PIKE, ARREST OF (See "POLICE").		
PITT-STREET (See "TRAMWAYS").		
PLAGUE (See "BUBONIC PLAGUE").		
POINTS OF ORDER :—		
Reported from Committee of Supply, 58, 435.		
Reported from Committee of the Whole, 266.		
RULINGS OF SPEAKER :—		
That a Temporary Chairman of Committees could take the Chair, notwithstanding that the Chairman of Committees had not been appointed, 49.		
That debate in Committee of Supply on items in Resolution for specific services must be confined to the items submitted, 58.		
That the provision in clause 4 of the Darling Harbour Wharves Resumption Bill, giving power to lease or sell certain of the land, was covered by the Title and Order of Leave; Speaker quoted decision of 17th August, 1897, in reference to the Totalisator Bill, 83.		
That amendment, for Call of the House, on a motion proposing a new Standing Order, could be admitted, 127.		
That sections 12 and 13 of the Public Works Act had been complied with by the Minister in moving motion to refer the matter of removing the Public Abattoirs from Glebe Island, to the Public Works Committee, 223.		
That an amendment to insert words "The Sydney Harbour Trust Commissioners" in clause 2 of the Industrial Arbitration Bill, before the Commissioners were appointed, was in order, 266.		
That the subject of the motion for the adjournment of the House in reference to land exchanges had not been discussed on a previous motion, 286.		
That the Fire Brigades Bill was out of order, because clause 25 conflicted with, and was contradictory of clause 65 of the Sydney Harbour Trust Bill, passed by this House, and now before the Council, 306.		
That the provision in the Racing Association Bill in regard to incorporation was not beyond the Order of Leave, and that the Bill did not require to be introduced in Committee, 318.		
That provision in clause 7 of the Early Closing Amendment Bill, which proposes to bring hotels, &c., selling tobacco, under the same law as tobacconists' shops was within the Order of Leave, 325.		
That proposal to put the motion for the adjournment of the House without debate on Friday sittings was not a contravention of the Standing Orders which gave the right to Members to debate such questions, 367.		
That although the Public Works Committee had varied the reference made to them in reference to the proposal to construct the Belmore to Fort Macquarie Electric Tramway, he would not rule the motion to carry out the work out of order, 367.		
That motion for adjournment of House in reference to thoroughfare for vehicular traffic through the Botanical Gardens, could be discussed in the financial debate in Committee of Ways and Means, and was out of order, 392.		
That as the Order of the Day was the property of the House, the second reading of the Tied Houses Bill could be moved by any Member, 409.		
That an Honorable Member discussing in Committee of Supply the estimate for "Railways and Tramways—Existing Lines—Working Expenses," was not in order in commenting in detail on a report of an officer on a new line of railway, 435-6.		
That a Minister was permitted to present papers to Parliament at any time, notwithstanding an address passed by the House requesting the production of the papers, had not been presented to the Governor, 441.		
That the introduction of the Patents and Trade Marks Bill should have been preceded by a Message from the Governor, 460.		

REFERENCES TO THE VOTES AND PROCEEDINGS, VOL. I—18TH PARLIAMENT—SESSION, 1900.	PAPERS ORDERED TO BE PRINTED.

P		
POINTS OF ORDER (<i>continued</i>):—		
RULINGS OF SPEAKER (<i>continued</i>):—		
That the motion for the adjournment of the House in reference to the Police Superannuation Fund anticipated the discussion of a motion which was already on the paper, and was out of order, 522.		
That the Federal Elections Bill was not out of order, notwithstanding the Schedule referred to in Clause 6 was not given, as the Schedules could be introduced and discussed in Committee, 541.		
That motion for adjournment on influence of Members with Federal Electorates Commissioners anticipated discussion on the Federal Elections Bill, and was out of order, 549.		
That motion approving of Government entering into a contract for the supply of steel rails should have originated in Committee of the Whole, and was out of order, 549.		
That motion for adjournment of the House in reference to contract for steel-rails anticipated the discussion of a motion given this day on the subject, and was out of order, 557.		
That in regard to the motion of adjournment in reference to consumptive patients, Liverpool Asylum, having been already discussed in Committee of Supply and being open to further discussion on the third reading of the Appropriation Bill, he thought that the item could not be discussed on the third reading of the Appropriation Bill, and he had not sufficient information as to the proceedings in supply to rule the motion out of order, 577.		
RULINGS OF DEPUTY-SPEAKER :—		
That motion for adjournment of House in reference to legalising certain Municipalities did not deal with the subject embodied in the Municipalities (Amendment) Bill, and was in order, 610.		
That certain clauses in the Municipalities (Incorporation Validating) Bill was not beyond the Order of Leave, 610.		
That the requirements of the Public Works Act had been complied with on motion to refer the work "High-level Bridge over the Hawkesbury River at Richmond" to the Public Works Committee, 615.

Commission of, to administer the Oath of Allegiance, reported, and read by Clerk, 12.		
Commission of Deputy, to administer Oath of Allegiance, 69.		
Lays on Warrant appointing Elections and Qualifications Committee, 17; Reports Maturity of Warrant, 44; Appoints first meeting of Committee, 91.		
Vote of Thanks to Sir Joseph Palmer Abbott, K.C.M.G., on his retirement, 26, 43.		
Lays on Table Election Petition—Taylor v. Smith, Canterbury; 91.		
Clerk informs House of unavoidable absence of, and Deputy-Speaker took Chair, 597, 607.		
RULINGS OF :—		
That a Temporary Chairman of Committees could take the Chair notwithstanding the Chairman of Committees had not been appointed, 49.		
That Debate in Committee of Supply on items in resolution for specific services must be confined to the items submitted, 58.		
That the provision in clause 4 of the Darling Harbour Wharves Resumption Bill, giving power to lease or sell certain of the land, was covered by the Title and Order of Leave; Speaker quoted decision of 17th August, 1897, in reference to the Totalizator Bill, 83.		
That amendment, for call of the House, on a motion proposing a new Standing Order, could be admitted, 127.		
That sections 12 and 13 of the Public Works Act had been complied with by the Minister, in moving motion to refer the matter of removing the Public Abattoirs from Glebe Island, to the Public Works Committee, 223.		
That an amendment to insert words "The Sydney Harbour Trust Commissioners" in clause 2 of the Industrial Arbitration Bill, before the Commissioners were appointed, was in order, 266.		
That the subject of the motion for the adjournment of the House in reference to land exchanges had not been discussed on a previous motion, 286.		
That the Fire Brigades Bill was out of order, because clause 25 conflicted with and was contradictory of clause 65 of the Sydney Harbour Trust Bill passed by this House and now before the Council, 306.

S		
SPEAKER (<i>continued</i>):—		
RULINGS OF— <i>continued</i> :—		
That the provision in the Racing Association Bill in regard to incorporation was not beyond the Order of Leave, and that the Bill did not require to be introduced in Committee, 318.		
That provision in clause 7 of the Early Closing Amendment Bill, which proposes to bring hotels, &c., selling tobacco, under the same law as tobacconists' shops, was within the Order of Leave, 325.		
That proposal to put the motion for the adjournment of the House without debate on Friday sittings was not a contravention of the Standing Orders which gave the right to members to debate such questions, 367.		
That although the Public Works Committee had varied the reference made to them in reference to the proposal to construct the Belmore to Port Macquarie Electric Tramway, he would not rule the motion to carry out the work out of order, 367.		
That motion for adjournment of House in reference to thoroughfare for vehicular traffic, through the Botanical Gardens, could be discussed in the financial debate in Committee of Ways and Means, and was out of order, 392.		
That as the Order of the Day was the property of the House, the 2nd reading of the Tied Houses Bill could be moved by any member, 409.		
That an honorable member, discussing in Committee of Supply the estimate for "Railways and Tramways, existing lines—working Expenses," was not in order in commenting in detail on a report of an officer on a new line of railway, 435-6.		
That a Minister was permitted to present papers to Parliament at any time, notwithstanding an address passed by the House requesting the production of the papers, had not been presented to the Governor, 441.		
That the introduction of the Patents and Trade Marks Bill should have been preceded by a Message from the Governor, 460.		
That the motion for the adjournment of the House in reference to the Police Superannuation Fund anticipated the discussion of a motion which was already on the paper, and was out of order, 522.		
That the Federal Elections Bill was not out of order, notwithstanding the Schedule referred to in clause 6 was not given, as the Schedules could be introduced and discussed in Committee, 541.		
That motion for adjournment on "Influence of Members with Federal Electorates Commissioners," anticipated discussion on the Federal Elections Bill, and was out of order, 549.		
That motion approving of Government entering into a contract for the supply of steel rails should have originated in Committee of the Whole and was out of order, 549.		
That motion for adjournment of the House in reference to "Contract for Steel-rails" anticipated the discussion of a motion given this day on the subject, and was out of order, 557.		
That in regard to the motion of adjournment in reference to "Consumptive Patients Liverpool Asylum, having been already discussed in Committee of Supply, and being open to further discussion on the third reading of the Appropriation Bill," he thought that the item could not be discussed on the third reading of the Appropriation Bill, and he had not sufficient information as to the proceedings in Supply to rule the motion out of order, 577.		
RULINGS OF DEPUTY-SPEAKER:—		
That motion for adjournment of the House in reference to legalising certain Municipalities did not deal with the subject embodied in the Municipalities (Amendment) Bill, and was in order, 610.		
That certain clauses in the Municipalities (Incorporation Validating) Bill was not beyond the Order of Leave, 610.		
That the requirements of the Public Works Act had been complied with on motion to refer the work "High-level Bridge over the Hawkesbury River at Richmond" to the Public Works Committee, 615.		
DISSENT TO RULING:—

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT.

(IMPERIAL ACT, 63 & 64 VICT., CH. 12.)

Printed under No. 10 Report from Printing Committee, 30 August, 1900.

CHAPTER 12.

An Act to constitute the Commonwealth of Australia.

A.D. 1900.

[9th July, 1900.]

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established :

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen :

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :—

1. This Act may be cited as "The Commonwealth of Australia Short title. Constitution Act."

2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom. Act to extend to the Queen's successors.

3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of "The Commonwealth of Australia." But the Queen may, at any time after the Proclamation, appoint a Governor-General for the Commonwealth. Proclamation of Commonwealth.

A.D. 1900.
Commencement
of Act.

4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect on and after the day so appointed. But the Parliaments of the several Colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.

Operation of
the Constitution
and laws.

5. This Act, and all laws made by The Parliament of the Commonwealth under the Constitution, shall be binding on the Courts, Judges, and people, of every State, and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.

Definition.

6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.

"The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the Northern Territory of South Australia, as for the time being are parts of the Commonwealth, and such Colonies or Territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called a "State."

"Original States" shall mean such States as are parts of the Commonwealth at its establishment.

Repeal of Federal
Council Act.
48 & 49 Vict. c. 60.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by The Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

Application of
Colonial Boundaries
Act.
58 & 59 Vict. c. 34.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

Constitution.

9. The Constitution of the Commonwealth shall be as follows:—

THE CONSTITUTION.

This Constitution is divided as follows:—

CHAPTER I.—THE PARLIAMENT:

PART I.—General:

PART II.—The Senate:

PART III.—The House of Representatives:

PART IV.—Both Houses of The Parliament:

PART V.—Powers of The Parliament:

CHAPTER II.—THE EXECUTIVE GOVERNMENT.

CHAPTER III.—THE JUDICATURE:

CHAPTER IV.—FINANCE AND TRADE:

CHAPTER V.—THE STATES:

CHAPTER VI.—NEW STATES:

CHAPTER VII.—MISCELLANEOUS:

CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

THE SCHEDULE.

CHAPTER

CHAPTER I.
THE PARLIAMENT.
PART I.—GENERAL.

A.D. 1900.
CHAPTER I.
THE PARLIAMENT.
PART I.
GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament," or "The Parliament of the Commonwealth."

Legislative power.

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

Governor-General.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

Salary of Governor-General.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

Provisions relating to Governor-General.

5. The Governor-General may appoint such times for holding the sessions of The Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue The Parliament, and may in like manner dissolve the House of Representatives.

Sessions of Parliament.
Prorogation and dissolution.

After any general election The Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

Summoning Parliament.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

First Session.

6. There shall be a session of The Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of The Parliament in one session and its first sitting in the next session.

Yearly Session of Parliament.

PART II.—THE SENATE.

PART II.
THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until The Parliament otherwise provides, as one electorate.

The Senate.

But until the Parliament of the Commonwealth otherwise provides the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until The Parliament otherwise provides, there shall be six senators for each Original State. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by The Parliament, as the qualification for electors of members of the House of Representatives, but in the choosing of senators each elector shall vote only once.

Qualification of electors.

- A.D. 1900.
- Method of election of senators.** **9.** The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.
- Times and places.** The Parliament of a State may make laws for determining the times and places of elections of senators for the State.
- Application of State laws.** **10.** Until The Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.
- Failure to choose senators.** **11.** The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.
- Issue of writs.** **12.** The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.
- Rotation of senators.** **13.** As soon as may be after the Senate first meets and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable: and the places of the senators of the first class shall become vacant at the expiration of the third year, and the places of those of the second class at the expiration of the sixth year, from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.
- The election to fill vacant places shall be made in the year at the expiration of which the places are to become vacant.
- For the purposes of this section the term of service of a senator shall be taken to begin on the first day of January following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of January preceding the day of his election.
- Further provision for rotation.** **14.** Whenever the number of senators for a State is increased or diminished, The Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.
- Casual vacancies.** **15.** If the place of a senator becomes vacant before the expiration of his term of service the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.
- At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.
- The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.
- Qualifications of senator.** **16.** The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President. A.D. 1900.
Election of
President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence. Absence of
President.

19. A senator may, by writing, addressed to the President, or to the Governor-General if there is no President, or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant. Resignation of
senator.

20. The place of a senator shall become vacant if for two consecutive months of any session of The Parliament he, without the permission of the Senate, fails to attend the Senate. Vacancy by absence.

21. Whenever a vacancy happens in the Senate the President, or if there is no President, or if the President is absent from the Commonwealth, the Governor-General shall notify the same to the Governor of the State in the representation of which the vacancy has happened. Vacancy to be
notified.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers. Quorum.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative. Voting in Senate.

PART III.—THE HOUSE OF REPRESENTATIVES.

PART III. HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators. Constitution of
House of
Representatives.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until The Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- I. A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators.
- II. The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted. Provision as to races
disqualified from
voting.

A.D. 1900.
Representatives in
first Parliament.

26. Notwithstanding anything in section 24, the number of members to be chosen in each State at the first election shall be as follows :—

New South Wales	Twenty-three.
Victoria	Twenty.
Queensland... ..	Eight.
South Australia	Six.
Tasmania	Five.

Provided that if Western Australia is an Original State, the numbers shall be as follows :—

New South Wales	Twenty-six.
Victoria	Twenty-three.
Queensland... ..	Nine.
South Australia	Seven.
Western Australia... ..	Five.
Tasmania	Five.

Alteration of
number of members.

27. Subject to this Constitution, The Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

Duration of House
of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

Electoral divisions.

29. Until the Parliament of The Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

Qualification of
electors.

In the absence of other provision, each State shall be one electorate.

30. Until The Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of the Parliament of the State ; but in the choosing of members each elector shall vote only once.

Application of State
laws.

31. Until The Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

Writs for general
election.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives, or from the proclamation of a dissolution thereof.

Writs for vacancies.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker, or if he is absent from the Commonwealth, the Governor-General in Council may issue the writ.

Qualifications of
members.

34. Until The Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows :—

- I. He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen :
- II. He must be a subject of the Queen, either natural-born or for at least five years naturalised under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker. A.D. 1900.
Election of Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence. Absence of Speaker.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant. Resignation of member.

38. The place of a member shall become vacant if for two consecutive months of any session of The Parliament he, without the permission of the House, fails to attend the House. Vacancy by absence.

39. Until The Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers. Quorum.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting-vote. Voting in House of Representatives.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

PART IV. BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State, shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of The Parliament of the Commonwealth. Right of electors of States.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorised by him, an oath or affirmation of allegiance in the form set forth in the Schedule to this Constitution. Oath or affirmation of allegiance.

43. A member of either House of The Parliament shall be incapable of being chosen or of sitting as a member of the other House. Member of one House ineligible for other.

44. Any person who—

Disqualification.

- i. Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power : or
- ii. Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer : or
- iii. Is an undischarged bankrupt or insolvent : or
- iv. Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth : or
- v. Has any direct or indirect pecuniary interest in any agreement with the public service of the Commonwealth, otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons :

shall be incapable of being chosen or of sitting as a senator or as a member of the House of Representatives.

But

A.D. 1900.

But subsection IV does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

Vacancy on
happening of
disqualification.

45. If a senator or member of the House of Representatives—

- I. Becomes subject to any of the disabilities mentioned in the last preceding section : or
 - II. Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors : or
 - III. Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in The Parliament to any person or State :
- his place shall thereupon become vacant.

Penalty for sitting
when disqualified.

46. Until The Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

Disputed elections.

47. Until The Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of The Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

Allowance to
members.

48. Until The Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of Four Hundred Pounds a year, to be reckoned from the day on which he takes his seat.

Privileges, &c., of
Houses.

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by The Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

Rules and orders.

50. Each House of The Parliament may make rules and orders with respect to—

- I. The mode in which its powers, privileges, and immunities may be exercised and upheld :
- II. The order and conduct of its business and proceedings either separately or jointly with the other House.

PART V.
POWERS OF THE
PARLIAMENT.

Legislative powers
of The Parliament.

PART V.—POWERS OF THE PARLIAMENT.

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth, with respect to :—

- I. Trade and commerce with other countries, and among the States :
- II. Taxation ; but so as not to discriminate between States or parts of States :
- III. Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth :
- IV. Borrowing money on the public credit of the Commonwealth :
- V. Postal, telegraphic, telephonic, and other like services :
- VI. The naval and military defence of the Commonwealth and of the several States and the control of the forces to execute and maintain the laws of the Commonwealth :
- VII. Light-houses, light-ships, beacons, and buoys :

VIII.

A.D. 1900.

- VIII. Astronomical and meteorological observations :
- IX. Quarantine :
- X. Fisheries in Australian waters beyond territorial limits :
- XI. Census and statistics :
- XII. Currency, coinage, and legal tender :
- XIII. Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money :
- XIV. Insurance, other than State Insurance ; also State Insurance extending beyond the limits of the State concerned :
- XV. Weights and measures :
- XVI. Bills of exchange and promissory notes :
- XVII. Bankruptcy and insolvency :
- XVIII. Copyrights, patents of inventions and designs, and trade-marks :
- XIX. Naturalization and aliens :
- XX. Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth :
- XXI. Marriage :
- XXII. Divorce and matrimonial causes ; and in relation thereto, parental rights, and the custody and guardianship of infants :
- XXIII. Invalid and old-age pensions :
- XXIV. The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States :
- XXV. The recognition throughout the Commonwealth of the laws, the public acts and records, and the judicial proceedings of the States :
- XXVI. The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws :
- XXVII. Immigration and emigration :
- XXVIII. The influx of criminals :
- XXIX. External affairs :
- XXX. The relations of the Commonwealth with the islands of the Pacific :
- XXXI. The acquisition of property on just terms from any State or person for any purpose in respect of which The Parliament has power to make laws :
- XXXII. The control of railways with respect to transport for the naval and military purposes of the Commonwealth :
- XXXIII. The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State :
- XXXIV. Railway construction and extension in any State with the consent of that State :
- XXXV. Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State :
- XXXVI. Matters in respect of which this Constitution makes provision until The Parliament otherwise provides :
- XXXVII. Matters referred to The Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law :
- XXXVIII. The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia :
- XXXIX. Matters incidental to the execution of any power vested by this Constitution in The Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

A.D. 1900.

Exclusive powers of
The Parliament.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- I. The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes :
- II. Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth :
- III. Other matters declared by this Constitution to be within the exclusive power of The Parliament.

Powers of the
Houses in respect
of legislation.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licenses, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may if it thinks fit make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

Appropriation Bills.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

Tax Bills.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only ; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

Recommendation of
money votes.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

Disagreement
between the Houses.

57. If the House of Representatives passes any proposed law and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which

the

the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

A.D. 1900.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of The Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

Royal assent to Bills.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

Recommendations by Governor-General.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General, by speech or message to each of the Houses of The Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

Disallowance by the Queen.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of The Parliament, or by Proclamation, that it has received the Queen's assent.

Signification of Queen's pleasure on Bill reserved.

CHAPTER II.

THE EXECUTIVE GOVERNMENT.

CHAPTER II. THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen, and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

Executive power.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

Federal Executive Council.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

Provisions referring to Governor-General.

64. The Governor-General may appoint officers to administer such Departments of State of the Commonwealth as the Governor-General in Council may establish.

Ministers of State.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After

A.D. 1900.	After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.
Ministers to sit in Parliament.	
Number of Ministers.	65. Until The Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as The Parliament prescribes, or, in the absence of provision, as the Governor-General directs.
Salaries of Ministers.	66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until The Parliament otherwise provides, shall not exceed twelve thousand pounds a year.
Appointment of civil servants.	67. Until The Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.
Command of naval and military forces.	68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.
Transfer of certain departments.	69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth, the following departments of the public service in each State shall become transferred to the Commonwealth :— Posts, telegraphs, and telephones : Naval and military defence : Light-houses, light-ships, beacons, and buoys : Quarantine. But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.
Certain powers of Governors to vest in Governor-General.	70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a colony, or in the Governor of a colony with the advice of his Executive Council, or in any authority of a colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

CHAPTER III.
THE JUDICATURE.

CHAPTER III.
THE JUDICATURE.

Judicial power and Courts.	71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as The Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as The Parliament prescribes.
Judges' appointment, tenure, and remuneration.	72. The Justices of the High Court and of the other courts created by the Parliament : I. Shall be appointed by the Governor-General in Council ; II. Shall not be removed except by the Governor-General in Council, on an Address from both Houses of The Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity ; III. Shall receive such remuneration as The Parliament may fix ; but the remuneration shall not be diminished during their continuance in office.

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as The Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences : A.D. 1900
Appellate jurisdiction of High Court.

- I. Of any Justice or Justices exercising the original jurisdiction of the High Court :
- II. Of any other federal court, or court exercising federal jurisdiction : or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth, an appeal lies to the Queen in Council :
- III. Of the Inter-State Commission, but as to questions of law only : and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by The Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until The Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits inter se of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits inter se of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council. Appeal to Queen in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise, by virtue of Her Royal Prerogative, to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

- I. Arising under any treaty :
 - II. Affecting consuls, or other representatives of other countries :
 - III. In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party :
 - IV. Between States, or between residents of different States, or between a State and a resident of another State :
 - V. In which a writ of *mandamus* or prohibition or an injunction is sought against an officer of the Commonwealth :
- the High Court shall have original jurisdiction. Original jurisdiction of High Court.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter— Additional original jurisdiction.

- I. Arising under this Constitution, or involving its interpretation :
- II. Arising under any laws made by The Parliament :
- III. Of admiralty and maritime jurisdiction :
- IV. Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections, The Parliament may make laws— Power to define jurisdiction.

- I. Defining the jurisdiction of any federal court other than the High Court :

II.

A.D. 1900.	II. Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is vested in the courts of the States :
Proceedings against Commonwealth or State.	III. Investing any court of a State with federal jurisdiction. 78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.
Number of judges.	79. The federal jurisdiction of any court may be exercised by such number of judges as The Parliament prescribes.
Trial by jury.	80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as The Parliament prescribes.

CHAPTER IV.
FINANCE AND
TRADE.

CHAPTER IV.
FINANCE AND TRADE.

Consolidated Revenue Fund.	81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.
Expenditure charged thereon.	82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon ; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.
Money to be appropriated by law.	83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law. But until the expiration of one month after the first meeting of The Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for The Parliament.
Transfer of officers.	84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth. Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation payable under the law of the State on the abolition of his office. Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth ; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer. Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof,

thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

A.D. 1900.

85. When any department of the public service of a State is transferred to the Commonwealth— Transfer of property of State.

- I. All property of the State, of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary.
- II. The Commonwealth may acquire any property of the State, of any kind, used, but not exclusively used, in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth.
- III. The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by The Parliament.
- IV. The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth, and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise, not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth. Uniform duties of customs.

89. Until the imposition of uniform duties of customs—

- I. The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth. Payment to States before uniform duties.
- II. The Commonwealth shall debit to each State—
 - (a) the expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth.
 - (b) the proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- III. The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of The Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive. Exclusive power over customs, excise, and bounties.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect;

- A.D. 1900.
- effect ; but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.
- Exceptions as to bounties.
91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of The Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.
- Trade within the Commonwealth to be free.
92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.
- But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.
- Payment to States for five years after uniform Tariffs.
93. During the first five years after the imposition of uniform duties of customs, and thereafter until The Parliament otherwise provides :—
- I. The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State :
 - II. Subject to the last subsection, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.
- Distribution of surplus.
94. After five years from the imposition of uniform duties of customs, The Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.
- Customs duties of Western Australia.
95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth ; and such duties shall be collected by the Commonwealth.
- But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.
- If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.
- Financial assistance to States.
96. During a period of ten years after the establishment of the Commonwealth and thereafter until The Parliament otherwise provides, The Parliament may grant financial assistance to any State on such terms and conditions as The Parliament thinks fit.
- Audit.
97. Until The Parliament otherwise provides, the laws in force in any colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the

the Government of the colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government, or an officer of the Commonwealth, were mentioned whenever the colony, or the Government, or an officer of the colony is mentioned.

A.D. 1900.

98. The power of The Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State. Trade and commerce includes navigation and State railways.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof. Commonwealth not to give preference.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation. Nor abridge right to use water.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as The Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder. Inter-State Commission.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State: due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission. Parliament may forbid preferences by States.

103. The members of the Inter-State Commission—

- I. Shall be appointed by the Governor-General in Council :
- II. Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of The Parliament in the same Session praying for such removal on the ground of proved misbehaviour or incapacity :
- III. Shall receive such remuneration as The Parliament may fix ; but such remuneration shall not be diminished during their continuance in office.

Commissioners' appointment, tenure, and remuneration.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States. Saving of certain rates.

105. The Parliament may take over from the States their public debts as existing at the establishment of the Commonwealth, or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof ; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States. Taking over public debts of States.

A.D. 1900.

CHAPTER V.
THE STATES.CHAPTER V.
THE STATES.Saving of Constitu-
tions.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

Saving of powers of
State Parliaments.

107. Every power of the Parliament of a colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in The Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

Saving of State
laws.

108. Every law in force in a colony which has become or becomes a State, and relating to any matter within the powers of The Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by The Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the colony had until the colony became a State.

Inconsistency of
laws.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

Provisions referring
to Governor.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

States may surrender
territory.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

States may levy
charges for
inspection laws.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by The Parliament of the Commonwealth.

Intoxicating liquids.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage shall be subject to the laws of the State as if such liquids had been produced in the State.

States may not raise
forces.Taxation of property
of Commonwealth
or State.

114. A State shall not, without the consent of The Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth; nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

States not to coin
money.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

Commonwealth not
to legislate in respect
of religion.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

Rights of residents
in States.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

Recognition of laws,
&c, of States.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public acts and records, and the judicial proceedings, of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence. A.D. 1900.

Protection of States from invasion and violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and The Parliament of the Commonwealth may make laws to give effect to this provision. Custody of offenders against laws of the Commonwealth.

CHAPTER VI. NEW STATES.

CHAPTER VI. NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of The Parliament, as it thinks fit. New States may be admitted or established.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of The Parliament to the extent and on the terms which it thinks fit. Government of territories.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected. Alteration of limits of States.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected. Formation of new States.

CHAPTER VII. MISCELLANEOUS.

CHAPTER VII. MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by The Parliament and shall be within territory which shall have been granted to or acquired by the Commonwealth and shall be vested in and belong to the Commonwealth, and if New South Wales be an Original State shall be in that State and be distant not less than one hundred miles from Sydney. Seat of Government.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the seat of Government.

126. The Queen may authorise the Governor-General to appoint any person or any persons jointly or severally to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen, but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function. Power to Her Majesty to authorise Governor-General to appoint deputies.

127.

A.D. 1900.
Aborigines not to be
counted in reckoning
population.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

CHAPTER VIII.
ALTERATION OF
CONSTITUTION.

Mode of altering
the Constitution.

CHAPTER VIII.

ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of The Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it, or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors, the vote shall be taken in such manner as The Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of The Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

SCHEDULE.

OATH.

I, A.B., do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors, according to law. So HELP ME GOD!

AFFIRMATION.

I, A.B., do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors, according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

COMMISSION.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen,
Defender of the Faith, and so forth,—

To Our Trusty and Well-beloved—

ALEXANDER OLIVER, Esq., M.A., President of Our Land Appeal Court.

Greeting :—

KNOW YE, That We, reposing great trust and confidence in your ability, zeal, industry, discretion, and integrity, do, by these presents, authorise and appoint you to make full inquiry as to the suitability for the Seat of Government of the Commonwealth of Australia of such tracts or areas as you may be invited to consider, to inspect all or any of such sites as you may think fit, and, after public inquiries conducted in open Court by you, and the taking of evidence thereat touching the premises, to certify such evidence, or so much thereof as you may deem relevant to the inquiry, under your hand, and report to us the conclusions you shall have arrived at as the results of such inquiries and inspections, accompanied by such explanatory or illustrative plans, sketches, estimates, and other particulars as may be desirable in your opinion: And We do, by these presents, grant to you full power and authority to call before you all such persons as you may judge necessary, by whom you may be better informed of the truth in the premises, and to require the production of all such books, papers, writings, and all other documents as you may deem expedient, and to visit and inspect the same at the offices or places where the same or any of them may be deposited, and to inquire of the premises by all lawful ways and means: And Our further will and pleasure is that you do, within six months after the date of this Our Commission, certify to Us, in the Office of Our Colonial Treasurer, under your hand and seal, what you shall find touching the premises: And We hereby command all Public Officers and other persons whomsoever within Our Colony of New South Wales that they be assistant to you in the execution of this Commission: And We declare this Commission to be a Commission for all purposes of the Act 44 Victoria No. 1, intituled "*An Act to regulate the taking of evidence by Commissioners under the Great Seal*"—to take effect from the day of commencing duty.

In testimony whereof, We have caused these Our letters to be made Patent, and the Great Seal of Our said Colony of New South Wales to be hereunto affixed.

Witness Our Right Trusty and Right Well-beloved Cousin, WILLIAM, EARL BEAUCHAMP, Knight Commander of Our Most Distinguished Order of Saint Michael and Saint George, Our Governor and Commander-in-Chief of Our said Colony of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this fourteenth day of November, in the year of Our Lord one thousand eight hundred and ninety-nine, and in the sixty-third year of Our Reign.

BEAUCHAMP.

By His Excellency's Command,
JOHN SEE.

ENTERED on Record by me, in Register of Patents, No. 21, page 152, this fourteenth day of November, one thousand eight hundred and ninety-nine.

For the Colonial Secretary and Registrar of Records,—

CRITCHETT WALKER,
Principal Under Secretary.

ROYAL COMMISSION ON SITES FOR THE SEAT OF GOVERNMENT OF THE
COMMONWEALTH.

REPORT.

Part I.—Introductory.

To His Excellency the Right Honorable WILLIAM, EARL BEAUCHAMP,
Knight, Commander of the Most Distinguished Order of Saint Michael
and St. George, Governor and Commander-in-Chief of the Colony of
New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY :—

Before actively addressing myself to the execution of the Commission authorising and appointing me to make full inquiry as to the suitability for the Seat of Government of the Commonwealth of Australia of such tracts or areas as I might be invited to consider ; to inspect all or any of such Sites as I might think fit ; and, after public inquiries in open court, and the taking of evidence touching the premises, to certify such evidence, or so much thereof as I might deem relevant to the inquiry, and report to your Excellency the conclusions arrived at, as the results of such inspections and inquiries, I found myself faced by serious preliminary difficulties.

The first was a personal one, of a kind likely to strain the duty of allegiance to one's native State ; for it was clearly a paramount duty that I should endeavour to discharge my mind of every sentiment and symbol of bias in favour of that State, as well as of any disposition to favour the supposed interests or pretensions of its Capital. To the best of my power, and from the standpoint of a sincere federalist, I have done my best to consider the momentous questions involved in the Commission, solely as an Australian citizen, and with an eye striving to look to the future dimensions and requirements of the Australian Commonwealth, and not to the present and temporary advantages or disadvantages which the establishment of the Federal Territory and Seat of Government in any particular part of New South Wales might entail on that State or its metropolis.

My next difficulty was of a different kind, and arose from the vagueness of the 125th section of the Bill which has now become the Commonwealth of Australia Constitution Act, the text of that section being :—

“The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to, or acquired by, the Commonwealth, and shall be vested in and belong to the Commonwealth, and, if New South Wales be an Original State, shall be in that State, and be distant not less than one hundred miles from Sydney.

“Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

“If Victoria be an Original State, the Parliament shall sit at Melbourne until it meets at the Seat of Government.”

The 100 miles prohibition.

52 and 53 Vic., c. 63, sec. 34, with which compare Chorlton v. Lings, 4 L.R. C.P., p. 374.

1. Assuming that it is the Seat of Government, and not the Territory, which is to be distant from Sydney not less than 100 miles, the first point inviting consideration is whether distance from Sydney is to be measured in a direct line or by the nearest road ordinarily used in travelling. The Imperial method of measuring distances is "in a straight line on a horizontal plane," and, I believe, the Victorian Interpretation Act prescribes a similar method, while the statutory interpretation of distance in this Colony adopts the "nearest-road" principle in measuring distance from one point to another. I have always thought, and still think, that, among the reasons which might fairly be urged as indicating a "contrary intention" on the part of the framers of the Commonwealth Act within the meaning of the saving provided by the Statute cited in the margin, and of the saving contained in the 118th section of the Commonwealth Act, and for holding to our own method of measuring distance in our own State, are these;—that New South Wales is the State which cedes the Federal Territory in which the Seat of Government must be situated,—that the rigorous application of a method other than our own might have excluded some contemplated area otherwise suitable, and possibly neutralised all the advantages which the Commonwealth was intended to gain by the gift of "Crown lands" (an expression which must be interpreted by reference to local laws); and further, that the commercial aggrandisement of Sydney, against which it is presumed this prohibition must have been directed, would not be influenced one way or the other along radial or straight lines, but by the accustomed commercial routes,—which in most cases would be the Railways. But the generally accepted interpretation of this prohibition is that, as the Commonwealth Act is an Imperial Act, its enactments must be interpreted according to Imperial rules of interpretation.

2. Whatever be the right interpretation of the 100 mile prohibition, I have not thought any Site distant from Sydney more than 100 miles by the nearest road ordinarily used in travelling, though within that distance by the radial rule, to be, on that account alone, excluded from consideration.

3. But it happens that very few of the proposed sites lying within the radial or direct distance limit appear to offer any special advantages; and, therefore, this question of distance has not, so far, been productive of serious difficulty, except perhaps in the case of the Bathurst Site.

4. The sketch map (Appendix A) which accompanies this Report, prepared by Mr. E. Twynam, Chief Surveyor, Department of Lands, shows the excluding effect on some proposed Sites of the radial line of 100 miles, measured from the west boundary of the City of Sydney.

Grant or acquisition of territory.

5. Another difficulty was created in respect to the grant or acquisition of territory. The section declares that "the Seat of Government shall be within territory which shall have been granted to, or acquired by, the Commonwealth, and shall be vested in, and belong to the Commonwealth." Differences of opinion as to the meaning of these words date as far back as the passing of the Bill by the Parliament of New South Wales; and, in the course of my inspections and inquiries, I have been repeatedly asked to express an opinion whether the present owners of land lying within the selected territory will be dispossessed, subject to compensation for the value of the land resumed, or whether the provisions of the section will be satisfied by the mere withdrawal from New South Wales, and cession to the Commonwealth, of whatever area may be selected for the Federal Territory, the present owners being left undisturbed in their proprietary rights, but under a new landlord—the Commonwealth—and with a right to compensation for every acre within the selected area resumed for Commonwealth purposes.

6. Some legal authorities had already expressed an opinion that the quoted direction would be sufficiently complied with if this Colony divested herself of such territorial rights as she possessed at the time of withdrawal;—in other words, that the mere cession of the territorial area would carry out the requirements of the section in this respect. And as this opinion seemed to have strong support from considerations of cost, and to be in itself reasonable, it seemed to afford a satisfactory answer to the objections of those landed proprietors to whom the bare idea of dispossession, even with compensation, was distasteful. Moreover, when the improved values

values of land within the Municipal areas which were nearly always made the nuclei of proposed Federal Capital Sites, came to be known, the amount that would be required for their absolute resumption reached, in some cases, as much as, and in others more than, three-quarters of a million sterling—amounts which seemed altogether out of proportion to the adaptability of the sites for the purposes of the Seat of Government, because in very few cases, if any, would the streets or general design of an included city or town be found to fit in with the requirements of the Capital of the Commonwealth.

7. But, after giving this matter further consideration, I have come to the conclusion that it is open to very serious question whether the words of the section above quoted do not import, although they may not express, a statutory mandate to resume, and pay compensation for, the whole area to be acquired. What lands the Crown—*i.e.*, New South Wales—may own within the area to be selected, the section expressly declares “shall be granted to the Commonwealth without any payment therefor”—words which may be thought to imply that any resumed portion of land therein which does not belong to the Crown must be paid for, payment being the generally accepted form of compensation for the disturbance or destruction of proprietary rights.

8. The Statutory declaration that “the Seat of Government shall be within territory which shall have been granted to, or acquired by, the Commonwealth,” indicates two methods of creating the Federal Territory: (1) Grant, (2) Acquisition; but these may, it is supposed, be taken advantage of cumulatively as well as alternatively. The first method (Grant) would obviously be appropriate in the case of Crown lands within the Territory; indeed, it might have been in contemplation by the framer of the section that the Territory might contain nothing but Crown lands, so that the Commonwealth might acquire its entire Territory free of cost. The second method (Acquisition) may have been intended to include Purchase, as well as any mode of securing ownership other than “Grant.” If this view is correct, then the expression “Grant” would be applicable to the Crown lands (if any) within the Territory that New South Wales would have to make a gift of to the Commonwealth; while “Acquisition” would, as a general term, indicate methods of obtaining by purchase, &c., private or alienated land so situated.

Probable meaning of the words.

9. But as there are very few districts in New South Wales eligible for the selection of the Federal Territory which contain any considerable areas of good unalienated land, it becomes important to understand what is implied by the term “Acquisition” in its operation on the ownership of private land. If it means resumption, then there can, it would seem, be a “permanent” resumption with dispossession of the original owners, or a “provisional” resumption without actual dispossession, for the purpose of giving effect to the supposed intentions of the Act. Permanent resumptions might be necessary, and probably would be, to clear the ground for the laying-out of the Federal Capital building site, and its appurtenances, preparatory to the erection of the required buildings, but, for a large portion of the residuary area ceded to the Commonwealth, “provisional” resumption might be sufficient; and the Federal Act of Parliament to be passed to give effect to the provisions of the Commonwealth Act could provide that, notwithstanding resumption, all persons having estates or interests in lands within a resumed area should continue to hold the same subject to all powers conferred on the Commonwealth; and, in the event of permanent resumption of any such lands by the Commonwealth, that such persons should be entitled to compensation on the basis of the values of the resumed lands at the date of the issue of the Proclamation appointing the day for the establishment of the Commonwealth, or as on the 1st January, 1901. Tenants of such lands would attorn to the Commonwealth, but retain their holdings with the obligations and rights attaching thereto until “permanent” resumption; and, even then, it might be provided that resumption should, in certain cases, be effected without dispossession, eviction, or any other destructive result. This would, perhaps, give due effect to the permissive and discretionary power of resumption which the section, it is thought, intended to confer on the Federal Parliament.

Acquisition may imply provisional or permanent resumption.

10. The second paragraph of the section under consideration enacts that “the Territory shall contain an area of not less than 100 square miles” (= 64,000 acres); and the difficulty so often experienced in giving a just construction to statutory words

“Not less than 100 square miles.” Preferent right to enhanced values.

words defining a minimum quantity which do not also state or indicate a maximum limit is repeated in interpreting this paragraph. Do the words "not less than" standing, as they do, without any qualification import an unlimited discretion on the part of the State that gives, and the Commonwealth which accepts, to reciprocally give and take a much larger area than the minimum of 100 square miles—say, for example, 1,000 square miles, or even more?

11. Long before I had finished my visits of inspection, and before holding any Public Inquiry, the conviction was forced on me that 100 square miles would not be nearly enough for a Federal Territory; but as it was obvious that increase of the territory to be ceded to the Commonwealth would involve *prima facie* sacrifices on the part of the surrendering State, I was disposed to think that there ought to be no considerable excess over the prescribed minimum, and that, although 25 per cent. of excess might be permissible, the offer of an area much larger than that minimum was not contemplated by the framers of the enactment. Further consideration has made me abandon this opinion, and interpret the words cited with a leaning rather to a large and beneficial construction than to a construction based on an assumption that this combination of the old 25 square miles run blocks was meant to be the Australian equivalent of the District of Columbia, or to a construction anticipating on the part of New South Wales an indisposition to cede, even to a Partnership of which she would be so influential a Member, more than the Statutory minimum of her Territory, and whether with or without compensation.

12. The question of offering a much larger area to the Commonwealth than 100 square miles may be expected to turn upon the mutual benefit or loss that such a transaction might be expected to entail. To the Commonwealth, or Partnership of Australian States, the acquisition of a territory very much larger than the minimum area will, I am convinced, prove of inestimable benefit. As landlord, the Commonwealth will be able, either to sell choice blocks and frontages within the Federal City area, at more pounds sterling per foot than they cost per acre, or, if perpetual ground leasing be preferred, to dispose of them so as to assure a splendid annual income to the Commonwealth which created the enhanced values, while land suitable for suburban residences and for agriculture, mixed farming, agistment of stock, or other industries, should command prices, whether on sale or lease, that must return, at the very lowest estimate, from 50 to 200 per cent. on the original outlay.

13. No doubt a similar result, though on a much reduced scale, would follow, even if the Federal Territory were limited to 100 square miles; but it is difficult to believe that the area of enhanced value will not, in less than half a generation, cover a much larger tract than 100 square miles. Therefore, the potential area of enhanced value, or betterment, should be secured for Federal uses; and, as a business transaction, the larger that area is (within reasonable limits) the better for the Commonwealth. If a sufficient area be not so secured, whether resumption follows immediately or is deferred, it is clear that others than the creators of the betterment will gain by it and be the reapers of what they have not sown.

14. If it were necessary, the Commonwealth Act itself might be called as a witness in support of the power, if not of the expediency, of acquiring additional room for the operations of the partnership; for, among the powers conferred by section 51, subsection xxxi specifies "the acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws," and that power seems to be conferred, by the 52nd section, exclusively on the Commonwealth to legislate with respect to the Seat of Government and all places acquired by the Commonwealth for public purposes. Section 111 is the correlative of these enactments, for it enables the Parliament of a State to surrender any part of the State to the Commonwealth, whereupon, and upon acceptance by the Commonwealth, such part of the State becomes subject to the exclusive jurisdiction of the Commonwealth.

15. Subsection xxxi of section 51, by the words "on just terms," indicates the controlling condition of any such acquisition of property; and this condition should, I submit, be taken to have the effect of incorporating the accepted principles of compensation to private parties, and to the State affected by the loss of such property.

16. Upon the whole, therefore, the conviction is almost irresistible, that a timid adhesion to the 100 square miles minimum would not be in the best interests of the Commonwealth; and I have endeavoured in the Conclusions, in Part III, to give effect to that conviction in such a way as to afford the determining Authority an opportunity of acquiring either a very much enlarged area, or, in the alternative, of accepting the area as originally proposed, or any modification thereof.

17. Another question arising upon the interpretation of this section is, "What are the Crown lands which New South Wales must make a gift of to the Commonwealth?" ^{"What are Crown lands?"} It seems, at all events, clear that lands vested in Her Majesty and not permanently dedicated, or granted, or lawfully contracted to be granted (which is the definition of "Crown lands" in the "Crown Lands Act of 1884"), would be included; but it is doubtful whether that class of lands known as "Church and School Lands," which, for certain purposes, have by a recent Act of Parliament (the "Church and School Lands Act of 1897") been made Crown lands for the purposes of that Act, fall within the scope of the expression "Crown lands" as used in this section. A very large area of these "Church and School lands" has been converted under the Act cited, and is now held under various forms of tenure, including leases for long terms of years. This question becomes of importance in connection with such sites as contain large tracts of Church and School lands at present held under tenures which could not be destroyed without compensation. The question might also be raised whether Crown lands under lease or other tenure were meant to be included;—lands in respect of which compensation would have to be paid by the State to its tenants or licensees before it could make a gift of them to the Commonwealth. With respect to public highways of which the soil would in so many cases be held to be vested in Her Majesty, it is not, I think, a tenable contention that they are "Crown lands" within the meaning of this 125th section. It is, however, considered that the soil of navigable rivers, lakes, and lagoons, also the floor or bottom of any port, bay, or inlet, included within any proposed area would be "Crown lands" which must be given to the Commonwealth without payment. Upon the whole it seems to be a reasonable inference that the expression "Crown lands" in the section under consideration means "Vacant Crown Lands."

18. Further, this section raises the question whether, in the event of compensation to private owners following resumption, the State which loses so large an area of its territory (in all cases more or less highly improved), and therefore of its taxable lands and inhabitants, is to be compensated for that loss? ^{Compensation and its basis.} It is a question which arises in connection with the estimated cost of establishing the Seat of Government—whether more than 64,000 acres be offered or not. It is to be observed that one of the exclusive powers with which the Parliament of the Federation has been invested is to legislate for the peace, order, and good government of the Commonwealth with respect to the Seat of Government and all places acquired by the Commonwealth for public purposes; and section 51, already referred to, among the various powers therein enumerated, specifies (xxxI) "the acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws."

19. If, then, there is reason to believe that the "good government of the Commonwealth" may be legitimately promoted by permitting it to occupy the position of landlord of a much greater area than 64,000 acres, provided the acquisition of that area be made "upon just terms" to the surrendering State, it would seem to follow that the interpretation of this section should be that which attaches to every resumption of private lands—the obligation of compensating, first, the private owners for deprivation of estate, and, next, the surrendering State for whatever losses it will sustain consequent on such resumption. These latter losses may be roughly stated as follows:—

1. Loss of revenue obtained from taxation of lands included within the ceded area.
2. Loss of revenue contributed by inhabitants paying income or any other tax, and resident within the ceded area.
3. Loss of roads, bridges, public buildings, and other State property within the ceded area.
4. Losses, other than as above specified, capable of pecuniary valuation, and consequent on the act of cession.

20. Against these losses it would seem only just to put, by way of reduction,—

1. Any relief to the ceding State from the annual outlay incurred in the maintenance of roads, bridges, and other public works taken over by the Commonwealth.
2. Any betterment, or enhancement of values which would enure to the benefit of the ceding State in respect of lands and other property outside the ceded territory and capable of pecuniary valuation.

21. A secondary question is whether, in the event of State compensation for loss of territory being allowed, the surrendering State as a constituent member of the Commonwealth should be required to contribute its quota to the amount of compensation to be determined? But the determination of this question would depend much upon the position of the selected Site, and whether or not the cession of that Site will create a betterment area, and, if so, to what extent, within the limits of the surrendering State.

Location of
site of
Federal terri-
tory.
Circular
inviting
proposals.
Inspections.
Public in-
quiries.

22. The location of the Federal territory, with respect to the position of the constituent States of the Commonwealth, next claims attention. In the absence of any provision in the Statute bearing on this subject it appeared to be a reasonable course to invite, by advertisement in the principal country papers, proposals from such places in any part of New South Wales (not being within the proscribed area) as might be thought by residents and others to offer suitable Sites for the purposes in view.

This was done, and an unexpectedly large number of responses followed. The list includes the following places :—

Eden.	Orange.
Yass.	Wellington.
Howlong.	Bombala-Eden (Southern Monaro).
Albury.	Goulburn.
Carcoar.	Bemboka.
Queanbeyan.	Young.
Barber's Creek.	Hay.
Corowa.	Inverell.
Cootamundra.	Braidwood.
Wagga Wagga.	Port Stephens.
Murrumburrah.	Bellingen (Don Dorrigo).
Tumut.	Moss Vale.
Nowra (Sassafras).	Tenterfield.
Rylstone.	Delegate.
Tumbarumba.	Buckley's Crossing.
Molong.	Wentworth.
Glen Innes.	Forest Reefs (Millthorpe).
Armidale.	Junee.
Bathurst.	Towrang.
Mt. Clarence.	Bowna.

Circulars.

23. Circulars were, without delay, despatched to the various Associations, and persons, proposing these Sites, asking for detailed information under the heads, and embracing the subjects, specified in the accompanying Form.

PROPOSED SITES FOR THE FEDERAL CAPITAL.

Persons desirous of bringing under the notice of the Commissioner any area containing 64,000 acres, as a suitable Site for the Federal Capital, are invited to forward their suggestions in writing, addressed to the "Registrar of Land Appeal Court, Sydney."

Such communications should afford as full and accurate information on the subjects hereunder set forth as can be obtained.

I. CLIMATIC CONDITIONS.

- (a) Range and mean of temperature during each quarter of the year, beginning with January.
- (b) Altitude above sea level, and mean altitude of the area as a whole.
- (c) Rainfall.

II. ACCESSIBILITY.

- (a) By railway (existing or to be constructed).
- (b) By road.
- (c) By water.

The conditions under this head should deal with the approaches to any proposed Site as from the several constituent States of the Commonwealth, and distances in miles from approximate centres of area to the Capital Cities of such States should be given.

III. PHYSICAL CONDITIONS.

- (a) Nature of soil.
- (b) Water supply and catchment.
- (c) The possession of, or proximity to, stone, timber, and other material.
- (d) Drainage.
- (e) Other physical features.

IV. OWNERSHIP AND VALUE.

- (a) Area of alienated or private lands.
- (b) Area of Crown lands (including Church and School lands, reserves, &c).
- (c) Estimated value of private lands (unimproved).
- (d) Estimated value of private lands (with existing improvements).

V. MISCELLANEOUS CONDITIONS, &c.

- (a) Character of neighbouring country, having regard to :—
 1. Facilities for food supply.
 2. Mineral products ;—especially coal.
 3. Capacity to support a considerable population.
 4. Conditions favourable to commercial and industrial development.

The Commissioner will subsequently appoint times and places for the holding of public inquiries, at which evidence will be taken, and due notice by letter will be given to persons who may intimate their wish to give evidence, as well as by advertisement in the local newspapers.

Land Appeal Court, Darlinghurst,
23rd October, 1899.

24. It will be seen by reference to the list of Sites submitted for inspection, prefixed to this Report, that out of the total number of Sites proposed for the Federal Territory, twenty-three have been inspected,—some of them as many as three times.

The following is an alphabetical list of the Sites that have been inspected :—

Albury	Goulburn
Barber's Creek	Molong
Bathurst	Moss Vale
Bemboka	Murrumburrah
Bombala—Eden (Southern Monaro)	Orange
Braidwood	Queanbeyan
Buckley's Crossing	Tumut
Carcoar	Wagga Wagga
Cootamundra	Wellington
Corowa	Yass
Delegate	Young.
Forest Reefs (Millthorpe)	

25. At fourteen out of this list of twenty-three Sites Public Inquiries have been held pursuant to the terms of the Commission. These inquiries have, in nearly every case, been held at the Court-houses, and always so as to suit the convenience of the promoting Committees or Leagues, who sometimes found great difficulty in procuring the punctual attendance of their witnesses. The evidence at these inquiries was taken on oath. The witnesses were examined, in the first instance by the

the Commissioner, and afterwards by any person present who expressed a desire to do so. So much of their evidence as appeared to be in any way relevant to the subject of inquiry has been taken down in the form of depositions by the Secretary to the Commission, and certified Summaries of that evidence accompany this Report. The original depositions are retained in the Office of the Colonial Secretary.

The central force of populations. Grouping of Sites.

26. It will be seen that no inspection or public inquiry has been held for proposed Sites lying north of the Main Western Railway Line. For adopting this course excluding, as it does, at least seven proposed Sites lying north of that line of demarcation, I must accept the sole responsibility. In the absence of any direction contained in the Commonwealth Act, it seemed reasonable to give effect to the attractive force of the denser populations. No point in New South Wales is equidistant, or even approximately equidistant, either from the respective Capitals or from the denser populations of the constituent States. It followed, therefore, that inquiries under the Commission should be limited to such Sites as could be shown to be fairly accessible by the ordinary lines of communication to the most densely peopled parts of those States. This criterion appears, according to existing statistics, to exclude all Sites lying much to the north of the Railway from Sydney to Bourke. The population located south of the Main Western Line, as prolonged across the Continent or extended to Port Darwin, is estimated by the Government Statistician at 2,714,105 against 1,003,625 residing north of that line; and if, instead of the Main Western Line as prolonged, the 33° parallel of south latitude be adopted as the line of demarcation, the same authority estimates the population resident south of that line at 2,588,725 as against 1,129,005 resident north. (See Annexure marked A.) So that whichever of these lines of bisection be taken, the southern population is much in excess of the northern. At the same time, it must be admitted that the adoption of this method would not have been justified if any Site lying northward of either line had been, or could be, pointed out, which collected all the features of suitability for a Federal Territory in a higher or more assured degree than any of the Southern Sites. But no such Site has been pointed out.

27. This Report will, therefore, deal only with such Sites as are situated South of the Main Western Line, and these will be divided into three groups:—

- (1.) Those lying along, or in the immediate vicinity of, the Bathurst to Bourke Railway.
- (2.) Those lying along, or in the immediate vicinity of, the Goulburn to Albury Railway.
- (3.) Those lying along, or in the immediate vicinity of, the Goulburn to Cooma Railway, and its prolongation to the Victorian Border, at or near Delegate.

For brevity, these three groups of Sites will be referred to as (1) Western Sites; (2) South-western Sites; (3) Southern Sites; and their distribution is shown in the appended table:—

WESTERN SITES.	SOUTH-WESTERN SITES.	SOUTHERN SITES.
Bathurst Carcoar-Garland Forest Reefs (Millthorpe) Molong Orange (Canobolas) Wellington	Albury Cootamundra Corowa Goulburn Murrumburrah Tumut Wagga Wagga Yass Young	Barber's Creek Bemboka Bombala-Eden (Southern Monaro) Braidwood Buckley's Crossing Delegate Moss Vale Queanbeyan

Part II.—Conclusions: Review of determining factors, &c.

28. In approaching a task, the difficulty and importance of which may be allowed to speak for themselves, I need hardly say that my humble efforts to fulfil it will claim a large measure of toleration.

Conditions
and con-
siderations
that should
determine
conclusions.

Your Excellency's Commission authorised inquiries specifically "as to the suitability for the Seat of Government of the Commonwealth of Australia of such tracts or areas as might be proposed for consideration"; but, in order to locate the Site of the Seat of Government, it was necessary, as a first step, to determine—at least, approximately—the Federal Territory which should include that Site. The attempt to do this has somewhat enlarged the scope both of the Inquiries and the Conclusions, but, it is hoped, not superfluously.

I have throughout endeavoured to keep in view the governing conditions for a Federal Territory and Capital for Australia, rather than what were considered necessary conditions by those who established the District of Columbia, with its Capital of Washington, or, at a later date, the Dominion Capital of Ottawa. The choice of our Federal Territory and Seat of Government seemed to invite special consideration, not only because of our special political characteristics, but for important topographical and physical reasons, as well as for reasons connected with the nature and extent of the Federal ownership of whatever Territory is to be ceded by New South Wales.

29. In the first place, as mentioned in an earlier part of the Report, it seemed a reasonable and convenient course to adopt the accepted routes of internal communication, both in New South Wales and the other States of the Commonwealth (Tasmania alone excepted, as being an island State), for determining the lines of accessibility to the Federal Territory as between all the States. Indeed, in the far greater number of Sites submitted for inspection, it was found that the railways, or their expected extensions or connections, were the chief influence in determining the proposal of those Sites. "Accessibility," therefore, has been considered mainly in connection with, and as determined by, the three principal Railway Routes specified in paragraph 27.

30. To attach values to the various factors of suitability commensurate with their importance would be a most difficult, if indeed it be a feasible, undertaking. The possession, however, of such sources of Water Supply, preferably by gravitation, as should be sufficient for the service of a population estimated to reach 40,000 within a generation, has throughout been considered rather as a condition precedent, or *sine quâ non*, than as a feature or point to which varying values might be attached.

31. The figures, 40,000, were assumed, for various reasons, one of which was that the population of Ballarat (in Victoria) seemed to afford a fair guide to what might be expected of the Federal Capital. But the certainty of expansion has always been kept in view, and there is nothing unreasonable in predicting for our Capital a population equalling, within the period above indicated, that of Ottawa at the present time (about 45,000). The possession, then, of ample water resources has been put prominently in the foreground, and this will hardly be regarded as without justification by those who consider what a sequence of drought years, such as those we have just passed through, might mean for a large inland population dependant on a precarious water supply.

32. It is, of course, beyond dispute that water supply is a matter largely within the combined forces of engineering and money; on the other hand, it seemed equally beyond dispute that a distinct physical advantage in the matter of water resources possessed by any particular Site without making any considerable demand on the Federal Treasury should be placed to the credit of that Site, especially when the supply was shown to be procurable within territorial limits.

33. In connection with this most important subject of Water Resources it is necessary to bear in mind;—(1) That an ample water supply will be needed for the large body of artisans (perhaps not fewer than from 2,000 to 4,000) who will be quartered for years on, or near, the spot selected for the Federal Capital. For ordinary domestic and sanitary, to say nothing of building, purposes, this large

contingent must be accommodated with the necessary supplies of water from the start, and not many of the proposed sites can be said to command the requisite facilities to give that accommodation without large preliminary expenditure and great delay; (2) That the Site selected for the Federal Capital must depend in a large measure on the Scheme of Water Supply, especially when that is a gravitation scheme; or, in other words, the Water Factor should locate the Building Site, and not *vice versa*.

34. It so happened that, during the summer and autumnal months of 1899–1900, when most of the proposed Sites were examined, New South Wales was passing through one of the severest series of drought years ever recorded, when almost all its streams had shrunk, and some had altogether ceased to flow, and many of its lakes and springs had dried up. The period of inspection was, therefore, well chosen for the purpose of seeing the country at its worst; and, partly as a result of these discouraging conditions, it very soon became manifest that no reliance could be placed on the assurance of abundant water supply so freely hazarded by the various promoters of Sites. The assistance of expert officers of the Water Conservation Branch of the Department of Works was, therefore, solicited, and, by the courtesy of the Minister in charge and the principal officers, of that Department, competent persons were detached for the examination of the most promising Sites, and their reports, to which attention is invited, will be found among the Annexures, General and Special.

35. The streams of New South Wales, whether as to permanency, volume, or other features, do not give much encouragement to those who would prefer the employment in the Federal Capital of water rather than steam as a motive power for trams, platform lifts, and other services; but there is reason to believe that, in a few instances, they could be used for the generation of hydraulic and electric power, though to what extent we have, at present, no sufficient guide. Perhaps the surplus overflow of the Murrumbidgee at the proposed Barren Jack Weir, or of the Snowy River above Buckley's Crossing, might supply such power in a limited degree.

36. In regard to "Climatic conditions," it seemed to be generally recognised, as an almost indispensable condition in the selection of the future Seat of Government, that, in the interests of the Commonwealth at large, some area within New South Wales should, if possible, be chosen which, by reason of its elevation, its rainfall, and its position with respect to the neighbouring country, could lay claim to an equable temperature, so far as such a condition can be secured; by reason of its distance from the sea coast should be exempt from the depressing influences associated with moist sea breezes; and, as a general result of these and other conditions, should assure a healthy and bracing climate to the various classes of the body politic whose home—for some during the entire year, for others during a more or less lengthened period—will be at the seat of Government.

37. It has been impossible to predict the times or seasons when the Federal Sessions will be held; but the controlling factor in the choice of a climate ought not, it is thought, to be the convenience of any one class, but the welfare of the inhabitants as a community. General convenience points directly to an invigorating climate, within limits of temperature excluding the sultry summer and autumnal heat of low-lying country on the one hand, and, on the other, those chilling, boisterous winds that sweep some of our plateaux with such force and severity that even the indigenous forest trees are unable to withstand their violence. And here I may be permitted to say that one of the principal reasons which have induced me to throw out some Sites situated on important rivers, and possessing attractive features in regard to accessibility and otherwise, has been their comparatively small elevation above sea level. It may be asked—Why, then, were inspections and public inquiries held for these low-lying Sites? The answer is, that the authorities with whom rest the power and responsibility of finally determining the Site for the Federal Territory, may repudiate the conditions which seemed to me indispensable. Evidence, therefore, has been collected in the interests of such low-lying areas as seemed in other respects to deserve consideration.

38. Although a position and importance subordinate to Water Resources have been assigned to Climate, a bracing recuperative climate may justly claim to be regarded, though in a secondary degree, as indispensable. By far the larger proportion of Australians are congested in seaport towns or on the coast districts, localities which, while they are supposed to ensure regular employment, and a regular sequence of amusements for all classes, and, in some cases, better prospects
for

for agricultural and dairying industries, have but little recuperative value generally, and for continuous residents none at all. Probably one of the best known correctives of the enervating effects of a warm moist temperature is a pure bracing mountain air, for "mountain air,"—the air of our more elevated tablelands and plateaux—is of itself at the same time a stimulant and a tonic without mischievous reagency on the system.

39. The area that can be afforded by New South Wales for the Federal Territory will hardly be enough to provide a tract of country sufficient for the restorative and reinvigorating purposes to which allusion has been made, but the larger the district that can be spared from our tablelands the better for the future of our people. I do not suppose that the establishment of the Federal Territory will interfere in any way with our Universities; but it must attract to itself the future Military School of the Commonwealth, and it must to a large extent draw to itself the encampments and evolutions of our Military Forces; for not only is the Commonwealth invested (by section 59 of the Statute) with the administration of Naval and Military Defence, but, by section 114, "No State, without the consent of the Commonwealth, may raise or maintain any Naval or Military Force"; and, by section 219, the duty of protecting every State against invasion, and, with the consent of the Executive of that State, against domestic violence, is imposed on the Commonwealth—powers which, apart from any other transfers of State authorities, imply the possession by the Commonwealth, at the seat of Government of the necessary material, executive and administrative. From these and similar considerations it follows that our Federal Territory should, if it be possible, be both the sanatorium and nerve centre of the Nation.

40. To the factor of Accessibility, to which reference has been already made in this Report, a less value has been accorded than to Water Resources or Climate. And the fact that nowhere in New South Wales could a site for the Seat of Government be discovered equi-distant, or nearly equi-distant, from the capitals of the constituent States, at once indicated that Accessibility must become a matter of judicious compromise; and that the leading principle of such compromise should be the selection of a site not situate in such a position relatively to the two States which were the principal parties to the compromise, as well as to the other States whose communications with the seat of Government must, of necessity, be through the territories of those two States, as to offend the Federal sentiment of what may be called topographical justice. This sentiment was tersely expressed by a witness who said, "*There ought to be a fair deal.*"

41. It has been contended that the compromise of which the 125th section is the result points primarily or by implication to a site as near as possible to, while just outside, the 100 mile prohibitory arc. The Statute gives no support to such a contention, and it is hardly reconcilable with the "fair deal" principle adverted to in the preceding paragraph. On the other hand, a pedantic adhesion to mileage equi-distance along the South-Western Trunk Railway, would result in the selection of a Site somewhere between Cootamundra and Wagga Wagga, which, in respect to Water Resources and Climate, would not be desirable.

42. As no working or workable coal seams are at present known to exist outside the prohibited area of 100 miles from Sydney, it was not expected that any of the proposed Sites could be shown to possess the advantages derived from local coal resources, unless in the way of such proximity to coal as is claimed by Bathurst and Orange in connection with Lithgow, and by Goulburn in connection with Bundanoon, coal. But in the case of the Bombala-Eden Site, the only one which gives promise of a port always accessible to vessels of considerable tonnage, the carriage of coal by sea from Newcastle or any southern port to Eden, and thence by rail to the Monaro Tableland, would make the relative cost of land and sea carriage of coal to the capital a very important question.

43. Of less practical importance is the possession of, or proximity to, deposits of good building stone and timber forests; because it is uncertain whether contractors would use local stone or timber in preference to Pymont stone and American timber, even if both could be obtained within a distance of (say) 50 miles from the building site; but, if cores brought to the surface by the diamond drill could be relied on as showing the suitability of rock deposits for building purposes, such tests would, undoubtedly, be of much use. As far as the evidence goes, it does not, in any case, appear to afford special promise of cheapening the cost of building by the use of local stone or timber.

44. The character of the Soil included within any proposed Site may, by some, be considered as only of secondary importance compared with Water Resources, Climate, and Accessibility; but, in view of the Federal Parliament deciding to accept the benefits and burdens attached to the ownership of a very large tract of country, the possession of a fertile unexhausted soil appears to be of considerable importance; and it must not be forgotten that a fertile soil is not always associated with a good Climate or with an ample Water Supply. If the Commonwealth goes into its inheritance with the intention of recouping itself for a proportion of the cost incurred in preparing the Seat of Government for occupation, the difference between a rich productive soil and a sterile waste would at once make its mark on the income derived by the landlord; while, for all purposes connected with the internal Commissariat, a district, the soil of which is capable of meeting all, or most of, the demands made on it for grain food, fodder, meat supply, and dairy products, should, it is thought, command marked attention. The nature of the soil also becomes of importance, in regard to its geological formation, from an architectural point of view. The extra cost incident to insecure or treacherous foundations may, perhaps, not be of great moment to the Commonwealth, but the existence of such foundations would detract greatly from the market value of building sites.

45. In connection with Land Values, the probable cost to the Commonwealth of acquiring large areas for which resumption values would have to be paid in case of dispossession of the owners, must indisputably exert a strong influence in the selection of a suitable site, even though that cost be borne ratably by the members of the Federation, and though the basis of valuation be determined as at the date of the assent to the Commonwealth Bill, or at the date of its establishment by proclamation, pursuant to the third section of the Statute. To some extent, perhaps, the estimates of land values, with existing improvements, for areas within or outside Municipal boundaries, which have been given in the Summaries, may act as a guide (approximately) to the cost of resumption, where resumption may be thought necessary. And if, instead of 100 square miles, 500, or even more be resumed, the probable cost per acre of the territory to be selected cannot be a matter of indifference, especially in connection with the fact that land in some districts has been valued at £3 per acre, or less, while in others it certainly could not be resumed under from £6 to £8 per acre on an average of the contents of the entire Site. Other elements of cost, besides cost of land, *e.g.*, railway connections, will be dealt with in comparing the relative advantages and disadvantages of the various Sites inspected.

46. That the future Seat of Government of the Australian Commonwealth should have a ground site possessing all the physical conditions, and features, desirable for a beautiful and commodious city—if these are within reach—is undeniable. To some extent the final selection of the building site might be made conditional on professional inspection and approval after such tests as may be necessary; but common sense alone would suggest a sufficient expanse of rolling down country facing eastward, free from severe gradients on the one hand, and from the monotony of large flat surfaces on the other, with a mountain background, and as many as possible of the adjuncts of an elevated plateau flanked by hills. Depressions should be avoided, or converted into artificial lakes, for which purpose the command of an ample water supply would be invaluable. A Site which could provide these advantages for building purposes would, most probably, also provide sufficient open spaces for purposes connected with Military parades and the manœuvres of troops, as well as for periodical encampments.

47. The same class of country could (at least, such has been the result of my inspections) furnish all land required for parks and other places of public recreation, while the vicinity of permanent streams stocked with fish, indigenous and acclimated, would attract the vacation rambler, the tourist, the artisan with a holiday, and the public generally for whom occasional picnicking is almost a necessary of life. On this head, but more particularly from an architectural standpoint, attention is invited to the Report furnished by Messrs. Mansfield, Vernon, Barlow, and Knibbs. (Annexure C.)

47. On all the heads that have been reviewed in the preceding paragraphs under this Part, there has been no lack of competition among the various Sites that have been inspected; but one Site appears to possess features of suitability with which no other Site is brought into competition. These will be fully considered when the Bombala-Eden, or Southern Monaro, Site is compared with rival Sites on the Southern Line.

Part III.—Conclusions.

(a) WESTERN SITES.

48. Although, perhaps, the water resources of Canobolas are inferior, in ^{Canobolas} regard both to catchment area and head for gravitation, to those of the Upper ^(or Orange) Campbell's River for Bathurst, yet there is evidence to support the conclusion that they are fairly sufficient for an assumed population of 40,000, and would be capable, by auxiliary storage, of supplying a still greater population. Moreover, the superior rainfall of Canobolas (as much as 14 inches greater than that of Bathurst), becomes an important factor when comparing the catchments of Canobolas and Bathurst; while the same may be said of the facilities possessed by this Site for providing an ample water supply for large bodies of workmen and others employed on buildings, &c.

49. The climate of Canobolas, from the superior altitude of its Site, and its position on the fall of the plateau toward the Great Western Plains, is preferable to that of any Western Site, and I believe that the comparatively high rainfall of Canobolas is climatically beneficial, and in no way injurious, to health.

50. The soil of Canobolas is, perhaps, superior to that of Wellington, and, acre for acre, certainly superior to the soil of Bathurst, the weathering and destruction of the Canobolas basalts and other igneous rocks producing a more distinctively and permanently fertile soil than is produced by the same natural processes on the granites, limestones, or slates. The soil of Millthorpe, as a whole, is perhaps a trifle better than that of Canobolas, and the rainfall is practically the same. Much of what is called the "Forest," resting on a diorite foundation, is perhaps wetter country than Canobolas, and its fertility, and vicinity to the last-named Site, are the principal reasons for its suggested inclusion in that Site.

51. In the matter of accessibility, Canobolas is only 47 miles farther by rail from Sydney than Bathurst is, and, considered from the standpoints of the Southern and South-western and Western States, *via* the Blayney-Harden connection, Canobolas and Bathurst are on about the same level. As between Canobolas and Wellington, the advantages are in favour of the former Site. As between Canobolas and the Sites lying between it and Blayney and Lyndhurst (Millthorpe and Carcoar-Garland), there is but little difference in respect of accessibility.

52. The coal and iron and other minerals of Lithgow are nearer to Bathurst than to Canobolas, but the difference in cost of carriage is not of much importance.

53. The Canobolas Site, resting on basalt over clays and diorite, would afford better foundations for heavy structures than the granitic clays and gravelly detritus of Bathurst.

54. Bathurst, by reason of its stretches of open down country, is more suitable for military evolutions, encampments, &c., than any other Western Site, but reasonably sufficient Sites for these purposes could be provided at Canobolas.

55. The convergence of the Blayney-Harden and Orange-Condobolin connection and extension combine to make Canobolas a better market and emporium for all kinds of produce (stock, of course, included) than either Bathurst or Wellington.

56. As a building site, the gently sloping, lightly timbered lands, lying between the railway line, about Bloomfield Platform and the foot hills of the Canobolas Mountains, are not excelled, even if they are matched, by any other Western Site. The Canobolas Mountains in the immediate background are a strikingly distinctive feature.

57. In respect to the possession of suitable building material, I am inclined to bracket all these Western Sites together; for in the absence of proved sandstone or freestone deposits, and of timber suitable for such buildings as will adorn the Federal Capital, Sydney sandstone and American and Canadian timbers will doubtless be resorted to; but it is at present impossible to say that the sandstone deposits at, and in the vicinity of, Lithgow may not, at certain depths, afford stone equal even to that of Pyrmont.

Land Values. 58. In regard to Land Values, the figures appended show the estimated cost of absolute resumption of the Western Sites as originally proposed :—

	£	s.	d.
<i>Canobolas</i> (Orange).—Improved value of 64,700 acres (less 10,800 acres of Crown lands) outside Municipal boundaries ...	365,000	0	0
Improved value of lands within Municipal boundaries...	592,426	0	0
Total	957,426	0	0
<i>Bathurst</i> .—Improved value of 64,000 acres outside Municipal boundaries (less 5,530 acres Crown lands) at £4 per acre...	233,880	0	0
Improved value of lands within Municipal boundaries...	913,184	0	0
Total	1,147,064	0	0
<i>Forest Reefs</i> (Millthorpe).—Improved value of 82,000 acres (less 50,640 acres Church and School lands = 31,360 acres) at £6 per acre(*)...	188,160	0	0
NOTE.—This valuation omits the cost of compensation in connection with Church and School lands held under lease, &c.			
<i>Wellington</i> .—Improved value of 91,500 acres outside Municipal boundaries (less 15,890 acres of Crown lands), at £3 per acre ...	226,830	0	0
Improved value of lands within Municipal boundaries...	167,535	10	0
Total	394,365	10	0
<i>Carcoar-Garland</i> .—As roughly estimated for the whole area, including Church and School lands, but excluding town of Carcoar ...	200,000	0	0
Or, at £3 per acre for 50,000 acres outside Municipal boundaries, and £35,000 for lands within those boundaries ...	185,000	0	0

59. Thus it will be seen that the cost of resuming private or alienated land within the Canobolas Site outside Municipal boundaries would be £365,000, as against £233,880 for the same class of land within the Bathurst Site—a difference of £131,120; and that the cost of similarly resuming lands (as improved) within Municipal boundaries would be for Canobolas £592,426, as against £913,184 for the same class of land within the Bathurst Site—a difference of £320,758. The resumption cost for the other principal Sites is shown in the last preceding paragraph, but, in some cases, the estimates are only rough approximations.

60. No evidence has been, or indeed could well be, given at the inquiries respecting the “loss” which may be expected to accrue to the State of New South Wales by reason of the cession of any tract by, or its withdrawal from, that State. Any such loss capable of pecuniary valuation would, therefore, form the subject of future consideration when the Commonwealth and the surrendering State have agreed as to the particular tract of country to be established as the Federal Territory, and as to the location of the Seat of Government within it.

61. It will be noted that the arc of the 100-mile radius, measured from the west boundary of the City of Sydney, cuts off a large part of the Bathurst Federal Territory Site and the entire Federal Capital Site (see Sketch Map, marked A, in Appendix). This result was not known when the inquiry was held at Bathurst, although it was thought by some witnesses that the Bathurst Site might be affected, to some extent, by the 100-miles radial limit.

62. The evidence in support of the Carcoar-Garland Scheme is almost wholly that of its promoter, Mr. Biddulph himself, and it must be at once admitted that the Site proposed by that gentleman has some conspicuous merits; but, as an independent scheme placed in competition with others on the Main Western Line, it seems to be inferior to some of them in regard to the character of the area selected for its Federal

(*) For particulars of holdings, formerly part of Church and School Estate, in the county of Bathurst, and within suggested extension of Canobolas Federal Territory, see Annexure 3 A (Orange Site).

Federal Capital Site, the fertility of its soil, its accessibility other than from the South, and its lack of specially attractive physical features; while, as compared with Bathurst, it lacks those extensive undulating downs which would be so useful for Military evolutions. But, although as an independent Site, Carcoar-Garland seems to me to be placed at a disadvantage as against other Western Sites, it, nevertheless, deserves serious consideration as supplying, with the Forest Reefs Site (Millthorpe), much of the area for extension of the Canobolas or Orange Site which I have suggested, or which may be adopted at any future time.

63. Upon a comparison of the "factors of suitability" possessed by the Wellington Site with those disclosed by other Sites situated on or about the Main Western Railway, the first apparent weakness of Wellington is in the matter of altitude, which at the railway station reaches only 996 feet above sea-level, and for the selected Site, as an average, about 1,200 feet. In the matter of Water Resources, although a pumping scheme might be relied on to supply the expected population (40,000), no gravitation scheme has been satisfactorily shown to be available. The Site is not well located in respect of accessibility, especially for the Southern and South-western States, and its connections North and West are at present only prospective. It lies at the outlet of a rather circumscribed, though beautiful, valley, and contains a rather large proportion of inferior country, and does not seem capable of expansion, except toward lower levels.

64. This Site was not specially inspected for the purposes of the Commission. The map of the Rylstone Site forwarded with the Report does not show the position of the Capital Site within the Territory Site; but even if it be admitted that a fairly suitable building site could be found in the neighbourhood of the township of Rylstone, and that, at some expense, a fair water supply from the Cudgegong River, or Cox's Creek, could be obtained, also that the Rylstone sandstones might furnish good stone for building purposes, still Rylstone has no claims on the score of accessibility, being situated 53 miles off the Main Western Railway (on the Wallerawang-Mudgee Line); or for the general fertility of a soil derived from formations partly sandstone, partly granitic; or for its capacity to support a large population; or for facilities in view of the enlargement of its area if more room is required for Commonwealth purposes. I would nevertheless, have, made an effort to specially inspect the Rylstone Site, even at the eleventh hour, but, on consideration, it appeared to be impossible to bring Rylstone into competition with several Western Sites; and, like Bathurst, though not in so great a degree, the Rylstone Site is intersected by the 100 mile arc. The Mount Clarence Site was not inspected, because it was within the prohibited distance however measured.

65. The conclusion I have arrived at, on a comparison of Western Sites, is that, whether as originally proposed, and as embracing an area of 64,700 acres, including 10,800 acres of Crown lands, or enlarged as suggested in paragraphs 11 to 14, and shown on the Plan of the Canobolas Extension Site (see Sketch Map, marked Q, in Appendix), so as to dedicate an area for the Federal Territory of about 883 square miles, (*) the Canobolas, or Orange Site, is the most promising that could be selected among all the Sites on, or in the immediate vicinity of, the Main Western Railway for the purpose of establishing therein the Seat of Government of the Commonwealth. (b)

(*) The boundaries of the suggested enlargement of the Canobolas Federal Territory Site, as given by Mr. H. A. Crouch, District Surveyor, Orange, are, approximately, as follow:—Area, about 565,500 acres; counties of Bathurst, Wellington, and Ashburnham. Commencing at the junction of the Murrumburrah-Blayney Railway Line with the Main Western Railway Line, and bounded thence north and east, passing along the suburban boundaries of Blayney to the south-east corner of W. Kemp's 640 acres, portion 23, parish of Torrens, county of Bathurst; thence north about 5½ miles, passing along the west boundary of King's Plains; thence west about 3 miles; thence north about 10¼ miles, passing about 1 mile east of Guyong to the south-east corner of Perrier's grant of 1,241 acres, parish of Freemantle, county of Bathurst; thence west about 6 miles to Emu Swamp Creek; thence northerly down that creek about 3 miles; thence west about 4½ miles to Frederick's Valley Creek, at the north-east corner of Blacket's 1,280 acres (Rosedale Estate), parish of March, county of Wellington; thence northerly down that creek to the crossing of Orange-Ophir Road (known as the Third Crossing); thence generally westerly through the parish of March, about 5½ miles to Nandillion Ponds Creek, at the south-west corner of Kite's 640 acres, portion 15; thence by that creek north-westerly, and downwards to the north-west corner of Taylor's 2,560 acres grant (now James Dalton's "Kangaroooby"), portion 22, parish of Gamboola; thence by the west boundary of that land south to the Main Orange-Molong Road; thence by that road westerly to Molong Creek; thence by that creek westerly to the Municipal boundary of Molong; thence by that boundary south and west to the road from Molong to Manildra; thence by that road south-west about 4½ miles; thence west to Mandagery Creek, about 1½ miles south-west from "Garra"; thence southerly by that creek to "Long's Corner," about 3 miles south-west from Toogong; thence southerly by the road from "Long's Corner" to Canowindra, about 4½ miles; thence generally easterly about 25 miles, through the parishes of Molong, Nyrang, Barrajin, Cargo, along the south boundaries of Edinburgh and Clarendon, and through the parish of Blake to Flyer's Creek; thence by Flyer's Creek downwards to its junction with Belubula River; thence by that river upwards to the crossing of the Murrumburrah-Blayney Railway Line; thence by that line north-easterly to the crossing of McKenzie's Creek; thence by that creek upwards to the Carcoar-Blayney Road; thence by portions 38, 37, 36, and 35 east and south to Belubula River; thence by that river upwards to the Municipal boundary of Blayney; thence by that boundary west to the Railway Line aforesaid; and thence by that line northerly, to the point of commencement.

(b) SOUTH-WESTERN SITES.

Grouping of Sites along the Sydney-Melbourne Trunk Railway.

66. The clustering of almost all the Sites proposed on this line of communication, along, or in the immediate vicinity of, the Sydney to Melbourne Trunk Railway, is to a certain extent the counterpart of a similar grouping of Sites on the Main Western Line; but the influence of the important Border State of Victoria in determining the lines of Accessibility is more marked in connection with these South-western Sites.

Distinction between Western and South-Western Sites.

67. Compared with the principal Western, these South-western Sites, with the exception of Goulburn, are physically distinguished by their connection with rivers of large volume and permanent flow—the Murrumbidgee and Murray; and that feature would be distinctively expressed on a section of the country lying between the upper basin of the Wollondilly (say at Goulburn) and the basin of the Murray at Albury, which would mark a fall of from 2,074 to 534 feet above sea

	feet.
Goulburn Ry. Station	2,074
Bowning ...	1,807
Yass ..	1,660
Tumut (approximately) ..	1,300
Murrumburrah ...	1,271
Cootamundra ...	1,082
Junee ...	988
Wagga Wagga ...	609
Albury ...	534

level; or, if Cullerin Station be taken as the highest point on the tableland, a fall of 1,861 feet. Between these points of maximum and minimum elevation, the Railway Station altitudes above sea level of Goulburn, Bowning, Yass Plains, Murrumburrah, Cootamundra, Junee, Wagga Wagga, and Albury are found to be respectively, 2,074, 1,807, 1,660, 1,271, 1,082, 988, 609, 534 feet. When these elevations are compared with the largest and most permanent sources of water supply, Wagga Wagga gets the benefit of the Murrumbidgee by a loss of 1,465 feet of elevation, and Albury the benefit of the Murray by a loss of 1,540 feet.

Junee.
Murrumburrah.
Cootamundra.

(8. The distance along this Main Trunk Line from Melbourne to Sydney is 576 miles; so that an equi-distant point on it, as between the two Capital Cities, would be about the 288th mile. At or about this point Junee is the only Site that has been proposed; but, as already indicated in paragraph 41, that Site, like others on the downward grade or descent toward the Plains of Riverina, is open to grave objection on the score of both Water Resources and Climate. (*) Junee, therefore, has been rejected, and, for the same reasons, Cootamundra and Murrumburrah. To supply an assumed population of 40,000, water would have to be lifted from the Murrumbidgee, or brought by gravitation from one of its affluents, at very great expense, to ensure a sufficient service for any of these Sites, and, against these drawbacks, no compensating advantages have been disclosed, with the exception of such as may be claimed under the head of Accessibility.

Wagga
Wagga.

69. Lower in the descending series lies Wagga Wagga, the elevation of its Railway Station above sea-level being 609 feet, and of the Site selected for the Federal Capital about 710 feet as an average. This Site has the advantage of being only 21 miles distant from the point of equi-distance between Sydney and Albury, being 309 miles distant from Sydney, and 267 miles from Melbourne, and it has the enviable endowment of an unlimited water supply in the Murrumbidgee, on the left bank of which permanent and ample stream it is situated. That supply, however, must, it would seem, be obtained by pumping, for no effective gravitation supply has been pointed out, nor is the existence of a gravitation source of supply probable, at least, within reasonable limits of distance and expenditure. In regard to fertility of soil, food supply, and facilities for the enlargement of the proposed Site, Wagga Wagga is well favoured. The Site selected for the Federal Capital, being an expansion or enlargement to the south of the present town of Wagga Wagga, though lacking any features of distinction, would seem to be architecturally sound and acceptable. If resumption values were paid for the 94,000 acres of alienated lands embraced in the Site, they would, including the area within Municipal boundaries, cost, according to estimates of witnesses, £962,560. In spite of all its apparent advantages, I must, nevertheless, place Wagga Wagga in the Rejected List, for its water supply must be a pumping one from the River Murrumbidgee, and its summer and autumn climate is the climate of a low-lying district situate in a river basin. Moreover, the cost of resuming the Federal Capital Site, which includes the town of Wagga Wagga (supposing resumption to be necessary), would be out of all proportion to the advantages derived from the inclusion.

70.

(*) Mr. C. E. Blomfield reported (23/5/1900) as follows:—"The only possible Water Supply for Junee is by pumping from the Murrumbidgee. The lift will be from 500 to 600 feet, and the distance about 20 miles."

70. The next Site of importance on the Southern Trunk Railway is Albury, Albury. distant 190 miles from Melbourne and 386 from Sydney, and having an altitude at the Railway Station of 534 feet, and, as a mean of the proposed Site, of 700 feet above sea-level. Like Wagga Wagga, Albury has all the advantages connected with an unlimited water supply by pumping from the river (The Murray), on the north bank of which it is situated. The alluvial flats of the Murray frontages give Albury great advantages in the possession of a fertile soil removed from the baneful influence of droughts, while the country bordering on the river affords all facilities for the production of grain, fruits, and wine; and, for the command of almost unlimited food supplies from other districts, Albury must be allotted a prominent place. The Murray could be made a navigable river by a moderate expenditure in snagging and dredging, and health resorts are within easy reach. The elevation of the Railway Station of Albury is less by 75 feet than that of the Station at Wagga Wagga, and, although Albury is almost entirely surrounded by high country, especially on the Victorian side, it is, nevertheless, claimed that even during the hot months of the year the climate is healthy and invigorating; but, in all these cases of low-lying Sites, the evidence of local witnesses, which, of course, is rarely unfavourable, must not be allowed to outweigh actual physical conditions; and these disclose the fact that Albury, like Wagga Wagga, is within the zone of high inland summer and autumn temperatures. Perhaps the climate of Albury, by reason of its proximity to the Victorian Mountain Ranges on the south-east, may be beneficially influenced, in some degree, but certainly not to such a degree as to compensate for a loss of 1,000 to 1,500 feet of altitude. In the matter of Accessibility, Albury is about twice as far from Sydney as from Melbourne, and is on the bank of the boundary river between the two States of Victoria and New South Wales. With the commercial consummation of Federation, Albury and the Federal Capital of the Commonwealth, if located there, must be dominated by the nearer State and its Metropolis for all commercial purposes, for trade will then necessarily be governed by the conditions of cheaper and shorter access to the best market. If there had been no such compromise of the rival claims of New South Wales and Victoria as is contained in the 125th section of the Commonwealth Act, the last objection could not, I think, have been fairly raised against the aspirations of Albury; but, in view of that section, which declares that the Seat of Government shall be in the State of New South Wales, but distant not less than 100 miles from Sydney, it would hardly be reasonable to comply with the 100 miles limit in a way that might result in a Site being accepted which, while technically and topographically within New South Wales, and so complying with the literal requirements of the section, would be within the commercial sphere of influence of a Border State to such a degree as to make the statutory direction as to location, in effect, almost nugatory.

71. As Corowa Railway Station is about 30 feet lower than that of Albury, Corowa, and the Site inspected presented no features of superiority over the Albury Site, and Howlong. as it could not be assumed that a Site lying lower down the same river (the Murray) could have a better climate than one lying some miles higher up, the reasons for rejecting Albury were reasons for rejecting Corowa. An additional reason was that Corowa is situated at the terminus of the branch line, Culcairn to Corowa, and, as compared with Albury, is less conveniently located on the line of direct communication between New South Wales and Victoria. Howlong Site, situate between Corowa and Albury, was cursorily examined but not officially inspected, being open to the same objection as Corowa.

72. Tumut is not on this Trunk Railway, but is reached by road from the terminus (Gundagai) of the Cootamundra Branch Railway, the distance being 21 miles. Tumut township has an altitude, according to Mr. Staff-Surveyor Chesterman, of 925 feet; but the mean altitude of the proposed Capital Site would, according to the same witness, be about 1,300 feet above sea-level. The difference in mileage, rail and road, between Sydney and Tumut and Melbourne and Tumut, is about 70 miles in favour of the former. The summer and autumnal heat are not excessive. The rainfall is ample (33 inches), and is well distributed over the four quarters of the year. The soil is very fertile on the alluvial flats, and, on the hill slopes, quite up to the average of similar country. The water resources are ample, and a promising gravitation supply is offered by the Buddong, apart from the Tumut River itself. The basin of Gilmore Creek, on which lies the Site of the proposed Federal Capital, is by no means without distinctive features; and the Tumut River, which is the eastern

eastern boundary of the proposed territory, can claim to be along the whole length of its course, not only, perhaps, the most lovely stream in New South Wales, but to offer riverside landscapes that, for natural beauty, are unsurpassed, if they are rivalled, by any in that State. It is, therefore, with no little reluctance that I feel obliged to add Tumut to the list of rejected South-Western Sites; but this Site, being 54 miles, even when connected by rail, from the main line of communication—the South-Western Trunk Line between the Northern and Southern States—is at a perpetual disadvantage. As against any Site situated on the Trunk Line, Tumut is handicapped by the fact that Sydney is 308 miles, and Melbourne 378 miles, distant, which means 110 miles of extra haulage from each Capital, and proportionate lengths along each State section of the railway. The Gilmore Valley Capital Site is physically a circumscribed area incapable of much expansion, and a large portion of the Territory Site is very rough and intractable country for agricultural purposes. The mean altitude, even allowing it to reach 1,300 feet, is hardly sufficient to ensure the required climate, especially in Summer and Autumn; but if Tumut had been situated on the Trunk Line, with the advantages it possesses, that Site, according to the original proposal, should, in my judgment, have been at least bracketed as on an equality with the Yass Site as originally proposed.

Tumbar-
umba,
Bowna,
Hay,
Wentworth.

73. The four Sites specified in the margin did not seem to require inspection, as my knowledge of the country proposed for the Federal Territory by their advocates made further examination unnecessary. Hay and Wentworth were within the hot zone, and were unsuitable in other respects. Tumbarumba was more inaccessible than Tumut, and more circumscribed in area; and Bowna (submitted too late for inspection) was in no better position than Albury. These Sites were, therefore, rejected without special inspection.

Comparison
of Goulburn
and Yass.

74. All other South-western Sites having been rejected, Goulburn and Yass alone remain for consideration and comparison.

In regard to Water Resources, if Goulburn had to be supplied by gravitation, its position is rather low on the comparative list prepared by Mr. Blomfield, having been placed by him between Queanbeyan and Cootamundra. On the other hand, Yass, if supplied by a pumping scheme from the Murrumbidgee, has been assigned a somewhat similar position, between Wagga Wagga and Junee; but subsequently to Mr. Blomfield's inspection, it has been claimed, in favour of Yass, that the Micalong catchment can provide that Site with an effective gravitation scheme (see Annexures—Yass, 3, 3a, 4); but that scheme is, in consequence of length of pipeline and other circumstances, an expensive one—£270,000 for piping alone. The Upper Wollondilly has not been, it must be admitted, thoroughly examined for a gravitation supply for Goulburn; but even if the water resources of Goulburn were equal, or nearly equal, to those of Yass—and neither are particularly promising—yet there are good reasons why the Yass Site possesses more advantages than that of Goulburn, viz. :—(1) Although Yass does not possess the altitude above sea level of Goulburn, the Yass climate is on the whole better than the Goulburn climate; (2) Yass is nearer the point of equi-distance between Sydney and Melbourne than Goulburn by about 60 miles—both being on the same trunk line; (3) The Yass district gives greater facilities for expansion of area (if desired), and has a better soil; (4) The cost of resumption of land for Yass is considerably less, according to estimates of value, than for Goulburn. The area within Municipal boundaries—

Of Goulburn being valued at	£676,737
Of Yass at...	213,000

A difference in favour of Yass of £463,737

while the estimated value of land outside the Municipal boundaries of Goulburn is about £3 7s. 6d. per acre on an average, and of the same class of land at Yass at £3 per acre. According to these figures, the cost of the Yass territory would be less than a third of the cost of the Goulburn territory.

Yass Site, as
proposed to
be enlarged.

For these reasons I have thought that the Yass Site should be preferred to the Goulburn Site, even as originally proposed, which, in the case of Goulburn, embraces 100 square miles, and of Yass, 144 square miles; but my grounds for advising the offer of Yass as the most eligible among South-western Sites for the establishment of the Seat of Government of the Commonwealth rest, in a very considerable degree, upon the inclusion of an enlarged area, the increase being as

as much as 950 square miles, and embracing the entire bed of Lake George (probably not less than 60 square miles), which, of course, is Crown land, and would cost the Commonwealth nothing. Roughly, the suggested extension of the Yass Site would begin at the junction of the Yass River with the Murrumbidgee, and, thence eastward, follow the course of the Murrumbidgee to a point near to Queanbeyan; thence northerly to Bungendore, and the eastern side of Lake George to its northern end; and thence by a line connecting that point with the head of the Yass River; and so by the Yass River to the point of commencement. (See plan of Yass Extension Site, marked R in Appendix.*) This enlargement would practically federalise most of the triangular tract of country, of which the apex is Goulburn, the base the Murrumbidgee River, and the two sides, portions of the Main South-western Trunk Line and of the Goulburn to Cooma Line.

75. There is some highly improved country on the eastern and south-eastern ^{Lake George.} shores of Lake George, including the Currendooley Estate and House, which perhaps it might be desirable to acquire as a country residence for the Governor-General; but I have excluded this tract, to avoid loading the Yass Scheme with an additional and large item for cost of resumption.

I have included the basin of Lake George for the following reasons:—

- (1) Its acquisition would, practically, cost the Commonwealth nothing; and it is an area of Crown land that New South Wales has never considered to be of the smallest value to her territory, except for a small strip at the southern end of the Lake used for measuring two base lines in connection with a Scheme of General Triangulation. The Lake is a large expanse of more or less brackish water when at high level,(†) and a large expanse of saline mud when at its lowest; sometimes partially covered with the weed known as *Fat Hen* and a salinous creeper (? *Rhagodia*, sp.); and the catchment is limited in extent.
- (2.) If, notwithstanding its limited catchment, the basin of this Lake, or a portion of it, could be converted into a reservoir, its value to the Commonwealth Territory would be much greater than to any part of New South Wales.(‡)
- (3.) If the basin cannot be converted into a permanent reservoir, then if reclamation by the Commonwealth should be undertaken,—and there is not much room to doubt that the whole of the water in the basin could, if necessary, be discharged by cutting and tunnel (through Geary's Gap) to the lower levels about the sources of the Yass River, and perhaps directly into that river,—there would be a very large area of valuable land acquired for Commonwealth purposes which is not likely to be acquired for the benefit of New South Wales. It is right to add that I have not been able to obtain any exact information as to the depth and nature of the soil deposits in the Lake; but if the grass on those portions of the southern end of the Lake which have reclaimed themselves can be taken as a criterion of the soil, it should be well worth reclaiming.(§) (c)

(*) Mr. A. C. Betts, Chairman of the Goulburn Land Board, has furnished the following description of the suggested enlargement of this Site:—Commencing at the intersection of the Southern Railway Line with Bowring Creek, and thence by that creek downwards to its junction with the Murrumbidgee River; thence by the eastern bank of that river, upwards to a point due west of Ranger Hill Trigonometrical Station, parish of Yarralumla, county of Murray; thence by a line east to the head of Turallo Creek; thence by that creek northerly to its junction with Lake George; thence by the eastern and northern shores of Lake George to its northern extremity; thence by a line west about 10 miles to Yass River; thence by the south bank of that river, downwards to the town of Yass; thence north to Southern Railway Line, and by that line westerly, to the point of commencement.

(†) Mr. A. C. Betts, Chairman of the Goulburn Land Board, writes, that in the very wet years, 1870-1874, when the Lake had risen so high as to threaten to submerge Bungendore, the water was not even then fit to drink, although the codfish introduced by the late Sir Terence Aubrey Murray live and thrive in the Lake.

(‡) The surface level of Lake George was ascertained by actual levelling to be 2,225 feet above sea level by Surveyor Mountain in 1878—(Notes upon "Floods in Lake George," by Mr. H. C. Russell, Government Astronomer, p. 15)—which is 565 feet higher than Yass Railway Station. If the water of Lake George could be purified, by providing an outlet as well as by dredging, and evaporation be diminished by reducing the surface area, this height should be sufficient to provide a gravitation supply for the Yass Capital Site; and a very large area of the Lake Basin could still be reclaimed and brought under irrigation if required.

(§) In the summer of last year, when the Lake was very low, the mud on the western side of the basin easily bore a buggy and pair for some hundreds of yards from the high water level; and, to judge from the look and feel of the soil, it certainly seemed as if reclamation would be much easier in this basin than in the case of the salt morasses and quaking bogs on the banks of the Shoalhaven, on the Coolangatta Estate, which the proprietors have converted, and are still converting, into splendid agricultural land. Since my last visit to the Lake, I have received a copy of a report by the Lake Observer (Mr. Glover) to the Government Astronomer, in which it is stated that the greater part of the bed consists of soft mud, varying in depth from 15 inches to 3 inches, under which there is a very stiff black soil, almost clay, averaging about 2 feet in depth, and below the black soil a light cream-coloured sandy loam. Further examination of the Lake bed, by means of trial shafts and borings, might throw very useful light on the possibility of its successful reclamation, and help to solve some interesting geological questions.

(e) SOUTHERN SITES.

All Southern Sites, except three, disregarded.

76. Between Goulburn and the Victorian Border, 7 Sites were submitted for inspection and inquiry, and between Sydney and Goulburn 3, or, if Sassafras be included, 4. Of these 11 Sites, 8 were inspected—viz., Barber's Creek, Bemboka, Bombala-Eden (Southern Monaro), Braidwood, Buckley's Crossing, Delegate, Moss Vale, and Queanbeyan; but Public Inquiries were held only at Queanbeyan, Braidwood, and Bombala. Barber's Creek, Moss Vale, and Towrang Sites were considered unsuitable, among other reasons, for either insufficient or difficult and costly water supply; Delegate and Eden became incorporated with Southern Monaro; Buckley's Crossing, in spite of its splendid Water Supply, when considered as a rival to its near neighbour, was thought to be outclassed as an independent Site; Sassafras—on the summit of the coast range that defines the basin of the Shoalhaven on the east—gave no hope of an adequate Water Supply, was manifestly open to objection on the score of accessibility, and could claim no physical or other advantages over Braidwood, a rival Site in the upper basin of the Shoalhaven; and Bemboka, at the head of the Bega River, at the foot of the Nimitybelle, or Brown's, Mountain, was a comparatively low-lying Site, without any countervailing advantages. Competition was therefore practically limited to 3 Sites—Queanbeyan, Braidwood, and Southern Monaro.

Queanbeyan.

77. The first named of these Sites, embracing as it does a long frontage to the Murrumbidgee and the beautiful and fertile Limestone Plains (on the Duntroon Estate), with an altitude of between 1,900 and 2,200 feet, promising water resources, and a much commended climate, when placed in competition with its neighbouring rival on the west, Yass, was clearly at a great disadvantage in regard to Accessibility; the distance from Melbourne to Queanbeyan being 502 miles, or, by the proposed extension, *viâ* Bairnsdale and Cooma, about 460 miles, while from Sydney it is only 205 miles, and when placed in competition with the Southern Monaro Site, was at a like disadvantage for the same reason, and also in regard to the possession of an ample and cheap gravitation water supply. Nevertheless, although rejected as an independent Site among Southern competitors, much of the proposed Queanbeyan Site has been included in the enlarged Site of Yass. (See paragraph 74, and Plan of Yass Extension Site, marked R in Appendix.)

Braidwood.

78. Like most of the Tableland Sites, Braidwood is a pastoral or grazing, rather than an agricultural, district, and is held in comparatively large areas; the resumption of the Braidwood Site would, therefore, be much less costly than the resumption of agricultural country; the average value for Braidwood, Yass, and Queanbeyan, being, for improved lands outside municipal boundaries, about £3 per acre. Braidwood is some 30 miles off the Goulburn-Cooma Line, and its water resources, except for a pumping scheme, are not good. Its climate is rather severe in winter—perhaps, however, not more severe than that of Southern Monaro. Its summer climate is quite equal to that of Queanbeyan, and it gets the sea breeze somewhat earlier in the day; but, in regard to Accessibility, it is rather more unfavourably situated than Queanbeyan, and the area of good country in the upper basin of the Shoalhaven, in which the Braidwood Site lies, is limited, while the character of its soil is not one of its greatest recommendations. But for these drawbacks, the gently undulating downs seen from the summit of Gillimatong Hill, seemed admirably suited for a Capital Site. Bateman's Bay, at the mouth of the Clyde River, as a Federal Port associated with this Site, although it affords sea-carriage, cannot vie for an instant with Twofold Bay in connection with the Southern Monaro Site; and the Araluen Valley as a garden for semi-tropical grain and fruits, is not a particularly strong feature. Braidwood therefore must be added to the list of rejected Sites.

Other Southern Sites.

79. The Goulburn Site has already been considered when comparing South-western Sites. Bombala-Eden, or, Southern Monaro, Bemboka, Delegate, and Buckley's Crossing were the only other Southern Sites inspected, and as Bemboka, near the head of the Bega River, possesses only the altitude, and, with it, the climate of the Foot Hills of the Coast Range, and is in other respects unsuitable, that Site may be disregarded. Delegate, near the Victorian Border, does not come into competition with the other Sites, inasmuch as its promoters may be said to have practically retired in favour of Bombala-Eden. No Public Inquiry was held at Buckley's

Buckley's Crossing, but, although in regard to water resources, position, character of country, and climate, that Site had much to recommend it, yet it lacked those special features which the neighbour Site of Southern Monaro possessed, and suggested a modified incorporation with that neighbour rather than independent competition. Such incorporation, it will be seen, has been suggested. (See Plan and description of boundaries of Southern Monaro Extension Site, marked S in Appendix.)

80. Three inspections of the Southern Monaro Federal Territory and Capital Sites made for the purposes of the Commission, confirmed strongly the favourable opinion I have always entertained of this tract of country, just as similar inspections of the Orange and Yass Sites strengthened my original inclinations in their favour; and when it was decided to reduce the eligible Sites to three, the right of Southern Monaro to a place could not be questioned; for not only does it possess all the features of suitability claimed for Orange and Yass, except Accessibility by rail, but it has some special features of its own which must attract the serious attention of the determining Authorities.

Southern
Monaro Site.

In the first place, the inclusion in the Federal Territory of Southern Monaro of a harbour like Twofold Bay, with at least from 5 to 6 square miles of safe anchorage for the largest ocean-going steamers, secured by a north and south breakwater of no extraordinary dimensions or cost, and of a railway connection with that harbour, both railway and harbour and a sufficient area of adjacent country to be Commonwealth property, distinguish this Site from all others.

The Engineer-in-Chief for Harbours and Rivers estimates the cost of the breakwaters—the northern, 4,700 feet, the southern, 4,850 feet in length, affording a width of entrance of 1,800 feet—at £1,028,000, a sum which might be considerably reduced if suitable stone could be obtained in the neighbourhood. (See sketch of Bay and works, and letter of Mr. Darley, Annexure Bombala-Eden, 5.)

But as against this large sum, it is only fair to set the fact that this harbour being Crown land would cost the Commonwealth nothing for resumption.

If the Seat of Government were to be located on the Monaro tableland, and connected by rail with a harbour such as Twofold Bay, the Commonwealth would acquire an invaluable naval base situated nearly halfway between the two State Capitals that offer the greatest temptations to an enemy—Sydney and Melbourne. The Eastern States of Australia would acquire a harbour of refuge, or for refitting ships in distress, or for coaling. If the Commonwealth is to have a navy of its own, or even a training ship, Twofold Bay would be a convenient station, particularly for gunnery practice, and suggests itself as the convenient head-quarters of the Naval Commandant. As the breakwaters would be fortified, the Port of Eden could be made practically impregnable. With such a harbour the Commonwealth would have two routes for reaching the various State Capitals—one by sea, the other by land—and for facilitating the collection, mobilisation, and despatch of troops, munitions, and equipments.

The lumber cargoes from the other side of the Pacific could be discharged direct on the Eden Wharf; and the same facilities would exist for cargoes of coal, stone, iron, roofing slates, tiles, cement, and all other kinds of building material; and thus every State of the Federation would have a common commercial heritage in a harbour second only to Port Jackson.

The resident inhabitants and visitors of the Federal Capital on the uplands of Monaro would have, within three hours journey by rail, a seaside climate admirably suited for bathing and seaside recreations; and as winter quarters for those who might require an occasional change from a bracing to a milder climate. And two such climates as those of Eden and Monaro would be of reciprocal benefit.

What these and other advantages might mean in the course of a generation or two it is impossible to predict, and, perhaps, difficult to exaggerate.

Whether the advantages to be derived from the association of such a harbour with a Federal Territory would compensate for the cost of securing them, it is for others to determine; but even in its present state, the Port of Eden, except during violent south-east gales, which are infrequent, is one of the best on the coast of

New

New South Wales, the in-curved northern headland forming a very snug, though rather small, harbour, which has an excellent jetty, where vessels of 2,000 tons can discharge, while a few thousand pounds spent in extension and enlargement of the jetty, and in putting down mooring and riding buoys, would very greatly improve the shipping facilities of the Port pending the construction of the Breakwaters.

I have given special attention to the harbour advantages associated with this Site, because they are, in one respect, its chief distinguishing feature; but there is another aspect in which this Site is distinguished from all others. If the Federal Capital is established in Southern Monaro, it is considered certain that Victoria will extend her Gippsland Line, now terminating at Bairnsdale, through Orbost, and contouring the coast up to the Victorian Border near Delegate or Timbillica, and so complete a coastal circuit of railway communication, which would be of great strategical value, and would also be a relief to the Main Trunk Line, and possibly an effective substitute for a duplication of the roadway of that line, the ordinary traffic on which must, with intercolonial freetrade, become more and more congested. The cost of such an extension, which it is presumed would be borne by Victoria, is estimated by Mr. Rennick, the Victorian Engineer-in-Chief for Construction, at £665,493 15s., or £4,500 per mile for 147 miles 71 chains. The cost of extension to Delegate River or Bendoc would be much higher, viz., £1,351,212 10s. and £1,442,237 10s. (See Annexure 1 to Report on Bombala-Eden, or Southern Monaro.)

In regard to Water Supply, whatever rank is to be assigned to the Site which possesses the most abundant, as well as the cheapest, by gravitation from a never-failing source, with 280 feet of head, Southern Monaro has hardly a rival, even under the conditions of the original proposal; but with the Snowy River thrown in, as it will be by the enlargement of the Site, as suggested (*post*, page 24), Southern Monaro stands absolutely first in the important matter of Water Resources; and the same Site gives better promise than any other of affording water power for hydraulic lifts and the development of electrical energy. The character of the Water Supply is treated at length in the Report on this Site, at page 39. It may, however, be mentioned here that most of the catchment areas of the Delegate and Little Plains Rivers are in New South Wales, and within the proposed Federal Territory as enlarged, although the sources of both are in swamps and springs on the other side of the Victorian Border.

In regard to Accessibility, although the distance from Sydney to Melbourne, *viâ* Goulburn and Cooma Railway, as extended to the Victorian Border, and thence *viâ* Orbost and Bairnsdale to Melbourne, would be approximately 676 miles, or 100 miles more than the distance between the same two points by the Main South-Western Trunk Line *viâ* Albury; yet, the Southern Monaro Site would be very nearly equidistant, as between Sydney and Melbourne by rail, and by water the difference would not be very much in favour of Sydney. The disadvantage of 100 miles more railway road between the two Capitals would, however, be more than counter-balanced by the advantages of the alternative sea route, and the connection of our Southern Railway System with the Victorian Gippsland System.

Southern Monaro, it must be admitted, is at present cut off both from Sydney and Melbourne by the break in railway communications, and, of these, it seems that no less than two extensions and one independent line will be required before the Site can be said to be properly accessible. The Victorian extension has already been considered. There remain the connecting line, Eden to the Monaro Federal Capital Site, and the extension from Cooma to the same point. This extension has been estimated to cost, if continued to the Victorian border, £7,000 per mile, *i.e.*, for 91 miles, £637,000; and the connection, from Eden to the Table Land, if taken *viâ* Bondi, £1,323,330; and, if taken *viâ* Wolumla, Postle's route, £1,088,719. The former is the shorter route by some 14 miles, but it is much the more costly per mile. (See Annexures 2 and 3, Bombala-Eden.)

The connection from Twofold Bay, according to the proposals of the promoters of the Southern Monaro Site, would be made at the joint expense of the Commonwealth; so that the proportion of cost falling to New South Wales might not, on a population basis, be more than £400,000, in round numbers. The extension from Cooma to the Border, estimated at £637,000, together with the proportion of cost to

to New South Wales of the breakwaters—say, £370,000; making a total, with the proportion of cost of the Lord's Hill Water Supply Scheme (£40,000), of £1,411,400.

But it is contended by the promoters, and, I think, with justice, that their Scheme should not be weighted with the cost of a railway, which they say ought to have been constructed years ago in fulfilment of a State obligation to the just claims of an important, but hitherto neglected, part of her territory. As a matter of fact, the right of the district to the more costly of these two lines—that from Eden to the Monaro Tableland—has been publicly and influentially conceded; and the promoters have asked me, in justice to their case, to reproduce the views of Sir Henry Parkes and Sir William (then Mr.) Lyne, as expressed in a debate in the Legislative Assembly on the 1st October, 1891:—

Sir HENRY PARKES: "It does not follow that because this very fine port (Eden) has, from one cause or another, been neglected, that it will continue to be neglected. When that district is opened by railway communication, to which, in my judgment, it is richly entitled, Eden, which has a very fine harbour, will become the site of a very important maritime city. . . . I have that faith in the progress of this country that I have long foreseen that, although retarded by unfavourable circumstances, this result is certain by the very force of growth from without. . . . Twofold Bay has been the victim, if I may so term it, of singular neglect. I do not say whose fault it is. It is very difficult to distinguish; but, certainly, before many years, Twofold Bay, where the town of Eden is situated, . . . will become one of the most important places in New South Wales. I have no doubt whatever of that. As far back as 1873 I advocated the construction of a railway to the port to bring the traffic of Monaro to the bay. . . ."

Mr. LYNE: "I think, if there is a district in which a railway should be constructed, it is from the tableland to the port of Eden. There is no finer port in the Colony, and there is no finer country at the back of it. It is certainly to be regretted that the construction of the line has been left so long in abeyance. There is no possible doubt that the port must become a great shipping port, and it will become a great centre of population."

These are the deliberate opinions of a past and present Premier of New South Wales, and were given without intuition of Federal requirements or conditions, but solely upon a consideration of the natural claims of the district to better communication. And whether New South Wales has to bear the whole cost of this connection of port and tableland, or only a proportion of it, the liability is not one to be placed to the debit of the Southern Monaro Site. A just compromise would seem to be to charge New South Wales—*i.e.*, the Southern Monaro scheme—with

Proportion of cost of this railway (say)...	£400,000
" " breakwater	£370,000
" " Lord's Hill Water Supply Scheme			£14,400
			£784,400
	Total	...	£784,400

and to relieve the scheme from the whole cost of the Cooma extension (£637,000), because that extension may now be regarded as the equivalent of the Eden-Bombala connection admitted to have long been an unfulfilled State obligation.

Thus the cost to the State of the Southern Monaro Scheme, under the heading of Accessibility, would be about £784,400.

In the matter of Climate, the altitude of this Site (2,400 feet) and its latitude (37 degrees south), ensure a somewhat cooler summer and autumn than any other Southern Site, and in winter a climate quite as endurable as those of Braidwood, Queanbeyan, or Buckley's Crossing. All these Southern Sites are within the influence, during the hot months, of the afternoon sea breezes, and though in Southern Monaro the winter temperature sometimes drops to 20 degrees, and there are falls of snow, yet there is compensation in the summer day temperature, which averages only 66 degrees, and in a night temperature of 50 degrees, and the snow rarely lies on the ground all day. Bleak cutting winds are experienced occasionally in winter, but they are not more severe than those of other Southern Sites on the Tableland.

In regard to soil, there are some extensive tracts included in this Site of splendid basaltic soil, and that of granite formation is as well adapted to the growth of cereals and fruits as the soil of any other Southern Site. Its proximity to the warmer and very productive Bega District would, however, give Southern Monaro an advantage over some of these Sites, in the command of such grain and fruit supplies as are the products of a warmer climate. The same coast country would also be helpful in supplying fat cattle during certain seasons, and dairy produce, in which respects the other Southern Sites are not so well favoured.

The

The southern slopes of the Monaro Tableland, taking Nimitybelle as the ridge, though differing much in geological formation, preserve throughout, with the exception of limited areas of rough mountain country, the same surface characteristics of an elevated plateau—undulating lightly-timbered downs, traversed by numerous streams, all converging towards the Victorian Border and eventually finding their way to the Snowy River. It is a district which, more than any other that has come under inspection, offers ample areas of similar character for extension of a Federal Territory, if required, and at a reasonable cost for resumption, Monaro, as a whole, being a pastoral and thinly-settled country.

For possession of, or vicinity to, any useful deposits of building-stone, clay for brickmaking, &c., I do not think that Southern Monaro has any advantage over other Southern Sites; but the inexhaustible forests of useful hardwood timber on the slopes of the Coast Range and elsewhere within or close to the proposed Federal Territory, give this Site advantages over any other Western, South-Western, or Southern, if local timber should be much used for building material.

The surface formation of the Site proposed for the Federal Capital, and the nature of the subsoil, resemble, in some degree, those of other undulating downs, and may be bracketed with Yass, Braidwood, and other Sites; but for artificial lakes and other ornamental waters the water supply in the neighbourhood of this Site is superior, both in respect of quantity and easy conveyance to that of any Southern and many other Sites, and the pipe line that would afford this supply could be utilised for many other purposes. The natural drainage is good, and there would be no swamps or morasses to reclaim.

Of the 80,000 acres of the Site proposed as Federal Territory, about 5,000 acres are Crown lands. The improved value of the area within the municipal boundaries of the town of Bombala is given at £72,635; for the residue, about 74,000 acres, a fair average would be from £3 to £4 per acre, some tracts being worth no more than 30s. per acre, while others are worth £7.

This Federal Territory Site of 125 square miles (80,000 acres) is, in my opinion, altogether inadequate, and an extension of area is suggested which would increase the area up to 1,200 square miles approximately; (*) and the average improved per-acre value of the increased area would, probably, be £3. (See Southern Monaro Extension Plan, marked S in Appendix.)

As has already been pointed out, Southern Monaro is a pastoral, and not an agricultural, district. For all meat products, therefore, it and its associated Coast Districts could be relied on to supply the requirements of a largely increased population; but the absence of any market for cereals and root crops has hitherto made farming on a large scale an unprofitable business. The advent or expectation of a market would, however, soon alter these conditions, and agriculture would take and retain its proper position in this district, and the proposed railway extensions and connections, if carried out, would make Southern Monaro readily accessible for all external food supplies.

(*) The Chairman of the Goulburn Land Board has supplied the following description of the Southern Monaro Federal Territory Site, according to the suggested enlargement:—Commencing at the junction of Snowy and Delegete Rivers, and bounded thence by a line south to the boundary line between Victoria and New South Wales; thence by that boundary line south-easterly to the summit of the Coast Range; thence by that range northerly to a point due east of the northern boundary of the town of Nimitybelle; thence by a line west to a point due north of the junction of Snowy River and Wulwye Creek; thence by a line south to that junction, and by the east bank of Snowy River downwards, to point of commencement.

Summary of Conclusions.

81. Summing up the Conclusions reached on the foregoing Review of the various Groups of Sites proposed, your Commissioner considers that any one of the three Sites—(1) Orange (or Canobolas), (2) Yass, (3) Bombala-Eden (Southern Monaro), will be suitable for the establishment therein of the Seat of Government of the Commonwealth; and whether for the area originally proposed, or enlarged as suggested, or as may subsequently be determined.

If the final selection is to be governed mainly by considerations of cost of acquisition, and present accessibility as between New South Wales and Victoria, Yass would be entitled to first place; but the resources of that Site for an effective Water Supply for a large population are not as satisfactory as could be desired.

If the quality of the soil and the character of the climate are accepted as the controlling factors, Orange (or Canobolas) would be entitled to first place; but the cost of resuming land within this Area will be very heavy, and the Water Supply from the Canobolas Catchment is not very promising for a large population. This Site has the additional drawback of not being, in respect of Accessibility, a fair compromise as between Sydney and Melbourne.

If the Federal Territory is, within reasonable limits, to be selected independently of cost and of present Accessibility, Southern Monaro combines more distinctively appropriate features than either Canobolas or Yass.

On their own merits, apart from the considerations indicated above, and having regard to the future, rather than the initial, requirements of the Commonwealth, Southern Monaro is entitled to the first place, and Canobolas and Yass may be bracketed as about equally suitable.

Acknowledgments, &c.

82. Your Commissioner regrets that it has been found impossible to submit his Report within the time originally allotted. The unexpectedly large number of applications for inspection of Sites, and Public Inquiries between the intervals of the Sittings and the engagements of the Land Appeal Court, the necessity of making several such inspections in some cases, the protracted character of the Inquiries, and the obligation, amounting almost to a duty, which he felt under to collect all the relevant material in his power which could aid in the future determination of the Seat of Government, have been the principal causes of delay in completing the task entrusted to him.

83. Also, he thinks it right on his part to admit that some of the suggestions and opinions contained in this Report may not strictly fall within the scope of the powers or duties with which he was invested by the Commission. To such a charge, if made, he has nothing to offer by way of answer or excuse, except that the temptation to exceed his instructions, if he has exceeded them, has been too great for him to resist, and that he preferred the chance of receiving absolution for having done more than he was commissioned to do, to the certainty of receiving merited censure for having done less. But he is not conscious of having committed, or even contemplated, the impropriety of encroaching on the function of the constitutional authorities who have been invested with the prerogative of determining both the Seat of Government and the Federal Territory.

84. In bringing his Report to a close, it gives your Commissioner much pleasure to acknowledge the many obligations he has been under in the execution of his Commission. To the Premier and Members of the Victorian Government, the Commissioner of the Victorian Railways, the Engineer-in-Chief for Railway Construction in Victoria, and the Secretary to the Commissioner, the Secretary and Officers of the Ballarat Water Trust,—his cordial thanks are but an insignificant acknowledgment of the courtesy and assistance extended to him on all occasions; and they are due in as full measure to the Premier, and to the Secretary for Public Works in New South Wales, to the Under-Secretary, the Railway Commissioners,

the Engineer-in-Chief and Assistant Engineer for Railway Construction, the Engineer-in-Chief for Harbours and Rivers, and the Officers of the Water Conservation Department who have been so helpful in the examination of the various sources of Water Supply; to the Chief Surveyor and Officers of the Compiling Branch, Department of Lands; the Government Astronomer, without whose cheerfully rendered aid the Records of Temperature and Rainfall would have often been defective, or conjectural; the Government Architect, and the professional Architects of Sydney who supplied a valuable Report (General Annexure C); and to the Government Statistician and Government Geologist, for information very kindly furnished by them.

To Mr. A. C. Betts, Chairman of the Goulburn, and Mr. H. A. Crouch, District Surveyor of the Orange Local Land Board, the Commissioner is under very great obligations for the plans and descriptions and other topographical particulars supplied by them in relation to the various Sites in their districts; also, to Mr. G. H. Sheaffe (District Surveyor, Goulburn Local Land Board), Mr. William Orr (District Surveyor, Wagga Wagga Local Land Board), Mr. Staff-Surveyor Barlow (Albury), Mr. Staff-Surveyor Chesterman (Tumut), Mr. W. R. Bundock, of Braidwood (formerly Road Superintendent), and to Mr. W. R. Newton, of Bombala. The companionship and guidance of these gentlemen over extensive tracts of country, and their large stores of local knowledge, have been of inestimable service.

He has, further, to thank the many Chairmen and Secretaries of the Local Leagues and Committees for their assiduous courtesies and kind offices during his numerous inspections of Sites; his thanks are also due to those Police Magistrates and other Officers, who, at some inconvenience to themselves, allowed the use of the Court-houses for the conduct of public inquiries.

But this acknowledgment of his obligations would be incomplete if it omitted the name of the Secretary to the Commission, Mr. J. T. Keating, Registrar of the Land Appeal Court, whose experience and ability as a Draftsman have been highly appreciated whenever technical difficulties arose. It has been a subject of much gratification to your Commissioner that he has been associated with an officer of such marked ability, zeal, and discretion; and that, chiefly as a result of his unflagging industry, the whole of the clerical, corresponding, and deposition work of the Commission has been carried to completion without extraneous assistance.

Certified under my hand and seal, this 26th day of October, 1900.

(L.S.) ALEXR. OLIVER.

GENERAL

GENERAL ANNEXURES.

(A.)

Government Statistician's Office,

Sydney, 10 September, 1900.

Dear Sir,
In the estimates of population forwarded to you, the Island State of Tasmania was excluded from consideration; the request, as understood, being confined to the population of Australia. I enclose estimates of population which include Tasmania.

Yours, &c.,

T. A. COGHLAN,

Statistician.

Alex. Oliver, Esq.,
President, Land Appeal Court, Darlinghurst.

ESTIMATE OF POPULATION (*exclusive of Aborigines*).

WITHIN the Commonwealth, and north of the 33rd parallel of south latitude.	NORTH of railway line from Sydney to Bourke, and thence by a line due west across Australia.
New South Wales 451,575	New South Wales 501,725
Queensland 482,400	Queensland 482,400
South Australia (including Northern Territory) ... 37,500	South Australia (including Northern Territory) ... 7,500
Western Australia 157,530	Western Australia 12,000

(B.)

Subject :—Comparison of fourteen proposed Federal City Sites as regards their Water Supplies.

Public Works Department, New South Wales,

Water Conservation Branch, 6 June, 1900.

Sir,

In accordance with your verbal request, I herewith beg to place the various Federal City Sites which I have inspected in the following order as regards their water supplies, and, for greater convenience, I have divided them into two groups, viz. :—(1) Those which can be supplied by gravitation; and (2) Those for which pumping will have to be adopted.

Group I.

Buckley's Crossing
Bombala
Tumut
Carcoar-Garland
Bathurst—(*Vide* later Report of 4/8/00, appended).
Orange
Queanbeyan
Goulburn
Cootamundra.

Buckley's Crossing is decidedly the best. The supply is unlimited, the distance the water will have to be brought is small, and provision could easily be made for generating electricity at the place where the water supply would be taken off, as the fall in the river is very rapid.

Bombala and Tumut are both very favourably situated for water supply by gravitation, and have sources of supply equal to a very large population.

The Carcoar-Garland Site is a very good one, but the streams are not so permanent as those of Southern Monaro, so that more use would have to be made of flood waters; but there would be no difficulty about supplying water for a large population, and also in obtaining power for generating electricity.

Orange has only a small watershed for its supply, but it is very good, and so is the rainfall. My reason for placing it below the Carcoar-Garland Site is that it has not the same possibilities for supplying a very large population.

Queanbeyan has a large available supply, both from the Cotter and Murrumbidgee Rivers. The former would give a very good and pure supply, but the expense would be large; and it is for that reason alone I have placed it so low down on the list.

Goulburn has a fair supply for a limited population; but if it were to grow much above 70,000 it is difficult to say where the extra supply of water could be brought from; also, the storage is not very good.

In

In Cootamundra, a gravitation scheme from the Adjinbilly Creek is quite possible. It has sufficient elevation, and the supply would be ample for a large population; but it would be an expensive scheme, and a lot of gold-mining on the Creek would have to be put a stop to. The water at the time of my visit was very turbid.

Group II.

Albury
Wagga Wagga
Yass
Junee
Braidwood
Bathurst—(But *vide* later Report of 4/8/00, appended).

Of the pumping schemes there is not much to choose between Albury and Wagga Wagga, but Albury would be a little the best on account of the Murray being a larger river than the Murrumbidgee, having fewer towns on its catchment, and, therefore, less liable to pollution.

Yass and Junee are about the same, and the supply would have to be pumped from the Murrumbidgee in each case. Yass has fewer towns on the catchment above it than Junee, but for Junee the pumping lift would not be so great.

Braidwood and Bathurst are very similar, as storage reservoirs would most likely be necessary in both instances, and to supply the higher levels pumping would be necessary.

CHARLES E. BLOMFIELD,

Resident Engineer, Department of Works.

P.S.—I have since examined Campbell's River, at Wallbrook, and find that a large and pure gravitation supply can be obtained for Bathurst. I would now place it in the list of towns that can be supplied by gravitation, between Carcoar-Garland and Orange.—CHARLES E. BLOMFIELD, Assistant Engineer, Deniliquin, 4th August, 1900.

To the Federal City Site Commissioner, Land Appeal Court.

(C.)

Sir,

Sydney, 10 August, 1900.

In response to your invitation, we have the honor to submit the following expression of our opinion on the questions placed before us for consideration in connection with the selection of a Site for the Federal City of the Australian Commonwealth.

From an architectural, sanitary, and engineering point of view, the topographical and general features of an ideal Site for a Federal or other City may be summed up briefly as follows:—

The Site should be a stretch of gently undulating country, the slopes of which of sufficient fall for drainage purposes, and admitting of the construction of streets of easy grade,—should, if contiguous to a river, be out of the reach of floods and free from fogs. Gently rising ground, containing a few depressions readily convertible into small lakes, and the Site itself surrounded by commanding hills,—preferably in the form of an amphitheatre, or rather semi-amphitheatre,—would probably satisfy the conditions indicated, and present the artistic features essential for the development of a really beautiful city. The Site should be within easy distance of an ample water supply, admitting of the creation and maintenance of the artificial lakes which should constitute a leading feature of its public gardens.

While the presence of a river is desirable, it is not indispensable; but the locality should be within easy reach of natural features which might be developed into popular pleasure and health resorts.

In order that the *sanitary* conditions may be satisfactory, it is important that the subsoil should *not* be clay. . . . It would be advantageous for the city to have a north-easterly aspect, and it should be well sheltered.

Conditions affecting the erection of the City.

The first requisite in the creation of a city of the character proposed is provision for housing the industrial classes that would be employed in the erection of the Federal buildings. This necessarily implies, also, a sufficient water supply and sewerage. The simultaneous erection of these Federal buildings may be reasonably estimated to require the services of at least 2,000 workmen, or an industrial population—including its caterers—of 8,000 people.

To erect permanent dwellings for the whole of this population would be unwise, as, on the completion of the building operations, most of the operatives would depart in search of work elsewhere. Temporary quarters might, therefore, be considered as desirable as an adjunct to private enterprise, especially in the early stages. This requisite involves, as a preliminary, the consideration of the design of the city, and the matured plans for its complete development, particularly with respect to the position of its streets, its public buildings, its water-supply, drainage, general traffic arrangements, and public gardens. Nothing inconsistent with or in any way hampering the ultimate design should be allowed to establish itself.

If it be possible to find a suitable Site sufficiently close to an existing town, there will be some advantage in respect of meeting the preliminary industrial requirements, since the necessary stores, workmen's dwellings, &c., would, in part, be already provided.

Design of City.

The main approaches to the public buildings should be of an imposing character. *Triple avenues of good width* would probably fulfil this condition.

The question of width of streets will, to some extent, depend upon the Site and local requirements. To have unnecessarily wide streets throughout would be a serious mistake.

The whole question of the general form of the city design is so dependent upon the topographical features, including the grades, &c., of the selected Site, that it is impracticable to further discuss anything so problematical.

Building

Building Materials.

Building Stone.—So far as is at present known, there is no suitable stone other than that at Sydney, the cost of working which is about one-half that of the Stawell stone of Victoria.

Wherever the Site may be, the advantages possessed by the Sydney building stone are such as to indicate that, in the absence of further discovery, it should be used for the façades of all the principal buildings, in conjunction with the harder stones, such as granite, marble, trachite, and bluestone for special features.

The Hawkesbury sandstones have, however, not been adequately explored ; and it is desirable that wherever a good building stone is believed to exist the beds should be tested. As far as is known to us, Katoomba and Bundanoon offer the most promising fields for exploration.

With regard to the Sites mentioned viz., those referred to hereinafter, there is a great poverty of good building stones. The obvious advantages of being able to use a local stone suggests the desirability of thoroughly exploring the formation nearest to the selected Site.

Trachyte and granite would form suitable materials for street purposes. . . . The Southern Sites are better supplied in respect of these stones than the Western Sites.

Brick.

The quantity of brick that must be used must necessarily be much greater than that of stone. Brick earths, however, are likely to be found in sufficient quantities in close proximity to any of the suggested Sites. . . . Modern machinery can produce bricks of good quality even out of what seems unpromising material.

With regard to timber, there is none suitable, in sufficient quantity, on any of the Sites mentioned. The question of timber supply does not, therefore, affect them.

Lime may be obtained within accessible distances of all the Sites.

The Schedule on the following page enumerates the buildings that will probably be necessary, their assumed cost, and the number of years required to complete them, *i.e.* after the necessary arrangements have been made for access, water-supply, and sewerage, and the housing of operatives.

Schedule.

Houses of Parliament	... £750,000	7 years.	Minor Departments, <i>e.g.</i> —		
Governor-General's Residence..	75,000	3 "	Finance and Trade	..	
Post Office	... 100,000	3 "	Fisheries	
Custom-House	... 50,000	2 "	Health	80,000 3 years.
Secretariat	... 80,000	3 "	Statistics	
Military Academy		Patent and Copyright	
Barracks		Audit, &c.	
Commandant's Residence	... } 200,000	4 "	Premier's Official Residence	... 10,000	1 year.
Arsenal and Factory	... }		Minister for War	... 7,600	1 "
Treasury	... 50,000	2 "	Treasurer	... 7,500	1 "
Courts of Justice		Attorney-General	... 7,500	1 "
Law Offices, Federal	... } 300,000	5 "	Laying-out City, &c.	... 250,000	
Records House, &c.	... }				
National Hall, with Art Gallery and Library	... 150,000	10 "			
				£2,117,500	

In view of the long interval of time that must elapse before the Houses of Parliament could be completed and ready for occupation, it is desirable that temporary accommodation should be provided. This could be ready in three years—that is, in about the time required for the erection of the major portion of the administrative buildings.

Relative cost of building on different Sites.

Taking the foregoing estimates as the average for all, the following will indicate the relative cost of the different Sites, Bathurst and Goulburn being bracketed as equal and taken as unity:—

Bathurst-Goulburn	1·00
Millthorpe-Yass	1·04
Orange	1·05
Albury (if supplied from Melbourne)	1·05
Albury (if supplied from Sydney)	1·12
Wagga Wagga	1·10
Bombala	1·15

The high cost of building at Bombala might be reduced if, for other purposes, coastal facilities were provided, with Eden, perhaps, as a port.

We have, &c.,

G. ALLEN MANSFIELD, F.R.I.B.A.,
Chairman.

W. L. VERNON, F.R.I.B.A.,
Government Architect.

JOHN BARLOW, F.R.I.B.A.,
Pres. Inst. Architects, N.S.W.

GEO. H. KNIBBS,

Pres. Inst. Surveyors, N.S.W., Sur. Lecturer, University of Sydney.

His Honor, Alex. Oliver, Esq.

Federal Capital Site.

Dear Mr. Oliver,

Sydney, 17 September, 1900,

In accordance with your request, we have reconsidered the matter of the Bombala Site; and we are of opinion that if the Eden-Bombala railway were constructed, and deep water port formed, the cost of building there would be about equal to the cost of building at either Millthorpe or Yass, viz., 1·04 as compared with Bathurst and Goulburn, which, as before, are taken to represent unity for the purpose of comparison.

We are, &c.,

G. ALLEN MANSFIELD, F.R.I.B.A.
W. L. VERNON, F.R.I.B.A.
JOHN BARLOW, F.R.I.B.A.
GEO. H. KNIBBS.

To His Honor Alex. Oliver, Esq.

(D.)

New South Wales, Department of Navigation,

Sydney, 22 August, 1900.

Sir,

I have the honor, by direction of the Superintendent, to acknowledge receipt of your letter of the 17th instant, and in reply beg to state that the following are the distances in nautical miles by steamer's course between the places mentioned below :—

Perth and Albany	385 miles.
Albany and Twofold Bay, <i>via</i> Adelaide and Melbourne	1,882 "
Twofold Bay and Sydney	208 "
Adelaide and Sydney, <i>via</i> Melbourne	1,072 "
Melbourne and Sydney, wharf to wharf	577 "
Hobart and Sydney	630 "
Launceston and Sydney	544 "
Brisbane and Sydney	510 "

If I can furnish any further information, I shall be happy to do so.

I have, &c.,

Alex. Oliver, Esq., President's Chamber,
Land Court of New South Wales.

NORMAN C. LOCKHART,
Secretary.

Part IV.—Reports on Sites.

ALBURY SITE.

Statement of Case.

THE following topographical description of Albury and the adjacent district has been furnished by Mr. Topography. Staff-Surveyor Barlow, of Albury :—

“The town of Albury is situated on the right, or northern, bank of the Murray River, at the historical spot where the explorers, Hume and Hovell, first crossed the stream on the 17th November, 1824, on their journey from Yass to Port Phillip. It is distant about 90 miles, as the crow flies, or about 390 miles by stream, from the sources of the Murray River, which take their rise in the Munyang Range of the snow-clad Australian Alps, near Mount Kosciusko, the average height of this range being 6,000 feet above sea level.

“Albury is on the Main Trunk Railway Line connecting Sydney and Melbourne. It is prettily situated in a basin almost surrounded by an amphitheatre of low hills, and fertile flats extend for several miles on either side of the Murray River. The most extensive and pleasing views of the town and the winding valley of the river can be obtained from either end of Dean-street, from a point of the Hospital Hill on the west, and from Schuback’s Hill on the east; also from Poole’s Hill on the north, and from Fallon’s vineyard on the north-east.

“The proposed Federal City Site extends from the town boundaries northerly and easterly. On the north, the country is slightly undulating, having a gradual rise northerly to the foot of a range of low hills, locally known as the “Black Range” (the average height above sea-level of this range being 1,500 feet), and distant from 4 to 5 miles from the town boundary. The area is timbered with box and apple, and the soil alternates between rich red loam and decomposed felspathic granite. The average height above sea-level of this area is about 700 feet. It is drained by the Bungambrawatha Creek, which empties itself into the Murray River below the present town settlement.

“The hills on the north, which are of granite and slate formation, extend back for about $1\frac{1}{2}$ miles, and the country then opens out northerly towards Jindera and Gerogery, being slightly undulating and of excellent quality for either grazing or agriculture. On the north-east of the town of Albury, along the old Sydney Road, and between Schuback’s Hill and the Black Range, the country opens out into a wide expanse of undulating and well improved vineyard and grain lands, lightly timbered with box and apple, the soil being rich red loam. This description of country extends north-easterly to the village of Bowna (12 miles), and for a considerable distance beyond. The river flats lying to the south and east of the town of Albury are from a mile to $1\frac{1}{2}$ miles wide, and are timbered with red gum; they are liable to partial inundation, and are exceptionally rich grazing lands. On the Victorian side of the Murray River, in the neighbourhood of Albury, the river flats extend back for about 2 miles. Rough ridges of granite and slate formation, heavily timbered with box and stringybark, are then met with, extending back for a considerable distance, but intersected by numerous fertile valleys, such as those of the Kiewa and Little Rivers, the Yackandandah, Talangatta, Middle and Indigo Creeks, which all empty into the Murray River.

“The country on the Victorian side gradually rises from Albury until the Victorian Alps are met with, the principal elevations, with their heights above sea level and distances from Albury, as the crow flies, being as follows :—Mount Bogong, 50 miles, 6,508 feet; Mount Hotham, 65 miles, 6,100 feet; Mount Feathertop, 57 miles, 6,303 feet. These mountains are covered with snow for four or five months during the year—the snow being plainly visible from Albury.

“The town of Beechworth, with its salubrious climate and an elevation of 1,775 feet above sea-level, is distant 28 miles by road and 71 miles by rail from Albury, and the Victorian sanatorium of Bright is distant 45 miles by road and 96 miles by rail.

“The Murray River, as previously mentioned, takes its rise in the Australian Alps, in the vicinity of Mount Kosciusko, the highest point of the range, 7,328 feet above sea-level, and is, therefore, fed by the snow waters from the western falls of the Alps. The snow waters from the Victorian Alps (Bowna Mountains) also flow into the Murray above Albury, the principal tributaries on the Victorian side being the Limestone, Thowgla, Curryong, Wabba, Cudgewa, Burrowa, Cooyetong, Talangatta, Yackandandah, and Middle Creeks, and the Indi, Mitta Mitta, and Kiewa Rivers. The principal tributaries on the New South Wales side are the Kankoban, Swampy Plains, Spring Flat, Tooma, Maragle, Tumberumba, Mannus, Coppabella, Jingellic, and Bowna Creeks.”

The proposed Federal Territory Site, comprising 64,000 acres, is shown by red edging, and the Capital Site by blue edging, on the Map of Albury Site (marked B, in Appendix), from which it will be seen that the Territory Site is nearly equally bisected by the Main Trunk Railway to Melbourne. That line also intersects the proposed Capital Site. The Murray River forms the southern and eastern boundary of the larger area.

The mean temperature for * years shows for the summer quarter, 77·1; for the autumn, 53·7; Climatic conditions (temperature). for the winter, 51·3; and for the spring, 66·9. According to the evidence of one witness, the temperature in one year, 1865, rose to 118°, but had never approached that degree of heat since. Between 1872 and 1899 the highest recorded shade temperature was 117·3 in 1878, and the lowest on same day was 67·3. The character of the climate (from a health standpoint) is thus given by Dr. Andrews, the resident medical officer :—“Albury is as healthy as any district in the Colony. No complete mortality tables exist, but the death-rate among the younger members of the community is very low. Albury is used as a health resort. Epidemics and infectious diseases do not trouble the district much, and it is free from diphtheria and typhoid; very little rheumatism or rheumatic gout. Had recorded the temperature for many years. The lowest drop in temperature would be 60° or 65°. The maximum period of heat is confined

* The period of years for which these figures were given is not stated.

confined to about six or seven weeks in the summer. Sunstroke and heat apoplexy were rare. The heat is rarely oppressive during the day. It is not a depressing heat, but rather a stimulating, dry heat. The winter climate is perfect."

The evidence of this witness was corroborated by other resident witnesses, who agreed that January and February were the hottest months, but that even the summer heat was dry and healthy, and not relaxing.

Altitude. The height of the Albury Railway Station is 534 feet above sea level; but, according to Mr. Staff-Surveyor Barlow, the average altitude of the proposed Federal Territory would be 700 feet above sea level, and a height of between 1,500 and 2,000 feet is gained at a distance of 15 to 25 miles from the proposed Site.

Rainfall. The mean annual rainfall, as given by the Government Astronomer, is 28.82 inches. These figures cover a period of thirty-five years. The evidence shows that the rainfall is fairly well distributed over the four quarters of the year, and had never fallen in any one year below 20 inches.

Accessibility.

Albury is distant from Sydney by rail (main trunk)	386 miles.
" " Melbourne by rail (main trunk)	190½ "
" " Adelaide (approximately) by rail	700 "
" " Brisbane	900 "
" " Hobart	670 "
" " Perth	2,000 "

from Wagga, 77 miles; from Corowa, 35 miles; from Germanton, 36 miles; from Beechworth (Victoria), 28 miles; from Wodonga (Victoria), 3 miles; from Talangatta (Victoria), 29 miles; and from Curryong (Victoria), 80 miles. Mr. District-Surveyor Orr reports of the roads that they are good in all directions, both on the New South Wales side and the Victorian side. The Main Southern Road, and other leading roads centreing at Albury, are formed, made, and for the most part macadamised, and generally excellent means for intercommunication are provided to the adjacent towns and settlements.

Albury is accessible by water from Adelaide, and all points in the basin of the Murray, by that river, which is navigable for the greater part of the year.

Physical conditions (soil). The soil, largely of a reddish chocolate colour, is described as very fertile and suitable for the successful growth of cereals of all kinds, fruits, lucerne, tobacco. The alluvial flats on the river bank are particularly rich, and provide abundant pasturage for stock.

It is claimed that the soil of this district is specially favourable for the production of wine, and the area under vines is said to approach 1,000 acres.

Water supply and catchment. An abundant and permanent water supply is provided by the River Murray; but it appears from the report of Mr. C. E. Blomfield, who, in company with the Commissioner, examined the River Murray as far up as Talmalmo, 52 miles by road from Albury, that this point is only 125 feet above the Albury Railway Station, and 45 feet below the top of the present reservoir; and that Officer's conclusion is that a pumping scheme would have to be adopted for Albury if it should be chosen as the Federal City. (See Annexure—Albury, 1.)

Attention is also invited to an extract from Colonel Home's Report (Annexure—Albury, 2). It may be mentioned that neither Mr. Blomfield nor the Commissioner visited Murray Gates.

Information of the discovery of an efficient gravitation water supply from the Mitta Mitta River, in Victoria, was transmitted, together with a plan of the catchment, some time after the holding of the public inquiry at Albury; but whatever power the Commonwealth may have to acquire a catchment area situate outside its territorial limits, it is clear that the Mitta Mitta catchment could form no portion of the Territory situate in New South Wales which will be ceded to the Commonwealth.

Building material. Granite of good quality for building purposes, and in unlimited quantities, together with useful freestone and excellent clay for brickmaking, are said to exist within or in close proximity to the proposed Site; also of timber—red-gum, blue-gum, box, pine, mountain-ash, and stringy-bark. Lime is obtainable from limestone, at a distance of about 20 miles.

Drainage. The Site possesses good facilities for drainage as a whole, the surface formation being favourable.

Other physical features. The subsoil is described as solid, and affording good foundations. The Site is sheltered from high winds by the surrounding steep granite hills. It is distant about 80 miles in a direct line from Mt. Kosciusko, the highest peak in New South Wales; and on the Victorian side of the river, to the north-east, the Sanatorium of Beechworth, 2,000 feet above sea-level, can be reached in an hour's journey by train. The Buffalo and Bogong Mountains are also within easy reach.

Ownership and value. The area of alienated land is given as 50,200 acres, valued, as improved, at £452,980. The area of Crown lands is given as 13,800 acres.

Miscellaneous conditions. The following extract from the Report of the Albury Federal League supplies all necessary information on this head:—

"(a) The character of the country within a radius of 60 miles of Albury is admirably adapted to the production of food of all kinds. The country is principally occupied by station-holders and farmers, and in the Albury Sheep District alone, comprising an area of 856,121 acres, there are, according to the latest returns, 14,686 cattle, 573,000 sheep, and 1,772 pigs. The carrying capacity of the country as grazing land is estimated at one sheep to the acre, besides cattle and horses. Agriculture is largely practised in the district, all sorts of cereals being grown—wheat, barley, oats, sorghum, and lucerne being the chief. The estimated average yield of the land under crop is three bags to the acre. The land also produces abundance of fruit—the mulberry, orange, apple, peach, apricot, plum, cherry, walnut, and vines; the vines being world-wide in their reputation. The river flats are well adapted to the cultivation of vegetables, and the River Murray supplies fish in abundance. Area under crops is estimated at about 157,000 acres; under vineyards, 1,000 acres."

"(b) The mineral products of the country are gold, silver, and tin, no coal being produced in the neighbourhood, although boring operations were contemplated some years ago. It is anticipated that the increased price for tin, and the new legislation as to gold-dredging, will greatly increase the output of these minerals."

"(c) The country is well able to support a very large population, being, at present, a very large exporter of wheat, wool, tallow, hides, sheep, cattle, and pigs; and as, at present, intense cultivation is not practised by the farmers, there is no doubt that closer settlement would result in a greatly increased production, the soil being very rich."

"(d)

“(d) The conditions are very favourable to commercial and industrial development, the businesses of wool-selling, milling, tanning, dairying, and brewing being at present carried on; and, with increased facilities, each of these businesses would be greatly increased. There is also every facility for woollen mills, boot-factories, freezing works, and various other factories, the country producing the various articles required, and the district affording opportunities for the successful carrying out of extensive manufactures.”

ANNEXURES.

Albury, 1.

To the Federal City Commissioner, Land Appeal Court,—

Sir,

Department of Works, Sydney, 6 June, 1900.

The results of my investigations of the River Murray, above Albury, of 26th, 27th, and 28th ultimo, tend to show that a gravitation scheme for Albury as a Federal City would be out of the question.

The Murray River, at north-east corner of portion 21, parish of Talmalmo, county of Goulburn, 52 miles by road from Albury, is only 125 feet above the Albury Railway Station,—that is, 45 feet below the top of the present reservoir; so that a pumping scheme would have to be adopted for Albury if it is chosen as the Federal City.

CHARLES E. BLOMFIELD,
Resident Engineer, Department of Works.

Albury, 2.

EXTRACT from Colonel Home's Report.

17. From an inspection of the river above Albury, and inquiries made on the spot, it appeared that there were not many places where a large volume of water could be impounded at all at a reasonable cost, the only likely sites heard of being above the Murray Gates, on the Swampy Plain River, in the county of Selwyn, and at Talmalmo, on the Murray River, in the county of Goulburn. Subsequent inquiries and rough surveys by Mr. Scaver confirmed this idea, it having been ascertained that a third site, at Tom Grogan's Flats, on the Indi River, was too inaccessible to be any use; so that the choice seems to lie between these two. The Murray Gates Site has the advantages of being entirely in New South Wales, of a narrow gorge in hard granite rock, and of only one small patch of land to be resumed; its disadvantages are—being a long distance from the head of the proposed canal, and somewhat difficult of access, and a possible difficulty in obtaining sufficient quantities of sand. The Talmalmo Site is only 60 miles by road from the head of the proposed canal, would require a comparatively low weir, and has a fine basin for storage above it; but a large area of valuable land and some houses would be submerged in both New South Wales and Victoria. The roads on both banks would have to be shifted to higher levels. The length of the dam would be about 1,400 feet, and the quality of the rock is not very good. As far as can be judged from the rough surveys, the required storage might be possibly obtained at either site without exceeding the height of dams that have already been constructed, but the cost at Talmalmo would probably be double that at the Murray Gates; so the latter site should be given the preference if a detail survey is undertaken.

BATHURST SITE.

Statement of Case.

THE Federal Territory, as proposed by the Bathurst Federal Site Committee, embraces an area of Topography. 100 square miles, or 64,000 acres, and its position, as well as that of the proposed Site for the Federal Capital, will be understood by referring to the Map of this Site, marked C, in the Appendix; the Territory being therein edged red and the Capital Site blue. The City of Bathurst is included in the larger area, but not in the Capital Site.

The following Topographical Sketch has been supplied by Mr. Clunies Ross, B.Sc. Lond., F.G.S., Resident Master in charge of the Technical College, Bathurst:—

“Bathurst, sometimes designated the City of the Plains, is a municipal city, commandingly situated on the west bank of the Macquarie River, in the county of Bathurst, at a height of about 2,200 feet above the sea. The population of the municipality, in 1898, was 9,450; of the county, 30,143. On the east side of the Macquarie, opposite Bathurst, and forming a suburb, is the village of Kelso, in county Roxburgh; population of Roxburgh, 9,162. Area of the Bathurst municipality, 2,560 acres. These figures are compiled from the Statistical Register for 1898.

“Bathurst is on the Main Western line, 145 miles from Sydney by rail. In a direct line, as the crow flies, the distance is about 98½ miles. It is slightly to the north of a line drawn due west from Sydney. The city is laid out in streets crossing at right-angles, each 1½ chain wide, running north east-south west and north west-south east.

“The ground on which the city is built slopes up gently from the river, and the highest parts are about 150 feet above it. From the top of the hill behind All Saints' College a very fine view of the basin of the Macquarie may be obtained, and it is seen that the river is bordered by rich flats of deep soil, mostly under pasture or lucerne. A general view of the greater part of Bathurst is also obtainable from the same point. The houses are generally built of red brick, locally made. The river runs in a broad and deep channel, which it seldom fills, and is spanned by a good bridge which connects Bathurst with Kelso. A short distance below the bridge, the Vale Creek, which skirts the southern side of Bathurst, enters the Macquarie.

“The city is divided into 10-acre blocks, several of which are reserved for public recreation. These are planted with trees, and one, Machattie Park, is beautifully laid out and contains a handsome fountain, ornamental lake, fern-house, and aviary. All the principal streets have the footpaths asphalted, and many are planted with trees—elms, white cedar, and pepper trees being chiefly used. The roads are made up of broken basalt (blue metal), obtained from the Bald Hills, just outside the town. The soil on which Bathurst is built is mainly decomposed granite, which breaks up into coarse sand. This very quickly dries, and there is seldom much mud in the streets. In the lower parts there are some beds of clay and alluvium, probably brought down by creeks, one of which, the Jordan Creek, runs through the town.

“There are terraces of gravel, consisting of quartz, pebbles, and sand, carrying a little gold, at various heights on both sides of the Macquarie.

“Outside the city, the Bald Hills are conspicuous. These are about 2 miles from the centre of Bathurst, to the south-west and south, and rise to about 650 feet above it. From the top one obtains a good view of the town, with its more conspicuous buildings, such as the Colleges, Court-house, Cathedrals, and Churches, and of the surrounding country—the Bathurst Plains. They would be more correctly described as downs, since there is very little level country, but the ground rises into gentle undulations. From the Bald Hills the course of the Macquarie may be traced from White Rock, about 6 miles above Bathurst, where it is formed by the junction of the Fish and Campbell Rivers. These rivers rise about 40 miles away in the Swatchfield district.

“The

"The Bathurst Plains are nearly all under cultivation, and are surrounded, except for a gap between the two rivers abovementioned, by dark hills, closely timbered, which rise with a steep slope to a height of from 1,000 to 2,000 feet above Bathurst. These hills, which really form a tableland, broken by deep gullies, consist of old Silurian rocks, capped to the east by Devonian rocks of rather later age. At the foot of the hills, to the east of Bathurst, is the valley of the Winburndale Rivulet, which drains most of the country in that direction, and, after receiving many tributary creeks, falls into the Macquarie, about 15 miles below Bathurst.

"The Bald Hills themselves have a capping of about 250 feet of columnar basalt, resting on beds of gravel, fireclay, and sand, which in turn rest on the granite. They stretch away with a nearly level surface to about the village of Perth, situated about 6 miles to the south of Bathurst. To the north-west, a series of detached hills may be seen, mostly with a thin capping of basalt, the last being Mount Pleasant, at the foot of which is the residence of James Stewart, Esq. To the west, the hills slope steeply down to Evans' Plains, drained by Evans' Plains Creek, which enters the Macquarie near Mount Pleasant. To the south lie Perth and George's Plains, and beyond the hills rise, about Cow Flat, 12 miles away; beyond which, again, is Rockley, about 10 miles further south.

"As the Silurian hills are, at least, 10 miles from Bathurst in any direction, the view from the Bald Hills is a very extensive one, and, from the large amount of cultivation, indicates a very rich and fertile country, especially in spring, when the green of the young crops contrasts finely with the dark forest of gum-trees on the hills.

"The granite area around Bathurst is mainly devoted to wheat-growing, and the soil appears to be tolerably uniform, except on the alluvial flats and in the neighbourhood of the Bald Hills, where it is modified somewhat by the downwash from the basalt. The basalt is an old lava which flowed from a volcano a long distance away, probably near the sources of the present Macquarie, but which has been completely denuded from nearly all the intervening country.

"On the Silurian rocks there is little cultivation, except near the rivers and creeks, but sheep are grazed; and a good deal of mining is carried on, there being numerous quartz veins, some auriferous, and a considerable number of copper lodes.

"The granite, in places, is solid at the surface, and most of the undulations appear to have a core of rock less altered than that on the lower ground. It may be described in popular language as a grey granite, approximating in character and appearance to the well-known Scotch granite of Aberdeen. The Silurian rocks are mainly of a slaty character, much altered to the north and south; less so to the east and west. They include some thick beds of limestone, several of which form handsome marbles—white, red, bluish, and nearly black—when polished.

"The Silurian rocks stretch away for a long distance to the north, south, and west of the Bathurst area. To the east they soon pass under the Devonian rocks, and further away, in the Wallerawang and Lithgow districts, Carboniferous rocks and Coal Measures come in, resting on Devonian rocks or directly on the granite.

"The climate of Bathurst is similar to that generally characteristic of the Tableland. The summer is moderately warm, but the temperature seldom rises above 100 degrees, and, the air being dry, the heat is not usually oppressive. The winters are cool, but frosts are usually slight, and snow seldom falls, only two heavy snowstorms being recorded for over twenty years. The prevailing winds are from the west, and most of the rain comes from that quarter."

The mean temperatures for the Summer, Autumn, Winter, and Spring quarters for the years 1896–1899, are given as $84\frac{3}{4}$ degrees, $63\frac{3}{4}$ degrees, $61\frac{1}{2}$ degrees, and $83\frac{1}{2}$ degrees respectively, and these quarterly means show a general mean of about 73 degrees. These figures should indicate a very uniform climate as to temperature. The highest temperature recorded was on 3rd February, 1897, and reached 106 degrees, while the lowest, 20 degrees, was recorded on the 10th May of the same year.

The average annual rainfall for the past forty years is $24\frac{3}{4}$ inches. The best rainfall recorded since 1879 is that for 1890, which reached $34\frac{1}{2}$ inches; the worst is that for 1888, which was no more than 15.05.

The mean altitude of the area of the Federal Territory Site is approximately 2,300 feet above sea level; that of Bathurst 2,200 feet. The height of Bathurst Railway Station is 2,155 feet above sea level.

A sketch map, prepared under the direction of the Chief Surveyor (see Map, marked A, in Appendix), shows the radial line, measured from the western boundary of the City of Sydney, as intersecting the Federal Territory Site and including the City of Bathurst, if the prescribed distance as laid down in the Commonwealth Act is to be measured by the crow's flight, or direct-line rule. The distance of Sydney from Bathurst by that rule is given at $98\frac{1}{2}$ miles. The distance by rail from Sydney is 144 miles 70 chains (in round numbers, 145 miles), and by road 124 miles.

Mr. J. B. Suttor, Railway Engineer to the Commissioners (a witness at the Public Inquiry), put in evidence the appended Return of mileage distances:—

Bathurst to Sydney	145 miles.
Bathurst to Brisbane, <i>via</i> Sydney	868 "
Bathurst to Brisbane, <i>via</i> the proposed line from Wellington to Werris Creek,					
702 miles, made up as follows:—					
Bathurst to Wellington	103 miles.
Wellington to Werris Creek	130 "
Werris Creek to Brisbane	469 "
702 miles.					
Bathurst to Melbourne, <i>via</i> Harden, 483 miles, viz. :—					
Bathurst to Blayney	27 miles.
Blayney to Demondrille	110 "
Demondrille to Melbourne	346 "
483 miles.					

Adelaide, being 483 miles from Melbourne, the distance from Bathurst to Adelaide, *via* Melbourne, would equal 966 miles. Bathurst

Climate (tem-
perature).

Rainfall.

Altitude.

Accessibility.

Bathurst to Adelaide, *via* the proposed line from Cobar and Broken Hill, equals 894 miles, viz. :—

Bathurst to Cobar...	314 miles.
Cobar to Broken Hill	260 "
Broken Hill to Adelaide...	320 "
					894 miles.
Hobart to Bathurst, <i>via</i> Sydney...	775 miles.
Hobart to Bathurst, <i>via</i> Melbourne	968 "
Perth to Bathurst, <i>via</i> Adelaide and Melbourne	2,298 "
Perth to Bathurst, <i>via</i> Sydney	2,532 "

Bathurst has no river or water communication.

This is described geologically by Mr. Ross as being principally a decomposition from hornblende granite or granitite, but with basaltic outflows in places, and limestones at a distance of about 20 miles from Bathurst. (See Report on Geology of Bathurst and its neighbourhood,—Annexure—Bathurst, 1.)

The river flats, resulting from continuous downwash from the basalts, should be very fertile, and much better able to withstand exhaustion than the granitic soils. Mr. Dunnichiff, manager of (Bathurst) Government Experimental Farm, stated in evidence that cereals thrive in this district, especially wheat and oats, and that about 10,000 acres of the proposed Federal Territory are under crop, and, under a better system of farming, would average 12 bushels of wheat to the acre; and another witness, Mr. W. G. Thompson, secretary of the local Agricultural Society, stated that wheat grown in this district went as high as 67½ lb. to the bushel. A third witness gave 20 to 25 bushels as the oat crop per acre; and there was a concurrence of testimony in favour of the soil of the district for all kinds of root crops and for fruit growing, especially for English fruits. It was also an excellent stock fattening country. According to Mr. Patterson, head gardener to the municipality, the soil in the proposed area is, on the whole, fertile; some of it had been under crop for sixty years, and was still unexhausted.

I may add that, as far as my observations are of any value, I came to the conclusion, after a good many opportunities for judging, that for a granitic soil, which is the principal formation on the Federal Territory Area, it is a fairly good one, and with proper fallowing and moderate restoratives ought to continue such.

Bathurst has not enjoyed a good reputation for its municipal water supply, which is obtained by means of pumping, and is said to be, occasionally, intermittent. The Committee have, therefore, looked to other sources for the supply of the proposed Federal City. (See evidence of Mr. E. T. Webb, and Annexure—Bathurst, 4; also of Mr. R. S. Gilmour, Mayor of Bathurst, and of Messrs. T. McPhillamy, Paterson, and others.) A good deal of evidence on independent catchments was taken at the public inquiry, but as it appeared desirable to have the various Sites relied on examined by an expert, that task was undertaken by an officer of the Works Department, Mr. Blomfield, but as he did not report favourably on either the Apsley, Fish River (Locksley), or Bathampton Creek Sites as capable of providing a gravitation supply (see his Report, Annexure B2), he was instructed to make an inspection of another Site at Wallbrook Swamp, about 27 miles in a direct line from Bathurst, on the Campbell's River; and it was ascertained that, as regards head, this catchment would be 900 feet above the Bathurst Railway Station, by a dam 70 feet high and a length on the crest of about 250 yards, and give a collecting area of about 70 square miles. His Report on the Wallbrook Site is most favourable (see Annexure—Bathurst, 3). The pipe-line course would be, perhaps, 35 miles in length. It is claimed for the Wallbrook scheme that the catchment is almost wholly Crown land and very clean, and that there is a suitable locality for a service reservoir, about 10 or 12 miles distant from Bathurst, and 150 feet above that city. The site of the proposed weir is stated to be basalt, with a good foundation; and Mr. Gilmour estimates the cost of the pipe line, exclusive of the weir, at about £2,000 per mile.

The evidence on this subject tends to show that excellent granite for building purposes can be obtained in any quantities at Locksley and other places, and that basalt is plentiful, but there appears to be no freestone nor sandstone nearer than Lithgow, and no Carboniferous rocks in the vicinity of Bathurst. It was thought by Mr. Ross that the Bathurst granite would prove superior to that of Moruya. Excellent marbles are to be obtained within easy distance of the proposed Capital Site; but though many of the samples produced by Mr. Roberts (retired Government District Architect) were very beautiful and suitable for internal work, there was none suitable for exterior facings, if such were thought desirable, for the more important Federal Buildings,—architecturally much disputed. The columnar and other basalt from the Bald Hills appears to be too curly for working. Ordinary limestones for the manufacture of lime are abundant; and for brickmaking the best of clays are close at hand, and the bricks from these clays are, it is stated, of good colour and impervious to damp. Sharp sand and shingle are easily obtainable in any quantities. Slate good enough for flagging can be had. As to timber, the supply for building purposes about Bathurst was meagre, and would have to come from distant districts.

In connection with building materials, Mr Roberts' evidence went to show that good foundations for the heaviest buildings could be obtained by going down to the substratum of decayed granite, presumably because this "rotten granite" does not contract or expand like the clays which have caused so many Bathurst buildings to show cracked walls.

The Drainage of the proposed Federal Capital Site was stated to be good, although that of Bathurst at present is not good, though it might be.

The area of Crown lands within the proposed Federal Territory, as given by Mr. Paterson, is 1,421 acres, not including reserves or parks vested in trustees. Inside the municipal boundaries the aggregate value of improved land is estimated at £913,184, and of unimproved land within the same limits, but exclusive of reserves, the Model Farm, and Crown land, is £18,263. The balance of the Federal Territory, outside the municipality, is valued at £4 per acre, as improved.

The advantages claimed for this Site in respect to Facilities for Food Supply and other matters under the head "Miscellaneous Conditions" are set out fully in the Summary of Evidence (see Part V).

ANNEXURES.

Bathurst, 1.

GEOLOGY OF BATHURST AND ITS NEIGHBOURHOOD.

THE City of Bathurst is situated nearly at the centre of an undulating tract of country, forming a tableland, at a height of about 2,200 feet above the sea, and surrounded, at a distance of about 12 miles, by higher ground, which reaches, to the east of Bathurst, about 2,000 feet above the city.

The surface rock all round Bathurst is granite, overlain in places by beds of river gravel, and on the Bald Hills, as well as one or two other isolated hills in the neighbourhood, by a capping of basalt, which is an old volcanic lava, and appears to have come from a considerable distance. The granite is usually much decomposed to some distance from the surface, but most of the undulations appear to have a core of less altered rock. Where fresh specimens of the granite are obtainable, as at Mount Pleasant, it is seen to be a rather coarse-grained rock, composed of crystals of quartz, orthoclase, feldspar, with some oligoclase, black mica, and hornblende. It might be called a hornblending granite or a granitite. It is a handsome rock, and has a fine effect when used as a building stone, as may be seen at "The Mount," the residence of James Stewart, Esq. Near the boundary of the granite area the rock changes its character, the feldspar becoming of a pinkish colour; there is less mica, and little, if any, hornblende. This may be well seen on the Orange-road, about 10 miles from Bathurst. Outside the immediate neighbourhood of Bathurst there are granites of several different types. One of these, at Locksley, about 16 miles east of Bathurst, is a very fine granite, carrying large crystals of deep red orthoclase in a fine-grained matrix.

At a distance of about 10 miles from the City one passes off the granite, which passes under Silurian rocks. The latter consists mainly of schists and slaty rocks, much bent and folded in places, and which run, roughly, north and south. Interbedded with the slaty rocks are beds of limestone in places. They are best seen to the north, in the neighbourhood of Limekilns, about 20 miles from Bathurst, and on the south between Cow Flat and Rockley, but occur in other places as well, as at Green Swamp, Wattle Flat, &c. The rocks have never been surveyed systematically, but it will probably be found that there are several bands of limestone, roughly parallel to one another. In the Limekilns area, the rocks, usually called marbles, are of very varied colours and markings, ranging from light brecciated rock with red patches through more compact limestone to others which are nearly black. These have already been obtained in large blocks, although only worked near the surface. In the Cow Flat area, white marbles predominate. At Bell's quarry, there is a face of quite 20 feet of pure white stone, jointed, but obtainable in large blocks, which analysis shows to be nearly pure calcite. There are also dolomitic limestones in the same area. In the neighbourhood of Rockley, Briar Park, a fine black and white encrinal limestone occurs.

From the country between the basins of the Fish and Campbell Rivers, the Silurian rocks have been denuded away for a long distance from Bathurst.

The hills to the east of Bathurst are capped with Devonian rocks, mostly soft sandstones, quartzites, and a few bands of impure limestone. These rocks dip to the east, and in the neighbourhood of Tarana, brown sandstones, which might serve as freestone, are found.

The basalt at the Bald Hills stretches for about 3 miles, forming a nearly level capping to the hills, at an average height of about 600 feet above the city. The foot of the Bald Hills is about 2 miles from the centre of Bathurst. The basalt is a rather fine grained columnar rock, with crystals of olivine and augite. It breaks with a bluish-black fracture, and at the Corporation quarry is a good deal decomposed, but further round, opposite Orton Park, it is more compact. The rock breaks into excellent road metal, and the columns form good kerbing for the streets. It has not been much used for building, but a few cottages are built of it, and, with white pointing between the blocks, have rather an attractive appearance.

Mineral Veins.—The Silurian rocks are traversed by many quartz veins, some of which are auriferous. Gold also occurs in other rocks—for example, in chloritic rock and dolomite, at Bunnamagoo, in the Rockley area. Copper lodes occur in several localities, notably Green Swamp, east of Bathurst, and around Cow Flat, where copper-mining was carried on for some time, and has recently been revived; also at Burruga, south of Rockley, and Wiseman's Creek. Silver has been extensively mined at Sunny Corner, and, probably, exists in other localities. Argentiferous galena has also been found near Newbridge, and manganese ore in several places. Some very large ironstone veins also occur at Newbridge.

Summarising, it may be said that gold, alluvial and reef, has been worked to the north—Wattle Flat, Sofala, and, farther off, Hill End; to the east—Glanmire, Fontana Reef, Napoleon Reef, Sunny Corner, &c.; to the south and south-west—Caloola, Back Creek, Bunnamagoo, &c. Copper: South—Cow Flat, Burruga; south-east—Wiseman's Creek; east—Green Swamp, and, I believe, occurs about Wattle Flat. Silver: Sunny Corner, Back Creek, Newbridge, and specimens of argentiferous galena from other localities. Manganese: Green Swamp, Back Creek, near Rockley.

Fine specimens of mica are obtained at Brewongle, and molybdenite also occurs there.

Some rather promising looking slate comes from Duramana, north of Bathurst, but has not been followed down.

W. J. CLUNIES ROSS, B.Sc., Lond.

Bathurst, 2.

REPORT by Mr. Engineer Blomfield.—Federal City Water Supply—Bathurst Site.

Goulburn, 4 April, 1900.

Campbell's River (Apsley Site, favoured by Bathurst people).

Storage very good; catchment very good; foundations good, but likely to be deep; dam expensive in itself, but inexpensive with regard to quantity of water it will hold back.

The principal point against this site is that it will be only partly a gravitation supply, being only 80 to 90 feet above the Bathurst Railway Station, and a lot of the town is above this level, so that pumping will be necessary.

Could supply 300,000 people safely.

Fish River (Locksley Site).

Storage good; catchment good; foundations very good, and only short weir required.

This site, though higher than the Apsley site (about 134 feet above Bathurst Railway Station), is not high enough for a total gravitation scheme.

Bathampton Creek.

Site about 200 to 250 feet above Bathurst Railway Station; catchment small; storage good; foundations good.

CHARLES E. BLOMFIELD,

Resident Engineer, Department of Works.

To the Federal City Commissioner.

Bathurst, 3.

MEMORANDUM from C. E. Blomfield, Department of Works, to The Principal Assistant Engineer, Water Conservation, Department of Public Works.

WATER SUPPLY FOR BATHURST AS A FEDERAL CITY—WALLBROOK SITE.

Sir,

Public Works Department, New South Wales, Water Conservation Branch, 24 July, 1900.

In accordance with instructions contained in attached paper, I made a flying visit to the Wallbrook site for Bathurst Water Supply, as a Federal City, on the 20th instant.

The site of the proposed reservoir is just below the junction of the Wallbrook Swamp with Campbell's River, near the north-west corner of portion 20, parish of Wallbrook, county of Georgina. The hills come in fairly close together, with a very big basin above, and a dam 70 feet high could be put in with a top length of about 250 yards. The formation is slate, and rock is showing on both sides, so that the foundations would most likely not have to go very deep; in fact, it is a good site for a large reservoir at reasonable expense.

The height of this site is nearly 900 feet above the Railway Station at Bathurst, so that there is ample head.

The catchment is good and clean, and there are nearly 70 square miles of it altogether. I was unable to obtain any rainfall records taken on the catchment area; but Rockley, about 9 miles away, has a good rainfall (17 inches lowest recorded), and, as the catchment is considerably higher than Rockley, it would most likely have a better rainfall.

If 1 inch of the annual rainfall on this catchment were stored, there would be sufficient, after allowing 10 per cent. for evaporation, to supply a population of 80,000 people at 30 gallons per head per day.

The distance from Bathurst in a straight line is about 27 miles, and the country is not very difficult.

Taking everything into consideration the proposal is very favourable.

CHARLES E. BLOMFIELD,

Resident Engineer, Department of Works.

Bathurst 4.

Bathurst, 4.

MR. E. T. WEBB'S EVIDENCE.

Bathurst Federal Water Supply.

THIS is a question of the greatest importance to the future Federal Capital; and as no town in New South Wales that is over 100 miles from Sydney has, at present, an adequate supply for the Federal City, it will be necessary for the Federal Parliament to provide same; hence it is of the greatest importance to have the Capital placed in a locality where, practically, an unlimited supply can be obtained. In this respect, Bathurst is most favourably situated, as there are two sources of supply within a short distance of the City—one by gravitation, and the other partly gravitation and partly pumping.

The gravitation scheme is what is usually known as the Winburndale supply. In this instance, high dams would have to be built to conserve the water, which would then be brought in open trenches and pipes to the town, a distance of between 12 and 15 miles. The water for this supply would be obtained from the Winburndale and Gulf Creek at a point about 600 feet above the City. This source of supply was favourably reported upon by the late Mr. Clark, but the estimated cost was more by £10,000 than the scheme carried out by the Government.

The other scheme is to dam Campbell's River, at the Lagoon. A dam here, about 50 feet high, and about $\frac{1}{4}$ mile long in the bottom, and not more than $\frac{3}{4}$ mile long at the top, would impound as much water as is impounded in the Prospect Dam, from which the Sydney supply is drawn; and, in order to increase the supply, it would only be necessary to increase the height of the dam, which could be done up to 100 feet. The water would be supplied by Campbell's River and its tributaries, some of which have never been known to be dry, and which drain an area of over 400 square miles. It would have to be brought about 9 miles by pipes to town, and would supply all places in the City not more than 50 feet above the Town Hall by gravitation. For the higher positions of the town, the water would have to be pumped to the present or new reservoir.

The nature of the country about the site of the proposed dam is of granite formation.

Since sending in our last Report, three places have been visited, with the object of obtaining a gravitation scheme for the City.

The first place visited was Bathampton, about 12 miles from town. Here there is a good valley which would contain a large volume of water if a dam was erected at a point where the hills come close together, and which is 211 feet above the Town Hall.

The water would be supplied by Forster's Valley Creek, and a small creek coming from King's Plains; drainage area between 30 and 40 square miles. If this place were chosen, it would necessitate the alteration of the Carcoar-road; also the resumption of a large area of valuable land.

The next place visited was Wallbrook, about 25 miles in a direct line from town, and 1,000 feet above the City. The supply here would be obtained from the Campbell's River and Wallbrook Creek; drainage area about 150 square miles. There is a splendid site for a dam and reservoir. A dam could be erected here capable of containing three to five years' supply for a population of 40,000 persons, allowing 30 gallons each per day. Dam 50 feet high would be about 100 yards in bottom and 300 yards at top. The reservoir here would be as large as the Lagoon, and, being so far from town, the land could be resumed at a reasonable price.

The next place visited was Brisbane Valley Creek, 16 to 17 miles in a direct line from Bathurst, and 600 feet, at least, above the Town Hall; drainage area about 50 square miles. The site for the dam here is the best that could be imagined. A dam 50 feet high would, in the bottom, be about 30 yards across, and the rock right at the surface; the top would not be more than 100 yards across. The capacity of the reservoir would not be so large as at the other two sites, but a dam 50 feet high would impound sufficient water for a town of 40,000 people for from twelve to fifteen months without any rain. The rainfall over the watershed is about 30 inches.

BOMBALA-EDEN (SOUTHERN MONARO) SITE.

Statement of Case.

THE Site (about 80,000 acres) proposed for the Federal Territory, and, within it of the Federal City, is Topography. situate in the county of Wellesley, and is distant in a direct line from the Port of Eden (Twofold Bay), about 50 miles, and from the Victorian Border about 20 miles. The Federal Territory Site includes the town of Bombala, but the Capital Site lies some 2 miles west of that town. In addition to this area it is proposed to offer about 10,000 acres at Twofold Bay, including Eden, and a strip along the proposed railway route from Eden to Bombala. Southern Monaro falls from the heights of Nimitybelle and the country west to the Australian Alps, in gently undulating stretches of lightly wooded downs and rolling plains, along the courses of the McLaughlin and Bombala Rivers, and of various rivulets having their sources in the Coast Range, towards Delegate and Victoria. It is intersected by the 37th parallel of south latitude and by the 149th meridian of east longitude. Its ridge or roof is at Nimitybelle, whence the country falls north towards Cooma and the Murrumbidgee, and south towards Bombala. Bombala is reached by coach from Cooma, the most southern station of the Goulburn-Cooma Railway, by a good road of 54 miles, and from Eden or the coast adjacent by three roads, *via* Tantawanglo, Big Jack, and Bondi, which ascend the Coast Range at the most accessible points. As might have been anticipated from its position, on an easy descending grade, with the Coast Range on one side of the plateau and the Snowy River Ranges, culminating in Kosciusko, on the other, this tract of country is bountifully supplied with rivers and watercourses, all of which eventually find their way to the Snowy River, and so through Gippsland to Orbost and the ocean. Though long settled, chiefly, however, for grazing purposes, Southern Monaro has not attracted the notice to which its physical endowments entitle it, while the distance of markets from the best agricultural areas has made ordinary farming an unprofitable business. But for this serious drawback, Southern Monaro might be the agricultural replica of Orange. At present it is almost entirely devoted to the depasturing of sheep and cattle.

The vast tracts of sterile mountainous country lying between Bairnsdale and the Victorian Border have been an effectual barrier to any exploitation by Victorian settlers of this part of the Monaro Tableland; but this great barrier to intercolonial trade would be removed if the Victorian Railway, of which the terminus is now Bairnsdale, were carried to the border, near Bendoc or Delegate, and signs are not wanting that this extension only awaits a corresponding extension on the part of New South Wales of the Goulburn-Cooma Line to the Victorian border.

From observations and information furnished by the Government Astronomer extending over a Climatic conditions (Temperature) period of ten years, the mean maximum is given at 68°, the mean minimum at 40·8. The hottest month average is 81·1, and the coldest 29·5; and the average for the seasons is—Spring 55·6, Summer 66·1, Autumn 56·1, Winter 43·6. The average night temperature is Summer 50·3 and Winter 31·4. During the last heat wave, the thermometer did not reach 100° in the shade on the hottest day. Sometimes 10° or 12° of frost are recorded. Snow falls in the district, but seldom lies on the ground all day, except on the higher land. Unpleasantly cold winds are experienced in winter, but they are infrequent and of short duration. During the summer, sea breezes set in about 4 o'clock in the afternoon, which reduce the heat and

and are exhilarating and refreshing. As a rule, the nights are cool, and it is stated that mosquitos and sand-flies are unknown. The comparatively mild climate of Southern Monaro (Bombala) is attributed, partly to the proximity of the sea, and partly to its position, and the fact that it is to some extent sheltered from the westerly and south-westerly winds blowing off the Snow Mountains.

Eden, which is embraced in the Southern Monaro Scheme, has a cool and equable climate, owing, no doubt, largely to its maritime situation and latitude.

Rainfall.

The annual average rainfall is about 29 inches. This is the average for the past ten years, which includes the recent drought sequence, which would give, perhaps, an average of 20 inches. The rainfall at the sources of water supply would average over 30 inches.

Altitude.

The mean altitude of the Territory Site would be about 2,400 feet above sea level, the highest points reaching 2,800 feet and the lowest 2,250 feet above that level.

Accessibility.

The proposed Site would be distant from Cooma Railway Station about 60 miles, and from Sydney, by rail and coach, 325 miles; from Melbourne, by present railway routes, 573 miles, but, *via* Bairnsdale and extension to the Border, about 330 miles; from Adelaide the mileage distance would be about 804 by land and 900 by water; from Brisbane, 1,048 miles by land and 793 by water; from Hobart, by water, 360 miles, and by land and water, 420 miles.

In connection with these distances, and with the question of accessibility generally, it is an integral part of the Scheme to connect Eden with the proposed Federal Capital Site by a federally-owned railway; also to rely on the construction by Victoria of a connecting line from Bairnsdale (*via* Orbost, probably) to the Border. If this last-mentioned connection were in existence, the Bombala Site would be very nearly equi-distant between Sydney and Melbourne. As already mentioned, there are three roads from Eden to the South Monaro Tableland, with an average length of from 50 to 60 miles, and there are three railway routes proposed to reach Bombala from Eden, of which the two most favoured are estimated to cost, including stations, &c.—

	£
(1.) <i>Via</i> Wolumla, 81 miles 36 chains (Postle's route)	1,088,719
(2.) <i>Via</i> Bondi, 67 miles 9 chains	1,323,330

The first, or Wolumla, route, costing about £12,000, and the route *via* Bondi about £20,000, per mile, while there is a difference in favour of the more costly of the two routes—the Bondi route—of 14 miles. (See memo. of Mr. C. O. Burge to the Engineer-in-Chief, dated 20th August, 1900—Annexure—Bombala-Eden, 2.)

In addition to the connection by rail from the Port of Eden, this scheme contemplates the extension to Bombala and the Victorian Border of the Southern Railway, whose terminus is now at Cooma—either *via* Bobundara on the west, or *via* Nimitybelle on the east.

The following is the estimated cost of these extensions:—

	£	s.	d.
(1.) From Cooma to Delegate, on the Victorian Border, <i>via</i> Nimitybelle and Bombala, 91 miles, at £7,000 per mile	637,000	0	0
(2.) From Cooma to Delegate, on the Victorian Border, <i>via</i> Bobundara, about 105 miles, at £7,000 per mile	735,000	0	0

The extension from Bairnsdale to the—

(1.) New South Wales Border, at Delegate, is estimated to cost (say) 122 miles 67 chains, at £11,000 per mile	1,351,212	10	0
(2.) To a point near Bendock, 131 miles 9 chains, at £11,000	1,442,237	10	0
(3.) Near Timbilica, 147 miles 71 chains, at £4,500... ..	665,493	15	0

(See letter of Mr. Rennick, Engineer-in-Chief for Construction, Victoria, of 15th June last—Annexure—Bombala-Eden, 1.)

A third route has been "inspected," leaving the Orbost to Timbilica route at Sydenham Inlet, and reaching the Border at a point between Timbilica and Bendoc, having a mileage of 147 miles (about) from Bairnsdale, and estimated to cost the same amount per mile as the Orbost-Timbilica route. If the Federal line from Eden to the proposed Site takes the Bondi, or most southern of the three routes, this third ("inspected") route would appear to take a favourable direction for connection with the Federal line, especially if the extension from Cooma by New South Wales adopted the route *via* Nimitybelle and Bombala, but not if the Cooma extension took the route *via* Bobundara. The promoters of the Southern Monaro Scheme favour the route from Cooma *via* Nimitybelle.

It is claimed for this scheme that it is the only one which, in offering a safe and commodious seaport (at Eden, Twofold Bay) with a sufficient area in the vicinity (10,000 acres), provides a Site equally accessible to all the Federating States by sea, and as between Sydney and Melbourne, one not much nearer to the former than the latter metropolis; the difference in favour of Sydney being about 161 nautical miles, according to Annexure.

Twofold Bay is capable of being made an invaluable naval base to the Federation, as well as a first-class harbour, by means of protecting breakwaters from the two headlands of Look-out Point and Jew's Head(*) ; the enclosed water varying from 12 to 3½ fathoms, and giving anchorage room of nearly 6 square miles. The cost of these breakwaters is estimated, by the Engineer-in-Chief for Harbours and Rivers, at £1,028,000, a proportion only of which would be provided by New South Wales, as the harbour, surrounding land, and railway connection with the tableland would be Federal property. The position of the proposed breakwaters is shown (Annexure—Bombala-Eden, 5), and the lengths and costs, in Mr. Darley's letter (Annexure—Bombala-Eden, 4).

(*) To those who have no knowledge of Twofold Bay, and the position of the little township of Eden, the Sketch Map referred to may give some idea of the great strategical value of the northern promontory of the Bay and its isthmus. For all purposes of fortification, these heights are far superior to any on the coast. The batteries on the sea front would have an effective fire-arc of more than 200 degrees, and the land front could be easily protected by one or more detached forts. In every respect, the position is an ideal one; and, as the two extremities of the breakwater would be fortified, the port would be impregnable as against any naval force likely to attack it, and, on emergencies, the protected anchorage would afford a most secure harbour of refuge, or for other purposes. If by any mischance or reverse the British fleet should lose control or touch at this side of the Tasman Sea, Twofold Bay, unfortified, would be an ideal base or lair for an enemy's commerce-destroyers, being the best place on the coast to refit, or save fuel, and at the same time to command the fairway of three-fourths of our commerce. It becomes, therefore, a very serious question for the Commonwealth, whether it or the enemy shall secure this most important natural position.

No analysis of the soil of this Site appears to have been made, but a large proportion of the Site is of granite with some basaltic and slate formation. It is stated to be very fertile and of considerable depth, and to be capable of growing excellent crops of all cereals and most English fruits; 20 bushels of wheat to the acre and sometimes much more had been obtained, also excellent crops of oats and potatoes. No exception can be taken in the matter of foundations for heavy buildings. Besides conifers and other evergreens, all the deciduous trees suitable for ornamental plantations, such as the oak, elm, poplar, willow, plane, are said to flourish in this district, and what vegetable products require a warmer climate, can find it in the adjoining and lower lying Bega and other coast districts.

The following extract from the evidence of the Inspecting Officer of the Works Department, Mr. C. E. Blomfield, shows that this site is exceptionally well favoured in respect to "Water Supply and Catchment":—

"Inspected proposed Federal Territory for water supply purposes. Lord's Hill, at the 5-mile post, on the Bombala-Delegate Road, would make a good site for a storage reservoir to supply any part of the proposed Federal City site by gravitation. The Delegate River is the best of the sources. The water was pure and good, with a discharge of 100 cubic feet a second. If the supply was only one-sixth of this, it would suffice for a city of 250,000 people, at 36 gallons per head per day. A storage reservoir would not be required for some considerable time; but if required a good site was obtainable at an elevation of 60 feet above Lord's Hill, where an inexpensive weir could be erected 30 feet high and 600 feet long, with good foundations. This would be about 280 feet above Bombala. The Bombala River could also be utilised to bring water to Lord's Hill, and thus supplement the Delegate River if necessary. This site is about 250 feet above Bombala, and about 17 miles from the town. Other rivers, viz., Saucy Creek, Little Plains River, Jackson's Bog, Nicholson's Bog, and Coolumbooka River, could also be utilised for gravitation for the greater part of the proposed territory. Estimated cost of Lord's Hill scheme, £40,000. He had seen nothing that could be utilised for power for generating electricity, &c. The Lord's Hill supply could be used for hydraulic lifts, &c."

The same witness, in his comparison of sites for water resources, gives this Site second place after Buckley's Crossing for the possession of an ample gravitation supply from the Delegate River.

Even without having recourse to the never failing Snowy River, in the immediate neighbourhood, Southern Monaro is, without exception, the best-watered area of any of the Tableland Sites that have been proposed. With the Snowy River, according to the suggested enlargement of the Southern Monaro Scheme (see Part III, paragraph 79), not only would the Federal Capital be insured in perpetuity against want of water for domestic, sanitary, and kindred uses, but useful sources for the generation of electrical power would be available, as well as for ornamental waters, &c.

It is claimed that, within the short distance of 10 miles from the proposed Capital Site, there are unlimited quantities of good building stone, including blue and grey granite, sandstone, freestone, and slate, also limestone; also clay for brick-making, and gravel; and, within the same distance, extensive forests of ironbark, mountain ash, messmate, stringybark, blue and grey gum, as well as other useful timbers. This claim is well founded, both in respect of stone and timber. The forests on the slopes of the coast ranges are more promising for building purposes than those within, or in the vicinity of, any other inspected Site.

Excellent drainage for the Capital Site is assured by the face and trend of the country, and, if absorption were necessary, the soil being of a porous loam would be sufficiently absorbent.

The area of alienated land within the proposed Federal Territory Site is, approximately, 74,000 acres, the rest being Crown lands—say, 5,000 acres—and about 2 square miles included within the Municipality of Bombala.

The estimated value of the alienated land as improved is from 30s. to £5 or £7 per acre, and of the land within Municipal boundaries also as improved, £72,665.

The average per acre value of improved lands over the enlarged area ought not to exceed (approximately) £3 to £4 per acre.

Under this head it is claimed that Southern Monaro assures an abundant food supply for a large population, partly from its own production, partly from the associated coast districts; and, it is contended, that the only impetus required for the development of its great natural resources is that which would follow the location of the Federal Capital within its limits. In regard to defensibility, it is pointed out that Twofold Bay could be easily fortified, and would form an important naval base; while the Coast Range, inaccessible in all but a few places, could easily at those points be made a second and impregnable line of defence.

In regard to minerals, though coal is not known to exist, it could be easily and cheaply obtained by sea from the northern mines on the seaboard. The precious or useful metals, such as gold, silver, iron, copper, lead, tin, &c., are said to exist in payable forms; and the late Rev. W. B. Clarke is claimed as an authority for the mineral wealth of the district.

From the health point of view, the evidence goes to show that the district of Southern Monaro is singularly free from such diseases as typhoid, diphtheria, consumption, and asthma,—some of these being almost unknown; and that, generally, owing largely to altitude and purity of water, Southern Monaro stands very high in the list of the healthy districts of Australia.

Engineer-in-Chief's Office, Melbourne, 15 June, 1900.

BAIRNSDALE TO NEW SOUTH WALES BORDER.

Dear Sir,

I have the honor to forward herewith map showing the different proposed routes between Bairnsdale and the New South Wales Border, together with mileages, cost per mile, and total cost, at the following places, viz.:—

	£	s.	d.
At Delegate River, 122 m. 67 c., at £11,000 per mile	1,351,212	10	0
Near Bendoc, 131 m. 9 c., at £11,000 per mile	1,442,237	10	0
Near Timbillicca, 147 m. 71 c., at £4,500 per mile	665,493	15	0
Near Bondi, 147 m.	665,493	15	0

Copy of my Report of 31st ult., is also enclosed.

I have, &c.,

F. RENNICK,
Engineer-in-Chief

Alex. Oliver, Esq., Land Appeal Court, Darlinghurst, Sydney, N.S.W.

Board

Board of Lands and Works (Railways Construction Branch),
 Engineer in Chief's Office, Melbourne, 31 May, 1900

MEMO — PROPOSED RAILWAY FROM BAIRNSDALE TO THE NEW SOUTH WALES BORDER

First — To Delegate or Bendoc

THE country along this route may, as regards railway construction, be described as 37 m to 45 m medium, 86 m difficult and very difficult, total, 123 m to 131 m

The cost of an economical railway through the difficult and very difficult portions will depend largely on what work such a line would have to do

So far as may be judged from surface indications, the greater part of the country between Bairnsdale and Delegate, or Bendoc, and its resources appear of a very inferior character, and quite unfitted to maintain, under the present industrial condition of Victoria, any considerable population

Unless it contains mineral wealth not yet discovered, any railway for purely development purposes should be of the cheapest possible character, consistent with efficiency and safe working

All the railway trial surveys hitherto made in this district have been for lines of the old Victorian type, with fairly easy curves, but with steep grades in the mountains

The present estimates for substantial railways by those surveyed routes are—through medium country, £5,000, difficult, £10,000, and very difficult country, £20,000 per mile, the average being £11,000, exclusive of land and rolling stock. There would be nearly 1½ mile of tunnel on the very difficult parts. Such lines, with a small additional outlay on station equipment, &c, would be capable of coping with a large traffic, both local and interstate, and permit a fair average speed for passenger trains of the best and most comfortable type

The question is, Would any such line be justified within a reasonable period—say, twenty years?

By a very careful survey, and the introduction of sharp curves—say, 4 and 5 chains radius—and increasing the length through the difficult and very difficult sections, a light railway might be constructed at considerably less cost—say, about £5,000 per mile. A careful trial survey would be necessary before a definite estimate could be made for such a line

Second

A line to Umbilcoota, beyond Mallecoota, or to Bondi on the Border, would go through much easier, but, perhaps, poorer, country than to Delegate or Bendoc

A railway of our second class type, 60 lb rails, and correspondingly light equipment, could be built for about £4,500 per mile

The cost of rails is now an important factor in railway estimates. From 1892 till about eighteen months ago rails could be landed in Melbourne at from £4 to £5 per ton, or £400 to £500 per mile, of, say, 60 lb to the yard. Now, they would cost nearly double this money

This difference, while not counting much in lines costing £10,000 or £12,000 a mile, becomes a considerable proportion in those costing £2,000 to £4,000

F RENNICK,
 Engineer-in-Chief

The Hon the Minister of Railways

Bombala Eden, 2.

Department of Public Works (Railway Construction Branch),
 Engineer in Chief's Office, Sydney, 20 August, 1900.

MEMORANDUM to The Engineer in Chief

Bombala to Eden

IN reference to Mr A Oliver's letter, dated 17th instant, herewith, I have brought up to date the approximate cost of the Bombala to Eden Lines, *via* Bondi, and *via* Wolumla, adding on to the latter, and subtracting from the former, that due to the distance between Bombala and the proposed new capital, and taking both lines down to the waterside at Eden. The amounts and distances are as follows—

Capital to Eden Wharf, <i>via</i> Bombala and Wolumla, 81 m 36 chs	£1,088,719
Capital to Eden, <i>via</i> Bondi, 67 m 9 chs	£1,323,330

The maximum grades and curves are the same in each case

It will be seen that the Wolumla route, though over 14 miles longer, is the cheaper, but the extra working of this length would go against the Wolumla line. On the other hand, the portion of the latter line between Bombala and the Capital would form part of the line from Sydney to the new Capital, and the connection with the Port of Eden should not be entirely debited with the cost of this length

The whole matter requires a good deal of consideration, in which the above question, and that of working expenses, would have to be fully dealt with

C. O. BURGE.

BOMBALA TO EDEN, *via* BONDY —Length 67 m 9 ch
 With revised earthwork rates at 2s

Estimate of 1893 revised		£

Bombala-Eden, 3.

Department of Public Works, Railway Construction Branch,
Engineer-in-Chief's Office, Sydney, 18 September, 1900.

My dear Mr. Oliver,

In reply to your inquiry of the 12th instant, I beg to state:—

1. The length of the proposed line from Cooma to Delegate, on the Victorian Border, *via* Nimitybelle and Bombala, is 91 miles, and the estimate, which is very old, amounts to about £7,000 per mile, or, in all, £637,000.
2. The length of a line from Cooma to Delegate or the Victorian Border, *via* Bobundara, is about 105 miles, and its cost, at £7,000 per mile, would be £735,000.

Yours, &c.,
H. DEANE.

Alexander Oliver, Esq.

Bombala-Eden, 4.

Department of Public Works, Sydney, 4 September, 1900,

I am afraid there has been too much delay in answering your letter of 20th ult. *re* Twofold Bay. I enclose you a small hand map showing the breakwaters I would propose. The Northern is 4,700 feet long, and Southern 4,850 feet long; width of entrance, 1,800 feet. The area enclosed would be $6\frac{1}{2}$ square miles, and area of water, over 24 feet deep, $3\frac{3}{4}$ square miles. This would form a most commodious and well sheltered harbour.

I estimate the cost at £1,028,000. This allows a liberal price for stone. It might be much less if really good stone can be obtained at each headland; but I doubt if the local stone is good enough.

I would not recommend overlapping breakwater; they are more costly, have really no advantage, but have some disadvantages.

Yours sincerely,
C. W. DARLEY.

BRAIDWOOD SITE.*Statement of Case*

THIS Site is reached by a very good road, 30 miles in length, from the Tarago Station, on the Goulburn-Cooma Line, but has not yet been connected by rail with the Southern Railway System. A very conspicuous hill, known as "Gillimatong," rising abruptly from the elevated basin of the Shoalhaven River, which may be said to form the Braidwood District, marks the position of the township, which was established as far back as 1839, and now contains a population of about 1,300. The proposed Federal Territory Site contains an area of 100 square miles (64,000 acres), and the proposed Capital Site, which embraces the town of Braidwood, an area of 3,840 acres. The latter Site is distant about $4\frac{1}{2}$ miles east of the Shoalhaven River, in south latitude $30^{\circ} 30'$, and east longitude $149^{\circ} 47'$, is in the county of St. Vincent, and includes parts of the parishes of Percy, Braidwood, Boyle, and Coghill. The Federal Capital Area, 3 miles by 2 miles, as proposed, extends beyond the town half a mile to the north and west, $1\frac{1}{2}$ mile to the south, and 1 mile to the east, and is intersected by the Monkittie branch of Gillimatong Creek, about half a mile from the northern boundary, and the northern portion of the Area slopes to this creek in a gradual manner, except immediately north of the town, where the rise is more abrupt, and culminates at a level of 50 or 60 feet above the town, in the hill on which is the grave of Dr. Braidwood Wilson, one of the earliest pioneers, after whom the town is named.

The eastern portion of area is fairly level, and embraces the valley of Monkittie Creek and its tributary watercourses, on which are arable flats, separated by low undulations, and this formation extends at least 4 miles eastward.

Westerly, the Site takes in the continuation of the ridge on which the town is built, down to its termination at junction of Pound Creek, and on the south side of that creek extends over the foot slopes of Gillimatong Hill, which lies about 1 mile south-west of Capital Area. The trend of these slopes is north and east, and gradient easy, but the elevation towards the south-west corner of Area is somewhat above the town.

Southwards, the Site extends up the valley of Pound Creek, and over the range running south-east, which separates this creek from Monkittie Flats, and which rises by easy slopes from south boundary of town, forming an elevation above it towards the north-east corner of Area.

The Federal Capital Area, taking Braidwood as the approximate centre, is situated about 30 miles from Tarago, a station on Goulburn-Cooma Railway Line, and about 20 miles south of Goulburn, and is reached by a well-metalled road, classed as one of the Main Roads of the Colony, on which two coaches ply to and fro daily.

Other means of access are as under:—On the north from Nowra, distant 75 miles, *via* Nerriga and Sassafras; on the east, from Nelligen, on the Clyde River, distant 30 miles up Clyde Mountain; on the south, from Moruya, distant 52 miles, *via* the town of Araluen. Coaches run regularly on these roads.

There are also the roads to Queanbeyan, 40 miles away, and to Cooma, *via* Bredbo, on the south, with a branch to Captain's Flat, distant 30 miles.

A railway line about 30 miles in length has been surveyed between Tarago and Braidwood.

Jembaicumbene and Sergeant's Point townships lie 6 and 8 miles, respectively, to the east and south, on good roads of access, while Araluen, on Moruya Line, 16 miles distant, and 1,600 feet lower level, supplies fruits and other products suitable to the coastal climate, including maize, and a considerable traffic exists, especially in the fruit season. Grapes, figs, peaches, apricots, oranges, and melons grow in Araluen freely, while in Braidwood English fruits thrive best.

The Braidwood Federal Territory, as proposed, extends north of the town about 5 miles; west, 2 miles; to the south, about 7½ miles; and to the east, 5 miles; comprising an area of 64,000 acres, and 13½ miles from north to south, and 7½ miles east to west; situate in the parishes of Boyle, Percy, Elrington, Braidwood, Coghill, and Seymour; and is located on the heads of Durran Durra, Gillimatong, and Jembaicumbene Creeks, draining into the Shoalhaven, which lies about 3 miles, on the average, from its western boundary.

The Territory is bounded on the south by the watershed between the Jembaicumbene Creek and the Araluen Creek, on the east by the low range separating the waters of the Shoalhaven and Mongarlowe Rivers, except at the south-east corner at Reidsdale, where the east boundary crosses the valley of a minor branch of the Jembaicumbene at Reidsdale; on the north and west, there are no natural boundaries.

The whole Area slopes to the west, and is of granitic formation, except on its eastern side, where basalt and slate are touched upon.

There is a considerable area of level ground, especially in the wide, flat valley of Jembaicumbene in the south, and in the Monkittie Flats east of the town, in the central portion of Area; but in the northern end, on Durran Durra Creek, the country is more broken, and the flats of less extent.

The principal area of cultivation is on the Monkittie Flats, east of the town, and on Jembaicumbene Creek, near the town of that name.

An extensive bird's-eye view of the Federal Territory, and Braidwood district in general, can be obtained from Gillimatong Mount, which has an elevation of over 3,000 feet above sea-level, and lies about 1½ mile south-east of the town, from which it is readily reached by a short walk.

Immediately to the east lies the valley of the Monkittie Creek, and about 5 miles away its sources in the divide from the Mongarlowe River; while the horizon is bounded by the Coast Range, about 13 miles distant, which rises into considerable elevations in the "Currockbilly" and "Budawang" Mountains.

To the south-east are the sources of the Mongarlowe, at a somewhat lower level, and the Monga Mountain, dividing the Mongarlowe from the Jembaicumbene; south can be seen the valley of the Jembaicumbene and the range forming the watershed between that creek and Araluen waters, while over this can be seen part of the ranges enclosing Araluen and the upper course of the Dena River, which is very rugged. On the west and south-west can be seen part of the course of the Shoalhaven River, which, rising about 45 miles south, at an elevation of about 3,500 feet above sea level, near the Big Badja Mountain at a point where the Great Dividing Range merge into one, runs north, and thence towards the sea. Unlike most rivers, the Shoalhaven has its upper course through fairly level country to within sight of its source above Snowball, while about 20 miles below Braidwood it begins to fall rapidly, and the valley deepens towards the north, and the river in places is difficult of access, even on foot.

The upper portion of the Shoalhaven Valley, between the Great Dividing Range and the Coast Range is rather narrow above the junction of Jerrabat Creek, 20 miles south of Braidwood.

Below this point the valley widens, but is again contracted west of Braidwood by the spurs of the Gourcock Range, an offshoot from the Great Dividing Range, and which separates the Shoalhaven from its tributary, the Reedy Creek. This range rises into some lofty peaks, such as Elrington and Polemang, about 15 miles distant.

North of Braidwood the valley opens out and the Mongarlowe and Reedy Creek join on the east.

The mountains recede and diminish in height and disappear altogether due north, while north-west can be seen the Tarago Range, and to the north-east the Sandstone Hills, between the Clyde River and Shoalhaven, intercept the view. The intervening country is comparatively level, but though not containing much actual flat country, the ridges are of moderate elevation.

The proposed Territory Site is shown on the Map of Braidwood Site, marked E in Appendix, by the area within red edging, the Capital Site within blue edging.

Climatic conditions (temperature).

The mean temperature, taken for a period of twenty-one years, gives, for the first (summer) quarter of the year, 66·8; for the second (autumn), 49·9; for the third (winter), 46·2; and for the fourth (spring), 64·1; for the hottest month on record, 72·3; and for the coldest, 3·55; for the hottest day on record, 103·6; for the coldest, 14·3.

Altitude.

This is given as 3,157 feet above sea-level, but noted as "not verified." It is, probably, as stated by Mr. Bundock, formerly Road Superintendent, about 2,200 feet. The altitude of Solus-street, in the township, as obtained from the Under Secretary, Department of Works, is given as 2,136 feet. These figures may be considered as accurate, being the result of levels taken in the course of the Tarago-Braidwood Railway survey.

Rainfall.

The mean rainfall for the same period is given as 28·90, distributed thus:—For the first quarter of the year, 8·47 inches; for the second, 7·86; for the third, 5·49; and for the fourth, 7·08.

Accessibility.

This Site is reached by railway to Tarago (on the Goulburn-Cooma Line), 158 miles; and thence by a good level road to Braidwood, 32 miles. A railway to the town, covering a distance of 30 miles, was surveyed some years ago, and the money for its construction voted, but never expended. Access is also obtainable by sea to Nelligen, where a steamer runs weekly from Sydney, and thence by road to Braidwood, 33 miles. The distances of Braidwood from other Capitals, by land, are as follow:—

Melbourne, <i>viâ</i> Tarago	492 miles.
Brisbane, <i>viâ</i> Tarago	933 "

and by sea and land as follows:—

Brisbane to Sydney, by sea	500 miles.
Sydney to Braidwood	187 "

Total, Brisbane to Braidwood	687 "
------------------------------	-----	-----	-----	-----	-----	-----	-----	-------

Melbourne

Melbourne to Sydney, by sea	576 miles.
Sydney to Braidwood...	187 "
Total, Melbourne to Braidwood	763 "

Adelaide to Sydney, by sea, thence to Braidwood	1,271 miles.
Hobart to Sydney, by sea, thence to Braidwood	825 "

Nearly all granitic formation, with alluvial flats and decomposed granite in the hills. Subsoil— Physical conditions (soil).
clay and decomposed granite generally. Well adapted for growth of cereals, potatoes, root crops, and fruits suited to a temperate climate.

There is an abundant supply of water in the Shoalhaven River, which has a catchment area of Water supply and catchment.
about 450 square miles; but Mr. Blomfield, the Resident Engineer, who examined the river to a point about 20 miles above the town, reports as follows:—

“Braidwood is not well situated for a gravitation supply, as the town has a fairly high situation, and the fall in the Shoalhaven is small. As far as the quantity and quality of the water is concerned, there is no difficulty, but, for a large population, pumping would be necessary.

“In addition to the Shoalhaven, the Mongarlowe River has also a good and pure supply, but this would also require pumping, as, even if the river itself had sufficient elevation, there is a ridge over 200 feet high between it and the town.”

There is an inexhaustible supply of excellent granite easily procurable, which is claimed to be equal Building material.
to Moruya granite. Abundance of good freestone is stated to be available at Corang, within 30 miles of Braidwood, whilst limestone exists within 14 miles. The timber supply consists of mountain-gum, messmate, mountain-ash, sassafras, blackwood, plum-tree, ironbark, spotted and blue gum, stringybark, &c., mostly obtainable on the Dividing Range, just outside the proposed Area; also at Reidsdale, and in the vicinity of Major's Creek. Good clay for bricks. Sand and lime can be obtained in the Area.

The Site possesses good natural facilities for drainage. Drainage.

The following extract is taken from the report furnished by the local Committee:—“The greater Other physical features.
portion of the proposed Area consists of fairly level country, all suitable for cultivation and residences, with moderate sized hills in the northern and eastern portions. The whole Area is well-watered with creeks, many of which are perennial, whilst subterranean water of excellent quality is procurable at comparatively small depths.”

The area of alienated or private lands is estimated at 63,000 acres, and that of Crown lands, Ownership and value.
including reserves, &c., 1,000 acres. The land is not highly improved. Inside the Municipal area, but excluding the town of Braidwood, the value, as improved, is estimated from £3 to £5 per acre. For the whole area, but excluding the town of Braidwood, a fair average value, as improved, was stated to be £3 per acre.

With regard to Food Supply, it is claimed that the Braidwood district could supply sufficient meat Miscellaneous conditions.
food for a population of 40,000. The country is more suited to cattle than sheep, and the natural grasses throughout the district are noted for their fattening qualities, Braidwood cattle being credited with topping the market. Cereals, potatoes, and other root crops can be grown, and good crops have been realised, but the top soil is shallow as a rule, and soon exhausts itself under crop. With closer settlement, the district could be rendered much more productive, and capable of supporting a large population. Dairying is carried on principally by the farmers. The district is suitable to the establishment of chilling and freezing works, but there are not sufficient sheep for the establishment of woollen manufactories.

With regard to minerals, Braidwood may be said to be well favoured. Gold is found in considerable quantities, and an already large output is likely to be considerably augmented when the numerous dredging plants, now being erected in the district, are going concerns. Deposits of silver, copper, and ironstone are known to exist, but have not hitherto attracted much attention. Stream tin is found in the Shoalhaven. Good coal and shale seams are said to be found within 25 miles of Braidwood, samples of which were exhibited at the Inquiry. It may be conceded that Braidwood, being the centre of an extensive pastoral, agricultural, and mining district, within easy reach of the metropolis and the seaboard, is favourably situated for commercial and industrial development.

From a health point of view, it is claimed that the district is remarkably free from epidemics, and that, owing to its altitude, tuberculosis and kindred complaints were of rare occurrence. The district is described as very healthy, favourable to longevity, and the death rate is below the average.

CARCOAR-GARLAND SITE.

Statement of Case.

THIS Site (shown on Plan, marked F, in Appendix), situated some 5 or 6 miles south-east of the small town of Carcoar, on the Blayney-Harden junction of the Main Western and South-western Railways, was inspected during the hottest part of the summer of 1899-1900, in company with its promoter, Mr. Lindon Biddulph, formerly a licensed surveyor, who has had the advantage of a long familiarity with the district. Evidence as to its suitability was taken at a public inquiry at Orange on the 27th March last. At that inquiry the only witness was Mr. Biddulph himself, whose evidence was given briefly, in view of the detailed statements contained in the report handed in by him, from which the following extracts have been made:—

The mean temperature for the summer quarter is 67·5; for the autumn quarter, 48·6; for the winter quarter, 44·4; for the spring quarter, 61·7. The greatest recorded heat is 98·4, and the lowest 15·4. Climate (temperature).

The average annual rainfall is nearly 31 inches, distributed in fairly equal proportions over the four quarterly periods; but it is claimed that the sources of supply for storage receive the 39 inches rainfall of the higher country. These results are given on the authority of the Government Astronomer, and covering a period of eighteen years to date, show a very equable climate. Rainfall.

The height of Carcoar Railway Station is 2,363 feet; the average height of the proposed Capital and Territory Site is given as 2,270 feet above sea-level. Altitude.

Mr.

Mr. Biddulph reports as follows :—

Accessibility.

“(a) It is exactly the same distance from Melbourne as Goulburn is ; 189 miles to Sydney ; 442½ miles to Melbourne ; about 700 miles to Brisbane, on completion of the Werris Creek to Wellington loop line ; about 923 miles to Adelaide, *via* the proposed Cobar to Broken Hill extension ; about 710 miles to Adelaide, *via* the Murray Valley (should Hay and Morgan ever be connected) ; about 820 miles to Hobart, *via* Melbourne ; about 2,200 miles to Perth (should the railway be laid down between Port Augusta and Kalgoorlie) ; to Adelaide, *via* Melbourne, 925 miles.

Physical conditions.

“(b) By road, approximately the same to each chief city, as by rail, excepting in the cases of Brisbane and Adelaide—respectively about 180 and 100 miles nearer by road.

“(c) By water, the same as to Sydney (the Federal Port) from all State capitals, thence 189 miles by rail ; or ditto to Melbourne, thence 442½ miles by rail.

Physical conditions.

“(a) Soil very rich and fertile in places, and for a considerable extent. May be quoted as ‘fair to good’ over the whole area, and resulting principally from the decomposition of ferruginous and aluminous slates, and, in a lesser degree, from the decay of iron-bearing intrusive rocks, such as basalt, diorite, gabbro, syenite, andesite, &c., &c.

“(b) There are several sites, adjacent to the City, with immense ‘storage capacities.’ Five of these would have a ‘combined catchment area’ of some 333 square miles. The creeks or rivers supplying these, like all Australian streams, are intermittent in dry seasons, though with unceasing flow in ordinary and good years. The whole of the Federal Area would lie some 300 feet below delivery pipes of these reservoirs, thus receiving the ‘necessary pressure’ to initiate an adequate and economical water supply by gravitation, also the lighting of ‘Federal Area’ by electricity, ample and frequent flushings of all drains and sewers, and a perfect ‘fountain system’ could thus be sustained for the necessities of gardens and public parks, &c., &c.

“(c) Granite, for building purposes, is obtainable on and near the area ; whilst marble, limestone, basalt, &c., are to be procured in the neighbourhood, though sandstone would have to be railed some 90 miles or so, from the vicinity of Wallerawang, &c., &c. There is an abundance of good brick-making clay on the area. Timber would come principally from Sydney and the districts around, though there is some fair material to be had from the country adjoining the Federal Area, on the south.

“(d) The sewage system would be a very complete one, as reticulation from all sides and over the whole site is available into a ‘main,’ discharging with the true fall of the country, and with an even grade throughout, at the north-western corner of the area. The undulating nature of the land, and the number of small streams intersecting the area, afford a good natural drainage for streets and surfaces generally.

“(e) The Site is upon the ‘second’ or ‘subsidiary plateau,’ the main tableland above, lying between Orange and Neville, averaging some 600 feet greater altitude. This position ensures a more equable climate than the higher lands. Being less exposed, it is practically as cool during the summer months, whilst their rigorous winter periods are avoided. A reference to the ‘Thermometer Registrations’ will verify these statements. Lying, as it does, alongside and just beneath Mount Macquarie (the second highest point in the West), the waterworks and City, &c., would be protected in case of an attack by an enemy, as Mount Macquarie rises 1,700 feet above the area, and would, of course, be fortified ; also, there are several lesser eminences around the site, which could be dealt with similarly. This great hill is an ‘isolated mass,’ about one-third of a mile long, and one-twelfth of a mile wide on top, and possessed of a flat cap. It is about 6 miles distant from City centre. Being remote from the sea coast (111 miles to nearest point, and 120 miles to Sydney as the crow flies), with the rough and intervening Blue Mountain Range, the site is almost unreachable by a foe. The railway runs diagonally through the area, from north-east corner at Carcoar to the south-west corner at Watervale. The scenery is also very fair.

Ownership and value.

“(a) Omitting the ‘Municipality of Carcoar’ at north-east corner, areas alienated would be, roughly, 1,500 acres of town and suburban land, and about 50,000 acres of country lands ; total of about 51,000 acres.

“(b) Crown lands, including Church and Schools Estate, reserves, &c., equal about 12,500 acres.

“(c) Unimproved private town and suburban lands, about £20,000, and 30s. per acre for country, £75,000 ; total, £95,000 unimproved value.

“(d) Improved value, private town and suburban land	£35,000
50,000 acres of country lands at 60s.	£150,000

Total cost	£185,000
------------	-----	-----	-----	-----	----------

Miscellaneous conditions

“(a) 1. Food material is assured, as the area is contiguous to the great wheat-producing centres in the Lachlan, Bogan, and Macquarie River valleys, &c., &c. ; is surrounded with a grand district, yielding all descriptions of animal and vegetable products, and is on the direct line of Queensland cattle supply to Sydney and Melbourne, &c.

“2. Coal must be railed about 90 miles ; iron is plentiful on the area ; gold, silver, and copper obtainable.

“3. It has the capacity to support a considerable population.

“4. Centrality, climate, existing railway connection, easy touch with Sydney, economic and ample water supply, ample food supply within easy distance, coal and building material handy, situated at a spot central to the important towns of Bathurst, Orange, Cowra, and Blayney (respectively 44, 39, 27, and 17 miles by rail therefrom), the ‘Federal City’ would benefit these centres of trade without being sufficiently near thereto to destroy their status, as it were ; whilst, on the other hand, the former would be advantaged and enriched in its position. I take it that the capabilities of a ‘Federal Area,’ as regards power of support and commercial development, *per se*, is a minor consideration only, compared with the greater questions of climate, centrality, and accessibility in regard to the bulk of Australasian population, cheap and ample water supply, and necessary pressure for complete sanitation, provided the districts contiguous thereto are naturally rich and able to provide all, or nearly all, the food material and other necessities required by the ‘Federal City’ ; and, unquestionably, this is the case with our Western Sites. Besides, gardens and parks, public offices, colleges, private mansions, &c., are not concomitants of chimney stacks and smoke, noise, and evil odours, &c., &c. Foundations good ; bedrock not too deep in most places, and capable of supporting weighty buildings.”

Mr,

Mr. Biddulph adds:—"Were it not for one 'important obstacle,' I believe the best spot in New South Wales would be the locality of Spring Hill and Millthorpe as a centre. This region occupies the 'very roof' of the 'basaltic plateau,' and from this point the waters radiate towards the Lachlan and Macquarie River basins. It is a beautiful tract of rich, undulating country, with rather bitter winter periods—average elevation being somewhere about 3,000 feet above sea level. I have shown such by 'red square' in the map supplied by me. I thought it might be considered as an 'alternative scheme,' perhaps. The great drawback I allude to is the fact that every gallon of water would, under great expense, wear and tear of plant, &c., have to be raised by 'pumping operations.' The cost of resumption at present time of these small towns and the area around would not be great, and the betterment that would accrue, through Federal expenditure, &c., in the shape of 'incremental values,' would be enormous, and the property of the Federal State recouping same several times over, maybe, on the transaction. I fear this impediment is nearly insurmountable. It is a matter for hydraulic experts to decide. However, if the question could be settled satisfactorily, I believe that the Site would be a better one, perhaps, than 'Carcoar-Garland.'"

Mr. Engineer Blomfield inspected the several sources of water supply, and reported as follows:—

"*Coombing Rivulet Site.*—About 500 feet above the proposed Federal City; foundations very good; ^{Water resources.} catchment good; storage fair; will require a high dam, say 100 feet, but not very long—less than quarter of a mile. If 1 inch of the annual rainfall on the area of this river were stored, it would keep a population of 100,000 going for twelve months, allowing 30 gallons per head per day.

"*Belubula River Site.*—About 390 feet above proposed Federal City; foundations very good; storage good; catchment: the fact of Blayney being on this River condemns it as a prospective water supply. If the site were chosen, Blayney, as a junction, would most likely become an important place, and pollution of water in the Belubula would be certain to take place. However, as the storage and fall are good, it might be considered as a means for generating electricity, &c.

"*Brown's Creek Sites.*—Lower site will have to be rejected, as it is only about 100 feet above proposed Federal City. The alternative site, higher up, is about 350 feet above proposed Federal City. Foundations good; catchment good; storage very good. If 1 inch of the annual rainfall on the area of this creek were stored, it would keep a population of 90,000 going for twelve months, allowing 30 gallons per head per day.

"I did not inspect Flyer's and Cadia Creeks; but I have been down the former twice during the late dry years, and there was a good supply of water running on both occasions. The catchment is good, and, from what I remember, I do not think there would be any difficulty in obtaining a site for a reservoir; in fact, on a safe estimate, the Combing Rivulet, Brown's and Flyer's Creeks should supply a population of a quarter of a million easily."

COOTAMUNDRA SITE.

Statement of Case.

COOTAMUNDRA is an incorporated Borough, having an area of 3,040 acres and a population within the ^{Topography.} Municipal area of 2,560. It is situated on a level tract traversed by the Main South-western Trunk Railway (Sydney to Melbourne), and is the junction point of two branch Lines—Cootamundra to Temora, 38 miles on the north-west, and Cootamundra to Gundagai, 34 miles on the south. On reaching Cootamundra, the difference in altitude between the highest point along the Line and the commencement of the flat basin of the Murrumbidgee, is about 1,200 feet. That river, however, is distant from Cootamundra about 30 miles. The proposed Site for the Federal Capital is some 10 miles east of Cootamundra, and near to Wallendbeen Station. It has an elevation of about 600 feet higher than Cootamundra, and is a combination of undulating hills and valleys, some portions of which are under cultivation, while other portions are used as pastures.

The mean quarterly temperatures, for a period of thirteen years, are given by the Government ^{Climatic conditions (temperature).} Astronomer as 72.4 degrees for the first quarter (summer), 51.9 degrees for the second (autumn), 47.9 degrees for the third (winter), and 67.3 degrees for the fourth (spring). The mean of the hottest month is 81.1 degrees, and of the coldest 41.3 degrees. The greatest recorded heat is 106 degrees, and the lowest 27.9 degrees.

The climate generally is described as a salubrious one, the winters being mild and the summer heat not oppressive to any degree, and sunstroke is hardly known. Endemic diseases are unknown, and epidemics only as in other country districts.

The height of the Railway Station at Cootamundra is given as 1,082 feet above sea-level; but it is ^{Altitude.} considered that the height of the proposed Site will be about 600 feet more, from which it would follow that the Cootamundra or Wallendbeen Site has an elevation above sea-level of about 1,600 to 1,700 feet.

The mean rainfall (taken for the same period) is 25.65 inches, distributed over the year thus:— ^{Rainfall.} For the first quarter, 7.01 inches; for the second, 6.35; for the third, 6.32; and for the fourth, 5.97.

The proposed Site is distant about 242 miles from Sydney, taking Wallendbeen as the farthest ^{Accessibility} point. Cootamundra itself is nearer by 70 miles to Sydney than to Melbourne, the distances being 323 miles from Melbourne, and 253 from Sydney. The distance from Brisbane is 976 miles, but about 876 by the proposed Werris-Creek Dubbo connection; from Adelaide, 682 miles, which would be much reduced if the Cootamundra-Temora Line were extended westerly to Hillston and Wilcannia. There is no communication by water.

The soil is described as a chocolate loam, with belts of white granite country; and Dr. Curran's ^{Physical conditions (soil).} authority is cited for the statement that the formation of the proposed Federal Territory Site is porphyritic. On Wallendbeen, granitic in parts.

Cootamundra is at present supplied by gravitation and pumping. Two witnesses considered that ^{Water supply and catchment} an efficient gravitation supply could be obtained from Adjinbilly Creek, a tributary of the Tumut, and syphoned across the Murrumbidgee at a cost of about £200,000; also from the Tumut, at a point about 60 miles distant from Cootamundra, at a cost of about £250,000. A third gravitation scheme would, it was stated, be afforded by the Barren Jack or Goodradigbee Weir. Mr. Blomfield, who inspected the Adjinbilly, reported that that Site, as far as elevation, storage, and catchment were concerned, was a very good one, but would be expensive (the reservoir site being distant about 40 miles from Cootamundra), and that the gold-mining in that locality, which made the water very muddy, would have to be stopped. (See Annexure, marked Cootamundra, 1.) There

Building material.

There is excellent granite for building purposes in Wallendbeen, and good rubble material at Bethungra, but no sandstone or marble. There is slate at Gundagai, and limestone at Galong and Illabo. Abundance of clay for bricks, and also at Temora for fire bricks. Of timber—ironbark, red-gum, stringybark, white-box, and pine, are obtainable within a reasonable distance; also mountain ash and messmate on the Tumut Ranges. Some of the hardwoods are liable to the attack of white ant.

Drainage.

The Wallendbeen Site would be well favoured in respect of drainage, as it is situated on the watershed of the Lachlan tributaries on the north, and of the River Murrumbidgee on the south.

Ownership and value.

The improved value of lands within municipal area is given at £254,000; the Water-works costing, when finished, £30,000, and the Gas-works, £11,000.

The average value of improved land outside municipality is about £5 per acre in the parishes of Cootamundra, Jindalie, Cowcumber, Cullinga, Muttama, and Wallendoon; but there is some rough land in the parishes of Cootamundra and Muttama not worth more than 10s. to 20s. an acre.

There is no Church and School land within the proposed Site, and the area of Crown lands has not been given; but it is probably small.

Miscellaneous conditions. Facilities for food supply.

There can be no question that this Site is admirably situated for the purpose of commanding all materials for the supply of a large population. The Trunk Line, of itself, is an invaluable artery for this purpose, and the two branch lines to Temora and Gundagai tap country very rich in food resources. From its position, although coal is not known to exist in the district, Cootamundra would be well situated for the establishment of any industry depending on an ample supply of cereals, wool, hides, or live stock.

The mineral products are stated to embrace gold, chrome, asbestos, steatite, manganese, and iron.

ANNEXURE.

Cootamundra, 1.

WATER SUPPLIES FOR COOTAMUNDRA, AS A FEDERAL CITY SITE.

Sir,

Wagga Wagga, 23 May, 1900.

The result of my investigation at Cootamundra is to show that a supply by gravitation is possible, but expensive. The proposal is to bring the water from the Adjinbilly Creek; and, as far as elevation, storage, and catchment, are concerned, it is very good. But this creek is on the other side of the Murrumbidgee from Cootamundra—it runs into the Tumut River not far above its junction with the Murrumbidgee; so that the water would have to be syphoned across the Murrumbidgee. Another thing, there is a lot of gold mining going on, making the water very muddy, and this would have to be stopped. The distance of the proposed reservoir site from Cootamundra is about 40 miles.

CHARLES E. BLOMFIELD,

Resident Engineer,
Department of Works.

To The Federal City Commissioner.

FOREST REEFS AND CALVERT (MILLTHORPE).

Statement of Case.

THE proposal of this Site purports to come from the combined Federal Capital Leagues of Millthorpe, Forest Reefs, Carcoar, and Blayney, and, for brevity, will be referred to as the "Millthorpe" Site. It is said to embrace an area of 82,000 acres, or, approximately, 128 square miles, and is situate in the county of Bathurst, parishes of Belubula, Beaufort, Calvert, Errol, and part of Lindsay. (See Plan of Site, marked G in Appendix.) Much of the Site may be said to be the watershed of the streams, which, on one side, flow into the Macquarie, on the other into the Lachlan, and, as might have been anticipated, it possesses small facilities for a gravitation water supply, on which point the Report of Mr. Seaver, of the Department of Works, may usefully be consulted. (Annexure—Forest Reefs, 1.)

The eastern boundary of the Federal Territory Area commences at a point on the Main Western Railway, and, excluding the town of Blayney, follows the course of the Belubula River, excluding Carcoar, and continuing to the junction of Flyer's Creek with the Belubula, from which point Flyer's Creek is taken as a boundary on the west to the north boundary of the parish of Calvert, and thence on the north by that boundary to the point of commencement.

Climate (temperature).

No records of temperature are kept for Millthorpe or for the Forest; but for all practical purposes it may be assumed that the temperatures (including ranges and averages) for the neighbouring Site of Orange, or Canobolas, may be taken as a fair guide for Millthorpe. (See "Canobolas"—Climate.)

Rainfall.

The mean quarterly rainfall for ten years, according to the figures supplied by the Government Astronomer, is: for the summer quarter, 8.99 inches; for the autumn quarter, 8.42 inches; for the winter quarter, 8.58 inches; and for the spring quarter, 7.48 inches,—showing a mean annual rainfall of 33.47 inches, distributed with remarkable evenness.

Altitude.

The height above sea level of Millthorpe Railway Station is 3,131 feet, or 285 feet above Orange Railway Station; and the highest point in the selected area is given as 3,500 feet.

Accessibility.

The Secretary to the League who prepared the returns under this head reports as follows:—

"The proposed Federal Area would embrace a tract of country lying between Carcoar, Blayney, and the Forest Reefs, and would be connected with Sydney by the Main Western Line—distance 181 miles; also with Melbourne (through the connection between the Western and Southern Lines of New South Wales, which already exists, the junction with the Western Line being by the Blayney to Harden Branch)—distance 456½ miles; also with Adelaide, *via* Melbourne—distance 939 miles to Carcoar at southern end.

"The connection of Brisbane by rail is at present *via* Sydney only—distance in all, 904 miles; but the proposed connection of the Western and Northern Lines of New South Wales—now under consideration of the Government—from Werris Creek to a point on the Western Line (probably at Wellington, 75 miles north of Blayney), will cause the distance by rail from Blayney to Brisbane to be reduced to about 700 miles, approximately. The distance from Sydney to Brisbane by rail is 723 miles. Another proposed line of railway is that to connect Adelaide (*via* Broken Hill) with the Western Line of New South Wales, probably by means of the Cobar line, which junctions with the Western Line at Nyngan, about 925 miles, and *via* Morgan and Murray Valley, about 724 miles to Carcoar.

"It will thus be seen that the proposed Federal Area has a central position on the existing and proposed railway lines between the various State Capitals.

"The connection with Hobart is, of course, *via* Sydney or Melbourne."

The

The accessibility of this Site by roads has very little, if any, interest for the inhabitants of the other States. Access by water does not exist, as there are no navigable streams available.

The soil of the proposed Site averages from 2 to 5 feet in depth, and is generally of volcanic origin, deep chocolate in colour, resulting from decayed basaltic overflows, with a clay subsoil underlying basalt. The bed rock is diorite. There are also rich alluvial flats. The soil is very fertile, and produces strong crops of cereals and potatoes, and, consequently, agricultural farming prevails, the country being rather closely settled in holdings averaging between 200 and 300 acres.

The resident witnesses considered that a sufficient water supply could be obtained from Flyer's, Brown's, and Slattery Creeks by means of a weir and reservoir, and that a gravitation head could be got from within 2 miles of Millthorpe, and the rainfall and catchment of the Canobolas were relied on as auxiliary sources; but from the Report of Mr. Seaver (Annexure—Forest Reefs, 1), the hope of supplying this Site by gravitation gets no encouragement, and the nature of the agricultural occupation would be adverse to the storage of pure water; nor does it seem, according to the view taken by that officer, that a pumping scheme could be relied on. The proposed Site is evidently the roof (so to speak) of the watershed between the Lachlan and Macquarie Rivers, and that fact of itself should dispose of a gravitation scheme.

This Site appears to be without granite, but to have limestone in large quantities, also marble, and at Byng, some 15 miles distant, freestone. Basalt is plentiful enough, and, it is said, cuts straight and works well. There is slate towards the Canobolas slopes, and of gravel there is abundance. The clay of the district makes good bricks. The timber supply is poor, though fair hardwood can be obtained in the vicinity.

The drainage is easy, being towards streams flowing south.

There are 50,640 acres of Church and School land, and 31,360 acres of alienated land, but no "Crown land," other than Church and School land, within the proposed Area. The following estimate of cost of resuming these areas of Church and School lands has been supplied by the Honorary Secretary of the Millthorpe League:—

	9,376	acres homestead selections, @ £4	...	£37,504
27 years to run	16,520	,, improvement leases	} @ £1	.. £22,525
10 "	2,902	,, " "		
7 "	3,103	,, " "		
	6,761	,, pastoral leases.		
	4,667	,, 2 to 3 years to run	} @ 5s	... 1,252
	345	,, 5 " "		
	1,749	,, 9 to 11 " "	@ 10s.	... 874
	614	,, farm leases @ 30s. 921
13 years to run	504	,, special leases @ 10s. 252
	10,860	,, Crown lands—Nil.		
	50,640	,, Church and School lands £63,328

The improved value of the private land is put by one witness at £6 per acre; another estimate was £3 10s. as an average; but I am inclined to think that the higher estimate is nearer the truth.

The total estimated cost of resuming 31,360 acres of alienated land at £6 per acre (£188,160), and of the 50,640 acres of Church and School land (£63,328), would be approximately £251,488.

Much of the Church and School land is infested with briar and other scrub, and is held under improvement leases for varying periods; but resumption of this land would involve compensation, but there is no evidence as to the amount or basis of such compensation. It might, however, be open to the Commonwealth to take over these 50,640 acres of Church and School lands without any disturbance of tenures or tenants.

With a soil and climate not surpassed (if, indeed, equalled) by any Site that has been the subject of inspection, Millthorpe can claim the possession of an ample Food Supply, particularly in the direction of breadstuffs and potatoes, the average wheat crop being about 20 bushels, and oat crop 30 to 40 bushels to the acre. Root crops thrive well, also all English fruits; and a considerable amount of stock is raised in the district, and there is a fair amount of mixed farming. It was thought that within a radius of 50 miles the country was capable of supporting a population of 40,000.

Forest Reefs is a well-known auriferous tract, and there is an important copper-mine at Cadia.

ANNEXURE.

Forest Reefs, 1.

REPORT on Proposed Federal Capital Site at Millthorpe.

Orange, 29 July, 1900.

As instructed, I visited Millthorpe, and on the 27th and 28th instant inspected the creeks in its vicinity from which it was proposed to obtain water. From aneroid levels taken, I find that no sufficient head can be obtained; indeed, to get any elevation at all, it would be necessary to go to the very head of Flyer's Creek—the only one available—where the catchment area would be practically nil.

If water could have been taken from further down either this or Brown's Creek, the catchment area would be on highly-cultivated farms of from 50 to 100 acres. Even if water was raised by pumping, this latter objection would hold good.

I was unable to obtain the parish of Beneree at the Lands Office, but, from the small attached plan, it will be seen that Millthorpe is almost at the head of the watershed, which is shown by red hatching.

T. W. SEAVER.

GOULBURN SITE.

Statement of Case.

GOULBURN, distant 134 miles by the Southern Railway from Sydney (the Intercolonial Southern Trunk Line connecting Sydney and Melbourne, *viâ* Albury), is a well-known and long established city, having, it is estimated, a population of about 10,000, and situated within the proposed 100 square miles Territory, edged red on the plan accompanying this Report; but the Site selected for the Federal Capital lies just outside, and to the south of, the city of Goulburn, and is intersected by the railway line at about 135 miles from Sydney, the Goulburn-Cooma extension joining the main line about a quarter of a mile to the south-west of that Site, and the junction of the proposed Crookwell line is within the proposed Site. The city is situated at the junction of the Mulwarrie Ponds Creek with the Wollondilly River which, flowing through the Burrigorang Valley and the Warragamba Gorge or Canon, is known in its lower course as the Hawkesbury. The selected area for the Territory lies within the basin of an amphitheatre of hills, the continuation of the ranges that come from Lake George on the west, and on the east define the course of the Shoalhaven River. The 100 miles radius from Sydney cuts off about 5 acres from the Federal Territory Site.

Goulburn and the country lying south of it is a lightly-timbered tract of open, undulating downs, bearing a certain resemblance, in this respect, to Bathurst and Yass Plains. Its proposed Site was inspected on the 27th October, 1899, and 26th February, 1900, and the Public Inquiry was held on the 7th and 8th May of this year. (For proposed Territory, see Plan, marked H, in Appendix.)

Climatic conditions (temperature).

According to the Temperature Table, furnished by the Government Astronomer, covering the past ten years, the mean spring temperature was 57·6; the mean summer, 68·3; the mean autumn, 57·1 and the mean winter, 45·0; while the mean maximum for the same period was 68·8, and the mean minimum 45·1. The greatest recorded shade temperature is given at 108 degrees on the 7th February, 1894, and the lowest at 20 degrees on the 24th July, 1892, and 10th and 30th July, 1895.

The mean daily range for the year varies from 29·89 in 1891 to 19½ in 1899.

The Site is about 50 miles from the sea in a direct line, and the cooling sea breezes set in invariably at the close of a hot day.

Rainfall.

For a period of twenty-nine years (1870-1899) the mean rainfall works out at 25·76 inches, distributed thus:—First quarter of year, 7·49; second, 6·07; third, 5·49; and fourth, 6·71,—showing a fairly level fall. The fall is probably as much as 2 or 3 inches greater along the ranges, which form the sources of the watercourses.

Altitude.

The mean altitude of eleven trigonometrical stations is 2,295½ feet above sea-level. Goulburn Railway Station has a similar altitude of 2,074 feet.

Accessibility

From the Table of Distances put in evidence (See Annexure—Goulburn, 4), which, in regard to distances by sea, would require a few corrections according to the official table of sea distances furnished by the Secretary of the Navigation Department (See Annexure D), Goulburn is 134 miles from Sydney; 443 miles from Melbourne; 924 miles, *viâ* Serviceton and Melbourne from Adelaide; 857 miles from Brisbane; from Hobart, *viâ* Melbourne, 899 miles, and *viâ* Sydney, 782 miles; from Albany, 2,234 miles, *viâ* Sydney, and *viâ* Melbourne 1,966 miles.

The district is well supplied with roads, and the old Sydney to Albury Road, still a first-class road, passes through Goulburn, running generally parallel to the railway.

Physical conditions (soil).

Mr. A. J. Sach, Resident Master of the Goulburn Technical College, describes the soil as having been formed from Silurian shale, weathered down to clay, with extensive sandy areas (decomposed quartzites) and from limestone. West and north of Goulburn, about one-fourth of the area of the Territory Site is red and chocolate soil of volcanic formation, and very rich soil, capable of successful cultivation, connected with the Mulwarrie and Wollondilly and extending a quarter of a mile from their beds. No granite is found nearer than Marulan (20 miles by railway), and there is no slate, but very hard shale.

It is in evidence that large quantities of produce, inclusive of cereals, are grown in the surrounding districts, especially Taralga, Crookwell, and Gullen, and that dairying is an important and increasing industry. The soil is said to be very favourable for wheat, oat, barley, rye, and potato crops, also for almost all English fruits.

Water supply and catchment.

The general opinion of the resident witnesses on these heads was that an abundant Water Supply was obtainable, to be stored by weirs and dams, and pumped to the higher levels. The District Surveyor gives the catchment area of the Wollondilly, above the weir, at 276 square miles, and of the Mulwarrie at 281, together 557 square miles, the Sydney catchment being given by another witness at 354 square miles, with a rainfall of 61 inches. But Mr. Blomfield, who gave expert evidence on the subject, while admitting that it was possible to combine three sources of supply for Goulburn, *viz.*, Sooley Ponds, Wollondilly, and Mulwarrie, stated that, if combined, pumping would be necessary, as there was not sufficient elevation for gravitation. A gravitation scheme, however, might be obtained by going some 16 or 17 miles up the Wollondilly, the estimated cost being put down at £60,000 to £70,000 at 30 gallons per head of population. The Baw Baw catchment, he thought, might be useful in connection with a pumping scheme, but that of Mulwarrie was not good; and he knew of no place for the development of greater electric power for traction than those inspected by him.

The Mayor of Goulburn, Mr. Knowlman, with others who gave evidence, thought more favourably of the water resources available than did Mr. Blomfield. Upon this important question, the Reports of Mr. Blomfield—(Annexures—Goulburn, 1, 2, 3)—may be usefully consulted. It may be mentioned here that Mr. Blomfield, in his comparison of fourteen proposed Federal Sites as regards relative values of water supply by gravitation, places Goulburn eighth in the list—next after Queanbeyan, and before Cootamundra. (See Annexure B.)

Building material.

As one of the witnesses said, the proximity of Goulburn to Sydney, whence all necessary building material can be quickly and cheaply obtained, is a great advantage. Still, apart from that fact, the evidence goes to show that the Goulburn district could supply marble, granite, limestone, and flagging slate in abundance, freestone at Marulan and Bundanoon, probably the materials for good cement and excellent clay for bricks. The timber supply, however, is probably no better or worse than that of most of the plateau Sites, and for practical purposes may be disregarded.

Drainage.

The contour of this Site is favourable for drainage, and the geological formation is not unfavourable.

The

The evidence shows that, of the 64,000 acres, 61,750 acres are private land, and 2,250 acres Crown lands and reserves; that the estimated value of lands within the Municipal boundaries of Goulburn, as improved, is £676,737; and of private lands, outside those boundaries, is from £3 5s. to £3 10s. per acre. Ownership and values.

With regard to the subjects collected under Head V—Facilities for Food Supply; Mineral Products, especially Coal; Capacity to support a considerable population; and, Conditions favourable to commercial and industrial development—the evidence is by no means unfavourable. The returns furnished show that Goulburn is a large stock centre, and that, owing to railway facilities and climate, and its vicinity to other productive districts, it would be well adapted for the establishment of killing and chilling works, and the utilisation of by-products. The return of stock depastured in the district for the last year gives—sheep, 404,000; cattle, 36,874; horses, 7,654; and pigs, 5,000. Miscellaneous conditions.

Coal is known to exist at Bundanoon, about 40 miles distant, although not considered equal to Newcastle coal; and it is stated that a rich deposit of iron ore within the proposed Site is now under test.

ANNEXURES.

Goulburn, 1.

FEDERAL CITY SITE WATER SUPPLIES, GOULBURN.

Sir,

Goulburn, 7 May, 1900.

There are three possible sources of supply for proposed Federal City Site of Goulburn, viz., the Wollondilly River, the Mulwarrie Ponds Creek, and the Sooley Ponds Creek.

The Wollondilly River has a large catchment area, and a lot of it is good; but, for a large population, storage and pumping would have to be adopted. A large reservoir with a short dam could be obtained at the village of Baw Baw, and from this the water would have to be pumped to supply the Federal City. By going about a mile above the site of Mr. Woore's old mill—i.e., 15 or 16 miles up the Wollondilly River from Goulburn—sufficient head would be obtained for a gravitation supply, and the catchment area is large enough to supply a 70,000 population; but I did not see a good site for a storage reservoir, although sufficient storage might be obtained by putting in a series of weirs as the population increased.

The Sooley Ponds Creek has not got such a good catchment area as the Wollondilly River, and it would be impossible to obtain a gravitation supply from it; but there are good sites for storage from which water could be pumped to supply the city.

The Mulwarrie Ponds Creek has a large but very ineffective catchment area. A large reservoir could be obtained on this creek, not far from the town from which the water would have to be pumped. A gravitation scheme from this creek would be impossible. I do not think that, in very dry years, this creek would be of any use.

CHARLES E. BLOMFIELD,
Resident Engineer, Department of Works.

To The Federal City Commissioner, Goulburn.

Goulburn, 2.

FURTHER INSPECTION OF WOLLONDILLY RIVER AT GOULBURN.

Sir,

Goulburn, 9 May, 1900.

The inspection which I made of the Wollondilly River on the 8th instant practically confirmed what I had already given in evidence, except that it is not possible to get any more head without going a long way further up. I found that, on my previous visit, I had been within 10 feet of the top of the rapids, and that above it the river gets very flat again. Although this stops the possibility of getting more head without considerable loss of catchment, it makes the storage a little better, as the weir will throw the water further back.

CHARLES E. BLOMFIELD,
Resident Engineer, Department of Works.

To The Federal City Commissioner, Land Appeal Court.

Goulburn, 3.

FEDERAL CITY WATER SUPPLY, GOULBURN.

Yass, 11 April, 1900.

THERE are three proposed sources of supply for Goulburn, viz., the Wollondilly River, the Mulwarrie Ponds Creek, and the Sooley Ponds Creek.

The Wollondilly has a large catchment area, and a lot of it is good. For a large population, storage and pumping would have to be adopted. A large storage reservoir with a short dam could be obtained at the village of Baw Baw, and from this water would have to be pumped to supply the Federal City. A gravitation scheme, except for a limited population, is out of the question. I think it would be possible to supply up to 40,000 people by gravitation; the storage would be the principal difficulty.

The Mulwarrie Ponds Creek has a large but ineffective catchment area. A large storage reservoir could be obtained on this creek, opposite "Wynella," not far above the town. It would have to be pumped to supply town. I am very doubtful about sufficient water running into it in very dry years to be of any practical use.

The Sooley Ponds Creek has a more effective catchment area than the Mulwarrie Ponds Creek, but it is not very good; and any scheme on this creek would have to be a storage and pumping one.

CHARLES E. BLOMFIELD,
Resident Engineer, Department of Works.

To The Federal City Commissioner, Albury.

Goulburn, 4.

ORANGE OR "CANOBOLAS" SITE.

Statement of Case.

THIS Site, comprising 64,700 acres, was originally submitted under the name of the town (Orange) which was included within the proposed area. The much more characteristic name "Canobolas," subsequently approved by the Committee, will be adopted in this Report.

I am indebted to Mr. District Surveyor Crouch for the topographical and general description, which follows:—

"The proposed "Canobolas" Federal Territory is intersected by the Main Western Railway Line, between 187 miles 45 chains and 197 miles 15 chains from Sydney, and it is also traversed for 7 miles 15 chains by the line to Condobolin. It comprises part of a plateau having an average elevation of about 3,000 feet above sea-level. The Territory generally includes low hills of trap formation, and gentle undulations sloping gradually to the north-west and north-east. The south and south-eastern parts are nearly level, but in the western parts the hills are higher, and in the south-western corner is situated the striking and well known Canobolas Mountain Peak, about 4,500 feet high, which, rising from 1,000 to 2,000 feet above the level of the surrounding country, is visible from all parts of the district, and, from its summit, enchanting views of from 40 to 60 miles in extent can be obtained in every direction. Towards the north and east light soils are found, in parts derived from shale formation, with diorite, quartz, trap, and serpentine rocks interspersed. In other directions rich red, black, and grey soils prevail (with gravelly ironstone subsoil in places), derived from the porphyritic basalt, the overflow from the long since extinct Canobolas Volcano. The climate and soil are particularly adapted to the growth of English fruits, such as currants, raspberries, strawberries, &c., whilst orchard trees, table grapes, vegetables, and all hardy plants thrive luxuriantly. Charming sites for homesteads abound throughout, more especially in the western parts. Almost all the land surrounding the Canobolas Mountain has been reserved, so that its sides, clothed with forest trees, its picturesque and fern-clad gullies, and the few isolated parts on the northern and eastern slopes, which have been cultivated, give beauty and variety to the scene. The well defined ridges which trend north and south from it, divide the county of Ashburnham from the counties of Wellington and Bathurst. From its slopes streams take their rise, which empty themselves into the Lachlan, Belubula, Macquarie, and Bell Rivers. The Territory is well watered by springs, and by Gosling, Brandy, Spring, Summerhill, Blackman's Swamp, Sportsman's, Molong, and Heifer Station Creeks. In all of these water can be obtained, except in very dry seasons, and in some the supply is permanent. On Gosling Creek, a reservoir has been constructed, from which water has been laid on to the town of Orange. This holds about

about 140,000,000 gallons, and during the severe drought of recent years, at no time was there less than 73,000,000 gallons contained. As the Territory is 124 miles distant from the coast, it is removed from the moisture of the sea breezes, whilst on the other side it closely approaches the fringe of the dry western plains. Its elevation and unique position combine to afford a cool, bracing, healthy atmosphere; so that it is thought Sir Hercules Robinson's forecast—that in future years it will become the 'Sanatorium of the West,'—must inevitably be fulfilled.

"The Municipalities of Orange and East Orange, which adjoin, and which are estimated to contain a population of about 7,000, are within the Territory, and lie respectively west and east of the railway line.

"The proposed Site of the Federal Capital has been designed to be adjacent to the southern boundaries of the Municipalities; so as to include about 1,200 acres of Crown land, and 1,650 acres of alienated land. The latter area has been but very lightly improved; so that a city can be designed and laid out on virgin ground, practically, without interfering with any improvements other than fencing; whilst the design of the existing Municipalities can be suitably incorporated in the suburbs of the Federal City. This Site has the advantage of being intersected in a north and south direction by the Main Western Line, and in a westerly direction by the Condobolin Branch Railway Line."

The sketch map in the Appendix, marked "K," shows by red edging the area proposed for the Federal Territory, and by blue edging that proposed as the Site of the Federal Capital.

The climate of "Canobolas," judged by the official records, appears to have everything to recommend it; the mean temperature during the hot season of the year being about 63 degrees, and during the other months about 46 degrees. The greatest recorded heat is 102 degrees; and cold, 16 degrees. Climate (Temperature).

The average annual rainfall is 39½ inches, which is very evenly distributed over the four quarters of the year. These figures cover a period of twenty-seven years. Rainfall.

The height of the Orange Railway Station above sea-level is 2,846 feet, and the mean altitude of the proposed Federal Territory may be set down as nearly approaching 3,000 feet, the highest point—the Peak of the Old Man Canobolas Mountain—reaching an elevation above sea-level of about 4,500 feet, roughly, 1,500 feet above the mean height of the Territory Site. Altitude.

Taking the Railway Station of Orange as a convenient point for the measurement of distances, Orange is distant 192 miles from Sydney by the Main Western Railway; 481 miles from Melbourne by the Harden-Blayney route; 963 miles from Adelaide by the Adelaide-Melbourne and Harden-Blayney routes, but if Adelaide is connected, *viâ* Broken Hill, with the Condobolin Line, the distance will be reduced to about 700 miles; 915 miles from Brisbane, *viâ* Queensland and Sydney Trunk Line, but about 685 miles if the proposed connection, Werris Creek to Wellington, about 56 miles to the north of Orange, be constructed; the distance from Sydney to Brisbane being 723 miles by rail. Communication with Hobart (Tasmania) would be, *viâ* Sydney, 818 miles, or, *viâ* Melbourne, 938 miles. Orange has no river or water communication, and those by road, though affording access in many directions, do not call for detailed description. Accessibility.

Derived from the decay of basaltic outflows from the great volcano now only partially recognisable in the peaks of the Canobolas, and from limestones elsewhere, the soil is of exceptional fertility, being generally in colour a rich chocolate on the slopes, with black moulds in the valleys, although with inferior qualities on the summits of the hills. Its natural productive powers, especially for wheat and potato crops, are very great, and, so far, there are hardly any signs of exhaustion. It is considered capable of giving in average seasons five to six sacks of wheat (say 25 bushels) per acre, and an excellent yield of potatoes. The district is renowned for its apples, cherries, and other English fruits, and the return, compiled from official materials, of produce forwarded by rail from the Orange district for the two years ending 30th June, 1899, annexed hereto, and marked Orange, 1, is evidence of the extraordinary fertility of the soils of the "Canobolas." Soil

Although the existing water supply of Orange appears to be ample for a population of 7,000, or even 10,000, the Gosling Creek Reservoir, having a storage capacity of 140,000,000 gallons, and being easily enlarged, yet to supply a population of 40,000 the present water supply would not suffice. It would, therefore, be necessary to bring other catchments and sources of supply into requisition. Mr. Blomfield, the engineer who examined all the useful and available catchments, gave evidence that at a point on the Molong or Meadow Creek, a good catchment of 8 square miles in area, with an elevation of about 100 feet higher than the Orange Railway Station, could be secured, which, by means of a dam about a quarter of a mile, and a pipe line 5 miles in length, would bring water of excellent quality by gravitation to the proposed Site, sufficient for the domestic requirements of 40,000 people. About 2¼ miles higher up the same creek, at a place known as the Devil's Hole, the late Mr. William Clark, C.E., recommended the construction of a high-service reservoir. This reservoir would have a catchment area of about 2,240 acres, and its outlet would have an elevation of 315 feet above the highest point in the town of Orange. At this point, as reported by Mr. Clark, after a long spell of dry weather the flow was equal to 1½ million gallons per diem. Mr. Blomfield's evidence will be found in the Orange Summary of Evidence in Part V, and his comparative estimate of the "Canobolas" (Orange) will be found in the Annexure, marked B. Professor Liversidge's analysis of the water obtained from the source now supplying the town will be found in the Annexure hereto, marked Orange, 2. An important advantage possessed by this Site is the command, at the present time, of a water supply which would, probably, be found sufficient for the service of a large body of artisans, and, by increasing the height of the present weir a few feet, the supply could be made equal to a very large storage capacity, and in the immediate vicinity of the proposed Capital Site. Water resources, catchments, &c.

The evidence in connection with subhead (c) of Physical Conditions, namely, "The possession of, or proximity to, stone, timber, and other building material," is satisfactory, so far as it goes, to show that basalt (including columnar), granite, and limestones, are available in any required quantities, and in places not too remote from the proposed Building Site; but it is not so satisfactory in respect of the sandstones, and, indeed, it was not to be expected that any Devonian sandstones of this district could compare favourably with the best Hawkesbury sandstones for building purposes. Building materials.

The clays, as is the case in nearly all the proposed areas, are sufficient for brickmaking, and, from an architectural point of view, would provide all necessary varieties of colour, with due moisture resistance. Good hardwood is, perhaps, procurable from some of the adjacent districts; but for "Canobolas," as for almost all other Sites, the forests from which contractors will obtain the building timber for the Capital are not in New South Wales, but on the west coast of North America.

The

Drainage.

The selected Site drains chiefly in a northerly direction into watercourses that connect with the River Macquarie. There are no objections to the Site in respect of natural drainage.

Other physical features.

The towering mass of the Canobolas Mountains, distant from Orange Railway Station about 8 miles, is easily accessible to buggies to within a few hundred yards of the Trigonometrical Station at the summit, and, by a small expenditure, a practicable track for buggies could be made to the summit. Not many prospects in New South Wales can vie with the panorama spread out to the spectator's eyes from the cairn on top of the highest peak of the Canobolas; and it may be said with truth that if a visitor should desire a bird's eye view of the most fertile districts of this Colony from the most commanding point, the cairn of Canobolas is that point. It is satisfactory to know that the most picturesque portions of this interesting mountain have been thoughtfully reserved for public recreation.

Values, &c.

The area of Crown lands, including reserves, &c., embraced in this Site, is given at 10,800 acres. The improved value of all lands contained in the area, inclusive of lands within municipal areas, is given at £1,020,000, exclusive of roads. This valuation includes large areas of conditionally purchased land, which have been valued as on a freehold basis. The estimated value of lands embraced within the municipal boundaries, with existing improvements, was put down at £592,426, while the unimproved value of lands outside the municipal boundaries was given by one witness of experience at £2 per acre all round, and the improved value of the same lands at £5 per acre, which, excluding Crown lands, would amount to about £260,000. The District Surveyor would increase that value to £365,000, or nearly £7 an acre. It may, I think, be assumed that the resumption of the entire area would, in round numbers, cost not much less than a million sterling.

Miscellaneous conditions.

With an evenly distributed annual rainfall of nearly 30 inches, a fertile soil, and a favourable climate, it would follow almost as a corollary that the ravages of drought, so calamitous in less favoured districts, must be practically unknown in the "Canobolas"; and the evidence shows that such is the fact. As a food centre, this district is favoured by almost exceptional conditions, and its ability to support a large population largely from its own resources cannot be questioned. As a stock emporium, also, its position is very attractive, and there can be but little doubt that these physical advantages indicate the district as one possessing the conditions which are likely to command attention when the metropolis demands country killed meat—a demand which, in the public interests, cannot be much longer retarded. The coal supply of the district is derived from Lithgow, distant about 96 miles, but the rate of carriage is very reasonable. From the health aspect, this district is well favoured; and on this subject the evidence of Dr. Keltie (Orange, Summary of Evidence, in Part V.) may be usefully consulted.

ANNEXURES.

Orange, 1.

PRODUCE forwarded from the Orange District (Millthorpe, Springhill, and Orange Stations), for a period of two years, ending 30th June, 1899.

Potatoes	197,194 bags
Turnips	1,741 "
Pumpkins	3,029 "
Wheat	30,273 "
Oats	10,351 "
Chaff)	
Hay)	26,735 tons
Straw)	
Flour	19,324 "
Fruit	76,021 cases.

Orange, 2.

The University, Sydney, 27 August, 1877.

REPORT upon a Sample of Water obtained from the source proposed for the Supply of the Town of Orange.

Colour, &c.—No trace of brown colour; fairly clear and bright, but with, however, a faint opalescence or milkiness.

Only a small amount of sediment thrown down on standing.

Smell.—None.

Taste.—None.

Without previous filtration it yielded the following results:—

Free ammonia	·04 parts per million
Albumenoid	·09 "
Chlorine	1·60 "
Nitrates present—	
Total solid matter	51·00 parts per million, equal to 3·57 grains per gallon
Loss on ignition	10·44 " " " " " " " "
Fixed solid matter	40·56 " " " " " " " "

The residue left on evaporation to dryness was nearly white, with faint brown patches.

On ignition this residue blackened slightly; but the carbon burnt quickly away, and the fixed solid matter was almost pure white in colour.

The percentage composition of the above residue was found to be as follows:—

<i>Analysis of Residue.</i>	
Silica	73·62
Iron sesquioxide and alumina	7·97
Lime	7·36
Magnesia	3·49
Potash	undetermined
Soda	" "
Chlorine	·43
Sulphuric Acid	traces
Carbolic Acid	" "
Undetermined and loss	7·13

100·00

Microscopical examination.—Very few organisms were found to be present. The forms met with were those commonly existing in spring and river waters, such as rotifera, diatoms, paramœcia, and other closely allied organisms.

Remarks—On the whole, this water may be regarded as a very pure one, and one well adapted for household and manufacturing purposes. The amount of inorganic matter in solution is below the average.

ARCHD. LIVERSIDGE.

Orange

30th August, 1900.

H. A. CROUCH,
District Surveyor.

QUEANBEYAN SITE.

Statement of Case.

THE proposed Territory at Queanbeyan (shown on Plan, marked L, in Appendix) excludes that township, and extends from its western and southern population boundaries in a generally south-western direction to the Murrumbidgee River, to which it has a frontage of about 15 miles, whilst its northernmost portion is intersected by the Molonglo River, and its eastern area by the Jerrabomberra Creek, a tributary of the Molonglo. The Site is traversed by the Goulburn and Cooma Railway, between the 197th and 206th mile posts, and comprises an area of 64,000 acres, embracing the parishes of Narrabundah and Tuggeranong, and parts of the parishes of Canberra, Yarrolumla, Gingerline, Queanbeyan, and Googong, in the county of Murray. The proposed Capital Site, on Canberra Plain, comprises an area of about 1,600 acres, situated on the Molonglo River, at its junction with Jerrabomberra Creek, about 6 miles north-west of the township of Queanbeyan, and about 2 miles south of Mount Ainslie. The Site selected is one of the most picturesque in a district abounding in fine landscapes, and from it some magnificent views are obtainable.

From returns furnished by the Government Astronomer, the mean temperature at Queanbeyan during each quarter of the year is as follows:—

1st January to 31st March...	68.9 degrees.
1st April to 30th June ...	50.0 "
1st July to 30th September ...	46.0 "
1st October to 31st December ...	63.7 "

Climatic
Conditions
(temperature)

The hottest day on record was 109.4 degrees, and the coldest, 15.8 degrees. The average of the hottest month was 79.2 degrees, and the average of the coldest, 34.1 degrees. The temperature is described as changeable, but unless a thunderstorm occurs the fall is not material. The district is described as possessing a pleasant, healthy climate, conducive to longevity, and free from endemic disease. There might be one or two hot nights in the summer. The winter climate is very cold, and, perhaps, on that account, pneumonia is relatively more prevalent than in other parts of the Colony, but residents had not to protect themselves more from chills than elsewhere.

The altitude of Queanbeyan Railway Station is 1,901 feet. The mean altitude of the whole of the proposed Territory is stated to be 2,350 feet. The Site selected for the Capital is about 2,000 feet above sea-level.

Altitude

The average annual rainfall is 23.55 inches, as furnished by the Government Astronomer. This is for a period of twenty-nine years, viz., 1871 to 1899. The highest recorded fall was, in 1887, 41.29 inches, and the lowest, in 1895, 11.84 inches. From the quarterly averages, the rainfall appears to be evenly distributed throughout the year.

Rainfall

Situated on the Cooma Branch of the Southern Main Trunk Line, Queanbeyan is distant 194 miles from Sydney. Yass, on the Main Trunk Line, may be reached by road, 30 miles. Melbourne is distant, by rail, 502 miles; but, if the proposed junction of the Cooma Branch Line with the Bairnsdale (Victoria) Line is carried out, the distance to Melbourne would be reduced to 420 miles, and the distances to Adelaide and Hobart proportionately reduced. At present, Adelaide is distant, by steamer and rail, 1,260 miles; Hobart, by steamer and rail, 660 miles; and Brisbane, by rail, 917 miles. Good roads from the surrounding districts also afford access to Queanbeyan, and it may also be reached by water to Nelligen, on the South Coast, thence, by road, 60 miles.

Accessibility

May

Physical conditions (soil).

May be described as alluvial slate formation, ferruginous, and decomposed granite—chiefly the latter—with an underlying soil of rotten granite and clay. There is a good deal of limestone and some evidence of basaltic formation. The soil, as an average, is fairly deep, and varies from the richest in the country to poor, but, on the whole, is very fertile and suitable for agriculture and mixed farming.

Water supply and catchment.

Under this head, Mr. Blomfield reports :—

“There are three possible sources of supply for proposed Federal Site at Queanbeyan—the Cotter River, the Murrumbidgee, and the Queanbeyan River.

“The Cotter has only one possible objection that can be urged against it;—that is, expense. The point on the river from which the water would have to be brought for a gravitation supply is only about 16 miles, in a straight line, from the Federal City Site; but the country is very rough, and an expensive syphon would have to be made across the Murrumbidgee Valley. Everything else is very favourable, the catchment is good and very effective, the stream is said to be permanent, and it has the appearance of being so. On 13th April, 1900, there was more than enough passing down to supply both Sydney and Melbourne. The water was very clear, while the waters of the Murrumbidgee were very turbid.

“The Murrumbidgee could also be utilised for supplying the Queanbeyan Site by gravitation, as the river, at Michelago, is about 150 feet above the proposed Site, the distance being about 33 miles. As it would be necessary to go further up to get a greater fall, a full investigation might prove the Cotter scheme to be not much more expensive, and in other points it is easily the best.

“With supplies like the Cotter and Murrumbidgee, I did not think it worth while investigating an intermittent river like the Queanbeyan.”

The following information is extracted from the Committee's Report :—

“The catchment area of the Murrumbidgee, above Tharwa, is about 2,300 miles, and above its junction with the Molonglo about 3,500 miles. The summer flow of the Murrumbidgee there rarely falls below 100 cubic feet per second (54,000,000 gallons per day) at Tharwa, and 160 cubic feet per second (86,400,000 gallons per day) at the Molonglo junction.”

Building material.

Large deposits of sandstone contiguous to the proposed Territory, and an inexhaustible supply of freestone of good quality at the Black Hill, a few miles west of the proposed building Site. Granite is plentiful. An unlimited supply of limestone exists at the junction of the Cotter and Murrumbidgee Rivers. Plenty of river shingle and clean sharp river sand, and abundance of clay for brickmaking. The available timbers are red and yellow box, stringybark, messmate, and mountain ash.

Drainage.

Other physical features.

Naturally good. The proposed building Site has a fall in all directions.

For foundations of heavy buildings the soil is very suitable. Stone or clay is met a few feet from the surface. Canberra Church, a heavy building with a spire, with foundations in clay 4 feet deep, shows no signs of subsidence or cracking. The Territory contains undulating plains and forest lands, is intersected by numerous watercourses and natural springs which could be easily utilised for watering parks and public gardens. Mount Kosciusko is within 80 miles, and Lake George is distant only 16 miles, whilst the Yarrangobilly Caves are within easy access. A great variety of climate is claimed for the Site, and within a few hours a height of 5,000 feet can be reached.

Ownership and value.

Nearly all of the proposed Territory is alienated or private lands, there being only 949 acres of Crown land, including Church and School land, reserves, &c. As a whole, and as improved, the land is estimated to be worth £3 per acre. The Committee's Report estimates the total value of private lands, with improvements, at £157,000.

Miscellaneous conditions.

The proposed Territory is chiefly pastoral, but about 30,000 acres in the Queanbeyan District are held by small holders, a large proportion of which is under cultivation for breadstuffs and forage. With closer settlement and mixed farming, it is claimed that sufficient wheat and other crops for a population of 40,000 would be forthcoming. In meat food, the district could supply a large population, as its stock carrying capacity is very high, as is evidenced by the fact that in the recent drought impoverished stock from other districts were sustained there. The grasses are remarkably fattening, and grazing is at present the most lucrative industry. English fruits are grown, and wine has been made in the district. Dairying would succeed with increased population.

The mineral products of the district are iron in extensive lodes, gold, silver, tin, antimony, shale, &c. Coal outcrops have been found in the district, but no coal-mines have been developed to any commercial extent.

The district is well able to support a large population, and is favourably situated for manufacturing industries, such as woollen manufactories, tanneries, iron manufactories, &c., whilst dairying, fruit-growing, jam making, and similar industries would follow with population. Chilling and freezing works for export could be established, the district being suitable for growing crossbreds of large frame. With existing railway routes, it is claimed that the State, commercially, is in favour of Sydney.

TUMUT SITE.

Statement of Case.

Topography.

TUMUT, a municipal town containing about 1,400 inhabitants, is situated on the river of that name, and the most important affluent, after the Lachlan, of the Murrumbidgee River. Tumut is within the Eastern Division of New South Wales, and on the western slope of the Australian Alps. The area proposed for the Federal Territory (see Plan, marked M, in Appendix) contains 100 square miles (64,000 acres), of which 41,800 acres are alienated lands, and the balance, 22,000 acres, Crown lands. The Cootamundra-Gundagai branch of the South-Western Trunk Railway has its terminus at Gundagai, from which point Tumut is reached by two excellent roads, the distance being about 21 miles. A road from Wagga Wagga to Tumut (60 miles) passes by Mount Adrah, Tarcutta, and Adelong; and branch roads lead from Tumut to Batlow, Tumbarumba, Adelong, Blowering, and other settlements. An extension of the Cootamundra-Gundagai branch Railway to Tumut has been recommended by the Public Works Committee, and there are strong hopes that it will shortly be constructed, and thus bring this most productive and beautiful district into touch with the Main Trunk Railway, Sydney to Melbourne.

For

For the appended topographical description of the Tumut River Valley, the Commissioner is indebted to Mr. Staff-Surveyor Chesterman, of Tumut:—

“ Among the tributary streams of the Murrumbidgee River, if the Lachlan be excluded, the Tumut River must be accorded first position, both as to importance and size. This river—rising in the Big Bogong, on the Snowy Mountains, at an elevation of about 6,000 feet above sea level, and flowing generally in a northerly direction—empties itself, after a course of about 170 miles, into the Murrumbidgee at a point a few miles above Gundagai. The upper portion (comprising almost the southern half of the river) is mostly through rugged mountainous country, rising steeply from the valley into elevated tablelands, affording good summer pasturage. The main feeders on this portion, from the east, are the Doubtful, the Yarrangobilly, and the Jonnama Rivers; on the west, Long Creek and Buddy Creek are the most important affluents. The longer portion of the river (from Talbingo, northerly) flows through more diversified country, broken by tributary streams, and, as the loftier mountains are left behind, the country opens out considerably, more particularly around the town of Tumut, which is reached when, roughly, about two-thirds of the river from its source has been traversed. Here we have the large alluvial flats of Tumut Plains and Bombowlee on the east, and the narrower, though no less rich, flats, of Blowering and Gocup on the west. Proceeding down the river, the hilly country approaches more closely to the river, narrowing the flat land, but only to again soon open out and disclose the rich lands around Brungle, Tarrabandra, and Darbalara; the latter near the Murrumbidgee Junction.

“ Centreing our attention more particularly around the vicinity of Tumut, we find alluvial flats extending along the banks of the main river and the larger tributary streams. Behind these alluvial areas, undulating and ridgy uplands, mostly suitable for cereals, extend back into steep, broken, inferior wooded hills. In some instances these hills flatten away into high ridgy tablelands, heavily timbered, but affording soil suitable for cold country growths. Variations of the above general conformation occur, in that occasionally forest uplands and even hilly country reach down to the banks of the streams, ‘pinching’ the alluvial flats. If, however, the positions of the tributary streams with regard to the trunk river be known, the dividing ridges and ranges forming the watersheds at once approximately locate themselves; and from the above description a general idea may be grasped of the country in question. I say ‘general’ because, from the broken nature of the country intersected by its numerous watercourses and small streams, it is very difficult, if not impossible, to convey an exact idea in detail.

“ Still confining our attention to the area more immediately around Tumut, we find on the east bank of the main river the Goobaragandra or Little River junctioning a short distance above the town, and the Bombowlee Creek a couple of miles below the town. These streams have a general trend easterly and westerly, and the richest country in the Tumut Valley is found on the north and south of where they junction with the main river—to wit, the flats of Bombowlee and the Tumut Plains. The ridge dividing them comprises broken wooded country, some distance back from the main river, however. North of Bombowlee Creek there is no feeder of consequence till the Killimicat Creek, with a north-westerly flow, is reached. This latter stream debouches near the confluence of another comparatively large affluent, known as the Brungle Creek, roughly about half-way between the town of Tumut and the mouth of the Tumut River.

“ On the west bank of the Tumut River one stream of importance stands out prominently, viz., the Gilmore Creek, which has almost throughout a course practically parallel to and a few miles west of the main river, sweeping round north-easterly in the last 5 miles of its career to effect a junction immediately below the present town. Rich country, partly alluvial, but mostly upland, extends up the banks of this creek for miles, gradually narrowing; but the range forming its eastern watershed, and dividing it from the waters proper of the main river, is high, steep, rugged, and affords mostly even inferior grazing. The range of hills on the west of the Gilmore Creek forms the watershed between that creek and the Adelong Creek, which latter stream has a general direction parallel to the Tumut River, ultimately emptying itself into the Murrumbidgee about 8 miles below Gundagai.

“ About 4 or 5 miles from its mouth, the Gilmore Creek receives a tributary stream known as the Gadara or Sandy Creek, and it is the immediate basin of this latter stream, comprising a large extent of undulating country which has been suggested as a Site for a future Federal City. The general flow of the Gadara or Sandy Creek is south-easterly, a high stony range, known as Table Top, forming its north-eastern watershed, and separating its waters from those of the Gocup and Meadow Creeks, the latter being within suggested Federal Territory, but junctioning with the Tumut River proper some miles below the present town. The south-western watershed of Gadara Creek is partly the range mentioned before, separating the waters of Gilmore and Adelong Creeks, and partly a spur running easterly from this range and separating the Gadara Creek waters from the little streamlets flowing into the Windowie Creek, another feeder of the Gilmore. This spur at its eastern end forms a comparatively low “divide,” and the general aspect of the whole Gadara or Sandy Creek basin may be described as undulating and ridgy with circling hills on the north, west, and south-west.

“ The highest point on the suggested Federal Territory is probably the summit of Tabletop. North-east of this the country falls away through hills and ridges to the flats of Gocup, on the main river, while the country on the immediate west is described in the preceding paragraph. West of this again the suggested Federal Territory includes part of the Adelong Creek watershed. South of the present town of Tumut long spurs stretch northerly from the high range between the Gilmore Creek and the Tumut River.

“ The general formation of the Tumut River Valley is granitic, interspersed with belts of limestone (more particularly on the Yarrangobilly, where the well-known limestone caves exist), schistics, and trap.

“ The extent of alluvial land in the valley of the Tumut was, some years ago, estimated as follows:—

“ Tumut River (including the Goobaragandra, from 4 miles below Brungle to Talbingo)	14,860 acres.
“ Brungle Creek	600 ”
“ Killimicat Creek	500 ”
“ Bombowlee Creek	600 ”
“ Gilmore Creek	800 ”
	<hr/>
	17,360 ”

“ These

"These flats are rich alluvial, producing large crops of tobacco, maize, potatoes, and, where cultivated, of fruit; while the uplands, to the foot of the ridges, are well adapted for cereals." (The above is quoted from a printed Report by Mr. H. A. Gilliat, Examiner of Public Works proposals, laid before the Legislative Assembly in 1891.)

"The abovementioned Report estimates the extent of arable upland at 100,000 acres. This, of course, will vary according to the limit adopted. The area remaining may be classed as pasture land, better adapted to sheep than large stock. Some of it is very inferior, while, in other places, sheep thrive well."

Climatic conditions (temperature).

There being no official Meteorological Observer for temperature at Tumut, the records of temperature were those kept by a resident witness, who stated that the highest recorded temperature in his knowledge was 110 degrees, and the lowest on the same day, 90 degrees; that the highest average summer reading for ten years was 90 degrees, and the lowest for the same period, 60 degrees; the highest autumn temperature being 70 degrees, and the lowest 40 degrees; and that he had never known the winter temperature to go below 40 degrees at mid-day. The prevailing wind in summer was from the east, and in winter from west and south-west.

Altitude.

This is given by Mr. Staff Surveyor Chesterman as 925 feet for the town of Tumut, and, for the proposed Capital Site, from 1,000 to 2,000 feet, with an average of about 1,300 feet above sea level.

Rainfall.

The Rainfall Observer for the Government Astronomer gives the average annual rainfall for eleven years, commencing with the year 1889, as 33 inches, distributed thus:—1st quarter, 7·40 inches; 2nd quarter, 9·86 inches; 3rd quarter, 8·54 inches; 4th quarter, 7·17 inches,—from which it will be seen that this ample rainfall is very evenly distributed over the year.

Accessibility.

From Sydney, Tumut is distant by railway to Gundagai, and thence 21 miles by road, 310 miles; and by rail and road from Melbourne, 350 miles; from Brisbane, 1,000 miles; and from Adelaide, 810 miles. As already mentioned, the Public Works Committee has recommended an extension to Tumut of the Cootamundra-Gundagai Branch. There is no water communication with Tumut.

Physical conditions (soil).

The soil is generally of granitic formation, with outcrops of basalt and volcanic rocks, and varies from rich alluvial flats to forest country, suitable for cultivation, and high ridges. Belts of limestone occur close to the proposed Site, and there are outcrops of slate in the north-east corner and the eastern slopes.

The soil on the alluvial flats is a rich chocolate, basaltic in places, with firm, loamy clays. The flats and hill slopes are especially suitable for cereals of all kinds, and, on the basaltic soils, excellent fruit and vegetables of all kinds are produced in profusion.

Water supply and catchment.

The Tumut River, which is a strong running permanent stream, would provide an ample water supply, and the catchment area of that source is very large, with excellent facilities for storage. There are, in reality, three collecting areas—the Tumut, Adelong, and Sandy Creeks.

Mr. Blomfield's Report (Annexure, T 1) shows that he examined the Buddong River, an affluent of the Tumut, for a gravitation supply. The following extract from that Report would promise very satisfactory Water Resources:—

"The proposed offtake from above the Buddong Falls is about 1,800 feet above the highest point on the proposed Federal Area, and there is no difficulty about bringing the water in over an intervening range of hills. The catchment area is fairly large, and is nearly all forest reserve, so the water will not be liable to pollution.

"This proposal, with storage (easily obtainable), would be equal to supplying a population of 40,000 inhabitants; and if the Federal City should ever grow to large dimensions, the Tumut River could be made use of for a large supply by gravitation, at reasonable cost. In fact, Tumut, situated as it is at the foot of the mountains, could be supplied from a number of sources, such as the Adjinbilly and other Creeks that flow into the Tumut River."

Building material.

Blue granite occurs in unlimited quantities, and in large blocks, and it is said to be the best building stone in the district; also limestones, including marble and slate, with freestones within a reasonable distance of the proposed Capital Site. There is abundance of good clay for brickmaking, also of sand and gravel. The timbers include ironbark, pine, box, mountain ash, messmate, and urabbi within easy reach.

Drainage.

The physical conformation of the country is very favourable for drainage, whether by ordinary system of sewerage or by more modern methods.

Ownership and value.

Alienated lands (freehold, conditional purchase, conditional lease, &c.) :—

41,000 acres of country lands, worth (unimproved)	£104,000
300 acres of town lands, worth (unimproved)	37,000
500 acres of suburban lands, worth (unimproved)	10,000
Approximately estimated	£151,000
41,000 acres of country lands, worth (improved)	£172,000
300 acres of town lands, worth (improved)	125,000
500 acres of suburban lands, worth (improved)	25,000

Improved value of alienated lands,—that is, with existing improvements (approximately estimated) £322,000

Crown lands (including reserves, commons, &c.) are made up thus:—21,500 acres of country lands, 300 acres within town of Tumut (recreation reserves, parks, other reserves, streets), 400 acres of suburban lands (mostly within common of Tumut).

The following is extracted from the Report furnished by the Local Committee:—

Miscellaneous conditions.

"1. The area within a radius of 20 miles of the proposed Site is composed of 170,000 acres of rich chocolate-coloured volcanic soil, and 30,000 acres of rich alluvial flats (much of which has been cultivated for fifty years, with little or no deterioration), whilst the more elevated portions afford splendid grazing country for sheep right to the mountain tops. The alluvial land is eminently suited to the growth of tobacco, maize, hops, fruit, and vegetables, and for that purpose cannot be excelled in Australia. For wheat-growing, our forest lands are also in the front rank, the published statistics clearly showing that the returns

returns per acre are among the highest in the Colony. With such an area of land at command, sufficient foodstuffs could be raised to supply a population of 200,000 people. Failure of crops in the district has never been known. All through the past drouthy seasons, when in many parts of the Colony despair had seized the people, and ruin stared them in the face, the district of Tumut was unaffected, and starved-out owners from other localities brought their flocks and herds in hundreds of thousands to its pastures to save their lives. These owners also furnished the fodder products of Tumut farms, and sent them to their drought-stricken holdings to feed the remainder of their stock.

"2. In minerals, the district excels. The best and most extensive gold-fields in New South Wales are within 5 miles of the proposed Site, viz., at Adelong. Chrome, iron, and copper are found in abundance. Silver and tin are also procurable in considerable quantities.

"3. The capacity to support a considerable population is assured by the extent to which agricultural, pastoral, and mineral resources can be utilised. Work could be found for all, as commercial and industrial development is but concomitant with the foundation of a large city, and is necessary to ensure its stability and progress.

"4. From a commercial point of view the district has much to recommend it. The suitability of its soil for the growth of malting barley and hops, bespeaks for it a great future in the manufacture of malt and its concomitants—ale, beer, porter, cider, &c. With the advent of a larger population in the district, maize would be converted into cornflour, maizena, maizemeal, and probably whiskey. The unlimited supply of fruit ensures the manufacture, in a wholesale way, of jams, jellies, preserves, dried fruits, &c. Honey, which is now almost a waste product, would, under different circumstances, have its output increased a hundredfold. Dairy farming, too, would in such a favoured district advance by leaps and bounds, and, with its kindred occupation of poultry raising, would form no mean item in the commercial wealth of the city. Conditions are favourable in the extreme to the establishment of woollen mills, boot factories, tanneries, refrigerating works, and other factories, as all the necessary raw materials are at hand. With the increased development of the mineral areas, large reduction works, employing many, will be erected."

ANNEXURE.

Tumut, 1.

WATER SUPPLY FOR TUMUT PROPOSED FEDERAL CITY SITE.

Sir,

The proposed source of Water Supply for the Federal Area, at Tumut, is from the Buddong River, a tributary of the Tumut River.

The proposed offtake from above the Buddong Falls is about 1,800 feet above the highest point on the proposed Federal Area, and there is no difficulty about bringing the water in over an intervening range of hills. The catchment area is fairly large, and is nearly all forest reserve, so the water will not be liable to pollution.

This proposal, with storage (easily obtainable), would be equal to supplying a population of 40,000 inhabitants; and if the Federal City should ever grow to large dimensions, the Tumut River could be made use of, for a large supply, by gravitation, at reasonable cost. In fact, Tumut, situated as it is at the foot of the mountains, could be supplied from a number of sources, such as the Adjinbilly and other Creeks that flow into the Tumut River.

CHARLES E. BLOMFIELD,
Resident Engineer,
Department of Works.

WAGGA WAGGA SITE.

Statement of Case.

WAGGA WAGGA, a borough estimated to have a population of about 6,000, is situated on the south or left bank, and in a bend of the Murrumbidgee—the second-largest river in New South Wales. The Sydney to Melbourne, or South-west Trunk Railway, touches the town at its south-east corner, 309 miles from Sydney, and from Melbourne 267 miles. The geological formation is granitic, and the Site proposed for the Federal Capital sweeps in gentle undulations from the present town, southerly, towards Lake Albert. The area of the proposed Federal Territory is 100,000 acres, or 156½ square miles, of which 8,000 are Crown lands, reserves, &c. This area is intersected by the river, rather more than one-half being situated north of it; and the proposed Site of the Capital, embracing about 3,000 acres, includes the town on the north or riverward. In shape, the Area is fairly compact, and does not contain much poor land, while the river flats on both banks are of exceptional fertility, but are liable to inundation on the occurrence of high floods. The town occupies a commanding position, commercially, and in close touch with some of the finest farm and pasture lands in the district known as Riverina. The basin of the Murrumbidgee is well indicated by the hills that mark the westward course of that river. (See Plan of Site, marked N, in Appendix.)

The mean quarterly temperature for a period of twenty-seven years, from information furnished by the Government Astronomer, shows, for the January to March quarter, 74·2 degrees; for the April to June quarter, 53·1 degrees; for the July to September quarter, 49·5 degrees; and for the October to December quarter, 67·9 degrees. The mean temperature for the hottest months are respectively 85 degrees, 66·3 degrees, 57·5 degrees, and 79·7 degrees; and for the coldest months, 61·7 degrees, 39·9 degrees, 40·6 degrees, and 56·9 degrees.

The altitude of Wagga Wagga Railway Station is 609 feet. The mean altitude of the proposed Capital Site is, approximately, about 710 feet above sea-level.

This, for the past seven years, is given at 22·94 inches; and for a period of twenty-seven years, the Government Astronomer is quoted as the authority for the following figures, showing distribution of rainfall over the four quarters of the year:—From January 1st to March 31st, 5·197 inches; from April 1st to June 30th, 6·480 inches; from July 1st to September 30th, 5·637 inches; and from October 1st to December 31st, 5·435 inches; the mean for the year being 22·749 inches.

Wagga Wagga is distant from Sydney, 309 miles.
" " Melbourne, 267 miles.
" " Brisbane, 1,033 miles.
" " Hobart, 637 miles.
" " Adelaide, 750 miles.
" " Perth, 2,119 miles.

Accessibility.

By

By road, Wagga Wagga is on the Main Road from Sydney to Melbourne, and numerous branch coach roads lead to the outlying districts. The Main Stock Route from Queensland passes through Wagga Wagga.

By water—once the principal mode of bringing supplies to this district. The river, since the establishment of railway communication, has been very little used; but it is stated that, with a moderate outlay, it could still be made available.

In common with many other projected Sites, the advantage of shorter distances from adjacent States, such as Western Australia and Queensland, is claimed for this Site.

Physical conditions (soil).

The soil of the Site selected for the Capital is described as a firm loamy clay, with quartz grit. Properly cultivated it is said to be very productive. Wheat and oats are the principal cereal crops, and the cultivation of the vine for wine is increasing. Root crops do well, except in very dry years; likewise citrus and stone fruits and raspberries. A large area has recently been taken up and planted with tobacco, which is expected to become in time a very successful industry. There is an important Government Experimental Farm close to Wagga Wagga.

Water supply and catchment.

The present Water Supply is by pumping from the Murrumbidgee, and this is relied on as being ample and most effective for a population of 40,000. Of course, the catchment area is that of this river.

An examination of Tarcutta Creek for a gravitation scheme was made by Mr. Blomfield; but his Report is unfavourable, and he thinks that no other kind of supply than a pumping one can be depended on. (See Annexure hereto, marked Wagga Wagga, 1.)

Building material.

The Report states that "there are large outcrops of boulder granite within 5 miles of Wagga Wagga, from which stones of any reasonable size may be hewn. There are also large quantities of metamorphic slate with level beddings and smooth faces, well suited for random rubble work or building in behind parapet walls. Limestone of excellent quality is plentiful about 40 miles from Wagga Wagga, but the supply is at present obtained by rail. Gravel suitable for use in concrete foundations, &c., abounds in large quantities along the river bed. Sand of good quality is abundant in and about Wagga Wagga. Bricks of excellent quality are burnt at Wagga Wagga, where an unlimited quantity of good earth for making them is obtainable. The local timber is somewhat limited in quantity, and consists of Colonial pine—a very useful timber for many purposes,—and river gum, which is very durable and useful for heavy studs, &c."

Drainage.

On this head, the Report states: "The facilities for drainage are great, as the valleys between the undulating hills trend westerly from the range of hills along the eastern boundary of the proposed Site of the Federal Capital, and the drainage would reach the river a long way below the town, if not absorbed in sewage farms. The undulations are of such a gentle character that the gradient of all streets and roads would be very easy.

Other physical features.

"The Murrumbidgee flows through a rich alluvial flat midway, and for the entire length of the tract of country under notice. The Kyeamba Creek, a permanent and important watercourse, flows along the south-eastern boundary. Lake Albert, a natural basin 40 feet lower than the bed of the Crooked Creek, which could be diverted into it at a comparatively small outlay, is capable of being rendered a permanent and highly ornamental sheet of water, which would ensure a plentiful supply of water to the neighbourhood, and provide an excellent rowing course.

"Houlaghan's Creek, on the northern boundary of the proposed Federal Territory, is not permanent, but offers facilities for conserving water in very large quantities. The higher hills about Wagga Wagga present strategic positions which, if fortified, would command a large expanse of the surrounding country.

"The Site of the proposed City is a long way above the level of the highest river floods, and there is no local catchment to cause freshets. Quartz and dykes of quartz and diorite occur in the vicinity of Wagga Wagga, which provide an ample supply of good road-making material."

Ownership and values.

Of the 100,000 acres proposed for the Federal Territory, it would seem that about 9,000 are Common Reserves, and probably 6,000 acres are covered by water, or are the sites of roads, &c.; but the values, as improved, given in the Report, are for 94,000 acres, and are thus estimated:—

23,440 acres improved private lands, at £8	£187,520
31,680	"	"	£5
38,850	"	"	£3
			462,560
Estimated value, as improved, of lands within Municipal boundaries			500,000
			£962,560

There are no Church and School lands within the proposed area.

The District Surveyor on this head reports as follows:—

Miscellaneous conditions (food supply, &c.).

"Wagga Wagga is the chief centre of the celebrated Riverina District, which contains probably the richest and most productive agricultural lands in the Colony. The country for miles around is eminently suited for the production of wheat, oats, barley, and other cereals, and vegetables and fruits of many varieties. Its success as a pastoral district provides unlimited supplies of beef, mutton, and pork. It is the natural and most convenient market to the Tumbarumba District; consequently the English fruits and vegetables prolifically produced in that more elevated district are readily obtainable.

"The agricultural and pastoral resources of the district, as previously detailed; the convenience of this Site as a central market; the fertility of the soil, rendering it favourable for the establishment of small homesteads on limited areas; its ready accessibility by rail and river, &c.,—represent special capacity to support a large population.

The same officer also reports that, out of four Sites within his district which had been considered as regards the suitability for the Federal Capital, Wagga Wagga is the most suitable, because, among other reasons, that Site "embodies all the advantages represented by Albury, but is more centrally situated between the two most important capitals, viz., Sydney and Melbourne. This Site would also include the whole of the channel or waterway of the Murrumbidgee River; whereas Albury or Corowa would only, of necessity, embrace the waterway of one side of the Murray River. Again, Wagga Wagga is pre-eminently fitted, as regards natural features and surroundings, &c., for the important purpose of a Federal Capital."

ANNEXURE.

Wagga Wagga, 1.

WATER SUPPLY FOR WAGGA WAGGA AS A FEDERAL CITY.

Sir,

I have examined the Tarcutta Creek, with a view of getting a gravitation scheme from it for Wagga Wagga, and find that it would be necessary to go so far up it to get the required height that there would not be enough catchment left to supply a large population.

Upper Tarcutta is only 90 feet above the Wagga Wagga Post Office, and the creek for a long way above Upper Tarcutta is very flat.

I think that Wagga Wagga will have to depend for its supply on pumping from the Murrumbidgee.

CHARLES E. BLOMFIELD,
Resident Engineer, Department of Works.

To The Federal City Commissioners.

WELLINGTON SITE.

Statement of Case

THE Site of the Federal Territory, proposed by the Wellington Federal League, comprises an area of 150 square miles, or 96,000 acres, in the form of a rectangular figure, having the present town of Wellington for the centre. (See Plan, marked O, in Appendix.)

Wellington, though longer an established town than Orange, is estimated to contain a population of not more than about 2,200 within municipal boundaries. At a distance of 248 miles from Sydney, it, like Orange, is intersected by the Main Western Railway Line. From Orange to Stuart Town (the once well-known Mining Camp of Ironbarks), in a distance of 36 miles, the loss of altitude is 1,046 feet; and from that station to Wellington, a distance of 20 miles, there is a further loss of 804 feet. Thus, Wellington stands at 996 feet above sea level. From Stuart Town to Mumbil the country is rather poor, but from thence it improves rapidly as the line passes for the remaining 14 miles between prominent wooded heights, along a well-defined valley, until, when nearing Apsley, it emerges into the beautiful and fertile Wellington Valley. The Bell River, rising from the slopes of the Canobolas, joins the Macquarie, which has its source above Bathurst, at the north-western extremity of the town of Wellington, the junction being locally known as "The Meeting of the Waters." On the western side the town is sheltered by a pine clad range of Devonian formation (chiefly of conglomerates and sandstones), being the northern end of the Catombal Range. The district on the eastern side of the Bell River abounds in limestone of Upper Silurian age; and at a distance of 4 miles south from the town are the limestone caves, containing considerable deposits of bone breccia, as described in the travels of Sir Thomas Mitchell. This breccia consists of fragments of the bones of marsupials, of both extinct and existing species; amongst the former may be mentioned Diprotodon and Thylacoleo, the lastnamed being also known as the marsupial lion. The soil, which is very fertile, is comprised, principally, of decayed basalt, and forms rich alluvial river flats. To the north and north-west, on the right bank of the Macquarie River, there is a magnificent expanse of lightly undulating, rich, agricultural country, within which is included the Site of the proposed Federal Capital. This country is intersected by the railway line and the main roads to Dubbo, Cobarah, and Mudgee.

The climate of Wellington is described by a very good judge, Mr. C. H. Barton, as one of the healthiest climates in the world, though for four months in the year the heat is very great. For a period of eighteen years the records of the Government Astronomer show that during the summer quarter the mean temperature is 73.3; during the autumn quarter, 55.3; during the winter quarter, 49.7; and during the spring quarter, 68 degrees. The greatest recorded temperature reached 105.9, and the lowest, 19. Climate (temperature).

The quarterly rainfalls during the same period are very regularly distributed, being 5.83, 6.30, 5.58, and 6.84 inches, showing for the year a rainfall of very nearly 25 inches. Rainfall.

The altitude of Wellington is 995 feet, and of the proposed Federal Territory averages 1,200 feet. Altitude.

On this subject the evidence of the witness above quoted, Mr. Barton, went to show that the pretensions of Wellington to possess the Seat of Government depend mainly on the construction of the railway from Werris Creek, on the Northern Line, to Wellington, and that, without that connection, Wellington could not be considered accessible so far as Brisbane is concerned—an objection which, in the opinion of the witness, is common to all the Western Sites; but that, if connected with Broken Hill and Werris Creek, Wellington would be a singularly central Site, and would be very accessible to Adelaide, Brisbane, and Melbourne. On this head he produced the annexed Tables and Report:— Accessibility.

(a) TABLE of Distances from Wellington Railway Station to Adelaide, Brisbane, Melbourne, Sydney, and Newcastle by Railway Lines now in existence:—

From Wellington—	
To Adelaide, <i>via</i> Melbourne	1,020 $\frac{1}{4}$ miles.
To Brisbane, <i>via</i> Sydney	971 "
To Melbourne, <i>via</i> Blayney	537 $\frac{1}{2}$ "
To Sydney, <i>via</i> Bathurst	248 "
To Newcastle, <i>via</i> Sydney	350 "

(b) TABLE of Distances from Wellington Railway Station to Adelaide, Brisbane, Melbourne, Sydney, and Newcastle with proposed connections from Cobar to Broken Hill and Wellington to Werris Creek:—

From Wellington—	
To Adelaide, <i>via</i> Cobar	*784 miles.
To Brisbane, <i>via</i> Werris Creek	589 "
To Melbourne, <i>via</i> Blayney	537 $\frac{1}{2}$ "
To Sydney, <i>via</i> Bathurst	248 "
To Newcastle, <i>via</i> Werris Creek	*272 "

* Approximate distances.

Keeping in view the all important part that coal plays in maritime warfare and commercial intercourse with other nations, also the desirability of our chief coaling centres being as near as possible to the point where in time of war the Federal troops would be mobilised (*viz.*, the Federal Capital), it is a matter of vital importance, in the consideration of the question of accessibility, that the Wellington proposed Site is (*via* Werris Creek) only 272 miles from Newcastle, and 152 miles from Lithgow.

Due consideration under this section must also be given to the fact that, under our present arrangement of Colonial Governments, the respective Railway systems of the colonies have been devised and constructed with a view to the development and advancement of each individual Colony; but it is reasonable to conclude that Federated Australia will gradually merge these Railway systems into one, and that the future extension of the main trunk lines will become a national undertaking. Thus

Thus the Western Line of New South Wales, now terminating at Bourke, will, probably, junction with the Western Line of Queensland at Cunnamulla; Cobar will, in course of time, connect with Broken Hill, and the Queensland Central Line seems destined to junction with the transcontinental line from Adelaide to Palmerston.

The ultimate extension of our Railways in the direction above indicated is merely a question of time.

Wellington, situated as it is on the Western Line, 248 miles from Sydney, will then be more accessible to the enormous area of magnificent country thus opened up than any other of the proposed Sites, and at the same time easily accessible from our main seaport.

CHARLES H. L. BARTON.

Physical conditions (soil).

The soil of this Area is described as partly limestone, partly basaltic, with rich alluvial flats on the river frontages. A considerable portion is under cultivation, chiefly for wheat, for which it has a great reputation, the average being put down at 20 bushels an acre. It is claimed that continued cultivation has but little effect on the fertility of these wheat lands. Mr. R. M. Smith, manager of the well-known "Towri," estate, who farmed some 6,000 acres, described the soil as a rich chocolate with some limestone on it, and stated that cereals, lucerne, maize, and fruits grew well, but that for root crops, the rainfall was hardly sufficient. Mr. McLeod, a local miller, described the wheat grown in the district as splendid milling wheat, the best in the Colony, taking first prize at the late Sydney Exhibition, and weighing 68½ lb. to the bushel. The general opinion was that the district was easily capable of supporting an increased population of 40,000, both in meat and grain foods. A large part of the Crown lands within the area is poor. The average size of holdings would be about 320 acres, but generally speaking the country, with the exception of that near Wellington, is capable of closer settlement, and therefore of greater productiveness.

Water resources, catchments, &c.

The evidence on this subject was not convincing as to the existence, within any reasonable distance of Wellington, of a sufficient gravitation supply; and it was Mr. Barton's opinion that the Macquarie River did not give a sufficient fall to serve the Federal Capital Site, assuming its average height to be 450 feet above Wellington Station, and that neither would the Bell River, although water might be conserved at a distance of about 30 miles from Wellington, provide a gravitation head. It was believed, however, by some witnesses that at Burrandong, some distance up the Macquarie, a sufficient supply could be obtained by gravitation with an ample catchment. For a pumping scheme, the evidence went to show that a population of 40,000 could be supplied without difficulty. Other witnesses thought that sufficient water could be obtained by storage reservoirs; but, taken as a whole, the evidence of competent Water Resources for a Federal Capital is not very encouraging.

Drainage.

The proposed Site of the Federal Capital would, no doubt, from the formation and undulations of the country selected, be entirely unobjectionable.

Building materials.

Sandstone, it was stated, occurred at Mitchell's Creek, and basalt fit for building purposes within a few miles of Wellington, and, within 8 or 10 miles, limestones (including marble), granite, and fireclay. Excellent clay for brick-making was to be had in unlimited quantities. It was claimed by one witness (a monumental mason) that freestone of a very strong and durable character, though reddish in tint, was obtainable, and was "the best stone in the country after Pymont stone"; also workable marble, capable of taking a good polish; and that the limestones produced very good lime. With respect to timber, though ironbark and pine were obtainable at greater or less distances from Wellington, no reserves of useful timber for building purposes were shown to exist within or near the proposed Site.

Values.

Mr. Pridham, an experienced valuator, values the private lands within the Area selected for the Site at about £3 per acre including improvements, but excluding lands within Municipal boundaries. The estimated value of lands within Municipal limits is put (exclusive of improvements) at £167,535 10s.

Miscellaneous conditions.

In respect of Mineral Resources, the Manager of the Mitchell's Creek Freehold Gold-mining Company, Bodangora, only a few miles out of Wellington, stated that the result of ten years' working of that mine was a product of £234,142 worth of gold, and he thought the country round Bodangora (Mitchell's Creek) auriferous for a radius of 20 miles, and though on present discoveries it would not support a large population, yet that further gold and copper discoveries, which might be expected, would alter the conditions. Evidence was given that coal had not been profitably worked in the district, but that there was a coal seam 7 feet thick about 22 miles north from Wellington, at a depth of only 30 feet, but was not a first-class coal, and was not thought suitable for railway purposes; also, that on the proposed line of the Werris Creek-Wellington Railway a discovery of coal had been made in 1852. (See Annexure—Wellington, I.)

In regard to health, the resident medical authorities gave Wellington a very good character. It was admitted that the summer was hot, but the climate generally was bracing and the changes neither sudden nor violent; and that the winters were delightful, and the district very favourable for chest and renal complaints, and the rate of mortality below the average.

ANNEXURE.

[Wellington, 1.

EXTRACT from a Report upon Geological and Mineralogical Survey, by S. Stutchbury, July 1st, 1852. (See Volume of Votes and Proceedings, 1852, Public Library, Sydney.)

MR. STUTCHBURY reports as under:—The Talbragar River, below the station, exhibits sandstone fit for building purposes, similar to that at Dubbo, and would be easily quarried. In the dry bed of the river, picked up some slabs of coal, evidently brought down the stream. Barbical is 18 miles from the confluence of the Talbragar with the Macquarie River—14 miles through the bush. Tried for gold without success. Mitchell's Creek falls into the Talbragar about 1½ mile above Barbical. Traced the coal first found loose at Barbical to its site. Found it on the Talbragar River, 2½ miles above the station (Gillis's Murrinutgindigundi), and 3 miles above the junction of Spicer's Creek. The section exhibited in the bank of the river is the following:—Large rocks of coarse conglomerate, sloping back to a height of 200 feet; fine-grained sandstone, 20 feet; loose, scaly, culm-like coal, 6 feet; hard fissile coal, resembling the splint coal of Lanarkshire, 5 feet to the water-line—probably more. The upper bed of coal would answer well for calcining metallic ores, or burning lime. The lower bed is highly inflammable and useful for most purposes, greatly resembling the splint coal so much valued in Scotland for smelting iron. These beds are, probably, extensive, and easily got at by sinking into, the angle of dip being very small—scarcely perceptible from the horizontal.

YASS SITE.

Statement of Case.

YASS JUNCTION, situate on the Southern Trunk Railway Line—Sydney to Melbourne—is distant from Sydney 187 miles; and Yass township is reached by a short tramway of 3 miles from that Junction. The proposed Federal Territory embraces an area of 144 square miles, or 92,160 acres. It includes the whole of the parishes of Yass and Hume and portions of Bango, Boambalo, Bowning, Derringullen, Manton, Murrumbateman, Nanima, and Warroo; but the promoters of this Site would not be averse to its reduction to 100 square miles. The distance from Yass to Albury is 199 miles, and from Albury to Melbourne, 190½ miles; altogether about 390 miles from the Capital of Victoria. The proposed Federal Territory is shown by red edging on the Plan marked P in Appendix; the Federal Capital Site by blue edging. The District of Yass, included within the Territory Site, is stated to embrace an area of 36 square miles.

On three occasions I have had opportunities, by personal inspection, of considering the suitability of the Yass Sites for the establishment of the Federal Territory in, or about, the proposed Area; and I do not think the general description of the Yass League, allowing a very pardonable prepossession in favour of the writer's district, in the appended description is exaggerated:—

“The area recommended as Federal Territory consists of undulating downs, in places fairly heavily timbered, but for the most part devoid of trees. The latter applies more particularly to the two Sites suggested for the Capital. European and native trees flourish well throughout the district, and, with the almost unlimited water supply to be obtained, the formation of beautiful parks and ornamental gardens surrounding public buildings is rendered comparatively easy. Amongst other species, we particularise the oak, elm, poplar, plane, pepper, and willow trees; also many varieties of pines. All these flourish well at Yass. The equable climate favours also the growth of all garden plants, even under the present disadvantage of a want of irrigation. Roses, chrysanthemums, wisteria, &c., &c., indicate, by rapid growth and profuse blooming, that our climate is all that can be desired. Among fruits, the apple, pear, cherry, plum, walnut, grape, and fig bring their produce to perfection. The panoramic view, obtainable from any one of the numerous coigns of vantage in the Territory, increases, in a marked degree, the claim of Yass district to be the selected Site. From the summit of Bowning Hill, near the north-west corner of the Area, there is an uninterrupted view for some 40 miles in every direction. A National Observatory on this eminence might be easily erected, as the approach to the summit is not difficult from the south-east. Many permanent creeks intersect the Territory. By the expenditure of a comparatively small amount of money, artificial lakes and smaller areas of ornamental water could be provided for. The open downs are most suitable for carrying out extensive military manœuvres, such as would take place when the troops from different States are mobilised. We understand this would, probably, be annually. In the event of the construction of the great weir on the Murrumbidgee River, a magnificent lake will be formed, and, although the site of the weir is not within the Federal Territory, yet a great National Park could easily be dedicated in the neighbourhood. Not far from the weir site, some fine caves exist, which add greatly to the other attractions of the district. These caves only require exploring to reveal, we believe, much that is lovely and interesting to sightseers.”

The mean temperature for the summer quarter of the year is given at 69·9; for the autumnal, 52·6; for the winter, 55·2; and for the spring, 64·4. The highest recorded temperature is 105 degrees, and the lowest, 21·5 degrees. Climatic conditions (temperature).

The average annual rainfall is 24·20 inches, distributed thus over the year:—Summer quarter, 5·91 inches; autumn, 6·26; winter, 6·01; and spring, 6·02;—a very equable rainfall. Rainfall.

The altitude of Yass Town is 1,626 feet above sea-level; and of the proposed Site, the mean altitude is given as 1,800 feet. Upon the general Climatic Conditions, the Government Medical Officer for the district and Meteorological Observer, describes the Yass climate as very healthy, and for about nine months of the year very bracing, being neither too moist nor too dry. He had known a drop of 30 degrees in the course of the twenty-four hours, but the average drop would be 15 degrees or 20 degrees. Had only once known the temperature to reach 105 degrees, when the drop would be about 30 degrees or 35 degrees. For January, the mean maximum was 89 degrees; for February, the hottest mean maximum for fifteen years was 87 degrees, for December, 84 degrees; the highest night temperature would be about 75 degrees for a night or two during the summer. There was always a cool change at night, and the sea breeze reached Yass about 6 in the evening; but not of any strength. The district, in his opinion, was not liable to epidemics and was particularly free from typhoid. Altitude.

The distances of the proposed Site, in miles, are thus given:—

From Sydney	193 miles.	
„ Melbourne	395 „	
„ Adelaide	878 „	
„ Brisbane	909 „	
„ Albany, <i>via</i> Sydney	2,293 „	

Accessibility

The Secretary of the Yass Federal League, while admitting that the Yass Site was not centrally situated as between Sydney and Melbourne, considered centrality not altogether a matter of mileage; adding, that if the Site were 100 miles further south, it would be in a much hotter climate,—which statement cannot be gainsaid.

There is no water communication in connection with this Site.

The soil of this Site was stated to be derived from the decay of granite and limestone and from sedimentary rock; and as evidence of its productive powers, the estimated wheat yield for 1899 is put down at 18 bushels, per acre. Most of the country inspected was sound grazing country, but on the frontages there are greater or less areas of good agricultural land. Physical conditions (soil)

The result of the examinations made by the expert officers of the Works Department, Messrs. Blomfield and Seaver, shows:— Water Supply and Catchment.

- (1) That an abundant supply of water can be obtained from the Murrumbidgee River, which at Good Hope, about 10¼ miles up the river from Yass, is 540 feet below Yass, and 870 feet below the Trigonometrical Station on Yass Plains; and at the Dog Trap Ford, 22½ miles above Yass, that river is 310 feet below Yass and 660 feet below the same Trigonometrical Station; and that it would be possible, although costly, to get the necessary supply by pumping about 600 feet. (2)

- (2) That the Yass River offered no facilities for a gravitation supply. Mr. Blomfield, in his comparative estimate of the various Sites, in regard to Water Supply, gives Yass third place, and for a pumping, not a gravitation, scheme. (See Annexures—Yass, 1 and Yass, 2 hereto, also Annexure B.)
- (3) Subsequently to Mr. Blomfield's inspections, Mr. Seaver examined some of the Murrumbidgee tributaries on the left bank of that river, and particularly the Micalong River, which flows into the Goodradigbee, about 3 miles above Weejasper. His Report (See Annexure—Yass 3) gives promise of an ample gravitation water supply from a point about 2,123 feet above sea level and 500 feet above Yass township. The watershed of this source of supply is given at 44 square miles, the available head at 400 feet, and the length of pipe line about $38\frac{1}{2}$ miles. The cost has been roughly computed at about £303,000, but this estimate is based on an 18-inch pipe; if a 14-inch pipe were laid, there would be a saving, on first cost, estimated at £70,000. (See letter of the Engineer-in-Chief, of 13th September last, Annexure—Yass, 4.)
- (4.) If, however, the building Site of the Federal Capital were shifted eastward towards Hall, or even further east, the Cotter River might afford a good gravitation supply; but it would have to be brought across the Murrumbidgee River by a conduit, as in the case of the Micalong gravitation scheme.
- (5.) Wherever in this Site the Federal Capital is located, the water supply would most probably be procurable only from some catchment situated at some considerable distance from the proposed Federal Territory, and it will necessarily be a very expensive one; and herein, perhaps, lies an element of weakness inseparable from the Yass Site, whether as originally proposed or as enlarged. In addition to the cost of the permanent supply, the cost of obtaining a temporary supply for a large body of artisans and others engaged on the buildings, street foundations, &c., would have to be taken into account; and, at present, it is not quite clear how such temporary supply could be obtained.

Buildin
material.

In regard to the ordinary building stones occurring on tablelands, as well as to timber, Yass is in no better or worse position than its rivals. It has yet to be shown that the sandstones or freestones are such as would be used in the erection of large and costly buildings, although they might be, and indeed are, used for ordinary building purposes. On this subject the Report of Mr. Geological Surveyor Andrews (Annexure—Yass, 5) should be consulted. The timber supply may, for all practical purposes, be disregarded.

But the promoters of the Yass Site claim that marble of a quite exceptional quality exists in unlimited quantities at a very short distance from Yass Township, and it is claimed that this marble is particularly well suited for important public buildings. (See Annexure—Yass, 7.) A local builder and contractor of long experience has described the various building stones of the district in a Report which was given in evidence at the Public Inquiry. (See Annexure—Yass, 6.)

Drainage.

Either of the proposed Sites would, without doubt, be very capable of being easily drained, the fall of the country being toward the west and south-west; and the absence of swamps or morasses shows that the natural drainage is good.

Values

There is but little Crown land within the proposed area, few reserves, and no Church and School land. The estimated value per acre of freehold land is £3, and of conditional purchase land £2 10s., as improved. The improved value of land within municipal boundaries is given as £213,000.

Facilities for
food supply.

Mr. J. R. Ross, a grazier, stated in his evidence (which was corroborated by other witnesses) that "Yass Stock District would supply animal food for a population of 40,000. As a stock district there is no healthier in the Colony. There are probably only two other towns between Sydney and Albury which pass more stock than Yass. The five years just passed were as bad as the Colony has passed through; but taking three years, ending 1899, there was an increase of 20,000 sheep in the district. The loss of stock through drought was comparatively small. With closer settlement a much better supply of farm produce would be forthcoming. A large area is suitable for agriculture; but to support a large population, the district would have to depend on outside sources for wheat. Artificial grasses can be grown successfully on the alluvial. Lucerne can be grown with success. The rich agricultural land is along the river, but as a farming district it is only on a small scale."

And Mr. McCallum, a grazier and farmer, stated that: "District principally pastoral, though there was a large amount of agricultural land. Wheat grown, but not in large areas. He (himself) had grown 100 bushels of maize to the acre in exceptional seasons. Oats and barley are grown in small patches; apples will grow anywhere, and the climate suits peaches; lucerne is grown. District very suitable for stock. Droughts occur, but stock are not lost. Stock come here in drought time from elsewhere. Yass Plains carry about one sheep to the acre; with closer settlement probably more. On 31st December, 1899, there were 12,131 cattle, 527,938 sheep, and 3,992 horses in the district. It would be a good place to establish chilling and freezing works."

ANNEXURES.

Yass, 1.

FEDERAL CITY WATER SUPPLY.—YASS.

Yass, 11 April, 1900.

THE Yass proposal is easily described, as it is to be pumped from the Murrumbidgee. There is no doubt about the quantity of the supply, as, from my personal knowledge of the Murrumbidgee lower down, I am sure that it would be a long time before the maximum daily consumption of the Federal City exceeded the minimum daily flow of the Murrumbidgee; but the lift is large.

At Good Hope, a point of the river about $10\frac{1}{2}$ miles away from Yass, it (the river) is about 540 feet below Yass and about 870 feet below the Trigonometrical Station out on the plain near Yass.

At the Dog Trap Ford, about $22\frac{1}{2}$ miles from Yass, and a lot higher up the river than Good Hope, the river is 310 feet below Yass and 660 feet below the Trigonometrical Station mentioned above. (This Trigonometrical Station is about 5 miles from Yass.)

It might be possible to obtain a water supply from the Murrumbidgee with a lift of 500 to 600 feet by not fixing the Site of the City too high.

A supply from the Yass River would have to be obtained by storage and pumping. There is a storage site about 5 miles above the town of Yass.

CHARLES E. BLOMFIELD,
Resident Engineer, Department of Works.

To The Federal City Commissioner, Albury.

Yass 2.

Yass, 2.

FEDERAL CITY SITE WATER SUPPLIES.—YASS.

Sir,

Goulburn, 7 May, 1900.

There are two possible sources of supply for the proposed Federal City Site at Yass, viz., the Yass River and the Murrumbidgee River.

In the Yass River the fall is so small that a gravitation scheme is out of the question, as, going high enough up to get the necessary head, so limits the catchment area that there would not be sufficient water for a large population. A supply could be obtained by storage and pumping; but, as storage would be unnecessary in the Murrumbidgee, and the supply would be purer, it would be best to obtain the supply from the latter river.

At Good Hope, a point of the Murrumbidgee River about 10½ miles away from Yass, the river is about 540 feet below Yass, and at the Dog Trap Ford, about 22½ miles from Yass, the river is 310 feet below Yass. By carefully choosing some point between these two places, and not fixing the Site of the Federal City too high, it would be possible to get the necessary supply by pumping about 600 feet. As far as the quantity of water is concerned, storage would be unnecessary until the population was approaching half a million. The height of the lift would be about equal to that between Ryde and Wahroonga. The pipe line would be less expensive, and the fuel more expensive.

CHARLES E. BLOMFIELD,

Resident Engineer, Department of Works.

To The Federal City Commissioner, Goulburn.

Yass, 3.

MINUTE PAPER:—PROPOSED SITE, NEAR YASS, FOR FEDERAL CAPITAL (*re* WATER SUPPLY).Department of Public Works, New South Wales, Water Conservation Branch,
Engineer-in-Chief's Office, Sydney, 14 July, 1900.

As instructed, I visited Yass for the purpose of seeing if a supply of water, sufficient for a city of 40,000 inhabitants, could be brought to it from the Goodradigbee River.

From my previous knowledge of the district I did not think this could be done, and upon going over level books, &c., with Mr. Oxley of the Roads Branch, I satisfied myself that such a scheme was out of the question. I then inspected the Micalong River, which enters the Goodradigbee about 5 miles above Weejasper, and found a suitable supply. This river rises in precipitous granite country, subject to heavy falls of snow during many months of the year; and what is known as the Micalong Swamp at its upper end seems to act as a reservoir, keeping up the flow for a long time after rainfalls.

From statements made to me by Messrs. Jones and McBean, station-holders, Messrs. Martin, Vaughan, Marzol, and others, small land-holders, and Taylor, a working miner, as well as from discharges taken by myself, I consider that the least flow of this river during the driest years does not fall below 12 cubic feet per second, and at the time of my visit, after rain, the discharge was 2,000 cubic feet per second.

The best offtake for a gravitation scheme would be on portion 20, parish of Weejasper, at an elevation of 500 feet above Yass township, or about 2,123 above sea level, and at a distance by road of 35 miles.

The pipe line would follow the Micalong River, cross the Goodradigbee, then go by the main road across the Taemas Bridge to a storage reservoir, say, 100 feet above the proposed Site, the available head being thus 400 feet. From Yass to Weejasper, a distance of 30 miles, the pipes would be laid along or close to a good road, and for the last 5 miles up and round steep mountain sidings, to which the cost of carriage from Yass is 30s. per ton.

At the time of my visit, although all the rivers and creeks were in high flood, the Micalong water was clear and sparkling. The watershed of the creek above section 20 is 44 square miles, on which are a few settlers but no agricultural land. There are also a few miners washing gold in dishes.

I attach a map showing catchment area coloured red, and the pipe line to Yass, with aneroid levels marked along its course, and also the rainfall observation taken at Weejasper for 1899, and the first six months of 1900.

The heights of the various portions of the proposed pipe line are as follows:—

Yass Tramway	1,623 feet above Sydney h.w.m.
Murrumbidgee River, at Taemas Bridge.....	1,223 " " "
Narrangullen Hill—highest point between Yass and Weejasper	1,813 " " "
Goodradigbee River	1,203 " " "
Weejasper Creek	1,278 " " "
Crossing on Micalong River	1,358 " " "
Section 21 on Micalong River	1,778 " " "
Section 20 on Micalong River	2,123 " " "

T. W. SEAVER,

Assistant Engineer.

Rainfall at Weejasper for Year 1899.

January	1.42 points.	August	3.1 points.
February	1.47 " "	October	2.80 " "
March	1.18 " "	November	2.71 " "
April	1.97 " "	December	0.12 " "
May	2.17 " "		
June	4.28 " "	Total.....	22.89 " "
July	1.21 " "		

This year was the lowest rainfall for many years past, and during last summer the Nottingham Creek almost ran dry, which had not occurred before since selectors first took up land upon it.—T.W.S.

For 1900 (first half).

January	2.36 points.
February	Nil
March	3.96 points.
April	4.9 " "
May	5.50 " "
June	6.26 " "
Total	22.17 " "

NOTE.—The above gives the rainfall at Weejasper; but, as the Micalong catchment area is about 1,500 feet higher than this, the rainfall will be increased.—T.W.S.

Yass, 3a.

MINUTE PAPER:—PROPOSED SITE, NEAR YASS, FOR WATER SUPPLY.

Department of Public Works, New South Wales,

Engineer-in-Chief's Office, Sydney, 12 October, 1900.

SINCE my previous Report on the above subject, I have again examined the Micalong River, which, on my previous visit, was in high flood, and the surrounding country difficult of access.

The Federal City Site, which was before fixed on the south side of Yass, has now been transferred to the plains along the Railway Line, under Bowning Hill.

From the point of view of Water Supply, this is a better position, as, being lower than the other, a better head is available, which will equal about 690 feet; or, allowing 100 feet head for distributing reservoir = 590 feet available head.

I have made further inquiries as to the flow in the Micalong Creek, and all the replies I received showed that it was permanent during the driest summer. In case, however, it is found necessary to store water at the head of the pipe line, a good reservoir could be constructed on portions 9, 20, and 30, parish of Napier, as shown on attached sketch:—A dam could be built in the narrow gorge, as shown, which, with a height of 60 feet, would store about 500 million gallons of water = 403 days' supply for 40,000 people; or, allowing for evaporation, say, one year's supply. The

The foundations of the dam would be on red granite on bottom and slopes [sample herewith]. The length of the pipe line to the new Site will be about the same as the first line, viz., about 35 miles.

Attached is a statement of the average and least rainfall at Kiandra, Red Hill, and Weejasper for a series of years :—

Rainfall at Kiandra—average, 1866 to 1898.....	= 64	inches.
" " least (1895)	= 53	"
" Red Hill—average, 1886 to 1898	= 37	"
" " least (1895)	= 23½	"
" Weejasper—1899	= 22·89	"
" " half of 1900	= 22·17	"

The year 1899 was the driest ever experienced in this district, and in that year the Nottingham Creek went dry for the first time.

F. W. SEAVER.

NOTE.—This copy of Mr. Seaver's Report was received on the 17th October, therefore after the "Conclusions" arrived at had been laid before Parliament.—A.O.

Yass, 4.

YASS WATER SUPPLY.

Dear Mr. Oliver,

Public Works Department, Engineer-in-Chief's Office, Sydney, 13 September, 1900.

When the rough estimate, sent to you on the 12th July, was prepared, we had very limited information available. Subsequent investigation shows that the length of pipe-line would be about 38½ miles, or 3½ miles longer than first anticipated. This would necessitate a larger pipe to carry the same quantity of water; so I have now estimated for an 18-inch pipe. This, with the greater length, brings the cost of pipes up to £270,000; to this must be added (say) £33,000 for head works, weir for storage reservoir, service reservoir, and reticulation; making the total cost (say) £303,000. Of course, this is a very rough estimate, as it is impossible to say at this stage what extent of reticulation would be required. Approximately, this may be put down at £1,000 per mile. I have included 20 miles, or £20,000 for this service.

Seeing that the growth of the town must be more or less gradual, it is a question whether a lesser quantity of water might not suffice for some years to come, and thus a smaller pipe might be laid.

The 18-inch pipe estimated for would carry 2½ million gallons per day. A 14-inch pipe would carry nearly 1½ million gallons per day, and effect a saving on first cost of £70,000.

The total cost for the smaller pipes, with head works, reservoirs, and reticulation, &c., as before, would be £233,000.

When the consumption demanded it, a second main could be laid, and the town would not be dependent upon one main.

Alex. Oliver, Esq.,

President of Land Court.

Yours, &c.,

C. W. DARLEY.

Yass, 5.

11 May, 1900.

THE stone examined by me at "The Gap," Mundoonan, and Hatton's Corner, in the neighbourhood of Yass, appears to be of fair quality for ordinary building purposes, and occurs in considerable quantities.

1. "The Gap" (10 miles south-east of Yass)—The stone here consists of soft red, brown, and yellow sandstones, shales, mudstones, and quartzites, occurring in narrow beds and having a vertical dip.

The stone could be easily worked, but the bedding planes are set close together, thus preventing the quarrying out of large blocks.

2. *Mundoonan*.—Similar stone to that found at the "Gap" (2 miles away) occurs here. Two of the most massive sandstone beds are from 4 to 6 feet thick. They are, however, intersected by closely set master joints. This prevents the extraction of stone suitable for important edifices.

Good flagstones can be obtained easily.

3. *At Hatton's Corner*.—Beds of an indurated sedimentary rock, from 1 to 2 feet in thickness, underlie the limestone beds in that locality. A system of joints causes them to split into losenge-shaped patterns, from which they would have to be squared by the "plug and feather" system. These beds have a dip of about 20 degrees.

The stone is similar to granite to chisel.

Quartz-felsite and porphyry of black colour occur in vast quantities in and about the town.

Massive limestones and marbles exist in the neighbourhood.

E. C. ANDREWS,

Geological Surveyor.

The Government Geologist.

Yass, 6.

YASS FEDERAL CITY LEAGUE.

REPORT of Mr. Geo. Thompson (for many years a builder and contractor at Yass), on the various kinds of building stone to be found in and near Yass.

Freestone.—This is found in Mundoonan Range, distant from Yass between 7 and 8 miles. Two places have been worked, viz., on the old Sydney Road, near "The Gap," and on the Yass River, road to Gundaroo. Both places are about equal distances from Yass, and about 1½ mile from each other. There have been no regular quarries opened, but simply surface work. The stone is yellow colour and very fine in the grain. That which is taken from the surface is soft when quarried but hardens afterwards; it stands the weather well. A store which has been erected in Yass for more than forty years from surface stone (no quarry being as much as 6 feet in depth), has stood well, there being no sign of decay about it.

There is, to all appearances, every facility for opening good quarries, as the hills rise to a considerable height above the gullies, and stone is to be found all over them.

Sandstone.—This occurs at several places in and around Yass, viz., at "Bellevale," Jones' Creek, Barber's Paddock, near the tram line, at the Show Ground, and on the high ridge on Douro Estate towards the Trigonometrical Station. There have been no quarries opened on this line—merely surface work. The stone is hard and well suited for building. It makes excellent steps, standing any amount of wear. Steps made of this stone are to be found in all the gate openings and most of the door openings at the Court-house and the Convent Schol. The largest shows of this stone on the surface are in Barber's Paddock, Jones' Creek, and near the Show Ground.

Local Greenstone.—On Black Bog Creek, at the back of the township range, there are large deposits of stone of a greenish tint, very strong and hard to work. It would probably take a beautiful polish. There have been only a few natural face steps taken from here; but if the stone is the same under the surface, there are then, practically, unlimited quantities of it.

Limestone.—Limestone is found in large quantities all over the proposed Federal Area. At the Murrumbidgee, from 10 to 14 miles distant, it forms great ranges of hills. It could be quarried in any size and is not too hard to work. It is very suitable for buildings. The limestone of this district burns into a powerful lime, much in request for making mortar.

Granite.—There is no granite proper in the neighbourhood; but a bastard granite forms the bulk of the stone on the north-east of the bridge over the Yass River within the township; also to the west and north-west. It presents a bold face at the precipice near the Police Barracks. This stone is of a very dark blue colour and is very hard; some of it is very fine in the grain. It could be quarried in any sized blocks with proper appliances, and is inexhaustible in extent.

Marble.—There is a deposit of marble or white limestone near Coolalie, 6 miles distant, but it has not been worked except for burning into lime. It would not be hard to work as a building stone, and could be got in fair sized blocks.

GEORGE THOMSON,

Stonemason, Yass.

Yass, 7

Yass, 7.

NOTE on the Deposit of Marble at Yass, by G. W. Townsend, C.E.

Yass, 7 September, 1900.

IN view of the possibility of the Site for the Federal City being chosen in the vicinity of Yass, I can conceive, save in the matter of water supply, no more important factor in favour of such a choice than the existence of a durable, strong, easily worked, and beautiful building stone in practically unlimited quantity within the area chosen.

Such a stone is to be found within 8 miles of the town of Yass, and 1 mile from Coolalie Station, on the Main Southern Railway, in the form of an extensive bed of very handsomely variegated light-coloured marble of excellent quality for building stone, blocks of the largest size required for large buildings being readily obtainable. A geological surveyor from the New South Wales Department of Mines recently inspected Yass District for deposits of building stone, and in his report mentions the fact of the existence of massive deposits of limestone and marble in the Yass District.

It is a pity that the valuable bed of marble at Coolalie was not brought prominently under the notice of the officer making the inspection, as there can be but one opinion as to the vast importance of this deposit, both as regards a practically unlimited supply of excellent building stone, as well as lime of exceptionally good quality, that can be burnt from the quarry refuse.

The marble deposit at Coolalie has been proved to exist over an area of 25 acres, and there are fairly sure indications that it extends over a considerably larger area—probably about 50 acres. From my experience of similar beds over a large portion of the Colony, I consider the depth of the Coolalie deposit will probably be found to be about 300 feet. As a matter of fact, the supply is practically inexhaustible.

As a building stone, marble of course ranks among the most valuable, though its usual costliness precludes the use of it for general purposes. The resistance to crushing is about 8,000 pounds per square inch, equal to over $3\frac{1}{2}$ tons;—rather less than that of granite of average quality.

The durability of marble—unless exposed to air containing acid fumes, as is the case in districts where large smelting operations are carried on—is quite equal to that of the best granite, while the ease with which it can be sawn into blocks of any required size make it as easy to work as an ordinary freestone. I saw a piece of Yass marble tried under a mason's chisel, and it worked as easily as any good freestone would do; while the superiority of this marble, in point of durability and strength to resist crushing, place it far, in point of value as a building stone, in advance of the best Sydney sandstone. I see no reason why it should not be obtained at a moderate price—probably not exceeding that at which the Pyrmont or Waverley stone is sold in Sydney.

GEO. WM. TOWNSEND, C.E.

Part V.—Summaries of Evidence.

ALBURY SITE.—Summary of Evidence taken at a Public Inquiry held at Albury on 2nd, 3rd, and 11th April, 1900.

Robert Aikins,
Hon. Secretary,
Albury Federal
Capital League.

Produced Report prepared by League in response to the Commissioner's circular, also returns furnished by the Government Astronomer, showing—(1) Highest shade temperature with the lowest shade temperature recorded on the same day; (2) Lowest shade temperature with the highest shade temperature recorded on the same day. These returns cover a period of twenty-eight years.

Robert Rixon,
hospital
collector.

Climate.—Had forty-two years' experience of the climate of Albury district. Had been engaged in farming, and was brought up amongst stock. The rainfall over the 64,000 acres proposed as Federal Territory was evenly distributed, and was well suited for stock.

John Maclure,
wine-grower.

Rainfall.—Seventeen years resident of district. Considered the rainfall as good as in any part of the Colony. It averaged about 29 inches, fairly well distributed through the year. Had never known a failure of the crops through drought, though frosts sometimes caused a deficiency in the vintage and fruit-trees.

Food Supply.—Considered the district well adapted for growth of all ordinary cereals and root crops. The district, with intelligent labour, was as good as, if not better than, any part of Australia for cereals, and quite capable of supporting a population of 40,000 souls.

Patrick Edwin
Fallon, wine
merchant.

Food Supply.—Forty-six years resident in Albury. Had forty years' experience in wine-growing. Had never known a failure of wine crops from want of rain. As good a wine crop could be grown in the district as anywhere, and the industry was capable of large expansion, so that a population of 40,000 could be supplied. Had grown wheat and oats and other cereals. As high as 48 bushels of wheat to the acre had been obtained near the town. The district would support an immense number of farmers.

James
Colquhoun,
wheat buyer.

Food Supply.—Had fourteen years' experience in the district, buying and selling wheat. The wheat grown was of excellent quality, and averaged 10 to 12 bushels per acre per annum,—in good seasons, 20 bushels or over. A great deal more of the land would grow wheat, and cereal products to support a population of 40,000 could be grown in the district. The rainfall is suitable to cereals. Fruit of nearly all varieties can be grown in sufficient quantities for all requirements.

Thomas Plum-
mer, retired
fruit-grower and
dairyman.

Food Supply.—Resident in district over forty years, and had large agricultural experience. Never had a crop that did not pay. The district would grow fruit of all kinds, and cereals sufficient for a population of 40,000. Potatoes grow in large quantities. By sowing artificial grasses, enough stock for all requirements could be raised.

Climate.—Had worked in the hottest days in summer. The climate was genial and bracing, and very healthy. He had never had a day's sickness.

Accessibility.—As regards productiveness, water supply, climate, and accessibility, Albury was the best Site in the colonies. Beechworth (Vic.), a beautiful and bracing climate, only 10 miles distant.

Defence.—For defence purposes, Albury is well situated, being surrounded by hills.

Charles Lucas
Griffiths,
auctioneer, and
stock and station
agent.

Climate.—Had lived in Albury district about twenty-two years. The district has a varied climate within a reasonable radius. That of Albury was preferable to that of Melbourne or Sydney. Hot nights in summer were exceptional. The district was not subject to sudden or violent changes of temperature. The biggest drop he knew of was about 50 degrees, and the highest temperature 106 degrees in the shade.

Rainfall.—Very regular. Has never gone below 20 inches, and is suitable for cereals and any farming and grazing. Droughts practically unknown.

Water Supply.—The Murray River, than which no better could be had anywhere.

Facilities for Food Supply.—Had large dealings in cattle, horses, and sheep, and for over ten years was a grazier. Albury and Wodonga one of the largest stock centres in the interior of Australia. Had never to go outside their own district for supplies. Local demand always over supplied. District capable of much higher development. Many present holdings too large to work profitably. Dairying can be profitably carried on.

Arthur Andrews,
resident medical
officer.

Climate.—Albury is as healthy as any district in the Colony. No complete mortality tables exist, but the death rate among the younger members of the community is very low. Albury is used as a health resort. Epidemics and infectious diseases do not trouble the district much, and it is free from diphtheria and typhoid; very little rheumatism or rheumatic gout. Had recorded the temperature for many years. The lowest drop in temperature would be 60 degrees or 65 degrees. The maximum period of heat is confined to about six or seven weeks in the summer. Sunstroke and heat apoplexy were rare. The heat is rarely oppressive during the day; it is not a depressing heat, but rather a stimulating dry heat. The winter climate is perfect.

Drainage.—The town is well drained. Garbage could be disposed of by sewerage farms, treated bacteriologically as in London, Exeter, and Taunton.

Water Supply.—This is excellent and unlimited; an analysis was taken a few years ago.

Building Stone.—There is an unlimited supply of granite suitable for building purposes. Some of this had been tested at the Sydney Museum, and was reported to be the soundest and best sample produced in the Colony. There is also useful freestone at Tabletop (about 15 miles distant), which was practically imperishable; and an abundance of clay for brickmaking.

W. N. M.
Edmondson,
Merchant.

Climate.—Had resided in the district since 1860. Considered the climate very endurable, summer or winter. The summer climate would not affect the most delicate constitution. In 1865 the temperature rose to 118 degrees. There was a great drought that year. It has never approached that temperature since.

Accessibility.—It is on the main trunk line, and had several branch lines. Beechworth, a cool climate, was within easy reach, and the high Bogong and other mountains are easily accessible. The Murray River could easily be rendered a valuable alternative means of approach by an inexpensive system of locking.

Facilities for Food Supply.—The district could grow anything, except tropical products, and was capable of supporting 100,000 people.

Climate.—

Climate.—Resident thirty years in the district. Knew of no better climate in the colonies than that of Albury. Droughts, in the ordinary acceptation of the term, were unknown. George Edward Mackay, stock inspector.

Rainfall.—The average is about 28 inches. The district is not subject to destructive floods.

Food Supply.—A large quantity of stock is exported to other colonies, as also to other districts of this Colony. During 1899, 40,156 fat and 69,427 store sheep were exported to other colonies, and 40,120 fat sheep and 1,905 cattle were, during the same period, exported to other districts of the Colony. District celebrated for its fruit.

Altitude.—Had been Staff Surveyor for thirteen years. Produced plan of the proposed Federal Territory. There was ample area alongside the present town, and extending north and east, to provide for a city of 40,000 people. The altitude of the proposed Territory would on an average be 600 feet above sea level. It was 694 feet at Ettamogah, 534 feet at Albury, 571 feet at the Racecourse, and 797 feet at Tabletop. Maurice Barlow, Staff Surveyor.

Water Supply.—Colonel Home had furnished a report *re* a scheme for water supply from a place 40 or 50 miles above Albury, where a reservoir could be constructed sufficient to irrigate a great portion of Lower Riverina. He put in a copy of reports of analysis of the water from the present water supply of Albury.

Accessibility.—Albury is 190½ miles from Melbourne and 386 from Sydney. Thought the site of Albury would be most suitable to the Southern Colonies, and admitted that, under a common tariff, Sydney could not compete successfully with Melbourne for the trade of the Albury district.

Food Supply.—He had an intimate knowledge of the district, and considered it, within a radius of 50 miles of Albury, capable of supplying a population of 40,000 with cattle, sheep, and grain. Produced statistics of wool, wheat, hay, and chaff passing through the railway stations of the district. The average yield of wheat for the last six or seven years has been about 12 bushels to the acre.

Drainage.—The facilities for drainage were good.

Foundations.—Suitable for heavy buildings.

Climate.—An ideal spot for the Federal City; climate most agreeable; rarely an oppressive night in summer. Heat in daytime never so oppressive as to debar work being done. Malcolm McTaggart, Government Architect.

Foundations.—Was familiar with the site of Albury, and had practical experience of important buildings there. No signs of subsidence were visible in their foundations. Heavy buildings could be erected with perfect safety. Concrete was hardly necessary.

Drainage.—The buildings would not be affected by the drainage.

Climate.—Hot days occasionally, but no hotter than elsewhere.

Water Supply.—A scheme was proposed to utilise the river for electric lighting and other motive power, and the figures show that it was ample for a city of ten times the size of Albury. Walter Joseph Billson, Mayor of Albury and Chairman of the Federal Capital League, brewer.

Ownership and Value.—Knew the contents of document produced; assisted in preparing it, and believed it to be substantially correct. The Crown lands were made up by two Commons. The unimproved value of private lands, estimated at £5,400, refers only to the private lands which have not been improved. It does not include estimated unimproved value of improved land. If the Commonwealth resumed our waterworks at face value, would be glad to hand them over to-morrow; the same with regard to other Municipal works.

Climate.—Had lived in the Albury district for fifteen years, and considered the climate a very good one; had been in Queensland and all through New South Wales, and thought Albury the best average climate. John Charles Chennery, auctioneer and stock and produce manager for Younghusband & Co., Ltd.

Food Supply.—It was one of the finest stock and wool-producing districts in the Colony.

Accessibility.—Albury is very central, both with regard to Victoria and New South Wales.

Water Supply.—A fall of 70 feet can be got within 30 miles, and of 200 feet by going further, with good foundations for a weir.

Climate.—Fifty-nine years in the district; forty years at Tabletop, 14 miles from Albury. One of the finest and healthiest in Australia. There had been no epidemics within his knowledge. Had never seen a case of sunstroke. For a few days of two months of year the heat may be oppressive, but when hot at Albury it is hot everywhere. James Mitchell, grazier, of Tabletop.

Food Supply.—The district was extremely fertile. A magnificent wheat country. All kinds of cereals could be grown. The district was not subject to droughts. The district could easily support a population of 40,000, with closer settlement.

Building Stone.—There is plenty of granite and freestone in the district; also fireclay, a few miles from Albury, and sandstone and lime at Tabletop.

Climate.—Eighteen years resident of Albury. Particularly healthy district. The summer heat is a bright dry heat. The changes are not sudden. Was not aware of any epidemics. Henry Headley, brewer.

Building Material.—Particularly good clay for bricks. Plenty of sandstone at Tabletop.

Climate.—Resident in Albury for twenty years. From a sanitary point of view Albury is very healthy and conducive to longevity. There is no endemic disease, except an occasional outbreak of typhoid, which you get everywhere. The climate would not be conducive to pneumonia or phthisis. Only two months of the year to which exception could be taken, but then it is a dry heat. It is not a relaxing heat. Sunstroke is rare. The nights are not invariably cool, but most frequently so. Patrick Kennedy, medical practitioner.

Climate.—Resident in the district for sixty-two years. The district is decidedly conducive to longevity; was himself 80 years of age, and an evidence of it. His wife is strong and well, and she had been in the district since 1845. They had ten children, all born in the district. District not subject to epidemics. David Reid.

Food Supply.—Thought the district would support a population of 400,000 without any trouble. Better country for grazing and agriculture could not be found.

Altitude.—Albury is 534 feet above sea level, at the railway station. The average height of the proposed Federal Territory would be about 700 feet. Irwin Smith, licensed surveyor.

Accessibility.—Albury is most central, being on a main trunk line, with feeders on each side of the Murray River.

Climate.—Thirty-one years in the district. Had to work a great deal out of doors, and never felt any inconvenience from the climate. John Wenke, farmer.

Food Supply.—Thought the district could support 400,000, and endorsed prior evidence as to fruit-growing facilities of the district. Climate.

Thomas James Plunkett, farmer and grazier.
Amos Crisp, builder and contractor.

William Joseph Gordon, architect.
George Arthur Thompson, merchant.

Climate.—Thirty-nine years in the district. Was out in all sorts of weathers. January and February were the hottest months. It was a dry heat, but did not interfere with his work.

Climate.—Twelve years in the district. Did not think Albury hot; never found the heat interfere with his work.

Foundations.—The foundations were good; no better could be got.

Building Material.—Good freestone was obtainable; also timber, lime, bricks, &c.

Foundations.—Engaged in district twenty-three years. Had generally found clay bottoms in connection with buildings. On the whole, the foundations were as good as could be got anywhere.

Accessibility.—Thirteen years in the district. Albury eminently suited for the Capital, being on the Main South-west trunk line. It was not altogether under the sphere of trade influence of Victoria. In the event of a uniform tariff, the possession of coal would give Sydney a commercial ascendancy over Melbourne.

Climate.—As an employer of about eighty hands, he could speak of the healthiness of the climate. They never had anyone away on account of heat.

BATHURST SITE.—Summary of Evidence taken at a Public Inquiry held at Bathurst on 2nd, 3rd, and 4th July, 1900.

Gloster Searle White, Joint Secretary of Bathurst Federal Committee.
Exhibit A.

COMMITTEE formed to forward claims of Bathurst as a Site for the Federal Capital, at a Public Meeting held February 25th, 1899; sub-Committees were also appointed. Committee still in existence, and ratifies reports of sub-Committees. Put in plan showing proposed Federal Territory.

Climatic Conditions.—Had been practising in Bathurst over thirty years. Produced a report (Exhibit B) prepared by himself, on the suitability of Bathurst from a health and sanitary point of view. The report is true, to the best of his knowledge and belief. He could give no information as to the death rate of Bathurst, but it is less than the sea coast. There were no endemic diseases. They had had cases of typhoid, but they came from all parts; he did not attribute the cases to the defective drainage of the town. The climate was antagonistic to consumption, asthma, and kindred complaints. They had a considerable range of temperature, but not injurious to health. The evenings, as a rule, were cool, and sunstroke was of rare occurrence.

Altitude.—Bathurst is about 2,200 feet above sea level.

Physical Conditions—Drainage.—Not satisfactory, but could easily be made so.

Climatic Conditions.—Resident of Bathurst seven years; previously practising in Sydney twelve years. The proposed territory generally is very healthy, and especially beneficial to weak lungs, asthma, &c. The climate was dry and bracing. Personally, he had been a great sufferer from asthma, and derived great benefit from the Bathurst climate. The sea breezes which reach Orange pass over Bathurst. He could not attribute any ailment to the Bathurst climate, and acquiesced in the report furnished by Dr. Bassett, which he had read.

Drainage.—Was familiar with the proposed territory, and thought it could be easily drained. Bathurst, at present, is not well drained, but it was no worse than any other country town; but it could be easily drained if taken in hand.

Water Supply.—The present water supply to the town was insufficient.

Climatic Conditions.—He produced certain returns (Exhibit C) obtained from a work published by the Government Astronomer. He was the local Observer, and first furnished the information to the Government Astronomer. These returns are accurate copies of the official information. The mean altitude of the whole Federal area was about 2,300 feet. The rainfall average is for each year, and the average for forty years is 24½ inches.

Accessibility.—Was a resident of Sydney, but was engaged mostly travelling on duty on all lines. The radial limit of 100 miles from Sydney would cut through Bathurst at about the Railway Station. Bathurst is 145 miles from Sydney by rail, and about 100 miles direct. Produced a Return, showing the distance of Bathurst from the various Capitals of the colonies, compiled from official sources, and true to the best of his knowledge and belief. This Return includes distances by projected railway lines. Also produced a map showing a system of railways in connection with a transcontinental railway in relation to Bathurst and district. This line would open communication with all the eastern ports, and lessen the time of journey to England by ten days. The location of the Capital at Bathurst would make the Blayney-Harden line a paying one. There is a good prospect of the Werris Creek-Wellington Line being constructed. In the absence of large rivers, a transcontinental railway is inevitable, and, in such case, Bathurst would be the most central place for the Federal Capital.

Water Supply.—Simply a question of choosing one of three Schemes. The Campbell's River Scheme would meet all requirements. It is a clean catchment, nearly all Crown land, and a gravitation scheme which would be as good a supply as the Prospect Dam in Sydney.

The Possession of, or proximity to, Stone, Timber, and other Building Material.—Good timber, such as turpentine, blackbutt, and mountain-ash can be obtained from the mountains in the police district of Bathurst; also pine on the Mudgee Line. Bathurst is not well supplied with timber within a few miles radius, but is well situated as a centre to command good supplies of timber. Good ironbark commences at Koorawatha on the Southern Line, and extends to Narrabri. At Munderoran there are 260,000 acres reserved for timber. Very good freestone is obtainable at Wallerawang and on the western slopes of the Great Dividing Range; and good bricks are got from Orange and Lithgow.

Foundations.—Granite foundations would be obtained, and none are better. The Railway Station at Bathurst, erected in 1876 on granite foundation, has not a crack in it.

Nature of Soil.—Nearly the whole of the proposed Federal Area is granitic—that is, a granite basis, with basaltic deposits or overflows in places on the Bald Hills. The granite is hornblende, very much decayed near the surface. The rotten granite is not an ideal foundation for heavy buildings; but, with proper precautions, a good foundation can be obtained. The shifting of foundations at Bathurst is due to a substratum of clay under the surface soil. Produced Report on the Geology of Bathurst and its neighbourhood, which he had prepared.

W. J. Clunies Ross, B.Sc., London, and F.G.S., Resident Master in charge of the Technical College, Bathurst.
Exhibit E.

William Alfred Blackstone, Telegraph Master and Meteorological Observer at Bathurst.
Exhibit C.

John Bligh Suttor, Railway Engineer to the Commissioners.
Exhibit D.

Exhibit D.

The Possession of, or proximity to, Stone, Timber, and other Building Material.—Fine granite obtainable at Locksley and Mount Pleasant—a good building stone for decorative purposes. It is in any quantity, and superior to the Moruya granite. There is no freestone near Bathurst, and no sandstone like the Pyrmont stone nearer than Lithgow. Limestone exists, but not suitable for building purposes. Marble occurs in large quantities. Basalt is plentiful in the Bald Hills. There is fireclay at the Bald Hills, and deposits of very fine sand. There is no sign of Carboniferous rocks around Bathurst. Produced

Exhibit F.

Nature of Soil.—Had resided in Bathurst since 1897, and had been engaged in similar work all his life. The proposed Federal Area included the Experimental Farm. The soil was generally granitic, with deep black clayey loam on the river frontages. The surface soil generally was about 10 inches deep, resting on rotten granite.

Alfred Allen
Dunncliff, head
Manager of
Bathurst
Government
Experimental
Farm.

Facilities for Food Supply.—Cereals thrive in the Bathurst district, especially wheat and oats. About 10,000 acres of the proposed Federal Area are under crop. The country would average 12 bushels of wheat to the acre under a better system of farming. Splendid lucerne has been grown on the river bottoms. Root crops and all English fruits grow splendidly.

Nature of Soil.—Had been in Bathurst eleven years, and was well acquainted with the proposed Federal area. The soil varies—parts decomposed granite, and parts volcanic loam—but, as a whole, is fertile. Some of it had been cropped for sixty years. Was not an expert in agriculture, but was a horticulturist. The soil in the area was still unexhausted. On the downs above the river flat the cultivable soil is 3 or 4 feet deep.

Alfred Andrew
Patterson, head
gardener to
the Bathurst
Municipality.

Other Physical Features.—Most of the European trees grow at Bathurst. Oaks, elms, and plane trees thrive in perfection, but the district generally has gone in more for coniferas than deciduous trees. The proposed area is well situated for ornamental tree planting and landscape gardening, and several sites in the area are especially suitable for a park with artificial lakes.

Nature of Soil. (Foundations).—Had been connected with the Government Architect's Department about thirty-three years, and had had considerable experience in putting in foundations of large buildings during twenty-three years. Underlying the whole of the Bathurst district is a layer of decayed granite, on which is a layer of decayed granite in clay, and above which again is a layer of soil. The clay beds are undulating, and to get a good firm foundation you must go down to the substratum of decayed granite, following the deep undulations of the clay. Good foundations for the heaviest buildings could thus be obtained. Some of the river flats would be suitable for building. There the depth of soil varies. Generally, over the whole area of Bathurst, a sound foundation could be obtained at from 6 to 15 feet deep.

William Roberts,
Government
District
Architect
(retired).

Possession of, or proximity to, Stone, Timber, and other Building Material.—The available material consists of stone, brick, and river shingle. Basalt, from the Bald Hills, is used for foundations and guttering. It is too curly for working. Excellent building granite at the Rocks, large blocks of which, capable of polish, can be obtained. There is no sandstone, but excellent marble is obtainable in various colours. Tolerably good slate, suitable for flagging, can be got, and lime is plentiful. Some of the finest clay for brickmaking exists in the district. The clay is impregnated with iron in solution distributed equally through it, and makes bricks of good colour, and impervious to damp. Fire bricks are also made. Sand and good river shingle can also be obtained.

Foundations.—Had forty years' experience of building in Bathurst, and confirmed Mr. Roberts' evidence in respect of foundations.

Robert Baldwin,
builder and
contractor.

Water Supply and Catchment.—Was familiar with the Bathurst district, of which he was a native. Knew the proposed Federal Territory and had been all over it, and had visited all the proposed sites for water supply but one. Visited the Lagoon Site, but found it too low for a wholly gravitation scheme. He wrote the Report on the Wallsbrook scheme from information supplied, and favoured either that scheme or the Brisbane Valley Creek scheme. Did not favour the Winburndale scheme. The Brisbane Valley Creek is 16 or 17 miles from Bathurst, and the site of the weir would be 600 feet above the town. There was a good foundation, and the dam would be 100 yards long by about 50 feet deep. The catchment area is about 40 or 50 square miles. A weir 50 feet high would cover with water an area of about 1,100 acres, about 25 feet deep. About 25 miles of pipe would be required. He had not personally inspected the Site.

Edmund Tom
Webb,
merchant.

Exhibit G.

Other Physical Features.—He considered the land south of Bathurst, at the foot of the Bald Hills, the most favourable building site. There is a band of clay running through Bathurst, varying from 18 inches to 5 feet in depth; foundations on that would crack unless carefully laid.

Water Supply and Catchment.—Was a native of Bathurst, and had been engaged in agriculture and grazing. The Committee decided on the Federal Capital Site shown on plan by blue edging. The Site adjoins the city. There are three schemes of Water Supply to that area. He preferred the Wallsbrook, the catchment of which is about 100 square miles, mostly Crown lands, including the sources of all the tributaries on the Abercrombie Mountains. The proposed reservoir would be on freehold land, worth about 30s. per acre, and is about 1,000 feet above Bathurst. There could be a service supply from the Lagoon, 10 or 12 miles from Bathurst, and about 150 feet above the town. The pipe lines would be about 35 miles, and would cost about £2,000 a mile, exclusive of the weir. The site of the weir is basaltic, with a good bottom, and the crest of the weir would be about $\frac{1}{4}$ -mile wide. There are two other schemes, but the Committee prefer the Wallsbrook.

Robert Lionel
Gilmour, Mayor
of Bathurst.

Ownership and Value.—Had been a grazier all his life, and knew something of land values. If the whole area of 64,000 acres were valued for sale with improvements, he would assess it at £4 per acre. Some of it, on the Bald Hills, was only worth £1 per acre, and some is worth £30 per acre.

Facilities for Food Supply.—The district was principally used for fattening stock. If Bathurst were chosen as the Site, there would be no difficulty in housing and feeding 2,000 operatives, and when the city was built, Bathurst and district could supply it with food. Closer settlement would render the land five times as productive.

Water Supply and Catchment.—Was a native of Bathurst, and knew the upper part of the Campbell River. Knew the Wallsbrook Swamp, and knew the proposed site of weir. The catchment was clean and at least 100 square miles, mainly Crown lands. Had never seen the watercourse dry; it is beautiful water.

John
McPhillamy,
solicitor.

Water

Alfred Andrew
Patterson
(recalled).

Water Supply and Catchment.—Had accompanied Mr. Blomfield (the Water Conservation Officer) in his inspection of the Lagoon and Bathampton Schemes. The latter would be high enough for Bathurst, but not for a higher town. Had also examined, with Mr. Campbell, the upper part of the Campbell River. Wallbrook is 35 miles from Bathurst by road, and 25 miles direct. Wallbrook is one of the best sites for water supply for Bathurst. It is about 1,000 feet above the town, and the swamp runs back, with varying width, for 3 miles. The Campbell River runs through the swamp. By making a weir, enough water could be impounded to supply Sydney. The catchment is 100 square miles, mostly Crown lands. A weir 50 or 60 feet high would throw the water back about 23 miles. The water is pure and clean.

Exhibit H.

Facilities for Food Supply.—He put in the following returns:—

- (1) Return of live stock in the Bathurst District.
- (2) Total area of green and grain crops in Bathurst District, year ending 31st March, 1897.
- (3) Butter, cheese, and bacon made in District, year ending 31st March, 1897.
- (4) Production per acre of grain and hay crops in Bathurst District, year ending 31st March, 1897.
- (5) Return of Crown lands within boundaries of proposed Federal Territory.

The Returns are for the Police District of Bathurst, and were prepared by direction of the Committee, from Mr. Coghlan's last available Return.

Alfred Gordon
Thompson.

Was familiar with the Campbell River, and knew the proposed weir site for thirty years, and concurred with Mr. Patterson's evidence. Had never known the river dry. There was always a strong stream of clear water.

John Job Cope-
man, architect.
Exhibit J.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Put in a return of building material procurable in the locality of Bathurst. The statements therein he stated to be true, to the best of his knowledge and belief.

William Henry
Hudson, timber
merchant.

Had been in the timber trade for twenty-five years. The local supply of timber was very meagre. For a large city, timber would have to be imported. Did not regard the Blue Mountains as part of the district, and timber there was only suited to cheap buildings. A little Dubbo pine was used in the district, but for good sound timber you had to go to the Northern Rivers.

James Dewar,
brickmaker.

The clay in Bathurst was the finest in Australia for bricks. They were impervious to damp, and could be baked any colour. Fireclay could be obtained in the Bald Hills at a depth of 100 feet. There was splendid gravel under the clay.

James Ruther-
ford, resident of
Bathurst since
1861.

Nature of soil.—Had heard evidence as to foundations, and had good experience in building. The cracks in the Bathurst buildings were the fault of the builders. If timber were put in so that the foundations would settle evenly, the cracks would not occur.

Was familiar with the proposed Federal area, and endorsed the evidence of the previous witnesses as to building material. There was plenty of timber for rough heavy buildings. There was plenty of splendid freestone at Lithgow.

Water Supply and Catchment.—There was catchment enough in the Campbell River to supply, with storage, 100,000 people. The water was clear and pure.

Facilities for Food Supply.—The district could supply itself with food generally for an additional population of 40,000 people. It is a good district for wheat and other cereals, also for English fruits, and would carry as much stock per acre as any place he had seen.

Mineral Products.—Gold and iron were plentiful, and copper could be got at Cow Flat. The nearest coal was at Piper's Flat and Wallerawang, but the coal used in the town was mostly brought from Lithgow.

John Joseph
Sullivan, grazier.
Exhibit K.

Facilities for Food Supply.—Put in a statement in reference to the capabilities of the Bathurst District for grazing, raising, and fattening stock. The statements therein were prepared by him, and were true and correct, to the best of his knowledge and belief. The district could support an additional population of 40,000 from its own resources and drawing on adjoining districts.

Peter Furness,
farmer.

The proposed Federal area is good wheat-growing country, and would average 12 bushels per acre, or 20 to 25 bushels of oats per acre. English fruits flourish in the district. The soil varies in depth, but did not think it was being exhausted, though there had been some exhaustion which could be minimised with more skilful cultivation.

Jacob Knights,
farmer and pro-
duce dealer.

Resident in Bathurst since 1855. The soil of the proposed area was good and fertile, suited to all kinds of cereals, roots, and English fruits.

William Gilbert
Thompson,
Secretary Local
Agricultural
Society

Their exhibition of farm produce was one of the most successful in the Colony. Wheat grown in the district went as high as 67½ lb. to the bushel. Oats grow fairly. Barley for malting can be grown successfully. Root crops and English fruits thrive in the district. Some of the finest cattle in the Colony are produced in the district. It is a splendid fattening district.

Daniel Veness,
Town Clerk.

Water Supply and Catchment.—The present water supply of Bathurst was handed over by the Government, and is used by about 99 per cent. of the people. Did not think it an inefficient or precarious supply, though at times they had to make it intermittent. It is a pumping scheme, and the water is of fair quality. The average cost of the supply is £1,100 or £1,200 a year.

Ownership and Value.—Had been Town Clerk for ten years. Inside municipal boundaries, the population of Bathurst is approximately 9,300, as per census of 1891. The aggregate value of improved lands inside those limits is £913,184, and in the same area the unimproved land, exclusive of reserves, the Model Farm, and Government land, is valued at £18,263. He could not give values outside the municipal area.

William Henry
Webb.
Exhibit L.

Miscellaneous Conditions.—Put in a return prepared by him as one of the sub-Committee, showing mineral products and capacity to support population, also conditions favourable to commercial and industrial development.

Captain Forsyth
Cheffins,
Captain of
Reserve of
Officers.

Defence.—Was Captain of the 3rd Regiment stationed at Bathurst, which he thought the best naturally defended city in New South Wales. Surrounded by hills, some of which were practically impregnable. There was good ground round the city for manœuvring troops. It had natural facilities for hasty defence, and you could heliograph to Sydney by intervening stations.

BOMBALA-EDEN SITE.—Summary of Evidence taken at a Public Inquiry held at Bombala on 24th, 25th, and 26th April, 1900.

Produced copy of report (Exhibit A) sent to the Commissioner, which was a true copy of original, prepared by sub-Committee, appointed by their League.

Climate.—Resident of the district about fifty years. Had kept a thermometer, but did not keep records. During last heat-wave the thermometer did not quite reach 100 degrees in the shade on the hottest day. In extreme cases there might be a fall of 40 degrees from highest to lowest temperature. Never saw the thermometer below zero. There might be 10 degrees or 12 degrees of frost. Southern Monaro is milder in winter than Northern Monaro. This is due to the prevailing direction of the wind and the distance from the mountains. The figures in report under climatic conditions were prepared from information furnished by the Government Astronomer. Snow falls in the district, but seldom lies on the ground all day except in the highlands. Southern Monaro is visited by unpleasantly cold winds in the winter, but they are infrequent and of short duration. Bombala gets sea breezes in summer about 4 o'clock in the afternoon. They reduce the heat, and are exhilarating and refreshing. The nights are, as a rule, cool. There might be two or three hot nights in the summer. Eden possesses one of the best climates in New South Wales.

Altitude—The figures produced in report were furnished by the Government Astronomer. Bombala is about 2,400 or 2,500 feet above sea-level. Murray's Look Out on the proposed Site is about 3,190 feet. The lowest point of the proposed territory is 2,150 feet above sea-level.

Rainfall.—The annual rainfall is 29 inches for a period of ten years, including the last droughty years, when the average would be only about 20 inches. The district is not subject to droughts. The proposed source of water supply averages over 30 inches per annum.

Accessibility.—The Bombala-Eden Site is nearly equi-distant from Melbourne and Sydney. The distances are :—

Bombala from Sydney, by land	325 miles
Bombala from Melbourne, by land	330 "
Eden from Sydney, by water	290 "
Eden from Melbourne, by water	397 "

Adelaide, 804 miles by land, and 900 miles by water; Brisbane, by land 1,048 miles, by water 793 miles; Hobart, by water 360 miles, by land and water about 420 miles; New Zealand, by water 1,260 miles. Cooma must be connected by rail with Bombala for defence and commercial purposes, and thence through the proposed Federal Territory to the Victorian Border. A railway from Bombala to Eden is part of our scheme, with a strip of land along such railway together with 10,000 acres round Eden as Federal Territory. The Cooma-Bombala Railway, *via* Nimitybelle, which we favour, would cost £455,270. That estimate is ten years old. This line must be constructed at the expense of New South Wales to relieve the congestion of traffic on the main trunk line, Sydney to Melbourne, *via* Junee and Albury. We favour the proposed line, Bombala to Eden, *via* Bondi. This route would be about 70 miles, and the cost of construction would be borne by the Commonwealth. Eventually the railway would have to be carried on to the Victorian Border to join with Bairnsdale, and thus complete the connection between Adelaide and Brisbane.

Physical Conditions—Nature of Soil.—Principally a rich loam, a slight proportion of basalt and some granite; very fertile, and for the greater part deep. No analysis has been made, but the formation might be classed as principally granitic and slate. It would grow anything.

Building Material.—Immense supplies of timber on the ranges. Iron is found in the district, and slate at Delegate; stone is dealt with in the Report. The Eden-Bombala Railway would considerably cheapen cost of building and construction.

Facilities for Food Supply.—The district is very productive. Dairying and fruit-growing flourish. The district could supply the Capital, and what the high lands could not produce could easily be brought from the coast. Any crop that can be produced in a cold climate will grow. Wheat and oats are grown—wheat only in small areas, as there is no market for surplus, though we can grow 20 to 30 bushels per acre. Sheep farming pays better than agriculture at present.

Miscellaneous Conditions—Defence.—The proposed scheme of railways, taken in conjunction with the seaport of Eden, would form an admirable feature for military and defence purposes. It would be necessary to erect a breakwater at the port of Eden to make it fit for a Federal Port, and the town would probably have to be fortified.

Trade.—The Bombala district is not under the commercial influence of Victoria. All the supplies of the district are obtained from Sydney.

Ornamental Trees and Lakes.—The area proposed would lend itself readily to the making of artificial lakes and ornamental tree-planting. All English trees would thrive. American trees do even better. The lakes could be filled by gravitation.

Climate.—Was resident of the district for fifty years. The climate was a very healthy one—not more liable to sudden changes than any other part of the Colony. Concurred with Mr. Campbell's evidence as to the heat. They got about 10 degrees of frost.

Accessibility.—The extension of the railway, Cooma to the Victorian border, and thence to connect with present Bairnsdale terminus, was a national undertaking, and was absolutely necessary, whether the Federal Site was chosen in the district or not; it would relieve the congestion of traffic on the present trunk line *via* Albury. The proposed line, Bombala to Eden, would provide alternative sea-carriage. Most of the trade of the district goes to Sydney, and, in the event of Federation and the construction of the Cooma-Bairnsdale Railway, the business of the district would still remain with Sydney.

Nature of Soil.—Particularly suited to aboriculture. Had large experience in tree-planting, and had largely cultivated ornamental trees. All the English trees thrive well. The district is one of the richest in New South Wales.

Drainage.—The site chosen for the Capital is sufficiently undulating to be suitable for excellent sanitary conditions and drainage.

Facilities for Food Supply.—The Monaro district could provide meat and food for a city of 40,000 people. Cereals could be grown, also potatoes in large quantities, whilst all the rivers are stocked with fish.

Defence.—The opening of a railway from Cooma to Bombala, and thence to the Border, and through Gippsland, is necessary for defence purposes.

Building

Coulson
Murphy,
auctioneer and
commission
agent, Hon. Sec-
retary of the
Southern
Monaro Railway
and Federal
Capital League.

Ronald Camp-
bell, grazier,
Member and
Chairman of the
Southern
Monaro Railway
and Federal
Capital League.

Henry Tolle
mache Edwards,
grazier.

Thomas Moore,
carpenter.

Building Material.—Had been sixteen years working at his trade in the district. Had very good building timber, suitable for large buildings. They had messmate, white or mountain ash, cut-tail, blue-gum, and box. Some of this timber is obtained on the mountains. Splendid clay, suitable for bricks, existed, and very good bricks were made locally. There was freestone and good flagstone, also granite.

Robert Hugh
Cook, bank
manager.

Conditions Favourable to Commercial and Industrial Development.—Had been resident in Bombala three and a-half years. The proportion of banking business done with Victoria was about $2\frac{3}{4}$ per cent. Outside banking, almost all the business of Bombala and district was done with Sydney. After Federation the business would still remain with Sydney.

Estimated Value of Land.—As an average, the value of the site selected is from 30s. per acre to £6 or £7 per acre, as improved.

Robert Watson
Dawson, stock
inspector.

Food Supply.—Gave returns of stock in the Bombala and Eden districts. The carrying capacity of the district was one sheep to the acre, year in and year out. It was excellent fattening country, and fat stock from it were sent annually to Sydney, Melbourne, and Tasmanian markets. There was a large dairying industry. Maize grows to perfection in the Eden district, and oats up to 75 bushels per acre in the Bombala district. Wheat and other cereals succeed very well, also all root crops.

Robert Eddie,
medical
practitioner.

Climate.—Had been seventeen years in the district, which was free from epidemics, though measles and influenza had been experienced. There was no endemic diseases. Had only seen three cases of typhoid in the district, and one diphtheria; consumption and asthma were almost unknown. There had been a few cases of hydatids. The district was a very healthy one, owing to the purity of water and altitude—about 2,400 feet. Eden is one of the healthiest places in Australia; it has a very even climate, with no frost. Typhoid is unknown there. Had always recommended it as a health resort. Had seen no ill results from changes of climate in Bombala. It might range from 90 degrees to 55 degrees in the summer months. No more liability to asthma and bronchitis than in Sydney or elsewhere.

Drainage.—There is a good system of sanitation in the town of Bombala at present. The site of the proposed capital is favourably situated for drainage.

George Kellond,
stone cutter and
bricklayer.

Building Material.—Had been in Bombala about forty-three years. Was continually using the local stone, and had built the principal buildings in Bombala. Quarried his own stone. It was a sort of grey sandstone. It cuts clear and hard, and hardens on exposure to the weather. It exists in large quantities. There is also plenty of granite and flagstones. Splendid clay for bricks exists, also fire clay. Good lime can be obtained locally, also sand in any quantity for mortar can be obtained from the river beds. Timber in any quantity can be got from the mountains.

Morris Samuel
Emanuel,
general store-
keeper.

Conditions favourable to Commercial and Industrial Development.—Fourteen years resident. Deals in hardware, groceries, drapery, produce, and every general requisite. Mostly everything obtained from Sydney. If the railway from Cooma, *via* Bairnsdale, &c., were constructed the trade would still be with Sydney. With Federation, and a uniform tariff, the district would still do business with Sydney.

Henry Lancaster,
carpenter
and builder.

Timber.—Had exercised his trade in Bombala for twenty-three years. Native timber used for superstructures of the local buildings, also for joists, studs, and roofing. Timber could be procured almost any size wanted. Mountain-ash, messmate, grey and flooded gums, and ironbark were obtainable, either on the site selected or on the adjacent coast district.

Building Stone.—Sandstone, freestone, and granite were obtainable in the district; likewise plenty of clay for bricks.

Edward Neale
Flowright,
storekeeper.

Conditions favourable to Commercial and Industrial Development.—Nine years resident of Bombala. Stocked hardware, grocery, and drapery. All his supplies obtained from Sydney. Did no business with Victoria. Federation would not disturb existing arrangements in regard to business.

James McCoy,
farmer and
grazier.

Food Supply.—Resident of the district for fifty years. Had cultivated wheat, and obtained an average of 20 bushels to the acre; but knew of a farm near the proposed site which yielded 45 bushels to the acre, and had thrashed for neighbours as high as 43 or 45 bushels to the acre. Taking good and bad seasons together for ten years, you could average 10 bushels to the acre. Oats were better suited to the district than wheat. Other cereals could be cultivated; especially maize. Potatoes thrive. With closer settlement, the district would easily support a population of 40,000 people. Dairying is carried on. The district comprises about 200,000 acres of good agricultural land.

Building Material.—Resided at Delegate, and was secretary of the Delegate Federal League. There were expensive deposits of slate at Wollondilly suitable for roofing.

James
McNought,
farmer, Chair-
man, Candelo
Progress
Committee.

Climate.—Thirty-four years of age, and resident of Candelo District, where he had been all his life. The climate of his part of the district was a genial one. Only two months winter.

Rainfall.—More than 30 inches per annum.

Water Supply.—Plentiful.

(The evidence of
this witness has
reference wholly
to the Candelo
District.)

Timber.—Spotted gum, box, and blue-gum.

Food Supply.—Principally a dairying district. Maize is grown abundantly. Wheat averages 25 bushels to the acre. Other cereals also do well. Vegetables and fruit may be grown, whilst oysters and fish are in abundance.

Charles Edwin
Blomfield,
Resident Engi-
neer, Depart-
ment of Public
Works.

Water Supply.—Inspected proposed Federal Territory for water supply purposes. Lord's Hill, at the 5-mile post on the Bombala-Delegate Road, would make a good site for a storage reservoir to supply any part of the proposed Federal City site by gravitation. The Delegate River is the best of the sources. The water was pure and good, with a discharge of 100 cubic feet a second. If the supply was only one-sixth of this it would suffice for a city of 250,000 people at 36 gallons per head per day. A storage reservoir would not be required for some considerable time; but, if required, a good site was obtainable at an elevation of 60 feet above Lord's Hill, where an inexpensive weir could be erected 30 feet high and 600 feet long with good foundations. This would be about 280 feet above Bombala. The Bombala River could also be utilised to bring water to Lord's Hill, and thus supplement the Delegate River supply if necessary. This site is about 250 feet above Bombala, and about 17 miles from the town. Other rivers, *viz.*, Saucy Creek, Little Plain River, Jackson's Bog, and Nicholson's Bog, and Coolumbooka River could also be utilised for gravitation for the greater part of the proposed territory. Estimated cost of Lord's Hill scheme £40,000. He had seen nothing that could be utilised for power for generating electricity, &c. The Lord's Hill supply could be used for hydraulic lifts, &c.

BRAIDWOOD SITE.—Summary of Evidence taken at a Public Inquiry, held at Braidwood on 14th and 15th June, 1900.

Initiation of League.—League initiated by public meeting convened at Council Chambers, when Committee appointed, which still exists. Whatever has been done was done in a formal and regular way.

Climatic Conditions.—Produced return from Government Astronomer, giving particulars of Braidwood climate, viz., mean temperature, hottest and coldest months on record, hottest and coldest day on record, and rainfall per quarter. This return covers a period of twenty-one years.

The Government Astronomer also gave the altitude of Braidwood as 3,157 feet, but this is not verified.

Climatic Conditions.—Practising in Braidwood eight years. District remarkably free from epidemics; they only occur in very mild form. Climate in favour of stamping out any epidemic. Sun-stroke very rare; knew only of two cases. Typhoid for a number of years unknown; cases had occurred, traceable to preventible causes. Diphtheria and ophthalmia practically unknown. Measles not prevalent; a few cases had been brought from Sydney. Consumption rare; owing to altitude of Braidwood, patients do well. Greatest range of temperature in his knowledge, 35 degrees. Residents not liable to sudden chills. The sea breeze generally reached Braidwood about 4 p.m. in summer, and lowers temperature about 20 degrees. Considered climate very good, and during prevalence of sea breeze, town healthier. District favourable to longevity. Local water principally obtained from wells and tanks. Traced no ailments or illness to its use.

Climatic Conditions.—Resident of Braidwood. Practising in Colony twenty years—in New England, Tamworth, Gunnedah, Scone, Sydney, Kiama, and Braidwood, so had a varied experience of climate. Wholly concurred with Dr. Cummings' evidence. Hereditary consumption only consumption known in district, and patients have a greater longevity, owing to altitude, than in any other district he knew. Death rate of district was $1\frac{1}{2}$ per cent. of population, mostly comprising aged people from 60 to 98 years of age, and young children. Very few adult deaths between 20 and 50. Over sixty persons in district over 80 years of age. Births in 1899, 168; and for 1900, up to date, 58—a fair annual average. Population of police district, about 6,000. In 1899, 81 deaths; and 1900, up to present, 42 deaths. The healthiest district he had ever lived in.

Altitude.—Resident of district since 1880. Formerly Road Superintendent. Altitude obtained from Under Secretary, Public Works, 2,136 feet at Solus-street. The mean altitude of the whole proposed Federal Area was, approximately, the same as the town—in round figures, 2,200 feet. Had accompanied Mr. Blomfield, who took levels of part of the Area, so was able to speak *re* altitude.

Accessibility.—The Report contained all information obtainable under this head, and he swore the contents are true to the best of his belief.

Water Supply and Catchment.—Accompanied Mr. Blomfield in his inspection. Heard his Report read, and agreed with it. They had gone 20 miles up the Shoalhaven River to a point about 50 feet above the town. Mr. Blomfield had two aneroids with him, and check measurements were taken. They had the railway levels as a datum. A higher supply might be got further up river, but the river is flat, and some distance would have to be travelled. There was plenty of water. The Mongarlowe Site is about 30 feet above Braidwood Court-house. A ridge, 200 feet high, intervenes. That would have to be a pumping scheme. Mr. Wade's scheme is not high enough for gravitation. His Report was for the supply of the town of Braidwood—not the Federal Capital Site. Went about 13 miles up the Mongarlowe. Did not think it would be possible, by going higher up, to get a gravitation scheme.

Climatic Conditions.—Over forty years resident of Braidwood. Never felt uncomfortably hot, or had a day's illness in Braidwood. Considered it a very healthy climate. The changes in summer were not prejudicial to health. The sea-breeze generally came about 4 p.m., and lowered the temperature, but never found it cause chills. Had been through the whole of New South Wales. Braidwood the healthiest, and conducive to longevity. He was nearly 80 years of age. Did not know a better climate or a better Site for the Federal Capital.

Facilities for Food Supply.—Could grow good beef, which he attributed to the good grasses. Braidwood cattle always topped the market. The natural grasses throughout the country noted for their fattening qualities. Could supply fifty times as much meat as was consumed locally. A granite country. With closer settlement, could be made much more productive, and support a large population. Had got 40 bushels of wheat to the acre at Ballalaba. District celebrated for potatoes. Tropical fruits could be grown at Araluen.

Nature of Soil.—Resident and native of Braidwood. Was thoroughly familiar with proposed Federal Territory. Soil nearly all granite formation, with either clay subsoil or decomposed granite; in the hills, decomposed granite without the clay. Soil very porous. About 4 miles east of the town the soil is more of a sandstone. Slate formation commences 5 miles east of town. Did not know of any volcanic soil in the area. Out of the 64,000 acres about 20,000 acres arable land.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Large amount of timber on the Dividing Range, just outside proposed Area; also at Reidsdale, and back of Major's Creek. They had mountain ash, messmate, stringybark, and sassafras. Very little box, and no pine or cedar.

Ownership and Value.—Some of proposed building sites more valuable than other parts. As improved, he valued it at £5 per acre inside the Municipal area, but excluding the town of Braidwood. Some of it is worth £6 per acre. The land is slightly improved; about £1 per acre. For the whole area of 64,000 acres, very difficult to estimate and value; thought a fair average, £3 per acre. There is some rough country in it. Any increment of value by reason of location of Federal Capital Site in the area should go to the Commonwealth.

Facilities for Food Supply.—Worked cattle entirely, but thought it good sheep country with moderate rainfall. The quality of the beef grown in district remarkably good. Thought district could supply sufficient meat for a population of 40,000, but doubted if it could supply its own breadstuffs. Dairying confined principally to the farmers, but large quantities of milk and butter could be produced. District very suitable for establishing chilling and freezing works. Not sufficient sheep in district to encourage establishment of woollen industry. Monkitee an excellent portion of district for wheat raising. Average 16 bushels to the acre.

Richard Mitchell Higgins, Mayor of Braidwood and President of the Local Federal League.

Donald McDonald Campbell, Journalist and Secretary of the Local Federal League.

Harold Lytton Cummings, medical practitioner.

George Read, medical practitioner.

William Frederick Bundock.

Row and Hassall, grazier.

Robert John Coghill Maddrell, grazier.

John William Bunn, grazier

Nature of Soil.—Resides close to Braidwood. Engaged grazing fifty years. Had cultivated and knew nature of soil of the proposed Federal Area. Granite formation, with clay subsoil. Top-dressing shallow as a rule—9 inches deep; some places deeper, but exceptional. Below clay, rotten granite. In 4 or 5 feet sinking you would strike decomposed granite. Fertile soil for grass. Grain crops would wear it out in three or four years, but would recover if properly treated. In places good for root crops. The flats are good, but the hills only fit for grass. Better country for cattle than sheep. There may be trap soil at Reidsdale, but very little of it. Soil suitable for elms, pines, oaks, and generally for ornamental planting.

Facilities for Food Supply.—Fine grazing country, fattens cattle as well as any place in Colony. Cereals will grow. Potatoes and turnips do well. English fruits will grow, but the soil has to be trenched.

Julius Vider, storekeeper.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Sandstone of good quality at Corang. Enormous deposits of limestone at Long Swamp and Larbert. Enormous quantities of timber within 20 to 25 miles of Braidwood, and within 8 or 9 miles towards the coast. Messmate, mountain-ash, mountain-gum, white-gum, stringybark, blackwood, and sassafras obtainable within 10 or 12 miles. Further away spotted-gum, &c.

Ownership and Value.—Familiar with the district. Was one of the Government Assessors for Land and Income Tax. Knew the proposed Federal Area. Not much rough land in it. All useful country, and very fair as a whole. Valued the whole area as improved, excluding town of Braidwood, at £3 per acre. Some of it is worth £6. Doubted if any of it is only worth 30s. per acre. Would value the proposed Capital Site, excluding the town improvements, at £5 per acre.

James Henry Byrne, grazier.

Nature of Soil.—Thirteen years in district. Grazier all his life; also cultivates land. Acquainted with Federal Area. Soil granitic, with here and there a subsoil of clay.

Facilities for Food Supply.—Had obtained 20 bushels to the acre outside the area, and 35 bushels of oats. You could get 50 bushels of barley in some places. Potatoes, for yield and flavour, could not be beaten. Very good grazing country; 5 acres to the beast for ordinary cattle, and 10 acres to the beast for fattening. More a cattle than sheep country, but sheep do well in ordinary seasons.

George Arthur Basingthwaite, farmer and grazier.

Nature of Soil.—Resident of Larbert, 10 miles north of Braidwood. Familiar with the 64,000 acres Site. About one-third of it is arable or agricultural land. Agreed with previous witnesses as to soil.

Facilities for Food Supply.—Good country for cattle. Could supply meat, and, probably, butter and milk, for a population of 40,000, but hardly breadstuffs. Oats, wheat, barley, and English fruits will grow.

George McRae, saw miller.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Resident of Braidwood. Mill about 12 miles out. Very good timber available for building purposes; mountain-ash, messmate, mountain-gum, sassafras, and plum-tree; blue-gum at Araluen; blackbutt about 20 miles away, towards Bungendore.

William Augustus Kershaw, builder and contractor.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Practising his calling fifty-one years in district. Splendid granite in any quantity; first-class quality, good colour, capable of good polish; equal to Moruya granite. Abundance of freestone within 30 miles of Braidwood, at Corang. It has been used for tombstones, and stood the test for thirty years; it is free from flaws and joints, and will cut in any direction. Limestone of an excellent character within 14 miles of Braidwood. Had seen slate in the district. Had good clay for bricks, and had seen a little fire-clay. Timber grown in district had stood test in some buildings for forty years. They had stringybark, mountain-ash, messmate, mountain-gum, and sassafras; also blackwood and plum-tree.

Other Physical Features.—Foundations very good if dug deep enough. Had seen signs of subsidence, owing to shallow foundations.

William Cunningham, agr. culturist.

Facilities for Food Supply.—Resides Braidwood. Cultivates wheat, oats, and barley—principally wheat—on alluvial land. Experimented for the Government on various wheats, and sent specimens of his main crop to Professor Cobb, who reported favourably on it. It averaged 27 bushels per acre. The Federal Area would not all average that; but, in favourable seasons, 30,000 acres of it would average 20 bushels per acre. It is all good country. He spelled his land for four years. It is country which exhausts itself under cropping. Had grown oats up to 40 to 50 bushels per acre, potatoes 18 tons per acre, and hay 30 cwt. per acre. With closer settlement and mixed farming the Area would support a much larger population.

William Frederick Bundoock, recalled.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Heard Mr. McRae's evidence. Would add that spotted-gum is obtainable within 20 miles; blackbutt and ironbark within 26 miles, in lengths up to 40 feet; grey gum and box obtainable at Araluen; and blue gum, stringybark, and white box towards Nerriga. White ant not troublesome in locality.

William John Chapman, commission agent.

Ownership and Value.—Value proposed Federal Territory, as improved, from 50s. to £3 per acre. Not highly improved. Excluding the Capital Site, the remainder is worth 50s. per acre, and the Capital Site, excluding Braidwood, £3 per acre as improved.

Facilities for Food Supply.—Braidwood a great stock centre, but not a depôt. Buyers come there for stores. District good for grazing and fattening.

Henry Francis Maddrell, grazier.

Nature of Soil.—Resident of Braidwood. Born in district. Knows the Federal Area. Granite soil with alluvial flats. Some very good grazing land, and some very good agricultural land.

Facilities for Food Supply.—A good cattle country. Enough stock to keep a chilling factory going; great numbers of cattle sent to Sydney. Will fatten sheep very well in fair seasons. Dairying carried on by a number of small farmers. Had let his land to farmers. In fair seasons they got 18 to 25 bushels of wheat per acre. Lucerne is cultivated. Soil not easily exhausted.

James O'Brien, grazier and farmer.

Facilities for Food Supply.—Resident of Braidwood forty-six years. Cultivated land on Jembai-cumbene Creek—wheat, oats, potatoes, barley. Soil fertile. Got 20 to 30 bushels wheat per acre; had grown as high as 40 bushels per acre, and 60 bushels oats. Grew lucerne, but not in the Federal Area. As a whole, good country for sheep and cattle, and good dairying country, which could stand a drought. Country suitable for closer settlement, and would then support a large population.

Henry Lutwitz Mater, stock inspector.

Facilities for Food Supply.—Resident of Braidwood. District embraced Police District of Braidwood, from 6 miles north of Nerriga and 40 miles south of Braidwood. Extends 22 miles west and about 14 miles east, including Araluen. Produced Return of Stock in district, as follows:—

	1899.	1900.	
Horses	4,225	3,716	
Cattle	33,237	27,012	
Sheep	85,210	77,353	Very

Very good fattening district. Carry one sheep to the acre in most places. Produced a large number of fat stock in the year. About 5,000 or 6,000 fat cattle, and about 25,000 sheep exported annually. District too small for large-stock chilling or freezing works. Good dairying country, if provision made for winter feed.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Resident of Braidwood forty years. Knows the proposed Federal Area. Timber of very good quality can be obtained in any quantity. Plum-tree very good timber for flooring and furniture.

Mineral Products.—Ironstone outcrop at Buddawang; said to be an indication of coal. Cobalt, going $2\frac{1}{2}$ per cent., and copper also found there. Tin got on the Shoalhaven.

Conditions favourable to Commercial and Industrial Development.—Would bear closer settlement and carry a large population. Brewing could be established, and malting barley produced. District favourable for woollen manufactories.

Mineral Products.—Put in a return showing mineral product of Braidwood Electorate for 1898, obtained from Mr. Coghlan's report for that year. Confirmed Mr. Musgrave's statement *re* iron. Stream tin in the Shoalhaven. Assayed black sand, which went 29 oz. 12 dwt. 8 gr. of gold to the ton. Copper and lead obtainable. Produced sections, showing coal, sandstone, and shale bands in parish of Endrick, county of St. Vincent.

Mineral Products.—Residing about 15 miles from Braidwood. Produced sample of coal and shale found close together about 25 miles from Braidwood. They were found in the face of the mountain—the shale about 15 feet above the coal and under Carboniferous sandstone. The coal seam was about 2 ft. 6 in. through. Had it assayed; equal to Newcastle coal. The shale specimen went 52 per cent. Thirty miles from Braidwood there is a 7 ft. 6 in. seam of coal under the same sandstone.

John Musgrave,
journalist.

James
McDonald,
storekeeper.

George Webb,
farmer and
grazier.

CARCOAR-GARLAND SITE.—Summary of Evidence taken at a Public Inquiry held at Orange on 27th March, 1900.

Had twenty-four years' experience of the district. Had been constantly resident and familiar with it. The Carcoar-Garland Scheme for the Federal Capital was his own proposal, and he produced a map showing it. The Site was that inspected by the Commissioner. He also produced a Report referring to the Site, and following the heads of the Commissioner's circular.

Climatic Conditions.—The information under this head contained in the Report was obtained from the Postmaster, Carcoar, and the Government Astronomer. The figures refer to Carcoar, but would apply generally to the Site proposed for Capital on plan. The altitude is about 50 feet below that of Carcoar. He also put in a certificate by the Carcoar Postmaster, showing the highest temperatures registered in Carcoar for three days in November and December, 1899, and in January and February, 1900.

Accessibility.—The centre of the proposed Capital Site is $442\frac{1}{2}$ miles from Melbourne by the trunk line and the Harden-Blayney connection. Sydney is distant 189 miles, and Brisbane 700 miles, by the Werris Creek and Wellington proposed loop-line. Adelaide is distant 923 miles *via* the proposed Cobar-Broken Hill extension, and 925 miles *via* Melbourne. Hobart, *via* Melbourne, is 820 miles; and Adelaide 710 miles, *via* the Murray Valley, should Hay and Morgan be connected. Perth would be distant 2,200 miles, *via* Port Augusta (by Transcontinental Railway) and Broken Hill.

Nature of Soil.—Very rich and fertile in places, and, for a considerable extent over the whole area, may be classed as fair to good. Information under this head is furnished in the Report.

Water Supply.—For this purpose, a point on plan between Lyndhurst and Manduramah on the railway line has been taken. There is a choice of supply, and a number of catchment areas are shown on plan. Any one of the Brown's Creek, Belubula River, or Coombing Creek sources of supply would be sufficient for a city of 40,000 inhabitants. These would be the principal sources of supply; but there are two other creeks. Each of these sources would give a fall of 300 feet to the proposed City Site. The catchment areas get the 39 inches of rain of the higher portions of the district.

Ownership and Value.—There are about 1,500 acres of town and suburban lands, and about 50,000 acres of country lands. The town of Carcoar is excluded, as it includes £32,000 of improved value. The Church and School lands in the area have been regarded as Crown lands, though a large portion of them has been converted into holdings under the Crown Lands Acts. None of the Church and School lands are included in the proposed City Site. The estimates of value are given in the report. The rough estimate for resumption of the whole area, improved, is £200,000. Leaving out the Church and School Estate, it would be £185,000.

Miscellaneous Conditions.—No part of the area cuts into the proposed Forest Reefs Site. The centre of the City Site is between Lyndhurst and Manduramah, and central to Bathurst, Orange, and Cowra, and there are no towns of importance to be overshadowed or deteriorated by its selection.

COOTAMUNDRA SITE.—Summary of Evidence taken at a Public Inquiry held at Cootamundra on 8th and 9th June, 1900.

Initiation of League.—Committee formed at public meeting. Was a member, and afterwards Secretary. Committee responsible for everything done and information collected.

Nature of Soil.—Resident of Cootamundra twenty-three years. General character of proposed Federal Territory described by Dr. Curran as porphyry. The soil is chocolate loam, with a belt of white granite country.

Facilities for Food Supply.—Produced statement showing area under cultivation of wheat and hay in counties of Harden, Clarendon, and Bland during period 1894 to 1899. Other products of district are sheep, cattle, pigs, horses, oats, maize, barley, fruits of all kinds, vegetables, and dairy produce.

Mineral Products.—Cootamundra the centre of numerous gold-fields, and the district also produces chrome, asbestos, slate, steatite, manganese, and iron oxide.

Frederick
Pinkstone,
journalist,
Hon. Secretary
of Cootamundra
Federal Capital
League.

Climatic

George Stephen Hay, Post and Telegraph Master, Cootamundra; District Registrar of Births, Deaths, and Marriages.

William Hall Matthews, storckeeper.

John Thomas Stratton, Mayor of Cootamundra

William Falconer, builder and contractor.

Samuel Highfield Dickson, monumental mason and general agent.

William Miller, stock and station agent.

Climatic Conditions.—Produced return from Government Astronomer of temperature and rainfall for thirteen years.

Altitude of Cootamundra, 1,079 feet above sea-level.

Produced return of births, deaths, and marriages in Cootamundra district within a radius of 14 miles for ten years ending December, 1899.

Accessibility.—Resident in Cootamundra twenty-six years. Familiar with lines of communication with other Colonies. Melbourne 323 miles by rail, and Sydney 253. Brisbane 976 miles distant, but reducible 100 miles if proposed Werris Creek to Dubbo Line constructed. Adelaide 682 miles by present railway routes. Junee about equi-distant from Melbourne and Sydney. Junee to Hay Branch Line is 35 miles from Cootamundra, and the connection with the Great Western Line 21 miles distant. Cooma Line about 130 miles distant. Railways go west from Cootamundra to Temora, and south-easterly to Gundagai. If line to Temora extended westerly to Hillston and Wilcannia, would considerably reduce distance to Adelaide.

Ownership and Value.—Highest value town property Cootamundra, unimproved, £20 per foot; lowest value for business purposes, £3 per foot. Beyond business area, values vary from £40 to £500 per acre. The average value of the agricultural country lands in the parishes of Cootamundry, Jindalie, Cowcumber, Cullinga, Muttama, and Wallendoon is from £3 10s. to £6 10s. per acre as improved. In parishes of Muttama and Cootamundra there is a certain amount of rough land worth 10s. or 20s. per acre. From 4,000 to 5,000 acres of land, about 15 miles from Cootamundra, realised £3 per acre within the last year.

Water Supply and Catchment.—Present town supplied by gravitation and pumping. Supply ample, so far as the reticulation goes. Consumption of water about 12,000,000 gallons per annum. Supply not sufficient for a population of 40,000 people.

Ownership and Value.—Ratable property in the Borough of Cootamundra valued at £254,000; area of Borough, 3,040 acres; street mileage, 20½; population inside Municipal area, 2,650; dwellings, 530. This information taken from the Council books. Present waterworks, completed, will cost £30,000, and gasworks, £11,000.

Facilities for Food Supply.—District second to none in New South Wales. Very large product of wheat; average, 10 to 12 bushels per acre in a fair season. Could easily supply 40,000 people with bread-stuffs. Flour exported to Sydney, Japan, the Islands, &c. Any grain will grow in the district.

The possession of, or proximity to, Stone, Timber, and other Building Material.—In building trade nineteen years; in district twenty-seven years. Good building-stone rubble at Bethungra; splendid granite at Wallandbeen; no sandstone; no marble; good slate at Gundagai; limestone at Galong and Illabo. Abundant clay for bricks, also splendid clay for fire-bricks obtainable at Temora. Material for concrete available. Hardwood not much used on account of white ant. Ironbark, stringybark, red-gum, wattle, and kurrajong obtainable locally. The railway, Temora to Wyalong, would open up large quantities of Murrumbidgee pine.

Other Physical Features.—Country about Cootamundra not too good for foundations. About Wallandbeen as good as could be got anywhere.

Altitude.—Knew Site chosen at Wallandbeen. A gently undulating country, averaging about 600 feet higher than Cootamundra. Wallandbeen Station, the lowest portion of the Site, is 50 or 60 feet below average height of Site.

Water Supply and Catchment.—Adjinbilly Creek, which flows into the Murrumbidgee about 36 miles from Cootamundra, the best supply for a large population. The Murrumbidgee would have to be crossed by a syphon.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Inexhaustible supply of first-class granite at Wallandbeen; nearly equal in quality to Moruya granite. Flagging stones at the Black Ranges, about 10 miles from Galong Platform. Limestone or marble deposits at Tarrabanda, near Gundagai. No sandstone or freestone in district. Fine quartz gravel for roadmaking, and good clay deposits for brickmaking. Material for firebricks at Temora. Produced samples of ironbark, red-gum, stringybark, white box, and Lachlan or local pine grown in district. White ants will not tackle red-gum or ironbark. Not much trouble with white ant in district.

Drainage.—Wallandbeen Site easily drained—partly into Murrumbidgee, partly into Lachlan River. Sanitary drainage to be disposed of by sewerage farms.

Other Physical Features.—Site chosen very suitable for a large city. Foundations very good.

Accessibility.—Resident of district twenty-five years. Cootamundra situated centrally between Adelaide and Brisbane on railway communication, and nearly semi-distant between Melbourne and Sydney. Commands important Railway junctions of Cootamundra-Temora and Cootamundra-Gundagai lines, 20 miles from Murrumburrah-Blayney Junction, and will command the traffic from the Lachlan-Koorowatha line.

Water Supply and Catchment.—Well acquainted with the district sources of supply. Did not favour pumping. 40,000 people could not be supplied economically by pumping. Gravitation scheme could be established on the Tumut River, about 50 miles above Tumut, at a cost of about £250,000. Knew the Adjinbilly Junction, about 12 miles above Gundagai. Sufficient height could be got there. The water would have to be brought less than 60-miles. This scheme would not cost more than £200,000. The third scheme was the Government one at Barren Jack, or Goodradigbee. He preferred the Adjinbilly scheme.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Were Gundagai line extended, extensive supplies of mountain ash, gum, and messmate on the tableland above Tumut would be tapped.

Ownership and Value.—The Wallandbeen proposal is principally private lands, comprising parts of the Wallandbeen, Nubba, and Berthong Estates, which could be resumed at a maximum cost of £4 per acre.

Facilities for Food Supply.—The resources of the Riverina District sufficient to support 40,000 people if Capital established at Wallandbeen.

Conditions favourable to Commercial and Industrial Development.—Large quantities of stock pass through Cootamundra en route to the mountains. With sufficient population meat chilling works would be successful.

Climatic

Climatic Conditions.—Resident over five years. Cootamundra a healthy place. Fall in temperature on very hot days not great or trying; chills do not ensue. The winters are very mild, and the cold not severe. Occasionally very hot winds occur, and a few nights are oppressive. A week of such weather very unusual. Heat much greater than usual during last five years, on account of drought. Knew only one case of sunstroke. The Wallendbeen Site very healthy, and much cooler than Cootamundra. Cootamundra free from endemic disease; no diphtheria; occasionally a case of typhoid; consumption very unusual; ophthalmia not common. Duration of life quite up to the average. Death rate below the average.

Other Physical Features.—Cootamundra, on a flat, might easily be drained better than it is. Wallendbeen Site more easily drained.

Walter Hull,
Government
Medical Officer,
Cootamundra.

FOREST REEFS AND CALVERT SITE.—Summary of Evidence taken at a Public Inquiry held at Millthorpe on 5th and 6th July, 1900.

Initiation of League.—The League was initiated by public meeting. The Committee appointed is still in existence.

Climatic Conditions.—The returns furnished by the League, obtained from the Government Astronomer, are the same as those of Orange, no Government Observer being stationed at Millthorpe.

Accessibility.—Information under this head was prepared by the sub-Committee, and is true, to the best of his knowledge and belief.

Ownership.—The proposed Territory contains all the Church and School lands in the district. Some of it contains briar and is let under improvement leases.

Climatic Conditions.—Had been practising in Millthorpe six months. No Government Medical officer in the place. Had sufficient hearsay experience of general healthiness of the climate, which his own experience supported. Thought it nearly as perfect a climate as existed in Australia. Knew of no consumption of local origin. There had been two suspicious cases of diphtheria, but no certainty. Had not seen any asthma, influenza, or bronchitis. Thought district not liable to pulmonary attacks owing to sudden changes. A few cases of typhoid had occurred; one came from Blayney. No cases of sunstroke within his knowledge. Thought Millthorpe a splendid sanatorium, and had never seen a better climate.

Climatic Conditions.—Resided in Millthorpe thirty and a half years. Kept the rainfall record for the Government Astronomer since 1889. Did not record temperature. The annual rainfall from 1890 to 1899 averaged 33.32 inches. A more healthy climate than Millthorpe was not obtainable. It was phenomenal to get a shade temperature over 90 degrees. Millthorpe possesses all the advantages of Orange climate, with an increased altitude of 287 feet. The climate is very bracing. Changes are not sudden. The temperature has never reached zero, and its highest was about 100 degrees at the time of the heat wave.

Nature of Soil.—Resided at the Forest. Had been thirty-years in the district, and knew the country well. Prepared part of the report furnished the Commissioner. The soil was principally red, of basaltic formation with alluvial flats. Subsoil principally clay, with underlying basalt. Surface soil averaged 2 to 5 feet in depth. Away from the alluvial the bed-rock is diorite.

Water Supply.—Ample water supply at the Forest. Directly you strike the basalt you get water; that is the great drawback to mining there. Know the source of supply for the proposed capital—Flyer's Creek, Brown's Creek, and Slattery Creek. The first two are relied on, which means a reservoir and weir; the latter to be erected within 2 miles of Millthorpe, from which a gravitation scheme could be got.

The possession of, or proximity to, Stone, Timber and other Building Materials.—No granite suitable for building. Any amount of limestone. Marble obtainable near the Forest, and freestone at Byng, 15 miles distant. The basalt is good building stone, cuts straight and works well. Slate is got 4 miles away towards the Canobolas. Gravel is plentiful, but not much sand.

The only timber adjacent is stringybark. Very good bricks are made locally. No fire clay.

Foundations are good on the site chosen for the Capital.

Facilities for Food Supply.—The district is very fertile, and produces strong crops of cereals and potatoes. In good seasons, 20 bushels of wheat to the acre; average of ten years, about 15 bushels. Oats average 30 to 40 bushels to the acre. Root crops thrive, also English fruits. Average size of the holdings, about 300 acres. The country is well farmed. A large amount of stock is raised. The country is capable of supporting a population of 40,000 people. Agriculture prevails, but a great many small holdings carry sheep.

Nature of Soil.—Resident in the district twenty-one years. Corroborated Mr. Norman's evidence re depth and fertility of soil; also agreed with his evidence as to capabilities of food supply. They could also draw for supplies on neighbouring districts of Bathurst, Carcoar, &c. Agreed with Mr. Norman as to sheep, but district principally used for fattening owing to severity of winter. The rich soil made farming the most profitable. No failure of crops in the district to his knowledge.

Ownership and Value.—Valued the private land in the proposed Territory at £6 per acre as improved. Produced map showing geological features of proposed Federal Area.

Facilities for Food Supply.—In business in Millthorpe thirteen years. The district was very strong in breadstuffs, but not so much in meat. Had good grazing land for fattening, but country chiefly agricultural. The country is closely settled. Average acreage is about 200 or 300. Within a radius of 50 miles the country is capable of supporting a population of 40,000.

Facilities for Food Supply.—Agreed with Mr. Saunders' evidence, but added that produce is sent from Millthorpe to almost every part of the Colony.

Drainage.—Resident of district for fifty years. Knew site chosen for Federal Capital. It is undulating country, well-suited for drainage. Properly drained, it would become naturally dry. Sewage farms could be established at convenient places. The fall would be, principally, into Brown's Creek.

Miscellaneous Conditions.—Had been in Millthorpe three and a half years. Prepared the returns under this head, which are true, to the best of his knowledge and belief. Large quantities of the local produce went to the local mill, especially wheat. Large quantities of potatoes, chaff, and flour go to Orange by road and rail. Since he had been at Millthorpe the general traffic on the railway had more than doubled itself.

Had

Bartholomew
John Harris,
blacksmith.

Had been twenty-two years at Forest Reefs. Had experience in mining. One of the finest copper-mines in the Colony was at Cadia, but it has not been worked to any extent for twenty years. The Forest Reefs is auriferous country, but the great drawback is the water. It is a very wet country. There were large beds of ironstone, and silver has been a prominent feature in combination with copper and gold. Had been a Volunteer, and could speak on the subject of Defence. The site chosen for the Capital was peculiarly fitted for defence, owing to the physical character of the surrounding country.

The Commonwealth of Australia.

REPORT showing suitability of the Forest Reefs and surrounding country as a Site for the Federal Capital. The Registrar, Land Appeal Court, Sydney,—

Dear Sir,

Millthorpe, 13 June, 1900.

On behalf of the combined Federal Capital Leagues of Millthorpe, Forest Reefs, Carcoar, and Blayney, we have the honor to suggest, as a Site for the Federal Capital of Australia, an area of about 82,000 acres, the position of which is indicated by the accompanying plan, full area shown by red band, Church and School Estate by green shading, and private lands by blanks within red band. The Site embraces, roughly, 128 square miles, and is situated within the parishes of Belubula, Beaufort, Calvert, Errol, and part of Lindsay, in the county of Bathurst. Centre of City Site shown by red cross.

In compliance with your requirements, indicated by a circular of 23rd October last, we now furnish information on the subjects specified therein, viz. :—

1. *Climatic Conditions.*

(a) Range and Mean Temperature during each quarter of the year, beginning with January.

Quarter.	Mean temperature.	Hottest month on record.	Coldest month on record.
January 1st to March 31st.....	66·3	75·2	58·3
April 1st to June 30th.....	48·6	64·6	37·5
July 1st to September 30th	44·2	50·4	36·9
October 1st to December 31st	60·4	69·8	49·8

These figures show the mean for twenty-seven years, and have been obtained from the Government Astronomer, and are those of the district of Orange, none having been kept of Millthorpe nor of the Forest Reefs ; but the proposed City Site would be practically the same temperature as Orange.

(b) Altitude above sea level, and mean altitude of the Area as a whole.

Mean altitude 2,200 feet, approximately. Highest point 3,500 ; and, by slightly extending the Area, the Canoblas could be included, and an altitude of more than 4,600 feet obtained.

(c) Rainfall.

January 1st to March 31st	8·99 inches, ten years average.
April 1st to June 30th	8·42 " "
July 1st to September 30th	8·58 " "
October 1st to December 31st	7·48 " "

33·47 inches per annum.

These figures show the average for ten years, and have been supplied by the Government Astronomer.

2. *Accessibility.*

(a) By Railway (existing or to be constructed).

The proposed Federal Area would embrace a tract of country lying between Carcoar, Blayney, and the Forest Reefs, and would be connected with Sydney by the Main Western Line—distance 181 miles ; also with Melbourne (through the connection between the Western and Southern Lines of New South Wales which already exists, the junction with the Western Line being by the Blayney to Harden Branch)—distance 456½ miles ; also with Adelaide, *via* Melbourne, distance 939 miles to Carcoar at southern end.

The connection of Brisbane by rail is at present *via* Sydney only—distance in all, 904 miles ; but the proposed connection of the Western and Northern Lines of New South Wales—now under consideration of the Government—from Werris Creek to a point on the Western Line (probably at Wellington, 75 miles north of Blayney), will cause the distance by rail from Blayney to Brisbane to be reduced to about 700 miles, approximately. The distance from Sydney to Brisbane, by rail, is 723 miles. Another proposed line of railway is that to connect Adelaide (*via* Broken Hill) with the Western Line of New South Wales—probably by means of the Cobar Line, which junctions with the Western Line at Nyngan, about 925 miles, and *via* Morgan and Murray Valley, about 724 miles, to Carcoar.

It will thus be seen that the proposed Federal Area has a central position on the existing and proposed railway lines between the various State Capitals.

The connection with Hobart is, of course, *via* Sydney or Melbourne.

(b) By Road.

The Main Western Road from Sydney to Bourke and Queensland passes close to the proposed Area, and other main roads junction with it within the proposed area.

(c) By Water.

Access to other State Capitals *via* Sydney, by water.

3. *Physical Conditions.*

(a) Nature of Soil.

The soil within the proposed area is principally rich chocolate volcanic, with black soil in valleys, with a small area of inferior soil on the highest points.

(b) Water Supply and Catchment.

A good water supply is obtainable from Flyer's Creek, and Brown's Creek, which run through the proposed Area, and the enormous catchment provided by the Canoblas Mountains could be made available.

(c)

(c) The possession of, or proximity to, Stone, Timber, and other Building Material.

The stone within the proposed Area is principally basalt, which is easily obtained in suitable blocks in any size, and in any quantity.

Granite also exists in easily accessible positions.

There are flagstone quarries on the eastern slopes of the Canobolas Mountains.

Limestone is also available in immense quantities.

An unlimited supply of superior marble can also be obtained within an easy distance of the proposed Area.

Good hardwood timber is also procurable within a reasonable distance of the proposed Site.

A superior quality of clay for bricks is abundant at shallow depths within the area, and is already extensively used in the manufacture of bricks.

(d) Drainage.

The drainage matter is an easy one, both as regards surface drainage and sewers, for there are three main streams falling away southerly from the City Site, the main central one being Brown's Creek.

(e) Other Physical Features.

The average elevation within the proposed area would be 2,900 feet—that would be the northern portion; the southern portion, say, 2,500 feet; while the whole would average about 2,700 feet above sea-level.

The altitude of the proposed City Site is about 3,000 feet.

Permanent streams are within the proposed area.

The country is, in part, undulating and of a hilly character, with considerable areas of tableland.

4. *Ownership and Value.*

(a) Area of Alienated or Private Lands.

There are 31,360 acres of privately-owned lands within the proposed area.

(b) Area of Crown Lands (including Church and School Lands, Reserves, &c.).

The office estimate of lands within the Church and Schools Estate in the proposed Area is set down at 50,640 acres. There is no Crown land (other than the Church and School Estate) within the Area.

(c) Estimated Value of Private Lands (Unimproved).

The value of unimproved private lands will average £2 per acre.

The small areas of "suburban land" near Blayney and Carcoar, together with those Boroughs, are excluded from the proposed Area.

(d) Estimated Value of Private Lands (with existing Improvements).

The improved value of privately-owned lands will average £3 10s. per acre.

5. *Miscellaneous Conditions, &c.*

(a) Character of Neighbouring Country, having regard to—

(1) Facilities for Food Supply.

Sheep, cattle, poultry, &c., are raised and fattened for market in large numbers in the proposed Area and neighbouring country, which also comprises rich agricultural land, with abundant rainfall, ensuring heavy crops of every description. Failure of crops from drought is unknown.

Surplus produce sent out of the district during two years, from Carcoar, Millthorpe, Blayney, and Spring Hill Stations, according to official records, as follows:—Chaff, 20,898 tons; produce, 22,034 tons; total, 42,932 tons. The produce includes:—Potatoes, turnips, pumpkins, wheat, oats, flour, and fruit. The chaff includes:—Chaff, straw, and hay.

The total tonnage, as specified, having been despatched from the four stations named, falls far short of the actual surplus sent out of the district, as a great quantity goes to Orange and intermediate stations.

A very large increase of production is possible, as there are large areas of land still uncleared within the Area which are suitable for cultivation.

(2) Mineral Products, especially Coal.

Extensive gold and copper mines exist within, and adjacent to, the proposed Area, and have been worked with splendid results.

The mineral products within the Area are gold (principally) and copper. Various gold and copper mines are now at work within, and adjacent to, the proposed Area.

Coal is obtained at Lithgow in unlimited quantity and quality for all purposes, and is supplied at a low price; the distance by rail being, say, 82 miles.

(3) Capacity to support a considerable Population.

The Area proposed, and the surrounding district, are adapted for the growth of most of the necessaries of life, and are conveniently situated for obtaining other supplies elsewhere.

The climate conditions are entirely favourable to health and comfort.

(4) Conditions favourable to Commercial and Industrial Development.

The pre-eminence of the proposed Site is indisputable, from the fact that its position, with regard to the railway system, controls the markets of the south, south-western, and western districts, and already immense quantities of produce grown in the vicinity are supplied to these markets as well as to the metropolis.

We shall be prepared to submit to the Commissioner, when he visits Blayney, the names of various persons as witnesses to give evidence with respect to the several matters herein referred to, and to have such persons in attendance at the inquiry.

We have, &c.,

J. W. HAYES.

S. C. FRANCIS.

JNO. NOONAN.

J. H. DOBBIN.

(On behalf of combined Federal Leagues.)

GOULBURN SITE.—Summary of Evidence taken at a Public Inquiry held at Goulburn, 7th and 8th May, 1900.

Ernest William Johnson, Hon. Secretary Goulburn Federal Capital Committee.

George Henry Sheaffe, District Surveyor, Goulburn.

Exhibit D.

Augustus Kerr, commission agent.

Exhibit E.
Exhibit F.

Exhibit G.

Exhibit H.

Alfred de Lisle Hammond (Master of Arts), grazier.

Exhibit I.

(According to telegram from Government Astronomer, afterwards received, the greatest range in May, 1891, was 33 degrees on 14th.)

Plan of Site.—Produced map showing proposed Federal Territory of 64,000 acres, including the City of Goulburn.

Climatic Conditions.—The temperature tables in the report furnished by the Committee were obtained from the Government Astronomer.

Situation of Site.—The 100 mile radius from Sydney would be measured from the nearest boundary of the City of Sydney. Had discussed the matter with the Chief Surveyor, and it was agreed that the measurement should be so made. According to the charting, not more than 5 acres would be included in the proscribed area. Handed in a report prepared by him under the several headings of the Commissioner's circular.

Range and Mean of Temperature during each Quarter of the Year, beginning with January.—Produced return under this head, comprising information obtained from the Government Astronomer.

Altitude, &c.—Produced document showing the mean of various altitudes about Goulburn, prepared by Mr. Sheaffe and himself.

Rainfall.—Produced Table of Rainfall at Goulburn for each quarter for twenty-nine years, obtained from the Government Astronomer.

Accessibility.—Produced document compiled by himself, showing distances of the proposed Federal Capital by land and sea from the various Capitals of the Colonies—those by sea computed from Sydney. The distance, Goulburn to Melbourne, *via* proposed Cooma-Bairnsdale line, is given.

Range and Mean of Temperature during each Quarter of the Year, beginning with January.—Resident in district thirteen years. Produced summary of his own records of temperature for last ten years, being copy of those supplied the Government Astronomer. The mean observations of temperature were furnished him by the Government Astronomer. As to range of temperature on one day, 25th May, 1891, which was physically a severe day, the maximum was 94 degrees, and the minimum, 30 degrees; and, again, in the same month, the maximum was 94 degrees, and the minimum, 32 degrees. During the last ten years temperature getting more equable, and the range gradually diminishing. In 1892, the greatest range was 42 degrees on two days; in 1893, greatest range, 63 degrees; in 1894, 54 degrees; in 1895, 47 degrees; in 1896, 50 degrees; in 1897, 46 degrees; in 1898, 44 degrees; in 1899, 44 degrees. The mean daily ranges for the whole year were as follow :—

1891	...	29.89 degrees.	1894	...	24½ degrees.	1897	...	21 degrees.
1892	...	25 "	1895	...	20½ "	1898	...	20 "
1893	...	25 "	1896	...	25 "	1899	...	19½ "

Highest shade temperature during above period, 108 degrees, on 7th February, 1894; and lowest in same time, 20 degrees, on 24th July, 1892, and on 10th and 30th July, 1895. Considered the weather is changing all over Australia; not so hot in summer, not so cold in winter.

Altitude.—Had made notes as to altitude on return. His own place was about 20 feet above Yarra Platform, which is 2,231 feet above sea level.

Rainfall.—Kept the rainfall records. That produced from the Government Astronomer is practically the same as his, except that his record was only for ten years.

Climatic Conditions.—Resident of Goulburn thirty-seven years. District eminently qualified, climatically, as the Site for the Federal Capital. No more healthy climate in Australia. Only 56 miles from the sea; hence gets sea breeze in summer, making the nights cool. Heat considerable at midday in midsummer owing to clearness of atmosphere, but generally followed by cool nights.

Accessibility.—Goulburn possesses great facilities of access by rail. Situated on Main Southern line, between the two principal capitals of Australia, less than fourteen hours journey from Melbourne, and less than four hours from Sydney. Goulburn to Brisbane, by rail, 857 miles; and to Adelaide, 924 miles. To Hobart, *via* Melbourne, 852 miles; thus nearly equi-distant from the three outside Capitals—Hobart, Melbourne, and Brisbane.

Water Supply and Catchment.—Principally a question of storage. Present water supply of Goulburn a pumping scheme. An abundant supply obtainable at moderate cost. A weir could be constructed at several places on the Wollondilly River, and a sufficient supply impounded for a large population, which could be supplemented, if necessary, by resorting to the Mullwarrie Ponds. A dam could also be constructed at a small cost on Sooley Creek, a few miles from Goulburn, which, according to Mr. Clark, C.E., would impound 69 million gallons of water, which, if the Wollondilly supply ran short, could be run off by gravitation. It would not command the highest part of Goulburn; it would have to be pumped. The catchment area of Wollondilly, Mulwarrie Rivers, and Sooley Ponds is about 515 square miles, compared with 354 square miles catchment area of Sydney Water Supply; said to be ample for a million people. The rainfall on the Sydney catchment is 61 inches, while that of the Goulburn is about 28 inches, though over an extent of country in the catchment area the rainfall is much greater. By comparatively small outlay a weir could be erected across the Wollondilly below its junction with the Mulwarrie, which would throw water back above the city.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Goulburn suitably situated in this respect. Marble and slate in abundance. Lime a special article of export. Good stone for building purposes; evidenced by the two Cathedral churches in Goulburn. Clay for brickmaking in unlimited quantities. Valuable deposits of fireclay. Proximity to Sydney renders cost of carriage of building material comparatively light.

Ownership and Value.—Private lands, 61,750 acres; Crown lands, 1,000 acres; reserves, 1,250 acres; total, 64,000 acres. Estimated value unimproved private lands outside municipality, £2 10s. per acre; with improvements, £3 10s. per acre. Unimproved value of lands inside municipality, £378,000—excluding Crown lands, public parks, reserves, or lands vested in Borough Council. Value of same lands as improved, £560,000. These valuations are based on the municipal assessment, and outside that on his knowledge of sales.

Facilities for Food Supply.—Large quantities of produce grown in surrounding districts, especially, Taralga, Crookwell, and Gullen. Soil and climate admirably adapted for fruits. Cereals extensively grown. Dairying is extensively carried on, and increasing every year.

Minerals.—

(Witness corrected his evidence later, and valued land inside municipality, with improvements, at £676,737.)

Augustine Matthew Betts, solicitor.

Minerals.—Coal of good quality at Bundanoon in large deposits.

Capacity to support a considerable Population.—Within a radius of 50 miles, capable of supplying a large city with food of every kind. Sydney, as a source of supply in case of necessity, was within easy distance.

Conditions favourable to Commercial and Industrial Development.—Goulburn a large and important centre. Large business transacted at Post Office. Quoted statistics as to number of postal notes, money orders, postage stamps, &c., issued.

Water Supply and Catchment.—Was delegated to examine the water supply and catchment of the proposed Site for the Federal Capital at Goulburn. Examined it during three days early in April, and was accompanied by the person appointed by the Committee to point out their proposed sources of supply. (Admitted at this stage that Goulburn would be a fair datum for the Site to be supplied with water.) Read his report. (Exhibit L.) Possible to combine three sources of supply, viz., Sooley Ponds, Wollondilly, and Mullwarrie Ponds. If combined, pumping would be necessary; not sufficient elevation for gravitation. The Wollondilly, at Woore's old mill, alone, would permit of gravitation. It is about 50 feet above the present reservoir site, and about 190 feet higher than the main street of Goulburn. By going further up the river you could get a higher fall. Sixteen or 17 miles of piping would be required. The foundations are good, but the river does not open out much; but a weir 20 to 40 feet high and $\frac{1}{4}$ mile in length could be built; but the storage with one dam would not be sufficient. Estimated cost of supply £60,000 or £70,000, not including reticulation, allowing 30 gallons per head. That is the only gravitation scheme available. Heffernan's Creek is, perhaps, a little higher, but the storage accommodation is inferior. It would be possible to augment the Wollondilly gravitation scheme from Heffernan's Creek. The Baw Baw pumping scheme could also be increased by it. Baw Baw has a much bigger catchment, and would cost less than his scheme, taking the capital cost into consideration, but with a population of 40,000 would not cost much less. He did not see any place for developing higher power for electric traction, &c. Mullwarrie Ponds are only suitable for a supplementary supply. It is not a good catchment. It is big; but flat.

Water Supply and Catchment.—Last summer, driest on record in Goulburn for many years. Ran out of water in January, 1899. Town supplied from two waterholes on Wollondilly and Sooley Creek for ninety-two days—about 200,000 gallons a day. Most water obtained from the Sooley Creek waterhole, which was fed by springs, which ran more as the weather got drier. The Government sent an officer who reported that a dam erected below junction of Sooley Creek and Wollondilly River, at cost of £2,000, would impound 48 $\frac{1}{2}$ million gallons, which would supply Goulburn 140 days, or 240 days with present supply. Present weir will supply 10,000 people, and the Sooley Creek weir, 12,000. The Baw Baw weir would supply 40,000, and the Upper Wollondilly, 70,000; total, 132,000 from the four schemes. Did not think Mr. Blomfield's scheme involved excessive expenditure; but thought if he went higher up Wollondilly, he would have got a higher fall. The river rises near Crookwell, which is 1,000 feet above Goulburn. Thought Mr. Blomfield's estimated cost of weir (£70,000) high, comparing it with estimated cost of weir by Mr. Wade.

Nature of Soil.—Master of College, fourteen years. Frequently examined district soils, both chemically and mechanically. Silurian shale weathered down to clay soils exists; also extensive sandy areas (decomposed quartzites) and those derived from limestone. West and north of Goulburn are red and chocolate soils of volcanic formation; this might be one-fourth of the area. There is very rich soil, capable of successful cultivation, connected with the two rivers, Mullwarrie and Wollondilly, and extending $\frac{1}{4}$ mile from their beds. Granite no nearer than Marulan; no slate; there are very hard shales.

Drainage could be readily established owing to natural formation of country.

Climatic Conditions.—Practising in Goulburn eighteen years. Climate very healthy; only four medical men in the place. Population of Goulburn and district, 12,000. Average length of life not known as there was no local health officer and no statistics kept. District not subject to epidemics. Had influenza and typhoid; but they were not epidemic. Tuberculosis had occurred; but the cases came from Sydney. No diphtheria. Consumptives were sent to Goulburn for the dry and healthy air. Heat apoplexy was almost unknown.

Produced statement, copied from official records, showing death rate for a period of five years, based on a population of 10,000 for the city of Goulburn. The return included deaths in the hospital, which were largely from the surrounding district.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Practising in Goulburn twenty years. Nearest freestone at Marulan, 20 miles distant; also stone at Bundanoon, 30 or 40 miles distant. Plenty of marble of good quality about the district; some within 20 miles. Slate for flagging in the Cookbundoon Ranges, also at Kerrawarry. Sand and lime plentiful. All the materials for Portland cement. Produced copy of paper he had written on the limestones of the district. Bricks are manufactured locally, also fire bricks. No timber suitable for building. Hardwood obtainable about Wingello. Foundations relatively good; the subsoil, largely ironstone, gravel, or clay. The western portion of the area chosen for the Capital Site is very suited for building.

Drainage.—Goulburn capable of good drainage. No special difficulty in sewerage. Drain pipes are made locally.

Other Physical Features.—The existence of Goulburn would not be a disadvantage; it is the making of a very fine city. No objection to its conversion into the Federal Capital. It would be a great advantage in laying out a Federal City adjacent to it. The natural features of the Site chosen are good, and would be satisfactory for the laying-out of parks, domains, plantations, &c.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Resident over thirty years. Engaged in stone cutting twenty-five years or more. First-class freestone obtainable at Marulan and Bundanoon; granite within 3 or 4 miles; marble at Kingsvale, Marulan, Longreach, and Wandellima; limestone in large quantities close to the town; slate at Kerrawarry and Cookbundoon. Bricks, in all colours, made locally.

Forty years in district. Freestone, of first-class quality, obtainable within 3 or 4 miles of Goulburn. Soft, when taken out, but hardens on exposure. Bluestone in inexhaustible supply within 3 miles. Blue granite in the town, also granite at Pomeroy and Woolloogorang. Marble of different colours at various places. Plenty of slate for roofing and building about 25 miles distant. Limestone nearly everywhere. No better bricks in the Colony. Mountains of fire-clay. Abundance of gravel and sand in the river bed. Subsoil clay, then shale. The clay is impregnated with ironstone, and makes good foundations.

Frederick Durham Badgery, grazier.

Climatic Conditions.—Resident of Lake Bathurst. On and off, in district forty years, but regularly for last sixteen years. Goulburn second to no climate in New South Wales, in regard to healthiness. Nights very cool; hot nights rarely occur.

Accessibility.—With the 100 miles limit, did not know any place so suitable for the Federal Capital as Goulburn.

Nature of Soil.—Large proportion of very good soil, with good clay underlying, which, if dug or trenched, would be very productive.

Ownership and Value.—Unimproved value of proposed area outside Municipality, £2 10s. per acre; with improvements, £3 to £3 5s. per acre.

William Sands, stock and station agent.

Ownership and Value.—Came to Goulburn, 1853. Was local valuer for the Land and Income Tax Department. Outside the Municipality, he assessed the unimproved value of the land at £3 per acre; with improvements, about £3 10s. per acre.

Conditions favourable to Commercial and Industrial Development.—Goulburn admirably adapted for establishment of killing and meat chilling works, owing to its railway facilities, climate, and being a large stock centre.

William Henry Wheatley, auctioneer.

Ownership and Value.—Native of district. Valued the land outside Municipal boundaries as unimproved at £2 10s. per acre, and improved, £3 to £4 per acre.

Alfred Ernest Stuart, journalist.

Facilities for Food Supply.—Capable of supporting a large population. Goulburn's position as second inland city of the Colony due to great pastoral and agricultural resources of surrounding district. Wheat and potatoes two main agricultural products; but oats, maize, barley, rye, sorghum, pumpkins, &c., grow almost anywhere. Dairying an important industry in Argyle. Last year 37,000 head of dairy cattle in district, and 5,000 to 6,000 pigs. Large export trade in fruit.

Russell Edward Conolly, flour-mill manager. Exhibit N.

Conditions favourable to Commercial and Industrial Development.—Thirteen years in Goulburn. Produced return for ten years to 30th June, 1899, of revenue of Goulburn Railway Station, giving number of tickets issued, revenue from tickets and coaching traffic, inward and outward tonnage of goods, coal and other minerals, wool, hay, straw, &c., and live stock. The Return is compiled from the Annual Report of the Railway Commissioners.

William John Bartlett, brewer.

Climatic Conditions.—Twenty-six years in Goulburn. Found the climate excellent, health-giving, and invigorating. Evenings, in the hottest season, cool and refreshing, the sea breeze invariably setting in at the close of a hot day.

Nature of Soil.—Surface soil of fair quality. Subsoil of stiff clay, impregnated with ironstone thick enough to withstand immense pressure and ensure solid foundations.

Water Supply and Catchment.—The Wollondilly and Mullwarrie offer facilities for weirs at many places at small outlay, impounding practically unlimited supplies of water. The Murrumbidgee could be tapped at Bredbo or Micalago. The natural watershed of the Wollondilly and Mullwarrie is about 500 square miles.

Drainage.—Surface well adapted for perfect system of drainage, at comparatively low cost.

Other Physical Features.—Contour of surface formed by a series of lightly-timbered, undulating, and gently sloping hills, admirably adapted for building purposes. Climate and soil favour cultivation of English ornamental plants and shrubs, with a more rapid and vigorous growth. Close proximity of Lakes George and Bathurst and the Mountains.

Facilities for Food Supply.—All kinds of fruits common to the temperate zone. Cereals, root crops, and fodder plants.

John Cole, farmer and grazier.

Facilities for Food Supply.—Forty-six years resident in district. Engaged in farming and grazing all his life. Products of district: wheat, corn, oats, potatoes, barley, rye, lucerne, apples, cherries, apricots, plums, quinces, and almost every kind of vegetable. His land, some 200 or 300 acres, a fair sample of the land suitable for cultivation in the proposed Federal Area. His average crops were:—Hay, 2 tons to the acre; wheat, 35 bushels to the acre; barley, about 50 bushels to the acre; potatoes, 6 tons to the acre (saleable). Dairying one of the main industries of the district. Number of large factories in district, and considerable output of butter. Stock fattened in district bring highest prices in Sydney market.

Alexander John Wares Manson, fruit-grower.

Facilities for Food Supply.—Engaged fruit growing in district about seventeen years. Very suitable for cool-climate fruits. Apples, pears, cherries grow remarkably well. The quality of fruit is very good. Good grapes can be grown. Several of the prizes for the best orchards in the Colony came to the district.

George Henry Sheaffe (re-called)

Ample facilities for getting food into proposed territory from surrounding districts.

Drainage.—The conformation of the land on which Goulburn is built is very favourable for the construction of street sewerage.

Joseph Longmore Henderson, inspector of stock.

Facilities for Food Supply.—Produced return of stock sold at Goulburn Saleyards during fifteen years. It represents about one-quarter of the number of stock yarded. The number of stock depastured in the Sheep District of Goulburn for the year ending 31st December, 1899, is: Sheep, 404,000; cattle, 36,874; horses, 7,654; pigs, 5,000. Goulburn would be one of the best sites for slaughtering and chilling.

Exhibit R.

Abram Orpen Moriarty, late Chairman, Goulburn Land Board.

Climatic Conditions.—Chose Goulburn fifteen years ago as the most suitable residence for himself and family. Climate not excelled by any part of Australia, if any part of the world. Range of temperature moderate. District healthy, fruitful, and, as a Site for the Federal City, unrivalled.

ORANGE SITE.—Summary of Evidence taken at a Public Inquiry held at Orange on 22nd, 23rd, 24th, 26th, 27th, 28th, and 29th March, 1900.

Climatic Conditions.—Put in return from Government Astronomer (marked "Exhibit A"). Orange was not, as a rule, subject to sudden and violent changes. Such changes were very rare in summer. The temperature might fall 20 degrees or more. The evenings in summer were generally cool, whilst the heat was never humid or oppressive. The winters were very cold, but the cold was remarkably dry and not dangerous to health. Orange was largely used as a sanatorium, chiefly for pulmonary complaints.

George De Vial
Pilcher, resident
of district for
twenty-five
years.

Altitude.—The average altitude of the proposed territory is 3,200 feet above sea level. The Canobolas Mountain is about 4,500 feet, and the Railway Station at Orange 2,843 feet, above sea level. A great deal of the proposed Territory is much higher than the Railway Station, and some of it is lower.

Rainfall.—The figures (Exhibit A) were obtained from the Government Astronomer, and comprise twenty-seven years' records, showing a fraction over 39 inches per annum.

Accessibility.—Had been twenty-three years in Orange District, and nineteen years Station-master there. Orange Railway Station is 192 miles from Sydney and 481 miles from Melbourne *via* Harden-Blayney connection. From Adelaide, *via* Melbourne and Harden-Blayney, it is 900 miles. A line from Broken Hill to Menindie and Cobar to Wilcannia would considerably lessen the distance to Adelaide. From Brisbane, *via* Sydney, Orange is distant 915 miles by existing lines; but this distance will be reduced to 625 miles if the proposed Werris Creek and Wellington Junction is carried out. Access to Orange by road is also obtainable by the Great Western Road, *via* Bathurst; also *via* Young, Cowra, Carcoar, and Blayney. There is also the North-western Road through Wellington and Bourke to Queeneland.

Fred. Richardson,
Railway
Station-master,
Orange.

Miscellaneous Conditions.—Produced return of products of the district exported by rail for a period of ten years. Exhibit C.

Orange was largely used as a health resort. His position as Station-master gave him ample opportunity of knowing that sometimes in summer it was difficult to obtain accommodation for all the visitors. People came there from all parts, and benefited greatly by the change. Fruit of all kinds, and of a most superior character, was produced in the district. He was a practical fruitgrower himself.

Physical Conditions.—Had thirty years practical experience in Orange and district. He was at present Town Surveyor.

John Hale,
architect and
surveyor.

Stone.—Basalt of good quality was very plentiful. Sandstone could be found in several quarries in the district, and there were several deposits of limestone. Marble suitable for mantelpieces was obtainable, also slate, whilst granite suitable for building purposes could be obtained near the town. Every variety of clay could be got, and bricks could be made anywhere in the district. Very little gravel, but good sand for building was available.

Timber.—Cypress pine from Parkes, ironbark from Dubbo, mountain ash, stringybark, and box from the Canobolas. Hardwood was obtainable from the coast, but Oregon timber was mostly used locally.

Nature of Soil.—Had been a storekeeper and farmer, and was familiar with the various soils in the proposed Territory. The soil was principally red volcanic, varying in quality, and suitable for the growth of cereals and potatoes, and generally good for farming. It had been largely cultivated since 1862. The land could produce 25 bushels of wheat to the acre, and a large area of it was suitable for fruit-growing. It was more suitable for wheat than oats, and very well suited for barley. Potatoes thrive very well. They had never had a total failure of crops in the district.

George Hawke,
resident of
Orange forty-
three years.

Capacity to support a considerable Population.—The district itself would grow sufficient cereals to support an additional population of 40,000 people. Had not seen a portion of the Colony which would better carry a large population. The soil stood a long time without manuring. Dairying was not successful, as the winters were severe; but sufficient dairy produce was procurable to supply the district.

Ownership and Value.—Orange was a Borough of 640 acres. The total unimproved value of the land, including reserves, was £157,381, and the improved value was £461,225. This valuation is exclusive of the Borough of East Orange. He produced return showing number of live stock sold through the Municipal Sale-yards at Orange during the last five years.

Francis James
Mulholland,
Town Clerk of
Orange.

Exhibit E.

Conditions Favourable to Commercial and Industrial Development.—Had been a storekeeper in Orange for twenty-five years, and had opportunity of judging of capabilities and potentialities of the district. Orange was a great centre of supply for farm produce for adjoining districts not so well favoured. The climate of the district was suitable for the establishment of various industries, and was especially favourable to factories. Goods could be stored that, in other climates, would perish. Orange was an emporium for stock coming from other districts, and was a central place of sale. It would be a very suitable place for killing and freezing of stock, and the district could produce sufficient of its own stock for the purpose.

James Bonnor,
storekeeper.

Conditions favourable to Commercial and Industrial Development.—Had been Member of Parliament for the district, and had ample opportunities of knowing the district's capabilities. Large quantities of farm produce were exported from the district. There had been no failure of crops for forty years. All British fruits grow in profusion. The town of Orange was a large business centre, and the most progressive town in the West. A large amount of business was done with mining townships in the vicinity, and a great number of people periodically visit the town. There were great facilities in the district for the establishment of various industries.

James Torpy,
resident of
district for over
thirty years.

Drainage.—Orange is admirably situated for easy natural drainage. The present drainage is into Summer Hill Creek, and thence into the Macquarie River. The existing methods are satisfactory, except, perhaps, the open drain in the town, which the Municipality intend to cover in. By a series of concrete water-tables, this town could be made one of the cleanest and sweetest in the Colony.

Other Physical Features.—There are vast deposits of limestone close to the Railway Station, and in the district some of the finest marble in the world. There were plenty of flagstones of sedimentary rock, whilst the locally made bricks are equal to anything in Australia.

Ownership and Value.—Had been an auctioneer in the district for twenty years, and had a large experience of land values within the proposed Federal Area. Excluding the Municipal area of Orange, he would value the land at £2 per acre all round, unimproved. The same land, as at present improved, he valued at £5 per acre. Had sold a good deal of land in the Area. It mostly consisted of small farms, averaging 200 to 250 acres.

James Stuart
Leeds,
auctioneer.

Facilities for Food Supply.—Orange is a great emporium for stock, and the chief centre for sale in the Western Division. The natural grasses of the district are fattening. The district is a good pastoral and agricultural one.

Miscellaneous

Henry Augustus
Crouch, District
Surveyor.

Miscellaneous Conditions.—Had been District Surveyor at Orange for eighteen years, and had been familiar with the district for twenty-eight years. Produced a plan prepared by him of the district and proposed Federal Territory. The plan included an area of 64,700 acres. If it should be extended, he would agree to the north-western extensions shown on tracing supplied by the Orange Federal League. He thought the town of Orange should be included; if not, the Federal Territory should not extend north of Orange. If the capital were built 7 or 8 miles from Orange, it would depreciate the value of property in Orange, but the district would not suffer. If the town were resumed, there would be no escape from the value of improvements, but the cost of resumption could be avoided by building the new City alongside the present town; but he thought it would be better to resume the town, and pay the cost. He did not know of any better Site in the district than that proposed.

Water Supply.—The Site commanded the best water supply within a radius of 20 miles. He thought the Forest Site would be objectionable for a city on account of having no railway communication. It could get a good water supply, but it would be more expensive. Mandurama would be a good Site for a city; the railway passes there. It lacks elevation, and is not so central as that proposed. The Orange Site has a purer water supply than the Mandurama Site. The latter would get all the Blayney drainage. He estimated the various catchment areas as follows:—Gosling Creek, 4,500 acres, and if Brandy Creek were added, 6,100 acres; Devil's Hole Weir would have a catchment of 2,240 acres. That is Mr. Clark's scheme. The creek at Devil's Hole has never been known to cease running. The weir would be 350 feet above Orange, and the water is singularly pure. According to Mr. Clark's scheme, the dam would be 325 feet long, and 62 feet high, with an available storage capacity of 100,000,000 gallons. The formation is basaltic. A very good scheme could be adopted for water supply for the Forest district proposal if the Federal City were located there; but he did not think he could choose a Site there equal to the Orange proposal. The map prepared by him showed all the sources of water supply, the present reservoir for the town, and the approximate watersheds of the various creeks.

Drainage.—If the Capital be at Orange it would have a fair site for drainage into the Macquarie River, and the flat land to the north-east of the town could be used as a sewerage farm. It is porous, absorbent soil.

Other Physical Features.—If the Site of the Federal City was to be an expansion of the present town of Orange, it would be best to the south. The cost of resumption would be small by going that way. The proximity of the existing town would be an advantage at the outset in accommodating the builders of the new city. There would be no objection to Orange forming part of the Federal City, as regards its laying out, though it is not a modern city; still, it has good wide streets, $1\frac{1}{2}$ chains wide, and good building sites exist to the north of the town. There is, however, country between the town and the grants to the south, which would practically be a clean sheet. It would include the Common, about 1,000 acres, and the site for the Lunatic Asylum, about 400 acres (1,400 acres of Crown land), and the two adjoining sections are very lightly improved.

Ownership and Value.—The proposed territory embraces 10,850 acres of Crown lands. As District Commissioner of Taxation, he was able to state that the unimproved value of the land in the area, for taxation purposes, was £127,303, excluding Crown lands. That valuation is for 1895. It might be 10 per cent. higher now. The improved value of the same lands was estimated at £365,000. With Municipal valuation, the total amount would be £1,020,000. This does not include roads. The alienated lands in the Gosling Creek watershed amount to 4,212 acres, valued at £19,000, as improved. The additional Brandy Creek watershed contains 1,154 acres of alienated land, which, with improvements, is worth about £5,000. There are 210 acres alienated above Devil's Hole weir, worth about £600. A weir put in at north-east corner of portion 84, parish of Towal, on Meadow Creek, would have a watershed of about 3,200 acres, worth £8,000, as improved. The Site for the Capital, shown on map by red hatched lines, includes about 1,650 acres of alienated land, worth, as improved, about £27,000, and about 1,200 acres of Crown land. These values are on a freehold basis, but a larger area of the land is conditionally purchased.

Charles Edwin
Blomfield, Civil
Engineer, Water
Conservation
Branch, Depart-
ment of Public
Works.

Water Supply.—Had ten years' experience in New South Wales and eighteen months in Victoria in connection with water supply. Examined the various catchment areas in connection with the proposed Federal Capital Site, near Orange, all being within the proposed Federal Territory. The district water resources were sufficient for a population of 40,000 people in the near future for domestic purposes, but not for electrical power. Examined the localities in company with the Mayor of Orange, beginning with Spring Creek, which he considered of no value as a water supply, the catchment being nearly all alienated cultivated land with deep soil, with only one possible reservoir site, which was hardly high enough to give sufficient pressure. Spring Creek could be eliminated from consideration without loss. Gosling Creek, which supplies the present reservoir, was next examined. It has an effective catchment area of 7 square miles, nearly all alienated and under cultivation. The present reservoir has an effective capacity of about 90 million gallons, allowing for soakage and evaporation, but could be enlarged and a supplementary reservoir placed in the creek above it. Brandy Creek could be utilised, adding a further catchment of 2 square miles, and there would then be a supply for 20,000 people at 30 gallons a day. Molong or Meadow Creek, the site of Mr. Clark's proposed weir, was next examined. It is too high up, the catchment is small, and would throw the water only a short distance back. Lower down the creek a larger catchment and a better storage reservoir could be got. A reservoir at Devil's Hole would have a drainage area of 1,600 acres according to Mr. Clark. This Site has decided advantages, as it drains the highest parts of the Canobolas, has a steep rocky catchment of volcanic basaltic formation, and the catchment area is largely Crown land. He did not take the elevation of the Devil's Hole site, nor its height above the present reservoir. A dam about a quarter of a mile long would be required above where the Molong Railway crosses the creek. It would have to be higher than the present dam at Gosling Creek to store a greater volume of water; but if it was the same height as the present reservoir, it would store about 140 million gallons. The effective catchment area above the site would be about 8 square miles, including 1,400 acres of Crown lands, and the site would be about 100 feet above the Railway Station, at a point about a mile above the railway line. The fall in the Creek is about 100 feet to the mile for the first few miles above the railway, and the water particularly clear and pure. A service reservoir in connection with this site could easily be obtained. For the reasons stated, I consider the Meadow Creek the best source of supply. Taking a rainfall of 20 inches per annum, with a loss of one-fifth, a supply of 460,000,000 gallons could be obtained. The water would have to come about 5 miles to the town of Orange, and would be sufficient for all domestic purposes for a population of 40,000 people. On a second visit to the site, he took barometrical readings, which confirmed his opinion that the site was over 100 feet above the town of Orange.

Minera

Mineral Products.—Had been in charge of underground operations in the Wentworth Proprietary and Aladdin's Lamp Mines at Lucknow, 6 miles from Orange, for some years. Extensive gold-mining operations had been carried out there for some years. There had also been gold-mining in the Ophir and the Forest districts. Silver and copper are found at Lewis' Ponds, 16 miles, and Byng, 11 miles, from Orange. A copper-mine on a large scale is being worked at Blayney. There are sufficient mining capabilities in the district to employ a large population.

Building Material.—At Caloola, extensive marble deposits; at Beneree, black marble, on the common basalt, in unlimited quantities; on the eastern slopes of the Canobolas, flagging stones; and, at Rosedale, limestone in unlimited quantities.

Water Supply.—Produced plan of present reservoir, and analysis of water in Meadow Creek. The available supply in the reservoir is 125,000,000 gallons, according to plan, but 18 inches have since been added to the height of the wall, giving an additional 20,000,000 gallons. The total depth is 25 feet, but the capacity given is taken from a depth of 16 feet. The analysis shows no deleterious matter in the water.

Estimated Value of Private Lands unimproved.—The estimated value in the Borough for the present year is £78,783, or with all improvements, £178,909.

Rainfall.—Produced rainfall records. During fifteen years, from January, 1885, the lowest annual rainfall was 20.63 inches in 1888, and the highest 53.72 inches in 1887.

Climatic Conditions.—Had fifteen years experience of the district. Considered the climate very good, but rather severe for two or three months in the year.

Accessibility.—The Site chosen, so far as climate, water supply, drainage, &c., is concerned, is as good as could be found in the Western District; but as regards railway communication, he thought a better Site could be obtained on the Southern lines.

Climatic Conditions.—Had been practising in Orange ten years. The climate is healthy, atmosphere comparatively dry, bracing, invigorating, and salubrious. The temperature fairly even, the exception being when a heat wave is over the Colony generally; but even then the heat is not continuous—at most not more than three or four days—and the nights invariably cool. Changes are not rapid. You might get a fall of 20 degrees to 30 degrees, but they caused no ill effects. The winters for the last four or five years were very mild; the cold is dry and bracing. Orange is recognised by the profession as one of the best places to send pulmonary patients to. Typhoid occurs, most of the cases coming from East Orange, where they obtain water from wells.

Drainage.—Did not consider Orange properly drained, but that was a common fault with country towns. The drainage of the proposed Site would be good.

Facilities for Food Supply.—Had twenty-seven years business experience in the Orange district, and had been engaged in the chilled meat industry. It could be revived in Orange, which should be a suitable depôt for receipt of live stock and despatch of killed and dressed meat. 250,000 sheep in carcase could be sent to Sydney if proper freezing works were established here. Within a radius of 50 miles of Orange, sufficient meat could be obtained to support a population of 40,000.

Facilities for Food Supplies.—Had thirty-five years' experience of Orange, and was resident of the town for the greater part of that time. Was one of the original proprietors of the old Orange Freezing Works, now defunct. From his experience of that enterprise, the chilled meat industry, if again started in Orange, would be a great success, and enough stock could be raised, within a radius of 50 miles of the town, to supply a population of 40,000 people.

Proposed Name of Territory.—Mr. Crouch suggested as an appropriate name "The Canobolas Territory." Mr. Stobo suggested that it be called "Chamberlain."

QUEANBEYAN SITE.—Summary of Evidence taken at a Public Inquiry held at Queanbeyan on 11th June, 1900.

Initiation of Committee.—Formerly Mayor of Queanbeyan. At a public meeting a Committee was appointed to collect information in furtherance of Queanbeyan's claim to be the Federal Capital. He was appointed Chairman, and the Report furnished was carried out by resolution of the Committee.

Climatic Conditions.—Twenty-two years in district. Regarded it as very healthy. Temperature changeable, but unless a thunderstorm occurred the fall was not material. Never had it 100 degrees shade, followed by frost. Cases of heat apoplexy occurred chiefly on the plains. Typhoid more prevalent this year than for seven or eight years, owing to the five years' drought. Measles and influenza had occurred, but they are independent of climate. Diphtheria had also occurred, owing to insanitary causes. The climate was conducive to longevity. Residents of the district upwards of 80 and 90 years of age could be met. Most death certificates given by him were either for very young or very old people.

Water Supply.—At present from underground tanks. Sometimes in the summer the river water is used.

Drainage.—The surface drainage of the town is not good. Cesspits are used for nightsoil, and the surface drainage goes into the river.

Climatic Conditions.—Practising at Queanbeyan ten years. Produced Return showing number of births and deaths in Registry District of Queanbeyan. District a pleasant, healthy climate, free from endemic disease. Most deaths caused by diseases prevalent everywhere. Perhaps pneumonia more prevalent than elsewhere in Australia, on account of the cold climate; but the mortality from other diseases being comparatively low may make pneumonia seem more prevalent. Had practised in other country districts, and thought Queanbeyan the healthiest district he had ever been in. Did not think people had to protect themselves more from chills than elsewhere. There might be one or two nights in the summer when sleep is difficult on account of the heat.

Drainage.—The present sanitation of Queanbeyan was unsatisfactory. There should be no trouble with the drainage. The soil is of a character suitable for filtration if it was decided to treat sewage that way.

Climatic Conditions.—Put in returns obtained from the Government Astronomer, giving particulars of temperature, also rainfall, for a period of twenty-nine years. That showed the average annual rainfall to be 23.55 inches.

The altitude of Queanbeyan, also given by the Government Astronomer, is 1,899 feet.

Accessibility.—

Frederick William Moppett, underground mining superintendent and licensed surveyor.

Charles James Smith, Mayor of Orange.

William Ernest Bouffier, Council Clerk, East Orange.

Edye Hayes Stobo, land agent, and Secretary to the Orange Federal Capital Committee.

Charles Edward Finch, Chairman of Local Land Board.

William Keltie, medical practitioner.

Henry William Larence, butcher and cattle dealer.

John Charles McLachlan, solicitor.

William Pike, Chairman of Queanbeyan Federal City Committee.

Sydney Longden Richardson, Government Medical Officer at Queanbeyan.

Patrick Blackall, medical practitioner.

Theophilus Cox, journalist and Hon. Secretary of the Committee.

Accessibility.—The figures in the Report were prepared by him from various publications to which he had access, and were accurate, to the best of his knowledge and belief. Besides the railway, access was obtainable to Queanbeyan by steamer to Nelligen, and by road thence *via* Braidwood. Large quantities of goods came by this route. Nelligen was 60 miles distant by road; and Sydney, by road and water, 240 to 250 miles.

Nature of Soil.—Over fifty years in district. Had no geological knowledge of soil, apart from knowledge as a farmer. Was familiar with the proposed Territory. It is mostly light red soil, chiefly granite, nearly a foot deep. Underlying soil, rotten granite and clay. No volcanic formation. Some of the soil is deep red—a ferruginous soil. Should say the soil of district is a strong soil, which, with proper cultivation, would last a number of years.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Limestone, ironstone, and freestone.

Facilities for Food Supply.—He cultivated about 70 acres, but outside the proposed Area. His crops are wheat, oats, maize, and potatoes. Regarded the proposed Territory as chiefly pastoral, but if cut up into small areas of 150 to 200 acres would be suitable for agriculture and mixed farming, and would support a much larger population. It would grow sufficient wheat and other crops for a population of 40,000. Barley for malting could be grown. It is a good dairying country.

Altitude.—Resident of Queanbeyan for forty years. One of the observers for the Government Meteorologist in Sydney. Knew the altitude of the proposed Territory from the Railway Time-table and known elevations in the Area, such as Mount Ainslie, The Black Hill, Taylor's Hill, and the Mugga Mugga Range. The altitude in Report is a mean taken from these. Knew the proposed Area intimately. That selected as the Capital Site would be lower, if it is near or around Canberra Church. It would not be less than 2,000 feet.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Large deposits of sandstone contiguous to the Territory. Inexhaustible supply of freestone at the Black Hill. The spire of Canberra Church was built from these quarries. Limestone deposits, a large proportion of which is admirably adapted for building purposes. Slate in the neighbourhood of Stringy-bark Hill. Marble outcrops on the Queanbeyan River. Numerous pipeclays, suitable for delf. Material for concrete in the river.

Facilities for Food Supply.—Had grown nearly every species of English fruit in his own garden, and his table grapes had been awarded first prize for several years at Agricultural Show, Sydney. Had also taken prizes for honey.

Mineral Products.—The Cotter contains gold, silver, and copper. Iron outcrops are also observable in the proposed Area. District capable of great commercial and industrial development. Produced article written by him for the *Queanbeyan Observer*, the statements in which were true, to the best of his knowledge and belief.

Nature of Soil.—Native of district. Engaged in pastoral and agricultural pursuits. Knew the proposed Territory. The soil varied from the richest in the country to poor, consisting of alluvial slate formation, ferruginous, and decomposed granite, besides evidence of basaltic formation. There is a great deal of limestone. The district was originally called Limestone Plains. The soil, as an average, is fairly deep.

Water Supply and Catchment.—The Cotter River supplies water of the purest quality; it could hardly be contaminated, being in a rough country where farming could not be carried out. River not affected by drought. There is a collecting lagoon at its head largely fed by springs. The head of the Murrumbidgee would also supply pure water, and would give a good gravitation supply. The Queanbeyan River would be a third source of supply.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Blue granite, sandstone, limestone, porphyry, and slate. Unlimited clay for bricks, and excellent sand. Mountain ash within easy access, red box, messmate, and stringybark.

Drainage.—The proposed Capital Site would be easily drained. There is a fall in all directions.

Other Physical Features.—For foundations of heavy buildings, Site is suitable. Stone or clay is met a few feet from surface. Canberra Church, a heavy building with spire, shows no cracking. The foundations are in clay, 4 feet deep. Great advantages offered to sightseers. Site about 80 miles from Kosciusko, and in close proximity to Lake George. Great variety of climate in 30 or 40 miles of country. Within two hours of Tharwa Bridge a height of 5,000 feet can be reached.

Ownership and Value.—The proposed Territory, as a whole, with improvements, could be secured for less than £3 per acre.

Facilities for Food Supply.—Had known yield of 60 bushels of wheat to the acre in picked places. If Capital located on proposed Site, could be supplied with food of all kinds from a district of 30 or 40 miles radius for a population of 40,000. You could grow anything that can be grown in the south of England. The present yield of cereals could be increased 100 per cent., and the Site itself could be cultivated fifty times as much as it is at present. The grasses are remarkably fattening for sheep and cattle, and grazing at present pays best. The country carries one sheep to the acre; in very good seasons it would carry ten. Quinces, apricots, apples, peaches, loquats, gooseberries, and table grapes are grown, and wine has been made in the district. Malting barley has been grown. Dairying would succeed with increase of population.

Conditions favourable to Commercial and Industrial Development.—District very favourable for all manufacturing industries. Woollen manufactories, tanneries, fellmongeries, and iron manufactories should do well. With existing railway routes, the Site, commercially, was in favour of Sydney.

Climatic Conditions.—Left England at end of 1868 on account of consumption, and arrived in district 1869. Considered climate one of the healthiest in the world, being sufficiently warm without being distressingly hot, and the cold is not too raw, as it is sheltered from the cutting winds. Had gained in health and increased in weight since arrival in district.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Granite the principal building stone. Unlimited supply of limestone at junction of Cotter and Murrumbidgee Rivers.

Ownership and Value.—As a whole, and as improved, considered proposed Territory worth £3 per acre.

Facilities for Food Supply.—Lifelong resident of district. Knew proposed Territory. Thought it equal to any similar sized area he knew of in the Colony, and better supplied with water. Capable of carrying

Sampson Southwell, farmer.

John Gale, journalist.

Frederick Campbell, grazier (Yarrowhulmla).

William Farrer, Government Wheat Experimentalist.

Andrew Jackson Cunningham, grazier.

carrying one sheep to the acre all the year round. A large quantity of wheat could be grown. Fifty times the present cultivation could take place in the district. A city of 40,000 people established on the proposed Site could draw its supplies from the surrounding district with closer settlement. A first-class dairying district.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Any amount of stone; excellent granite and limestone. John Fitzgerald, farmer.

Facilities for Food Supply.—Farming for about ten years at Tuggernong and Naas. Had cultivated wheat, potatoes, &c., a great deal, and had been engaged in dairying, grazing, and pig-raising. The district averaged one sheep to the acre. There would be sufficient stock to supply a population of 40,000 with meat.

Water Supply and Catchment.—Resident and native of district, which, in vicinity of proposed Site, is particularly well watered. Accompanied Mr. Blomfield in inspecting the Cotter. The water is always clear and cold, and it runs through higher elevations than the Murrumbidgee. William Davies Wright, stock and station agent.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Large blocks of limestone at the Cotter River. Limestone, marble, and ironstone at Cuppacumbalong; also large deposit of superior limestone within a mile of Queanbeyan.

Ownership and Value.—Thought the value of proposed Territory would be fully £3 per acre; some of it worth more. Four thousand or 5,000 acres at Duntroon, excluding the homestead, worth £5 per acre.

Facilities for Food Supply.—A breeding district for cattle and sheep. It would be favourable place to establish freezing and chilling works for export. Crossbreds of large frame would grow here. Within a radius of 30 or 40 miles of proposed Site, you could support a population of 40,000 on meat and breadstuffs. Had seen 48 bushels of wheat to the acre realised on several occasions. Hops grow luxuriantly at Cuppacumbalong, and raspberries grow there in tons.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Had been Road Superintendent five years. Available stone in district for building limited to freestone or sandstone suitable for rubble work. Abundance of granite, which, with machinery, could be used for building. Very little basalt. Porphyry makes good road material, but had not seen it used for building. Had seen diorite at Captain's Flat. It is a disappointing stone for macadam. Limestone is good for road making; also hematite. Plenty of river shingle and clean sharp river sand. Had not seen marble in the district. Good clay for brickmaking was available. The principal timbers were red and yellow box, stringybark, messmate, and mountain-ash. Charles O'Hanlan, Road Superintendent, Queanbeyan.

Other Physical Features.—A couple of never-failing creeks (Jerrabomberra and Woolshed Creeks) traverse the Site, which could be utilised for ornamental purposes, artificial lakes, &c.

TUMUT SITE.—Summary of Evidence taken at a Public Inquiry held at Tumut on 11th and 12th May, 1900.

Climatic Conditions.—Resident of district, forty years. No record of range of temperature kept, as no official observer at Tumut. Highest temperature in his recollection 110 degrees; and the lowest on same day, 90 degrees. Average highest summer reading for ten years, 90 degrees, and lowest for same period 60 degrees. The highest autumn temperature averaged 70 degrees, and the lowest 40 degrees. Prevailing wind in summer easterly, in winter westerly and south-west. Had never known the winter temperature to be below 40 degrees at midday. The climate was very healthy, and the district free from epidemics. John Weedon, storekeeper.

Altitude.—Tumut is 930 feet above sea level.

Rainfall.—He kept the local records for the Government Astronomer. The average annual rainfall for a period of eleven years, commencing with 1889, is 33 inches. The average rainfall for each quarter of the year during the same period is:—1st quarter, 7.40 inches; 2nd quarter, 9.86 inches; 3rd quarter, 8.54 inches; 4th quarter, 7.17 inches. It will be seen that the rainfall is very evenly distributed over the whole year. The rainfall for the first quarter of the current year is 9.73 inches.

Accessibility.—Tumut is 310 miles from Sydney—by rail to Gundagai, and thence by road. It is 350 miles from Melbourne, 1,000 miles from Brisbane, and 810 miles from Adelaide. Gundagai, the present terminus of the railway, is 21 miles distant from Tumut. An extension of the railway has been recommended by the Public Works Committee. R. V. Kearney, journalist.

Nature of Soil.—Rich chocolate basaltic soil, with alluvial flats, very suitable for the growth of cereals and fruits. Undulating country. Within a 20-mile radius of Tumut there are 70,000 acres of rich chocolate soil, and 30,000 acres of rich alluvial flats.

Water Supply and Catchment.—An unending supply from the Tumut River. Catchment area almost unlimited, and ample facilities for storage.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Blue granite in unlimited quantities; marble, slate, limestone, in plenty. Clay suitable for brickmaking is found on the proposed Site, and sand and gravel are procurable in large quantities. Timber, including ironbark, pine, box, mountain ash, messmate, and urabbi, is within easy reach.

Drainage.—The physical conformation of the country made drainage an easy matter. Sewerage could be utilised on the farms, or destroyed by incineration.

Other Physical Features.—The proposed Site is in the midst of beautiful surroundings, the elevated portions affording good grazing. About 20 miles from the Site are the Buddong Falls, of 250 feet, on the Tumut River, which could be readily utilised as a motive power for electric lighting, &c.

Facilities for Food Supply.—Sufficient food stuffs could be grown in the district to support a population of 200,000. The average wheat crop is 25 bushels to the acre. Maize grows abundantly. There has never been a failure of crops. In the drought season, hundreds of thousands of sheep are sent from other less favoured districts.

Mineral Products (Gold).—The Adelong gold-field is one of the richest in the Colony. Chrome, iron, copper, silver, lead, tin, and asbestos are found in good quantities.

Conditions favourable to Commercial and Industrial Development.—The pastoral, agricultural, and mineral resources of the district were capable of supporting a large population, and the conditions were favourable to the establishment of almost any kind of industry, such as woollen mills, boot factories, tanneries, freezing works, &c. Facilities

William Bridle,
land owner.

Facilities for Food Supply.—Over forty-seven years resident of district. Tumut district premier maize-growing centre in Colony. He had raised from 80 to 100 bushels to the acre. Lowest average crop for the Tumut Valley was 50 bushels to the acre. Wheat averaged 25 to 30 bushels per acre. Some crops had gone over 40 bushels to the acre. Oats averaged 40 bushels. Root crops flourished. Tobacco was grown extensively a few years back. The district would easily supply a population of 40,000 with grain and breadstuffs.

Frederick
Kindred,
stonemason.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Twenty-three years in his trade at Tumut. Grey granite was the best building stone in the district. It was obtainable in large blocks, and worked very hard. Limestone, marble, and serpentine were obtainable in large quantities; also good flagging slate. Clay suitable for bricks, tiles, and pipes could be got.

H. W. Mason,
medical
practitioner.

Climatic Conditions.—Practising in Tumut sixteen years. District as healthy as any in the world; not subject to epidemics. Consumption was rare. He had treated cases, but they came from elsewhere. The climate is bracing and invigorating, with cool nights in the warmest weather. The district favoured longevity. Had only treated one case of sunstroke in sixteen years.

Facilities for Food Supply.—The soil is exceptionally rich, especially the valleys and flats. Had some experience in farming, and knew that maize varied from 50 to 100 bushels per acre. Had personally grown tobacco, obtaining 2,300 tons from 100 acres. District very favourable for dairying. The weather was never too hot. Had obtained 6 lb. of butter per head per week from seventy cows during last summer.

Capacity to support a Considerable Population.—The district could be self-supporting, if population increased by 50,000. Without calling on outside districts, they could supply foodstuffs to a population increased by that number. Mining was progressing, and would help to support a large population.

Alfred Henry
Chesterman,
District Staff
Surveyor.

Altitude.—Produced map of the proposed Territory. Considered the Site most suitable. The altitude of Tumut is 925 feet, and that of proposed Site from 1,000 to 2,000 feet; the average, roughly, about 1,300 feet.

Nature of Soil.—Generally granitic, with outcrops of basalt and volcanic rocks, and varied from alluvial flats to forest country, suitable for cultivation, and high ridges. Belts of limestone were in close proximity to the Site. The granite was a bluish grey. Slate formation existed in the north-east corner of the Territory, with slate outcrops on the eastern slopes.

Water Supply and Catchment.—There are three watersheds—Tumut River, Adelong Creek, and Sandy Creek.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Freestone quarries near Gundagai. Marble was obtainable in the higher portions of the Site. Granite is plentiful.

Ownership and Value.—The proposed Territory comprised 64,000 acres, of which 41,800 acres are alienated and 22,200 acres are Crown lands. He valued the alienated lands, as unimproved, at £151,000, made up as follows:—

41,000 acres country lands	104,000
300 " town "	37,000
500 " suburban "	10,000
As improved, £322,000, viz.—	
Country lands	172,000
Town "	125,000
Suburban "	25,000

Crown lands, including reserves, commons, &c., comprised 21,500 acres country lands, 300 acres in the town of Tumut, and 400 acres suburban lands, mostly within the Tumut Common.

W. H. Hilton,
Council Clerk.

Ownership and Value.—Excluding Government land, streets, and Church property, the value of land in the municipal area of Tumut is £112,000, as improved. The population of the Municipality is 1,439, and that of the Police District 4,170. The average annual death-rate of the Police District is 1·2 per cent.

Frank Taylor,
solicitor.

Climatic Conditions.—Had come to Tumut on account of his health. Had derived great benefit from the climate, which was inimical to pulmonary complaints.

Charles Edwin
Blomfield,
Resident
Engineer,
Department of
Public Works.

Water Supply and Catchment.—Had inspected the proposed Territory, with the view of reporting upon the facilities for Water Supply. Had taken the hill at Gadare as the proposed site for a storage reservoir. Had visited the Buddong Falls, from which water could be conveyed to the proposed Site by piping—about 20 miles. The Buddong Creek is a tributary of the Tumut River. A large part of its watershed is an extensive timber reserve of unalienated land. At the time of his visit a large supply of clear water was flowing in the creek. It was clearer water than that in the river. The falls are about 1,800 feet above the datum hill, and about 2,900 feet above sea level. There would be no difficulty in storage. Did not measure the discharge, but there was sufficient water flowing to supply 500,000 people. Without storage there was enough water to supply 40,000 people. The water could be carried to the Gilmore and down the valley. It could also be taken close to the proposed Federal Site without a dam being necessary. There was sufficient fall to generate electric power if necessary, and by going higher up the river a supplementary supply of large volume could be obtained by gravitation.

Alexander Davis,
farmer.

Facilities for Food Supply.—Produced samples of wheat and oats he had grown; the former averaged 42, and the latter 50, bushels to the acre. Excellent flour is made from the local wheat. Malting barley could be grown, also potatoes and maize. Grapes, apples, pears, and other fruits grow luxuriantly. Mixed farming was very successful in the district. Two first prizes offered by the Government for mixed farming were won by Tumut.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Timber suitable for all kinds of work are obtainable within easy distance of Tumut, comprising ironbark, pine, gum, box, mountain ash, messmate, and urabbi.

Clement Vernon,
builder.

Climatic Conditions.—Endorsed previous witnesses' testimony re climate. No better could be found anywhere.

Robert Donald-
son, Member of
Parliament for
the district.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Had experience as a bridge contractor. Within a radius of 15 miles from Tumut, mountain ash and messmate existed in inexhaustible quantities, measuring from 3 to 5 feet in diameter at the butt, and very little less at a height of 50 feet.

Capacity to Support a Considerable Population.—The district supplied the town with stock, and could, if necessary, raise enough to supply the requirements of 40,000 people.

WAGGA WAGGA SITE.—Summary of Evidence taken at a Public Inquiry held at Wagga Wagga on 17th and 18th April, 1900.

Initiation of League.—Was Chairman of the Committee appointed by public meeting called by advertisement, and presided over by the Mayor. The Committee is still in existence, and had prepared a Report, and had adopted plans prepared by him.

Constantine Francis Bolton, forty-one years resident of Wagga Wagga, and formerly District Surveyor.

Nature of Soil.—Granitic, with alluvial flats of rich quality along the river which get deeper as you go up river. Undulating chocolate soil away from the river. The Model Farm is typical of the soil of the district, which is as uniform as any district in the Colony. Soil not easily exhausted by cultivation.

Water Supply and Catchment.—Present town waterworks capable of extension. They have been duplicated, and are now more than sufficient for the supply of the town, which has a population of about 6,000. The storage reservoir is 250 feet above the town. There is plenty of force. The water is pumped up from the river. Was in favour of a pumping scheme, as a gravitation scheme might easily be cut off, as evidenced by Ladysmith and Bloemfontein. Endorsed the Committee's Report *re* water supply and catchment. The Murrumbidgee was wholly in New South Wales, and no noxious trades were plied on its banks. Its discharge at lowest was sufficient to supply London. When the river is low, springs flow into it, and flow most in dryest seasons. The evaporation at the present reservoir is about $7\frac{1}{2}$ feet per year, which shows that impounding a large body of water is impracticable.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Limestone about 40 miles north-west of Wagga Wagga, on the watershed of Hoolaghan's Creek. Marble on the left bank of the river at Jellingro, about 40 miles from Wagga Wagga. No sandstone. Clay, suitable for bricks and tiles, of exceptional quality, and sand and gravel in the river suitable for concrete. Not well supplied with timber, except cypress pines and river gum, both of which are very durable. Building timber generally brought by rail.

Drainage.—The alluvial flats are sometimes enriched by inundation. Floods occur periodically—usually in September—caused by the melting snow and local rains. The 1891 flood was about 2 feet deep in the main street, and averaged about a mile each side of the river. From Morris-street South, town not subject to flood, and proposed Federal City Site quite out of flood reach. Approximately, it is about 170 feet above the level of the highest flood. The drainage of the proposed Capital Site trends west to the Flowerdale Lagoon and eventually into the river, if not intercepted by sewage farms. Sewage could be utilised on the rich alluvial flats.

Other Physical Features.—Foundations about Wagga Wagga are good. None of the present public buildings in Wagga Wagga show signs of subsidence. Large alluvial flats extend along the river from Wagga Wagga to the junction of the Yass River—about 100 miles by the river. The features of the country are eminently suited for ornamental grounds and water. Lake Albert capable, without much expense, of being converted into a real lake of about 200 acres, averaging 15 feet deep.

Ownership and Value.—Nearly all proposed Territory alienated. No Church and School lands. Agreed with Report as to estimated value of unimproved land along the river frontage. His assumption was that Wagga Wagga did not exist. If the town is taken into account as remaining as it is, and the Commonwealth wants to secure enough land to serve their purpose of a town, the land without the improvements would be worth about £8 per acre.

Facilities for Food Supply.—Soil adapted for growth of cereals and root crops. Grapes and stone fruit are grown.

Water Supply and Catchment.—Tarcutta Creek, about 20 miles from Wagga Wagga, would afford splendid facilities for impounding water. It is a very large catchment with little settlement, affording good supply of water with little chance of contamination. The water could be piped to Wagga Wagga. The present supply to the town was sufficient when the river was at its lowest.

Facilities for Food Supply.—Thirty-six years of age. Native of, and practically resident of, Wagga Wagga all his life. Partially responsible for the figures under this head in Report. Wheat returns obtained from the Government Statistician. Since 1870 area under wheat cultivation gradually increasing. A great deal is exported. The quality is good and brings top prices in Sydney market. 1899 was a bad year. Could not say what were wheat returns for that year, but think about 8 bushels to the acre. Farming in the district is chiefly wheat and oats, with a little grazing. Some of the land has been continuously cropped since 1876 without showing exhaustion, but it has been the custom of late years to fallow the land—give it a spell for a year. Agreed with Mr. Pulver's Report, *re* canning and drying fruit. Had seen both canned and dried fruit from the Experimental Farm. It was the best he had seen. Wine had been produced at Lake Albert since 1870. There is a large area of land in the district capable of wine growing.

Henry Oliver Heath, solicitor

Conditions favourable to Commercial and Industrial Development.—Did not recollect when all the business of Wagga Wagga was done with Melbourne. It may have been a fact. He knew that steamers used to come up the river, presumably from Melbourne. Thought the greater part of the local trade was now done with Sydney. Knew of no other industries that could be added to the League's Report. Successful freezing works had been carried on at Narrandera. Wagga Wagga ought to be very suitable for similar works, in view of the large pastoral area surrounding it. Woollen-mills could also be established. They had no iron.

Climatic Conditions.—Native of district, and Council Clerk for two and a-half years. Member of sub-Committee appointed to obtain information as to climatic conditions. The figures in the Report were obtained from the Government Astronomer. No information is given as to range of temperature. (Information *re* temperature withdrawn at this stage with the view of substituting information at a later stage containing range of temperature.) The information as to altitude was obtained from the Government Astronomer.

Robert Emblen, Council Clerk, borough of Wagga Wagga.

Water Supply and Catchment.—About 4,000 people out of a population of 4,800 take and pay for water from the present town supply. About 80 gallons per head per day is pumped, and about 45 gallons per head per day is the average consumption all the year round. Present reservoir capable of extension, but it would be costly, as it would have to be blasted out of rock. Present plant could be extended to supply ten times the population. At present it could not supply 40,000 people. The capacity of the river, from what he had heard, was about 10 million gallons per hour at its lowest.

Drainage.—They had no drainage system at present.

Other Physical Features.—The present parks would be hardly worth considering for a large city. Did not think any of the municipal works, except the waterworks, could be utilised for the Federal City. Did not think the Site of the Federal City would be on the present town Site.

Ownership and Value.—The capital value of whole area of improved lands inside the Municipal area is £500,000. That is a moderate valuation. Improved lands are rated on the annual value; unimproved are fixed on 5 per cent. of the capital value. His valuation had nothing to do with lands outside Municipal limits, and included no Government land or land exempt from taxation. There were a few travelling stock reserves and Police paddock and barracks in the Area. If these were resumed, it would add £25,000 to his estimate.

Accessibility.—Resident in district nineteen years. Was one of the members of sub-Committee under this head. The information furnished in the Report is true, to the best of his belief. Obtained some of the information from the Railway Time Table, some from his own knowledge. Thought Wagga Wagga fairly equi-distant from the Capitals of the other colonies. The distance in favour of Melbourne was about 60 miles. That advantage would not disappear on Federation. He could not point to a place in New South Wales equi-distant from the Capitals of the other colonies. Fifty or 100 miles either way did not matter much to South Australia or Queensland. Had considered possibility of distances between the Capitals of South Australia and Queensland being shortened by Hay to Morgan Railway and Dubbo to Werris Creek. There was a chance of the river being again used for carrying produce. It would be much longer, but would be of use where time was not of great moment.

Nature of Soil.—Good workable soil—principally chocolate loam—and, with proper cultivation, suitable for growth of cereals. He manured his land from year to year. Wagga Wagga district the best pastoral and agricultural district he knew in New South Wales.

Other Physical Features.—Wagga Wagga did not feel the drought as much last year as other districts lower down; they were able to keep their stock going.

Facilities for Food Supply.—He grew wheat and hay every year; also oats. The soil in the district would grow all kinds of cereals; also mangolds, turnips, parsnips, beet, oranges, lemons, stone fruit, apples, cherries, and raspberries. District well situated for meatworks, both for killing and freezing.

Ownership and Value.—Resident of town over ten years. The area of 23,440 acres on plan he valued at £8 per acre. As you go back from the river, the value decreases to £2 per acre. Was not an expert on value of land, but thought the Experimental Farm land worth £3 per acre.

Facilities for Food Supply.—District highly favoured for wool and mutton. Sheep principally produced a high-class merino. District capable of carrying a sheep and a-quarter to the acre in ordinary seasons, and could support a much larger population.

Conditions favourable to Commercial and Industrial Development.—Some of the wool clips of the Wagga Wagga district command highest price. Special facilities for growing good wool, viz., soil and climate. Did not know any part of Colony that could produce a better class of commercial wool. At least two-thirds of the wool goes to Sydney. Wagga Wagga well situated for killing and freezing works, and any form of manufacturing or commercial industry.

Capacity to support a considerable Population.—Had been in business in Wagga Wagga a great many years. The district had immense resources. A large portion of the present sheep pastures are adapted to agriculture, and the district generally capable of much closer settlement.

Conditions favourable to Commercial and Industrial Development.—Seven-eighths of his business was done with Sydney. He was a general storekeeper. He imported wire and kerosene from Melbourne as the freight was lighter. The majority of the wool goes to Sydney. Not much goods came across the Border under drawback. There would be an advantage to Sydney, under present conditions, if Wagga Wagga were made the Federal Capital. The trade is guided by the freight. If the freight was a mileage rate, the nearer you go to Albury the less you would have to do with Sydney. Assuming mileage rates and a uniform tariff, Melbourne would have the advantage.

Facilities for Food Supply.—Native of district and owner of a vineyard at North Wagga Wagga. The letter with Report was written by his father. He saw it, and was consulted about it; believed the contents to be true.

Climatic Conditions.—Wagga Wagga climate very good—best he had been in in New South Wales, and he had been all over it. Did not think the thermometer ever reached 120 degrees; had had it 117½ degrees.

Conditions favourable to Commercial and Industrial Development.—Manager of bank in Wagga Wagga eighteen years. Very familiar with the business of the town. The proportion of the wool trade done with Sydney, about 75 per cent., as against Melbourne—that is, within a radius of 40 miles. Other trade does not necessarily follow the wool. About 60 per cent. of station supplies come from Sydney. Did not think Melbourne commercial influence paramount in Wagga Wagga. In his experience, Sydney had the principal trade of the town, the proportion would hardly be 75 per cent. No doubt something was due to differential railway rates. A good deal of stuff came from Melbourne to Albury, thence by teams. Wagga Wagga, centrally situated as regards the Capitals, Sydney and Melbourne, though the distance was in favour of Melbourne. District in good position, financially, though the last five years were very trying to the pastoralists and farmers.

Nature of Soil.—Practised in Wagga Wagga twenty-six years, and put up many buildings. Knew the proposed Federal Capital Site marked on plan. The soil is nearly all granite and changed slate. Some on the east is rough; the rest undulating. Good foundations for large buildings exist, except on the flats, which are subject to flood and would not be built upon. No danger of subsidence. Site very suitable for public buildings of a large city; but he had seen better. He preferred the north side of the river, 2 or 3 miles to the north of the river, that would be detached from the present town of Wagga Wagga. Part of proposed Site, south of Willan's Hill, is too rough; but 3,000 or 4,000 acres in the Site are suitable for building. The river flats are particularly suited for the growth of trees and could be used for parks.

Water Supply and Catchment.—Plenty of sites up river, where water for 40,000 people could be obtained. No gravitation scheme within 50 miles. Fall of river from Gundagai, about 18 inches to the mile. Gundagai, about 160 miles by river from Wagga Wagga. Tarcutta Creek a good catchment; but the water would have to be pumped.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Good granite; no freestone; good gravel for concrete; good sand. Timber, mostly river gum; some pine. Would mostly be imported.

Conditions

Thomas Halloran, grazier and dealer.

Joseph Hayes, wool-classer

David Copland, merchant.

Adolph Edward Pulver, fruit-grower.

Thomas Stewart Gardiner, Manager, Bank of New South Wales, Wagga Wagga.

George Sheppard, architect and surveyor.

Conditions favourable to Commercial and Industrial Development.—Nine years in Wagga Wagga. General storekeeper; principally retail business. His business largely done with Sydney. Wagga Wagga most centrally situated Site for the Federal Capital. William Shaw, merchant.

Facilities for Food Supply.—Constant resident six years; intermittently connected with district sixteen years. Wrote article in the Report on suitability of district for production of wine. With closer settlement, good prospects for wine-growing in district. Climate eminently suitable for wine-making. Never had phylloxera in district. Robert Horatio Caldwell, vigneron and merchant.

Climatic Conditions.—Forty-five years resident. Concurred with Committee's Report. Site selected best in neighbourhood of Wagga Wagga. Heat considerable during portion of the year. During hottest days the heat sometimes continued into the night. Considered 100 degrees a high temperature; over 100 degrees does not make much difference. 105 degrees in the shade at Wagga Wagga less oppressive than 95 degrees elsewhere, owing to dry westerly wind. Kept no records, and could not speak of range of temperature, but considered district healthiest in New South Wales. James Gormly, Member for the district.

Accessibility.—Considered Wagga Wagga the most centrally situated place between Sydney and Melbourne for the Federal Capital.

Water Supply and Catchment.—Had studied water conservation all his life, and traversed the watersheds of all the rivers of New South Wales rising in the Australian Alps, and studied where dams or weirs could be erected and water stored. Sufficient water for a city as large as Sydney or Melbourne could be stored in Tarcutta Creek by constructing a weir where the hills approach. Thought Tarcutta Creek, as a source of supply, equal to the Sydney-Menangle scheme. The water was very pure.

Facilities for Food Supply.—Favourably situated for supporting a large population, and district very suitable for fattening stock. On 31st December, 1898, there were in the Wagga Wagga Sheep District—1,162,000 sheep, 20,500 cattle, and 12,500 horses. District also very suitable for growth of wheat and other cereals, also root crops and fruit of all kinds.

Conditions favourable to Commercial and Industrial Development.—Seventy-five per cent. of trade of Wagga Wagga done with Sydney. If differential rates abolished under Federation, a Federal City at Wagga Wagga would still do the bulk of its business with Sydney.

Water Supply and Catchment.—Ten years engineer to the Wagga Wagga Waterworks, which supplied all the town except North Wagga Wagga. Supplied a population of 4,000, also part of Junee. Average about 70 gallons per day. Present plant could not supply a population of 40,000. Had not considered gravitation, but thought pumping better. Gravitation a stagnant scheme; pumping is live water, if taken from a flowing river. So far as he knew, the river was not polluted. Their water was analysed some years ago, and reported perfectly satisfactory. Knew nothing of the Tarcutta country, but judged that the Tarcutta Creek for some months of the year is stationary. The normal flow of the Murrumbidgee, at Wagga Wagga, about 9,000,000 gallons per hour. George Robert Chappell, engineer to the Borough Waterworks.

Location of Site.—Had submitted four Sites for the Federal Capital—viz., Wagga Wagga, Albury, Corowa, and Tumberumba. His Wagga Wagga proposal differed from that suggested by the Committee, which extended 2 miles further south. He proposed 6,000 acres for the Federal Capital—3,000 acres on each side of the river. His scheme coincided partly with the Committee's, but his was more compact. He would adopt that part of the Committee's Site on the southern side of the river, which comprised about four sections. He marked on plan an area on northern side of river which he would choose for the Federal Capital. It is near the river, and as available for Water Supply as that on the southern side, and preferable as a site to the expansion of the present town southwards, as it brings the Site nearer the central point of the two Capitals—Sydney and Melbourne. The land on northern side of river is an excellent site for building, and could be resumed for £3 or £4 per acre present value, and would be cheaper than the southern Site. He put in his reasons why Wagga Wagga should be the Federal Capital. William Orr, District Surveyor.

Location of Site.—Resident of Wagga Wagga eighteen years. Knew Site recommended by the Committee. As Mayor last year was chairman of the movement. Thought the proposed Capital Site on southern side of the river better than on the north. That on the north would include good undulating land, but would be detached and isolated from the town and separated by low flooded lands. George Coleman, solicitor, formerly Mayor of Wagga Wagga.

Water Supply and Catchment.—Would favour a pumping scheme for the proposed Capital, even in view of cost. The Tarcutta Creek is one of the largest creeks in Australia; has a large catchment, and passes through a district with a large rainfall. Its water is much better than the Murrumbidgee, and the supply is always good.

Conditions favourable to Commercial and Industrial Development.—Had opportunities of instituting comparison between the business done with Sydney and Melbourne; should say fully 90 per cent. done with the former.

WELLINGTON SITE.—Summary of Evidence taken at a Public Inquiry held at Wellington on 3rd and 4th August, 1900.

Initiation of League.—The League was constituted at a public meeting convened by the Mayor, at which a Committee was formed. The information obtained has the approval of the Committee. John Collins, Secretary, Wellington Federal League.

Climatic Conditions.—Thirty-three years resident of district. Wellington one of the most healthy districts to live in. Had only had a doctor in his house once in twenty-five years, and reared a family of eight. Thought the Site chosen for the Capital the best in the district.

Water Supply and Catchment.—Knew the Macquarie River well; did not think there was a sufficient fall in the river for a gravitation scheme to supply a height of 450 feet. Water could be conserved on the Bell River, about 30 miles above Wellington; but not to take it that height. About ten times as much water could be impounded in the present dam as was there at present. Roger Taylor Burton Gaden, farmer and grazier.

Facilities for Food Supply.—The district was capable of supporting a large population. It is good fattening country, and would be a convenient place to establish freezing works.

Climatic Conditions.—Native of the district and practising in it two years. Wellington extremely healthy. The altitude was good and the climate bracing, except for a few nights in the year. The summer is hot; but did not prevent anyone pursuing his ordinary avocation, and the changes are not sudden and violent. The extremes of the climate are not inimical to health. The winter climate the finest in Australia. Arthur Montague Rygate, medical practitioner.

No

No epidemic diseases. Infectious fevers, especially typhoid, extremely rare. Diphtheria and asthma are very rare and there is no ophthalmia. It is a good sanatorium for chest and renal complaints. The medical profession have sent people here from Sydney and England. The mortality rate is below the average.

Water Supply.—A water supply for a population of 40,000 could easily be obtained from the Macquarie River, with a proper system of filtration.

Drainage.—The Site is suitable for a large city, with good facilities for drainage.

Climatic Conditions.—Had been in Wellington twenty years. One of the healthiest climates in the world. For four months in the year it is very hot; but never heard of a case of sunstroke.

Accessibility.—Produced certain returns relating largely to proposed railway, Werris Creek to Wellington. The district claims as the Capital Site depended mainly on the construction of that line. Without it, Wellington could not be considered accessible, so far as Brisbane is concerned; that objection obtains against all the Western Sites. Joined to Broken Hill and Werris Creek, this district would be singularly central. These railways are certainties; but are a long way off being constructed. If constructed, Wellington would be very accessible to Adelaide, Brisbane, and Melbourne.

Climatic Conditions.—Resident eighteen years in district. Produced certain returns (Exhibit B) showing altitude, temperature, and rainfall. The two latter were prepared from the Post Office records. Determined the altitude himself, from his professional knowledge of the country. Took the Railway Station as a datum point. His experience of the climate was that the extremes were too great. The last four years were the worst in his recollection.

Nature of Soil.—Was familiar with the proposed Territory. It is the most suitable about the district. It is hilly country except in a few places, which might be described as undulating. Mostly limestone country; some of it basaltic. Quality of soil very good and very fertile. A considerable portion is under cultivation, but only a small area for a long period, but it is capable of cultivation for a long period without stimulants.

Water Supply and Catchment.—Knew the Macquarie River. Did not think a gravitation supply could be obtained from it. A gravitation scheme to supply Wellington could be got by going about 10 miles up the Bell River, but not to supply a height of 350 feet. A supply for that height could be obtained by going further up. A large reservoir and 20 miles of piping would be required. There would be no difficulty in choosing a good site, with good foundations for a weir. The fall is not more in the Macquarie than in the Bell River. For a smaller town than 40,000 you could obtain Sites along Curra Creek for water supply. Water could be stored without difficulty within a reasonable distance of Wellington for a large population.

Facilities for Food Supply.—Soil and climate suitable for growing cereals and fruit. Average wheat crop, 20 bushels to the acre.

Climatic Conditions.—Resident of Wellington sixteen years. Was local observer for the Government Astronomer, and was jointly responsible with Mr. Dawson for the returns (Exhibit B). The rainfall is for eighteen years. Did not think the temperature of Wellington out of the way. Put in return—(Exhibit C),—showing range and mean of temperature for each quarter of the year.

Water Supply and Catchment.—Knew the Macquarie River for some distance up. Thought it more suitable for storing water than the Bell River; it contained a much greater quantity of water than the Bell River, and had more tributaries. Had taken levels for sluicing drains. To get a gravitation supply for a height of 450 feet, you would have to go 20 miles up the river, where there are plenty of places for constructing a dam or weir. The hills come close together, and a rock bottom could be got, generally diorite, from 20 to 100 feet. A weir 50 feet high would back water up about 2 miles. There are many places where a 50-acre reservoir could be got by making a weir, notably at Duck Falls, about 3½ miles from Mr. Campbell's. The catchment areas in the district are suited for conserving water. Could not say he knew where 1,000 acres could be conserved, independent of the rivers. Burrendong is the best place; it had an enormous catchment.

The possession of, or proximity to, Stone, Timber, or other Building Material.—Sandstone at Mitchell's Creek, 12 miles from Wellington; bluestone within 3 miles of Wellington.

Capacity to Support a Considerable Population.—Had considerable experience of mining in the district. The Mitchell's Creek Proprietary Mine and other reefs were in the district, and alluvial workings at Jawbone. Coal and copper were to be found, and ironstone at Micketymulga. A large population could be employed mining if the industry were developed.

Nature of Soil.—He farmed on a large scale; cultivated about 6,000 acres, principally wheat. His soil is a rich chocolate, with some limestone on it. The farm is not in the proposed territory, but is just on the boundary.

Facilities for Food Supply.—All cereals will grow, and it is good fruit country, but not wet enough for root crops. Sufficient food could be locally grown to support a large population. It is a great stock carrying district. Lucerne will grow, and grapes are grown for table use. Maize grows along the rivers.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Marble, limestone, sandstone, and granite within 8 or 10 miles of Wellington. Fire-clay not 10 miles away. Pine and iron-bark timber. Bricks are made at Wellington and Geurie.

Water Supply and Catchment.—Irrespective of the rivers, a fair catchment area could be obtained in Middle Gully Creek. There is also Mitchell's Creek, which is always running, and there is a good catchment at the Springs. Good dams could be made at Watson's and Curra Creeks.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Very good granite, suitable for building, 8 miles from Wellington. Freestone of good quality, and in any quantity, at Geurie, 9 miles distant. Limestone exists in unlimited supply, and is a good building stone. Bluestone is obtainable. Sandstone is obtainable within a mile of Wellington. Any kind of brick can be made from the clays in the district. The Wellington bricks are not porous. Pine, ironbark, and hardwood timber are available.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Had thirty years' experience in working limestone and marble in the district. The marble is very workable, and takes a good polish. Freestone, of a very strong durable character and reddish colour, is obtainable. It is the best stone in the country after Pymont stone. The local limestone makes very good lime. Bluestone is plentiful, also a fair supply of granite and good slate for building. The local clay makes excellent bricks.

Water

Charles Hampden Barton, Manager of Commercial Bank, Wellington. Exhibit A.

Samuel Hugh Dawson, licensed surveyor.

Alexander Chrystal, Post and Telegraph Master, Wellington.

Abel Wilkins, agent.

(Note.—This evidence was subsequently corrected by the witness in a letter to the Commissioner, wherein he states that the fall in the river is only 7 to 9 feet to the mile, but that the fall is greater higher up.)

Robert Manackn Smith, manager of "Towri" Estate.

Frederick Henry Kennard, Mayor of Wellington, builder and contractor.

Robert Craig, monumental mason

Water Supply and Catchment.—Water would have to be brought by gravitation from somewhere about Burrendong. Enough could be got to supply a large city, but it would have to be taken from a sufficient height. About 12 miles up the Macquarie would yield a supply sufficient for 40,000 people. There is not a good catchment, but there are good sites for a weir.

Ownership and Value.—The proposed Federal Area is of a very mixed character. A large part of the poor land is Crown land. The freehold, including improvements and excluding the municipal area, is worth £3 per acre.

Facilities for Food Supply.—Within a radius of 20 or 30 miles around Wellington, the land compares favourably with any part of the country for sheep and cattle. Fattening country. Average holding about 320 acres. The country, except immediately around Wellington, is capable of closer settlement, and capable of supporting a very much larger population. Wellington would be a very suitable site for killing and freezing works.

Ownership and Value.—The estimated capital value of all lands within the municipal area, exclusive of improvements, is £167,535 10s.

Facilities for Food Supply.—Resident of Wellington, and mill-owner. Wheat grown in district is splendid milling wheat and the best in the Colony. It got first prize at the recent Sydney Exhibition, and went 68½ lb. to the bushel. The heavy grain is attributable to the nature of the soil. The district is capable of supporting a very large population with cereal food and cattle and sheep, and could be more closely settled.

Had considerable experience in dairy farming, from youth upwards, in various dairying districts in the Colony. Dairying had not been carried on in the Wellington district in a systematic manner, but the land is suitable for it, and, if taken up properly, would succeed. It is a good grassed country, highly productive of cereals and other cattle foods. The natural grasses are good.

Produced a return, showing goods received and despatched from the Wellington Railway Station for a period of three years.

Mineral Products.—Had been connected with the district about six years. The Mitchell's Creek Mine, Bodangora, belonged to one man, but employed between 200 and 300 persons. Within a radius of 20 miles of Bodangora, the country is auriferous, and contains copper, gold, iron, and silver. In ten years £234,142 worth of gold had been taken out of the mine, and its permanency was assured for twenty years. The district is not capable of supporting a large population on present discoveries, but it may yet turn out a large gold or copper field. Expressed surprise that there were not more mines discovered.

Resided at Wellington. There were coal prospects in the district. Twelve miles from Wellington, at Mitchell's Creek, the sandstone formation commences, and 22 miles north from Wellington a coal seam, about 7 feet thick, was found at a depth of about 30 feet. It is not a first-class coal, and not suitable for railway purposes. Put in copy of a Report, dated 1st July, 1852, re discovery of coal. This is on the Wellington and Werris Creek proposed railway, about 28 miles northerly from Wellington.

In Wellington since 1856, and was gold mining on and off since 1853. There was a copper-mine about 3 miles south of Wellington, from which 25 tons of fine ore were taken. There is also an outcrop of copper 1½ mile from the town. The country within 15 or 20 miles of Wellington is capable of supporting a large mining population. The country is conglomerate or Devonian. Mining has been going on about Wellington for forty-four years. Thought any amount of coal would be found about Wellington. The Caves were a source of attraction to visitors, but were capable of much extension if properly explored.

Walter Pridaux Pridham, stock and station agent, and land valuer.

William Gardiner, Council Clerk.

Murdoch McLeod, miller.

John Irving, auctioneer and commission agent.

William Riddle, Railway Station-master at Wellington.

Edward Bristowe, Manager of Mitchell's Creek Freehold Gold-mining Company, Bodangora.

Robert Porter, journalist. Exhibit D.

James Sibbald, caretaker, Wellington Caves.

YASS SITE.—Summary of Evidence taken at a Public Inquiry held at Yass on 19th April, 1900.

Initiation of League.—Resident of town nine years. Committee convened by advertisement, and appointed by public meeting. Was concerned in drawing up Report, and, to an extent, responsible for the whole of it.

Climatic Conditions.—Information under this head in Report obtained from Government Astronomer. The proposed Federal City Site is about 150 feet higher than Yass; that would be about 1,800 feet above sea level.

Water Supply and Catchment.—Had drawn Mr. Blomfield's attention to a gravitation scheme from the Murrumbidgee River.

Ownership and Value.—Yass is a Municipal district. Had a very good knowledge of values in the town. The statements in the Report are true, to the best of his knowledge and belief.

Climatic Conditions.—Nine years in district. Had assisted to draw up part of Report submitted by League. Was on Committee. Climate of Yass considered very healthy. Very bracing for nine months of the year. Not too dry or too moist. The hot months are December, January, and February. Lung affections are benefited by the climate. Reported temperature daily to the Government Astronomer. Had seen a drop of 30 degrees, but the average was 15 degrees or 20 degrees. Had only seen thermometer once up to 105 degrees; the drop that day would be 30 degrees or 35 degrees. Mean maximum for January was 89 degrees; for February (the hottest mean maximum for fifteen years), 87 degrees; December, about 84 degrees. The highest temperature at night, about 75 degrees perhaps once or twice in the summer. Always a cool change at night. Sea breezes come to Yass about 6 in the evening, but not to any extent. District not liable to epidemics; particularly free from typhoid. Asthma and influenza much the same as other places. Could speak favourably of the health of the whole place, but could say nothing of the mortality. The altitude is sufficient for a healthy and enjoyable climate.

Drainage.—Wherever the Site of the Federal City is located in the Area, drainage will be easy. The present storm-water drainage goes into the Yass River. Excreta and other matter are buried.

The possession of, or proximity to, Stone, Timber, or other Building Material.—Thirty-four years in Yass. Had prepared Report on building stones (Exhibit, p. 64) found in Yass and vicinity. Its contents are true and correct, to the best of his belief. A building known as the Corner, at Yass, was erected from local freestone, and has been up forty years. This stone cuts well, is soft in the quarry, and hardens on exposure. It has not been quarried any depth. Another stone, called greenstone, is obtainable 1½ miles west of Yass. It is very hard and durable. Limestone is found all over the place. It is a dark lime, not used

Samuel Edward Bradford, Mayor of Yass, President of Yass Federal League.

Joseph English, Government Medical Officer, Yass District.

George Thompson, builder, contractor, and stonemason.

used for burning. (Specimens of marble were produced by the witness and exhibited to the Commissioner.) No pure white marble. No real granite in the neighbourhood; that produced is bastard granite. The sample of slate produced was obtained 22 miles away. It had not been quarried any depth or tested.

Frederick
Norton Oxley,
Road Superin-
tendent.

Nature of Soil.—At Yass five years. Fifteen years in Government service. Had considerable knowledge of Yass district. The material in and about Yass suitable for street and road making is easily obtainable in large quantities. Limestone makes good roads. Good gravel for light roads is plentiful, and is mostly used on the roads. The sample of stone produced is granite, though the Committee say not. Yass Plains, a slaty formation—a decomposed rock—he should think black shale and granite. The Site marked for the Federal City is undulating country, with good building sites.

Water Supply and Catchment.—Not an expert on water supply. Accompanied Mr. Blomfield in his examination. His own opinion was that the water supply should be from the Murrumbidgee. The Yass River not suitable; the water becomes very hard at times, and the supply is insufficient.

The possession of, or proximity to, Stone, Timber, and other Building Material.—No good building timber in district.

Drainage.—Knew a good deal of the contour of the proposed Federal Area. It would be easy to get good drainage and sewage farms.

Other Physical Features.—By constructing a small dam, artificial lakes could be easily made.

John Russell
Ross, grazier

Facilities for Food Supply.—In district since 1888. Formerly a banker. Yass Stock District would supply animal food for a population of 40,000. As a stock district there is no healthier in the Colony. There are probably only two other towns between Sydney and Albury which pass more stock than Yass. The five years just passed were as bad as the Colony has passed through; but taking three years ending 1899, there was an increase of 20,000 sheep in the district. The loss of stock through drought was comparatively small. With closer settlement a much better supply of farm produce would be forthcoming. A large area is suitable for agriculture, but to support a large population the district would have to depend on outside sources for wheat. Artificial grasses can be grown successfully on the alluvial. Lucerne can be grown with success. The rich agricultural land is along the river, but as a farming district it is only on a small scale.

Conditions favourable to Commercial and Industrial Development.—The great volume of trade is done with Sydney. The town and district are undoubtedly under the commercial influence of Sydney.

Argyle
McCallum,
farmer and
grazier.

Water Supply and Catchment.—Native of the district, and lifelong resident. Knew the district well, and thought Site chosen for Territory the best one. Would cost more to bring water from the Murrumbidgee than the Yass River. Water of the Yass River gets hard as you go down—probably due to mineral deposits it passes through. It is not reckoned good drinking water. Enormous pumping machinery would be required to pump the water from the weir at Barren Jack. He did not know the fall of the Murrumbidgee per mile above Yass.

The possession of, or proximity to, Stone, Timber, and other Building Material.—Agreed with the evidence already given under this head.

Facilities for Food Supply.—District principally pastoral, though there was a large amount of agricultural land. Wheat grown, but not in large areas. He himself had grown 100 bushels of maize to the acre in exceptional seasons. Oats and barley are grown in small patches. Apples will grow anywhere, and the climate suits peaches. Lucerne is grown. District very suitable for stock. Droughts occur, but stock are not lost. Stock come here in drought time from elsewhere. Yass Plains carry about one sheep to the acre; with closer settlement, probably more. On 31st December, 1899, there were 12,131 cattle, 527,938 sheep, and 3,992 horses in the district. It would be a good place to establish chilling and freezing works. Business is all done with Sydney.

Tyndale Stubbs,
stock and station
agent.

Facilities for Food Supply.—Doing business in Yass for ten years. Centrally situated for stock business. More sheep sold there than in any part of Colony except Gunnedah. Not a better district in New South Wales as a centre for sheep selling. Gave statistics of sales by his firm. They averaged over 400,000 a year. Last year's sales were 50,000 over preceding year—all stores, destined for Sydney or Goulburn. Climate very suitable for merino sheep. Not a dairying district.

Capacity to Support a Considerable Population.—Closer settlement would enable Yass Stock District to support twenty times its present population.

Thomas Henry
Furnival Griffin,
bank manager,
Hon. Secretary,
Yass Federal
League.

Five and a half years managing Commercial Bank, Yass. Was concerned in drawing up the League's Report. Obtained the figures *re* Climatic Conditions from the Government Astronomer, and the altitude from the Railway Time Table. The average altitude was assumed.

Accessibility.—Yass, twice the distance from Melbourne it was from Sydney. Could not say it was centrally situated as regards Sydney and Melbourne, but centrality was not a matter of pure mileage. Adelaide and Brisbane and other cities had to be considered. There are countervailing advantages in favour of Yass. If it were 100 miles further south, it would be in a much hotter climate.

I certify that the foregoing Summaries of Evidence, viz., for Albury, Bathurst, Bombala-Eden, Braidwood, Carcoar-Garland, Cootamundra, Forest Reefs, Goulburn, Orange, Queanbeyan, Tumut, Wagga Wagga, Wellington, and Yass, contained in pages 66 to 94, have been compiled from the depositions taken before me at the Public Inquiries held in respect of each of such Sites.

Commissioner.

APPENDIX.

LIST OF PLANS.

- A. Plan showing 100 mile radial limit from City of Sydney.

Plans of proposed Federal Territories and Capital Sites—

- B. Albury.
- C. Bathurst.
- D. Bombala-Eden.
- E. Braidwood.
- F. Carcoar-Garland.
- G. Forest Reefs and Calvert
- H. Goulburn.
- K. Orange.
- L. Queanbeyan.
- M. Tumut.
- N. Wagga Wagga.
- O. Wellington.
- P. Yass.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SEAT OF GOVERNMENT OF THE COMMONWEALTH.

(OPINION OF MR. R. E. O'CONNOR RESPECTING.)

Printed under No. 5 Report from Printing Committee, 19 July, 1900.

Opinion.

I HAVE been asked to advise whether any place outside New South Wales can legally be the Seat of the Government of the Commonwealth.

I am clearly of opinion that so long as section 125 remains a part of the Constitution the Seat of Government cannot legally be anywhere outside New South Wales.

That section, which takes effect the moment the Constitution comes into force, enacts in mandatory terms that the Seat of Government of the Commonwealth shall be in New South Wales. From that moment it becomes impossible that the Seat of Government can legally be anywhere outside of New South Wales.

The portion of New South Wales which, subject to the provisions of the section, is to be chosen as the permanent Seat of Government can be determined only by the Parliament of the Commonwealth; but before the Parliament determines that question there must, of necessity, be some place selected temporarily as the Seat of Government in which the public business of the Executive of the Commonwealth will be transacted.

The power to make this selection must, of necessity, be vested in the Federal Executive, but that power must be exercised subject to the provisions of section 125. To fix the Seat of Government even temporarily outside New South Wales would be as much a breach of the Constitution as to fix it permanently outside of New South Wales.

For these reasons, I am clearly of opinion that under no circumstances can the Federal Executive or any other authority, legally fix the Seat of Government of the Commonwealth outside New South Wales.

R. E. O'CONNOR.

ANNO SEXAGESIMO ET SEXAGESIMO PRIMO.

VICTORIÆ REGINÆ.

A.D. 1898.

DRAFT OF A BILL

To constitute the Commonwealth of Australia.

Preamble.	WHEREAS the people of [<i>here name the Colonies which have adopted the Constitution</i>], humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established: And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in the present Parliament assembled, and by the authority of the same, as follows:—
Short title.	I. This Act may be cited as " <i>The Commonwealth of Australia Constitution Act.</i> "
Act to bind Crown, and extend to the Queen's Successors.	II. This Act shall bind the Crown, and its provisions referring to the Queen shall extend to Her Majesty's Heirs and Successors in the Sovereignty of the United Kingdom.
Proclamation of Commonwealth.	III. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of [<i>here name the Colonies which have adopted the Constitution</i>] shall be united in a Federal Commonwealth under the name of " <i>The Commonwealth of Australia.</i> " But the Queen may, at any time after the Proclamation, appoint a Governor-General for the Commonwealth.
Commencement of Act.	IV. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several Colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
Operation of the Constitution and laws.	V. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the Courts, Judges, and people of every State, and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
Definition.	VI. " <i>The Commonwealth</i> " shall mean the Commonwealth of Australia as established under this Act. " <i>Colony</i> " shall mean any Colony or Province. " <i>The States</i> " shall mean such of the Colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the Northern Territory of South Australia, as for the time being are parts of the Commonwealth, and such Colonies or Territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called a " <i>State.</i> " " <i>Original States</i> " shall mean such States as are parts of the Commonwealth at its establishment.
Repeal of Federal Council Act.	VII. " <i>The Federal Council of Australasia Act, 1885,</i> " is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth. Any such law may be repealed as to any State by The Parliament of the Commonwealth, or as to any Colony not being a State by the Parliament thereof.
Application of Colonial Boundaries Act.	VIII. After the passing of this Act the " <i>Colonial Boundaries Act, 1895,</i> " shall not apply to any Colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing Colony for the purposes of that Act.

IX.

IX. The Constitution of the Commonwealth shall be as follows:—

Constitution
and its Divisions.

THE CONSTITUTION.

This Constitution is divided as follows:—

- CHAPTER I.—THE PARLIAMENT:
 Part I.—General:
 Part II.—The Senate:
 Part III.—The House of Representatives:
 Part IV.—Both Houses of The Parliament:
 Part V.—Powers of the Parliament:
- CHAPTER II.—THE EXECUTIVE GOVERNMENT:
- CHAPTER III.—THE JUDICATURE:
- CHAPTER IV.—FINANCE AND TRADE:
- CHAPTER V.—THE STATES:
- CHAPTER VI.—NEW STATES:
- CHAPTER VII.—MISCELLANEOUS:
- CHAPTER VIII.—ALTERATION OF THE CONSTITUTION:
 THE SCHEDULE.

CHAPTER I.

THE PARLIAMENT.

PART I.—GENERAL.

Chap. I.
The Parliament.
Part I.
General.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament," or "The Parliament of the Commonwealth." Legislative power.

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution; such powers and functions of the Queen as Her Majesty may be pleased to assign to him. Governor-General.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until The Parliament otherwise provides, shall be ten thousand pounds. Salary of Governor-General.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth. Provisions relating to Governor-General.

5. The Governor-General may appoint such times for holding the sessions of The Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue The Parliament, and may in like manner dissolve the House of Representatives. Sessions of Parliament. Prorogation and dissolution.

After any general election The Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs. Summoning Parliament.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth. First Session.

6. There shall be a session of The Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of The Parliament in one session and its first sitting in the next session. Yearly Session of Parliament

PART II.—THE SENATE.

Part II
The Senate
The Senate

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until The Parliament otherwise provides, as one electorate.

But until The Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until The Parliament otherwise provides there shall be six senators for each Original State. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by The Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

Method of election of senators.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

Times and places.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

Application of State laws.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

Failure to choose senators.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

Issue of writs.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

Rotation of senators.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of the third year, and the places of those of the second class at the expiration of the sixth year, from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made in the year at the expiration of which the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of January following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of January preceding the day of his election.

Further provision for rotation.

14. Whenever the number of senators for a State is increased or diminished, The Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

Casual vacancies.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

Qualifications of senator.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

Election of President.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

Absence of President.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

Resignation of senator.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

Vacancy by absence.

20. The place of a senator shall become vacant if for two consecutive months of any session of The Parliament he, without the permission of the Senate, fails to attend the Senate.

Vacancy to be notified.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth, the Governor-General shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

Quorum.

22. Until The Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

Voting in Senate

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

PART

PART III.—THE HOUSE OF REPRESENTATIVES.

Part III.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

House of Representatives.
Constitution of House of Representatives.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- (i.) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators.
- (ii.) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

Provision as to races disqualified from voting.

26. Notwithstanding anything in section twenty-four the number of members to be chosen in each State at the first election shall be as follows: [*To be determined according to latest statistical returns at the date of the passing of the Act, and in relation to the quota referred to in previous sections.*]

Representatives in first Parliament.

27. Subject to this Constitution, The Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

Alteration of number of members.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

Duration of House of Representatives.

29. Until The Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

Electoral divisions.

In the absence of other provision, each State shall be one electorate.

30. Until The Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of the Parliament of the State; but in the choosing of members each elector shall vote only once.

Qualification of electors.

31. Until The Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

Application of State laws.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

Writs for general election.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives, or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth, the Governor-General in Council may issue the writ.

Writs for vacancies.

34. Until The Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

Qualifications of members.

- (i.) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:
- (ii.) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

Election of Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

Absence of Speaker.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

Resignation of member.

38. The place of a member shall become vacant if for two consecutive months of any session of The Parliament he, without the permission of the House, fails to attend the House.

Vacancy by absence.

39. Until The Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

Quorum.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

Voting in House of Representatives.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

Part IV.
Both Houses of
The Parliament.Right of electors
of States.Oath or affirma-
tion of allegiance.
Schedule.Member of one
House ineligible
for other.

Disqualification.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of The Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the Schedule.

43. A member of either House of The Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i.) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or
- (ii.) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer: or
- (iii.) Is an undischarged bankrupt or insolvent: or
- (iv.) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or
- (v.) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or as a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

Vacancy on
happening of
disqualification.

45. If a senator or member of the House of Representatives—

- (i.) Becomes subject to any of the disabilities mentioned in the last preceding section: or
- (ii.) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or
- (iii.) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in The Parliament to any person or State:

his place shall thereupon become vacant.

Penalty for
sitting when
disqualified.

46. Until The Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

Disputed elec-
tions.

47. Until The Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of The Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

Allowance to
members.

48. Until The Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.

Privileges, &c.,
of Houses.

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by The Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

Rules and orders.

50. Each House of The Parliament may make rules and orders with respect to—

- (i.) The mode in which its powers, privileges, and immunities may be exercised and upheld.
- (ii.) The order and conduct of its business and proceedings either separately or jointly with the other House.

PART V.—POWERS OF THE PARLIAMENT.

Part V.
Powers of The
Parliament.Legislative
powers of The
Parliament.

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to:—

- (i.) Trade and commerce with other countries, and among the States:
- (ii.) Taxation; but so as not to discriminate between States or parts of States:
- (iii.) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:
- (iv.) Borrowing money on the public credit of the Commonwealth:
- (v.) Postal, telegraphic, telephonic, and other like services:
- (vi.) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth:
- (vii.) Light-houses, light-ships, beacons and buoys:
- (viii.) Astronomical and meteorological observations:
- (ix.) Quarantine:
- (x.) Fisheries in Australian waters beyond territorial limits:
- (xi.) Census and statistics:
- (xii.)

- (xii.) Currency, coinage, and legal tender :
- (xiii.) Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money :
- (xiv.) Insurance, other than State Insurance ; also State Insurance extending beyond the limits of the State concerned :
- (xv.) Weights and measures :
- (xvi.) Bills of exchange and promissory notes :
- (xvii.) Bankruptcy and insolvency :
- (xviii.) Copyrights, patents of inventions and designs, and trade marks :
- (xix.) Naturalization and aliens :
- (xx.) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth :
- (xxi.) Marriage :
- (xxii.) Divorce and matrimonial causes ; and in relation thereto, parental rights, and the custody and guardianship of infants :
- (xxiii.) Invalid and old-age pensions :
- (xxiv.) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the Courts of the States :
- (xxv.) The recognition throughout the Commonwealth of the laws, the public acts and records, and the judicial proceedings of the States :
- (xxvi.) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws :
- (xxvii.) Immigration and emigration :
- (xxviii.) The influx of criminals :
- (xxix.) External affairs :
- (xxx.) The relations of the Commonwealth with the islands of the Pacific :
- (xxxi.) The acquisition of property on just terms from any State or person for any purpose in respect of which The Parliament has power to make laws :
- (xxxii.) The control of railways with respect to transport for the naval and military purposes of the Commonwealth :
- (xxxiii.) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State :
- (xxxiv.) Railway construction and extension in any State with the consent of that State :
- (xxxv.) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State :
- (xxxvi.) Matters in respect of which this Constitution makes provision until The Parliament otherwise provides :
- (xxxvii.) Matters referred to The Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law :
- (xxxviii.) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia :
- (xxxix.) Matters incidental to the execution of any power vested by this Constitution in The Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

Exclusive powers of The Parliament.

- (i.) The seat of government of the Commonwealth, and all places acquired by the Commonwealth for public purposes :
- (ii.) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth :
- (iii.) Other matters declared by this Constitution to be within the exclusive power of The Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licenses, or fees for services under the proposed law.

Powers of the Houses in respect of legislation.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

Appropriation Bills.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Tax Bill.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only ; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

Recommendation of money votes.

Disagreement
between the
Houses.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of The Parliament, and shall be presented to the Governor-General for the Queen's assent.

Royal assent to
Bills.

58. When a proposed law passed by both Houses of The Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

Recommendations
by
Governor-
General.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

Disallowance by
the Queen.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of The Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

Signification of
Queen's pleasure
on Bill reserved.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of The Parliament, or by Proclamation, that it has received the Queen's assent.

Chap. II.

The
Executive
Government.

CHAPTER II.

THE EXECUTIVE GOVERNMENT.

Executive
power.

61. The executive power of the Commonwealth is vested in the Queen, and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

Federal
Executive
Council.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

Provisions
referring to
Governor-
General.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

Ministers of
State.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

Ministers to sit
in Parliament.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

Numbers of
Ministers.

65. Until The Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as The Parliament prescribes, or, in the absence of provision, as the Governor-General directs.

Salaries of
Ministers.

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until The Parliament otherwise provides, shall not exceed twelve thousand pounds a year.

Appointment of
civil servants.

67. Until The Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

Command of
naval and
military forces.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

Transfer of
certain
departments.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth:—

Posts, telegraphs, and telephones:

Naval and military defence:

Lighthouses, lightships, beacons, and buoys:

Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

Certain powers of Governors to vest in Governor-General.

CHAPTER III. THE JUDICATURE.

Chap. III.
The
Judicature.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as The Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other justices, not less than two, as The Parliament prescribes.

Judicial power and Courts.

72. The Justices of the High Court and of the other courts created by the Parliament—

- (i.) Shall be appointed by the Governor-General in Council :
- (ii.) Shall not be removed except by the Governor-General in Council, on an Address from both Houses of The Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity :
- (iii.) Shall receive such remuneration as The Parliament may fix ; but the remuneration shall not be diminished during their continuance in office.

Judges' appointment, tenure, and remuneration.

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as The Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

Appellate jurisdiction of High Court.

- (i.) Of any Justice or Justices exercising the original jurisdiction of the High Court :
- (ii.) Of any other federal court, or court exercising federal jurisdiction ; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council :
- (iii.) Of the Inter-State Commission, but as to questions of law only—

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by The Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until The Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council in any matter involving the interpretation of this Constitution or of the Constitution of a State, unless the public interests of some part of Her Majesty's Dominions, other than the Commonwealth or a State, are involved.

Appeals to Queen in Council.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise, by virtue of Her Royal Prerogative, to grant special leave of appeal from the High Court to Her Majesty in Council. But The Parliament may make laws limiting the matters in which such leave may be asked.

75. In all matters—

- (i.) Arising under any treaty :
- (ii.) Affecting consuls or other representatives of other countries :
- (iii.) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party :
- (iv.) Between States, or between residents of different States, or between a State and a resident of another State :
- (v.) In which a writ of mandamus or prohibition or an injunction is sought against an officer of the Commonwealth :

Original jurisdiction of High Court.

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i.) Arising under this Constitution or involving its interpretation :
- (ii.) Arising under any laws made by The Parliament :
- (iii.) Of Admiralty and maritime jurisdiction :
- (iv.) Relating to the same subject-matter claimed under the laws of different States.

Additional original jurisdiction.

77. With respect to any of the matters mentioned in the last two sections The Parliament may make laws—

- (i.) Defining the jurisdiction of any federal court other than the High Court :
- (ii.) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is vested in the courts of the States :
- (iii.) Investing any court of a State with federal jurisdiction.

Power to define jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

Proceedings against Commonwealth or State.

79. The federal jurisdiction of any court may be exercised by such number of judges as The Parliament prescribes.

Number of judges.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as The Parliament prescribes.

Trial by jury.

CHAPTER

CHAPTER IV.

FINANCE AND TRADE.

Chap. IV.
Finance
and Trade.

Consolidated
Revenue Fund.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

Expenditure
charged
thereon.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

Money to be
appropriated
by law.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of The Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for The Parliament.

Transfer of
officers.

84. When any department of the public service of a State becomes transferred to the Commonwealth all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

Transfer of
property of
State.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i.) All property of the State of any kind, used exclusively in connection with the department, shall become vested in the Commonwealth; but in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary.
- (ii.) The Commonwealth may acquire any property of the State, of any kind, used, but not exclusively used, in connection with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth.
- (iii.) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by The Parliament.
- (iv.) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until The Parliament otherwise provides of the net revenue of the Commonwealth from duties of customs and of excise, not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

Uniform duties
of customs.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

Payment to
States before
uniform duties.

89. Until the imposition of uniform duties of customs—

- (i.) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii.) The Commonwealth shall debit to each State—
 - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth.
 - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii.) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of The Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive. Exclusive power over customs, excise, and bounties.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect; but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods. Exceptions as to bounties.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free. Trade within the Commonwealth to be free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until The Parliament otherwise provides— Payment to States for five years after uniform tariffs.

(i.) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State.

(ii.) Subject to the last subsection, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, The Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth. Distribution of surplus.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth. Custom duties of Western Australia.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until The Parliament otherwise provides, The Parliament may grant financial assistance to any State on such terms and conditions as The Parliament thinks fit. Financial assistance to States.

97. Until The Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned. Audit

98. The power of The Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State. Trade and commerce includes navigation and State railways.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof. Commonwealth not to give preference.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation. Nor abridge right to use water.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as The Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder. Inter-State Commission.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard being had to the financial responsibilities incurred by any State in connection with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission. Parliament may forbid preferences by States.

103. The members of the Inter-State Commission—

- (i.) Shall be appointed by the Governor-General in Council;
- (ii.) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an Address from both Houses of The Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity;
- (iii.) Shall receive such remuneration as The Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

Commissioners' appointment, tenure, and remuneration.

Saving of certain rates.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

Taking over public debts of States.

105. The Parliament may take over from the States their public debts as existing at the establishment of the Commonwealth, or a proportion thereof according to the respective numbers of their people, as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

Chap. V.
The States.

CHAPTER V. THE STATES.

Saving of Constitutions.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

Saving of powers of State Parliaments.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution, exclusively vested in the Parliament of the Commonwealth, or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

Saving of State laws.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of The Parliament of the Commonwealth, shall, subject to this Constitution continue in force in the State; and, until provision is made in that behalf by The Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

Inconsistency of laws.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

Provisions referring to Governor.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

States may surrender territory.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

States may levy charges for inspection laws.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by The Parliament of the Commonwealth.

Intoxicating liquids.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage shall be subject to the laws of the State as if such liquids had been produced in the State.

States may not raise forces.

114. A State shall not, without the consent of The Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

Taxation of property of Commonwealth or State.

States not to coin money.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

Commonwealth not to legislate in respect of religion.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

Rights of residents in States.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

Recognition of laws, &c., of States.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public acts and records, and the judicial proceedings of every State.

Protection of States from invasion and violence.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

Custody of offenders against laws of the Commonwealth.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and The Parliament of the Commonwealth may make laws to give effect to this provision.

Chap. VI.
New States.

CHAPTER VI. NEW STATES.

New States may be admitted or established.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

Government of territories.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of The Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and, operation of any increase or diminution or alteration of territory in relation to any State affected.

Alteratio of limits of States.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

Formation of new States.

CHAPTER VII.
MISCELLANEOUS.

Chap. VII. Miscellaneous.

125. The seat of Government of the Commonwealth shall be determined by The Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and if New South Wales be an Original State shall be in that State and be distant not less than one hundred miles from Sydney.

Seat of Govern-ment.

Such territory shall contain an area of not less than one hundred square miles and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

If Victoria be an Original State, The Parliament shall sit at Melbourne until it meets at the seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

Power to Her Majesty to authorize Governor-General to appoint deputies.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

Aborigines not to be counted in reckoning population.

CHAPTER VIII.
ALTERATION OF THE CONSTITUTION.

Chap. VIII. Alteration of Constitution.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of The Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

Mode of altering the Constitution.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next Session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as The Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of The Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner effecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

THE SCHEDULE.

OATH.

I, A.B., do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. So HELP ME GOD!

AFFIRMATION.

I, A.B., do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.)

II.—ADDRESSES FROM COLONIAL LEGISLATURES.

No. 1.

SOUTH AUSTRALIA.

Address to the Queen from the Legislative Council and House of Assembly.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

May it please Your Majesty—

WE, Your Majesty's dutiful and loyal subjects, Members of the Legislative Council of South Australia, in Parliament assembled, approach Your Majesty with assurances of our loyalty and sincere attachment to Your Majesty's Throne and Person.

We humbly pray Your Majesty to be pleased to cause a measure to be submitted to the Imperial Parliament for passing into Law the Federal Constitution for Australasia which has been accepted by the Colonies of New South Wales, Victoria, South Australia, and Tasmania.

August 8, 1899.

Legislative Council, South Australia.
R. C. BAKER, President.

August 3, 1899.

House of Assembly, South Australia.
JENKIN COLES, Speaker.
F. HALCOMB, Clerk.

No. 2.

VICTORIA.

Address to the Queen from the Legislative Council and Legislative Assembly.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

May it please Your Majesty—

WE, Your Majesty's loyal subjects, the Members of the Legislative Council and the Members of the Legislative Assembly of Victoria, in Parliament assembled, approach Your Majesty with assurances of loyal attachment to Your Throne and Person. We humbly desire to lay before Your Majesty:—

1. That, pursuant to legislation passed by the Parliaments of New South Wales, Victoria, South Australia, Tasmania, and Western Australia, a Convention of Representatives of the Colonies named met during the years 1897 and 1898, and framed a Draft Federal Constitution in the form of a Bill for enactment by the Imperial Parliament.

2. That in the beginning of the present year the Prime Ministers of the Colonies named and the Prime Minister of Queensland, in Conference assembled, amended the said Draft Federal Constitution in certain respects.

3. That subsequently Federation Enabling Acts were passed by the Parliaments of New South Wales, Victoria, Queensland, South Australia, and Tasmania, and those Acts provided for the submission of the Federal Constitution, drafted and amended as aforesaid, to the electors of New South Wales, Victoria, Queensland, South Australia, and Tasmania for acceptance or rejection.

4. That the electors of New South Wales, Victoria, South Australia, and Tasmania have accepted the said Constitution as amended, and a vote of the people of Queensland will be taken on the 2nd September next.

5. That the "Victorian Australasian Federation Enabling Act, 1896," No. 1,443, provides as follows:—

Section 37—

"If two Colonies in addition to Victoria accept the Constitution, the Legislative Council and the Legislative Assembly of Victoria may adopt a joint Address to the Queen praying that the Constitution may be passed into law by the Imperial Parliament upon receipt from the Parliaments of such two Colonies either of similar joint or separate Addresses from each House at such Parliaments."

Section 38—

"When such joint Address has been agreed to, pursuant to the preceding section, the same shall be transmitted to the Queen with a certified copy of the Constitution."

6. That by the "Victorian Australasian Federation Enabling Act, 1899," No. 1,603, which amended Act No. 1,443, called therein the Principal Act, it is provided as follows:—

"This Act shall be incorporated with the Principal Act, and, except so far as inconsistent with this Act or inapplicable thereto, the provisions of the Principal Act relating to the submission of the Constitution to the Electors and its transmission to the Queen for legislative enactment by the Imperial Parliament shall *mutatis mutandis* apply to the Constitution as proposed to be amended in the particulars appearing in the First Schedule to this Act."

"The Constitution as proposed to be amended in the particulars appearing in the First Schedule to Act and as set forth in the Second Schedule to this Act shall—

(a) be submitted to the Electors for the Legislative Assembly in Victoria for acceptance or rejection by direct vote, and, if accepted by a majority of the Electors voting, may, afterwards,

(b) be transmitted by both Houses of Parliament to the Queen for legislative enactment by the Imperial Parliament."

7. In pursuance of these powers we, Your Majesty's most dutiful and loyal subjects, transmit to Your Majesty the said Constitution and the said Constitution amended as aforesaid, and pray that, upon the transmission to Your Majesty of joint or separate Addresses from the Houses of Parliament of two or more of the other Colonies, namely, New South Wales, Queensland, South Australia, Tasmania, and Western Australia, Your Majesty may be pleased to cause the accompanying Constitution, amended as aforesaid, to be submitted to the Imperial Parliament that it may be passed into law by the Imperial Parliament for the establishment of an Australian Commonwealth composed of those Colonies which unite with Victoria in a similar prayer to Your Majesty.

All of which we, the Members of the Legislative Council and the Members of the Legislative Assembly of Victoria, humbly pray Your Majesty to take into Your gracious and favourable consideration.

W. A. ZEAL, President.
F. C. MASON, Speaker.

No. 3.

NEW SOUTH WALES.

Address to the Queen from the Legislative Council and Legislative Assembly.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

May it please Your Majesty—

WE, Your Majesty's loyal subjects, the Members of the Legislative Council of New South Wales, in Parliament assembled, approach Your Majesty with assurances of loyal attachment to your Throne and Person.

We humbly desire to lay before Your Majesty :—

1. That pursuant to legislation passed by the Parliaments of New South Wales, Victoria, South Australia, Tasmania, and Western Australia, a Convention of Representatives of the Colonies named met and framed a Draft Federal Constitution during the years 1897 and 1898.

2. That in the beginning of the present year the Prime Ministers of the Colonies named, and the Prime Minister of Queensland, in Conference assembled, amended the said Draft Federal Constitution in certain respects.

3. That subsequently Federal Enabling Acts were passed by the Parliaments of New South Wales, Victoria, Queensland, South Australia, and Tasmania, and those Acts provided for the submission of the Federal Constitution, drafted and amended as aforesaid, to the electors of New South Wales, Victoria, Queensland, South Australia, and Tasmania, for acceptance or rejection.

4. That the electors of New South Wales, Victoria, South Australia, and Tasmania have accepted the said Constitution as amended. The vote of the people of Queensland will be taken on the 2nd September next.

5. That the Federal Enabling Act of New South Wales, which was passed during the month of April last, provided as follows :—

“ If two Colonies, in addition to New South Wales, accept the Constitution, both Houses of Parliament may adopt Addresses to the Queen, praying that the Constitution may be passed into law by the Imperial Parliament upon receipt of similar Addresses from the Parliaments of two such Colonies, and the Addresses so adopted shall be forthwith transmitted to the Queen, with a certified copy of the Constitution.”

6. In pursuance of those powers, we, Your Majesty's most dutiful and loyal subjects, pray that upon the transmission to Your Majesty of an Address from the Legislative Assembly of New South Wales to the same effect, and of similar Addresses from the Parliaments of two or more of the other Colonies, namely, Victoria, Queensland, South Australia, Tasmania, and Western Australia, Your Majesty may be pleased to cause the accompanying Constitution to be submitted to the Imperial Parliament for the establishment of an Australian Commonwealth composed of those Colonies which unite with New South Wales in a similar prayer to Your Majesty.

All which we, the Members of the Legislative Council of New South Wales, humbly pray Your Majesty to take into Your gracious and favourable consideration.

On behalf and in the name of the Legislative Council,—

JOHN LACKEY, President,

17th August, 1899.

JOHN J. CALVERT, Clerk of the Parliaments.

On behalf and in the name of the Legislative Assembly,—

J. P. ABBOTT, Speaker.

9th August, 1899.

F. W. WEBB, Clerk.

No. 4.

TASMANIA.

Address to the Queen from the House of Assembly.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

May it please Your Majesty—

WE, your Majesty's loyal subjects, the Members of the House of Assembly of Tasmania, in Parliament assembled, approach Your Majesty with assurances of loyal attachment to Your Throne and Person.

We

We humbly desire to lay before Your Majesty—

1. That, pursuant to legislation passed by the Parliaments of New South Wales, Victoria, South Australia, Tasmania, and Western Australia, a Convention of Representatives of the Colonies named met and framed a Draft Federal Constitution during the years 1897 and 1898.
2. That in the beginning of the present year the Prime Ministers of the Colonies named, and the Prime Minister of Queensland, in Conference assembled, amended the said Draft Federal Constitution in certain respects.
3. That subsequently Federal Enabling Acts were passed by the Parliaments of New South Wales, Victoria, Queensland, South Australia, and Tasmania, and such Acts provided for the submission of the Federal Constitution, drafted and amended as aforesaid, to the electors of New South Wales, Victoria, Queensland, South Australia, and Tasmania, for acceptance or rejection.
4. That the electors of New South Wales, Victoria, South Australia, and Tasmania have accepted the said Constitution as amended. The vote of the people of Queensland will be taken on the second September next.
5. That the Federal Enabling Act of Tasmania, which was passed during the month of January, 1896, provided as follows :—“ If two Colonies in addition to Tasmania accept the Constitution, both Houses of Parliament may adopt Addresses to the Queen praying that the Constitution may be passed into law by the Imperial Parliament upon receipt of similar Addresses from the Parliaments of two such Colonies, and the Address so adopted shall be forthwith transmitted to the Queen with a certified copy of the Constitution.”
6. In pursuance of those Powers we, Your Majesty's most dutiful and loyal subjects, pray, that upon the transmission to Your Majesty of an Address from the Legislative Council of Tasmania to the same effect, and of similar Addresses from the Parliaments of two or more of the other Colonies, namely, New South Wales, Victoria, Queensland, South Australia, and Western Australia, Your Majesty may be pleased to cause the accompanying Constitution to be submitted to the Imperial Parliament for the establishment of an Australian Commonwealth composed of those Colonies which unite with Tasmania in a similar prayer to Your Majesty.

All which we, the Members of the House of Assembly of Tasmania, humbly pray Your Majesty to take into Your gracious and favourable consideration.

On behalf and in the name of the House of Assembly,—

NICHOLAS J. BROWN, Speaker.

Passed the House of Assembly this 8th day of August, 1899,—
JOHN KIDSTON REID, Clerk of the House.

No. 5.

TASMANIA.

Address to the Queen from the Legislative Council.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

May it please Your Majesty—

WE, your Majesty's loyal subjects, the Members of the Legislative Council of Tasmania, in Parliament assembled, approach Your Majesty with assurances of loyal attachment to Your Throne and Person.

We humbly desire to lay before Your Majesty—

1. That, pursuant to legislation by the Parliaments of New South Wales, Victoria, South Australia, Tasmania, and Western Australia, a Convention of Representatives of the Colonies named met and framed a Draft Federal Constitution during the years 1897 and 1898.
2. That in the beginning of the present year the Prime Ministers of the Colonies named, and the Prime Minister of Queensland, in Conference assembled, agreed to suggest amendments in the said Draft Federal Constitution in certain respects.
3. That subsequently Federal Enabling Acts were passed by the Parliaments of New South Wales, Victoria, Queensland, South Australia, and Tasmania, and such Acts provided for the submission of the Federal Constitution, amended as aforesaid, to the electors of New South Wales, Victoria, Queensland, South Australia, and Tasmania, for acceptance or rejection.
4. That the electors of New South Wales, Victoria, South Australia, and Tasmania have accepted the said Constitution as amended. The vote of the people of Queensland will be taken on the second September next.
5. That, under the provisions of the Australasian Federation Enabling Act (Tasmania), 1896, and of the Australasian Federation Enabling Act, 1899, two Colonies in addition to Tasmania having accepted the Constitution, the Houses of Parliament of Tasmania are empowered to adopt Addresses to the Queen praying that the Constitution may be passed into law by the Imperial Parliament.
6. In pursuance of these Powers we, Your Majesty's most dutiful and loyal subjects, transmit to Your Majesty the said Constitution and the said Constitution amended as aforesaid, and pray that, upon the transmission to Your Majesty of an Address from the House of Assembly of Tasmania to the same effect, and of joint or separate Addresses from the Houses of Parliament of two or more of the other Colonies, namely, New South Wales, Queensland, South Australia, Victoria,

Victoria, and Western Australia, Your Majesty may be pleased to cause the accompanying Constitution, amended as aforesaid, to be submitted to the Imperial Parliament, that it may be passed into law by the Imperial Parliament, for the establishment of an Australian Federal Commonwealth composed of those Colonies which unite with Tasmania in a similar prayer to Your Majesty.

All which we, the Members of the Legislative Council of Tasmania, humbly pray Your Majesty to take into Your gracious and favourable consideration.

ADYE DOUGLAS, President of the Council.

Passed the Legislative Council this 23rd day of August, 1899,—

E. C. NOWELL, Clerk of the Council.

No. 6.

QUEENSLAND.

Address from the Legislative Council and Legislative Assembly.

TO HER MOST GRACIOUS MAJESTY VICTORIA, of the United Kingdom of Great Britain and Ireland,
Queen, Defender of the Faith, Empress of India, &c., &c., &c.

WE, Your Majesty's most faithful subjects, the Members of the Legislative Council of the Colony of Queensland in Parliament assembled,—

HUMBLY REPRESENT TO YOUR MAJESTY—

1. That we approach Your Majesty with the assurance of our devoted loyalty to Your Majesty's Throne and Person.

2. That, pursuant to legislation passed by the Parliaments of New South Wales, Victoria, South Australia, Tasmania, and Western Australia, a Convention of representatives of the Colonies named met, during the years 1897 and 1898, and framed a Draft of a Federal Constitution for Australasia.

3. That in the beginning of the present year the Prime Ministers of the Colonies named, and the Prime Minister of Queensland, in Conference assembled, amended the said Draft Federal Constitution in certain respects.

4. That subsequently the Parliaments of New South Wales, Victoria, Queensland, South Australia, and Tasmania severally passed a Federal Enabling Act, which provided for the submission of the Federal Constitution, so drafted and amended as aforesaid, to the electors of the said Colonies respectively for acceptance or rejection.

5. That the electors of New South Wales, Victoria, Queensland, South Australia, and Tasmania have accepted the said Federal Constitution so drafted and amended as aforesaid.

6. That the "Australasian Federation Enabling Act (Queensland), 1899," being the Federal Enabling Act passed as aforesaid by the Parliament of Queensland, contains the following provision:—

"If two Colonies, of which New South Wales shall be one, in addition to Queensland, accept the Constitution, the Legislative Council and Legislative Assembly may adopt Addresses to the Queen, praying that the Constitution may be submitted for enactment by the Parliament of the United Kingdom of Great Britain and Ireland subject to the adoption of similar Addresses by the Parliaments of such two Colonies.

"When such Addresses have been adopted they shall be transmitted to the Queen with a certified copy of the Constitution."

7. That the Constitution in the next preceding paragraph mentioned is the said Federal Constitution so drafted and amended as aforesaid.

8. That the Parliaments of the said Colonies of New South Wales, Victoria, South Australia, and Tasmania have adopted Addresses to Your Majesty of a similar nature to those mentioned in the provisions set out in the sixth paragraph hereof.

We, therefore, humbly pray that Your Majesty will be graciously pleased to take the premises into your Royal consideration, and to cause the said Constitution, of which the accompanying is a certified copy, to be submitted for enactment by the Parliament of the United Kingdom of Great Britain and Ireland, and that Your Majesty will be graciously pleased to cause all other necessary steps to be taken for the establishment of an Australian Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the said Constitution, consisting of Queensland and all those other Australasian Colonies whose Parliaments similarly pray Your Majesty.

And your Petitioners, as in duty bound, will ever pray.

On behalf and in the name of the Legislative Council,—

HUGH M. NELSON, President.

Legislative Council Chamber,
Brisbane, October 10, 1899.

On behalf and in the name of the Legislative Assembly,—

ARTHUR MORGAN, Speaker.

Mr. Chamberlain to Governor Earl Beauchamp.

(Sent 12:55 p.m., December 22, 1899.)

TELEGRAM.

I TRUST that it is true, as reported, that Delegates will be sent to England from Australia to assist and explain when Parliament is considering the Federation Bill. It is desirable that they should confer with Law Officers of the Crown and Her Majesty's Government on constitutional and legal questions involved, and such a conference might avoid any protracted discussion and opposition on technical points in Parliament. When may Delegates, if they are coming, be expected to arrive?

QUEENSLAND.

Lieutenant-Governor Sir S. W. Griffith to Mr. Chamberlain.

(Received February 28, 1900.)

Sir,

Government House, Brisbane, January 13, 1900.

I have the honour to transmit by this mail a Petition to Her Majesty the Queen, signed by twelve Members of the Legislative Council of Queensland, urging certain objections to the Draft Bill for the establishment of the Commonwealth of Australia.

2. The Petition does not appear to call for any comment.

The Right Honourable,
The Secretary of State for the Colonies,
&c., &c., &c.

I have, &c.,
S. W. GRIFFITH.

[Enclosure in No. 18.]

January 13, 1900.

To HER MOST GRACIOUS MAJESTY VICTORIA of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, Empress of India, &c., &c., &c.

WE, your Majesty's most faithful subjects, Members of the Legislative Council of the Colony of Queensland, humbly represent to Your Majesty:

That we approach Your Majesty with the assurance of our devoted loyalty to Your Majesty's Throne and Person.

That the Legislative Council of Queensland on the tenth October, 1899, agreed by a majority of sixteen to nine, to an Address to Your Majesty praying that a Bill for the establishment of "The Commonwealth of Australia" be submitted to the Imperial Parliament with a view of the same being enacted as a New Constitution for the Colonies of New South Wales, Victoria, South Australia, Tasmania, and Queensland.

That your petitioners as Members of the Legislative Council strongly object to the proposed new Constitution for the following reasons:—

Because, the Senate being elected by the people and not by the Parliaments of the States, there is no provision for the Representation of the Government of Queensland in the Federal Parliament, so that the Government of Queensland will be isolated, and yet the State subject to Taxation, and to have its laws abrogated without notice or power of appeal.

Because, the Senate will be absolutely powerless to conserve the rights of the several States, as it is subject to being outvoted by the double number of the Representatives at joint sittings of the Senate and the House of Representatives.

Because, the whole of the revenue of the Colony being pledged for the payment of the Interest and Principal of the Public Debt of Queensland, the transfer of the one-fourth of the Customs and Excise for the period of ten years, and thereafter of the whole of that source of Revenue, is a distinct breach of the contract under which the Colony has obtained loans to the amount of £34,000,000.

Because, the power of levying Taxation, raising Loans on the security of the Public Revenue, and of enacting Laws for the Government of the State, are transferred to the Federal Government, while the Liabilities for the payment of existing Public Loans and Interest thereon are to remain chargeable to the State, though it will be deprived of the power of raising money to meet the claims of the Public Creditors as Bondholders.

Because, in the event of the whole or part of a State territory being transferred to the Federal Government, there is no definite provision for its Representation in the Federal Parliament, or any Constitutional Rights reserved.

Because, the Federal Parliament is to have the power of limiting Appeals to Her Majesty's Privy Council, and thus interferes with the Prerogative of the Crown and the privilege of the subject.

We, therefore, humbly pray that your Majesty will, when the said "New Constitution" is submitted to the Imperial Parliament for enactment, also cause this Petition to be placed before them, so that the objections may be considered, and that the Commonwealth of Australia Bill may be amended or otherwise as the Imperial Government may see fit.

And Your Petitioners will ever pray.

(Signed)	A. C. GREGORY,	BOYD D. MOREHEAD,
	WILLIAM D. BOX,	JAS. COWLISHAW,
	ALEXANDER RAFF,	JOHN McMASTER,
	ROBERT BULCOCK,	CHAS. F. MARKS, M.D.,

Lieutenant-Governor Sir John Madden to Mr. Chamberlain.

(Received February 28, 1900.)

Sir,

Government House, Melbourne, January 20, 1900.

I have the honour to report that the Honorable Alfred Deakin, a Member of the Legislative Assembly of this Colony, has been authorised and accredited by this Government to proceed to England, and to confer with Her Majesty's Government, and the Law Officers of the Crown, on legal and constitutional questions, arising in connection with the Draft of a Bill to constitute the Commonwealth of Australasia, and also to explain and give assistance generally, when the Bill is before the Imperial Parliament.

A letter has been addressed to Mr. Deakin under my signature, advising him of his appointment.

I have, &c.,

comes before the Imperial Parliament, I have the honour to transmit a letter which I have received from my Prime Minister intimating the decision arrived at by this Government to be represented by Sir Philip Fysh, the Agent-General, as the result of the Conference of Premiers, who decided that each Colony should appoint a Delegate.

I have, &c.,

GORMANSTON.

[Enclosure in No. 23.]

Premier to Governor.

My Lord,

Premier's Office, Hobart, February 5, 1900.

Referring to the telegram received from the Secretary of State for the Colonies, in which the hope was expressed that Delegates would be sent Home from the Australian Colonies to explain and give assistance when Federation comes before the Imperial Parliament, I have the honour to inform Your Excellency that at a conference of Premiers of the Australian Colonies, held in Sydney on the 25th ultimo, it was decided that each Colony should appoint a Delegate.

Sir Philip Fysh, the Agent-General for this Colony, has been appointed by your Ministers to represent Tasmania, and he has been instructed to co-operate with the other Delegates in unitedly urging the passage of the Bill through the Imperial Parliament without amendment.

I have, &c.,

N. E. LEWIS, Premier.

Governor the Right Honourable
Viscount Gormanston, G.C.M.G.

No. 24.

Mr. Chamberlain to The Governors of New South Wales, Victoria, South Australia,
Queensland, and Tasmania.

My Lord [Sir],

Downing-street, March 23, 1900.

I have the honour to inform you that all the Delegates appointed to confer with Her Majesty's Government and the Law Officers of the Crown with regard to the Draft Commonwealth Bill, and to explain and give assistance during the passage of the Bill through Parliament, are now in London.

I have already had the pleasure of meeting and conferring with the Delegates, whose mission is proving of much advantage, and who are giving and receiving useful explanations as to the effect of the provisions of the Bill in consultation with the Law Officers.

I desire to convey the thanks of Her Majesty's Government to your Ministers for their action in joining in the appointment of this delegation, and thus facilitating the early introduction of the Bill for establishing the Constitution and its passage through Parliament.

I have, &c.,

J. CHAMBERLAIN.

No. 25.

NEW ZEALAND.

Agent-General to Colonial Office.

(Received March 28, 1900.)

Sir,

Westminster Chambers, 13 Victoria-street, London, S.W., March 27, 1900.

I am directed by the Agent-General to state that he has received a cablegram from his Government informing him that he has been appointed to represent the Colony of New Zealand in the matter of the "Commonwealth of Australia Constitution Bill," and that His Excellency the Governor has accordingly intimated his appointment to the Secretary of State.

I am, &c.,

WALTER KENNAWAY.

No. 26.

NEW ZEALAND.

Governor the Earl of Ranfurly to Mr. Chamberlain.

(Received March 28, 1900.)

TELEGRAM.

My Government desires to inform you that Reeves, Agent-General for New Zealand, is acting for and on behalf of New Zealand in respect of the Bill now before Imperial Parliament with regard to Australian Federation.

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FEDERATION OF THE AUSTRALIAN COLONIES.

(FURTHER PAPERS RELATING TO, PRESENTED TO BOTH HOUSES OF THE IMPERIAL PARLIAMENT, MAY, 1900.)

Printed under No. 5 Report from Printing Committee, 19 July, 1900.

TABLE OF CONTENTS.

Serial No.	From or to whom.	Date.	Subject.
		1900.	
1	Sir R. C. Baker (Chairman of Committee, Federal Convention).	January 8. (Rec. Feb. 13.)	Encloses an epitome and history of the clauses referring to an appeal from the High Court to the Privy Council.
2	Mr. Sidwell Shotton to Mr. Balfour.	Feb. 3. (Rec. in Colonial Office, Mar. 15.)	Calls attention to the demand of the Eastern Gold-fields of Western Australia for separation.
3	Mr. E. M. Kirwan (Gold-fields Reform League of Western Australia).	March 22.	Encloses a manifesto of the League, and states what has been done to bring the matter before the Colonial Legislature.
4	To Lieutenant-Governor Sir John Madden (Victoria).	March 22.	Requests that Mr. Shotton may be informed that the Secretary of State awaits the statement which the Rev. Mr. O'Gorman has been invited to submit on behalf of the Gold-fields district before deciding whether he can take any action.
5	The Australian Delegates	March 23.	Memorandum of some of the reasons which justify them in urging that the Commonwealth of Australia Constitution Bill may be passed into law in the form in which it was affirmed by the electors of the Federating Colonies.
6	Mr. E. M. Kirwan (Gold-fields Reform League of Western Australia).	March 23.	Transmits resolution of the London Branch of the League endorsing the action of the citizens of Perth in repudiating and condemning the Colonial Government for sending a Delegate to London.
7	The Mayor of Kalgoorlie (Western Australia).	(Rec. Mar. 24.) Telegram.	States that at a monster meeting, Eastern Gold-fields residents unanimously repudiated Mr. Parker, and desired no amendment to the Bill.
8	The Bank of New South Wales, and the Commercial Banking Company of Sydney (Ltd.).	March 27.	Requests, on behalf of themselves and other commercial institutions, that the right of appeal to the Privy Council may be retained.
9	Colonial Office	March 29.	Memorandum of objections of Her Majesty's Government to some provisions of the Draft Commonwealth Bill.
10	Dr. E. Paget Thurston.....	(Rec. Mar. 29.)	Calls attention to the serious danger of a revolution in Western Australia as a consequence of the unsatisfactory treatment of new-comers by the Government.
11	The Agent-General for New Zealand	March 30.	Encloses a memorandum showing certain amendments desired by New Zealand.
12	Mr. S. H. Parker	March 30.	Statement of the position of Western Australia.
13	To the Australian Delegates	March 30.	Encloses a copy of No. 8, and asks for their observations.
14	To the Bank of New South Wales.	March 30.	States that a copy of No. 8 has been sent to the Delegates, and that the matter is engaging the earnest attention of Her Majesty's Government.
15	Sir George Dibbs, and Messrs. Want and MacLaurin.	(Rec. Mar. 31.) Telegram.	Protests, on behalf of 82,000 voters of New South Wales, against the proposed abolition of the right of appeal to the Privy Council, and against the passing of the Bill unaltered.
16	The Australian Delegates.....	April 2.	Observes, with reference to No. 8, that the Delegates are unable to see why the question should be reopened.
17	To the Australian Delegates	April 3.	Transmits copy of No. 15.
18	The Australian Delegates.....	April 4.	Submits observations on No. 15.

Serial No.	From or to whom.	Date.	Subject.
		1900.	
19	To Governor Earl Beauchamp (New South Wales).	April 5.	Requests that No. 15 may be acknowledged.
20	To the Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania.	April 5. Telegram.	Suggests an amendment of the Bill which would allow of the entry of Western Australia into the Commonwealth.
21	Colonial Office.....	April 5.	Minutes of proceedings at a Conference between the Secretary of State and the Australian Delegates.
22	To the Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania.	April 5. Telegram.	Sets forth the objections of Her Majesty's Government to the operation of Clause 74 in restricting the right of appeal to the Privy Council, and earnestly appeals to the Governments to co-operate with the Secretary of State in securing the unopposed passage of an amended Bill.
23	Mr. Walter Griffiths.....	April 8.	Encloses a copy of the petition from the Eastern Gold-fields, praying for separation from Western Australia, and renews his request for an interview with the Secretary of State.
24	To the Australian Delegates	April 10.	Inquires whether they hold the view that Section 121 of the Bill allows of the admission of new States only within the conditions of the Constitution.
25	To the Agent-General for New Zealand.	April 10.	Replies to No. 11.
26	To Mr. E. M. Kirwan	April 10.	States that Mr. Chamberlain does not think that a personal interview would be desirable at the present time.
27	To Acting Governor Sir A. C. Onslo (Western Australia).	April 10.	Requests that Dr. Paget Thurston may be informed that his communication has been received.
28	Lieutenant-Governor Sir S. W. Griffith (Queensland).	(Rec. April 11.) Telegram	Reports that Ministers wish to publish the substance of No. 21.
29	The Australian Delegates.....	Extract. April 11.	States that the point referred to in No. 23 will be laid before a full meeting of Delegates after Easter.
30	The Agent-General for New Zealand.	April 11.	Regrets to learn that Mr. Chamberlain cannot see his way to take any further steps, and inquires whether the amendments desired by the New Zealand Government were rejected on their merits or because it was not considered desirable to amend or interfere with the Bill.
31	To Acting Governor Sir A. C. Onslo (Western Australia).	April 11. Telegram.	Asks when the Eastern Gold-fields petition may be expected.
32	To Governor Sir Gerard Smith (Western Australia).	April 11.	Requests that the Mayor of Kalgoorlie may be informed that No. 7 has been received.
33	To Mr. Edmund Barton	April 11.	Acknowledges receipt of No. 18.
34	To Mr. E. M. Kirwan	April 11.	Acknowledges receipt of No. 6.
35	Mr. Walter Griffiths.....	April 12.	Protests against the delay of the West Australian Government in forwarding the petition of the Eastern Gold-fields.
36	The Albany and District Separation League (Western Australia).	(Rec. April 12.) Telegram.	Notifies that a petition signed by 28,000 persons, praying for separation, was presented to the Governor on 17th March.
37	Acting Governor Sir A. C. Onslo (Western Australia).	(Rec. April 12.) Telegram.	Reports that petitions from the Eastern Gold-fields, and from Albany, were sent by mail of 7th April.
38	To Mr. Walter Griffiths	April 14.	Refers him, in reply to No. 23, to the letter to Mr. Kirwan of 10th April (No. 26).
39	To Lieutenant-Governor Sir S. W. Griffith (Queensland).	April 14. Telegram.	Agrees to publication of substance of No. 21, if other Premiers do not object.
40	The Albany and District Separation League (Western Australia).	March 14. (Rec. April 16.)	Notifies the despatch of a petition to the Queen praying for the separation of Albany from the Colony, and its addition to the proposed New Colony, and submits arguments in support of the request.
41	The Mayors of Coolgardie and Kalgoorlie (Western Australia).	March 15. (Rec. April 16.)	States that resolutions were unanimously passed at a public meeting at Kalgoorlie on Sunday, 4th March, repudiating Mr. Parker as the representative of the Colony, and asking for the separation of the Eastern Gold-fields.
42	To the Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania.	April 16. Telegram.	States that what Her Majesty's Government immediately desire is that the Delegates should be authorised to consult with Her Majesty's Government as to the best means of giving effect to the necessary alterations.
43	The Agent-General for New Zealand.	April 17. Telegram.	Asks whether the Premiers who meet in conference on the 19th inst. could be informed that the Imperial Government would be willing to insert a clause preserving the "open door" for New Zealand, provided Australia did not object.
44	To the Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania.	April 17. Telegram.	States that the New Zealand Government desire that provision should be made for entry of New Zealand at any time within seven years. The Secretary of State has suggested communication with the other Colonies.
45	To Mr. Walter Griffiths	April 18.	Informs him that the petition referred in No. 35 was forwarded by mail of 7th April.
46	Lieutenant-Governor Sir John Madden (Victoria).	April 19. (Rec. April 19.) Telegram.	Inquires whether there is any objection to the publication of Nos. 21, 42, and 44.

Serial No.	From or to whom.	Date.	Subject.
		1900.	
47	To the Agent-General for New Zealand.	April 20.	Informs him that it is the earnest desire of Her Majesty's Government to refrain from any amendment of the Bill that can possibly be avoided; it is scarcely likely that New Zealand would be unable to secure the same representation as is being conceded to the Original States.
48	To Lieutenant-Governor Sir John Madden (Victoria).	April 20. Telegram.	Agrees to publication of correspondence referred to in No. 46, if Premiers see no objection.
49	Lieutenant-Governor Sir John Madden (Victoria).	(Rec. April 22.) Telegram.	Forwards a message from the Premiers in conference, conveying their reply to No. 22.
50	Mr. Edmund Barton.....	April 23.	Expresses the opinion, in reply to No. 24, that Clause 121 does not empower the Parliament of the Commonwealth to admit new States on conditions subversive of Intercolonial Free Trade.
51	Mr. J. Harvey Finlayson.....	April 23.	Forwards a message from the Australasian National League, pointing out that an influential and numerous section have always favoured the retention of the right of appeal, and that there is no public expression of dissatisfaction with the proposal of the Imperial Government to amend the Bill.
52	The Bank of New South Wales and the Commercial Banking Company of Sydney (Ltd.)	April 24.	Encloses a petition to the House of Commons from various Banks praying for the retention of the right of appeal to the Privy Council, and asks that Mr. Chamberlain will present the petition.
53	The Australasian National League.	April 24. (Rec. April 24.) Telegram.	Strongly supports the retention of the right of appeal to the Privy Council.
54	Lieutenant-Governor Sir S. W. Griffith (Queensland).	(Rec. April 25.) Telegram.	Reports that, so far as he can judge, there is a great preponderance of public opinion throughout the Australian Colonies in favour of the acceptance of the suggestions of Her Majesty's Government as to the right of appeal to the Privy Council; and that public opinion is almost unanimous that the wishes of Western Australia should be met.
55	To the Bank of New South Wales.	April 26.	States that the petition enclosed in No. 52 will be included in papers to be presented to Parliament, but that Mr. Chamberlain would prefer that other arrangements should be made for its presentation to the House of Commons.
56	Governor Earl Beauchamp (New South Wales).	(Rec. April 26.) Telegram.	Forwards a resolution of the Sydney Chamber of Commerce protesting against any curtailment of the right of appeal to the Privy Council.
57	The Australian Delegates (except Queensland).	April 27.	Memorandum stating that, as the Premiers have been unable to accept the suggestions regarding the amendment of Clause 74, it is their (the Delegates') duty to press for the speedy passage of the Bill as prepared by the instructions of the Australian people; comments on No. 9.
58	Governor Lord Lamington (Queensland).	(Rec. April 27.) Telegram.	Reports that the Government and people of the Colony are in favour of the amendment proposed by Her Majesty's Government as regards the appeal to the Privy Council; the Chief Justices of South Australia, New South Wales, and Queensland are strongly of opinion that the amendment should be insisted on.
59	To Acting Governor Sir A. C. Onslow (Western Australia).	April 27. Telegram.	Informs him that the Premiers are not able to accept any amendment, and urges that the Government should make a resolute effort to bring the Colony into federation at once.
60	The Bank of New South Wales and the Commercial Banking Company of Sydney (Limited).	April 27.	States that they have made arrangements with Sir R. Hanson, senior member for the City, to present the petition enclosed in No. 52.
61	The Agent-General for South Australia.	April 28.	Communicates a resolution of the Adelaide Chamber of Commerce requesting Her Majesty's Government to insist on the retention of the right of appeal to the Privy Council.
62	To the Agent-General for New Zealand.	April 28.	Informs him that the Premiers have decided that they have no authority to accept any amendment of the Bill, and that Mr. Chamberlain does not feel justified in further pressing for amendments in a matter which appears to be one to be settled by the Australian Colonies.
63	To Mr. S. H. Parker.....	April 28.	Encloses copy of No. 59.
64	The Agent-General for New Zealand.	May 1.	Regrets the position taken up by the Secretary of State, and intimates that his Government still trust that Her Majesty's Government will take steps to protect the endangered interests of New Zealand.
65	Mr. J. H. Symon	(Rec. May 1.) Telegram.	States that the message of the Mayor is ridiculed; that the National League is a political minority; and that the Chamber of Commerce is practically a section of the League.
66	Mr. J. H. Symon	(Rec. May 2.) Telegram.	Urges that the proposed amendment will create a powerful and bitter party who will not rest till the wrong is righted, and must endanger the attachment to England.
67	Governor the Earl of Ranfurly (New Zealand).	(Rec. May 2.) Telegram.	Urges objections of his Ministers to the abolition of the right of appeal to the Privy Council.

Serial No.	From or to whom.	Date.	Subject.
		1900.	
68	Acting Governor Sir A. C. Onslow (Western Australia).	(Rec. May 2.) Telegram.	Reports that Parliament has been summoned for 17th May, when a Bill will be introduced providing for the immediate submission of the Federation Bill to the people, and that Ministers gratefully accept the offer to make provision for the subsequent entry of Western Australia.
69	To Governors of the Australian Colonies.	May 3. Telegram.	Asks for a telegraphic summary of the views of the leading newspapers as to Clause 74.
70	To Lieutenant-Governor Sir John Madden (Victoria).	May 3. Telegram.	Asks for a statement of his personal opinion as to the amendment of Clause 74.
71	Colonial Office.....	May 4.	Memorandum by Her Majesty's Government replying to No. 57.
72	Lieutenant-Governor Sir John Madden (Victoria).	(Rec. May 4.) Telegram.	Expresses the opinion that it is very desirable that the amendment proposed by Her Majesty's Government should be adopted.
73	To Acting Governor Sir A. C. Onslow (Western Australia).	May 4. Telegram.	Requests, in reply to No. 63, that he will convey to his Ministers the high appreciation entertained by Her Majesty's Government of their decision.
74	To Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania (repeated to Western Australia).	May 4. Telegram.	Informs them that the Bill will be referred to the people of Western Australia, and asks what alterations will be made in the clause providing for the representation of each State in the Parliament of the Commonwealth.
75	Governor Earl Beauchamp (New South Wales).	(Rec. May 4.) Telegram.	Forwards a resolution of a representative meeting of the New South Wales Bar that any infringement of the right of appeal to the Privy Council would be injurious to the public interest.
76	Governor Earl Beauchamp (New South Wales).	(Rec. May 5.) Telegram.	Forwards resolution of the Fire and Marine Underwriters Associations, protesting against any curtailment of the existing right of appeal to the Privy Council.
77	Governor Earl Beauchamp (New South Wales).	(Rec. May 5.) Telegram.	Forwards a message from the Stock Exchange, strongly urging the maintenance of the unfettered right of appeal to the Queen in Council.
78	Governor Lord Tennyson (South Australia).	(Rec. May 5.) Telegram.	Reports that of the two prominent newspapers, one favours the views of Her Majesty's Government, the other the views of the Delegates.
79	Governor Earl Beauchamp (New South Wales).	(Rec. May 5.) Telegram.	Forwards resolution of a large meeting of business, trades, and professional men in Sydney, emphatically protesting against any limitation of the present right of appeal to the Privy Council.
80	Governor Earl Beauchamp (New South Wales).	(Rec. May 5.) Telegram.	Reports on the expression of newspaper and public opinion as to the proposed amendment of Clause 74.
81	To Governor Viscount Gormanston (Tasmania) and Acting Governor Sir A. C. Onslow (Western Australia).	May 5. Telegram.	Asks for their personal opinions on the question of the amendment of Clause 74.
82	Governor Lord Lamington (Queensland).	(Rec. May 5.) Telegram.	Reports that the most important papers of the Colony are favourable to the amendment of Clause 74, and that he cannot trace any opposition.
83	Lieutenant-Governor Sir John Madden (Victoria).	(Rec. May 5.) Telegram.	Reports that the leading papers of both parties favour the retention of the present right of appeal.
84	Mr. J. R. Dickson (Queensland)...	May 5.	States his reasons for not signing the memo. of April 27, No. 57.
85	Acting Governor Sir A. C. Onslow (Western Australia).	(Rec. May 6.) Telegram.	Expresses his own opinion, as Chief Justice, that the right of appeal to the Privy Council should be preserved; Ministers are unanimously in favour of the amendment proposed by Her Majesty's Government.
86	Acting Governor Sir A. C. Onslow (Western Australia).	(Rec. May 6.) Telegram.	Reports that the newspapers of the Colony have not expressed themselves very definitely on the question of Clause 74; but the <i>Western Australian</i> strongly favours the course taken by Her Majesty's Government.
87	Governor Viscount Gormanston (Tasmania).	(Rec. May 7.) Telegram.	Reports that the amendment of Clause 74 is strongly favoured by the leading newspapers.
88	Governor Viscount Gormanston (Tasmania).	(Rec. May 7.) Telegram.	Reports that the Chief Justice is strongly of opinion that the right of appeal to the Privy Council should be maintained.
89	To the Agent-General for New Zealand.	May 7.	Replies to No. 64.
90	The Brisbane Chamber of Commerce.	May 7. (Rec. May 7.) Telegram.	Reports that the Chamber emphatically desire to retain the right of appeal to the Privy Council.
91	Acting Governor Sir A. C. Onslow (Western Australia).	(Rec. May 7.) Telegram.	Reports that both the metropolitan newspapers strongly urge that the existing powers of appeal to the Privy Council should be maintained in their full force.
92	Mr. Edmund Barton.....	May 8.	Encloses a memo. expressing the hope that Her Majesty's Government will even now pass the Bill without amendment, and disclaiming responsibility for the consequences if it is amended; encloses copy of correspondence with Mr. Dickson as to his position.

FEDERATION OF THE AUSTRALIAN COLONIES.

AUSTRALIA.

FURTHER PAPERS RELATING TO THE FEDERATION OF THE AUSTRALIAN COLONIES.

(In continuation of [Cd. 124] April, 1900.)

No. 1.

Sir R. C. Baker to Colonial Office.

(Received February 13, 1900.)

Sir,

President's Office, Adelaide, January 8, 1900.

I had the honour to forward to you, in February, 1898, copies of the proceedings and debates of the Federal Convention of Australia.

I venture to think that a statement of the somewhat peculiar procedure adopted by the Convention may facilitate the explanation of the Bill, and that the history of those clauses, on which there may be a difference of opinion, may be of value. I, therefore, take the liberty of sending you two memoranda—one relating to procedure generally,* and the other explaining the history of the clauses relating to an appeal to the Privy Council from the decision of the High Court, concerning which I am informed that it is probable amendments may be moved.

I have, &c.,

R. C. BAKER,

Chairman of Committees of the Federal Convention.

Enclosure in No. 1.

THE AUSTRALIAN FEDERAL CONVENTION, 1897-98.—THE COMMONWEALTH BILL.

Epitome of history of the Clauses referring to an Appeal from the High Court to the Privy Council.

The clauses referring to this subject, as presented to the Adelaide sitting of the Convention by the Drafting Committee, were as follows:—

- “The High Court shall have jurisdiction, with such exceptions and subject to such regulations ^{72 (afterwards sometimes 73 or 74).} as the Parliament may from time to time prescribe, to hear and determine appeals, both as to law and fact, from all judgments, decrees, orders and sentences of any other federal court or court exercising federal jurisdiction, or of the Supreme Court of any State, whether any such court is a court of appeal or of original jurisdiction; and the judgment of the High Court in all such cases shall be final and conclusive, provided that no fact tried by a jury shall be otherwise re-examined in the High Court than according to the rules of the common law.
- “Until the Parliament otherwise provides, the conditions and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.
- “No appeal shall be allowed to the Queen in Council from any court of any State or from the High Court or any other federal court, except that the Queen may, in any matter in which ^{73 (afterwards sometimes 74 or 75).} the public interests of the Commonwealth or of any State or of any other part of Her dominions are concerned, grant leave to appeal to the Queen in Council from the High Court.”

In order to enlarge the power of the Queen to grant leave to appeal, Sir George Turner (page 968, Adelaide *Hansard*) moved to leave out the words in Clause 73 “may in any matter in which the public interests of the Commonwealth or of any State or of any other part of Her Majesty's dominions are concerned.”

Sir George Turner stated that if this amendment were carried he would move the insertion of other words to also give the High Court the right to give leave to appeal to the Privy Council, so that leave to appeal could be granted either by Her Majesty the Queen or by the High Court.

The amendment was negatived by 17 to 14, and there was then a long debate (on the motion that the clause stand part of the Bill) as to the policy of restricting the right to appeal to the Privy Council. The clause, however, was carried by 22 to 12 (page 989).

So that, so far as the question under consideration is concerned, the clauses were not amended at the Adelaide sitting.

During the recess between the Adelaide and Sydney sitting the following amendments were suggested (but were not considered until the Melbourne sitting, January and March, 1898).

(a) *By the House of Assembly of New South Wales.*

That the High Court should have jurisdiction only by consent of the parties to the cause, and Clause 75 should be struck out.

These two suggested amendments, taken together, meant that by consent there should be an appeal from the Supreme Courts of various Colonies, and that on such consent being given the decision of the High Court should be final and conclusive, but that if no such consent was given the High Court should have no jurisdiction.

This was negatived without a division (31st January, 1898, Melbourne *Hansard*, page 321).

(b) *By the Legislative Council of New South Wales and by the Legislative Council of Victoria.*

That the judgment of the High Court should not be final and conclusive; *id est*, that there should be an appeal from the High Court to the Privy Council.

This

* Not printed.

This was negatived without a division (page 333), on the understanding that a motion was to be moved, giving to Her Majesty the Queen the right to grant an appeal. Sir George Turner accordingly moved an amendment to that effect, which was amended on the motion of Mr. Wise, and negatived by 22 to 14 (page 347).

(c) *By the Legislative Council of Victoria.*

Consequent on the words "and the judgment of the High Court shall in all cases be final and conclusive" being struck out, to insert words in lieu thereof, giving the right to appeal to either the High Court or the Privy Council. As the words were not struck out this amendment could not be put.

(d) *By the Assembly of Tasmania.*

To further restrict the right of Her Majesty the Queen to grant leave to appeal to those cases only in which "the public interests of parts of Her Majesty's dominions other than the Commonwealth are concerned." As this was in substance inconsistent with decisions arrived at by the Committee, it was not put.

(e) *By the Council of Tasmania.*

That Clause 75 (originally Clause 73) should be struck out (which would leave the right of appeal to the Privy Council the same as in Canada).

This was negatived on the motion that the clause stand part of the Bill.

N.B.—The House of Assembly of New South Wales also suggested that this clause should be struck out, but this suggestion must be considered in conjunction with suggestion (a).

On the 31st January, 1898, Mr. Wise moved that the following words be added after the words "final and conclusive" in the 74th Clause: "saving any rights which Her Majesty may be pleased to exercise by virtue of Her Royal prerogative." This was negatived by 22 to 14 (page 347).

The Bill having been gone through was then ordered to be reconsidered, and on such reconsideration, on the 11th March, Sir Joseph Abbott moved (page 2286) that the words formerly rejected by 22 to 14, viz.: "saving any right that Her Majesty may be pleased to exercise by virtue of Her Royal prerogative" be inserted in Clause 74 (formerly 72).

The object of Sir Joseph Abbott's amendment was to grant an appeal to the Privy Council, not as a matter of course, but if the Privy Council considered there were good *prima facie* grounds. This was carried by 20 to 19 (page 2323).

Mr. Symon then moved to add a proviso:

"Provided also that the right saved is that of granting leave to appeal, and shall continue only until Parliament otherwise provides" (page 2325).

This was agreed to without a division.

Clause 75 (originally 73) was then considered, and Sir Joseph Abbott moved to strike out the words: "in which the public interests of the Commonwealth of any State or of any other part of Her Majesty's dominions are concerned." This was carried without a division (page 2326).

Mr. Symon then moved to insert, in lieu of the words struck out, the words "not involving the interpretation of the Constitution of the Commonwealth or of a State."

It was submitted by Sir Joseph Abbott that the amendment could not be put, because it was a direct negative of the amendment carried by him on the preceding clause. On the other hand, Mr. Barton and Mr. G. Reid submitted that the amendment was only a qualification of the proposition granting the Privy Council the power to give leave to appeal, and fell short of a negative.

The Chairman said: "I do not think I can rule the proposed amendment out of order. Every clause, or nearly every clause, of a Bill in some way qualifies the preceding clauses. In some instances they extend, in others they limit, the operation of these clauses. This is not a direct negative."

Mr. Barton moved, as a qualification of Mr. Symon's amendment, to add to the words proposed to be inserted by Mr. Symon the words: "nor in any matter involving the interests of any other part of Her Majesty's dominions." This was agreed to (page 2333) without a division, and then Mr. Symon's amendment, as amended by Mr. Barton, was inserted by 21 to 17 (page 2335). A further amendment was then proposed by Mr. Symon, which was challenged on a point of order and withdrawn. Another amendment was then moved, "Provided that no appellant to the High Court shall afterwards appeal to the Privy Council in the matter of the same appeal." This was also withdrawn (page 2340). A division on the retention of the Clause 75 resulted—Ayes 21, Noes 17.

The Bill having been gone through was reported a third time, and, *inter alia*, Clauses 74 and 75 were ordered to be reconsidered.

The consideration of Clause 74 (now Section 73) was postponed, and Clause 75 was struck out on the motion of Mr. Barton, who moved to insert a new clause, the same as the clause struck out, with the substitution of the word "unless" instead of "or." The effect of the alteration was that the prerogative right of appeal in cases involving the public interests of any other part of Her Majesty's dominions, and also in cases involving the interpretation of the Federal Constitution, of the Constitution of a State when such public interests were concerned, was kept intact.

Mr. Glynn moved to strike out "not," with a view of giving Her Majesty the Queen the right to grant appeal in cases involving the interpretation of the Federal or of a State Constitution.

The amendment was negatived by 21 to 18 (page 2419).

The new clause was then agreed to (this is the Section 74 in the Bill except as to some small drafting amendments).

Clause 74 was then reconsidered, and Mr. Symon moved to strike out the words "Saving any right which Her Majesty may be pleased to exercise in virtue of Her Royal prerogative," inserted on 11th March on Sir Joseph Abbott's motion (page 2419).

It being apparent, however, that the majority in favour of the retention of these words (see page 2421) would be increased if a division were called for, the amendment was withdrawn.

An examination of the Bill as finally adopted will show that the wording of Clauses 73 and 74 is different (although the meaning is the same) from the clauses as framed in the Convention. This is accounted

accounted for by the fact that after the Bill had been gone through a third time, the Drafting Committee suggested some few hundred drafting alterations—these were passed *in toto*, having been certified to as correct by Mr. Barton and the Chairman.

The effect of the Bill as it now stands is as follows :—

- (1.) The appeal from a State Court to the Privy Council still remains—an appellant can appeal to either the Privy Council or the High Court, provided in either case that the interpretation of the Constitution does not arise.
- (2.) Her Majesty the Queen may grant leave to appeal from the High Court to the Privy Council, except in “matters involving the interpretation of the Federal Constitution or of the Constitution of a State, unless the public interests of some part of Her Majesty’s dominions other than the Commonwealth or of a State are concerned.”
- (3.) The Commonwealth Parliament may still further limit the matters concerning which Her Majesty the Queen may grant leave to appeal to the Privy Council.

R. C. BAKER,
Chairman of Committee, Federal Convention.

No. 2.

Mr. Sidwell Shotton to Mr. A. J. Balfour.

(Received in Colonial Office, March 15, 1900.)

[Answered by No. 4.]

Dear Sir,

Kenilworth Avenue, Beaconsfield, Victoria, February 3, 1900.

Mr. J. W. Kirwan, the proprietor of the *Kalgoorlie Miner*, and a leader in the West Australian federal movement, has written to me enclosing a rough draft of the petition to be presented to Her Majesty in reference to the great disabilities which many of her loyal subjects have to endure in the Eastern Division of the Colony. He has asked me to privately use any political influence I may have on behalf of the Separation League of West Australia.

The word “separation” is not one to conjure with in Conservative circles; but I can fully endorse all that is put forward on behalf of the residents of the Eastern Gold-fields of West Australia. Living as I did for some time on the fields, I know the grievances of the mining population to be very real.

The manner in which the Premier, Sir John Forrest, has treated West Australia in the matter of Federation has caused a great feeling against him in all political circles in the Eastern Colonies of Australia.

The separation movement is assuming almost irresistible force, and if some settlement is not come to I greatly fear that the exasperation of the miners will be intensified.

At the eleventh hour the West Australian Government may yield, but its leaders have given proof of great obstinacy and want of tact.

The imposition of Federation on West Australia by the Imperial Parliament would settle the matter, though I think that if separation were likely to be granted by the Imperial Authorities the Forrest Government would quickly yield to the just and reasonable demands of the mining community.

I enclose some West Australian newspaper cuttings,* and also extracts* from the Melbourne newspapers.

I hope you will forgive me troubling you at this very trying time, but the question seems to me a very urgent one, and delay will intensify the difficulty.

The men who have made West Australia what she is deserve every consideration, and I feel assured that they may safely leave their case in the hands of Her Majesty’s Government.

I beg, &c.,
SIDWELL SHOTTON.

No. 3.

Mr. E. M. Kirwan to Colonial Office.

(Received March 23, 1900.)

[Answered by No. 26.]

Sir,

Gold-fields Reform League of Western Australia.
London Branch—Offices: 112, Newington Causeway, S.E., March 22, 1900.

I am instructed by the Delegates from West Australia, and the Committee of the London Branch of the above League, to inform you that since the arrival of our second Delegate—Mr. W. Griffiths, M.P.—several meetings have been held with regard to the interview between the Rev. Father O’Gorman and Mr. Anderson of your Department. After mature deliberation it was finally decided to state that we find ourselves unable to put our grievances in a better form than as set forth in the League’s manifesto. Copies of this document have already been left at your office, but we again beg to present another copy.

With regard to the request to state in what way our grievances have been put before the Colonial Government, I am instructed to say that we commenced a search of the files of the West Australian *Hansard*, beginning at the 1896 session—the first to be opened after the arrival in the Colony of the present Governor, Sir Gerrard Smith. We found that the first speech in the Legislative Assembly was then made by Mr. Gregory, and that it contained a protest against the food duties. Should you consider it absolutely necessary, we will put on clerks to transcribe the many pages of the West Australian *Hansard* which have been filled during the last few years with motions and speeches upon our grievances, but we do not believe that Sir John Forrest or any of the Ministers will for one moment deny that we have exhausted every constitutional means, both in Parliament and out of it, of putting forth the injustices of which we complain in the hope of having them redressed.

Our

* Not reprinted.

Our last petition, signed by 18,000 adult male residents on the gold-fields, asked that the people of West Australia should be given the opportunity of voting upon Federation as in the case of all the other Australian Colonies. This petition was not only refused, but was treated by the Legislative Council with derision.

I have, &c.,

E. M. KIRWAN,

Honorary Secretary.

[Enclosure in No. 3.]

MANIFESTO OF EASTERN GOLD-FIELDS REFORM LEAGUE OF WESTERN AUSTRALIA.

“*Separation for Federation.*”

Adopted by the Conference held at Kalgoorlie, W.A., January 3rd, 1900.

WE, the Delegates from all public bodies representing the people resident on the Eastern Gold-fields of Western Australia, in conference assembled, have decided by a majority of 60 to 1 to initiate a movement to take advantage of the clauses existing in the Constitution Act of Western Australia which allows the division of that Colony into separate colonies. We deem it expedient that we should clearly state to those we represent, to our brethren in the Eastern Colonies, and to our fellow-citizens in the British Empire, the reasons that have compelled us to take so serious a step.

The population we represent are those persons living in Western Australia to the east of the 119th meridian, and to the south of the 24th parallel. They are almost entirely composed of arrivals from parts of the British Empire other than the western coastal districts of Western Australia. In 1890, at the time when Representative Government was granted, this portion of the Colony was to a large extent considered desert and worthless; but by the energy of these new arrivals it has been since converted into the largest producing gold-field in Australasia.

The older inhabitants, residing in the west, have viewed these new arrivals with suspicion, if not dislike, and have used the powers of Responsible Government entrusted to them most injuriously to the interests of the new comers. They have framed laws, they have imposed taxes and expended revenue for the especial advantage of those residing on the western coast, or older settled portions of the Colony; and by their wrongful legislation and administration they have grievously oppressed the residents in the eastern or newly-settled portion of the Colony, who form two-fifths of the total population of Western Australia as at present existing.

We are oppressed especially in the following matters:—

1.—*Inadequate Parliamentary Representation.*

In the matter of Parliamentary Representation we have been denied the advantage of manhood suffrage, which is one of the laws of the Colony. This has been withheld from us by regulations which make it extremely difficult, and in many cases impossible, for persons residing on the eastern gold-fields to have their names placed upon the electoral rolls. We are also denied that fair and reasonable representation which we are entitled to in both Houses of the Legislature. The residents in the districts mentioned number over 70,000, or nearly two-fifths of the inhabitants of Western Australia. Under the present Electoral Act they are allowed only 3 out of 24 members in the Legislative Council. In the Legislative Assembly, or popular House, which consists of 44 representatives, our numbers would entitle us to at least 20 members, whereas we are allowed only 6. In other words, while on a population basis the eastern gold-fields should have two-fifths of the total representation in each House, they are allotted exactly one-eighth in the Council, and rather less than one-seventh in the Assembly. But even this does not fully present our disability. If the last available electoral rolls, those of May, 1899, are examined, it will be seen that the number of electors is very disproportionate to the electorates. Three electorates, each with less than 100 on its roll, return one member apiece to the Assembly, while the 5,674 electors of the East Coolgardie electorate, as at present constituted, are allowed no more than one representative. To show the disproportion more exactly, should an election occur at present, East Coolgardie, with its 5,674 electors, would return one member, while 5,650 electors on the western coast and in the older parts of the Colony would return 21 members. Again, while the 11 highest electorates on the roll, comprising the gold-fields, Perth and Fremantle, contain 29,141 electors, the 11 lowest, which are virtually pocket boroughs, contain only 1,568 electors in all. At the last general election, out of a Legislative Assembly of 44 members, 18 were returned unopposed, and of these, 17 were supporters of the Ministry. The smallest constituency in which a contest occurred contained 165 electors; yet there were seven constituencies, each containing less than that number of electors, whose representatives were returned unopposed as supporters of the Government. (See Schedule VI.)

During the present session of Parliament an amendment of the Constitution, or so-called Redistribution of Seats Bill, was passed, but has not yet received the Royal Assent. This Bill is supposed to do away with these mischievous anomalies, but it only raises the proportional representation of the eastern gold-fields to one-fifth in the Legislative Council, or 6 members in a House of 30; and to one-fifth in the Legislative Assembly, or 10 members in a House of 50. It obliterates only two pocket boroughs, while it creates at least one new one, the Collie, called in the Bill the South-West Mining District. Nor are the numbers of the unopposed Ministerial seats materially altered in respect either of electors or of representation.

As an instance of the spirit of unfairness displayed in the Legislative Assembly when the Bill was being dealt with, it may be mentioned that a proposal to give North-East Coolgardie, with 3,370 electors, an additional member was defeated by 24 votes to 6, whilst on the same day the two Kimberley electorates, which it proposed to amalgamate, containing a total of 235 electors, were retained as separate electorates by 22 votes to 5. Thus, while 3,370 electors on the eastern gold-fields were given only one member, the favoured districts of Kimberley, with 235 electors all told, were allotted two members. While this state of things continues, all legislation and taxation fair to those resident on the eastern gold-fields must be, as in the past, either unconsidered or rejected, and we can have no hope of amelioration for years to come.

2.—*Revenue and Expenditure.*

We would next call attention to the unscrupulous treatment we have received, and are receiving, in the matter of finances. Dealing with the last four years, 1895-1899, we find that the Consolidated Revenue has been £9,935,004. During the same period the expenditure was £10,459,585, apart from loan expenditure

expenditure. This loan expenditure amounted to £6,180,464, and, therefore, the total expenditure during the four years in question has been £16,640,049. We find that during this period £2,448,789 was expended on railway administration, and £1,010,264 on posts and telegraphs. Deducting these amounts, because the published figures cannot be divided, we see that in all other directions there was expended in the colony of Western Australia during the last four years the total amount of £13,180,996. (See Schedule III.)

On September 27, 1899, a return was asked for in the Legislative Council of the expenditure on the Eastern Gold-fields during the four years in question. The return states (Schedule II) :—

(I.) Expenditure on the Eastern Gold-fields during the last four years (exclusive of the Northam-Menzies railway), £954,397 18s. 4d.

(II.) Cost of railways from Northam to Menzies, £984,935 3s. 7d.

From this we see that all the Government claims to have spent on these fields during the last four years is £1,939,332. But even this is an over-estimate. The section of railway from Northam to Southern Cross was passed before the discovery of the Coolgardie Gold-fields, and cost approximately £324,000, which sum was authorized before the period in question. Hence, on the Government's own showing, the total expenditure for the said period on the Eastern Gold-fields, including public works, has been £1,615,332, as against £11,565,664 spent on the coastal districts during the same period, or nearly £10 for every £1 spent on the Eastern Gold-fields. (Schedule III.)

But, further, we claim that the Eastern Gold-fields have contributed to the Consolidated Revenue Fund during that period considerably over £2,000,000, exclusive of railway receipts or profits. That is, to put it briefly, *the Government has derived half a million more revenue from the gold-fields during the last four years than it has spent on them out of the Consolidated Revenue and Loan Funds put together.* In other words, during the last four years the Government has, in effect, spent on the coastal or older districts, in addition to their own proper revenue, the entire loan expenditure, and half a million of the revenue derived from the gold-fields.

3.—Taxation.

Having dealt with the expenditure, we now turn to the taxation. On inspection, the guiding principle seems to be to get as much out of fields as possible by taxing our food, clothing, and other necessities, and generally all commodities, in the interests of farming products and local coastal manufactures. The stock-tax and the tax on chilled meat are notable examples. We then come to that most iniquitous form of taxation—differential railway rates. It is only necessary to mention that the carriage to Kalgoorlie is, per ton—

	Local.			Imported.		
	£	s.	d.	£	s.	d.
Timber—Jarrah or Oregon	0	19	1	4	2	8
Coal	0	16	1½	1	8	8
Jam	1	16	5	5	3	8
Tomato Sauce	1	16	5	5	3	8
Vinegar	1	16	5	4	2	8
Wine, according to quantity	1	8	9	7	12	7
Agricultural Produce	0	15	6	1	8	9

And as if this were not sufficient penalisation for our industries, the Government imposes a progressive tax on the values of gold ore sent as back loading to the coast at owner's risk. Commencing, say, with 15 oz. ore, the charge is 1½d. per ton per mile, and it rises for every additional 10 oz. another ½d. per ton per mile. Thus, 65 oz. concentrates sent from Kalgoorlie to the coast would cost £6 8s. 4d. per ton, and would be carried at owner's risk. There is also a rebate of 10s. per ton on ore over 2 oz. if carried 300 miles and treated on the western coast, or in the case of ore under 5 oz., a reduction of 30 per cent. on the carriage is made to induce its treatment in the colony. And, to penalise the gold-fields still further, the Government has imposed a tax on book profits shown by companies, whether distributed as dividends or otherwise.

4.—Refusal of Natural Railway Facilities.

In addition to denying us fair representation, over-taxing us, and diverting revenue and loans for the benefit of the older settled districts, the dominant minority on the coast have refused to allow us our natural harbour at Esperance, and have frequently stated that they will never permit the construction of a railway to the south coast. In order to force all our commerce and traffic to pass through Perth and Fremantle, they thus compel all goods from the eastern colonies to travel an extra 568 miles by sea, and 163 miles by rail. The distance from Fremantle to Coolgardie is 363 miles, whereas from Esperance it is only 200, in a direct line. (Schedule V.)

5.—Federation.

We, the residents on the Eastern Gold-fields, are unanimously in favour of the Commonwealth Bill recently passed by all the other five colonies of Australia. We recently presented to the Parliament in Perth a petition signed by 18,000 adult males on the gold-fields, supplemented by the signatures of 5,000 coastal residents—a total of 23,000 in all—requesting that the people of this colony should be allowed to vote on the Commonwealth Bill, as every other resident in Australia had already done. How was our petition received? The Lower House threw it out; the Upper House received it with derision, and rejected it by a majority of 13 votes to 4. We were thereby denied all chance of that union with our brethren in the other colonies which we so unanimously desire. The same Upper House also threw out, by a majority of 11 votes to 5, a resolution to adopt the Amended Bill that its own Committee had helped to draw up.

We do not believe in the sincerity of those in Parliament who profess a love for Federation and yet wish to amend the Commonwealth Bill. We of the Eastern Gold-fields are entirely opposed to the amendments made by the Perth Parliament, for we believe that their operation would be to our detriment. We do protest most strongly against that proposed amendment to which we understand

Sir John Forrest and his party attach the utmost importance, that, namely, which provides for the cutting of the colony into districts for the election of Members to the Federal Senate. We know too well in what spirit the districts would be parcelled out, and therefore we look on any amendment in this direction as the gravest calamity to Federation and the federal spirit. We know that the power granted would be exercised ruthlessly. Are not the Eastern Gold-fields at present only one district against the seven districts of the coast, and what guarantee would we have that we should not be placed in a similar position with regard to the Federal Senate?

The other amendments to which we, the residents of the gold-fields, are strongly opposed, are the proposal to retain the Western Australian tariff in full force for five years instead of a gradual reduction at the rate of 20 per cent. annually from the time of the establishment of uniform duties between the other colonics and the amendment abrogating the necessity for obtaining the consent of a State to the construction of railways in its own borders as far as the transcontinental railway is concerned. We know our brethren in the eastern colonies; we are quite prepared to trust them in the matter; and we regard it as an insult, alike to their intelligence and their honesty, to demand from them any such prior guarantee.

The fourth proposed amendment gives to the local Parliament the right to impose differential rates on the railways for five years. It is scarcely necessary to add that the system of differential rates is regarded by us with feelings of bitter hostility.

Separation.

Having exhausted all constitutional means such as are usually adopted, the residents of the Eastern Gold-fields summoned at Coolgardie, on December 13, 1899, a conference of representatives of all the public bodies on the fields, to consider what steps should now be taken to further the cause of Federation with our brethren in the east. That conference was the most representative ever held on these gold-fields. Representatives of all classes and interests were present. Capital and labour sent their delegates. Mayors, councillors, mine managers, and others were there. Every aspect of the question was carefully considered. As the result of our deliberations, we came to the conclusion that no course was left open to us but to start an agitation for separation, and a resolution to that effect was carried by a majority of 60 to 1.

Constitutional Provisions.

With regard to the possibility of separation, we would draw attention to two facts:—

(I.) The Imperial Parliament, when it granted Responsible Government to Western Australia, recognised and contemplated the possible subdivision of this colony into two or more separate colonies, and in the Western Australian Constitution Act made special provisions for the accomplishment of such separation (*vide* Act 52 Vic. 23, Sections 61, 62, 63.) (Schedule I.)

(II.) The Government of Western Australia retained these clauses in the Constitution Acts Consolidation Act as introduced into the Legislative Assembly last session, thereby showing that they recognised the right of Her Majesty's advisers to avail themselves of the same at any time they may think fit, also confessing their necessary subservience in this respect to the will of the Imperial Government.

Finances of the Proposed New Colony.

Having thus shown the possibility of instituting the new colony, we will now deal with its probable financial position, being careful to under-estimate rather than to over-estimate. For this purpose the revenue is calculated on the figures for 1899, the worst of the last four financial years, though it may be remarked that there is already an improvement on these figures of about 10 per cent. of revenue. A return that has been carefully made out shows that the proportion of the revenue contributed by the gold-fields during the last year was £510,902. This does not include the revenue derived from the railways and tramway. The sum of £510,902 has been calculated on the assumption that two-fifths of the total revenue of the colony was contributed by the Eastern Gold-fields. Those acquainted with the population, however, know that the proportion is really much greater, since, from the character of our people and our wealth, we consume much more than our share of dutiable commodities. (Schedule IV.)

According to the latest return available, the Government has made a profit on Eastern Gold-fields railways of £250,000 in three years over and above interest on capital and their proportion of rolling stock; and the cost of this line was £984,925. (Schedule II, Dempster's Return.) This is not included in the sum set down above, and could be considerably increased by proper management. In its official return the Government has estimated the annual expenditure on the gold-fields, exclusive of railway construction, at under £250,000 a year. (*Vide* Dempster's Return, Schedule II.)

Hence, our revenue is amply sufficient to cover not only our total annual expenditure, but all our public works as well.

Our position is best seen by comparing the new colony with Western Australia when it got Responsible Government in 1890:—

<i>Western Australia.</i>	<i>New Colony.</i>
Population, 45,000.	Population, 70,000.
No. of Electors, 5,860.	Electors on Roll, May, 1899, 15,352.
Revenue, £414,000.	Revenue (exclusive of railways), £510,902.
Debt, £1,367,333.	Debt, (?)
Railway, 188 miles, worked at a loss of £6,527, or £35 per train mile.	Railways, 250 miles, worked at a considerable profit,—probably £100,000.
Land, 1,000,000 square miles.	Land, 370,000 square miles.
Complicated coast.	Compact and simple.
Expensive communication.	Cheaper administration.
Nobody at their back.	Federated Australia is behind us.

Hence, in every respect the new colony, when she assumes Responsible Government, will present incontestable advantages over Western Australia at the same stage in the latter's career.

Indebtedness

Indebtedness of the New Colony.

It is provided in the Constitution Act that, should separation at any time be brought about, the public debt of the new colony shall be "that portion of the public debt of the colony (of Western Australia) that has been expended *within* the territory about to be separated." Now, if that provision is rigidly carried out by the Lords Commissioners of Her Majesty's Treasury, we shall have but a small public debt, if any, for, as has been already shown, most of our public works have been paid for out of revenue.

Western Australia's Loans Guaranteed.

There is one point, however, that must be remembered. We in no way wish to escape our liabilities, and we are bound to afford aid should the older portion of Western Australia be unable to meet its liabilities up to the total of the present debt. We have gone security for her; we have, so to speak, backed her bill, and we are prepared to acknowledge that liability should Western Australia fail to meet her engagements at present incurred. It must be clearly understood that we still acknowledge secondary liability to those persons who have advanced loans on the security of the whole of Western Australia, and we desire that such a clause shall be inserted in the Constitution of the new colony.

Of course, the public debt of the new colony under our Constitution Act will be apportioned by the Lords of the Treasury in London, and, as they will have all the facts before them, we await with perfect confidence their decision as to our share. (Schedule I.)

Summing Up.

Now for the conclusion of the whole matter: We have been, and are still being, grossly and grievously wronged and injured; we are denied our rights; we have sought redress by all other legitimate means and failed; and there is now only one constitutional means remaining—the separation of the Eastern Gold-fields into an independent colony. That separation is singularly and specially provided for under the Constitution Act. The revenue of the new colony will be ample. The district is compact, convenient, and easily administered. There is no obstacle in our way except the opposition of the coastal districts. Lastly, the fact of our federating with the other Australian colonies will cause the rest of Western Australia to federate also.

Remember our motto—"Separation for Federation."

Schedule I.

CLAUSES ALLOWING FOR SEPARATION.

The following are the particular clauses referred to in the foregoing manifesto, taken from the "Act to Confer a Constitution on Western Australia, and to grant a Civil List to Her Majesty."—Reserved 29th April, 1889; Royal Assent proclaimed, 21st October, 1890.

52 VICTORIÆ No. 23, CONSTITUTION ACT, 1889.

Part V.—Legal.

Section 61.—Nothing in this Act contained shall prevent Her Majesty from dividing the colony of Western Australia as she may from time to time think fit, by separating therefrom any portion thereof, and either erecting the same or any part thereof into a separate colony or colonies under such form of Government as she may think fit, or from subdividing any colony so created, or from reuniting to the Colony of Western Australia so created.

Section 62.—In the event of any such separation or other proceedings as in the last preceding section mentioned, the provisions of this Act shall apply, so far as practicable, to the Colony of Western Australia as for the time being existing.

Part VI.—Financial.

Section 63.—Whenever any portion of the Colony is about to be separated therefrom, the Lords Commissioners of Her Majesty's Treasury may, if requested by the Governor-in-Council, on report and accounts furnished by him, declare what portion of the public debt of the Colony has been expended within the territory about to be separated, and the interest and sinking fund, if any, upon the portion of the public debt mentioned in any such declaration shall be a reserved charge payable to the Government of Western Australia by the Government of the separated territory, and due provision for such reserved charge shall be made in any Act regulating the Constitution of the separated territory: Provided always, that nothing herein contained, and no declaration or provision as aforesaid, shall in any way prejudice or effect any security of any debentures which may have been issued by the Government of Western Australia before separation of any such territory.

Schedule II.

EXPENDITURE ON EASTERN GOLD-FIELDS.

Dempster's Return.

In the Legislative Council, on September 27th, 1899, a return was furnished, on the motion of the Hon. C. E. Dempster, showing—

- *1. Q.—The expenditure on the Eastern Gold-fields during the last four years? A.—£954,397 18s. 4d., exclusive of Northam to Menzies railway.
2. Q.—The cost of railway from Northam to Menzies? A.—£984,935 3s. 7d.
3. Q.—The cost of water conservation, tanks, experimental bores, condensers, and all public buildings? A.—£461,381 11s. 3d. (exclusive of Coolgardie water scheme, £159,674), and public buildings, £259,367.
4. Q.—The amount granted to the Coolgardie Exhibition? A.—£6,731 12s. 3d.

5.

* NOTE.—This is the only item in which four years is the time mentioned. The others presumably deal with cost from the date of the discovery of the Eastern Fields.

5. Q.—The cost of all surveys and roads? A.—£4,632 8s. 7d.	
6. Q.—The cost of police, magisterial protection and jurisdiction? A.—Police, £81,006 15s 3d.; magistracy, £12,585 8s. 5d.	
7. Q.—The estimated cost of water used by the Railway Department between Northam and Menzies? A.—£130,000 (estimated), exclusive of interest on construction and maintenance of dams.	
The above figures give an apparent total expenditure of	£1,939,332
From which has to be deducted the cost of the railway from Northam to Southern Cross, which was made prior to 1895, and is not within the Eastern Gold-fields	324,000
Making the total expenditure for the period	£1,615,332

Schedule III.

REVENUE AND EXPENDITURE.

The Revenue of the Colony during the last four years has been, to June 30th of each year:—

1895-6—See Statistical Register, p. 8, 1896	£1,858,695
1896-7— " " " p. 10, 1897	2,842,751
1897-8— " " " p. 37, 1898	2,754,747
1898-9—See Sir J. Forrest's Financial Statement in Budget Speech, p. 1427, <i>Hansard</i> , September 26th, 1899	2,478,811

Or a total for four years of

£9,935,004

The Expenditure of Consolidated Revenue for the same period was:—

1895-6—See Statistical Register, p. 9, 1896	£1,823,863
1896-7— " " " p. 11, 1897	2,839,453
1897-8— " " " p. 37, 1898	3,256,912
1898-9—See Sir J. Forrest's Speech, <i>Hansard</i> , p. 1428, September 26th 1899	2,539,357

Total Consolidated Revenue Expenditure for four years

£10,459,585

The Loan Expenditure for the same four years is as follows:—

1895-6—See Statistical Register, p. 29, 1898	£650,708
1896-7— " " " " " " " " " " " "	2,609,668
1897-8— " " " " " " " " " " " "	1,896,145
1898-9—See Sir J. Forrest's Budget Speech, <i>Hansard</i> , p. 1429, September 26th, 1899	1,023,943

Total Loan Expenditure for four years

£6,180,464 *

Total Expenditure for Four Years:—

† Candidates Unopposed (5).

‡ Candidates Unopposed (13).

The Electorates printed with *italics* are Electorates on Eastern Gold-fields, and those with *, numbering 35, have all been retained under the 1899 Act. This new Act allows for four additional seats for the Coolgardie Gold-fields, five new seats to Perth and suburbs, and also an additional seat for the Nelson Electorate, which has a roll of only 235 names. The number of Legislative Assembly Electorates were increased from 44 to 50.

Number of electors on roll May, 1899, 42,807, with 44 members in Legislative Assembly, or one to 972 electors. Eastern Gold-fields had 15,325 names on roll at that date, 6 members, or one for every 2,553 electors; while the Northern Pastoral District had 12 members, or one for every 191 electors on roll. The number of electors on roll when Western Australia got Representative Government was 5,360, and 3,734 voted at first election.

N.B.—It should be remembered that all Electorates are single.

No. 4.

Mr. Chamberlain to Lieutenant-Governor Sir John Madden (Victoria).

Sir,

Downing-street, March 22, 1900.

I have the honor to inform you that a letter* has been addressed to the First Lord of the Treasury by Mr. Sidwell Shotton, of Kenilworth Avenue, Beaconsfield, Victoria, in support of the objects of the Separation League of West Australia.

Mr. Shotton is aware that his letter has been referred to this Department; and I shall be glad if you will cause him to be informed that the Rev. Mr. O'Gorman, who has been delegated by the inhabitants of the Gold-fields districts of West Australia, has personally made a representation to this Department on the subject of their grievances, and has been requested to put his statements in writing in order that they may be communicated to the Colonial Government for consideration; and that until I am in possession of their reply I shall not be in a position to consider whether Her Majesty's Government could properly take any action in the matter.

I have, &c.,

J. CHAMBERLAIN.

No. 5.

Memorandum of the Australian Delegates.

As a preliminary to a further interview with the Right Honourable the Secretary of State for the Colonies, the Delegates appointed in pursuance of his invitation and under resolutions of the Conference of Premiers (copy appended, marked A) held in Sydney in January last, deem it well to put in writing some of the reasons which, in their opinion, justify them in strongly urging that the "Commonwealth of Australia Constitution Bill" may be introduced and passed into law in the form in which it was affirmed last year by large majorities of the electors of the Colonies of New South Wales, Victoria, Queensland, South Australia, and Tasmania. They are further impelled to this course by the force with which the Law Officers of the Crown have explained the views which, as they believe, render it desirable that some alterations should be made. The Delegates are also encouraged in this fuller expression of their views by the great kindness with which their representations have been invited and received.

While it is open to them to defend by argument the provisions in which it seems to be contemplated to propose alterations, the Delegates are necessarily precluded by the vote of the Australian majority from even appearing to treat with acquiescence the suggestion that any amendment is necessary. Seeing that they are directly instructed by unanimous resolution of the Premiers of their several Colonies to act together in expressing the earnest objection of the Australian people to any alteration of that which a vote so great and so emphatic has ratified, they are bound at the outset to make it an urgent though respectful request to the Secretary of State that the measure as a whole may be submitted to Parliament in the form in which it was transmitted by the five Legislatures immediately concerned, covered by loyal addresses from each of them praying that Her Majesty might be pleased to cause it to be so submitted. They conceive that the only complete assent which can be given to the addresses mentioned is to leave the text of the Bill intact both at and after its introduction. It is the Bill as it now stands, and no other, under which, as the Preamble truthfully recites, the people of five loyal Colonies have agreed to unite. That recital would not be justified if something or anything were either introduced or passed to which those Colonies have not agreed. It is that agreement of the people which is the root of the tree of union, and anything which strikes at the root endangers the whole tree. The Delegates therefore submit that the federating Colonies are morally entitled to have the whole Bill laid before Parliament in the very form in which it stood when the votes of the people, affirming it, constituted it the Australian agreement.

The Delegates have been asked whether, assuming that Imperial alterations are nevertheless to be embodied in this Australian agreement before its presentation to Parliament, it is in their opinion preferable that such changes should find place in the portion of the Bill colloquially called the "covering clauses" or in the portion proposed to be called "the Schedule." If their answer were to be read by those whom they represent as in any way an acquiescence in amendments, it is obvious that they would have no authority from Australia to answer such a question. But knowing that the question is not for a moment intended to produce any such impression, they would reply that they recognise that an alteration may, so far as its sense is concerned, be just as well placed in one part of the measure as another, inasmuch as the covering clauses and the Schedule must necessarily be read together. No doubt it would—in appearance—be the less objectionable method to place such alterations in the covering clauses. The result, however, of leaving the Schedule intact, while altering the covering clauses, would be the same, as the meaning and effect of the instrument would still be changed, and the substance of the objection would remain. But the question appears to the Delegates to be significant. If there is hesitation to place alterations in the Schedule rather than in another part of that whole which is the Agreement recited at the very outset, is it not because the change of meaning involved appears less striking in the one part of the instrument than in the other? Surely the question of alteration ought not to depend on such a consideration when the result in each case is identical. The Delegates submit with equal confidence and respect that it is quite clear on examination how vitally the provisions of the Schedule may be, and are likely to be, altered by amendments placed in the "covering clauses"; and therefore that the agreement is none the less altered although the place chosen for the alteration shows the greatest disposition to treat the parties to the agreement with all courtesy and kindness,—a disposition which it is scarcely necessary to say will be highly appreciated, but which the Queen's subjects in Australia will consider much less satisfactory than the holding sacred here of a compact held sacred there.

Copies of the appended paper (marked B) have been handed to the Delegates to indicate the amendments which are foreshadowed as possibly to be embodied by Her Majesty's Government in the "covering clauses."

Taking first, for reason of convenience, the proposal to declare the laws of the Commonwealth to be "Colonial Laws" within the meaning of the Colonial Laws Validity Act of 1865 (28 & 29 Vict. c. 63), the Delegates may be permitted to say that they agree in the opinion that a declaratory amendment of this kind relating to an Imperial Act would be looked for rather in the covering clauses than in the Schedule. But they are asked further whether it is in their view to be preferred that this declaration should be made by separate enactment or that it should, as indicated by the annexure, appear in the Bill? Guarding themselves as before against possible misapprehension elsewhere, they would reply, without admitting the necessity of any amendment, that a separate enactment appears to be a better vehicle for such a declaration than the measure itself. They cannot, however, refrain from expressing the view that the meaning of the Bill is clear without any such legislative explanation. The doubt expressed by the law advisers of the Crown arises, as they have explained, from the presence in Clause VI of the words "Colony shall mean any Colony or Province." It is submitted that this definition is framed simply for the purpose of clearly including South Australia in the Bill, and can in no wise exclude the definition of "Colony" in the Colonial Laws Validity Act from applying to the Commonwealth in relation to its laws. The definition in the Commonwealth Bill arises from the fact that South Australia has from time to time been variously designated in legislation as a Colony and as a Province. For instance, in the Imperial Statutes 4 & 5 Wm. IV c. 95, and 1 & 2 Vict. c. 60, the designation is "Province"; in 5 & 6 Vict. c. 61, "Colony" and "Province" are both used for the same purpose; in 4 & 5 Vict. c. 13, in 13 & 14 Vict. c. 59, and in all Imperial Acts relating to South Australia since the passage by the Local Legislature of the Constitution Act (18 & 19 Vict. No. 2) the term "Colony"

"Colony" is used; but in the Act last mentioned, and in all other local legislation since its passage, South Australia has uniformly been referred to as a "Province." Apart from legislation, the Letters Patent, Commissions, and Instructions, issued in connection with the offices of Governor, Lieutenant-Governor, and Administrator of the Government for South Australia, have all employed the word "Colony" alone to designate that possession, while the Regulations and other official documents under or in consequence of Local Acts have as regularly referred to South Australia as a "Province." It was merely for the purpose of avoiding the constant repetition of the distinction between the words "Colony," as applied to the other States, and "Province," as applied to South Australia, that the definition in question was placed in the Bill. Inasmuch as Imperial Legislation has so generally referred to South Australia as a Colony, it may be that excessive caution has been used by the draughtsmen in this instance. If after this explanation any doubt remains, the Delegates are of opinion that the real point of objection is in the definition itself as introducing that doubt; and if the definition is unnecessary it would not seem to be convenient to counteract any doubt by amendment elsewhere in the Bill. The Commonwealth appears to the Delegates to be clearly a "Colony," and the Federal Parliament to be a "Legislature" within the meaning of the Colonial Laws Validity Act, and they cannot think that the larger meaning given to the word "Colony" in Clause VI to save words can be held to take away the Protection of the Act of 1865 from any law passed by the Federal Parliament. But the Interpretation Act of 1889 (52 & 53 Vict. cap. 63) might itself be cited in support of the same contention. That Act prescribes that, "unless the contrary intention appears, the expression 'Colony' in any Act passed since the 1st January, 1890, is to mean any part of Her Majesty's Dominions, exclusive of the British Islands and of British India." The Interpretation Act goes on to require that where parts of such Dominions are under both a Central and a Local Legislature, all parts under the Central Legislature shall, for the purposes of the definition, be deemed to be one Colony. It might be argued that this definition secures the application of the Validity Act to Colonial Statutes passed since the end of 1889; and if this be so it would be strange if the occurrence in Clause VI of the few words quoted were held to deprive the laws of the Parliament of the Commonwealth of Australia of the same protection. It may further be observed that the Constitution of Canada contains no words similar to those proposed to be here inserted, even though that Constitution was enacted prior to 1889; yet it will not be denied that the Colonial Laws Validity Act applies to Dominion Statutes. What then is there which excludes its application to the Statutes of the Commonwealth?

The Delegates turn now to the suggested amendment of Clause V by the omission of the part of that clause which prescribes that "laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth." It will be observed that this provision is much more restricted than that made by Section 20 of the Federal Council Act of 1885. Under the present measure the provision is made to apply only to cases in which a British ship begins and concludes her voyage within the limits of the Commonwealth. But Section 20 of the Federal Council Act applied to every British ship which commenced her voyage in any one of the colonies concerned, and also to every British ship which concluded her voyage in any one of them. In the former case the Federal Council Law would apply to a British ship on the whole of her voyage from Australia to a port beyond the Commonwealth; in the latter case, to a British ship on the whole of her voyage from any point beyond the Commonwealth to Australia. In the present measure, so wide an application is not for a moment desired to be given to any law of the Commonwealth; yet it is now sought to further restrict, in the hands of a much more competent Legislature, a power which fifteen years ago the Imperial Parliament did not consider too wide for a much inferior body: a body neither elective nor bi-cameral, and lacking both a responsible Executive and a Treasury. It has been further suggested that the matter is sufficiently provided for by the Merchant Shipping Act of 1894. If this view is correct, then the phrase objected to is at the worst a redundancy, and is therefore harmless. The Merchant Shipping Act of 1894, practically repeating the provisions in this behalf of Section 4 of the Merchant Shipping Act of 1869, gives in its 736 Section power to the Legislature of a British Possession to make laws regulating its coasting trade under conditions which need not here be set out. It is also true that the term "British Possession," whether as defined in the Act of 1869 or in the Interpretation Act of 1889, which preceded the present Merchant Shipping Act, would include such a Possession as the Commonwealth of Australia, which, under the Interpretation Act, would be deemed to be one British Possession, including all parts under the Central Legislature. The expression "Coasting Trade" is not defined in any of the Acts cited; it may be taken to include the trade of vessels plying merely between the ports of a Possession within territorial limits. But the provision in the Commonwealth Bill, to which exception has been taken, would apply to such ships, on a voyage solely between two ports of the Commonwealth, even if they drifted or were blown outside the 3-mile territorial limit: the beneficial effect therefore would be, that a vessel on such a voyage would not be exposed to the anomaly of being subject to one set of laws at 2½ miles from the coast, and to another set of laws at 3½ miles from the coast. That this should be prevented is surely not too much to ask. Moreover, the provision in the Bill removes a further anomaly by protecting a vessel which passes from the territorial waters of one Colony into those of another from being subjected to a change of laws in that very operation, and by applying to her the uniform laws of the Commonwealth during the whole of her passage between Commonwealth ports. While, then, the power is less than that conceded to the Federal Council, and never abused, it is larger than that conceded by the Merchant Shipping Act, but larger only for the most beneficial purposes. The reasonableness of the right claimed appears the more clearly when it is considered that one of the most useful purposes of the Constitution is the facilitation of trade between the several Colonies to an extent not hitherto possible, with a clear tendency towards obliterating, in respect of commerce, those arbitrary lines between colony and colony which in the past have been productive of so much friction and hindrance.

There remain for explanation the enactments relating to appeals to the Judicial Committee of the Privy Council. The most important of these is to be found in the first part of Clause 74. It has been suggested that it ought to be nullified, first by striking out from the second covering clause the words "this Act shall bind the Crown," and adding a consequent amendment in that clause; and next by appending to covering Clause V the following words: "nothing in this Act, or in the Schedule set forth as the Schedule to this Act, shall affect any prerogative of the Crown to grant special leave to appeal to Her Majesty in Council." The meaning of Clause 74 would be entirely changed if the alteration suggested were made, and the effect of the reading together of the covering clauses and the Schedule would be

that

that the Schedule itself would be something materially different from that which the people of the five Colonies have made their agreement. Such a result would, in the view of the great majority of the Australian people, be nothing short of a calamity to Australian self-government.

Turning to Clause 74 itself, the discussion of which is forced on them by the suggestion, the Delegates would point out that the effect of the clause is by no means so far-reaching as has been supposed in many quarters. The contention for the finality of the judgments of their High Court is based by Australians on the argument that if they are fit, as is conceded, to make a Constitution for themselves, they are fit also to say what that Constitution means, and for that purpose they should be allowed to rely on the decisions of their High Court.

Judicial knowledge of local conditions, invaluable always, is indispensable in the interpretation of Constitutions.

Her Majesty's Judges, Australian as well as British, will ever be men of conspicuous ability and integrity, whose impartiality will not be prejudiced by their domicile:—are not English appeals heard in the House of Lords?

Few parts of the Bill were more keenly discussed at the several Sessions of the Convention than those which have been termed, for brevity, the Privy Council clauses. A mere reference to the index of the Debates will show how numerous and varied were the proposals discussed in the Convention. These discussions were conducted with absolute publicity, and before the provisions finally took their present shape there had been two lengthy adjournments of the Convention, during which the Press and the public had closely debated the matter, and during which also the several Legislatures of the Federating Colonies, with the exception of Queensland (which had not been represented at the Convention), but which affirmed the Bill as framed, had made their varying suggestions for the amendment of this as well as the other parts of the Bill, including the covering clauses. As the result of the discussions during the earlier sessions of the Convention and during its adjournments, and of strongly sustained debates in the final Session at Melbourne, Clause 74 took the following, which is its present, form: "No appeal shall be permitted to the Queen in Council in any matter involving the interpretation of this Constitution or of the Constitution of a State, unless the public interests of some part of Her Majesty's Dominions, other than the Commonwealth or a State, are involved. Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise, by virtue of her Royal prerogative, to grant special leave to appeal from the High Court to Her Majesty in Council. But the Parliament may make laws limiting matters in which such leave may be asked." The concluding sentence of the clause, it is conceived, confers on the Commonwealth a right to do that which each State at present has power to do, subject to reservation of the Bill as affecting the prerogative, in accordance with the ordinary vice-regal Instructions. (See Instructions to Australian Governors, dated July, 1892, Clause VIII, paragraph 7, under which the Governor is to reserve for the signification of the Royal pleasure "any Bill of an extraordinary nature and importance, whereby Our prerogative, or the rights and property of Our subjects not residing in the Colony, or the trade and shipping of the United Kingdom and its dependencies, may be prejudiced.") The framers of the Instructions clearly appear to have considered that the Colonies had full rights of legislation in such matters as paragraph 7, just quoted, sets forth, subject only to reservation for the Royal pleasure; and then only when previous instructions upon the particular Bill had not been obtained through one of the principal Secretaries of State, or when the Bill did not contain a clause suspending its operation until the signification of the Royal pleasure. The last sentence of the clause, therefore, seems merely to confer on the Federation that legislative power which has long been possessed by each of the constituent States.

The second part of Clause 74, beginning with the words "except as provided in this section," makes no mention of appeals to the Queen in Council from the Courts of the States or Colonies, and it is submitted that the appeal which now lies to Her Majesty in Council from those Courts is not taken away by the Bill as it stands, since the proposed enactment deals only with appeals to Her Majesty in Council from the High Court, for which appeals it was necessary for the Constitution to make provision. The immediately preceding clause, 73, merely gives jurisdiction to the High Court with respect to appeals. It does not abolish appeals to the Queen in Council with respect to State Courts, and as there is no enactment elsewhere that appeals from them are to cease, the prerogative remains, and the appellant may take his case either to the High Court or to the Privy Council. But when, and only when, he goes to the High Court in one of the limited class of cases set forth in the first part of Clause 74, he must abide by the decision of that Court. Further, it will be remembered that the public interests of any part of Her Majesty's Dominions other than the Commonwealth, or a State of the Commonwealth, cannot in any case remain the subject of a final decision by the High Court, even where the interpretation of this measure or of a State Constitution is involved. The Delegates have thus summarised what appears to them to be the effect of the provisions in the Schedule, and consideration is asked whether the clauses are of such a nature as to justify alarm, and whether it is worth while to incur the risk of serious dissatisfaction in Australia for the sake of preserving the small degree of prerogative affected.

The clauses are framed with relation to things as they exist, and even if the sovereign power of Parliament is ever to be exercised over the heads of the Australian people, we submit most earnestly that the present is pre-eminently a measure in respect of which that power should not be exercised.

The Delegates would here refer to the action of the Imperial Government in respect of the Federal Council Bill in 1885. In his circular despatch informing the Governors of the several Colonies of the passage of that measure, the then Secretary of State for the Colonies, having remarked that it had passed the House of Lords and was awaiting its second reading in the House of Commons when fresh advisers of Her Majesty had assumed office, said that "it would have been inexpedient to make any avoidable alterations in the Draft" prepared by the Convention at Sydney, "unless such alterations could be previously considered by the same or a similar Convention." Now that the popular approval has been invoked and given, to submit proposed amendments to the "same" Convention is impossible, because its legal existence has ended, and to submit them to a "similar Convention" would be insufficient unless the Convention were popularly elected and its decisions popularly ratified. But the submission of amendments to a third referendum at this late stage would be regarded by the public in Australia as harassing, even if its vote were called for without a previous discussion of the amendments by another elected Convention. Apart from the expense of such proceeding, the delay would be most vexatious and unpopular, and beyond and above such considerations, the distrust of their previous decisions so manifested

would be resented by the electors, whose agreement has been arrived at only after many years of agitation and controversy. The Delegates are unable to see that any fresh tangible facts have intervened since the referendum of 1899 to justify the expectation that the well-considered vote of that year would be reversed in respect of the matters in question. They feel that there are strong grounds for anticipating that the Governments of the several Colonies would emphatically protest against the expense, the delay, the turmoil, and the disturbance of normal conditions which would accompany a third referendum on, perhaps, a single point. But they admit at the same time that the logical result of the attempt to make any alteration of substance is to appeal a third time to a constituency containing nineteen-twentieths of the population of the Australian Continent, and spread over more than two millions of square miles—that is to say, over an area almost two-thirds as large as the Continent of Europe;—all this at an enormous expense, and merely for the purpose of ascertaining whether Australians, who have twice decided that the makers of laws are in their opinion fit to interpret them, are prepared to reverse that decision in derogation of their own competency. It is not to be supposed that such a burden could be laid upon the people without awaking among them a feeling that they are seriously aggrieved. If, on the other hand, alterations were forced on them without their consent, something which is not their agreement, and for which they have never asked, would thus be forced on them, and the sense of injustice would be equally strong. It is respectfully urged that the granting of this Constitution without amendment is the only way out of such a dilemma.

When the Federal Council Bill was before the House of Commons in August, 1885, a right honourable gentleman, respected by all parties as a high constitutional authority, directed attention to several points in relation to that Bill which discover marked differences between its history and character and those of the present measure. He remarked that there was no evidence to show that the Bill then presented had really been satisfactorily discussed and considered in the Colonies themselves. He said that it emanated, in the first instance, from a small coterie of Prime Ministers. He declared that the Bill would have come before the House with greater authority if they had reason to believe that proper pains had been bestowed upon it, and that proper efforts had been made to obtain full publicity and discussion for it in the Australian Colonies themselves. He condemned it as a very scanty, fragmentary, and imperfect sketch of a Federal Constitution. Nevertheless, he was content that the House should pass the Bill in the form in which the Colonies had asked it to do so, and as a matter of favour to them, but the responsibility of its formation would rest substantially more with the Colonies than with Parliament. The action of both Houses confirmed this view.

In comparison, how irresistible is the present case!

Emanating in the first instance from the Australian electors, through specially chosen representatives, moulded by these with infinite pains, framed in full publicity, and then discussed for nearly twelve months in the debates of the Convention, the columns of the Press, and the meetings of the people, the measure now to be submitted to the Imperial Parliament differs in every one of these respects, and radically differs, from the Federal Council Bill. For the "scanty, fragmentary, and imperfect sketch" of Federal Union presented in 1885 there has now been substituted a Constitution which may without presumption be characterised as complete in all its parts, and, after most anxious consideration of previous Federal Charters, approved and accepted by the Parliaments and the people of the Federating Colonies. If British statesmen were content, as they showed that they were content, to pass the former measure in the shape given to it by Executive Governments alone, how much stronger is now the appeal of Australia to the sense of justice and generosity of Government and Parliament when they are asked to confirm the Constitution of her Commonwealth, framed by the chosen of her people and solemnly agreed to by that people themselves.

In the speech from which extracts have already been taken, it was justly said that the responsibility for the Federal Council would rest with the Colonies themselves. Five Australian Colonies, by an aggregate majority of nearly three to one of their people, have affirmed with the utmost emphasis that they are prepared to take the responsibility of their own Constitution. They are of British stock; they are fellow countrymen of the people of this Kingdom; they have no more confidence in themselves and in their power to work out their own destiny than is right and just in men of their blood; that they have no less, events have proved. Not arrogantly, but with the pride of their race, they ask to be accounted fit for those responsibilities which men of that race have never shirked and seldom abused. If they are given what they now ask, they will know that they have received a trust which their fellow subjects in this Kingdom will find them able to fulfil. It placing that trust in their hands the Mother Country will bind her Colonies to her with something stronger than words upon paper: with the high confidence which justice engenders, and the affection which gratitude evokes and perpetuates.

"A."

RESOLUTION PASSED AT THE CONFERENCE OF THE PREMIERS OF THE AUSTRALASIAN COLONIES ON THE 25TH JANUARY, 1900.

"THAT, in compliance with the request contained in the despatch received from the Secretary of State for the Colonies, that Delegates from the Australian Colonies should be sent to England to explain and give assistance when the Australian Commonwealth Bill comes before the Imperial Parliament, this Conference is of opinion that each Colony should appoint a Delegate, and that such Delegates when appointed should represent all the Federating Colonies in unitedly urging the passage of the Bill through the Imperial Parliament without amendment, and in explaining any legal or constitutional questions that may arise."

A.D. 1898.

DRAFT OF A BILL.

To Constitute the Commonwealth of Australia.

WHEREAS the people of [*here name the Colonies which have adopted the Constitution*], humbly Preamble. relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established: And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in the present Parliament assembled, and by the authority of the same, as follows:—

I. This Act may be cited as "*The Commonwealth of Australia Constitution Act*."

Short title.

II. ~~This Act shall bind the Crown and its~~ *The provisions of this Act and of the Constitution set forth in the Schedule to this Act* referring to the Queen shall extend to Her Majesty's Heirs and Successors in the Sovereignty of the United Kingdom.

Act to bind Crown, and extend to the Queen's Successors.

III. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of [*here name the Colonies which have adopted the Constitution*] shall be united in a Federal Commonwealth under the name of "The Commonwealth of Australia." But the Queen may, at any time after the Proclamation, appoint a Governor-General for the Commonwealth.

Proclamation of Commonwealth.

IV. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several Colonies may, at any time after the passing of this Act, make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.

Commencement of Act.

V. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the Courts, Judges, and people of every State, and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be *Colonial Laws within the meaning of the Colonial Laws Validity Act, 1865, in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.*

Operation of the Constitution and laws.

Nothing in this Act or in the Schedule set forth as the Schedule to this Act shall affect any prerogative of the Crown to grant special leave to appeal to Her Majesty in Council.

VI. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.

Definition.

"Colony" shall mean any Colony or Province.

"The States" shall mean such of the Colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the Northern Territory of South Australia, as for the time being are parts of the Commonwealth, and such Colonies or Territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called a "State."

"Original States" shall mean such States as are parts of the Commonwealth at its establishment.

VII. "*The Federal Council of Australasia Act, 1885*," is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Repeal of Federal Council Act.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or to any Colony not being a State by the Parliament thereof.

VIII. After the passing of this Act the "*Colonial Boundaries Act, 1895*," shall not apply to any Colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing Colony for the purposes of that Act.

Application of Colonial Boundaries Act.

IX. The Constitution of the Commonwealth shall be as follows:—*set forth in the Schedule to this Act*—

Constitution and its Divisions.

SCHEDULE.

THE CONSTITUTION.

This Constitution is divided as follows:—

CHAPTER I.—THE PARLIAMENT:

PART I.—General:

PART II.—The Senate:

PART III.—The House of Representatives:

PART IV.—Both Houses of The Parliament:

PART V.—Powers of the Parliament:

CHAPTER II.—THE EXECUTIVE GOVERNMENT:

CHAPTER III.—THE JUDICATURE:

CHAPTER IV.—FINANCE AND TRADE:

CHAPTER V.—THE STATES:

CHAPTER VI.—NEW STATES:

CHAPTER VII.—MISCELLANEOUS:

CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

THE SCHEDULE.

No. 6.

Mr. E. M. Kirwan to Colonial Office.

(Received March 23, 1900.)

[Answered by No. 34.]

Gold-fields Reform League of Western Australia.
London Branch—Offices: 112, Newington Causeway, S.E., March 23, 1900.

Sir,—

I am instructed to inform you that at a special general meeting of the above Branch, held last evening at the offices, 112, Newington Causeway, S.E., the following motion was unanimously adopted:—

Moved by the Chairman (Mr. W. Griffiths, M.P.), seconded by Mr. E. M. Kirwan: "That this Branch endorses the action of the citizens of Perth in public meeting assembled, in the Queen's Hall, on February 16, in repudiating and condemning the action of the Government in sending to London a delegate who has no mandate from either Parliament or the people to advocate amendments to the Commonwealth Bill."

I am further instructed to inform you that a cable has been received to the effect that 26,000 residents on the gold-fields have signed our "Separation for Federation" petition to Her Majesty the Queen.

I have, &c.,

E. M. KIRWAN,

Hon. Secretary.

No. 7.

The Mayor of Kalgoorlie (Western Australia) to Colonial Office.

(Received March 24, 1900.)

TELEGRAM.

[Answered: see No. 32.]

MONSTER meeting held here Eastern Gold-fields residents unanimously repudiated Parker. Desired no amendment Bill. Mayor, Kalgoorlie.

No. 8.

The Bank of New South Wales and Commercial Banking Company, Sydney, Limited, to Colonial Office.

(Received March 27, 1900.)

[Answered by No. 14.]

Bank of New South Wales, 64 Old Broad-street, London, E.C., March 27, 1900.

Draft of Bill to constitute the Commonwealth of Australia.

Sir,—

We have the honour to inform you that we have received a telegram from the Head Office of the Bank of New South Wales, in Sydney, to the effect that the Commercial Banking Company of Sydney, Limited, the City Bank of Sydney, the Savings Bank, and the Bank of New South Wales, Sydney, have sent, by last post, a petition to the Imperial Parliament craving that the existing right of appeal to the Privy Council may be retained, and requesting us to do what is necessary to inform you that the petition had been forwarded.

We therefore beg to bring this information to your knowledge, and to ask you to be good enough to do what is necessary to retain the existing right of appeal to Her Majesty in Council, or otherwise to delay the settlement of the question as to the right of appeal until this petition, signed as it is by four large and influential institutions in Australia, can be presented to the Imperial Parliament, which will be done in due course as soon as received.

For your information, we may state that the four institutions are all of purely Colonial creation. The Commercial Banking Company of Sydney, Limited, was established in 1834 and incorporated in 1893. Its head office is in Sydney, New South Wales. It has 137 branches in the Colonies of New South Wales and Queensland. It has a subscribed capital of £2,000,000, and paid-up capital of £1,000,000. Its deposits amount to over £10,000,000, and the totals of its balance-sheet amount to £13,500,000.

The Savings Bank is a local institution for collection of the savings of the people in New South Wales, and has no London office.

The City Bank of Sydney is also a local institution, with eighteen branches, mainly confined to Sydney and suburbs. Its paid-up capital is £400,000, and the totals of its balance-sheet amount to over £1,500,000. It has no London office, but is represented here by the London Joint Stock Bank, Limited.

The Bank of New South Wales was established in 1817 and incorporated by Act of Council in 1850. It has a paid-up capital of £1,950,000. Its deposits amount to £18,637,000, and the totals of its balance-sheet amount to £25,897,000, and, with the exception of Tasmania, it is represented in all the Colonies of Australasia by 191 branches.

We enclose the balance-sheets* of the Commercial Banking Company of Sydney, Limited, and the Bank of New South Wales, and we beg that, in view of the fact that the institutions named are local and influential banks, you will give the matter your best consideration.

We have, &c.,

For the Bank of New South Wales,

DAVID GEORGE,

Manager.

For the Commercial Banking Company of Sydney, Limited.

NATHANIEL CORK,

Manager.

* Not reprinted.

No. 9.

Memorandum of the Objections of Her Majesty's Government
to some Provisions of the Draft Commonwealth Bill.

HER Majesty's Government have had under their careful consideration the question how far it is possible to pass through the Imperial Parliament the Bill which has been submitted by the five Colonies of Australia; they desire to acknowledge the assistance they have received from the Memorandum prepared by the Australian Delegates, and they appreciate the friendly spirit in which the questions raised have been discussed.

Her Majesty's Government are most anxious that the Bill should be passed, and speedily passed, in a form which shall give to the Australian Colonies the Federation which they so earnestly desire; but, at the same time, it is their bounden duty to protect the interests of the United Kingdom and of other parts of the Empire which are also committed to their charge.

The points of difference are few in number, and involve a minimum of alteration. Her Majesty's Government observe that the Memorandum of the Delegates abstains from discussing any of the suggested alterations on their merits, and consists almost entirely of an appeal to Her Majesty's Government to accept without alteration the proposed Bill, as embodying the wishes of the people of Australia.

Her Majesty's Government feel it their duty to place on record some of the reasons which make it impossible for them to accede to this request, much as they would desire to do so.

The Memorandum of the Delegates requests that the whole of the draft Bill as received from the Colonies may be submitted to Parliament and passed into law. The distinction which was drawn in the discussions of the Federal Convention between the "covering clauses" and the "Constitution" is no longer recognized, and it is contended that the whole Bill, covering clauses and Constitution alike, ought to be passed by the Imperial Parliament without alteration, on the ground that it embodies the Agreement at which the people of the Colonies have arrived.

While there is every desire to give effect, as far as is possible, to the wishes of the people of Australia, it must be pointed out that the enabling Acts under which the Referendum was taken formally referred to the "Constitution" only, and the Addresses from the Parliaments pray that the "Constitution" may be submitted to the Imperial Parliament and passed into law.

The distinction between the covering clauses and the Constitution was clearly pointed out by Mr. Barton on several occasions in the course of the debates. Speaking at Adelaide at the sitting of the 14th April, 1897, on Clause 5, with reference to the provision as to the operation of the laws of the Commonwealth on British ships: "This appears to be a concession to Australia, and the best thing to do is to let the Imperial authorities deal with it." In the course of the debates at the Sydney meeting of the Convention in 1890, Mr. Barton again expressed himself more fully to the same effect. "We do not expect," he said, "that the Imperial Legislature will amend the provisions which are in the Constitution itself, although they are an endeavour to extend our autonomy; but these covering clauses are suggestions to the Imperial Legislature, and it would be absurd to expect that, as regards these clauses, the Imperial Legislature will not make such amendments as they please."

It is clear, therefore, that the covering clauses were not regarded as a part of the Agreement between the Australian Colonies as to the Constitution under which they are prepared to unite, but rather as suggestions as to the terms of the Agreement between the Colonies and the Mother Country.

An examination of the covering clauses shows that they deal with matters in which Australia, being a part only of Her Majesty's dominions, could not properly claim to have a final voice. They affect in important respects the prerogative of the Crown and the powers and privileges of the Imperial Parliament and of the Legislatures of other parts of the Empire. In regard to these matters, the Imperial Parliament and Government are in the position of trustees for the whole of Her Majesty's dominions, and the responsibility attaching to that trust makes it incumbent on them to examine with the utmost care any proposal which would in any degree affect their power to discharge the trust efficiently. They cannot relieve themselves of responsibility to those for whom they are trustees by divesting themselves of their powers by delegation. In putting the provisions of the draft Bill which affect these powers in the form of suggestions, and not as an integral and essential part of the Federal Constitution, the Statesmen who framed that instrument and the Parliaments and peoples who have indorsed it have fully recognized this principle.

The alterations suggested, as shown in the copy of the draft Bill handed to the Delegates, were limited to those which appeared essential for the safeguarding of the powers intrusted to the Imperial Parliament and Government for the protection of those common interests and the discharge of those common duties which form the peculiar sphere of the central authority of the Empire.

Taking them in the order in which they are discussed in the Memorandum of the Delegates, the first is the proposal to declare the Laws of the Commonwealth to be "Colonial Laws" within the meaning of "The Colonial Laws Validity Act, 1865." The Memorandum maintains that the doubts entertained by the Law Officers as to the application of that Statute to the enactments of the Commonwealth Parliament are unfounded, and that any amendment is therefore unnecessary; but that, if it is considered important to remove doubts on the subject, a separate enactment would be a better vehicle for such a declaration than the measure itself. It is to be observed in this connection that the Honourable R. E. O'Connor, one of the members of the drafting Committee, at the meeting of the 9th September, 1897, stated that the Colonial Laws Validity Act would have no application to the Laws of the Commonwealth, and it is important, in the interests of the Commonwealth, as well as of the rest of the Empire, that any possibility of misapprehension as to the validity of Commonwealth Laws or as to the supremacy of Imperial legislation should be removed. That there is room for such misapprehension is clear, not only from the language of Clause 6 of the covering clauses, but also from Article 51, paragraph 38, of the Constitution, which confers on the Commonwealth Parliament "the exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament

Adelaide
Debates, p. 628.

Sydney Debates,
p. 252.

Parliament of the United Kingdom or by the Federal Council of Australasia." Sub-section 29 of the same clause of the Constitution, moreover, empowers the Commonwealth Parliament to legislate in regard to "external affairs," and, consequently, under these provisions it might be claimed that the Parliament of the Commonwealth had power to pass legislation inconsistent with Imperial legislation dealing with such subjects as those dealt with by the Foreign Enlistment Act. The responsibility to foreign Powers for such legislation would rest, not on Australia, but on the Government of the United Kingdom, as representing the whole Empire; and in the absence of any definition or limitation of the privilege claimed by these provisions for the Commonwealth Parliament, Her Majesty's Government would fail in their duty if they left any room for doubt as to the paramount authority of Imperial legislation.

The next amendment dealt with in the Memorandum is the proposed omission from Clause 5 of the words which prescribe that "The Laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth." The Delegates rely upon the fact that an even wider application in the case of British ships was given to the Laws of the Federal Council by Section 20 of the Federal Council Act of 1885, and they urge that the Laws of the Commonwealth Parliament, a more representative and responsible body than the Federal Council, should not be denied the more limited application claimed in the clause.

The words of Section 20 of the Federal Council's Act were very wide, perhaps unduly so, and if the powers thereby conferred had been freely exercised grave difficulties would certainly have arisen.

What is desired is the power to the Commonwealth to control the coasting trade: this power they will have under Section 736 of "The Merchant Shipping Act, 1894," which is not confined in its operation to the coasting trade while in territorial waters. Moreover, the words "first port of clearance" and "port of destination" in the clause in question are not free from ambiguity, and embarrassing questions might be raised as to the law applicable to a ship clearing from one Australian port for another after coming to Australia from a port in some other part of Her Majesty's dominions.

The analogy of the Federal Council of Australasia is incomplete, inasmuch as it was contemplated that all British possessions in Australasia might be represented in the Federal Council, whereas the operation of this Bill is at present confined to five Australian Colonies.

It must not be forgotten that the Imperial Parliament was expressly invited by Mr. Barton, when speaking in the Convention, to deal as they thought proper with this provision of the Bill.

The Memorandum next deals with the amendment relating to appeals to the Privy Council.

Before proceeding to consider the reasons urged by the Delegates against the proposed amendment, it is desirable to set out the grounds upon which Her Majesty's Government object to the provisions of Article 74, to which the suggested amendment applies. The Article is as follows:—

"No appeal shall be permitted to the Queen in Council in any matter involving the interpretation of this Constitution, or of the Constitution of a State, unless the public interests of some part of Her Majesty's dominions, other than the Commonwealth or a State, are involved.

"Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise, by virtue of her Royal prerogative, to grant special leave of appeal from the High Court to Her Majesty in Council. But the Parliament may make laws limiting the matters in which such leave may be asked."

It is impossible to say what construction would be placed on this Article when it comes to be judicially interpreted. There may be large classes of cases just on the border-line with regard to which it cannot be predicted whether they do or do not involve the interpretation of the Constitution.

It may fairly be argued that any question as to the validity of the exercise of legislative powers by the Legislature of the Commonwealth is a matter involving the interpretation of the Constitution. Questions may arise whether legislation under any of the powers mentioned in paragraphs i, ix, x, xix, xx, xxvi, xxvii, xxviii, xxix, xxx, xxxvii, and xxxviii of Article 51 of the Constitution is or is not *ultra vires*, and any such legislation may involve matters affecting foreigners and foreign ships in Australia and in Australian waters and their Treaty rights. Yet as the clause stands there would be no right of appeal from the High Court to the Privy Council in such cases.

The Constitution embodies a request to the Imperial Parliament to delegate to the Parliament of the Commonwealth part of the powers now exercisable only by the Imperial Parliament or by the Crown. Paragraphs 29, 30, and 38 of Article 51, for instance, purport to transfer to the Commonwealth Parliament powers not included in the powers of an ordinary Colonial Parliament, and it can hardly be contended that the Imperial Parliament should preclude an appeal to an Imperial Court on any question as to the extent to which powers now exercised exclusively by itself or by the Crown have been delegated.

A grave objection to Article 74 is the absence of any definition of the class of cases in which "the public interests of some part of Her Majesty's dominions other than the Commonwealth or a State."

Does this phrase include the interests of a large class of persons in Her Majesty's dominions—say of investors in Australian securities, or of a body of shareholders in an industrial undertaking formed, say, in the United Kingdom, to carry on some great commercial enterprise in Australia—or is it confined to cases in which the interests affected are only those of the government of other parts of Her Majesty's dominions?

If the latter is the true meaning, the proviso would have little or no operation. If the former, no task can be conceived more difficult than that of deciding whether or not the condition of the Article has been satisfied.

The view taken in the Memorandum of the Delegates is that the prerogative of granting leave to appeal to the Privy Council from the Supreme Courts of the several Colonies is unaffected, and that Article 74 only applies to appeals from the High Court of the Commonwealth.

This is very doubtful, and is only one of the many difficult questions of construction which would arise upon this Article. The Article appears to have been framed under the impression that the only appeal from the Supreme Courts of the Colonies was to be to the High Court of the Commonwealth, and its effect upon the right of Her Majesty to grant leave to appeal to the Privy Council from the Judgments of Supreme Courts of the Colonies is problematical.

If, however, the view taken by the Delegates on this point be correct, the result will be that in a Constitutional case a litigant defeated in the Supreme Court of a State might appeal at his option either to the High Court of the Commonwealth or to the Privy Council. The successful party might prefer the latter, but would have no choice.

Again,

Again, if the Delegates' view as to the construction of the Article is correct in the case of a decision by a Superior Court with which neither litigant is satisfied, there may be cross appeals, one by one party to the High Court, and the other by the other party to the Privy Council. The decisions of both of these Courts may be final, and if they happen to disagree, it is difficult to see what will be the consequence.

Further, under Article 74, it would in many cases be possible for a litigant to present a Petition to the Queen in Council for special leave to appeal, on the ground either that the question at issue did not involve the interpretation of the Constitution, or that public interests were involved, and on this Petition there would be a preliminary argument on either or both of these points.

To pass this Article in its present form would be to introduce confusion and uncertainty in a matter in which it is desirable above all others that there should be clearness and certainty. The difficulty of construing it forms an insuperable obstacle to its adoption by the Imperial Parliament without modification or some overriding clause in the Bill to control its operation.

But there are other and graver objections to the Article. From the proceedings of the Convention, it would appear to have originated to some extent in objections to the present constitution and working of the Judicial Committee of the Privy Council. The administration of justice by that Tribunal has been, on the whole, such as to command the confidence of the Empire.

But apart from this consideration, the time is specially inopportune for any proposal to curtail its jurisdiction. Proposals are under consideration for securing a permanent and effective representation of the great Colonies on the Judicial Committee, and for amalgamating the Judicial Committee with the House of Lords, so as to constitute a Court of Appeal from the whole British Empire. It would be very unfortunate if Australia should choose this moment to take from the Imperial Tribunal the cognizance of the class of cases of greatest importance, and often of greatest difficulty. Article 74 proposes to withdraw from the Queen in Council matters involving the interpretation of the Constitution. It is precisely on questions of this kind that the Queen in Council has been able to render most valuable service to the administration of law in the Colonies, and questions of this kind, which may sometimes involve a good deal of local feeling, are the last that should be withdrawn from a Tribunal of appeal with regard to which there could not be even a suspicion of prepossession.

Questions as to the constitution of the Commonwealth or of a State may be such as to raise a great deal of public excitement as to the definition of the boundaries between the powers of the Commonwealth Parliament and the powers of the State Parliaments. It can hardly be satisfactory to the people of Australia that in such cases, however important and far-reaching in their consequences, the decision of the High Court should be absolutely final. Before long the necessity for altering the Constitution in this respect would be felt, and it is better that the Constitution should be enacted in such a form as to render unnecessary the somewhat elaborate proceedings which would be required to amend it.

But it must be further observed that matters involving the interpretation of the Constitution may raise questions of the utmost gravity, not only between the Commonwealth and the separate States, but also as between the Commonwealth and the States on the one hand, and other parts of Her Majesty's dominions or foreign countries on the other. Among the matters on which the Parliament may make laws for the Government of the Commonwealth is comprised (Article 51, paragraph 10) fisheries in Australian waters beyond territorial limits. The interpretation to be put on the Constitution in this matter may most seriously affect British vessels, and particularly vessels from New Zealand. Grave questions may arise as to what fisheries beyond territorial limits are to be deemed to be Australian fisheries, and as to the class or classes of persons on whom the laws of the Commonwealth as to this matter will be binding. It is hardly reasonable to expect that inhabitants of other parts of the Empire should be finally concluded in such matters by the decision of the Australian Court.

Another head on which the Parliament of the Commonwealth has power to legislate is that of external affairs (Article 51, paragraph 29). As has already been pointed out, a law might be passed by the Parliament of Australia with reference to the subject of foreign enlistment. The consequences of such legislation might involve the Empire in difficulties with foreign Powers. It is not reasonable to withdraw from the Imperial Tribunal the right of deciding whether a measure of this class is or is not invalid as being in contravention of Imperial legislation, or as to its true construction.

The legislation of the Parliament of the Commonwealth may affect British shipping coming from the United Kingdom or British possessions. The Merchant Shipping Act, 1894, makes (Sections 735-736) special provision for legislation in a British possession with regard to vessels there registered, and with regard to the coasting trade in British possessions. Having regard to the interests which may be affected by legislation under this head, it appears essential that there should be the possibility of an appeal to the Queen in Council.

The question of the right of appeal must also be looked at from the point of view of the very large class of persons interested in Australian securities, or Australian undertakings, who are domiciled in the United Kingdom. Nothing could be more prejudicial to Australia than to diminish the security felt by capitalists who desire to invest their money there. One element in the security which at present exists is, that there is the possibility of an ultimate appeal to the Queen in Council, and there is very strong feeling against its abolition. Cases affecting the rights of such persons may often involve questions of the interpretation of the Constitution. But, apart from this consideration, the last sentence of Article 74 of the Constitution provides in express terms that the Parliament of the Commonwealth may make laws limiting the matters in respect of which leave may be asked to appeal. So that it is evident that the possibility of appeal in certain cases left by Article 74 as it now stands may be indefinitely curtailed in the future.

A brief examination of the history of Article 74 may be desirable before proceeding to discuss the arguments of the Delegates against its amendment.

In the draft of the Constitution prepared at the Adelaide meeting of the Federal Convention the Article was as follows:—

“No appeal shall be allowed to the Queen in Council from any Court of any State, or from the High Court or any other Federal Court, except that the Queen may in any matter in which the public interests of the Commonwealth, or of any State, or of any other part of Her dominions are concerned, grant leave to appeal to the Queen in Council from the High Court.”

The

The meaning of this, Article was explained in the discussion on the 20th April, 1897, by Mr. Higgins, who was a member of the Judiciary Committee, as follows:—

"I feel a misapprehension has grown up that we are trying to do something new. The object of this clause is simply to stereotype in the Act what has already existed in Canada, where there is a general right of appeal reserved to Her Majesty in Council on a decision of the Privy Council; but that right of appeal is not allowed unless the cases are of public interest. Therefore the effect of Clause 73 is simply to put in plain English what is the law now in Canada."

Mr. Barton endorsed this explanation, saying: "That is the whole purpose and object of the clause; my honourable friend has saved me the trouble of explaining it."

The phrase "public interest" was used by Mr. Higgins as defining the class of cases in which special leave is granted to appeal from a decision of the Supreme Court of Canada. The rules laid down by the Privy Council as regards such appeals are set forth in the case of *Prince v. Gagnon* (8 App., Cas. 103):—

"Their Lordships are not prepared to advise Her Majesty to exercise her prerogative by admitting an appeal to Her Majesty in Council from the Supreme Court of the Dominion, save where the case is of gravity, involving matter of public interest, or some important question of law, or affecting property of considerable amount, or where the case is otherwise of some public importance or of a very substantial character."

The language of the Article then under consideration hardly carried out the purpose with which it had been framed, as explained to the Convention by Mr. Higgins and Mr. Barton, namely, that it was only intended to stereotype and fix, in regard to the High Court of Australia, the practice of the Privy Council, as declared by that body itself, in regard to the Supreme Court of the Dominion of Canada; but their declarations are conclusive, as showing the sense in which the Article was adopted by the Convention at the sitting of the 20th April, 1897.

All that Her Majesty's Government desire upon this point is that effect should be given to the expressed intention of the framers of the clause, that it should embody the practice of the Privy Council upon Canadian appeals. After the Bill had been settled at Adelaide, it was discussed at length by the several Parliaments of the Federating Colonies, and several amendments were proposed in favour of extending the right of appeal as left in the Adelaide draft, but none apparently in favour of further restriction. The question was not discussed at the Sydney meeting, nor until January, 1898, when an effort was made by those members who were in favour of the appeal to obtain the insertion of a provision saving the prerogative. The attempt was defeated by 22 votes against 14. The question was again brought up on the 11th March, when, on the motion of Sir Joseph Abbott, a clause saving the prerogative to grant special leave to appeal was carried by one vote in a House of thirty-nine Members. This was followed by an amendment, moved by Mr. Symon, excepting cases involving the interpretation of the constitution of the Commonwealth or of a State, which was carried by 21 votes to 17.

The original draft of the Adelaide Session, therefore, which abolished appeals from all lower Australian Courts, and except by special leave from decisions of the High Court in matters involving the public interests of the Commonwealth, &c., was completely departed from, and the question of the appeal was left in the position summarized on page 7 of the Delegates' Memorandum.

If the provision in the Adelaide draft had carried out the declared intention of those who framed it, and left only the special appeal from the High Court in the cases in which appeals are allowed from the Supreme Court of the Dominion, it would have been entirely satisfactory to Her Majesty's Government, but the exception introduced at the last moment on the motion of Mr. Symon leaves the question in a very unsatisfactory and anomalous position. That exception had not been discussed in the several Parliaments when the measure was before them for detailed consideration, and can hardly be said to have received adequate discussion.

The Delegates urge that "the contention for the finality of the Judgments of their High Court is based by Australians on the argument that if they are fit, as is conceded, to make a Constitution for themselves, they are fit also to say what that Constitution means, and for that purpose they should be allowed to rely on the decisions of their High Court," that "judicial knowledge of local conditions invaluable always is indispensable in the interpretation of Constitutions," and "that Her Majesty's Judges, Australian as well as British, will ever be men of conspicuous ability and integrity, whose impartiality will not be prejudiced by their domicile."

The answer is that in many cases the construction of the Constitution of such a country as Australia cannot be regarded as affecting Australian interests alone.

That cases would come before the Imperial Court of Appeal with the advantage of a full knowledge of local conditions relevant to the case as they would have been explained in the judgments of the Australian Court, and that while the high standing and ability of Australian Judges is recognised to the fullest degree, it would be of great assistance to them that, in exceptional cases, there should be the possibility of having their decisions on constitutional questions reviewed by a Tribunal which, even if party feeling ran high on the question in dispute, could not possibly be charged with being under its influence.

In conclusion, it should be remembered that the question must be looked at from a still wider point of view.

The retention of the prerogative to allow an appeal to Her Majesty in Council would accomplish the great desire of Her Majesty's subjects both in England and Australia, that the bonds which now unite them may be strengthened rather than severed, and, by insuring uniform interpretation of the law throughout the Empire, facilitate that unity of action for the common interests which will lead to a real Federation of the Empire.

The object of every one at present should be to draw closer together all parts of the Empire. The existence of the right of appeal, subject to the leave of the Privy Council, has been a link effectively binding together every part of Her Majesty's dominions: the weakening of this tie would seriously lessen the value of even so great and beneficent a result as the Federation of Australia.

If the Bill were passed in its present form, while it would mark a step in advance as far as the Federation of Australia is concerned, it would be a retrograde measure so far as it affects the larger question of Imperial Federation.

March 29, 1900.

No. 10.

Dr. E. Paget Thurston to Colonial Office.

(Received March 29, 1900.)

[Acknowledged: see No. 27.]

To the Right Hon. Joseph Chamberlain, M.P.,—

Sir,

As delegates from all parts of Australia are about to address you on the subject of Federation, I venture, as a taxpayer of Western Australia, to appeal to you in this letter. We have here a Boer and Outlander question almost parallel to that in the Transvaal. As an Outlander I appeal to you.

The vast majority of the people in this Colony are unrepresented in Parliament, while the Metropolitan Press is entirely in the hands of the Boer party. The old West Australians openly speak as if the Colony were theirs and we were interlopers who have no course open to us but to leave the Colony if we are dissatisfied. Our contention is that the Colonies were acquired as the result of England's great wars, that, instead of claiming the land as a set-off against the National Debt, Great Britain gave it to such of her sons as chose to go and live there, and that consequently we have just the same rights as the older residents.

Only three terminations are possible to the policy of the present Ministry.

(1) *Separation of the Gold-fields.* This would be only fair to the Gold-fields; but thousands of Outlanders have settled in the other parts of the Colony, and this step would not redress their wrongs. The practical result of this step would be prosperity for the Gold-fields, but almost ruin for the rest of the Colony.

(2) *Revolution.* I fear this is much more probable than is generally thought. Unless a material change takes place quickly there will be bloodshed in this Colony.

(3) General depression, practically equivalent to bankruptcy.

(a) Taking the income of last January, it would be equivalent to over seven hundred millions per annum from the population of Great Britain. I ask you, sir, whether any party in England would venture to impose the half of this burden for one year—to pay for the Boer war, for instance? We have been carrying this load for a long while.

(b) The great bulk of the taxation is levied through duties on food and drink. As the Boer party includes all the agricultural producers, and the Outlanders include the great bulk of the consumers, this acts injuriously on us in two ways. It puts a frightful load on the Outlander taxpayer, and enables the Boer producer to command a very high price for his food-stuffs. Owing to the limitation of the market by excessive protection, many articles of common use reach *famine* prices at times. In the three years I have been here, for instance, potatoes have been £22 10s. a ton; apples, 2s. 6d. a pound; oranges, 5s. a dozen; new laid eggs, 4s. a dozen (at the time of writing, 3s. 6d.). Fresh butter is practically unobtainable for ten months in the year, and common country wine (such as I used to buy for 3d. and 4d. a bottle in the Canary Islands) is here 2s. a bottle. I ask you, sir, whether any other place in Her Majesty's Empire (not physically inaccessible) can show prices one half as high during the past three years? What makes it still harder is that in the other parts of Australia most of the above articles are almost unsaleable through superabundance.

(c) Debt has been piled up to such an extent that in like ratio in England it would amount to two thousand five hundred and thirty-two millions sterling. By the time the Coolgardie Water Works and Fremantle Harbour have been finished and paid for, the debt will be equivalent to three thousand two hundred and fifty-five millions. Even granting that the assets, the railway, harbour, and water works might, in like ratio, be regarded as a set-off of a thousand millions, the debt remains at the stupendous figure of two thousand two hundred and fifty-five millions, beside which the debts of England, or even France, fade into insignificance.

That the country is being crushed by the burden is shown in many ways. Probably one shop in three in the principal part of Hay-street has changed hands since I have been here. Most of the stores in the suburbs have closed. The most significant point is that the *departures* from the Colony in the past three years must number between 50,000 and 60,000. Potent as is the attraction of the word "Gold," the departures actually exceeded the arrivals during ten months of 1898-9.

It is in your power, sir, to remedy this state of affairs, by showing Sir John Forrest's representative that you strongly disapprove of the treatment of the Outlanders in this Colony, and especially of their being taxed without being represented, and by expressing your determination to throw your influence into the Separation scale unless all this is changed. I feel sure the pressure of public opinion at home, and in the rest of Australia, would be strong enough to compel the Boer party to grant justice.

It is the fear I have that a continuance of the present injustice and oppression *will lead to a revolution* that impels me to the boldness of writing you this letter.

I am, &c.,

E. PAGET THURSTON, M.D., B.A. CANTAB.

[Enclosure in No. 10.]

THE data on which the foregoing calculations are based are as follows:—

The population of Western Australia is taken at	170,000
" " Great Britain	"	"	"	41,000,000
Ratio of Western Australia to Great Britain = 17 : 4,100				

The Western Australia Customs and Excise in January, 1900, were ... £76,829 4s. 6d.

The Western Australia total Revenue in January, 1900, was ... 242,148 7s. 3d.

The total debt is estimated at £10,500,000. The last authentic figure available was as remote as June, 1898.

The Public Debt of Western Australia was then £9,203,738 6s. 11d.

No. 11.

The Agent-General for New Zealand to Colonial Office.

(Received March 31, 1900.)

[Answered by No. 25.]

Westminster Chambers, 13, Victoria-street,
London, S.W., March 30, 1900.

Sir,

I have the honour to enclose herewith a memorandum indicating the nature of certain amendments desired by New Zealand in the Commonwealth of Australia Constitution Bill.

The amendments are three in number. There is a fourth point upon which I may have to touch, but as it is not likely to be my duty to do more than express my opinion concerning it, I have not referred to it in the enclosed memorandum. I propose to mention it verbally to you, if possible in the presence of the Delegates from Australia.

I may add here that my Government emphasises the desire of New Zealand for a friendly understanding with the five federating Colonies. New Zealand desires to ask for nothing which is not reasonable and not likely to be beneficial to all parties. An amicable arrangement is the sincere and earnest wish of my Government. It is, however, their belief that the amendments indicated, while unobjectionable in themselves, are necessary to safeguard the special interests of New Zealand as one of the Colonies named in Clause VI of the Commonwealth Bill, and I have therefore to ask that Her Majesty's Government may be pleased to give the suggested amendments fair consideration, and, if they should be thought just, countenance and support.

I have, &c.,

W. P. REEVES.

[Enclosure in No. 11.]

MEMORANDUM for the Right Honourable the Secretary of State for the Colonies.

THE Government of New Zealand desires to secure the insertion of certain amendments in the Commonwealth of Australia Constitution Bill shortly to be laid before the Imperial Parliament.

These amendments are three in number. The first of them is, in effect, that New Zealand should preserve the right of joining the proposed Commonwealth of Australia on the same terms as the original States now about to be united in such Commonwealth.

The second is, that while New Zealand remains outside the Commonwealth, litigants in her higher Courts, though reserving the right they now possess to appeal to the Queen in Council, should, as an alternative, have the right to appeal to the High Court of Australia on paying the fees and complying with the rules of that tribunal.

The third amendment is, that the Australian Commonwealth and the Colony of New Zealand should be empowered to make the necessary arrangements to employ their naval and military forces for mutual aid and defence, including operations outside their own boundaries, and for that purpose to co-operate in forming a homogeneous Australasian force.

The importance of the first amendment to New Zealand is great. The Colony is divided from Australia by 1,200 miles of unbroken sea. It still takes from four to five days for persons quitting New Zealand to reach any port in Australia. Though a large and valuable trade is carried on between the two countries, and though New Zealand is linked to Australia, not merely by financial ties, but by bonds of intercourse, cordial friendship, and sympathy, she has also vital and separate interests. Many, also, of the leading matters on which the discussions on Federation in Australia during the last twelve years have turned are topics with which the New Zealand people is almost unacquainted. It is, therefore, only to be expected that the Colony should watch the Federal movement with caution and reserve. It is also true that, until June of last year, New Zealand was unable to judge as to the intentions of the great Colony of New South Wales with regard to the Commonwealth Bill. It was not until the month of September that Queensland decided to enter the Commonwealth; Western Australia has not even yet done so. And it was directly after the decision of Queensland had become known that, in response to a request from Sir John Forrest, the leading statesmen of Australia intimated that, in their opinion, it was impossible to consider any further amendments of the Commonwealth Bill. From that moment the only course left open to New Zealand has been that now taken.

About that time there appeared in New Zealand evidences of the growth of a feeling in the Colony in favour of a closer union with Australia. This was on the eve of the general elections, and Mr. Seddon, the Prime Minister, then defined his position, stating that the future relations of New Zealand with Australia were a matter for education and careful examination: that for himself he kept an open mind, but that prudent deliberation was advisable. At the general elections which took place in December last, Mr. Seddon was returned to power with an unusually large majority. It may, therefore, very safely be assumed that this cautious but not hostile attitude fairly represents the present view of the people of the Colony. Some stress may be laid on the foregoing facts in view of the possible objection that New Zealand's action now comes too late. The Colony virtually asks that, in view of its position of distance and difficulty, it should have more time given it to make up its mind than has been found necessary by colonies which are contiguous or almost so. If it should be proposed to fix a limit of time to this, that would clearly be a matter for reasonable consideration.

In so far as the second amendment would give certain New Zealand litigants a right of resort to the High Court of Australia, it is scarcely likely to meet with objection in Australia unless on the general ground that no amendment whatever of the Commonwealth Bill is now desirable. In the event of the amendment being admitted, it is obvious that certain precautions might have to be taken to conserve the existing rights of New Zealand litigants, and also to prevent clashing of appeals, but doubtless these could be provided for.

The third amendment, that providing for a species of partial federation for purposes of defence and mutual assistance, seems not only desirable but unobjectionable in every way. It does not propose that any kind of compulsion should be applied to either the Commonwealth or New Zealand: It merely empowers them to make such arrangements as may be deemed mutually advantageous. At present it seems more than doubtful whether either the Commonwealth or the Colony has the power to make simple, binding, and effective arrangements which would involve operations and expenditure outside their own boundaries

boundaries, and under which each would have to act so as to affect colonists not subject to their respective jurisdictions. Recent events have clearly shown that the time has passed by for regarding the military forces of a colony as something never to be employed outside its own boundaries. I need not point out that such a co-operation would be of value not only to Australia and New Zealand, but to the Empire which both are so anxious to serve.

W. P. REEVES.

Westminster Chambers, 13, Victoria-street,
London, S.W., March 30, 1900.

No. 12.

Memorandum on the Position of Western Australia.

IN the discussion at the Convention which drafted and passed the Commonwealth Bill, it was generally admitted that the condition of Western Australia entitled it to special treatment if it joined as an Original State in the Federation of the Australasian Colonies. It was pointed out that not only would the Colony lose a great portion of its Revenue by Intercolonial Free Trade, but also that the settlement of the soil and the development of its industries would be most prejudicially affected by the unrestricted competition of the other Colonies.

In these circumstances the Convention passed the 95th Clause of the Bill, which is as follows :—

“ Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia may, during the first five years after the imposition of uniform duties of Customs, impose duties of Customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth ; and such duties shall be collected by the Commonwealth.

“ But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty ; and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

“ If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.”

The Commonwealth Bill was, in July of last year, referred to a Joint Select Committee of both Houses of the Western Australian Legislature for consideration and report, and the Committee reported with respect to this Clause that it would cause great inconvenience and injury to trade, and recommended that it should be so amended as to give the whole of the present duties to the Colony for the full period of five years, without reduction.

In order to give effect to the Committee's recommendation, the Government of Western Australia now seek to have the Bill amended by striking out the 95th Clause, and inserting in lieu the following :—

“ During a period of five years following the imposition by the Parliament of the Commonwealth of uniform duties of Customs, the State of Western Australia may, notwithstanding anything in this Constitution, continue to receive the same duties of Customs as are in force there at the passing of this Act, such duties to be collected by the Commonwealth. The Parliament of Western Australia may, during that period, repeal or alter, but may not increase, any of such duties ; and, at the end of the said period, such duties shall absolutely cease.

“ During the said period of five years all goods imported into the other States of the Commonwealth from Western Australia shall be subject to such duties of Customs as the Parliament of the Commonwealth may impose.”

If this amendment be made, the Government will immediately summon a meeting of the Western Australian Legislature, with a view to passing the necessary legislation so that the Commonwealth Bill may be referred to the people, and the Government will also use its utmost endeavours to secure the acceptance of the Bill by the voters.

S. H. PARKER.

GEORGE DIBBS.

JOHN HENRY WANT.

HENRY MACLAURIN.

No. 16.

Mr. Edmund Barton to Colonial Office.

(Received April 4, 1900.)

Sir,

Whitehall Court, S.W., April 2, 1900.

I am in receipt of Mr. Bertram Cox's letter of the 30th ultimo,† enclosing a copy of a communication received by Mr. Chamberlain from the London Branch of the Bank of New South Wales, in which it is stated that certain Banks in Sydney have sent by mail a petition to the Imperial Parliament praying that the existing right of appeal to the Privy Council may be retained.

Mr. Bertram Cox further states that Mr. Chamberlain will be glad to be favoured with any remarks which the delegates may wish to make on Mr. David George's letter.

In reply, I beg to state, on behalf of the delegates, that as the institutions in question, their shareholders and their customers, have expressed their wishes in their votes on two occasions, the delegates are unable to see why, in face of the repeated majorities for the Bill, which on both occasions contained the Clauses objected to, these institutions should deem themselves entitled to reopen the matter, or to seek further delay in the accomplishment of federation. Their views were ably represented in the Convention by members of that body, and they had the unrestricted right of petition to the Parliament of New South Wales, which, however, passed with enthusiasm the loyal Address, forwarding the Bill with the request that, having been affirmed by the electors, it might be submitted to the Parliament of the United Kingdom with a view to its enactment.

The Delegates, moreover, take exception to the terms of Mr. George's letter, if it or the Petition seeks to convey that it is proposed to abolish appeals to the Privy Council.

† No. 13.

‡ No. 15.

§ No. 17.

In reply, I have to remark, on behalf of the delegates, that the senders of the telegram appear to have already expressed their opinions by their votes at the Referendum, taken on two occasions, on both of which these gentlemen must have been in the minority, as the Bill contained in both instances the same provisions on this subject, in the same words. If the senders claim that the whole of the 82,000 voters against the Bill in New South Wales are to be taken as opponents of the provisions as to appeals, they must in turn admit that all the 107,000 voters for the Bill were supporters of those provisions.

The cablegram in question is without doubt a claim on the part of the minority to rule the majority; and the delegates are of opinion that to amend the Bill in the direction desired would be an admission of the claim. Further, it is quite erroneous to affirm that the Bill proposes to take away the rights of British subjects to appeal to the Privy Council. This is an assertion which has been common among the opponents of Federation, of whom the senders of the cable were among the most prominent.

I have, &c.,
EDMUND BARTON.

Mr. Chamberlain to Governor Earl Beauchamp (New South Wales).

Sir,

Downing-street, April 5, 1900.

I have the honour to inform you that I received on the 30th ult. the telegram,* of which a copy is enclosed, protesting against any modification by the Australian Commonwealth Bill of the present right of appeal to the Privy Council.

I shall be obliged if you will cause this telegram to be acknowledged on my behalf.

I have, &c.,
J. CHAMBERLAIN.

No. 20.

Mr. Chamberlain to The Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania.

(Sent 7 p.m. April 5, 1900.)

TELEGRAM.

Your desire to see the great work of Australian Federation completed by the inclusion of Western Australia in the Commonwealth is earnestly shared by Her Majesty's Government.

Clause 95 is now the sole remaining obstacle to the acceptance of the Constitution by the Western Australian Parliament, and there is considerable force in the objections entertained by the Colony to the sliding scale on the practical grounds of the continual dislocation of revenue and commerce which it would involve. No principle of the measure would be affected by the amendment desired, and it would be a misfortune if a matter of minor detail were to prevent the attainment of a great national object. Without further authority, the delegates have no power to consider the question.

Would your Government be willing either to assent to the amendment desired by Western Australia, or to empower their delegate to endeavour to come to an arrangement on the subject?

Should your Government agree in principle, but fear that the necessity for further reference to the people of the Colonies concerned would cause delay, might not the object be secured by inserting a proviso in the covering clauses of the Bill containing the Constitution, to the effect that Western Australia may enter the Federation on the terms mentioned above if resolutions in that sense are severally passed by the Parliaments of the six Colonies?

The motive of this suggestion is a sincere desire to assist the complete success of the great scheme of Federation prepared with so much ability by the Australian Colonies; but if the Ministers of the Federating Colonies do not favour it, Her Majesty's Government have no intention of pressing it.

No. 21.

Minutes of Proceedings of a Conference of Australian Delegates, at the Colonial Office, Downing-street, London, S.W., Thursday, 5th April, 1900.

Present : The Right Honourable JOSEPH CHAMBERLAIN, M.P., the Secretary of State for the Colonies, presiding.

The Right Honourable the EARL OF SELBORNE, Under Secretary of State for the Colonies.

Sir RICHARD E. WEBSTER, Bart., Q.C., M.P., Her Majesty's Attorney-General.

Sir ROBERT B. FINLAY, Q.C., M.P., Her Majesty's Solicitor-General.

Sir COURTENAY P. ILBERT, K.C.S.I., C.I.E., Parliamentary Counsel.

The Right Honourable C. C. KINGSTON, Q.C., from South Australia.

The Honourable E. BARTON, Q.C., from New South Wales.

The Honourable A. DEAKIN, from Victoria.

The Honourable J. R. DICKSON, C.M.G., from Queensland.

The Honourable Sir PHILIP Fysh, K.C.M.G., Agent-General, representing Tasmania.

A. G. BERRY, Esq., Secretary to Federation Delegation.

S. H. PARKER, Esq., Q.C., from Western Australia.

The Honourable W. PEMBER REEVES, Q.C., Agent-General, representing New Zealand.

The Honourable Sir R. G. W. HERBERT, G.C.B.

H. BERTRAM COX, Esq.

JOHN ANDERSON, Esq., C.M.G.

Mr.

Mr. CHAMBERLAIN : Gentlemen, with the assent of the other delegates, our first business is to ask the gentlemen who represent New Zealand and Western Australia whether they have anything to add to the statements which they have put in for our consideration, and, perhaps, I will ask Mr. Parker in the first place to say whether he would like to add anything to what has already been said in his memorandum.

Mr. PARKER : Mr. Chamberlain, perhaps you, sir, and the gentlemen present will pardon me if I only say a few words, because I feel I am hardly in a condition to say anything. I think my fellow delegates from the Australian Colonies will all admit that it is most desirable to consummate their work by federating the whole of Australia.

SEVERAL DELEGATES : Hear, hear.

Mr. PARKER : While one-third is excluded from the Australian Federation their work can hardly be said to be complete. Now, Western Australia it is admitted by the Bill—and I need not go beyond the Bill—it is admitted in the Bill in the strongest terms that Western Australia is not so fitted to federate with the neighbouring Australian Colonies as the larger and older Colonies are. Its industries, particularly so far as agriculture is concerned, are in comparatively an infant state. They require fostering; and it was recognised by the Convention and in the Commonwealth Bill that in order to foster these industries Western Australia should retain its duties as against the neighbouring Colonies for a period of five years. The Commonwealth Bill provides that these duties shall be reduced annually by one-fifth, so that in five years they die out entirely. Now, it was felt by the Committee of the Joint Houses of the Legislature of Western Australia, that this was not only not sufficient protection for these new industries and for the agriculturist, but also that an annual alteration of duties would greatly injure and disturb trade, and therefore it was recommended by the Joint Legislative Committee that these duties should be continued as a whole for the period of five years. The Joint Select Committee of the two Houses recommended several other amendments to the Bill, but after due consideration the Government of the Colony have authorised me to state that they will be prepared to do their utmost to bring Western Australia into the Federation as an Original State if the Bill can be so amended that Western Australia may retain its duties as against the neighbouring Colonies for a period of five years. I need not delay the meeting, because the gentlemen who come from the neighbouring Colonies, who are particularly interested in the subject, are just as well acquainted with the arguments that I might use as I am myself, but I may point out that it is very little we ask, and we have a great deal to give. We are prepared to give one-third of the area of the whole of Australia. We do not ask for any alteration in the principle of the Bill, we simply ask for the alteration of the amount of the duties which the Bill proposes to give us. Instead of being reduced to four-fifths, three-fifths, two-fifths, and one-fifth, we ask the whole for five years. I might point out, Mr. Chamberlain and gentlemen, that Western Australia is very peculiarly situated as regards Federation, because of its comparatively isolated state. In order to reach Sydney from Perth it will take a representative of Western Australia about the same time as it would take to go from London to New York. There is no railway communication, and we can only travel by sea to South Australia and thence by rail. I take it that the capital of Federated Australia will be somewhere in New South Wales, near Sydney, therefore Western Australia will be very considerably handicapped in the way of representation until she is united by a railway with the neighbouring Colonies. Well, Western Australia also, so far as its revenue is concerned, collects a great bulk of it by means of custom dues, and it is estimated that she will lose about £300,000 a year if she federates with the Australian Colonies. But notwithstanding this, notwithstanding the difficulty of representation, notwithstanding the fact that we cannot really be united with the rest of Australia until we have a railway, still the Government of Western Australia is prepared to accept all these disadvantages if we can have the Bill amended in the one particular which I have mentioned. Now, sir, it has been pointed out to me that the delegates from the neighbouring Colonies are instructed to do their utmost to have this Bill passed by the Imperial Parliament without any amendment whatever, and I take it that if the Imperial Government adopt the view of the delegates there will be little hope of my obtaining any amendment in favour of Western Australia. But if, as I anticipate, the Bill will be amended in some particulars by the Imperial Legislature, then it seems to me there can be no reason why it should not also be amended in the minor matter which I have mentioned as affecting Western Australia, because after all it is a very minor matter compared to the amendment that is proposed to be made by the Imperial Government as regards the Privy Council and other matters mentioned in the memorandum which has been furnished to us. The reason why it has been said that the Bill ought not to be amended is that a further referendum will be necessary to the people of Australia. Well, this ground will be cut away entirely if the Bill is amended at all, and it will let in the opportunity for the amendment which I desire on behalf of my Colony, and I hope and trust that the delegates from the neighbouring Colonies will see their way, sir, to suggest to you a mode by which, if this Bill is amended at all, Western Australia may be admitted as an Original State on the terms she asks.

The Hon. W. PEMBER REEVES : Mr. Chamberlain and Gentlemen : I, like Mr. Parker, have but little to say, but I should like to lay some stress as he did upon the peculiarity of our position. While we are not so geographically placed as to be quite one of the Australian Colonies, we are so placed that no other part of the Empire has quite the same interest in them and in this Bill as we have. We are not contiguous with them, but we have the ties of intercourse and trade. Our people meet them in business daily, and this Bill which is to be passed, and which is to lay down the lines of the Commonwealth, establishing it for all time—at any rate for generations to come—will affect us whether we come into the Federation or whether we stand out. Our position, in short, is not an enviable one. We stand to lose if we stay out. We stand, in the opinion of a great many of our people, to lose also if we go in hurriedly and without due consideration. We have a very large and valuable trade in Australia. For the last ten years that trade has averaged something over £2,500,000 a year, which, to a small community like New Zealand, is a matter of considerable moment. If we stay out of the Federation it is our belief that we shall lose a part of that trade. On the other hand, if we come in we shall take on ourselves of course a portion of the burdens of Federation, and we do not at present see, or at any rate a considerable number amongst us do not see, that our interests are identical enough with those of Australia to make it prudent enough for us to hasten into Federation. We think, in fact, that it may be necessary for us to make some special arrangements. This may lead to delicate and careful negotiations. That, sir, is our main reason for the caution and the hesitation which our people have shown during the last ten years. If, as I say, we stay out of the Federation, our interest in this Bill is not merely confined to its effect upon

upon our trade—the effect which any customs tariff imposed on Australia may have upon our trade—but, as we shall meet the Australians in business every day, we may come into collision with them, as people in business do come into collision, over such matters as fisheries and other parts of trade and industry. That is why the legal clauses of this Bill are a matter of special interest to us, even if we do not come into the Federation. It may be said, sir, that the relations of Australia and New Zealand in regard to this Bill are purely a matter of domestic concern—are domestic matters which Colonists should settle amongst themselves and with which Her Majesty's Government have no concern. That I do not admit. No matter which concerns two distinct portions of the Empire is a matter purely of domestic concern to one of them. No matter which requires Imperial legislation is a matter of domestic concern to one of them. No matter which requires Imperial legislation is a matter of domestic concern. For this Bill to become operative is an Imperial concern requiring Imperial interference and Imperial settlement. It may be said, it has been asked, why did we not ask for this concession, for it is a concession, before? The answer to that is, sir, first of all we have looked on at the discussion of Federation in Australia from our own standpoint—a standpoint of isolation; we have looked on and watched what has been going on. We have seen—up till the middle of last year—the whole question of Federation in solution. We have seen to a certain extent a conflict of ideas and a conflict of interests. We had no one ordered, settled, established body to negotiate with, and we did not know until July that the greatest Colony on the Continent, the Colony of New South Wales, would adopt Federation in the form in which it had been settled by the Convention. We were to a large extent misinformed. In the judgment of many of us New South Wales was not going to accept the Convention. As it happened, New South Wales did accept it, and by a clear majority, although after a very keen difference of opinion amongst her people. Since that moment we have had no opportunity of getting any amendments into the Commonwealth Bill. From that moment the principle was laid down that any further amendments in the Commonwealth Bill could not be considered out there. When I say that, I rely upon the telegrams sent by the leading statesmen of the proposed Commonwealth to Sir John Forrest, which I think were sent in the last week of last September. We therefore have had no opportunity of asking for this concession until now; and it does appear to us now that now is the proper time; and that, as the Bill had to come Home and be dealt with by the Imperial Parliament, the proper tribunal to approach is the Imperial Parliament, and we appeal to that Imperial tribunal now. It is not the case that the people of New Zealand have declared themselves against Federation. It is not the case that the Prime Minister of New Zealand has declared himself against Federation. Mr. Seddon, in speaking before Parliament last Session, challenged anybody to say that he had ever declared himself opposed to Federation; his position is simply one of cautious examination. And that, in fact, is the position of the majority in New Zealand. A movement has been growing in favour of Federation with Australia. As far as I can understand, it is still growing. Therefore I think our request cannot be dismissed as a mere wanton meddlesomeness, as mere wanton interference at the last moment in order that we might appear to be doing something. Our request is the result of the growing feeling in New Zealand that we shall have to face the question of Federation with Australia, that we shall have to make up our minds—and that pretty soon—whether we are definitely coming in, or whether we are prepared to accept the consequences of standing out. But we wish to have time, sir—reasonable time, given us to make up our minds; and I submit that, in consideration of our peculiar position—a position which has called for caution, which has demanded caution, in which caution has been our duty, that it is not unreasonable of us to ask for a fair time in which to come to this momentous decision. I am dealing now, and I have been dealing, entirely with the first amendment, that is the one which asks that the open door should be left for us for a certain time, because, although no time is specified, I frankly admit that some time must be specified in case we come to any arrangement about it. Of course, it would be ridiculous to suppose that we should retain the right for a hundred years, or for a generation even, to come in on the same terms as the Original States. All we suggest is some reasonable time. Then I will not detain you, sir, by dwelling upon the second or the third amendments; that relating to the option to our litigants to have recourse to the Australian Federal Court—the High Court; and that dealing with an arrangement relating to co-operative defensive arrangements by the Commonwealth and New Zealand. They are simply matters of practical utility, and I base our request principally upon their reasonable and practical nature. If no amendments are to be admitted now, they, of course, cannot be dealt with at all. Nor should I advance the suggestion that the Commonwealth Bill should be delayed or a referendum to the whole people of Australia be made necessary for those two amendments. But, if the Bill is to be dealt with, if the Bill is to be amended, then I hope that those two amendments will be fairly considered. That is all I ask. I may say before sitting down that it is not the wish of the Government of New Zealand to delay the Commonwealth Bill in any unreasonable manner. So far from desiring to do that, sir, if any means may be found—can be found—by which our interests can be safeguarded without putting the people of Australia to any expense or inconvenience or unreasonable delay, no one would be more glad to see that than the Government of the Colony of New Zealand.

MR. CHAMBERLAIN: I should like to ask the delegates from Western Australia and New Zealand one or two questions, and probably some of the delegates might also wish to have further explanations. In the first place, I would like to ask Mr. Parker whether he has considered that if his proposal is accepted, there would necessarily be delay in regard to Federation, because, I understand, he admits that if that proposal is accepted, as he makes it, there would have to be a further referendum, and that would involve certainly a great deal of delay, and possibly some risk, and I would ask him whether he has considered any way by which that delay might be avoided on the assumption that the delegates generally and their respective Governments were favourable in principle to his proposals?

MR. PARKER: I agree with you, sir, that it seems to me there would be perhaps some little delay. In the event, of course, of the amendment that I suggest being adopted, I take it, it would be necessary to have another amendment to the third clause of the Bill, which names the Colonies that have accepted the Constitution—an addition to that clause to the effect that, if Western Australia within a certain time accepted, she should be included as an Original State in the Proclamation. The Bill provides for a proclamation proclaiming the Australian Federation. But I would not ask, I would not dream of asking, for this amendment if it alone necessitated a referendum. I do not think it would be fair to the other Colonies to ask for this concession, if it put the other Colonies to all the expense and delay of another referendum to the people. My point is this, that, as it is suggested that the Bill will be amended by the Imperial Parliament—as it is proposed to amend it—

Mr.

Mr. CHAMBERLAIN: No.

Mr. PARKER: The Bill——

Mr. CHAMBERLAIN: Pardon me, I do not think that any decision has been come to at the present time.

Mr. PARKER: Oh, I beg your pardon, I should have said suggested.

Mr. CHAMBERLAIN: Suggested from outside. No statement whatever has hitherto been made on the part of the Imperial Government.

Mr. PARKER: I was misled by the memorandum that was sent to me.

The ATTORNEY-GENERAL: The argumentative memorandum.

Mr. PARKER: It was suggested that the Bill should be amended, and the clauses of the Bill which it was proposed to amend were struck out and the alterations put in.

Mr. CHAMBERLAIN: I see. All I want to say is, that up to the present time anything of this kind has been in the nature of personal suggestions, as a result of conversation; no official or formal suggestion has been made.

Mr. PARKER: Then I might put it in this way, sir, that if the suggestion that has been made that the Bill should be amended in certain particulars is carried out, then the reason that is given why the amendment that I ask should not be adopted is no longer a reason, the reason being that it would require another referendum to the people, because I take it that if this minor amendment which I suggest requires a referendum to the people, the much larger amendments that it is suggested to be made by the Imperial Parliament as regards the Privy Council and the Merchant Shipping would certainly require a referendum to the people, but I would not ask for this amendment to be made on behalf of Western Australia if it alone required a referendum to the people.

Mr. CHAMBERLAIN: Well, then to make the matter perfectly clear I will put this hypothesis to you: Suppose either that the Imperial Government makes no amendment or that it makes its amendments in a form which does not require any further reference to the people, in that case have you any way to suggest by which similarly the object of Western Australia can be carried out without such a reference and consequent delay?

Mr. PARKER: I think, sir, from my perusal of the memorandum that was furnished by you, sir, to the delegates, that you draw a distinction between the Constitution as contained in the Bill and what are known as the covering clauses. Well, is not this matter as it affects Western Australia more in the nature of a covering clause than a part of the Constitution. How can it be said to be a part of the Constitution? It is merely an allowance to Western Australia of its duties for a term of years. An alteration of that kind would not be an alteration of the Constitution, therefore, I submit, sir, that if the alteration as to appeals to the Privy Council does not require a referendum, much less does an alteration of this clause giving Western Australia its duties for five years require any reference to the people.

Mr. CHAMBERLAIN: Then, Mr. Reeves, may I ask you with regard to two of your suggestions, namely, the reference to the Court and the arrangements for mutual defence? Do you urge that it would be desirable in any case to introduce those into the Bill? Would it not be rather a matter for subsequent agreement between New Zealand and the Commonwealth?

The Hon. W. PEMBER REEVES: I think, sir, that they would come into the Bill quite as properly as the special arrangements relating to Western Australia. I think there is more than one point in the Bill which might be regarded as of a local character—a *quasi*-local character. For instance, I think the defining of the locality of the proposed capital might be said to come under that head. There are distinct references to Western Australia in the Bill. I am not sure whether there is not a distinct reference to Queensland—some reference to Queensland.

The Hon. E. BARTON: There is a special power to divide that State into electorates for the choosing of senators.

Mr. CHAMBERLAIN: But any such arrangement clearly, if introduced into the Bill now, would involve the delay which we all deprecate, would it not? You cannot suggest that those could be introduced by way of covering clauses, can you?

The Hon. W. PEMBER REEVES: I do not suggest in regard to those two. I do not to-day suggest anything one way or the other, except to say first of all with Mr. Parker that if the Bill itself is to be amended then I think that they could properly be put in. If the Bill is not to be amended, then it becomes a question. If we once know that it becomes a question of suggesting what course is to be taken. I do not yet know that the Bill is not to be amended.

Mr. CHAMBERLAIN: Well, then there is only one other question that I wish to ask: Can you state what is the opinion of New Zealand or of your Government with regard to the question of Appeals? You are, of course, aware how that question is left by the Constitution. What opinion has been formed? If you could express any opinion upon it I should be glad.

The Hon. W. PEMBER REEVES: Yes, sir, I am authorised to say this: The Government of New Zealand will be very glad if the appeals to the Privy Council can be preserved—the right of appeal on constitutional points. That is in view of the possibility of their coming into the Federation. They recognise, however, that it is a very large question—a matter of Imperial concern, and by no means their sole or peculiar affair. They confine themselves therefore to expressing a hope that some way may be found, if possible, satisfactory both to Her Majesty's Government and to Australia, by which this right of appeal may be retained.

Mr. CHAMBERLAIN: Mr. Parker, have you any observations to make upon that point?

Mr. PARKER: I have no instructions whatever, sir, from my Government.

The Hon. E. BARTON: It would be very important in the course of my duty to know from Mr. Reeves whether he had been authorised to suggest any time as that which his Government thinks should be allowed for New Zealand to enter the Commonwealth on the terms of an Original State. Of course, she may possibly have those terms under the Bill as it stands, in the event of her applying for admission after the Bill has become law.

The Hon. W. PEMBER REEVES: I think I might say, Mr. Barton, that I have a very wide discretion, and what I interpret to be a general discretion with regard to these terms from our Government.

Mr. CHAMBERLAIN: What time do you suggest?

The Hon. W. PEMBER REEVES: I should suggest seven years; that would be a minimum.

The

The Right Hon. C. C. KINGSTON: I should like to ask Mr. Parker this: There is a very strong difference of opinion in Western Australia, is there not, Mr. Parker, as to the propriety of the amendments you suggest?

Mr. PARKER: I do not know that there is a very strong adverse opinion to these proposed amendments. Of course, one could quite understand that there is very often an agitation against Government proposals, but taking the opinion of the Legislature, I think I am justified in saying that the Legislature, the Upper and the Lower House, are almost unanimous in favour of this proposed amendment.

The Right Hon. C. C. KINGSTON: There has been considerable popular agitation against the amendments, has there not?

Mr. PARKER: I do not think there is any popular agitation against the amendments; there has been agitation amongst the people in favour of Federation.

The Hon. E. BARTON: In favour of the reference of the Bill as it stands?

The Right Hon. C. C. KINGSTON: As it stands. In many cases petitions have been prepared with that object, has there not?

Mr. PARKER: I believe there is a large petition presented to Parliament. I am not a member of either House, but I know from hearsay, and seeing it in the papers, that large petitions numerous signed from the gold-fields and elsewhere were presented to Parliament asking that the Bill should be referred to the people—the Bill as it was drafted.

The Right Hon. C. C. KINGSTON: Is there not some petition signed by 30,000 people in the course of forwarding?

Mr. PARKER: I only know from what I see in the papers.

The Right Hon. C. C. KINGSTON: That is so, is it not?

Mr. PARKER: I believe that is so, judging from the papers; but it is a petition for Separation, not Federation.

The Right Hon. C. C. KINGSTON: And the opinion of the gold-fields is altogether against the amendment you suggest?

Mr. PARKER: I do not know. I dare say the opinion of the gold-fields may be against it, because you must bear in mind that the gold-fields population is purely a consuming population; the remainder of the Colony is a producing population. Of course, these duties add to the cost of living to a certain extent, but a Government which has various communities to look after must study the interests of the whole; it cannot sacrifice all the agriculturist and infant industries merely for the benefit of the gold-fields population.

The Right Hon. C. C. KINGSTON: Then may we take it that the consumers of Western Australia, as opposed to the manufacturing and producing population, are in favour of the Bill as it stands, and the agriculturists and producing population are in favour of the amendment?

Mr. PARKER: I will not say the consumers as a whole, only those on the gold-fields. I do not think the consumers anywhere else, except on the gold-fields, would object to the amendment that I particularly refer to.

The Right Hon. C. C. KINGSTON: It is the Parliament which prevents the reference to the people at present?

Mr. PARKER: The Upper House.

The Right Hon. C. C. KINGSTON: The Upper House?

Mr. PARKER: The Upper House is apparently of opinion, or a majority are, that Federation would be so detrimental to Western Australia that they would not allow the Bill to be referred to the people.

The Right Hon. C. C. KINGSTON: Are you not of opinion, Mr. Parker, that if the Bill were referred to the people it would be accepted by the people of Western Australia?

Mr. PARKER: It is impossible to form an opinion.

The Right Hon. C. C. KINGSTON: I want the benefit of your personal opinion.

Mr. PARKER: I should be very sorry to say that there was a majority in favour or a majority against. I believe the whole of the agriculturist and manufacturing interests—people interested in manufactures, and a great many of the consumers as well about the coasting portions, are against Federation, on the terms of the Bill as at present drafted, but the gold-fields population, of course—

The Right Hon. C. C. KINGSTON: Very strongly in favour of it?

Mr. PARKER: A large majority of them who come from the neighbouring Colonies are wholly in favour of Federation.

The Right Hon. C. C. KINGSTON: Your Colony at present is in a very prosperous condition?

Mr. PARKER: I think so; yes.

The Right Hon. C. C. KINGSTON: Owing to the discovery and development of the mineral resources by visitors from other Colonies and other countries?

Mr. PARKER: I do not admit that at all; I think it is owing principally to the great encouragement given to the development of this industry by the Government. The Government has spent many hundreds of thousands of pounds in following up the prospector, and giving him water, without which he could not have lived.

The Right Hon. C. C. KINGSTON: And the Revenue returns, of course, have been very considerably augmented by this Government expenditure?

Mr. PARKER: Exactly.

The Right Hon. C. C. KINGSTON: You say that it is very little you ask; what you do ask is the right to tax the goods of other States, is it not?

Mr. PARKER: Pardon me, that tax is settled.

The Right Hon. C. C. KINGSTON: You want to double the rate?

Mr. PARKER: No, it is only a question of the amount.

The Right Hon. C. C. KINGSTON: Quite so. Have you calculated at all what it means?

Mr. PARKER: I have not.

The Right Hon. C. C. KINGSTON: But the proposal contained in the Bill was assented to by the representatives of Western Australia in Convention three years ago, was it not?

Mr. PARKER: I am not aware. I was not a member of the Convention, and I have not read the debates.

The Hon. E. BARTON: I think in that Convention it was carried without a division.

The Hon. C. C. KINGSTON: It was agreed to by the representatives of Western Australia in Convention in 1897?

Mr. PARKER: I really do not know.

The Hon. E. BARTON: 1898.

The Right Hon. C. C. KINGSTON: No, was it not Adelaide?

The Hon. A. DEAKIN: No, it is Melbourne.

The Right Hon. C. C. KINGSTON: You have laid some stress on the difficulty arising from the distance of your Colony from the others—your representatives attending the sittings of the Federal Parliament—would not in a certain sense distance such as that afford some degree of protection to your producers from outside competition—the distance, and the consequent difference in price?

Mr. PARKER: Certainly, yes, in a degree. You understand, Mr. Kingston, I am not asking anything now: I am not asking for a right to impose those duties; it is only a question of the amount.

The Right Hon. C. C. KINGSTON: No, only a doubling of the rate. You speak as the representative, of course, of the Government of Western Australia. The Government was represented at the Federal Convention in 1897 and 1898?

Mr. PARKER: I believe so.

The Right Hon. C. C. KINGSTON: And I believe the Government was represented at the Premiers' meeting last year?

Mr. PARKER: Sir John Forrest was present.

The Right Hon. C. C. KINGSTON: Do you know that it was then agreed that steps should be taken for the reference of the Bill to the people of Western Australia?

Mr. PARKER: I know from the memorandum I have seen on the subject.

The Right Hon. C. C. KINGSTON: And that memorandum, of course, you know, was signed by Sir John Forrest and the other Premiers?

Mr. PARKER: Yes.

The Right Hon. C. C. KINGSTON: Is it not the fact that the majority of the Government have since voted against this reference?

Mr. PARKER: I do not think so. There is only one member of the Government in the Upper House, and the Government in the Lower House carried a resolution referring the Bill to the people in two forms—the Bill, and the Bill as amended.

The Hon. E. BARTON: The Bill and something else?

Mr. PARKER: The Bill in two forms.

The Hon. C. C. KINGSTON: Is it not the fact that the majority of the Government of Western Australia voted against a carrying out of the Premiers' agreement after their Premiers had assented to it?

Mr. PARKER: I do not think so.

The Hon. A. DEAKIN: As I understand, Mr. Parker, the proposal is that if this amendment be made Western Australia joins as an Original State?

Mr. PARKER: Yes.

The Hon. A. DEAKIN: She elects her representatives to the Federal Government, and they necessarily under the Constitution possess equal rights and powers with all the other representatives, and that is to be for a period of five years after the passing of the uniform tariff?

Mr. PARKER: That is so.

The Hon. A. DEAKIN: Western Australia representatives would be members from the very inception, consequently they will be members from the time of the drafting and passing of the Commonwealth tariff, and this amendment which you propose says:—

“During a period of five years following the imposition by the Parliament of the Commonwealth of uniform duties of Customs, the State of Western Australia may, notwithstanding anything in this Constitution, continue to receive the same duties of Customs as are in force there at the passing of this Act.”

And that the Parliament of Western Australia may decrease during that period, repeal or alter, but may not increase any of such duties, consequently the representatives of Western Australia would be voting upon a tariff which would not apply to themselves or their country. Would not that be an extremely anomalous position?

Mr. PARKER: Is not that position already created by the Bill? It is already provided that Western Australia retains its duties.

The Hon. A. DEAKIN: Those duties, as you are aware, disappear in the fifth year?

Mr. PARKER: Yes.

The Hon. A. DEAKIN: And consequently, as you say, the difficulty exists in a minor degree, but you see that it exists in a much more serious degree in your proposal, which leaves them for five years absolutely untouched by duties for which they must have voted?

The Hon. E. BARTON: That is so; they are to share in framing the tariff of the Commonwealth.

Mr. PARKER: After all, five years is a very brief period. After that they will be affected by these duties.

The Hon. A. DEAKIN: Do you not think it would be necessary if this were carried, in consequence of this proposed amendment of yours, to introduce some other amendment, some condition as to the part they would play in framing a tariff not to affect themselves?

Mr. PARKER: I do not know if it would be advisable to make an amendment to that effect; I should offer no objection to it.

The Hon. J. R. DICKSON: I would simply ask Mr. Reeves whether, regarding the Constitution, he does not consider there is a sufficiently open door provided for the admission of New Zealand at any future time?

The Hon. W. PEMBER REEVES: No, sir; if we had thought that we should not now be appealing to Her Majesty's Government; we do not consider it sufficient.

The Hon. J. R. DICKSON: Do you not think that whatever the feelings of Australia might be, the Federal Government would very favourably consider your application for admission to the Commonwealth at a future time? But New Zealand does not consider itself competent to assent, or whether the Constitution could be jeopardised by delay. There has been considerable trouble so far. That decision should be made simply on the hypothesis of what a considerable proportion of Australasia desire.

The

The Hon. W. PEMBER REEVES: I have stated already that as far as it may be possible to avoid delay and expense that we should welcome any means avoiding that, provided we retain the right of coming into Federation. As regards Mr. Chamberlain's suggestion, I say clearly that the "open door" amendment would be a very proper thing to put into a covering Bill. I have tried, sir, to explain why New Zealand has shown a reluctance to join the Federation. It has been absolutely necessary to proceed with caution. If I have failed to show that, I have failed to justify our action.

The Hon. Sir P. FYSH: I want to emphasise one point, Mr. Parker. Your Revenue is about £3,000,000 a year just now?

Mr. PARKER: I believe for the year ending 31st March it was £2,890,000.

Sir P. FYSH: That is near enough for my purpose. And you state that the loss of Revenue, or rather the portion of Revenue that you gather from the duty upon eastern products, amounts to £300,000 a year?

Mr. PARKER: More than that.

Sir P. FYSH: I took your words down.

Mr. PARKER; It is the loss we shall sustain by Federation by this Bill which is estimated at £300,000 a year.

Sir P. FYSH: Well, the actual loss of Revenue; you are gathering at the present moment by duties upon eastern products £300,000 a year. These figures are from a return from yourselves. It is the intention to take one-fifth off that each year, so that out of £3,000,000 Revenue £150,000 a year would be the loss by coming in under this Convention. Now as to the people who are to be benefited, I should like you further to tell us, if you can, as nearly as possible the numbers you would divide as the gold-fields population and the city and suburban populations, taking 160,000 people now as your population, and give us something like a fair division?

Mr. PARKER: It is difficult to say. There has been no census of the Colony for some years, and it is almost impossible to estimate the somewhat migratory gold-fields population, but I think that probably we might take it there are 100,000 people in the settled districts and 70,000 in the gold-fields.

Sir P. FYSH: You say your settled districts would be represented by about 45,000 people, who eight years ago were the numbers of your census; and since then you say that 120,000 who have come in by the reasonable advantages offered by the larger population, and chiefly by the attraction of the gold-fields: however, put in your own way, it is a question between 100,000 and 70,000—100,000 in the settled places and 70,000 in the gold-fields—therefore the protection with respect to the products of your people would be considerably limited so far as the number of the population is concerned. The greater portion of your population would be those who have to pay the extra price by reason of this tariff which you propose to impose. This is what I wish to make out?

Mr. PARKER: Probably.

Sir P. FYSH: You accept that?

Mr. PARKER: The portions, but you must bear in mind although it is the greater portion of the population it is not the best portion of the population of the Colony, because, after all, it is those who settle, those who produce, who are the most desirable Colonists. This is why we desire if possible to encourage those engaged in agricultural and industrial pursuits.

Sir P. FYSH: Yes; I will not pursue that. That is all I wish to say.

The ATTORNEY-GENERAL: I might just ask; it would, I suppose, be for the Government to decide, Mr. Barton, would it not? But, assuming any amendment were necessary, everything could be done easily within the period of a year, mentioned in your Bill as the time in which it should be proclaimed; on a question of time.

The Hon. E. BARTON: If a second referendum were required.

The ATTORNEY-GENERAL: I mean assuming it was required.

The Hon. E. BARTON: It would need an Act of Parliament in each Colony.

The ATTORNEY-GENERAL: I was only asking for the time. I did not assume myself it would be necessary, but assuming it is necessary, is a year not long enough?

The Hon. E. BARTON: That largely depends on the time of meeting of the various Houses. I take it these Acts might be passed in a very few months. On the other hand, it might take six months to pass them. It is quite possible that even then the year would suffice.

The Right Hon. J. CHAMBERLAIN: I think we have only to thank these gentlemen.

The Hon. E. BARTON: I wish to ask Mr. Parker this question: Am I to understand that, if this amendment necessitates a consequential amendment, the Government of Western Australia are willing that such an amendment should be put into this Constitution as a consequence of what is suggested by you? The representatives of Western Australia in the Federal Parliament have no right to discuss or vote upon the Federal Tariff.

The Hon. A. DEAKIN: During the "five years" interregnum?

The Hon. E. BARTON: During the "five years" interregnum, yes.

Mr. PARKER: I have no instructions on the subject, but I have no doubt they would assent to any such proposal.

The Hon. A. DEAKIN: Do you attach importance to the difference which exists between your proposed amendment and the clause in the Bill? The clause in the Bill requires that after uniform duties and customs have been imposed by the Federal Parliament, then the Parliament of the State of Western Australia shall determine the duties to be levied—that probably means an appeal to the people, certainly an appeal to Parliament, before the passing of a new tariff. Now your amendment carries on whatever duties and customs may be in force in Western Australia at the time of the passing of the Act, giving neither Parliament nor the electors an opportunity of considering what, under the altered circumstances of the case, as for instance the Federal Tariff, they would wish to do. Do you attach importance to that part of the amendment?

Mr. PARKER: Of course there is some importance to be attached to that. There is no occasion under the amendment that I propose to re-enact the duties. The electors of the Colony would have it in their power to abrogate duties. That, they consider important.

The Hon. A. DEAKIN: Do you attach importance to the difference to which I have referred? You say you do attach some; have you any objections to the amendment being considered in the first form instead of the second, so that your Parliament, with the Federal Tariff before it, shall be required to reconsider the position, and pass a fresh tariff?

Mr.

Mr. PARKER: I should recommend my Government to agree to that suggestion.

The Hon. A. DEAKIN: To accept the first form instead of the second?

Mr. PARKER: To accept the first form.

The Right Hon. C. C. KINGSTON: New Zealand, I think, was represented at the Federal Convention in Sydney in 1891?

The Hon. W. PEMBER REEVES: Yes.

The Right Hon. C. C. KINGSTON: Since then she has consistently declined to be represented at this Federal gathering, has she not?

The Hon. W. PEMBER REEVES: I could not say how many invitations we have declined, Mr. Kingston. We certainly declined one; whether we have had subsequent invitations, I am not able to say.

The Right Hon. C. C. KINGSTON: Are you able to express any opinion as to the probability of New Zealand desiring to join the Federation?

The Hon. W. PEMBER REEVES: If you had asked me that question twelve months ago I should have said there was very little hope. I am bound to say that last year more interest, much more interest, seemed to be taken in the question. It received more support than I could have thought possible; more than that I will not say.

The Right Hon. C. C. KINGSTON: You do not think there is any immediate prospect of New Zealand joining the Federation, do you?

The Hon. W. PEMBER REEVES: I would say this, that if this concession is granted it would make it, in my opinion, a great deal more likely that we should join.

The Right Hon. C. C. KINGSTON: Do you think that New Zealand has any reason to apprehend any unfair treatment at the hands of the Commonwealth with reference to her admission under the powers of the Commonwealth under the Bill?

The Hon. W. PEMBER REEVES: I would not use the word "unfair." I am sure the Commonwealth would do nothing unfair, and nothing that the interests of its own citizens would not require, but there might be interests in the course of the next few years that might grow up which might affect the introduction of New Zealand.

The Right Hon. C. C. KINGSTON: Then if New Zealand could rely under the Bill for anything that is fair she does not want anything more, does she?

The Hon. W. PEMBER REEVES: Nothing more.

The Right Hon. Mr. KINGSTON: I know that it is the desire of New Zealand that, even whilst outside the Federation, her people should have the right of appeal to the High Court of Australia. Is it not intended that under such circumstances the decision of the High Court should be final, or is it suggested that that appeal should be simply another obstacle in the path of final justice?

The Hon. W. PEMBER REEVES: I am really unable to say. Of course, what is asked is the option of going to that Court, and I assume that if both litigants preferred to go to that Court rather than to go to the Privy Council, I could hardly imagine them wishing to go to both if they had gone through the two Courts in New Zealand already, our Court of Appeal and the Supreme Court.

The Right Hon. Mr. KINGSTON: I suppose you would consider it a mischief, and not an advantage, that another Court should be interposed in the path of final justice?

The Hon. W. PEMBER REEVES: In what way is it a mischief? I do not consider an appeal to the Privy Council a mischief.

The Right Hon. Mr. KINGSTON: No, but you interpose a decision of the High Court.

The Hon. W. PEMBER REEVES: I should say an arrangement which should lay open to litigants four Courts in succession, the Court of Appeal, the Supreme Court, the High Court of Australia, and the Privy Council, would be embarrassing. I could hardly conceive such a thing; we do not ask such a thing, and we do not contemplate it.

The Right Hon. Mr. KINGSTON: You wish the power to go to the High Court for final decision.

The Hon. W. PEMBER REEVES: I want it to go to the High Court. I assume in that case of New Zealand the Court of Appeal would be cut out.

The Right Hon. Mr. KINGSTON: In the case of New Zealand the Court of Appeal would be cut out.

The Right Hon. J. CHAMBERLAIN: I thank you, gentlemen, for your attendance.

Mr. PARKER: May I be permitted, Mr. Chamberlain, to say just one word? You mentioned, sir, that you presumed if this amendment I ask for were adopted, that it might cause some delay. I think probably it would not cause any delay. I take it that if this amendment were adopted the whole matter could be settled in Western Australia in the course of three months, and that probably would be before the Proclamation was published declaring a Federated Australia. And following up the amendment, I suggested the third clause in the Bill would also require to be amended, because it mentions the names of the Colonies which would be united in the Federal Commonwealth; and I would propose as a further amendment the addition of these words:—

"If at any time before the Proclamation the Parliament of Western Australia passes an Act enabling that Colony to join the Commonwealth as an Original State, the people of Western Australia may be included in the Proclamation and united in the Commonwealth."

The Hon. A. DEAKIN: Is that with or without consulting the people by referendum?

Mr. PARKER: Oh, with.

The Hon. A. DEAKIN: It does not say so, and there is no provision for that.

The Right Hon. C. C. KINGSTON: I would like to ask, has Mr. Parker any reason for believing that the Bill, as proposed to be amended, would be more acceptable to the majority of the people of Western Australia than the Bill as it now stands?

Mr. PARKER: Yes, I believe it would. I believe if the Bill were amended in the manner suggested it would be adopted by a very large majority of the people.

The Right Hon. C. C. KINGSTON: You know the amendment is strongly resented amongst the consumers?

Mr. PARKER: It is not resented amongst the consumers except the gold-fields' consumers. It must be borne in mind that the wage-earners in the gold-fields are paid proportionately to the amount that they have to pay for their food, and a reduction in the cost of food would mean a reduction of wages. I do not think, therefore, it would affect them.

The Right Hon. C. C. KINGSTON: Is it not the fact that even in Perth, where the amendment is most strongly advocated, a resolution was lately carried at a public meeting against it? Mr.

Mr. PARKER: I do not think it was.

The Right Hon. C. C. KINGSTON: At the Town Hall, just before you left.

Mr. PARKER: No, I do not think so; I do not think there was a resolution carried against this.

The Right Hon. C. C. KINGSTON: Against any amendment of the Bill.

Mr. PARKER: Was there? It may be, but you must bear in mind that you can get up a public meeting and you can carry anything.

The delegates from Western Australia and New Zealand then withdrew.

No. 22.

Mr. Chamberlain to The Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania.

(Sent 12 midnight, April 5, 1900.)

TELEGRAM.

THE discussion with the delegates has been carried on in a most friendly spirit and with good result. Any desire or intention to interfere in any matter involving interests exclusively Australian is disclaimed by Her Majesty's Government, but they are confident that full weight will be given to their suggestions by your Ministers when urged on behalf of interests of United Kingdom, or as Trustees for the Empire at large.

Her Majesty's Government would have desired amendment as to various questions which have arisen, but are unwilling to risk delaying Federation by pressing their views, and the operation of Clause 74, in restricting the right of appeal to the Privy Council, is now practically the only matter at issue.

Her Majesty's Government object to this clause because (1) the term "public interests" is so vague and indefinite as to leave uncertainty in a matter where precision is of first importance, and increased litigation, due to applications for leave to appeal and the multiplication of arguable points on appeal, will be the result.

(2) A most important link of Empire would be seriously impaired, and the consequences would be far-reaching in allowing divergency to spring up where, in the general interests, unity and uniformity is most desirable.

(3) It can scarcely be to the interests of Australia that in important questions as to boundaries between powers of Commonwealth and States the final decision should not lie with highest tribunal of Empire, beyond suspicion of local bias or predilection.

(4) Important questions may arise as to operation of Commonwealth Laws on British shipping, or generally as to whether such laws are *ultra vires*, which the Imperial Parliament can scarcely allow to be concluded by decision of Australian High Court.

(5) Commonwealth legislation on such subjects as fisheries may seriously affect the interests of subjects of other parts of the Empire, and in such matters Parliament could not expect them to submit to be deprived of an appeal to an Imperial Court.

(6) Banks and other financial and commercial institutions having large interests in Australia, entertain very strong feeling against the limitation, and weighty representations have been made on the subject to Her Majesty's Government.

(7) Her Majesty's Government feel that the actual restriction, and the power claimed to make further restriction equivalent to practical abolition of appeal, would be specially inopportune at the moment when they are considering terms of a Bill for enhancing the dignity and promoting the efficiency of the Judicial Committee by practically amalgamating it with the House of Lords, and providing for adequate permanent representation of the great Colonies in a new Court which it is proposed to create. Should Australian appeals be practically withdrawn, the new Court would be deprived of a large part of its value as providing a new sphere for co-operation between Colonies and Mother Country, and giving effect to some extent to ardent desire for closer relations now happily existing both in Mother Country and Colonies.

Her Majesty's Government feel that for these reasons, and others which have been fully explained to delegates, they must press for amendment of Clause 74, but it is their earnest desire that such amendment may be carried out in the way most agreeable to Australian sentiment, and so as to avoid if possible the necessity of delay and expense involved in a further referendum.

Several suggestions have been made with this object, but delegates feel that lack of instructions precludes them from discussing the form which any amendment should take, or the method by which effect should be given to it. It is also necessary that provision should be made for explaining that, as intended by the framers of the Constitution, the Colonial Laws Validity Act, 1865, will apply to Laws of a Commonwealth Parliament; there can be no difficulty in arranging suitable terms on this point.

I now earnestly appeal to your Government to co-operate with me in securing the unopposed passage of a Bill which, while accepting the Constitution proposed by the Colonies practically in its entirety, will also take account of the considerations urged above; and I trust that your Ministers may see fit to enlarge the instructions to their delegate, and to give him authority to arrange with Her Majesty's Government the speediest and most satisfactory method by which these objects can be ensured.

No. 23.

Mr. Walter Griffiths to Colonial Office.

(Received April 9, 1900.)

[Answered by No. 38.]

Sir,

Hotel Cecil, Strand, W.C., April 8, 1900.

Re Eastern Western Australian Gold-fields Petition.—In accordance with your request, conveyed in yours of March 21st, I had the pleasure of explaining my business verbally to Mr. J. Anderson, of your office, and at the same time exhibited the proofs of the representative character to which you referred.

Your

Your favour intimated that you would then be in a better position to judge whether a personal interview was necessary.

Nearly a fortnight has elapsed, and I have not yet had the honour of the receipt of any intimation of the result of your consideration.

As the petitioners whom I represent are justly incensed at the manner in which their petition, humbly addressed to the "Queen's Most Excellent Majesty," has been delayed in its transmission by the Western Australian Government (their justification in doing so I will not now question), I called on Mr. Anderson, and understood from him that the Colonial Office were in no way responsible for the delay. He also gave me to understand that he had nothing to convey to me as to the result of my previous interview.

Mr. Anderson also informed me that the Colonial Office were "officially" unaware of the existence of the petition. This being so, I now have the honour on behalf of the petitioners to hand you herewith a copy of the petition; also to respectfully ask on their behalf that the petition be forwarded to its destination, at the request of the Colonial Office, without further delay.

I may add that I am still desirous of laying before you, officially, the grievances of the petitioners; and, as I am desirous of returning to Australia at an early date, I should like to be in a position to report to those who have delegated me the success or otherwise of my mission.

I am, &c.,

WALTER GRIFFITHS.

[*Enclosure in No. 23.*]

TO THE QUEEN'S MOST EXCELLENT MAJESTY:—

WE, Your Majesty's most loyal and dutiful subjects, inhabitants of that portion of the Colony of Western Australia lying to the south of the 24th parallel of latitude, and east of the 119th meridian of longitude, and known as the Eastern Gold-fields, humbly approach Your Majesty with every assurance of our loyalty and devotion to Your Majesty's Crown and Person, and humbly entreating Your Majesty's gracious consideration to this our Petition:—

At the time of the establishment of the present constitution of the Colony of Western Australia it was contemplated and declared that circumstances might arise and render expedient the division of the Colony by separating any portion thereof and erecting the same into a separate colony. The probability of such division was expressly reconsidered by Sections 61 and 62 of the Western Australian Constitution Act, 1889 (assented to by Your Majesty on 21st October, 1890), which specially reserved powers on that behalf. We humbly submit that, as regards the Eastern Gold-fields, circumstances calling for Separation have now arisen for the following among other reasons:—

Since the establishment of Responsible Government in Western Australia many of Your Majesty's subjects have come from outside the Colony to reside on the Eastern Gold-fields. They now compose almost the entire population of that district, which was previously uninhabited and unproductive. By their energy, enterprise, and capital, mines have been discovered and developed and industries built up and established; and what was previously regarded as a desert has been converted into a populous and prosperous district. The inhabitants of the remaining portion of Western Australia, who are chiefly the settlers before Responsible Government, possess representation in both Houses of Parliament greatly in excess of what they are entitled to, and have thus acquired a power which they have used, and continue to use, towards the inhabitants of the Eastern Gold-fields harshly, arbitrarily, and unjustly, and not in accordance with the spirit of the Constitution. They have passed laws and applied public moneys for their own special benefit and to our detriment; and have otherwise, by unfair and wrongful legislation and administration, oppressed the inhabitants of the Eastern Gold-fields. In particular:—

1.—They have denied and continue to deny to the inhabitants of the Eastern Gold-fields that fair and reasonable representation in Parliament to which such inhabitants are entitled by their number, wealth, and resources, through the power of domination thus secured to and retained by themselves.

2.—They have imposed unfair and unequal burdens on the inhabitants of the Eastern Gold-fields, of which the following are instances:—

- (A) Heavy Customs taxation on food and other commodities, so devised as to place the burden chiefly on us, and to oppress us for the advantage of their monopolies.
- (B) Preferential railway rates, imposing special and unequal taxation, intended to establish and support at our expense, monopolies for their special advantage.
- (C) Special taxes on the gold-mining industry.
- (D) Refusal of railway communication with our natural port on the Southern Coast, in order to force our trade into their portion of the Colony and to distant ports.
- (E) The expenditure of a large portion of public moneys in their district, while our larger and more pressing needs are comparatively neglected and ignored.
- (F) The inhabitants of the Eastern Gold-fields are unanimously in favour of joining the Federal Union of the Australian Colonies and of accepting for that purpose the Bill for the establishment of the Commonwealth of Australia recently adopted by the Parliaments and people of five other Colonies. That Bill was drafted by an Australian Convention, in which Western Australia was represented equally with the other Colonies. It was finally settled at a Conference of the Premiers of six Australian Colonies, at which this Colony was represented by its Premier, who accepted the Bill in its final form and promised to endeavour to procure the passing of an Act submitting it to the electors of Western Australia for acceptance or rejection. Instead of this the Bill was referred by the Parliament of Western Australia to a Joint Committee of both Houses, who suggested amendments. A petition signed by 18,000 adult males, resident on the Eastern Gold-fields, and 5,000 adult male residents of the Western Districts, was presented to both Houses of Parliament asking that the Bill might be submitted for acceptance or rejection by the people of the Colony, but the Houses of Parliament nevertheless refused by large majorities to grant the prayer of the petition, and the Upper House refused to submit the Bill as adopted by the other Colonies. We are thus prevented, by the arbitrary action of the dominant

dominant party in the Parliament of Western Australia, comprised as aforesaid, from realising our intense desire to join the Federal Union and participate in the moral and material advantages of Australian National life.

When the Western Australian Constitution Act of 1889 was passed the population was 43,000. Queensland obtained responsible Government when its population was 28,000. The population of the Eastern Gold-fields, on whose behalf we humbly address Your Majesty, now numbers 80,000, and is rapidly increasing. The district contains by far the greater portion of the wealth, and contributes most of the revenue of the Colony. The area of the Colony, which is 975,920 square miles, or about one-third of Australia, owing to growth of population and diversity of interests, is too large to be properly governed as one colony. We therefore humbly pray Your Majesty that the Colony of Western Australia may be divided by separating the Eastern Gold-fields therefrom according to the boundaries herebefore defined and by erecting the same into a separate Colony, with a full measure of representative and responsible Government, and we, Your Majesty's most loyal and dutiful Subjects, will, as in duty bound, ever pray.

No. 24.

Colonial Office to Mr. Edmund Barton.

[Answered by Nos. 29 and 50.]

Sir,

Downing-street, April 10, 1900.

I am directed by Mr. Secretary Chamberlain to inform you that he has received a letter from Western Australia, suggesting that, if it is impracticable to amend the draft Commonwealth Bill to meet the views of Western Australia by the substitution of five years' fiscal freedom for the sliding scale of Customs duties at present provided, it would be desirable to amend Section 121 of the Bill in order to allow the Federal Parliament, if it so pleases, to admit Western Australia to the Commonwealth hereafter on the terms desired by the Colony—it being presumed by the writer that the Parliament will, under Section 121 as it now stands, be able to admit new States to the Commonwealth only within the conditions of the Constitution, one of which conditions is free trade between the States.

Mr. Chamberlain would be glad to learn whether the Australian delegates hold this view as to the restricted effect of Section 121.

I am, &c.,

H. BERTRAM COX.

No. 25.

Colonial Office to Agent-General for New Zealand.

[Answered by No. 30.]

Sir,

Downing-street, April 10, 1900.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 30th ultimo* enclosing a memorandum as to the amendments desired by the Government of New Zealand in the draft Australian Commonwealth Bill.

2. Copies of your memorandum were, as you are aware, communicated to the delegates of the Federating Colonies, and they had the advantage of hearing the further explanations as to the position and claims of New Zealand, in the able and temperate statement made by you at the meeting on the 5th instant.

3. In regard to the first amendment proposed on behalf of the Government of New Zealand, the delegates, apart from the fact that they have no instructions empowering them to consider amendments to the draft Bill, were unanimously opposed to the inclusion in that Bill of a provision securing to New Zealand, for a term of years, the right of joining the Commonwealth on the same terms as the Colonies which have agreed to enter as Original States.

4. They pointed out that during the period of grace proposed to be allowed circumstances might arise which would cause grave embarrassment to the Commonwealth if it were open to New Zealand to claim admission on the same terms as the Original States, and that Article 121 of the draft Bill provided sufficiently for the admission of New Zealand at any time upon such conditions as might be found mutually acceptable to the Colony and the Commonwealth.

5. The other two amendments proposed by you appear to the delegates to be matters which should not properly find a place in the Constitution, but are rather for subsequent action by corresponding legislation in the Colony and the Commonwealth, or for executive agreement.

6. I am to add that it would appear that the suggested amendments as to the appeal from New Zealand Courts to the High Court of Australia, and the arrangements for mutual defence, would, if undertaken now, lead to great delay, and involve a fresh referendum to the people of the Federating Colonies, while there does not appear to be any probability that the Federation would not favourably entertain any proposals of the kind, if put forward after Federation.

7. The proposal to give an option to New Zealand for a period of years to join as an Original State might possibly be introduced in the covering clauses without necessitating a further appeal, but the propriety of introducing such a clause appears to be a matter for the decision of the Federating Colonies.

8. Mr. Chamberlain appreciates the anxiety of your Government to protect the interests of New Zealand, and at the same time to refrain from any action which would result in delaying or imperilling the Federation of Australia, and as active intervention on his part might prejudice the early passing of the Bill, he does not feel justified in taking any further steps in the matter; but he would suggest that your Government might, if they think fit, communicate their views direct to the Premiers of the Federating Colonies.

I am, &c.,

H. BERTRAM COX.

No. 26.

Colonial Office to Mr. E. M. Kirwan.

Sir,

Downing-street, April 10, 1900.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 22nd ultimo,† enclosing the manifesto of the Eastern Gold-fields Reform League of Western Australia.

Mr.

* No. 11. † No. 3.

Mr. Chamberlain desires me to say, in reply, that the question of Western Australia joining in Federation is under discussion with the Australian Delegates, and that as regards the other grievances touched upon in the papers which you have forwarded, Mr. Chamberlain understands that they form the subject of a petition now before the Government of Western Australia, and until he has received the petition, with the observations of the Colonial Ministers thereon, he is unable to express any opinion on the matter.

In these circumstances, Mr. Chamberlain does not think that a personal interview with the gentlemen who desire to make representations to him orally would be desirable at the present time, as it might give rise to unfounded expectations.

I am, &c.,

H. BERTRAM COX.

No. 27.

Mr. Chamberlain to Acting Governor Sir A. C. Onslow (Western Australia).

Sir,

I have the honour to request that you will inform Dr. E. Paget Thurston that I have duly received his communication* on the subject of the present position of affairs in the gold-fields of Western Australia.

[See No. 50.]

Sir,

Whitehall Court, S.W., April 11, 1900.

I have the honour to acknowledge the receipt of Mr. Bertram Cox's letter of the 10th instant,‡ in which it is stated that a letter has been received from Western Australia suggesting that if it is impracticable to amend the draft Commonwealth Bill to meet the views of that Colony by the substitution of five years' fiscal freedom for the sliding scale of Customs duties at present provided, it would be desirable to amend Section 121 of the Bill in order to give power to the Federal Parliament to admit Western Australia, if desired, to the Commonwealth hereafter on the terms desired by the Colony.

In reply, I have to state that it will not be practicable to obtain the full meeting of delegates until after Easter, but so soon as they meet the letter will be laid before them, and a reply forwarded.

I have, &c.,

EDMUND BARTON.

No. 30.

The Agent-General for New Zealand to Colonial Office.

(Received April 11, 1900.)

[Answered by No. 47.]

Sir,

Westminster Chambers, 13 Victoria-street, London, S.W., April 11, 1900.

I have the honour to acknowledge the receipt of your letter of the 10th instant,§ relating to my memorandum on the amendments desired by the Government of New Zealand in the draft Australian Commonwealth Bill.

I regret to learn that the delegates of the Federating Colonies are opposed to the inclusion in that Bill of any of the amendments suggested by my Government, and I specially regret that they unanimously object to any amendment under which New Zealand would retain the right, for a reasonable period, of entering the Commonwealth as an Original State. I have informed my Government that, in the opinion of the Right Honourable Secretary of State, the proposal to give an option to New Zealand for a period of years to join as an Original State might possibly be introduced in the covering clauses without necessitating a further appeal, but that the propriety of introducing such a clause appears to be a matter for the Federating Colonies.

I regret to learn that Mr. Chamberlain does not feel justified in taking any further steps in the matter. I would venture, however, to point out that the insertion of a clause in the covering Bill, preserving for some years the right of New Zealand to join the Commonwealth as an Original State, would be most unlikely to delay the passing of the Bill in any way. It could not reasonably be urged that such a proviso ought to become the subject of a referendum to the people of the five Federating Colonies.

Having regard, therefore, to the gravity of the position as affecting the interests of New Zealand which are at stake, I beg permission to ask that Mr. Chamberlain should give the protection of these interests his further consideration. Otherwise the position of New Zealand must be such as to cause my Government no small anxiety, and to leave room for future complications and misunderstandings.

Meanwhile

* No. 10.

† No. 21.

‡ No. 24.

§ No. 25.

Meanwhile I desire to point out that I had not the advantage of being able to listen to any of the arguments laid before Mr. Chamberlain by the delegates against the acceptance of my Government's amendments. Nor was I able to put any questions to the delegates on the subject, though they both heard and questioned me.

I would, therefore, now ask the favour of Mr. Chamberlain's opinion whether the arguments advanced by those gentlemen against the granting of the requests of my Government seemed to indicate that there were weighty and insuperable objections to considering the amendments on their own merits, or whether the main objection seemed to be that, at the present stage, it is, in the opinion of the delegates, not desirable to amend or interfere with the Commonwealth Bill.

I have, &c.,

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 8th instant* on the subject of the petition from the Eastern Gold-fields of Western Australia, and, in reply, I am to refer you to the letter addressed to Mr. Kirwan from this Office on the 10th instant. †

I am, &c.,

C. P. LUCAS.

No. 39.

Mr. Chamberlain to Lieut.-Governor Sir S. W. Griffith (Queensland).

(Sent 3:55 p.m., April 14, 1900.)

TELEGRAM.

[See No. 28.]

If Prime Ministers of other Federating Colonies do not object, I have no objection to publication of reasons urged by Her Majesty's Government for reconsideration of Clause 74.

No. 40.

The Albany and District Separation League to Colonial Office.

(Received April 16, 1900.)

Sir,

Albany, Western Australia, March 14, 1900.

We have the honour of informing you that we have forwarded to Her Majesty the Queen, through His Excellency the Governor of Western Australia, Sir Gerard Smith, K.C.M.G., a petition praying that the town and port of Albany with adjacent territory, as specified therein, may be separated from the rest of Western Australia and added to the proposed new gold-fields province. The reasons which have induced the petitioners to take this step are many and various, and we shall endeavour to deal more fully with them than was possible in the petition to Her Majesty.

(1.) For very many years the people of Albany and District have suffered from the centralisation policy of not only the Government under the responsible system but also the Government under the Crown Colony system. Ever since the Colony was established all power has been in the hands of the political leaders residing in the central district, and they have persistently endeavoured not merely to further the interests of the capital, Perth, but they have at the same time sought to retard the progress of other districts that were likely to vie in importance with the capital.

(2.) In pursuance of this policy of centralisation, Fremantle was for many years offered as a free port to the mail steamers, while the steamers were charged port dues at Albany. Then, without any pretension that the mail service for this Colony or for the other Colonies would thereby be improved, the Government have in every way sought to divert the mail steamer trade from the port of Albany to the port of Fremantle.

(3.) For sixty years the people of Albany have contributed to the revenues of the Colony, and in return have received little assistance from the Government. Princess Royal Harbour, which would be of extreme value in time of war, has been dredged for only a limited area, and the efforts of the people of this town to induce the Government to increase the deep-water area has been of no avail. The aim of the Government appears to be to diminish the importance of the port of Albany in order to increase the importance of Fremantle.

(4.) The opening and development of the country around Albany has been retarded by the lack of Government assistance, which has been given without stint to other districts nearer Perth. Apart from the Perth main road, which was constructed years ago for the purpose of serving the mail coaches, there are not ten miles of made road within the district, and this district cannot be developed without such roads, as in the winter months much of the country is impassable. On the other hand, many districts which are fed from Perth have had liberal support from the Government, and have thus been able to make progress.

(5.)

* No. 23.

† No. 26.

(5.) These are a few only of the many ways in which the progress of this district has been retarded by the governing body of this Colony; and which have caused the petitioners to be eager for a more enlightened Government. The effect of the neglect of the town and district by the Government has been to keep the population stationary, despite the fact that all other parts of the Colony have made progress. In 1890 the population of Albany was 3,000, and it remains at the same figure to-day, the hostility of the Government having crushed out enterprise.

(6.) We had hoped that under Federation the political conditions would have been improved, but the governing body to which we have referred has, in every way possible, checked the movement and denied the people the opportunity of voting at a referendum on the question, although it was well known that the majority of the people in the Colony were anxious for the Colony to enter the Union. Under Federation the power of this oligarchy would be crippled, and it would cease to be able by means of unfair representation in Parliament to tax the whole Colony on behalf of their favoured districts.

(7.) It has been recognised by the Imperial Government and also by the Colonial Governments, that Albany is an extremely important strategical point which it is necessary should have adequate defences. In 1890 forts were built here at the expense of the Colonial Governments, and the Imperial Government provided the guns, and a small garrison is kept here. Under Federation the Federal Military and Naval authorities will have charge of the defences of Federated Australia, and it is, we submit, necessary that those authorities should also have possession of the defences of Albany. If Western Australia were to stand out of Federation she would without separation hold control of the most vital strategical point in Australia, and in pursuance of her past policy that point would be neglected. In any case, whether separation be granted or not, Albany should for defence purposes belong to Federal Australia.

(8.) The resources of the district included in our boundaries are many and various. They include vast karri and jarrah forests, and the land is especially suitable for dairy farms, market gardens, and orchards. The district is well watered, and would carry a very large population if properly opened up by roads and railways. In several parts there are indications of minerals. The climate is the finest in the whole of Australia, and Albany is the health resort for the people who reside on the gold-fields.

We trust, therefore, that when considering the petition you will keep in view the strategical importance of Albany as being sufficient, apart from our grounds of complaint against the Government of the Colony, to warrant the granting of its prayer.

We have, &c.,

ALEC. P. MATHESON, President,	} Albany and District Separation League.
GEO. JOHNSTON, Vice-President,	
ROLAND R. BRADLEY, Secretary,	

No. 41.

The Mayors of Coolgardie and Kalgoorlie to Colonial Office.

(Received April 16, 1900.)

Sir,

Town Clerk's Office, Kalgoorlie, W.A., March 15, 1900.

As Mayor of Coolgardie and Mayor of Kalgoorlie, we have been requested to inform you that at a public meeting of about 8,000 persons held on the Kalgoorlie Recreation Reserve, on Sunday, March 4, the following resolution was unanimously carried:—

"That this mass meeting of residents of the Eastern Gold-fields of Western Australia desire to repudiate the appointment of Mr. S. H. Parker as Federal delegate from Western Australia to London, on the ground that he does not represent their views on Federation, and that they desire no amendment whatever in the Commonwealth Bill."

The resolution is similar in terms to one carried unanimously in Perth at a recent public meeting.

We may add that at the Kalgoorlie meeting, resolutions were also carried unanimously favouring the separation of the Eastern Gold-fields from the rest of Western Australia, and their erection into a self-governing Colony to be affiliated with the new Australian Commonwealth. In furtherance of this project, a petition to Her Majesty the Queen, signed by about 26,000 adults, will be handed this week to His Excellency the Governor of Western Australia, for presentation to Her Majesty.

We have, &c.,

CHARLES SOMMERS, Mayor of Coolgardie.
H. W. FIMISTER, Mayor of Kalgoorlie.

The Right Hon. Joseph Chamberlain,
Secretary of State for the Colonies,
London.

No. 42.

Mr. Chamberlain to The Governors of New South Wales, Victoria, Queensland, South Australia, and Tasmania.

(Sent 5.0 p.m., April 16, 1900.)

TELEGRAM.

WHILE Her Majesty's Government would be glad to have the Premier's concurrence in, and approval of, policy of amending Bill for purposes indicated, what they immediately desire is that the delegates should be authorised to consult with Her Majesty's Government as to the best means of giving effect to the necessary alterations, with a view especially to avoiding a further referendum, if possible.

The responsibility must, of course, rest with Her Majesty's Government, but they are anxious to avail themselves of the assistance of the delegates, as explained in my telegram of 5th April.*

Fernhurst, April 17.

AUSTRALIAN Premiers meet conference Thursday. If they could be informed Imperial Government willing insert covering clause preserving open door New Zealand, provided Australia did not object, my Government would greatly thank Secretary of State.—REEVES, Agent-General.

No. 44.

Mr. Chamberlain to The Governors of New South Wales, Victoria, South Australia, Queensland, and Tasmania.

(Sent, 6:30 p.m., April 17, 1900.)

TELEGRAM.

I LEARN that the Government of New Zealand* are anxious that the covering clauses of the Federation Bill may be amended by providing that New Zealand may enter Federation on the same terms as the Original States at any time within seven years.

I have replied that Her Majesty's Government would not be justified in making such an amendment in the absence of an expression of Australian opinion in its favour, and have suggested that the Prime Minister of New Zealand should communicate with the Prime Ministers of the Federating Colonies if he desires to press it.

Her Majesty's Government will be prepared to consider the proposal of the New Zealand Government if the Premiers regards it favourably.

No. 45.

Colonial Office to Mr. Walter Griffiths.

Sir,

Downing-street, April 18, 1900.

In reply to your letter of the 12th instant,† I am directed by Mr. Secretary Chamberlain to inform you that he has learnt, by telegram from the Officer Administrating the Government of Western Australia, that the petition from the Eastern Gold-fields was forwarded by the mail of the 7th of April.

TELEGRAM.

[Answered by No. 48.]

REFERRING to your telegrams of 5th, 16th, 17th April,‡ is there any objection to publication of correspondence?

No. 47.

Colonial Office to Agent-General for New Zealand.

Sir,

Downing-street, April 20, 1900.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 11th instant,§ on subject of the amendments desired by the Government of New Zealand in the draft Australian Commonwealth Bill.

2. I am to inform you in reply that, in deference to the wishes of the people of the Federating Colonies, it is the earnest desire of Her Majesty's Government to refrain from any interference with the terms of the Bill that can possibly be avoided. So far as concerns the amendment specially desired by New Zealand, I am to observe that it is scarcely likely, looking to the relative importance of New Zealand as compared with the various States entering the Federation, that if the Colony should hereafter wish to enter the Commonwealth, it would be unable to secure, or that the Commonwealth would be unwilling to grant, the same representation as is being accorded to the Original States.

3. In other respects the Original States are not secured in any special privileges under the Constitution, and in the circumstances, as the matter has not been in any way discussed or considered in the Federating Colonies, Her Majesty's Government would not feel justified, in the absence of any distinct expression of opinion from them in favour of the amendment, and in the face of the aversion of the delegates to any amendment, in pressing the matter.

4.

* See No. 43. † No. 35. ‡ Nos. 21, 42, and 44. § No. 30.

45

4. It appears from the Press telegrams that the Prime Ministers of the Federating Colonies are to meet shortly to discuss the question of the amendment desired by Western Australia, and the suggestion of Her Majesty's Government, and the Prime Minister of New Zealand might, if he considers it desirable, take the opportunity of bringing before them the amendments desired by New Zealand.

5. I am to add, with reference to the last two paragraphs of your letter, that the arguments of the delegates against the course proposed by you were mainly their own inability to consider any amendments, and the fear that any addition of the kind suggested would delay the progress of the Bill.

I am, &c.,
C. P. LUCAS.

REFERRING to your telegram of 19th April,* I agree to publication of my telegrams if Premiers see no objection.

No. 49.

Lieut.-Governor Sir John Madden (Victoria) to Mr. Chamberlain.

(Received 6:45 p.m., April 22, 1900.)

TELEGRAM.

IN accordance with request made by Premiers in Conference, Melbourne, transmit following telegram:—

The Premiers of New South Wales, Victoria, Queensland, South Australia, and Tasmania, in Conference assembled, having given full consideration to the despatches from the Secretary of State for the Colonies respecting suggested amendments in the Commonwealth Bill, reply:—

(1.) While they fully recognise the feeling of the Imperial Government that vigilance on their part is essential in the interests of all parts of the Empire, and also the importance of securing the inclusion of Western Australia in the Federation from the first, they cannot forget that by the enabling Acts and in pursuance of them (a) the framing of the Federal Constitution was expressly entrusted to the Convention of Representatives, specially elected by the people for the purpose, in all the Colonies, except Queensland and Western Australia, and that the final acceptance or rejection of the Constitution when framed was also remitted to the people; (b) the question as to appeals was, *inter alia*, considered by the Convention in Adelaide, and no appeal to the Privy Council was allowed. During the visit of the Premiers to England at the Jubilee, the matter was referred to by the Secretary of State for the Colonies, who urged reconsideration. It was accordingly reconsidered at the meeting of the Convention in Melbourne, and resolved in the opposite direction to the decision in Adelaide. Later, the matter was again discussed, and the compromise now in the Bill agreed to. It was yet again debated in the Premiers' Conference prior to the last referendum, and no alteration was made in the form of the Bill. The vote was then taken, and the Bill was adopted by a large majority of the electors; (c) the Commonwealth Bill belongs, therefore, in a very special sense to the people of Australia, whose only mandate to Governments and Parliaments is to seek its enactment by the Imperial Parliament in the form in which it was adopted by the people.

(2.) The Premiers believe that the appeal clause, as framed, could not work injuriously to any part of the Empire, although the proposed new Court of Appeal for the Empire would doubtless present attractions to the people of Australia.

(3.) The only alternatives suggested in the despatches are: (1) Amendment of the Bill, and (2) postponement of its consideration. Of these two, the Premiers do not hesitate to say that the latter course would be much more objectionable to Australians generally even than the former.

(4.) Without disputing the constitutional power of the Imperial Parliament to amend the Bill on its own responsibility, the Premiers respectfully urge that the voice of the Australian people given on the Bill as it stands should receive that favourable consideration which such a weighty referendum demands. The Premiers do not consider themselves as having authority to accept any amendments. They hope that the Colony of Western Australia, whose representatives assisted to frame the Bill and in the Convention almost unanimously agreed to Clause 95, may be urged to accept it as it stands. They think that the Bill already sufficiently provides for the admission of New Zealand.

No. 50.

Mr. Edmund Barton to Colonial Office.

(Received April 24, 1900.)

Sir,

Whitehall Court, S.W., April 23, 1900.

With reference to Mr. Bertram Cox's letter of the 10th instant,† and in continuation of mine of the 11th idem‡, respecting the admission of West Australia to the Commonwealth, I have now the honor to inform you that, having placed the matter before the delegates, they request me to state, in reply, that they are of opinion that Clause 121 does not empower the Parliament of the Commonwealth to admit new States on conditions subversive of intercolonial Free Trade, neither can they think that the Convention would have sanctioned, or the people would have adopted, the grant of any such power.

I have, &c.,

No. 52.

The Bank of New South Wales and the Commercial Banking Co. of Sydney, Limited, to Colonial Office.

(Received April 24, 1900.)

[Answered by No. 55.]

Draft of Bill to constitute the Commonwealth of Australia.

Sir,

The Bank of New South Wales, 64, Old Broad Street, London, April 24, 1900.

Referring to our letter of the 27th March, and to your reply of the 30th March,* we have now to inform you that the petition to Parliament from the Bank of New South Wales, the Commercial Banking Company of Sydney, Limited, the City Bank of Sydney, and the Trustees of the Savings Bank of New South Wales, under their respective corporate seals, praying that the existing right of appeal to the Privy Council may be retained, has now arrived at this office, and we beg to enclose copies of same. We therefore propose to have the petition presented to Parliament as soon as it resumes its sittings, and we beg to ask, through you, whether the Right Hon. Joseph Chamberlain, M.P., Secretary of State for the Colonies, would be prepared, on behalf of the Banks, to present the petition to the House of Commons.

We think it right to state that, in writing about the petition, the General Manager of the Bank of New South Wales says:—

"It is the opinion of able Counsel here that the Convention Bill as framed practically leaves the right of appeal to Her Majesty in Council in doubt, whereas we all thought it had been retained. The Bank sets, and has always set, great store on the right of appeal, and would not willingly forego it, and we hope the Bill will be amended accordingly."

We should regard it as a great honour if Mr. Chamberlain would kindly consent to present the petition, and on hearing from you to that effect will forward the original document.

We are, &c.,

For the Bank of New South Wales,

DAVID GEORGE, Manager.

For the Commercial Banking Co. of Sydney, Limited,

NATHANIEL CORK, Manager.

[Enclosure in No. 52.]

TO THE HONOURABLE THE COMMONS OF THE UNITED KINGDOM OF GREAT BRITAIN AND IRELAND IN PARLIAMENT ASSEMBLED.

The Humble Petition of the Bank of New South Wales, The Commercial Banking Company of Sydney, Limited, the City Bank of Sydney, and the Trustees of the Savings Bank of New South Wales, under their respective Corporate Seals, sheweth:—

1.—That your Petitioners are banking corporations and companies carrying on business as bankers in the Colony of New South Wales and throughout the others of the Australian Colonies.

2.—That by an Order in Council made on the thirteenth day of November one thousand eight hundred and fifty by the Queen's Most Excellent Majesty by and with the advice of Her Privy Council and published in the New South Wales Government Gazette of the twenty-fourth day of June one thousand eight hundred and fifty-one it was ordered that any person or persons might appeal to Her Majesty Her heirs and successors in Her or Their Privy Council from any final judgment decree order or sentence of the Supreme Court of New South Wales in such manner within such time and under and subject to such rules regulations and limitations as were thereafter mentioned that is to say (so far as

is

* Nos. 8 and 14.

is material to be herein stated) in case any such judgment decree order or sentence should be given or pronounced for or in respect of any sum or matter at issue above the amount or value of Five hundred pounds sterling or in case such judgment decree order or sentence should involve directly or indirectly any claim demand or question to or respecting property or any civil right amounting to or of the value of Five hundred pounds sterling the person or persons feeling aggrieved by any such judgment decree order or sentence might within the time limited in that behalf apply to the said Court by petition for leave to appeal therefrom to Her Majesty Her heirs and successors in Her or Their Privy Council.

3.—That by the said Order in Council it was further provided that it should be lawful for the said Supreme Court of New South Wales at its discretion on the petition of any party who might consider himself aggrieved by any preliminary or interlocutory judgment decree order or sentence of the said Supreme Court to grant permission to such party to appeal against the same to Her Majesty Her heirs and successors in Her or Their Privy Council subject to the same rules regulations and limitations as were therein expressed respecting appeals from final judgments decrees orders and sentences.

4.—That by the said Order in Council Her Majesty further reserved to Herself Her heirs and successors in Her or Their Privy Council full power and authority upon the humble petition at any time of any person or persons aggrieved by any judgment or determination of the said Court to admit his or their appeal therefrom upon such terms and upon such securities limitations restrictions and regulations as She or They should think fit and to reverse correct or to vary such judgment or determination as to Her or Them should seem meet.

5.—That the right to appeal to Her Majesty in Council conferred by the said hereinbefore stated Order in Council is the present existing right of appeal in the Colony of New South Wales.

6.—That under other orders and provisions similar rights of appeal to Her Majesty in Council exist in the other Australian Colonies in respect of the judgments decrees orders sentences and determinations of the Supreme Court of those Colonies.

7.—That Section 71 of the Bill now before Your Honourable House provides amongst other things for the creation of a Federal Supreme Court called the High Court of Australia.

8.—That Section 73 of the said Bill provides as follows:—

“The High Court shall have jurisdiction with such exceptions and subject to such regulations as “The Parliament prescribes to hear and determine appeals from all judgments decrees orders and sentences:

“1. Of any Justice or Justices exercising the original jurisdiction of the High Court.

“2. Of any other federal court or court exercising federal jurisdiction: or of the Supreme Court of any State or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council.

“3. Of the Inter-State Commission but as to questions of law only: and the judgment of the High Court in all such cases shall be final and conclusive.

“But no exception or regulation prescribed by The Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

“Until the Parliament otherwise provides the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.”

9.—That Section 74 of the said Bill provides as follows:—

“No appeal shall be permitted to the Queen in Council in any matter involving the interpretation of this Constitution or of the Constitution of a State unless the public interests of some part of Her Majesty’s Dominions other than the Commonwealth or a State are involved.

“Except as provided in this section this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal Prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. But the Parliament may make laws limiting the matters in which such leave may be asked.”

10.—That under Section 73 of the said Bill the right of appeal to Her Majesty in Council from the Supreme Court of the present existing Colonies is left intact and in addition an alternative right of appeal to the High Court of Australia is created.

11.—That it is to the interest of the whole Empire that there shall be certainty and uniformity in the decision of all questions especially in mercantile matters arising within the different portions of the Empire and that such certainty and uniformity cannot be attained unless the final Court of Appeal for the whole Empire be to Her Majesty in Council.

12.—That at the present time persons and corporations trading or owning property in different portions of the Empire have entered into contracts or have advanced moneys knowing that in important matters the right of appealing to Her Majesty in Council as a final Court of Appeal at present exists and any interference with or limit placed upon such right of appeal will very seriously affect such persons and corporations and generally interfere with the commercial interests of the Empire.

13.—That under Section 74 in the event of cross appeals arising from the decision of the Supreme Court of any State in any suit action or matter appeal may be made by one party to Her Majesty in Council and by the other to the High Court of Australia.

14.—That in the event of the same subject-matter arising for decision in two separate States or between different sets of litigants in the same State an appeal may be carried in the one case to Her Majesty in Council and in the other to the High Court of Australia.

15.—That even in the case of one proceeding or matter as for instance the liquidation of a company by or under the direction of the Court of a State there may be under this Bill an appeal to Her Majesty in Council by one unsuccessful party and to the High Court of Australia by another unsuccessful party although such appeal involves exactly the same point. The same observation applies or may apply to matters arising out of the administration of the Land Acts of this and the other Australian Colonies.

16.—That under this Bill an unsuccessful party may insist on his right to appeal to the High Court of Australia and the successful party must allow such appeal to proceed and has no right to insist that the appeal shall be made in the first instance to Her Majesty in Council. Your Petitioners venture to think that either party should have the right to insist that an appeal shall go direct to Her Majesty in Council.

17.—That in this way the alternative right of appeal created by the said Sections 73 and 74 will give rise to difficulties and confusion in practice and may lead to conflicting decisions of law by the alternative Courts of Appeal in respect of the same subject-matter or the same point of law.

18.—That the existing right of appeal to Her Majesty in Council purporting to be left intact by Section 73 is further seriously prejudiced and diminished by the wide prohibition embodied in the first clause of Section 74 of the said Bill. This provision may affect the rights and interests of citizens of the Commonwealth and of the State inasmuch as by Section 51 of this Bill the Parliament of the Commonwealth has power to legislate (among other things) upon trade and commerce with other countries and among the States.

19.—That the second clause of Section 74 of the said Bill enabling the Parliament to make laws limiting the matters in which Her Majesty may be asked by virtue of Her Royal Prerogative to grant special leave of appeal from the High Court to Her Majesty in Council will have the effect of empowering the Federal Parliament to seriously limit if not to practically destroy the right of Her Majesty's subjects in the Australian Colonies to appeal to Her Majesty in Council as a final court of ultimate resort.

20.—That the effect of this provision will be to remove from Her Majesty in Council and the Imperial Parliament the right to determine what matters shall be the subject-matter of appeal to Her Majesty in Council and to remit that right to the Federal Parliament.

21.—That it is desirable that the existing rights of appeal to Her Majesty in Council should not be curtailed in any way and that in order to obtain uniformity of decision it is desirable that Her Majesty in Council should remain the final Court of Appeal from the Supreme Courts of Her Majesty's Australian Colonies.

Your Petitioners therefore most humbly pray:

That the said Bill may not pass into law as it now stands but that your Honourable House will be pleased to take into consideration the representations and statements herein contained and will make such amendments or alterations in the said Bill as may be necessary for the purpose of retaining intact the present existing rights of appeal to Her Majesty in Council possessed by Her Majesty's subjects in the Australian Colonies.

And your Petitioners as in duty bound will ever pray &c.

The original of the Petition bears the Corporate Seal of each of the Petitioner Corporations.

(Received 2:55 p.m., April 25, 1900.)

TELEGRAM.

BEFORE I relinquish the administration of the Government on the return of Lord Lamington, who arrives to-morrow, I think that it is my duty to inform you that, so far as I can judge, there is a great preponderance of public opinion throughout the Australian Colonies in favour of the acceptance of the suggestions of Her Majesty's Government as to Appeal to Privy Council.

Public opinion, is further, almost unanimous that if any amendment is made in the Bill, provision should also be made for the completion of Federation by meeting the wishes of Western Australia. The announcement that Her Majesty's Government have decided in this sense would, I am satisfied, be generally welcome, and would end the difficulty.

No. 55.

Colonial Office to The Bank of New South Wales.

[Answered by No. 60.]

Sir,

Downing-street, April 26, 1900.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of the letter of the 24th instant,* signed by the Manager of the Commercial Banking Company of Sydney and yourself, enclosing copies of a petition to Parliament from the institutions you represent, and the Trustees of the Savings Bank of New South Wales, praying that the existing right of appeal to the Privy Council may be retained.

Mr. Chamberlain desires me to state that your letter and the petition will be included in the papers which are about to be presented to Parliament on the subject of the Commonwealth Bill, but that, in regard to your request that he should present the petition, he would prefer in the circumstances that you should make other arrangements in that respect.

I am, &c.,

AM desired by Ministers to transmit following resolution:—

Begins: Sydney Chamber of Commerce protest against any curtailment in Commonwealth Bill of existing right of appeal to Privy Council.AUGUSTUS ROBINSON,
President.

No. 57.

Memorandum of the Australian Delegates (except Queensland).

AFTER the Conference held at the Colonial Office on the 5th April, 1900, the Right Honourable the Secretary of State invited the Premiers of the Australian Colonies which have forwarded the Commonwealth Bill to "co-operate" with him in securing an "amendment of Clause 74 in the way most agreeable to Australian sentiment," trusting that they would "see fit to enlarge the instructions to their Delegates," and give them "authority to arrange with Her Majesty's Government the speediest and most satisfactory method" of doing so. The one remaining amendment of the measure which Her Majesty's Government have suggested has been fully considered by the Premiers in conference. As they have been unable to accept it, or to agree to withdraw, enlarge, or modify the instructions under which the Delegates are acting, it continues to be the common duty of the Delegates, each of whom is appointed to represent all of the Federating Colonies, to press for the speedy passage of the Bill as prepared by the instructions and endorsed by the votes of the Australian people. In firmly preferring this request with all possible respect, the subscribing Delegates feel it to be desirable to offer some comment upon the Memorandum of the Secretary of State of the 29th March, 1900, not from any desire to unduly prolong controversy, but simply to prevent possible misunderstanding.

It is unfortunately a necessity that their remarks should be mainly confined to the legal issues raised by the Crown Law Officers, and chiefly upon legal lines. But at the outset the Delegates desire to once more affirm their conviction that the real question involved is only incidentally one of a legal character. So far as they discuss matters of interpretation or construction of the Commonwealth Bill, it is merely for the purpose of showing that they may be safely set aside even from the standpoint of the constitutional lawyer. They may be, and indeed are, worthy of the best examination in detail, and this the Delegates have endeavoured to give them, satisfied as they are that at best they affect only what in the present case may be termed side issues. It is hoped that they will be read in this light, and not supposed to be fundamental, because they are here again examined at some length. The substantial issue which it has been the first duty of the Delegates to submit, and which they again, with all deference, press upon the best attention of Her Majesty's Ministers, is that the Bill as prepared is the Australian Constitution in a double sense, since it is not only Australian by origin, but by the deliberate endorsement of Parliaments and peoples. Any alteration of it not both absolutely essential and incapable of achievement by any other means and at any other time is to be deprecated as destroying the character of the measure so prepared, and re-opening numerous issues at present happily and conclusively settled.

The very preamble of the Commonwealth Bill, in language adopted after full debate as the foundation of the whole structure, sets out that the people of the Colonies which have adopted the Constitution "humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established." An alteration such as is proposed would, therefore, at once vitiate the agreement to unite, and render this solemn declaration a violation of the facts.

It is to be gravely apprehended that if Clause 74 be amended the persistent opponents of Federation and of this Bill would be encouraged to renew their agitation. A fresh referendum, whatever its result, must involve further expense, delay, and vexation. If a referendum were not granted it would be correctly asserted that the Bill no longer contained the contract which the people had accepted. In either case, the initiation of the Commonwealth would be embittered, and its earliest problems confused by the introduction of issues fruitful of strife. The Delegates are still confident that Her Majesty's Government will not find it incumbent upon them to adopt a course involving such consequences.

The anxiety of Her Majesty's Government that the Bill should be speedily passed is acknowledged with gratification. That it is their bounden duty to protect other interests besides those of Australia, if any such are injured, is as readily recognized. It is believed that the Commonwealth Bill has been framed with every due regard to this consideration, and that the Representatives who prepared it have left nothing undone to secure in its provisions just protection to the interests of the Mother-country and of the rest of the Empire, as well as of Australia.

As it is no longer in contemplation to alter the measure except as to Clause 74, the effect of which would be nullified by amending Nos. 2 and 5 of the "covering clauses," the Delegates will confine their remarks as closely as possible to that part of the Bill. They are told that their previous Memorandum "abstains from discussing any of the suggested alterations on their merits." They venture respectfully to entertain a different opinion, and in support of it they point to the fact that the elaborate Memorandum of Her Majesty's Government is of a nature which would scarcely have been thought necessary had not the merits of the suggestion been shown to be, at the least, arguable.

The Delegates, however, admit that they have forborne to dilate on the disadvantages to Australia which result from present appeals to the Privy Council, for not only are the delay and expense of these appeals incapable of serious dispute, and the evils patent which are inseparable from the want of judicial knowledge of Australian laws and conditions, but the Court as at present constituted is not attempted to be defended. Whether its proposed reconstitution will suffice from the Australian point of view must depend upon subsequent Imperial legislation. If that legislation suffices, it will then be possible to confer on the reconstituted Court jurisdiction with reference to Australian appeals. But Australia has, for many

years, sought to secure a remedy for the existing conditions, and when at length, after infinite pains she has formulated a scheme which satisfies Australian requirements, and which is ready for legislative enactment, it would manifestly be inequitable that its adoption should be postponed pending the consideration of some other remedial measure not yet prepared, and which may, or may not, be satisfactory.

Australia has not chosen this moment to present an alternative to the proposals of Her Majesty's Government, but the reconstitution of the Council is now presented as an alternative to the acceptance of the work on which Australia has been engaged for years, in the endeavour to cope with existing disabilities which must otherwise remain for an indefinite time until removed by means of which the details have not yet been submitted to Parliament. The Bench in Australia composed of Her Majesty's Judges is under no suspicion, and suffers from no stigma. When the proposal for the establishment of an Imperial Court of Appeal was submitted to the Premiers, they replied that such a tribunal "would doubtless present attractions to the people of Australia." If, then, the measure creating such an Imperial Court be hereafter passed, containing a ready means by which its jurisdiction might be adopted by the Commonwealth in regard to issues involving the interpretation of local Constitutions, there would be no difficulty in the way of a cordial acceptance of the new Court by the Federal Legislature. Assuredly, the creation of the new Court would not be delayed by the immediate passage of Clause 74. The desired end would thus be happily attained by an unexceptionable procedure without the friction likely to be generated by the amendment of the Commonwealth Bill. The establishment of the Commonwealth necessitates the immediate constitution of a Court to which speedy recourse may be had for the determination of differences between the Commonwealth and the States as to their relative jurisdictions. The delay and inconvenience which would inevitably result if that Court were only to be found in England are surely too grave to be permitted.

The merits, however, are largely apart from the question whether the handiwork of the Australians in their Bill is open to improvement. In provisions which are not objected to they have provided the means for improvement by their own hands, when they think the day for it has come; but as the making of the measure is an act of self-government, so is the amending; and the question is, whether this act of self-government can meritoriously be interfered with.

It is remarked that "the points of difference are few in number, and involve a minimum of alteration." There being now but one point of difference, it is not worthy of consideration whether friction and dissatisfaction should be created for the sake of so little, and whether the whole of the draft Bill should not be submitted to Parliament, and passed into law, in its present form, when it is as plain that the refusal would mean much to Australia as it is that the gracious concession of all cannot mean much to Her Majesty's Government or to Parliament.

It is not quite an accurate description of the Enabling Acts, under which the referendum was taken, to say that they "formally referred to the 'Constitution' only." Both in the Enabling Act and the Addresses, the Constitution means the whole Bill. Take, for instance, the New South Wales Enabling Act of 1895, under which her Representatives in the Convention were elected. While Section 3 states that the first of the chief objects of the Act is to provide for the framing of a "Federal Constitution for Australasia," Clause 7 imposes on the Convention the duty of framing a Federal Constitution "in the form of a Bill for enactment by the Imperial Parliament"; and, having thus stated what it means by a Federal Constitution, the Act, whenever it afterwards refers to the Constitution, must be taken to refer to the Bill for enactment by the Imperial Parliament. Further, the Act provides for the adoption by the several Colonial Parliaments of Addresses to the Queen, praying "that the Constitution may be passed into law by the Imperial Parliament." The "Constitution," therefore, which was to be the subject of the Addresses, plainly meant the whole of the Bill for enactment by the Imperial Parliament referred to in Clause 7.

Again, in the Act of 1899 making "provision for the acceptance and enactment of a Federal Constitution for Australia," the Preamble recites the preparation by the elected Convention of a draft Bill intitled, "Draft of a Bill to constitute the Commonwealth of Australia," and that the said draft Bill "was duly submitted to the vote," at the first referendum; and in the whole of this enactment the "draft Bill" is the measure which is to be put to the vote, and the term "Constitution" is defined as "the draft of a Federal Constitution set out in the 3rd Schedule," turning to which we find it to contain the draft Bill, "covering clauses" and all. It was this draft Bill which was submitted to the final vote, and that is why the whole of it is sent forward with the Parliamentary Addresses as "the accompanying Constitution," the enactment of which is prayed.

The Convention, then, did not act *ultra vires* of the Enabling Acts in preparing and submitting the covering clauses. The same consideration was given to them as to the rest of the Bill. They are part of the Constitution as defined in those Acts, in compliance with which they were submitted to the people. The Enabling Acts were passed, within their legislative powers, by the Parliaments of the several Colonies, and assented to by Her Majesty's Representatives, and no attempt has ever been made to disallow any of them.

It is quite true that there are ways in which the covering clauses could be altered without changing the meaning of the Schedule; but that is not the case with regard to the suggested alterations as to Privy Council Appeals, which is avowedly intended so to operate as to practically nullify Clause 74. No Delegate, and no Australian Minister, has ever admitted, or even suggested, that it would be a preservation of the intercolonial compact of the electors to make such an alteration as this.

There is no utterance of Mr. Barton's, nor is there any inference to be drawn from any words of his, which can point to any acquiescence on his part in anything amounting to an amendment of the Schedule headed "The Constitution." The very passage quoted on p. 2 of the Memorandum of Her Majesty's Government from a speech of his at the Sydney meeting of the Convention in 1897 is an expression of his confidence that the provisions of the "Constitution" itself would not be altered, and cannot be cited to show that he would acquiesce in amendments of it simply because they were made through the covering clauses. But the Delegates would remark that the question now under discussion should be considered in relation rather to the conclusions of the Convention and afterwards of the Premiers, as ratified by the electors, than to the expressions of individual representatives in debate.

It may here be made clear, if, indeed, it is not so already, that the Delegates do not put forward on the part of Australia any "claim to have a final voice in respect of matters which are not purely Australian."

Australian." They believe, and with confidence, that there is no desire to prevent Australians from managing their own affairs, so long as in so doing they make no attempt to manage the affairs of other countries. They do not presume to doubt that Her Majesty's Government, and the Parliament of the United Kingdom, being in a sense trustees for the whole of Her Majesty's dominions, regard it as their duty to see that no one part of the Empire exercises its self-governing powers in derogation of the rights of other parts of the Empire. On the other hand, if an extension of self-government is sought under circumstances which do not injuriously affect other parts of Her Majesty's dominions, the Australian people believe themselves to be entitled to such an extension. This is merely an assertion of the ordinary rights of British citizenship among Her Majesty's free white subjects.

The substantial questions then are—

1. Whether Clause 74 derogates from the rights of other parts of the Empire? and
2. Even if it appears technically to do so, whether the clause would in its operation injuriously affect other parts of Her Majesty's dominions?

The Delegates confess their inability to see that an affirmative answer can be given to either of these questions.

As to the first question, the clause expressly reserves the rights, or, to use its own words, the "public interests," of every part of Her Majesty's dominions outside the limits of the Federation. It is said that "public interests" need legal definition. If the expression has no technical meaning, it must be construed in its ordinary and common-sense signification; and there ought to be no difficulty on the part of the average citizen in understanding the meaning of a term which he reads every day in his newspaper, and frequently employs in his speech. Where the question at issue concerns the legislative powers given by the Constitution to the Federal Parliament, or those conserved to a State, the "public interests" of another part of the Empire will be involved where it becomes necessary to define the extent to which, if at all, the exercise of such powers has impinged on those exercised by the Crown, or by the Imperial Parliament, or by the Legislature of any other part of the Queen's dominions. It is evident that this consideration meets most of the difficulties suggested in the Memorandum of the Government, inasmuch as in this class of cases the path of appeal to Her Majesty in Council cannot be barred by the clause. If, for instance, questions arise "whether legislation under any of the powers mentioned in paragraphs 1, 9, 10, 19, 20, 26, 27, 28, 29, 30, 37, and 38 of Article 51 of the Constitution is or is not *ultra vires*," and the legislation involves matters "affecting foreigners and foreign ships in Australia and in Australian waters, and their Treaty rights," Clause 74 will not take away the right of appeal, for the public interests of Her Majesty's dominions outside Australia would be involved. Any other conclusion would need for its support the somewhat embarrassing contention that in such instances there is no conflict of public interests.

If the interests of investors in Australian securities, or of shareholders in "industrial undertakings formed in the United Kingdom to carry on some great commercial enterprise in Australia," are touched as the result of Federal legislation, they can be equally touched now under those Constitutions which give the several Colonies the right to legislate for the peace, order, and good government of those Colonies "*in all cases whatsoever*." These are powers in the every-day possession of each of the Colonies composing the Australian Federation: powers which are not grudged to them singly, but which are supposed to be dangerous in the hands of the Commonwealth they are about to form, and especially dangerous when the legal mind expresses itself judicially in Australia instead of at Westminster. Is this the time for such mistrust?

But assuming that the interests of these classes of subjects are not "public interests" of the parts of the Empire in which the subjects live, how can it be said that Imperial interests are affected by the subjection of enterprises in Australia to Australian laws, for the mere reason that these laws are to be interpreted by Her Majesty's Judges in Australia? British investors are content to lay out their money in other parts of the world under alien laws, interpreted by alien tribunals. Australians will be prone to doubt that such investors can be seriously alarmed at the prospect of having afforded to their investments in Australia the security of British laws administered by British Judges, a security which will never be questioned. The Memorandum refers to the high standing and ability of Australian Judges, although the basis of the Memorandum appears to imply a want of confidence in their trustworthiness. The capacity and impartiality of Judges drawn from Australia have lately been recognised by making them eligible to seats on the Judicial Committee of the Privy Council. Surely their possession of these qualities is not doubted because they sit in Australia, and admitted only when they are associated in their labours with Imperial Judges? Or can it be supposed that they are unable to discharge their duties adequately or without bias except on the opposite side of the world to that in which the cause of action arose? Our Judges are now appointed to hear the very class of causes in which it is suggested that they would prove unreliable if they heard them in Australia.

The Delegates fail to understand how the interpretation given to the Federal Constitution, or to the Constitution of an Australian State, is likely to derogate from the rights, or to injure the public interests of, for example, Hong Kong or Vancouver. The principles of statutory interpretations are the same throughout the Empire, and when those principles are applied in Australia to extract the meaning of a clause or a phrase, the process is scarcely likely to diminish the security of life, liberty, or property elsewhere. If a controversy is finally decided by the High Court of Australia the decision will, of course, be a guide, *but in Australia only*, to the settlement of subsequent controversies in similar cases; but that is to-day the fact with respect to the decisions of the Superior Courts, in all parts of the Empire, when not appealed from; and however closely those decisions may be followed in the Courts which give them, it will scarcely be contended that they injuriously affect the rights of litigants in other parts of the Empire, or shake the principles upon which those rights are upheld.

It is, however, generally contended, in opposition to Clause 74, that its operation would "tend to destroy uniformity of decision on constitutional questions," and would in this way raise confusion and uncertainty, which would be against the interests of the rest of the Empire. The principles of the interpretation of Statutes are so well understood that any lack of uniformity in that regard is out of the question. But in their application to the words of an Australian Constitution, the occasion for uniformity of the decisions with those given on the meaning of other Constitutions does not even arise. The decisions of the particular Court would be consistent, one with another, whether pronounced by the High Court or by the Privy Council, since the same Court does not usually give inconsistent judgments; but the questions which may be raised as to the construction of the Constitution must themselves differ

so completely from questions affecting Constitutions of different design, that uniformity of decision is in this respect as unattainable as it is undesirable. The Constitution of Canada is entirely different from the Commonwealth Bill in many points, but especially as regards the reservation of residuary powers affected by the enumeration in Clause 5, and by the express reservations of Clauses 106, 107, and 108. Uniformity of decisions in questions such as these would be an attempt to bring two differing Constitutions into line, with the result of confusion and disaster.

Judicial knowledge of local conditions is an essential to true interpretation, which, nevertheless, differs with the conditions; and where the structural methods of two Constitutions are as widely apart as the countries to which they apply, and where also the local conditions are as far asunder as the methods or the countries, to strain after uniformity of decision is to grasp at peril with both hands. If uniformity of legislation in widely separate parts of the Empire is unattainable, as it will be so long as men of British race are free, it cannot be said to be so important as to be essential to Imperial interests that there should be uniformity in the interpretation of dissimilar Constitutions. Moreover, sensible business people do not resort to lawyers at a distance from a country to find out what the law of that country is. If a merchant in London wants to know the Australian law affecting his interests, he seeks the advice of competent counsel in Australia; he does not prefer the opinion on such questions of even the most eminent of English lawyers. Why is this? Clearly because his common sense tells him that an intimate knowledge of local laws and conditions is of the highest importance in the formation of a sound opinion. Suppose, then, that the leading counsel in Australia and the eminent jurist in England are both promoted to the Bench, will it follow that the promoted Englishman will understand the local law as well as his promoted brother in Australia, to whom a superior knowledge of that law was accorded in practice before his promotion?

Her Majesty's Judges in Her Australian Courts may be as fairly trusted to abstain from infringing the rights of Her subjects residing elsewhere as any Judges in any other of Her Courts. Justice is administered in the name of the Queen. The Courts, wherever situated, are constitutionally Hers, and the Judges are constitutionally Her selection, nor has it been found difficult to give Australian Judges the status of Privy Councillors. Her Advisers in Australia are, and will be, as responsible for wrong guidance as are Ministers in this Kingdom, and Australians are not so un-British as to admit that 4,000,000 of them cannot properly conduct their own affairs, or properly choose Judges who can say, better than any authority elsewhere, what those Australians mean in their Constitutions. It may, of course, be said that the Commonwealth Bill will be an Imperial Act. Nevertheless, it is an instrument of Government framed by chosen Australians and ratified by those who chose them. If the Australians had not made it, the occasion for this discussion would never have arisen.

In discussing the first of the questions which they take to be involved, the Delegates have found it impossible to avoid touching the second; but probably it will be apposite to the second question to remark briefly on the contention, that to reserve to Her Majesty's Judges in Australia the final decision of a few Australian questions will shatter, or at least weaken, a "link of Empire." The Delegates reflect with pride that there are sentiments which will constitute eternal "links of Empire," but are quite unable to understand how there can ever be the least hope that we can merely, "by insuring uniform interpretation of the law throughout the Empire, facilitate that unity of action for the common interests which will lead to a real Federation of the Empire." The "unity of action" and the "uniform interpretation of the law" seem to them wholly unrelated, and certain to remain so. The consciousness of kinship, the consciousness of a common blood, and a common sense of duty, the pride of their race and history, these are the links of Empire—bands which attach, not bonds which chafe. When the Australian fights for the Empire, he is inspired by these sentiments, but no patriotism was ever inspired or sustained by any thought of the Privy Council.

The Delegates fail to see how its monopoly of the right of final interpretation can tend to make the Australian feel that it binds his affections more closely to the mother of his race. The tie of affection will last as long as its causes. May that be for ever. The tie which is not rooted in affection is no boon, it is an injury; and yet we are told it is to be maintained lest Her Majesty's Judges in Australia should give interpretations to the British Laws and Constitutions of that land which will usurp the powers, or endanger the interests, of their fellow-subjects elsewhere. Even now Australian Legislatures have the power to make declaratory laws, and cases have arisen in which they have declared by Act of Parliament the meaning of their laws to be the reverse of that which the Judicial Committee has attributed to them. Will it be said that this legislative power thus exercised by Australians, to interpret finally their own laws, is a danger to British interests or a destroyer of any link of Empire? Unless the power is so chargeable its existence and exercise seem quite inconsistent with the position set up by the Memorandum of the Government. Why should not Australians, have the alternative of interpreting their meaning on the Bench as in the Senate? Are their Judges less trustworthy than their legislators?

The Delegates are not unaware that representations, which they have not had the advantage of seeing or hearing, have on this subject been addressed to Her Majesty's Government. If they have come from private citizens they have generally emanated from members of the minority who have opposed the Bill. If they have come from men of high official position, they are as destitute of authority as in all cases ought to be the pronouncements of officials in derogation of the action of Government when backed by Parliament and people. Contrast with these criticisms the explicit language of the Right Honourable G. H. Reid, speaking as Premier of New South Wales in August last: "There will be no safety or security for Australian union until it is known that the Bill that Australia has drafted for the Imperial Parliament to pass word for word is passed by that august tribunal word for word." Without citing the numerous expressions of similar opinions from leading public men of all parties in Australia, the subscribing Delegates may be forgiven if they refer to their own qualifications for interpreting the views of the Australian people. Four of them were elected members of the Convention which framed the Bill, at a time when the Colony of Queensland was not represented in the Councils of Federation. One of them was the elected President of the Convention, another of them was elected to that Convention by the largest number of votes ever polled for any candidate in Australia, and he was subsequently made the leader of the Convention by the voices of all the Colonies. Mentioning these facts, merely to show that they speak from personal knowledge, the Delegates assure Her Majesty's Government that the proposed alteration of the Constitution, even through a covering clause, cannot fail to be distasteful and harassing to the Australian people. If they accepted the Constitution with such an amendment, it would be because they were made to choose between the bowl of intervention and the dagger of delay.

In conclusion, the Delegates submit that the object of all those who seek "to draw closer together all parts of the Empire" will be best served in Australia by never permitting its Federation to be placed, under any circumstances, in even apparent opposition to "the larger question of Imperial Federation." So far from there being any necessary conflict between the two movements, it has always been maintained in the Colonies that local union is an essential preliminary to any practical scheme of Imperial co-operation. The suggestion that they are antagonistic is therefore to be deprecated, as it is not only unjustified, but must deal a serious blow to the prospects of Imperial Federation all over Australia.

The Delegates therefore plead most earnestly with Her Majesty's Government that effect may be given to the representations made by the Australian Premiers in their recent telegram. That despatch makes it clear that the clause as it stands was repeatedly considered and ratified by Convention, Premiers, and people; that the electoral adoption of the Bill is a mandate to Executives and Legislatures to seek its enactment in the form which the people gave it by their representatives, and confirmed by their votes; that the Premiers decline to accept alterations, because that course is unauthorised in view of the mandate, and would therefore be improper; and that they declined to authorise others to do on their behalf that which they cannot rightly do themselves. This request implies no questioning of the trusteeship of Her Majesty's Government, of the wisdom of Parliament, or of its sovereign power; but often it has been the truest wisdom of sovereignty to abstain from the exercise of its power, or so to exercise it only as to win the gratitude of those who are subject to its authority.

No. 58.

Governor Lord Lamington (Queensland) to Mr. Chamberlain.

(Received 12:44 p.m., April 27, 1900.)

TELEGRAM.

My Government are astonished at attitude of Mr. Deakin at Colonial banquet, and they are in favour of inclusion of your amendment *re* Privy Council in Federation Bill. The Premier says that the people of this Colony are strongly in favour of amendment. Chief Justices of South Australia, New South Wales, and Queensland, whom I have seen, are all strongly of opinion that you should insist on amendment without reference to local Parliaments.

No. 59.

Mr. Chamberlain to Acting Governor Sir A. C. Onslow (Western Australia).

(Sent 4:5 p.m., April 27, 1900.)

TELEGRAM.

[Answered by No. 63.]

REFERRING to my telegram of 5th April*, as you are probably aware, Premiers of Federating Colonies have declared that they have no authority to accept amendments in Bill, and they have not given the Delegates any instructions in regard to any suggestion. I cannot in these circumstances press the matter further, and I would now urge your Ministers earnestly to consider whether they should not, in the best interests of the Colony, as well as of Australia, make a resolute effort to bring the Colony into Federation at once.

Western Australia, unless it joins as Original State, can only enter later on condition of complete intercolonial free trade. It will thus lose the temporary protection offered by Clause 95, and, looking to present population of Colony, it may also be found difficult to secure such large representation as it would receive as Original State, and which will enable Colony to secure adequate protection for all its interests in Federal Parliament.

Your Ministers will also, of course, take into consideration effect of agitation of the Federalist party, especially in gold-fields, if Western Australia does not enter as Original State.

In these circumstances it appears to me of utmost importance to future of Western Australia that it should join at once; and as your Ministers have done their best to secure modifications desired by Parliament, I would urge them to take early steps for summoning new Parliament and laying position fully before it with a view to the action necessary for ascertaining wishes of people as to entering Federation.

If they agree to this course, a clause will be inserted in Bill providing that, if people have intimated desire to be included before issue of Her Majesty's Proclamation, Western Australia may join as Original State.

The Agent-General for South Australia to Colonial Office.

(Received April 30, 1900.)

Office of Agent-General for South Australia,
1, Crosby Square, Bishopsgate-street Within, London, April 28, 1900.
Sir,
I am directed by the Agent-General to inform you that he has received the following by cable from the Honourable the Premier of South Australia :—

“ Adelaide Chamber of Commerce request that you will communicate the following to the Right Honourable the Secretary of State for the Colonies :—At a general meeting, yesterday, a resolution was passed requesting the Imperial Government to insist on provisions of Commonwealth Bill maintaining right of appeal to Privy Council as now existing.”

I am to say that Sir John Cockburn would be obliged by your bringing this, in due course, under Mr. Chamberlain's notice.

I am, &c.,
T. FRED. WICKSTEED,
Secretary.

No. 62.

Colonial Office to The Agent-General for New Zealand.

Downing-street, April 28, 1900.
Sir,
With reference to the letter from this Department of the 18th instant,* enclosing copy of a telegram† which had been sent to the Federating Colonies of Australia in regard to the wishes of your Government, I am directed by Mr. Secretary Chamberlain to acquaint you that the Premiers at their Conference at Melbourne have decided that they have no authority to accept any amendment of the Bill, and that they consider that the Bill already provides sufficiently for the admission of New Zealand.

In these circumstances Mr. Chamberlain does not feel justified in further pressing for amendments in regard to a question which appears to be one to be settled by the Australasian Colonies without Imperial interference.

I am, &c.,
C. P. LUCAS.

Downing-street, April 28, 1900.
Sir,
I am directed by Mr. Secretary Chamberlain to transmit to you the accompanying copy of a telegram‡ which he has addressed to the Governor of Western Australia on the subject of the entry of the Colony into Federation.

I am, &c.,
C. P. LUCAS.

No. 64.

The Agent-General for New Zealand to Colonial Office.

(Received May 2, 1900.)

[Answered by No. 89.]

Westminster Chambers, 13 Victoria-street,
London, S.W., May 1, 1900.

Sir,
I have the honour to acknowledge the receipt of your letters§ of the dates quoted in the margin.

I much regret that, in response to the hope expressed in my telegram to you of the 17th April,|| the Right Honourable the Secretary of State did not see his way to telegraph to the Governors of the Federating Colonies that Her Majesty's Government were prepared to “ favourably ” consider the amendment desired by New Zealand, should the Premiers of those Colonies think it unobjectionable.

While thanking the Right Honourable the Secretary of State for the courteous attention he has personally given to the case of New Zealand, I have also to regret that he did not see his way to grant me, as the representative of New Zealand, a position of advantage in urging my Colony's case equal to that accorded to the Delegates from the Federating Colonies.

I also regret to note that the Right Honourable the Secretary of State appears to be of opinion that the insertion of a covering clause preserving an “ open door ” for New Zealand, for, say, seven years, might delay the passing of the Commonwealth Bill. As such an amendment would not involve a referendum, I am unable to believe that it would delay the Bill.

I

* Not printed.

† No. 44.

‡ No. 59.

§ Nos. 47 and 62.

|| No. 43.

¶ Formal letter transmitting a copy of No. 44.

I have also to regret that the Right Honourable the Secretary of State is of opinion that the matter of the amendment desired by New Zealand is one for settlement by the Australasian Colonies themselves. I especially regret this, because it is virtually impossible that the matter can be settled by the Australasian Colonies themselves. Owing to the peculiar position of the Australian Commonwealth Bill, no authority, except the Imperial Parliament, exists for dealing with the question, and it appears therefore to me to be easy to understand why under such circumstances no Australian statesmen are prepared to take the responsibility of advocating any concession, however slight and just, tending to safeguard the interests of New Zealand.

As, therefore, the course suggested by the Right Honourable the Secretary of State is manifestly impossible (inasmuch as no body exists in Australia authorised to deal with the matter), my Government respectfully adheres to its position, and still trusts that Her Majesty's Government may be pleased, either by the insertion of a clause in the Imperial Act covering the Commonwealth Bill, or by such other step as may seem advisable, to protect the endangered interests of New Zealand.

The loyal and important Colony of New Zealand, whose present and future interests are certain to be deeply affected by the legislation which the Imperial Parliament is about to consider, only asks to be assured under the Commonwealth Bill that it will be accorded no worse treatment than was given to more than one North American Colony during the process of completing the Federation of the Canadian Dominion.

I cannot help thinking that such a question, in respect of which an appeal is made to the Imperial Government and Parliament of the British Empire, from one of its most patriotic dependencies, whose distant insular position entitles it to special consideration, ought not to be regarded as one undeserving of Imperial interference.

I venture to express a hope that, provided the Right Honourable the Secretary of State sees no objection, my memorandum addressed to him on the 30th March,* the report of the remarks I made at the meeting at the Colonial Office on the 5th April,† and the correspondence‡ with yourself, of which this letter forms a part, will be laid before Parliament when the Commonwealth Bill comes on for consideration.

I have, &c.,
W. P. REEVES.

Governor the Earl of Ranfurly (New Zealand) to Mr. Chamberlain.

(Received 3.19 p.m., May 2, 1900.)

TELEGRAM.

My Government look with grave concern on the pressure that is being brought to bear with respect to abrogation of Her Majesty the Queen's prerogative and right of appeal to Privy Council. My Government admit small commercial disputes might show cause for a Federal Court, but at the same time in best interests of Empire the right of appeal to Privy Council on constitutional ground and important commercial suits where British subjects outside Colonies are interested is one of strongest links binding us to Mother Country. It is to be remembered that New Zealand is outstanding State. If Imperial Government give way to demands of Australian Delegates, same privileges could not be reasonably denied other States if demanded. Advantage of present position is exemplified by Midland Railway appeal; nothing short of appeal to Privy Council could have satisfied all parties. Despatch follows by mail.

No. 68.

Acting Governor Sir A. C. Onslow (Western Australia) to Mr. Chamberlain.

(Received 8.30 p.m., May 2, 1900.)

[Answered by No. 73.]

I AM desired by Ministers to thank you for your great efforts to obtain one amendment required in the Bill on behalf of Western Australia, and regret you have been unable to secure the desired alteration. Parliament has been summoned, on your suggestion, for the 17th May, when an Enabling Bill will be introduced by Premier providing for the immediate submission of the Federation Bill to the people.

Ministers gratefully accept your offer to make provision in the Imperial Act for Western Australia to enter as an Original State should the wishes of the people be expressed in favour of Federation before the Queen's Proclamation is issued.

Memorandum in Reply to Memorandum of Delegates of 27th April. (No. 57.)

4 May, 1900.

HER Majesty's Government feel that no useful purpose will be served by a detailed discussion of all the arguments contained in the Memorandum of the 27th April, signed by four of the Australian Delegates, as most of them have been met by anticipation in the Memorandum of the 29th March.* Nothing would be gained by the repetition of arguments which have already been sufficiently developed, and Her Majesty's Government feel that the time has come when further written discussion of the position adopted by the Delegates with reference to the amendments suggested by Her Majesty's Government is unnecessary. There are, however, one or two points which deserve a brief comment, even at the risk of some repetition.

It cannot be fairly contended that the approval given by the people of the Australian Colonies in favour of the proposals for Federation submitted to them is to be taken as an unqualified and considered ratification of every detail of the Constitution, and that no single provision of the measure can be altered without contravening the deliberate decision of the majority of the electors of Australia on that point.

The only other point to which Her Majesty's Government think it necessary at this stage to allude has reference to the statements made in the seventh paragraph of the Memorandum of the 27th April respecting the alleged disadvantages which at present attend appeals to the Privy Council.

Her Majesty's Government believe that these appeals are not attended with such delay and expense as are suggested, and they are not aware of any justification of the statement that there are patent evils arising from the want of knowledge of Australian laws and conditions.

It has never been admitted, nor can it be justly asserted, that the Court of the Privy Council as at present constituted is incapable of defence. Her Majesty's Government refer to the statement in their Memorandum of the 29th March, that the administration of justice by the Privy Council has been, on the whole, such as to command the confidence of the Empire. This statement is amply justified by the history of that Tribunal, and no inference to the contrary can properly be drawn from any proposals for still further improving its constitution.

The excellent work which has been done by the Judicial Committee in deciding the extremely difficult and delicate questions which arose between the Dominion and the Provinces of Canada is of itself a complete refutation of the idea that the Tribunal as at present constituted needs any defence.

The amendments which have been proposed by Her Majesty's Government are based upon no mistrust of the people of Australia; the sole desire of Her Majesty's Government is that, in a matter which affects not only the welfare of Australia, but the interests of the whole Empire, the Bill should be passed in a form which will be best alike for Australia and for every other part of Her Majesty's dominions. In the attempt to attain this result Her Majesty's Government confidently hope that they will have the co-operation and the support of the Australian people.

No. 72.

Lieutenant-Governor Sir John Madden (Victoria) to Mr. Chamberlain.

(Received 9:23 a.m., May 4, 1900.)

TELEGRAM.

WHILE I should have preferred not to interfere in the matter, I am unquestionably of opinion, since you desire my view, that while for merely legal purposes, an equally good Court of Appeal might possibly be established from Federated Australia, still the importance of the constitutional, Imperial, and commercial aspects of the matter makes it very desirable that the amendment suggested by Her Majesty's Government should be adopted.

No. 80.

Governor Earl Beauchamp (New South Wales) to Mr. Chamberlain.

(Received 5.10 p.m., May 5, 1900.)

TELEGRAM.

THE *Daily Telegraph* declares that Clause 74 should never have been inserted, because it has nothing to do with Federation, and wantonly snips off one of the prerogatives of the Crown. This paper entirely favours amendment.

The *Sydney Morning Herald* supports Clause 74, but favours compromise. It expresses surprise that some of those who supported the Bill should desire its amendment, and states that opposition is now too late.

There is some controversy in the Press on the subject, which includes letters from various public men who voted for the Bill, but desire an amendment of clause. Newspapers also report resolutions in favour of amendment which have been passed by the Chamber of Commerce, the Stock Exchange, the members of Bar, the Banks, and a representative meeting of citizens. No meetings appear to have been held in favour of clause as it stands.

Lieut.-Governor Sir John Madden (Victoria) to Mr. Chamberlain.

(Received 7.45 a.m., May 5, 1900.)

TELEGRAM.

REFERRING to your telegram of 4th May,‡ the leading Conservative daily and weekly newspapers, *Argus* and *Australasian*, urge strongly retention of present appeal to Privy Council and acceptance of proposed new Imperial Court of Appeal. The leading liberal daily and weekly newspapers, *Age* and *Leader*, insist that Clause 74 is prejudicial to legal rights at the present time possessed by Colonial litigants, and it must discourage British investors in this Colony. It is also obstruction to the judicial unity of Empire and to the acceptance of Haldane's proposed new Court of Appeal, which would distinctly tend to unity of Empire.

No. 84.

* To Western Australia only.

† No. 74.

‡ No. 69.

Mr. J. R. Dickson (Queensland) to Colonial Office.

(Received May 7, 1900.)

Sir,

52, Stanhope Gardens, S.W., May 5, 1900.

I learn that a second Memorandum* from the Australian Delegates, urging that no amendment of the Privy Council Appeal be made in the Commonwealth Bill by Her Majesty's Government, has been forwarded for your consideration.

As this document does not bear my signature (being one of the Delegates), it appears to me proper that you should know my reasons for declining to sign.

They are two in number, viz.—an earnest wish to see the Bill passed by the Imperial Parliament without delay, which I know is the paramount desire of Australia; and secondly, a conviction that the maintenance of plenary appeal to the Privy Council, notwithstanding the provisions of the Bill, is regarded with most cordial approval by every loyal subject—certainly in Queensland—and, I believe, generally throughout Australia.

My colleagues well know that whenever we have touched on this subject I have not seen eye to eye with them; but when we first addressed you I allowed my individual views to give way to a sense of loyal *camaraderie* and to show unanimity in council. Also, having been instructed by the Premiers at their January Conference to get the Bill passed without amendment, I signed the first Memorandum† presented as the exposition of the views of the Australian Delegates, notwithstanding I felt that the retention of full appeal in our Federal Constitution was the desire of the Government and people of Queensland.

Since arriving in London, we have had the honour and immense advantage of consultations with the Attorney-General, Sir Richard Webster, and Sir Robert Finlay, Solicitor-General, who, at interviews and in the written reply‡ to our Memorandum, with which you have favoured us, have expressed arguments in maintenance of full appeal which appear to me to be practically unanswerable.

You are aware that after our Memorandum and your reply thereto had been mutually considered, it was deemed advisable to place the position before the Premiers of Australia, with a view to enlarge our commissions and to accept amendments. Their reply§ is, to my mind, clear. They hesitate to accept the responsibility of enlarging our commissions lest they should show themselves “infirm of purpose” in still conducting the progress of Federation; for, be it remembered, the Premiers who now administer the affairs of Australia are not in all cases the men who successfully carried the Commonwealth Bill through stormy Parliaments and fiercely passioned referenda. Public gratitude has been expressed by political ostracism. Nevertheless, I read their reply as assenting to enlargement of appeal, with an earnest request for no unnecessary delay to occur in passing the Bill.

Their reply to you states:—

“(3.) The only alternatives suggested in the despatches (from the Secretary of State for the Colonies) are: (1) Amendment of the Bill, and (2) postponement of its consideration. Of these two the Premiers do not hesitate to say that the latter course would be much more objectionable to Australians generally even than the former.”

Can any intelligent reader doubt the construction to be attached to this passage? The undoubted meaning is that, above all things, delay in passing the Bill is to be deprecated, and, although they will not undertake the responsibility of accepting amendments, they desire the Bill passed *now*, even with amendments.

Having, then, their answer to your communication, I am of opinion our clear duty is to accept the Bill with the Privy Council Appeal maintained in the form you have expressed to us, and so ably argued and explained by the two eminent legal authorities to whom I have previously referred.

I think, in presenting a contentious and highly argumentative communication to you now—a document which if fully weighed appears to invite deliberate consideration and reply—those who do so are really imperilling the early presentation of the Bill to Parliament, and may tend to frustrate an immediate and successful issue to our most important mission.

In illustration of this I would refer to the paragraphs in this second Memorandum, which assert, “The substantial questions then are—(1) Whether Clause 74 derogates from the rights of other parts of the Empire? and (2) Even if it appears technically to do so, whether the clause would in its operation injuriously affect other portions of Her Majesty's dominions? The Delegates confess their inability to see that an affirmative answer can be given to either of these questions.”

My difficulty is to see how any other than an affirmative reply can be given to either of these questions.

My colleagues also refer to this question as being “so little” a concession. I consider it to be of immense and far-reaching importance. But, if “so little,” why dissent from the superior counsels of Her Majesty's Government and delay the Bill in a matter of trivial importance?

It is not, however, my intention or desire to proceed with criticism of this document. My colleagues (Delegates), three of whom are justly recognized as most eminent in their learned profession, appear to me to view this question of appeal in a purely legal aspect, and naturally, as the authors of the Bill, to have a parental partiality for their own offspring.

My experiences of life and public office induce me to regard it from the standpoints of public policy, as well as of commerce and finance. And in these several positions I hold that maintenance of full appeal to the Privy Council is indispensable to the unity of the Empire and to a feeling of confidence and protection, which—even if it be a sentiment purely—encourages commercial and financial relations and expansion. Surely we should not allow ourselves to be blinded to the immense advantages of assisting the development of fuller trade relations within this great Empire. Hence it is in the true interests of Australia, as well as of Britain, to maintain all present connections; and if so now, how much more so may it be hereafter, when the phenomenal exigencies and patriotic impulses of the present day which bind us so closely together have disappeared?

But even as a legal question, I find diametrically opposite views to those held by my learned colleagues entertained by the most eminent jurists of Australia. Sir Julian Salomons, Sir Samuel Griffith—and surely no one will allege that he is “a member of the minority who have opposed the Bill,”

* No. 57.

† No. 5.

‡ No. 9.

§ No. 49.

or that being in "high official position," his views should be treated as "destitute of authority"—Sir Samuel Way, and, indeed, all the Chief Justices of Australia, are unanimous in advising that full appeal to the Privy Council be maintained in the new Constitution. Therefore, slightly altering the message conveyed to me from Brisbane yesterday, and published in this day's *Times*, I may assert without fear of contradiction that my learned colleague Delegates do not represent a majority even of the legal feeling in Australia on this question.

While I have the full authority of the Government of Queensland for concurrence in the proposed amendments, I shall not further engage your attention, on which I fear I have unduly trespassed in this lengthy communication, except to add that, for the foregoing reasons, which can be considerably amplified; I have declined appending my signature, and also to say that I am constantly in receipt of letters and cablegrams from Australia which justify me in asserting emphatically that the prevailing desire of Australia at present is to strengthen the ties which bind her to the Motherland.

At no time in Colonial history has a more enthusiastic desire to be bound up in the unity of the great British Empire been felt or expressed than that which now permeates Australia.

That desire is the yearning of a great British people to be considered, not as "Colonials," but as British citizens, loyal to Queen and Empire, and possessing with their fellow-subjects equal rights and privileges, together with similar aims and ambitions.

The people of Australia have given proof of this desire by something more practical and tangible than words alone. To you, Sir, and Her Majesty's Government, Australia owes the development and present vigorous existence of this mighty feeling; and I conclude by respectfully representing that upon your decision will greatly depend the full meaning of "United Empire" hereafter, and the continuance of these loyal sentiments in the breasts of generations of future Australians.

I have, &c.,

JAMES R. DICKSON.

No. 85.

Acting Governor Sir A. C. Onslow (Western Australia) to Mr. Chamberlain.

(Received 8:55 p.m., May 6, 1900.)

TELEGRAM.

YOUR telegram of 5th instant.* I am strongly in favour, speaking as Chief Justice, of amending Clause 74 so as to preserve the right of appeal, either to the Privy Council or to the House of Lords.

Ministers are unanimously in favour of the amendment in Clause 74, which Her Majesty's Government desire. They are of opinion that, by the possession of one Court of ultimate appeal for the whole British race, whose decisions are final and binding on all the Courts of the Empire, there is constituted a bond between all British people which should be maintained inviolate as the very keystone of Imperial unity.

61

No. 89.

Colonial Office to The Agent-General for New Zealand.

Sir,

Downing-street, May 7, 1900.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 1st instant,* on the subject of the amendment desired by New Zealand in the Australian Commonwealth Bill.

2. With regard to your expression of regret that the Governors of the Federating Colonies were not informed that Her Majesty's Government were prepared to consider favourably the amendment desired by New Zealand, Mr. Chamberlain desires me to say that he did represent the views of New Zealand to the Premiers of the Federating Colonies by telegram, dated April 17th,† but that it seemed to him desirable that the Prime Minister of New Zealand should also himself communicate with the Prime Ministers of the Federating Colonies, and that if he had persuaded them to assent to his views, the amendment would, as a matter of course, have been favourably considered by Her Majesty's Government.

3. You further express regret that you were not accorded, as the representative of New Zealand, the same position of advantage in urging the Colony's case as was accorded to the delegates from the Federating Colonies. Mr. Chamberlain is not aware of your being, and trusts that you were not, at any disadvantage, except that at the Conference at this Office, on the 5th April, you and Mr. Parker, representing Western Australia, withdrew from the Conference after making your statements, and were not invited to stay for the subsequent discussion between the representatives of Her Majesty's Government and of the Federating Colonies. Mr. Chamberlain can only say that this limitation of the subsequent discussion to the representatives of the five Federating Colonies was adopted at the wish of the Delegates themselves.

4. The intervention of the Imperial Parliament would undoubtedly be necessary in order to enable the amendment desired by New Zealand to be introduced into the Bill, and if New Zealand could have come to an arrangement with the Federating Colonies, Her Majesty's Government would have readily proposed legislation for that purpose. But they would not feel justified in inviting the intervention of Parliament to impose the wishes of New Zealand on the Federating Colonies against their will.

5. Her Majesty's Government fully and cordially recognise the claim of New Zealand upon their consideration, but, while this claim would have the greatest weight with them in a matter concerning only this country and New Zealand, it would hardly justify them in interfering in a difference between New Zealand and five other Colonies which take a different view, and in putting pressure on the majority to yield to the minority.

6. I am to add that the whole of the papers on this subject, including your memorandum and your statement at the Conference, will be laid before Parliament at an early date.

I am, &c.,

H. BERTRAM COX.

No. 91.

Acting Governor Sir A. C. Onslow (Western Australia) to Mr. Chamberlain.

(Received 5:50 p.m., May 7, 1900.)

TELEGRAM.

BOTH metropolitan newspapers this morning strongly urge that the existing powers of appeal to the Privy Council should be maintained in their full force.

The Morning Herald stated that Australian people will heartily approve amendment desired by Her Majesty's Government, and that if the amendment is not made it will be destructive of existing bond of union.

The Western Australian says that "the final appeal to the Privy Council is the last and only link between the Colonies and the Motherland, and that it is more than ever essential that the last right of interpretation as to the efficacy and incidence of British law and justice should be left in the hands of an Imperial Court of Appeal."

No. 92.

Mr. Edmund Barton to Mr. Anderson.

(Received May 8, 1900.)

Dear Mr. Anderson,

Whitehall Court, S.W., May 8, 1900.

With reference to the memorandum from Her Majesty's Government, which was handed to the Delegates to-day, I send you herewith, on behalf of my colleagues and myself, a further document, which I shall be glad if you will lay before Mr. Chamberlain at the earliest possible moment.

I also enclose copies of correspondence which has taken place between Mr. Dickson and the other Delegates with reference to his present attitude.

Yours, &c.,

EDMUND BARTON.

John Anderson, Esq., C.M.G.,
Colonial Office, S.W.

[Enclosure

* No. 64.

† No. 44.

[Enclosure 1 in No. 92.]

MEMORANDUM.

Whitehall Court, May 8, 1900.

THE subscribing Australian Delegates agree that no useful purpose is likely to be served by further written discussion of the amendments proposed to be made in the Commonwealth Bill by Her Majesty's Government.

The alteration chiefly discussed between the Delegates and Her Majesty's Government relates to appeals to the Judicial Committee. This is in no sense "a detail of the Constitution" such as is referred to in the second paragraph of the memorandum of May 4th. It has been described from the first by Her Majesty's Government as vital, and has been so treated by the Delegates, who have always distinguished such a proposal from those of minor importance which have been associated with it.

As it was understood that the suggested amendment in regard to the Colonial Laws Validity Act had been abandoned, no reference was made to it in the second memorandum of the Delegates. Without receding from any opinion already expressed, they urge that such an Act ought not to apply to the important Legislatures of such great self-governing communities as the Dominion and the Commonwealth, whose statutory authority should be subordinate only to that of the Imperial Parliament when exercised after the establishment of these Constitutions and expressly applied.

The Delegates trust that even now Her Majesty's Government may be willing, as they are able, to provide by separate legislation for this and any other matter which they consider essential, passing the Commonwealth Bill without amendments as desired by the peoples, Parliaments, and Governments of the Colonies which they have the honour to represent. For the consequences which may ensue immediately and ultimately if the suggested amendments be made they cannot be held responsible. If they have been outspoken and tenacious of their views, the sincerity of their apprehensions will, no doubt, be accepted as sufficient justification.

They again express their thanks to Her Majesty's Government for the courtesy with which their representations have been received.

We have, &c.,

EDMUND BARTON.
ALFRED DEAKIN.
C. C. KINGSTON.
P. O. FYSH.

[Enclosure 2 in No. 92.]

Dear Sir,

52, Stanhope Gardens, S.W., April 27, 1900.

I have again to thank you for a (further) copy of the communication proposed to be addressed to Mr. Chamberlain by the Federal Delegates, and have carefully perused same. I have given this document attentive and serious consideration, and, while I fully recognise the great care and ability with which it has been framed, I feel that it opens up a large field of contentious debate, likely to militate against the object I primarily have in view, namely, to get the Commonwealth Bill passed as early as practicable.

I consider that up to the present time we have fulfilled the mandate issued to us at the Conference of Premiers in January last, and that they, later on, have been made acquainted with the actual position of affairs here, and have replied to Mr. Chamberlain accordingly.

I therefore believe that to continue to press upon Her Majesty's Government correspondence which may lead to further arguments is inviting delay in presenting the Bill to Parliament, with a possibility of imperilling its consideration at the present time.

Under these circumstances I cannot subscribe to a communication which, in my view, may, unintentionally, be fruitful of results unfortunate to Australia.

I remain, &c.,

JAMES R. DICKSON.

A. G. Berry, Esq.,

Secretary to the Australian Federation Delegates.

[Enclosure 3 in No. 92.]

Dear Sir,

Victoria Office, 15, Victoria Street, S.W., April 27, 1900.

I beg to acknowledge receipt of your letter of even date, which I have laid before the Delegates.

In reply, they instruct me to state that they cannot but express their extreme regret for the course to which you feel yourself impelled. The original instructions of the Delegates still bind each of them on behalf of all the Federating Colonies to urge "the passage of the Bill through the Imperial Parliament without amendment." These instructions are confirmed by the cable message of the Premiers to the Secretary of State for the Colonies, which does not accede to the request of that Minister that such instructions may be enlarged.

As they are continuing to discharge the duties imposed on them with the loyalty demanded by the vote of the people, as well as by both the letter and the spirit of the instructions, they cannot but feel regret that any other interpretation of your duty has forced itself upon your mind.

The Delegates further point out that you were a consenting party to the preparation of the memorandum now completed, and that you take no objection in your letter to its form or its substance. Only on Wednesday last you asked for and obtained an amendment by the omission of a sentence, which it has, since your letter, been thought right to restore. At the meetings which you attended up to yesterday, you did not raise any objection to the presentation of the document on the ground that it would be in the interest of Australia to secure the speedy passage of the Bill, even with amendments to which you, like your colleagues, were expressly instructed not to assent.

The Delegates consider the course they are adopting to be not only one which they are in duty and in loyalty bound to undertake, but to be the best means of securing the speedy passage of the Bill, and that without amendment. They still hope that you may see your way to rejoin their consultations. In the meantime the memorandum will be forwarded to the Colonial Office.

Yours, &c.,

ALBERT G. BERRY,
Secretary to the Australian Federal Delegates.

The Honorable James R. Dickson, C.M.G.

[Enclosure

[Enclosure 4 in No. 92.]

Dear Sir,

52, Stanhope Gardens, S.W., May 3, 1900.

While not desirous of opening up correspondence in connection with your reply to me of the 27th ultimo, I think it only due to myself to remove misconception which might be inferred from your expressions.

You say, "They (my colleagues) still hope that you may see your way to rejoin their consultations." Permit me to point out that I never expressed any desire or intention to hold aloof from such councils or deliberations as may tend to promote the object we all have at heart—the early passage through the Imperial Parliament of the Commonwealth Bill.

We differ, *inter alia*, as to how this can be most readily accomplished, and I therefore refrained from appending my signature to a document which, in my opinion, might entail serious delay in the passing of our Bill, but, in so doing, I feel that I am not separating myself from common action with my colleagues to urge the passage of the Bill, which, after all, is the paramount desire of the people of Australia, and is also the important feature in the reply of the Premiers to Mr. Chamberlain.

I may also add that, even in the first stages of the preparation of this document, I expressed doubts (bearing in mind the opinions of the Premiers in their aforesaid reply) as to the need of, or the advantage to be gained by, the presentation of arguments which might call forth a reply, and so tend to delay legislative action.

Yours faithfully,

JAMES R. DICKSON.

Albert G. Berry, Esq., Secretary to the Australian Federal Delegates.

REPORT

OF THE

COMMITTEE ON FEDERAL FINANCE

APPOINTED BY THE

GOVERNMENT OF NEW SOUTH WALES

ON 28TH APRIL, 1898.

With ADDENDUM by a Member of the Committee.

Printed under No. 18 Report from Printing Committee, 29 November, 1900.

SYDNEY: WILLIAM APPLGATE GULLICK, GOVERNMENT PRINTER.

1900.

[6d.]

Sydney, 17th May, 1898.

The Right Honorable G. H. Reid, P.C., M.L.A., Premier,—

Sir, -

In response to your letter of 28th April, we have the honor to report that the Committee named by you have duly met and considered the questions submitted, and now beg to tender the following Report thereupon :—

Transferred Services.

With respect to these we enumerate the services which we assume will be taken over by the Federal Parliament, following the Convention Schedule, viz.:—Census and Statistics, Mint, Defence, Bankruptcy and Patents, Post and Telegraphs, Customs Expenditure, Navigation, and Quarantine.

It is provided that each State shall be credited with revenue and debited with expenditure accruing in connection with these services as at time of transfer, which we take to mean that the services will go on as at present, but under Federal administration; and that the expenses and receipts as arising in each State will be apportioned to each State in the books of the Federal Treasury.

This being so, the effect on the States of the Transferred Services will be to leave the net cost to each nearly the same as if no transfer were made. All things being exactly equal, there would be actually no difference; but we have thought fit to make an adjustment in one case, which speaks for itself.

At the outset it would appear as if the amalgamation under one Administration would tend to effect savings, but it is not prudent to reckon on any material savings at present, because the bulk of the Services, such as Post Office, &c., will go on as now; while as to Customs, until at any rate the first seven years are over during which the book-keeping system will prevail, it seems highly probable that the same machinery will be required in each colony as at present existing.

We append an estimate of the net cost of the Transferred Services under the Commonwealth and with it the present approximate cost of same to each State, which practically forms the basis of the Estimate. The only difference as involved in the change to Federal Administration is in the case of New South Wales which will be put to an increased Estimated Expenditure of £25,000 by reason of having to collect heavier Customs Duties.

Expenditure on Transferred Services.

	<i>As now.</i>	<i>For Collection, extra Customs.</i>	<i>After Transfer.</i>
	£	£	£
New South Wales	475,000	25,000	500,000
Victoria	350,000	350,000
South Australia	60,000	60,000
West Australia	170,000	170,000
Tasmania	20,000	20,000
	<hr/>	<hr/>	<hr/>
	£1,075,000	25,000	1,100,000

Note.—No provision has been made for alteration of postage rates in any of the colonies in order to bring about equality. If raised, the colonies concerned will pay more on postage, and their Treasuries will receive back more surplus, and *vice versa* if lowered. We have allowed for interest and maintenance on works and buildings transferred.

New Services.

The provisions of the Bill in this respect are quite open—that is to say, the Federal Parliament has unlimited powers with regard to new expenditure. In considering this matter, we have adopted, for sake of convenience as a skeleton form, the schedule set forth by the Convention, but we have not felt ourselves bound by the figures therein, nor do we think that, in arriving at somewhat different figures, we are in any way reflecting on the framers of that schedule. It is because we have not viewed these figures as under challenge, so to speak, that we have not thought it necessary to invite any of the Finance Committee of the Convention to appear in support of their figures.

We have taken a good deal of evidence on the subject, and are free to admit that there is justly room for some difference of opinion; but after fully weighing all the circumstances of the case, we are of the opinion that the figures which we append are reasonable, not involving undue economy and yet providing sufficiently for the costs of the original powers. It is necessary to explain that under the head of new expenditure we think it fair to include such additional expenditure in connection with the transferred services as the Federal Parliament may see fit to impose in the interests and for the benefit of all the States. Such as any new defence expenditure, although by the Convention this is grouped with the transferred services.

The method prescribed in the Bill for division of the new expenditure among the States is in proportion to the population of each, and we append the figures which we have adopted with respect to the population; the ratio for each State founded thereon; and the apportionment of the sum total between them.

NFW

NEW SERVICES.		£
<i>Legislature</i>		150,000
The additional cost is for estimated election expenses on higher scale, and for travelling expenses of Members.		
<i>Governor-General</i>		17,500
<i>Executive</i>		14,000
<i>Civil Establishment</i> ...		18,500
<i>Treasury</i>		45,000
Additional sum provided for audit and book-keeping.		
<i>Justice</i>		50,000
Additional sum provided for Sheriff, Crown Solicitor, and Law Costs.		
<i>Inter-State Commission</i>		10,000
This is not provided for by Convention Committee.		
<i>Public Buildings—Interest and Maintenance</i>		75,000
Increased amount due to large provision.		
		380,000
<i>Additional for Defence</i>		75,000
The new Estimate for defence was included by Convention under transferred services.		
		455,000
10 per cent. margin		45,500
		500,500
Say		£500,000

Distribution of New Expenditure.

	Population.	Population Ratio.	Share of £500,000.
			£
New South Wales	1,323,000	41·40	207,000
Victoria	1,176,000	36·80	184,000
South Australia... ..	363,000	11·36	56,800
West Australia... ..	162,000	5·07	25,350
Tasmania	171,000	5·37	26,850
	3,195,000	100·	500,000

Federal Revenue.

The Federal Government is to take over the collection of the Customs Revenue immediately on the establishment of the Commonwealth, and is to impose a uniform tariff and to do away with duties between the States within two years of its coming into existence.

It is also to take over the Services to be transferred as soon as may be convenient.

Until the imposition of a uniform tariff the States themselves will be at liberty to fix the amount they will raise through the Customs and the mode of raising it.

It will be the duty of the Federal Treasurer to credit each State separately as collected therein with the Customs Revenue and with the Receipts from Transferred Services; and the funds derived from these sources are chargeable with the costs of the Transferred Services as they arise in each State, and also with the share of each State in the new expenditure of the Commonwealth. The balance remaining is to be paid to the States periodically.

As already stated, within two years the Federal Parliament is to impose a uniform tariff for all the States, whereupon duties will cease to be charged on goods passing from State to State, except in the case of West Australia, which is to be permitted to gradually remit her intercolonial duties by instalments spread over five years.

But it is further provided that the Customs Duties on goods passing from State to State shall be deemed to accrue to the benefit of the State where the goods are consumed or used. It will be seen that an extensive book-keeping and account system must be devised by the Federal Treasury, to ensure each State receiving its proper share of the Revenue belonging to it, and being charged with its proper expenditure so as to arrive at an accurate measure of the balance to be paid over to it. A sum to provide for this book-keeping has been included in New Expenditure.

It is desirable to add that after the expiry of five years fixed for the book-keeping system, as it has been called, the provisions of the Bill with regard to the amount to be handed back to the States as surplus are that it shall be on such a basis as may be determined by the Federal Parliament to be a fair one. We do not feel called on to offer an opinion as to what that basis is likely to be some seven years hence, beyond saying that it seems to be in the discretion of the Federal Parliament entirely.

As regards the raising of Revenue, there is nothing laid down in the Bill prescribing the mode by which the Federal Parliament shall do so.

After the establishment of uniform tariff the Parliament is free to impose direct Taxation and relieve Customs, or to rely entirely on the latter; but with this limitation as to Customs Duties, that it cannot retain, for the purpose of providing for its expenditure, more than one-fourth of the whole amount collected.

But

But bearing in mind that the States individually give up their Customs Revenue on which the majority of them rely at present in great measure for the adjustment of their Financial requirements in connection with matters not taken over by the Commonwealth, such as interest on loans, &c. And, further, believing that it will not be disputed that in the case of several of the States, it would be most burdensome, if not impossible, to impose additional direct taxation of any magnitude on them, it seems reasonable to suppose that the Federal Parliament, composed as it will be of representatives from all these States, will elect to raise the bulk of its revenue through the Customs.

We are asked to fix the amount, and in our opinion it will be a sum which must as nearly as possible balance the requirements of the majority of the States. We believe that it will be found to range between £6,500,000 and £7,000,000 in the aggregate, probably the latter.

As to its allocation between the different States, a more difficult question arises, and one on which a great deal of controversy has taken place.

If each Colony consumed in probably dutiable goods exactly the same per head, the calculation would be simple, but experience has shown to the contrary. We need not enter into the causes of these discrepancies in this short summary, but we have carefully considered the mass of expert evidence which has been brought before us, and by its light and such other information and knowledge as we possess we have come to the conclusion that a sufficiently near approximation of what must be admitted to be a more or less speculative matter will result from the use of the appended ratios in relation to the sum total to be divided, and have placed beside them the population ratios for purposes of comparison. It may be well to explain that the consumption ratio of West Australia is estimated at nearly double her population ratio, in large measure, because the adult male population of that Colony is much larger in proportion to her total than in the other Colonies.

A £6,500,000 to £7,000,000 Tariff, respectively worked out on these ratios, would give for each Colony the figures set forth beneath the ratio figures. Assuming, of course, that the said ratios are correct, and that the Federal Parliament decides to raise the whole sums needed, or nearly so, by Customs Revenue.

	Ratio for Division of Tariff.	Actual Population Ratio.
New South Wales	43·	41·40
Victoria.....	32·	36·80
South Australia	10·5	11·36
West Australia	10·	5·07
Tasmania	4·5	5·37
	100·	100·

Tariffs divided according to first ratio :—

	£7,000,000
New South Wales	£3,010,000
Victoria	2,240,000
South Australia	735,000
West Australia	700,000
Tasmania	315,000
	£7,000,000
	£6,500,000
New South Wales	£2,795,000
Victoria	2,080,000
South Australia	682,500
West Australia	650,000
Tasmania	292,500
	£6,500,000

Now, to put each Colony in as good a position as it is now according to most recent information as to Customs Revenue, and allowing for new expenditure, the following sums would be approximately necessary :—

New South Wales	£1,765,000
Victoria	2,238,000
South Australia	688,000
West Australia	1,112,000
Tasmania	374,000

from which the following result accrues :—West Australia and Tasmania would not have enough, while New South Wales would have more than is necessary.

West Australia is in a peculiar position, owing to a large share of her present revenue being derived from intercolonial duties; but these are permitted to work off gradually. Nevertheless, for this and other reasons, her case is so exceptional that we do not see how she can easily come into line with the other colonies without considerable adjustment on her part.

(NOTE.—With regard to that Colony's transferred and new services a sum of £195,000 is estimated. Calculation will show that this will not be quite met by a £7,000,000 tariff on the basis of one-fourth retention, to which the Federal Treasurer is limited. But it is probable that adjustment could be made, in view of the exceptional tariff allowed to her.)

The Tasmanian Treasurer is hopeful of his revenue coming out better than estimated. Assuming it does not, the amount short of requirements would not, in all probability, exceed £60,000 on a £7,000,000 tariff, or £80,000 on a £6,500,000 tariff.

New

New South Wales, however, would be in the exceptional position of having imposed on her a tariff higher than she requires, and of thereby getting a refund from the Federal Treasury to her own Treasury of a large surplus during the book-keeping period, at any rate. It is quite certain that this cannot be handed back to the identical people who contributed to it, because there can be no remission of Customs duties. As a Colony she gets it back; and it will be for her people, through the local Parliament, to decide how it shall be dealt with.

To sum up the position as regards New South Wales, which we are more particularly concerned with, it may be put in this way:—

That, viewed in the light of the figures which we have submitted as to expenditure and revenue, the primary cost of Federation to her would be about £232,000 over and above present expenditure, viz., her share of new expenditure (£207,000) plus the additional cost of transferred services (£25,000), as shown.

And that the secondary cost would be increased taxation through the Customs of between £1,260,000 to £1,480,000 according to the tariff decided on, resulting in a surplus of from £1,000,000 to £1,250,000 or thereabouts, after defraying the primary cost. And whether this ultimately turns out to be a real cost or not will depend on whether the surplus is remitted back to the people of the Colony in some form of reduced taxation in other directions or not, which rests, as we have said, with the people themselves through their representatives.

In reply to the question—What amount of Customs revenue would be required to enable the Commonwealth to place all the States in a position to meet their financial requirements?—we estimate that about £11,000,000 would suffice to balance all.

But if West Australia be excluded, about £8,000,000 would suffice for the rest.

We have referred to West Australia and Tasmania elsewhere, and need only say here that we consider even the smaller sum would be an impracticable and inadvisable one to raise by Customs duties. Though not in the reference, we have considered the question of possible savings to the Commonwealth and therefore to the Colonies as a whole, by a consolidation of debts through the federal administration; but the matter is one involving so many complicated issues that we have not considered it feasible to go into it in the time at our disposal.

Figures Quoted.

These, as will be seen, are for the most part given in round numbers, which we think the better mode of quoting estimates which cannot pretend to exact accuracy. They are sufficiently near for all practical purposes, and we believe fairly present the case, and will enable a reasonable conclusion to be come to on the questions at issue.

In conclusion, we desire to say that we have received the fullest information we could desire from the various witnesses examined.

Mr. Coghlan, the Hon. Mr. Pulsford, and Mr. Nash have ungrudgingly and most obligingly given up a great deal of time, and devoted much pains, to place before us their views and figures, and we thank them for it; and also Major-General French, the Hon. John See, Mr. Lockyer, and Mr. Martin, who at short notice in each case attended and gave valuable information.

We have the honor to be,

Sir,

Your obedient servants,

J. RUSSELL FRENCH, Chairman.

BRUCE SMITH.

H. N. MACLAURIN.

Addendum to the Report of the Federal Finance Commission, consisting of Mr. J. Russell French, Hon. Dr. MacLaurin, and Mr. Bruce Smith.

I MUCH regret the necessity for placing on record, as expressive of my own individual opinion, some important qualifications of the above Report. I have deemed it best to append my signature to the Report, as a whole, which in many respects I endorse, and to note only those portions of it with which I cannot agree, stating as briefly as possible my reasons for so differing.

Transferred Services.—Under the above head, in regard to future economy of administration, I consider that it will be possible, in a very short time, to effect substantial savings in the higher branches of the several services. I refer more particularly to “Customs” and “Defence,” and certain of the “New” services provided for. I hold the opinion that centralization of administration almost invariably tends to economy; and I consider that some substantial allowance should have been made in that regard, as a set-off against a provision of 10 per cent. allowed for a margin for contingencies on the “New” expenditure.

Legislature.—Under the above head, I consider the amount allowed for election expenses (£60,000 per annum) altogether beyond probability; inasmuch as the franchise of the States parliaments, and that of the two branches of the Commonwealth legislature being identical, the greater portion of the State expenditure on elections can be utilized by the Federal Parliament.

Treasury.—Under this head the sum allowed for Audit and for the “Book-keeping” System (£32,500) is, in my opinion, too high. The latter work will consist, in a great measure, of a record of Customs revenue and expenditure, in regard to which Mr. Lockyer (Collector of Customs of New South Wales) expressed the opinion that the accounts of each State could be so kept that the Central adjustment would merely involve the bringing together of the several State accounts, at a cost of about £2,000 a year. But, allowing for other branches of Federal administration, I consider that the allowance is excessive.

Justice.—Under this head, I consider the allowance for “Law Costs,” of £20,000 per annum, much too high, having regard to the fact that the Commonwealth will not be concerned with such fruitful sources of litigation as Railway and Tramway management, Railway Construction, Land Resumptions, and Land Administration.

Public Buildings.—I consider the provision for £75,000 per annum, for interest on expenditure and for maintenance of public buildings, excessive. In my view, the limited number of Commonwealth functions, and the small number of its representatives to be accommodated, would not justify or lead to the erection of public buildings of the magnitude and elaborateness popularly associated with such institutions, or for which this large annual allowance would provide a capital sum.

Additional Sum for Defence.—Under this head also I consider the estimate (£75,000 extra) excessive, inasmuch as Major-General French has stated in evidence that a further annual expenditure of £15,000, together with a further “loan” expenditure of £50,000, entailing an annual expenditure of about £2,500—in all, an additional *annual* outlay of £17,500 would, irrespective of an equalisation of Volunteer forces, bring all the colonies up to the New South Wales standard, which he considers one of sufficiency.

Assumed Ratio of Imports under an Uniform Tariff.—I feel bound to record my distinct qualification of the percentages assumed by my colleagues. The matter is, as the Report admits, “one of a more or less speculative character”; but I feel convinced that, even at the initiation of an uniform tariff, the percentages will not be as the Report anticipates; and that, in a very short time, the two colonies of New South Wales and Victoria (being comparatively settled communities, in which the populations live under generally similar conditions) must approximate to a *per capita* basis. The percentages adopted presuppose that the people of New South Wales will, under an uniform tariff, continue to consume dutiable goods (both as regards customs and excise) to an extent of 20 *per cent. per head* in excess of the consumption of the people of Victoria; a conclusion which I cannot endorse. The importance of the percentages is far-reaching in the inquiries of the Commission, as they affect the whole of the calculations in regard to the probable contributions of revenue by the colonies mentioned, and lead, in my opinion, to a substantial over-estimate of the amount of revenue required to be raised by New South Wales.

Conversion.—I desire, in regard to this head, merely to draw attention to the fact that no calculation has been entered upon or allowance made for the probable savings that would result in the near future, by a conversion, into Federal Stock, of the debts of the several colonies. Those savings have been estimated by competent persons at so large a sum that it should, in my opinion, be an important factor in such an inquiry as the Commission has had so short a time to make.

May 18, 1898.

BRUCE SMITH.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONFERENCE OF PREMIERS HELD IN SYDNEY,
JANUARY, 1900.

(REPORT OF.)

Printed under No. 5 Report from Printing Committee, 19 July, 1900.

CONFERENCE OF PREMIERS, AT THE EXECUTIVE COUNCIL
CHAMBER.

SYDNEY, 24 JANUARY, 1900.
(2.30 P.M.)

THE undermentioned Premiers of the Colonies of New South Wales, Victoria, South Australia, Queensland, and Tasmania, were present, viz. :—

<i>New South Wales</i> ...	The Honorable W. J. LYNE, M.P.
<i>Victoria</i>	The Honorable ALLAN McLEAN, M.P.
<i>South Australia</i>	The Honorable F. W. HOLDER, M.P.
<i>Queensland</i>	The Honorable ROBERT PHILP, M.P.
<i>Tasmania</i>	The Honorable NEIL ELLIOTT LEWIS, M.P.

It was proposed by the Honorable Allan McLean, and unanimously resolved, that the Honorable W. J. Lyne be the Chairman, and Mr. Alex. C. Budge, Clerk of the Executive Council, the Secretary to the Conference.

The Chairman drew the attention of the Conference to the business to be brought before them, and submitted the following subjects, viz. :—

1. Appointment, &c., of Federal Delegates to visit England.
2. Appointment of Provincial Governors under Commonwealth.
3. Question of residence of Governor-General.
4. Proposals of Eastern Extension Telegraph Company.
5. New Guinea question.
6. Federal Rifle Team for England.
7. Bubonic Plague.
8. Fremantle as a Port of Call.
9. Western Australia's adherence to Commonwealth Bill.
10. Selection of an Agent-General to represent Australian Colonies at Berne Postal Union Festival.

The Conference proceeded to consider the subject of the appointment of
FEDERAL DELEGATES TO VISIT ENGLAND,

when, after general discussion, it was resolved that the further consideration be postponed until to-morrow.

PROVINCIAL GOVERNORS UNDER THE COMMONWEALTH.

The Conference, having fully considered the subject, is of opinion (*a*) that a reduction in salaries now given to Governors should be made; (*b*) that the appointments should, as at present, be vested in the Imperial Government; (*c*) that Governors should not be expected to supplement their salaries from their private means.

RESIDENCE OF GOVERNOR-GENERAL.

The Conference resolved that as the Governor-General will not be appointed as Governor of any one Colony, and as the Government Houses in Sydney and Melbourne have been offered, no action was necessary.

NEW

NEW GUINEA QUESTION.

After full discussion, and as New South Wales would not agree to pay compensation to the Syndicate without Parliamentary sanction (Victoria only agreeing to pay if New South Wales did), the matter dropped.

FEDERAL RIFLE TEAM.

The Conference resolved that in view of the large number of troops sent to South Africa, and now serving there, no steps should be taken during the present year to send a Federal Rifle Team to compete at Bisley.

The Conference adjourned at 6.15 and resumed at 8.15 o'clock.

The Right Honorable Sir John Forrest, P.C., Premier of West Australia, here joined the Conference, but did not take part in any matters concerning Federation.

FREMANTLE AS A PORT OF CALL.

The Right Honorable Sir John Forrest brought this subject before the Conference, and explained the steps that had led up to the question, when, after deliberation, the further consideration was postponed until to-morrow.

The Conference adjourned at 10.30 p.m. until 11 o'clock to-morrow.

THURSDAY, 25 JANUARY, 1900.

The Conference having met at 11 o'clock, resumed consideration of the subject of mail steamers calling at Fremantle, and after deliberation resolved :

“That this Conference of Premiers is unable to agree to any extension of the period of transit as asked for by the Mail Companies.”

STATISTICIANS: MEETING OF, AND CENSUS.

The Conference having fully considered the question, agreed to the following Resolutions:—

“That it is desirable that a Census be taken in each Colony during the year 1901, and that a Conference of Statists be held at an early date, not later than 20th proximo, to make all arrangements for carrying out the same.”

“At such Conference the Statists shall also prepare and publish a return showing how many members each original State shall be entitled to in the House of Representatives, and that the return be prepared upon the basis appended hereto.”

APPENDIX.

The method of computing the populations of the several Colonies to be adopted by the Statisticians to be as follows:—“The record of births and deaths, as well as of arrivals by sea, shall be taken as correct when certified to by the Statistician of the Colony to which they refer, but the number of departures by sea shall be subject to correction. The amount of correction to be ascertained by adding the number of births and of arrivals during the ten years 1881–1891 to the population actually ascertained in 1881, and from the number so arrived at, the number of deaths and of recorded departures shall be subtracted, and the remainder compared with the actual population ascertained in 1891. If the population as estimated in the foregoing manner be found to exceed the true population, the excess shall be taken to be the departures unrecorded during the ten years 1881–1891; and in estimating the population at the close of 1899, it shall be assumed that there has been the same proportion of unrecorded departures to the recorded departures since 1891, as there was in the ten years 1881 to 1891.

BUBONIC PLAGUE.

The Conference resolved that when suspicious cases arose, as had recently been reported in Adelaide and Sydney, every precaution should be taken in each of the Colonies to prevent the disease spreading, and when any particular case was diagnosed as the true plague, each Colony should adopt such measures as might be deemed advisable to deal with the disease, and immediately advise all the other Colonies on the subject.

WESTERN

WESTERN AUSTRALIA'S ADHERENCE TO COMMONWEALTH BILL.

This matter was fully discussed, but no action was determined.

SELECTION OF AN AGENT-GENERAL TO REPRESENT AUSTRALIAN COLONIES AT BERNE POSTAL UNION FESTIVAL.

After discussion the Agent-General for South Australia was appointed.

APPOINTMENT OF FEDERAL DELEGATES TO VISIT ENGLAND.

The Conference having deliberated, resolved,—

“That, in compliance with the request contained in the despatch received from the Secretary of State for the Colonies, that delegates from the Australian colonies should be sent to England to explain and give assistance when the Australian Commonwealth Bill comes before the Imperial Parliament, this Conference is of opinion that each colony should appoint a delegate, and that such delegate, when appointed, should represent all the federating colonies in unitedly urging the passage of the Bill through the Imperial Parliament without amendment, and in explaining any legal or constitutional questions that may arise.”

Mr. Lyne desired to place on record his opinion that a delegation, consisting of Mr. Barton and Mr. Deakin; would be preferable.

The Conference also agreed to the following instructions for the guidance of the Delegates :—

That, in the opinion of this Conference, the delegates who may be sent to London in relation to the Commonwealth Bill should emphasise the following facts :—

- (a) That a Bill was originally drafted and discussed by representatives of all the Australian Colonies in 1891.
- (b) That in 1897 a Convention was specially elected by the people of New South Wales, Victoria, South Australia, and Tasmania, and included also representatives of Western Australia. That this Convention sat in Adelaide, Sydney, and Melbourne, and debated, amended, re-drafted and finally adopted the Bill after many weeks of labour.
- (c) That, later on, the Premiers of the Colonies named and the Premier of Queensland made certain further amendments in the Bill, which was then, by parliamentary authority, by statute, referred to the votes of the electors of the Colonies, with the exception of Western Australia.
- (d) That in New South Wales, Victoria, Queensland, South Australia, and Tasmania the Draft Bill was approved by a large majority of the voters, the total votes being 374,681 for and 144,355 against.

FEDERAL Polling, 1898 and 1899.

		1898.	1899.
New South Wales	{ For	71,595	107,420
	{ Against	66,228	82,741
Queensland	{ For	35,181
	{ Against	28,965
Victoria	{ For	100,520	152,635
	{ Against	22,099	9,804
Tasmania	{ For	11,746	13,437
	{ Against	2,689	791
South Australia	{ For	35,800	65,990
	{ Against	17,320	17,053

E. and O.E.

- (e) The Legislatures of the Colonies whose votes had approved the Bill, then remitted the draft to the Imperial Authorities, praying for its passing by the Imperial Parliament.

That, in view of these facts, the Imperial Government and Parliament be respectfully urged to pass the Bill so carefully drawn and considered and finally adopted by the people without any amendment.

THE

THE NEW HEBRIDES.

The Conference agreed that a telegram in the following terms be forwarded to the Secretary of State for the Colonies :—

Reported in press cables that French newspapers insist on the necessity of settling the fate of the New Hebrides; also alleging that Australian opposition to French annexation of the group has greatly diminished. Conference of Australian Premiers now in session at Sydney inform you that Australian opposition to French annexation has in no way diminished, and, without wishing to embarrass the Imperial Government at the present juncture, express an earnest hope that no steps will be taken to give France greater control unless Australasian Governments first consulted.

DEATH OF H.H. THE DUKE OF TECK.

The Conference resolved that a telegram in the following terms be forwarded to the Right Honorable the Secretary of State for the Colonies by His Excellency the Lieut.-Governor :—

Will be glad if you will kindly convey the deep sympathy of the Premiers of Australia and Tasmania in Conference assembled to Her Royal Highness the Duchess of York, in her great affliction.

The Conference adjourned at 10.30 p.m. until Saturday at 10.30 a.m.

SATURDAY, 27 JANUARY, 1900.

The Conference assembled at 10.30 a.m. and entered upon the discussion of the proposals of the Eastern Extension Telegraph Company, when after full consideration the Honorable J. W. Holder proposed the following motion, viz. :—

“ That the proposals of the Eastern Extension Telegraph Company for a Cape-Australian cable be accepted with the following qualifications :—

- (a) The suggestion of Mr. Chamberlain to be agreed to.
- (b) The right to open local offices to be exercised only on the laying of the Pacific Cable.
- (c) No exemption from Customs duties to apply except to Telegraph instruments, cables, and chemicals.
- (d) Sites in Perth, Fremantle, Adelaide, and Glenelg, to be subject to satisfactory arrangements approved by the Governments of Western Australia and South Australia.
- (e) The Roebuck Bay Cable not be closed. The Postmasters-General to arrange details subject to these provisions.”

A majority of Premiers were in favor of the above motion, but the Premiers of Victoria and Queensland having expressed a desire to obtain further information it was unanimously agreed to postpone the final decision for a few days, and the Premiers of Victoria and Queensland to communicate with the President, who will thereupon record and notify to the Secretary of State the decision arrived at.

The business being ended, the Conference, on the motion of the Premier of Victoria, seconded by the Premier of Queensland, thanked the Honorable William John Lyne for his valuable services as Chairman.

Mr. A. C. Budge was also thanked for his services as Secretary, and the Conference adjourned *sine die*.

ALEX. C. BUDGE,
Secretary.

WILLIAM JOHN LYNE,
Chairman.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONFERENCE OF PREMIERS, HELD IN MELBOURNE,
APRIL, 1900.

(MINUTES OF PROCEEDINGS OF.)

Printed under No. 5 Report from Printing Committee, 19 July, 1900.

CONFERENCE OF PREMIERS, HELD AT MELBOURNE
IN APRIL, 1900.

Minutes of Proceedings.

THURSDAY, 19 APRIL, 1900.

THE Conference met at the Executive Council Chamber, Melbourne, on Thursday, 19th April, 1900, at 10·25 a.m.

Present :

The Honorable W. J. LYNE, M.P., Premier of New South Wales ;
The Honorable A. McLEAN, M.P., Premier of Victoria ;
The Honorable F. W. HOLDER, M.P., Premier of South Australia ;
The Honorable R. PHILP, M.P., Premier of Queensland ;
The Honorable N. E. LEWIS, M.P., Premier of Tasmania.

Resolved—That the Honorable A. McLean, Premier of Victoria, be Chairman of the Conference ; and that Mr. R. S. Rogers, Secretary to the Premier of Victoria, be Secretary to the Conference.

COMMONWEALTH OF AUSTRALIA BILL.

The Conference proceeded to consider the matter of the Commonwealth of Australia Bill.

Telegrams were read from the Right Honorable the Secretary of State for the Colonies and from the Australian Delegates in London as to the position of the Bill and as to certain proposed amendments.

A telegram was read from the Right Honorable Sir John Forrest, K.C.M.G., Premier of Western Australia, with regard to the alterations desired by that Colony. A telegram from the Honorable A. P. Matheson, of Western Australia, to the Honorable F. W. Holder, relative to the subject, was also read.

After discussion, the Chairman was requested to telegraph to the Australian Delegates in London for certain information ; also to move His Excellency the Lieutenant-Governor of Victoria to telegraph to the Right Honorable the Secretary of State for permission to publish the Colonial Office telegraphic despatches of 5th April (two) and of 16th and 17th April, 1900.

Resolved—That the further consideration of the subject be postponed until to-morrow.

The Conference then, at 4·50 p.m., adjourned until 10·30 a.m. on the following day.

FRIDAY, 20 APRIL, 1900.

The Conference met, pursuant to adjournment, at 10·30 a.m.

Present : All the Members.

COMMONWEALTH OF AUSTRALIA BILL.

Telegrams were received from the Western Australian Federal League and from the Australian Natives' Association, Perth, relative to the amendments desired by Western Australia, and the inclusion of that Colony in the Federation.

As no reply had been received to the telegram sent to the Australian Delegates in London, the sitting of the Conference was suspended until 3·45 p.m. On resuming at that hour, the Chairman stated that still no reply had come to hand.

The Conference, at 3·55 p.m., adjourned until 10·30 a.m. next day.

SATURDAY, 21 APRIL, 1900.

The Conference met, pursuant to adjournment, at 10·30 a.m.

Present :

All the members except the Hon. N. E. Lewis, Premier of Tasmania.

COMMONWEALTH OF AUSTRALIA BILL.

Telegrams were received as follows, viz. :—

From the Right Honorable the Secretary of State for the Colonies, agreeing to the publication of the Colonial Office telegraphic despatches if the Premiers saw no objection to that course.

From Mr. J. T. Walker, Chairman of a public meeting held in Sydney, relative to the Privy Council Appeal question.

From President of Chamber of Manufactures, Perth, as to amendments desired by Western Australia.

From the President of the Eastern Gold-fields Reform League, Kalgoorlie, respecting the position of Western Australia.

CENSUS.

Resolved—That the date selected by the recent Conference of Statisticians for the taking of the Census in the Australasian Colonies be adhered to.

COMMONWEALTH OF AUSTRALIA BILL.

The information asked for having been received from the Australian Delegates in London, the Conference deliberated until 4·30 p.m., when it adjourned until 7·30 p.m.

On resuming at 7·30 p.m., the Conference further deliberated, and finally adopted the following telegram for transmission to the Right Honorable the Secretary of State for the Colonies, and the Chairman was requested to move His Excellency the Lieutenant-Governor of Victoria to telegraph accordingly, viz. :—

The Premiers of New South Wales, Victoria, Queensland, South Australia, and Tasmania, in Conference assembled, having given full consideration to the despatches from the Secretary of State for the Colonies respecting suggested amendments in the Commonwealth Bill, reply :—

1. While they fully recognise the feeling of the Imperial Government that vigilance on their part is essential in the interests of all parts of the Empire, and also the importance of securing the inclusion of Western Australia in the Federation from the first, they cannot forget that by the Enabling Acts, and in pursuance of them—

- (a) The framing of the Federal Constitution was expressly intrusted to the Convention of Representatives specially elected by the people for the purpose in all the Colonies except Queensland and Western Australia; and that the final acceptance or rejection of the Constitution, when framed, was also remitted to the people.
- (b) The question as to appeals was, *inter alia*, considered by the Convention in Adelaide, and no appeal to the Privy Council was allowed. During the visit of the Premiers to England, at the Jubilee, the matter was referred to by the Secretary of State for the Colonies, who urged reconsideration. It was accordingly reconsidered at the meeting of the Convention in Melbourne, and resolved in the opposite direction to the decision in Adelaide. Later, the matter was again discussed, and the compromise now in the Bill agreed to. It was yet again debated in the Premiers' Conference prior to the last referendum, and no alteration was made in the form of the Bill. The vote was then taken, and the Bill was adopted by a large majority of the electors.
- (c) The Commonwealth Bill belongs, therefore, in a very special sense, to the people of Australia, whose only mandate to Governments and Parliaments is to seek its enactment by the Imperial Parliament in the form in which it was adopted by the people.
2. The Premiers believe that the appeal clause, as framed, could not work injuriously to any part of the Empire, although the proposed new Court of Appeal would, doubtless, present attractions to the people of Australia.
3. The only alternatives suggested in the despatches are :—(1) Amendment of the Bill, and (2) postponement of its consideration. Of these two, the Premiers do not hesitate to say that the latter course would be much more objectionable to Australians generally even than the former.
4. Without disputing the constitutional power of the Imperial Parliament to amend the Bill on its own responsibility, the Premiers respectfully urge that the voice of the Australian people, given on the Bill as it stands, should receive that favourable consideration which such a weighty referendum demands. The Premiers do not consider themselves as having authority to accept any amendments. They hope that the Colony of Western Australia, whose representatives assisted to frame the Bill, and in the Convention almost unanimously agreed to clause 95, may be urged to accept it as it stands. They think that the Bill already sufficiently provides for the admission of New Zealand.

All business being concluded, it was resolved, upon the motion of the Hon. W. J. Lyne, seconded by the Hon. F. W. Holder, that the thanks of the Conference be accorded to the Hon. A. McLean for his services as Chairman, and to Mr. R. S. Rogers for his services as Secretary.

The Chairman then, at 9 p.m., declared the Conference closed.

ROBERT S. ROGERS,
Secretary.

A. McLEAN,
Chairman.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

AUSTRALASIAN FEDERATION ENABLING ACT.

(STATEMENT SHOWING NUMBER OF OFFICERS WHO WILL BE TRANSFERRED UNDER, AND
AMOUNT OF SALARIES.)

Printed under No. 8 Report from Printing Committee, 9 August, 1900.

The Secretary, Public Service Board, to The Under Secretary for Finance and Trade.

Sir,

Public Service Board,
50, Young-street, Sydney, 7 August, 1900.

With reference to an interview which the Chairman of the Public Service Board recently had with the Honorable the Premier and Colonial Treasurer, at which Sir William Lyne asked to be furnished with a statement showing the number of officers who would be transferred under the provisions of the Federal Enabling Act to the control of the Commonwealth, and the amount of the salaries of the officers so affected, I am directed to furnish the following information, which has now been supplied by the Departments concerned:—

Name of Department.	No. of Officers.	Amount of Salaries.	
		£	s. d.
Public Health... ..	17	3,218	0 0
Customs	298	57,130	0 0
Navigation (<i>see memo. of Secretary</i>)	56	8,198	10 0
Postal and Telegraph (<i>see memo. of D.P.M.G.</i>)	5,110	428,368	0 0
Total	5,481	£496,914	10 0

No information is given as to the Naval and Military Defence Departments, the officers of which do not come under the operation of the Public Service Act.

I have, &c.,
J. W. HOLLIMAN,
Secretary.

AUSTRALIAN FEDERATION.

(EXTRACT FROM A MEMORANDUM ON THE DRAFT AUSTRALIAN COMMONWEALTH BILL,
ADELAIDE, 1897.)

Printed under No. 6 Report from Printing Committee, 26 July, 1900.

[Communicated to the Premier of New South Wales, after the Conference with the Colonial Premiers
assembled in London in July, 1897.]

AUSTRALIAN FEDERAL CONSTITUTION.

Suggested Amendment in Draft Commonwealth Bill of 1897.

Clause 75.

Amend the clause so as to read as follows :—
“No appeal shall be allowed to the Queen in Council either from a Court of any State from which there is an appeal to the High Court, or from the High Court, or from any other Federal Court from which there is an appeal to the High Court, except by leave of the High Court or of the Queen in Council.”

NOTES ON SUGGESTED AMENDMENT.

Clause 75.

The object of the amendment is to maintain the right of appeal to the Queen from any Court from which there is no appeal to the High Court, and to allow appeals from the High Court when leave is given either by that Court or by the Queen in Council.

The reasons for maintaining the appeal to the Queen in Council were stated by the Privy Council in 1871 as follows, when the question was raised by the Australian Colonies :—

“The appellate jurisdiction of Her Majesty in Council exists for the benefit of the Colonies, and not for that of the Mother Country, but it is impossible to overlook the fact that this jurisdiction is a part of the prerogative which has been exercised for the benefit of the Colonies from the date of the earliest settlements of this country, and that it is still a powerful link between the Colonies and the Crown of Great Britain. It secures to every subject of Her Majesty throughout the Empire the right to claim redress from the Throne; it provides a remedy in certain cases not falling within the jurisdiction of ordinary courts of justice; it removes causes from the influence of local prepossessions; it affords the means of maintaining the uniformity of the law of England in those Colonies which derive the great body of their law from Great Britain; and it enables suitors, if they think fit, to obtain a decision, in the last resort, from the highest judicial authority and legal capacity existing in the metropolis.

“The power of establishing or re-modelling the Colonial Courts of Justice is vested by the 28 and 29 Vict.* in the Colonial Legislatures, and it is undoubtedly desirable that the Colonial Courts of Justice should be so constituted as to inspire confidence in their decisions, and to give rise to very few ulterior appeals. But the controlling power of the highest Court of Appeal is not without influence and value, even when it is not directly resorted to. Its power, though dormant, is not unfelt by any judge in the Empire, because he knows that his proceedings may be made the subject of appeal to it.”

The Australian Colonies acquiesced in this view at the time.

The question was again raised by the passing in 1875 of the “Supreme and Exchequer Court Act of Canada”; and the Privy Council again pointed out that :—

“The supreme appellate authority of the Empire or the Realm is unquestionably one of the highest functions and duties of the sovereignty. The power of construing, determining, and enforcing the law in the last resort, is, in truth, a power which overrides all other powers; since there is no act which may not in some form or other become the subject of a decision by the supreme appellate tribunal, and that tribunal can alone determine the limits of its own jurisdiction. “This

* This refers to s. 5 of the Colonial Laws Validity Act, 1865 (28 and 29 Vict., c. 63).

"This power has been exercised for centuries, as regards all the dependencies of the Empire, by the Sovereigns of this country in Council; that is to say, the Sovereign to whom the prayer for relief is addressed affords that relief, with and by the advice of a certain number of the most eminent judicial officers and jurists of the Realm, who are sworn of the Privy Council for this purpose. The final order made on each appeal is the direct act of the Queen in person. So that by this institution, common to all parts of the Empire beyond seas, all matters whatsoever requiring a judicial solution may be brought under the cognizance of one Court, in which all the chief judicial authorities in this country have a voice. To abolish this controlling power, and to abandon each Colonial Dependency to a separate final Court of Appeal of its own, is obviously to destroy one of the most important ties which still connect all parts of the Empire in common obedience to the source of law, and to renounce the last and most essential mode of exercising the authority of the Crown over its possessions abroad."

It may also be pointed out that, by the Colonial Courts of Admiralty Act, 1890, Admiralty jurisdiction, *i.e.*, jurisdiction on the high seas, which is not ordinarily vested in any local court, was conferred on Colonial Courts, on the assumption that there would be an appeal from those courts to the Queen in Council. It probably has escaped the notice of the draftsman that clause 75 might raise a doubt whether the appeal under the above Act in Admiralty cases is maintained.

There is also a general, and probably a growing, desire in the Colonies, as well as in the United Kingdom, for uniformity of law, particularly commercial law and shipping law.

Such a uniformity cannot be attained unless there is some provision for making uniform the interpretation of the law. Judicial decisions will necessarily vary in different courts, and can only be brought into uniformity by one Court of Appeal governing the whole of them.

It must also be recollected that the existence of the appeal to the Queen in Council, with its protection against any decision due to local prepossessions, is an important element in the consideration of investors of English capital in Australia. It cannot be for the benefit of the Colonies to alarm those investors.

They also are very numerous and powerful, and the amount invested is very large. They will no doubt oppose any proposal to abolish the appeal to the Queen in Council.

There may be, no doubt, defects in the Judicial Committee, as in every human institution. But, surely it is better to try to cure those defects than to abolish a very important link in the unity of the Empire, and to lose the benefits of uniformity in law, which the appeal to the Queen in Council undoubtedly confers.

It must be recollected that the Privy Council comprises the best and most experienced lawyers in the United Kingdom, and also experienced members of the Colonial judicial bench.

The Australian Colonies doubtless desire that all appeals shall be heard by their Federal High Court; and that this desire is reasonable need not be denied.

What the amendment proposes, therefore, is that there should be no appeal from the High Court as of right, but that the Queen in Council should have the right to give leave to appeal. This is the state of things which practically exists in the case of Canada.

The result of it is that leave is only given in those cases where there is an important question of principle to be tried, or where there is some reason to suppose that local prepossessions have influenced the decision, or where it is alleged that they have so influenced it, and it is desirable to remove the feeling of injustice created by such allegation.

There may be cases in which no appeal lies to the Federal High Court in Australia. In such a case it seems desirable to preserve the prerogative of the Queen in Council to grant leave to appeal in a proper case. Such leave is very rarely given; in fact, it is only given where there would apparently be a miscarriage of justice if the leave were not given.

17th, July 1897.

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FEDERAL ELECTORAL DISTRICTS COMMISSIONERS.

(REPORT OF THE, WITH TWO SCHEDULES.)

Printed under No. 18 Report from Printing Committee, 29 November, 1900.

To His Excellency the Honourable Sir FREDERICK MATTHEW DARLEY,
Knight Commander of the Most Distinguished Order of Saint Michael
and Saint George, Lieutenant-Governor and Commander-in-Chief of
the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY :

We, the Royal Commission appointed to make inquiries with a view to enabling a Bill to be submitted to Parliament for the apportionment of the Colony into Divisions, for which Members representing New South Wales in the Federal House of Representatives may be chosen, in accordance with the provisions of the Draft Bill "To Constitute the Commonwealth of Australia," have the honor to report to your Excellency as follows :—

As directed by the Bill "To constitute the Commonwealth of Australia," which has now become "The Commonwealth of Australia Constitution Act," we have endeavoured to comply with those provisions of the Constitution which relate to Electoral Divisions.

The 29th section of "The Commonwealth of Australia Constitution Act" reads as follows :—"Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the Divisions in each State for which Members of the House of Representatives may be chosen, and the number of Members to be chosen for each Division"; and, in reference to the application of State laws, section 31 provides that "until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time-being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of Members of the House of Representatives."

Your Commissioners were naturally led to make inquiries with reference to the efficiency of the State rolls of electors as an instrument by which the elections for the Senate and the more numerous House of Representatives might be effected. In the prosecution of these inquiries, it was ascertained, from reliable sources, that, while there was little, if any reduction in the manhood or voting strength of the State from that shown on the rolls, yet at the same time there was such a diminution

in the expression of the voting power as to lead to well-founded suspicion that the rolls would be utterly unreliable for the purposes intended. We were thus led to suggest that new and complete lists, representing a census of the actual manhood of New South Wales, should be taken in a house-to-house canvass from one end of the Colony to the other. For this, a very intelligent and efficient response was afforded by the police force of the Colony, which resulted in a complete census, arranged in electoral divisions, of every qualified elector in the Colony in the month of October, 1900.

The grave result may be at once apprehended when it is understood that the total number of names on the electoral rolls for the current year—1899–1900—was 322,468; and that in that number there were found errors of disqualification by death, removal, departure from the Colony, lunacy, &c.—besides a very considerable number of names misplaced or entered on the wrong electoral lists—amounting to 132,136. The instructions conveyed to the police force by the Inspector-General of Police included a caution that not one person who was duly qualified should be omitted. The investigation led to the addition of 123,647 new names of duly qualified electors to the electoral lists. Thus it will be seen that the lists returned by the police yielded a total electoral population of 318,116, which is the approximate electoral strength of New South Wales under the existing franchise. This number, if divided by 125, the number of the State electorates, yields a quota of 2,544 electors for each; and if the same total is divided by 26, the number of divisions that are to return Members to the House of Representatives in the Federal Parliament, a Federal electoral quota of 12,235 is obtained.

It will be remembered that the Parliamentary Electorates and Elections Act provides a marginal allowance to be used by the Electoral District Commissioners when delimiting the boundaries of the State districts. This marginal allowance is a limit of 600 above or below the ascertained quota, considered to be sufficient to meet the varying conditions of settlement and the natural difficulties in grouping population; and it was regarded as the nearest approximation to equal representation that could be obtained, consistent with a full knowledge of the varying conditions of Australian settlement. So that, in applying the principle controlling the State laws in this respect, it will be seen that the number of electors, which may range in the State electorates from 1,944 to 3,144, may in the Federal electorates, with a proportionate margin of 2,885, range from 9,350 to 15,120.

Difficult as it was in the first instance to establish this approximation to equality of representation, still more difficult as it seems to have been to maintain it, the difficulty is largely augmented when the application of the principle of the State laws rendered it imperative to embrace extensive tracts of territory, including vast inaccessible areas almost bereft of population, and stretches of territory that are not likely to be occupied for any profitable industry for many years to come.

Prior to the completion of the police electoral census, there appeared to be a pressing public necessity that some projection or tentative scheme should be issued for the consideration of the electors,—some scheme upon which the public attention could be focussed, with a view to the submission of such suggestions as the Commissioners might find, on full and complete examination, to be of value in the public interest. On the 7th August, 1900, therefore, a tentative scheme, based on the available information at our command, was published, and to this public attention was directed, with a view to obtaining public criticism and any suggestions that could intelligently convey a true consensus of public opinion, as far as Federal Electoral Divisions were concerned. In response, numerous communications have been received, every one of which has received the most careful consideration of the Commission.

While a large amount of correspondence has taken place in reference to the boundaries, the consensus of opinion is decidedly in favour of their confirmation; but, though the retention of the boundaries as at first proposed is fairly arguable, the altered numbers returned on the lists collected by the police have led your Commission to a reconsideration of such districts as are directly and vitally affected thereby. It should be observed that the quota will not be very seriously affected

by

by the collection of the new lists, the quota under the old Electoral Rolls being 12,402, and that under the revised lists, 12,235. The application of the quota, with the marginal allowance, to the Divisions tentatively proposed by the Commission, shows that five of the proposed districts are affected. Three (Cammara, Cronulla, and Moolabinda, now Newcastle) being above the maximum of 15,120, and two (Warrego, now Bogan, and Wirradari, now Riverina) below the minimum of 9,350. These have received consideration, and, with the exception of Warrego, now Bogan, all of the districts are now within the proportional limits prescribed in the Parliamentary Electorates and Elections Act.

Owing to the increase in the population of the proposed Cammara electorate, as shown by the newly-collected lists, the Commission have determined to detach a portion of the Glebe electorate, including about 2,400 electors, and include it with the City electorates, which it is now proposed shall consist of Sydney West (to include the portion of the Glebe electorate referred to), with an electoral population of 14,098, and Sydney East with an electoral population of 14,661. This will reduce the number of voters in Cammara to 14,252.

A modification of the tentative scheme, as far as the Newcastle electorates are concerned, has been deemed advisable, owing to the increased electoral population shown by some of the new lists for that district. It is now proposed to include 14,663 voters in the Federal electorate including Newcastle. This district possesses an urban population, and there, as in the metropolitan area, all electoral machinery may be obtained with the greatest facility.

The Commission have carefully considered the case of the districts of The Richmond, The Tweed, The Clarence, the Hastings, The Macleay, New England, Liverpool Plains, and The Gwydir; and, after the fullest consideration of the various interests, and of the impossibility of obtaining a numerical electoral equality without seriously dislocating interests which are united, and introducing elements of discord and disintegration (particularly in the North Coast District), they have unhesitatingly determined to adopt the following Divisions:—(1.) The Tweed, Ballina, The Richmond, Lismore, and Tenterfield; electoral population, 9,748. (2.) The Clarence, Grafton, The Hastings and Macleay, The Manning, Raleigh, and a considerable portion of Gloucester; electoral population, 12,690. (3.) Glen Innes, Armidale, Uralla-Walcha, Tamworth, Quirindi, and about two-thirds of Bingara; electoral population, 12,851. (4.) Inverell, Moree, Narrabri, Gunnedah, part of The Barwon, and one-third of Bingara; electoral population, 11,624.

The most considerable shrinkage in population is shown by the newly-collected lists to have occurred in the western plains of the Colony and in Western Riverina. This is attributable, to a very large extent, to the continued drought, which, for the last four years and upwards, has seriously affected that portion of the Colony. The Commissioners have not been unmindful of the fact that a return to normal climatic conditions will lead to an increased settlement and a larger electoral enrolment there. Meanwhile they suggest a slight modification of their former tentative scheme with regard to these districts. The three most westerly Federal electorates, as now proposed, will contain an electoral population of 27,976 electors within an area of about 159,000 square miles—more than half of the Colony. This immense tract of country—it is one and a third times as extensive as Great Britain and Ireland, one and a half times the size of New Zealand, and over six times as big as Tasmania—has within it conditions so different from those prevailing in the more closely-settled parts of the Colony that, at the Census of 1891, it was found that, of a population of 83,897 therein contained, only 30,615, or 36 per cent., were females. The severity of the conditions of settlement is plainly apparent, and also the futility of attempting to arrange boundaries in anything approximating to numerical equality of population.

After having fully considered these matters, your Commissioners submit the distribution of New South Wales into twenty-six Federal Electoral Districts, as shown on the accompanying maps, and expressed by names in the accompanying Schedule A, attached to and forming part of this Report. Schedule B, also attached to and forming part of this Report, gives the names of the State electorates which are wholly, or in part, included in each of the Federal Electoral Districts, and also the number of electors in each such proposed Electoral District. In

In the consideration of the scheme an adherence to the spirit and letter of the Constitution Act is imperative. We have therefore embraced such areas and such groups of population as will help to unite all interests which, under State conditions, may appear to be divided and separate, but under the truer and larger national Federal view are one. The spirit, therefore, of united national Australian life, where it has been possible in combining small State communities, has been observed.

C. J. McMASTER, President,
Federal Electoral Districts Commission.

GEORGE LEWIS, }
C. J. SAUNDERS, } Commissioners.

Office of the Federal Electoral Districts Commission,
Sydney, 16th November, 1900.

SCHEDULE A.

FEDERAL ELECTORAL DISTRICTS.

- | | | |
|-------------------|-----------------|------------------|
| 1. Sydney, East. | 10. Cambewarra. | 19. Canobolas. |

SCHEDULE B.

Sydney, East.

To include the electorates of Sydney-King (nearly the whole), Sydney-Fitzroy, Sydney-Bligh, Sydney-Flinders, Sydney-Belmore, and Sydney-Cook.
Number of voters—14,661.

Sydney, West.

To include the electorates of Sydney-Gipps, Sydney-Lang, Sydney-Denison, Sydney-Pymont, Sydney-Phillip, Sydney-King (a small portion east of Lower George-street), and Glebe (that part which lies north and east of the Glebe Road).
Number of voters—14,098.

Maroubra.

To include the electorates of Paddington, Randwick, Waverley, Woollahra, and that part of Botany which consists of the South Kensington Estate, and also that part which is within the Randwick Municipality.

Number of voters—13,340,

Sydney,

Sydney, South.

To include the electorates of Darlington, Redfern, Waterloo, Newtown-Erskine, and that part of Botany not included in Maroubra.
Number of voters—14,555.

Cronulla.

To include the electorates of Newtown-Camperdown, Newtown-St. Peters, Marrickville, St. George, that part of the Canterbury Division of Canterbury south of the Canterbury-road and Cook's River, and Sutherland Division of Woronora.
Number of voters—14,695.

Cammara.

To include the electorates of Balmain North, Balmain South, Leichhardt, Annandale, and that part of the Glebe not included in Sydney West.
Number of voters—14,252.

Parkes.

To include the electorates of Ashfield, Burwood, Petersham, that part of Granville lying east of the Dog Trap road, that part of Canterbury which consists of the Strathfield and Enfield Divisions, and the northern part of the Canterbury Division, and the Drummoyne Division of Ryde.
Number of voters—13,934.

Kuring-gai.

To include the electorates of Warringah, St. Leonards, Willoughby, Ryde (except the Drummoyne Division), and the Gosford Division of Northumberland.
Number of voters—14,123.

Tomah.

To include the electorates of Sherbrooke, the Nepean, the Hawkesbury, Parramatta, Granville (that part west of the Dog Trap-road), Canterbury (the Liverpool Division), Hartley (the eastern part of the Lithgow Division), and Northumberland (the St. Albans Division).
Number of voters—12,194.

Cambewarra.

To include the electorates of Camden, Woronora (except the Sutherland Division), Illawarra, Kiama, The Shoalhaven, and Bowral.
Number of voters—12,819.

Macquarie.

To include the electorates of Macquarie, Bathurst, West Macquarie (except the Tuena Division), Cowra, Hartley (the western part of the Lithgow Division, the Katoomba Division, and Wallerawang Division), and a small portion of Rylestone, surrounding Capertee.
Number of voters—10,794.

Werriwa.

To include the electorates of Goulburn, Argyle, Braidwood (that part north of Braidwood), Queanbeyan (that part north of Queanbeyan), West Macquarie (the Tuena Division), Yass, and Boorowa.
Number of voters—10,911.

Monaro.

To include the electorates of Monaro, Braidwood (that part south of Braidwood), Queanbeyan (that part south of Queanbeyan), Moruya, Eden-Bombala, and Bega.
Number of voters—11,191.

Cudgegong.

To include the electorates of Rylstone (except a small portion included in Macquarie), Mudgee, Wellington, and Dubbo.
Number of voters—11,497.

Newcastle.

To include the electorates of Newcastle East, Newcastle West, Kahibah, Wallsend, Waratah, Wickham, the Minmi Division of East Maitland, and a part of the Cooranbong Division of Northumberland, comprising Catherine Hill Bay and Lake Macquarie.
Number of voters—14,663.

Hunter.

To include the electorates of Durham, East Maitland (except the Minmi Division), West Maitland, Singleton, Northumberland (the Wollombi and part of the Cooranbong Divisions), Robertson, and the Stroud Division, and part of the Raymond Terrace Division of Gloucester.
Number of voters—13,459.

Hume.

To include the electorates of Tumut, Albury, The Hume, The Murray (the extreme eastern portion only), and Gundagai.
Number of voters—11,200.

Mirrool.

To include the electorates of The Murrumbidgee, Wagga Wagga, Young, and Grenfell (the Barmedman, Grenfell, Marsden, Wyalong, and Yalgogrin Divisions.)
Number of voters—10,710.

Canoblas.

To include the electorates of Orange, Molong, Ashburnham, Condoumlin (except that part within the Nyngan and Warren Land Districts), and Grenfell (the Billy's Lookout, Euglo, and Ooma Divisions).
Number of voters—10,131.

Kippara.

To include the electorates of the Clarence, Grafton, The Hastings, and Macleay, The Manning, Raleigh, and Gloucester (the Bullah Delah, Copeland, Forster, and Part of Raymond Terrace Divisions).
Number of voters—12,690.

New England.

To include the electorates of Tamworth, Quirindi, Uralla, Walcha, Armidale, Glen Innes, and that part of Bingara outside the Bingara Land District.
Number of voters—12,851.

Namoi.

To include the electorates of Inverell, Moree, Narrabri, Gunnedah, Bingara (that part within the Bingara Land District), and that part of The Barwon which is within the Walgett and Walgett North Land Districts.
Number of voters—11,624.

Unara.

To include the electorates of Tenterfield, The Richmond, The Tweed, Lismore, and Ballina.
Number of voters—9,748.

Bogan.

To include the electorates of Coonamble, Bourke, Cobar, that part of Condoumlin which is within the Nyngan and Warren Land Districts, that part of The Lachlan within the Cobar Land District, and that part of The Barwon which is not within the Walgett and Walgett North Land Districts.
Number of voters—9,140.

Riverina.

To include the electorates of Wentworth, Deniliquin, Hay, The Lachlan (except a small portion included in Bogan), and The Murray (except the extreme eastern portion).
Number of voters—9,400.

Barrier.

To include the electorates of Broken Hill, Sturt, Alma, and Wilcannia.
Number of voters—9,436.

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

FEDERAL ELECTORAL DIVISIONS.

(REPORT OF THE FEDERAL ELECTORAL DISTRICTS COMMISSIONERS RESPECTING THE DIVISION OF THE COLONY INTO.)

Printed under No. 3 Report from Printing Committee, 5 July, 1900.

Sir,

Federal Electoral Districts Commission, Sydney, 2 July, 1900.

In our investigations with a view to the division of the Colony into Federal Electoral Divisions we have naturally been led to a consideration of the condition of the Electoral Rolls of the various State Electorates throughout the Colony.

It is very difficult to form an absolutely just and accurate opinion upon the percentage of error that must exist in the rolls for the city of Sydney and the districts contiguous to it. In some of these it is known to be large, and in others, while the actual numbers may not differ to any appreciable extent, the personalities will be found to have changed to a very large and heavy percentage.

Subjoined will be found a schedule, showing the percentage of disqualifications for all electorates (marked "B"). The average disqualifications for the country electorates range from 6 to 33 per cent., and in particular divisions of the country electorates a much higher percentage of disqualifications is found, ranging, in fifty-five divisions, from 30 to 71 per cent. (*see* Schedule "A").

Schedule "C" attached shows the percentage of disqualification in the metropolitan area to be only 3·8 per cent., as against 15·2 per cent. for the country districts. These disqualifications are given by the police, in very many cases from memory, particularly in the metropolitan and surrounding districts, and as the electors within the metropolitan area are not so well known to the police as the country residents, it is needless to say that the percentages are lower.

There is little doubt that a re-issue of rights and a new enrolment by the police would considerably reduce the numbers on the rolls in the metropolitan area.

The rolls, both from the returns and from the personal testimony of the police officers and others, are so unsatisfactory as to be utterly unreliable in the matter of accuracy. We have therefore to submit that new rolls should be taken by the police, and new rights issued to every elector who is qualified, as soon as it is possible for the necessary legislative authority to be obtained. Any new enrolment can be effected by the police.

The rolls should be taken in such a manner as to enable them to be adapted for Federal purposes.

We have, &c.,

C. J. McMASTER,	} Federal Electoral Districts Commissioners.
President,	
GEORGE LEWIS,	
C. J. SAUNDERS.	

The Honorable the Chief Secretary.

"A."

THE ELECTORAL ROLLS.

The percentage of names struck off by the police was very high in some of the Divisions, as under:—

- 30 per cent.—Bowral (Bowral), Clarendon (Gundagai), Maude (Hay), Cargellico (The Lachlan), Nimitybelle (Manaro), Obley (Molong), Yarrangobilly (Tumut), Euston (Wentworth).
- 31 per cent.—Newton Boyd (Grafton), Lake Victoria (Wentworth).
- 32 per cent.—Trangie (Dubbo), Blackville (Quirindi), Purnamoota (Sturt), Swamp Oak (Tamworth), Teralba (Wallsend).
- 33 per cent.—Hillgrove West (Armidale), Krawaree (Braidwood), Drysdale (Cobar), Stockton (Newcastle East).
- 34 per cent.—Greta (Singleton), Trunkey (West Macquarie).
- 35 per cent.—Wangonilla (Deniliquin), Katoomba (Hartley), Mungindi (Moree), Woodburn South (The Richmond).
- 36 per cent.—Billy's Lookout (Grenfell).
- 37 per cent.—Collarendabri (The Barwon), Wentworth (Wentworth).
- 39 per cent.—Landsborough (Bourke), Tilpa (Wilcannia).

- 40 per cent.—Overflow (Condoublin), Jugiong (Gundagai), Kiandra (Manaro).
 42 per cent.—Yalgogrin (Grenfell), Goangra (Narrabri).
 43 per cent.—Ford's Bridge (Bourke), Currathool (Hay), Euabalong (The Lachlan), Rocky Water-holes (Wilcannia).
 44 per cent.—Mossiel (The Lachlan), Menindie (Wentworth).
 45 per cent.—Barrington (Bourke).
 46 per cent.—Nana (Raleigh), Nowendoc (Uralla-Walcha).
 48 per cent.—Alectown (Condoublin), Pooncaira (Wentworth).
 50 per cent.—Girilambone (Cobar), Captain's Flat (Queanbeyan).
 55 per cent.—Goodooga (The Barwon), Yantabulla (Bourke).
 56 per cent.—Mount Hope (The Lachlan).
 57 per cent.—Dalmorton (Raleigh).
 62 per cent.—Noonthurungee (Wilcannia).
 70 per cent.—Yandarlo (Wilcannia).
 71 per cent.—Thackaringa (Sturt).

“B.”

Percentage of names marked off on the various Electoral Rolls by the police as being those of deceased or disqualified persons:—

- 0·6 per cent.—Paddington.
 0·7 per cent.—Woollahra.
 1 per cent.—Sydney (Denison).
 1¼ per cent.—Sydney (King), Sydney (Lang).
 1½ per cent.—Annandale, Darlington, Sydney (Cook).
 2 per cent.—Newtown (Erskine), Redfern, Sydney (Belmore), Sydney (Fitzroy), Waterloo.
 2½ per cent.—Sydney (Bligh).
 3 per cent.—Balmain North, Balmain South, Newtown (Camperdown), Sydney (Flinders).
 3½ per cent.—Glebe, Sydney (Phillip).
 4 per cent.—Marrickville, Newtown (St. Peters), St. George, St. Leonards.
 5 per cent.—Botany.
 6 per cent.—Bathurst, Broken Hill, Petersham.
 7 per cent.—The Clarence, Durham, Inverell, Leichhardt.
 7½ per cent.—Parramatta.
 8 per cent.—Albury, Randwick, Sydney (Gipps), Uralla-Walcha.
 9 per cent.—Ashfield, Dubbo, Sydney (Pyrmont), Yass.
 10 per cent.—Gloucester, The Hume, Macquarie, The Nepean, Orange, Quirindi, Sturt, Tenterfield.
 11 per cent.—The Hastings and Macleay, Mudgee, Tumut, Wagga, Wellington.
 12 per cent.—Alma, Armidale, Ashburnham, Bingara, Gunnedah, The Hawkesbury, Northumberland, Willoughby.
 13 per cent.—Argyle, Grafton, Grenfell, Manaro, The Manning, Molong, The Murrumbidgee, Waverley, Wilcannia.
 14 per cent.—Kahibah, Newcastle East, Young.
 15 per cent.—Glen Innes, The Murray, Sherbrooke, Tamworth, Woronora.
 16 per cent.—Ballina, Braidwood, Granville, Lismore, Maitland East, Moree, Moruya, Newcastle West, Robertson, Shoalhaven, The Tweed, Waratah.
 17 per cent.—Boorowa, Cobar, Illawarra, Narrabri, Rylstone.
 18 per cent.—Bega, Burwood, Queanbeyan, The Richmond, West Macquarie.
 19 per cent.—Coonamble, Cowra, Deniliquin, Wallsend.
 20 per cent.—Eden-Bombala, Goulburn, Hay.
 21 per cent.—Gundagai, Maitland West, Wickham.
 22 per cent.—Bowral, Hartley, Ryde, Singleton.
 23 per cent.—Raleigh, Warringah.
 24 per cent.—The Barwon, Bourke.
 25 per cent.—Kiama.
 26 per cent.—Condoublin.
 30 per cent.—The Lachlan.
 33 per cent.—Wentworth.

“C.”

REVISION OF THE ELECTORAL ROLLS.

1. *Ninety-five Country Electorates.*

Number of names struck off	36,049
Average for each Electorate	379
Percentage for the ninety-five Country Electorates	15·2

2. *Thirty City and Suburban Electorates.*

Number of names struck off	3,276
Average for each Electorate	109
Percentage for the thirty Metropolitan Electorates	3·8

3. *The whole Colony.*

Number of names struck off	39,325
Average for each Electorate	314
Percentage for the 125 Electorates	12·2

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

**PROPOSED FEDERAL ELECTORATES OF
NEW SOUTH WALES.**

(PARTICULARS SHOWING BOUNDARIES OF.)

Printed under No. 8 Report from Printing Committee, 9 August, 1900.

Wurrang (Sydney Cove).

No. 1 will include Elizabeth Bay, Woolloomooloo Bay, Farm Cove, Sydney Cove, Dawes Point, Darling Harbour, and that part of Johnstone's Bay up to Blackwattle Cove, the divisional line running along Bayswater-road, William-street South, William-street, Park-street, George-street, George-street West, to a point where it is met by Bay-street and Newtown-road, thence by Bay-street to William Henry-street, and by William Henry-street to Darling-street, and by Darling-street and its prolongation to the waters of Port Jackson.

Toorawal (Dialect spoken south of Port Jackson).

District No. 2 is bounded by Barcom-street to Oxford-street, thence by Dowling-street to Cleveland-street, by Cleveland-street to Newtown-road, by Newtown-road to George-street West, thence by George-street, Park-street, William-street, and Bayswater-road to Barcom-street.

The electorates will be :—In No. 1: The greater part of King Division, and Fitzroy, Gipps, Lang, Denison, and Pyrmont Divisions. In No. 2: The southern part of King Division, and Flinders, Phillip, Belmore, and Cook Divisions. In No. 1 Division also are included all the islands of Port Jackson and Lord Howe Island.

Maroubra (Chief of Tribe about Coogee).

District No. 3 is that which includes the electorates of Paddington, Woollahra, Waverley, Randwick, and an eastern portion of Botany, and is a coast district lying between Port Jackson and Botany Bay, of the suburbs adjacent to the city on its eastern side. The part of the Botany electorate included is the South Kensington Estate, at the back of the Randwick Racecourse, with the remaining portion of the Randwick Municipal District lying between the south boundary of Randwick and Botany Bay. This will constitute an area the interests of which are united by many ties.

Booralee (Name of District).

In District No. 4 it is proposed to unite the Parliamentary electorates of Darlington, Redfern, Waterloo, Botany (except the Kensington portion, &c.), and Newtown (Erskineville). Speaking generally, this district is bounded by Newtown-road and Cook's River-road to Barwon Park-road and Ricketty-street to Shea's Creek, Cook's River, and Botany Bay.

Cronulla (Botany Beach).

District No. 5 includes the Parliamentary electorates of Newtown (Camperdown), Newtown (St. Peters), Marrickville, St. George, that part of the Canterbury electorate within the Canterbury municipal district, and the northern portion of the Woronora electorate, lying between Port Hacking and Botany Bay. In this is included a considerable portion of Newtown, Enmore, St. Peters, Tempe, Dulwich Hill, Canterbury, Arncliffe, Rockdale, Kogarah, Carlton, Hurstville, Penshurst, Oatley, Como, and Sutherland. This district is served by the Illawarra line.

Cammara (Tribe on Shores of Port Jackson).

District No. 6 is bounded by Bay-street and the Parramatta-road to Long Cove Creek, and includes within its limits the electorates of Glebe, Annandale, Leichhardt, Balmain South, and Balmain North.

Bullanaming (name of Petersham).

No. 7 District includes the Parliamentary electorates of Petersham, Ashfield, Burwood, Ryde (the Drummoyne portion), Granville (leaving out Merrylands and Guildford), and that part of Canterbury including Enfield, Strathfield, Homebush, Flemington, and south as far as the water-pipes. It includes, besides those places already mentioned, Rookwood, Auburn, Bankstown, Irishtown, Concord, Drummoyne, and Dobroyd.

Kuringgai (Tribe between Port Jackson and the Hawkesbury).

No. 8 District includes the Parliamentary electorates of St. Leonards, Willoughby, Warringah, Ryde (less the Drummoyne portion), and the Gosford portion of the Northumberland electorate. It includes St. Leonards, Mosman, Manly, Neutral Bay, Willoughby, Chatswood, Lindfield, Gordon, Turramurra, Hornsby, Berowra, Cowan, Narrabeen, Middle Harbour, Field of Mars, Penrith Hills, Beecroft, Carlingford, Eastwood, Ryde, Hunter's Hill, Meadowbank, Ermington, Putney, Lane Cove River, Brooklyn, Woy Woy, Longueville, Greenwich, Kuringgai Chase, Gosford, Ourimbah, Kincumber, Tuggerah Beach Lake, Wyong, and Broken Bay. This district is served by the Northern railway.

Tomah (conspicuous Mountain in centre of Electorate).

No. 9 District includes the Parliamentary electorates of Parramatta, Granville (that part west of the Dog Trap Road), Sherbrooke, The Hawkesbury, The Nepean, Hartley, that part of Canterbury lying west of George's River and Prospect Creek immediately around Liverpool, and the St. Albans part of the Northumberland electorate. This will include Harris Park, Toongabbie, Seven Hills, Blacktown, Doonside, Mount Druitt, St. Marys, Glenbrook, Springwood, Lawson, Katoomba, Blackheath, Mount Victoria, Hartley Vale, Eskbank, Lithgow, Bowenfels, Wallerawang, Rydal, Jenolan Caves, Castlereagh, Richmond, Windsor, Pitt Town, Wilberforce, Kenthurst, Mulgrave, Baulkham Hills, Smithfield. All of these are served by the Western and the Hawkesbury River railway lines.

Cambewarra (Range in Southern part of Electorate).

No. 10 District will include the Parliamentary electorates of Camden, Woronora (that part south of Port Hacking), Illawarra, Kiama, Bowral, and The Shoalhaven. It will include Clifton, National Park, Campbelltown, Picton, Mittagong, Bowral, Moss Vale, Sutton Forest, Bundanoon, Wingello, Camden, Narellan, Cobbitty, Berry, Nowra, Jamberoo, and Gerringong.

Millemurra (Place on Macquarie River).

No. 11 District will include the Parliamentary electorates of Bathurst, Macquarie, West Macquarie (except the portion south of Burruga), and Cowra. It includes Bathurst, Blayney, Carcoar, Woodstock, Mount Macdonald, Lyndhurst, Sofala, Cowra, Rockley, and Oberon.

Werriwa (Lake George).

In No. 12 District it is proposed to include the area which extends from Barber's Creek on the Southern line to Wallendbeen, and from Bungendore to Tuena inclusive, combining the electorates of Argyle, Boorowa, Goulburn, Yass, the southern (Tuena) portion of West Macquarie, the northern portion of Queanbeyan (north from Bungendore and the Molonglo River, including Lake George), and that part of Braidwood north of Larbert. This will include the towns of Goulburn, Marulan, Crookwell, Bungendore, Yass, Harden, Murrumburrah, Bowning, Gunning, Binalong, Boorowa, Wallendbeen, Collector, Tarago, Marlow, Wombat, Bookham, Goodradigbee, Bungonia, and Lakes George and Bathurst.

Narriga (Monaro Tribe).

No. 13 District extends from Marlow and the confluence of the Molonglo River with the Murrumbidgee River to a line between the Pilot and Cape Howe, in which the electorates of Bega, Eden-Bombala, Monaro, Moruya, and the southern portions of Braidwood and Queanbeyan are combined. It includes the towns of Cooma, Braidwood, Queanbeyan, Milton, Moruya, Bombala, Bega, Eden, Delegate, Kiandra, Araluen, Nelligen, Wagonga, and Pambula.

Wambool (The Macquarie).

District No. 14 extends from Blackman's Crown to the Liverpool Range, and from Mount Terrell in the Liverpool Range to about 12 miles west of Trangie railway station, on the Great Western Railway Line. The following electorates are combined within the proposed boundaries:—Dubbo, Mudgee, Rylstone, and Wellington, including the towns of Mudgee, Wellington, Dubbo, Rylstone, Merriwa, Cassilis, Coolah, Stuart Town, Tambaroora, Hill End, Gulgong, Capertee, Cobborah, Narromine, Timbregongie, Ilford, Denison Town, Hargraves.

Moolabinda (Newcastle).

No. 15. This district extends from Newcastle to Port Stephens on the north, and to Tuggerah Beach Lake on the south, and to the Sugarloaf Range on the west. The following electorates are combined:—Newcastle East, Newcastle West, Kahibah, Wallsend, Waratah, Wickham, Gloucester (part), and Northumberland (part). The district includes the towns of Newcastle, Stockton, Raymond Terrace, Wickham, Lambton, New Lambton, Wallsend, Plattsburg, Merewether, Hamilton, Carrington, Adamstown, Awaba, Newport, Cockle Creek, Wyee, and Morrissett.

Wonnarua (Tribe in Hunter Valley).

District No. 16 extends from the east boundary of East Maitland to the Liverpool Range, and from the eastern watershed of the Paterson to the Great Dividing Range, combining the electorates of East Maitland, West Maitland, Durham, Singleton, and Robertson, and including the towns of East Maitland, West Maitland, Morpeth, Singleton, Dungog, Paterson, Clarence Town, Seaham, Aberdeen, Musclebrook, Murrurundi, Haydonton, Scone, Denman, Jerry's Plains, Broke, Lochinvar, Branxton, Minmi, Wollombi, and Ellalong.

Waananga

Waananga (Upper Murray).

District No. 17 extends from the Snowy Mountains and the mountains forming the eastern watershed of the Tumut River to about 20 miles west of Corowa, on the Murray River. It includes the electorates of The Hume, Tumut, Gundagai, Albury, and an eastern portion of The Murray, with the towns of Albury, Gundagai, Tumut, Cootamundra, Bethungra, Corowa, Mulwala, Howlong, Germanton, Tumberumba, Mangoplah, Walbundry, Gerogery, and Jugiong.

Mirrool (a Creek in the Electorate).

District No. 18 will include the electorates of The Murrumbidgee, Wagga Wagga, Young, and the southern portion of Grenfell. It will include the towns of Wagga Wagga, Narandera, Young, Temora, Grenfell, Wyalong, Ganmain, Coolamon, Junee, Goolagong.

Calarie (Lachlan River).

District No. 19 includes the electorates of Orange, Molong, Ashburnham, the northern part of Grenfell, and the greater portion of Condoulin. This will include the towns of Orange, Forbes, Parkes, Molong, Condoulin, Cudal, Manildra, Peak Hill, Bulgandramine, Spring Hill, Byng, Ophir, Obley, and Bexcourt.

Nymboida (One of Principal Heads of River Clarence).

District No. 20 extends from Port Stephens to the Clarence and its tributaries, and from the coast on the east to the edge of the table-land. The electorates included are:—The Clarence, Grafton, The Hastings and Macleay, The Manning, Raleigh, and the greater part of Gloucester, with the towns of Grafton, Maclean, Kempsey, Gladstone, Port Macquarie, Wingham, Taree, Tinonee, Stroud, Bullah Delah, Copeland, Fredericton, Trial Bay, Copmahurst, Newton Boyd, Buccarumbi, Dalmorton, Solferino, Iluka, Yamba, Coldstream, Woolgoolga, Nambucca, and Forster.

Callala (Peel River).

District No. 21 extends from the Liverpool Range to the Dumaresq River, and from the eastern side of the table-land of New England to the western boundary between the Land Districts of Warialda and Bingara and Inverell. It includes the electorates of Inverell (except that part within the Warialda Land District), Glen Innes, Armidale, Uralla-Walcha, Bingara (except that part within the Bingara Land District), Tamworth, and Quirindi (the Nundle portion only). It includes the towns of Armidale, Glen Innes, Inverell, Tamworth, Hillgrove, Emmaville, Tent Hill, Walcha, Nowendoc, Nundle, Dungowan, Bendemeer, Manilla, Barraba, Ashford, Wandsworth, Guyra, and Uralla.

Kamalari (Local Tribe).

District No. 22 extends from the boundary between the Warialda and Bingara and Inverell Land Districts to the Narran River, and from the Macintyre down to the Liverpool Range. It includes the electorates of Moree, Narrabri, The Barwon (part), Gunnedah, Inverell (part), Bingara (part), and Quirindi (part), and the towns of Narrabri, Moree, Gunnedah, Quirindi, Walgett, Coonabarabran, Collarendabri, Mungindi, Boggabilla, Breeza, Boggabri, Wee Waa, Bingara, Warialda, Cobbadah, Pallamallawa, Yetman.

Unara (Chief on the North Coast).

District No. 23 extends from the range dividing the waters of the Richmond from those of the Clarence to the Queensland Border, and from Beardy River to the coast, including the electorates of Ballina, Lismore, The Richmond, Tenterfield, and The Tweed, and the towns of Lismore, Tenterfield, Ballina, Woodburn, Tabulam, Drake, Coraki, Wardell, Tintenbar, Byron Bay, Mullumbimby, Cudgen, Maryland.

Warrego (Extensive Pastoral District).

District No. 24 extends from the eastern watershed of the Castlereagh River to the pastoral holdings along the western side of the Paroo River, and from the south boundary of the Land District of Cobar to the Queensland Border, including the electorates of Coonamble, Bourke, Cobar, part of The Barwon, and small portions of Condoulin and The Lachlan; and the towns of Bourke, Cobar, Coonamble, Brewarrina, Nyngan, Mount Drysdale, Canonbar, Girilambone, Warren, Nevertire, Nymagee, Tilpa, Louth, Wanaaring, Enngonia, Barrington, Goodooga, Angledool, and Berrywynia.

Wirradari (Big Local Tribe).

No. 25. This sparsely-populated area extends from the Murray about Mulwala and from a point on The Lachlan about 20 miles east of Cargellico to the South Australian Border, and from the south boundary of the Cobar Land District to the Murray River, combining the electorates of Wentworth, Deniliquin, Hay, the greater part of The Lachlan, and the western portion of The Murray. It includes the towns of Wentworth, Hay, Hillston, Deniliquin, Jerilderie, Berrigan, Tocumwal, Urana, Gunbar, One Tree, Carrathool, Tuppall, Mathoura, Moama, Moira, Moulamein, Wanganilla, Oxley, Booligal, Cargellico, Euabalong, Mossiel, Menindie, Pooncaira, and Euston.

Murkurilla (Sub-tribe in Western Division).

District No. 26 consists of a combination of the electorates of Wilcannia, Broken Hill, Alma, and Sturt, and includes the towns of Wilcannia, Broken Hill, Silverton, Purnamoota, Tibooburra, Milparinka, Torrowangee, White Cliffs, Thackaringa, and Euriowie.

1900.

NAMES FOR ELECTORATES, FEDERAL PARLIAMENT.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on 16th August, 1900, "to consider and report upon the names for the Electorates for the "House of Representatives in the Federal Parliament," and to whom was referred on 22nd August, 1900, "the paper 'Particulars showing Boundaries "of Proposed Federal Electorates of New South Wales,' together with three "maps,"—have agreed to the following Report:—

Your Committee having considered the subject referred, together with the correspondence relative thereto, have agreed to recommend, for adoption by your Honorable House, the names set forth in the Schedule hereunder:—

PROPOSED FEDERAL ELECTORATES OF NEW SOUTH WALES.

No. of District.	Names suggested by Federal Districts Commissioners.	Names recommended by the Select Committee.
1	<p>Wurrang (Sydney Cove)</p> <p>Will include Elizabeth Bay, Woolloomooloo Bay, Farm Cove, Sydney Cove, Dawes Point, Darling Harbour, and that part of Johnstone's Bay up to Blackwattle Cove, the divisional line running along Bayswater-road, William-street South, William-street, Park-street, George-street, George-street West, to a point where it is met by Bay-street and Newtown-road, thence by Bay-street to William Henry-street, and by William Henry-street to Darling-street, and by Darling-street and its prolongation to the waters of Port Jackson.</p>	Sydney.
2	<p>Toorawal (Dialect spoken south of Port Jackson) ...</p> <p>Is bounded by Barcom-street to Oxford-street, thence by Dowling-street to Cleveland-street, by Cleveland-street to Newtown-road, by Newtown-road to George-street West, thence by George-street, Park-street, William-street, and Bayswater-road to Barcom-street.</p> <p>The electorates will be:—In No. 1: The greater part of King Division, and Fitzroy, Gipps, Lang, Denison, and Pymont Divisions. In No. 2: The southern part of King Division, and Flinders, Phillip, Belmore, and Cook Divisions. In No. 1 Division also are included all the islands of Port Jackson and Lord Howe Island.</p>	Sydney-South.
3	<p>Maroubra (Chief of Tribe about Coogee)</p> <p>Is that which includes the electorates of Paddington, Woollahra, Waverley, Randwick, and an eastern portion of Botany, and is a coast district lying between Port Jackson and Botany Bay, of the suburbs adjacent to the city on its eastern side. The part of the Botany electorate included is the South Kensington Estate, at the back of the Randwick Racecourse, with the remaining portion of the Randwick Municipal District lying between the south boundary of Randwick and Botany Bay. This will constitute an area the interests of which are united by many ties.</p>	Maroubra.

No. of District.	Names suggested by Federal Districts Commissioners.	Names recommended by the Select Committee.
4	<p>Booralee (Name of District)</p> <p>It is proposed to unite the Parliamentary electorates of Darling-ton, Redfern, Waterloo, Botany (except the Kensington portion, &c.), and Newtown (Erskineville). Speaking generally, this district is bounded by Newtown-road and Cook's River-road to Barwon Park-road and Ricketty-street to Shea's Creek, Cook's River, and Botany Bay.</p>	Cook.
5	<p>Cronulla (Botany Beach)</p> <p>Includes the Parliamentary electorates of Newtown (Camper-down), Newtown (St. Peters), Marrickville, St. George, that part of the Canterbury electorate within the Canterbury municipal district, and the northern portion of the Woronora electorate, lying between Port Hacking and Botany Bay. In this is included a considerable portion of Newtown, Enmore, St. Peters, Tempe, Dulwich Hill, Canterbury, Arncliffe, Rockdale, Kogarah, Carlton, Hurstville, Penshurst, Oatley, Como, and Sutherland. This district is served by the Illawarra line.</p>	Botany.
6	<p>Cammara (Tribe on Shores of Port Jackson) ...</p> <p>Is bounded by Bay-street and the Parramatta-road to Long Cove Creek, and includes within its limits the electorates of Glebe, Annandale, Leichhardt, Balmain South, and Balmain North.</p>	Lang.
7	<p>Bullanaming (name of Petersham)</p> <p>Includes the Parliamentary electorates of Petersham, Ashfield, Burwood, Ryde (the Drummoyne portion), Granville (leaving out Merrylands and Guildford), and that part of Canterbury including Enfield, Strathfield, Homebush, Flemington, and south as far as the water-pipes. It includes, besides those places already mentioned, Kookwood, Auburn, Bankstown, Irishtown, Concord, Drummoyne, and Dobroyd.</p>	Wentworth.
8	<p>Kuringgai (Tribe between Port Jackson and the Hawkesbury)</p> <p>Includes the Parliamentary electorates of St. Leonards, Willoughby, Warringah, Ryde (less the Drummoyne portion), and the Gosford portion of the Northumberland electorate. It includes St. Leonards, Mosman, Manly, Neutral Bay, Willoughby, Chatswood, Lindfield, Gordon, Turramurra, Hornsby, Berowra, Cowan, Narrabeen, Middle Harbour, Field of Mars, Pennant Hills, Beecroft, Carlingford, Eastwood, Ryde, Hunter's Hill, Meadowbank, Ermington, Putney, Lane Cove River, Brooklyn, Woy Woy, Longueville, Greenwich, Kuringgai Chase, Gosford, Ourimbah, Kincumber, Tuggerah Beach Lake, Wyong, and Broken Bay. This district is served by the Northern railway.</p>	Kuringgai.
9	<p>Tomah (conspicuous Mountain in centre of Electorate)</p> <p>Includes the Parliamentary electorates of Parramatta, Granville (that part west of the Dog Trap Road), Sherbrooke, The Hawkesbury, The Nepean, Hartley, that part of Canterbury lying west of George's River and Prospect Creek immediately around Liverpool, and the St. Albans part of the Northumberland electorate. This will include Harris Park, Toongabbie, Seven Hills, Blacktown, Doonside, Mount Druitt, St. Marys, Glenbrook, Springwood, Lawson, Katoomba, Blackheath, Mount Victoria, Hartley Vale, Eskbank, Lithgow, Bowenfels, Wallerawang, Rydal, Jenolan Caves, Castlereagh, Richmond, Windsor, Pitt Town, Wilberforce, Kenthurst, Mulgrave, Baulkham Hills, Smithfield. All of these are served by the Western and the Hawkesbury River railway lines.</p>	Parkes.
10	<p>Cambewarra (Range in Southern part of Electorate) ...</p> <p>Will include the Parliamentary electorates of Camden, Woronora (that part south of Port Hacking), Illawarra, Kiama, Bowral, and The Shoalhaven. It will include Clifton, National Park, Campbelltown, Picton, Mittagong, Bowral, Moss Vale, Sutton Forest, Bundanoon, Wingello, Camden, Narellan, Cobbitty, Berry, Nowra, Jamberoo, and Gerringong.</p>	Illawarra.

No. of District.	Names suggested by Federal Districts Commissioners.	Names recommended by the Select Committee.
11	<p>Millemurra (Place on Macquarie River)</p> <p>Will include the Parliamentary electorates of Bathurst, Macquarie, West Macquarie (except the portion south of Burruga), and Cowra. It includes Bathurst, Blayney, Carcoar, Woodstock, Mount Macdonald, Lyndhurst, Sofala, Cowra, Rockley, and Oberon.</p>	Bathurst.
12	<p>Werriwa (Lake George)</p> <p>It is proposed to include the area which extends from Barber's Creek on the Southern line to Wallendbeen, and from Bungendore to Tuena inclusive, combining the electorates of Argyle, Boorowa, Goulburn, Yass, the southern (Tuena) portion of West Macquarie, the northern portion of Queanbeyan (north from Bungendore and the Molonglo River, including Lake George), and that part of Braidwood north of Larbert. This will include the towns of Goulburn, Marulan, Crookwell, Bungendore, Yass, Harden, Murrumburrah, Bowning, Gunning, Binalong, Boorowa, Wallendbeen, Collector, Tarago, Marlow, Wombat, Bookham, Goodradigbee, Bungonia, and Lakes George and Bathurst.</p>	Goulburn.
13	<p>Narriga (Monaro Tribe)</p> <p>Extends from Marlow and the confluence of the Molonglo River with the Murrumbidgee River to a line between the Pilot and Cape Howe, in which the electorates of Bega, Eden-Bombala, Manaro, Moruya, and the southern portions of Braidwood and Queanbeyan are combined. It includes the towns of Cooma, Braidwood, Queanbeyan, Milton, Moruya, Bombala, Bega, Eden, Delegate, Kiandra, Araluen, Nelligen, Wagongo, and Panbula.</p>	Monaro.
14	<p>Wambool (The Macquarie)</p> <p>Extends from Blackman's Crown to the Liverpool Range, and from Mount Terrell in the Liverpool Range to about 12 miles west of Trangie railway station, on the Great Western Railway Line. The following electorates are combined within the proposed boundaries:—Dubbo, Mudgee, Rylstone, and Wellington, including the towns of Mudgee, Wellington, Dubbo, Rylstone, Merriwa, Cassilis, Coolah, Stuart Town, Tamborora, Hill End, Gulgong, Capertee, Cobborah, Narramine, Timbregongie, Ilford, Denison Town, Hargraves.</p>	Robertson.
15	<p>Moolabinda (Newcastle)... ..</p> <p>Extends from Newcastle to Port Stephens on the north, and to Tuggerah Beach Lake on the south, and to the Sugarloaf Range on the west. The following electorates are combined:—Newcastle East, Newcastle West, Kahibah, Wallsend, Waratah, Wickham, Gloucester (part), and Northumberland (part). The district includes the towns of Newcastle, Stockton, Raymond Terrace, Wickham, Lambton, New Lambton, Wallsend, Plattsburg, Merewether, Hamilton, Carrington, Adamstown, Awaba, Newport, Cockle Creek, Wyee, and Morrissett.</p>	Newcastle.
16	<p>Wonnarua (Tribe in Hunter Valley)</p> <p>Extends from the east boundary of East Maitland to the Liverpool Range, and from the eastern watershed of the Paterson to the Great Dividing Range, combining the electorates of East Maitland, West Maitland, Durham, Singleton, and Robertson, and including the towns of East Maitland, West Maitland, Morpeth, Singleton, Dungog, Paterson, Clarence Town, Seaham, Aberdeen, Musclebrook, Murrurundi, Haydonton, Scone, Denman, Jerry's Plains, Broke, Lochinvar, Branxton, Minmi, Wollombi, and Ellalong.</p>	The Hunter.

No. of District.	Names suggested by Federal Districts Commissioners.	Names recommended by the Select Committee.
17	<p>Waananga (Upper Murray)</p> <p>Extends from the Snowy Mountains and the mountains forming the eastern water-shed of the Tumut River to about 20 miles west of Corrowa, on the Murray River. It includes the electorates of The Hume, Tumut, Gundagai, Albury, and an eastern portion of The Murray, with the towns of Albury, Gundagai, Tumut, Cootamundra, Bethungra, Corowa, Mulwala, Howlong, Germanton, Tumberumba, Mangoplah, Walbundry, Gerogery, and Jugiong.</p>	Hume.
18	<p>Mirrool (a Creek in the Electorate)</p> <p>Will include the electorates of The Murrumbidgee, Wagga Wagga, Young, and the southern portion of Grenfell. It will include the towns of Wagga Wagga, Narandera, Young, Temora, Grenfell, Wyalong, Ganmain, Coolamon, Junee, Goolagong.</p>	The Murrumbidgee.
19	<p>Callarie (Lachlan River)</p> <p>Includes the electorates of Orange, Molong, Ashburnham, the northern part of Grenfell, and the greater portion of Condoulin. This will include the towns of Orange, Forbes, Parkes, Molong, Condoulin, Cudal, Manildra, Peak Hill, Bulgandramine, Spring Hill, Byng, Ophir, Obley, and Bexcourt.</p>	Canobolas.
20	<p>Nymboida (One of the Principal Heads of River Clarence).</p> <p>Extends from Port Stephens to the Clarence and its tributaries, and from the coast on the east to the edge of the tableland. The electorates included are:—The Clarence, Grafton, The Hastings and Macleay, The Manning, Raleigh, and the greater part of Gloucester, with the towns of Grafton, Maclean, Kempsey, Gladstone, Port Macquarie, Wingham, Taree, Tinonee, Stroud, Bullah Delah, Copeland, Fredericton, Trial Bay, Copmanhurst, Newton Boyd, Buccarumbi, Dalmorton, Solferino, Iluka, Yamba, Coldstream, Woolgoolga, Nambucca, and Forster.</p>	The Clarence.
21	<p>Callala (Peel River)</p> <p>Extends from the Liverpool Range to the Dumaresq River, and from the eastern side of the tableland of New England to the western boundary between the Land Districts of Warialda and Bingara and Inverell. It includes the electorates of Inverell (except that part within the Warialda Land District), Glen Innes, Armidale, Uralla-Walcha, Bingara (except that part within the Bingara Land District), Tamworth, and Quirindi (the Nundle portion only). It includes the towns of Armidale, Glen Innes, Inverell, Tamworth, Hillgrove, Emmaville, Tent Hill, Walcha, Nowendoc, Nundle, Dungowan, Bendemeer, Manilla, Barraba, Ashford, Wandsworth, Guyra, and Uralla.</p>	New England.
22	<p>Kamilari (Local Tribe)</p> <p>Extends from the boundary between the Warialda and Bingara and Inverell Land Districts to the Narran River, and from the Macintyre down to the Liverpool Range. It includes the electorates of Moree, Narrabri, The Barwon (part), Gunnedah, Inverell (part), Bingara (part), and Quirindi (part), and the towns of Narrabri, Moree, Gunnedah, Quirindi, Walgett, Coonabarabran, Collarendabri, Mungindi, Bogga-billa, Breeza, Boggabri, Wee Waa, Bingara, Warialda, Cobbadah, Pallamallawa, Yetman.</p>	Liverpool Plains.

No. of District.	Names suggested by Federal Districts Commissioners.	Names recommended by the Select Committee.
23	<p>Unara (Chief on the North Coast)</p> <p>Extends from the range dividing the waters of the Richmond from those of the Clarence to the Queensland Border, and from Beardy River to the coast, including the electorates of Ballina, Lismore, The Richmond, Tenterfield, and The Tweed, and the towns of Lismore, Tenterfield, Ballina, Woodburn, Tabulam, Drake, Coraki, Wardell, Tintenbar, Byron Bay, Mullumbimby, Cudgen, Maryland.</p>	The Richmond.
24	<p>Warrego (Extensive Pastoral District)</p> <p>Extends from the eastern watershed of the Castlereagh River to the pastoral holdings along the western side of the Paroo River, and from the south boundary of the Land District of Cobar to the Queensland Border, including the electorates of Coonamble, Bourke, Cobar, part of The Barwon, and small portions of Condoulin and The Lachlan; and the towns of Bourke, Cobar, Coonamble, Brewarrina, Nyngan, Mount Drysdale, Canonbar, Girilambone, Warren, Nevertire, Nymagee, Tilpa, Louth, Wanaaring, Eangonia, Barrington, Goodooga, Angledool, and Berrywynia.</p>	The Darling.
25	<p>Wirradari (Big Local Tribe)</p> <p>This sparsely-populated area extends from the Murray about Mulwala and from a point on The Lachlan about 20 miles east of Cargellico to the South Australian Border, and from the south boundary of the Cobar Land District to the Murray River, combining the electorates of Wentworth, Deniliquin, Hay, the greater part of The Lachlan, and the western portion of The Murray. It includes the towns of Wentworth, Hay, Hillston, Deniliquin, Jerilderie, Berrigan, Tocumwal, Urana, Gunbar, One Tree, Carrathool, Tuppal, Mathoura, Moama, Moira, Moulamein, Wanganilla, Oxley, Booligal, Cargellico, Euabalong, Mossiel, Menindie, Pooncaira, and Euston.</p>	Riverina.
26	<p>Murkurilla (Sub-tribe in Western Division)</p> <p>Consists of a combination of the electorates of Wilcannia, Broken Hill, Alma, and Sturt, and includes the towns of Wilcannia, Broken Hill, Silverton, Purnamoota, Tibooburra, Milparinka, Torrowangee, White Cliffs, Thackaringa, and Euriowie.</p>	Broken Hill.

W. H. B. PIDDINGTON,

No. 1 Committee Room,

Chairman.

Legislative Assembly, 30th August, 1900.

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 22 AUGUST, 1900.

MEMBERS PRESENT :—

Mr. Ashton,		Mr. Kidd,
Mr. Lees,		Mr. Piddington.

Mr. Piddington called to the Chair.

Entry from Votes and Proceedings appointing the Committee read by the Clerk.
Committee deliberated.

[Adjourned till Wednesday next, at 2 o'clock.]

WEDNESDAY, 29 AUGUST, 1900.

MEMBERS PRESENT :—

Mr. Piddington in the Chair.		
Mr. Ashton,		Mr. Kidd,
Mr. Lees,		Mr. Richards.

Entry from Votes and Proceedings referring the paper "Particulars showing Boundaries of proposed Federal Electorates of New South Wales," together with three maps, to the Committee, read by the Clerk.

Paper and maps before the Committee.

Committee considered names of Electorates as submitted.

[Adjourned till To-morrow, at 3 o'clock.]

THURSDAY, 30 AUGUST, 1900.

MEMBERS PRESENT :—

Mr. Piddington in the Chair.		
Mr. Ashton,		Mr. Haynes,
Mr. Kidd,		Mr. Lees,
Mr. Richards.		

Committee further considered names for Electorates.

The Committee having agreed upon the names to be recommended for adoption by the House.

Chairman submitted Draft Report.

Same read and agreed to.

Chairman to report to the House.

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

EFFECTIVE VOTING FOR THE FEDERAL SENATE.

(REPORT OF THE DEPUTATION THAT WAITED ON THE CHIEF SECRETARY CONCERNING THE ADOPTION OF.)

*Printed under No. 6 Report from Printing Committee, 26 July, 1900.**[Laid upon the Table of this House in accordance with promise made in answer to Question No. 16, of 24 July, 1900.]*

Deputation received by the Chief Secretary (on behalf of the Prime Minister), 11th July, 1900.

MR. WILLIAM McMILLAN said: In the absence of Mr. Waddell, I take the liberty of introducing formally this deputation. It represents a new organisation, called "The Effective Voting Organisation," and it has been brought about to a large extent owing to the visit of Miss Spence to this Colony, and we think it is only right to do honor to her in this movement. Of course we want, in the first place, to obtain the sympathy and support of the Government in placing this matter before the Members of Parliament, and it is essentially a movement to deal with the mode of voting for the Senate in the coming federal elections, and, as the time is short, there is no opportunity of carrying on propaganda work throughout the country; we have to deal directly with Parliament if anything is to be done before the federal elections, and are therefore anxious to get the sympathy and support of the Government in a motion which I believe the Attorney-General will move. That motion will ask the House to refer this matter to a Select Committee for consideration, and that Committee will naturally call for experts and the presence of those enthusiastic in this movement. All we want is to propagate our views, and wish, if the question does ultimately go to practical politics, that Members of Parliament will thoroughly understand it. It would be useless to enter upon any technical exposition of the system, as a system we desire to get carried out in the federal election of senators, but think I can refer briefly to the underlying principles. Although we call ourselves by a great many names and shibboleths, still we all consider ourselves democrats, and the main purpose of this movement is to see that what we consider true democratic principles are carried out in the representative system of our Government. We do not believe that democracy means simply the representation of a bare majority of one party in the country; for instance, if in the country there are 300,000 votes, and four or five, or more sections of political creed, we do not believe that 160,000 of those voters should be able to send in all the Members of Parliament, to the exclusion and the political extinction of the 140,000, who have opinions which it is necessary the country should understand. In a proposal we have to make, we think there is a fair field for carrying out this true principle of democracy, and while the majority must rule, still every section of the community that numbers a quota of the electors, or of those who go to the poll, should have its representation; also the great principle that no man should throw away his vote. We know that in the case of a popular election, under the old system, say, such as that which was recently held, one very popular man might have twice the number of votes necessary to put him in, and of those who voted for him, a large number would throw away their votes. Take another example—referring again to the number of electors as 300,000, if taken for granted also, in order to make ourselves perfectly clear, that all those electors went to the poll, there are six senators to be returned; that represents a quota of 50,000 voters, and we hold that every section of the community that is capable of supporting its opinions by a quota of representation should be represented in the Federal Senate. You will see clearly that on the other system it is impossible to get at the real feeling of the people, or rather their opinions. I will take a case like this, which is a simple one: Supposing, in this federal election, instead of a man getting 53,000 or 54,000 votes, he gets 150,000; now, on our principle, 50,000 votes are sufficient to put him in, and the balance of votes are absolutely thrown away, whereas we hold that if those who were voting knew that

they could not get in their own men—some of those who got smaller votes—they would naturally prefer to “plump.” Now, there is no system we wish to introduce like plumping, consequently it is necessary to distribute and place the extra 100,000 votes under this system, and the only way is to take proportionally the No. 2 on the list. I should have said to you that in voting under this system each voter would number the candidates in the order of preference, one to six, so that in this case, where a man gets more than a quota, you take the first No. 2 votes, and ultimately the No. 3 votes would come in when the second man had got his quota. Now, you will agree with me—putting the thing simply—if there are 300,000 voters, and we will allow that there is one political creed represented by 160,000 voters only, and that you have two or three other political creeds represented by the other 140,000 voters, that on the purest principles of democracy these people should have proper representation. While this system secures the reasonable representation of minorities, it does not in any way affect the democratic principle of majority rule. I did not intend to go so minutely into it, as we are not here to explain to you all the elaboration of this system, but we do feel strongly that we have got a system which is absolutely scientific on those democratic principles I have laid down; we feel it is not like an ordinary political question which everyone can easily understand—it is a technical matter, and the first thing would be to convince a Committee of the House (who would be the centre of the propaganda afterwards) of the absolute scientific correctness of this principle or system. We realise that if there was the slightest doubt as to the mode of carrying it out, if in any way it could act unfairly in its results, it would be rejected at once by the people of this country; but we want to see first that the Members of Parliament understand it; secondly, that it could be put into the concrete form of a Bill, and if carried out in these federal elections, there could be no mistake with regard to the fairness of the result. One word more. These federal elections apply, as far as I referred to them, to the appointment of six senators for this Colony. Those six senators, although in one sense members of a House under a bi-cameral system, are the representatives of State rights, and it has become a matter of importance to us, to the Federal Parliament, to the State Parliament, and to the State *qua* State, this election of the six who are to represent New South Wales as an entity in the federation should not result in sending men haphazard as under the present system. As you know, the representative of a minority is often returned; but we should send six men who would be absolutely a mirror of the public opinion of this country, not necessarily overriding the principle of majority rule, but representing in the aggregate the various political creeds and sections that make up the public of New South Wales. It is not easy to explain a matter of this kind, but I have explained it sufficiently, I think, to show you the great importance of the subject, and would ask your Government to give every assistance, at any rate, to the appointment of this Select Committee.

Mr. J. MEDWAY DAY: The object of our deputation, as Mr. McMillan has indicated, is to endeavour to get the Hare system of voting applied to the elections for the Federal Senate. Our organisation will not stop there; but there is a special opportunity now for getting this done, and if the system should be applied to the Federal Senate, it will afford a good object lesson; if it turns out a success (as I have no doubt it will), we ought to secure it for the local elections. In asking you to take the course suggested by Mr. McMillan, we are asking you to follow a notable precedent. In 1862 a motion was moved in the Legislative Council of New South Wales to provide that the Council be elective in future, and that the members should be elected by the whole Colony on the Hare system. On the motion of Mr. Wentworth that was referred to a Select Committee, which reported on it, and in August the second reading was carried by eleven to four. The Bill was passed by the Assembly by twenty-four to twenty; then one of those incidents occurred, which are likely to occur in the best regulated families—the Ministry had to resign. The Bill was dropped, and nothing more was heard of it. New South Wales was the first Colony to agree to the Hare system, which was not more than three years old, and it would be certainly very creditable to us as a Colony if we were the first to bring it into actual practice in connection with the Senate election. In proposing that this be applied to the Senate election, we are not asking for any material change, nor for anything that will involve a vast amount of trouble. The Commonwealth Act provides that the Senate be elected by the whole Colony as one constituency, consequently the rolls as at present will do. The ballot-papers may be made out in precisely the same way; the only thing is that the electors will have to fill them up in a somewhat different fashion; whatever additional labour there is, will certainly devolve upon the Chief Returning Officer. We are not asking for as much to be done in connection with the Senate elections as will be done in preparing for the elections for the House of Representatives. There is certainly, as Mr. McMillan has ably pointed out, a special reason why, in the election for the Senate, public opinion should have perfect freedom of expression. To put the matter in a nutshell, the Hare system allows the electors to group themselves. Suppose there are 180,000 electors voting, and six members to be returned, although they may live many miles apart, the electors have an opportunity of grouping themselves together, and arranging as to the members whom they wish should represent them. There was a time, the date of which it has been impossible to fix, when none were for party but all for the State. With respect to this Senate election, which is a new departure, it is important we should be able to say “None for the party, all for the State,” whatever may be the difference of our opinions. Those elected should be entitled to say,—we are fairly and honestly the representatives of the State of New South Wales.

Mr. WADDELL: I might point out one or two things. Under our present system the great trouble is that only the majority of the people are practically represented in the Parliament; what we want, in bringing about this change, is to make Parliament a true reflex of the people of Australia. We want, when it assembles, to feel that every party of any numerical importance will be fairly represented in the Federal Parliament; under our present system that is impossible, and I would like to point out to you what seems to me a strong reason for some action being taken. Under our present system, not only may a large and important section of the people be not represented on an important issue, but misrepresented. Suppose the issue be Free-trade and Protection—to use an old illustration—and in a certain electorate two men offer themselves; they cannot both be elected, the Free-trader, we will say, gets 1,100 votes and the Protectionist 1,000; in that case the Protectionists are not only not represented, but are misrepresented.

Mr. SEE: How are you going to get over that?

Mr. WADDELL: By having it as we wish, by having, say, five electorates grouped together, and having the system we seek, embodied in Statute Law and brought into effect, and there will be a chance for all sections to be represented. There is another point on which objection has been raised: That it will be difficult to define it in Statute Law so that there will be no trickery; that would leave no room for doubt

doubt in the counting of the votes. We have an instance of where this has been done in connection with the towns of Hobart and Launceston; their system has been embodied in Law, and the elections carried out under it, and there was no doubt whatever in the minds of the people that the counting had been correctly carried out, and worked with every satisfaction.

Mr. SEE: They got a rude shock in one case, Captain.

Mr. WADDELL: The fact that the Tasmanian Parliament have been able to embody it in Statute Law shows that we can do it, and with as much satisfaction. We are not asking your Government to undertake any difficult problem that has not been undertaken by a Parliament before. We hope your Government will see good reason for granting our request; it is an experiment that is of great importance to the whole civilised world that is under representative government.

Mr. BRUCE SMITH: I take it that the object of this deputation is not so much to convince you personally of the merits of this modern scheme of election, but to gain the sympathy of the Government when this question comes before the House. I have not had the pleasure and benefit of hearing Mr. McMillan, but understood that Mr. Wise had intimated his intention of submitting a resolution in his capacity of private member, and take it that the object is to enlist your sympathy as a member of the Government, and induce the Government, to take it up as a Government matter; not promising immediately to introduce a Bill, but to interest yourselves in the resolution, which will be the means of appointing a Committee, the report of which the Government can act upon, or not. I take it you have had an opportunity of seeing for yourself how much more completely the system advocated reflects the feeling of the public than the very crude method hitherto carried out, and I take it that the whole object of representative government is that every shade of political opinion should be represented in any representative body; and it has occurred to me that what we seek to do is to produce what photographers call a "reduction." We cannot put a million and a quarter into the Assembly or Senate, but want to put it there in spirit; we do not want a representation of the people with some feelings left out; and the crudity of the present system leaves a great many unrepresented. Miss Spence and Mrs. Young have gone round most of the suburbs and have educated the people up to this point; that is, as far as the method is concerned. Until they were addressed by Miss Spence, their minds were in a chaotic condition. They were able to see that the complicated nature of the method need not in any way affect the voters themselves. When once the voters are convinced that with honest returning officers and honest scrutineers, all the voter has to do is to order the rotation of preference which he wishes to express for the candidates before him, and his work is done, and whatever complications there are in the system must come afterwards on the persons of a competent returning officer and scrutineers for both sides, who will take care that justice is done to all the candidates. No less a thinker than John Stuart Mill over forty years ago characterised the Hare system as the most perfect that had yet been conceived, and I was reminded of that the other day in reading the account of a deputation which waited on Mr. Holder, the Premier of South Australia, in which Miss Spence, Mrs. Young, and a great number of Members of both Houses of Parliament, asked Mr. Holder to consider whether his Government could not apply this system to their Senate elections, and his reply was this: "I have watched the Tasmanian experiment; I do not know much about it." It was clear he had not taken much trouble to study it closely. He said that he considered the whole question to be in the experimental stage, and beyond helping to apply it to some municipal elections, would not take the responsibility of applying it to Senate elections. He was a little wanting in not making himself better acquainted with the result of this method as applied in Tasmania. There is a very able essay published by Professor Jethro Brown on "Democracy," and in the opinion of that gentleman of keen intellect the Tasmanian election was a great success. He admitted that the people had a shock, as you say, but we have had many such shocks under the existing system, and the fact that men are elected to bodies which some of us would prefer should not be elected does not touch the question; the point is, when you have the House elected, does it more perfectly represent the opinions of the people outside than under the crude system we have to-day? We are living in days when Governments like to consider whether the introduction of a question is safe or not, and I am sorry to say our own Colony is not very free from it; but would point out that no Government would take up with greater safety a question of modern movement than this which is now put before you, because you have on the one side the theoretical opinion of one of the greatest thinkers of our century, John Stuart Mill, and the practical approval of the people of Tasmania, because you have not heard one authoritative complaint about the adoption of the system: there has been no charge of improper conduct on the part of the officers who had to carry out the complicated part of the method, nor has there been anything beyond that vague cry which we have after every election from those who have not been successful in returning their men. It gives effect to the opinions of some of the minorities now shut out, and, by electing for a large constituency, gets rid of anomalies which must exist where the number of candidates enable the minority to be represented. You are asked to get the sympathy of the Government for the appointment of a Committee of intelligent men to inquire into this system in an unbiassed way, and report to the House on the conclusions they draw. In doing this you will be adding one more to the many courageous things which the Government of which you are a member have done.

Mr. HOLMAN: You do not require very much more, but would like, with your permission, to present one more aspect. The object is to ask you to eventually obtain this method for the Senate elections; the question as to how it could be applied to Parliamentary elections may arise afterwards, but we do not wish to raise that now.

Mr. SEE: Could you not take the House of Representatives?

Mr. McMILLAN: The Constitution declares the exact way in which the House of Representatives shall be elected; Mr. Bruce Smith, as well as a number of people, look upon it as an experiment, and it would be better to try it on the Senate first.

Mr. HOLMAN: The point is,—we will take the same figures that Mr. McMillan used—assuming that 300,000 people vote, and assuming that they are divided in this way, 140,000 Protectionists, 100,000 Freetraders, 60,000 Labour men; that would be a possible division. Now, you see, we have the choice of two methods of electing the senators—Block, or Hare-Spence. The Colony must not be cut into constituencies; if we apply the block system, what would be the result—either there will be a fusion of parties, or each party will run its six candidates. The Protectionists would get ranging from 140,000 to 120,000 votes; the Freetraders would get from 100,000 to 80,000 votes; and in same manner the votes for the Labour men would be from 60,000 to 50,000; the result then would be that the six Protectionists would

would be elected, in spite of the fact that fully one-half of the entire Colony would not be represented by these Protectionists at all. I put that to you, that 160,000 voters—Freetraders and Labour men—would be entirely unrepresented in the Senate, and the senators would not represent the entire Colony, but merely the dominant section; and so far from this being an imaginary result, Miss Spence quoted the result of an election in Brussels, where 8,000 voters put in sixteen representatives, and 11,000 were unrepresented.

Mr. SEE: But supposing the 11,000 had combined, what would they do?

Mr. HOLMAN: Then the 8,000 would be unrepresented. This system moves automatically, there need be no preparation nor grouping, the thing does itself, and does it in this way: A quota is determined; taking the figures I gave, 300,000, you get a quota by dividing this by the number of seats, six, giving 50,000; every party which can show 50,000 supporters, or voters, is entitled to a representative; that has twice that number, two; and three times, three, and so on. With the figures given, the Protectionist party would return, say, three members, the Free-trade party two, and the Labour party, instead of being hopelessly out of it, as it would be under the block system, would return one representative; and I venture to say that the return of one representative, not obtained by bunching, intrigue, or trickery, but as a matter of right by the natural operation of the system, would be of the utmost value to any struggling organisation seeking to bring its views before the judgment and verdict of the country. I say this, as a member of a struggling minority. Take your own case, the member of a party which is believed to be the dominant one; is it not likely that by a fusion they may be annihilated at the polls. I submit to you that this is a state of things particularly to be avoided by us now that we are forming a Senate. Supposing that the Labour party were eliminated, leaving two parties in Federal matters, by the block vote one of these parties could get the whole six candidates in, and the other party be unrepresented. From the study of American politics, we know the diabolical trickery and degradation of political life, and the undesirable elements, when the election turns upon the running of a certain number of members, and obtaining a block vote for them. There is another aspect of the case: Supposing, again, there are only two parties at one election; 160,000 people vote for the Protectionist bunch of six, and they are returned as senators for New South Wales, 140,000 being entirely disfranchised; supposing 10,001 people go over, the mere transfer of a number like this to the other side diametrically alters the whole policy under the block system. These people are disfranchised owing to a little party that may be won by a glass of beer or by the last speech from the stump, and have determined the election of the whole six senators. Under the system we advocate, the minority would be entitled to return two members. No solid body can be disfranchised where each voter forms part of a quota. This seems to show that any consideration or analysis of the block vote condemns it. I was a great opponent of the Commonwealth Bill on account of the block vote for the Senate. The Government are not wanting in courage, and here is something that is in operation in Brussels and in Tasmania. I was in Hobart just a few weeks prior to the election, but was unable to wait to see it; I was in political circles, and learned a good deal of its operations; I read of the last election under the Hare-Spence system, and though there were a number of informal votes, this was due to the fact that the Government had foolishly laid it down that any name struck off would make a vote informal; but as to misunderstanding the system, the number of papers informal through this was a bagatelle. The operation was carried out by the Government Statistician with absolute satisfaction to all, including the defeated candidates. With respect to Captain Miles, there were allegations against him; but if the people like to choose a man, the blame rests with the people, not with the system. The only criticism on the system, of any note, is that of who criticises it not in comparison with the block vote, but in comparison with the single electorates. We want to put before you that this is the only system that will secure in the Senate true representation of any given Colony when we depart from single electorates, and we so depart under the terms of the Constitution; we submit there is nothing in the way this system is in operation, and is supported by almost every scientific writer on politics. It was practically adopted by the Legislature of New South Wales many years ago, and this is a case where a thing should be tried and adopted by the Parliament, in order, if possible, to afford to the many of us, who looked upon the block vote for the Senate as one of the most serious defects of the Federal Bill, an opportunity of seeing that removed, and that all sides can conjoin in asking for the method which proposes to give justice to every section of the community.

Mr. SPENCE: The agitation for the right for every male adult to vote went on for a long time, and the right for every adult to vote is now near fruition. There are still requests being made, so that a man may have the right to vote wherever he may be on the polling-day. There is also provision, as we know, to safeguard any elector from any coercive influence to vote in any way against his convictions. It is made clear here to-day that men, under the present system, are coerced into voting in a way they did not wish, and in any system that allows that we fail to realise the dream of democracy, and we are trying to make it perfect. We know that there are various means of coercing people. We want the solid opinion that the voter holds.

Mr. SEE: You will never get it.

Mr. SPENCE: We want, as nearly as possible, to get it. We do not want anything like the American system of machine-made politics—they do not respect their legislators there. Each vote should have its full value; under the block system it gets no one returned except someone against it.

Mr. MEDWAY DAY: I would like to call your attention to two points which may create a wrong impression. It was said "with honest returning officers." We are not going to reflect on returning officers; they are honest.

A MEMBER: Until found out.

Mr. MEDWAY DAY: We claim our system as the safest, even in the event of an officer being inclined to be otherwise. In the case quoted by Mr. Holman, 8,000 of a solid party returned sixteen members; some months subsequently there was an election for the Senate, and the others returned the whole eight members to the other House: could there be a greater anomaly than that? What progress and result is possible under a system of that kind? We point to that as a glaring illustration of the absolute failure of the block vote in large constituencies. The other point: Would this system have any application to single electorates? I say it would, in the event of a three-cornered or a four- or five-cornered election. Under this system, the man desired by the greatest number would be returned. Look at the Narrabri election, where two Protectionists would insist on standing; the second vote would have brought out a different result, but the application would not be of very great value in constituencies returning less than five members. The larger the constituency, the better every party can get a spokesman in.

Mr.

Mr. R. D. MEAGHER: From what I can judge, you seem to be considerably wedded to the present system of representation. I would like to call your attention to the fact that certain figures have been called for by your Attorney-General, and they show this astounding fact: That under our present mode of representation in New South Wales, 21 per cent. of the members sitting in our present House of Assembly represent minorities. That large percentage is one, I think, which will give you food for reflection. We had an illustration of this Colony voting as a whole at the referendum some two years back; there was an important party, the Labour party, who were unable to return one single member to the Convention, large as they were, important as they are, and magnificent as their organisation is. I believe their Leagues are better organised than either of the other parties, but even in the Convention that sat to draw our Constitutional Bill, seeing the proportion of Labour supporters, there was only one out of the fifty, Mr. Trenwith, who got there by Mr. Syme, of the *Age*. Had he not been included in the *Age* "Ten," I do not think he would have been elected. I feel satisfied myself that not one of that Labour party feels that if that Federal election for ten men to represent New South Wales had been conducted on the Hare-Spence system, the Labour party would not have had representation. Mr. Spence has pointed out that not only is "One man one vote" a matter we prize, but its natural corollary must come, "One vote of one value." If six senators are returned, and 160,000 votes can bunch and do it, you have these particular people whose votes represent six values, and the other votes are absolutely valueless. We are making no extravagant demand in asking that the Government will allow this to go to a Committee of the House. I admit there may be a blemish in this system; there is nothing perfect. But I say the blemishes are infinitesimal compared with our present system.

Mr. BRUCE SMITH said that the 29th and 31st Clauses of the Commonwealth Act provided that the Colony be cut into divisions for the election of the members of the House of Representatives, and that the election be conducted as nearly as possible on the existing method of election, but the election of senators is left entirely in the hands of the Parliament, and is to be conducted in such manner as the Parliament may decide.

Mr. SEE: I only knew this morning at 10 o'clock that I would be called upon; the Honorable the Premier is unable to come to town this morning in consequence of a rather bad attack of illness. It appears to me, and I am speaking now only for myself, and have an open mind on the subject, that I should like to know more about it. I have been informed considerably to-day upon the side of the question which you believe in. I am not prepared to say that I am going to subscribe to it, but the request seems to be a reasonable one, and I will bring it under the notice of my colleagues. There should be a Select Committee to inquire into the system which you so sincerely believe in, and if it can be proved to the satisfaction of the Members of the House that it would be a good thing for the election of the members of the Senate, there is no reason it should not be done. I do not for one moment believe it is to cure all the evils, and it will not get rid of the election by majority. It may reduce the majority from six to four, but it will be there, and you can only carry on the business by majority. If you would have 60,000 men having a vote as effective as 100,000, it would not be justice to the 100,000. You have minority representation now, and I sat on the minority side of the House for many years. I will admit that this is an excellent theoretical idea; I know that in some cases where there are two bitter opponents, say a Freetrader and a Protectionist, where the system of counting up the next man, and the next were followed, the pronounced Freetrader or Protectionist would vote against the man on the other side who had the most likelihood of being elected. I do not wish to go into details, but the speeches you have made have impressed me, and the information afforded me will be of great advantage. I am at all times willing to hear both sides, and my vote will be given in the direction of allowing this to be thoroughly investigated. We are moving on, and are making experiments every day, and in the majority of cases they are right; they may be crude at first, but we become accustomed to them. This new system would be no doubt more complicated than the one at present in use; but I do not want to insult the intelligence of the general bulk of electors by saying they are not qualified to exercise the vote. Some there were who thought it doubtful whether the Elector's Right system should be introduced, but since its introduction there have been less informal votes. The people soon learn to understand the right thing to do; they may make a mistake, but the great many will not. I do not care to discuss this question in anticipation of a larger inquiry, which will be brought about as the result of this deputation; Mr. Wise has expressed his intention to bring forward such a report, as a private Member. Upon the report every Member of the House would have the power of expressing his vote, and if the majority of the Members thought it a desirable thing for the country that the Senate be elected by the system, whether we are in favour of it or against, we must submit to it. I could vote for the appointment of the Committee without voting for the finding of the Committee, and we are safeguarded as long as we have the last say. My other duties have prevented me from following this subject; unfortunately I did not hear Miss Spence, but I read portions of her addresses. The information afforded me to-day has widened my knowledge of the subject, and I will not hinder the inquiry you seek, as I think that the best method of settling what you advocate. We, like every sensible section of the community, must agree to the will of the majority. We are all delighted to realise that the Federal Bill has been assented to by the Queen. This is the first deputation, since the acceptance of the measure, that has brought under the notice of a Minister something in connection with this great Constitution. We are glad we have arrived at that stage when Australia will have a larger and wider scope, that we may make it wider in its workings, and carry out the great objects that Constitution has in view.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

NAMES FOR ELECTORATES, FEDERAL
PARLIAMENT.

(PETITION FROM CERTAIN RESIDENTS OF PARKES AND BOGAN GATE IN FAVOUR OF ONE OF THE
FEDERAL ELECTORATES BEING NAMED AFTER THE LATE SIR HENRY PARKES.)

Received by the Legislative Assembly, 26 September, 1900.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales in
Parliament assembled.

The humble Petition of the Residents of Parkes and its vicinity,—

SHOWETH :—

1st. That, in the opinion of your Petitioners, one Federal electorate in this Colony should perpetuate the name of the deceased statesman to whose patriotic labours the early union of the Australian Colonies under one grand Commonwealth is largely due.

2nd. That the electorate proposed to be named "Calare," or "Canoblas," should therefore be called "Parkes."

3rd. That this town is situated almost in the centre of the proposed electorate, and, to prevent confusion of locality, should have the preference to any other electorate.

4th. That, as a further reason, your Petitioners would urge the fact that the late Sir Henry Parkes was much gratified at the compliment of this town having been called after him, which he testified to by numerous visits, by valuable presents to the townspeople, and by evincing a particular interest in the welfare of its inhabitants; and they believe that, could the decision have been left to him, it would have been in harmony with our present request.

And your Petitioners pray that their request may be taken into consideration in fixing the names of the electorates.

And your Petitioners will ever pray.

[Here follow 402 signatures.]

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

NAMES FOR ELECTORATES, FEDERAL
PARLIAMENT.

(PETITION FROM CERTAIN RESIDENTS AND ELECTORS OF THE TOWN AND DISTRICT OF FORBES
IN FAVOUR OF THE NAME OF "CALARE.")

Received by the Legislative Assembly, 18 October, 1900.

The Petition of the Residents and Electors of the Town and District of Forbes,—

To the Honorable the Premier and Parliament of New South Wales,—

RESPECTFULLY SHOWETH :—

That your Petitioners learn that attempts are being made to substitute the name "Calare"—the name given to this electorate by the Commission appointed to name the Federal Electorates of this Colony—with the names of "Parkes" and "Canoblas."

Against any such change your Petitioners beg respectfully, but strongly, to protest, for the following reasons :—(1) To name the electorate "Parkes," when there is a town similarly named within its boundaries, would lead to endless complications ; (2) the name "Canoblas" is equally unsuitable, as it only represents an insignificant mountain range at an extreme corner of the electorate.

The name "Calare" is the aboriginal appellation for the Lachlan River, which river runs from almost one end to the other of the electorate, and we believe that its adoption, if finally decided on by Parliament, would give entire satisfaction to a vast majority of the electors and residents.

For these and other reasons we respectfully ask that the name "Calare" may be retained, and your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 365 signatures.]

NEW SOUTH WALES.

PUBLIC SERVICE LIST.

1900.

Being a List of the Officers employed, at 30th June, 1900, by the Government of New South Wales, under the provisions of the "Public Service Act of 1895."

NOTE.

THE Public Service Board desire to state, for general information, that the plan adopted in preparing this list is to place the officers in the various divisions in order of salary, and, where there is more than one officer at the same salary, then to place the officers in alphabetical order of their names. It is therefore in no sense a "Seniority List."

In the Special, Educational, and General Divisions grades are not specified. The upper and lower grades of the Professional Division are divided into sections, as under :—

Higher Grades—

Salaries of £550 and upwards	A1
„ £400 and under £550	A2
„ £300 „ £400	A3

Lower Grades—

Salaries of £225 and under £300	B1
„ £150 „ £225	B2
„ £75 „ £150	B3
Salaries under £75	B4

The Grades of officers in the Clerical Division are as follows :—

Higher Grades—

Salaries of £500 and upwards	A1
„ £400 and under £500	A2
„ £300 „ £400	A3

Lower Grades.—

Salaries of £291 to £299	a1
„ £281 to £290	a2
„ £271 to £280	a3
„ £261 to £270	a4
„ £251 to £260	a5
„ £241 to £250	b1
„ £231 to £240	b2
„ £221 to £230	b3
„ £211 to £220	b4
„ £201 to £210	b5
„ £191 to £200	c1
„ £181 to £190	c2
„ £171 to £180	c3
„ £161 to £170	c4
„ £151 to £160	c5
„ £141 to £150	d1
„ £126 to £140	d2
„ £111 to £125	d3
„ £96 to £110	d4
„ £81 to £95	d5
„ £65 to £80	d6
„ £50 to £64	d7

In a few cases the Board have, for special reasons, placed officers in higher grades than their salaries actually warrant.

NAVIGATION.

Note.—The Department of Navigation was formed prior to the 30th June, 1900, but inasmuch as the officers had not been graded by the Public Service Board on that date, they are not included in this list. They will appear in a special *Gazette* which will be issued as soon as the grading is completed.
