent opportunities of seeing him alone.

4657. Was your father's case a specially troublesome one? Yes; so I am told.

4658. Did he always appear to be in much the same condition? No; not always. Sometimes he was worse than others. On two or three visits for a little while he appeared to be quite rational, and then he would slip away again.

4659. Before he was removed to the asylum was he troublesome at home? Well, he was such a short while there that it is hard to say. We only knew he was insane on Sunday. Then the doctors came, held a consultation, and it was decided that it would be best to take him to Bayview House.

4660. What doctors were there in that consultation? Dr. Manning, Dr. Scot-Skirving, and Dr. Williams.

4661. Did your father appear to be particularly violent at the time he was removed to Bayview House? No; he was not actually violent, but he was very restless.

4662. Had he become dirty in his habits? Oh no, not in the slightest, he was just restless, and was continually walking about the house.

4663. Did you not state a few minutes ago that your father spoke to you about his sleeping in a stable, and that when you complained to Dr. Vause he explained that it was but the fancy of an ill-regulated mind? Yes.

4664. Were you ever told by Dr. Vause that your father was sleeping in an isolated room? No; we always understood up to the very last that he had a man or men continually with him.

4665. Do you remember your father being removed from Bayview House? Yes.

4666. Did he seem to be latterly, that is immediately prior to his removal in a worse condition than he was when he was originally taken to the institution? Yes; he was latterly.

4667. Was he more erratic in his talk? Yes, for a little while at first he was fairly sensible, and then he slipped away again. Then there was not so much change in his condition at all until he became worse again.

4668. Did he ever complain to you about the food he received? No; but he invariably said to us that he never had any breakfast.

4669. Did he ever complain that he was getting cold baths early in the morning? I cannot say that.

4670.

4670. When you saw him on your visits was he well dressed, clean, and tidy? He was not as well kept or Mr. \* \* \* dressed as he is now, not as clean looking nor as tidy.
4671. When you saw him was he clean in his attire, and was his clothing as clean and in as good order as <sup>30 Nov., 1894.</sup> when it was supplied to him? No; it was not as it should be; it was torn a bit, and there were spots on it as if they had been caused by him dropping his food. I think otherwise the clothing was fairly decent.
4672. When you heard the report to the effect that he was kept in an isolated room, did you willingly agree to his removal from Bayview House to Callan Park? Yes; I wanted it done quickly.
4673. Who originally told you about your father sleeping in an isolated room? My solicitors.
4674. Do you know from whom they obtained the information? No.
4675. Do you visit your father at Callan Park? Yes.
4676. Do you see any great change in him now;—does he seem to be physically better? Yes.
4677. Mentally, does he seem to be more composed, as far as you can judge from his conversation with you? Sometimes he seems to be better mentally, but at other times he is much about the same.
4678. Were you present when he was removed from Bayview to Callan Park? I was at Bayview.
4679. Did you go out by yourself? No.
4680. Whom had you with you? Mr. \* \* \* and Dr. Scot-Skirving. They went out at night and removed him. I went out in the morning myself.
4681. Where did you see your father when you went out? In a room opposite the sitting-room; he was sitting there with two attendants.
4682. Did you go out with Mr. \* \* \* and Dr. Skirving in the evening? Yes.
4683. Who had the order for your father's removal? I had.
4684. Who signed it? Sir George Richard Dibbs.
4685. Had it been signed with your full consent, and was it on your desire that the patient was removed? Yes.
4686. Did you see the real place in which he slept on the night before he was removed? Yes.
4687. Did you see it in the morning or in the afternoon? I saw it at about a quarter to 11 on that Sunday morning.
4688. Had it been cleaned out by that time? Yes; it had been washed out.
4689. Did you see any bedding in the room? No; the floor of the room itself was very wet. It looked as if it had been just washed out.
4690. Previously, then, were you really unaware of the nature of your father's sleeping accommodation? Most decidedly.
4691. Did he ever complain about having been personally injured while in the institution? I think on one occasion, as far as I can remember, he said he had a row with an attendant, and the attendant hurt him.
4692. Had he a black eye when you saw him on this Sunday morning? Yes.
4693. Did you ask him how that came about, or did he offer you any explanation? No; I scarcely spoke at all. I did not ask the question.
4694. Generally speaking, were you satisfied with the treatment the case received at Bayview House until you discovered the circumstances connected with his accommodation at night? Well, no; we were not quite satisfied, but still we thought in the circumstances that we had done the best that we could do with him.
4695. Was your mother satisfied? No; but she was of the same opinion—that we were doing the best we could.
4696. Do you mean under the advice of Dr. Scot-Skirving and Dr. Williams? Yes; she thought the patient was getting the best available treatment. I thought the same, but I have been very much undeceived.
4697. *Dr. Manning.*] After having been at Cook's River for some few weeks did your father fall into a condition of great exhaustion? Yes.
4698. Then did he pick up and get better for a time—better mentally and in physical health—more reasonable in his conversation, and stronger in his movements? Yes.
4699. Did he become so much better that you had serious thoughts about taking him home again? Yes.
4700. Then did he have another relapse? Yes.
4701. Was I present at the consultation before the patient was removed from his residence to Bayview House? Yes.
4702. Are you aware that my recommendation at this time was that he should be removed to a private house and placed in the care of an attendant? I remember that there was some such recommendation, but I do not know who made it. I think my mother said one of the doctors recommended that the patient should go to a private house.
4703. Was the determination to send him to Cook's River Asylum arrived at subsequent to the other recommendation? Yes.
4704. *President.*] Do you wish to say anything further about the case, Mr. \* \* \*? No; except that I may add, perhaps, that pretty nearly every time either my mother or myself visited Bayview House we asked Dr. Vause if there was anything we could do—if we could bring my father clothing or anything else. We were only too anxious to do everything we could in the unfortunate circumstances.
4705. *Mr. McGowen.*] In an answer to Dr. Manning, given a moment ago, did you not say that some little time after the patient was placed in Bayview House there was some improvement in his condition;—how long was it before you noticed this improvement? I cannot fix any time, but I suppose it was about five or six months.
4706. How long did the improvement last? Perhaps three or four days; it would certainly not be longer than a week.
4707. Then was he in a sane state until you took him out, or did you notice any improvement during the last six or eight months that he was there? I think he had three improvements altogether during the time he was at Bayview; after these he slipped back to his former state.
4708. When you went into the room at 11 o'clock on Sunday morning, May 20th, did you notice any offensive smell? Yes; there was an abominable smell, although the room had been washed out.
4709. Do you say that your mother repeatedly interviewed Dr. Vause and made offers to supply further clothing, if necessary, for your father's use? Yes, and I did so myself. 4710.

- Mr. \* \* \* 4710. It has been stated in evidence that your father was exceptionally destructive with his pyjamas and singlets. Did your mother supply him with pyjamas and singlets at the request of Dr. Vause? Yes.
- 30 Nov., 1894 4711. Do you know with how many suits of pyjamas he was supplied? I think he had six suits when he went to Bayview. I should think about ten or twelve suits were taken out afterwards. I should think in all he received sixteen suits of pyjamas, or at all events not more than eighteen suits. We always asked Dr. Vause to let us know when he wanted a further supply. They were then sent out at once.
4712. Did your father complain at various times that the room in which you saw him was not the room in which he slept? He did not put it like that. We asked him if he slept in a certain room upstairs, and he always replied that he used to sleep in the stable.
4713. *Dr. Vause.*] Do you remember me saying to you it would be necessary for the patient to occupy a single room? I do not.
4714. *Mr. McGowen.*] Did any authorities of the institution point out to your mother or yourself a room which you supposed your father was in the habit of sleeping in. Did Dr. Vause point out such a room upstairs? That is the room I saw him in at first; then he came down into a room opposite the sitting-room, and that is the room Dr. Vause said he slept in.
4715. *Dr. Vause.*] On Sunday morning, the 20th of May, do you remember telling me that you did not understand what was meant when I said it would be necessary for the patient to occupy a single room? I may have said it, but I certainly do not remember any reference to a single room at all.
4716. Do you know what is meant by a single room? I never remember anything about a single room being mentioned.

[Witness withdrew.]

Mr. Frederick Gannon sworn and examined:—

- Mr. F. Gannon. 4717. *President.*] What are you, Mr. Gannon? I am a solicitor practising in the Supreme Court of New South Wales.
- 30 Nov., 1894. 4718. Are you a solicitor in connection with some matters for Dr. Vause, of Bayview House, Cook's River Road? Yes.
4719. Have you any personal interest in the institution known as the Licensed House for the Insane, called Bayview House? Not the slightest, and never had.
4720. Have you any professional interest in it? Nothing beyond the fact that Dr. Vause is a client of mine.
4721. It has been stated that you have a proprietary interest in the institution;—is that true? It is not true. There is not the slightest foundation for any such statement.
4722. Have you visited the institution a good many times? Yes; very frequently.
4723. Have you had full opportunity of seeing the way in which it is conducted from a general standpoint? I have.
4724. As far as you are able to speak, is everything satisfactory in the matter of clothing, food, and cleanliness—and is the institution well managed? Yes, most certainly. There is not the slightest fault to find, as far as I can see. The whole of the arrangements of the place have always met with my admiration. I have never heard any complaint concerning the institution.
4725. Have you seen or do you know of any personal violence being used towards the patients? None whatever.
4726. Have you ever heard any complaints about there being an insufficient number of attendants? No.
4727. Have you ever heard that the attendants neglected their duties, or that the patients were in any way neglected? No.
4728. In your experience has Dr. Vause always been kind and attentive to the patients under his control? Yes, he has always been most kind; and speaking personally, I can say he has not only been my medical attendant but a friend, and a medical attendant and friend to my wife and family.
4729. Therefore, with all your knowledge of Dr. Vause, are you competent to speak of his character for humanity as well as skill? Yes; there is no man living for whom I have a greater respect than for Dr. Vause. I do not say it as his friend, but I say it as one having lived alongside of him for many years, and one who has had a full opportunity of studying his life and actions.
4730. Do you know who is the proprietor of Bayview House? Yes; I have known no one except Dr. Vause to be the sole proprietor.
4731. We have had it in evidence from the Honorable Edward Greville, who acted as attorney for Dr. Vause, that he has seen a legal document in connection with the proprietorship, and that he is perfectly satisfied that Dr. Vause is the proprietor;—is this confirmed by you? Yes; no one can have a better knowledge than Mr. Greville. Dr. Vause is a client of mine, but I really had nothing to do with the transfer of the deeds.
4732. There is a rumour abroad that "Gannon & Co. are greatly interested—in fact, to such an extent that they are drawing from the poor insane kept at Bayview House no less than £6,000 per annum;"—is that true? It is a fabrication from beginning to end.
4733. There is not the slightest foundation for any such statement? There is not an atom of truth in it.
4734. Do you know of any mortgage over the property? I do not know. I have never had anything to do with one.
4735. We have had a great deal of contradictory evidence in regard to the personal habits of Dr. Vause, and you, having been on most intimate terms with him for some time, will be able to speak with some authority. Is Dr. Vause a sober man in the ordinary sense of the word? He is one of the most sober men I have ever met. I have seen him morning, noon, and night. I have been at parties with him; I have been to the theatre with him; I have been at his house up to 12 o'clock at night, and I never saw him on any occasion under the slightest influence of liquor. I meet him almost every day; no one knows him better than I do; no one knows his habits better than I do, and I can say he is a strictly sober man.

[Witness withdrew.]

TUESDAY, 4 DECEMBER, 1894.

[The Commission met in the Board Room of the Chief Secretary's Office at 11 a.m.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.  
 FREDERIC NORTON MANNING, | ANDREW GARRAN, Esq., LL.D.  
 Esq., M.D., INSPECTOR-GENERAL OF THE | JAMES SINCLAIR TAYLOR MCGOWEN,  
 INSANE. | Esq., M.L.A.

Dr. Vause was in attendance to hear evidence and examine witnesses in his own defence.

Herbert Blaxland, Esq., M.R.C.S., L.R.C.P., sworn and examined:—

4736. *President.*] Are you, at present, Medical Superintendent of the Hospital for the Insane at Callan Park? Yes.
4737. How long have you been employed there in that capacity? Since December, 1891.
4738. Do you remember Case No. 1 being brought to Callan Park? Yes; he was brought there in May last.
4739. Did you see him on his arrival? I saw him in a carriage at the institution.
4740. Subsequently, had you ample opportunities of particularly examining his case? Yes.
4741. Can you technically describe his case? He was suffering from general paralysis of the insane—*locomotor ataxy*.
4742. Was it a bad form of disease? Yes; and he was also in an acutely ammoniacal state.
4743. Was the patient very violent when he was first received into the institution? He was violent as far as he could be in his exceedingly weak state. He was too weak to kick or strike anybody.
4744. Were there any bruises or marks on his body when you first examined him? Yes; his left eye was black.
4745. Were there any other bruises on his body? No.
4746. Has he improved considerably since you received him at Callan Park? Yes.
4747. Was he at first a refractory patient? Very refractory, destructive, dirty in his habits, and used very bad language.
4748. In these respects has he improved very much of late? Yes. After a while he was able to get up, and then he left off his destructive habits, except occasionally, when he destroys articles of clothing. He still sometimes wets his bed.
4749. In treating him did you adopt the separate cell system? He had a single room.
4750. Does he still use one to sleep in? Yes.
4751. Is it the one I saw the other day, containing an iron bedstead? Yes.
4752. Was the iron bedstead in it when the room was first occupied by him? No; it would have been too dangerous to have used one then.
4753. Is there any danger now? No; very often he will not use it, and will order it to be taken out of the room, because he prefers to lie on the floor.
4754. In cases of this kind does not, sometimes, the urine of patients smell very strong? Yes; it becomes highly ammoniacal.
4755. In your opinion, from the large experience you have had in cases of this kind, did you think it was absolutely necessary to place Case No. 1 in a separate room and make special provisions for him, because of his peculiar habits? Yes; I did.
4756. Is he improving now as well as the nature of the disease will permit? He has improved; but I think, comparatively speaking, he is at a standstill now.
4757. *Dr. Garran.*] What has been the course of the progress made? It has simply been development from one stage to another. In these cases of general paralysis, there are different stages. There is first the maniacal, and then the patient, after this is over, passes to what is called the tranquil stage. That is the state in which Case No. 1 is now.
4758. Do you attribute his present condition to any special treatment of your own, since he has been at Callan Park? No.
4759. Do you think the same would have happened if the patient had remained at Bayview House? Yes.
4760. Is there always a man on night-duty at Callan Park Asylum? Yes; always.
4761. Do you think any great importance is to be attached to interfering with the patients or leaving them alone completely through the night? I think interfering with them would often be a source of irritation to the patients.
4762. Supposing you were to get a patient up during the night, do you think it would be worse for the patient than leaving him alone? Not for some of them.
4763. During the course of this inquiry the question has been raised, whether in cases of acute mania it is better to leave a patient alone in a dirty condition during the whole night, or to interfere with him, by waking him up to obey the calls of nature, and so break him in to more cleanly habits;—which is, in your opinion, the preferable course to follow? Not to interfere, in cases of acute mania. One might interfere at times, and to a certain degree, but there is nothing at all to be gained if a man is thrown into a constant state of irritation by telling him to make water or anything else.
4764. If you saw, or if a warder saw, a patient making water on the floor of his room, or on his bed even, would it be wise for him to rush in and tell the patient to use the utensil? No; if he did the patient would not do it. Case No. 1 would not have done it. He insisted on doing these things just as he liked, and if an attendant attempted to stop him he would throw his pillow at him, or the first thing he could lay his hands on.
4765. If you saw him taking his pyjamas off, and he refused to wear them, would it be the proper thing to use anything more than ordinary persuasion, in endeavouring to get him to wear them? No; he would only resist it if you did, and become more irritated.

Dr.  
H. Blaxland,  
4 Dec., 1894.

- Dr. 4766. Would it, therefore, for the patient's sake, be better to leave him naked, rather than irritate him by attempting to get his clothes on? It would be better to leave him naked.
- H. Blaxland. 4767. Do you think patients suffering from acute mania feel the cold? Not to the same extent as other men and women do.
- 4 Dec., 1894. 4768. Do you mean to say they are not so sensitive and liable to take cold as other people? No; and they always keep themselves warm by exercise, as they are on the move constantly.
4769. As a rule, do you think if they temporarily denude themselves of clothing they do not physically suffer from chill? No; they do not suffer.
4770. The question has arisen as to whether or not it would be proper to interfere with a patient who insists on taking his clothing off;—do you think such would be the proper course to follow? I do not think it would be advisable to interfere.
4771. As far as I can gather from you, am I to understand that the patient was as destructive when first he arrived at Callan Park as he was at Bayview House, and did the attendants endeavour to do all they could to keep him clothed? We tried our best; but to show you the difficulty with which we had to contend, I produce a list of the articles of clothing he destroyed during the first four months of his stay at Callan Park. [*List produced, marked Exhibit "A 1." See Appendix.*]
4772. Does this list show that on May 22nd the patient destroyed eight articles of clothing? Yes, seven garments and one bed-tick.
4773. Was he in a highly destructive state then, and very excited? Yes, he was.
4774. Do you think his excitement was in any way due to his having been transferred from one asylum to another? I think it was.
4775. At first, did you make the experiment of placing an attendant in the single room with him for the purpose of watching him and looking after his requirements? Yes, for a night or two I did; but we found that such a course of procedure would not do at all.
4776. So far as your experience goes, then, did you find it better to leave the patient alone in the single room? Yes, with the precaution of having an attendant always on watch for anything that might be required.
4777. Did you find that this treatment resulted in the patient getting more mental repose and sleep? Yes; the less interference there was the better.
4778. Was there anything cruel or heartless in leaving this patient, while in that stage of his malady, as much alone as possible? No, certainly not, as long as he was visited at intervals.
4779. When he was first admitted to Callan Park could you with safety leave a bedstead in his room for his use? No.
4780. Did you put a mattress on the floor for him to sleep on? We put two or three straw mattresses on the ground. He was in the habit of tumbling about the room and walking about in a restless manner. We therefore put the mattresses on the floor to minimise the possibility of him hurting himself. He would occasionally tear his bedding.
4781. What covering had he when the mattresses were put on the floor? He had a canvas rug;—or more correctly speaking, a rug, made by stitching a blanket between two pieces of canvas, the whole being quilted in the stitching.
4782. Supposing he kicked off his blankets or rug, would the attendant cover him up? Yes; he was always supplied with good bed-clothing. Sometimes he would have more clothing than at others.
4783. I want to be particular about these rugs;—how do you say they were made? There was canvas on the top side, blanket next, and a sheet of dallis underneath. All were sewn together and quilted. Sometimes he would have blankets instead of these; at others he would refuse to use the blankets and say he preferred the rugs.
4784. Was he supplied with warm cocoa or tea at night? Yes, if he asked for it. I ordered at first that he should have warm cocoa or milk as a soothing drink to induce sleep or quietness.
4785. Was he a very troublesome patient? Most extremely so.
4786. Have you ever had in Callan Park a patient equally troublesome? I never had a worse. I think there have been one or two cases as bad, but certainly we never had a worse.
4787. Is he a paying patient? Yes.
4788. Do you know how much is now paid for his maintenance at Callan Park? Yes; £327 12s. per annum.
4789. Have you any means of ascertaining whether this amount covers the cost of his maintenance? It did not at first.
4790. Why not at first? Because of the extraordinary amount of destruction of clothing and other articles.
4791. Do you think the amount you name covers the cost of his maintenance now? I think it now should cover all expenses.
4792. Did members of the patient's family supply his personal clothing? They did at first, and do now.
4793. Although it was torn so repeatedly, was the clothing renewed whenever necessary? Yes.
4794. Do you supply the whole of the bed-clothes? Yes; the bedding and bed-clothes are supplied by the institution.
4795. Do you think the patient cost you more than at the rate of £327 per annum when he first went there? Yes; I think so.
4796. Supposing Dr. Vause received less for his maintenance at Bayview House, do you think he would make much profit? I think not.
4797. Have you ever visited Bayview Asylum? Yes.
4798. Did you see the two single rooms on the male side across the court-yard from the main building? No; I do not recollect them.
4799. In the room in which Case No. 1 sleeps at Callan Park do you regulate the admission of air by opening and closing the window, according to the coldness or warmth of the night? I do not think the upper window is ever touched. It being open does not interfere with the patient, who cannot feel any draught from it.
4800. Do you ever find this room or any of your single rooms cold early in the morning? No.
4801. Do you ever notice that the patients suffer from a chill? No.

Dr.  
H. Blaxland.  
4 Dec., 1894.

4802. In this particular form of paralysis to which Case No. 1 is a victim, do the patients shake very much? Yes; these paralytic patients are particularly tremulous.
4803. Is it easy to say when a patient is shaking whether it is caused by cold or tremulousness; one witness has said that when he saw this patient he was shaking not only with paralysis, but also from cold—I want to know whether it would be easy for anyone to discern whether the tremor was from cold or paralysis? A medical man might be able to tell, but I question whether a layman would; he would have to be a very intelligent layman if he did.
4804. Do you mean it would take an intelligent man to discover if the shaking was caused by anything other than paralysis? Yes; especially in a case like this one. His case is of such a nature that he cannot feed himself now. He was worse when he first came, for then it took two men to feed him—one to hold him and another to give him his food. This was because of his tremor and restlessness.
4805. Is the tremor and restlessness worse in the morning than in the evening? I do not think it is.
4806. What degree of light is admitted into the room, through that window which you say is seldom closed? A little light comes in.
4807. Do you think the admission of light into these single rooms at daybreak is of any importance to the patients? No.
4808. Are nervous and excited patients most restless in the first part or last part of the night? It is hard to say.
4809. But do you not think that a patient restless in the early part of the night becomes exhausted by his exertions and falls asleep in the early part of the following morning? Some might and others might not.
4810. Is there any advantage in always having the window left open, so that the sunlight can be admitted early in the morning? No.
4811. Is there any medical advantage in this? No; because with a restless patient it would be an advantage to keep the room dark in the morning if he happened to be asleep.
4812. First, then, do you think that darkness in the cell early in the morning is any disadvantage to the patient? No.
4813. Second, do you very much doubt the medical wisdom of interfering with acute maniacs during the night? I do.
4814. Do you think they are, medically speaking, best left alone? Yes; too much attendance would do more harm than good.
4815. Do you think the attendant himself should be allowed to judge when he should enter the room to attend to a patient during the night? Yes; to a very large extent.
4816. How often in the course of the night did an attendant look in upon Case No. 1? When he was first at Callan Park there was a special man stationed outside the room door, constantly on the watch. The patient was also visited every hour.
4817. Supposing you have any ordinary patient, suffering from general paralysis, what course of night treatment do you adopt? He is placed in a single room at night with night-clothing, which he can use and wear if he likes. If he is destructive and tears the clothing up it is removed for safety, as he might tie them round his neck or penis. When the torn clothing is removed a heap of straw is left in the room, and the patient is seen every hour.
4818. Then does every patient confined in a single room get the advantage of night patrols? Yes.
4819. Is a man ever neglected during the night? No.
4820. Do they first have the option of wearing night-clothes? Yes.
4821. And if they are destructive are such patients left with a bed of loose straw? Yes.
4822. Is there any alternative other than leaving them in this manner? Not that I know of.
4823. Have you been able to form any opinion as to the medical treatment Case No. 1 must have received while at Bayview House? No; When he arrived at Callan Park from Bayview House he was simply in one of the ordinary stages of paralysis.
4824. Was there anything in his case or symptoms that led you to believe he had not been properly treated while at Bayview House? No, nothing.
4825. *Mr. McGowen.*] Do you say that patients in the state Case No. 1 was when he was received at Callan Park do not feel the cold? No, they do not; their sense of feeling is blunted.
4826. Yet do you not say that an attendant would go into the cell and put a blanket over him if he threw his bed-clothes off;—why was this done if he could not feel the cold? Because in this case there was a special attendant to do it.
4827. If he is not susceptible to cold, what is the use of putting a blanket over him while he is asleep? This was done on the supposition that it might be more comfortable for the patient.
4828. When you visited Bayview House did you go in your public capacity or as a private visitor? I went there as Acting Inspector-General of the Insane during the absence of Dr. Manning.
4829. *Dr. Manning.*] Might not a patient coming out of his sleeping room early in the morning into the cold air shiver whilst crossing an open yard, especially if he had not been cold in his room during the night? Yes.
4830. Am I to understand from you that Case No. 1 is still in a state of impassivity, and that sometimes he is dirty in his habits? He has been very dirty, messing in and wetting his bed and smearing his body and the room with feces.
4831. Does the urine of patients such as this smell very strong and pungent? Yes; it is a common thing for it to emit a very strong odour.
4832. Is the urine of these patients different in smell to that of people in ordinary health? Yes.
4833. We have had it in evidence that the room Case No. 1 occupied at Bayview House stank abominably until 11 o'clock in the morning, even after it had been washed out earlier in the day;—if it did, would that be anything uncommon? Not at all.
4834. If the room were well washed out every morning would it be ready and fit for occupation again every night? Yes.
4835. Would such a room, requiring constant washing, dry better if it were away from a corridor and had a large door than a single room situated in a corridor such as yours are at Callan Park? Yes, I think it would.
4836. We have had it in evidence from Professor Anderson Stuart that lunatic patients whose tendency is not to use a utensil should be roused up two or three times a night to micturate or evacuate, and to support

Dr.  
H. Blaxland.  
4 Dec., 1894.

support this opinion he quotes M. Charles Mercier, who in his work on "Lunatic Asylums: Their Organisation and Management," published this year, says:—"Patients who are of dirty habits need constant attention, and are a source of continual trouble in asylums, but fortunately, by assiduous attention, very much may be done to cure them of the objectionable customs." Going on to speak of the treatment, the author of the work I quote says:—"Patients who are dirty from sheer malice, and from a desire to give trouble, are a very difficult class to deal with. This category of patients are the most objectionable of all. Such patients are always made the tenants of single rooms, in which they are, for the most part, left during the night to their own devices, and discovered in the morning in a condition of indescribable filth, and this cause is, in many asylums, unavoidable; but in an ideal asylum, in which the number of attendants is not limited by necessary considerations of economy, such patients would have a special attendant to remain with them at night and to prevent their indulgence in such practices. With the first of the two classes into which patients of his category have been divided, the prevention then would be very easy, and with the second it would not be difficult. Whatever the cause of this uncleanness may be, every dirty patient should be trained into habits of cleanliness by being compelled to attend the closet not only at frequent intervals, but what is most important, at regular times. The nervous, as a whole, and any special nervous mechanism of these particular functions, is much the creation of habit that when once, by persistent training, the habit is established by exercising these functions at fixed intervals and at regular times, the nervous system will be broken into conformity, and the habit will at length become unmodifiable by the individual. For this reason patients who are wet or dirty at night should be taken up at least three times and always at the same time every night and given the opportunity of evacuating. Besides taking these patients out of bed, which should be done every three or four hours, the night attendant should, at each visit—that is to say, every hour examine their beds to see if they are dry, and if they should be wet, they are to be at once changed—dry macintoshes and dry sheets placed upon the bed. Every such patient should be examined by the night attendant before he goes off duty, and every bed should be dry and clean when the day attendant come on." Do you think it would have been advisable to follow this course of rousing the patient two or three times a night in the case of Case No. 1? I know it could not have been done in his case.

4837. Supposing it could be done, do you think it would be advisable to rouse a general paralytic in this manner? Certainly not.

4837½. If Professor Anderson Stuart quoted the words I have read to you in support of his theory in regard to Case No. 1, must he have been mistaken in the nature of the case? I should think so, for my idea is that Mercier, in writing as quoted, refers to old demented who wet their beds from inertia.

4838. Do you think it would be advisable to have an asphalt floor in these single rooms? I think there might be some slight advantage, but at the same time the room would be colder. On second thoughts, too, I do not think there would be much advantage in asphalt floors.

4839. Have you any rooms artificially heated at Callan Park? No.

4840. Do you think it necessary to have artificially heated rooms in this climate? No; I do not see the necessity for them.

4841. Are you aware of any asylums in Australia which have single rooms artificially heated? No; there are none so heated in Australia.

4842. Do you know Dr. Alex. S. Paterson, of Adelaide? Yes.

4843. Is this his writing and signature [*Letter produced*]? Yes.

4844. Dr. Paterson writes as follows:—

My dear Dr. Manning, Colonial Surgeon's Office, South Australia, 23 November, 1894.  
1. There are no single rooms for violent, sick, or excited cases heated by hot air or steam coils.  
2. I do not consider the artificial heating of rooms necessary.

Do you agree with that opinion? Yes.

4845. Is the Tasmanian a very much colder climate than that of New South Wales? Yes.

4846. Do you know Dr. Macfarlane, of Tasmania? Yes.

4847. He writes as follows [*Letter produced*]:—

Dear Dr. Manning, New Norfolk, 24 November, 1894.  
None of our single rooms are heated with either hot air or steam coils. Four of the single rooms off the infirmary ward at the new building for males lately erected have open fire-places. These rooms are used for cases which would be objectionable in the general ward. In this Colony, where the winters are sometimes very severe, it would be an advantage if some of the single rooms were heated artificially, though, as a rule, no inconvenience is caused by the absence of artificial heat.

Does this letter agree with your experience? Yes.

4848. As a matter of fact, in cases of this kind, is it not better that the rooms should be somewhat cold? It is in some ways, for then the patient is more likely to keep himself covered up, and to remain in bed. I have noticed that on cold nights patients are much quieter and remain in bed. On hot nights they are more noisy and restless.

4849. We have had a good deal of evidence as regards patients being specially dressed when they receive their friends on visits to the institution;—do not your printed rules for the guidance of the chief attendant and the matron expressly state that patients on these occasions must be properly dressed? Yes.

4850. In fact, is it not a rule that patients shall not go into the visiting-room except they are properly dressed? They are never allowed to unless they are so dressed.

4851. Is it a rule that they shall be tidied up before they see their friends? Yes.

4852. For what reason? In the hope of training them into good habits. In fact, the change of dress on these occasions is a good education in the habits of tidiness.

4853. Do the friends of the patients like to see it done? Yes, and they very soon grumble if it is not.

4854. Even lately have friends of patients complained to you repeatedly of officials taking patients to the visiting-room not dressed in their Sunday clothes? Yes, there have been complaints of that kind.

4855. Is it an uncommon thing for the friends of patients to bring clothes which they desire them to wear when seeing visitors? No.

4856. Is not this done because their friends like to see them in ordinary respectable clothing, rather than in Government clothes? Yes.

4857. As a matter of fact, are not a good number of the patients at work in the laundry or in the grounds when their friends come to see them, and then the patients are dressed in their best clothes, made clean and tidy, and taken to the visiting-rooms? Yes.

4858:

Dr.  
H. Blaxland.  
4 Dec., 1894.

4858. Are they like children—have to be tidied up when taken to see their friends? Yes.
4859. Have you a patient named \* \* \* at Callan Park? Yes.
4860. A gentleman who pays for his maintenance? Yes.
4861. Does he like to do the dirtiest and hardest work he can find? Yes, always.
4862. Is he ever in a fit condition to see his friends—I mean in appearance? No, not in his ordinary clothes.
4863. Does he dress himself up at night and whenever his friends come to see him? Yes.
4864. Have you had patients transferred to you from Cook's River? Occasionally.
4865. Did you ever hear any complaint made about the food at Cook's River? No.
4866. Do you think it would be unwise economy to stint patients in their food? Most positively I do.
4867. What would the result of such a course be? The patients would speedily become worse in their habits, and more destructive.
4868. Stinting them of food, then, would not pay? No; certainly not.
4869. Would Dr. Vause most likely know that? Yes; I think so.
4870. What is the custom of the official visitors when they come to Callan Park as regards speaking to the nurses;—do they make inquiries about the patients from the matron or the attendants? They always speak to me or the other medical man; as a rule, they do not speak to the attendants.
4871. If the official visitors wish to obtain special information about a patient what do they do? Send for the nurse to the Board Room and make special inquiries.
4872. We have heard you say you are obliged sometimes to put patients in single rooms at night without clothing;—are there some confined in this state nearly every night? Yes, a few; and sometimes in the day as well.
4873. Are there also patients in these rooms, without having utensils for their use? Yes.
4874. Why? Because they would not use them except as weapons, and instruments of noise by battering the shutters and doors. They might use them as weapons of attack on the attendants, or put them on their heads; or they might use them as a receptacle to catch their urine, and drink it afterwards.
4875. For these reasons, then, do you think it would be advisable not to give them utensils at all? Yes, certainly.
4876. Do you frequently have to give excited patients sedatives? Yes.
4877. In special conditions are these sometimes administered in the patient's food or drink? Yes.
4878. Is it absolutely necessary for bad melancholia patients to take sedatives? Yes.
4879. Such as large doses of tincture of opium and morphia? Yes; I have one patient who is taking a grain of morphia three times a day in his food.
4880. Are there many rats at Callan Park? Yes; every now and then there are a considerable number.
4881. Can you assign any reason for the presence of the rats? Yes; they come for the food that is thrown about.
4882. Do the patients feed them? Yes; they like to, and some of them keep rats for pets.
4883. If an attendant finds a rat in one of the rooms, or a rat-hole in the asylum, is it his duty to report the circumstances at once? Yes.
4884. Are these rats more frequently in the yards? Yes.
4885. Do you keep watch for them, war with them, and endeavour to keep them down? Yes.
4886. Have you much difficulty with verminous patients? Yes; I have three Government patients now whose heads and beards have to be continually watched.
4887. Are there any bugs at Callan Park? Yes.
4888. In the new buildings? Yes; and in the old wooden buildings—we could never get them out. We are always watching and at war with them.
4889. Do you find it an extremely difficult task to keep them down? Yes.
4890. Objection has been taken during this inquiry to patients dying in these single rooms;—do many patients die in your single rooms? Yes, a great many; and it would be more objectionable for them to die elsewhere.
4891. Are they placed in these rooms after they have reached a stage of partial collapse? Yes; it is more private for them in their extremity in these single rooms, and we do not want other people to see them die. In the hospital, when a patient dies, he or she is screened off until the body can be removed.
4892. Do you ever tie old or feeble patients in a chair? Occasionally we pass a sheet round them and fasten it to the two sides of a chair.
4893. Occasionally are straps used for this purpose? Yes; I used one for years.
4894. Is this done for the protection of the patients? Yes; when they are out getting fresh air. If they were not so protected they would tumble about and interfere with other people.
4895. From time to time do you transfer people from Callan Park to Cook's River Asylum? Yes.
4896. I have here a list of some of those transferred; will you tell me what sort of patients they are; the first is Case No. 36? She was one of the most boisterous, erratic, and violent patients we ever had.
4897. Was she kept in a single room? Yes; frequently by day as well as by night.
4898. Case No. 37? Violent and aggressive, constantly noisy, and required a single cell.
4899. Case No. 38? Very noisy; melancholia; refused her food; required a single room.
4900. Do you remember Case No. 39? I do not remember her, but I have looked up her case and found that she was noisy, and required a single room.
4901. Has it been your custom for a long time past to select the acute cases to send to Cook's River? Yes.
4902. Has this arisen because of the scarcity of single rooms at Callan Park? Yes; and when sending patients away to Cook's River you can hardly expect the Medical Superintendent to pick his best cases for that purpose.
4903. Was Case No. 19 a troublesome patient? Yes, very.
4904. How many nurses were sent with her when she was taken to Cook's River? Three nurses and one attendant.
4905. Was this necessary for safety? Yes.
- 4906-7. *Mr. McGowen.*] Is she in the habit of making a lot of complaints about her treatment? Yes; and she is very untruthful in her statements. 4908.

- Dr. H. Blaxland. 4908. Is she back with you now at Callan Park? No; she is just at present at Gladesville. She goes the round of the institutions.
- 4 Dec., 1894. 4909. Is this list [*produced—Exhibit A. 1*] a correct list of everything Case No. 1 has destroyed whilst he has been at Callan Park? No, not everything destroyed; but it is correct as far as it is written down.
4910. This shows 118 shirts, 39 blankets, besides sheets, socks, and pillow-slips? Yes; he used to tear them up in our presence, and at the time considered he was making money by ripping his shirts up.
4911. *Dr. Manning.*] How many months was he under your care before you could get him dressed? Four months.
4912. *President.*] Do you say it is the custom to dress up the patients when they are taken to see their friends? Yes.
4913. Is that the universal custom? I believe so.
4914. It has been a matter of complaint in evidence that patients are dressed up in this way in order that their dirty clothes, ordinarily worn, shall not be seen by their friends;—do you know if that practice is followed? They are properly dressed in every case, both male and female patients, before they are allowed to see their friends.
4915. When a patient is put in an isolated cell, is it done on the authority of the attendants, or by the order of the Medical Superintendent? The attendants have power to put patients in isolation, but they must report to me immediately it is done.
4916. Is that the case on both the male and female sides? Yes.
4917. *Mr. McGowen.*] Supposing two attendants on the morning of the 20th of May went into the room occupied by Case No. 1 at Bayview House, and put his ordinary clothes over his dirtied pyjamas and singlet, would you remonstrate with them? If the pyjamas were dirty it certainly would not be a nice thing to do. Perhaps the clothing would not be dirty.
4918. Do you think that in the case of a dirty patient the pyjamas drawers would be likely to escape? No; probably not.
4919. Supposing we have it in evidence that on the morning you received Case No. 1, two attendants entered his room at Bayview House and put his day-clothes on him over his dirty pyjamas and singlet to take him to the bath;—would you expect your attendants to put clean clothes over a filthy pair of pyjamas? No; I should expect they would cover him up with a blanket to take him to his bath; they certainly could not clean him in his room.
4920. *Dr. Manning.*] Do you think that a nurse of a few months' experience in this work is capable of judging whether patients should have drugs or not? Most decidedly not.
4921. It has been given to us in evidence by one of the nurses that one of the patients had what she called drugs, which made her worse, and that being so, she had some doubt about giving them;—do you think a nurse is capable of judging in a matter of this kind? Certainly not; and I should dismiss any nurse who told me that.
4922. Have you paying patients in your cottages? Yes.
4923. Are you obliged occasionally to move them from the cottages to the general wards? Yes.
4924. If a cottage patient becomes worse—noisy and boisterous—what do you do with him? He is removed to the general building until such time as he has quietened down.
4925. Is there a constant change of patients between the cottages where they pay to the wards where patients who do not pay are kept? Yes; a man may live in the cottages during the daytime and be sent down to sleep in the main hospital, and some of them are even put to sleep in single rooms.
4926. *Dr. Faure.*] Do you think it would be advisable to have a sloping floor in the single rooms? No.
4927. Do you think it would be very false economy to stint patients in their food? Most decidedly.
4928. Did Case No. 1 sometimes throw his clothes off without tearing them? I do not think he did. He was always so impatient in getting them off that he always tore them.

[Witness withdrew.]

William Daniel Campbell Williams, Esq., L.R.C.P., M.R.C.S., sworn and examined:—

- Dr. W. D. C. Williams. 4929. *President.*] Are you at present employed in the Military Forces of New South Wales? Yes; I am principal medical officer.
- 4 Dec., 1894. 4930. Are you acquainted with Case No. 1? Yes; I have been for a number of years.
4931. Both before and since his removal to Bayview House? Yes; I have seen him since his removal there.
4934. Do you attribute his illness to any particular cause? I attribute it to extreme worry.
4935. Was the patient attended by Dr. Scot-Skirving? Yes; but when he was first taken ill, I think, but I am not sure, Dr. Scot-Skirving was in England. I saw the patient at the time.
4936. On whose recommendation was he taken to Bayview House? I think it was on mine.
4937. Did you see him immediately after his reception there? Yes; I think I went with him when he was admitted.
4938. When you saw him on subsequent visits did he seem to have considerably improved? He did improve after a time. For the first six weeks or two months he was very ill—in a state which amounted to just a question of life or death. He was extremely ill from physical weakness, as well as mentally. Then he improved for a little time; then again he relapsed, and continued up and down.
4939. As soon as he began to improve in bodily health did his mind get worse? I think that when his physical condition improved his mind cleared up for a time and then became worse again.
4940. How long had he been in the institution before you noticed he was getting worse? After he had been at Bayview House about two months he began to improve, and continued to improve for several months. He then had another attack of mental exacerbation, and he never became as well after this second attack as he did after the first.

4941. Did you frequently visit him while he was at Bayview House? Once a week for many months, but latterly not so frequently.
4942. Are you aware that special accommodation was provided for him? I saw him in two suites of rooms.
4943. Did he usually sleep in a dormitory? The first room I saw him in was on the ground-floor, and that room was used as his bed-room. He slept in an upstairs room afterwards.
4944. While you conversed with him latterly did he ever complain that he was put to sleep in a stable? No; never.
4945. Were you ever made aware that he was placed under restraint and put to sleep in a separate room; I knew he was in a single room, and understood that he always had an attendant with him.
4946. Which room do you suppose that to be? I did not know which, but I thought it was either upstairs or downstairs in the main building.
4947. Did you know that he was placed in a separate room away from the main building altogether? No.
4948. Have you been made aware of that fact lately? Only since this investigation was initiated. No one informed me of it at the time of my visits to Bayview House.
4949. When you visited the institution did you make inquiries as to the way he was treated, and did you always see the patient? I used to see him every time I went out, and he always appeared to be treated just the same as he was at first.
4950. Did you ever have any conversation with Dr. Vause as to his condition? Yes.
4951. Did Dr. Vause ever tell you that he was placed in the isolation room? No.
4952. Were you aware of it at all at the time of your visits? No.
4953. *Dr. Garran.*] As far as you observed at the time of your visits was the treatment of the patient satisfactory? Eminently so.
4954. As far as you saw, were the appointments of his rooms sufficient to keep him in comfort? Yes; in every way.
4955. Was he well fed? Yes; with food from Dr. Vause's private table.
4956. Have you any reason to regret that you advised his being placed there? No.
4957. Have you had any special opportunities of studying insane patients? I have seen a considerable amount of insanity in my time.
4958. Have you any complaint to make of the treatment of this case while at Bayview House? Not the slightest.
4959. Do you feel sure that Dr. Vause did everything he could for the comfort and welfare of the patient? Yes; I think I do.
4960. Do you suspect him of any cruelty or neglect to the patient? Not the slightest.
4961. Did you see anything in his treatment at Bayview House to which you could object? No; I used to be able to go out day or night, and I had the free run of the whole place. I was allowed to go out just as I liked, and at any time.
4962. Up to what period did you make these frequent visits? I cannot exactly remember, but I think it was up to the time that Dr. Scot-Skirving returned. I know I went out frequently for the first two to four months. After that I went out every few weeks.
4963. Did you see Case No. 1 frequently up to December, 1893? Somewhere about that time, I think.
4964. Up to that time were you perfectly satisfied with his treatment? Yes.
4965. If any change for the worse took place in his treatment must it have been after that date? Yes.
4966. *Mr. McGowan.*] Do you know the patient was removed from Bayview Asylum because his treatment was not altogether as satisfactory as you say it was in the earlier stages of his confinement? I would not answer a question as to his treatment put exactly in that way. I would say he was removed because his treatment was alleged to be unsatisfactory.
4967. Have you seen the room where, it is stated, he was placed to sleep for six months? I do not think I have; I do not remember it.
4968. Is it one of two detached rooms in a courtyard away from the main building? I do not remember it.
4969. We have it in evidence that for six months at least, previous to the 20th of May, 1894, he was placed to sleep in this room; does not that cover the period of December, 1893, which you mentioned in answer to a question asked by Dr. Garran? Yes; but I did not know he was confined in this room away from the main building.
4970. From time to time when you visited the institution were you under the impression that he occupied one of the two rooms you usually saw him in? Yes, up to December, 1893.
4971. With an attendant too? Yes, and that he had two attendants for the bulk of the time.
4972. Did you go out to Bayview House after December last, up to the time the patient was removed? Yes; but not as frequently as before.
4973. When you saw the patient was he ever violent and excited? He was in a condition of extreme mental excitement. At the mere sight of a female he would take down his trousers. He was dirty in his habits—so dirty that you could not imagine such conduct from a gentleman. He was, in fact, in a most dreadful state.
4974. Supposing you had been told by Dr. Vause that he was put in an isolation room would you have thought it to be proper treatment? I should have quite agreed with it.
4975. Did they ever know at Bayview House when you were coming on a visit? No; I used to drop in at all times.
4976. Would you go straight to Dr. Vause or to the patient? Dr. Vause was often in the old house. I would go to the office, and then the patient would be brought. First, Dr. Vause would go and see if he was presentable, for at one time if you left him for a few seconds he would have his trousers off.
4977. What time would elapse between your arrival and you seeing the patient? From two to six minutes.

[Witness withdrew.]

Robert

Dr. W. D. C.  
Williams.  
4 Dec., 1894.

Robert Scot-Skirving, Esq., M.B. et C.M., sworn and examined:—

- Dr. R. Scot-Skirving.  
4 Dec., 1894.
4978. Were you medical attendant on Case No. 1 for a considerable period? Yes.
4979. Were you attending on him when he was attacked by mental disease? Yes; with Dr. Williams.
4980. Were you present when he was removed from his own house to Bayview Asylum? Yes.
4981. Did you sign the certificates for his removal? I signed one of them.
4982. Did you afterwards visit him for a considerable time? Yes, in the earlier time of his stay at Bayview House.
4983. Had you always every opportunity of seeing the patient when you called at the asylum? Yes, he was always brought into the room to me.
4984. Were you always satisfied with his treatment, so far as you are aware of the accommodation that was provided for him? I saw the bedroom he occupied at first, but I did not see his sleeping accommodation after I returned from England. I went to England in February, 1893, and I came back to Sydney in September of the same year.
4985. Subsequent to your return did you visit the patient occasionally? I think I did two or three times after I returned, and before he was removed to Callan Park. Two or three times; certainly not more than three; perhaps twice.
4986. Were you told on either of these latter visits that the patient was placed in an isolation room? If I was it did not make any impression on my mind.
4987. After having seen the patient, conversed with him, and ascertained his state of mind, if you heard he was undergoing solitary treatment would you have been surprised? I did not think much on the subject either one way or another. If I had heard that he was in a room by himself I should at once have thought that such treatment was necessary. I always understood he was in a room by himself.
4988. Were you aware that any change had been made in his sleeping accommodation? No; I did not grasp that fact.
4989. Have you seen the two isolated rooms in the courtyard of Bayview House, set apart for the use of violent and noisy patients? No; I did not know of their existence.
4990. Did you know that Case No. 1 was placed in one of these to sleep? No.
4991. Did you make any close investigation into his surroundings? No; I always took a great interest in his case, and the progress of his malady. As to the treatment, I had every confidence in Dr. Vause, regarding him, as I do, as an expert in such cases. I simply trusted to him.
4992. Were you ever informed that the patient was placed in this isolated room? I was not; and I did know of the existence of the building until this day.
4993. *Dr. Garran.*] Have you any objection to putting violent patients in a solitary room? No; if patients are violent it is necessary. At Prince Alfred Hospital we have an isolation ward where we put violent patients.
4994. Has anything come to your knowledge to lead you to doubt the suitability of the treatment of Case No. 1 while at Bayview House? I have got no more knowledge of the case now than what I have derived from public prints.
4995. *President.*] Do you remember when the patient was removed from Bayview House to Callan Park? Yes; I was out there at the time, and his son was with me.
4996. From what part of the building was he taken? I do not know.
4997. Was Mr. \* \* \* with you? He went out to Bayview House, but I cannot remember whether he waited with me. I do not remember who brought the patient to us. We waited in a sitting-room, and he was brought to us. We put him in a carriage; I got in alongside the patient, and we accompanied him across from Bayview House to Callan Park.
4998. What induced you to go to Bayview House on that occasion? My position in relation to the family. They have been intimate friends of mine as well as patients. When this trouble began, the son spoke to me, and told me he had made up his mind to remove the patient.
4999. *Mr. McGowan.*] I understood the son to say in his evidence, that Dr. Scot-Skirving saw the room which the patient occupied;—have you seen it? I never saw the room. I did not know of its existence. It is only by what I have read in the public prints that I have any knowledge of this place.
5000. *Dr. Manning.*] Did I meet you in consultation on Case No. 1 before he was sent away from his own house at all? Yes.
5001. Was my advice then that he should be sent to a cottage in charge of a special attendant? Yes.
5002. Was the arrangement to send him to Cook's River Asylum made independent of me? Yes, it was; the only part you took in it was that you said in the circumstances perhaps it would be best to have a cottage with attendant, until we saw whether the derangement was only a temporary aberration of intellect. Within two days after seeing you the patient was becoming obviously uncontrollable, and as it was difficult to get cottages and reliable men attendants, both Dr. Williams, I, and the friends came to the conclusion that it would be better that the patient should go to Cook's River. I had spoken to you again, and you informed me that new buildings were to be put up at Cook's River. It is a fact that your original suggestion was to obtain a cottage and attendants, but we found it could not be done, and the patient was then sent to Bayview House.
5003. *Dr. Vause.*] When he was located at Bayview House was there any question raised about the new building? I do not think we discussed the matter. The room I saw the patient in was in the old building, and it seemed to be adequate for his case.

[Witness withdrew.]

The Hon. Dr. MacLaurin, M.L.C., M.A., M.D., LL.D., sworn and examined:—

The Hon. Dr.  
MacLaurin.  
4 Dec., 1894.

5004. *President.*] Were you one of the official visitors to Bayview Asylum and other institutions of a similar character? I was.
5005. Do you remember at what period? I forget the date, but it was when Sir Alfred Roberts went home.
5006. Did you visit the institution frequently? Yes, once a month.
5007. Were you satisfied with the general arrangements of the place? Yes, as far as I saw them at the time.
5008. Were the patients properly treated? Yes, as far as I saw.
5009. Did Dr. Vause appear to be attentive to his duties, and was the institution worked satisfactorily? Yes, as far as I saw.
5010. *Mr. McGowen.*] Do you know when you made these visits? Yes; it was some years ago when I was acting temporarily for another medical man, Sir Alfred Roberts, the chairman of the Visiting Board.
5011. Did you send any notice to Dr. Vause informing him when you would make your visits? No.
5012. *Dr. Garran.*] Did you always go out on the same day? No, not always. We generally paid our visit on Thursdays, but not always on that day.
5013. *Mr. McGowen.*] Did you go straight to the asylum, or did you first call at the office? The first thing we did as a rule was to walk into the office and wait there for a little while looking at the books. Then we would go from the office direct to the asylum and come back and thoroughly examine the books.
5014. What interval would elapse from the time you entered the office until you passed on to the asylum? If we did the clerical part of our work first, such as inquiring into the journal and case-book to ascertain the number of admissions and discharges, &c., which we were bound particularly to do, then we might be half an hour or longer. If we went to the asylum first we should only be in the office for a few minutes.
5015. *President.*] Are you acquainted with Case No. 1 particularly? I think I saw him once at Cook's River.
5016. Did you see him in the office or in the rooms supposed to be set apart for his use? He was in bed.
5017. Was he in one of the associated dormitories? He was in a big room upstairs set apart entirely for him.
5018. Do you recollect the time of this visit? It was made in either April or May, 1893.
5019. As an official visitor, did you see the food supplied to the inmates? Yes.
5020. Was it always satisfactory? Yes, as far as I could see.
5021. Is the dietary scale satisfactory as regards variety of food and so on? As far as we could see it was.
5022. It has been stated here on oath by several witnesses that it was a frequent custom for messages to be sent round announcing the arrival of official visitors, so that the patients could be decently dressed and put in proper order;—when you went straight into the wards would it be impossible to do that in the course of the few minutes available? I should think it would; but if this were done it would only be the proper thing to do. If I managed an institution of this kind I should send a message to the nurses to say the official visitors had come, in order that the performance of their duties could be facilitated as much as possible. I think that is quite the proper thing to do.

[Witness withdrew.]

Edward Petrie Sinclair, Esq., M.B. et Surg., sworn and examined:—

5023. *President.*] Are you a graduate in medicine? Yes, of Glasgow University.
5024. Where do you live? At Ennmore.
5025. Have you any knowledge of Bayview Asylum? Yes.
5026. For some time were you employed there? Yes.
5027. In what capacity? That of Acting Medical Superintendent.
5028. When was this? From the 7th January to the 10th of February of the present year—for exactly five weeks.
5029. Had you any experience prior to this in lunatic asylum work? No, except that I have visited asylums as a student.
5030. While you were at Bayview House had you power equivalent to the Medical Superintendent himself? Yes, I had.
5031. How did you come to be employed in that capacity? An attendant came for me on the 7th of January, saying that something had happened to Dr. Vause, an accident of some kind in which injuries were inflicted by an inmate. I was asked then if I would go to the asylum during the daytime and look after things generally until he had recovered.
5032. Had you, while acting in this capacity, an opportunity of seeing Case No. 1? Yes; I saw him daily.
5033. Did you see him amongst other patients or in a room? He was usually by himself in charge of an attendant. He was constantly with an attendant.
5034. Where did he sleep at night? In a single room in a small building directly opposite the big building.
5035. How many of these rooms are there in this building? Two.
5036. How often did you visit the institution? Once a day, never before 11 in the morning and not later than 5 o'clock in the afternoon. I have visited Bayview House at half-past 11, 12, 1, 2, and 3 o'clock in the day.
5037. Had you every opportunity of studying Case No. 1? Yes.
5038. Are you satisfied that it was proper to put him to sleep in an isolated room? Yes; it was proper treatment.
5039. Why so? Because he was a destructive and restless patient. He slept but little. I think he was better in this room away from any noise and he was unable to do himself any harm.
5040. With regard to the patient's dress? It was good and clean.

Dr. E. P.  
Sinclair.  
4 Dec., 1894.

- Dr. E. P. Sinclair.  
4 Dec., 1894.
5041. Did you ever hear that the patient had a cold bath the first thing in the morning? Never. I understood he always had a tepid bath. I did not see him have his bath, but I was told this by the attendant.
5042. Who was the attendant that told you this? A man named Mackenzie.
5043. Have you ever had a conversation with this attendant about this case? Nothing beyond talking about the patient's food and his sleep.
5044. Did Mackenzie ever make any complaint to you about his treatment? Never.
5045. What was your impression of Mackenzie's character? I thought he was a careful man, or he would not have been in the position he held.
5046. Was he the sole attendant on the patient, then? Yes.
5047. Was there any provision for a night attendant? I always understood that he had a night attendant.
5048. Did you ever see him in his sleeping-room? No.
5049. Did you ever examine this room? Yes, on two or three occasions.
5050. Have you been in it? Yes.
5051. Did you notice any swell in it? No; it was always clean.
5052. Was it well ventilated? Yes.
5053. Was there any air-brick over the door? I do not remember; but I know there was a large ventilating window.
5054. Did you notice if there was any ventilation in the ceiling? Yes, there was.
5055. Was there any ventilation to provide for the access of air under the floor? I do not know.
5056. Do you know if the floor was on the ground? I cannot answer that question.
5057. How many times were you in that room? Twice, at all events.
5058. During the time it was occupied by Case No. 1? Once then, and once since he was removed.
5059. Was the patient a robust man, or did you notice if he had any difficulty in walking? He always had a tremor, and required aid when walking.
5060. We have had it in evidence that when he was taken out of his room the first thing in the morning that he shivered very much;—what would you attribute that to? I think it would be tremor caused by his ailment. I do not think he would shiver from the cold.
5061. Do you think he would feel cold? No; I think he had sufficient clothing and covering, and was warm.
5062. If placed in a room like that would he be perfectly warm and comfortable? I think so.
5063. Did you notice whether this room had a wooden lining? Yes, it was lined. There were also means of ventilation through the observation holes in the doors.
5064. Have you observed him in the day-time, and had a conversation with him? Yes.
5065. Was he dirty in his habits? I never saw him dirty.
5066. When talking to you was he offensive in his language? Yes; he used several oaths, and sometimes he would quote Bible names. On one occasion he made some remarks about a pair of plaid trousers I was wearing.
5067. Did you approve of his being put in this isolation room? Yes.
5068. Why? Because he was destructive, and liable to do himself harm. He was also sleepless, and I was told that he was filthy in his habits. I, on one occasion, saw him undress himself. He pulled the pockets out of his trousers, and tore the buttons off his coat. His hat was also perforated.
5069. During the five weeks you were there had you every opportunity of seeing the food? Yes; I visited the institution during the meal hour on several occasions.
5070. Was there always sufficient food? Yes; the food was adequate, well cooked, and sufficient in every way for an institution of that kind.
5071. Some of the witnesses have said the food was badly cooked, and not of good quality;—what would you say about that? It is not true. I heard of a complaint once about some beef-tea. There was no foundation whatever for the complaint.
5072. Did the wardsmen complain to you? No.
5073. Did one of the female nurses complain? No; I always had conversations with the matron.
5074. Did anyone ever make any complaint to you concerning the food? No.
5075. Did you ever see any of the patients inadequately clothed? No; never.
5076. *Dr. Garran.*] During the five weeks you visited the institution was Alick Mackenzie the day attendant on Case No. 1? Yes.
5077. From him did you learn of the patient's habits? Yes.
5078. Was it from him that you learned that the patient was locked up in this isolation room at night? No; it was from Dr. Vause, who informed me at the beginning that the patient required such treatment.
5079. Are you quite sure you were told of this? Yes, certainly; otherwise I could not have known.
5080. Can you say whether Mackenzie ever said anything to you about night attendance? No; I cannot say.
5081. Do you think these isolation rooms across the yard are suitable rooms for patients of this kind? I do.
5082. Do you think the fact of these rooms being detached from the main building is an advantage? I think it is advantageous.
5083. In what way? Take the case like the one in question, who could not sleep. He was away from annoyance, and did not annoy others when in the single room. He was free from the sometimes annoying influence of attendants on duty. Furthermore, he in the single room was safer than in a dormitory—he could not fall out of bed. If put in an ordinary room he would fall out of bed.
5084. Do you think there is any disadvantage in taking patients from these rooms into the open air when going to their bath? There is scarcely any distance to take them, and I do not think there is much disadvantage if clothing is put round them.
5085. Do you see any harm in having these rooms detached from the main building? No; I think it is the proper thing.
5086. Would there be any necessity in stinting the supply, or by giving badly cooked and inferior food to the patients? No; certainly not. As far as Case No. 1 was concerned, he was well looked after;

- after; and he dined in Dr. Vause's private house. I have seen him throw the crockery about in Dr. Vause's breakfast-room. As for the other patients, I can say that they partake of the same kind as everybody connected with the institution—good wholesome meat and everything else.
5087. Have you seen the straw mattresses and rugs on which the patients sleep? Yes; the rugs are lined with blanket and quilted together.
5088. Have you noticed the blanket inside the rugs? Yes; and they are quite sufficient to well cover patients.
5089. Are they sufficient to keep them warm at night? Yes.
5090. *Mr. McGowen.*] Did you notice any sores on the persons of the patients? There were a few boils on one or two.
5091. Did Case No. 40 ask you about some sores on her body? She was pointed out to me. I think the matron directed my attention to the case. After seeing it, I came to the conclusion that her blood was out of order, because she would not eat sufficient animal food.
5092. Was it not caused by her eating bad food? No; it was not bad food, but want of food. She was suffering from religious mania, and refused to eat animal food.
5093. Did you make any alteration in her general diet? I recommended that she should have beef-tea and animal broths, and that her boils should be properly poulticed.
5094. Did she not get proper nourishment formerly? She would take everything but animal food, and that was what her system required.
5095. Do you know anything about the eleven or twelve rooms on the female side? I have seen them all.
5096. Do you know how many windows are in those rooms? I cannot answer that question. I know there are one or two in each, but I am not quite positive which.
5097. Have you seen those rooms lately? No.
5098. Has it ever been reported to you that they are all occupied at night? I saw in the morning, when making my visits, that most of them had been occupied.
5099. Do you know whether there was night attendance on these patients? Certainly there was.
5100. How do you know that? I was told so. I made inquiries, and the matron told me that there was always a night attendant on duty, and that visits were made every two hours at the longest.
5101. What matron told you this? The matron in charge at the time. I am not aware of her name.
5102. Was it Jessie Fuller? I think that is the name.
5103. Are you sure that you were informed by this matron—supposed to be Jessie Fuller—that through every night the patients in these single rooms were visited by an attendant? Yes; every two hours at the longest.
5104. Did you ever try to find out if this was correct? I had no possible chance to find this out, and I had no reason to doubt it.
5105. Was it ever reported to you that patients were placed in these rooms without clothes? They always had night-clothing and the rugs I have referred to.
5106. Was it possible for women to be put in straw in these rooms without your knowing it? I saw these rooms in the day-time. I never saw them at night.
5107. Was any complaint made to you to the effect that such things were done? No; never.
5108. *Dr. Vause.*] Subsequent to the five weeks' experience to which you have alluded, did you attend a patient at Bayview House described as Case No. 41? Yes; he was suffering from typhoid fever.
5109. How long did you attend on him? For about two months.
5110. During that period did you call on him at all hours during the day and night? Yes.
5111. Had you then ample opportunities of seeing the place and the way it was managed? Yes.
5112. Did you see anything wrong or suspicious? No.
5113. *President.*] When you visited Case No. 41 did you go direct to the patient? Yes; and to reach him I would pass through two long corridors and up the stairs.
5114. Had you, then, every opportunity of seeing the general regulation of matters pertaining to the institution at night? Yes; I saw where the patients slept.
5115. Were there any nurses about? Yes; there were always nurses. There was a specially-trained nurse for this case, who had not been in the institution previously.
- [Witness withdrew.]

WEDNESDAY, 5 DECEMBER, 1894.

[The Commission met at 11 a.m., in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
Esq., M.D., INSPECTOR-GENERAL OF THE  
INSANE.

ANDREW GARRAN, Esq., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
Esq., M.L.A.

Dr. Vause was in attendance to hear evidence and examine witnesses in his own behalf.

Bessie Ann Simpson sworn and examined —

5116. *President.*] Are you matron at Gladesville Hospital for the Insane? Yes.
5117. Have you been there in that capacity for some considerable time? Yes; thirteen years, the 6th of last June.
5118. Previous to that were you one of the sisters in the Sydney Hospital? Yes.
5119. Did you come out to Australia with Miss Osborne? Yes.
5120. Were you some years as the Sydney Hospital? Two years, I think.
5121. Previous to that had you a good deal of hospital experience in England? Yes; I was trained at St. Thomas's Hospital, and was subsequently at the Derbyshire General Infirmary.
5122. Amongst others, were you one recommended by Miss Florence Nightingale to Miss Osborne? Yes.
5123. Had you a considerable amount of experience in general hospital work prior to entering a lunatic asylum? Yes.
- 5124.

Dr. E. P.  
Sinclair.

4 Dec., 1894.

Bessie Ann  
Simpson.

5 Dec., 1894.

- Bessie Ann Simpson.  
5 Dec., 1894.
5124. Have you found that some patients require careful watching, because of their occasional violence, even though they were highly respectable and brought up in refinement before being mentally disordered? Yes.
5125. When these unfortunate ladies become insane do they seem to change their nature altogether? Yes; they are altogether different.
5126. Are their habits quite altered? Their habits are just the opposite, as a rule, to what they were formerly.
5127. When you find it necessary to put such patients in a single room do you find any advantageous result? Yes; in cases of excitement the patients appear to become calm sooner by being alone.
5128. In some cases do these patients refuse to wear night-clothing? Yes.
5129. Are their habits dirty? Yes, very dirty.
5130. Do they lose sense of decency and propriety? Yes, they do.
5131. *Dr. Manning.*] Have you been anxious as far as possible, to apply hospital methods to the Gladesville patients? Yes.
5132. Do you find it quite impossible to do so in many cases? Yes, in many cases; but we try it as far as we can.
5133. Are there certain cases which you are obliged to put in single rooms without clothing? Yes.
5134. Also without chamber utensils? Yes; because these patients are so destructive and dirty.
5135. Do a good many of them refuse to wear clothes at all? Yes.
5136. Do some tear the bed-ticks? Yes, almost directly.
5137. Do they then lie in the straw? Yes, they do. Some seem to prefer the straw.
5138. As far as you know, from your large experience, is there any other possible treatment for this class of cases? I do not think so.
5139. If you had double or treble the number of nurses on your staff would you still be obliged to place some patients in single rooms? I do not think the size of the nursing staff would make any difference at all in this respect.
5140. If the staff were very much larger would you still treat these patients as you do now? Yes.
5141. Would having nurses with these patients prevent sleep and do them harm? Yes; it would irritate the patients.
5142. Are you sometimes obliged to keep these patients in these rooms both day and night? Yes.
5143. Is it a fact that you have to keep some patients in continually for a whole week at a time, because you dare not leave them out? Yes; in many cases.
5144. The only thing you can do with such a patient is to feed her and let her get as much sleep as she can? Yes; to feed her and keep her as clean as possible.
5145. How many nurses would it take to spoon-feed such patients? Sometimes three or four; and in some cases I have known it used to take more.
5146. Have you a certain number of patients who will always go without shoes and stockings? There are some who will not wear them.
5147. Have you others who will not wear petticoats? Yes.
5148. Do you think there would be any difficulty for an inspecting visitor to know whether a patient had petticoats on or not? It is easy to see. Some of the patients, on the other hand, have a mania for a great many petticoats.
5149. Is it the custom at Gladesville for the official visitor to make inquiries about patients from the nurses; or do they make inquiries from you? Sometimes from myself, and at others from the nurses; but chiefly from the head nurse.
5150. Do the official visitors speak to the ordinary nurses as a rule? No; I do not think they have done so.
5151. Is it different from a hospital nurse who has charge of a patient, inasmuch as you move about freely in an asylum? Yes.
5152. Do you run short of clothes or bed-clothes occasionally at Gladesville? No; we have sufficient clothes.
5153. But, occasionally, are you unable to get quite all you want from the store? Occasionally we cannot get them just at the time we want them.
5154. Are they always supplied to you later on? Yes; and the longest we have had to wait is not more than a week or two.
5155. Would that often happen in any large household? Probably so.
5156. Have you much difficulty as regards verminous patients? We rarely have anything of that kind. Sometimes when a patient is in delicate health she seems to breed vermin; but we have but few cases of the kind.
5157. Have you many patients in regard to whom it would be unsafe for one nurse to open the door of a single room at night? Yes.
5158. Is it your system in night-watching to send two nurses? Yes.
5159. Are there patients whose doors it would be quite safe for one nurse to unlock in the day-time but not at night? Yes. In some cases one nurse might take a patient away from the room in the daytime, and it would take two or three to move her at night.
5160. Do you superintend the passing to and fro of patients to the visiting-room? Yes.
5161. Is it one of your duties to see that these patients are properly dressed on these occasions? Yes.
5162. Do the friends of patients expect to see them properly dressed? Yes.
5163. Is this dressing looked upon as one of the ordinary rules of the asylum? Yes; I have to see that she is tidily dressed and in every way comfortable.
5164. In the case of quiet patients do they wish it themselves? Yes.
5165. In the case of dirty patients is it advisable for many reasons to do so? Yes.
5166. Do the friends of patients wish it? Yes.
5167. Do they supply you with clothes for the patients to wear in the visiting rooms? Yes; a great many of the friends do supply clothes for this purpose and for Sunday wear.
5168. Do you, with Dr. Sinclair, have the selection of cases which you send from Gladesville to Cook's River Asylum? Yes.
5169. Will you tell me what kind of cases some of these are;—I will ask you what is Case No. 33? A very bad case—a single-room case. 5170.

Bessie Ann  
Simpson.

5 Dec., 1894.

5170. Do you remember Case No. 19? No.
5171. What have you to say about Case No. 42? She was a refractory case, and very troublesome indeed.
5172. Is one of the first inquiries you make, when you know patients are going to Cook's River, whether you can send single room cases? Yes.
5173. Is that because you are short of single rooms at Gladesville? Yes.
5174. So that the class of patients you send to Bayview House is not your best? No.
5175. We have had it in evidence that at Cook's River it has been the habit for the attendants to have ten minutes, a quarter of an hour, and even twenty minutes' notice of the arrival of the official visitors, so that they may prepare the patients for inspection;—how much preparation do you think could be made by five nurses amongst fifty patients? Not much; it would take that time with one alone in some instances.
5176. With the class of patients I have been mentioning could much preparation be made? No; not much.
5177. Would it be possible to do a little tidying amongst the patients? You might get a clean dress, but the difficulty is that the patient might object to wear it.
5178. Would any changes that could be made in the dresses of fifty patients in ten minutes or a quarter of an hour be very few indeed? Yes.
5179. Would it be possible to change the dresses of the whole fifty and tidy them up generally? Certainly not.
5180. *Dr. Garran.*] You say you like to dress up the patients tidily before they are inspected;—do you find it difficult to keep some of them tidy during the day? Yes.
5181. Have they lost all sense of female delicacy and taste? Yes.
5182. Have they lost all interest in looking smart? Yes.
5183. And are you obliged, as a matter of treatment, to leave them alone? Yes; in many cases we are.
5184. Do you wait upon these patients all day long? Yes; they are always under observation all day.
5185. Must you clean them up a little when their friends come to see them? Yes; they must be made presentable.
5186. When a patient becomes violent, and you think it necessary to put her in a single room, do you do so on your own authority? If a patient becomes so violent as to be unsafe to herself and to others, I put her in a single room, and report the circumstance at once to the doctor.
5187. Do you ever put a patient in without the doctor's knowledge? No; the doctor always knows.
5188. What degree of violence or noisiness induces you to put a patient in a single room? If it amounts to just a simple quarrel with another patient I would not do it, but if a patient becomes very violent, and dangerous to herself and to others, I do not hesitate.
5189. If a patient gets out of bed at night, is that a sufficient reason for removal to a single room? Not unless she continued to do so, and became violent.
5190. Do patients sometimes get out of bed at night and pull other patients about? Yes; but I would not put her in the single room for that if it were done casually. The next night the same patient might be quite good.
5191. What amount of light is there in these single rooms? They are lighted from the dormitory. There is no light in the rooms themselves.
5192. Are they rather dark? Yes.
5193. Is not that a disadvantage? I think it is an advantage, because they sleep better, and are more likely to be quiet.
5194. Would the light wake them? In the associated dormitories the light keeps some of them awake.
5195. Do you darken the windows in the associated rooms? Yes; we pull the blinds down.
5196. Do you not throw the light in early in the morning? No.
5197. Is it your opinion that a highly excited patient is better by herself than with anyone with her? I think so—much.
5198. Do you think a nurse or nurses sleeping in the same room would be disadvantageous? I think the patients are better alone.
5199. Have you a night nurse on duty patrolling the asylum? We always have three night nurses.
5200. Are any of the patients in these single rooms left all night without being seen? No; they are seen every two hours, and oftener if necessary—sometimes every half-hour.
5201. Are all these ordinary nurses, or are they under a chief nurse? They are under a senior nurse, who is stationed in the observation ward.
5202. The three, then, are not all of the same status? No; one is a senior nurse; the next is a second senior, and the third is a junior.
5203. Have you many violent patients at Gladesville at present? Yes; a good many just now.
5204. Do you send them to Bayview House now? No; I wish we could.
5205. Does one violent patient cause you more trouble than half a dozen quiet ones? Yes.
5206. *President.*] Referring to these single rooms, are there a number of them in a row, with a corridor on the outside, and is that corridor lighted at night? Yes.
5207. So that although the rooms themselves are dark, a light is easily thrown on the patient if necessary? Yes; there is a light in the corridor, and the nurses are supplied with lamps.
5208. Concerning this tidying of patients, say there are fifty patients to be seen, and there are two nurses to attend to them, that a large proportion of this number are clean and the smaller number have to be attended to, could that be done in a few minutes? No, not if they are at all troublesome.
5209. Does it always take some time to persuade these patients that it is right they should look tidy? Yes; they object to being dressed, and you have to coax them.
5210. Do you make it a strict rule to tidy up the patients when their friends come to see them? Yes, always.
5211. Are the quiet patients always pleased to be tidied up? Yes, and when well enough they tidy themselves, and take a pleasure in doing it.
5212. Is there any provision for the three night nurses to obtain any little comforts that patients may require? Yes.
5213. What provision? We classify the patients, and those requiring night attention of this kind are placed in the observation ward.

- Bessie Ann Simpson.  
5 Dec., 1894.
5214. Can you get tea or cocoa during the night? Yes, when it is required.  
5215. Were are these things kept? The senior nurse has them in the observation ward.  
5216. Is there always an ample supply there? Always for those who want it. Generally milk is the drink given, and there is always milk.  
5217. Do these patients always get milk, cocoa, or tea when ordered by the doctor? Generally they are ordered milk or cocoa, and they get it.  
5218. Generally speaking, are these patients on milk diet, and is milk always available? Yes, and there is no difficulty in getting it.  
5219. Have you a gas-stove at which you can heat these drinkables? There is a Sicc stove in the observation ward, and it can be used whenever it is required.  
5220. *Dr. Vause.*] How many patients have you under the three night nurses? The whole of those on the female side.  
5221. How many are there? About 300.  
5222. Is that 100 patients to one nurse? Yes.  
5223. If you require anything heated on a summer night do you have to light a fire before you can get it? We keep the stove alight summer and winter in the night nurses' room.  
[Witness withdrew.]

Eric Sinclair, Esq., M.B., C.M., M.D., sworn and examined:—

- Dr. E. Sinclair.  
5 Dec., 1894.
5224. *President.*] Are you Medical Superintendent at Gladesville Hospital for the Insane? Yes.  
5225. How long have you held that position? Since January, 1882.  
5226. Had you any previous experience in lunacy work? None.  
5227. Have you any medical attendants except yourself? Yes, two others.  
5228. How many patients are there at Gladesville? Eight hundred and fifty, 550 males and 300 females.  
5229. How often do you make your round personally? I generally go round every day. If possible I go over the whole of the house every day, but it is not always possible to do that. When I do not one of the other medical officers completes the inspection.  
5230. Are there a good number of refractory patients in Gladesville Asylum? Yes. I presume that we have the usual proportion, at all events.  
5231. What is the rule in regard to the treatment of refractory patients at Gladesville when the occasion becomes necessary for nurses or attendants to put them in the single room; must this fact always be immediately reported? There is no such things done at Gladesville as the nurse in charge placing a patient in the single room without reporting it till the next day. If a patient is in the habit of sleeping in a single room the facts in connection with the case are reported when I make the usual medical round. If patients become suddenly violent and in consequence are at once placed in a single room the fact would be reported without delay.  
5232. When cases have become chronic do you get the report on your ordinary medical round? Yes, that is customary.  
5233. Have you a regular time of visitation? Yes.  
5234. Have the other medical gentlemen in connection with the institution a fixed time in connection with their visits? Yes. There is a fixed time.  
5235. Do you keep notes of all the cases? Yes. Everything to do with the cases is set down in the case-book.  
5236. With regard to the male patients put into the single rooms have you a night-watch? Yes, we have more than one night attendant on duty. There are three in the main building and one in the branch building.  
5237. Do you find that to be a sufficient number of night attendants for nearly 600 patients? Yes.  
5238. Would that be more than 150 patients to one attendant, or about that number? We do not count it in that way. If patients require special attention, care is taken that they shall have it irrespective of the ordinary attendants making their usual round.  
5239. While on a visit at Gladesville I observed that the single cells are lighted from the corridor, there not being any light in the single rooms themselves;—is that the case? The light thrown into the single cells is entirely from the corridor, where there are gas lamps alight throughout the night.  
5240. Does the light being thrown into the cells affect the patients at all during the night? We find from experience that it is not advisable to have too strong a light.  
5241. Is there an observation hole in the doors of these single rooms? Yes.  
5242. How often is the night watch supposed to go round? The watch is supposed to make a visit every hour.  
5243. Have you any check to show that this is done? Yes; there is a tell-tale clock which marks every time the night attendant makes his round.  
5244. Are some of the patients kept in these single rooms filthy dirty in their habits? Yes.  
5245. It has been given in evidence before us that in certain cases a particularly strong urinal smell cannot be got out of the rooms for days together;—is it a fact that in certain stages of insanity it is not possible to get rid of this smell? No. In certain classes of insanity it is very strong, but it can be removed.  
5246. What are your floors;—wooden or asphalt? We have wooden floors.  
5247. Can these always be made sweet under ordinary circumstances, even with this particular class of insane patient? Yes.  
5248. Do you think asphalt would retain the smell long? With this class of patients it is likely that it would dry quicker, and if that were so the smell would not last as long. It would smell quiet as bad though the first thing in the morning.  
5249. Do you think asphalt would suit the associated dormitories, where demented and old and feeble patients sleep? Yes, perhaps so.  
5250. If an experienced person who knew nothing at all of these matters, except by casual examination, offered an opinion, do you think he would be in a position, by going into one of these places, where the floor was of wood or asphalt, before it had been cleaned, to state authoritatively whether the smell was from stale or fresh urine? I am afraid he would not.

Dr.  
E. Sinclair,  
5 Dec., 1894.

5251. *Dr. Manning.*] Have you paid a considerable amount of attention to the treatment of wet and dirty patients of late? Yes, of late years I have.
5252. Does the number of wet and dirty patients at Gladesville compare favourably, *pro rata* of course, with other institutions of similar size? Yes.
5253. We have had it in evidence from Professor Anderson Stuart that patients should be roused from their beds two or three times a night, if necessary, for the purpose of cleanliness, and to support his contention he quotes "Mercier" on this subject;—do you think a patient should be roused, say every four hours;—would that be proper treatment of acute mania in general paralysis? No; certainly not. Such experiments might be tried with advantage on demented, but certainly not on a paralytic.
5254. Would it be decidedly wrong treatment if applied to an acute maniac? Yes. On no account should these patients be roused. Interference in this direction would involve great danger of a falling off in general health, owing to want of continuous rest.
5255. Would rousing up as suggested interfere with his recovery? Yes.
5256. When quoting from "Mercier," Professor Stuart gave this extract: "Patients who are dirty from sheer malice, and from a desire to give trouble, are a very different class to deal with. This category of patients is the most objectionable of all. Such patients are always made the tenants of single rooms, in which they are for the most part left during the night to their own devices, and discovered in the morning in a condition of indescribable filth, and this cause is in many asylums unavoidable. But in an ideal asylum in which the number of attendants is not limited by necessary considerations of economy, such patients would have a special attendant to remain with them at night and to prevent their indulgence in such practices. With the first of the two classes into which patients of his category have been divided the prevention would then be very easy, and with the second it would not be difficult. Whatever the cause of this uncleanness may be, every dirty patient should be trained into habits of cleanliness by being compelled to attend the closet not only at frequent intervals, but what is most important, at regular times. The nervous system as a whole, and any special nervous mechanism of these particular functions, is much the creation of habit, that when once by persistent training the habit is established by exercising these functions at fixed intervals and at regular times, the nervous system will be broken into conformity, and the habit will at length become unmodifiable by the individual. For this reason patients who are wet or dirty at night should be taken up at least three times, and always at the same time every night, and given the opportunity of evacuating. Besides taking these patients out of bed, which should be done every three or four hours, the night attendant should at each visit, that is to say, every hour, examine their beds to see if they are dry, and if they should be wet they are to be at once changed, dry macintoshes and dry sheets placed upon the bed. Every such patient should be examined by the night attendant before he goes off duty, and every bed should be dry and clean when the day attendant comes on." Do you believe that "Mercier," when writing as quoted above, meant what he has written to apply to acute cases of mania? No; certainly not to acute cases.
5257. To which classes then do you think he makes reference? To imbeciles, to demented, and to old and feeble patients who might remain in bed from sheer indolence or weakness.
5258. If Professor Anderson Stuart applies this opinion to the treatment of acute maniacs, do you think he has altogether mistaken his case? Certainly he has.
5259. Have you at Gladesville, or have you seen anywhere else in Australia, these single rooms artificially heated? No.
5260. Do you find it necessary even in winter-time that these rooms should be so heated? No; not in this climate. The patients never suffer from cold, neither in the night-time nor in the daytime.
5261. What are your instructions to the matron and chief attendant as regards the tidying of patients when they are taken to see their friends? The instructions are that patients when taken to see their visiting friends shall be dressed as they are when going to church.
5262. Will you give the reason why this is a strict rule of the public hospitals for the insane? One would, in the first place, naturally do so if he went to see his own friend. We do the same with the patients. We see that their hands and faces are washed, and that they are dressed in decent clothes. A man might be working outside in the grounds, and common decency demands that he should not go to his friends as he comes from work, probably with wet trousers and a dirty coat.
5263. Do the quieter patients dress themselves? The patients who understand what is intended frequently grumble if they are not allowed to dress themselves. If they are in the garden and are informed of the arrival of friends, some patients will straightaway wash and dress themselves and proceed to the visiting room.
5264. Do the friends of the patients expect to see them tidy? They do, indeed, and would very soon grumble if they did not. We frequently get letters of complaint if the clothing and the patients are not as tidy as the friends expect them to be.
5265. Do they supply clothes for this purpose? We always ask them if they can afford to do so. If they can we get special clothes from the friends for Sunday and visiting wear. We keep these clothes for such occasions, and dress the patients in house clothes for ordinary work.
5266. Are you obliged to treat a number of patients in single rooms? Yes.
5267. Are a certain proportion of these put in single rooms at night without clothes? A certain proportion are in these rooms both day and night without clothes.
5268. What are they supplied with? With a canvas rug lined with blanket, and straw mattress. In some cases where patients destroy the mattresses they are supplied with straw without the tick.
5269. Since you have visited the Medical Superintendent at Gladesville have you had an opportunity of visiting most of the large asylums in England, in Scotland, and in other parts of the world? Yes.
5270. Have you visited the best both in England and Scotland? Yes.
5271. Did you find similar customs observed at these as those you observe in the treatment of such cases at Gladesville? Yes.
5272. Do you know of any other effectual way of dealing with this class of patients? No; you might keep an attendant in the room, but that is not a way I should recommend.
5273. If you had a larger staff of attendants than you have now would you still be of that opinion? Yes; I should still think it better for the patient if he had to be in a single room, to put him there with straw mattresses rather than with an attendant.
5274. In part of that quotation from "Mercier" it is said: "But in an ideal asylum in which the number of attendants is not limited by necessary considerations of economy such patients would have a special attendant

Dr.  
E. Sinclair.  
5 Dec., 1894.

attendant to remain with them at night to prevent the indulgence in dirty practices"; do you think the presence of an attendant would stop patients in their dirty habits? No; it would not.

5275. If you had such an increase of staff as would enable you to place an attendant with each dirty patient of this class would you still be of the same opinion and object to make any change? Yes; it would, for a change in this direction would do harm to the patients. It would interfere with their rest; it would keep them from sleeping; it would keep them in a constant state of irritation, and result in increased excitement.

5276. What is the usual custom when the official visitors are going through the asylum in regard to making inquiries about the patients? Inquiries while making the rounds are made from the medical officer or officers accompanying the visitors. In the ward the visiting doctors speak to the patients themselves.

5277. Do they also occasionally speak to the matron? Yes.

5278. And very occasionally to the chief nurses? Yes; but not to the other nurses.

5279. Why is that? Because the chief nurse is supposed to know all about the ward and the people in it. The other nurses are under his or her direction.

5280. During the last ten years have you made great improvements in the single rooms? Yes.

5281. In the way of providing extra light and extra ventilation? Yes.

5282. Have you been doing this gradually? Yes.

5283. Have some alterations been made within the last six months? Yes; and some still require to be altered.

5284. Have you been unable to complete the necessary alterations for want of funds? Yes.

5285. Have you still a number of rooms which you do not consider to be sufficiently lighted or ventilated? Yes.

5286. Are some of the patients in these single rooms in such a condition that you can, with safety, give them chamber utensils? Yes. In most of the cases utensils are placed in the rooms. They are put in wherever the patients do not make a noise. In some instances it would be useless to put utensils in the room.

5287. Is that because patients would not use them? Yes.

5288. Or put them to a bad use? Yes.

5289. Have you seen Case No. 1? No.

5290. Have you heard a good deal about him? Yes.

5291. Do you know something of the nature of his affliction? Yes.

5292. In dealing with cases of that kind would you think it advisable to consult me, and inform me freely of the condition and difficulties of the case? I always make a point of doing so.

5293. Partly as a matter of consultation and partly because of my share in the responsibility? Yes; but mainly the latter.

5294. Have you had patients transferred to you from Cook's River Asylum? Yes, occasionally.

5295. Have you heard any complaints about the food at that institution? No.

5296. Or as regards the clothing? No. We have no complaints. The people usually spoke very well of the place. If we have heard complaints we have invariably told you.

5297. We have had it in evidence that sometimes patients have died in the single rooms at Bayview House;—is it so at Gladesville too? Yes.

5298. Have you had a considerable number of deaths in the single rooms? Yes; we frequently place patients in these rooms when they reach a low condition. We purposely put them in these rooms by themselves, for it is anything but pleasing to the other patients to see anyone approaching death.

5299. Have you had cases of a violent and noisy patient suddenly collapse and die in a single room? Yes; in the daytime.

5300. In your English and Scotch experience did you learn what was the custom with regard to attendants sleeping in the dormitories with patients? In some of the asylums I made inquiries on this point, and found that in the public asylums it is not the custom for attendants to sleep in the dormitories with patients.

5301. Is it the custom in private asylums for the nurses to sleep with the patients? Yes; but not in the public asylums.

5302. Have you transferred patients from Gladesville to Cook's River? Yes.

5303. I will mention the names of some of them, and will you tell me the nature of some of the cases—first, Case No. 33? A violent case, in the refractory ward as a rule; slept in single room.

5304. Case No. 43? I do not remember much about her case.

5305. Case No. 42? She was a single-room case.

5306. Were a fair proportion of the patients sent to Bayview House single-room cases? We tried as far as possible to send single-room cases. We were glad to get rid of them as we were short of single rooms.

5307. Did you always ask if you could send single room cases? Yes; and we were told sometimes that we might and sometimes that we might not.

5308. We have been told in evidence that notice was given, some ten or fifteen minutes, and sometimes more, of the arrival of the official visitors at Bayview House, and that in the interval between the arrival of the visitors and their going round the wards, a considerable amount of preparation was made by changing the dresses of the patients, do you think that with fifty patients and five nurses a considerable amount of change could be made in that time? With patients inclined to be violent you could not do much, if anything at all in the time.

5309. What is it usual for nurses to do when they ascertain that the official visitors are in an institution? They take the towels away and make the wards tidy. But they have no time to change dresses. They might put dresses straight or arrange neckerchiefs; then they would assemble the patients so that they can be easily seen.

5310. When the official visitors enter a ward at one end is it often half an hour before they reach the other? Yes; it is so at Gladesville.

5311. Do you think it would be impossible to make elaborate preparations and redress the patients as stated in from ten to twenty minutes? It could not be done, and if it were attempted on some patients the first thing they would do would be to tell the visitors.

5312. Have you at Gladesville a number of women always without shoes and stockings? Yes.

5313. Are there some without petticoats? Yes.

5314. Is it easy for official visitors of experience to see whether patients have petticoats on under their dresses or not? Yes, quite easy.

Dr.  
E. Sinclair.  
5 Dec., 1894.

5315. *Dr. Garran.*] Where you have a dirty patient in a single dormitory do you sometimes clean it up during the night and sometimes leave the room alone? The patient may be roused to make water in the earlier part of the night and it does him no harm. If it happens late at night sometimes the room is left till morning.

5316. Is it an uncommon thing if feces becomes desiccated to leave it there till morning? No; not if deposited early in the night.

5317. Does it often happen that ordure is found on the floor of the room and on the pyjama trousers of the patient? This happens always with certain patients.

5318. Can this be avoided? No.

5319. Do you think it a good thing to turn patients out of bed unnecessarily for the purpose of attempting to keep them clean? No; interference of this kind makes them excited and stops their night's rest.

5320. Is it better to leave them in their dirt than to constantly insist on cleaning them? Yes; always in these particular cases of acute mania.

5321. Is it desirable to have more light in these rooms;—do you think patients should have the sunlight as soon as it is available in the morning? No; if so the patients would get up so early; hence we have a shutter to keep out the light.

5322. Do you pull that shutter up at night? Yes.

5323. Does it rest with the warder to pull it down again in the morning? Yes.

5324. If a patient goes to sleep late after a restless night do you get him up at the usual time for his bath? No; in certain cases we leave him to sleep.

5325. Practically do you get them up so soon after daylight that it is not worth while to trouble whether there is light or not in the room? We do not consider that light makes much difference.

5326. Do you find any difficulty in getting these rooms dry after they have been scrubbed? No.

5327. Are your single rooms outside and detached from the main building? No; they are off a corridor.

5328. Do they get as much fresh air as they would if they were outside? Perhaps not; but they get sufficient.

5329. Do you use any chemical in scrubbing out these rooms? We use Sanitas soap and carbolic. We could not get the smell out without using these.

5330. I desire to know if you can distinguish between a strong urinous smell—do these rooms when they are opened in the morning emit a strong urinous smell? It is a strong smell of fresh urine. The urine of these patients smells more or less strong from the moment it is passed.

5331. We have it in evidence that when a certain room was opened early in the morning at Bayview House there was an abominable smell of stale urine? I can quite understand there being a strong smell, and much of it might depend upon the amount of ventilation during the night. These patients throw off from their own bodies perspiration that smells strong and that in itself would cause a room to be stuffy.

5332. Would these exudations from a man's body give the smell of stale urine? The first thing in the morning the smell of these rooms meeting anyone coming from the fresh air would be sufficient.

5333. If the floor of the room had not been properly cleaned could this stale urinous odour arise? It is quite possible. The smell comes back. The urine sometimes soaks into the boards and its smell comes back as the room gets dry.

5334. Supposing the floor is of the ordinary kind, such as the urine could pass through the cracks, what would be likely to happen? There would be the greater likelihood of the smell coming back, in the way I spoke of.

5335. Have you many cases of general paralysis at Gladesville? A considerable number.

5336. Is it, as a rule, a disease with well-marked stages? Yes; there is at first the stage of excitement, then the stage of quietness, and it generally ends in the stage of dementia.

5337. Does the latter always come after the other? The stages are not particularly well-marked.

5338. In the highly irritable stage are these paralytics very troublesome patients? Yes.

5339. Is that the most dangerous period? Yes.

5340. Is there any stage where you have to put these patients in a single room at night? Yes; in the first stage. It is absolutely necessary to do so, as the patients then are extremely destructive.

5341. Is that any uncommon form of treatment? It is not at all uncommon.

5342. Do you give any special attention to these patients while in this stage? Yes; the attendants have to visit them more frequently.

5343. Do the attendants on these occasions look through the observation holes, or do they open the room door? They do not open the door unless they are specially told to do so. They open the door only when a patient is greatly excited, or when anything specially requiring attention renders it necessary for them to go inside the room.

5344. Do you think these patients feel the cold? I do not think so. If we saw that they did we should take extra precautions. We do not often ascertain that the skin gets a chill.

5345. Do not these patients seem to physically suffer from cold? No; if they feel the cold they lie down in the straw; for often, in the morning, they have been found buried in the straw, with the rugs pulled over them.

5346. When these patients become violent, on winter nights, and denude themselves, have you found them to be cold in the morning? No.

5347. Have you any idea of the temperature of these rooms? No; but they and the patients are warmer than the outside air.

5348. Would it be a good thing to reduce the ventilation? On very cold nights in the winter-time we do reduce it with the aid of small shutters.

5349. Do you ever shut the ventilators? We shut them when it is exceptionally cold.

5350. When you take them out to go to the bath do they shiver? No; except when taken from one end of the ward to the other. They are always covered with blankets, and one does not notice the shivering.

5351. Is it any distance from the rooms to the bath? In some wards there is some distance to go; in other wards the baths are close beside the rooms.

5352. Do the patients have to go outside on the verandahs to get to the bath? Yes; except they are taken a long way round.

5353. Practically do they go into the outside air when on their way to the bath? Yes; but under the verandah all the time.

5354. For what distance? It looks about 60 feet.

5355.

- Dr.  
E. Sinclair.  
5 Dec., 1894.
5355. Do any go quite into the open? No; they are under a verandah, free from draughts.
5356. Do you see any objection in those patients going into this half open air? No.
5357. Have you noticed any patient get a chill from this practice? No; nor have I heard any complaint to that effect.
5358. *Mr. McGowen.*] Do you know of any better method than putting these patients in the cells naked;—is it not possible to make some canvas shirts, which they cannot destroy? No; not when in that stage. No thickness of canvas is too strong for them. The heavy rugs are destroyed in a night.
5359. Is it not possible to make some garment without arms, wearing which they would be unable to destroy it? We tried some combination things, but they would not answer. We have tried all things that have been thought of, and we find the best garment is the one we have adopted.
5360. Is there no way of fastening some garment at the waist or back, by which the patient might remain clothed during the night? You have no idea of what these people are like in this stage of insanity, You could not keep clothing on these patients except by tying it, so that it would be painful to the wearer.
5361. Do you use any implements of coercion, such as camisoles and muffs? Yes.
5362. Do you make any entries in certain books when these are used, so that they can be seen by the visiting doctors? Yes; I have to record the use of these things, and the entries are seen every time the official visitors come to Gladesville.
5363. Supposing an attendant desired to make a complaint, regarding the treatment of a patient, would he make it to you, to the chief attendant, or to the matron? It would be made to me as a rule. If not, it would be made to the senior attendant, and that attendant would be in fault if he did not come to me with it immediately.
5364. What is the usual custom followed when a complaint is made? The usual custom is to complain to the senior attendant, in minor matters of routine, but if there is anything serious to complain about I should expect the complaint to be made direct to me.
5365. Since you have been at Gladesville have any outside physicians consulted with you and attended patients for physical and surgical ailments? Yes.
5366. Have you had any consultations on mental matters? Only with Dr. Manning.
5367. Have medical men on their travels visited Gladesville? Yes.
5368. Have they expressed favourable opinions as to the working of the institution? Yes.
5369. In case it becomes necessary to administer drugs to patients, is it the invariable custom for the medical officer to look fully into the matter? Drugs are always ordered by the doctor, and only after he has seen the patient.
5370. Are drugs administered by the attendants? Yes.
5371. Are they mixed by the dispenser? Yes.
5372. *Dr. Vause.*] What would be the effect on an irritated and excited patient of fastening on a canvas jacket by mechanical means, especially where there was a tendency to remove clothing? It would make him more excited when necessary to keep him as quiet as possible.
5373. Would you do such a thing at night time? I would not.
5374. Would you have brass fastenings on any article of clothing in a single room, while occupied by a patient of this class? No; we do not even use a camisole at night.
5375. *President.*] Do you think moving about either inside or in the vicinity of a single room at night would tend to excite a patient in this stage of the disease? Yes.

[Witness withdrew.]

Kate Brennan sworn and examined:—

- Kate  
Brennan.  
5 Dec., 1894.
5376. *President.*] Are you nurse at Bayview Asylum? Yes.
5377. Are you engaged there now in that capacity? Yes.
5378. How long have you been there? About two years.
5379. Were you engaged on December 2nd, 1892? Yes.
5380. Did you then sign a book containing a list of your obligations and duties and the regulations of the institution? Yes.
5381. Have you always endeavoured to obey those instructions? Yes.
5382. What are your particular duties now? At present, and since January, I have been in charge of the Government patients' dining-room.
5383. Had you any previous experience in this particular work before going to Bayview House? No. Formerly I was a house and parlour maid at Stanmore, and I took certificates of character with me when I was engaged by Dr. Vause.
5384. Now that you are in charge of the dining-room have you every opportunity of seeing that the food is well-cooked and of good quality? Yes; and it is always good.
5385. Have you ever heard any complaints from any of the nurses on this score? One or two of the nurses did grumble about their food.
5386. Do they get the same kind of food as the patients? Yes.
5387. What was the nature of their complaint about the food? They said that the meat was not tender, that it was too tough.
5388. Did they say it was too fresh? It was always fresh. Sometimes the steaks for breakfast were rather hard.
5389. Was it because they were a little too fresh for use? I never found it so.
5390. Was there always an adequate supply? There was always plenty of meat.
5391. Did you sleep in the dormitories? Yes.
5392. With how many patients? There were fourteen when I went there, but there are not as many now.
5393. Was it the custom to change the sheets in your dormitory at night? I never did it, but I believe it was done last winter-time.
5394. Do you mean that the sheets were put on in the daytime and taken off at night? In one of the dormitories they were taken off—in the dormitory next the single rooms.
5395. Was that on account of the patient being dirty, or was there any other express reason for that being done? The nurse used to take the sheets off.

Kate  
Brennan.  
5 Dec., 1894.

5396. What nurse was that? It was Maggie Macleod; she always had clean sheets in the day.
5397. Do you know the number of single rooms there are on the verandah on the female side? I think there are ten.
5398. Have you seen patients put in them? Yes.
5399. Have you assisted to take patients out in the morning? Yes.
5400. Were there some of them put in naked? There is one patient who sleeps in straw.
5401. What is her name? Case No. 15. I have seen her take off every stitch of clothes. She is a very destructive patient.
5402. When the official visitors came to the institution to see the patients did you always get warning, so that you might make them ready? No. We never knew more than ten minutes or a quarter of an hour of the arrival of the visitors before we saw them in the wards. We could not do much in making patients ready in that time. The patients were tidied, just the same as they are when Dr. Vause comes his rounds.
5403. Was there any difference made at all in the patients when the visitors came? Sometimes if a patient had on a specially untidy dress it was changed.
5404. Did you ever take the clothes off one patient and put them on another? No, never; and I never saw it done.
5405. Was there always a good supply of clothing for the use of the patients? Yes.
5406. It has been told us that there were patients who had no stockings on, and that some of the stockings had no feet;—is that so? Nurses could get everything they wanted in the way of clothes by going to the laundry.
5407. Have you ever been on duty as a nurse at night? Yes, for one week.
5408. How long is that ago? Some months ago.
5409. Is there a nurse on night duty now? Yes.
5410. Do the nurses take this night duty in turn? Yes, once a fortnight; it used to be once a week.
5411. Do you remember Case No. 17? Yes.
5412. Was she a delicate patient? Yes.
5413. Did she always have a nurse in attendance on her at night? Yes; two nurses slept in the dormitory where she was.
5414. Do you know that Case No. 20 broke her arm? Yes.
5415. Were you on night duty then? She was in the dormitory where I slept, and Maggie Macleod was in my place during the week I was on night duty.
5416. How did this accident occur? We cannot exactly say when it was done or how it was done. We found her with her arm broken.
5417. Did she tumble out of bed? I do not know. The patient while in the dormitory was restless, and wandered about the room. She was pulling the bed-clothes off the other patients, and Nurse Macleod asked me to remove Case No. 20 to a single room. I would not do so at first, but at half-past 10 o'clock, after mentioning the case to the matron, Macleod and myself moved her from the dormitory to a single room.
5418. Was it not until morning that you discovered the patient's arm broken? Yes.
5419. When you removed her and left her in the single room, was her arm broken? No.
5420. Did you visit one of the patients every hour? Yes; Case No. 23.
5421. Could you see into these rooms? I saw Case No. 20 standing at the door asking for her clothes. She wanted her clothes to get dressed.
5422. Did you ever go into the single rooms while on night duty? No, only to Case No. 23.
5423. Did you ever hear of the doors or these rooms being opened between 10 o'clock at night and 6 o'clock in the morning in consequence of some disturbance in one of the cells? No, I never heard of it.
5424. When you go round, do you just look in on the patients? Yes.
5425. Supposing a patient to be in great distress, what do you do then? We can always see the patient, and we open the doors if they are noisy. If they are quiet we do not open the doors.
5426. Did you always go round every two hours? Yes.
5427. How long ago is that? I think it was in August.
5428. Is it the custom now for the nurses on night duty to go round every two hours? They go round every hour now.
5429. Is there a tell-tale clock kept to record these visits? Yes.
5430. What was the reason Lizzie Verity was discharged? Because she left the patients for too long.
5431. Was that neglect of duty? Yes; it was against the rule to leave a patient alone. She left a patient and went into the dining-room to get a cup of tea.
5432. On the whole, are you satisfied that everything possible is done for the care of the patients? Yes.
5433. Is Dr. Vause attentive to his patients? Yes.
5434. How often does he make his rounds through the institution? Sometimes twice and at other times three times a-day.
5435. Has he a regular hour for making these visits? Yes, at 12 o'clock.
5436. When does he make the other rounds? In the morning at breakfast-time, and in the evening.
5437. In cases of sickness is he always available? Yes.
5438. Do these separate rooms smell badly in the morning? Yes.
5439. A very strong smell? Yes.
5440. Do they get fresh and sweet before night-time? Yes; they are well washed, and we always use chloride of lime.
5441. How many utensils are there in these separate rooms? There is one in each cell.
5442. Of your own knowledge is there one in each cell? Yes.
5443. Do you know there are ten of these rooms? Yes.
5444. And in these ten rooms are there ten india-rubber utensils used? Yes; I have seen one in each cell.
5445. Are any patients sufficiently intelligent to make complaints about the institution, if necessary, to the Medical Superintendent? Yes.
5446. Have you ever known them make complaints? No.
5447. If anything went wrong had you an opportunity of reporting to Dr. Vause? Yes.
5448. Could complaints be made direct to him? Yes.
5449. What matron was there then? Bridget Morrissey.

Kate  
Brennan.  
5 Dec., 1894.

5450. Did Bridget Morrissey ever tell you that complaints must be made through her? Yes; I made a mistake; it was to the matron I used to complain, but if she happened not to be there I always went to Dr. Vause and made complaints of that kind.
5451. *Dr. Garran.*] When Maggie Macleod told you that she took the sheets off the beds did she do it of her own free will? She never told me she took them off; I saw her doing it myself.
5452. Why did she do it? She said she could not get sheets from the laundry in the morning, and that it was not necessary to leave them on the beds.
5453. Was any order given for her to take these sheets off? I never heard of it. I was in the same dormitory and I never had any such order.
5454. Has there been a night-nurse on duty all the time you have been at the asylum? No; the night-nurse began duty last year.
5455. At about what time of the year? I do not remember exactly, but I think it was sometime during the winter.
5456. Was it about last May? I do not know.
5457. Do you think that there is a night-nurse on the men's side? I do not know if there is one there.
5458. Is there only one nurse on night duty? There is one on regular night duty, but there is more if a patient is in the hospital. A nurse is always on night duty if a patient is in the hospital.
5459. Supposing you are on night duty and want to get a cup of hot tea or cocoa, can you get it? Yes.
5460. Where do you get it? In No. 1 dining-room.
5461. Are the materials for making these warm drinks kept in the cupboard there? Yes; there have always been materials of this kind there since I have been at the institution.
5462. If we have been told by other witnesses that it is impossible to get these things on the female side is that a mistake? I always found them there, and I know one nurse who got tea for me.
5463. Is there a fire kept in that room? Yes; I think so.
5464. Could you always get these things without any difficulty? Yes; whenever I wanted them.
5465. Were there always sufficient materials in the cupboard? Yes.
5466. As far as you know is the bedding at night the same as is shown to the visitors in the day-time? Exactly the same, except in cases of very dirty patients.
5467. Have sheets been taken off the beds of very dirty patients? I think they have been taken off some of the beds in the bottom dormitory.
5468. With those exceptions, is the bedding and are the bed-clothes as we see them in the day-time the same as are used at night? Yes.
5469. As far as you know are the sheets taken off in any other dormitory? No.
5470. *President.*] Are you in charge of the dining-room? Yes.
5471. Do you say that there is an adequate supply of food for the patients? Yes.
5472. Is there more than is necessary? Yes.
5473. What do you do with what is left? We send what is not wanted back to the kitchen, and the scraps are put in the waste box.
5474. *Mr. McGowan.*] With regard to these single rooms, do you say there is only one patient, Case No. 15, put into them at night in a nude condition? Yes.
5475. Are you sure there are no more? She is all.
5476. Are all these rooms occupied every night? Not always. I think there is one vacant now.
5477. Usually are there nine or ten patients in these rooms every night in the week? Yes.
5478. Have any alterations taken place in the single rooms lately? None that I know of.
5479. Are they just the same now as they were before Case No. 1 was removed? Yes, they are the same now as they were when I first went there.
5480. Have no improvements been made in these rooms since he was there? No.
5481. None at all? None that I know of.
5482. Is there not a window in the wall opposite the door—a window that is covered by a shutter? There are two windows.
5483. Were they always there? Yes, they have been there since I have been there for the last two years. Those two windows—I mean in the centre room—have been there ever since I have been there.
5484. Why was Case No. 15 put in that room naked? We always tried to put clothes on her but she would not keep them on.
5485. Does Dr. Vause always make three visits to the asylum each day? Not always.
5486. Did he do so before the trouble about Case No. 1? He visited the institution regularly once a day and sometimes twice.
5487. Did you ever have more than ten minutes' notice when the visiting doctors arrived? We might have had a quarter of an hour, but certainly not more.
5488. Were any of the patients got ready on these occasions? They were hurriedly tidied, such as putting on a handkerchief, or fastening up their boots and stockings.
5489. Did you ever see Government clothes put on private patients? Never.
5490. Did you ever see them put on a patient (Case No. 44) who slept in the square room occasionally and who was a private patient? Yes, I think I have seen a winsey dress on her.
5491. Was she a private paying patient? Yes.
5492. Did you ever see Case No. 45? Yes.
5493. Did you ever see her amongst the Government patients? No, never.
5494. Did you ever know of her being locked in a room and having a fit while in the room? No, she was always in the dormitory with the nurses.
5495. Was she in the habit of having fits night and day while she was in the asylum? Yes.
5496. Do you mean to say that she was never locked in a room and while there have a fit? No, she always used to sleep in the dormitory.
5497. Was she never locked up in a room the key of which was kept by a nurse? No.
5498. Did you know Case No. 46 who died there? Yes.
5499. Do you know if there was any request made to Mrs. Gilchrist for a cup of tea just before this patient died? No, I do not know.
5500. Was Case No. 47 there and ill for a few weeks? Yes.
5501. Did the doctor visit her and prescribe for her? Dr. Vause did not; he was not there then. Dr. Ramsey was there then and he did.

5502. Supposing you wanted it could you get a cup of tea or cocoa for the patients during the night? Yes.
5503. Could you have got a cup of tea during the night previous to the trouble about Case No. 1? Yes.
5504. Did any other nurses know where these materials for making tea or coffee were? Yes, they always had a key and could get at the cupboard.
5505. Was Bridget Morrissey matron at the time? Yes.
5506. Ought she to know about these things? Yes, she must have known it.
5507. Supposing she said she did not know of it? I do not know how she could say that. I knew these things were in the cupboard. We have been there and got bread, butter, and milk from the cupboard.
5508. Supposing Annie Marshall did not know of it? She might not, she was only there for a very short time.
5509. Supposing Josephine Mackay said she did not know of these things? She must have known, and other nurses knew they were there. I always made tea the first thing in the morning, and tea was left in this cupboard all through the night before.
5510. Did you put Case No. 20 in a single room at half-past 10 at night? Yes.
5511. And what time was she taken out in the morning? Between half-past 5 and 6 o'clock.
5512. At 12 o'clock at night when you were passing the cell did you see her? Yes, at the cell-door.
5513. How did you see her? I had a lantern in my hand.
5514. Did you look at her through the observation hole? Yes, and she then asked me for her clothes, for she wanted to get dressed.
5515. Was she naked then? No, she had a night-dress on.
5516. When did you see her again? I saw her about 5 o'clock in the morning, when I unlocked the door and went in. She was lying on the bed covered up with blankets.
5517. Was anything said about the broken arm then? No.
5518. Did you notice any nurse acting cruelly towards her? No.
5519. Have you heard any complaints to the effect that Nellie M'Bride used a scrubbing-brush on Case No. 23? I never saw it done.
5520. Do you know Case No. 12? Yes.
5521. Was she a private patient at the institution? Yes.
5522. Was she placed in a single cell? Yes.
5523. Do you think her friends knew of this? I do not know.
5524. Was she put in in a nude state? No, she always had a night-dress and plenty of blankets.
5525. Did you ever see a nurse give her medicine? Yes, she got a draught occasionally.
5526. Not very often? No.
5527. Two or three times a week? No.
5528. Did she refuse to take these draughts? She did not like them.
5529. Did you have to resort to any subterfuge to get her to take them, such as putting them in her food or in milk? No, I never saw anything like that in regard to that patient, but I have put medicine in another patient's tea.
5530. Did you get these medicines from the doctor? Yes.
5531. Were they administered under his directions? Yes, the directions were always stated on the bottle.
5532. *Dr. Manning.*] Do you know whether in Case No. 44, a private patient, Dr. Vause finds her in clothes? I do not know.
5533. *Dr. Vause.*] Was it customary to remove the sheets at night in any other ward than that where Macleod was? No, doctor.
5534. Was this done by any other nurse in the place? No, I never saw it done except by Macleod.
5535. How many windows are there in these single rooms—I mean openings for the admission of light? One at the back; I do not think there is another.
5536. *President.*] Have you been round the place lately? Yes.
5537. Have you not noticed the carpenter at work? Yes, but only in one room.
5538. What about the glazed windows over the doors? Oh, I forgot about them. There is a window over each door.
5539. Were these windows put in lately? Yes, since the gas was laid on.
5540. Did you not forget this fact when you were questioned by Mr. McGowen about improvements being made in the single rooms? Yes, I never thought of it then.
5541. Do you still say there were always two windows there? I did not think of this then.
5542. But do you remember now that windows have recently been placed over the doors? Yes; but when I spoke about seeing two windows, I meant I had seen two windows.
5543. Which are they? There are two in the middle cells, where the lattice work is.
5544. *Dr. Vause.*] How long was Annie Marshall acting as nurse? I cannot say; not very long. Not more than a fortnight or three weeks.
5545. Did Macleod have difficulties in getting through her work before she left? Yes, she used to make difficulties. There were a couple of patients in bed in the morning—Case No. 47 and Case No. 48. Nurse Macleod was supposed to come and fetch their breakfast, and then she grumbled to me about it.
5546. *President.*] Did she grumble about any other portion of her work? She always said there was a lot of work to do.
5547. Did she grumble at the character of the institution? She was always grumbling.
5548. Did you ever hear her complain that the patients were not properly treated? No; she always said that the patients had too much their own way. I have not heard her say that the patients' food was bad, but I have heard her grumble about the nurses' food.
5549. Have you heard her say that the patients on the Government side were not supplied with proper clothes? Yes; I have heard her say so.
5550. Do you agree with her views on this subject? No; I could always find whatever clothing I wanted.
5551. *Dr. Vause.*] Did Macleod write to Henry Gearey while you were at Bayview? Yes.
5552. Who posted the letter? Kate Kennedy.

Kate  
Brennan.  
5 Dec., 1894.

- Kate Brennan.  
5 Dec., 1894.
5553. Do you know if Macleod visited Gearey while she was at the institution? Yes, Jessie Urquhart told me that she did.
5554. Have you heard anyone at the institution express any opinion about the truthfulness of Macleod? Everybody was always complaining about her being untruthful.
5555. From the time you knew Macleod was in communication with Gearey did you notice any change in her demeanour? Yes; she seemed to do as she liked.
5556. Did she try to upset the work of the establishment? I do not know.
5557. Do you know if she kept the clothes back from the laundry? Yes, she did.
5558. *President.*] Did you report that matter to the doctor? No; I had nothing to do with reporting to the doctor while the matron was there.
5559. Did you complain to the matron about it? I think I said something to the matron, who often spoke about Macleod, saying she could not see why that girl was always grumbling.
5560. Do you know if anyone acquainted the medical superintendent of the fact? I do not know, I never did.
5561. *Dr. Vause.*] Have you known anything to complain of? No.
5562. Were the complaints made by her groundless in your opinion? Yes.
5563. Did Macleod's manner imply that she did not care whether she was discharged or not? Yes.
5564. *President.*] Did you ever hear her say that? I heard her say she only wished she would be discharged.
5565. *Dr. Vause.*] Why did she say that;—did she say she could get another billet? Yes; she said that Gearey had promised her that he would get her a Government situation.
5566. Do you know if Mackenzie wrote a letter to Macleod? Yes.
5567. Did Mackenzie say in his letter to Macleod that she was a fool for not getting to see Gearey as requested? I do not know whether it said that. She told me she did go and see Gearey.
5568. Did Annie Marshall give you a letter for Macleod? Yes, and I gave it to Macleod, and she said it was a letter from Goulburn from Mackenzie.
5569. Did this letter say that Gearey would get Macleod a good billet? Yes; she told me so.
5570. Did Macleod endeavour to get other nurses to keep the clothes back from the laundry? I do not know. There were two nurses in the dormitory.
5571. Do you know if the laundress had some words with Macleod on this account? Yes, I have heard them.
5572. Do you know why Macleod was dismissed summarily? I only know that I reported her to Mrs. Gilechrist for abusing me on the day she was discharged.
5573. Do you know anything about nurse Urquhart? I know that Macleod ran into the ward, got hold of nurse Urquhart, called her names, said she would murder her, and struck her with a key.
5574. Did she leave the same day? Yes.
5575. Was not Macleod particularly engaged in bed-making? Yes.
5576. Is not this work considered less responsible than the immediate supervision of patients? Yes; I always found it was so.
5577. Was she ever head nurse on the Government side? No; she was in charge of the dining-room.
5578. *Mr. McGowen.*] Do you say that everybody complained about Macleod being untruthful? Yes; Lizzie Verity, the laundress, Ada Simpson, and Jessie Urquhart.
5579. Have you noticed any great addition to the bed-linen and the clothes of the patients since Case No. 1 was there? No; we always get new bed-linen every summer.
5580. Has there been any extra amount purchased since last May? Not as I know of.
5581. Did you ever see any of the Government patients scrubbing the floors? Yes.
5582. Were they scrubbing them with lime? No; with sand.
5583. Did they ever use lime and burn their hands? No; I have seen them scrubbing the floors with sand.

[Witness withdrew.]

Maggie Kennedy sworn and examined:—

- Maggie Kennedy.  
5 Dec., 1894.
5584. *President.*] Are you a nurse at Bayview House? Yes.
5585. When were you engaged to occupy that position? I went there on the 30th of July.
5586. Did you sign the ordinary obligation book? Yes.
5587. Did you keep a copy of the rules and regulations in connection with the institution? Yes.
5588. Do you remember a nurse named Macleod who was at Bayview House? Yes.
5589. Had you a good deal of experience of her? I think I had about two months.
5590. Was she a truthful girl? No; she was untruthful.
5591. Can you mention any specific cases in which she was untruthful? Yes; I could in many ways. She was in the habit of carrying yarns down to other girls, which were anything but the truth.
5592. Had she a general reputation of being untruthful? Yes.
5593. How long were you there before you found out that she was untruthful? I do not know exactly. First of all I was warned by other girls, and then I found it out myself.
5594. Did she ever tell you that she was in communication with a man named Gearey? No; but she gave me letters to post to him.
5595. Had you conversation with her on many occasions? No.
5596. Have you ever been on night-duty while at Bayview House? Yes.
5597. While on that duty did you always go round to the different wards? Yes; I went through all of them.
5598. Did you also go round to the single rooms? Yes.
5599. How often did you go round to the single rooms? Every hour, and every half hour if necessary.
5600. Was the time of your attendance always marked out? Yes; it was every hour of the night.
5601. Were any of the patients noisy? Yes; a few of them were troublesome.
5602. Was it necessary on any occasion to open those rooms at night, in order to see what was the matter with the patient? Yes.
5603. Did you do so between 10 o'clock at night and 5 o'clock in the morning while going on your regular rounds? Yes; with ordinary patients.

5604.

5604. Was that between 10 at night and 5 in the morning, while you were on your ordinary rounds? Yes.
5605. Do you ever go into any of the cells in company with other nurses? Yes; I had to with very troublesome patients, such as Case No. 33. I went in by myself in ordinary cases, but where patients were violent I would go in with another nurse.
5606. What for? To see whether they were all right. I would open the door and ask if they were all right. If the patient was awake she would say "Yes"; if she was asleep that was quite sufficient. I was provided with a lantern.
5607. Did you ever go in a room occupied by a troublesome patient? Not alone after 10 o'clock at night when there were no other nurses about.
5608. Would you go into the rooms to see the quiet patients but not the noisy ones? Yes.
5609. Would you question the noisy ones? I would look at them through the observation hole in the door, but I would not go in.
5610. Was there an ample supply of provision for tea, cocoa, and milk, and so on, through the night, if such things were required for the use of the patients? Yes; any amount.
5611. Where were these provisions kept? In No. 1 dining-room.
5612. Was there always a fire there? Yes; always while I have been at the institution.
5613. *Dr. Vause.*] Would there have been any danger in going into the room of Case No. 33 alone? Yes; I would have been afraid to have gone in there by myself.
5614. Was there any necessity to go into her room? There was no necessity, doctor.
5615. Were the patients you visited in the manner you have described more or less sickly? Yes.
5616. *President.*] Was the reason why you went in because the patients you saw were quiet and in delicate health? Yes; I used to go in for fear they wanted a drink during the night.
5617. Were they really sick patients? No; they were not what you might call hospital patients, but we always visited them in case they wanted anything.
5618. *Dr. Vause.*] Have you had to deal with sick patients at times? Yes, now and again.  
[Witness withdrew.]

Maggie  
Kennedy.  
5 Dec., 1894.

Mr. Alfred Barden sworn and examined:—

5619. *President.*] Are you, Mr. Barden, engaged in the butchering business? Yes; I used to be a squatter, but I now buy and sell cattle. I buy meat on commission for Dr. Vause, to be consumed by the patients of Bayview House.
5620. Do you not supply him with the meat? No, I merely buy it.
5621. Where do you get your supplies from, then? From Glebe Island, Darling Harbour, where I obtain the best I can buy.
5622. Do you always make a personal inspection of the meat before you purchase it? Yes, always.
5623. What commission do you get for your trouble? It amounts to about £1 per week.
5624. Is the supply generally about the same in quantity week by week? Yes; as a rule it amounts to 200 lb. per day. On some days, however, the quantity may be a little less than this. I purchase mutton one day and beef the next.
5625. In purchasing the meat in this way do you buy it in joints or how? Beef I take by the quarter and mutton by the sheep. In hot weather I buy it and put it in the freezing house, sometimes as much as half a bullock at a time.
5626. Do you buy in this manner for any other institution? No.
5627. Supposing you purchase a larger quantity than is necessary for consumption in one day, what do you do with what is left over? Return it to the freezing house.
5628. Do you make a point of always selecting the best meat available? Yes; Dr. Vause always told me to buy the best meat possible, and I always buy it.
5629. *Dr. Garran.*] Do you get your commission on the cost of the quantity you buy? Yes.
5630. Have you any interest, then, in getting the meat cheap? No.
5631. Do you always get the best you can? Yes, always. I get the best I can in the market, no matter what price.

Mr.  
A. Barden.  
5 Dec., 1894.

[Witness withdrew.]

TUESDAY, 11 DECEMBER, 1894.

[The Commission met at 11 a.m., in the Board Room, Chief Secretary's Office.]

Present:—

THE HON. SIR ARTHUR RENWICK, KNT., B.A., M.D., M.L.C., PRESIDENT.

FREDERIC NORTON MANNING,  
ESQ., M.D., INSPECTOR-GENERAL OF THE  
INSANE.

ANDREW GARRAN, ESQ., LL.D.  
JAMES SINCLAIR TAYLOR MCGOWEN,  
ESQ., M.L.A.

Dr. Vause was also in attendance to hear evidence and examine witnesses in his own behalf.

Johanna Dwyer sworn and examined:—

5632. *President.*] Were you at one time an attendant at Bayview Asylum? I was, about six years ago.
5633. What position did you occupy? I first went as an attendant on the Government side, and afterwards I was on the private side of the institution as attendant on the female patients.
5634. Had you any experience in lunacy work before you went there? Yes; I was at Parkside Lunatic Asylum for two years.
5635. Were you engaged at Bayview House by Dr. Vause, and at the time of your engagement did you sign a book? Yes.
5636. Did this book contain the obligations under which you placed yourself—the rules and regulations of the institution—and were they all carefully explained to you? Yes.

Johanna  
Dwyer.  
11 Dec., 1894.

5637.

Johanna  
Dwyer.  
11 Dec., 1894.

5637. During the time you were there had you every opportunity of seeing the working and management of the institution? Yes.
5638. Were you satisfied with the management? Yes; I never had any complaints to make during my time, and I certainly have none to make now.
5639. From your experience at Parkside Lunatic Asylum, and contrasting it with what you saw at Bayview House, is there any particular point in the management of the latter institution to which you would like to call attention? In the matter of management one is equally as good as the other.
5640. Would you say that Bayview House, as an institution for the insane, is more homely than the Parkside Asylum? Yes; if anything it is. Dr. Vause himself is more homely in his treatment of patients.
5641. Was every little possible comfort provided for the patients, and was the medical superintendence satisfactory? Yes; perfectly so.
5642. How long is it since you left Bayview House? Three years.
5643. Were the patients at night-time carefully watched and attended to? Yes, while I was there.
5644. Do you know whether a night-nurse went round among the patients every night? We always went round at night just before going to bed. If anything occurred during the night we were always handy, and could see at a moment's notice what was going on. We slept in a room with a number of patients.
5645. Did you sleep in the associated dormitories? Yes.
5646. Do you remember the single rooms on the verandah? Yes.
5647. When patients were placed in these rooms were they put there on the authority of the matron, the doctor, or whom? When a patient became noisy she would be put in the single room by the matron, acting under the instructions from the doctor.
5648. Do you know from experience that patients are very often very destructive with their clothing? Yes.
5649. In your time was particular attention paid to the patients placed in these single rooms in regard to night-dresses, and so on? Yes; they were always supplied with everything they wanted, and if a patient was sick the attendants were ordered to see that they were not allowed to want anything.
5650. If any patient has become destructive, torn her bed-clothes and everything else, has she been allowed to lie naked in the straw? Yes; we have taken out the clothes at night if we have heard a patient very noisy and violent. We have gone to the cell and removed all the torn clothing for safety's sake.
5651. Was the watching of these particular cells, in ordinary circumstances, confined to nurses sleeping in rooms at each end of this row of single rooms, or was there any night-watching besides that? No; only when a patient was sick.
5652. Supposing any disturbance occurred during the night, would it be heard by the nurses sleeping at each end of these single rooms? Yes.
5653. Would such an occurrence be heard without difficulty? Yes.
5654. Was there any necessity for a nurse to be walking about the whole of the night to keep watch over the patients in these single rooms? No.
5655. How was it when patients were sick at night? There was always a nurse sent off to attend on a sick patient.
5656. In your time at the institution was ample provision made to supply any necessary comfort in the way of nourishment to patients at night? Always. Supplies were kept in the different wards, or rather off the different wards. If a patient were sick on the Government side, the necessary comforts could be obtained in that part of the building, and it was just the same in regard to the private side.
5657. Was there any special place where these supplies were kept on the female side? Yes; in a large cupboard in No. 2 dining-room. I have known occasions on which jellies were made for a sick patient by Mrs. Vause herself.
5658. Was there a fire available at which you could make a cup of tea, cocoa, or coffee? Yes.
5659. Was there a fire kept in this No. 2 dining-room night and day? Not always. In the day-time the fire was always alight, and it was always laid for use in the night-time if necessary. If a fire was wanted there was no difficulty in making it.
5660. Did you ever know of any patient suffering from want of nourishment during the night? No.
5661. Do you know of any nurse or nurses behaving cruelly to the patient, such, for instance, as scrubbing them down with a brush instead of washing them in the proper way? No; I never heard of any such things.
5662. Did many patients die while you were in the institution? I think there were three or four.
5663. Prior to their death were they always properly attended to? Yes.
5664. When drawing near to death was a clergyman sent for, so that he might attend at the right time? Yes.
5665. Did official visitors come to the institution occasionally? Yes.
5666. Were you warned of their arrival before they came through the wards? No; not until I saw them myself.
5667. Do you know a man named Henry Gearey? Yes.
5668. Have you had any conversation with him in regard to the state of affairs at Bayview House? Not much; he certainly came to see me.
5669. Where did he see you? At the "Native Rose Hotel," Darling Harbour.
5670. Did he give you this card [*produced*]?

HENRY GEAREY,

At the side of Mark Foy's—1 door.

9, Brisbane-street, Surry Hills.

Yes; he gave me that card.

5671. Do you know what his object was in having communication with you? I can only say he wanted to know what I knew about Bayview House and its management, and he wanted me to give evidence upon this subject. Personally I have not seen Dr. Vause for six years; therefore I said to Gearey, "I have nothing to say either for him or against him." I also told Gearey that, in my opinion, Dr. Vause was always extremely kind to the patients.

5672. Did he ask you anything about a man named Alexander Robinson, who previously had been an attendant at Bayview House? Yes.

5673.

5673. What did he ask you about Robinson? He said Robinson said I could give certain information about the place.

5674. Do you think that he meant you could substantiate certain accusations against the place? I think so.

5675. Did he hold out to you any promise of advantage to yourself personally if you gave certain information relative to the management of Bayview House? No; all our talk amounted to a general conversation.

5676. Did Gearey appear to be persistent in his endeavours to find out anything he could against Bayview House? He did at first; but he did not want to hear much after he saw I was favourably inclined towards Dr. Vause and the management.

5677. From the nature of his conversation with you did you understand that he had some prejudice against the institution? I thought so at the time.

5678. Did you give to Mr. Gearey your opinion about the man Robinson? No; he never asked me.

5679. Do you think from your own experience in the institution that Dr. Vause always behaved kindly to the patients? I do not think Dr. Vause could be unkind to the patients. I never saw him unkind, and I can say, from personal experience, that both Dr. Vause and Mrs. Vause were always most anxious that the patients should receive every comfort. Although Dr. Vause discharged me at a minute's notice I say what I have said.

5680. From your experience in the institution do you believe that Dr. Vause always took a deep interest in the welfare of the whole of his patients? Yes, I do.

5681. Why did Dr. Vause discharge you? I had a quarrel with one of the attendants, the result being that the doctor called me in and I was dismissed.

5682. Did Dr. Vause give you any reference of character when you left? No.

5683. When you are giving evidence to-day, therefore, you are speaking the whole truth and in a strictly impartial manner? Yes; all I say is quite true.

5684. Do you wish to say anything further about the institution, except that you were satisfied with the management and the general conduct of affairs while you were there? No; I do not. I never knew of anyone leaving the institution who did not express satisfaction of the way in which patients had been treated.

5685. *Dr. Garran.*] Which was the ward you took charge of while you were at the institution? I forget the number of the ward.

5686. Was a nurse named Maggie Macleod there then? No.

5687. During the time you were at the institution did you ever receive instructions to take the sheets off the beds at night-time? No, sir.

5688. Did you ever do that, or know of it having been done? No, sir.

5689. While you were there was the general clothing of the patients insufficient? No.

5690. On any occasion did you ever ask for additional clothing for the patients and meet with a refusal from the person or persons in charge? No; I could always get what clothes I wanted.

5691. Am I to understand that there was never an insufficiency of clothing providing an attendant would go for it when required? No; there was always a plentiful supply.

5692. Was the supply of food at all times sufficient? Yes.

5693. Was the food good in quality? Yes; we and the patients got the same kind of food as Dr. Vause had at his own table.

5694. Was the food fairly well cooked? Yes, it was.

5695. Was a nurse named Nellie McBride there while you were there? No; she was not.

5696. Did you ever see any female patient put in the solitary bed-rooms unnecessarily? No; and some of them have often expressed a desire to be placed in these rooms.

5697. As far as your experience goes, was it always necessary for a patient, whether on the Government side or on the private side, to be confined in the solitary rooms when they were placed there? Yes, certainly.

5698. Was Case No. 17 there during your time? No.

5699. *Mr. McGowan.*] At the time you refer to, when Mrs. Vause made jellies, and so on, was that in Dr. Vause's first wife's time? Yes.

5700. Was she very kind. Yes.

5701. How many of these single cells for separate treatment were there in your time? I think there were between eight and twelve.

5702. Were they always filled every night? If patients were quiet they were left in the bed-room. If they got rowdy during the night they would be removed from the associated dormitory and put in the single rooms.

5703. Was there a patient in each room on every night? No; often there were rooms empty.

5704. How many, on an average, were in these rooms at night? I should say four or five and six.

5705. When patients were put in these rooms were their clothes taken away from them? Yes; their day-clothes.

5706. In some cases did patients have nothing at all in the room but straw? No; in my time they always had a good covering in the single rooms. Some of the patients, the most violent, would tear up the tick, and after doing so, cover themselves up with the straw.

5707. Do you admit that unless patients in a single room at night-time became noisy none of the attendants would go to look at them? The matron, and perhaps one of the nurses as well, always went round the last thing at night before going to bed.

5708. At what time? Nine, or half-past 9 o'clock at night.

5709. Would anyone see these patients during the night-time unless they made a noise sufficient to wake up the attendants sleeping in the dormitory—what I mean is, would the patients be seen between the time they were placed in these cells at night and taken out in the morning? No, sir.

5710. Was a similar system carried on as far as you know at the Parkside Institution? No; there was a night-nurse there.

5711. But still do you say that the patients at Bayview House are treated as well as they were at Parkside? They were whilst I was there; in fact the patients were more kindly treated: for instance, the Government patients were not forced to do anything they did not want to do.

5712. Did you ever see Government clothes put on private patients? No; private patients always had their own clothes.

5713. Do you mean to say you never knew that official visitors came to the institution until you saw them yourself? No; never.

5714. Did any time elapse from when the official visitors arrived at Dr. Vause's office until they came through the asylum? I cannot say.

- Johanna Dwyer.  
11 Dec., 1894.
5715. How long would it be after the visitors reached the office until they came through and saw the patients? I cannot say.
5716. Do you think five minutes would elapse? I cannot say; I never knew when the official visitors came to the office.
5717. Did you never get any intimation announcing that the doctors were there? No.
5718. *Dr. Manning.*] Do you say that the food was good and plentiful? Yes; certainly. Dr. Vause was always there every morning at breakfast-time to see the food go out, and Mrs. Vause superintended affairs on the ladies' side.
5719. As far as the Government patients are concerned, was the supply of food plentiful? Yes.
5720. Was there more bread than you would be likely to use? Yes, and other food, too.
