REPORT

OF THE

PUBLIC SERVICE BOARD

APPOINTED UNDER THE PROVISIONS OF THE

PUBLIC SERVICE ACT OF 1895.

Printed under No. 2 Report from Printing Committee, 28 June, 1900.

SYDNEY: WILLIAM APPELGATE GULLICK, GOVERNMENT PRINTER.

1900.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC SERVICE BOARD.
(FOURTH ANNUAL REPORT.)

Printed under No. 2 Report from Printing Committee, 28 June, 1900.

To His Excellency the Right Honorable WILLIAM, EARL BEAUCHAMP,
Knight Commander of the Most Distinguished Order of Saint Michael
and Saint George, Governor and Commander-in-Chief of the Colony of
New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

We, the Public Service Board, appointed under the terms of the Public Service Act of 1895, have the honor, in accordance with the provisions of Section 18 of the said Act, to present you with this our Fourth Annual Report.

Towards the close of the period which we have now under review a change took place in the personnel of the Board. Mr. T. A. Coghlan was granted leave of absence on the 21st November last, and Mr. W. Houston, Under Secretary for Lands, was appointed Deputy Member, he having on a previous occasion occupied that position, and being therefore familiar with the duties of the office.

It is outside the province of the Board to allude to the circumstances which led to this re-arrangement—they merely state the fact, and take the opportunity thus afforded them of expressing their sense of the obligations under which they lie to Mr. Coghlan for his loyal co-operation and assistance.

The Board may perhaps be permitted to express their satisfaction that the Legislature has seen fit to pass the Public Service (Superannuation) Act of 1899, by which many ex-Civil Servants, who were debarred by the terms of the Civil Service Act of 1884 and the Public Service Act of 1895 from obtaining a pension, have now acquired that right. By this means cases of hardship which were caused by the operation of the Public Service Act of 1895 have been relieved. The effect of the measure on the Superannuation Account is dealt with under its appropriate heading in a later portion of this Report. Appendix I* shows the names of the persons * Page 33. affected and the pensions to which they are respectively entitled.

The year which has passed has been one in which the administration of the Act has been subjected to the most crucial examination; and the Board feel that, notwithstanding many adverse criticisms, they have not forfeited the confidence

confidence of either Parliament or the public. The work they have been engaged upon has been of the most exacting character, and in its execution it was impossible not to have aroused the hostility of many who thought themselves injured or aggrieved by their action.

Most, if not all, of the strictures passed have arisen out of an imperfect acquaintance with the facts. The policy of the Board has been to allow time and fuller knowledge to correct these misapprehensions. They felt that to have entered into controversies on such subjects would have led them far away from the discharge of their proper duties, and they had perfect confidence that in the end justice would be done them; in which they have not been disappointed. Before passing to other matters they desire to express to the Honorable the Attorney-General their acknowledgment of the courteous way in which he has treated their recommendations, and also of the ready assistance he has always been willing to afford them.

GRADING AND APPEALS.

In their last Report the Board drew attention to the fact that they had been unable, for reasons therein advanced, to grade the Land and Income Tax Department. The disabilities then existing still continue, but the Board, after conference with the First Commissioner, have from time to time revised those salaries which seemed to call for such treatment, so that no real hardship has resulted. They have on several occasions carefully inspected this Department, and are pleased to be able to report that on the whole it is served by a very efficient staff.

Reference was also made in that Report, to the grading of the Professional Staff of the various Departments. Since that was written, the Board have revised the salaries of the officers composing that staff, and they are now engaged in hearing appeals against the grading; but before touching further on the subject they would like to refer to some complaints which have been made in Parliament as to their alleged neglect in not determining the earlier appeals. These complaints are altogether based on an imperfect knowledge of the case. Although it was impossible, in anything like reasonable time, to personally interview all the 2,789 officers who appealed against reductions in their salaries, the Board did so in the cases of as many officers as chose to wait upon them.

It must be admitted that the reductions shown in that grading were severe, but not nearly so drastic as those which the majority of those outside the Service had to suffer in the matter of their incomes. The Civil Service is to a large extent a body by itself, separated from the rest of the community in its ideas and aspirations, and hence, as was only to be expected, many of its members had a difficulty in appreciating the altered economic conditions which affected most of their fellow citizens.

Under these circumstances their appeals were natural, and can be readily understood; the question as to the value of their services as compared with that placed upon similar work in private employ, did not apparently present itself to their minds.

The Board are aware that even now the rank and file of the Service are paid at a higher rate than persons in private employ, but they believe that it is in the interest of the country that the State Service, which, under the new system, can only be entered by the door of a strict competitive examination, should offer the greater attractions.

Taking all these circumstances into account, the Board, with the aid of the Departments, revised the first grading, and published the results in the *Gazette*, as shown on the next page. Subsequently they prepared the Increment Regulations for officers in the lower grade of the Clerical Division, and also revised the salaries of professional officers, and are now engaged in a further revision; the Estimates have also been reviewed every year in connection with salaries over £300. It must be admitted, however, that the striking out of all increases over £400 has embarrassed the work of the Board, and shut out many valuable officers from receiving well-earned increases. This subject is referred to at length on page 19.

The

The following statement shows the time occupied in dealing with appeals of Officers against the first grading.

Department.	Date of Grading, as notified in <i>Gazette</i> .	Date when Appeals were finally dealt with as notified by <i>Gazette</i> showing results of Appeals.

NOTE.—In accordance with the Act, Officers were allowed thirty days from the date of the publication of the grading to appeal.

In dealing with the subject of appeals generally, reference may be made to an objection which has been raised to the provisions of Section 15 of the Public Service Act, which enacts that all appeals against the Board's grading shall be made to the Board, whose decision shall be final. It has been urged that this is simply appealing from Cæsar to Cæsar; in other words, that the appellants can hardly expect a favourable rehearing, because the Board, it is suggested, would naturally be interested, at any rate unconsciously, in upholding their first decision. That this is a misconception of the facts of the case is easily made apparent, by detailing the mode of procedure adopted in the appeals against the grading of the Professional Staff, referred to in the earlier part of this Report. When taking this work in hand, the Board felt it was impossible for them to see every officer, much less to examine his work minutely. They therefore, after conference with the Under Secretaries and Heads of Departments, appointed a Sub-Committee, composed of some of the ablest officers in the Service, to visit each office and collect such information as would assist the Board in coming to a decision. On the receipt of the report of this Committee, a copy of it was sent to each of the Under Secretaries whose Department was affected, with a request that he would give the Board the benefit of his advice. When this was obtained the Board had further conference with the Committee, and with others who could give them valuable information, such as the Engineer-in-Chief for Public Works, the Engineer-in-Chief for Railway Construction, the Government Architect and the Chief Surveyor. The Board then, with the aid of the advice thus obtained, coupled with their own knowledge of the Service, obtained in many cases by previous personal inspection, carefully revised the information supplied by the Sub-Committee; and finally, after again consulting the Under Secretaries, issued the provisional grading referred to—with which it may be mentioned the Under Secretary in each Department in every instance concurred—and invited appeals from any officers who might think themselves aggrieved by such grading.

In due course the appeals were received, and the appellants were invited to appear in person before the Board; their statements were taken down by means of shorthand-writers; their work was carefully examined and compared with work of a similar kind performed by other officers; the Heads and Sub-heads of the Departments in which they were employed were also examined as to the statements made, and finally the Under Secretaries were again consulted in the light of the further information thus obtained, and, as a result, a considerable number of appeals were sustained, both in regard to salary and grading.

The Board are confident that any impartial critic, after reading the explanation given, will come to the conclusion that the most careful and unbiassed consideration is given to this important part of their work.

CHANGES IN DEPARTMENTAL ARRANGEMENTS.

Since the date of the last Report of the Board the following changes in Departmental arrangements have taken place:—The Chief Inspector of Public Accounts and his staff have been re-transferred to the Treasury. On the advice of the Board, the staff was in 1897 transferred from the Treasury to the Audit Office; for it appeared to them that the very important principle of having an independent check on all Government Accounts, both Revenue and Expenditure, would be best carried out by placing this branch under the control of the Auditor-General, who is an officer responsible to Parliament. It can be readily seen that a check on the Treasury itself would, theoretically, be better secured by the Inspectors being placed under an authority outside that Department; but they regret to find that, owing to the failure to pass certain necessary legislation which would give the Auditor-General powers he does not now possess, and the unfortunate presence of friction in the relationships existing between certain high officers, it has been found desirable, for a time at all events, to revert to the previous condition of affairs. The Board, however, hope that the whole question will be reconsidered.

The Tanks and Wells Sub-department, which was formerly a branch of the Mines Department, and which the Board recommended in their last Report should be attached to the Works Department, has been transferred partly to the Lands and partly to the Works, the management going to the former and the construction to the latter Department—in fact, reverting to a condition of things which obtained prior to the year 1888. The Board fear that this will not prove a satisfactory change, either from a financial or an administrative point of view. So unsatisfactory did a similar arrangement prove when it was tried many years ago, that a Royal Commission was appointed to inquire into the whole subject, and the conclusions come to were as follows:—

We find that the evidence throughout discloses that the dual control exercised by the Department of Public Works and the Department of Mines over the public watering places, and the laxity in adherence to arrangements between them—doubtless framed with the best intentions, but in which the seeds of discord are sown broadcast (see p. 175)—has, as a natural consequence, for some years past been productive of frequent unseemly differences and recriminations, and much unnecessary and irritating correspondence between the Departments, the tedious details of which we have deemed it unnecessary and unprofitable to enter into in this report.

This very objectionable state of things has no doubt for a corresponding length of time been highly prejudicial to public interests, and to the decorous and regular conduct of public business by the Departments in question. We therefore deem it incumbent upon us to suggest the adoption of the following remedies:—

- (1.) That the Department of Public Works be charged with the construction of all public watering places, whether tanks, wells, or artesian borings, and with the entire supervision, maintenance, and control of them.
- (2.) That the necessity for constructing public watering places on any stock route be in all cases reported to the Department of Public Works by the Stock Branch of the Department of Mines.
- (3.) That the sites for such watering places be fixed by the Department of Public Works, dividing the distances between them as equally as the circumstances may permit.
- (4.) That before entering upon the construction of such watering places a report be obtained by the Department of Public Works from the Government Geologist, or other competent authority, as to advisability of sinking wells or boring for artesian water.

In concluding this portion of our report, we desire to point out that for some time past three classes of officers have been employed in the supervision, control, and maintenance of public watering places, namely: Road Superintendents, under the Department of Public Works, Inspectors of Public Watering Places, and Overseers of Public Watering Places (who are also Inspectors of Stock), under the Department of Mines. (Q. 647 to 649.)

But in the event of the Department of Public Works being charged with the entire supervision, control, and maintenance of all public watering places in accordance with our suggestion, the services of the inspectors and the overseers of public watering places would be unnecessary, and the duties now performed by them might conveniently (with necessary assistance) be undertaken by road superintendents resident in the several districts, who, presumably being trained engineers, and having supervised the construction of these fine works, and the erection of all the appliances connected with them, must naturally have a better knowledge of their management and a greater interest in them than could be expected from unprofessional officers of a foreign Department.

It seems to the Board that in the light of previous experience it is rather a doubtful policy to try the experiment again. The Board feel compelled to advert to these matters, as the Public Service Act, in the 18th section, directs them, in their Reports to the Governor, to “indicate the changes and measures necessary
in

in its opinion for the improved working" of the Public Service, "or of any Department or subdivision thereof"; and in the 8th section the following directions are given:—

As often as shall be necessary to carry out the directions and provisions of this Act, and to ensure the establishment and continuance of a proper standard of efficiency and economy in the Public Service, the Board shall, as far as practicable, personally inspect each Department, and investigate the character of the work performed by every officer therein, and the efficiency, economy, and general working of such Department, *both separately and in its relation to other Departments*, and may, for such purpose, examine the permanent head of such Department and such other witnesses as may appear to the Board to be necessary.

They have therefore no option but to refer to those cases in which they think improvements in the present system can be carried out.

The Board have also to report that no steps have as yet been taken to give effect to their recommendation in regard to the reorganisation of the Charities Department. In their last Report they dealt fully with the subject; it may not, however, be amiss, considering the importance of the question, to repeat part of what was then advanced. The portion referred to is as follows:—

The Charities Department, which is under the Chief Secretary's Department, is one of the most important branches of the Public Service. The Board, for reasons which need not now be entered upon, were unable at the time of the grading to fully carry out their views in regard to the reorganisation of this branch. They had, however, come to certain conclusions in regard to the management of the Department, and further consideration has only strengthened their views. To put these ideas into practice required an entire remodelling of the Department, and in the multiplicity of their other duties the Board did not see their way to enter upon so important a matter. With certain exceptions, they took the Department as they found it, and graded each officer according to the value of the work performed by him, and according to his capacity to perform such work. During the past year the Board have entered very fully into consideration of the changes which are necessary to be brought about to ensure efficiency in administration of charitable relief; and with the concurrence of the Chief Secretary, they appointed Dr. Williamson, the Superintendent of Gladesville Asylum, to go through the Department with the view to having an independent opinion as to the condition of each Asylum, the method of treatment in vogue, and generally regarding the management of the whole Department. These reports are now before the Board, and the conclusions which Dr. Williamson has come to coincide to a large extent with the views which the Board had arrived at as the result of their own investigations. The Board consider that in the interest of the old men and women who are accommodated in the various Asylums, an entire change of system should be introduced. For the most part these old people are in infirm health, and probably 1,300 out of about 3,900 are really hospital patients; while many others, though not actually sick in the ordinary acceptance of the term, are yet too infirm to quit their dormitories. In any work of reorganisation this important fact must receive due attention, and the Board hope to be able to reorganise the Department on lines more in accordance with the requirements of the medical officers and the inmates, bearing in mind that in those Asylums where a large number of sick are housed the attendants should be qualified by hospital or nursing experience. At present only eight out of some twenty-two attendants have had hospital training, while quite a large proportion of the unskilled attendants joined the Department when too old to adapt themselves to the requirements of the Service.

The delay which has taken in the settlement of the matter is no doubt largely due to the fact that in the interval a change of Government has taken place, and that a large amount of pressing work had to be carried through in a limited period of time. It is to be hoped, however, that this urgent and difficult question will shortly be satisfactorily settled.

STORES AND PUBLIC SERVICE TENDER BOARD.

In their last Report the Board drew attention to the radical changes which had been effected in the management of the Stores Department. A Public Service Tender Board was appointed, consisting of:—

R. R. P. Hickson, Esq., Under Secretary for Public Works, Chairman;
 Edmund Fosbery, Esq., Inspector-General of Police;
 Eric Sinclair, Esq., M.D., Inspector-General of the Insane;
 F. W. Neitenstein, Esq., Comptroller-General of Prisons;
 P. B. Walker, Esq., Chief Electrician and Engineer-in-Chief of Telegraphs;
 W. A. Gullick, Esq., Government Printer;

and regulations were passed for their guidance. The powers of this body can be gathered from the following excerpt from the regulations: No. 346 reads:—

The Tender Board shall be the authority for dealing with tenders and conditions of contract for the whole of the stores or other requisites, including furniture, forage and provisions for the Public Service, other than supplies for the Railway Department, warlike stores, military clothing, and materials required for works in course of construction not usually included in the annual contracts for supplies.

The

The Public Service Board have the power to make regulations for "determining the mode of procuring stores or other material or requisites for the Public Service, and providing for and regulating the inspection of stores, material, or requisites, and examining and auditing the books and accounts of officers in charge of stores, materials, and requisites, and for taking stock thereof, and for investigating and examining all contracts, accounts, invoices, requisitions, orders, and vouchers in any way relating to stores, material, or requisites for the Public Service: Provided always that the Governor may determine and carry out methods of procuring supplies for the Public Service other than by public tender, and independently of regulations framed by the Board," but they have not the power to make regulations for the disposal of the stores; this being accomplished by means of general instructions issued by the Governor and Executive Council. These need not be repeated here, but they were complete and effective for the purpose in view; they were published in a supplement to the *Government Gazette* of 8th July, 1898. The regulations provided for a fee of £100 per annum for the Chairman of the Board, and fees at the rate of £1 ls. per sitting for the other members—the total sum to be paid to each such member not to exceed £50 in any one year, or a total cost for the whole Board of £300. Parliament, however, saw fit to disallow this, and the Public Service Board desire, with all respect, to invite attention to the matter again, as they feel sure important features of the case have escaped attention. The objection taken appears to be that it is undesirable to impose dual positions, to which pay is attached, on already highly placed officials, who in connection with their own proper duties have sufficient to tax their energies and time. This, in a general way, is no doubt true, but the Public Service Board contend that an exception exists in this case, on the ground that these officers, having acquired in their respective offices an experience such as no one else in the nature of things has been able to gain, are fitted to discharge these responsible duties more effectively than any other officers; and the extent of these responsibilities can be gauged better when it is known that the value of the stores either directly or indirectly controlled by the Tender Board amounts to over £441,000 per annum. It is clear, therefore, that a saving of even a small percentage on this total will mean a large sum. Moreover, it is essential to the success of the scheme that only officers of the highest standing in the Service should hold these important appointments, because it requires all the authority which high position lends, to enforce the often unpalatable decisions which the Tender Board, in the exercise of their functions, have to arrive at. It is not to be wondered at that these gentlemen have met, and still meet with, some obstruction in the discharge of their onerous duties; but with the support of the Ministers this can easily be overcome, to the great advantage of the State.

* Page 34.

In Appendix II* will be found the Report of the Tender Board for the year ending the 31st December last, and as bearing on the point referred to, the following paragraph may be quoted, showing conclusively that it requires the exercise of the strong arm of the Executive to put down the opposition encountered:—

The Board, however, on assuming office under the Executive approval and regulations, were led to expect that the heads and chief officers of the public Departments would co-operate with them in carrying out the regulations and effecting a reduction in the public expenditure for supplies generally, but regret to state that they have been disappointed in this expectation.

It is pleasing, however, in contradistinction to the above, to be able to quote the following paragraph from the same report:—

"The Board record with pleasure the co-operation of the Chief Medical Officer of the Government in their efforts to effect economy in the supply of drugs, &c., for use in gaols, benevolent asylums, and other Government institutions. The Chief Medical Officer, through whom all requisitions for such supplies pass, has issued a circular directing that concentrated infusions be substituted for tinctures whenever possible, that the variety of drugs asked for be kept within narrow limits, that requisitioning for preparations which are merely 'elegant,' and consequently expensive, be avoided, and ordinary forms of therapeutic value substituted therefor, and that every requisition for an unusual kind of drug, or for an unusual quantity of any drug, be accompanied by a special explanation furnished by the visiting surgeon, and that in every case the quantity of drugs asked for be strictly proportionate to the consumption actually shown for the last preceding term."

It is needless to say that the members of the Tender Board have keenly felt the action taken by Parliament, not so much on account of the loss of their fees, as the apparent want of appreciation of their labours, due, the Public Service Board venture

venture to think, to the absence of a knowledge of all the facts of the case. They, however, hope that the explanation given herein will remove misconceptions which have evidently existed.

The Board regret to have to report the resignation of Mr. Hickson as Chairman of the Tender Board, that gentleman having stated that he has not the necessary time to devote to this business, and to express their pleasure that Mr. Fosbery, Inspector-General of Police, has, for the present at all events, consented to fill the breach. They hope that the remaining members of the Board will not be compelled to follow Mr. Hickson's example, but will remain at their posts, where they are in a position to do the State such good service.

In illustration of the valuable work performed by these gentlemen, the subjoined extract from the before-quoted report is pertinent:—

For purposes of comparison, the Board have also prepared a statement (Appendix C) showing the expenditure from the Vote for "Stores and Stationery" during the three financial years ended the 30th June last, and the three previous years, from which it will be seen that the expenditure for the services has decreased to the extent of nearly £9,000 per annum. For the current financial year the expenditure is estimated at £87,000, showing a still further reduction of £15,000. In addition to this, it should be borne in mind that as the Board are the sole authority for procuring stores and other materials and requisites for the Public Service, they have been able to make a considerable saving on charges against Departmental Votes, from the fact that many officers found it necessary, after the Board's appointment, to considerably curtail their requisitions when they learnt that a number of the items asked for were objected to as lavish expenditure. The waste, therefore, which has in the past existed in the distribution of stores, &c., has virtually been reduced to a minimum by the Board's action.

TRANSFER OF OFFICERS AND THE GRANTING OF DISTRICT ALLOWANCES.

The Board in previous Reports have referred to the regulations made with respect to district allowances in the Western Division of the Colony, the object of such regulations being to grant a measure of relief to those officers who are subjected to the incidence of the higher cost of living which rules in that part of the Colony, and thus, as far as possible, put them on a footing of equality with their more fortunate brethren in the Eastern Division. The Board felt, however, that even with the most careful consideration, and the aid of the advice of the most experienced officers in the Service, the regulations laid down would not meet every case; and in order to still further remove causes of complaint, they advised, after further reference to their Committee, that the following amendments should be made in the regulations:—

Officers residing at Nyngan, Elswick, Carrathool, and Conargo shall be allowed the same rate as those living within the present allowance area.

Officers residing at Baradine, Gulargambone, Bingara, Dandaloo, Marsdens, Trundle, Whitton, Darlington Point (Warangesda), Urana, Waroo, Nevertire, Jerilderie, Ungarie, Moama, Tocumwal, shall be allowed half the rate set out above.

Officers residing at Wilcannia, Louth, Tilpa, Walgett, Collarendabri, Angledool, Mungindi, Mogil, Goodooga, Barrington, and Enngonia shall, in addition to the rate set out above, receive a sum equal to one-fourth thereof.

Officers residing at Tibooburra, Hungerford, Ivanhoe, Menindie, Milperinka, White Cliffs, Wanaaring, Mossgiel, and Pooncarie shall, in addition to the rate set out above, receive a sum equal to one-half thereof.

The estimated additional cost involved by those amendments was £1,144 per annum, and Parliament generously voted this amount. It is too much to hope that even this extra concession will satisfy all claims, as it is impossible to make every condition of country life yield to regulations, however skilfully or comprehensively framed. The Board, in their visits of inspection to the country offices, have been much impressed with the disabilities, both pecuniary and physical, under which many of the servants of the State labour by reason of the great distance they live from the more favoured parts of the Colony. They found that not a few of them had for many years resided in localities where the most trying climatic conditions obtain, and, as a consequence, both they and their families were suffering in health. Some of the officers with good salaries send their families during the summer season to cooler climates; but it is clear that only the few can resort to this remedy, the majority having to suffer without any chance of alleviation.

The Board have been able by means of district allowances to minimise the pecuniary difficulty, and they have also taken steps to meet the other, and in this they are pleased to know that they have had the entire approval of the Government, as will be seen from the subjoined minutes, which they consider of sufficient importance to quote in full.

Public Service Board, Sydney, 17 November, 1899.

To The Honorable B. R. Wise, Q.C., M.P., Attorney-General,—

Transfer of Officers after prolonged service in the Western Districts.

THE Public Service Board, on 4th August, 1897, in a minute addressed to the Acting Premier, in connection with the proposal to grant living allowances to officers stationed in remote districts, drew attention to the hardship which is often entailed by keeping officers thus situated for a number of years, and stated that they had had under consideration the question as to whether a system could not be devised by which, where practicable, officers might, after a certain period, be transferred from the country to the town, and *vice versa*. They suggested that this rule might be applied in certain cases where officers have been for a period of, say, six years in one place. The Government, however, did not then see its way to concur in the proposal.

The question has again been under the consideration of the Board, and a report has been obtained from the Sub-committee on District Allowances. The Sub-committee, who have gone carefully into the matter, suggest that the term of service of officers in the extreme north-west should be limited to three years, and in towns further west of a given line five years; officers to have an absolute right of removal to a favourable district at the expiration of the respective terms, and the cost of removal to be defrayed by the Crown, in accordance with the provisions of Regulation 71.

The views of the permanent heads of the Departments affected have been obtained on these proposals, and are transmitted herewith.

The Board, after carefully considering the whole subject, have reluctantly come to the conclusion that any proposal to give officers an absolute right to removal after being stationed a certain number of years in one place would be impracticable. They have come to this conclusion with much regret, as the painful results which at times follow the prolonged retention of officers and their families in the very hot and remote parts of the Colony have been forcibly brought before them in the course of their visits to such districts.

Although, however, it may not be possible to bring into operation any hard and fast rule such as that suggested, it would no doubt be a satisfaction to officers to know that as far as possible the practice will be carried out; and the Board therefore desire to submit the matter for the consideration of the Government, with a view, if considered desirable, of concurrence being given to the adoption of such a course.

G. A. WILSON, } Members of the
J. BARLING, } Public Service Board.

Attorney-General's Department, Sydney, 25 November, 1899.

To The Secretary, the Public Service Board, Sydney,—

Sir,

I have the honor, by direction of the Attorney-General, to acknowledge the receipt of a minute addressed to him by the Public Service Board upon the subject of the transfer of Officers after prolonged service in remote districts, and to transmit, for the Board's information, the following copy of a minute written by him in the matter:—

“ I am sorry that the Board has come to this conclusion, but note with satisfaction the concluding paragraph of this minute, and trust that in practice the term of service in these districts will not exceed three years.”

The papers forwarded by the Board to this Department are returned herewith.

I have, &c.,

HUGH POLLOCK,
Secretary.

Public Service Board, Sydney, 3 January, 1900.

To The Honorable B. R. Wise, Q.C., M.P., Attorney-General,—

Transfer of Officers after prolonged service in the Western Districts.

THE Public Service Board note the minute of the Honorable the Attorney-General, as conveyed in the Secretary's letter of the 25th November last, in regard to their minute on the question of the transfer of Officers after prolonged service in remote districts of the Colony; and they desire to suggest, for the consideration of Mr. Wise, the advisableness of bringing the matter under the attention of the Cabinet, as the suggestions made can only be effectually carried out by the cordial co-operation of the Minister of each Department.

All that will then be necessary will be for the Under Secretaries to make their recommendations to the Board so as to give effect to the proposals, which, the Board desire to point out, will mean an increased cost to the State in the matter of removal expenses.

GEO. A. WILSON, } Members of the
J. BARLING, } Public Service Board.
W. HOUSTON, } Deputy Member of the
Public Service Board.

The approval of the Cabinet to this course was notified to the Board.

Public Service Board, Sydney, 5 February, 1900.

To The Secretary to the Attorney-General,—

Transfer of Officers after prolonged service in the Western Districts.

THE Public Service Board note the decision of the Cabinet in this matter. It is presumed that the Honorable the Attorney-General will cause copies of the minutes to be sent to each of the Ministers, with a view to effect being given thereto.

J. W. HOLLIMAN,
Secretary.

Difficulties will no doubt arise in carrying out the proposal, but with the cordial co-operation of Ministers and Under Secretaries, which seems to be assured, a great measure of relief will ensue.

EXAMINATIONS

EXAMINATIONS.

During the past year thirty-one competitive examinations have been held for the filling of 272 vacancies, at which 2,733 candidates presented themselves, particulars of which are given hereunder :—

EXAMINATIONS held during the year 1899.

Date.	Position.	Salary.	No. of Vacancies.	No. of Candidates.

In Appendix III* will be found the report of the Board of Examiners for the Public Service, from which it will be seen that two examinations, included in the foregoing list, have been held of candidates seeking admission to the Clerical Division during the year 1899. The following extract from that report will no doubt be read with interest :—

From these statements three things are apparent—(1) that centres of examination are arranged to suit, as far as possible, the convenience of individual candidates; (2) that the candidates are not confined to Sydney, but are fairly distributed over the whole of the Colony; and (3) that, in spite of the admitted difficulty of the examination, the number of candidates is increasing and the competition becoming keener. The marks obtained by the successful candidates at the last examination indicate a considerable improvement in the quality of the work as compared with that of previous examinations, the marks of the best candidates, in particular, being much in advance of the highest aggregate obtained on former occasions.

The Public Service Board wish to join with the Examiners in expressing their grateful recognition of the valuable services rendered by the many ladies and gentlemen who have so willingly, and without remuneration, consented to act on local supervising committees, without which it would be most difficult to conduct the examinations in the country. A glance at their names, which are given in the Appendix referred to, will show that some of our most prominent citizens have assisted in this important work. The Board also join in expressing their appreciation of the kindness of the Chancellor, Vice-Chancellor, and Senate of the University in placing the Great Hall at their disposal for the purpose of holding Examinations.

Their thanks are especially due to the members of the Examining Board for the extremely valuable work they have accomplished.

Since

Since the Examiners commenced their labours in January, 1897, the large number of 207 junior clerks who have passed the prescribed examination have been admitted into the Service, and it is not too much to say, judging from the reports the Board have received, that the Service has been distinctly improved thereby. With but few exceptions these young men appear to have creditably acquitted themselves, giving promise of increasingly useful service to the State. There is also little doubt that the admission of these junior clerks has tended to the economical administration of the Departments, as in many cases they have taken the place, and efficiently too, of persons who, under the previous system, would have been appointed at a much higher remuneration, the explanation being that these young men are drawn from the pick of the scholars of our public and private schools. In Appendix IV* will be found a statement showing the standard of education to which entrants must attain, and the subjects in which they are examined. It may be interesting to note, for purposes of comparison, the practice in England in matters of Civil Service examination.

* Page 39.

The clerical branches of the Home Service may be arranged as follows:—

1. First Division clerkships.
 2. Second „ „
 3. Boy copyists
 4. Post-office employés
- } About the same standard.

Yearly appointments to the First Division are not numerous. The examination is extremely severe, so severe that few, except University men of the highest standing, succeed in passing it.

Subjects of examination:—

English composition and Précis-writing.
 English History, Laws, and Constitution.
 Language and Literature—Latin, Greek, French, German, Italian.
 Mathematics (pure and applied).
 Natural Science.
 Political Economy.
 Moral Philosophy.
 Roman Law, &c.

No subjects are compulsory.

The salaries range from £150—£200 per annum to £1,000 per annum and more. Increments vary from £20 to £50 per annum.

Second Division Clerkships.

The examination includes handwriting, orthography, arithmetic, copying M.S., English composition, geography, English history, indexing, digesting returns into summaries, book-keeping.

The Commissioners recently suggested the addition of optional subjects, as follows:—A science, a foreign language, mathematics, shorthand.

The salaries range from £70 per annum to £250, but there is a higher division which reaches a maximum salary of £350. Promotion to the higher division is by merit.

Increments of salary range from £5 to £10 per annum.

Promotion is dependent upon special departmental reports, which must be satisfactory to the Commissioners.

Boy clerks.

Examination—Handwriting.
 Arithmetic (Elementary).
 Copying MS.
 English composition.
 Geography.

Salary—14s. per week first year.
 15s. „ second year.
 16s. „ third „
 17s. „ fourth „
 18s. „ fifth „

Further promotion is contingent upon their passing the examination for the Second Division. Outside

Outside these divisions there are a great many special appointments for which there are special examinations.

It will be seen from the above notes (1) that the higher positions in the English Civil Service are filled only by men of the highest ability and education; and (2) that the examination of candidates for admission to the Second Division is of a more practical character than our entrance examination, to which in other respects it is similar.

The first division clerks, who must not be more than 26 years old at the time of passing the examination, usually begin at a salary of £150 or £200. Their after progress is by regular increments. These, however, are dependent upon good conduct and practical ability, reports upon which are furnished to the Commissioners.

There is every reason to anticipate that the same high standard of excellence will be attained here as has been reached in Great Britain, if the system which has been inaugurated is allowed to have a fair trial; it is the one thing which cuts at the root of patronage and ensures a fair field and no favour to all without distinction, and makes the Civil Servants themselves feel that they have to rely upon their own efforts and abilities, and not the favour of influential friends.

The Board have had several conferences with the Attorney-General on the subject of examinations.

Mr. Wise is anxious that persons in the General Division shall have special facilities offered to them for entering the Clerical Division. He recognises, however, the importance of keeping up the standard of the educational test, as otherwise there would be a danger of the General Division becoming a "back door" entrance to the Clerical, which would inevitably tend to its deterioration. The Board thoroughly sympathise with the views of Mr. Wise in this matter, and they propose in future examinations to reserve a certain proportion of the vacancies in the Clerical for members of the General Division, with this proviso, that all such candidates shall at least obtain the minimum number of marks required for a pass; on their obtaining this they will be admitted in the order to which their relative marks entitle them.

With these precautions the interests of a large number of deserving Public Servants will be met without lowering the educational status of the Service.

TEST EXAMINATIONS.

The Board have now to refer to a subject which, perhaps, has caused more discussion than any other with which they have had to deal, viz., test examinations as applied to persons already in the Service.

Hereunder is given a list of the examinations held in the year under review:—

EXAMINATIONS held during the year 1899 of persons employed in the Public Service.

Date.	Position.	No. of Candidates.
27 Feb. ...	Test of Clerks for promotion (Regs. 263-264)	273
27 April ...	Post-mortem of Test under Regs. 263 and 264	70
24 " ...	Exam. under Reg. 278 (Clerks)	77
30 Oct. ...	Clerks of Petty Sessions for promotion to Grade A.	26
2 May ...	Telegraph Messengers as to fitness for Clerical work	209
17 June ...	Compositors' Grading Test	66
11 Sept. ...	Departmental Examination of Shorthand-writers and Typists paid less than £180 p. a.	53
	Total	774

The first four examinations were held under the provisions of what are known as the Increment Regulations, which, *inter alia*, provide for certain practical tests being passed before an officer is qualified for promotion from one grade to another. The full text of these Regulations will be found in Appendix V.*

In dealing with the objections which have been advanced against this system of examination, it must be borne in mind that the test is non-competitive, and that the position of an officer is not jeopardised by his failure to pass, the design being

being to prove his fitness for higher work; and it must be granted that however long the service of an officer may have been, if he cannot prove himself capable of advanced duties, it is clearly unjust to the State to promote him. The objection therefore falls to the ground that it is unfair to submit an old officer to a test, provided, of course, that it is a properly-designed one. On this question the controversy has chiefly revolved.

* Page 47.

In Appendix VI* will be found a specimen of the tests applied. It has been urged that the questions have been too academical in their character—easy enough perhaps to sharp youths who have just left college or school, but very difficult to men who have by long disuse lost the art of grappling successfully with such intellectual exercises. An examination of the test questions will show that this objection has but little real weight, and that the questions are eminently practical in their bearing, and are designed to bring out just that quickness of perception and facility in applying principles which the intelligent carrying out of the every-day routine of the better class of work in the Departments requires in its officers. The Board, however, have anxiously considered whether it is not possible to provide a discriminative office test applicable to the work of each particular officer, or class of officer. On a *prima facie* view, this would seem to meet most of the objections, and it is only on looking into the subject more closely that the practical difficulties appear. The Board have discussed this subject over and over again with their examiners, and as the result have been forced to the conclusion which those gentlemen have arrived at, viz., that it is not practicable to institute special Departmental examinations.

As the subject is of wide interest, it has been thought advisable to embody hereunder a very thoughtful minute which these officers have presented to the Board, with the terms of which they are in full accord.

DEPARTMENTAL EXAMINATIONS.

By these we understand examinations framed with a view to testing an officer's capabilities by means of questions upon the work that he is actually performing.

When the promotion examinations were inaugurated last year, we considered this method as well as other means of gauging ability, and we arrived at the conclusion that departmental examinations would not only prove difficult to work, but would also fail in their object.

In the first place it appeared to us that the practical difficulties were almost insuperable, and for the following reasons, among others:—

- (1) In large departments like Lands or Justice, papers containing suitable questions on the actual work of each examinee would of necessity be inordinately long, and there would always be the risk of overlooking some of the candidates. The work done in such departments is extremely varied and even technical, and as a rule one branch is ignorant of the routine pursued in another branch. A departmental system, to be just to all, would therefore have to be comprehensive and elaborate to an unmanageable degree.
- (2) To frame comprehensive sets of questions of this nature we should have to call in the assistance of a very large number of additional examiners; in fact, we should have to consult or associate with us the head of almost every separate branch. In the Lands there are fifteen of these, and the practical difficulty involved in trying to co-ordinate the proposed questions would be immense; indeed, we doubt whether questions for an examinee in an easy branch could be made of equal difficulty with those given to an examinee in a branch where more responsible work was done.

Further, to entrust the examination to the immediate superiors of the examinees would imperil the secrecy and value of the examination, which would then be entirely in the hands of officers, who, being in daily contact with the examinees, would be liable to bias for or against.

There would be a possibility, moreover, of such questions being set as would be likely to enable the candidate to bear out a previously-formed estimate of his efficiency.

- (3.) In small sub-departments, of which several examples could be given, the examinee himself might be the only person sufficiently familiar with the routine work of his office to be able to set questions upon it.

On the whole, a departmental examination appears to us to be a most elaborate method of ascertaining what can be much more readily and accurately elicited from the report of the officer under whom a candidate for promotion is daily employed, and from the personal inspection of the work by the Board's examiners.

Apart from its impracticability, it seems clear to us that a system of departmental examinations would fail to show whether an officer possessed abilities that would fit him for work of a higher order; and that, we understand, is the end in view. In branches where the work is of an elementary character it would be impossible, by purely practical questions, to differentiate between inferior men who have reached their maximum and men who are capable, should an opportunity arise, of doing advanced work. To take an example from our own service: A and B are record clerks, doing precisely the same work, each in due time and to the satisfaction of their superior officer. "A" is 30 years old, has been imperfectly educated, and is known to possess little ability; "B" is 25, well educated, and known to possess intelligence of a high order. If these two were examined merely upon the routine matters with which they are both equally familiar, in all probability it would be impossible for the examiners to determine

determine from their papers which is the better man. Such an examination would furnish no criterion of the capacity for more difficult or responsible duties; it would merely show what we already knew—that they were competent record clerks.

In this connection, it may be mentioned that in the commercial world, where examinations of accountants have been for many years in vogue, no attempt is made in papers on bookkeeping to go beyond general principles, although every large business has a system of accounts peculiar to itself. In other words, the examinations confine themselves to the general principles that underlie all the varied applications of bookkeeping.

We understand that in the United States elaborate Departmental examinations have been discarded in favour of general tests, which place all examinees upon the same footing. The former system was found to be not only difficult to carry out, but also to be unpopular with the Service. It was pointed out that whilst it might be more than just to men of little ability, it was apt to leave able men stranded in the inferior positions in which they had been placed as juniors. These latter had no means of proving their capacity—for on work of a simple character clerks of inferior ability may do just as well as men of much higher qualifications—and so might be left to waste the best years of their life on boys' work. The system failed, because it ignored the potential or prospective value of an officer, which, we take it, is of the utmost importance to the State.

In England there is no departmental system of examinations, so far as the Clerical Division is concerned. The tests are all of a general nature, and the fact that the English Service is divided into three classes, which can be entered only by open competitive examination, shows that the English Commission had in view something similar to our promotion examinations; at any rate the effect is similar.

In the German Civil Service, which is probably the best organised and the most contented in the world, advancement in the Service depends solely upon examination, the "claims of education and capacity" being everywhere recognised as superior to mere length of service in an "inferior function." (*Vide* Reports in American Civil Service Commission, p. 345, July, 1893, and June, 1894.) In the opinion of competent observers the efficiency and contentedness of the German Service are due to the conviction that the appointments are regulated by merit as shown by examinations.

It is essential that the senior officers and sub-heads should be well educated and competent men, and no Department will ever become fully efficient until this is the case. The weakness of the present Service lies not so much in the ranks of officers getting less than £200 per annum as in those of officers in receipt of more than that salary. The young men who have joined the Service during the past few years are better educated than many of their seniors, but if they are so unfortunate as to be attached to an office in which the work is performed in a negligent or slipshod fashion, it is almost hopeless to expect that they will become thoroughly efficient clerks. Owing to the exigencies of the Service, many of the present officers had to be admitted with but a very slight test of their educational qualifications. These are the men who, in the ordinary course of events, will in time be called upon to fill more responsible positions, and it is therefore of the greatest importance, if the future efficiency of the Service is to be assured, that some safeguards should be provided, by means of which the advancement of any but first-class men may be prevented.

It is not sufficient for a senior officer to be punctual, well-conducted, respectable, and hard-working in order to merit promotion, although these are very necessary attributes. He should be able to deal firmly yet fairly with his subordinates, and should be capable of giving them practical instruction in their work. If his duties bring him into contact with the public, he should be tactful and polite. If he occupies a confidential position he should have good judgment and discretion. He should, in short, be a man who will set a good example to his subordinates and command their respect, and to do this he must be something more than a mere machine.

A compromise between a general test and departmental examination might be arrived at by prescribing certain practical subjects in addition to a general test such as we have used hitherto. Thus a Lands' officer might be expected to show some acquaintance with the different Land Acts. The greater part of this knowledge might have no bearing on the work upon which he is actually engaged; but it might prove valuable to him in the future. Such a test, however, could not be applied at short notice without causing great hardship to the majority of the examinees, who, as a rule, have a special knowledge of certain sections, but no comprehensive knowledge of the Acts administered by their Departments. We have little doubt, however, that some such scheme could be devised and applied with good effect, but only as an addendum to a general test.

We fear that a new scheme would not meet with any more favour with the Service than the system adopted last year. On the contrary, it would be safe to assume that the officers—not a few—who are satisfied with the first examination, and are now studying to qualify for similar examinations in the future, will be aggrieved, and justly we think, should any radical alterations be made in the subjects prescribed for this year.

We have always thought the scope of these examinations might be enlarged with advantage, so as to include subjects of less immediate practical value than those we have hitherto been content with. A glance at the Civil Service Regulations of England, the United States, and Germany, will show how far behind we are as regards the educational qualifications which we require in officers holding senior positions. The extension of the subjects already set for the Promotion Examinations to include subjects like those mentioned below, would have the effect of raising the standard of efficiency immensely.

- (a) Shorthand and typewriting.
- (b) Law.—Law of Contract, Law of Evidence, Criminal Law, Law of Real Property, &c.
- (c) Political Science, Theory of Legislation, Parliamentary History and Procedure, Forms of Government, &c.
- (d) Political Economy, Trade and Finance, Taxation, Statistics, &c.
- (e) Logic.
- (f) Colonial History.
- (g) Modern History—say, from 1789 up to present time, topics and authors being prescribed each year.
- (h) English Literature—set Authors.
- (i) Modern Languages.

It

It is not intended to suggest that these or other subjects should be compulsory. All we suggest is that it would be a good thing if Government officials were encouraged to pursue one or more of these lines of study and were credited with any good results they obtained. There are many men in the Service who would be glad to strive for distinction even if it brought them no immediate advancement.

If the Board are of opinion that some alteration is necessary in order that the aptitude of an officer for the special work of his Department may be tested, the questions arise of (a) how to get more information in regard to an officer's efficiency, and (b) of specialising some portion of the written examination in order to test his departmental knowledge.

It is a recognised procedure that in cases where a numerical value is required, for examination purposes, the testing of aptitude is done by inspection; for example, the universal mode of testing a State school-teacher's aptitude is for the examiner to arrive at a valuation after seeing him give lessons and demonstrate his management of a school.

As a possible means of meeting the Board's wishes one or more officer in each Department and in the larger sub-departments might be associated with the Promotion Examiners, to set a paper for use at written examination in departmental law, procedure, and work, designed to test the knowledge of the officers due for examination, the field of examination being limited by the class of examinees due; but even this would be an extremely difficult matter to carry out.

It must be borne in mind also that it is usual to give notice to intending examinees some considerable time prior to altering an instituted examination, as men make their course of study accord with the subjects laid down at the preceding ones. In making a change, therefore, it would be only fair to allow men who have been studying since February last to take an examination similar to that held in that month, and the Departmental examination paper would have to be allowed as an alternative of one of the subjects already given—Commercial Arithmetic, Correspondence, Precis, Summarising, Indexing and Registration; Book-keeping being still required of officers in Account branches or of officers whose work involves the keeping of Books of Account.

The Board quite concur with the view expressed by their Examiners as to the desirableness of enlarging the scope of the examination, which may well include, *inter alia*, such a knowledge of legal principles as an educated business man would undoubtedly possess, as for instance, the rudimentary principles governing the law of evidence, the mercantile and maritime law, the law of principal and agent in contract and tort, the law of landlord and tenant, also that relating to negotiable instruments—and this might all be accomplished without involving a strictly technical examination.

The possession of a general knowledge on these and kindred subjects would doubtless be the means of obviating many of the difficulties which now occur. This standard cannot of course be attained at once, but it is an end to be sought—the "*terminus ad quem*" to be kept steadily in view.

The Board do not for one moment propose that the subjects mentioned should be compulsory, neither do they mean to suggest that failure to pass them should prevent ordinary promotion taking place under the prescribed conditions, but rather that what may be called an "Honors Class" might be created, from which could be selected the officers who are to fill the exceptional and higher positions in the Service. The Board are encouraged to hope that the younger officers will see in this an opportunity to win high positions, and evidence is not wanting that many of them are alive to the prospects opening out to them, and are grasping the meaning of the new conditions which now obtain, and are consequently making every effort to increase their mental stores.

No doubt the sluggish and indifferent will find fault with this new departure from old-established custom, and there may be a danger that too much attention will be given to their complaints, but the Board confidently rely on the support of Parliament and the country to sustain them in their efforts to create a Service which they hope in time will not be unworthy to rank in efficiency with the great Civil Services of the Mother Country and India.

The Attorney-General is very anxious that officers over the age of 30 who were in the Service before the passing of the Public Service Act shall be exempted from undergoing written examinations. This view the Board propose to meet in part, by providing that such officers, if they fail in only one subject, shall be granted a test comprising office work of the kind to which they have been accustomed. The Board think that as cases of this kind will probably be few in number, such test will be practicable, which it would not be if applied to the Service as a whole.

APPOINTMENTS.

During the year 1899, 613 appointments were made, as shown in detail in Appendix VII.* Of these, 362 were required to fill vacancies, and 251 new positions. The following analysis will supply useful details.

ANALYSIS

ANALYSIS of new appointments to the Public Service during the year 1899.

Department.	Nature and number of Appointments.	To fill Vacancies.	New Positions.
Chief Secretary.....	<i>To fill vacancies</i> — 11 nurses, at £25; 2 cleaners, 4 servants and 1 nurse, at £30; 1 cleaner, at £40; 1 attendant and 1 laundress, at £45; 2 junior clerks, 1 chaplain, 1 cleaner, 1 attendant, and 1 stableman, at £50; 1 attendant and 1 nurse, at £55; 1 kitchenman, at £62; 1 cook, at £65; 1 storekeeper, at £84; 1 cook, at £90; 1 house surgeon, at £100; 1 gardener, at £125.....	35
Do	<i>New positions</i> — 1 junior messenger, at £26; 1 medical officer, at £40; 1 junior clerk, at £50; 1 stableman, at £50; 1 store attendant, at £60; 1 attendant, at £75; 1 veterinary surgeon, at £275; 1 analyst, at £400	8
Treasury.....	<i>To fill vacancies</i> — 2 sewers, at £19 10s.; 2 junior messengers and 1 telephone attendant, at £26; 1 cleaner, at £30; 5 junior clerks and 2 cleaners, at £50; 1 cleaner, at £60; 2 bridge watchmen, at £120; 1 tidewaiter, at £130; 1 engine driver, at £140; 1 lithographic machinist, at £164.....	19
Do	<i>New positions</i> — 1 cleaner, at £12; 1 junior clerk, at £50; 11 tidewaiters, at £130, and 11 at £140; 1 wharf caretaker, at £145; 2 tidewaiters, at £150; 1 stationer's clerk, at £200; 1 chief assessor and 1 registrar (Taxation Department), at £450	30
Attorney-General...	<i>To fill vacancies</i> — 1 law clerk, at £300.....	1
Do	<i>New positions</i> — 1 junior clerk, at £50	1
Lands	<i>To fill vacancies</i> — 1 cleaner, at £7; 2 junior messengers, at £26; 4 junior clerks, 2 junior draftsmen, at £50; 1 inspector of conditional purchases, at £225	10
Do	<i>New positions</i> — 1 boy, at 2s. per day; 2 cadets, at £25; 2 junior clerks, at £50; 2 field assistants, at £100; 1 messenger, at £105; 1 caretaker, at £110; 6 assistant foresters, at £150; 1 piling overseer, at £200	16
Public Works	<i>To fill vacancies</i> — 1 gauge reader, at £5; 1 caretaker, at £24; 1 junior messenger, at £26; 6 junior clerks, at £50; 11 boys, at £54; 1 caretaker, at £109; 1 cook, at £120; 1 engine-driver and 1 assistant road superintendent, at £125; 3 fitters at £156; 1 clerk, at £200; 1 surveyor, at £300	29
Do	<i>New positions</i> — 1 gauge reader, at £5; 1 caretaker, at £40; 4 boys, at £54; 1 typist, at £75; 6 seamen, at £114; 1 fireman, at £132; 2 clerks and 2 draftsmen, at £150; 2 fitters and 1 clerk of works, at £156; 1 draftsman, at £185; 2 draftsmen and 1 clerk of works, at £200; 1 draftsman, at £290	26
Justice	<i>To fill vacancies</i> — 12 court cleaners, at £5; 2 acting matrons of gaols, at £5; 3 court cleaners, at £6; 2 court cleaners, at £7; 5 court cleaners, at £10; 1 acting matron of gaol, at £10; 22 acting clerks of petty sessions, at £10; 1 court cleaner, at £10 10s.; 2 court cleaners, at £12; 2 court cleaners, at £15; 2 acting gaolers, at £15; 1 District Court bailiff, at £25; 1 junior messenger, at £26; 1 chaplain, at £30; 5 junior clerks, 1 cadet draftsman, and 1 Sheriff's officer, at £50; 1 assistant cleaner, at £52; 2 court keepers and messengers, at £60; 1 Sheriff's officer, at £76; 1 clerk and schoolmaster, and 1 deputy coroner, at £200; 1 resident surgeon, at £320.....	71
Do	<i>New positions</i> — 1 court cleaner, at £4; 9 court cleaners, at £5; 1 at £7; 1 at £7 10s.; 1 at £8; 11 acting clerks of petty sessions, at £10; 1 junior messenger, at £26; 1 cleaner, at £30; 9 junior clerks, at £50; 1 examiner of titles, at £600.....	36
Public Instruction, Labour and In- dustry (exclusive of school teachers)	<i>To fill vacancies</i> — 8 teachers of Technical classes, paid by fees only; 3 junior attendants, 2 junior messengers, and 2 servants, at £26; 1 servant, at £31 4s.; 2 junior clerks, at £50; 1 cook, at £65; 1 cook and steward, at £84; 1 teacher of blacksmithing, at £150	21
Do	<i>New positions</i> — 1 teacher of Technical class, paid by fees only; 1 cleaner, at £9; 1 teacher, at £21; 1 teacher, at £25; 1 junior attendant, at £26; 1 junior assistant, at £52; 1 typist, at £75; 1 teacher of bootmaking, at £78; 1 teacher of mechanical drawing, &c., at £200; 1 inspector of factories and shops, at £200.....	10
Mines and Agricul- ture.	<i>To fill vacancies</i> — 4 officers to issue miners' rights, &c., paid by fees, or fees and commission; 1 warden's clerk, at £5; 1 warden's bailiff, at £10; 1 warden's bailiff, at £12; 2 warden's clerks, at £20; 1 junior clerk and 1 cadet, at £50; 1 inoculator, at £100	12
do	<i>New positions</i> — 4 officers to issue miners' rights, &c., paid by fees, or fees and commission; 1 warden's bailiff, at £6; 2 junior messengers, at £26; 2 junior clerks and 1 junior assistant, at £50; 1 inoculator and 1 assistant instructor, at £100; 1 engrossing and search clerk at £150; 1 inspector under the Vegetation Diseases Act, at £200	14
Postal and Electric Department.	<i>To fill vacancies</i> — 139 telegraph messengers and 11 switch attendants, at £26; 5 postal and telegraph assistants, at £39; 2 junior clerks, at £50; 2 cleaners, at £52; 2 cadets, at £65; 1 junior operator, at £91; 1 instrument fitter, at £150	163
do	<i>New positions</i> — 60 telegraph messengers, at £26; 26 switch attendants, at £26; 1 junior letter carrier, at £26; 1 postal and telegraph assistant, at £39; 1 messenger and junior letter carrier, at £39; 3 junior clerks, at £50; 1 line operator, at £140; 1 bicycle mechanic, at £150.....	94
Office of the Public Service Board.	<i>To fill vacancy</i> — 1 junior clerk, at £50	1
	<i>New positions</i> — 15 clerks on Clerical Relieving Staff, at £160* ; 1 junior clerk, £50	16
	Total	362	251
	GRAND TOTAL		613

* These are not new positions in the strict sense of that term. The officers referred to take the place of temporary employes. See explanation on page 19 of the Report.

From the foregoing it will be seen, as was to be expected, that the largest number of new positions is to be found in the Postal and Electric Telegraph Department. The Board look with some concern on the tendency to expansion which is observed in most Departments. To a certain extent this is a healthy sign as indicating the natural progress of the Colony. The increase in the population between the 31st December, 1895, and the 31st December, 1899, the period during which the Board has been in existence, was 6.88 per cent. Before, however, anything like correct deductions can be made from a study of the comparative rates of increase observed as between the cost of services and the growth of population, a great many factors must be taken into account, as, for example, the practice which now obtains in the Works Department of employing its own officers rather than contractors in carrying out public works. The returns will of course show under this system a large increase in the amount of salaries and wages, but no one could reasonably contend from these circumstances alone that the real cost of Government, as distinguished from the apparent, had increased;—the direct contrary may be the result. Again, the net increase of expenditure in the Postal and Electric Telegraph Department as between 1898 and 1899 was £29,436, but the net increase in revenue was £42,436. The Department of Taxation may be quoted as another example. In this case an entirely new Public Department was created, and the expenditure, in addition to the ordinary current work of management and collection, has included a large volume of initiatory work which will prove of permanent benefit. The expenditure on this account for the years 1896 to 1899, was £160,896, but the result was an addition to the Consolidated Revenue, in the shape of Land and Income Tax, of £1,541,197. It is apparent, therefore, that a mere comparison of bald figures will only lead to fallacious conclusions. Notwithstanding these considerations the Board think it right to raise a note of warning against the danger of unduly inflating the expenditure—so easy to accomplish, so hard to rectify. A return is now being prepared at the instance of Mr. Affleck, M.P., which will, it is hoped, throw light upon some of these questions, and put before the country a clear view of the trend of Government expenditure in the matter of salaries.

The return, upon the preparation of which all the Government departments are engaged, is a very elaborate one, but it will be worth all the trouble and expense bestowed upon it. The Board regret that it is not ready in time to enable them to use it for the purposes of this Report.

APPOINTMENTS UNDER SECTION 30.

During the year the following appointments have been made under Section 30, and as the papers connected with them have been laid on the Table, as provided by law, there is no occasion to further enlarge upon the subject other than to say that in every case the officer the Board nominated, after obtaining proper advice, was appointed.

APPOINTMENTS under Section 30 during the year 1899.

Name.	Position.	Salary.
Todd, Robert H., M.D., Barrister-at-Law.	Deputy Coroner, City of Sydney ..	£200 (<i>vice</i> Dr. Rennie, resigned).
Beveridge, R. C.	Chief Assessor, Income Tax Branch ...	£450.
Reid, C. W. (Dr.)	Junior Medical Officer, Hospital for Insane, Parramatta.	£270 and quarters.
Colbourne, H. R., Solicitor ...	Examiner of Titles	£600 (new position).
Stokes, Edward S. (Dr.) ...	Resident Surgeon and Dispenser, Trial Bay Prison.	£320 and quarters, &c., £80 (<i>vice</i> Dr. Franklin).
Bowhill, Thomas, F.R.C.V.S.	Resident Veterinary Surgeon, Depart- ment of Public Health.	£275 (new position).
Helms, Richard	Experimentalist to Chemist, Mines Department.	£350 do.
Bulkeley, J. A., B.Sc. ...	Assistant Instructor, Hawkesbury Agri- cultural College.	£100 and quarters (new posi- tion).

APPOINTMENTS TO THE POLICE MAGISTRACY.

With regard to appointments to the Police Magistracy, the Board think that a larger discretion should be allowed them in their choice of persons to fill places becoming vacant. At present they are bound to select candidates from the Public Service, unless they are able to certify that there is no one therein fit or qualified for the position, notwithstanding the fact that they may be able to select better men from outside. The Board think that to satisfactorily fill these positions it is necessary that the persons selected should possess qualifications of a high order, including tact and a general knowledge of the world—requirements which a long employment in the Public Service does not always ensure. So strongly did the Board view the matter that they put the following case before the Attorney-General :—

A question has arisen as to the bearing of sections 30 and 31 of the Public Service Act, in relation to the recommendations of the Board in the matter of appointments to the position of Police Magistrate. Section 31 provides that “No person shall be appointed to the office of Police Magistrate—

- “(1) Unless he be at the time of such appointment of the full age of thirty-five years or upwards, and be willing to reside permanently within the district in which he is appointed to act ;
 “(2) Nor unless such person shall have passed the examination in law prescribed by regulations to be made as in the next following section provided.”

and in accordance therewith examinations have been held open to the general public as well as to officers in the Service, resulting in a number of persons both in and outside the Service qualifying.

In the event of appointment being made from outside the Service, section 30 *inter alia* provides that no such appointment shall be made until the Board has been informed of the proposal to make such appointment, and has reported whether, in its opinion, there is any person in the Service capable of filling the position to which it is proposed that an appointment shall be made. All such reports shall be laid before Parliament.

If, therefore, section 30 is held to govern appointments under section 31, the Board would be precluded from selecting the most suitable candidate, should such an one happen to be one of those from outside the Service who passed the examination under section 31.

The Board, therefore, will be glad if the Crown Solicitor will be so good as to obtain the opinion of the Attorney-General as to whether the Board have the power to recommend the most suitable candidate, notwithstanding that he is not in the Service and that the Board could not absolutely certify that in its opinion there is not any person in the Service capable of filling the position to which it is proposed that the appointment shall be made.

To this Mr. Wise replied :—

I have carefully considered all the sections of the Act bearing on this point, and am of opinion that these appointments are governed by sections 28, 29, and 30. There is nothing in sections 31 and 32 to exempt the appointment of Police Magistrates from the general provisions of the other sections, so that, unless the necessary certificate can be given under sections 28, 29, and 30, persons outside the Service cannot be appointed to these positions.

For the reasons stated, the Board venture to think that wider limits should be permitted, for it does not necessarily follow that an officer who may be a good Clerk of Petty Sessions will successfully carry out the duties of a Police Magistrate. The Board, in short, contend that they should be at liberty to select the best man, even although they may not be able to certify that there is no person in the Service capable of filling the post. The Board further think that barristers or solicitors of, say, five years standing should be exempted from passing the prescribed examination; and they believe, after several discussions with them, that both the Attorney-General and the Minister of Justice are in harmony with their views in this matter.

The Board are far from advocating recourse to outside nominations to fill the general run of vacancies; to do so would be to foster a spirit of discontent in the Service, which would be prejudicial to the public interest. All they contend is that, in relation to some appointments—very limited in number—the public interest would be best served by resorting to a larger field than the Civil Service presents, and they think that this occasionally will happen in the matter of appointments to the Police Magistracy.

Sir Arthur Helps, in his essay on Government, gives expression to very similar opinions. “There is still,” he remarks, “to my mind, a want of something which I think may be noticed in all Governments of modern times, and that is, a power of attracting from time to time fresh ability and fresh views, and putting the Department in reasonable communication with the world about it.” The view so well expressed here, the Board think, will commend itself to every impartial and disinterested mind.

TEMPORARY

TEMPORARY APPOINTMENTS.

A return which has been prepared shows that on the 30th June, 1899, 905 persons were temporarily employed in the various Departments, distributed as under :—

Chief Secretary (including Botanic Gardens, Domain, Parks, &c., &c., 94)	109
Treasury (including Taxation Department, 189; Government Printing Office, 74)	285
Attorney General	Nil.
Lands	29
Public Works	251
Justice	12
Public Instruction, &c.	25
Mines, &c.	191
Postal and Electric Telegraph Department	3
	905

The sections dealing with such appointments, the 37th and 38th, read as follow :—

37. Whenever in the opinion of the Minister the prompt despatch of the business of any Department renders temporary assistance necessary, and the Board, upon being so informed, shall be unable to provide such assistance from other Departments, the Board shall select from the persons whose names are upon the register referred to in sub-section (iii) of section 19 such person or persons as to the Board appear best qualified for such work :—

1. Such person or persons may be employed to perform such work for any period not exceeding three months, and, if necessary, such person or persons may, with the sanction of the Board, be employed at the end of such period for any further period not exceeding three months, but shall not be so employed for more than three periods of three months each successively.
2. No person who has been temporarily employed in any Department shall, on the termination of his employment, be eligible for temporary employment in the Public Service during the six months next following such termination.
3. The services of any person employed temporarily may be dispensed with at any time by the Minister or by the Board.

38. Notwithstanding the provisions hereinbefore contained, the Minister may, in the case of temporary work, in the carrying out of any public work or scheme (if the Minister shall consider that it is for the public interest that the provisions of the last preceding section should not apply to such work or scheme) order that the temporary employment upon such work or scheme shall be until the completion of the same; and any person may, upon the recommendation of the Board, be temporarily employed in the Government Printing Office, or in the preparation of the Census Returns, for such time as may be necessary.

Some difficulty has arisen in connection with the administration of these sections. It has often happened, especially in the Works Department, that the services of persons who had exhausted the term of employment prescribed by section 37, viz., nine months, were still required. Section 38, as will be seen, gives the Minister power to continue the employment of such persons, in the case of an uncompleted work or scheme, until its completion. But there are many cases where it is desirable to remove an officer from work to work, and this the law technically disallows when the nine months prescribed by section 37 are exhausted; but it will be readily understood that when an officer has proved reliable, and has thoroughly mastered his work, it would be unbusiness-like to discard him for some new employé. The Attorney-General in the Amending Bill submitted to Parliament last Session, made provision for this contingency, but as the Bill has not yet been passed, the Board has had to continue a system of special agreements, which, with some modification, Mr. Wise has been good enough to sanction, thus temporarily meeting the difficulty. A copy of this agreement will be found in Appendix VIII.*

* Page 63.

EMPLOYMENT OF WOMEN.

The Board are endeavouring, as opportunities occur, to carry out the intention of Parliament relating to the employment of women. In June an examination was held for postal assistants, and out of the 40 successful candidates required, 23 were girls, while 6 others succeeded in gaining more than the minimum number of marks.

The

The Board regret to have to report that they have found some difficulty in placing these candidates, chiefly on account of the want of proper accommodation in the offices, but this will in time be remedied, and already arrangements have been made for the employment of six in the Head Office of the Postal and Electric Telegraph Department.

In the examination which was held in December for junior clerkships, these positions were for the first time thrown open to the competition of males and females alike. The estimated number of vacancies for the year was fifty, and amongst the first fifty candidates four girls secured places, six others obtaining the minimum number, or more, of the requisite marks. The result on the whole is gratifying, especially as the examination was a reasonably severe one, which all competitive tests necessarily are. The Board anticipate but little difficulty in utilising the services of the successful female competitors in this examination, and there is no reason to doubt that the employment of women in clerical work will be found as satisfactory in Government Departments as it has proved elsewhere.

Fears have been entertained that an extension of this system will mean the loss of situations to men, or possibly the lowering of their salaries. The Board take this opportunity of saying that such an apprehension is groundless. No doubt the employment of women in such places as are suitable for them, will have the effect of curtailing to some extent the employment of men; but this will produce a result beneficial to the State, because an equal number of men will be compelled to seek positions which women cannot occupy, and therefore will be available to engage in occupations tending to develop the resources of the Colony.

RELIEVING STAFF.

During the year which has passed a new departure has been made in the method of complying with the requests which are constantly being made by the various Departments for extra clerical assistance, due to the occasional absence from duty of members of the regular staff, and the occurrence from time to time of work of a special character. It had been the practice to meet these demands by engaging temporary clerks, as prescribed by section 37 of the Public Service Act, but this plan has not been found to work satisfactorily. In the first place, good clerks will not usually leave private employment to take up casual work; and, secondly, such clerks, if obtained, would not remain long enough to become familiarised with Departmental work. The Board came to the conclusion, therefore, that the best way out of the difficulty would be to appoint a permanent relieving staff, the permanency of the appointments meeting both objections. Good men, it was argued, would be willing under this condition to enter the Service, especially if sufficient encouragement as to remuneration were given. The Board accordingly determined to advertise for fifteen clerks, offering permanent employment, with salary beginning at £160, and rising by gradual increments to £200. In response 494 candidates offered themselves for the competitive examination which was held, and which was of a practical character. The fifteen who were successful were appointed; six of these were already in the Service. The Board have reason to believe that by this means they have secured a capable staff, which will become increasingly useful in the Departments.

A similar plan has been adopted with regard to a professional Relieving Staff, but the arrangements are not yet quite complete.

INCREASES TO SALARIES OVER £400.

In connection with the above subject the Board have to note the decision of Parliament to allow no increase on any salary over £400.

The Treasurer in his Budget Speech announced that, as this determination was arrived at, no increase over that amount could be submitted; the Board, therefore, have been precluded from making known their proposals in regard to the salaries of the higher officials. Section 10 of the Public Service Act provides that "The Board shall from time to time determine what salary, fee, or allowance is fairly appropriate to the work to be performed by, or assigned to each officer or grade of officers, or to be performed by or assigned to persons temporarily employed; and the salary, fee, or allowance so determined shall, subject to the necessary provision being from time to time made therefor by Parliament, be the salary payable in respect of such work

* Page 64.

work accordingly." In the cases under review, Parliament has had no opportunity of knowing what increases were proposed, and the Board now take the opportunity of making this information public. In Appendix IX* will be found a list of those officers to whom the Board thought increases were due, the amount of such increase, and the reasons which actuated the Board in proposing them. As will be seen, the total amount is £1,109; not, the Board venture to think, a large sum in comparison with the dimensions of the Service and the importance of the duties entrusted to these officers.

The Board, with profound submission to the wisdom of Parliament, respectfully desire to solicit its attention again to the important issues involved in this decision, as they fear that an adherence to an arbitrary rule of this kind will ultimately work great mischief. It must be within the observation of everyone who is acquainted with the subject, that the burthen of the responsible work of the Departments rests upon the shoulders of the class to which this rule applies. It is not difficult to provide for the minor appointments—a large number of suitable applicants are always available—but it is far different with the higher offices. To fill these satisfactorily, the Board have found the greatest difficulty—a difficulty which is by no means diminishing; and they fear that the adoption of the restrictive rule referred to will still further increase their troubles.

The writer before quoted, in remarking upon the difficulty in finding able men, says: "But it only shows how wary statesmen should be in their choice; and that when they once do get hold of a good man how much they should make of him."

The Board are endeavouring, by carrying out the directions of Parliament as expressed in the Public Service Act, to introduce into the Departments candidates of superior abilities, from amongst whom in due course the high positions in the Service can be filled, and they are apprehensive lest, by reducing the value of the prizes, already too few in number, a check will be given to the entrance to the Service of our youths of talent, to whom State employ should offer an adequate career; and it is manifestly to the interest of the Government that its Service should be made attractive, especially as merit alone will now secure admission thereto.

The Board feel assured that in bringing this matter forward, Parliament will acquit them of any intention of doing otherwise than what they conceive to be their plain duty, and that they will be pardoned if they express a hope that it will reconsider its decision. A copy of the correspondence which the Board have had with the Government on the subject will be found in Appendix X.†

† Page 66.

POSITION OF THE UNDER SECRETARIES IN RELATION TO THE BOARD.

The Board feel that much misapprehension has arisen in relation to this matter, and to this misconception they think the proposal to place the Under Secretaries outside the operation of the Public Service Act is partly due. It seems to have been the impression in some quarters that these high officials have been ignored in matters relating to their Departments; that their views have been put aside, and in some instances not even sought. An acquaintance with the methods of the Board, and the order of business observed, would show that these criticisms are based on a want of accurate knowledge. It is true that in the early operations of the Board, when the work of the Under Secretaries themselves was under review, their advice could not in all cases be taken, and it is clear that if the Board had not pursued an independent course of action they would not have been able to accomplish much real good. This early stage has long since passed, and nearly everything now comes to the Board through the channel of the Under Secretaries.

The Board may perhaps be permitted to say that in their opinion to put the Under Secretaries outside the scope of the Public Service Act would considerably detract from its effectiveness, and create a dual control which must impair discipline in the Service.

A careful consideration of the matter will show that it would be fatal to the proper influence of the Under Secretaries themselves—they would in such a case lose the protection which the Public Service Act throws around them, in common with all other public servants. To remove these officers from the control of the Board would be to put the Board in the somewhat analogous position of the commander-in-chief of an army whose generals had been made independent of him. These objections are applicable in large measure also to the suggested withdrawal of the Police Magistrates and

and the Crown Solicitor from the operation of the Act. The Board think that if any class of Civil Servants should be kept free from political influence it is the Police Magistracy.

To show how great the misconceptions have been with respect to the methods of the Board when dealing with the Heads of the various Government Departments, it is only necessary to quote a case which was referred to in Parliament as being illustrative of the mistakes the Board were liable to fall into by failing to consult heads of departments before making their recommendations. The case is that of Mrs. Douglas, in regard to whom it was alleged that they had shown a want of judgment in recommending her appointment as a nurse in charge of insane patients, she being upwards of 62 years of age. A perusal of the subjoined letter, which the Board addressed to the Honorable the Attorney-General on the subject, will serve to put the matter in its true light, and show that the recommendation of the Board was entirely misunderstood :—

The Honorable B. R. Wise, Q.C., M.P., Attorney-General,—

Case of Mrs. Charlotte Douglas, late Charge Nurse, Hospital for Insane, Parramatta.

THERE appears to the Public Service Board to be some misapprehension in regard to the circumstances of this case, the papers regarding which have been again referred to them by the direction of the Honorable the Attorney-General.

The circumstances in connection with Mrs. Douglas's retirement, shortly recapitulated, are as follows :—

This lady was employed in the Lunacy Department from the 1st July, 1860, to the 28th February, 1869, when she resigned. She was reappointed on 15th January, 1879, and served until 31st July, 1898, when, having reached the age of 62 years, she applied to be allowed to retire, apparently on representations made to her by Dr. Manning that she was entitled to receive a pension. She had elected, in terms of Section 57 of the Civil Service Act of 1884, to contribute to the Superannuation Fund, and had so contributed from the 1st May, 1887.

When her retirement had been effected by the Executive Council the papers were forwarded to the Board, in accordance with the usual practice, with a view of having the superannuation allowance computed by the actuaries. It was then pointed out that under the opinion of Mr. Attorney-General Barton, of December, 1893, her service for superannuation purposes could only legally be counted from the date she commenced to contribute to the Fund, viz., 1st May, 1887, and, therefore, as such service did not amount to fifteen years, she could not be allowed a pension, but only one month's pay for each year of service, from the date of commencing to contribute, before mentioned, and a recommendation to that effect was made by the Board.

This was fully explained to Mrs. Douglas. Dr. Sinclair, who in the meantime had succeeded Dr. Manning as Inspector-General of Insane, also saw the Board on Mrs. Douglas's behalf, and the legal difficulty in the way of granting a pension was explained to him.

The case appeared to the Board to be one of considerable hardship; but inasmuch as the law on the subject seemed to be clear, the Board could not recommend the payment of a pension. They therefore determined to submit a statement of the circumstances of the case to the Government, with a suggestion that as Mrs. Douglas has left the Service under the inducement of the head of her Department, that she would be allowed a pension, which however was not the case, the Government might consider it desirable to re-employ her in her former Department. The Board in making this suggestion had before them the memorandum of Dr. Manning of the 18th September, 1899, which is with the papers, in which he states :—

"I believed that she (Mrs. Douglas) was entitled to a pension and had carried out all the requirements with regard thereto, or I should not have taken steps to obtain her retirement, as she was physically fit for several years until she attained the age of 65."

Dr. Manning also states that one of the grounds on which he recommended her retirement was that although a most trustworthy and excellent woman, her defective education placed her in a difficult position with regard to the nurses under her. (She being a Charge Nurse having the supervision of other nurses.)

The Board made no statutory recommendation for her re-employment; indeed they have no power to do so, the appointment of Lunacy Officers of this class being entirely invested in the Inspector-General of Insane.

From the report appearing in the *Daily Telegraph* this morning of the Debate which took place in the Legislative Assembly last night on the "Public Service Act Amendment Bill," it appears to the Board that the Honorable the Attorney-General cannot be fully acquainted with the facts of the case as herein set forth.

As the statement in the paper referred to gives an altogether erroneous impression of the action which they have taken, they trust that Mr. Wise will, in justice to them, see his way to make the necessary correction and to put the matter in its proper light before the House at the earliest possible moment.

It is only right to add that, as soon as Mr. Wise became aware of the facts of the case, he at once acknowledged that he had been misled.

The Attorney-General has suggested to the Board that regulations should be framed with the object of defining clearly the position of the Under Secretaries in relation to the Board. To this they see no objection, provided always that the powers conferred upon the Board by Statute are not thereby impaired, and they have pleasure in reporting that after several conferences with Mr. Wise, regulations have been prepared which meet the views both of that gentleman and themselves. These regulations will be issued in due course.

INQUIRIES

INQUIRIES UNDER SECTIONS 49 AND 51 OF THE PUBLIC SERVICE ACT (OFFENCES).

During the year 1899 forty-two inquiries have been held under section 49 of the Act, and two under section 51, or forty-four in all. In four of these cases the investigations were conducted by delegation from the Board, with the approval of the Governor, the following gentlemen respectively acting on their behalf, viz. :—His Honor Judge Gibson, Mr. Stipendiary Magistrate Payten, and Messrs. Police Magistrates McKell and Fitzhardinge. To each of these gentlemen the thanks of the Board are tendered for their valuable services. In Appendix XI* the necessary particulars are given of the cases tried, with the exception that the names of the persons affected are not disclosed. The Board have reason to believe that the good-will of Parliament in not asking for the publication of this information is much appreciated. Appendix XII† gives particulars of fifty-four cases, in which either the offence was admitted, or the persons were dealt with in the Criminal Courts. It will be seen that a total number of 98 cases of offence were in one way or another adjudicated upon, involving work of a peculiarly trying character.

OFFICERS WHO HAVE BEEN GRANTED LEAVE OF ABSENCE TO PROCEED TO SOUTH AFRICA WITH THE NEW SOUTH WALES MILITARY CONTINGENTS.

In common with their fellow-colonists, the members of the New South Wales Civil Service have not been backward in contributing from their ranks many brave officers who have sought to distinguish themselves in the cause of their country in South Africa, nor must it be forgotten that the name of one well-known lady, to her great credit, figures in the list. By arrangement with the Government, leave of absence has been granted them while they are absent on this special duty. The Board are pleased to have the opportunity of placing their names on record.

List of Officers who have been recommended by the Board for leave of absence without pay to enable them to proceed to South Africa with the New South Wales Military Contingents.

Hindmarsh, A. J.	Messenger, Office Clerk of the Peace.
Tunks, L. D.	" Lands Department.
Logan, M. W.	Clerk, Office of Public Service Board.
Roth, Dr. R. E.	Lecturer, Fort-street Training School.
Dove, F. A.	Assistant Teacher, S. P. S., Camperdown.
Griffiths, L. H.	Assistant Farrier, Post Office Stables.
Taylor, P. R.	Switch Attendant, Burwood.
Burgin, A.	Telegraph Messenger, Parramatta.
Hays, F. R.	Clerk, Probate Office.
Legge, G. H.	Surveyor, Forbes, Lands Department.
Kilpatrick, F.	Assistant Teacher, P. S., Carlingford.
Peek, J. H.	" West Maitland.
Coulson, W. A.	Teacher, P. S., Nicholson's Lagoon.
Dennison, T. E.	Pupil Teacher, S. P. S., Wellington.
Cradick, A. E.	Teacher, P. S., Wyndham.
M'Ghinn, J. P.	Telegraph Operator, West Maitland.
Mackellar, P. F.	Pupil Teacher, P. S., Birchgrove.

Sproule, J. M.	" " "
Taylor, J.	Assistant Teacher, Mosman.

REMUNERATION AND PRIVILEGES IN THE JUNIOR RANKS OF THE POST OFFICE
AND OTHER DEPARTMENTS.

The Board have been subjected to considerable criticism in connection with the rates of remuneration paid to the minor officials in the various Departments, the Post Office appointments having been marked out for special notice in this regard. It has been alleged that the salaries have been either unduly lowered or not sufficiently raised. It may, perhaps, be unknown to many that not one salary in the Post Office Department below £100 per annum has been reduced, whilst, on the other hand, the steady tendency ever since the Board came into office has been to improve the status of the large number of persons who fill the minor appointments in that Department. In previous reports the Board have adverted to this subject. On this occasion they prefer that the Department should speak for itself, and accordingly they give below a report from the Deputy Postmaster-General on the subject.

1. TELEGRAPH MESSENGERS.

Some further improvement was effected during the year in the position of a number of young men originally appointed as Telegraph Messengers, but who, owing to the exigencies of the Service, had for some time been performing duties of a more important character than those ordinarily assigned to Telegraph Messengers—some as clerks, others as assistants in post offices, &c. An examination of a simple nature was held in Sydney and various country centres, at which all who were so engaged were allowed to present themselves. About sixty-three obtained the requisite number of marks for a pass, and they were appointed as Supernumerary Assistants, with an increase of salary from £52 to £65 per annum. Some of these, proving themselves to be fairly efficient clerks, have, in cases of emergency, been employed on clerical work in other Departments of the Public Service, and have, while so employed, been allowed payment at the rate of 7s. per day. Others have been appointed Supernumerary Operators at £65 per annum, pending their qualifying themselves for the position of Postal and Telegraph Assistant by passing the prescribed technical examination. Out of a staff of 540 Telegraph Messengers in receipt of the maximum salary of £52 per annum on 31st December, 1898, no fewer than 137 received increases as above explained, or were promoted to other positions during the year 1899.

2. ENTRANCE EXAMINATION FOR POSTAL AND TELEGRAPH ASSISTANTS.

As it was found that the examination prescribed by the regulations relating to the admission of youths to the Postal and Telegraph Service, with a view to their qualifying themselves for appointment as Operators, might safely be simplified, action has been taken accordingly, and the next examination will take place under the altered conditions. Candidates who pass this examination, however, are not eligible for any position in the Clerical Division other than that of Postal and Telegraph Assistant or Post and Telegraph Master.

3. MINIMUM SALARY OF POSTAL AND TELEGRAPH ASSISTANTS.

By regulations issued in July, 1898, the minimum salary for Postal and Telegraph Assistants of the fourth grade was fixed at £65 per annum; but as it was found that officers qualifying themselves for these positions had generally served for at least three years in a minor capacity, and that a salary of £65 per annum was barely sufficient for their maintenance when transferred, as most of them are, to a distance from their homes, an amended regulation was introduced, raising the minimum salary to £80 per annum.

4. SPECIAL LIVING ALLOWANCE TO JUNIOR OFFICERS.

Recognising that the rate of pay allowed under the regulations to junior officers transferred or promoted to outlying districts was inadequate to their support, the Board introduced an amended regulation, under which a special living allowance is payable, ensuring an emolument of not less than £85 per annum to all such officers.

5. INCREASE OF SALARIES OF POST AND TELEGRAPH MASTERS OF LOWEST GRADE.

A number of officers in charge of Post and Telegraph Offices, with the additional responsibility of Money Order and Government Savings Bank duties, and whose offices yielded a fair revenue, were promoted from the fourth to the third grade, with salary at the rate of £130 per annum, as it was thought that although the duties might not in some cases be heavy, the monetary responsibility involved fully justified the salary mentioned.

6. ANNUAL INCREMENTS TO OFFICERS IN THE GENERAL DIVISION.

A scheme of annual increments to officers in the General Division of the Postal and Electric Telegraph Department receiving less than £120 per annum has been approved of by the Board, and only awaits the provision of the necessary funds to be carried into effect. Under this scheme all officers in the General Division, except those whose maximum salaries are fixed at under £120 per annum, will (subject to satisfactory reports as to their efficiency and conduct) receive an annual increment until they attain that salary.

7. EXTRA LEAVE TO OFFICERS WORKING ON PUBLIC HOLIDAYS.

In the Postal and Telegraph Service many officers have to work on public holidays, and in order to compensate them for attending on such days it has been arranged to allow them an extra week's leave per annum. This concession necessitated the appointment of twelve additional Operators.

From this report it will be seen, amongst other improvements in the conditions affecting this particular class of officers, that out of a staff of 540 Telegraph Messengers, each in receipt of the maximum salary of £52 per annum on the 31st December, 1898, no fewer than 137 received increases or were promoted to other positions during the year 1899. The Board are well aware that with their utmost efforts

efforts to improve the status of the minor officials it will be impossible to meet all the hard cases which come under their notice. It is pitiable that young men, in some cases little more than lads, in receipt of small salaries, should take upon themselves the responsibilities of married life; but unfortunately some of them do so, and even if they were capable of filling them, places cannot be found which carry the necessary remuneration to enable them to sustain the obligations they have contracted. Most of these officers must face the difficulty and seek employment elsewhere, if they desire any adequate improvement of their condition, for there is not sufficient scope in the Department to provide places for the large number of lads who enter as Messengers, and who helplessly remain as such, long after they have outlived their best service in that capacity, for it is well known that boys between the ages of 14 and 18 make the best Messengers. The Board would only be misleading them if they held out any better prospects for the majority of them, for under no system of promotion can adequate advancement be secured. The same difficulty has been found to exist in England and also in the other Colonies, where a limit is fixed to the term of employment, and this the Department are endeavouring to do here, by making each entrant sign an acceptance of office on the understanding that should no other position be available for him by the time he reaches the age of 20 years, his services will be dispensed with in accordance with the terms set forth in the 206th clause of the Public Service Regulations, which reads as follows:—

Should the staff of messengers in receipt of £52 per annum be in excess of the requirements, and it is found desirable to direct the retirement of some of the officers employed, the Board may grant leave of absence on full pay to the extent of not more than four months to the officers marked out for retirement.

The Department have also thought it necessary to append the following note to all intimations of appointment, which, under the circumstances, is a very wise precaution:—

It should be understood that owing to the very large number of Telegraph Messengers already employed at the maximum salary there is very little prospect of those now joining being promoted to other positions, unless they qualify themselves by passing the prescribed examination for appointment either to the Clerical Division or as Postal and Telegraph Assistant.

With reference to this it is pleasing to know that several officers in the General Division have, by competitive examination, won their way into the Clerical Division.

It is to be wished that a check could be given to the plethora of what may be called "adult boys"—if such a solecism may be permitted—which now prevails, and which the Board fear will continue until the new system has had time to make its effects felt.

THE BONUS SYSTEM.

The Board desire to draw attention to what in their judgment threatens to become an abuse, viz., the extension of the bonus system, and in this term is also included overtime payments. Claims are constantly being preferred for payment for extra services outside the supposed scope of the duties for the discharge of which an officer receives his regular salary.

The Board, by the terms of section 10 of the Public Service Act, are empowered to determine what "salary, fee, or allowance is fairly appropriate to the work to be performed" by the servants of the State; all recommendations for the payments of bonus therefore have to be submitted to and approved by the Board.

The Board feel that it is extremely difficult to refuse sanction to such payments in face of the recommendations of the Permanent Heads. In saying this, they do not wish it to be understood for one moment that they question the *bona fides* of such advice; but they cannot help observing that there is a tendency to abnormal growth in the practice, on which they would like to see a tighter rein held. They are anxious that officers should understand more clearly than some appear to do at present, that the receipt of a regular and fair salary involves obligations which sometimes are operative beyond the regular working hours. The Board are aware that a large number of officers willingly work overtime, without hope of or wish for extra reward, and they are also conscious that in many instances additional payment is due; they only wish to suggest that a brake be put on what appears to be a growing demand, lest it develop into an unfair tax upon the State. It is difficult to provide a remedy. Perhaps, to some extent, this would be secured if it were made a rule that a statement should every year be put before Parliament showing the amount paid respectively to each officer by way of bonus or overtime, together

together with the amount of the regular salary received, and the reason for giving the extra payment, exclusive, of course, of payment to persons who are paid at a daily wage.

Parliamentary criticism would probably attend such a plan, and supply a wholesome corrective to any possible extravagance.

SUPERANNUATION, &C.

The Board have received the report of their Actuary on the state of the Superannuation Fund as it appeared on the 1st of January of this year. A copy of this document will be found in Appendix XIII,* and Appendix XIV|| gives a list of all those persons who were drawing pensions on the 31st of December, 1899, together with a statement of the amounts received by them respectively. Appendix XV† shows the pensions recommended during the year 1899 amounting to £5,580 8s. 6d., most of which appear in the larger return, contained in Appendix XIV.|| Appendix XVI¶ contains the particulars of the gratuities recommended for payment during the same period in accordance with the provisions of the "Public Service Act of 1895" and the "Civil Service Act of 1884," and totals £6,591 17s. 11d. These cases refer to officers retired for reasons other than offences, in which circumstance the payment of any sum by way of compensation is precluded by the Act. Appendix XVII‡ is a statement of refunds of officers' contributions to the Superannuation Fund in accordance with the provisions of section 62 of the "Public Service Act of 1895" and the "Public Service Superannuation Act, 1896." The total amount is £5,753 11s. 10d., and relates principally to those persons who elected to discontinue to contribute to the Civil Service Superannuation Fund, and who were retired on the recommendation of the Board at their own request, on the understanding that no gratuity should be added to the amount of the refund. The circumstances which led to this arrangement were fully detailed on pages 5 and 6 of the Board's last Report, and need not, therefore, be repeated. Appendix IA** gives the names of those persons whose pensions were increased to cover their service prior to the passing of the Public Instruction Act of 1880, as provided by the Public Service (Superannuation) Act of 1899. It will be seen that twenty-one cases were dealt with, and that the total amount of pensions was increased from £1,169 17s. to £1,821 18s. per annum.

Before dealing with the Actuary's report, the Board propose to refer to a few of the salient facts which were brought out in their report of the 21st June, 1898, which dealt with the Superannuation Fund as on the 31st December, 1897. It was therein shown that a net capital liability then existed of £1,344,541—that is to say, that that amount on the date stated would have been sufficient to have met all claims until their final extinction, when both the claims and capital sum would have ceased to exist; in other words, the provision of that sum at that date would have relieved the State from all further claims on account of Superannuation.

The distribution of this liability was shown as follows:—

	£
General Service—liability on account of officers already retired and officers now contributing to the Fund, but entitled to an allowance on retirement	1,288,166
Railway Service—liability on account of 156 officers already retired, and 564 officers now contributing to the Fund	372,631
5,603 discontinuants in the General Service, £180,359; and 226 in Railway Service, £11,534	191,893
	<u>£1,852,690</u>
Deduct balance at credit of Fund, £420,649; and value of perpetual endowment, £87,500	508,149
Net liability	<u>£1,344,541</u>

Or, to put it in another light:

Value of existing pensions (in excess of contributions towards the Fund by pensioners, so far as such contributions remain unexhausted by payment of pensions, &c.)—deficit	736,576
Value of prospective pensions to present contributors in excess of future contributions and past contributions of such persons—deficit	674,047
Value of contributions of discontinuants	Equal to share of credit balance.
Total	<u>£1,410,623</u>
Less: Value of endowment of £3,500 in excess of claims thereon—surplus	66,082
	<u>£1,344,541</u>

Since the date of that report nothing has been done to place the fund on solvent lines, but rather the contrary, the Superannuation Act of 1899 having put an additional liability on it of nearly £5,000 per annum.

The fund on the 31st December, 1897, was estimated to last, unaided, for about seven years. With the addition referred to, it will probably become exhausted in about four years from the present time. The 54th section of the Civil Service Act of 1884 provides that "at the expiry of every three years, an actuarial investigation shall be made as to the state and sufficiency of the Superannuation Account." The last investigation was made on the period ending the 31st December, 1897, with the result above given. The next investigation will, therefore, take place as from the end of the present year, which happens at a very convenient period, as the quinquennial regrading of the whole Service must then also take place, when any possible changes which may affect the Service from a superannuation standpoint will be duly accounted for.

To deal now with the Actuary's report. A perusal of it will show that the following are the principal facts disclosed.

The receipts proper for the year (1899) were as follows:—

	£	s.	d.
4 per cent. Contributions by Officers	25,885	15	10
Vote under Schedule B, Constitution Act	3,500	0	0
Interest on Balances	14,341	17	8
Sundry Special Receipts	1,106	5	1
Total	£44,833	18	7

The disbursements for the same period were:—

	£	s.	d.
For Pensions	95,778	18	10
„ Refunds	6,682	0	9
Gratuities, &c.	1,250	4	9
Total	£103,711	4	4

The accumulated fund is, of course, steadily diminishing; during the year it decreased by the sum of £58,877 5s. 9d., leaving a credit balance at the end of the year of £298,419 12s. 5d.

On 31st December last there were 823 pensioners on the fund, of whom the Railway Department contribute 165. The total pensions amount to £99,707, of which Railway servants draw £17,650. The particulars are given in Appendix XIV||, before referred to.

At the end of the four years, as pointed out, the capital will have become exhausted, and the only yearly revenue then available will be about £29,000—in this sum is included the statutory annual vote of £3,500 secured under the terms of the 53rd section of the Civil Service Act of 1884. The deductions from the Civil and Railway servants are at present drawn from the salaries of 2,445 persons, of whom 524 are Railway officers. The liability on account of those officers who elected to discontinue their contributions to the fund stands at about £190,000.

From rough calculations which have been made in advance of the next valuation of the fund, it may be taken that the maximum amount which will be required to pay pension requirements, in any one year, is £100,000; so that deducting the statutory provision of £3,500, and the annual contributions from the civil servants, the total deficiency for any such period would come to an amount between £70,000 and £80,000, this being on the assumption that the fund will be allowed to drift until it has become exhausted. Of course, this annual deficiency would gradually decrease until at last both pensions and pensioners would for ever disappear.

Even taking the worst view of the case, viz., that at the end of four years, the State would have to find £80,000 per annum with diminishing amounts thereafter, it is instructive to note how much smaller our liabilities are in this regard than those of the sister Colony of Victoria. In that Colony there is a pension list of 2,342 persons against 823 for New South Wales, and an annual liability of £247,900* as against £99,707† for this Colony. In this Colony the Civil Servants contribute

4

* Taken from the Victorian Year-book for 1897-8.

† See Actuary's report on page 71. The Victorian figures for that year are not available, but for a basis of comparison the figures given will answer all practical purposes.

4 per cent. from their incomes; in Victoria the State bears the whole liability. The time is quickly coming when the Civil Servants who have been mainly instrumental in providing pensions from their salaries for those who have been retired, will themselves become pensioners, and it is evident, if the Government do not come to the relief of the fund, that these officers will have to be told that the savings taken from them compulsorily have been expended on others, leaving nothing for them.

This position is, of course, an impossible one, all parties in the State having again and again recognised the responsibilities of the Government to their servants in this matter; the only question, therefore, is to determine what method shall be adopted to meet the difficulty. It has been shown in the earlier part of this report, that on the 31st of December, 1897, a capital sum of £1,344,541 was required to meet the liabilities on this fund, since then two more years of drifting have passed, and it may be supposed that the present year will have gone before the matter will be settled, three years extra liabilities will, therefore, have to be added to the capital sum previously named, roughly bringing up the total amount to the 31st December, 1900, to the sum of £1,500,000.

It will probably be fifty years before the last of the pensioners will have passed away; of course only a few octogenarians will then be left, but provision must be made to meet the whole period. The annual cost of the capital sum named, reckoned at 3 per cent. interest, would amount to £45,000, and a sinking fund of £13,298 4s. 9d. per annum, carrying compound interest at the same rate, would pay it off in the time mentioned. Of course these figures are merely given as an illustration of one aspect of the case, and it is hardly necessary to say are not intended even as suggesting the way to meet the difficulty.

Although a large amount is involved in the settlement of the matter, the *per contra* view should also in fairness be taken, because it is an undoubted fact that the existence of the Superannuation Fund has rendered easy the reorganisation of the Departments, by which the State has saved much more than the sum required to place the Fund on a satisfactory basis. It must be remembered also that the Civil Servants have contributed from their salaries since 1885 the large sum of £853,340, and that the fund started with an initial liability estimated at something like £1,000,000, which, on ordinary principles of equity, it should never have been called upon to bear. In point of fact, the contributions of the Civil Servants have been used to meet liabilities which properly belonged to the State, and towards which the Government only contributed five annual instalments of £20,000 each, which, at the inception of the fund, was equivalent to £92,594.

GRATUITIES TO WIDOWS.

During the past year 7 claims under the 51st section of the Civil Service Act of 1884 have been received by the Board from widows of deceased officers. Of these, 3 have been allowed; 2 have been rejected as not coming within the rules laid down for the guidance of the Board; while in 2 other cases the claims have not yet been finally determined. [*Appendix XVIII**.]

* Page 82.

The Board are often placed in a painful position with regard to cases of this class, in which their duties are apt to come in conflict with their sympathies. The terms of the Act relating thereto are rather difficult of interpretation. The clause reads as follows:—

51. If any officer die leaving a widow or any children under sixteen years of age in necessitous circumstances, the Governor may, on inquiry into the case, grant out of the Superannuation Account to such widow or children a gratuity not exceeding six months salary which such officer shall have been receiving at the time of his death.

The perplexity lies in determining the precise meaning intended to be attached to the term "necessitous circumstances." The rule of the Board was to recommend the full gratuity in cases where no assets were available from the estate of the deceased officer, or if assets had been left, to recommend the granting of such sum as would with the net assets of the estate make up the full gratuity. In cases where assets were available which were equal, or more than equal, to the amount of the full gratuity the practice was not to recommend any allowance.

These

These rules were also, it is understood, observed by the late Civil Service Board. The Public Service Board, however, felt that these regulations were not quite equitable, inasmuch as no allowance was made in them for the differing circumstances of each case. One widow, for instance, might have a young and dependent family; another no family at all; while yet a third might have a family able and willing to help their mother. The Board, after considering the matter in all its bearings, decided to recommend to the Government that these rules be amended by allowing in cases where widows are left with dependent children of 14 years and under (or of any age in case of mental or bodily incapacity which prevents the son or daughter from earning a living) the sum of £10 for each such child, in addition to the gratuity which would otherwise be payable to their mothers, provided that the total gratuity did not exceed that allowed by law. To this the Government assented; but the Board are conscious that, even with this amendment, cases arise which need more liberal treatment—such as, for example, where the assets consist of land which practically cannot be sold, and which not only brings in no revenue, but creates embarrassing obligations.

The Board have had several interviews with Mr. Wise on the subject, who has suggested that perhaps Parliament will be willing to put at the disposal of the Government small sums each year to meet exceptional cases. If this were done the Board would then deal with each case in accordance with the rules, leaving it to the Government to provide further assistance where circumstances of special need are manifest.

It is right, however, to point out in connection with the whole subject that the Board have no statutory obligation to make any recommendations in such matters; but the Government have requested them to undertake this duty.

COMMITTEES.

* Page 92.

A reference to Appendix XIX* will show that during the year 1899, 65 Committees sat to deal with 264 vacancies, which occurred chiefly in the General Division, for which examinations were not held, and that 4,453 candidates submitted their names in connection therewith.

The Committees, as the return shows, were selected from officers in every branch of the Service, except in one instance where a gentleman not in the Service, willingly gave his valuable time to this work without remuneration. To all these gentlemen the Board wish to express their obligations. Nearly in every instance the appointments made have been satisfactory.

Some exception has been taken to the Board resorting to the use of Committees in the matter of appointments. A little consideration, however, will show that it is impossible for any three persons to deal effectively, without help, with the thousand and one questions which claim the Board's attention, and they urge, as they have done on more than one occasion, that they have the inherent right to seek such assistance. They are well aware that they cannot, except in certain circumstances defined by law, delegate their functions, but they maintain that by securing the benefit of the accumulated store of knowledge which is to be found in the Service and elsewhere, they are only doing what business men are expected to do; with such help their decisions are based on the wisdom which the experience of many minds only can supply. The doing of this they contend in no way lessens their responsibility, because the work performed by these Committees practically resolves itself into that of the collection of the data which they need to enable them to come to their decisions.

There is only one case on the list which perhaps calls for remark, viz., that of the proposed appointment of Government Metallurgist, rendered vacant by the retirement of Mr. Taylor. The position was a good one, carrying a salary of £1,050 per annum. The Committee which reported on the matter came to the conclusion that owing to the altered circumstances of the Mining Industry there was no need to fill up the place. To this suggestion the Government assented. Consequently a considerable salary has been saved. The Board regret the trouble to which candidates have been put to no purpose; it could not, however, be avoided.

* Page 84.

In Appendix XX* will be found a copy of the Report which led to the decision referred to.

POSITIONS ADVERTISED.

Appendices XXI* and XXII† give particulars of the positions which have been advertised during the year which closed on the 31st December last. It will be seen that 833 vacancies, actual and prospective, were thus dealt with,—of this number 721 were advertised in the newspapers, and 112 by notices displayed at the local post offices. These latter related entirely to telegraph messengers, who are selected according to the terms laid down in Regulation 277, paragraph 5, which reads as follows:—

* Page 85.
† Page 87.

Where the work to be performed does not require any special knowledge, and where the principal qualifications necessary are good character and physical fitness, the Committee shall make a selection of the candidates who appear *prima facie* to be eligible, and should the number of such eligible candidates exceed the number of vacancies to be filled, then the Committee shall hold a ballot, and the person or persons successful at such ballot shall be recommended to the Board for appointment, if on inquiry they are found to be of good character and otherwise fit for the position to be filled. Provided that in the event of any candidate being rejected as unsuitable, the reasons for such rejection shall be fully stated by the Committee in their report to the Board.

On the whole this system has worked satisfactorily, and has this advantage that it effectually excludes favouritism.

With regard to the positions for which applications were invited in the newspapers, only two of capital importance were included, viz., that of Government Metallurgist, which is referred to on the preceding page, and that of Third Examiner of Titles.

EDUCATION DEPARTMENT.

The Board have not thought it necessary to refer at any length to this Department, which, although coming under its jurisdiction, in common with all other Government Departments covered by the provisions of the Public Service Act, is exhaustively dealt with in the admirable reports which are from time to time issued by its Minister.

The regulations governing the Staff were, after revision by the Department, issued by the Board, and all appointments, transfers, and promotions are recommended by the Board on the certificate of the Under Secretary that the recommendations are strictly made in accordance with the terms of those Regulations.

The Board felt that it would be disastrous to unduly interfere with a great State organisation such as the teaching staff of the Department is. They therefore have contented themselves by securing that the Regulations shall be strictly administered.

These remarks apply to the Educational Staff only; the Clerical Staff comes within the lines laid down for the Service generally, and is dealt with accordingly.

Section 46 of the Public Service Act lays down the principles which govern both the Department and the Board. It reads as follows:—

Any power of appointment, dismissal, or control of officers conferred upon the Minister, or upon the Minister with the approval of the Governor, or conferred upon the Governor alone under the provisions of the Public Instruction Act of 1880, shall, after the commencement of this Act, be exercised by the Governor upon the recommendation of the Public Service Board, in accordance with the provisions of this Act, and not otherwise, and all officers or persons employed under the provisions of that Act shall be deemed to be under the control of the Board, for the same purposes and to the same extent as the other branches of the Public Service to which this Act applies.

CONDITION OF DEPARTMENTS.

The Board have reason to believe that the feeling of uncertainty which obtained when they first undertook their work is rapidly passing away, giving place to an improved morale and increased efficiency in the Service. That soreness still remains in some quarters is to be expected; but the blame, if any, for this should not be placed on the shoulders of the Board, but rather on that condition of things which rendered a reorganisation inevitable. It is not to be wondered at, that amongst the large body of Public Servants (upwards of 16,000) who come under the control of the Board, in some cases officers have been placed in positions which time has shown they are not quite fitted for—that, in fact, to use a homely illustration, there are some “square pegs in round holes.” The Board are doing their best to remedy these defects. They are confident, however, that their work will not be judged by isolated instances of possible incongruities, but as a whole, and in that belief they leave the matter to the verdict of the community.

AGE STATISTICS.

A Return has been compiled in the Board's office giving the following information on the above subject.

The Public Service List for the year ending the 30th June, 1999, shows the number of officers to be 16,004. The Return here quoted from has relation to 6,981 of that number. The persons not included are :—

Teachers	4,822
Warders, &c., of Lunacy and Prisons Departments	...						842
Court-cleaners, District Registrars, &c.	629
Telegraph Messengers, Mechanics, &c.	864
Non-official Postmasters, &c.	1,776
Mining Registrars, &c.	90
							9,023

Of the 6,981 officers dealt with, 249 are over 60 years of age, or 3·5 per cent. of the total; eighty of these are 65 years of age and upwards—leaving 169 who are between the ages of 60 and 65.

The total salaries paid to those over 65 amounts to £19,600; that paid to those between 60 and 65, £40,237—or a total of £59,857 2s. to both classes. The oldest person in the Service is 86 years of age, and he occupies the position of Tower Attendant at the General Post Office; the youngest is a Messenger in the Mines Department, aged 15 years. The average age of the Service thus dealt with is 36·6 years.

These particulars are, perhaps, more curious than important, and yet they have a bearing on some of the questions which need a careful study on the part of the Board.

From a perusal of this statement it will be seen that the Board have not largely availed themselves of the provisions contained in the 68th and 69th sections of the Act, the reason for this being that some of the most valuable Public Servants are over the age of 60 years. The Board do not wish to imply by this statement that all the officers over 60 years of age who have been retired were unfit for work. On the contrary, some of them were capable men, but the necessity presented itself of reducing numbers, when, of course, the services of the younger officers were retained. An illustration of this is to be found in the Lands Department, where two land districts were amalgamated. The older Chairman was retired, and the younger one took charge of both districts. There are also somewhat similar instances in connection with the Police Magistracy. The portions of the 68th and 69th sections of the Act referring to this subject read as follows :—

68. * * * * If any such officer continue in the Public Service after he shall have attained the age of sixty years, he may at any time before he attain the age of sixty-five years be called upon by the Governor, acting upon the recommendation of the Board, to retire; and every such officer so called upon to retire shall retire accordingly.

69. Every officer, whether appointed before or after the commencement of this Act, if he attain the age of sixty-five years after the commencement of this Act, shall retire immediately on attaining that age, unless he is required, notwithstanding his age, to continue to perform his duty in the Public Service as hereinafter provided, and is willing so to do: Provided that the Governor may, notwithstanding that any officer has attained the age of sixty-five years (if the Board certify that in the interests of the Public Service it is desirable that such officer should continue in the performance of the duties of his office, or of any office in the Public Service to which he may be appointed, and if such officer be able and willing to do so) from time to time direct such officer to continue in the Service for such fixed time not exceeding twelve months (as the Governor in each case directs) or during pleasure. * * * *

CONCLUSION.

Before concluding this Report the Board have to express their obligations to their Secretary and Staff for the zealous and valuable work which they have accomplished, and to the many officers of the various Departments who have so loyally seconded their efforts for the improvement of the Service—a service which contains within its ranks officers who would bring credit to any Government,—and who, to use the words* of the late Lord Lisgar (then Sir John Young), “ have duties entrusted

* NOTE.—The full text of the speech will be found in Appendix XXIII, page 87.

entrusted to them of no mean importance—nothing less than the administration of the public affairs under the supervision of the responsible Ministers who are placed over them, in consequence of their possession of the confidence of Parliament—duties to be performed in strict obedience to the laws, and in accordance with confirmed rules, and with the traditions which experience has established in the Departments—rules and traditions which are not to be set aside at the discretion or, it may be, at the caprice of any individual, however popular, or at the bidding of any favourite, however powerful, whether an individual or a body of men.” “Now,” to quote still further from the same speech, “on these grounds the Civil Service should not be regarded as a mere band of clerks to register the decrees of others. In England they stand on a much higher footing. The Civil Service of that country has achieved a high and recognised place in the realm. It is the trusted adviser, the confidant of successive Ministries; it assists all with equal diligence and fidelity, without reference to distinctions of politics.

“The knowledge of the rules which are laid down and of the precedents which are to be followed gives the members of the Civil Service a great influence, inasmuch as they are the guides by which the Ministers, if they are wise, direct themselves—particularly those members of the Civil Service who have, by long experience in years past in their offices, acquired that position which enables them to say, ‘Such and such are the precedents which ought not to be departed from.’”

That Public Servants are endeavouring, according to their several abilities and opportunities, to realise the high ideals set forth in this pertinent address, and are preparing themselves in common with their fellow colonists to enter upon the more opulent life which is opening out to the community in the near advent of federation, is the expectation of the country, in which the Board are confident it will not be disappointed.

We have the honor to be,

Your Excellency’s most obedient Servants,

GEO. A. WILSON,	} Members of the Public Service Board.
J. BARLING,	
C. DELOHERY,	

Office of the Public Service Board,

50, Young-street, Sydney, 18th May, 1900.

LIST OF APPENDICES.

* These officers having been re-employed in the Public Service, the Board have recommended that while such employment continues the payment of pension be held in abeyance.

† Payment of gratuity has not been recommended by the Board in consequence of the officer's re-employment. The amount of refund of contributions has, however, been paid.

‡ The assignment to this officer of an additional pension, making in all £106 7s. per annum, has since been recommended.

Appendix No. Ia.

In the following cases the payment of additional pensions has been recommended by the Board, in accordance with section 1 of the Public Service (Superannuation) Act of 1899, which provides that in cases where persons retired since the passing of the Public Service Act who were employed in the Education Department prior to the passing of the Public Instruction Act of 1880, all such service shall be counted for the purpose of computing retiring allowances:—

Appendix No. II.

REPORT of the Public Service Tender Board, 1899.

Sir, Department of Public Service Tender Board, Sydney, 23 February, 1900.

We have the honor to submit, for the information of the Premier and Colonial Treasurer, and for transmission to the Public Service Board, the following report of the operations of the Tender Board during the year ended the 31st December last.

Forty-nine ordinary and two special meetings have been held by the Board, the attendance being as follows:—

Under Secretary for Public Works	28
Inspector-General of Police	49
Inspector-General of the Insane	41
Comptroller-General of Prisons	42
Engineer-in-Chief of Telegraphs	43
Government Printer	39

We regret that during the year Mr. R. R. P. Hickson, Under Secretary for Public Works, was compelled to tender his resignation of the Chairmanship of the Board, the time at his disposal being too limited to enable him to give that attention to the duties which he considered requisite. A successor has not yet been appointed, but the matter is now we understand under the consideration of the Public Service Board, and in the meantime the duties are being performed by Mr. Edmund Fosbery, the Inspector-General of Police, who also, however, has found it incumbent upon him to request that he may be relieved of the duties.

A statement will be found attached (Appendix A) showing that a total sum of £325,873 17s. was expended throughout the Service during the year for supplies and services, including forage and provisions, under contracts entered into by the Board.

The value of the stores, stationery, and furniture supplied through the Board during the year reach a total of £115,876 1s. 1d.—£100,597 12s. 6d. being defrayed from the Vote for Stores and Stationery, and £9,839 15s. 8d. from Special Departmental Appropriations, the balance, £5,438 12s. 11d., being the value of the labour in the manufacture in H.M. Gaols of articles for use of the Public Service. (See Appendix B.)

For purposes of comparison, the Board have also prepared a statement (Appendix C) showing the expenditure from the Vote for Stores and Stationery during the three financial years ended the 30th June last, and the three previous years, from which it will be seen that the expenditure for the services has decreased to the extent of nearly £9,000 per annum. For the current financial year the expenditure is estimated at £87,000, showing a still further reduction of £15,000. In addition to this it should be borne in mind that as the Board are the sole authority for procuring stores and other materials and requisites for the Public Service, they have been able to make a considerable saving on charges against Departmental Votes, from the fact that many officers found it necessary, after the Board's appointment, to considerably curtail their requisitions when they learnt that a number of the items asked for were objected to as lavish expenditure. The waste, therefore, which has in the past existed in the distribution of stores, &c., has virtually been reduced to a minimum by the Board's action.

The Board continue to exercise the closest scrutiny over all requisitions for furniture for public offices, &c. Such requisitions are reported upon by competent officers, after full inquiry, before being submitted to the Board, and in no case is approval given where an article can reasonably be dispensed with, or where an article of an equally serviceable and durable but less expensive character would meet all requirements.

The Board, however, on assuming office under the Executive approval and regulations, were led to expect that the heads and chief officers of the Public Departments would co-operate with them in carrying out the regulations and effecting a reduction in the public expenditure for supplies generally, but regret to state that they have been disappointed in this expectation.

As an illustration of the necessity for having such a check as is now placed upon all requisitions for furniture, the Board bring under notice an instance in which a bookcase was applied for. Upon inquiry being made it was found that practically there were no books to put in the case, and the officer signing the requisition stated that he did not make any inquiries as to the necessity for the article, as he understood that the Board would deal with that part of the matter.

Requisitions for furniture of an estimated total value of £14,450 were considered during the year of which items amounting in all to £1,300 were disallowed, and others reduced to the extent of a total sum of £1,150.

The

The Board have brought under the notice of the Public Works Department the desirability in the erection of all public offices in future of taking advantage of recesses therein for fitting up shelving and pigeon-holes (with doors if necessary) for books, records, printed forms, &c. Accommodation for such purposes has hitherto been provided by the supply of cabinet-made furniture, and the Board are of opinion that a considerable saving would be annually effected if their suggestion were adopted.

The Board record with pleasure the co-operation of the Chief Medical Officer of the Government in their efforts to effect economy in the supply of drugs, &c., for use in gaols, benevolent asylums, and other Government institutions. The Chief Medical Officer—through whom all requisitions for such supplies pass—has issued a circular directing that concentrated infusions be substituted for tinctures whenever possible; that the variety of drugs asked for be kept within narrow limits; that requisitioning for preparations which are merely “elegant,” and consequently expensive, be avoided, and ordinary forms of therapeutic value substituted therefor; that every requisition for an unusual kind of drug, or for an unusual quantity of any drug, be accompanied by a special explanation furnished by the visiting surgeon; and that in every case the quantity of drugs asked for be strictly proportionate to the consumption actually shown for the last preceding term.

Certain necessary amendments have been effected by the Board to the General Conditions of Contract.

Clause 3 has been amended to provide that, in cases where materials of an inferior quality or differing from those ordered are supplied, and are not immediately replaced when the contractors are called upon to do so, the officers may purchase such substitute therefor as in their opinion may be most suitable. Clause 4 has also been altered to provide that no charge shall be made by the contractors for packing or any description of container whatsoever. The necessity for such amendments was brought under notice by cases in which disputes had occurred, and in which the Crown Solicitor’s opinion was adverse to the Government.

Reference was made in our last Report to the fact that, as the conditions of contract adopted by the Board provided for the direct delivery of stores, &c., to the various offices and institutions, and at such times and in such quantities as might be required, there appeared to the Board to be no longer any necessity for retaining the horses and vehicles in use at the Government Stores. A recommendation that the same be disposed of, and that the drivers be either retired or provided for in other branches of the Service, has since been approved and given effect to, and the Board anticipate that a saving to the Government of £400 per annum will thereby be effected.

It has been found necessary to introduce a time-table and special instructions for the guidance of officers of the Public Service in connection with requisitions for stores and stationery. Requisitions were being received almost daily from some of the Departments, and in some instances from some half-dozen different officers occupying rooms in the same building and under one Department. In this way requisitions were received for such small items as half-dozen pencils, half-ream foolscap, two boxes nibs, &c. The ordering of such very small quantities, which under the conditions of contract had to be delivered direct to the officer requisitioning, operated somewhat unfairly upon the contractors, and would, if continued, undoubtedly have had the effect of increasing future contract rates. It also necessitated a large increase of clerical work in this Department.

The time-table as approved provides for quarterly supplies for offices and establishments situated in the Metropolitan District and for all manufacturing Gaols, half-yearly for Hospitals for Insane, Local Land Boards, and District Survey Offices, and yearly for all other country offices. In the case of the latter the Board anticipate a large saving in the cost of packing and carriage.

It is, of course, understood that requisitions for requirements of an exceptional or unforeseen character will be dealt with as received.

Recognising the necessity for introducing a uniform practice throughout the Service in connection with the transmission, inter-departmentally, of stores, &c., the Board caused inquiry to be made into the whole matter, and as a result adopted the following as the most economical system practicable, and issued instructions to the various Departments accordingly:—

- (a) All parcels not exceeding 11 lb. in weight to be forwarded by Parcels Post, except in cases where the distance does not exceed 150 miles, when the Railway Parcel Service, if possible, should be made use of.
- (b) All consignments over 11 lb. in weight to towns served by a railway station to be forwarded by Railway Parcels or Railway Goods, whichever is the most economical.
- (c) All consignments over 11 lb. and not exceeding 1 ton in weight to places not connected with the Railway System to be forwarded through Messrs. Wright, Heaton, & Co. (Ltd.), a tender by that firm for the Service for a period of three years having been accepted.
- (d) For consignments upward of 1 ton in weight to places not connected with the Railway System, special rates to be obtained beforehand.

The rates of the contract referred to in clause (c) are very much below those of the old schedule; which had been in operation for the previous ten or twelve years, in some cases as much as 60 per cent.

As regards goods despatched direct by the various contractors, Clause 4 of the General Conditions of Contract provides for the cheapest routes to be adopted, and for a reduction of the charges in cases where such routes have not been availed of.

In order to carry out the necessary reorganization of the Department, the Board some time ago recommended certain changes amongst the staff at the Government Stores. As already stated in this Report, the drivers have been dispensed with, but no action has yet been taken on our other recommendations, and the efficiency of the administration is hampered as a consequence. This matter we would urge should receive immediate attention.

We have, &c.,
EDMUND FOSBERY, Acting Chairman.
ERIC SINCLAIR,
FREDK. W. NEITENSTEIN, } Members.
P. B. WALKER,
W. A. GULLICK, }

The Under Secretary for Finance and Trade.

Amount estimated to meet expenditure for current year ending 30th June, 1900, exclusive of £11,500 incurred during last year, but not paid within that year..... £87,000

Appendix No. III.

REPORT of the Board of Examiners for the Public Service.

Board of Examiners for the Public Service,

7, Richmond-terrace, Domain, Sydney, 5 February, 1900.

The Chairman, Public Service Board,—

Sir,

I have the honor to report that during the year 1899 two examinations have been held of candidates seeking admission to the Clerical Division of the Public Service—the first in March, and the second in December. The work in connection with the latter has just been completed, and the results are now in your hands.

For the March examination there were 227 candidates, who were distributed at thirty-two different centres of examination, viz.—Sydney, Albury, Armidale, Bathurst, Bega, Berrima, Bowral, Broken Hill, Bungendore, Burrowa, Coonamble, Coraki, Cowra, Glen Innes, Goulburn, Grafton, Hay, Kempsey, Kiandra, East Maitland, Mudgee, Newcastle, Nowra, Orange, Rylstone, Scone, Singleton, Tamworth, Tenterfield, Wagga Wagga, Warialda, Wollongong. One hundred and fifty-two applied to be examined in Sydney. Sixty obtained sufficient marks to qualify them for a pass. For the December examination there were 304 candidates, distributed at the following centres, forty-one in number:—Sydney, Albury, Armidale, Bathurst, Bega, Bombala, Bowral, Bungendore, Burrowa, Camden, Cootamundra, Coraki, Deniliquin, Forbes, Glen Innes, Goulburn, Grenfell, Hay, Hill End, Kempsey W., Kiama, Lismore, Lithgow, E. Maitland, Milton, Moree, Moruya, Mudgee, Murwillumbah, Newcastle, Orange, Picton, Rylstone, Scone, Tamworth, Taree, Tumberumba, Wagga Wagga, Warialda, Windsor, Wollongong. There were 193 Sydney and 111 country candidates. Eighty-five obtained the requisite number of marks for a pass. On this occasion female candidates were allowed to compete. Sixty-three applied to be examined, and ten secured a place on the Pass List.

From these statements three things are apparent—(1) that centres of examination are arranged to suit, as far as possible, the convenience of individual candidates; (2) that the candidates are not confined to Sydney, but are fairly distributed over the whole of the Colony; and (3) that in spite of the admitted difficulty of the examination, the number of candidates is increasing and the competition becoming keener. The marks obtained by the successful candidates at the last examination indicate a considerable improvement in the quality of the work as compared with that of previous examinations, the marks of the best candidates, in particular, being much in advance of the highest aggregate obtained on former occasions.

In connection with the March examination, the following additional examiners were appointed to assist in marking the papers:—Messrs. E. M. Moors, M.A., A. Newham, B.A., C. Hardy, B.A., C. Brennan, M.A., W. G. Woolnough, B.A., and A. W. Jose. For the December examination:—Messrs. E. M. Moors, M.A., A. Newham, B.A., D. G. Stewart, M.A., C. Hardy, B.A., J. Le Gay Brereton, B.A., W. G. Woolnough, B.A., C. Brennan, M.A.

Before concluding this report, I desire to convey the thanks of the Board of Examiners to the Senate of the University of Sydney for allowing them to use the Great Hall of the University in connection with the examination of Sydney candidates; to the Under Secretary for Public Instruction for his courtesy in permitting them to use the services of the Inspectors of Schools as Superintendents at various country centres; and to those gentlemen for the efficient manner in which they supervised the examinations; and also to the ladies and gentlemen who consented to act on local supervising committees.

Appended will be found lists of the persons who acted as Superintendents in connection with the examinations referred to in this report.

I have, &c.,
T. BUTLER,
Chairman.

PUBLIC Service Examination, March, 1899.
Sole Supervisors, and Committees of Supervision.

Centre.	Sol Supervisor, or Committee, with Secretary.
Sydney	Mr. W. H. Nicholls, B.A.

Appendix No. IV.

SUBJECTS OF EXAMINATION OF CANDIDATES FOR ADMISSION TO THE CLERICAL DIVISION.

Extract from Regulations in Supplements to the "Government Gazette," No. 384, 5 May, 1898, and No. 431, 19 May, 1898.

EVERY Candidate for admission to the Clerical Division shall be examined in the following subjects:—

	Full mark value.
(1) <i>Handwriting</i> —To be valued for neatness, simplicity and legibility, judged by the answers to the examination papers in dictation and arithmetic	400*
(2) <i>English</i> —Dictation	200*
(3) <i>English</i> —Composition, précis writing, parsing, analysis (viz., division into clauses, full subjects and full predicates), and derivation of words	400*
(4) <i>Arithmetic</i> —The full course, such as is usually contained in a standard treatise	300*
(5) <i>Geometry</i> —Euclid, First book, including easy exercises	100
(6) <i>Geography</i> —Outlines of physical and political geography, and the geography of the Australasian Colonies in moderate detail	300
(7) <i>English History</i> —From the middle of the 18th century to the present time, especially with reference to the Colonies and Dependencies	300

And may be examined in not more than two of such of the following additional subjects as he may have selected in his application:—

(a) <i>Mathematics</i> —Euclid, Books 2 to 4, and 6, including easy exercises on these books and Book I. Algebra up to and including quadratic equations	350
(b) <i>English</i> —A prescribed author, the same as that prescribed for the Junior Examination of the current year	300
(c) <i>Latin</i> , including easy sight translation, easy composition, and grammar	300
(d) <i>French</i> , same as in Latin	300
(e) <i>German</i> , same as in Latin	300
(f) <i>Elementary Chemistry</i>	300
(g) <i>Elementary Geology</i>	300

The maximum number of marks allowed in respect of each subject shall be those placed opposite each respectively.

NOTE.—No candidate for admission to the Clerical Division shall be considered eligible for employment unless he has been awarded at least 60 per cent. of the full marks in the subjects marked *, and a total of at least 1,500 marks in the examination.

Appendix No. V.

EXTRACT from Supplements to the New South Wales *Government Gazette*, (No. 592), Friday, 8th July, 1898.

The Treasury, New South Wales, 8 July, 1898.

THE following Regulations in connection with the classification and scale of increments of Officers of the Clerical Division of the Public Service, and also with the appointment and salaries of Messengers,—made by the Public Service Board under the provisions of the "Public Service Act of 1895," having been approved by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of that Act.

G. H. REID.

REGULATIONS MADE BY THE PUBLIC SERVICE BOARD UNDER THE "PUBLIC SERVICE ACT, 1895."

Whereas by the Public Service Act of 1895, the Public Service Board is authorised and empowered to make, repeal, alter, and amend Regulations: Now, the Public Service Board, under and by virtue of the Powers contained in the abovementioned Act, doth, with the approval of the Governor, hereby make the Regulations following, that is to say:—

Classification and Scale of Increments of Salary of Officers of the Clerical Division.

Classification of Officers.

254. The existing classification of officers of the lower series of grades is hereby abolished, and in lieu thereof the following classification shall be in force:—

- Grade A.—Officers in receipt of salaries and allowances, other than equipment, forage, and district allowances, ranging from £251 to £299 a year, inclusive.
- „ B.—Officers in receipt of salaries and allowances, other than equipment, forage, and district allowances, ranging from £201 to £250 a year, inclusive.
- „ C.—Officers in receipt of salaries and allowances, other than equipment, forage, and district allowances, ranging from £151 to £200 a year, inclusive.
- „ D.—Officers whose salaries and allowances, other than equipment, forage, and district allowances, do not exceed £150 a year.

Increments

Increments of Salary.

255. From the 1st July, 1898, the officers in the various grades, whose salaries have not been increased during the preceding twelve months, shall be entitled to receive the increments of salary specified in the following regulations, subject to the terms of Regulation 263 hereof and to the necessary provision being made by Parliament, in accordance with section 10 of the Public Service Act of 1895.

Officers in Grade D.

256. The following scale of increments shall apply to officers of Grade D :—

- Section VII.—Officers in receipt of less than £65 a year shall be entitled to £65 a year.
 „ VI.—Officers in receipt of £65 a year and less than £80 a year shall be entitled to £80 a year.
 „ V.—Officers in receipt of £80 a year and less than £95 a year shall be entitled to £95 a year.
 „ IV.—Officers in receipt of £95 a year and less than £110 a year shall be entitled to £110 a year.
 „ III.—Officers in receipt of £110 a year and less than £125 a year shall be entitled to receive £125 a year.
 „ II.—Officers in receipt of £125 a year and less than £140 a year shall be entitled to receive £140 a year.
 „ I.—Officers in receipt of from £140 a year to £150 a year shall be entitled to receive £150 a year.

Where an officer receives through the working of the foregoing scale half or less than half the increment of his section, he may, if an officer of meritorious service, be allowed by the Board a further increment; but no officer shall, by the operation of this proviso, be allowed to pass out of Grade D.

For the year commencing 1st July, 1898, every officer shall, unless the Board otherwise direct, receive the salary of the section to which on that date he belongs, according to the foregoing scale; and in each succeeding year he shall be entitled to receive the increment of the grade, viz., £15 per annum, until he attains the maximum salary thereof, viz., £150 per annum. Provided also that before an officer passes out of Section IV, the Board, either directly or by means of its Examiners, shall take such steps as they may consider necessary to assure themselves as to the officer's conduct, diligence, and aptitude for clerical work.

On attaining the maximum salary an officer shall be tested, in such manner as the Board may direct, in order to ascertain whether he is fitted for work superior to that which the Board consider should be performed by an officer of Grade D, and if he successfully pass the test he shall be held to be qualified for admission to Grade C, as hereinafter provided. If, however, he is found not to be qualified for admission to the higher grade, he shall remain at the maximum salary of his grade until he passes the test prescribed or is otherwise dealt with by the Board.

Officers in Grade C.

257. The following scale of increments shall apply to Officers of Grade C—

- Section V.—Officers in receipt of £151 a year and less than £160 a year shall be entitled to £160 a year.
 „ IV.—Officers in receipt of £160 a year and less than £170 a year shall be entitled to £170 a year.
 „ III.—Officers in receipt of £170 a year and less than £180 a year shall be entitled to £180 a year.
 „ II.—Officers in receipt of £180 a year and less than £190 a year shall be entitled to £190 a year.
 „ I.—Officers in receipt of £190 a year and less than £200 a year shall be entitled to £200 a year.

Provided that where an officer receives through the working of the foregoing scale half or less than half the increment of his section, he may, if an officer of meritorious service, be allowed by the Board a further increment; but no officer shall, by the operation of this proviso, be allowed to pass out of Grade C.

For the year commencing 1st July, 1898, every officer shall, unless the Board otherwise direct, receive the salary of the section to which on that date he belongs according to the foregoing scale; and in each succeeding year he shall be entitled to receive the increment of the grade, viz., £10 per annum, until he attains the maximum salary thereof, viz., £200 per annum.

On attaining the maximum salary an officer shall be tested in such manner as the Board may direct, in order to ascertain whether he is fitted for work superior to that which the Board consider should be performed by an officer of Grade C, and if he successfully pass the test he shall be held to be qualified for admission to Grade B, as hereinafter provided. If, however, he is found not to be qualified for admission to the higher grade, he shall remain at the maximum salary of his grade until he passes the test prescribed or is otherwise dealt with by the Board.

Officers in Grade B.

258. The following scale of increments shall apply to Officers of Grade B—

- Section V.—Officers in receipt of £201 a year and less than £210 a year shall be entitled to £210 a year.
 „ IV.—Officers in receipt of £210 a year and less than £220 a year shall be entitled to £220 a year.
 „ III.—Officers in receipt of £220 a year and less than £230 a year shall be entitled to £230 a year.
 „ II.—Officers in receipt of £230 a year and less than £240 a year shall be entitled to £240 a year.
 „ I.—Officers in receipt of £240 a year and less than £250 a year shall be entitled to £250 a year.

Provided that where an officer receives through the working of the foregoing scale half or less than half the increment of his section, he may, if an officer of meritorious service, be allowed by the Board a further increment; but no officer shall, by the operation of this proviso, be allowed to pass out of Grade B.

For

For the year commencing 1st July, 1898, every officer shall, unless the Board, otherwise direct, receive the salary of the section to which on that date he belongs according to the foregoing scale; and in each succeeding year he shall be entitled to receive the increment of the grade, viz., £10 per annum, until he attains the maximum salary thereof, viz., £250 per annum.

On attaining the maximum salary an officer shall be tested in such manner as the Board may direct, in order to ascertain whether he is fitted for work superior to that which the Board consider should be performed by an officer of Grade B, and if he successfully pass the test he shall be held to be qualified for admission to Grade A, as hereinafter provided. If, however, he is found not to be qualified for admission to the higher grade, he shall remain at the maximum salary of his grade until he passes the test prescribed or is otherwise dealt with by the Board.

Officers in Grade A.

259. The following scale of increments shall apply to Officers of Grade A—

- Section V.—Officers in receipt of £251 a year and less than £260 a year shall be entitled to £260 a year.
- „ IV.—Officers in receipt of £260 a year and less than £270 a year shall be entitled to £270 a year.
- „ III.—Officers in receipt of £270 a year and less than £280 a year shall be entitled to £280 a year.
- „ II.—Officers in receipt of £280 a year and less than £290 a year shall be entitled to £290 a year.
- „ I.—Officers in receipt of £290 a year and less than £299 a year shall be entitled to £299 a year.

Provided that where an officer receives through the working of the foregoing scale half or less than half the increment of his section, he may, if an officer of meritorious service, be allowed by the Board a further increment; but no officer shall, by the operation of this proviso, be allowed to pass out of Grade A.

For the year commencing 1st July, 1898, every officer shall, unless the Board otherwise direct, receive the salary of the section to which on that date he belongs according to the foregoing scale; and in each succeeding year he shall be entitled to receive the increment of the grade, viz., £10 per annum, until he attains the maximum salary thereof, viz., £299 per annum.

But no officer of Grade A shall receive a higher salary than £299 unless and until the Board have ascertained that he is fitted to do work demanding a higher salary, and if the Board is satisfied that he is so fitted, such officer shall be considered as entitled to promotion to an appointment in the upper series of grades when a suitable opportunity occurs.

Increment in cases where an Officer's salary has been increased during year.

260. An officer who has not been in receipt of the salary enjoyed by him on the 1st July, 1898, for the whole of the preceding year, and therefore by the provisions of Regulation 255 not entitled to receive the increment of his grade, may be allowed by the Board such increment to his salary as will ensure his being placed in an equal position to that which he would have attained under these Regulations had his salary not been so increased.

Increments in the case of newly appointed Officers.

261. Officers newly appointed to the Service shall be entitled to receive the increment of their section from the 1st January or 1st July, as the case may be, following the expiration of the first twelve months' period of service.

Adjustment of salary in exceptional cases.

262. Nothing in the preceding regulations shall be held to prevent the Board granting an increase of salary beyond that which an officer would receive under the scale of adjustment herein contained, where an officer at the passing of these Regulations has been in receipt of an uniform salary for a lengthened period, and where such officer is of more than ordinary merit. But no adjustment of salary under this regulation shall be made so as to allow of an officer passing from one grade to another without having passed the Board's test.

Certificates of Officers' qualifications.

263. As soon as possible after the publication of these Regulations, and in every subsequent year during the month of March, the Permanent Head of each Department shall give a certificate regarding the attention and aptitude for work displayed by each officer in the lower series of grades under his control. Where such certificate is favourable, the officer concerned shall receive the increment of salary prescribed, but where such certificate is unfavourable, or where the certificate is not given, the officer shall remain at the salary then received by him. The certificate of the Permanent Head shall be based on personal knowledge or observation, but where the Permanent Head has not the means of giving such certificate, the heads of sub-departments shall furnish, through the Permanent Head, the certificate required.

In the case of branches of a Department situated away from Sydney, the Permanent Head may submit to the Board, in lieu of a certificate from himself, the certificates of the heads of such branches with any remarks thereon which he may deem desirable.

When a Permanent Head or the Head of any Sub-department has difficulty in certifying that an officer of his Department should receive the increment of salary to which he would be otherwise entitled under these Regulations, he shall refer the matter for the consideration of the Board, who will then cause the qualifications of such officer to be tested by its Examiners, and on receipt of their report the Board shall deal with the matter as they may deem most fitting.

Testing of the Qualifications of Officers and their Promotion.

Testing of Officers on maximum salary of Grade.

264. Officers who on 1st July, 1898, are in receipt of the maximum salary of a grade or who thereafter shall reach the maximum salary of a grade, viz. :—Grade D, £150 ; Grade C, £200 ; Grade B, £250 ; and Grade A, £299, shall remain at such salary until they have passed the test prescribed by the Board. The time of testing an officer shall be at the discretion of the Board, and every officer must submit himself to the test when called upon by the Board's Examiners. Provided that no officer who was appointed prior to the 23rd December, 1895, shall be compelled to submit to a written examination, but an officer who declines to submit thereto shall not be allowed promotion to a higher grade.

The Board shall notify at the proper time that they are about to test officers, and all officers who desire to submit to such test shall acquaint the Board thereof within the time specified in such notice. Those who do not so acquaint the Board shall be held not to desire to be tested. Officers who are not found qualified for admission to a higher grade, or who fail to make known their desire to be tested, shall not be eligible to be tested again in the same year.

When an officer has notified his desire to be examined for promotion in the manner hereinbefore prescribed, the Board shall call upon the Permanent Head of the Department in which such officer is employed to report as to the manner in which he performs his duties. When the Permanent Head is not able from personal observation to furnish such report, then the report shall be furnished by the head of the sub-department in which the officer concerned is employed. The Board or the persons authorised by them for the purpose, shall then examine the officer in regard to the manner in which his duties are carried out, and if they find that such duties are performed in a creditable manner, they shall submit the officer to such further examination, written or otherwise, as they shall deem necessary to ascertain whether he is qualified for work of a higher class than he has hitherto been performing.

Should the officer successfully pass such test, he shall be eligible to be promoted to the next higher grade and to receive the increment of salary prescribed for officers of that grade, on a vacancy occurring as hereinafter provided. Where, however, the test has been delayed by the action of the Board beyond the expiry of any financial year, such increment may, if the Board so decide, be dated back to the 1st July preceding. Officers receiving the maximum salary on 1st July, 1898, if otherwise eligible, shall have their increment from the same date, notwithstanding they may not have been tested and passed before such date.

Provided that in all cases promotion shall only be made from one grade to another when a vacancy has occurred in the next higher grade. Should, however, the exigencies of the Service so demand, the Board may at any time declare that the number of officers in any grade requires to be increased, whereupon the number of officers in the grade specified shall be increased accordingly, and promotion from the lower grade shall be made of the officers entitled thereto, subject to the necessary provision being made by Parliament for the purpose.

When the number of officers who have passed the test prescribed for promotion from one grade to another exceeds the number of vacancies in the grade to which promotion is to be made, then the selection of the officers for promotion thereto shall be decided by seniority. Such seniority shall be determined by the time the officer concerned has been in receipt of the maximum salary of his grade. Provided that when the Board declare vacancies to exist in any particular grade beyond those occurring in the ordinary way by deaths or retirements, any officer may be appointed who may not be the senior, if he possesses qualifications superior to those ranking above him by length of service, and when the circumstances, in the opinion of the Board, warrant such action being taken.

Promotion to Upper Series of Grades.

265. Vacancies to the upper series of grades shall be filled by the promotion of officers receiving the maximum salary of Grade A ; where there are no officers at the maximum, then from the officers next in rank. Should there be a deficiency of officers who have qualified for Grade A, the Board may allow officers in Grade B to be tested for promotion to Grade A, notwithstanding that such officers have not reached the maximum salary of their then grade.

Should there be a deficiency of officers who have qualified for Grade B, the Board may allow officers in Grade C to be tested for promotion to Grade B, notwithstanding that such officers have not reached the maximum salary of their then grade. The Board may apply similar treatment to officers in Grade D should there be a deficiency in the officers qualified to enter Grade C.

In no case shall an officer be promoted to a position in the higher grades, even though he is qualified to pass out of Grade A into such higher grades, unless he is fully able to undertake the duties pertaining to the office which is vacant.

Promotion of Clerks of Petty Sessions to Grade A.

266. No officer engaged in Petty Sessions work will be recommended for promotion to Grade A unless he possesses a good practical knowledge of the duties of a Clerk of Petty Sessions and has passed an examination in the following books and subjects :—

1. (a) Justices Acts, 14 Vic. No. 43 (with 11 and 12 Vic. Nos. 42, 43, and 44), and 32 Vic. No. 6 and 36 Vic. No. 1, with pages 432 to 553 of "Wilkinson's Australian Magistrate" (6th edition), title "Justices."
- (b) Justices' Appeal Acts, 5 William IV No. 22, sec. 3 ; 39 Vic. No. 33, 17 Vic. No. 39, 45 Vic. No. 4, with the following titles in "Wilkinson's Australian Magistrate" (6th edition) :—"Appeal," pp. 14-22 ; "Habeas Corpus," pp. 392-396 ; "Certiorari," pp. 90-93 ; "Justices," pp. 554-573 ; "Mandamus," pp. 611-613.
- (c) Acts Shortening Acts (16 Vic. No. 1 and 22 Vic. No. 12) and Interpretation Act, No. 4 of 1897.
- (d) Criminal Law Acts, so far as they relate to Summary Jurisdiction of Justices, 46 Vic. No. 17, 52 Vic. No. 6, and 55 Vic. No. 5, with the following titles in "Wilkinson's Australian Magistrate" (6th edition) :—"Criminal Law," pp. 143-288 ; "Felony and Misdemeanor," pp. 373 and 374 ; "Larceny," pp. 573-599.
- (e) Licensing (Liquor) Acts, 45 Vic. No. 14, 46 Vic. No. 24, and No. 17 of 1897.

(f)

- (f) The Small Debts Recovery Acts, 10 Vic. No. 10, 33 Vic. No. 11, 42 Vic. No. 15, 43 Vic. No. 34, 45 Vic. No. 27, 55 Vic. No. 19, and 56 Vic. No. 37, with the Contractors' Debts Act, No. 29 of 1897, and Book Purchasers' Protection Act, 54 Vic. No. 12.
- (g) Law of Evidence as given in "Wilkinson's Australian Magistrate," pp. 331-359 (6th edition).
- (h) The circulars of the Department of Justice having reference to the conduct of business in Petty Sessions Courts and offices.
2. The Regulations made by the Governor and Mining Board respectively under the provisions of the Mining Acts.

One set of questions numbering not less than twenty-four (24) shall be set for each examination, and shall be answered in writing.

Examinations under this regulation will be held periodically at dates of which timely notice will be given, and any officer desirous of submitting himself for examination must inform the Secretary of the Board in writing thereof, not later than the date specified in the notice, and shall give such further information as may be required. Any officer in any grade below Grade A may offer himself for examination.

Should there be an insufficient number of officers qualified to pass from Grade B into Grade A, as above provided, the Board may promote to Grade A from Grade C in the order of their seniority any officers of such who may have qualified themselves for admittance into Grade A in the manner herein prescribed.

Provision in cases where an Officer's salary may be higher than the nature of his duties warrants.

267. Subject to the provisions of sections 12 and 44 of the Public Service Act, where the salary of any officer is, in the opinion of the Board, higher than should properly be assigned to the work he performs, the Board may require such officer to take up other duties more in accordance with his salary, and should such officer be unable to perform work of a higher character, or not be desirous of a transfer to another district, should such transfer be necessary in the opinion of the Board for the proper working of the Public Service, the Board may direct that the salary of such officer shall be adjusted to the value of the work he performs, and that he shall not receive any of the increments of salary provided by these Regulations; and such direction shall hold good until the officer is found to be qualified for higher work as aforesaid, or accepts transfer to another district where work corresponding to his salary can be found for him.

Certain Officers may be exempted from operation of Regulations.

268. The Board may exempt from the operations of these Regulations any officer or class of officers, who, though classified in the Clerical Division, do not carry out duties of an exclusively clerical nature.

Salary of Officers showing capacity for special work.

269. Should it become known to the Board when testing for promotion that an officer displays marked attainments and capacity for special work, and should it appear that the promotion such officer has received or is likely to receive under these Regulations is in their opinion below his deserts, the Board may award him a salary, within the lower series of grades, commensurate with his attainments and capacity. All cases so specially dealt with shall, however, be reported by the Board to the Governor, and the circumstances shall be stated in their next Annual Report.

Intervals of testing.

270. The Board may from time to time decide the time which must elapse before an officer who fails to pass the test for promotion in two successive years shall be again tested for promotion.

Increments only payable on approval of Board.

271. No increment shall be payable or promotion made under these Regulations unless and until the Board have approved of such increment or promotion.

The following Regulations shall apply to Post and Telegraph Masters, Postal Assistants, and Telegraph Operators, who shall also be subject to Regulations 255, 260 to 265, and 267 to 271, so far as they are not inconsistent with these Regulations:—

272. Special competitive examinations shall be held by the Board, of Candidates for appointments as "Postal and Telegraph Assistant" in the Postal and Electric Telegraph Department, and vacancies occurring from time to time in the positions hitherto designated as Postal Assistant and Telegraph Operator respectively shall be filled from the list of candidates successful at such examinations.

Such examinations shall be held from time to time as may be found necessary, and due notice thereof shall be given in the public press. The notice shall state the estimated number of appointments to be made, the limits of age, time and place of examination, and such other information as may be necessary to intending candidates.

The provisions of Regulations 72 to 90 in regard to competitive examinations shall be held to govern the examination herein prescribed, in so far as the same can be made applicable thereto.

The subjects of examination and the maximum number of marks to be allowed for each subject shall be as follows:—

- | | |
|---|-----|
| (1.) Handwriting.—To be valued for neatness, simplicity, and legibility, judged by the answers to the examination papers in dictation and arithmetic... | 400 |
| (2.) English.—Dictation | 200 |
| (3.) English.—Parsing and analysis (viz., division into clauses, full subjects, and full predicates) | 300 |
| (4.) Arithmetic.—The full course, such as is usually contained in a standard treatise | 300 |
| (5.) Geography.—Outlines of physical and political geography, and the geography of the Australasian Colonies in moderate detail | 300 |

Provided, however, that a candidate shall not be considered as qualified for appointment unless he be awarded at least 60 per cent. of the full number of marks obtainable in each subject.

On

On their first appointment, Postal and Telegraph Assistants shall be considered as on probation, and be paid at the rate of £39 per annum for the first year, and £52 for the second year. On completion of the second year of service they shall be examined for permanent appointment, such examination being that prescribed hereafter under the designation of 4th Grade, salary at the rate of £65 per annum. On a probationer passing the said examination he shall be recommended for permanent appointment at a salary of £65 per annum.

No person who passes such examination shall be appointed to a position in the Clerical Division other than that of Postal and Telegraph Assistant or Post and Telegraph Master, so long as he remains in the lower series of grades referred to in the next regulation; but all appointments in the upper series of grades shall be open to any person qualified according to these Regulations who satisfies the Board that he is fitted for work valued at £300 a year or over.

Classification and increments to Salaries.

273. Post and Telegraph Masters and Post and Telegraph Assistants shall be divided into four grades, viz. :—

- 4th Grade.—Officers in receipt of salaries and allowances other than equipment, forage, and district allowances, from £65 per annum to £125 per annum.
 3rd Grade.—Officers in receipt of salaries and allowances other than equipment, forage, and district allowances, from £126 per annum to £175 per annum.
 2nd Grade.—Officers in receipt of salaries and allowances other than equipment, forage and district allowances, from £176 per annum to £225 per annum.
 1st Grade.—Officers in receipt of salaries and allowances other than equipment, forage, and district allowances, from £226 per annum to £280 per annum (or in the case of Post and Telegraph Masters, £299 per annum).

Officers in each of the above grades shall, provided the necessary funds are provided for the purpose by Parliament in accordance with section 10 of the Public Service Act, be entitled to receive an annual increment of salary of £10 until they reach the maximum salary of their grade (subject to the limitation hereinafter imposed in regard to officers who may be exempt from passing the test for promotion to the 2nd Grade). They shall then be tested as to their fitness for promotion to the next higher grade, and if found qualified for such promotion they shall, on a vacancy occurring, receive the salary and increments of that grade. Provided that no officer shall receive an increment to his salary unless the Permanent Head has certified to the Board that his conduct and attention to duty have been such as to warrant the increase of salary being given.

Officers who, at the passing of these Regulations, are in receipt of less than £80 a year, and who have not already passed the Departmental Examination equivalent to the test for admission to the 4th Grade, must do so before they shall become entitled to any increment of salary. Officers in receipt of less than £100 shall be tested before admission to the 3rd Grade, but officers receiving more than £100 a year may be admitted to the 3rd Grade without test, provided that the Permanent Head certifies that they are fit for work which should be paid for at a higher rate than £125 a year; but no officer not now receiving more than £200 a year shall be allowed to obtain more than £200 a year, unless and until he has proved that he can pass the test prescribed for admission to the 2nd Grade.

All officers shall pass the test for admission to 1st Grade before they shall receive salary in excess of £225 a year.

Postal Assistants attached to offices where the postal and telegraph business is not combined will, as far as practicable, be afforded facilities for learning telegraphy, either by transfer to other offices or by arranging for instruction to be given them (if not otherwise possible, after their regular hours of duty) at the local telegraph office.

Postal and Telegraph Assistants may be appointed Post and Telegraph Masters, provided they are certified by the Permanent Head to be capable of undertaking the charge of an office.

Should the exigencies of the Service demand an increase in the number of officers employed, the Board, on the recommendation of the Permanent Head, approved by the Minister, may declare that there are vacancies in any grade, notwithstanding that no actual vacancies have occurred, but the vacancies to be so declared by the Board shall not exceed three in the 2nd and six in the 3rd Grade to every ten vacancies declared in the 4th Grade. Additional vacancies in the 1st Grade may be declared by the Board from time to time as the exigencies of the Service may warrant.

The following shall be the test prescribed for promotion to the various grades :—

For appointment to the 4th Grade an examination in the following subjects :—

Theoretical.

1. "Electricity and Magnetism": Silvanus Thompson (1895 or any later Edition, paragraphs 10, 30, 85 to 92, 107, 166 to 171, 173, 174, 179, 181, 184, 191, 192, 208, 381, and 383).
2. Locality and calls of Stations in New South Wales.
3. Connections of a Morse circuit, and action of the different instruments.
4. General routine of office work.
5. Departmental Regulations, Telegraph Branch.
6. General knowledge of Telegraph circuits from the circuit map.

Practical.

7. Sending and receiving by sound on a Morse line at the rate of at least 20 words per minute. Candidates must obtain the required number of marks for a pass in this section, otherwise they fail altogether.
8. Adjustment of Siemens' Polarised Relay, and Neutral Relay on an actual circuit.

9. Switching lines with Universal switches (cross bar, and straight bar), and also understanding the ordinary switches used by the Department.
10. Describing and making up Meidinger, Daniels, and Minotto cells and applying simple tests of same for faults. Methods of connecting them up.
11. Simple testing with ordinary Detector Galvanometer—crosses, leakage, open circuit, and earth faults on lines; faults in main and local circuits of a Morse set.
12. Typewriting (where typewriters are available), at the rate of at least 25 words per minute.

The examination for promotion to the higher grades shall, in addition to the above, include questions on the following subjects :—

For the 3rd Grade—

1. Electricity and Magnetism : Units of Measurement, Ohm's Law and simple application of same.
2. Telephones : Method of connecting and tracing simple faults in.
3. Operating : Sending and receiving by sound at the rate of at least 25 words per minute.
4. Galvanometers : Detector and Differential ; Construction and uses of, in connection with systems of Telegraphy in use.
5. Relays : Siemens' Polar : Neutral—Construction of and tracing faults in.
6. Batteries : Leclanche and Bi-chromate. Construction Action, Resistance, and Electromotive force of ; purposes for which adapted, and methods of grouping.
7. Departmental Regulations : Postal Regulations Nos. 1 to 167.

For the 2nd Grade—

1. Shunts : Calculating value and use of ; Simple calculations of current strengths.
2. Departmental Regulations : Postal Notes, Parcels Post, and Savings Bank and Money Order Regulations.
3. Telegraphic Instruments : Duplex and Quadruplex Systems ; balancing and adjustment of : Morse Repeaters for ; Automatic Repeaters—Millikins, Toye, Neilson's Shunt.
4. Telephones : Ordinary Shutter Board of 50 or 100 numbers, connection of ; Call Bells—Magneto and Battery Bells, construction and uses of ; Induction Coils—Action and uses of ; Transmitters and Receivers—Principle and adjustment of patterns in use.
5. Operating : Sending and receiving by sound at the rate of at least 30 words per minute.

For the 1st Grade—

1. Electricity and Magnetism : Principles involved in Electrical transmission of speech, essential qualities of iron and steel for permanent and Electro Magnets, methods of construction for various purposes.
2. Calculation of simple Electrical measurements.
3. Testing : Faults in land lines, their nature and general principles of localisation.
4. Telegraphic Instruments : Polar Quadruplex and Duplex Systems, and Morse Repeaters in use, more extended knowledge of ; Stearns Differential Duplex, Principle and adjustment of ; Wheatstone's ABC instruments, principle and working of ; methods of working telephones and Telegraph instruments simultaneously on the same wire, theory of.
5. Cables : Single and Multiple. General knowledge of patterns in use, care of, jointing single core, simple testing of, protection from lightning.
6. Condensers : Construction and uses of : Methods of connecting.
7. Resistance Coils : Methods of winding and insulating.
8. Batteries : Distribution of, methods of connecting under different working conditions.
9. Telephones : Locating ordinary faults in, general knowledge and working of small exchange.

Officers who obtain 90 per cent. or more of the possible marks shall have first claim for promotion, notwithstanding their length of service may be less than that of officers who do not attain such standard : and no officer shall be considered as having passed who does not obtain 50 per cent. of the possible number of marks in the grade for which he competes.

The following are the text books recommended for study :—

- Cully's "Handbook of Telegraphy."
- Preece & Sievwright "Telegraphy."
- Preece & Stubbs "Manual of Telephony."
- Terry & Finn "Telegraphic Apparatus."
- Hobbs "Arithmetic of Electrical Measurements."
- Also the Departmental Regulations.

No officer at present in the Postal and Telegraph service shall be compelled to pass any written examination or written test.

Appeals.

274. Any officer who deems himself to be aggrieved by any action of either the Board, the Permanent Head, the Head of his sub-department, or the Board's officers, in regard to his being tested for promotion, or whose name may have been omitted from the certificate of the Permanent Head contemplated by Regulation 245 hereof, shall be entitled to appeal to the Board in respect thereof.

Appointment and Increment to Salaries of Messengers.

275. The messengers employed in the various Government Departments shall be divided into two grades, viz., the Junior Grade, to include those receiving salaries up to £52 per annum, and the Senior Grade, to include those receiving salaries above £52 per annum.

Boy messengers, on being appointed, shall receive a salary of £26 per annum ; on the 1st January, or 1st July, as the case may be, following the expiration of the first year of service, they shall be entitled to receive £39 per annum, and at the expiration of twelve months thereafter £52 per annum. Messengers shall

shall not be entitled to any further increment beyond the said salary of £52 per annum unless appointed to a vacancy in the Senior Grade, when they shall receive a salary of £60 per annum. On the 1st January or 1st July, as the case may be, following the expiration of every year thereafter, they shall be entitled to receive an increment of £7 10s. until their salary reaches £120 per annum. They will continue at this rate of salary, unless appointed to a vacancy amongst the staff of senior messengers whom the Board have graded above £120, which vacancy the Board consider should be filled at the salary awarded on the last general classification of the Service.

Messengers, who, at the date of these Regulations, are in receipt of salaries of £60 per annum and over, but less than £120 per annum, shall, provided they have been in receipt of such salary for a period of twelve months, be entitled to receive on the 1st July, 1898, and every succeeding year thereafter, an increment of £7 10s. until their salary reaches £120 per annum. Any messenger, however, whose salary may have been increased during the year preceding the 1st July, 1898, shall not be entitled to receive the said increment of £7 10s. until the 1st January or 1st July, as the case may be, following the expiration of twelve months from the date his salary was so increased.

The Senior Grade shall, until otherwise determined by the Board, consist of 100 messengers. For every increase of six in the number of junior messengers there shall be deemed to be one vacancy in the staff of senior messengers, to which a messenger receiving the maximum salary of the Junior Grade shall be appointed. The selection of the officer for promotion shall be decided by seniority, such seniority to be determined by the time the officer concerned has been in receipt of the maximum salary of his grade. In the event of two or more officers having equal claims to a vacancy by reason of seniority, then the selection shall be determined by ballot.

The granting of all increments under these Regulations shall be conditional on the necessary provision being made by Parliament for the purpose, and on the good behaviour of the officer concerned, in regard to which a report must be furnished by the Permanent Head of the Department or by the officer in charge of the Sub-department to which the messenger is attached.

Provision regarding Increments of Salary may be applied to Officers of the General Division other than Messengers.

276. The provisions in regard to the granting of increments of salary to messengers in receipt of £60 per annum and upwards may be extended to such other officers or class of officers of the General Division as the Board may from time to time determine.

Procedure to be adopted in connection with Appointments to the General Division.

277. Whenever it is found necessary to fill permanent positions when vacancies occur in the General Division of the Public Service by the appointment of persons not already employed therein, the following shall be the procedure to be adopted:—Applications shall be invited by advertisement in a daily paper circulating in Sydney, or, if the appointment be in a country district, then in a local newspaper circulating in such district, and in Sydney also if the circumstances warrant, giving particulars of the appointment or appointments to be filled and the amount of salary, and specifying the time within which applications will be received by the Board.

As soon as the time for the receipt of such applications has expired, they shall be referred for consideration to a Committee of responsible officers who shall be appointed by the Board for the purpose. Whenever possible, an officer of the Department in which the appointment is to be made shall be one of the members of such Committee.

The Committee shall make their selection without favour, solely on the merits of the candidates, and shall not pay attention to any representations made by a person interested in a candidate except such as are before them in the ordinary way as testimonials accompanying an application. Any candidate who, with a knowledge of this regulation, attempts either directly or indirectly to influence the Committee's decision, shall be disqualified from receiving the appointment which he seeks.

Where the work to be performed requires special knowledge, it shall be the duty of such Committee to ascertain the merits of the various applicants, and make due inquiry as to their character, and, having ascertained who is the most eligible candidate for the post to be filled, to make a recommendation accordingly to the Board.

Where the work to be performed does not require any special knowledge, and where the principal qualifications necessary are good character and physical fitness, the Committee shall make a selection of the candidates who appear *primâ facie* to be eligible, and should the number of such eligible candidates exceed the number of vacancies to be filled, then the Committee shall hold a ballot, and the person or persons successful at such ballot shall be recommended to the Board for appointment, if on inquiry they are found to be of good character and otherwise fit for the position to be filled. Provided that in the event of any candidate being rejected as unsuitable, the reasons for such rejection shall be fully stated by the Committee in their report to the Board.

The persons selected in the manner indicated shall be tried on probation for six months, after which period, if they are found suitable, they may be nominated by the Board for permanent appointment.

J. BARLING,
T. A. COGHLAN,
GEO. A. WILSON, } Members of the
Public Service Board.

Dated at the Office of the Board,
50, Young-street, Sydney, 8th day of July, 1898.

Appendix No. VI.

PAPERS set at the examinations held under the provisions of Regulations 263 and 264.

Upper Division.

FOR CLERKS RECEIVING EITHER £200 OR £250 PER ANNUM.—27TH FEBRUARY, 1899.

SUMMARISING.

Time allowed—One hour (9 to 10 a.m.)

Rule a form like that given below, and fill up the several columns from the particulars given. Districts should be shown in the same order as they appear on this sheet. In assigning marks, importance will be attached to accuracy and neatness. No additional credit will be given for completing the paper in less than the time allowed.

Southland.—Receipts: £1,859 10s. 4d. from Government, £2,133 18s. 8d. from rates, £93 13s. 10d. from other sources, £31 17s. 2d. balance from last year. Expenditure: £1,617 11s. 6d. for indoor relief, £1,647 18s. for outdoor relief. Population, 21,603.

Auckland.—Population, 153,564. Receipts: £401 12s. 1d. balance from last year, £5,847 1s. 8d. from Government, £3,831 17s. 1d. from rates, £3,972 18s. 7d. from other sources. Expenditure: £5,978 2s. for indoor relief, £6,417 13s. 10d. for outdoor relief.

Cook.—Expenditure: £334 14s. 4d. for indoor relief, £457 14s. 2d. for outdoor relief. Receipts: £256 2s. from Government, £370 3s. 7d. from rates, £17 1s. 11d. from other sources. Population, 5,287.

Taranaki.—Receipts: £7 16s 1d. balance for last year, £371 17s. from rates, £327 8s. 11d. from Government, £62 1s. 9d. from other sources. Population, 31,175. Expenditure: £480 3s. for indoor relief, £1,294 16s. 11d. for outdoor relief.

North of Auckland.—Population, 7,602. Receipts: £1,097 8s. 10d. from Government, £1,022 18s. 6d. from rates, £103 6s. 2d. from other sources, £401 12s. 1d. balance from last year. Expenditure: £67 9s. for indoor relief, £1,050 13s. 9d. for outdoor relief.

Thames and Coromandel.—Receipts: £8 10s. 9d. from last year, £1,168 10s. 10d. from Government, £1,021 0s. 7d. from rates, £209 0s. 6d. from other sources. Population, 8,502. Expenditure: £895 5s. for indoor relief, £1,263 17s. 2d. for outdoor relief. Receipts: £8 10s. 9d. balance from last year.

Waikato.—Receipts: £64 7s. 9d. balance from last year, £198 16s. 1d. from Government, £392 12s. 4d. from rates, £22 10s. from other sources. Population, 2,814. Expenditure: £386 15s. 11d. for outdoor relief; £389 3s. 4d. for indoor relief.

Wellington.—Population, 12,854. Expenditure: £6,873 6s. for indoor relief, £11,280 7s. 2d. for outdoor relief. Receipts: £8,309 3s. 7d. from Government, £6,164 8s. 6d. from rates, £2,687 1s. 1d. from other sources.

Wairau.—Receipts: £598 3s. 3d. balance from last year, £14 10s. from Government, £20 from rates, £13 9s. 3d. from other sources. Population, 447. Expenditure: £54 15s. for indoor relief, £364 16s. 10d. for outdoor relief.

Districts.	Balance from last year.	RECEIPTS.				EXPENDITURE.			Population.	Average of expenditure for relief per head of population of district without regard to receipt.
		From Government	From Rates.	Other Sources.	Total.	Indoor Relief.	Outdoor Relief.	Total.		
					*			*		*

* Examinees will have to compute the figures for these columns, disregarding fractions of pence in the averages.

Upper Division.

ARITHMETIC.

Time allowed—One hour and a half (10 to 11.30 a.m.)

Only four questions, of which the first must be one, to be attempted. Full work to be shown up, and where possible, the results should be arranged in tabular form. Marks will be allowed for neatness in execution.

1. The exports from the various Colonies of Australasia in 1896 were as follows:—

New South Wales	(population 1,323,469),	£14,635,523
Victoria	... (" 1,176,248),	8,848,336
Queensland	... (" 484,700),	3,677,436
S. Australia	... (" 364,044),	4,080,884
W. Australia	... (" 161,924),	687,267
Tasmania	... (" 171,719),	177,885
New Zealand	... (" 729,056),	8,034,104

Find (i) the total value of the exports from the whole of Australasia; (ii) the value per inhabitant of the exports from each Colony and from Australasia; and (iii) the percentage (calculated to two places of decimals) which each Colony may claim of the total value of the exports from Australasia.

2. The Government of New South Wales purchased machinery in America to the value of 30,000 dollars. What sum in English money did it have to pay, supposing that English money was then at a premium of 15 per cent., and given that at par 1 dollar = 4/2?

3. The cost of construction and equipment of railways in New South Wales amounts to £37,719,402; the average quarterly earnings amount to £756,657, and the average weekly expenditure is £31,050. What is the net income for the year, and what interest (to two places of decimals) is returned on the capital outlay?

4.

4. A person derives from landed property £1,700 a year, out of which he pays 10 per cent. agency fees. He sells his property, and by investing the proceeds in 4½ per cent. debentures at 105, increases his net income by £270. Find what his property realised.
5. On January 1st, 1897, a person leased from the Government 50,000 acres of land at an annual rental of £2 7s. 6d. per section (640 acres.) During the year the following areas were withdrawn :—
- (a) April 3rd, 5,600 acres for settlement purposes.
- (b) June 25th, 850 acres for reserve purposes.
- (c) September 1st, the area required for a road 3 miles long and a chain and a half wide.
- Find the annual rental (paid in advance) of the original block, and calculate the amount of the refunds due to the lessee at the end of the year on account of withdrawals.
6. A bankrupt, whose assets are £5,600 and liabilities £15,200, owes sums of £4,200, £3,070, and £1,875 respectively to his three principal creditors. What can the bankrupt pay in the £, and how much will the three principal creditors severally receive?

Upper Division.

BOOKKEEPING AND ACCOUNTS.

Time allowed—One hour and a half (11.30 a.m. to 1 p.m.).

This paper is compulsory for clerks engaged in account branches or clerks whose work is mainly in connection with accounts, but optional for clerks not so engaged.

1. A public officer has charged £150 to the vote of £6,000 for "Charitable Institutions," item 251 of the Appropriation Act of 1898-9. Payment has been made and accounts posted. He afterwards discovers that he has debited the amount in error, and that payment should have been from vote of £4,500 for "Cottage Hospitals," item 259 of 1898-9.
- Show how the error is to be corrected, and state which Public Department or Departments should be notified of the correction.

2. Open a ledger and post the following :—

1. Colonial Treasurer	Dr,	£625,972
To sundry Votes Cr. as under :—		
Revenue Estimates Votes, 1898-9.		
2. Medical Adviser to Government		£41,329
3. Marine Board		56,746
4. Survey of Lands		66,380
5. Observatory		4,507
Loan Estimates Votes, 1898-9.		
6. Railways		300,000
7. Bridges		57,000
8. Public watering-places		100,000
		£624,972

The Colonial Treasurer expends out of the above votes during the financial year the following amounts :—

On No. 2		£22,350
" " 3		45,391
" " 4		56,840

Upper Division.

INDEXING AND PRÉCIS.

Time allowed—One hour and three-quarters (2 to 3.45 p.m.)

Instructions.—The Index should contain the date of each letter, the name of the person by whom and to whom it is written, and, in as few words as possible, the subject of it. Under subject you should give only the really important point or points of each letter. This should be done briefly, distinctly, and in such a form as to readily catch the eye.

1. *Prepare an index of the several letters and memoranda in the précis paper herewith. Under what headings would you index them in a register of papers received?*
2. *State your views as to the sufficiency of an index to a press copying letter-book showing name of addressee and page number only. How would you connect in a letter-book a number of letters addressed to the same firm or individual?*
3. *Read the accompanying correspondence, and draw up a précis, i.e., a brief and clear statement of the case. The précis should contain all that is important in the correspondence, and nothing that is unimportant; it should present the case in a consecutive and readable shape, expressed as distinctly and as briefly as possible.*

TRANSPORTATION OF FRENCH CRIMINALS TO NEW CALEDONIA.

The Agent-General for Queensland to The Honorable the Colonial Secretary, Brisbane.
(No. 686a of 1883.)

Sir,

Queensland Government Office, 1 Westminster Chambers, Victoria-street,
London, S.W., 21 September, 1883.

I have the honour to transmit herewith, for your information, copies of the correspondence which has taken place between the Foreign Office, the Colonial Office, and the Embassy at Paris, relative to the transportation of relapsed criminals from France to New Caledonia.

I have, &c.,
THOS. ARCHER,
Agent-General.

The Foreign Office to the Colonial Office.

Sir,

Foreign Office, 27 August, 1883.

I am directed by Earl Granville to transmit to you herewith, for the information of the Earl of Derby, a copy of a Despatch which his Lordship has addressed to Her Majesty's Minister at Paris, instructing him to make a representation to the French Government in the sense suggested in your letter of the 10th instant, respecting the transportation of relapsed criminals from France to New Caledonia.

I have, &c.,
J. PAUNCEFOTE.

The Under Secretary of State, Colonial Office.

(No. 820.)

Earl Granville to Mr. Plunkett.

Sir,

Foreign Office, 25 August, 1883.

I communicated in due course to the Colonial Office Lord Lyon's Despatch, No. 313, of the 9th May last, in which His Excellency reported that the "Transportation of Relapsed Criminals" Bill had passed the first reading in the French Chamber of Deputies, and that New Caledonia and its Dependencies were included among the settlements to which relapsed criminals are to be sent.

The Earl of Derby has now brought under my notice in connection with this matter a joint communication, annexed herewith in copy, which has been addressed to His Lordship by the Agents-General of New South Wales, New Zealand, Queensland, and Victoria, and in which, *inter alia*, very strong representations are made with a view to the adoption of effective measures for preventing the serious consequences to be anticipated from the above-mentioned resolution of the French Government, by which large numbers of the worst class of criminals would be transported to New Caledonia, where, as it is stated, they would be free.

And with further reference to this subject, His Lordship has received from the Agent-General of Queensland a letter, of which copy is also enclosed for your information, and which forwards a telegram from the Premier of the Colony, calling attention to the refusal of the French authorities of New Caledonia to apply for the extradition of criminals who escape from Noumea into Queensland.

It is clear that this question, being one which gravely concerns the welfare of the Australian Colonies, must command the prompt attention of Her Majesty's Government, and I have accordingly to request that you will lose no time in placing yourself in communication with the French Government upon the subject, with a view to ascertain what is the course which they propose to pursue; in the first place in regard to the number of convicts to be sent out to the Western Pacific, and as to the position of such criminals after arrival; and secondly, with respect to the failure of the Government of New Caledonia to demand the extradition of criminals whom they have permitted to escape in the cases pointed out in the above-mentioned telegram from the Queensland Government.

The Hon. F. Plunkett, &c., &c.

I am, &c.,
GRANVILLE.

The Colonial Office to the Foreign Office.

Sir,

Downing-street, 10 August, 1883.

I am directed by the Earl of Derby to transmit to you, to be laid before Earl Granville, a copy of a letter from the Agent-General for Queensland, forwarding a telegram from the Premier of the Colony, in which he desires that the attention of Her Majesty's Government may be called to the refusal of the French authorities in New Caledonia to apply for the extradition of criminals who have escaped from Noumea.

2. In connection with this matter, I am to request Lord Granville's early consideration of the enclosed copy of a joint letter from the Agents-General of New South Wales, New Zealand, Queensland, and Victoria on the subject of New Guinea and New Hebrides, in which it is strongly urged that measures should be taken to prevent the consequences anticipated from the declared intention of the French Government to transport large numbers of the worst class of criminals to New Caledonia, where they would be free on arrival.

3. Considering the grave importance of this question to the welfare of the Australian Colonies, it appears to Lord Derby to be necessary to obtain immediate explanations from the French Government as to the course contemplated (1) in regard to the number of convicts proposed to be sent out, and their position after arrival, and (2) the failure of the Government of New Caledonia in the cases just reported to demand the extradition of criminals whom they have permitted to escape: and Lord Derby will be glad to be able to assure the Government of Queensland that Her Majesty's Government has not failed to give prompt attention to the serious representation which has been made to them, and has communicated with the French Government.

4. I am also to request that Lord Granville may be reminded that in 1881 the Queensland Legislature passed a Bill to prevent the influx of foreign and other criminals into the Colony, which was the subject of correspondence between this Department and the Foreign Office. This Bill did not at that time receive Her Majesty's assent, as objection was taken to the unequal incidence of certain of the provisions; but under the circumstances now reported, and having regard to the contemplated increase in the number of French convicts to be transported to the Western Pacific, it appears to Lord Derby that it will not be possible to continue to resist such legislation.

I am, &c.,
R. W. MEADE.

The Under Secretary of State,
Foreign Office.

(No. 563.)

Mr. Plunkett to Earl Granville.

My Lord,

Paris, 31 August, 1883.

On receipt of your Lordship's Despatch, No. 820, of the 25th instant, I drew up the memo., copy of which I have the honor to enclose, explanatory of the anxiety felt in the Australian Colonies as to the serious consequences which the proposed French law for the "transportation of relapsed criminals" to New Caledonia may entail.

My intention was to speak to M. Challemeil Lacour in the sense of your Lordship's instructions, and to leave the memo. with His Excellency only as a semi-official document.

I found, however, on calling at the Foreign Department this afternoon, that M. Challemeil Lacour, who has been in poor health for some days past, has suddenly become so much worse that he is about to proceed to Vichy, and at that moment he was in conference with the President of the Council arranging the temporary transfer of his duties to the latter.

I therefore placed the memorandum in the hands of M. Marcel, the Chef de Cabinet of M. Ch. Lacour, and begged him to submit it to the Minister for Foreign Affairs in my name.

Speaking quite unofficially, M. Marcel said he thought there was little prospect of the Recidivist Bill being passed in its present shape, and in any case many months must yet elapse before it can become law. He promised to call the attention of the Minister as soon as possible to the failure of the Government of New Caledonia to apply for the extradition of the three persons who had escaped from Noumea, as reported in the telegram from the Governor of Queensland of the 26th ultimo.

I have, &c.,
F. R. PLUNKETT.

The Earl Granville, K.G., &c., &c., &c.

Upper Division.

CORRESPONDENCE.

Time allowed—Three-quarters of an hour (3.45 to 4.30 p.m.)

Marks will be allowed for neatness of execution.

1. Draft a letter to his Lordship, the Secretary of State for the Colonies, to bear the signature of the Governor, embodying the representations made in the following letter, and the accompanying memoranda:—

The Colonial Treasurer to His Excellency the Governor.

My Lord,

The Treasury, 27 August, 1869.

I have the honor to inform your Excellency that complaint has been made to me by the Commercial Banking Company of this city, in reference to the state of the silver currency in this Colony; the coins at present in circulation being represented as to a considerable extent worn out and defective.

I take leave to enclose herewith specimens left with me by the Secretary of the Bank, together with others taken from the Treasury chest; and I am given to understand that the shopkeepers and others find it difficult to pass silver coin similarly worn out and defaced, which it is stated bears a large proportion to that of legible impressions and recent dates.

Having regard to the fact that the renovation by the Mint authorities of the copper currency has already been attended with the best results, and inasmuch as the condition of the silver currency seems to warrant the complaints that have been made with reference to it, it would appear that the time has arrived when the same might be improved with advantage, by the introduction of a supply of new coin of the respective denominations.

The

The ready acquiescence of the Lords of Her Majesty's Treasury in the application of this Government in the former case leads me to trust that in the latter equally satisfactory arrangements might be made. By such means the Imperial silver currency in this, and eventually in the adjacent Colonies, would be restored to a sounder footing, and acquire a more uniform character.

Before, however, entering upon details, I would, if your Excellency approve, suggest that reference might be made to the Deputy Master of the Mint upon the subject.

I have, &c.,
L. M. CARTER.

[*Memorandum upon the foregoing.*]

(No. 1.—Minute of His Excellency the Governor.)

THE Deputy Master of the Mint will please to report upon the letter.—G., 27/8/69,

(No. 2.—Minute of the Deputy Master of the Mint, in reply.)

The silver currency at Home is maintained in a healthy condition through the agency of the Bank of England, which withdraws from circulation the worn and defaced coins, and sends them into the Mint for recoinage, receiving also and sending into circulation the new coin. It is possible, as suggested by the Colonial Treasurer, that the Imperial Government might be induced to extend similar benefits to this Colony, in which case the presence of a Branch of the Royal Mint might perhaps be considered to afford facilities such as are obtained in London through the Bank of England.—C.E., 28/8/69.

(No. 3.—Minute of His Excellency the Governor upon the same.)

The Colonial Treasurer,—Shall I make any application Home?—G., 28/8/69.

(No. 4.—The Colonial Treasurer's reply.)

I shall be glad if His Excellency will make an application to the Imperial Government to send to the Colony sufficient silver coin to replace that now in circulation, which is worn and defaced.—L.M.C., 31/8/69.

2. Prepare a circular notifying officers who are in arrears with reports upon (a) ——— asking them for explanation of delay, and requesting speedy action.

(a) You may select any subject dealt with by your Department.

CLERKS RECEIVING £150 PER ANNUM.—27TH FEBRUARY, 1899.

SUMMARISING.

Time allowed—One hour (9 to 10 a.m.)

Summarise the information given hereunder in a form similar to that shown below. Gold-fields should be shown in the same order as they appear on this sheet. Marks will be allowed for neatness of execution.

Palmer.—101 European quartz miners, 6 European alluvial miners; quantity of gold, 37,339 oz.; average price per oz., £4.
 Charters Towers and Cape.—Quantity of gold, 79,595 oz.; average price, £3 7s. 6d. per oz.; European miners, 30 on alluvial, 1,250 on quartz.
 Hodgkinson and Mulgrave.—8 Chinese alluvial miners, 214 European quartz miners; average price of gold per oz., £3 10s.; quantity of gold, 12,997 oz.
 Ravenswood.—180 European quartz miners, 160 Chinese alluvial miners; average price of gold, £3 8s. per oz.; quantity of gold, 8,718 oz.
 Etheridge and Woolgar.—450 Chinese alluvial miners, 320 European quartz miners; quantity of gold, 18,431 oz.; average value of gold, £3 1s. oz.; 10 European alluvial miners.
 Cloncurry.—30 European quartz miners, 14 European alluvial miners; quantity of gold, 453 oz.; average price, £4 an oz.
 Clermont.—39 Chinese alluvial miners, 17 European quartz miners, 147 European alluvial miners; quantity of gold, 6,000 oz.; average price, £3 18s. an oz.
 Nebo.—10 European alluvial miners, 40 European quartz miners; quantity of gold, 3,404 oz.; average price per oz., £3 10s.
 Gympie.—1,172 European quartz miners, 11 European alluvial miners; 11 Chinese alluvial miners; quantity of gold, 50,312 oz.; average price, £3 10 per oz.
 Rockhampton.—Quantity of gold, 2,107 oz.; average price, £3 7s. 6d. Miners: Europeans, 52 on alluvial, 95 on quartz; Chinese, 8 on alluvial.

Name of Gold-field.	Alluvial Miners.			Quartz Miners.			Gross Total of Miners.	Quantity of Gold.	Average price per oz.	Total Value of Gold.

Lower Division.

PRÉCIS AND INDEXING.

Time allowed—One hour and three-quarters (2 to 3.45 p.m.)

Instructions.—The Index should contain the date of each letter, the name of the person by whom and to whom it is written, and, in as few words as possible, the subject of it. Under subject you should give only the really important points. This should be done briefly, distinctly, and in such a form as readily to catch the eye.

1. Prepare an index of the letters in the accompanying précis paper.
2. Rule a form for the registration for record for the same letters, and show how you would register them.
3. Read the accompanying correspondence, and draw up a précis—i.e., a brief and clear statement of the case.

The précis should contain all that is important in the correspondence, and nothing that is unimportant; it should present the case in a consecutive and readable shape, and as distinctly and briefly as possible.

Under Secretary for Lands and Public Works to Colonial Architect.

Department of Lands and Public Works,

Sir,

Sydney, 9 April, 1857.

With reference to your letter of the 24th January, 1857, respecting the erection of light-houses on the Australian coast, I am directed by the Secretary for Lands and Public Works to request that you will have the goodness to enter into correspondence with the Surveyor-General, in order that he may detach Mr. Surveyor Millington to accompany you to Cape St. George for the purpose of enabling the Government to fix upon a suitable site for the erection of a light-house there in accordance with the Report of the Light-house Commissioners.

2. You will also have the goodness to arrange to visit the locality with Mr. Millington, at the earliest possible period consistently with your other duties; and Mr. Millington's present proceedings may, perhaps, be interrupted if necessary to suit your convenience.

3. Mr. Secretary Hay is likewise desirous that you should report as to the description of lantern necessary for this building, and furnish specifications according to which it may be ordered for importation.

I have, &c.,

M. FITZPATRICK.

Surveyor-General to Under Secretary for Lands and Public Works.

Sir,

Surveyor-General's Office, Sydney, 8 July, 1857.

In reference to your letter of 21st April last, No. 234, I have the honor to forward, for the information of the Honorable the Secretary for Lands and Public Works, plans and drawings of the survey of the Heads of Jervis Bay, made by Mr. Assistant-Surveyor Millington, with the view to a decision being arrived at as to a suitable site for the erection of a light-house.

I have, &c.,

GEO. BARNEY, S.G.

Under Secretary for Lands and Public Works to Colonial Architect.

Sir,

Department of Lands and Public Works, Sydney, 30 July, 1857.

With reference to your letter of the 25th instant, respecting the erection of a light-house at Cape St. George, I am directed by the Secretary for Lands and Public Works to request that you will have the goodness to state whether you are prepared to join Mr. Millington in framing a report as to the eligibility for a light-house of the different sites marked on the plan forwarded to this office by Mr. Millington, and if you are so prepared, to furnish such report without delay, showing the character of building suitable to each locality.

2. I am at the same time to request that you will have the goodness to forward (if already prepared) the plan of the building, accommodated to the site, which you and Mr. Millington consider the most eligible for the erection of the light-house in question.

I have, &c.,

M. FITZPATRICK.

Colonial Architect to Under Secretary for Lands and Public Works.

Sir,

Colonial Architect's Office, Sydney, 17 August, 1857.

In attention to your letter of the 9th April, No. 128, and 30th ultimo, No. 266, relative to a site for the proposed light-house at Cape St. George, I do myself the honour to state that I proceeded with Mr. Surveyor Millington to make an examination for the purpose of selecting a spot suitable for erection of a light-house. The sites considered eligible, after a careful examination, are marked on the plan prepared by Mr. Millington.

It appeared to us that the site marked S on the map possesses greater advantages than any other. It is situated on the cliff, and is distant 4 miles south from the south head of Jervis Bay; it forms part of the outer margin of the Cape, and has a range of vision of 205 degrees seaward; the height is 180 feet above the level of the sea, and the formation is compact sandstone to the surface, which will give a solid foundation for the tower if erected on this spot, and if the tower be carried up to the height recommended by the Light-house Commission, the total elevation, above the sea, of the light will be 210 feet. The level nature of the summit also is favourable for the erection of the tower and other buildings, and there are facilities for the transport of building materials to it. Stone is abundant, fresh water is plentiful at about a mile distant, shells for lime can be procured on the coast, and sand at a short distance. The timber and other building stores, the lantern, light, and supplies for the light and keepers may be landed on the beach in Jervis Bay, convenient to the site.

The

The cost of erecting the light, tower, and necessary buildings at this spot is estimated at £4,350.

The site marked T is situated on another cliff of similar geological structure, about 1½ mile to the northward of site S. Its present height is 195 feet above the level of the sea, and the light, if this spot be selected, would be elevated 215 feet above the sea-level; the range of vision is only 174 degrees. A heavy outlay would have to be incurred in cutting down the top of the cliff to obtain a sufficiently level site. The access to it is most difficult for cart, or even for foot traffic. The cost, under these circumstances, of erecting the necessary buildings cannot be estimated at less than £6,500.

I have, &c.,
ALEXR. DAWSON,
Colonial Architect.

It is understood that the Pilot and Light Board are now to express an opinion on this matter. Transmit to Mr. Lane for the purpose (with the plan).—M.F. B.C., 27th August. Urgent. The Secretary to the Board.—H.L.

Secretary to Pilot Board to Under Secretary to the Treasury.

Sir,

Sydney, 14 September, 1857.

I am instructed to request that you will bring under the notice of the Minister for Finance and Trade the subject of light-houses on Cape George and Gabo Island.

Surveys having been made by the Colonial Architect and Assistant-Surveyor Millington, the Board are of opinion that plans should be drawn and tenders invited for the erection of a tower, 50 feet high, on the point marked S on Mr. Millington's plan, which site appears to have been judiciously selected.

W. L. G. DREW,
Secretary.

Harbour-master to Under Secretary to the Treasury.

Sir,

The Port Office, 15 October, 1858.

With reference to the accompanying papers relative to the erection of a light-house on Cape St. George, I am directed by the Steam Navigation and Pilot Board to inform you that the Board recommend that the sum of £4,350 be placed on the Estimates for the ensuing year for the construction of the light-house in question, and to request that you will be good enough to submit, for the consideration of the Honorable the Treasurer, that, should the vote be agreed to, no time be lost in causing the light-house to be erected on the site indicated in Mr. Surveyor Millington's map, marked S.

I have, &c.,
JOHN CROOK,
Harbour-master.

Submitted for the concurrence of the Honorable the Secretary for Lands and Public Works.—R.C., 16th October. Approved.—JOHN R., 20th October.

Lower Division.

CORRESPONDENCE.

Time allowed—Forty-five minutes (3.45 to 4.30 p.m.)

Marks will be allowed for neatness of execution.

*Draft letter in reply to the following letters from the minutes dated 13/2/98, 17/2/98, and 18/2/98—
i.e. three letters in all.*

Mr. R. Heath to the Under Secretary for Works.

Sir,

Danby, 11 February, 1898.

Facts have recently come under my notice which appear to me contrary to justice. Mr. James Watkins is employed as overseer by the District Council on the road from Danby to Burra, and he employs his own team of horses and his own sons and nephew on the work. This is contrary to the regulations, which say that no relatives shall be employed by overseers. The inhabitants are clamorous for a public meeting to petition the Government to do away with the nuisance, but I have got them to forbear until you have acknowledged this.

I remain, &c.,
R. HEATH, Storekeeper.

(1.) Inform Mr. Heath that matter will be inquired into. (2.) Also write to Secretary of Danby District Council and inquire whether such report is correct.—A.B., 13/2/98. Under Secretary.

The Secretary, Danby District Council, to the Under Secretary for Public Works.

Sir,

Danby, 16 February, 1898.

In reply to yours of the 13th instant, I am directed to inform you that James Watkins has been employed as working overseer on the road from Danby to Burra, and that during a portion of that time the Commissioners in charge of the road also employed his son, who has a team. I am further directed to state that no person has been employed by any such overseer, the employment and removal of the men being the direct personal action of the Warden and another Commissioner, who have endeavoured, as far as possible, to divide the work equally among the labouring population. It is not true that Watkins' nephew has been employed.

I have, &c.,
J. FRERE, Sec.

The matter is under control of the Danby District Council, and as they are a responsible body, I do not think the Department can interfere.—M.L., 17/2/98.

(3.) Inform complainant accordingly.—A.B., 18/2/98.

2. *In a voucher received from a business firm an error in addition has been discovered. Write a letter to the firm, calling attention to the fact. You may supply the name of the firm, and give particulars of the supposed error.*

FORM of agreement to be signed by persons whose engagements are continued—referred to in page 18.

Appendix No. VIII.

WHEREAS it is proposed to appoint _____ to the office of _____ Now, in consideration of the payment to the said _____ out of moneys from time to time appropriated by Parliament and during such times only as the said _____ shall be actually employed in such office he the said _____ agrees to take up and perform the duties of the said office during such period from time to time as he may be required or directed and at such daily weekly monthly or yearly rate as may be so provided by Parliament or that may be determined by the Public Service Board. And further that for any time that may elapse between the termination of any one employment and the commencement of another he shall not be entitled to be paid any salary or remuneration whatsoever. And it is a further term of this engagement that the Minister for _____ or the Public Service Board shall be at full liberty at any time to determine it by giving the said _____ such notice in writing as the said Minister or the Board may determine of its intention so to do and thereupon at the termination of the said notice this engagement shall be determined accordingly.

Dated this _____ day of _____ 190 .

} Members of the
} Public Service Board.

I accept the engagement upon the terms above mentioned.

Appendix No. IX.

STATEMENT showing Increases proposed by the Public Service Board to the Salaries of Officers receiving £400 per annum and upwards, and the reasons for such proposals.

Name of Officer.	Position.	Present Salary.	Salary proposed by Board.	Amount of Increase.	Reasons for proposing Increase.
Dr. J. Ashburton Thompson.	Chief Medical Officer.	£ 920	£ 1,000	£ 80	This Officer is practically at the head of the medical profession, and his duties are of a very important character. Although the Board were disposed at first to think that the salary of £920 per annum, which he has been receiving, was fair remuneration, the subsequent passing of the Public Health Act, which has thrown additional duties and responsibilities upon him, warrants, in their opinion, the increase of salary to £1,000 as proposed. The officer who holds a similar position under the Victorian Government, but whose duties are not by any means of so comprehensive a character, is paid at the rate of £1,000 per annum. The present serious outbreak of bubonic plague in Sydney illustrates the great responsibility which attaches to the position held by Dr. Thompson, and clearly shows, in the opinion of the Board, that the salary proposed is amply warranted.
Mr. S. Yardley, C.M.G.	Secretary to Agent-General.	830	900	70	The grading of the Agent-General's Office was omitted in 1896, as the Board had no means of judging the merits of the officers, or the character of their work. A member of the Board afterwards visited England and inquired into the whole matter, and as a result of his inspection the staff was graded. This office, being situated so far away from the seat of Government, has been greatly neglected, and the representations made by the Agent-General in favour of his staff in former years have been overlooked. The responsibilities of the Secretary to the Agent-General are quite as large and important as those of an Under Secretary, and the Board think that the salary of £900 proposed for that officer, and which is the same as that received by him some years ago, scarcely represents his value to the Government. The Board think that the omission to submit the increased salary was an oversight, as that amount was passed on the Supplementary Estimates of last year. They feel confident that Parliament will rectify this apparent oversight.
Mr. G. E. Brodie ...	Chief Inspector of Public Accounts.	700	750	50	Since the proposal was made to increase the salary of Mr. Brodie, a change has taken place in the position occupied by him. The Inspecting Staff has been transferred from the Audit Office to the Treasury; and Mr. Brodie consequently loses his title and position as Assistant Auditor-General. The work he now performs is not diminished in importance by the transfer, and the Board hope that this increase, which is well deserved, will be granted. Mr. Brodie has the inspection of all the Revenue Accounts, which requires a large amount of experience combined with exceptional firmness and judgment in dealing with often very critical matters.
Mr. W. M. Hamlet..	Government Analyst.	560	600	40	The duties of the Government Analyst are of a very important character, and have been largely increased by the passing of the Public Health Act. Amongst other matters, all the analyses required in criminal cases are made by him personally. On comparing the salary proposed for this Officer with that paid to similar officials in other colonies, it will be found that he is not overpaid; and the Board think that if he were in private employment, and carrying out similar duties, he would undoubtedly command a much greater salary.
Mr. J. R. Martin ...	Assistant Statistician.	425	475	50	Since the increase was proposed for this Officer, he has been transferred to another position.
Mr. W. McIntyre ...	Chief Electoral Officer.	400	450	50	This Officer has really the entire control of the Electoral Department, and the success of his administration may be gathered from the fact that the office is now carried on with a staff of thirteen, as against fifty previously, and, in the opinion of the Board, the office is managed with great efficiency. The responsibilities of this Officer are very considerable. The former occupant of the office received £500 per annum.
Mr. V. W. Williams	Superintendent of Mercantile Explosives.	400	450	50	This Officer has charge of an important and growing Department, and is, in the opinion of the Board, underpaid at the salary of £400, which he has hitherto been receiving. His duties consist in the administration of the Gunpowder and Explosives Consolidation Act, which deals with the manufacture, storage, and importation of explosives throughout the Colony. He also has charge of the Government Magazines.
	Carried forward £	3:0	

Name of Officer	Position.	Present Salary.	Salary proposed by Board.	Amount of Increase.	Reasons for proposing Increase.
	Brought forward	£ 390	
Mr. J. Davis ...	Engineer-in-Chief for Sewerage Construction.	800	900	100	This Officer is in charge of one of the most important engineering branches of the Public Works Department. He is responsible for the design and construction of the sewerage system of Sydney and country towns. He practically ranks with the other Engineers-in-Chief, and although his salary is set down at a lower sum than that paid to these gentlemen, his responsibilities are of the same kind. The construction of the sewerage system of Sydney has been a great success, and even with the increased salary proposed it is safe to say that Mr. Davis will be receiving smaller remuneration than any other Officer in the colonies having similar responsibilities. Mr. Davis is one of the most capable officers in the Government Service, and his skill as an engineer is recognised throughout the Colony.
Mr. E. J. H. Broad...	Superintendent, Fitzroy Dock.	450	500	50	A Committee consisting of the following gentlemen, viz., Mr. R. Pollock, Lloyds' Surveyor for N.S.W., Chairman, Mr. W. D. Cruickshank, Engineer-Surveyor to the Marine Board, and Mr. A. B. Portus, Superintending Engineer of Dredges, was appointed some time ago to carefully inquire into the working of the Government Docking Establishment at Cockatoo, with a view of enabling the Board to make such alterations as might be desirable in the public interest. This Committee recommended that the salary of Mr. Broad, the Superintendent, should be raised. The Board, after looking into the matter, fully concurred with the recommendation of the Committee, and determined the salary at the amount named.
Mr. W. J. Millner...	First-class Assistant Engineer.	450	500	50	This Officer was receiving a salary of £450 per annum when in charge of some of the sewerage contracts. He is now Principal Assistant of that branch, and the increase of £50 a year still places him very much below the other Principal Assistant Engineers, while his work is almost of equal importance.
Mr. J. M. Stawell ...	First-class Assistant Engineer.	470	475	5	The small increase of £5 recommended in the case of this Officer is proposed with a view of bringing his salary up to that of the grade, viz., £475 per annum.
Mr. C. McD. Stuart	First-class Assistant Engineer.	470	475	5	The small increase recommended in this Officer's salary is also proposed with the view of bringing it up to that of the grade, viz., £475 per annum.
Mr. T. Pridham ...	First-class Assistant Engineer.	425	450	125	These Officers hold very responsible positions, as they are the Chief Designers in the various branches to which they are attached. The increases proposed are only such as would place their salaries on a proper footing with regard to other officers in the Service.
Mr. W. Rossbach ...	First-class Assistant Engineer.	425	450		
Mr. A. E. Cutler ...	First-class Assistant Engineer.	430	450		
Mr. J. G. Oakeshott	Chief Architectural Draftsman	400	425		
Mr. J. Forsythe ...	Examiner of Accounts, Public Works Department.	400	425	25	The expenditure of the Department of Public Works amounted for the last financial year to £2,165,818 per annum, and for the Head of the Branch, charged with the examination and checking of all accounts connected with this large expenditure, which position Mr. Forsythe occupies, the Board think that the salary proposed is not by any means too large.
Mr. S. McCauley ...	Deputy Comptroller of Prisons.	500	550	50	In 1897 the positions of Deputy Comptroller and of Inspector of Prisons were amalgamated, and Mr. McCauley was appointed to the combined position, but with no increase of salary, although the new offices greatly increased his duties and responsibilities. Mr. McCauley is a most zealous and hardworking officer, who is specially recommended by the Head of his Department for consideration.
Mr. C. J. Saunders...	Inspector, Lands Department.	550	600	50	Mr. Saunders is an officer of high efficiency and industry, who has already been, and will be, called upon to perform duties of a difficult and exacting character, such as deserve a salary higher than that which he at present receives.
Mr. C. E. Rennie ...	Chief Draftsman, Lands Department.	500	550	50	Mr. Rennie is Chief Draftsman of a large Department in the Service, and the extent of his duties and the manner in which he performs them warrant an increase of emolument, particularly as his salary does not compare favourably with other officers in the Service holding a somewhat similar position.
Mr. E. F. Pittman...	Government Geologist.	800	850	50	The Board consider that an officer possessing the high scientific attainments necessary to the occupant of this position should be paid at the rate of at least £850 per annum. The former occupant of the office, Mr. C. S. Wilkinson, received a salary of £850, and an allowance of £230 per annum.
	Carried forward	£ 950	

Name Officer	sition	Present Salary.	Salary proposed by Board.	Amount of Increase.	Reasons for proposing Increase.
	Brought forward	£	£	£ 950	
Mr. G. A. McKay ...	Chief Mining Surveyor.	400	450*	50	The growth of mining business during the past three years has rendered it necessary to separate the office of Chief Mining Surveyor from that of Government Geologist, and Mr. McKay has been appointed to the position of Chief Mining Surveyor. He has charge of the surveyors who carry out the surveys required under the Mining Act. Since he took charge, the Branch has been brought to a more efficient state than it has ever been in since the Department was established; the work has been brought up to date, and no complaints are now ever made as to delays in dealing with mining surveys. This state of affairs is due chiefly to the administration of this Officer, Mr. McKay, and although the Board only propose a salary of £450 per annum, they are confident that the position would not be over-paid with £100 per annum additional.
Mr. E. H. Ray	Registrar, Department of Mines and Agriculture	450	475	25	The position of Registrar is one of the most onerous and responsible in the Mines Department, and requires a ready and a perfect knowledge of all mining practice and procedure. The Registrar is responsible for the collection of Mining Revenue and correspondence in connection with the leased mining lands of the Colony. His duties can only be performed by one who has had many years' special training and experience in the Mining Acts and Regulations. Mr. Ray fills the position admirably, and is very strongly recommended by the Under Secretary for increased remuneration.
Mr. J. C. H. Min-gaye.	Analyst and Assayer, Department of Mines and Agriculture.	400	450	50	The increase in this case is recommended by a sub-committee of officers appointed by the Board to advise them in regard to the regrading of the salaries of officers of the scientific staff of the Service. The Board are satisfied that the salary suggested by the sub-committee is a proper one for the office, having in view the highly scientific nature of the duties performed by the officer and his length of service; hence their recommendation.
Mr. A. Burnett	Inspector, Postal and Electric Telegraph Department.	461	470	9	On the death in September, 1898, of Mr. McMahon, Assistant Superintendent of Mails, it was decided to amalgamate the vacant position with that of Senior Inspector, thus saving a large portion of the salary. In consequence of this change Mr. Burnett's duties and responsibilities have been somewhat increased.
Mr. A. J. Arndell ...	Appointment Clerk, Postal and Electric Telegraph Department.	400	425	25	Mr. Arndell occupies an important position in the Postal and Electric Telegraph Department, being head of the Appointment Branch. He is entrusted with the duty of making recommendations in regard to transfers, promotions, and appointments in connection with the large staff of that Department, and is a confidential officer of long and meritorious service. He is strongly recommended by the Deputy Postmaster-General, concurred in by the Postmaster-General, for an increase of salary, which recommendation the Board entirely endorse.
			£	1,109	

Appendix No. X.

COPY of Minute written by the Public Service Board, on 16th January, 1900, to the Hon. The Attorney-General, in regard to increases to salaries of £400 per annum and upwards.

Re Appeals under the Public Service Act.

A DIFFICULTY has occurred in relation to the appeals with which the Board are now dealing under the provisions of the Public Service Act, which they wish to bring under the notice of the Honorable the Attorney-General.

Section 10 provides that "the Board shall from time to time determine what salary, fee, or allowance is fairly appropriate to the work to be performed by or assigned to each officer or grade of officers, or to be performed by or assigned to persons temporarily employed, and the salary, fee, or allowance so determined shall, subject to the necessary provision being from time to time made therefor by Parliament, be the salary payable in respect of such work accordingly," from which it seems clear that the Board has the statutory duty imposed upon them of determining the rate of salary payable to Civil Servants, subject only to the necessary funds being appropriated therefor by Parliament. In pursuance of this the Board determined that certain increases should be given, but the Government interposed and decided that no increase should be submitted to Parliament with respect to salaries over £400 per annum, thus importing into the administration of the Act a principle which it appears to the Board the Act does not provide for. If a discrimination can be exercised here, it can be made with respect to any salary, and the grading then becomes that of the Executive, and not of the Board, and Parliament is not in a position to know what the grading of the Board really is. The Board think that this important aspect of the case has escaped attention.

The

* This salary has been voted.

The Board fully realise that, quite apart from fundamental constitutional grounds, it was never intended that a body not responsible for the finances should have the power to pledge the revenues of the State; all they submit, and they do it with the utmost respect, is that Parliament has the right to know what their grading is, and be given the opportunity of approving or rejecting it, the Government of course having the inherent power to propose to Parliament any amendment of the grading they may think fit. This was done in a previous Session, when several increases proposed by the Board were rejected. The Board need hardly point out that the laying down of a rule that no increases to salaries over £400 per annum shall be allowed will work most prejudicially to the Service, for it is well known that this will affect the very class upon whom the burthen of carrying out the policy of the State chiefly rests, and the discouragement resulting therefrom can be easily understood, a view of the case with which the Board are pleased to know Mr. Wise is in entire sympathy.

This matter has forced itself upon the Board at the present juncture when they are dealing with appeals, in connection with which there are several cases of salaries over £400 per annum wherein the Board think that justice can only be done by determining, subject to the approval of Parliament, that increases shall be given.

The Board consequently feel themselves in an embarrassing position, and they therefore, with all respect, submit the case for the advice of the Honorable the Attorney-General, and they do this with the more confidence when they consider the very great help which Mr. Wise has often and willingly given them in carrying out the difficult functions which sometimes devolve upon them.

In referring this communication to the Premier, the Attorney-General minuted the papers as follows:—"Would the Prime Minister say what course he wishes to be taken in these cases?" To this Mr. Lyne replied:—"This matter had better be dealt with when the next estimates are considered. Parliament decided that no salary over £400 (four hundred) a year should be increased at present, and if it is intended to increase these salaries Parliament should, after its previous decision, be again consulted.—W.J.L."

Appendix No. XI.

STATEMENT of Inquiries held by the Public Service Board under the provisions of section 49 of the "Public Service Act of 1895," during the period from 1st January, 1899, to 31st December, 1899.

Department.	Nature of Offence.	Date of Inquiry.	Decision of the Board.
Chief Secretary's Dept.	Repeated indulgence in intoxicants	20 January	To recommend that the officers (two) be called upon to resign, but that they be considered eligible for re-employment in any suitable positions which may become vacant.
Postal and Electric Telegraph.	Absence from duty without leave ...	2, 3, 4, and 6 February.	That the officer be transferred to another branch of the Department. Upon his failing to report himself for duty in his new position, the Board recommended that the officer be dismissed the Service.
Public Instruction	Absence from duty without leave ...	10 February.....	To recommend that the officer be dismissed the service.
Postal and Electric Telegraph.	Unsatisfactory performance of duty, and neglect in connection with a contract for clearing a telegraph line.	16 ,,	To caution the officer, and remove him to another station. The officer to pay one-fourth of the expenses of removal.
Chief Secretary's Dept.	Charged with assault on a fellow officer.	22 ,,	Charge not proved; officer reinstated.
Do	Misconduct in that he had been in the habit of using intoxicating beverages to excess, and that he assaulted a fellow employee.	22 ,,	Officer reduced in salary and transferred to a position where he will be under strict supervision.
Postal and Electric Telegraph.	Being under the influence of intoxicants while on duty.	6 March	That the officer be transferred to another position at a reduced salary.
Do do	Using obscene language on the telephone.	24 ,,	To recommend that the officer be called upon to resign.
Lands	Absence without leave, owing to over-indulgence in intoxicants.	27 March	To recommend that the officer be called upon to resign.
Public Works	Negligence and carelessness in the discharge of their duties.	30 March	Charges not proved. Officers reinstated, and it was directed that they be paid salaries in full during suspension, and informed that the suspension had left no stain on their characters.
Postal and Electric Telegraph	Absence without leave, owing to excessive use of intoxicants.	12 April	Officer transferred to another position.
Do do ...	Misconduct in connection with the loss of a letter containing money.	12 and 13 April	To recommend that the officer be called upon to resign.
Chief Secretary's Dept.	Absence without leave	19 April	Officer having failed to reply to communications sent him on the matter, the Board recommended that he be removed from the Service.
Public Instruction	Immorality	1 May	To recommend that the officer be called upon to resign.
Treasury	Habitually using intoxicants to excess.	5 May	To reinstate the officer, with a caution as to his future conduct. Pay allowed during suspension.
Postal and Electric Telegraph	Absence without leave and irregular conduct in connection with official cash. Misconduct stated to have been the result of excessive drinking.	15 May	To reduce the officer's salary and transfer him to another position.

Department.	Nature of Offence.	Date of Inquiry.	Decision of the Board.
Postal and Electric Telegraph	Negligence in the performance of duty and absence without leave.	17 May.....	To transfer the officer to another position where he would be under supervision, without reduction in salary.
Do do	Improper conduct and fighting on Post Office premises.	23 May.....	To censure officer and allow him to resume duty.
Treasury.....	Demanding a fee from private individual for doing official work. (Officer had previously been under suspension on account of a somewhat similar charge.)	2 June.....	To recommend that the officer be called upon to resign.
Postal and Electric Telegraph	Irregularities in official accounts and suspicious conduct in connection with a fire which occurred in his office.	22 June.....	do do do
Do do	Causing the disappearance of a letter containing money, and being deficient in his official cash.	28 June.....	do do do
Public Instruction	Immoral conduct	3 July.....	do do do
Do	Insubordination, negligence in the discharge of duty, and violent language and threatening conduct during suspension whilst under the influence of liquor.	16 June, 6 and 7 July.	do do do
Do	Insubordination and incompetency..	25 and 26 July...	Officer reinstated. Arrangements made for him to be given work which he could perform in a more efficient manner.
Postal and Electric Telegraph	Unsatisfactory performance of duty	20 July.....	Some of the irregularities being of minor importance, the Board decided that the officer be reinstated for a few months with a view to his being retired on reaching the age of 60 years.
Public Instruction	Improper conduct towards certain female pupils.	19 and 20 July...	To recommend that the officer be dismissed the Service.
Postal and Electric Telegraph	Wilful disobedience or disregard of lawful orders of his superior officers.	31 July.....	In view of the evidence taken, and the officer's previous unsatisfactory conduct, the Board recommended that he be called upon to resign.
Do do	Absence without leave. (The officer had also failed to account for certain money deposits.)	2 August	To recommend that the officer be dismissed the Service.
Do do	Insubordinate conduct and negligence in the discharge of duty.	10, 11, & 12 Aug.	To transfer the officer to another position.
Treasury	Having been guilty of imposition, for which he was fined in a police court.	10 August	To recommend that the officer who failed to reply to communications sent him, be dismissed the Service.
Postal and Electric Telegraph	Absence from duty without leave ...	29 August	do do do
Public Works	Leaving a judgment of the Water Police Court for debt unsatisfied for more than one month. (The officer had previously been guilty of unsatisfactory conduct of a similar nature.)	1 September ..	Officer reinstated, on the understanding that he will pay off his indebtedness by monthly instalments.
Postal and Electric Telegraph	Negligence, in that the officers (2) failed to report a collision between a vehicle in their charge and a cab.	8, 11, and 12 September.	Charges withdrawn by Department.
Do do	Misconduct and neglect of duty.....	25 October	To recommend that the officer be dismissed the Service.
Do do	Using obscene language, and absenting himself from duty without leave.	27 October	Officer warned against repetition of misconduct, and removed to another position. Pay stopped during period of suspension.
Do do	Using obscene language, and being drunk while on duty.	7 November ...	Officer censured, fined £1, and reinstated.
Mines, &c.....	Insubordination	13 November ...	Officer reprimanded and to be transferred to another position.
Postal and Electric Telegraph	Misconduct, in that he neglected to report his continual late attendance.	16 November ...	Officer reinstated, but deprived of leave for four Saturday afternoons.
Do do	Misconduct and insubordination.....	16 November ...	Officer admonished and warned as to future conduct; certain leave stopped.
Lands	Improper conduct and negligence in the discharge of duty.	15 and 17 Nov...	Officer reinstated with a severe reprimand and a warning that further misconduct will lead to his removal from the Service.
The Treasury	Misconduct owing to over-indulgence in intoxicants.	1 December ...	To recommend that the officer be called upon to resign.
Public Works	Absence from duty without leave ...	10 November & 7 December.	To recommend that the officer be removed from the Public Service, with the proviso that if it should at any time be proved that the officer at the time he absented himself, suffered from mental disturbance, the case will be reconsidered with a view to reinstatement or the payment of compensation.

In the following cases the inquiries were held under the provisions of section 51 of the Public Service Act:—

Department.	Nature of Offence.	Date of Inquiry.	Decision of the Board.
Postal and Electric Telegraph	Wilfully sending vouchers to the head of his Department for the payment of sums of money in the name and to the signature of a certain person who was not at any time employed in the office. Carelessness and untruthfulness regarding telegrams.	10 June, and 24, 25, 26, and 31 July.	To transfer the officer, on trial for three months, to a less important position. Officer also severely censured, and warned that if at the expiration of the period named his conduct has not been in all respects satisfactory, his removal from the Service will be recommended. Pay during the period the officer was relieved from duty to be stopped.
Department of Justice.....	(1) Incompetence; (2) habitual drunkenness; (3) alleged bias and partiality in judgments in cases where the complainant was engaged as solicitor; (4) being unduly influenced by other solicitors.	14 to 23 Nov. ...	Charges 1 and 2 were considered by the Board to be absolutely devoid of truth. In regard to charges 3 and 4, it was held that they were not sustained by the evidence, complainant having entirely failed to prove his case.

Appendix No. XII.

STATEMENT showing offences reported to the Public Service Board, under the provisions of the Public Service Act, during the period from 1st January, 1899, to 31st December, 1899, in respect of which inquiries were unnecessary.

Department in which the Officer concerned was employed.	Offence.	Decision of the Board.
Public Works Department ...	Refusing to obey instructions of superior officer	Though denying the truth of the charge, the officer stated that he would obey instructions forthwith, and the Board allowed the Department to withdraw the suspension.
Postal and Electric Telegraph Department.	Sentenced to twelve months' imprisonment for stealing a letter sent by post.	To recommend that officer be dismissed the Public Service.
Do do ...	Absence without leave, and failure to report cause thereof.	As the officer's probationary appointment had not been confirmed, the Board decided to recommend that the appointment be annulled.
Do do ...	Negligence in the performance of duty. Truth of charge admitted.	To reinstate the officer, and inflict a fine of 5s.
Public Works Department ...	do do ...	To recommend that officer be called upon to resign.
Department of Public Instruction.	Misconduct, in having been on duty in a state of intoxication. Offence admitted.	do do
Postal and Electric Telegraph Department.	Negligence in failing to account for certain deposits of money paid into the Government Savings Bank. Offence admitted.	do do
Treasury	Being short in his official cash. Offence admitted.	To recommend that the officer be dismissed the Service.
Do	Being under the influence of drink whilst on duty. Offence admitted.	To recommend that the officer be removed from the Public Service.
Department of Lands	Repeated negligence in the discharge of his duty. Offence admitted.	To recommend that the officer be called upon to resign.
Post and Electric Telegraph Department.	Breach of regulations, in being continually late in attendance. Offence admitted.	To censure and reduce the officer in grade, also to remove him when a suitable opportunity offers to another position.
Public Works Department ...	Charged at Water Police Office with having committed a criminal offence.	The Board suggested that the officer, who was acquitted of the charge, be dealt with by the Department.
Postal and Electric Telegraph Department.	Misconduct in fighting on Post Office premises. Offence admitted.	Officer censured and allowed to return to duty.
Do do ...	Neglect of duty—apparently owing to over-indulgence in intoxicants. Offence admitted.	To reinstate the officer, payment of whose salary, however, was stopped during period of suspension.
Do do ..	Absence from duty owing to over-indulgence in intoxicants. Offence admitted.	To recommend that the officer be called upon to resign.
Do do ...	Gross misconduct and incivility to the public...	This officer was shortly afterwards tried, and sentenced to a term of imprisonment for forgery. The Board recommended that he be dismissed the Service.
Do do ...	Absence without leave, owing to over-indulgence in drink. Offence admitted.	To reprimand the officer, and to inflict a fine of £1.
Chief Secretary's Department	Misconduct, in having been in a state of intoxication whilst on duty. Offence admitted.	To recommend that the officer be called upon to resign.
Postal and Electric Telegraph Department.	Misconduct, in having accepted and transmitted a telegram the contents of which were of an indecent and libellous character. Offence admitted.	It being the officer's first offence, he was admonished and reinstated.
Department of Public Instruction.	Irregularities in connection with the transmission of school fees and neglect in replying to official communications on the subject. Offence admitted.	That the officer be transferred to another position.
Postal and Electric Telegraph Department.	Having without authority collected 4d. as surcharge on a letter, and failed to account for the money. Offence not admitted.	Officer censured and fined a week's pay.
Do do ...	Disgraceful and improper conduct, the result of over-indulgence in intoxicants. Offence admitted.	To recommend that the officer be called upon to resign.

Department in which the Officer concerned was employed.	Offence.	Decision of the Board.
Postal and Electric Telegraph Department.	Disobedience of orders, neglect of duty, &c. ...	As the officer's probationary appointment had not been confirmed, the Board pointed out that his appointment might be annulled.
Do do ...	Absence from duty without leave, owing to over-indulgence in intoxicants. Offence admitted.	To recommend that the officer be called upon to resign.
Do do ...	Breach of regulations in riding in company on duty, and galloping along a city street. Offence admitted.	To severely censure the officers (2); and to reduce them to the bottom of their grades.
Department of Lands...	Convicted and sentenced to imprisonment for embezzlement.	To recommend that the officer be dismissed the Service.
Treasury ...	Absence from duty owing to over-indulgence in drink. (Officer was also arrested and fined for drunkenness.) Offence admitted.	To recommend that the officer be called upon to resign.
Postal and Electric Telegraph Department.	Absence from duty without leave. Offence admitted.	To censure the officer and reinstate him.
Do do ...	Misconduct, in having been over-indulgent in intoxicants, and in having failed to account for a number of letters entrusted to him for delivery. Offence admitted.	To recommend that the officer be called upon to resign.
Department of Justice	Having been guilty of dishonest conduct in the discharge of his duty. Offence admitted.	To recommend that the officer be dismissed the Service.
Postal and Electric Telegraph Department.	Negligence and carelessness in the discharge of his duty. Offence admitted.	Officer censured and warned against a repetition of his misconduct.
Do do ...	Being under the influence of drink while on duty. Offence admitted.	Officer censured and cautioned.
Do do ...	Irregularities in connection with the receipt and failure to properly account for public moneys. Offence admitted.	To recommend that the officer be dismissed the Service.
Do do ...	Negligence in the discharge of his duties. Offence admitted.	Officer censured and warned against a repetition of misconduct. Pay stopped during period of his suspension.
Do do ...	Convicted and sentenced to imprisonment on a charge of stealing a letter sent by post.	To recommend that the officer be dismissed the Service.
Do do ...	Breach of the regulations in that he, in spite of previous warnings, continued to give orders on his salary to business people. Offence admitted.	To censure the officer, and to stop payment of salary during the period of his suspension.
Do do ...	Convicted and sentenced to imprisonment on a charge of destroying a letter and stealing another.	To recommend that the officer be dismissed the service.
Do do ...	Negligence in the discharge of his duties. Offence admitted.	To reinstate the officer, who was warned that any future misconduct would lead to his dismissal.
Do do ...	Having failed to account for certain Savings Bank deposits. Offence admitted.	To recommend that the officer be called upon to resign.
Do do ...	Misconduct, in having been under the influence of drink while on duty. Offence admitted.	To warn the officer and reinstate him on probation for three months, when his conduct will again be reported upon.
Do do ...	Breach of the regulations in that he has been guilty of continued late attendance. Offence admitted.	To caution the officer and reinstate him on probation for six months, when his conduct will be again reported on.
Do do ...	Carelessness in the discharge of his duties. Offence admitted.	To fine the officer in instalments the amount paid to the officer sent to relieve him. The Board further decided that should the officer's conduct be favourably reported on in six months the fine would be remitted.
Do do ...	Convicted and sentenced to a term of imprisonment for stealing a letter sent by post.	To recommend that the officer be dismissed the Service.
Do do ...	Misconduct, in that he was drunk, and used bad language while on duty. Offence admitted.	That the officer be censured and fined £1.
Do do ...	Misconduct, in that he used bad language while on duty, and absented himself from duty without leave. Offence admitted.	To stop payment of salary during the officer's suspension, to warn him against a repetition of the offence, and to transfer him to another office.
Chief Secretary's Department	Drunkenness while on duty. Offence admitted.	To reprimand the officer and fine him a fortnight's pay.
Postal and Electric Telegraph Department.	Absence from duty without leave	The officer forwarded his resignation, which, under the circumstances of the case, the Board recommended should be accepted.
Do do ...	Absence from duty without leave, owing to indulgence in intoxicants. Offence admitted.	Officer severely censured, and warned against a repetition of this, his first offence.
Department of Public Instruction.	Immoral conduct. Offence admitted	To recommend that the officer be dismissed the Service.
Postal and Electric Telegraph Department.	Carelessness and mismanagement in the discharge of his duties. Offence admitted.	To fine the officer £1 and transfer him to another office.
Department of Public Instruction.	Neglect of duty and misappropriation of school fees and other moneys. (Truth of more serious charges admitted.)	To recommend that the officer be called upon to resign.
Postal and Electric Telegraph Department	Absence from duty without leave	To reduce the officer's salary by £15 per annum, and to fine him half the amount of salary which accrued during period of suspension. The Board further decided that, if at the end of six months the officer's conduct be reported to have been satisfactory, his salary will be restored.
Do do ...	Stealing a letter sent by post containing a postal note. Offence admitted.	To recommend that the officer be dismissed the Service.
Do do ...	Absence from duty without leave. Offence admitted.	To recommend, in view of officer's unsatisfactory record, that he be dismissed the Service.

Appendix No. XIII.

REPORT of Actuary upon the operation of the Civil Service Superannuation Fund during the year 1899.

Gentlemen,

In accordance with your verbal directions, I have the honor to submit the appended information respecting the operation of the Civil Service Superannuation Fund during the year just ended.

The accumulated fund is steadily diminishing. The balance at credit on 1st January, 1899, has decreased by the sum of £58,877 5s. 9d., leaving a closing balance at the end of the year of £298,419 12s. 5d.

The receipts proper for the year were:—

	£	s.	d.
4 per cent. contributions by officers	25,885	15	10
Vote under Schedule B—Constitution Act	3,500	0	0
Interest on balances	14,341	17	8
Sundry special receipts	1,106	5	1
Total	£44,833	18	7

The disbursements were:—

	£	s.	d.
For Pensions	95,778	18	10
„ Refunds	6,682	0	9
Gratuities, &c.	1,250	4	9
Total	£103,711	4	4

The leeway of the fund, the differences of these totals, is, as stated above, £58,877 5s. 9d.

The contributions receivable from officers will gradually diminish, as will also the revenue from interest, whilst, on the other side of the account the payments will be greater in the immediate future, the operation of the Public Service (Superannuation) Act of 1899 being responsible for an increment in the pension list of nearly £5,000 per annum.

Thus the gap between revenue and disbursements, already very large, will widen year by year, with the result that in about four years the accumulated fund will have become exhausted; and at that date the only available means for the payment of liabilities will be the contributions of officers then in the Service, together with the statutory vote of £3,500, representing a total of about £29,000 per annum.

The pension list as at December 31st, 1899, consisted of the following:—

Origin of Pension.	No. of pensions.	Annual pension rate.
General Service (Males)	540	£70,382
„ „ (Females)	49	3,273
Railway Service	165	17,650
Under Schedule B	15	3,500
„ C. S. (Sup.) Act 1899	79	4,902
Total	848	£99,707

In twenty-five cases of the 848 here stated pensions are claimed under two of the pension headings, thus the actual number of individuals receiving pensions is 823.

In addition to the above list there are nine persons in respect of whose services pensions to the amount of £2,019 per annum have been assigned.

These pensions are at present in abeyance (the beneficiaries being engaged in various capacities under the Crown), and may or may not be entered on at any time, at the option of the pensioner.

The following statement shows the distribution of the officers in active service who are still contributing to the Fund:—

Head of Service.	Males.	Females.	Total.
General Service... ..	1,321	33	1,354
Public Instruction	376	191	567
Railways	524	...	524
Total	2,221	224	2,445

In the absence of a valuation, the present value of the liability in respect of future commitments in connection with entered on and prospective pensions cannot here be stated. Nor can an exact statement be made, for the same reason, as to the present value of the liability for future refunds of contributions to discontinuants from the Fund (under section 62 Public Service Act), but I am of opinion that the value of this latter liability, at the end of 1899, differs very slightly from that quoted in my valuation as at 31st December, 1897, and may be stated approximately at £190,000.

It

It will be interesting to take a comparative view of the pension list in force in the neighbouring colony of Victoria, the most recent figures in connection with which are for the year 1897-8.

The following figures (relating to Victorian pensioners who are in the same category as those in our own Colony, to whom my previously-quoted figures refer) have been obtained from the Victorian Year Book for 1897-8:—

	Persons.	Pension List.
Public Service (including Teachers)	1,570	£193,111
Railway Service	772	54,789
	—	—
Total	2,342	£247,900

The Pensions Abolition Act of Victoria was passed in the year 1881, and persons who have entered the Victorian Service since that date are not entitled to a retiring allowance of any kind. The above pension list is consequently the result of the operation of the old Pension Act, in relation to Civil Servants of the period prior to 1881.

No deductions are made from the salaries of those who are prospectively entitled to pensions, all annuity charges being paid from the Victorian Consolidated Revenue.

10th March, 1900.

I have, &c.
JOHN B. TRIVETT.

Addendum to Appendix No. XIII.

Re Board's Report for the year 1899.

1. As to the liabilities of the Civil Service Superannuation Fund if brought up to date, 31st December, 1899:—

I estimate the amount of the liability at little short of £1,500,000. This estimate is derived by approximate methods, and is not the result of a rigorous valuation, which could only be effected at the cost of great labour and time.

2. The additional cost to the Government, if the liability be provided for by loan will be, on the plan laid down in the draft report:—

3% interest on £1,500,000... ..	£45,000 per annum.
Sinking Fund at 3%, fifty years	13,298 „
4% improvement on balances as per section 54, C. S. Act	60,000 „
	—
	£118,298

This is the immediate annual load of liability which would be accepted by the Government, irrespective of the present annual interest paid to the Fund, now amounting to, approximately, £12,000. The amount so due would, of course, diminish annually, but a sum of at least £58,298 (*i.e.*, interest and sinking fund) will be payable each year during the whole fifty years in respect of the loan.

3. It is only right for me to show what would be the cost to Government if the liability were accepted bodily, as in Victoria, and to be payable out of the Consolidated Revenue. Thus during the next four years, during which the present credit balance of the Fund will meet obligations, the only cost to Government will be the interest at 4% on the credit balances, ranging from £12,000 at the present time (the Fund being approximately £300,000) down to vanishing point four years hence.

After the four-year period, the Government will have to provide for pensions, gratuities, and refunds, between £107,000 and £110,000 per annum. Taking the lower figure, £107,000, and allowing for officers' contributions at (say) £25,000 per annum, we find that four years hence the net cost per annum will be the difference of these amounts, *viz.*, £82,000, which will dwindle, gradually at first and rapidly at the latter part of the term, down to vanishing point (say) fifty years hence.

4. The sum of £853,340 has been paid by officers for the period 1st January, 1885, to 31st December, 1899.
5. The initial liability cast upon the Fund at its inception in 1885, I estimate, at least, at £1,000,000.
6. The value of the five annual instalments of £20,000 each, as at the commencement of the Civil Service Act of 1884, was £92,594.

26th March, 1900.

JOHN B. TRIVETT,
Actuary

Appendix No. XIV.

RETURN showing the names of persons in receipt of pensions from the Superannuation Fund, as at 31st December, 1899, with the amount of such pensions, and the date of retirement.

LIST of Committees appointed by the Public Service Board during year, 1st January to 31st December, 1899, to report upon applications received for positions in the General Division of the Public Service, and for other positions for which an examination was not held.

Date	Position.	No. of Vacancies	No. of Candidates	Committee.
1899.				
5 January...	Signwriter, Technical College...	1	9	F. Bridges, Chief Inspector of Schools; Dr. Morris, Superintendent, Technical Education; and Registrar, Public Service Board.
6 ,, ...	Male Attendant, Rookwood ...	1	8	Dr. Paton, Government Medical Officer; E. Hanson, Acting Director of Charities; and Registrar, Public Service Board.
10 ,, ...	Attendant, Coast Hospital	1	57	Dr. MacLennan and Registrar, Public Service Board.
23 ,, ..	Temporary Clerks, Taxation Department.	50	570	J. Davis, Engineer-in-Chief for Sewerage Construction; C. J. Saunders, Inspector, Lands Department; J. S. D'Arcy, Secretary, Taxation Department; and Registrar, Public Service Board.
2 February	Temporary Foreman, Darling River Snagging Works.	1	3	J. Davis, Engineer-in-Chief for Sewerage Construction, and J. W. Grimshaw, 1st class Assistant Engineer, Harbours and Rivers.
27 January...	Inspector under Factories and Shops Act, Newcastle.	1	87	J. Davis, Engineer-in-Chief for Sewerage Construction; T. B. Clegg, Clerk-in-charge, Labour and Industry; W. Cruickshank, Supervising Engineer, Marine Board; and Secretary, Public Service Board.
7 February	Messenger, Land Board Office, Grafton.	1	18	F. H. Wilson, Chief Clerk, Lands Department; A. J. Arndell, Appointment Clerk, General Post Office; and Secretary, Public Service Board.
15 ,, ...	Clerk of Works, Tamworth, New Lands Office.	1	48	J. Davis, Engineer-in-Chief for Sewerage Construction; G. McRae, Principal Assistant Architect; C. J. Saunders, Inspector, Lands Department; J. S. Wigram, Architect, Public Instruction; and Registrar, Public Service Board.
8 ,, ...	Junior Attendant, George-street Asylum, Parramatta.	1	106	Dr. Paton, Government Medical Officer; A. W. Green, Chief Superintendent of Asylums; and Secretary, Public Service Board.
17 ,, ...	Temporary Clerk and Paymaster, Moree to Inverell Railway.	1	232	J. Davis, Engineer-in-Chief for Sewerage Construction; F. H. Small, First-class Assistant Engineer, Railway Construction Branch; and Registrar, Public Service Board.
17 ,, ...	Account Clerk and Storekeeper, Moree to Inverell Railway.	1	132	Do do do
23 ,, ...	Probationary Nurses, Coast Hospital.	21	94	Miss McMaster, Matron, Coast Hospital; Miss Gould, Matron, Sydney Hospital; and Registrar, Public Service Board.
17 March ...	Stableman, Coast Hospital	1	52	C. A. Summs, Secretary, Board of Health, and Registrar, Public Service Board.
20 April	Junior Assistant, Plumbing Classes, Technical College.	1	3	O. Blacket, Lecturer in Mechanical Engineering, Technical College; J. Y. Nelson, Electrician, Telegraph Department; and Registrar, Public Service Board.
20 ,, ...	Assistant to Lecturer, Engineering Classes, Technical College	1	11	O. Blacket, Lecturer in Mechanical Engineering, Technical College; J. Y. Nelson, Electrician, Telegraph Department; and Registrar, Public Service Board.
21 ,, ...	Fitters and Boys, Dredge Service	6 & 10	32, 123	J. Carruthers, Chief Engineer, Dredge Service; O. Blacket, Lecturer in Mechanical Engineering, Technical College; and Registrar, Public Service Board.
11 May	Attendant, Female Lazaret, Coast Hospital.	1	5	Miss McMaster, Matron, Coast Hospital, and Registrar, Public Service Board.
16 ,, ...	Caretaker, South Sydney Morgue.	1	252	J. C. Woore, City Coroner; J. L. Williams, Chief Clerk, Justice Department; and Registrar, Public Service Board.
19 ,, ...	Caretaker, Bourke Wharf	1	57	Captain Jackson, Manager and Collector, Department of Public Wharfs; Captain Edie, Shipping Master; and Registrar, Public Service Board.
1 ,, ..	Gardener at the Vice-Regal Residence, Hill View.	1	63	Hon. P. L. C. Shepherd, M.L.C.; F. H. Searle; J. H. Maiden, Director, Botanic Gardens; and Registrar, Public Service Board.
19 ,, ...	Kitchenman, Coast Hospital ...	1	27	Dr. Violette, Medical Superintendent, Coast Hospital, and A. R. Gullick, Clerk, Board of Health.
10 ,, ...	Tide-waiter, Moama	1	11	F. H. Walford, Chief Tide Surveyor, and Registrar, Public Service Board.
23 ,, ...	Blacksmith, Technical College...	1	20	A. B. Portus, Superintending Engineer, Dredge Service; O. Blacket, Lecturer in Mechanical Engineering, Technical College; and Registrar, Public Service Board.
26 ,, ...	Resident Surgeon, Trial Bay ...	1	6	Dr. Thompson, Chief Medical Officer, and Captain Neitenstein, Comptroller-General of Prisons.
6 June .	Housemaid and General Servant, Coast Hospital.	1	26	Miss McMaster, Matron, Coast Hospital, and Registrar, Public Service Board.
31 May ...	ColloTYPE Printer, Government Printing Office.	1	5	C. Griffiths, Superintendent, Government Printing Office, and Registrar, Public Service Board.

Appendix No. XX.

REPORT of the Committee appointed to advise the Public Service Board in regard to the applications for the position of Government Metallurgist.

WE beg to report that we have held two meetings for the purpose of selecting a gentleman for the position of Government Metallurgist.

In the first place, we have given consideration to the question as to whether it is advisable in the public interests that this appointment should be filled, and have arrived at the unanimous conclusion that it is undesirable to fill the vacancy, as we feel assured that the public can receive no adequate return for the expenditure involved in the appointment and the maintenance of the works.

We wish to point out that since this appointment was made the conditions have been altogether changed. When the question was originally decided, there was no doubt a necessity for some works of the kind in the Colony, and it was in the absence of any such works, and in response to the public agitation at the time for their establishment that they were started.

Since Mr. Taylor was appointed, however, two highly equipped private metallurgical works have been established, viz., at Dapto and at Cockle Creek, and these institutions give the information that is generally desired by the mining community for all practical purposes. Thus we feel that the necessity for Government Works does not now exist.

We further wish to explain that, in order to give the same satisfaction to mine-owners as is afforded by these large privately-owned establishments, it would be necessary for the Government to expend a very considerable capital sum in equipping the works on a much more extensive scale than now exists; and by the non-filling of the appointment there will be the saving of this capital sum, as well as the large annual expenditure that would be required for the maintenance of a proper staff.

Also, in works of this kind it is necessary to constantly renew the plant and procure all new appliances and approaches that may be brought before the public. This would likewise saddle the Government with a large burden, all of which might be saved by the abolition of the works.

We also desire to emphasise the fact that if the Government were to establish works that would fairly compete with private enterprise, the result would be that for half the time the works would be idle, but the staff would have to be paid just the same.

It may be mentioned that when the agitation for Government Smelting Works was initiated in Parliament, one of the principal arguments used was that similar institutions were in existence, and had been found to work successfully, in other parts of the world; and it was desirable that New South Wales should not be behind other countries in endeavouring to work out the metallurgical problems connected with her metalliferous deposits. That this contention was based upon incorrect premises is evident in the fact that there is only one place in the world where Government Metallurgical Works have been successfully established, viz., Freiberg, in Germany, and the conditions which exist there are totally different from the conditions in New South Wales, because the Freiberg works are run in connection with State-owned mines, whereas the New South Wales mines are all in the hands of the public.

Hence it follows that Government works in this Colony, if run on commercial lines, must compete directly with private enterprise. The only alternative is to conduct the Government works on an extremely extravagant scale. The chief contention is that these works should be available for the treatment of small parcels of ore of all classes which may be sent in by mine-owners desirous of ascertaining the best method of treatment. If such a policy be continued it is clear that all the machinery employed would require to be cleaned up after each parcel had been operated upon, inasmuch as each owner would demand the metal actually obtained from his particular ore. An idea of the expense entailed by such a mode of procedure may be obtained when it is mentioned that in similar establishments, which are run on commercial principles,

principles, the method invariably followed is to *buy* the various ores in parcels of all sizes, according to their assay value, and when large quantities have been acquired, to treat, *in conjunction*, those varieties which are mutually suited for any metallurgical process. Thus, at the present time, the argentiferous galena and zinc-blende ores of Broken Hill, Burragorang, and Borah Creek are being successfully smelted with the complex tellurium-gold ores from Western Australia; mixed sulphides, containing a small proportion of copper, are being economically smelted with low grade auriferous slates, which could not be profitably treated *per se*. Many other analogous cases might be quoted to prove that any attempt on the part of the Government to treat small parcels of all the ores occurring in New South Wales must result in very great cost to the State.

If further arguments are needed to show the inadvisability of establishing Government Metallurgical Works on these lines, it may be stated that there is considerable doubt whether the services of a gentleman possessing all the qualifications necessary to the carrying out of the ideal aimed at could be obtained. There are probably very few, if any, persons who, in the course of an ordinary life, have acquired a thoroughly practical experience of the extraction of all the different metals, and any such person could command a very large salary indeed. But if an individual could be found who, in addition to such attainments, possessed sufficient genius to enable him to devise original methods for the treatment of complex ores, it is hardly conceivable that he would accept a salary at all, inasmuch as he could rapidly acquire a fortune in commercial enterprises.

The principal arguments in connection with this question may be summarised as follows:—

- (1.) Government Metallurgical Works have not been established in any country in the world where the conditions are similar to those existing in New South Wales.
- (2.) If such smelting works were run on commercial lines in New South Wales there would be an unwarrantable interference with private enterprise.
- (3.) The only alternative would be to conduct the works in an extravagant manner and at considerable cost to the State, for which the State would get no adequate return.
- (4.) We are of opinion that it is not possible to obtain a metallurgist possessing all the qualifications which seem to have been expected, and especially that of being able to devise an economical process for the treatment of every variety of so-called intractable ore which might be forwarded to him. This is said without disparagement to those who have applied for the position, among whom are some possessing very high scientific attainments and great metallurgical skill and reputation in regard to the extraction of certain metals.
- (5.) There is really no necessity for Government Metallurgical Works in this Colony, as the requirements of the public are provided for by the two very efficient customs Works—viz., at Cockle Creek, near Newcastle; and at Dapto, Illawarra.

For the reasons given above, we have, after mature consideration, to recommend that the position of Government Metallurgist be not filled; and as no good results can be expected from the Works, we consider no further expenditure in connection therewith should be incurred.

We have, &c.,

Appendix No. XXIII.

REPORT of the speech of His Excellency the Governor, Sir John Young, Bart., K.C.B., G.C.M.G., on the occasion of his proposing the toast of "Prosperity to the Civil Service of New South Wales," at their first picnic, held on 23rd January, 1864.

HIS EXCELLENCY (who was very enthusiastically cheered on rising) responded as follows:—"Mr. Fitzpatrick, Ladies, and Gentlemen,—I am very sensible of the warmth and of the flattering kindness with which the company has been pleased to receive the mention of my name, and I can assure them that I am extremely gratified by the existence of that sentiment, and by the manner in which it has been expressed. This meeting, I am told, is preliminary to further arrangements, to the formation of a club or association which the Civil Service intend to form, for the purpose of having a common place of meeting, and in order that they may enjoy the pleasures and advantages of frequent intercourse among themselves, and of communion upon topics of interest. This object, within due and legitimate limits, is one that is worthy of sympathy and encouragement; and I trust that it will meet with its full measure of success—the object being to facilitate intercourse, to form a bond of union between the different branches of the Civil

Civil Service, to give them the means of seeing each other frequently—a bond of union and of common policy, engendering an *esprit de corps* which may be highly serviceable to the individuals, and also profitable to the public good, inasmuch as it may strengthen the Service in self-respect, and in public respect by others, and so enable them to become apter to fulfil the duties entrusted to them—duties, I apprehend, of no mean importance—nothing less than the administration of the public affairs under the supervision of the responsible Ministers who are placed over them, in consequence of their possession of the confidence of Parliament—duties to be performed in strict obedience to the laws, and in accordance with confirmed rules, and with the traditions which experience has established in the Departments—rules and traditions which are not to be set aside at the discretion, or, it may be, at the caprice of any individual, however popular, or at the bidding of any favourite, however powerful, whether an individual or a body of men. (Cheers.) Now, on these grounds the Civil Service should not be regarded as a mere band of clerks, to register the decrees of others. In England they stand on a much higher footing. The Civil Service of that country has achieved a high and recognised place in the realm. It is the trusted adviser, the confidant of successive Ministries; it assists all with equal diligence and fidelity, without reference to distinctions of politics. The knowledge of the rules which are laid down, and of the precedents which are to be followed, gives the members of the Civil Service a great influence, inasmuch as they are the guides by which the Ministers, if they are wise, direct themselves—particularly those members of the Civil Service who have, by long experience in years past in their offices, acquired that position which enables them to say, ‘Such-and-such are the precedents which ought not to be departed from.’ Men of this kind have stamped order and stability on the executive administration of England, and they have guarded it from the suspicion that might attach to undue changes, or to what might seem capricious alterations. But if these advantages have accrued in England, they should accrue here, and much more are they needed here, for this reason, that the changes in your political atmosphere, the shiftings of your political scenery, have been of late years much more rapid and frequent than they have been at any time in England. Well then, if at every change of a political leader a change of system is to be introduced into the public offices, what can ensue but uncertainty and confusion? This is to be avoided; and there is another point to which your attention is required. In this country, under your imperfectly-developed and highly-centralised institutions, the Ministers of the Crown wield a large amount of power, and have a very extensive sphere of action. In England the Minister’s power is balanced by many powerful interests which have grown up for centuries, by great local institutions, but above all by the prescriptions of office. Now, as an enforcement of this argument, I will quote the words of the eloquent historian of the Invasion of the Crimea, who, speaking of the Civil Service, says:—‘Then again, a man rightly called a Minister of State is not a mere favourite of his Sovereign, but the actual transactor of public business. He is in close intercourse with those labourers of high worth and ability who, in all great States, compose the permanent staff of the public office; and in this way, even though he be newly come to affairs, he is brought into acquaintance with the great traditions of the State, and comes to know and feel what the interests of his country are.’ Now, in this passage, the permanent officials are not spoken of as mere clerks. No, they are the people who introduce the incoming Minister—the man who has distinguished himself by success and ability in legislative assemblies; they are the people who introduce him into acquaintance with the great traditions of the State, and who, however able he may be, cause him to know and feel what the interests of his country are. Let the members of the Civil Service recollect this—that theirs is no mean employment. (Cheers.) But I will not add more, or lengthen out my address. The sum and substance of it is this: Be your institutions what they may, call them by what name you please, the essence of all freedom consists in this—that each individual shall be subject to the law and to the law alone; to no discretion of a Minister, and to no caprice of a Minister; to the law known and promulgated; to the law confirmed by general acquiescence, and firmly and equally administered; and, as following from this general principle, as to the law, as the direct and undeniable corollary from this maxim, that the public Departments should be administered upon known rules and fixed practices—upon the traditions of office. No doubt the Minister may introduce changes—it may be his duty to do so—but he should introduce them publicly, and at the public call, after reference to Parliament, and with the assent of Parliament. But for the rest he should consult the head of his Department, and be bound by the traditions of his office; and of those traditions the proper and only safe keepers are the permanent officials. And in this capacity the public ought to recognise, to honor, and to uphold them; otherwise, you may depend upon this, that under specious pretexts, and under the vain shadow of responsibility to Parliament, the community may be subjected to as much changeableness, to as many caprices, and to as real a denial of justice in many particulars as is suffered by inhabitants of States where institutions arbitrary in name prevail, but institutions not more arbitrary than yours will prove in effect and reality if this point be not attended to. (Cheers.) Now, with this high idea of the benefits which the Civil Service can confer on the country, I beg leave to propose the toast, “Prosperity to the Civil Service of New South Wales,” and I only trust it may confer on New South Wales the benefits which the great and renowned Civil Service of England has conferred on the Empire. (Prolonged cheering.)

Memorandum attached.—J.V., 31/10/00.

T. A. Coghlan, Esq., to The Colonial Treasurer.

Agent-General's Department.

Sir,

Public Service Board, 50, Young-street, Sydney, 15 March, 1898.

In accordance with your request, I have the honor to advise of the changes and improvements I would suggest should be made in the management of the Agent-General's Office in London. These recommendations are based on detailed inquiries made and evidence taken in London in September last. I have not thought it necessary to submit with this letter the evidence, which is too voluminous to be herein embodied, but I am preparing it in such form as will be convenient for reference should any of the matters discussed require further elucidation.

Management of Public Debt.—The management of the public debt, with the inscription of stock, should be transferred from the Bank of England to the Agent-General's Department. This will bring about a considerable saving. The present cost of this service is £18,455 a year; the work could be done satisfactorily by the Department for £7,500 a year, and the stockholders equally well served. It is claimed that the prestige of the bank's administration of the inscription, &c., is valuable to the Government; but I have not been able to discover that the fact of the banks conducting the inscription adds or has added one penny to the selling price of the stock. I cannot, however, claim for the proposed management by the Agent-General's Department that the stockholder will be better served. It is simply a question of expense to the Government, and if there are no legal difficulties the change ought to be made in the interest of economy, as a yearly saving of £11,000 might be effected.

Shipping Business.—The New South Wales Government has a large amount of freights between British ports and Sydney, the arrangement in regard to such freights being handed over to Messrs. Houlder Brothers, who during the past seven years received £5,670. This, of course, is by no means all profit to Houlder Brothers, as a good part of the sum paid to this firm is absorbed in direct charges, such as lighterage, freights, dock-dues, &c.; but as the office could do the work just as well as Houlder Brothers, and as there is no reason why the Government should assist in maintaining the shipping ring which is alleged to affect injuriously freights to Australia, the freight business should be conducted directly by the Agent-General's staff. The Queensland Government conducts the whole of its shipping business, and makes a material saving thereby, and a considerable advantage would accrue to the Treasury if the New South Wales Government carried on this service with its own officers.

Inspection of Materials.—This is a very important work. The Government imports a very large quantity of machinery, steel rails, pipes, castings, and other ironwork. This is inspected in Great Britain before shipment. The inspection is entrusted to the firm of Sir John Fowler and Company, and the following sums have been paid to the firm during the years mentioned on account of inspection:—

1890	£5,519
1891	10,408
1892	3,384
1893	1,741
1894	1,086
1895	603
1896	1,390
								£24,161

This is an average of £3,452 per annum. Of the sum of £24,161, there was expended on account of Public Works, £6,581, and of Railways, £17,580.

The whole of the amount above set down does not represent profit. The services of the necessary inspectors are retained by Sir John Fowler and Company to test material supplied. These inspectors vary in number according to the quantity of work in hand.

I understand Sir John Fowler takes no part whatever in the conduct of his office; but it may be conceded that, on the whole, the work of inspection has been satisfactorily performed.

I find that the testing of iron and steel is usually done satisfactorily; but this cannot always be said where ironwork has to be fitted before leaving the manufacturer's yard, and cases have occurred when, through imperfect supervision, the Government has been put to large expense in remedying the defects which have been discovered at the time the work was being erected in the Colony.

I have carefully looked into the matter, and can find no satisfactory reason for continuing the present practice. It would be cheaper, and altogether a better arrangement, if the inspections were done under the direct supervision of the Government. If such plan were carried out it would be desirable to have a skilled engineer, and an assistant with a knowledge of drafting, attached to the Department; the services of inspectors could be secured as occasion required. The existence of such a staff in London would enable the Departments to import direct where the services of a middleman are now required. This is largely the practice of the Railway Commissioners, who are thus able to supply themselves with material on more favourable terms than the other Departments.

As showing the Departmental views of the question of supervision, it is no uncommon thing for a tender to be accepted which is not the lowest, because its acceptance gives the officers of the Department facilities for supervision which the lowest tender does not give. This is a further advantage of the plan proposed. America threatens to take the place of England in the supply of ironwork, and articles ordered from America could be inspected at the place of manufacture without involving the cost, as at present, of sending an officer from Sydney, or paying commission to an American firm. The interests of the Colony might also be served in other ways. It is very desirable, for example, to keep the merits of our timber products before the engineering world. At present the Agent-General's Office can only refer in a vague way to the merits of Australian hardwood for railway sleepers, wood-blocking, wharf construction, cabinet-making, and such like purposes, whereas a qualified engineer could speak with precision.

I was astonished to find the general ignorance in England as to the Colony's timber resources, and although wood-blocking is extensively practised in London, the other uses of hardwood are not generally known. If a happy selection were made of a qualified officer, he would also be able to advise the Agent-General in regard to the mineral resources of the Colony, in order to meet the numerous inquiries which are certain to be made, when it is known that such inquiries are likely to be answered intelligently.

I am disposed to think that a competent engineer ought to be attached to the Agent-General's Office, even if the present arrangement in regard to Sir John Fowler is continued. The Works Department need to be kept informed of the progress in engineering and sanitary matters, and an officer acquainted with the Colony's wants would be able to furnish most useful and valuable information to the Department. Special reports are often required on particular subjects; these could be confidently called for if the Resident Engineer were well acquainted with the conditions of the Colony, while this officer could, without being asked, transmit to the Colony information relative to the development of special branches of engineering, which, not being published, would not be obtainable through the ordinary channels. These reports would be sent to the officer in the Colony dealing, or likely to deal, with the question.

I have had the advantage of a discussion with several of the leading officers of the Works Department, who are unanimous in recognising the advantage that such an officer would be to their branches. The interests of the Railway Commissioners must however be studied in this matter, and only a person approved by them should be appointed to London. The engineer ought not to remain longer than five years without being exchanged for another officer from Sydney.

Produce Business.—I am strongly of opinion that under existing circumstances the Government should not undertake produce agency in any form. Trial shipments might be continued at the discretion of the Department, some such means being apparently necessary to awaken the local producers to the possibilities of trade. There should, however, be a produce expert attached to the Department. He would deal with trial shipments when they arrive and report on the possibilities of trade. His duties would be generally similar to those of the Board of Trade attaché to the British Embassies, and his reports somewhat in the nature of the communications received by the Board of Trade from their agents abroad, or of the American consular reports. His reports would be either on his own motion when anything came to his knowledge which would be interesting to colonial producers, or on subjects specially selected by the Department of Agriculture. His work should be entirely in connection with produce, as it would be idle to expect a produce man to make reports on technical or general subjects. If information of the latter class is needed, it could be obtained from the Agent-General, as it is at present.

There are several other important purposes a produce "expert" could serve. He would be able to advise producers and shippers of the defects in the preparation of their goods, and the peculiarities and

and wants of the British market. He could make it his study to find out how it happens that, every care being taken to ensure the shipment of goods in perfect condition, they oftentimes reach the distributor in an inferior condition. He could study the methods of foreign competitors, and advise where they could with advantage be followed. He could interest the large distributing associations in the trial of Australian produce, and he could draw attention to the desirability of introducing into the Colony the cultivation of produce having a ready market in Europe, the raising of which has been neglected in Australia.

The produce agent would have to keep closely in touch with the English and foreign markets, and send in regular reports dealing with the openings for trade not yet availed of, the peculiarities of the demand in various countries, information in regard to packing, transport, preparation of produce, and other matters not ordinarily known to the local producer or exporter.

The produce agent might from his special knowledge be able to advise the Agent-General of the operation of tariffs hostile to the New South Wales producer, but which might be modified on proper representation. It happens that at the present time New South Wales goods are subject in some countries to the maximum tariff, whereas the Colony is able to claim the most favoured nation treatment with the minimum tariff. This is more important than might at first sight appear.

Of course, the work of the produce agent would depend largely upon the instructions of the Department of Agriculture, and there are many special inquiries that he could make for that Department which would be extremely serviceable to the Colony. If it is decided to appoint such an officer, it will be necessary to see that no one but a first-class man is selected; an inferior man, or even a man with a not inconsiderable share of technical knowledge, but lacking judgment, might do an infinite amount of damage.

Inquiry Clerk.—There is an urgent need for the appointment of a clerk who is acquainted with the affairs and resources of the Colony. Not one of the clerks employed in the office of the Agent-General has been in Australia, and though inquiries are answered by the aid of a directory or a Blue Book, in very few cases can a person seeking information go away with the assurance that his inquiries have been satisfied. This is a very great defect in the organisation of the Department. The inquiry branch should be made an important feature in the working of the office, and be the means of economising the Agent-General's time, now often devoted to answering trivial inquiries.

The inquiry clerk might be appointed from the service in this Colony, the person chosen being selected on account of his capacity to deal with inquiries from intending emigrants, and his local knowledge. His knowledge of local affairs ought to be comprehensive enough to allow of his preparing an answer to the antagonistic statements in regard to the Colony which from time to time appear in the English press.

Many of these statements are made by interested parties, and obtain wide currency without contradiction. Of course, the reply to press statements should be made by the Agent-General, but the Department ought to be in a position to deal with them as soon as they appear, and not await, unless in exceptional cases, instructions from Sydney.

To enable the increased work of the Department to be properly carried out, additional office accommodation is needed. The changes indicated in this report could be effected, and a net saving made in the expense of the Agent-General's Office of, at least, £10,000 a year.

I have, &c.,
T. A. COGHLAN.

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

THE PUBLIC SERVICE.

(PARTICULARS OF THE NUMBER OF PERSONS EMPLOYED IN, EXCEPTING THE PUBLIC WORKS DEPARTMENT, ON THE 31ST DECEMBER, 1895, AND ON 30TH JUNE, 1899.)

Printed under No. 10 Report from Printing Committee, 30 August, 1900.

[Laid upon the Table in accordance with promise made, in part answer to Question No. 1, asked on the 26th October, 1899, by Mr. Affleck, M.P.]

Mr. W. H. Hall to The Government Statistician.

Sir,

Government Statistician's Office, Sydney, 22 August, 1900.

In compliance with the circular of the 27th January last, returns have been furnished by each of the Departments under the control of the Public Service Board, with the exception of the Public Works Department, and inasmuch as the return from that Department cannot be completed for some weeks, it has been considered advisable to close the investigation, with a view to the information already available being laid on the Table of the House. For the purposes of comparison, the financial years ended 31st December, 1895, and 30th June, 1899, have been adopted as the basis of the investigation, and Tables A to E inclusive, attached, indicate the expenditure in connection with each Department during those periods. In accordance with the direction of the Board, the expenditure in connection with the Police administration of the Colony is included; but for the purposes of this statement I have excluded the amounts from those shown under each heading, so that the comparison may be equitable, and not be affected by any factor not relevant to the matter. The following statement indicates, therefore, the actual expenditure of the Departments, excluding the Department of Public Works and Police administration, for each of the financial years ended 31st December, 1895, and 30th June, 1899:—

Department.	Year ended 31st December, 1895.				Year ended 30th June, 1899.			
	Permanent Staff.	Temporary Staff.	Wages Staff.	Total.	Permanent Staff.	Temporary Staff.	Wages Staff.	Total.
	£	£	£	£	£	£	£	£
Chief Secretary	67,867	53,300	15,647	141,814	84,958	47,550	10,870	143,378
Treasury	98,620	83,631	58,672	240,923	177,527	31,893	14,060	223,480
Attorney-General	13,082	1,090	108	14,280	12,991	12,991
Lands	165,229	23,332	21,844	215,405	172,735	3,456	18,853	195,044
Justice	152,528	82,800	1,185	236,513	141,945	50,900	1,939	194,784
Public Instruction	604,279	4,042	2,358	610,679	628,348	1,412	1,986	631,746
Mines and Agriculture	65,845	16,831	10,878	93,552	65,495	6,318	13,184	84,997
Post and Telegraph	307,818	146,066	11,856	465,740	377,420	31,064	14,344	422,828
Total	1,475,266	421,092	122,548	2,018,906	1,661,419	172,593	75,236	1,909,248

From the foregoing statement it will be seen that the expenditure for the financial year ended 31st December, 1895, was £2,018,906, while that for the financial year ended 30th June, 1899, was £1,909,248. The expenditure for the latter financial year, therefore, was £109,658 less than that of the former.

It must, however, be borne in mind that during the intervening period, under Departmental regulations in the Public Instruction and Post and Telegraph Departments, there is a system of increases dependent on qualification, and the Legislature has also sanctioned the payment of an annual increment in certain cases, under the regulations of the Public Service Board. The first payment under the Public Service Board Regulations occurred during the financial year ended 30th June, 1899, and in the Departments under consideration amounted to £13,527, while that under Departmental regulations involves

involves an annual payment of £20,491. The increases under Departmental regulations would have taken place even under the condition of things existent prior to the Public Service Board taking charge of the Service, and those under the Public Service Board Regulations may fairly be taken into consideration in arriving at an estimate of the actual savings effected by that body. The following table shows the distribution of the increments in question :—

Department.	Number of Officers affected.	Total Amount of Increments.
	No.	£
Chief Secretary	122	1,352
Treasury	101	1,000
Attorney-General	14	130
Lands	114	1,086
Justice	158	1,486
Public Instruction, under Public Service Board Regulations.....	60	675
Do do Departmental Regulations	750	15,000
Mines and Agriculture.....	44	516
Post and Telegraph, under Public Service Board Regulations	765	7,282
Do do Departmental Regulations.....	400	5,491
Total..	2,528	£34,018

Another factor that has to be taken into consideration is the expansion in business due either to Ministerial policy or the normal growth of the business of any particular Department; the latter is most noticeable in the case of the Public Instruction and Post and Telegraph Departments. The increase in expenditure in this direction in the Chief Secretary's Department is mainly due to the extension of business in connection with the sub-departments of Lunacy and the Medical Adviser. In the Treasury Department a larger expenditure was necessary in order to provide for more efficient administration of the Land and Income Tax. Expenditure in connection with the provision of an administrative staff for the Advances to Settlers Board accounts for the increase in the figures for the Lands Department. The small increase in the Justice Department principally arises from the necessity of fresh appointments of Clerks of Petty Sessions consequent on the opening of new offices, the additional outlay being £2,182. In the Department of Public Instruction the increased expenditure is resultant on the extension of educational facilities to new districts, and on the increase of accommodation requisite in rapidly-growing centres of population. No less than 413 new officers were appointed, involving an annual outlay of £38,000, while a further sum of £3,933 was absorbed in salaries of lecturers in various branches of Technical Education. In the Mines Department the sum of £3,854 represents increased outlay in respect of mining administration, while £4,446 was absorbed by the agricultural section. The increased outlay in the Post and Telegraph Department arises from the necessity for making provision to meet growing requirements for postal and telegraphic facilities. The following statement indicates the increase in expenditure in this direction :—

Department.	Permanent Staff.	Temporary Staff.	Wages Staff.	Total.
	£	£	£	£
Chief Secretary	9,980	5,918	425	16,323
Treasury	11,475	19,286	30,761
Lands.....	167	167
Justice	5,713	5,713
Public Instruction	44,987	632	1,986	47,605
Mines and Agriculture	8,600	8,600
Post and Telegraph... ..	13,059	3,414	16,473
Total	93,814	29,417	2,411	125,642

The foregoing amounts, due either to Ministerial policy or to the normal growth of business, would have been an increase of expenditure even if the old condition of things existed, and may reasonably be taken into account in determining the amount of savings effected by the Public Service Board.

Apart from the foregoing, there were savings in connection with Prison administration contingencies which amounted to £4,667 during the financial year ended 30th June, 1899, in comparison with the financial year 1895. The reconstruction of the Stores Department shows a saving during the last financial year, ended 30th June, 1900, of £18,762 over the condition of business existing at the time the Public Service Act came into operation. Further savings have also been effected by a revision of the travelling allowances paid to public officers.

The position then is as follows :—

Decrease in expenditure for year ended 30th June, 1899, in comparison with 1895 ...	£109,658
Annual value of increments paid since grading of the Service	34,018
Expenditure due to expansion of business	125,642
Savings in contingencies in Prisons Department... ..	4,667
Savings effected by reconstruction of Stores Department	18,762
Fees previously received by officers now paid into Consolidated Revenue (Estimate) ...	7,000
Amount saved by revision of travelling allowances
Total	£299,747

The

The amount saved in connection with the change of system in respect of the payment of travelling expenses has been left blank, but as it cannot be less than £18,000, the aggregate savings amount to at least £317,747.

The expenditure is charged to two accounts, viz., the Consolidated Revenue and the Loan Funds, and the following statement shows the distribution for each Department for each financial year in respect of each fund.

Department.	Year ended 31st December, 1895.				Year ended 30th June, 1899.			
	Paid from Consolidated Revenue.	Paid from Loan Fund.	Total Expenditure.	Proportion paid from Loan Fund to total Expenditure.	Paid from Consolidated Revenue.	Paid from Loan Fund.	Total Expenditure.	Proportion paid from Loan Fund to total Expenditure.

Difficulty has been experienced in determining the number of officers in the Service on the 31st December, 1895, consequent on the fact that the records of several Departments are meagre in their information in respect of officers holding positions under the control of other Departments. An adjustment of the figures furnished by most of the Departments became necessary to prevent duplication. The following statement shows the actual number of officers employed on the 31st December, 1895, and 30th June, 1899 :—

Department.	On 31st December, 1895.				On 30th June, 1899.			
	Permanent.	Temporary.	Wages.	Total.	Permanent.	Temporary.	Wages.	Total.
Chief Secretary.....	301	632	119	1,052	507	510	94	1,111
Treasury	405	539	539	1,483	1,062	208	108	1,378
Attorney-General.....	41	4	2	47	41	41
Lands	670	79	269	1,018	670	41	212	923
Justice	772	831	20	1,623	1,166	374	28	1,568

Mines and Agriculture	254	97	99	470	273	41	141	455
Post and Telegraph	3,405	1,301	105	4,811	3,274	1,610	134	5,018
Total	10,691	3,512	1,181	15,404	12,299	2,790	736	15,825

The foregoing statement shows an increase of officers in the Service at 30th June, 1899, of 421 persons over the number in employment on the 31st December, 1895, but it should be pointed out that consequent on the expansion of business it became necessary to appoint a number of officers, 1,403 of whom were in employment on 30th June, 1899. Of the 1,403, 989 were on the permanent staff, 390 on the temporary staff, and 24 on the wages staff.

I have, &c.,
W. H. HALL.

In forwarding to the Board Mr. Hall's report, I take the liberty of saying that I have carefully gone through the details of the computations, and agree in estimating the savings effected by the Board on the Departments herein dealt with (that is to say, all Departments except the Works) amount to about £317,000 per annum.—T. A. COGHLAN, Statistician, 24/8/00.

No. 1.

Mr. J. S. Inch to The Registrar-General.

Sir, Registrar-General's Department, Sydney, N.S.W., 12 September, 1899.

I have the honor to ask that the enclosed letter may be forwarded to the Public Service Board, to whom it is addressed, together with my memorandum of interim appeal, dated 27th February last, and that of June 15th, under heading "Increment Regulation Reports."

Your apparent appreciation of my services leads me to hope that you will assist me to obtain the desired object at an early date.

I have, &c.,

JAMES S. INCH,

Clerk in Charge, Correspondence and Records.

[Enclosures.]

Gentlemen, Registrar-General's Department, Sydney, N.S.W., 12 September, 1899.

I have the honor to ask for an interview on the subject of my salary for the past year.

It is my desire to bring under your notice the unbroken series of favourable recommendations which preceded the fixing of same at £230 per annum—*vide Gazette* of 27th February—and to disprove certain statements contained in a report by Mr. Noble, Deputy Registrar-General, dated 20th October, 1898, which was made at a time when he was, as he admits, suffering from some head trouble.

It would ill-become me to disparage a fellow officer, or to make capital out of so great a misfortune; but, I feel sure you will recognise that it is not compulsory for me to permanently sustain the evident prejudice to which I have quietly submitted, pending your fuller knowledge of the circumstances of the staff matters of this Department.

The thanks which you recently directed should be communicated to me, in connection with my suggestions on the subject of leave of absence, were received with gratification.

I have, &c.,

JAMES S. INCH.

Sir, Registrar-General's Department, Sydney, New South Wales, 27 February, 1899.
 With reference to the Public Service *Gazette* notice of 24th instant, fixing my salary at £230 per annum, I have the honor to state, for your information, that upon certain papers which bore a recommendation of the late Registrar-General that my salary be fixed at £250 per annum, I observed a note against my name in the handwriting of Mr. Barling, then Chairman of the Public Service Board, of which the following is a copy :—"He is now doing work which we graded at £300 per annum—£240."

This note was observed by the then Acting Registrar-General. The papers referred to were received from the Under Secretary of Justice on 7th October, 1898, and returned fourteen days later.

Seeing that only the minimum increment has been granted in my case, it appears to me that the Public Service Board have decided to leave the adjustment of my salary to you.

If such is the case, my only regret is that the matter is still incomplete.

The Registrar-General.

I have, &c.,
 JAMES S. INCH,
 Clerk in Charge, Correspondence Branch.

Mr. Inch is under a misapprehension in supposing that the adjustment of his salary has been left to me. I have made no recommendation, either for or against, in regard to his salary, and the presumption is that the Board have dealt with the matter upon the strength of recommendations which were made before my appointment, and their own investigations.—W.G.H-W., 2/3/99.

Mr. Inch and Records,—Records in accordance with Registrar-General's direction.—J.S.I., 2/3/99.

INCREMENT REGULATION REPORTS.

Registrar-General's Department, Sydney, New South Wales, 15 June, 1899.
 BEING directed—in my capacity as Clerk-in-Charge of Correspondence and Records—to prepare certain reports herein, I have the honor to draw attention to the fact that, owing to my own salary being £230—£70 per annum less than fixed by the Public Service Board at the original grading—I shall, perforce, come within the increment regulations myself. As the Public Service Board, in drawing up the forms upon which these reports are being made, do not appear to have contemplated that responsible officers would receive less remuneration than the £299 limit, my case seems to be somewhat singular; for this reason I respectfully submit the following statement for your information :—

On the 15th March, 1897, I was directed to, and did assume, control of the branch at present in my charge.

Reference to my monthly reports and those of my predecessors will show that I have procured a reduction of staff, and that the hours of work have been reduced to regulation time. Many useful registers have been opened under my supervision, including records of cemeteries and officers, sworn valuers, ministers for celebration of marriages, guardians of minors, and Acts affecting the Registrar-General's Department. I claim to have given a more definite and decisive tone to the correspondence of the Department generally, and, in view of the absence of complaint or dissatisfaction with my work, and of the discretionary power which I am authorised to exercise with regard to inward correspondence, and of the emergent services rendered by me during the past two years, I venture to hope that you may see your way clear to recommend that my salary be brought into agreement with original grading above referred to.

The Registrar-General.

JAMES S. INCH,
 Clerk in Charge, Correspondence and Records.

Submitted.

MINUTE-PAPER.

Subject :—Application of Mr. James S. Inch, an officer of this Department, for an interview with the Public Service Board, on the subject of his salary.

Registrar-General's Department, New South Wales.
 Mr. INCH's letter of 12th September, addressed to the Public Service Board, with covering letter, is forwarded herewith, together with his letter to me of 27th February, 1899, and his memo. of 15th June, 1899, mentioned in his covering letter.

As Mr. Inch is apparently under the impression that his advancement has been unwarrantably prejudiced by certain action of the Deputy Registrar-General and Chief Clerk, Mr. Noble, I venture to advance the suggestion that, in fairness to Mr. Noble, and in the interests of discipline, Mr. Inch might be afforded an opportunity of stating his case to the Public Service Board.

The reference in Mr. Inch's covering letter to my apparent appreciation of his services is beside the question. I have a high opinion of his clerical ability, and his systematic methods, in connection with the work of his branch; but his attainments are not such as to best qualify him for the position he now holds.

I have, on previous occasions, referred to the necessity for the appointment to the Correspondence Branch of an officer having a fair knowledge of law and conveyancing practice, with a practical knowledge of shorthand and correspondence generally. Such an officer in the position held by Mr. Inch would be of great value to this Department, the correspondence of which is largely devoted to legal matters.

Mr. Inch does not write shorthand, and he makes no pretensions, so far as I am aware, to the possession of any legal knowledge. On the other hand, he has many excellent qualities, which, no doubt, render him eligible for positions in the service, affording more scope for advancement than that in which he is at present placed.

I should not feel justified in recommending any larger increase in Mr. Inch's salary, whilst he is in his present post, than would result from the operation of the increment regulations.

W. G. H-W., Registrar-General.

The Under Secretary of Justice, B.C., 12th October, 1899.

Forwarded for the consideration of the Public Service Board. I may mention that Mr. Noble is at present suffering from a severe illness, and I understand is not likely to be able to return to duty for some weeks.—G.M., 13/10/99. The Secretary, B.C.

No. 2.

The Deputy Registrar-General and Chief Clerk to The Registrar-General.

Sydney, 20 October, 1898.

WITH regard to question No. 7, I desire to say that Mr. Deane the Accountant, and Mr. Young, Sub-Accountant, have given excellent service in their respective positions. The Audit Inspectors have spoken in the very highest terms of the manner in which these gentlemen perform their duties.

With regard to the mistake mentioned, I knew nothing of it personally until afterwards, when the Accountant told me of it, but I could see that it was a simple error, which had been at once discovered by the Accountant's ordinary check and put right immediately, and no harm could possibly result. Mr. Long received

received cheques for signature *directly* from the Account Branch, having implicit confidence in the Accountant. As to the duplicate set of accounts, I have never heard of them; Mr. Long never once mentioned such a thing, and I am quite certain that this statement is absolutely false.

The changes in the Account Branch were made eighteen months ago. Mr. Deane was appointed a Deputy Registrar-General (having the necessary knowledge and training) to assist Mr. Deputy Keele, who was over-pressed with work, but Mr. Long decided to still retain Mr. Deane as Accountant for the present; to relieve Mr. Deane of certain details Mr. Young was appointed as Sub-Accountant, which was a new position. Mr. Inch, who was then a clerk in the Account Branch, being appointed as Corresponding Clerk, *vice* Young. Mr. Inch had applied for the position of Sub-Accountant, but Mr. Young had much greater experience, with higher qualifications, and also was Mr. Inch's senior both in position and length of service.

With regard to the other questions, the Registrar-General has not been asked to furnish a report. They reflect seriously upon my reputation, as well as that of others in the Department, but more especially upon the late Mr. Parry Long. As the particulars afforded could only have been given by an officer of the Department acquainted with its inner working, I would therefore request that you will be good enough to take the necessary steps to have strict inquiries made to ascertain who prompted these questions, and gave such information; and also to give *all concerned* an opportunity to refute the serious charges made therein.

H. J. N.,

Deputy Registrar-General and Chief Clerk.

No. 3.

M.: J. S. Inch to The Public Service Board.

Registrar-General's Department, New South Wales;

Sydney, 2 November, 1899.

Gentlemen,

I have the honor to ask that I may be exempted from the operations of the increment scheme, or, at least, from examination with officers of the £250 limit; for which purpose this might be regarded as an appeal against my grading at the time of the introduction of such regulations.

In support of this application, I would respectfully draw attention to the fact that from the 11th May, 1896, to the 15th March, 1897, I provisionally filled the position of first assistant to the accountant of the Department at a salary of £50 per annum less than the Public Service Board had—after personal inspection of the work and duties of the office—affixed to it a few days before the first-mentioned date. While acting in this capacity I had, by personal effort and suggestion (resulting from a long commercial experience), been able to effect certain reductions of work and staff of the Account Branch by the introduction of new methods, &c., and, admittedly, for this and other reasons I was placed in charge of the Correspondence Branch on the 15th March, 1897, the deposed officer taking up the duties vacated by me. I was eventually recommended for the salary of £300, per annum at which the duties of such position had been graded. That the late Registrar-General had no cause for disappointment in connection with the services rendered by me in this position (which I still occupy) was, I submit, fully demonstrated by his reports under Regulations 77 (old regulation) and 32 (new regulation), and has written recommendations (three), in 1898, that my salary be fixed at £300, £260, and £250 per annum respectively, the last-mentioned being accompanied by a special memorandum (copy attached*), which, I think, indicates how sincerely he desired to obtain recognition of my services. The memorandum addressed by me to the Registrar-General, dated 15th June, 1898, briefly sets out the nature of the services referred to.

Following such recommendations, after an interval of a few months, came the sad end to the career of the late Registrar-General.

On my way to the magisterial inquiry, in this connection, I sought advice from the Department of Justice as to my duty, and tried to obtain an assurance that a full official inquiry would take place with regard to the then existing condition of things in this Department. Evidently my representations were considered reasonable, because I was received with courtesy and thanked, in no formal manner, for the step I had taken.

Having failed to obtain the desired assurance, however, I made certain statements to the Coroner, with a view to strengthening the hands of those with whom the appointment of Mr. Long's successor would rest, and in order that the suppression of certain grave facts might not rest solely with me.

Ample confirmation of this evidence was, and is, available.

On the day of the funeral, 29th September, 1898, a paragraph appeared in the *Australian Star*, written evidently to discredit the evidence given by me at the said inquiry. Mr. Noble (then acting Registrar-General) informed me and others in the Department that he dictated this paragraph to a *Star* reporter at the direction of Mr. Earling, then Chairman of the Board.

On the following day (30th) Mr. Noble used certain intimidating language to me, and also said that Mr. Wilson (of the Public Service Board) had remarked to him at the funeral "That he was very sorry for Mr. Inch," clearly implying in this and other ways that my prospects in the service were nil.

Being advised that I had a good case against the *Star* for libel, in connection with the paragraph complained of, I contemplated taking the matter into Court. But, on further consideration, I determined to wait and approach you, when your knowledge of the facts of the case might be mature. Notwithstanding the prejudice I sustained about this time as a result of the misrepresentations of Mr. Noble, notably in his report of 20th October, 1898, I have hitherto declined to approach you otherwise than through the prescribed official channel.

While not having been called upon to substantiate the statements made by me to the Coroner, I have been afforded an opportunity to report upon relative matters. I venture to think that the subsequent administration of this Department has tended to prove the soundness of my representations, and the necessity for their expressions. As a result of all the successive recommendations of Mr. Long in my favour, previously referred to herein, I was only afforded an increase of £5 per annum under the increment scheme, 1898-9.

Against this, I respectfully submit, the officer who was so largely responsible for the maladministration which had obtained in this Department has been deprived of almost all the legitimate appurtenances

to

* Not attached.

to his position except that of full pay. So recently as the 10th July last he (Mr. Noble) assured me that for fully three months after the death of Mr. Long he had been suffering from some head trouble—a fact which no fellow-officer who had even intermittent contact with him would doubt. I make this application without desire to prejudice anybody, but in the hope that I may obtain the increase of salary which would probably have been awarded had no misrepresentations been made, asking no recompense for the expense and anxiety which I sustained thereby.

I have, &c.,

JAMES S. INCH,

Clerk in Charge of Correspondence and Records.

No. 4.

Public Service Board Interview.

On Thursday, 2nd November, 1899, Mr. J. S. Inch, Clerk, Registrar-General's Office (age, 31 ; service, 7 $\frac{3}{4}$; salary, £230), waited on the Public Service Board, in the Chairman's room, regarding his salary.

Present:—Mr. G. A. WILSON, Chairman ; Mr. J. BARLING.

Mr. Wilson : You mention here (*indicating Mr. Inch's letter, asking for an interview with the Board*) a report by Mr. Noble. We have not seen any report by Mr. Noble. It has not come under our notice. We have no report before us.

Mr. Inch : The report was made to the head of my Department.

Mr. Wilson : How can we hear you with reference to a report that we do not know of ;—that report is not obtainable ?

Mr. Inch : I understood from Mr. Williams that it would be placed before you in some form, if it had not been already. He had a copy made the other day.

Mr. Wilson : Did you see what Mr. Williams had made out ?

Mr. Inch : No, sir.

Mr. Wilson : How do you know it was that report ?

Mr. Inch : He had a copy of the original report made the other day—the report I am referring to,—a copy was made in the office the other day. He asked me where the original was, and, somehow or other, it was dealt with apart from me, being a matter concerning me, and I was unable to tell him where it was.

Mr. Barling : Do you wish us to infer that we have got the report—that it was sent on to us ?

Mr. Inch : Not at all.

Mr. Wilson : We want to find out what report it is. If it is something that we have got it is a different thing.

Mr. Inch : It was made for the Registrar-General in connection with the questions which were asked in the House ; and was a report in which it was sought to show that I was the officer responsible for divulging the information ; and, seeing that I have been in charge of the records of the Department for two and a half years, you can quite understand —

Mr. Wilson : That has never been before the Board. The Board have no knowledge of that.

Mr. Inch : If the report itself has not been before the Board, the essence of it has, I take it.

Mr. Wilson : You propose to come here, among other things, to discuss and disprove certain statements contained in a report by Mr. Noble, dated 20th October, 1898, which was made at a time when Mr. Noble was, as he admits, "suffering from some head trouble." I personally have never seen that report. I do not know that report.

Mr. Inch : For anything I know to the contrary, it was forwarded on to you. If it did not reach you, the fact that the report was written and is on record is what I want to draw attention to.

Mr. Barling : Let us try and understand whether the report really came to us, because I do not remember any report coming. I would not say it is not here ; but I do not know that the report is here. I would like to know for certain whether there is such a report.

Mr. Inch : Such a report was made. There is no question about that.

Mr. Barling : If a report were made to the head of your Department, the head of the Department could deal with it. It is no use sending it on to us, to deal with something that we know nothing about.

Mr. Inch : The unfortunate part of it is that it is the one thing in the Department which we cannot find, and it is the one thing which was taken out of my hands to deal with, I being the record clerk. He came and asked me where he was.

Mr. Wilson : You said just now that he had a copy ; but that the original was missing ?

Mr. Inch : There is a press copy in the office letter-book.

Mr. Barling : Who was it addressed to ?

Mr. Inch : It was a report addressed by Mr. Noble to the Registrar-General on the date mentioned, 20th October, I think it is.

Mr. Barling : I want to find out whether it was ever sent here ? [*Mr. J. W. Holliman, Secretary to the Board, was sent for.*]

Mr. Wilson : Mr. Holliman, was any report sent by the Registrar-General, purporting to be made by Mr. Noble, with reference to Mr. Inch within the last week or fortnight ?

Mr. Inch : The copy was prepared this week.

Mr. Wilson : Has any such copy come on from the Registrar-General this week to your knowledge ?

Mr. Holliman : With regard to Mr. Inch ? From Mr. Noble ?

Mr. Wilson : Any report regarding Mr. Inch ?

Mr. Barling : You could not answer it just from memory ?

Mr. Holliman : No.

Mr. Inch : When this report was sent in to Mr. Williams, the reports under the increment scheme were referred to him by you for report, and anything that he may have said then in connection with my case would undoubtedly be affected, I take it, by that report. Whether it reached you in itself or in effect. I am unable to say.

Mr. Wilson : It is from Mr. Williams you must get that evidence.

Mr. Inch : Mr. Williams has had this matter of mine before him, and if he has not explained these things to you of course it is a disadvantage I am placed under which I probably should not be. *Mr.*

Mr. Wilson : Why should he? It is quite true that Mr. Williams knows that you addressed the Board.

[At this stage the shorthand-writer and Mr. Inch retired from the room at the request of the Board. Mr. Holliman remained.]

On resuming, *Mr. Wilson* said : We will have inquiries made about the report which we have not seen, and if we cannot get that to-day you must come another day. You may just address us about the matter of salary to-day.

[At this stage Mr. Coghlan entered. The shorthand-writer and Mr. Inch retired.]

On again resuming, *Mr. Wilson* said : That matter can be explained now.

Mr. Coghlan : It was a question of some report of Mr. Noble's. I did not understand your letter. Your letter said something about "to disprove certain statements contained in a report by Mr. Noble, dated 20th October, 1898, which was made at a time, &c." Before I could deal with your paper, I thought it was desirable to know what this meant, and I sent for a copy of the report; but I then saw that the document was not intended for the Public Service Board, and I refrained from reading it, and sent it back again; but I understand that my colleagues think that, as it has been in the office, it ought to be read. I have not become acquainted with the contents of the report or what the particular charges were—if there were charges in it; you seem to indicate that there were charges in it.

Mr. Inch : I was representing that I had certain motives for getting information which should not have been given.

Mr. Wilson : You see, Mr. Inch, I know absolutely nothing about it.

Mr. Barling : I was absolutely in ignorance of the thing. Each member of the Board deals with matters separately on his own initiative. Mr. Coghlan, when he saw that, sent for the report. I daresay you observed Mr. Holliman whisper something to me, and that is what made me ask you to go out, and that is how we found out that Mr. Coghlan had seen the report. You must have been aware that the report had been sent to the office, and could not understand how we had not seen it. I knew nothing about it, neither did Mr. Wilson.

Mr. Inch : I should not have known anything about the report at all in the first place, only a gentleman, who is a personal friend of mine, mentioned to me that the report had been shown to him in our office, and then afterwards I saw a press copy of it in the office, but the original I have never seen.

Mr. Barling : I think the better way would be for us to see the report now, and when we have seen the report we shall be able to judge what is the best thing for us to do.

Mr. Wilson : I presume you still wish the Board to go into the matter?

Mr. Inch : I was about to say that if Mr. Coghlan will give me an assurance that it has not prejudiced me in any way I would withdraw the matter from you, and simply deal with Mr. Williams on the subject.

Mr. Coghlan : It was to avoid being at all influenced by the report that, when I saw that this was not a matter coming before the Board—if I remember rightly it was a memorandum addressed to the Registrar-General by Mr. Noble—

Mr. Inch : Yes.

Mr. Coghlan : And it seemed to me to contain a good deal of other matter; but I can assure you I have not the slightest idea what the insinuations were against you or other officers, if there were insinuations.

Mr. Inch : It was trying to show that I had a motive for divulging information which was entrusted to me in my official position. It was so absolutely, on the face of it, misleading—perhaps, not intentionally so—but I felt in duty bound to draw attention to it officially when some time had passed over; but, as I have your assurance that I have not been prejudiced in your minds by that report, I am prepared to withdraw my present application, so far as you are concerned, if that meets with your approval.

Mr. Wilson : Now, you will address yourself to the matter of salary?

Mr. Coghlan : Mr. Inch, I will leave the matter with my colleagues. [Mr. Coghlan then left the room.]

Mr. Inch : In order not to take up much of your time and to be quite definite I have put the matter in writing.

Mr. Inch then read:—

Gentlemen,

Sydney, 2 November, 1899.

I have the honor to ask that I may be exempted from the operations of the Increment Scheme, or at least from examination with officers on the £250 limit; for which purpose this might be regarded as an appeal against my grading at the time of the introduction of such regulations.

In support of this application I would respectfully draw attention to the fact that from the 11th May, 1896, to the 15th March, 1897, I provisionally filled the position of first assistant to the Accountant of this Department at a salary of £50 per annum less than the Public Service Board had, after personal inspection of the work and duties of the office, affixed to it a few days before the first-mentioned date.

Mr. Barling : Questions were asked in the House exactly on that point, I think?

Mr. Inch : I do not think so.

Mr. Barling : I think it was asked in so many words.

Mr. Inch : I do not think so. I think you are thinking of something else. I think I have a copy of the questions here, sir.

Mr. Barling : However, you go on now.

Mr. Inch continued reading:

While acting in this capacity I had by personal effort and suggestion (resulting from a long commercial experience) been able to effect certain reductions of work and staff of the Account Branch by the introduction of new methods, &c., and admittedly for this and other reasons, I was placed in charge of the Correspondence Branch on the 15th March, 1897, the deposed officer taking up the duties vacated by me.

Mr. Inch : That was one of the points mentioned in this report. It was mentioned that I applied for the position of first assistant in the Accounts Branch and did not get it, and that is why I was dissatisfied. As a matter of fact I was taken from that position and placed in a higher position in another branch.

Mr. Wilson : Who made that statement?

Mr. Inch : That was contained in Mr. Noble's report. It was evidently made under a misunderstanding, I think.

Mr.

Mr. Inch continued reading :

I was eventually recommended for the salary of £300 per annum at which the duties of such position had been graded. That the late Registrar-General had no cause for disappointment in connection with the services rendered by me in this position (which I still occupy) was, I submit, fully demonstrated by his reports under Regulations 77 (old regulation) and 32 (new regulation) and his written recommendations (3) in 1898 that my salary be fixed at £300, £260, and £250 per annum respectively, the last mentioned being accompanied by a special memorandum (copy attached) which, I think, indicates how sincerely he desired to obtain recognition for my services. The memorandum addressed by me to the Registrar-General, dated 15th June, 1898, briefly sets out the nature of the services referred to.

Following such recommendations, after an interval of a few months, came the sad end to the career of the late Registrar-General.

On my way to the magisterial inquiry, in this connection, I sought advice from the Department of Justice as to my duty, and tried to obtain an assurance that a full official inquiry would take place with regard to the then existing condition of things in this Department; evidently my representations were considered reasonable because I was received with courtesy and thanked in no formal manner, for the step I had taken.

Having failed to obtain the desired assurance, however, I made certain statements to the Coroner with a view to strengthening the hands of those with whom the appointment of Mr. Long's successor would rest, and in order that the suppression of certain grave facts might not rest solely with me.

Ample confirmation of this evidence was and is available.

Mr. Barling : What were the grave facts? I noticed that in your evidence. What were the grave facts referred to?

Mr. Inch : There were a number of things, sir. Would you like me to deal with them now?

Mr. Barling : I would just like to know what they were. To me the whole thing was an enigma.

Mr. Inch : I can understand that, and of course it was a matter of surprise to me that I was not sent for and asked for an explanation. There were a number of things.

Mr. Barling : Of course it was not our duty to query anybody about statements they had made.

Mr. Wilson : It was on oath.

Mr. Inch : In the main, for a fortnight before the calamity, the condition of mind of both Mr. Long and Mr. Noble was so patent to the officers and the public that it was continually remarked upon. During the whole week before Mr. Long's death, Mr. Noble was in such an extraordinary state of mind himself that he was wholly taken up with that case of Mr. Wright.

Mr. Wilson : That is the George-street property case?

Mr. Inch : Yes.

Mr. Barling : Is it that case of a mistake in the property?

Mr. Inch : No, that case of Wright, the shorthand-writer. Mr. Wright had made some sort of report complaining about Mr. Noble's treatment of him. The whole of that week before Mr. Long's death, with writing and rewriting reports on that Wright case we turned out more than fifty sheets of foolscap of typewritten matter in connection with that case alone for Mr. Noble. He used to have the case written out—his own report and a report for Mr. Long to sign on top—there were two distinct things. Each time they extended over about six pages, and they were done in the day and taken away at night, and I was consulted, and a number of other officers consulted, as to how this thing could be amended and made stronger and more effective, and every day alike this case was the whole object of Mr. Noble's life in the office. I may say that at the same time Mr. Long had that Macdonald case on—that is the title case; and Miss Thompson, our typist, was away ill. There was such an extraordinary rush of work then that I got approval to get a typist for the time-being, and I had a Mrs. Fischer over, and she was in my room—being a stranger I had to dictate everything to her—and those two gentlemen, Mr. Long and Mr. Noble, sent for me incessantly. Mrs. Fischer can tell you so; she complained time after time. Every five minutes they used to send for me—each one had this big case in hand—and the work of the office was, practically, all in my own hands at that time. I was the confidential officer as between those two men. Individually, and together, I had to attend to them, and I had to attend to the office business as well. Not one of the heads of branches was consulted, or knew what was going on. The whole of the responsibility of the situation was upon me. I will just show you one or two things.

Mr. Barling : Mr. Inch—to what will this tend? Do you want to show that the minds of both those gentlemen were unhinged?

Mr. Inch : I want to prove that to you.

Mr. Barling : Is that what you mean?

Mr. Inch : Yes. Some months before you came into existence as a Board, Mr. Noble had been away from the office for three months from mental collapse. I have letters in his own handwriting here indicating that, and, of course, the medical certificates on his application are procurable.

Mr. Barling : Your idea in bringing these facts forward is to show that any adverse statement that Mr. Noble may have made about you in this report that we have not seen was due to aberration of intellect or unsound mind?

Mr. Inch : To a large extent.

Mr. Barling : You wish to disprove statements that have been made, on the plea that Mr. Noble is not in his right mind?

Mr. Inch : Yes.

Mr. Wilson : Is not this going away from the question of salary?

Mr. Inch : This is to show that the responsibility was on me at the time.

Mr. Barling : We have asked Mr. Inch to read that letter, and in that letter he has referred to these "grave matters," and we want to know what they are?

Mr. Inch : On the morning of Mr. Long's death I was with him almost all the time, and Mr. Noble was engaged finally revising this case of Mr. Wright's. Just before 1 o'clock I took—I went into my room—I had been over to the Justice Department with all the papers in connection with the Macdonald case, after the final schedule had been made, the certified copies had been prepared, and everything was done; I had taken the papers over myself with my own hand at Mr. Long's request, and then he came in to see me, and somebody pushed the door at the time and interrupted him, and he just stroked his beard in this way, and went out and went into his room. I followed him in, thinking he had something to say. He walked to his washstand and got his hat, and walked along the passage to Mr. Noble's room, and Mr. Noble was engaged with somebody, and he went out and went home, and that was the last we saw of him. Now it was early in the afternoon, probably about half-past 3—Mr. Noble has a little opening

opening in the wall from my room to his room, and he opened this about some business, and I said to him, "Mr. Long is not in; I have tried his door several times," and he said, "No, I will ring up Mrs. Long about it and see if he has left home," and he shut the door—shut the little window—and I heard the telephone go, and he opened the window again and he said, "Mr. Long has left home and Mrs. Long is coming down," and he was rather excited about it, and within three or four minutes afterwards I heard the door open and I went out and into Mr. Long's room and I saw what I saw. Well now I know Mr. Noble's state of mind, and I did not send for him first—that might have struck you—I did not go for Mr. Noble first, but I sent for a doctor.

Mr. Barling: You were the first one who saw poor Mr. Long?

Mr. Inch: The boy just opened the door, and I just stepped along, and I was supposed to have been the first one to see him. I sent down for the doctor and the police, and then I walked into Mr. Noble's room, and he was engaged with Mr. McDermott at the time, and all I said to him was, "Come quickly." Just those two words. And he apparently received a very great shock—it was so marked that Mr. McDermott mentioned the matter to me afterwards. He said, "Didn't it strike you as being very extraordinary that Mr. Noble should have sustained such a shock from your two simple words?" I said, "Of course it did." So Mr. Noble and Mr. McDermott came up behind me in the passage, and I held the door open, and it seemed singular to me that Mr. Noble looked into the room just to the very spot where Mr. Long was lying, and at once became most hysterical, and he put his two hands up to his head and tore his hair, and rushed away to the table at the other end of the room, and threw himself on the board table there, and rolled round and round and across and up against the mantel-piece and careered round in a most remarkable way, and I at once sent for Mr. Packham—he is a strong and cool-headed man—and at the moment when Mr. Noble saw Mr. Packham, he rushed at him and fell on his neck and began to rave and roar and cry most hysterically. Mr. Packham put him up against the mantel-piece and said "Oh, be a man Mr. Noble" or something of that sort, and then we had a look round. Of course I was watching these things very closely, and after a time Mr. Noble became perfectly calm, and went over to Mr. Long's drawers and searched them, and then he went out of the room and rang up Mr. Miller, and he rang up you.

Mr. Barling: And I immediately told him to report it to Mr. Miller.

Mr. Inch: Of course he was most excited.

Mr. Barling: He telephoned to me in a most excited way, but still I did not wonder at that.

Mr. Inch: No, not under the circumstances. Then Mr. Miller came over. He (Mr. Noble) had been perfectly calm until he (Mr. Miller) came. He at once became hysterical again in the same way and rushed at Mr. Miller and Mr. Gould and other people as they came in. I was there the whole time and arranged everything that was arranged about the coffin and about getting Mr. Long undressed, washed, and sent home decently. The whole thing took something like two hours, and then I went out to tea. I came back and there were two fellows in my room—one was an officer of our Department, and another was a lawyer's clerk, and Mr. Noble came bursting in in rather a merry sort of mood and he said "Isn't it a good job I didn't discover him?" I said "Why, Mr. Noble?" He said "Oh, they might have said it was me." Well, it struck me and the others as being a rather extraordinary remark to make. And then we found that somebody had given a report to the *Evening News*, that the revolver in Mr. Long's hand was so tightly gripped that it could not be taken away from him. As a matter of fact the revolver was lying across his open fingers like that. (*Indicating.*) The next thing was after I had given my evidence some representations were made to you as I understand, and this report was put in to nullify all the evidence which I had given.

Mr. Wilson: What report was that? The report you are referring to.

Mr. Inch: After the report of my evidence was published, then Mr. Noble said he came and saw Mr. Barling about it, and he directed him to put a paragraph in the *Star*, to counteract my evidence.

Mr. Barling: It was simply untrue.

Mr. Inch: That is what I have held all along. That is why I am here to-day. Your name has been most freely used in matters of this kind, and I am certain unfairly, and it is just as much in justice to you as to myself that I want this thing cleared up. Then the next thing was that Mr. Noble called a meeting of the heads of branches to ask them to show in some way their respect for Mr. Long unitedly. It was most apparent to me and the others to have something put in the papers to show that we were all unanimous in respect to Mr. Long, and that we were a united department, and although every officer attended not a single officer would consent to such a proceeding, because it was felt that it was sought to use them for some object which was not disclosed. All these things tended to misrepresent the state of affairs as they existed to you, and to hush up inquiry.

Mr. Barling: As far as I remember what took place was this: Mr. Noble came into my room. I read this evidence of yours, and I was very much surprised at it. I could not imagine what was the meaning of it. I was extremely surprised to read the evidence, and I said to Mr. Noble—I asked him what was the meaning of it. Do you remember what your evidence was?

Mr. Inch: That is a copy of the evidence I gave. [*Handing newspaper extract to Mr. Barling.*]

Mr. Barling: I do not think this is what I saw. I was very much surprised at what I saw, because it disclosed a state which I was not aware of in the office, and I asked him what was the meaning of it. Apparently he had not seen the evidence, and I read it to him or showed it to him, and he immediately said, "Oh, that's utterly wrong; I will send some statement to the paper about it."

Mr. Wilson: Didn't you make the correction yourself the next day, Mr. Inch?

Mr. Inch: No, sir; I did not.

Mr. Barling: No, there was something put in the paper when I asked Mr. Noble what it was.

Mr. Inch: Here is the correction. [*Producing it.*]

Mr. Barling: I think I sent a statement to Mr. Gould about it in reply to the questions in the House, and I do not think the whole statement was given.

Mr. Wilson: We are very doubtful what all this is tending to, and we are doubtful whether we should go into all these matters. What are you leading up to?

Mr. Inch: To show the responsibility that has been upon me for a long period.

Mr. Wilson: But is it necessary, in order to show the responsibility, to go into all the detail that you do?

Mr.

Mr. Inch : I want to put it before you, and if you reject it, of course I cannot help it. It seems to me to have a very great bearing upon the case. I want to show here, as I can from these minutes from time to time, that whereas Mr. Noble was apparently in charge, I was really the responsible officer.

Mr. Barling : The tendency of the evidence you have given now is to very seriously impugn Mr. Noble, and he is not here to hear it and answer it.

Mr. Inch : I want to draw your attention to the fact that Mr. Noble was well and at the office when I wrote my letter.

Mr. Wilson : You have made certain charges now—in fact, for want of a better word, insinuations—you insinuate that you were not the first man to see Mr. Long, and I gather from that that Mr. Noble was the first one to see Mr. Long.

Mr. Inch : That is presumed.

Mr. Wilson : It is a very serious thing to say about a man that is absent.

Mr. Inch : He is not a dead man.

Mr. Wilson : He is a living man, and, therefore, has a character.

Mr. Inch : I am not saying something that he won't have an opportunity of replying to.

Mr. Barling : Is it your idea to open up the whole case again in its very serious aspect? Is that your idea?

Mr. Inch : I have no desire to do anything at all to cast a reflection upon anybody.

Mr. Barling : Don't you see how serious it is?

Mr. Inch : I do.

Mr. Barling : It is a thing that if there is any value in it at all should have come out at the inquest.

Mr. Wilson : It appears to me that some of the statements which you have made to-day are statements which you ought to have made in a court of justice.

Mr. Inch : I asked for advice on the subject, and I was unable to obtain it.

Mr. Wilson : What advice do you want about telling the truth?

Mr. Barling : You were sworn to tell the truth, the whole truth, and nothing but the truth. You would not be justified in keeping a single fragment back that you are telling us.

Mr. Inch : I did not quite take that view. These were official matters. These would not affect the verdict of the Coroner in any way.

Mr. Wilson : That insinuation that Mr. Noble saw Mr. Long before you was not an official matter. It was a matter that might have a most important bearing. It was a most serious matter.

Mr. Barling : I find that I have got that statement that I mentioned to you. I said :

With regard to question No. 2, the Chairman of the Public Service Board desires to state for the information of the Minister that the insinuation contained therein, so far as he is concerned, is absolutely untrue. The circumstances referred to, as far as his recollection serves, are as follow :—"After the inquest in connection with Mr. Long's death had taken place, Mr. Noble happened to be in the Board's office, and Mr. Barling asked him the meaning of the evidence which had been given by Mr. Inch as to the strained relations existing in the Registrar-General's Office. Mr. Noble apparently at that time had not seen the evidence of Mr. Inch. The next day Mr. Noble was in the office again. He had then evidently read the evidence, and seemed very much disturbed. He said either that he had corrected the statement, or had given the correct facts to the papers—Mr. Barling forgets exactly which. In speaking to Mr. Noble about the matter, Mr. Barling was not only within his rights in doing so, but it was his duty to ask for any information regarding any matter which might affect the efficiency or proper working of any public office when it came under his notice."

Mr. Inch : Well, you see the tendency of my evidence is to rebut anything that was then said as reflecting upon me to you which provoked those remarks from you.

Mr. Wilson : You told us just now the tendency of your evidence was to show the responsibility you had. That may be quite right.

Mr. Inch : At the same time, it is a dual object. I am addressing you upon my case—upon the question of my salary.

Mr. Wilson : I have the very gravest doubts whether we ought to hear this.

Mr. Barling : The insinuations are most serious against Mr. Noble.

Mr. Wilson : You are making the very gravest insinuations against an absent officer.

Mr. Barling : I should like to know what is the object of that. What is your idea with regard to the thing? Why are you bringing this up against Mr. Noble?

Mr. Inch : If you will allow me to read this right through first I think it will be quite clear. Do you mind my finishing it?

Mr. Inch continued reading :

On the day of the funeral (29th September, 1898), a paragraph appeared in the *Australian Star*, written evidently, to discredit the evidence given by me at the said inquiry. Mr. Noble (then Acting Registrar-General) informed me and others in the Department that he dictated this paragraph to a *Star* reporter at the direction of Mr. Barling, then Chairman of the Board.

Mr. Inch : I should not have known the history of the thing if Mr. Noble had not told me. I want to show that Mr. Noble is the man who is giving information throughout.

Mr. Barling : That is absolutely untrue. [*Referring to the last few words read by Mr. Inch.*]

Mr. Wilson : There is no objection to that statement; but it is the other statements which wander away from the point.

Mr. Barling : These questions were asked in the House about this.

Mr. Inch : Of course, I am practically answering those questions *seriatim*.

Mr. Inch continued reading :

Being advised that I had a good case against the *Star* for libel, in connection with the paragraph complained of, I contemplated taking the matter into Court. But on further consideration I determined to wait and approach you when your knowledge of the facts of the case might be mature. Notwithstanding the prejudice I sustained about this time as a result of the misrepresentations of Mr. Noble, notably in his report of 29th October, 1898, I have hitherto declined to approach you otherwise than through the prescribed official channel.

And in that way I have never been able to reach you.

While not having been called upon to substantiate the statements made by me to the Coroner, I have been afforded an opportunity to report upon relative matters. I venture to think that the subsequent administration of this department has

has tended to prove the soundness of my representations and the necessity for their expression. As a result of all the successive recommendations of Mr. Long in my favour previously referred to herein, I was only afforded an increase of £5 per annum under the increment scheme 1898-9.

Mr. Wilson : What was your salary in 1896?

Mr. Inch : £150 a year.

Mr. Wilson : What is your salary now?

Mr. Inch : £230.

Mr. Inch continued reading :

Against this, I respectfully submit, the officer who was so largely responsible for the maladministration which had obtained in this Department has been deprived of almost all the legitimate appurtenances to his position except that of full pay. So recently as the 10th July last he (Mr. Noble) assured me that for fully three months after the death of Mr. Long he had been suffering from some head trouble—a fact which no fellow-officer who had even intermittent contact with him would doubt. I make this application without desire to prejudice anybody, but in the hope that I may obtain the increase of salary which would probably have been awarded had no misrepresentations been made, asking no recompense for the expense and anxiety which I sustained thereby.

Mr. Inch : Now that is practically what I have to say.

Mr. Wilson : As regards the salary, the Board in January next would have been in office four years. You have already in that time had an increase of £80. Assuming the increment system were in force, there would be an increase of £90 in four years. Is not that proper treatment?

Mr. Inch : I consider I am very much indebted to the Board for the way in which I have been dealt with; but when I have been called upon throughout for special service, and recommended under the regulations referring to distinctive service so regularly, it does seem to me that I might have recently been afforded a further increase.

Mr. Wilson : Do you consider, then, that the Board are simply to register the recommendations of the Department for increases of salary?

Mr. Inch : No, sir; but when Mr. Long, as Registrar-General, called upon me to fill a certain position, which was a very difficult one at the time, and promised me that if I was successful in it I should get the salary, I naturally looked forward to obtaining something like recompense as he indicated. I do not ask for everything that was promised.

Mr. Wilson : Of course, you know that Mr. Long had no right to pledge the Board?

Mr. Inch : The position we had to take up is this: that he being your representative, is in touch with you and at one with you.

Mr. Wilson : But he is not our representative. He is not the representative of the Board. He may be the medium through which the Board communicates its decisions.

Mr. Inch : We have to regard him as such. It was the year when my service was most distinguished and most valuable—when I was recommended for most—that I got least.

Mr. Wilson : The reason of that was this: that you had already got three or four increases of salary. You had an increase from £150 to £175, then from £175 to £225.

Mr. Inch : And then you gave me £5 last year.

Mr. Wilson : Then you had two substantial increases of salary.

Mr. Inch : One you gave me when you had inspected my work, and the moment that was fixed I was promoted to a higher position, and a clerk was saved in the Account Branch. By giving me the charge of things and permitting me to alter the system as I did we were able to do with a clerk less, and the position that you had fixed the higher salary to I filled with additional responsibility and got nothing more than the salary you had given me for the work I was previously doing. Having given every satisfaction there as I can show by the records, I was called upon to take this higher position as clerk in charge of correspondence and records, and things were in a very backward state. Every night of their lives they were late. I can show you by our monthly returns here that all this has been altered and that everything is done systematically at the present time, that records are obtainable in proper form at a moment's notice—in fact, efficiency prevails throughout the branch.

Mr. Barling : I was completely surprised that whatever you had to give was not given at the Court, and I am still more surprised now that I hear what it is. I think everything you have told us ought to have come out in Court.

Mr. Inch : If I had said publicly in the inquest what I have told you to-day, it would not only have ruined Mr. Noble, but it would probably have put you in a very awkward position.

Mr. Barling : It would not have put me in the slightest in an awkward position.

Mr. Inch : I mean as a Board.

Mr. Barling : It would not have put the Board in any degree in an awkward position. In fact, it would have been better, because now the details are to a large extent faded from our minds.

Mr. Wilson : I think we had better see Mr. Hayes-Williams about it.

Mr. Inch : I asked Mr. Williams to go through the whole case with me, and he would not do it.

Mr. Barling : Naturally, I should say, when he hears things like this.

Mr. Inch : Of course, he heard a year ago what you are hearing to-day. I did not lose any time; in fact, Mr. Williams called upon me.

Mr. Wilson : When he took office he sent for you?

Mr. Inch : Yes, immediately.

Mr. Barling : It seems to me, the more I think of it, I think it was your bounden duty to give information to the Coroner at the time. It is all over, and it cannot be tried again.

Mr. Wilson : With regard to your insinuation that Mr. Noble saw Mr. Long and did not admit it, and, secondly, that Mrs. Long twitted him with wishing to wear the crown, don't you see how the two things could be connected?

Mr. Inch : Exactly.

Mr. Barling : And another thing, that he was seeking the position of Registrar-General. Put all these things together—the inference is as sinister as it can be.

Mr. Inch : I was not in possession of the whole of the facts on the day of the inquest.

Mr. Barling : You were in possession of the main facts, and it should have gone to the Coroner.

Mr. Inch : But I had no idea at the time I went to the inquest that fellow officers of the Department could have confirmed the evidence.

Mr. Barling : You have to think only of what is the truth, not to think whether others would confirm it.

Mr. Wilson : You said the Coroner rushed the thing ; but suppose he had rushed the thing and actually closed your mouth, you could have made yourself right by reporting this to the head of the Department or you could have consulted your solicitor. " I had evidence to give and the Coroner shut me up. What can I do ?"

Mr. Inch : I took that very course of action. I went to a solicitor, and he said, " Your duty is very clear. You must either report this matter to the police, to the Under Secretary of Justice, or to the Board " ; so I went at once to the Justice Department the following day and asked them if an inquiry was going to take place, and they said, " Yes, they thought it was," and then we had—I think—Mr. Williams appointed, and he made an inquiry from me. I gave him the evidence, and if he did not take any action, of course, I am not answerable for that.

Mr. Wilson : Is this—what you have told us—in evidence in the Justice Department ?

Mr. Inch : It is in evidence with Mr. Williams at any rate.

Mr. Wilson : There was an official inquiry.

Mr. Inch : I take it that Mr. Williams' inquiry was a Departmental one.

Mr. Wilson : And you gave Mr. Williams the evidence that you are giving us to-day ?

Mr. Inch : Yes, in effect.

Mr. Wilson : That, of course, puts you all right so far as that goes ; that is to say, that you have not kept it back.

Mr. Inch : And then, again, after consulting a solicitor I consulted a barrister also on the subject, and he was very much startled with those matters before him—that Mr. Noble was Acting Registrar-General, and passing titles which might bring the office into unlimited expense.

Mr. Wilson : We must consult with Mr. Hayes-Williams about this.

Mr. Barling : I think so. I think we must see what is the right thing to do with this. But I think, Mr. Inch, you are very much to blame.

Mr. Wilson : Mr. Inch has to some extent put himself right in this way : that shortly after the Coroner's inquiry the Department had an inquiry conducted by Mr. Williams.

Mr. Inch : He was not appointed then. The day after the inquest, where I had given an index to the situation so far as it seemed to me, I consulted a solicitor, and he gave me three courses, either to go to the Justice Department, the Inspector-General of Police, or to you. I went to the Justice Department, and I asked them if an inquiry would take place, and they said in all probability it would. Since Mr. Williams was appointed he held what he considered to be an inquiry, and I gave him the fullest information.

Mr. Wilson : You gave him the evidence that you attempted to give us to-day ?

Mr. Inch : Yes. I had a report also put in, a confidential report to him (of course, I would not disclose it to you because I do not know whether it would be his wish that I should), but the whole matter, so far as I was concerned, was properly recorded and attended to.

Mr. Wilson : In fact, you unburdened yourself to the Department as soon as you could ?

Mr. Inch : Yes.

Mr. Wilson : We shall see Mr. Hayes-Williams about it. [*Mr. Inch then left.*]

No. 5.

Public Service Board Interview.

On Wednesday, 8th November, 1899, Mr. J. S. Inch waited upon the Public Service Board again in regard to his application for an increase of salary.

Present :—Mr. G. A. WILSON, Chairman ; Mr. J. BARLING.

Mr. Wilson : We are not quite sure whether you finished your statement the other day ?

Mr. Barling : I am sorry I had an appointment to meet someone at the ten to 5 tram, and I could not put the appointment off. I felt that I had hurried you, and, therefore, I suggested to Mr. Wilson that we should see you again so as to give you the fullest opportunity to say what you wish.

Mr. Inch : That is very kind of you, sir. There is a report I made to Mr. Williams.

Mr. Wilson : There is a good deal of matter mentioned the other day that we think is not matter for the Board, but we have decided that you may make your statement to-day if you have any more to say, and of course we shall only deal with the —

Mr. Inch : Relative matter.

Mr. Barling : In the statement we have got here there are certain things left out that took place in our interview, and it arose in this way : We had a conversation, if you remember, and I said to Mr. Garlick (shorthand-writer) " You need not take this down," and I forgot to tell Mr. Garlick when to recommence, and a whole lot has been left out that I was not aware of. It was not Mr. Garlick's fault. In the first place, I remember you were speaking about Mr. Noble trying for the position of Registrar-General.

Mr. Inch : Yes.

Mr. Barling : And I explained to you that the Board never had the slightest thought of putting Mr. Noble in the position of Registrar-General. It did not enter their minds.

Mr. Inch : But all that was really outside the scope of my—it was part of my cross-examination by you.

Mr. Barling : It seemed to give additional force to what you said, as if there had been some chance of Mr. Noble getting that position. There was none whatever. It was never thought of. It was necessary to fill up the place for the fortnight. Somebody must be there, and in recommending Mr. Noble for that place it was stated in our minute specially that it did not indicate the intention of the Board in their final recommendation. Mr. Noble was not thought of for the place for one moment.

Mr. Inch : I did not say that you did.

Mr. Wilson : In this statement that you read the other day you omitted to read a paragraph to the following effect :—" On the following day, the 30th," that is the day following the funeral, I suppose ?

Mr. Inch : Yes.

Mr.

Mr. Wilson : " Mr. Noble used certain intimidating language to me, and also said that Mr. Wilson, of the Public Service Board, had remarked to him at the funeral ——"

Mr. Inch : Yes ; do I understand that I did not read that ?

Mr. Wilson : Yes.

Mr. Inch : It was purely by accident.

Mr. Wilson : " That Mr. Wilson, of the Public Service Board, had remarked to him at the funeral that he was very sorry for Mr. Inch, clearly implying in this and other ways that my prospects in the service were nil." Do you still say that Mr. Noble said that ?

Mr. Inch : Yes.

Mr. Wilson : Would you be surprised to hear, Mr. Inch, that I was not near the funeral ?

Mr. Inch : I was at Mr. Long's house myself.

Mr. Wilson : You say that " Mr. Wilson remarked to him at the funeral ?"

Mr. Inch : I said that Mr. Noble said so.

Mr. Wilson : Would you be surprised to hear now that I was not at the funeral ?

Mr. Inch : I should not be surprised, because I was at Mr. Long's house, and I did not see you ; but I put that in to show you what has been said from time to time about other people—things which are not true, and I do not believe to be true.

Mr. Wilson : And you say Mr. Noble said this to you ?

Mr. Inch : Yes ; you have my signature there ?

Mr. Wilson : I assure you I was not at the funeral.

Mr. Inch : I never thought it was true. If I thought it was true I should not have approached you, gentlemen, with any hopes of receiving promotion. If you had feelings to me, as has been represented, how could I possibly have a hope of promotion ?

Mr. Wilson : You introduced matters the other day that we think—we do not exactly see the bearing of them,—and it is difficult to know what has a bearing until we hear what you have to say, and it is taken down, and, therefore, as far as possible, we will not interrupt you. You can make your statement.

Mr. Inch : If you will allow me to make a reference to the case of Messrs. Bucknell and Butler, as just having some reference to my business. You remember these gentlemen were removed by Mr. Long from the Births, Deaths, and Marriages Office to the Head Office. You gave those gentlemen a hearing in their protest matter, and you gave Mr. Long and Mr. Noble a hearing on the same question. Mr. Bucknell himself openly stated in the office, and stated to my very face, that you had allowed him to say a lot of disparaging things about me ; that you had allowed him to make disparaging representations about me. He said you allowed them to make disparaging remarks, and I did feel hurt at the time that I was not in any way called upon then to make an explanation.

Mr. Wilson : I think the disparaging remarks were in this way : that the whole difficulty arose out of a minute that you wrote in Mr. Bucknell's work. Mr. Bucknell naturally was irritated, and he may have said something that was not complimentary.

Mr. Inch : I want to show you that, notwithstanding all these things, and the fact that the representations of the officer have been made so widely known, and that you have accepted these statements about me ——

Mr. Wilson : How do you know I have accepted them ?

Mr. Inch : You have received them without giving me an opportunity of replying.

Mr. Wilson : I listened to Mr. Bucknell. There is no end to these matters. If I hear these statements, and you make statements about Jones, and Jones makes statements about Smith, where will it end ?

Mr. Inch : I understand that. I would like to show you one thing, as showing the nature of the work by Mr. Bucknell. That was the sort of thing that led Mr. Long to make the move (*showing paper to the Board*).

Mr. Wilson : Mr. Long commissioned you to make a report ?

Mr. Inch : Yes ; I was directed to go and report.

Mr. Wilson : And Mr. Bucknell had some natural irritation at a junior officer reporting on his work ?

Mr. Inch : You notice the spelling of the word " dealer " down below : that was the sort of work. That is the spelling of an officer who comes here and makes statements of that kind. I merely wish to show you that if there was fault found with that man's work, there was some justification for it.

Mr. Wilson : That was not the question I inquired into at all. It was a question as regards Mr. Bucknell's fitness for the new position. The question was as to giving him a new position.

Mr. Inch : But he was appealing against his having been removed.

Mr. Wilson : Yes ; because Mr. Long had no right to move him.

Mr. Inch : I know that. There was some reason for Mr. Bucknell being moved, and there was some reason for the report which I made.

Mr. Wilson : The Board never questioned that. They never went into that matter. The question was as regards Mr. Bucknell's present position in the office : had he suffered, as he considered, degradation ?

Mr. Inch : You see the position I am in. He is the second head of the branch downstairs, and he tells all these fellows that he has been down and blocked my promotion.

Mr. Wilson : I don't care what he tells them ; what have we to do with what he tells them ?

Mr. Inch : It places me in this position : here am I doing work for the Board ——

Mr. Wilson : What do you mean by working for the Board ?

Mr. Inch : Of course we are all under you, and indirectly we are your immediate servants, I take it. However, we will pass from that. I would like to show you some of my monthly reports.

Mr. Barling : You are the servants of the Government, not the servants of the Board.

Mr. Inch : There is a feeling in the Service ——

Mr. Barling : Of course, we are the ones entrusted by Parliament with certain very important duties in connection with the Service ; but still you are really employed by the Government—you are appointed by the Government, not by the Board.

Mr. Inch : I will show you that, as an appendix to a report by my predecessor in office in the Correspondence Branch. All those additional dates represent the dates from which the branch worked back.

Mr. Wilson : What does this prove ?

Mr.

Mr. Inch : I want to show you that before I took charge of the branch there was a large staff, and they were working overtime, and their work was not even up to date ; and I want to show you by my reports that a state of efficiency was brought about, and that the staff is less than it was in those days.

Mr. Wilson : Has there been any re-arrangement made in the work ?

Mr. Inch : Any re-arrangement that has been made has been made at my own suggestion.

Mr. Wilson : I mean are you comparing the same thing ? Is there the same work now that there was then ?

Mr. Barling : Do you mean that these gentlemen on these dates left after time ? They were kept in, but it does not show how long they were kept in ?

Mr. Inch : No ; but they did not get away to time. Now, this is the first report I put in after taking charge of the branch.

Mr. Wilson : This is a very small matter, Mr. Inch—"Departures after 4'45," that is fifteen minutes after the office-hours.

Mr. Barling : Before he took charge these men had to be kept back after that time, and, when he took charge, very few had to be kept back.

Mr. Inch : These are the reports immediately after I took charge.

Mr. Wilson : Are you comparing exactly the same things ? Is there the same work in the branch as there was then ?

Mr. Inch : There was exactly the same in these reports that I am going to show you. There was no difference at that time. I am showing you reports now immediately after I took charge. The Registrar-General said he would put no restriction upon me ; so I suppose I can hand these in. The report was really no report, you see, before I took charge.

Mr. Wilson : Who instituted this form of report ?

Mr. Inch : That was instituted by Mr. Pinhey. I was just saying that whereas the reports by my predecessor were only bare answers to the questions stated, when I took charge, I gave something more, and gave some idea of the business that was being done—in other words, I made it more secretarial.

Mr. Barling : This was during Mr. Long's time ?

Mr. Inch : Yes.

Mr. Wilson : Those are reports made by you since you took charge ?

Mr. Inch : Yes, and they show the reform I brought about.

Mr. Barling : I may tell you that Mr. Long, and especially Mr. Noble, used to speak in the very highest terms about you.

Mr. Inch : That is one of the things that is so difficult to understand.

Mr. Barling : And that is what made me so astonished when I found, according to Mr. Noble, that you had taken up an antagonistic position in regard to him, because until that time Mr. Noble was always speaking in your favour.

Mr. Inch : And rightly too. I can prove it by reference to all the heads of branches in the Department. Those reports will show how I took over the stores from eight branches in the office and consolidated the stocks, and I found in some branches there was over £10 worth of stock of green silk, and yet other branches were re-ordering ; and the whole of these stores have been under my care since. There was no Ministers' register when I went to the Department, and under the Act it is necessary to record the name of the Ministers in a register kept in the Department, and shortly after I got into the Department a solicitor came in and said, "I want to see the Ministers' register," and there was not one in the Department. They simply took the previous year's *Gazettes*, and stuck them in a book and made additions line by line.

Mr. Barling : I can quite see why you are showing this, because it tends to show your value to the Department ; and now, is my assumption corrected, that what you said about Mr. Noble was to show that if he has made any statements which are inimical to you they are not to be believed ?

Mr. Inch : Exactly.

Mr. Barling : Is that your idea ? Because you can quite understand that it is no business of ours to inquire into anything that should have come before the Coroner's Court. I understand you are showing these things in order to show that if Mr. Noble has said anything prejudicial to yourself he is not one whose word should be taken.

Mr. Inch : Yes ; but I emphasise the fact that I do not attribute it to wilful misrepresentation on Mr. Noble's part, but rather to some defect which I allege he from time to time suffers from mentally.

Mr. Barling : That might be true ; but, do you not see, you go far beyond that ? The inferences from what you say about Mr. Noble are something terrible, quite apart from anything you say about yourself. I am not quite certain whether you fully realise the importance of your remarks with regard to Mr. Noble.

Mr. Inch : I do, sir. Did you purpose letting me peruse the report ?

Mr. Barling : I do not mention this to suggest that you should make any alteration ; but I do not think you quite see the purport of your remarks about Mr. Noble. You say now that what you say shows aberration of intellect ; but what you say here (*indicating the notes taken at the previous interview*) means more than that.

Mr. Inch : That may be so. You know the human mind is a remarkable thing.

Mr. Wilson : But common-sense people must draw common-sense conclusions.

Mr. Inch : If Mr. Barling will be specific I will say what I mean.

Mr. Barling : Here I pointed out to you that it seemed to me that it was your bounden duty to give information at the Coroner's Court at the time of what you told us ; and the more I think of it the more I am impressed with that view of the case.

Mr. Inch : But I think I remarked afterwards that the whole of those facts were not before me until after I had been to the court.

Mr. Barling : But, of course, the more important ones were before you. Then it goes on here : "With regard to your insinuation that Mr. Noble saw Mr. Long, and did not admit it ; and secondly, that Mrs. Long twitted him with wishing to wear the crown, do you not see how the two things could be connected ?" You said, "Exactly." And then I said : "And another thing, that he was seeking the position of Registrar-General. Put all these things together, the inference is as sinister as it can be."

Mr. Inch : I might have added that ———

Mr.

Mr. Barling : Do you not see that is no business of ours, and we are only just trying to find what the bearing of that has on your appeal now. And now I understand you mean that you are showing these things to indicate that in your opinion Mr. Noble, to put it plainly, was off his head ; but this (*indicating the notes of the previous interview*) would mean a good deal more than that.

Mr. Wilson : You say you were not in possession of all the facts ? You were in possession of one of the most material facts, and that is that Mr. Noble had seen Mr. Long before you had.

Mr. Inch : I do not say that, but that would seem to be so.

Mr. Barling : How would that bear on your plight if Mr. Noble had seen Mr. Long before he admitted it ?

Mr. Inch : You remember at the time—I say if he really saw the body, then the evidence he gave to the Coroner was not true. I have to establish this : you, gentlemen, by indication (implication ?) accuse me of having divulged the information upon which those questions of Mr. Griffith were asked.

Mr. Barling : How did we do that ?

Mr. Inch : You were trying to prove the other day by suggestion that the wording of my letter to you was, as it were, on similar lines to the wording of the questions.

Mr. Barling : I think what you said was this : you here yourself stated there was something in my handwriting on the papers, such as, "He was doing the work that Mr. So-and-so was doing." The curious thing is that exactly that question was asked, and what was on it was on a confidential paper which should not have been with the papers, and which you, as the confidential clerk there, saw.

Mr. Inch : It was not in my capacity of confidential man that I saw that, because somebody else saw that.

Mr. Barling : But you answered that Mr. Noble had seen it, and Mr. Noble had been talking to Mr. Griffith.

Mr. Inch : But here is another thing : you know me by reputation as an intelligent officer. If I had been going to ask that series of questions myself, is it likely that I should have put my case so prominently forward, and made an attack upon you, gentlemen ?

Mr. Barling : I think you misunderstand again ; we are not accusing you, even by implication, of that.

Mr. Inch : I must have misunderstood you.

Mr. Barling : You brought it up, and then I pointed out what was very patent in the questions. There seemed to be a question aimed directly at something that could only have been put in by somebody who knew, who had seen this pencil memorandum of mine.

Mr. Inch : Now a number of people saw that pencil memorandum. I can produce them before you. You know Mr. Noble and two other gentlemen were placed upon the Land-tax Commission of inquiry of some sort. Well now, certain confidential reports were called for by them—returns rather. Well now, I saw Mr. Noble collect a whole room-full of our officers, and hand those most private and confidential reports to them just to startle them with the importance of the commission you had given them. Now, I saw the final recommendation of that sub-board—had it in my possession in my own room. It was given to me to rule up before any of you gentlemen saw it, and another officer at least saw it, because he came to me in the evening and said, "It would look very funny if this appeared in the *Star* to-morrow night, wouldn't it ?" I only mention this to show you how information has got out.

Mr. Barling : Do not think we are blaming you for it.

Mr. Inch : I accept your assurance to that effect, because I assure you I have felt it very much.

Mr. Wilson : We have not raised it at all ; and as regards Mr. Noble, and anything you have had, of course confidential officers must be trusted.

Mr. Inch : I had nothing to do with that Commission. Every particle of that was brought up to Mr. Long and myself, and we were asked for our opinions on any matters that cropped up, and any legal opinions that were given in that report were given by Mr. Long ; the work of his own hand, in front of me, because I saw him write them ; and I do not suppose the other gentlemen on that Committee know, because the work that Mr. Noble did was done at home, as far as they knew. I mention this as tending to show the truth of my representations.

Mr. Wilson : That report was not acted upon.

Mr. Barling : It all bears upon this point : you are showing, in your opinion, the unreliability of Mr. Noble ?

Mr. Inch : Yes ; mental unreliability. Now, the day before Mr. Long's death—I omitted to tell you this the other day—Mr. Packham observed his state, and I observed it, and Mr. Packham came and saw me, and then we went together into Mr. Noble's room and we urged Mr. Noble to take some action, either to put somebody incessantly in the room with him, or to make representations to the authorities—we had both been into the room, and Mr. Long was sitting looking down his room, and had not noticed us going in—and this remarkable answer was given by Mr. Noble to us : "I cannot do anything, because Mr. Long is so suspicious of me." I just mention this in connection with those questions of yours just now. Well, now, five minutes before the opening of Mr. Long's door by the boy, he (Mr. Noble) was talking to me through the wall, and his last words to me were, "Do not tell Mr. Packham." I said, "Why ?" He said, "Oh, he makes such a fuss." I told him (Mr. Packham) afterwards in conversation that he (Mr. Noble) had forbidden me to see him, and Mr. Packham blamed me afterwards for not telling the Coroner ; but I did not want to drag Mr. Packham into it unnecessarily. Mr. Packham had not been subpoenaed by the police to attend.

Mr. Barling : It seems to me that you have made an entire mistake. Those are matters that should have come out then.

Mr. Wilson : Those are considerations that a witness has no right to consider, whether a man has been summoned by the police, and not wanting to bring him into it.

Mr. Barling : You were sworn to tell the truth, the whole truth, and nothing but the truth. And a witness is bound to give information of everything he knows on the matter of the subject of the inquiry.

Mr. Inch : It seemed to me that these were matters that would come out at an inquiry which must ensue.

Mr. Barling : The inquiry ensuing would not be as to Mr. Long's death. The departmental inquiry would be as to how the office was carried on.

Mr.

Mr. Inch : Up to the time of the inquest I declined, as it were—you know it seemed repellant to me to consider these matters in the way in which I was bound to consider them after other matters transpired.

Mr. Barling : What you mean to say is this : when you thought Mr. Noble had taken an antagonism towards you, you thought it was your right to bring this forward so as to show the unreliability of Mr. Noble?

Mr. Inch : No ; I would not have brought it up in that way ; that would have been very selfish. It seems to me that when Mr. Noble, after the inquest, took such exceptional steps to hush up an inquiry, then the matter appeared to me to be very serious ; but not until then.

Mr. Barling : Was the inquest then over?

Mr. Inch : Yes.

Mr. Barling : Do you mean to hush a departmental inquiry?

Mr. Inch : Yes, exactly, because it would impair his prospects. I do not want to call officers of the Department down here and examine them about certain things ; but, if you insist upon it, I can show you out of the mouths of reliable men in the office, other than myself, that it was quite settled in Mr. Noble's mind that he was to have the position of Registrar-General. He was quite settled—until the very day of Mr. Williams' appointment he was perfectly satisfied that he would have the appointment.

Mr. Barling : There was not the faintest intention of giving it to him.

Mr. Inch : I quite believe that.

Mr. Wilson : The Board determined, when superseding Mr. Pinhey, that it was necessary that the position should be held by a solicitor, and that of itself would disqualify Mr. Noble.

Mr. Inch : Yes, but he seemed to think otherwise ; and the very fact of my going to the Under Secretary of Justice and telling him, through Mr. Williams, on my way to the inquest—I said, "Mr. Williams, I want to see Mr. Miller," and he said, "Very well, I will see him," and he came out and said, "Mr. Miller says if you have anything to say will you say it to me?" I said, "Well, I feel that I am in a very serious position. I feel that I am the only man in the Department who can approach you and say that it will not be safe to place any further responsibility upon Mr. Noble," and, if I remember rightly, Mr. Williams said, "Well, thank you for coming over, it rather confirms our own opinions," and then he mentioned that Mr. Barling had spoken to him on the telephone about the excited way in which Mr. Noble had communicated to him the previous evening.

Mr. Barling : I was not a bit surprised at the excitable way he spoke to me on the telephone, because I think anybody under the circumstances would be very excited.

Mr. Inch : Naturally.

Mr. Barling : It never struck me as anything remarkable—the excited way in which he spoke on the telephone.

Mr. Inch : So you see that my action was not covert in any way. I was perfectly straightforward. I went to the next authority and made my representations in a perfectly open way.

Mr. Barling : Did you tell Mr. Williams, of the Justice Department, all the things you have told us here?

Mr. Inch : No, I did not. You see all these things I was not aware of at the time.

Mr. Barling : But as far as you were aware at that time?

Mr. Inch : No, we did not go through everything. Mr. Williams was not prepared to hear it all. He went to see Mr. Miller, and he came back and said, "Mr. Miller says his advice to you is to go to the inquiry and stick to facts."

Mr. Barling : It could not possibly have been better advice.

Mr. Inch : It was the very best advice in the world ; but you see the position I was in. Mr. Noble, you are aware—I was Mr. Noble's junior officer. Supposing I had brought in these, as it were, confidential facts, there would have been nothing at the inquiry, as I knew by the men who were called, to support me in any way, and I thought "I shall merely besmirch the character of Mr. Noble, perhaps unjustly, knowing as I do that he is eccentric, and it is far better for me to say what I must say, and sufficient to provoke an inquiry after this inquest is over," I have had legal advice since, as I told you the other afternoon, and the tenor of the advice was to congratulate me upon the action I had taken rather than otherwise. "You have really lost nothing by keeping back. You have protected Mr. Noble if your assumption was wrong ; but, on the other hand, if he was not right, then you gave the authorities sufficient notice to hold a proper inquiry."

Mr. Barling : But it seems to me that the proper inquiry was held in the Coroner's Court. It is a proper inquiry for the Government to inquire into the management of the office ; but touching the death of Mr. Long, it was the Coroner's duty to do that, and everything bearing on that ought to have come out.

Mr. Inch : You must understand me that I am perfectly satisfied, and am to this day, that Mr. Long committed suicide, so that I think that has a very considerable bearing on the subject.

Mr. Barling : The inference would be quite different from this statement of yours here. Persons would not infer that from your previous statements to us.

Mr. Inch : But I think you have it specifically stated there.

Mr. Barling : Oh no, I do not think so.

Mr. Inch : Where you said "What is your insinuation?" I think my answer to you was, "Simply that Mr. Noble was in the room before I was."

Mr. Wilson : And then I asked you, "Did you see the connection?" and you said "Exactly."

Mr. Barling : "Mr. Wilson : With regard to your insinuation that Mr. Noble saw Mr. Long, and did not admit it ; and, secondly, that Mrs. Long twitted him with wishing to wear the crown, do not you see how the two things could be connected. *Mr. Inch* : Exactly. *Mr. Barling* : And another thing, that he was seeking the position of Registrar-General. Put all these things together—the inference is as sinister as it can be." Do not you see you could not get any other idea from it?

Mr. Inch : I have given you absolute facts. As I said there, I only know what Mrs. Long said about his wearing the crown from Mr. Noble's statement. She may never have made such a remark. The only source of the information is from Mr. Noble.

Mr. Barling : I understand you to say now that you have no idea but that Mr. Long committed suicide.

Mr. Inch : I never had.

Mr. Barling : And you do not intend anyone to infer that you believe anything else?

Mr. Inch : No, I never have.

Mr.

Mr. Wilson : The different points were these : You mentioned that Mr. Noble was desirous to be Registrar-General ; that Mrs. Long had twitted him with the desire to wear the crown ; and that he himself had said that Mr. Long was suspicious of him, and that ——

Mr. Inch : You might make it that he says that Mrs. Long had twitted him.

Mr. Wilson : And then that he said that it would be awkward for him if he were the first ——

Mr. Inch : Yes ; “ What a good job I did not discover him, because they might have said it was me ; ” that was in the presence of witnesses.

Mr. Barling : Further, you were certain that almost up to the time that Mr. Hayes-Williams was appointed Mr. Noble was satisfied in his own mind that he would get the appointment.

Mr. Inch : Up to the very day. I could confirm that beyond reasonable doubt.

Mr. Wilson : Now, Mr. Inch, to a reasonable, common-sense man, do not all those points lead to a conclusion ?

Mr. Inch : That is not the question. The question is what I thought.

Mr. Wilson : The question is not what you thought, but what would any reasonable judge of evidence think.

Mr. Inch : If that evidence alone was put before any reasonable man he would naturally say that Mr. Long had committed suicide.

Mr. Wilson : He would naturally say that such of those facts as were within your knowledge you should have given to the Coroner.

Mr. Inch : But when we come to analyse which of them were in my knowledge at the time of the Coroner's inquest a very different state of affairs appears.

Mr. Wilson : You knew that he knew before you ?

Mr. Inch : I believed it, but I did not even know that ; that is to say, I did not know of confirmative evidence.

Mr. Wilson : Have you any confirmative evidence now ?

Mr. Inch : I have officers who formed that conclusion at the same time.

Mr. Barling : Now what is your conclusion. What do you wish us to infer from it ?

Mr. Inch : My conclusion is that Mr. Long committed suicide ; that Mr. Noble discovered his body, and being in a weak state of mind himself at the time was afraid to make it known, and all his peculiar actions subsequently were with a view to preventing an inquiry which might impair his prospects of obtaining the position which he had so long coveted.

Mr. Barling : That is exactly your idea ?

Mr. Inch : Yes, exactly.

Mr. Barling : But how would that impair his prospects—the fact of his having seen the body first ?

Mr. Inch : To any ordinary man it would have no effect. In his own mind he was weak. He is a peculiar-minded man, and it bore in upon him that it would never do for him to be first on the scene because he was the next officer in command, and it appeared to him that some motive might be attributed. It was sheer funk on his part, and all those misrepresentations that followed really were the result of the great funk which was upon him in the matter.

Mr. Barling : I begin to see more clearly your argument in the matter. Mr. Wilson and I were perfectly astounded to read your evidence the other day, but now I begin to see more clearly your object. Obviously it is seeking to prove that Mr. Noble was really off his mind. He was unhinged.

Mr. Inch : That is right.

Mr. Barling : And all these prevarications were due to an unstable state of mind. He was afraid certain inferences would be drawn from the facts if they were known, which would be prejudicial to him, and it all arose from the fact of his being unhinged ?

Mr. Inch : That is right.

Mr. Barling : You are sure that is the right inference you wish us to draw ?

Mr. Inch : That is exactly what I wish—That is exactly the representation I wish to make.

Mr. Barling : Of course I wish to say again, it is not our business to inquire into the facts of Mr. Long's death.

Mr. Wilson : We are not inquiring.

Mr. Barling : We are not inquiring in any way, except so far as it bears on your appeal.

Mr. Inch : That statement was to show that that state of mind was prevalent before. That is a report of Mr. Deane, the Accountant. You notice there he says there were some arrears (*showed the paper to the Board*). I want to show you that on the very same day that that report is dated Mr. Noble puts down there “ Please say what arrears there are, if any.” Now an officer in charge of an office like ours, and an officer making a report like the Accountant, and to receive a question like that on the top of it, I think it shows that even at that time his mind was not quite right.

Mr. Wilson : Why should not Mr. Noble make that inquiry ?

Mr. Inch : There is a report on a certain date, which says that there are some arrears in this branch, and on the same date the gentleman is asked to state what arrears there are, *if any* ; that is as much as to say “ You are a liar.”

Mr. Barling : It does not show here what date Mr. Deane had made this report ?

Mr. Inch : This is the date of the report (*indicating*).

Mr. Barling : Then what you wish to point out to us, to show Mr. Noble's state of mind, are these words “ if any ? ”

Mr. Wilson : It probably is an unconscious phrase. It is, perhaps, unconscious cerebration ?

Mr. Inch : Now look at that report (*showing another paper*). I want to show that this report was made while Mr. Noble was on that committee work of yours, and I was acting during the whole of that time in the dual capacity of submitting officer and correspondence clerk ; and I want to show you that after showing the business of the month that I had accomplished, and referring to Mr. Noble's business, he puts on here that I attended to the detail work of the correspondence, when I was in charge of correspondence all the time, *and was doing all the work almost that Mr. Noble ordinarily did*.

Mr. Barling : You mean that Mr. Noble minimised what you did ?

Mr. Inch : Although, as you say, he was down here speaking well of me, he puts that on here, showing that I did the detail work of the branch when I was really doing Mr. Noble's work.

Mr. Barling : You think that is really minimising your work ?

Mr. Inch : Yes.

Mr.

Mr. Barling : You were the clerk in charge of correspondence, and now he says that you were doing something else, although you were at that time doing something more.

Mr. Inch : Yes; at the very time that that was written, he was down here speaking well of me, and saying I was a first-rate officer.

Mr. Wilson : The fact of the matter is, Mr. Inch, that Mr. Noble and Mr. Long were so constantly bringing your name before us for an increase of salary that we thought it was time to stop. Of course we have to consider all public servants, and you were brought so constantly before us for increase of salary that the Board really got —

Mr. Barling : It could not go on. You see we have to look at the whole Service. We have not only a small office to deal with. We have to look at the whole of the Service.

Mr. Wilson : It is not a private business. Those in charge of a private business can do what they like; but we have to look at the other officers in the Service. I assure you that those gentlemen were constantly asking for increase of salary for Mr. Inch.

Mr. Barling : That was what made me so astonished at the attitude that Mr. Inch apparently took up subsequently to Mr. Noble.

Mr. Inch : But all this time I was sticking to Mr. Noble, and doing his work. He was away for probably six or seven weeks on leave in 1898, and during the whole of that time I acted in his position; and then during the time he was on this Commission work, sometimes we did not see him for a whole week, and all that time I was acting for him. And this year he has been away well into his third month now, and all that time I have been entrusted with the charge of the business, and I have never asked for any consideration for it; and Mr. Noble's friends come up there, and I have to receive them and act towards them, and I have acted towards him all this year, in the most cordial way; but when I find out that, as it were, my career is blocked, then I realise that there must be a cause, and the only thing I know of is this report of Mr. Noble's, which I have referred to.

Mr. Wilson : We have not seen that; and I have said that the Board were so often met with demands for increase of salary to you that we had to consider the claims of other officers.

Mr. Barling : We saw Mr. Hayes-Williams this morning. He said he could not tell where the report had gone, and he had no recollection of sending it to the Board, and could not tell what had become of it. And we explained to you the other day—we spoke very decidedly at first, and then we rather hesitated. Mr. Holliman mentioned something to me, and then we found out that, at the request of Mr. Coghlan, a copy of that report was sent down some days previously. But I have not seen it yet.

Mr. Wilson : We have not seen it now.

Mr. Barling : Of course we shall read the report now it has come out in this way; but at the present time I have not seen the report, and neither has Mr. Wilson.

Mr. Inch : You remember the D. R. scheme—the scheme to transfer all the duties of the Registrars in the country to the postmasters. A certain letter was sent out to me one day to write in this matter, and I took it in to Mr. Long, and Mr. Noble was there and another gentleman; and I said to Mr. Long, “Do you want me to write this letter exactly as it is given to me with the facts wrong, or do you want me to point out discrepancies?” and he said, “I think you should point out if there is anything wrong;” and I said, “You are making representations here that if this thing is carried out there will be a saving of £4,000 a year,” and I said, “That is not right,” and he said, “Why not?” I said, “Why the whole affair is only £3,900, and you could not make £4,000 out of it.” And Mr. Long was embarrassed, and Mr. Noble sang out from the other end of the room, “That is all right; you do not understand”; and I bowed and left the room. And there was another one, £700—saved in salaries. He had to write to you, saying that there was no saving at all on the salaries; that there had been some saving in the contingencies. You remember those incidents. I knew all these things. And then, again, there was that case of Mr. Wright's. Of course, that has only happened after Mr. Long's death, and after the inquest. I told him (Mr. Hayes-Williams) that Mr. Long had never seen the case of Mr. Wright, as it was finally written out; but, as a matter of fact, the matter which issued from our office eight or nine days after Mr. Long's death was only written the day of issue, although it was reported to have been on Mr. Long's table on the day of his death.

Mr. Wilson : What is that again?

Mr. Inch : The two unsigned reports—the report of Mr. Noble and Mr. Long, both unsigned—were sent to the Justice Department some eight or nine days after Mr. Long's death, with a covering minute stating that these were on Mr. Long's table for signature on the morning of his death. Well, they were only written the day they left the office, the whole thing, and it is known right through my branch.

Mr. Wilson : You are prepared to state that of your own knowledge?

Mr. Inch : Yes. Well, now as soon as Mr. Williams came in he sent for me; and, without making any fuss, or putting in any reports to that effect, I put in a report, and I simply said I strongly recommended that Mr. Wright should be reinstated at once, and he asked me, “Why?” and I told him. I strengthened Mr. Williams' hands, and all these difficult things, which might have been made a lot of, were dealt with promptly in a proper way. As I said the other day, it is singular that the malcontents in the office came rushing up to my room, and thought that I was going to lead them on to harass everybody in there, and I really prevented a series of questions being asked in the House which it was intended to have asked, by the fact that I was able to represent that in all probability Mr. Williams would adjust matters in the Department; and so Mr. Williams will tell you that his senior officers have congratulated him upon the phenomenally quiet year in the Department, and I take a very great deal of credit to myself for that.

Mr. Barling : You want us to understand now that a number of officers in the Department were going to move Members of Parliament to ask questions, and your influence prevented them doing it?

Mr. Inch : Yes. It is very difficult for one to state everything in the way it might be said; but I do not know whether you are seized with what my duties are in the ordinary way. I do not think any officer in the whole Service is entrusted with the same duties as I am. I open everything that comes to our Department, and have done ever since I was in charge of the branch—my predecessors never did—and the discretionary power is left with me to distribute all that matter. If I think a thing should go to Mr. Williams I send it to him; if I think it should go to any other officer I send it to the other officer. On the 3rd October, that is—the day after the Bank Holiday—we had by the first post in the morning over 300 letters. I opened all those, and I did not think it was necessary to send a single one of those to Mr.

Williams,

Williams, and I did not send one. Probably some of them would reach him in due course in connection with applications under the Act. I just mention this to show you the wide range of my duties and the information and knowledge of the Department which I must have to be able to fill my position with credit as I have done in the past. Then to receive and despatch all the mail matter for the whole Department. Any duties which do not belong to anybody, anything in the post which I cannot say belongs to any branch, is miscellaneous, and I have to deal with it myself. We have something like 1,250 ministers registered for the celebration of marriages, and there is something every day happening in connection with these—either the Bishops have misspelled their names, or they are moving, or they have had some trouble with the church authorities and the church authorities want their names struck off, or the question of the power of parents under certain circumstances to give consent. All these matters crop up, and I have to minute my papers and represent the case to the Registrar-General, which I do, and invariably he accepts my advice and takes the action which I suggest. Then the question of the appointment of guardians of minors all over the colony is a matter which has been left to me. Where it appears there is a vacancy for a guardian, I take the first action by sending printed circulars to the Registrars and procure nominations from the local benches of magistrates. When a suitable nomination has been received I prepare my minute for the Chief Justice, and the recommendation is made for the appointment, and it goes through in due course. Then there is the matter of sworn valuers. There was no Sworn Valuator Register kept before my time. I took the trouble to get all the names of the existing sworn valuers together, had a Register compiled, wrote up the history of each one, and as the appointments occur now so they are posted up. The Bankruptcy Act, I think it is, requires that if any of them go insolvent they shall be struck off, and we have to watch these matters. Then any minors in Sydney who require consent are always referred to me for the whole Metropolitan district, and I have to examine these minors, find out whether they have parents, if so under what conditions they are living, and to cross-examine them about innumerable questions and matters, and ascertain whether the cases are right for the guardian to give consent; and never in a single instance has a consent been refused by the Registrar-General when I put it before him. I need hardly say that sometimes very delicate matters crop up, because the great majority of the girls who come to us are in an unfortunate condition, and they are often prepared to tell us the most deliberate untruths in order to get our consent rather than face their parents; so I have to ascertain by certain means whether their parents are really alive, and if necessary to have searches made in our own records, and very often these matters are very delicate, and I have always given satisfaction to the Registrar-General in these matters. And then I have to give a certificate to the Registrar-General each week that all the surplus moneys right through the Department have been properly taken up and suitably accounted for. Sometimes we have large sums of money—almost every day we have considerable remittances—and very often we send back many pounds in the week. Of course, I receive them, in the first place, in the incoming post, and then despatch them and record the despatch throughout the Department; or, where I do not do it personally, I have to give a certificate that it has been done properly. And, then, I have my own staff to supervise, and the five junior messengers in the Department, and I have to attend to the whole of the business of the Department—that is to say, if anything goes wrong with the water-pipes, or if any painting has to be done, or any petty cash vouchers, or anything of that kind, to be dealt with; if any business has to be done in the way of purchasing emergency stores, putting petty cash matters through, I have to attend to them; and the location of the offices on the W.C.'s, and all the miscellaneous work has somehow drifted into my room, and I am looked upon as a responsible officer. And then, notwithstanding the fact that I am a responsible officer—always regarded as the head of a branch in the Department—I am drawing a smaller salary than a number of gentlemen who only occupy minor positions without responsibility. Take the case of Mr. C. Fry; he is in receipt of a larger salary. I do not want to single out Mr. Fry particularly, but he is receiving a larger salary than I am, and he is doing the Land Titles Index, which has, in the past, been done by officers as low as £150 a year.

Mr. Barling: You know Mr. Fry had a very large reduction in his salary.

Mr. Inch: Yes; I am sorry for Mr. Fry, too; but I am just mentioning this as an instance.

Mr. Barling: You mean that Mr. Fry, doing very much inferior work to you, is getting a higher salary?

Mr. Inch: His work is not so responsible, because it is checked. He has, really, no responsibility upon him.

Mr. Barling: I have a very good idea of his work.

Mr. Inch: It is involved, no doubt, but in the past it was considered that it might be entrusted to an officer at £150, and it was done. By the way, Mr. Fry put a statement before you the other day showing the *pro rata* increases we have received, and, unfortunately for him, his reference to me was misleading, because his figures were quite wrong in connection with my own case, although he believed they were right; so I hope you will not take that as authentic, so far as regards me. Then there is the case of Mr. Rossiter. He is a personal friend of mine, and I am very sorry for him, but he is getting £300 a year for doing work which never carried anything like the salary of my position. I know the Board are not to blame for this.

Mr. Wilson: Mr. Rossiter would get a place at £300 a year if the Board could find a place at £300 a year to give him. Anything you say about these officers will not in any way prejudice them.

Mr. Inch: I do not wish it to. I am quite sure of that. I come here as one of the heads of branches in the Department, ranking something like seventh, I think.

Mr. Barling: You are using their names just to show that they are getting larger salaries than you are getting, and yet they are not holding as responsible positions as you?

Mr. Inch: They are not front-rank men. I am classed with the senior officers of the Department, yet I am getting a lower salary than other officers not in the same class.

Mr. Wilson: How do you mean you are seventh?

Mr. Inch: That has been the order of the officers ever since I have been there. [*Handing list to Mr. Wilson.*]

Mr. Wilson: Surely, you would not put yourself before Mr. Kloster?

Mr. Inch: No. We ought to leave the last one out. That is only an innovation. The other order is the order as it has prevailed for eight or nine years at least.

Mr. Wilson: You are talking now of the positions, not of the men who are holding them?

Mr. Inch: No, irrespective of the men. That order was fixed by Mr. Pinhey.

Mr.

Mr. Wilson: Mr. Pinhey may be right or wrong; but, of course, we do not model our arrangements by Mr. Pinhey.

Mr. Inch: I am sure of that; but I think you will allow me to tell you that history is the foundation of all knowledge, and we may use it if it is of advantage to ourselves. That is practically all I have to say, except that, perhaps, outside my own branch I have been able to make suggestions to Mr. Williams; as soon as he came into the Department—to show you how thoroughly loyal I was to him—I pointed out some very serious matters which required attention in different parts of the office; for instance I said to him, “There is no proper check on ministers’ marriages at present.” Since then I suggested that a new lot of registers and marriage certificates should be printed in proper form, and numbered right through like cheque-books and issued for receipts. All cancelled forms to be so marked and forwarded as if for registration. The present system is laborious, incomplete, and irritating to both ministers and registrars, and causes hundreds of letters to be written per annum. That is to say, even up to the present time we appoint a minister, we send him a lot of marriage certificate forms. They are not numbered. We know what we send him, and, perhaps, he spoils two or three, and he throws them into the fire, and he celebrates a marriage, and he forgets altogether to send us the certificate. A person comes down and says, “I want a copy of my certificate”; and we say, “There was never such a marriage.” I assure you I put hundreds of these cases before Mr. Williams. There were fifty the other day. He (the clergyman) said he had found fifty in his cupboard, and he sent down to see whether they were registered, and they were not.

Mr. Barling: I wonder you do not make it incumbent on the parties themselves to notify you?

Mr. Inch: In New Zealand they make everybody who is contemplating marriage go to the registrar and pay a fee, and then they are registered as eligible, and then they check the registrar’s return by that. There was a very sad case in connection with the Presbyterian Church a little while ago. Some doctor married a lady in Sydney. There was no record of the registration of marriage, and the lady’s friends were in a great state of consternation. We found out that this man had not been registering any marriages at all. There was a fearful row about it. We had the greatest trouble to keep the matter out of the court; and still our people have done nothing. I drew Mr. Williams’ attention to it at once. There is a reason for the delay now. They are contemplating altering the Act, and I think Mr. Williams is waiting until that is done, and he is going to see to the whole thing. Well, then, I consider that pointing out that matter of Mr. Wright’s to Mr. Williams in the way I did was of exceptional value to him, because it enabled him to do justice to Mr. Wright, and Mr. Wright does not know to this day anything about it; and it certainly relieved the Board of a case which might have troubled them somewhat from the representations which were being made, and it enabled the Registrar-General to put Mr. Wright in a position where he has remained ever since, perfectly happy so far as we know. Then there is the case of Mr. Spark. You had him down here the other day.

Mr. Barling: I inquired into Mr. Spark’s case very fully. Of course I have not finished with it yet.

Mr. Inch: Mr. Spark’s work is purely checking. He is a thoroughly good man, but his work is simple, and purely checking. It is a difficult and awkward, wearing position he has got; but as compared with mine, where I have to write most difficult matters—there are some of my original drafts here, which I might leave with you if you care to peruse them, showing you the most difficult matters I have to deal with; whereas Mr. Spark, who gets much more salary—his work is really certifying to the work of copyists.

Mr. Barling: Mr. Spark’s complaint is that he was removed from an important position to the position which he now occupies.

Mr. Inch: As he occupies that position now, it seems to me that his duties are less valuable than mine.

Mr. Wilson: Of course, some regard must be had to an officer’s service.

Mr. Barling: Those matters are not dealt with yet. I have not had the reports fully written out. When they are they will go to Mr. Hayes-Williams.

Mr. Inch: Then I suggested to Mr. Williams that, as there had been so many changes in the Department which I did not think the Board was cognizant of, and many of the changes being unsuitable both to the clerks and to the heads of branches, that he might call the heads of the branches together, and let each man select the men who would suit him best; and, after that was done, I thought there would be certain men over that no one would ask for, and that the Board might then be asked to confirm the new arrangement, and he would thus be ensured of a quiet life and an efficient department. I have nothing more to say, gentlemen, except to ask you to allow me to put in these copies of testimonials and minutes. I would like to thank you for the exceedingly patient hearing you have given me, and for the assistance you have given me in the matter of putting my case before you.

Mr. Barling: Have you said everything you wish to put before us now?

Mr. Inch: I think I have. I cannot recall anything more that I desire to say.

Mr. Barling: I am glad we have given you an opportunity, because I felt at the last meeting that you were a little bit hurried.

Mr. Wilson: I do not think, Mr. Inch, that we shall be able to look at that draft correspondence. We have not time to look at that.

Mr. Barling: There may be some confidential matters there. We can find that out from Mr. Williams.

Mr. Inch: I will simply ask this, that if any question of my ability should crop up, you will afford me an opportunity of demonstrating it.

Mr. Wilson: We have always heard the best accounts of you.

Mr. Barling: Your ability has never been questioned for one moment.

Mr. Inch: You will notice amongst those testimonials there is one from Mr. John Dunlop, under whom I served about twelve years ago, and I have the pleasure of enjoying his friendship at the present time—I was doing their shipping for them twelve years ago—and then Mr. Proctor, of the *Herald* office—there is a testimonial from him there. No doubt you have some personal knowledge of him. He would not misrepresent anything, I think.

No. 6.

The Secretary of The Public Service Board to The Under Secretary of Justice.

Registrar-General's Office.—Interview of Mr. J. S. Inch, Clerk, Registrar-General's Office, with the Public Service Board, regarding his salary.

Public Service Board, 50, Young-street, Sydney, 19 December, 1899.

IN view of the extraordinary character of some of the statements made by Mr. Inch at the interviews which he had with the members of the Public Service Board on the 2nd and 8th ultimo, I am directed by the Board to forward a copy of the Shorthand-writer's notes, and to say that the Board would be glad to have a report from the Registrar-General on those parts of Mr. Inch's statements which relate to matters coming within the jurisdiction of the Board.

The necessity or otherwise for action in regard to those of Mr. Inch's statements which do not so relate is, of course, a matter entirely for the permanent head of the Department to determine.

I am to add that the delay in forwarding these papers is due to the absence of the Shorthand-writer on duty at the Divorce Court, which prevented the transcription being proceeded with.

J. W. HOLLIMAN,

Secretary.

Forwarded to the Registrar-General.—G.M., B.C., 21/12/1899.

No. 7.

The Registrar-General to The Under Secretary of Justice.

Sir, Registrar-General's Department, New South Wales, Sydney, 22 January, 1900.

Referring to the statements made by Mr. J. S. Inch, an officer of this Department, at interviews accorded him by the Public Service Board on the 2nd and 8th November last, which were forwarded to me for report on the 19th ultimo, I have the honor to request that consideration may be given to the questions. First, whether Mr. Inch has upon his own statements and admissions been guilty of conduct which justifies his dismissal from the Service, or, if not, second, whether he can be considered a fit person to occupy his present position, and third, whether his immediate suspension is desirable pending some other position being found for him.

My reasons for making this request will probably present themselves to you upon a perusal of the notes of the interviews referred to, and I need only add that as I am unable to feel any confidence in Mr. Inch, I deem his immediate removal from his present position desirable in the interests of the Department.

I have, &c.,

W. G. H.-WILLIAMS,

Registrar-General.

[Confidential.]

MINUTE-PAPER.

Subject :—Interview of Mr. J. S. Inch, Clerk, Registrar-General's Office, with the Public Service Board, regarding his salary.

Registrar-General's Department, New South Wales.

THE Public Service Board ask for a report from me on those parts of the statements made by Mr. Inch at the interviews accorded him by the Board, which relate to matters coming within the jurisdiction of the Board.

These matters are, I take it,—First, the question as to whether the Chief Clerk, Mr. Noble, suffers from time to time from some mental defect as alleged by Mr. Inch (page 32) which would unfit him for duty; second, the question as to whether Mr. Inch's services have been such as to entitle him to special consideration as regards salary; and third, the question as to whether Mr. Inch has not, by his own statements and admissions to the Board, demonstrated his unfitness for his present confidential position.

I can deal with these only so far as my own knowledge extends, viz., from the date of my appointment—18th October, 1898.

As to the first matter, it does not appear to have any bearing upon the question of Mr. Inch's salary, and, if dealt with at all, it will, I presume, form the subject of an independent inquiry. From my own observation of Mr. Noble, I do not consider that any such inquiry is necessary.

As to the second matter, I would refer to my minute of 12th October, 1899—covering Mr. Inch's application of 12th September—in which it is stated that I should not feel justified in recommending any larger increase in Mr. Inch's salary whilst he is in his present position than would result from the operation of the Increment Regulations. I hold the same view to-day as I held on the 12th October last in reference to Mr. Inch's salary.

As regards the question of Mr. Inch's position, however, there is much more to be said. The post of Clerk in Charge of Correspondence and Records should be filled by a discreet, trustworthy, and loyal officer who is able to appreciate to the utmost the confidential nature of the position. The statements made by Mr. Inch to the Board, in my opinion, show conclusively that he entirely misconceives what is due from him. To my mind, he has sought to advance his own importance at the expense of the character and reputation of his superior officer, Mr. Noble, upon whom he has endeavoured to attach a stigma, the mere suggestion of which may place that officer under a suspicion that will cling to him for years; and he appears to have made use of confidential information, not only with the intention of bettering his own case—which is itself inexcusable—but also for the purpose of degrading his senior officer in the minds of the Board, upon whom the future advancement of that officer to some extent depends. Under the circumstances, I am of opinion that Mr. Inch is not a fit person to occupy such a position as that of Clerk in Charge of Correspondence and Records in this Department.

I have now to deal specifically with certain of Mr. Inch's statements, which, unless explained, are liable to give rise to misapprehension.

As to the so-called report of Mr. Noble's, of the 20th October, 1898, which Mr. Inch professes to assume has prejudiced him with the Board, and certain statements in which he asks to have an opportunity of disproving, he says, page 1: "He (the Registrar-General) asked me where the original was, and somehow

or

or other *it was dealt with apart from me*, being a matter concerning me, and I was unable to tell him where it was." Again, at page 3, he says: "The unfortunate part of it is that *it is the one thing in the Department which we cannot find, and it is the one thing which was taken out of my hands to deal with, I being the Record Clerk. He (the Registrar-General) came and asked me where it was.*"

These remarks entirely misrepresent the matter. Mr. Inch having referred, in his letter of request for an interview with the Board, to the alleged report, a question was raised as to the contents of the report, and I made inquiries of Mr. Inch, as I had no recollection of it. He then explained that it was a memo. written by Mr. Noble when certain questions which were asked in the House relative to the Department were being dealt with. I at once told Mr. Inch that, to the best of my recollection, the memorandum had never been acted upon. I did not make the inquiry of him as Record Clerk, but merely for the purpose of ascertaining what it was that he referred to; nor did I, when I learned this, expect that it would be in his custody as Record Clerk. As to its being "the one thing which we cannot find," it will be seen from what I have said that the form of expression is inappropriate; and as to its being "the one thing which was taken out of my" (Mr. Inch's) "hands to deal with," I may say that this form of expression is even less happy than the former one, Mr. Inch's position not being one which gives him the right to deal with any matters except under instructions.

At the foot of page 3 Mr. Inch says: "When this report was sent in to Mr. Williams, the reports under the increment scheme were referred to him by you for report; and anything that he may have said then in connection with my case would undoubtedly be affected, I take it, by that report." The inference to be drawn, presumably, is that at the time when the increment reports were referred to, Mr. Inch's advancement was prejudiced by the so-called report of Mr. Noble. Any such inference is negated by my memo. on his letter of the 27th February, 1899, which accompanied his application for an interview. As a matter of fact, my recollection of the matter is that, as I did not feel justified in dealing with action taken by my predecessor as regards increments, I minuted the papers accordingly.

At page 18 Mr. Inch interrupts the reading of his communication, dated 2nd November, 1899, at the words, "I have hitherto declined to approach you otherwise than through the prescribed official channel" to add, "and in that way I have never been able to reach you." This is very misleading. Mr. Inch was perfectly well aware that he was quite at liberty to ask for an interview with the Board at any time subsequent to my appointment. As a matter of fact, he did not ask or in any way suggest that he desired to approach the Board until his letter of 12th September last.

Mr. Inch then continued reading, and I must confess I do not quite grasp the meaning of the extract following his remark just quoted. If he intends to convey that I have been influenced in my administration of the Department by anything that he has said, I need only remark that his self-complacency has led him to mistake toleration for appreciation. The fact that I have from the very outset been desirous of having Mr. Inch transferred to some other position affords a criterion as to the value I would be likely to attach to his suggestions or reports.

Still reading from his communication of 2nd November last, Mr. Inch continues (page 18): "Against this, I respectfully submit, the officer"—meaning Mr. Noble—"who was so largely responsible for the maladministration which had obtained in this Department has been deprived of almost all the legitimate appurtenances to his position—except that of full pay." This again, is a misleading statement. Previously to my appointment, as I understand, Mr. Noble, as Chief Clerk, was the means of communication between the Registrar-General and the heads of branches, all departmental matters passing through his hands. This did not accord with the plan of action I proposed when taking charge of the Department, and I at once altered the system, which necessarily led to Mr. Noble's duties and responsibilities being largely curtailed. But it by no means justifies the inference which Mr. Inch, in his carefully-prepared statement of his case, would seek to raise. And whilst on the subject of this statement, so far as it involves Mr. Noble, I may remark that Mr. Inch appears to have adopted a method of laying his case before the Board that is more creditable to his shrewdness than to his sense of honor.

At page 21 Mr. Inch states that immediately I took office I sent for him. The fact is, that I did not send for Mr. Inch immediately, but upon the questions already mentioned being referred to me for report I called for him, as I called for other officers, to tell him that the intimate acquaintance with departmental matters which the questions indicated suggested that information had been divulged which should have been regarded as sacred, and to let him understand, as I had let other officers understand, that, as far as I could, I would deal with treachery and disloyalty in a prompt and effective manner.

At page 22 Mr. Inch says that what he has told the Board is in evidence with me, and adds: "I take it that Mr. Williams' inquiry was a departmental one. I gave Mr. Williams in effect the evidence I am giving to-day." There was no inquiry by me into matters relative to Mr. Long's death. My inquiry was with a view of discovering causes of disaffection and dealing with them. Mr. Inch took the opportunity, as I considered, to disparage Mr. Noble, and, if I remember aright, I declined to allow him to continue in such a strain. In effect, I concluded that he was endeavouring to justify his conduct in regard to the questions asked in the House, some of which he did not deny he might be indirectly responsible for, although he denied that he had instigated them.

At page 23, Mr. Inch says: "I had a report put in a confidential report to him (of course I would not disclose it to you, because I do not know whether it would be his wish that I should); but the whole matter, so far as I was concerned, was properly reported and attended to." As Mr. Inch has referred to this report of his, I attach it just as I received it, together with a copy of my memorandum of 31st October, 1898, a copy of which was handed to each officer occupying the position of head of a branch in the department.

At page 38, Mr. Inch says: "Mr. Noble took exceptional steps to hush up a Departmental inquiry because it would impair his prospects. It is worthy of note that, in the so-called report which Mr. Inch has made so much of, and which was written a few days after I took office, Mr. Noble asked for an inquiry. Certainly I never gathered the impression that he was desirous of hushing up an inquiry. On the contrary, it was at my suggestion that he did not press his request, which I considered would hamper me in the course of action I had laid down for myself when placed in charge of the Department.

At page 48, Mr. Inch says, in reference to Mr. Wright's case, "As soon as Mr. Williams came in (into office) he sent for me, and without making any fuss or putting in any reports to that effect, I put in a report, and I simply said I strongly recommended that Mr. Wright should be reinstated at once, and he asked

Exhibit F.

Exhibit O.

asked me why and I told him." And again at page 55a, "Well then, I consider that pointing out that matter of Mr. Wright's to Mr. Williams in the way I did was of exceptional value to him, because it enabled him to do justice to Mr. Wright, and Mr. Wright does not know to this day anything about it, and it certainly relieves the Board of a case which might have troubled them somewhat from the representations that were being made, and it enabled the Registrar-General to put Mr. Wright in a position where he has remained ever since, perfectly happy so far as we know." Mr. Inch apparently arrives at the erroneous conclusion—as he does at the foot of page 3, in regard to the increment reports—that action was taken on my recommendation. As regards Wright, I can say that Mr. Inch's remarks did not weigh with me one iota. The matter arose before my appointment, and I considered it was one which should be dealt with independently of me. I am under the impression that I minuted the papers accordingly. Being quite new to the Department and naturally anxious to avail myself of every legitimate means of arriving at the causes of the internal trouble that was apparent, I gave every officer an opportunity of unburdening himself. But I received all statements with caution, and endeavoured to avoid being influenced in any way by occurrences prior to my taking office. As regards Mr. Inch, I was especially careful, as I gathered the impression from his own demeanour and actions that his chief aim was not so much the welfare of the Department as the advancement of his own interests.

At page 49, Mr. Inch says, "And so Mr. Williams will tell you that his senior officers have congratulated him upon the phenomenally quiet year in the Department, and I take a very great deal of credit to myself for that." I fear Mr. Inch's mental vision is again somewhat obscured by the shadow of his own importance. I have ventured to take some small credit to myself for the present harmonious working of the Department, but I recognise that any success I have achieved is very largely due to the cordial co-operation of the senior officers, and indeed, with trifling exceptions, of the whole staff. Mr. Inch's ill-concealed animosity to Mr. Noble has not tended to make my task the pleasanter, and his suggestion that his influence has been the means of preventing questions being asked in the House at the instance of officers of the Department I regard as absolutely unfounded.

Again, at page 49, Mr. Inch says, "I don't think any officer in the whole Service is entrusted with the same duties that I am;" and goes on to speak of his discretionary power in reference to distributing correspondence, &c. Mr. Inch takes a large view of what are really quite trifling responsibilities. Whatever his duties and discretions may have been before my taking office, they are now limited, as regards the distribution of correspondence and papers, by specific directions which do not leave much room for the exercise of more than ordinary discretion. All heads of branches to whom correspondence is marked off by Mr. Inch, are instructed that anything out of the ordinary routine, anything in the nature of a complaint, or having any bearing on the efficiency of the administration of the Department,—anything, in short, of a special character,—is to be referred to me for approval of the action proposed to be taken. As a check, Mr. Inch is instructed to note upon a business paper, for my information, anything of the kind mentioned which he has so marked off, in order to ensure the observance of the rule. Mr. Inch's statements in this connection, on pages 49 and 50, must therefore be taken with considerable qualification.

On page 50, Mr. Inch says, "Any duties which do not belong to anybody; anything in the post which I cannot say belongs to any branch, is miscellaneous, and I have to deal with it myself." This is a grossly incorrect and misleading statement. As I have said, Mr. Inch has no authority to deal with any matters outside his allotted duties (which leave nothing of importance to his discretion) except under my own instructions.

Registration of Ministers for the celebration of marriages, page 50.—This work is for the most part purely routine, requiring care and accuracy. Mr. Inch is both careful and accurate. Where questions arise I deal with them personally, the minutes prepared by Mr. Inch being, as a rule, the result of my directions to him.

Appointments of Guardians of Minors, page 50.—This work is not left to Mr. Inch. Since Mr. Noble's absence on sick leave, Mr. Inch has taken the usual formal steps under my instructions. There have not been more than six appointments during the past three months.

Appointments of Sworn Valuers, page 51.—Largely routine work. There have been about six cases dealt with during the past three months.

Consents to Marriage of Minors, page 51.—This work calls for some tact and discretion, but as Mr. Inch invariably consults me before sending in any doubtful cases, his responsibility is not great. There has been an average of eight cases per month during the past year.

Surplus Moneys per post, page 51.—Before my appointment there was no proper check on moneys returned per post. To place the responsibility where it should rest, I directed Mr. Inch, as the head of the Correspondence Branch, to furnish me with a certificate, upon the weekly list prepared by the Sub-Accountant, that all moneys sent to the Correspondence Branch for return have been duly forwarded to their respective destinations.

Miscellaneous Work, page 52.—Mr. Inch does a considerable amount of this since Mr. Noble's illness.

Order of Seniority of Officers.—List marked "D" in pencil does not show officers in proper order of seniority or responsibility, nor was I aware that it was ever so regarded.

Marriage Registrations, page 54.—Mr. Inch's remarks on this subject touch upon a difficulty that has existed for years, and will continue, notwithstanding all precautions, so long as the law remains unaltered. The remark at page 53, "I assure you I put hundreds of these cases before Mr. Williams," must not be deemed to reflect any special credit on Mr. Inch. Any such cases as those referred to are reported to me, as they are discovered, by the Deputy Registrar-General in charge of the Births, Deaths, and Marriages Branch, and the reports, of course, pass through the hands of Mr. Inch in his capacity of Correspondence and Record Clerk, on their way to me. Since Mr. Noble's absence on sick leave, Mr. Inch frequently, without any authority, places a submission note on the papers—usually nothing more than the word "submitted" over his initials—before sending on to me these and other reports and papers—entirely superfluous action, which he, perhaps, considers entitles him to the further designation of "Submitting Officer." The case of the doctor—on page 55—which Mr. Inch mentions, occurred before my time, and nothing has since transpired with regard to the matter.

Mr. Inch's suggestion on page 56 did not meet with my approval.

Referring

Referring again to the question of the appointment of Guardians of Minors and Sworn Valuers, I should say, in justice to Mr. Inch, that he claims credit for a great deal of work in connection with these matters which I have been under the impression was done under the direction of Mr. Noble. As that gentleman is still absent on sick leave, I am unable to refer to him, and have therefore given the approximate number of cases dealt with during his absence.

In conclusion, as I have no desire that Mr. Inch should not have every credit that he deserves, I repeat what I have stated on previous occasions that I have a high opinion of his intelligence and general ability. He has been of considerable assistance to me during Mr. Noble's absence, and has voluntarily taken upon himself a quantity of miscellaneous work.

The recommendations of my predecessor will no doubt be given due weight as regards any claim Mr. Inch may have for special service prior to my appointment. My remarks, as before stated, have reference only to matters within my own knowledge.

W.G.H.-W.,

Registrar-General.

No. 8.

Minute by The Under Secretary of Justice.

Subject:—Interview of Mr. J. H. Inch, Clerk, Registrar-General's Office, with the Public Service Board, regarding his salary.

Department of Justice, Sydney, 30 January, 1900.

SUBMITTED, in reference to the Public Service Board's minute of 19th December ultimo, on paper 99/18,982 herewith.

Having read the evidence given by Mr. Inch before the Public Service Board on the 2nd and 8th November last, and also the letter and report of the Registrar-General, both dated 22nd instant, I can arrive at no other conclusion than that Mr. Inch is a dangerous and an unscrupulous person, and I concur with Mr. Hayes-Williams that his removal from his present confidential position is very desirable in the interests of the Department.

I am further of opinion that, judged by his statements before the Board regarding his superior officer (Mr. Noble), he is unfit for any other position in the Public Service. The statements made by him on pages 11, 12, and 13 are of such a character as throw suspicions of the very gravest kind upon Mr. Noble in connection with the death of Mr. Long. While at page 15 he says he "has no desire to do anything at all to cast a reflection upon anybody," and at page 20 he states "if I had said publicly at the inquest what I have told you to-day, it would not only have ruined Mr. Noble, but it would probably have put you (the Board) in a very awkward position," at his second appearance before the Board, *six days afterwards*, he said (see page 40), "You must understand that I am perfectly satisfied, and am to this day, that Mr. Long committed suicide," &c. ; and in answer to Mr. Barling (page 41) he said in effect that he never had any other idea than that Mr. Long committed suicide. Why, therefore, did he in his previous statements use language which must be regarded as conveying very sinister and grave suspicions in regard to the action of Mr. Noble (who he alleges had long coveted Mr. Long's position) at the time of the discovery of Mr. Long's dead body? On page 12 it is shown that he stated that when I myself arrived, after being telephoned for, "Mr. Noble at once became hysterical and rushed at Mr. Miller." This is a very gross misstatement of what actually took place on that occasion. Mr. Noble certainly for a few moments showed strong feeling when I entered his room, but was otherwise very quiet, and certainly never did such a thing as "rush at" either Mr. Gould or myself. I saw nothing whatever in his manner to lead me to believe that his mind was in any way unhinged.

After careful consideration, I cannot but regard Mr. Inch's statements in any other light than an exhibition of the most vindictive spirit towards Mr. Noble, against whom, it is clear, he has a strong animus, and I consider that his attempts to seriously damage Mr. Noble's reputation as an officer and his character as a man, as disclosed in these papers, while endeavouring to greatly magnify his own importance, prove him to be entirely wanting in that sense of honor and fairness which are essential in a public officer.

This very serious matter is one which has arisen chiefly out of an inquiry that has been instituted by the Public Service Board, the members of which are in a better position to judge the case than I am, inasmuch as Mr. Inch's evidence was given before them, and they had the opportunity of noting his manner and general bearing while he was making his statements and answering the questions put to him by them. My opinion is formed from a perusal of the papers sent to me by the Board, and also the report of the Registrar-General (Mr. Hayes-Williams), who is very well acquainted with Mr. Inch and the duties he performs, whereas I have but a very slight knowledge of him personally.

It is much to be regretted that Mr. Noble's state of health is such as to prevent him from being heard in his defence. He is, I understand, slowly recovering from a very severe attack of pneumonia supervening upon influenza.

G.M.

While I agree with much in the above minute, it appears to me that it will be necessary to hold a full inquiry before Mr. Inch's position can be clearly established, and steps might be taken to proceed with such inquiry at once.—W.H.-W., 21/3/1900.

The Secretary of the Public Service Board to The Under Secretary of Justice.

Public Service Board, 50, Young-street,
Sydney, 23 February, 1900.

Sir,

I have the honor to invite your attention to my communication of the 19th December last, asking for a report from the Registrar-General regarding certain statements made by Mr. J. S. Inch in the course of an interview with the Public Service Board, and to request that you will be so good as to expedite the matter.

I have, &c.,

J. W. HOLLIMAN,
Secretary, *per* R.A.G.

Submitted.—J.L.W. (for U.S.), 23/2/1900.

MINUTE.

MINUTE.

Subject:—Conduct of Mr. J. S. Inch, Clerk in the Registrar-General's Department.

Department of Justice, Sydney, 23 March, 1900.

Submitted.—With reference to the Minister's minute of 21st instant, I would suggest that the following charge be preferred against Mr. Inch, viz. :—

“That he did, at interviews accorded him by the Public Service Board on the 2nd and 8th November last, on the subject of his salary and position, unjustifiably seek to advance his own interests and impertance at the expense of the character and reputation of his superior officer, Mr. Noble.”

This charge might be communicated to the Public Service Board, with a request that they will inquire into it under the provisions of section 51 of the Public Service Act.

J.L.W.

(for Under Secretary).

Approved.—W.H.-W., 26/3/1900. Urgent. The Secretary to the Public Service Board.—J.L.W. (for U.S.), B.C., 26/3/1900.

No. 9.

Public Service Board Inquiry.

At 10.30 a.m. on Friday, 25th May, 1900, Mr. J. S. Inch, Clerk, Registrar-General's Office, appeared before the Public Service Board to answer a charge formulated against him under section 51 of the Public Service Act.

Present:—Mr. C. DELOHERY, Member of the Public Service Board ; Mr. F. BRIDGES, Deputy-Member of the Public Service Board.

Mr. W. G. Hayes-Williams, Registrar-General, attended on behalf of his Department.

Mr. J. S. Inch was present on his own behalf.

Mr. E. G. Baker, Shorthand-writer to the Public Service Board, was sworn to faithfully take and transcribe the notes of the inquiry.

Mr. Delohery: You are formally summoned to appear before the Board, Mr. Inch, under section 51 of the Public Service Act, upon the following charge:—

“That you did, at interviews accorded you by the Board, on the 2nd and 8th November last on the subject of your salary and position, unjustifiably seek to advance your own interests and importance at the expense of the character and reputation of your superior officer, Mr. Noble.”

I want to ask you how you plead to that?

Mr. Inch: Do I understand this is the only charge?

Mr. Delohery: That is the charge as set out. I merely want to take your formal plea, and the inquiry will be held afterwards. It is not necessary to go into the evidence to-day, but at a later date.

Mr. Inch: Well, before replying to you in that way, I would like to address you.

Mr. Delohery: I first want to know your plea. This is merely a formal matter; afterwards, if you deny the charges, you can make any reference you like.

Mr. Inch: It has occurred to me, sir, that if you would withhold for a moment the making of this charge might save a very great deal of bother and a great deal of unpleasantness. My position is this, and I think the Registrar-General knows it: I have tried time after time to get before the Board in connection with my salary.

Mr. Delohery: We are not going into that at all. I merely want to know your reply to the charges preferred against you. Are they true or not?

Mr. Inch: Absolutely untrue.

Mr. Delohery: That is all I want. You can afterwards give any evidence you like about your salary when the inquiry is being held.

Mr. Inch: I would like you to restrain a certain person from taking part in the case, except when called upon to do so. I say there are certain persons whom I intend to call as witnesses, and whom I ask you to restrain from taking any part in the case. I want to call them as witnesses, and I take it they cannot officiate in the case if I do that; and in order to do that I want to supply their names now and I want them restrained from taking any part in the case other than in the capacity that I shall call them as witnesses.

Mr. Hayes-Williams: What does that mean?

Mr. Delohery: I understand you want to call Mr. Williams as a witness?

Mr. Inch: I do, sir.

Mr. Delohery: What evidence can he give?

Mr. Inch: I understand, according to the information laid by Mr. Williams, that these things occurred in November last.

Mr. Delohery: The interviews?

Mr. Inch: Yes. The charge distinctly limits my conduct to what occurred in November last.

Mr. Delohery: Yes, before this Board; you came here and made certain statements.

Mr. Inch: I did.

Mr. Delohery: That was the charge made against you—that you made these statements for certain purposes, and that they were untrue. What evidence can Mr. Williams possibly give?

Mr. Inch: I shall reveal that in due course. This is a very serious matter to me, and to many other people; that is why I ask you for a moment to withhold the making of this charge formally. I have given this case very careful consideration, and taken very good advice about it; and it seems to me that, in the interests of all parties concerned, that it would be very much better if the Board could have seen their way clear to resolve this into a conference in the presence of Mr. Williams and myself.

Mr. Delohery: We must act according to the law. There are certain charges made against you, and we shall have to hold an inquiry.

Mr. Inch: Well, I shall have to take the point that this information is improperly laid; it is so serious a matter for me.

Mr.

Mr. Hayes-Williams: Allow me, one moment. Mr. Inch has spoken of his desire to call me as a witness. It seems to me no improper thing, my representing the Justice Department, and at the same time being called as a witness; I cannot see any difficulty there.

Mr. Inch: I must admit that the Registrar-General cannot appear in two capacities at once.

Mr. Hayes-Williams: Well, it very frequently occurs in a court of law.

Mr. Inch: This is my position: I am a married man, and there are seven people dependent upon my salary.

Mr. Delohery: It does not matter whether you are married or not; we have to inquire into your conduct. I want to know what date will suit you?

Mr. Inch: I want your expression of opinion.

Mr. Delohery: I will not express an opinion.

Mr. Inch: Will you allow me to be represented by counsel?

Mr. Delohery: Yes, you can be represented. You may have a solicitor if you wish.

Mr. Hayes-Williams: I would like to make clear at once that the Department have nothing to do with Mr. Noble's appearance in the matter at all. I am simply here to endeavour to indicate a principle, and the individual rights or wrongs of the parties themselves have nothing to do with myself as representing the Department. Mr. Noble being involved, the Board might say that he should be represented.

Mr. Delohery: That can be dealt with afterwards, when we have arranged for the date.

Mr. Inch: Will you give me authority then to appear with the assistance of counsel or a solicitor?

Mr. Delohery: Yes. You understand you are asking for a solicitor. We need not grant this concession; it is because we consider it a very serious charge against you. It is no right; you ask for it, we grant it to you. Every assistance will be given you in this matter, so that you may thoroughly understand the charges preferred against you.

Mr. Inch: I understand the charge is merely a formal one. I told Mr. Williams I had already established a case which would justify the Board taking other action than this. I quite expected the Board to have called upon Mr. Noble to express himself rather than me.

Mr. Bridges: It is scarcely right for Mr. Inch to tell the Board what they should do.

Mr. Inch: I was merely expressing an opinion.

[Inquiry adjourned to Thursday, 7th June, 1900, at 10 a.m.]

THURSDAY, 31ST MAY, 1900, 10 A.M.

Mr. J. S. Inch, Clerk in the Registrar-General's Office, appeared before the Public Service Board, to answer a charge formulated against him under section 51 of the Public Service Act.

Present:—Mr. C. DELOHERY, Member of the Public Service Board; Mr. F. BRIDGES, Deputy-Member of the Public Service Board.

Mr. W. G. Hayes-Williams attended on behalf of his Department.

Mr. Cargill appeared to watch the case on behalf of the Crown.

Mr. J. S. Inch was represented by Mr. Garland, instructed by Mr. John Stinson.

After argument, the inquiry was adjourned until to-morrow, at 10 a.m.

FRIDAY, 1ST JUNE, 1900, 10 A.M.

All the parties being present, *Mr. Garland* states he is prepared to tender evidence to prove the truth of the matters contained in Mr. Inch's letter.

Mr. Hayes-Williams states that he is of opinion that Mr. Garland must first satisfy the Board that the statements made by Mr. Inch defamatory of Mr. Noble were essential or reasonably necessary to the presentation of his case to the Board.

Mr. Garland contends that Mr. Inch was justified in making the charges.

The Board are of opinion that the matters referred to are outside the scope of this inquiry, whereupon *Mr. Garland* states that he has no evidence to offer, and, therefore, withdraws.

The transcript and application for an interview from Mr. Inch are put in. It is agreed that Mr. Inch's evidence before the Coroner, as reported in the *Star*, and also his correction in a subsequent issue, be regarded as part of the case.

The Registrar-General to The Under Secretary of Justice.

Sir,

Registrar-General's Department, New South Wales,
Sydney, 4 June, 1900.

I have the honor to forward herewith a letter addressed by me to the Public Service Board in reference to the inquiry now proceeding upon the charge preferred against Mr. J. S. Inch, and to request that you will be good enough to have same forwarded to the Public Service Board as speedily as possible.

I have, &c.,

W. G. HAYES-WILLIAMS,
Registrar-General.

Forwarded to the Public Service Board.—G.M., 4/6/00. The Secretary, B.C.

The Registrar-General to The Public Service Board.

Registrar-General's Department, New South Wales,
Sydney, 4 June, 1900.

Gentlemen,

In reference to the inquiry now proceeding upon the charge preferred against Mr. J. S. Inch, an officer of this Department, and to the ruling of the Board of Inquiry that, before evidence of the truth of Mr. Inch's statements can be admitted, he must establish that they are essential or reasonably necessary to the presentation of his case at the interviews referred to in the charge, I have the honor to state that,
with

with a view to shortening the proceedings, I will be prepared on Tuesday next to admit that such of Mr. Inch's statements reflecting upon Mr. Noble as relate to the following matters may have a bearing upon the question of his position and salary, and that upon those statements he is at liberty to offer evidence, viz. :—

The alleged aberration of intellect, and consequent unreliability of Mr. Noble.

The allegation, direct or inferential, that Mr. Noble has made representations prejudicial to Mr. Inch.

The allegation, direct or inferential, that Mr. Noble has minimised Mr. Inch's duties or services to his (Mr. Inch's) prejudice.

The allegation, direct or inferential, that Mr. Noble improperly used intimidating language to Mr. Inch.

I have, &c.,

W. G. HAYES-WILLIAMS,
Registrar-General.

No. 10.

Public Service Inquiry.

At 10 a.m. on the 5th, 6th, 8th, and 11th days of June, 1900, Mr. J. S. Inch, Clerk, Registrar-General's Department, appeared before the Public Service Board to answer charges formulated against him under section 51 of the Public Service Act, and embodied in the submission paper produced and marked "S."

Present :—Mr. C. DELOHERY, Member of the Public Service Board ; Mr. F. Bridges, Deputy Member.

Mr. W. G. Hayes-Williams attended on behalf of his Department.

Mr. J. S. Inch was present, and represented by Mr. Garland, instructed by Mr. Stinson.

Mr. Cargill attended on behalf of the Crown.

Mr. Noble was also present.

This deponent, *James Stephen Inch*, on his oath saith as follows:—I am Clerk in Charge of Correspondence and Records in the Registrar-General's Department ; I have been eight and a half years in the public service ; I previously had about ten years' general commercial experience ; in the public service I have been clerk in the account branch, second and first assistant to the accountant, the latter position now being described as that of sub-accountant, and my present ; I have occupied my present position over three years ; when I first came in my present position I received £175, next year I received £225, and for two years £230 ; the Board attached a salary of £300 to the position ; the salary of the first assistant was fixed at £237 10s. ; Mr. Parry Long was head of the Department on my appointment ; he was Registrar-General at that time ; my duties when I was first appointed were practically the same as now, except that Mr. Noble up till that time had borne the greater portion of the responsibility of the position and its kindred work,—by kindred work I mean, for instance, the distribution and reading of letters after registration was performed by him before and for a fortnight after my appointment to the post ; Mr. Noble personally supervised appointment matters, and leave of absence matters, and matters concerning the appointment and changes in connection with the ministers of religion and the celebration of marriages ; after my appointment to this position, a great number of changes were made in the Department ; Mr. Long made an effort to deal with a certain class of officer in the Department whose presence he found was rendering it impossible for him to maintain discipline and even common safety in the control of his Department ; Mr. Long frequently consulted me on those matters ; shortly after I went into the branch, and up till the day of his death, Mr. Long's relations with me were most confidential, but more particularly from the date upon which Mr. Noble went on leave for a month in the early part of 1897 ; that was the first leave Mr. Noble took after my appointment to the branch ; some ten years ago, some frauds took place in the Department ; after those frauds the then Registrar-General was retired ; Mr. Pinhey was then appointed ; during his term of office a case, known as Campbell's case, came before the Court, in which the Chief Justice made some very strong comments ; in consequence of those remarks, Mr. District Court Judge Fitzhardinge was appointed a Royal Commission, and made a report, in which he made some stringent comments on the working of the office ; when the Public Service Board came into existence, Mr. Pinhey was retired and Mr. Parry Long appointed ; in reference to my remarks in regard to the letter, I said there were certain officers with whom he proposed to deal, and he complained bitterly in connection therewith to me that Mr. Pinhey had not, immediately after the exposure in connection with the Hiddleston frauds, performed the duty for which he, Mr. Long, considered that Mr. Pinhey had been expressly appointed, viz., to sweep the office of all who had any connection with such frauds, or might have been held responsible by their long continuance, under the immediate observation of such officers ; Mr. Long told me that all through the office impecunious officers were connected with each other by indorsement and cross-indorsements in connection with financial obligations ; I mean mutual backing of bills ; I have read the allegations against me ; with regard to the first, referring to Mr. Noble's alleged aberration of intellect, I wish to state that in 1894, when Mr. Noble was in charge of the Births, Deaths, and Marriages Branch, he was very ill, and procured leave of absence for three months on a medical certificate, which I have not seen ; but I saw three letters from Mr. Noble, written about that time, to Mr. Pinhey, the Registrar-General, in which he referred to the fact that his head had completely given way ; I know that before that, while he was accountant, he told me that he was under Dr. Scot-Skirving, who said that he would lose his intellect altogether unless he took extended rest ; Mr. Noble was absent on sundry occasions during Mr. Long's term of office without application or medical certificate, the last occasion the month before Mr. Long died ; Mr. Long told me in connection with that case that it was the old head trouble, which he had seen coming on ; I understand that in connection with that absence Mr. Noble went under a small operation, an officer of the Department informed me ; Mr. McDermott gave me certain information ; just before Mr. Long's death the whole of Mr. Noble's attention was concentrated on the Wright case, and in connection with other business Mr. Noble was quite incoherent both in his notes and conversation ; this was a matter of general comment at the time ; in connection with the Wright case, when Mr. Wright's letter was handed in, I opened it ; that was about ten days before Mr. Long's death ; after having registered it, I took it into Mr. Long's room, and handed it to Mr. Noble in his presence ; he handed it to Mr. Long in turn ; when Mr. Long had read it, he turned to Mr. Noble and said, " Oh, why did you say such a thing ? " to which Mr. Noble replied, " This officer must be dismissed this time ; " then Mr. Noble

commenced to write a memorandum with a view to Mr. Wright's dismissal ; this was written and re-written day after day, until I think it was the Saturday morning before Mr. Long's death ; I was then in the Registrar-General's room, Mr. Packham was present, and Mr. Noble brought in a draft memorandum in connection with Wright ; Mr. Long was dictating to me in connection with a large property case which was then absorbing all his attention, and Mr. Noble begged his attention to the draft memorandum, and commenced reading it ; seeing that Mr. Long was quite unable or unwilling to attend to the matter, Mr. Noble left the room with the papers ; during this time Mr. Noble's attention was so absorbed with this memorandum that he did scarcely anything else ; it was not possible for me to obtain his serious attention to anything else ; he told me to put Mr. Long's work aside in connection with the property case (McDonald's case), and attend to his work in connection with the memorandum, which was of more importance ; on the other hand, Mr. Long insisted upon everything else being put aside for the McDonald case, demanding also a great deal of my personal time and attention in that connection ; Mr. Long died on Tuesday, the 27th September ; on the Monday Mr. Packham and I waited on Mr. Noble, as the highest official in the office next to Mr. Long, and begged him to take some action with regard to Mr. Long, who was apparently suffering from mental strain ; this was on the 26th ; Mr. Noble appeared to be quite unable to appreciate the situation, and said he could do nothing as long as Mr. Long was so suspicious of him ; on the 27th Mr. Noble was still engaged in revising the Wright memo., and at lunch time, when Mr. Long walked into his room, after calling to me, he was still engaged in the revision of the memo. ; about half-past 3 Mr. Long's door was opened with Mr. Noble's key, and his body discovered ; after sending for the doctor, I went to Mr. Noble's room, and he and Mr. McDermott were together ; I said, "Come quickly," and they both followed me into Mr. Long's room ; upon entering the room, Mr. Noble glanced in the direction of the body, and immediately became hysterical ; he caught his hair with his hands, and put his arms up, and rolled on the table ; he afterwards got up, and ran to and fro in the room, sobbing and saying different things ; he said, "If we could only have anticipated it" ; he frequently used the word, "Oh, oh," and was incoherent ; I sent for Mr. Packham ; he came in, and Mr. Noble rushed to him and embraced him ; he began to sob and behave most hysterically again ; Mr. Noble left the room and rang up Mr. Barling ; Mr. Miller came over ; Mr. Noble had calmed down then ; he, however, resumed his hysterical demeanour, in a somewhat diminished form in Mr. Long's room ; two hours afterwards he seemed quite himself again ; I was in my room with Landers and a clerk in the office of Mr. Evans, the solicitor, about 7 p.m. the same evening, and Mr. Noble came in quite happy ; his mood was entirely changed ; he made some remark to the effect that it was a good job he did not discover the body ; I said, "Why, Mr. Noble?" ; he said, "Being next in seniority they might have said it was me" ; the next day I gave evidence at the inquest ; the *Star* of the 28th gives my evidence almost verbatim ; the evidence I gave was absolutely correct ; in the *Star* of the 29th September a statement appeared ; I had a conversation with Mr. Noble about that ; he had been speaking to me on the morning of the 29th, and accused me of giving evidence to injure him ; he stated that Mr. Barling, the Chairman of the Board, had sent for him and directed him to correct it in the public press, after he had stated to Mr. Barling that I referred solely to the Bucknell protest case, and that he Mr. Noble, following Mr. Barling's direction, had given a reporter the corrective statement which would appear that day ; I made no reply to that except that, as there was an inquiry pending, I did not feel at liberty to discuss the matter ; the same afternoon I was at Mr. Long's house in the drawing-room, after the conversation ; I saw Mr. Noble approach Mr. Barling and say that it would appear that afternoon, or words to that effect ; last July, Mr. Noble and I had another conversation about the paragraph ; he said that for three months after Mr. Long's death he had been suffering from a pain in the head which made him forget things, and he was afraid to look ridiculous in the eyes of other people ; he mentioned that he had at times sent for the shorthand-writer, and been quite unable within an hour to give her a short memorandum ; he said he was unable to do so for an hour ; he said he had been practically told to insert the paragraph by Mr. Barling ; I made no reference to any inquiry in my evidence ; when I said he was worried over official matters I referred to the relations which existed between Mr. Long and Mr. Noble and the heads of branches ; when Mr. Noble went away for his first leave after his appointment as Chief Clerk, Mr. Long, told me, on the first morning of Mr. Noble's absence, that he had not received from me all he should have received in the way of business, in short he blamed me for suppressing from him matters which should have been dealt with by either him or Mr. Noble ; I refer to general business ; I assured him that I had sent him all the matters which would have gone to Mr. Noble had he been in the office ; Mr. Long was not satisfied about this, and went to my clerk's room and asked him certain things ; Mr. Long distrusted Mr. Noble after that ; if there was anything important on, as a deputation or anything of that sort, Mr. Long would procure my presence instead of Mr. Noble's ; from that time Mr. Long put more work on to me which should have belonged to the senior position, this was so apparent that one officer, Mr. Button, charged Mr. Long with allowing me to run the office ; Mr. Long was not in accord with the Examiner of Titles, and the case of McDonald's gave Mr. Long a great deal of worry ; the unimportant official inquiry was the Button protest ; I did not refer to it ; after the 29th September Mr. Noble's behaviour was unaccountable, his actions were not consecutive ; I put some letters before him for signature while he was acting as Registrar-General ; I produce one ; Mr. Noble put his pencil down it and said it was incorrect, and that there should be two letters, and asked me to consult Mr. Lewis about the matter ; I did so by memo. which appears on the back of the letter, and finding Mr. Lewis satisfied with the letter, I withdrew the spoilt copy and had it rewritten, and signed by Mr. Noble ; he signed it without comment the day after ; while he was still acting Registrar-General I placed the Chatswood papers before him in reference to the appointment of the District Registrar, with a minute for the appointment of Mrs. Ford ; I produce the minute upon which all the corrections are in Mr. Noble handwriting ; I produce another minute in which the alterations are in Mr. Noble's writing ; I used to detach the drafts from the papers and place them in a drawer ; when I heard the inquiry was coming on I took them out of the drawer and now produce them ; I produce also a draft dictated by Mr. Noble, the alterations in which are in his writing ; I also produce another memo. in Mr. Noble's writing ; Mr. Noble held the position of Acting Registrar-General for about a fortnight ; Mr. Noble acted as Chief Clerk for almost twelve months after Mr. Hayes-Williams' appointment ; after that he was absent continuously for five months ; when he came back I got leave of absence ; when Mr. Hayes-Williams became Registrar-General he called for reports from the officers on the working of the office. He had called upon me to do so some days previously. I produce a copy of that report ; it is the draft ; shortly after Mr. Williams took office the changes made in my duties

were

Exhibit A.

Exhibit B.

Exhibit C.

Exhibit D.

Exhibit E.

Exhibit F.

were very slight, the higher duties of my position were confirmed to me; I produce a memo. confirming the report; Mr. Noble had been the submitting officer for the whole Department in connection with general business, but Mr. Hayes-Williams directed that his branches should be self-contained, and the head of branches responsible to him direct, instead of through Mr. Noble, as heretofore; under this arrangement I had power to grant short leave of absence to the members of my own staff; to the extent of half a day—a power which had previously not been enjoyed by the deputies; I had interviews with Mr. Williams, in which I placed certain facts before him; I was several times recommended for an increase of salary; in 1899 I lodged an appeal against the decision of the Board; I saw a press copy of a memo. with reference to certain questions in the House, and I took it that the latter part of it referred to me, namely, that I was the officer who supplied the information; in my letter to the Board I referred to that part of the memo.; the Board then granted me an interview, and I put in a memo. everything I intended to say; no intimation was given me that the inquiry was to be confined to my application for increased salary, and I was under the impression that it referred also to the other matters referred to in my letter. With regard to charge 3, I rely upon my statement as to my work in page 45 of the transcript. In reference to charge 4, I may say that in a conversation which took place after Mr. Long's funeral, Mr. Noble said that unless I was prepared to remain absolutely quiet I might find myself out of my position, and that Mr. Wilson had made the remark to him the previous day that he was very sorry for me. He said that Mr. Wilson had indicated that I had no prospects left.

To Mr. Hayes-Williams: I have given my case a lot of thought, and the conversations referred to are well impressed on my mind; I repeat now that the statement in the transcript, page 36, that I went with Mr. Packham into Mr. Noble's room, and we urged Mr. Noble to take some action—either to put somebody incessantly into the room with him, or to make representations to the authorities. Mr. Packham more particularly urged Mr. Noble to take this action; I retired from the room when this particular thing was referred to, because I knew it was going to have reference to myself. I was not in the room when the definite proposition was placed before Mr. Noble by Mr. Packham; the only proposition made while I was in the room was that some action should be taken; we explained our affection for Mr. Long, and that something should be done; and because we had observed Mr. Long's condition; I then retired; I do not know what occurred between Mr. Packham and Mr. Noble afterwards, except by what I was told; Mr. Noble said to me, "I cannot do anything, as Mr. Long is so suspicious of me"; Mr. Packham was not then present; it is correct, as the transcript states, that Mr. Noble made that statement to us; I call it a remarkable answer in the light of the way it developed; it is correct to say that we urged him to put some one incessantly in the room with him, or to make some representation to the authorities; I keep a diary in reference mostly to private matters; my present diary contains reference to office business; last year I kept one, but it related almost wholly to private business; I made very few official notes in it, if any; I made notes of incidents that occurred in the office; occasionally, Mr. Noble's name appeared in them; some of them referring to Mr. Noble were of a complimentary character; they could not be called a record, complete or incomplete, of Mr. Noble's incapacity as an official; I made a memo. on the 10th July, of Mr. Noble's statement to me about his head trouble; my object in making that note was that as I had addressed the Registrar-General several times about my salary, and the publication of the paragraph in the *Star*, and the opinion said to be held by the Public Service Board with regard to me and my prospects and received from him a confirmation of Mr. Noble's statement of the Board's attitude to me, I had addressed the Registrar-General and received a promise from him to obtain for me a satisfactory transfer to some other department in the Public Service; after a lapse of some months the Registrar-General told me that he had been unable to effect his purpose; on the 15th June I addressed a memo. to the Registrar-General, of which I produce a copy; I made the note for my own protection in connection with my personal case; I made several other notes, in reference to Mr. Noble; I also got together any papers relating to the supposed prejudice in my case; I made notes for my own protection from the time I supposed my position was threatened; I did that from the time of Mr. Noble's declaration that my prospects had been blocked through the evidence I gave at the inquest; I do not think I did so prior to that; I became aware of Mr. Noble's leave in 1894 or 1895, because I was a member of his staff just before that time; I never saw the official papers in that matter until I handed them to you; I had a search made for them at that time, owing to an invitation from you to discuss the whole situation of the office; those papers would bear on that matter in relation to the report I submitted to you after the discussion, in this way, that you had asked me what desirable reforms were necessary in my opinion, and I expressed my opinion in that report; I did not proffer certain information; you invited me; I was in your room about some matter on or before the 26th October, 1898, when you expressed a wish to speak to me about another matter, and went over and locked the door; you commenced that conversation rather unpleasantly, so far as I was concerned, but after something over an hour the interview terminated upon the understanding that I should submit a report, which I did the following day; you had permitted me to procure some papers before the commencement of the interview. This (the papers relating to the leave) was amongst them; the reason of the leave was a matter of common knowledge in the Department; I never saw the papers in the Chief Secretary's Office, and I only know their contents from what Mr. Noble said; the papers consisted of three letters in Mr. Noble's writing, one or two office memos., and reference to the original papers; the three private letters were attached to the papers; I placed them upon sheets of foolscap and re-attached them to the papers; they did not appear to me to be private letters; I found them with the official papers; letters shown me are those referred to; letters dated 28/2/95, commencing "Dear Mr. Pinhey," 4/2/95, commencing in the same way, are the letters I referred to before the Board, as per transcript, page 9; I considered I was justified in using those letters in my own case, only as regards the removal of prejudice; I made other memos. besides those I spoke of; I made them for use for the purpose of the removal of prejudice; the drafts I produced to-day remained in my drawer until comparatively recently, about the middle of last year; they are not the papers I had in my hand when I went over to the Justice Department; I have shown them to my solicitor, and to no one else collectively; my clerks saw some of them separately, in connection with the papers; I have shown them to no one but officers; I know Mr. Walter Thompson, a solicitor; I first met him in his father's house, I think about the time of your appointment; I do not think I met him before or even knew him by sight; I do not think I produced certain office memoranda showing Mr. Noble's incompetency; I have no recollection that I told him on the first occasion I met him that I believed or knew that Mr. Noble was mad; I never said I believed he had
shot

shot Mr. Long ; I never used words that would raise that inference ; I do not think I flourished in my hand a bundle of official papers ; I do not recollect offering to show him some papers ; I do not think I said I was doing Mr. Noble's work ; I have no recollection of discussing Mr. Noble with him in any way ; I have no recollection of saying that I thought I ought to be chief clerk ; I do not think I ever said I was doing Mr. Noble's work except when he was away ; I have made the remark that one of us would have to go, on more than one occasion ; that remark was made more particularly as a result of the alterations you had made ; I did not think I was competent to be chief clerk ; I recommended the office should be abolished in 1898 ; after you had made your re-arrangements in the Department, Mr. Noble sought to recover from me certain of the duties which had once been performed by him, and I had protested to you, and matters remained as they were ; but under the new arrangement there was only work for one competent man in the two positions ; I did not feel that I was that man, as I placed myself entirely in your hands for transfer ; in reference to the questions asked in the House, I did not formulate 1, 2, and 3, and I did not suggest then nor did I furnish the information on which they were based ; I admitted I was indirectly responsible for them ; I admit I might have been indirectly responsible for question 7 ; I mean by being indirectly responsible by saying that every one in the office had seen the press paragraph, and all knew that I had written to the Minister for permission to take proceedings, and, in view of the official publicity given the day before by the *Star* paragraph, I discussed the matter quite freely both in and out of the office ; at least a dozen persons in the Department must have been aware that two cheques were drawn for one amount ; I only heard of it second-hand myself ; I know Mr. Rossiter ; I have referred to him as a friend of mine ; I would not say he is a personal friend ; I did not discuss Mr. Noble more with him than with other officers ; I have discussed Mr. Noble with other officers, or they with me, in reference to more unpleasant things attributed to Mr. Noble by other officers ; the reference came from them ; Mr. Gilham was one of those officers ; he has stated that he intimated to the Board that had Mr. Long not died when he did the office would have been ruined by Mr. Noble and his methods ; I heard Mr. McDermott, in the presence of a number of officers, say that it would be a positive calamity if he (Mr. Noble) were made Registrar-General ; Mr. Keele read me several pages of notes referring to Mr. Noble, upon which he was going to base a reply to the Registrar-General's invitation of the 31st October, 1898 ; a number of officers had appealed to the Registrar-General in 1897, and a series of questions were asked in the House by Mr. McGowen in connection therewith ; some of these officers had freely expressed themselves about the untruth and deception to which they had been subjected ; I consider the allegations they made were more serious than any allegation of aberration of intellect ; I have often heard officers charge Mr. Noble with being unscrupulous and revengeful ; I suppose there were no two officers in the department who did not discuss these matters ; I believe that Mr. Rossiter is a friend of Mr. Griffith, M.L.A. ; I asked permission to approach the Board previous to the interview ; I did so by means of a letter to the head of my Department in the form of an appeal ; the memo. of the 27th is not a direct request ; that is not the one I refer to ; I consider that the memo. of 27th February, 1899, is a request to have my case referred to the Board ; prior to that date I made no such request to you ; by my remark on page 18 I meant that the only way I could reach the Board was by an appeal against my grading, and so long as I believed, as I did believe for months after your appointment, that you were specially empowered to attend to salary matters, more especially in view of the arrangement which existed between us about my personal case, I could not possibly have access to the Board apart from you ; my arrangement with you was that you told me you had a thorough understanding with the authorities, and, further, that you wished for a legal shorthand-writer in my position, and asked me if I would not mind taking any action, but leaving the matter of a transfer to another position with as good, if not better, prospects than the one I then occupied ; I am quite sure that accurately represents what passed between us ; I did not for some time after your appointment assume an antagonistic attitude towards Mr. Noble ; I was reprimanded on one occasion, but so unjustly that you, upon my subsequent representations, tore up your reprimand in my presence ; that was not done at my request ; I did, at the suggestion of yourself, put in a formal withdrawal whereupon you destroyed the minute ; when I came to the Board I had your assurance that you had not reported on the suggestion of your predecessor with regard to the increments ; I was under the impression that something had been said by you, but that formal report had not been sent in ; that is how I explain the last part of the concluding answer on page 3 ; at the time I was in the Account Branch there was an accountant ; some time after I left the branch, Mr. Young was appointed to the title which had been denied to me ; I occupied the second position in the Account Branch ; the present accountant is relieved for a great portion of the day of the Account Branch work, but he is still actually accountant ; I am not aware that for some time prior, and ever since your appointment, he has performed none of the duties of the Account Branch, except in the absence of the sub-accountant ; I know the sub-accountant performs a great many of the duties that were performed by the accountant in my time ; I still assert that my position was similar, as regards duties, to that now performed by the officer known as the sub-accountant ; I had nothing approaching a quarrel with Mr. Noble in reference to the *Star* paragraph ; he spoke rather hotly, but I said nothing ; I had no ill-feeling towards him ; I was about 6 feet from Mr. Barling when Mr. Noble spoke to him on the day of the funeral, and I overheard the remark ; Mr. Long was not in the habit of receiving deputations to any extent ; when I referred to that in my evidence I had in my mind particularly the Dunn case ; it was over the question of the registration of a marriage, and there was a lot involved in it ; at that time I had charge of the work in connection with the registration of ministers ; Mr. Dunn, the Minister, was off the list, and the question was whether we should place him on the list or not, when certain of the public were supposed to be clamouring for proceedings to be taken against him ; he was a Presbyterian minister ; the deputation consisted of clergymen ; my age is 32 ; I was about 23½ years when I entered the Department ; my commercial experience dates from May, 1881 ; I was then 13 or 14 ; I went to the Department of Justice to ask advice as to whether, under the circumstances of Mr. Long's death and Mr. Noble's condition, I was responsible and should take any action ; at that time I had foreseen the calamity which did happen and could see that there would probably be a serious mishap in the future ; I anticipated something from Mr. Long's condition of mind.

Taken and sworn before us at Sydney, }

JAMES S. INCH.

C. DELOHERY, Chairman.

This

This deponent, *James Stephen Inch*, recalled on his oath, saith as follows :—

To Mr. Hayes-Williams: I went to the Justice Department to get advice as to whether I was responsible or not; I did indicate to the chief clerk, Mr. Williams, generally that there was something wrong; I gave the matter consideration before going there; it did not occur to me that there were other officers in the absence of Mr. Noble who were entitled to take full responsibility; Mr. Gilham has been in the Department about thirty years; he is Deputy Registrar-General, Deeds Branch; Mr. Keele, the Deputy Lands Titles Branch Registrar, had been there over twenty years; they are above me in a way; Mr. Gilham consulted me in the matter; on the night of Mr. Long's death he came to me and asked me if there was anything he could do in connection with the matter as it was then; on the day I went to the Justice Department I considered Mr. Noble was in a condition that would not justify any added responsibility being put upon him; I had reason to think that he was off his head intermittently, from the first day I knew him in 1891; on page 8 I mentioned Mr. Noble's condition of mind, and I mean by that he was very erratic and unable to concentrate his attention; my expression on page 8 that the minds of both these gentlemen were unhinged is rather more strong than I intended; quite a number of officers and others not employed in the Department commented upon Mr. Noble's mind; my own staff did so; Bayliss and Landers, of my staff, both did so; I am not prepared to name any others, nor any members of the public; the rush of work referred to on page 9 may have been partly caused by the absence of Miss Thompson and Bayliss; I had only one permanent officer left on my staff, Mr. Landers, who was registration clerk at £95 a year; from that cause alone we would have to be going at pressure; when I say that the work of the office was practically all in my hands at that time, I mean the departmental and correspondence matters; in saying I had to attend to the office work as well, it is merely a repetition; apart from the McDonald and Wright cases, there was [quite the usual amount of work; I was going at tremendous pressure all the time; I did remain after hours on occasions, I believe; I am very punctual in my attendance; it was not usual to consult heads of branches, except where they were expressly concerned; the Registrar-General, Mr. Noble, and myself were the three staff officers of the Department, and it was between us three that departmental business was transacted; I mentioned the matter in the way it appears in the transcript to illustrate how my responsibility would occur while apparently senior officers were in the Department; the entire absorption of the attention of Mr. Long and Mr. Noble upon the cases which caused them respectively such intense anxiety is the situation to which I refer on page 9 of the transcript, adding to that the fact that I considered their minds were irresponsible; Mr. Noble did scarcely any work during this period beyond the Wright case; I became aware of that because I was very frequently with him, and most of the work he would do would come through my hands; Mr. Long at times during that period interviewed the public and attended to office matters in a perfectly natural manner; the McDonald case was a complicated title matter; I wrote all the letters in the case; Mr. Long indicated to me what I should write; I assisted in the preparation of the schedules, the checking of documents, and the arrangement of interviews, and in negotiations with the Justice Department; I was over there twice; I took the papers over and obeyed the instructions of Mr. Long to arrange to have them placed before the Crown Solicitor; I did not do anything in the matter that a confidential clerk could not have done; the responsibility lasted from about a fortnight before and until I was relieved by the inquest; I did not consider my responsibility ended when the inquest was concluded; my solicitor advised me to approach the Justice Department again; on page 11 I said I knew Mr. Noble's state of mind; I mean by that that I knew he was exceedingly unwell and unreliable; Mr. Noble preceded me into the room, when I said to him, "Come quickly"; I pushed the door open for him; the body was lying to the back of the door, which opened inwards; on page 12 I mean by saying, "Of course, I was watching these things very closely," that I was in presence of a calamity; I had no reason to be suspicious of Mr. Noble at that time; I was not excited; I was never cooler in my life; as cool as I am in my ordinary office business; I am not likely to be mistaken as to anything that occurred; I am quite sure of that; on page 12 I say that Mr. Noble came bursting in in rather a merry sort of mood; I do not say he spoke in a flippant sort of way; I mean that he was in excellent spirits; on page 13 with regard to the way the revolver was held, I wished to infer that some person with a definite motive had given that information; I read the evidence taken at the inquest; I do not remember Constable Scott stating that the stock of the revolver was grasped with the thumb and forefinger; the report referred to on page 13 was published before the inquest; I saw the *Evening News* report of the evidence; on page 13 I refer to Mr. Noble calling a meeting to show some respect for Mr. Long; in making the statement which follows I was not expressing simply my own feeling, it was conveyed to me by others; Mr. Long was not popular with his officers; the objection taken by the officers might have been caused by that fact as well as a thought or feeling that it was intended to use it for some object not disclosed; on page 13 the expression "All these things," I presume I am referring to the notice in the papers, Mr. Noble's interview with Mr. Barling and the contemplated result of the meeting; the interpretation that I put on these things, that Mr. Noble was seeking to hush up an inquiry; I am under the impression that that opinion was fairly general amongst the heads of the branches; on page 14 I think in referring to the responsibility upon me I had in my mind in addition to the time immediately preceding Mr. Long's death, the various times when Mr. Noble was absent from the office on the Lands Tax inquiry; that responsibility only continued after the date of your appointment until the time I had the interview with you. I felt that my responsibility continued, despite my solicitor's advice, until I had unburdened myself to you; Mr. Barling read a statement to me on page 16 with regard to the reply of the Minister to question 2 in the House; I had never seen or heard of the statement before the interview of the 2nd November; my remark in reference to Mr. Barling's statement read to me is quite in order; I did not wish to infer that Mr. Noble had given the information upon which the questions were based; certainly as regards a great portion of them I have read the questions and consider them to some extent an attack upon him; I wished the Board to infer that Mr. Noble had permitted the information to escape, not that he had supplied it for a definite purpose; on page 18 "the other representations" referred to are the statement in the *Star*, and the report; the statement published in the *Star*, and the statement to the Board which preceded its publication; where I use the expression "misrepresentations," and at the top and towards the end of page 18 I refer to the paragraph published in the *Star*, and Mr. Noble's statements to the Board which preceded it; also the report of Mr. Noble of the 20th October; as far as I know I was the only officer afforded an opportunity to report under the circumstance I refer to here; it would surprise me to hear that all the heads of branches were invited to report at the same time; I am aware that a few days after

after a circular was issued to all heads of branches calling for suggestions and reports ; there are ten heads of branches ; there are about 100 officers in the Department ; I have no idea how many responded to that circular ; I do not think that circular is one that would obtain a candid expression of opinion from all the officers ; in some cases it might have been that if Mr. Noble's conduct had been unscrupulous or outrageous in some cases the circular would have brought it out, but not in others ; I should think it highly probable there would be complaints against him ; I should be surprised to know that out of forty-nine responses to that circular only one reflected upon Mr. Noble ; I considered that Mr. Noble had assumed the functions of the Public Service Board, and that that was the cause of almost all the dissatisfaction in the Department ; the report of the 27th October, 1898, covers a large amount of ground, and contains suggestions as to all branches of the Department ; my expression that I considered the suggestions imperative in the interest of the Department were from my personal knowledge of the working of the Department ; if other officers made reports practically containing the same suggestions I should say it would confirm my good judgment ; I had had about seven years' experience in the Department at that time ; I have not been confined to two branches ; I have done special work in addition to the two branches ; I was with Mr. Pinhey in the Fitzhardinge Commission ; I wrote the whole of his report partly at his dictation, and some of the figures I had to work up for him ; in addition to that I am in my present position necessarily conversant with most of the business of the Department ; I am aware Mr. Noble has been in the service over twenty years ; one of my suggestions was that the position of Chief Clerk and Deputy Registrar-General be abolished ; Mr. Noble's position ranks next to that of Registrar-General ; I have some knowledge of the nature of the duties performed by the search clerk and consider them very important ; experience would be the sole factor in determining their value ; I know the length of Mr. Hatton's service prior to his death ; I think he performed the work of search clerk for about fifteen years, but am not certain ; there was a break in his service and I am probably confused about it ; I knew that he was contemplating retiring from his position ; he had addressed me in connection with the probable amount of pension he would receive ; I suggested that the suspension should be at once removed from Mr. Wright, and you wrote a minute with regard to this matter immediately after interviewing me on the subject ; I am strongly of opinion that you acted on my advice ; the impression that you had acted on my suggestion that led me to make the remark at the head of the second page 55 of the transcript ; the minute was written immediately after the interview with you ; I refer to minute indorsed on Msc. Paper 98/2,181 ; I still say that I was under the impression that I had influenced the course taken in Mr. Wright's case by my representations ; at the date of the minute I was aware that certain officers in the Births, Deaths, and Marriages Branch were proposed to be transferred to the Statistician's Department ; I did not discuss with Mr. Rossiter certain alterations in the Births, Deaths, and Marriages Branch before I made my report ; I am not aware that Mr. Ridley, the head of the branch, regards Mr. Elyard as a very valuable officer ; Mr. Elyard has the longest experience in the Department ; I think of over thirty years ; he also approached me with reference to the amount of pension he would receive upon retirement ; he asked me to work it up to see what he would be entitled to ; I also suggested that Mr. Codrington was quite incapable of earning his salary, and should be retired ; he also had expressed a desire to be retired ; they were both my senior officers, as regards salary and service, but they had no rank with me as head of a branch ; I take the view that my position as head of a branch carried larger responsibility than that of the registration clerk in the Lands Titles Office ; I take it that my position was superior to that of any clerk not in charge of a branch ; when I made the suggestion that these officers should be retired, it was partly in view of the fact they had intimated to me that they wished to be retired ; I am aware of Mr. Spark's qualification, and know he is a licensed surveyor ; I knew he was an officer of long service, and that he had for many years occupied the senior position next to the Chief Draftsman in the Draftsmen's Branch, and from which he has been degraded ; he was removed by false representations ; I consider it a degradation to be removed from being second in the Draftsmen's Branch to be Superintendent of Engrossers ; the position of chief of a branch is not always superior in a material sense ; all I know about company law is what I gathered from the correspondence ; I know it is an intricate branch of the law ; I would not expect to pick up a knowledge of it from correspondence, but I had to correctly express it from memos. which were not always consecutive ; I know that Mr. Gilham regards Mr. Forsythe as a very smart and efficient officer ; I made the suggestion about him not with a view to condemn him, but I considered he had not sufficient capacity for the position, as he was not class enough ; I understood that Mr. Napier and Mr. Rossiter had been in charge under Mr. Gilham ; my reference to fees on Real Property Act applications are in reference to the financial aspect of the question only ; I have a general knowledge of certain things under the Act, having been writing and reading correspondence under the Act for the past three years ; my remark that "the weakest branch in the Department just now is the Lands Titles Branch," was having regard to the personnel of the staff ; as regards the working of the Births, Deaths, and Marriages Branch, I received and read the whole of their correspondence, and for a considerable time wrote all the letters in connection with that branch ; for the past three years I have had to keep the records, and attend to the appointments concerning all the district registrars in the colony, some 250, and all the ministers registered in connection with the celebration of marriages, and have been consulted or concerned about almost every important action taken in the branch—by Mr. Long, by Mr. Noble, by Mr. Ridley, and by the staff generally, and also by you, who have during the current year made three separate proposals to me about joining that staff ; on two of those occasions you undertook to make substantial recommendations in my favour, in the event of my acceptance ; that is my reply to your question as to what experience I had of the Branch ; my remark with reference to the illegibility of some of the register books is in regard to the Lands Titles Branch ; I do assert now that maladministration had obtained in the Department ; I refer, amongst other things, to the frequency with which he changed the officers in the Department without regard to the Public Service Act ; I do assert that Mr. Noble did frequently make changes, without reference to the Board ; I intended the sentence "against this, I respectfully submit, the officer who was so largely responsible for maladministration which had obtained in this Department," I evidently intended as a contrast to the former paragraph of my letter ; in reference to the statement in my letter that Mr. Noble had been deprived of almost all the legitimate appurtenances to his position, except that of full pay, refers to the alteration of the system of allowing the Chief Clerk to be the intermediary between heads of branches and the Registrar-General, which is practically all the change that was made, power of granting leave of absence, short leave, that is, of periods not exceeding half a day ; I did not make that statement,

meaning

meaning that Mr. Noble had been degraded from his position ; a man might be left in a position with no duties, and yet not be degraded ; I do not say that Mr. Noble suffered from some head trouble three months after Mr. Long's death ; I gave that as his statement ; I do not think he was quite well all the time ; there were one or two noteworthy things which happened, I think, within this period ; on the first occasion Mr. Noble got me in his room, and locked the door ; I was in his room, and the door was locked ; he got into a tremendous passion, and fairly hissed at me, across the table, using the words, " You hate me, you hate me " ; on the second occasion he had seen Mr. Baylis speaking to me, and afterwards he sent for me, and Mr. Bayliss informs me that he closed the door and asked him, without any introductory remarks, " What have you got against me ? " ; there was also the manner in which he signed correspondence ; he used to sign in four or five lines, *e.g.*, he would sign, " W. G. Hayes-Williams, Registrar-General, per H. J. Noble, Deputy Registrar-General " ; these are all matters within my knowledge ; I am under the impression that other people saw that he was not well, and that the public avoided him ; that impression probably led me to add to my letter to the Board, " a fact which no fellow-officer, having even only intermittent contact with him, would doubt " ; I cannot specify any fellow-officer who had the same impression as myself, so long a time having elapsed since the period referred to ; about a year had elapsed when I addressed my letter to the Board ; on page 21, where I say, " I asked Mr. Williams to go through the whole case with me, and he would not do it, " I think I was referring to the fact that when he first interviewed me upon his appointment, I proposed to call witnesses before him which he said he could not allow, limiting me, therefore, to what I could personally say ; there is a considerable omission from the transcript at foot of page 20 ; when I said that you (the Registrar-General) knew what I told the Board a year previously, I was under the impression that you had singled me out ; I meant the Board to infer from my next remark that you sent for me within a few days after your appointment ; the only reason I knew of why you had sent for me was because I had given the evidence that was objected to ; on page 21 I used the expression, " I was not in possession of the whole of the facts on the day of the inquest " ; I mean I was in possession of facts that I considered grave, but that did not relate to the death of Mr. Long ; I put before the barrister I consulted the case generally, and showed him the press paragraph, and told him about the condition of Mr. Noble and of Mr. Long during the previous few days, and what there was at that time to tell ; I probably produced some of the draft minutes that are in evidence, and, on the strength of my statement to him, he seemed to be very much startled, more especially when I told him that Mr. Noble was at that time passing titles under the Real Property Act with no examiner present ; the occurrence of the word " also, " in paragraph on page 25, stating that Mr. Noble used intimidating language is probably accidental ; I assert, positively, that reference to Mr. Wilson is correct ; the remark, " I am sorry for you, as you are sure to get into trouble, " are not the words used by Mr. Noble, I am positive ; In face of the remarks on page 26, I did believe that Mr. Noble had prejudiced me with the Board, and do still believe so ; my reason for still believing it is that I have never been properly described in the Public Service List ; I mean that I am described as a clerk instead of a clerk in charge ; I did not intend, in my remark, to convey the idea that all public servants had a duty to give information to the Board ; lower down I refer to the staff working overtime ; the staff was six in number ; there are now two officers less and one is a shorthand-writer, and the other is a type-writer, and was before ; there are four now ; very soon after I took charge we ceased to copy the letters for the Patents Office ; this was in order to permit me to take on added responsibilities ; my relations with Mr. Noble were such, he always spoke well of me up to the time referred to by Mr. Barling ; I do not consider Mr. Noble unscrupulous ; any wrong that I consider him to have been guilty of I attribute to some mental defect ; the papers upon which the memo. in pencil, mentioned on page 34, went through the usual course to Mr. Noble, who, in the presence of a junior officer of my branch, drew my attention to a sheet of paper with some pencil notes on it ; he said, " This is Mr. Barling's handwriting, I had a chat with him about you the other day, and mentioned to him what is stated here " ; quite a number of other officers were interviewed that day by Mr. Noble in connection with these same papers.

Mr. Bayliss.

JAMES S. INCH,

C. DELOHERY, Chairman.

This deponent, *James Stephen Inch*, recalled, on his oath, saith as follows :—

In reply to Mr. Williams : My reference on page 47 to the D. R. scheme was brought up by me owing to my conception of Mr. Noble's state of mind ; my reference to the £700 salaries was brought up with a similar object ; at the time spoken of in page 48 of the transcript, in reference to Wright's case, Mr. Noble was Acting Registrar-General ; I look at the report by Mr. Noble and the report by Mr. Long ; Mr. Noble's report is signed, ; the statement in transcript that both reports are unsigned is incomplete ; the date of registration of the blank report purporting to be Mr. Long's is 5th October, 1898 ; that report must have been written on or before that date ; covering minute is dated 11th October ; if I said those reports were written the date they left the office the statement would not be incorrect ; I cannot understand the date of registration on that report ; letter-book shown me contains a press copy of the report, and also an impression of the registration stamp ; a report of 4th October is copied on page 345 ; the next date after Wright's papers is dated 6th October ; I say that the report is not copied in its proper order, having regard to the dates preceding and following the report in the letter-book ; on page 350 I believe it has been stated we have a report, signed by Mr. Noble, which has been placed before Mr. Long ; it is dated 27th September ; this report, if signed and presented, as I believe to have been stated, should have been copied before several after-dated matters which precede it in the letter-book ; on occasions documents have been ante-dated ; having regard to the date of the covering letter, I say that the statement, " Well, they were only written the day they left the office, " the whole thing occurring on page 48, is not a fair report of what I intended to convey ; the statement that the fact was known to the whole of the branch hardly conveys what I wished to say ; I cannot see five material errors in the paragraph of seven lines on page 48 ; I know that reports were written half a dozen times ; I think it is most likely that both of those reports were dictated to the shorthand-writer on the 26th September ; I believed the notes were transcribed on the following morning ; I offer no opinion as to whether the reports sent over to the Justice Department differed

differed from the shorthand notes ; Mr. Long was at this time much occupied with the Macdonald case, and Mr. Noble with Wright's case ; Mr. Long did not, in cases of this kind, depute senior officers to write minutes ; knowing all the circumstances and the relations of the parties in this case, I think it highly improbable that Mr. Long deputed Mr. Noble to write the minute in Wright's case ; the morning these matters were being despatched from our office, the 11th October, my attention was drawn to this case by one of the staff, and I was informed by, I think, Mr. Bayliss, and, from inquiries made, I formed the opinion that all these three reports had been written on that day—that is, on the 11th October, but apparently I was wrong as regards Mr. Long's unsigned draft ; the report of Mr. Noble, which is dated 24th September, and signed by him as on that date, was evidently written on a much later date than it bears, inasmuch as the copy of same in the special letter-book was made almost immediately after it was typed, and does not come in its proper order of date in that book ; I believe the letter was retyped considerably after date and copied, and, therefore, could not have been on Mr. Long's table before his death—I mean, signed by Mr. Noble ; I say there is in the covering minute of the 11th November a statement that the reports were on Mr. Long's table on the day of his death ; I take it that, if a thing is submitted, it is at least on the table of an officer ; I do not draw any distinction between matters that come before me as a confidential officer and things that come to me by some other means ; the two things are distinctly the same ; my explanation of my remark about confidential communications is that information given to me in the presence of a junior officer, and probably known to other officers, I should not regard as confidential ; in reference to the statement on page 35, that a number of people saw that memorandum, I name two ; I would not positively say that any others besides Mr. Noble and Mr. Bayliss saw it ; at page 35, in reference to the statement that I saw Mr. Noble collect a whole room full of officers, and hand them those most private and confidential reports, I can recall four who were in the room at the one time—Mr. Deane, Mr. McDermott, myself, and Mr. Noble ; the others I am not positive of ; I have no doubt there were others, but I cannot say the number ; Mr. Deane and Mr. McDermott were not in confidential positions in departmental matters ; on page 35, the person who, I say, saw the final recommendation as well as I, was Mr. McDermott, and I presume he saw it before I did ; Mr. McDermott made the remark on page 35 ; with reference to the use of the word on the fifth line of page 36, " we " and " our," it is justifiable in view of the actual circumstances ; I do not consider that Mr. Noble's report of the 20th October showed any desire to hush up an inquiry ; I consider the publication of the *Star* paragraph his representation to the Public Service Board, as stated to me, and his endeavour to pass a unanimous resolution in connection with the deceased Registrar-General ; these are the matters which occur to me as having been in my mind on the 8th November last ; on page 43, the position I refer to as being coveted by Mr. Noble is that of Registrar-General—he had been speaking of it for years ; on page 46 I intend to convey that the cordiality displayed towards Mr. Noble was perfectly genuine ; I was quite friendly with him up to the time I sent in my application for an increase—I mean officially friendly ; he did not make me any little presents ; on page 49, where I use the expression " difficult things," on the third line, I include Wright's case, and the matters arising from the state of the Department upon Mr. Williams taking office ; the remark that I do not think any other officer in the whole service is entrusted with the same duties as I am, means any other officer at the same salary, or in a similar position ; until I took office, and a fortnight after, Mr. Noble opened all letters and distributed them ; Mr. Bayliss is my first assistant ; he gets £140 per annum ; I believe he has been acting in my position when I have been away ; I have been away about three months, with the exception of two days, at different times, upon which I resumed duty ; on page 50, in reference to the word " deal," I have been in the habit of acting by myself in this way that I would look into the matter and make a submission as to what should be done ; when I mention " not front-rank men," the expression would include Mr. Rossiter ; that is on page 54.

To the Chairman : Mr. Long was in the habit when going to lunch, or leaving his office, to lock his door and take the key with him ; the door was opened with Mr. Noble's key ; I tried the door three or four times—the first time about 2.15 p.m., and the last time, I think, after 3 ; I did not see him arrive ; on pages 38–39, the Mr. Williams I allude to is of the Justice Department ; the officers were almost openly hostile to Mr. Long latterly ; the Department was in a most unsatisfactory state during his rule.

To Mr. Bridges : When I say that Mr. Long asked me what Mr. Noble did, it occurred through my carrying out his instructions to send in to him all the work that Mr. Noble usually did ; the work was then sent in, and he came out and asked me and my clerks if that was all he did, and then told me that Mr. Noble had deceived him ; on page 345 there is a report dated 4th October in the letter-book, and on pages 350–2 a report by Mr. Noble in the Wright case is copied bearing date 24th September, 1898 ; the book was in my charge.

By Chairman : I never had the key of Mr. Long's room ; my clerk's room is the nearest room to Mr. Long's room.

JAMES S. INCH.

C. DELOHERY, Chairman.

This deponent, *Walter Lindsay Thompson*, on his oath, saith as follows :—I am a solicitor practising at Sydney ; I made a certain statement to the Registrar-General shortly after his appointment ; it was a statement of what passed in an interview between myself and Mr. Inch ; I met him at my father's house shortly after the Registrar-General's appointment ; Mr. Inch produced a number of official documents—a bundle of three, or four, or five—and they had the Registrar-General's stamps on them, originals and drafts. He told me that Mr. Noble was mad ; produced documents in support of it ; he used words that gave the inference that he believed Mr. Noble shot Mr. Long ; he offered to show me the papers ; he said he was doing Mr. Noble's work ; he said that he ought to be Chief Clerk.

To Mr. Garland : This was two or three days after Mr. Williams's appointment ; it was after dinner, between 7 and 8 ; my brother, who is a clerk in the Registrar-General's Department, was present ; the conversation was addressed to me ; I met Mr. Inch that night for the first time ; Mr. Inch was introduced to me after dinner ; my brother and I were smoking, and Mr. Inch came in, and my brother introduced him ; no one else was in the room but my brother and myself ; my brother must have heard a part of the conversation ; I think he has been in the Department about ten years ; Mr. Inch produced the papers, and the

the conversation turned on Mr. Long's death, and Mr. Inch passed some remarks in reference to Mr. Noble, and then I told Mr. Inch he ought not to show me the papers, and that he had better not do so, as they did not concern me, and I did not want to see them, and he said, "Oh, yes, I would like you to see them; it will all come out; it will be all public property shortly, and everybody will know; the whole thing will be out"; he put the papers into my hand and drew my attention to the draft letters, which had been altered, and said something to this effect, "You see they are not English, and the man who did this is not fit to be there," that is the substance of what he said; he told me that nobody but a madman could alter letters in that way; I do not remember the name of Kloster; it was not mentioned as far as I remember; I will not say that it was not said that a Mr. Kloster had been to see Mrs. Long, and that she asserted that her husband never died by his own hand; Mr. Evans' name was brought in; a lady was said to have had a vision that someone had put a revolver in Mr. Long's hand; I should like to explain the reason I mentioned the matter was that I have known Mr. Hayes-Williams for a long time, and Mr. Inch having these documents in his possession, I thought it only right to tell Mr. Williams and put him on his guard; I did not anticipate any inquiry; I think I told him also to be careful of Mr. Noble, as well as of Mr. Inch, owing to what Mr. Inch had told me; Mr. Williams and I had been fellow articulated clerks.

C. DELOHERY, Chairman.

This deponent, *Peardon Pearce Packham*, on his oath, saith as follows:—I am a clerk in the Patents Office; I remember about the time of Mr. Long's death; the day preceding his death I waited on Mr. Noble to make some representations regarding him; I went alone; Mr. Inch was not in the room with me during my interview with Mr. Noble; I urged him to see that someone was placed in the room with Mr. Long; but do not recollect urging him to make representations to the authorities; I urged upon him that Mr. Long was very worried, and should not be left alone; Mr. Noble did not remark, "I cannot do anything, because Mr. Long is so suspicious of me," he said in effect that he did not care to make any suggestion to Mr. Long about his work, as Mr. Long was very jealous in regard to looking after his own matters himself; I was in the habit of seeing Mr. Long nearly every day; Mr. Long was Examiner of Patents, and I was the Chief of the Staff under him.

To Mr. Garland: At the time I made the suggestion, it was apparent he was exceedingly worried; I did so to prevent a number of people seeing him who had not really important business with him; Mr. Long's condition would be apparent to everyone who had at all intimate relations with him; I frequently saw Mr. Inch with Mr. Long; I had conversations with Mr. Inch about Mr. Long's condition at this time. The morning prior to Mr. Long's death, in conversation, I tried to find out what was troubling him; Mr. Long did not tell me what was troubling him; I afterwards went to Mr. Inch; I asked him if he knew what was troubling Mr. Long; he told me that Mr. Long was very worried about a matter affecting the Land Titles Office; he told me the name of the case, but I do not remember it; I told him I had made a suggestion to Mr. Long, whom I had just seen previously, that he should have somebody in the room with him to see the papers as they are brought in; sort them and bring only the most urgent matters under his notice; and that I had suggested that Mr. Inch should be placed there; I told him that I would go to Mr. Noble and make that suggestion; I am almost sure Mr. Inch did not go up with me to Mr. Noble's room; I would say he did not come into the room with me.

To the Chairman: I had very little business with Mr. Noble; I should certainly say I did not think his mind was unhinged; I was sent for after Mr. Long's body was found; Mr. Noble was extremely affected by the occurrence; I know nothing about Mr. Noble's absences from the office.

P. P. PACKHAM.

C. DELOHERY, Chairman.

This deponent, *Ernest Sinclair MacDermott*, on his oath, saith as follows:—I am Clerk in Charge of the General Branch of the Registrar-General's Department; I think I am described in the Public Service List simply as clerk; my duties brought me in contact with Mr. Long and with Mr. Noble; I remember the time of Mr. Long's death; I cannot say that he appeared deranged; he was very much worried, and suffered from insomnia caused by neuralgia in the head; Mr. Noble did not at that time appear to be deranged; I did not notice that he was incoherent in his conversation; I am not aware that his condition of mind was a matter of general comment; I do not remember anyone remarking his condition of mind; I was in Mr. Noble's room at the time of the discovery of Mr. Long's body; Mr. Inch came in suddenly and beckoned to Mr. Noble, and I think he said, "Come quickly;" Mr. Inch appeared to be very much disturbed; his appearance led me to conclude that something serious had occurred; I did not see them go into the room: a turning in the passage obstructed my view of Mr. Long's door; they went in very quickly; I know a report was made by Mr. Noble in reference to an inquiry in which he was engaged; I never saw that report; I never saw Mr. Noble collect a number of officers and divulge confidential information to them generally; I am sure I never said to Mr. Inch in reference to some office matter in which Mr. Noble was engaged, "It would look very funny if this were to appear in the *Star* to-night"; I never made any remark regarding an operation which Mr. Noble had undergone; I have no recollection of making a remark to the effect that "it would be a positive calamity if Mr. Noble were to be appointed Registrar-General;" Mr. Noble, while he was Acting Registrar-General, never passed any titles before they had been examined and reported upon by two examiners; they are never submitted until they have been examined; I was always in attendance on Mr. Long at the weekly meetings for passing applications; I continued to be present when Mr. Noble acted in a similar capacity; Mr. Noble merely looked carefully into the titles that had been passed and reported upon by the examiners.

To Mr. Garland: I would not say in my opinion that it would be a positive calamity if Mr. Noble were to be appointed Registrar-General; I think it requires a legal man; I will not swear that I did not make the remark, but I have no recollection of having done so; I do not recollect being shown by Mr.

Noble any report or return that might have been regarded as confidential ; I never saw a return of refunds made by the Income Tax Commissioners ; I think I do recollect that he mentioned that £64,000 had been refunded by them ; that was owing to the work in some cases having been rather carelessly done ; I had done some of the checking in the office, and knew something about it ; Mr. Muddle was in Mr. Noble's room in the afternoon after lunch on the day of Mr. Long's death ; he said that he noticed that Mr. Noble was very upset and very excited ; I think I mentioned that to Mr. Inch ; Mr. Noble sent for me about five minutes to 4 that afternoon ; as far as I can recollect, he had papers about his table, and seemed busy ; he said he was very anxious and very worried about Mr. Long, as he had not seen him all the afternoon ; he said nothing about his mental condition ; he did not send for me to discuss the draft minute in Wright's case ; he did not mention it ; he appeared very much excited and distressed about Mr. Long ; as far as I could see, information about confidential matters did occasionally leak out from the office ; comment was made in the office about things that appeared in the press, in *Truth* and the *Sunday Times* ; Mr. Muddle must have been in Mr. Noble's room before I was in there.

To the Chairman : I do not think it was unusual for Mr. Long to be absent from the office in the afternoon at the Board office or the Justice Department ; Mr. Noble told me he had telephoned to those places before he telephoned to Mrs. Long ; I do not remember saying that it struck me as very extraordinary that Mr. Noble should have got such a shock from such simple words ; I have been in the Department sixteen years ; about five or six months after I joined the branch Mr. Noble was ill from overwork ; I never noticed that he was not right in his mind ; I have heard Mr. Inch say that Mr. Noble was mad ; I have heard others say the same thing when in temper.

To Mr. Bridges : I had a great deal to do with Mr. Noble in business, but I never said he was hesitating and unreliable in the way he did his business ; I may have remarked as to his peculiarities, but I do not recollect anything in particular

Taken and sworn before us at Sydney, }
this 11th June, 1900,— }

E. S. MACDERMOTT.

C. DELOHERY, Chairman.

This deponent, *James Stephen Inch*, on his oath, saith as follows :—The occasion of my visit to Mrs. Thompson's house was to visit either O. L. Thompson, who is employed in our office, or his father ; one of them was sick, I forget which ; there were several people present, including the two I have mentioned ; after some conversation some one introduced the subject of our office business, and I referred to the correspondence I had been engaged upon with the Justice Department regarding the *Star* paragraph ; as one member of the family was in the law the family drew him into the discussion, I am sure with the idea of rendering me some service ; I was on most friendly terms with O. L. Thompson ; the latter, who is a very good-natured fellow, referring to the general rumour that Mr. Noble would shortly obtain promotion to the Land Tax Office, said that if such occurred he hoped that Mr. Inch would be made Chief Clerk, as from what he could see at the branch he always acted in that capacity when Mr. Noble was not available, and that in seven cases out of every eight upon which they had telephonic communications with the head office it was through Mr. Inch ; the only papers I should have been likely to have had in my pockets were the papers relating to my personal case ; the question of publication of the whole business in the newspapers was simply mentioned as a probability if the libel action under discussion became a fact ; the rumours emanating from Mrs. Long and Mr. George Evans were both referred to ; the caution which Mr. Walter Thompson says he gave me was regarding the official displeasure I might incur if I went so far as to drag my Department into Court ; I never used words intended to give the inference that I believed that Mr. Noble shot Mr. Long.

To Mr. Hayes-Williams : The conversation at Mr. Thompson's house was shortly after Mr. Long's death, and after your name had been mentioned as the new Registrar-General ; I am almost certain it was ; the reply to my application for leave to prosecute was communicated to me on the 11th October ; you were appointed on the 17th or 18th October ; I am not aware that you knew nothing of the appointment three days before ; I am almost certain your name was mentioned at the conversation.

No. 11.

Public Service Board Inquiry.

At 10 a.m. on Thursday, 14th June, 1900, the Public Service Board met to deliver their decision in connection with the inquiry into charges preferred against Mr. J. S. Inch, Clerk, Registrar-General's Department, upon which he had been summoned to appear before the Board under section 51 of the Public Service Act :—

Present :—Mr. C. DELOHERY, Member of the Public Service Board ; Mr. F. BRIDGES, Deputy Member of the Public Service Board.

Mr. W. G. Hayes-Williams, Registrar-General.

Mr. J. Stinson, Solicitor for Mr. Inch.

Mr. J. S. Inch.

DECISION.

Mr. Delohery : After carefully weighing the whole of the evidence given at this inquiry, Mr. Inch, we have come to the conclusion that you are guilty of the charges preferred against you ; that is, that you did, at the interviews accorded you by the Board on the 2nd and 8th November last, on the subject of your salary and position, unjustifiably seek to advance your own interests and importance at the expense of the character and reputation of your superior officer, Mr. Noble. We desire also to say that, outside the charge of misconduct which has been preferred against you, we find you guilty particularly of taking public

public documents away from the office and showing them to persons not connected with the Public Service ; also of improperly using official information of which you came into possession in the performance of the duties of your office.

As to the punishment to be meted out to you, we consider that a man who has been guilty of making such reckless and untruthful statements as you have done is not a proper person to be retained in the Public Service. We have therefore decided to recommend your dismissal.

Mr. Stinson : Might I request that we be furnished with an exact copy of the transcript of this decision when prepared ?

Mr. Delohery : Yes.

[The Inquiry then concluded.]

EXHIBIT Q.

In re Inch.

Dear Mr. Pinhey,

59, Cambridge-street, Thursday Evening, 28/2/95.

This afternoon I got out for a little while when it got cooler and feel very much better. The doctor was inclined to be angry because I did not follow his instructions last week. I was so ill that I had to go to him. He gave me a certificate, and advised me to go away to the country at once. I went to the office, and saw Butler's hand so bad, and thought he was worse than I, so decided to wait on for a few days, at any rate, till Butler was on the way to a recovery sufficiently to enable him to keep at work. I could not go otherwise. On Sunday and Monday I was pounds better, but on Tuesday was off again, and at night I simply had to let go.

It was false economy for me to force myself to work when I had the influenza last June ; it was on me for six months, still I kept on. What could I do ? A man short, too, for the past six months, and all that work to be got up and the many other things requiring instant attention. Any one worth anything would have kept on as I did, though I felt it all the time, and took every care of myself in consequence.

I am not one to talk and boast about things of this kind. Mr. Dawes was my old and first chief.

I have had nothing but rush and tear for five years. However, it is done now. There is nothing that I know of now ; one or two improvements as the work comes round again, but nothing urgent. This is a great relief to me and must also be to you. My successors will reap the benefit.

In the course of a few days I will think out what is best to be done in my absence, at present I cannot force my brain any longer. I am very hopeful that this holiday will put me back again into my old health and strength. I do trust that I shall not have to grind so hard again, at least for some time to come.

I will try to-morrow to write an application. The doctor has given me a certificate that has startled me.

Allow me to tender my best thanks for your very kind inquiries and telegram. They are greatly valued. The memory of these little gracious acts on your part, sir, have helped me more than you think.

I am afraid I have rambled on and taken up your time, but I know you understand my position and will regard my letter in its proper light.

Kindly excuse my absence till I send in a formal application, I hope to-morrow.

Yours, &c.,
H. J. NOBLE.

Medical Certificate herewith.

Charles Pinhey, Esquire, J.P., Registrar-General, &c., &c.

EXHIBIT Q 1.

In re Inch.

Dear Mr. Pinhey,

Newport, 4 March, 1895.

I have made my application strong as I need the three months asked for. I am altogether done. My head especially so. It is of no use temporizing any longer. I must get my old health back again. Troubles never come alone. My wife and two children are ill at home. I had to come away on Saturday on Dr. Wilkinson's advice. May I ask you to do this for me. I feel sure you know I would not stop a day away if I could help it. I have gone too far, and this trouble of my father's was the *congé* to me.

With my best respects and kindest regards and to Mrs. Pinhey please, who I trust (with the children) are quite well again.

Yours, &c.,
H. J. NOBLE.

Thank you for the telegram and inquiries.

P.S.—I will write again in a few days or so when I can say what might be done in my absence. Fortunately, there is nothing now till the Index in May ; but that is not a very urgent matter, as we have the sheets all sorted now and tied up. I never got into such a morbid, hopeless state before. Excuse the writing please, as I cannot even do that decently.

H. J. N.

EXHIBIT R.

MEMORANDUM of Accountant covering application of Mr. J. S. Inch, of 16th December, 1893, and further letter of 12th February, 1894.

Registrar-General's Department, Sydney, 13 February, 1894.

WITH reference to the application of Mr. Inch for an increase in salary, dated 16th December last, and to his letter of the 12th instant, stating that he has had an offer of a position outside the Service, I have the honor to draw your attention to my report of the 5th August with regard to the services rendered already to the Department by Mr. Inch.

His

His previous experience specially fitted him for his present position, and his salary of £110 per annum cannot be considered even fair compensation for the important duties he has to perform.

His resignation would be an inconvenience and a distinct loss both to the Department and to the Service.

Under the special circumstances of the case, I would respectfully suggest for your favourable consideration and recommendation that Mr. Inch's salary be increased to £150 per annum from the 1st ultimo. Provision would, of course, require to be made for the extra expenditure on the Supplementary Estimates for 1894.

The Registrar-General.

Submitted.

H. J. NOBLE,

Accountant.

Case of Mr. Inch.

Sir,

2 March, 1894.

Referring to the enclosed application of Mr. Inch for an increase in salary, and also to accompanying papers, I venture to observe that, while zeal and competency are presumed to be possessed by officers of all grades, and ordinarily I should oppose their special recognition as being invidious; but in this individual case there can be no question that Mr. Inch has during two years past rendered efficient service as second assistant in the Account Branch.

The work has been heavy and responsible, and his previous commercial and financial training has stood the Department in good stead.

His salary of £110 is demonstrably inadequate.

There is no officer in the interim grades who could be nominated for the performance of these special duties.

I therefore feel justified, in the public interest, in recommending for the approval of the Honorable the Chief Secretary that an additional salary of £150 be authorised for 1894, and that it be applied to the position and service of Mr. Inch.

I have, &c.,

CHARLES PINHEY,
Registrar-General.

Principal Under Secretary.

EXHIBIT S.

SUBMISSION PAPER.—Inquiry *re* charges against Mr. J. S. Inch.

Public Service Board, 4 June, 1900.

In regard to the inquiry now proceeding into the charges against Mr. J. S. Inch, the Under Secretary of Justice forwards a letter from the Registrar-General stating that, with a view to shortening the proceedings, he will be prepared, on Tuesday next, to admit that such of Mr. Inch's statements reflecting upon Mr. Noble as relate to the following matters may have a bearing upon the question of his position and salary, and that upon those statements he is at liberty to offer evidence, viz. :—

1. The alleged aberration of intellect and consequent unreliability of Mr. Noble.
2. The allegation, direct or inferential, that Mr. Noble had made representations prejudicial to Mr. Inch.
3. The allegation, direct or inferential, that Mr. Noble had minimised Mr. Inch's duties or services to his (Mr. Inch's) prejudice.
4. The allegation, direct or inferential, that Mr. Noble improperly used intimidating language to Mr. Inch.

Submitted.

J. W. H.

EXHIBIT T.

In re Inch.

Sir,

59, Cambridge-street, Paddington, 4 March, 1895.

I have the honor to report my utter inability to continue official duties. This has been coming on for some time. During the past five years very heavy and responsible work has fallen to me, attended also with a great deal of anxious thought, and often with friction and worry.

From 1890 to 1894, as the first Accountant to the Department—as such intimately associated with yourself in the numerous and drastic reforms effected, and new systems introduced throughout the Department—and latterly as Chief Clerk to the Births, Deaths, and Marriages Branch, succeeding Mr. W. L. Dawes, twelve months ago. During this latter period a very large amount of arrears have been overtaken (most of them many years old), and every possible improvement suggested and carried out. The branch is now on a sound footing, and in excellent order.

For four and a half months I acted as Accountant also, and for six months one of the staff was absent through illness, thus rendering the burden heavier.

For the sake of quiet for calm consideration when new changes were contemplated—sometimes through urgency—I have during the past five years worked frequently at home during the evening, sometimes as late as 3 in the morning, in addition to the usual practice of working on till 6 and 7, sometimes without a break. By a rough calculation, I have reckoned that the time thus occupied would reach from 1,900 to 2,000 hours, or twelve months of official time. I have broken down four times, and returned as soon as possible to push on with the work, there being no one to take it up.

This has all been done voluntarily (largely silently), and without remuneration. The last occasion was in June last, when I had influenza, and was advised by Dr. Skirving to take a long rest, otherwise the brain would give way. I came back too soon, and have been unwell, off and on, ever since. It was unavoidable that I should return.

My illness is now a serious one, as it affects principally the brain. Dr. Wilkinson advises me in the same terms as Dr. Skirving did, only more strongly. I cannot force myself to further effort, and now beg respectfully that the doctors' recommendation may be carried out, and that I may be granted leave of absence from office for three months, as I feel in need of every day of it.

I shall have been in the Department twenty years in July next.

I have, &c.,

The Registrar-General.

H. J. NOBLE.

While expressing my regret that the state of Mr. Noble's health should have necessitated this application, I desire, on recommending that the leave asked for be granted, to state to the Chief Secretary that the causes herein referred to—of overwrought anxiety and work—have alike brought about and warranted this enforced rest.

Medical certificate enclosed!

CHARLES PINHEY,

The Principal Under Secretary, B.C., 6th March, 1895.

Registrar-General.

Submitted for approval.—C.W., 8/3/95.

Approved.—J.N.B., 12/3/95.

Medical Certificate.

“Kiara,” Ocean-street, Woollahra, 27 February, 1895.

I beg to certify that I have been in the way of observing Mr. H. J. Noble's state of health for some months past, and I consider that, unless he takes a rest from his office work and a change of air, he may seriously injure himself. He is much in need of rest; I should say at least two months, and the sooner he has it the better. He is now in that state of mind that he seems to lack the courage to take the necessary step. He is restless, and with no power of decision. If he goes on much longer without a good rest, he may take many months to recover his mental strength and balance. There is no doubt about the need for change, and the wisest economy is for him to take a rest when such a rest will fully restore him.

I have seldom seen a case in which rest from his daily work was more urgently required. My opinion is based not merely on one examination, but upon a personal knowledge of his normal and present state.

W. CAMAC WILKINSON, M.D., Lond., M.R.C.P.

MINUTE-PAPER

MINUTE-PAPER FOR THE EXECUTIVE COUNCIL.

Leave of absence to Mr. H. J. Noble, of the Registrar-General's Department.

Chief Secretary's Office, Sydney, 13 March, 1895.

In accordance with the accompanying medical certificate, and under the provisions of section 39 of the "Civil Service Act, 1884," I recommend that leave of absence for a period of three months, dating from the 4th instant, be granted to Mr. H. J. Noble, Chief Clerk, Births, Deaths, and Marriages Branch of the Registrar-General's Department.

JAMES N. BRUNKER.

The Executive Council approve of the leave of absence recommended.—ALEX. C. BUDGE, Clerk of the Council. Min. 95-10, 19/3/95. Confirmed, 26/3/95. Approved.—FREDK. W. DARLEY, 19/3/95.

EXHIBIT Q 2.

In re Inch.

Sir,

I have the honor, respectfully, to acknowledge the receipt, to-day, of your communication of the 28th instant, notifying the approval of your recommendation by His Excellency the Lieutenant-Governor, that three months' leave of absence, from the 4th instant, should be granted to me under section 39 of the "Civil Service Act of 1884."

I have, &c.,

H. J. NOBLE.

Wentworth Falls, 30 March, 1895.

EXHIBIT F.

REPORT made at the request of the Registrar-General.

Changes which, in my opinion, are imperative in the interests of the Registrar-General's Department.

27 October, 1898.

That the position and title of Chief Clerk and Deputy Registrar-General be abolished.

The respective heads of branches would then be directly in touch with, and responsible to, the Registrar-General.

The late Registrar-General discussed this very question with me when it appeared likely, some months ago, that Mr. Noble would be promoted to another office.

The advantage of the abolition of this position and title would be to give the Registrar-General a full and immediate connection with the business of the staff and Department.

Little, if any, extra strain would be placed upon any other officer, because, when reduced to fact, it simply means that business would go through one channel less than heretofore, and this Department is quite different, in respect of its needs of a Chief Clerk, to other departments, there being so many responsible and highly-paid officers under the Registrar-General.

That Mr. Hatton be retired from the position of Search Clerk, and that the Search Branch be merged into the Examiner's Branch, and placed in charge of a solicitor, who would have prospects of qualifying himself for appointment as Examiner of Titles.

That Mr. MacDermott be appointed to the vacant position of Registration Clerk. He is one of the most exact and orderly men in the Department, and would be in a position to keep the much-needed watch over the valuable records in the vaults of the Lands Titles Office.

All the other likely men have been too long used to slovenly methods.

That the suspension be at once removed from Mr. E. C. Wright, and the immediate transfer of Messrs. Ridley, Vider, Goodman, and Wright to the Government Statistician's Office be arranged for.

That Mr. Croker be brought up to Head Office in place of Mr. Bucknell.

That Mr. Bucknell be instructed to immediately complete the draft book of instructions to registrars (nearly two years have been spent on this production already; not a single district registrar has an authentic instruction book at present).

Mr. Pooley's application for a transfer from this Department, "for reasons only capable of personal explanation to the Public Service Board," should be called in.

These arrangements would leave Mr. Rossiter, at £300 per annum, in charge of the Births, Deaths, and Marriages Branch. The Board stated a few months ago that he was to go there next in seniority to Mr. Bucknell, that gentleman and Mr. Ridley being away; he would, therefore, simply be where placed by the Board.

That this gentleman has been reported against, and under what circumstances, I am fully aware. Hardly anybody in the Department has had a chance of proving his capacity for administration.

There is no proper check on ministers' marriages at present. Six months ago I suggested that a new lot of registers and marriage certificates should be printed in proper form, numbered right through like cheque-books, and issued for a receipt. All cancelled forms to be so marked, and forwarded as if for registration.

The present system is laborious, incomplete, and irritating to both ministers and registrars, and causes hundreds of letters per annum to be written.

A considerable number of marriages were discovered recently to have been celebrated and not registered.

The form of marriage certificate has been so tinkered with during the past two years that it now bears scarcely any resemblance to the outstanding ministers' registers. The treatment of the public in times past, more especially unmarried mothers, leaves much to be desired in connection with the Births, Deaths, and Marriages Branch.

I feel certain that Mr. Rossiter would do his utmost to remove all these defects, if chance offered.

Mr. Elyard (now at the Births, Deaths, and Marriages Branch) is quite incapable of earning the salary of £300 per annum—which he enjoys—and might be asked to take leave and retire.

Of Mr. Codrington, in the Deeds Branch, the same may be said with truth and justice. Both officers have long service at their backs, and would not, I believe, consider retirement an unexpected or undue hardship.

Both of them are also serving under officers who draw much lower salaries than they do.

Mr. Napier would then be called Deputy Registrar of Deeds.

The late Registrar-General considered that Mr. Kloster was the strong and progressive man in the Draftsmen's Branch.

The salary paid to Mr. Spark, as Superintendent of Engrossers, is quite out of keeping with other salaries paid in the Department to heads of branches and other responsible officers.

It will be years before Mr. Fry can qualify himself to earn his salary of £250 per annum in this Department, in view of his twenty (?) years' experience in the Postal and Telegraph Department, perhaps he might be appointed to a postmastership. Owing to the nature of the duties appertaining to my position, it would, perhaps, be advisable to have same regraded and renamed.

My first assistant, Mr. Bayliss, at £110, should receive promotion to £150 per annum (*See* Records, &c.).

Mr. Forsythe, now in active charge of Public Companies business, is hardly class enough for his work (appointed as Record Attendant), a new man should be procured who understands Company Law—some prosecutions might then be made to bring in returns and revenue.

As to the General Staff, although a number of vacancies exist, I think it quite large enough as it is.

If you consult with the heads of branches as to which men suit them, &c., and make exchanges where mutual agreement can be formed, I fancy you will have a few men over who could either be held as a relieving staff, or transferred elsewhere.

This done, you might go right through the branches as to order of merit and value of service of each man.

All postal applications for Deeds Branch searchers should be replied to by a circular referring writers to a law stationer.

No fees should be refunded in connection with R.P. applications upon which requisitions have issued.

Indefeasible titles of small value are now issued at a loss to the State. Why not have a consolidated fee on the same lines as the stamp duties? The weakest branch in the Department just now is the Lands Titles Branch. The most overmanned branch is that of the Births, Deaths, and Marriages. The first point mentioned herein seems to offer no alternative. Few of the men in it can hope to attain prominence. They are mostly bad writers. Some of the register books are in a most illegible condition, and the need of proper engrossing is apparent. The

The foregoing remarks and suggestions contain the substance of all that is necessary, apart from certain rules and practices to be arranged for afterwards, to place the Department on a sound footing. The regrading of each officer in the manner suggested should afford general satisfaction, and would abolish a long-felt discontent from a Department where such feeling might result in irreparable damage to documents of vast importance.

The Registrar-General. JAMES S. INCH,
Clerk in Charge of Correspondence Branch.

Sir, Registrar-General's Department, Sydney, 29 October, 1898.
I have the honor to draw your attention to a certain report which was somewhat hastily prepared and handed to you a few days ago.

It has since occurred to me that being so absorbed in the subject-matter, I did not express myself, considering our relative positions, in strictly proper terms.

Will you permit me to express regret therefor, and to tender this assurance that any apparent disrespect was purely accidental.

The Registrar-General.

I have, &c.,
JAMES S. INCH.

Registrar-General's Department, New South Wales, Correspondence Branch,
Sydney, 5 November, 1898.

Sir, With reference to your memorandum of the 31st ultimo, in which you invited a candid expression of opinion, in writing, from any officer of the branch under my control, on the subject of "Desirable reforms, &c.," I would like to take the opportunity of stating that apparently no public purpose would be served by my supplementing at this stage the suggestions already made, at your request, in my confidential memorandum of the 27th ultimo.

The Registrar-General.

I have, &c.,
JAMES S. INCH.

EXHIBIT H.

In re Inch.

(Extract from *Australian Star*, dated 28th September, 1898.)

James Stephen Inch, Correspondence Clerk at the Registrar-General's Office, said he was in his room all the afternoon yesterday, listening for the click of the lock of deceased's room, which would tell him that he had returned, as the last he had seen of him was just before 1 o'clock, and he thought he had not returned from lunch. Three times between 2 and 3 p.m. he tried the door, and found it locked. At about 3:50 p.m. he heard the door click, and went there immediately, meeting the messenger-boy, Oates. Going into the room he found the body lying on the floor, and thinking the deceased had had an attack of hæmorrhage he knelt down to examine him. He found the body cold and stiff, and then saw the point of the revolver protruding from under the waistcoat.

The Coroner: What time did you last see him alive? Just before 1 o'clock; he wandered into my room aimlessly. Aimlessly, did you say? Did you notice anything in his manner then? Yes; for some days past I had been doing some confidential work for him. He came to my room and stroked his beard and walked out again, saying nothing. I followed him to his room, because he seemed queer.

Did he appear to be worried? Oh, yes; he was very ill.

When did you hear of his accident? He had two trifling accidents; but they had nothing to do with the depression of his spirits. He was worried over official matters. I would like to emphasise that.

Did he ever say that he was tired of life, or that he contemplated suicide?—Well, I have had several conversations with him, but he never said anything like that. He seemed very much overborne.

Did he say that? Well, not exactly. He said official life was almost harder than he could bear. This was during the last two months.

Was he on good terms with the employees? No; I cannot answer that in the affirmative. He tried to be.

Did he have any quarrel with them? I would rather not answer that question.

But you will have to? I think it is covered in what I said about official worries.

Well, was he on good terms with his officers? Their relations were somewhat strained—they did not seem to understand him or appreciate him. This was through no fault of Mr. Long's, though. I would like to state that as my opinion.

EXHIBIT J.

In re Inch.

(Extract from *Australian Star*, dated 29th September, 1898.)

The late Mr. Parry Long.

In reference to the death of Mr. Parry Long, the Registrar-General, we learn upon inquiry that the Departmental troubles, of which a witness spoke at the inquest yesterday, were only those little matters incidental to a large office, and could have done nothing towards accentuating the worries which eventually proved overwhelming. The witness was the one who found Mr. Long's body, and being of a sensitive and emotional nature he unknowingly, in his overwrought state, was the means of giving undue prominence to an unimportant office inquiry recently held. Mr. Long was undoubtedly heavily worked, but he was a man of intense energy who revelled in his duties. Throughout the Departments which he controlled he was respected by all officers, and they are plunged in grief at his unfortunate death.

EXHIBIT N.

Memorandum to the Registrar-General.

Registrar-General's Department, Sydney, New South Wales, 24 September, 1898.

In connection with Mr. Wright's letter, I have the honor to submit reports thereon from the heads of branches concerned, and, after careful inquiry, I can safely say that the statements are greatly exaggerated, and, in some cases, distorted even to misrepresentation. Some of the matters referred to occurred twelve months ago, but are interwoven with certain subordinate adjuncts incidental to the case of Messrs. Bucknell and Butler, in which I was not asked to report as there were no charges made. I have also had the confirmation of Messrs. Vider, Goodman, Croker, and Macdermott, with each of whom Mr. Wright has worked.

As to Messrs. Bucknell and Butler's matter, there was no charge made against Mr. Wright, and the Board settled the matter without even referring to him.

The statements in the letter may be divided into five heads. As to the first, I would draw attention to Mr. Ridley's report of the 24th September, last paragraph.

2. *Re* "Overtures," I most emphatically deny that such an idea was suggested, nor could it have been. I had sent for Mr. Wright to ask him, personally, whether he desired to make any suggestions as to improvements which would help him in his work, which was greatly in arrears. He made one or two suggestions, about which I afterwards saw Messrs. Ridley and Bucknell. There could have been no reason for me to seek information, as imputed by Mr. Wright, as I had already discussed the matters referred to with Messrs. Ridley and Bucknell before seeing him. Mr. Wright left me apparently more satisfied, promising to give better attention in the future.

3. Macdermott's report attached explains this evident oversight. I am informed, however, by the Clerk in Charge of Correspondence, that he showed the letter in question to Mr. Wright—knowing that he had recently been removed to the Head Office, temporarily, to fill the place of an officer on sick leave—but he refused to look at it. Mr. Wright's application was received, however, and forwarded in good time, and it is to be noted also that the matter was well advertised in the press.

4. The former papers will fully explain this matter, which occurred over twelve months ago. Mr. Wright was away for nearly four months on the "Broken Hill Commission" at a time when his fellow tabulators, Messrs. Vider and Goodman—with the assistance of inexperienced men—were working very hard, and after hours, in order to keep faith with the promise of the Premier, made in the House, that the report on Vital Statistics for 1896 would be out shortly—they had only just finished that for 1895. I had, however, very good reasons for believing that Mr. Wright could have spent a portion of this period at this office, and after representations made to me by Messrs. Ridley and Vider, I sent Mr. Bucknell to see the Judge, who confirmed this opinion (see Mr. Bucknell's report attached, and my remarks made thereon at the time). I then sent for Mr. Wright, who would not give any explanation, and was very independent and rude in his manner, as then mentioned to you.

5. Mr. Ridley's report, paragraph 2, fully answers this assertion, which was possibly made in ignorance.

H. J. NOBLE,
Deputy Registrar-General and Chief Clerk.

UNSIGNED MINUTE BY THE REGISTRAR-GENERAL.

Sir,

Registrar-General's Department, Sydney, 27 September, 1898.

I have the honor, at the request of Mr. E. C. Wright, one of the officers of the Clerical Division of this Department, to forward a letter addressed to the Public Service Board about certain matters in which Mr. Wright considers himself aggrieved—though he has made no mention thereof within the Department—together with the remarks of the Deputy Registrar-General and Chief Clerk thereon, and reports by Messrs. Ridley and Macdormott; also the former papers in connection with Mr. Wright's matter.

I have made myself fully acquainted with the circumstances surrounding the matters complained of, and am constrained to say that Mr. Wright's remarks are quite unwarranted, and in some instances altogether out of place. As to the threats complained of, I was advised of all the circumstances at the time, and Mr. Wright reported the matter to me in writing, which he afterwards asked "permission to be allowed to withdraw, as they were written under a misapprehension"; this I granted.

I have been very considerate to Mr. Wright in the past, in view of official reports, trying him at "corresponding" work, where he should have given good service by reason of past experience. Mr. Ridley's report will show with what result.

In the case referred to I made no charges (which, by this letter, Mr. Wright evidently fears), merely submitting a covering letter of explanation. Messrs. Bucknell and Butler having been assured by the Public Service Board that their official status was not lowered by the change in their positions, respectively, the matter ended, and everything is now running smoothly.

Mr. Wright is a gentleman of very peculiar temperament, and sensitive to a degree; hence it is very difficult to place him, while his record cannot but be regarded as most unsatisfactory and disappointing.

I would draw attention to my report under Regulations 263 and 264, to the effect that Mr. Wright was "not fit for promotion," and that "he was a very troublesome officer."

I would recommend that he be returned to the Government Statistician's Department (from whence he came), together with the other members of that staff, as referred to in my previous letter on this subject. On reference to Mr. Ridley, I find that, as the cards of Births, Deaths, and Marriages are now prepared by the country Registrars, the examination thereof is a comparatively small matter, which can very well be attended to by the Examiners of the District Registrars' quarterly returns.

NOTE.—Mr. Wright was informed by me to-day that the Registrar-General had not signed this minute, and that I would see to the matter as soon as an Acting R.-G. is appointed. Mr. Wright asked that the matter might be deferred until an addendum he proposes to write be received.—H.J.N., 29/9/98.

Addendum received 29th September, and returned to Mr. Ridley as head of Mr. Wright's branch. Received again from Mr. Ridley (who preferred not to initial it), on 5th October. H.J.N.

[MEMORANDUM.]

EXHIBIT O.

Registrar-General's Department, New South Wales, Sydney, 31 October, 1898.

HAVING in view the thoroughly efficient and harmonious working of this Department, I am desirous, at the earliest stage of my administration, of ascertaining whether any reforms are desirable, and whether any causes of dissatisfaction exist amongst the officers.

I can devise no better means of arriving at this end than by inviting the confidence and co-operation of the officers themselves. Will you be good enough, therefore, to intimate to the officers of your branch individually that I shall be glad to receive during this week any communications they may wish to make, either in reference to the methods of working, or the existence of any causes of dissatisfaction affecting the Department generally, or any individual officer. Such information should be in writing, and may be handed to me in person.

The information sought is required for my own personal guidance, and I wish to have a thoroughly candid expression of opinion in every case. I shall, however, expect all statements made to be substantiated, if necessary, at the proper time.

Kindly return this memorandum to me during the day, with the signatures of the various officers of your branch attached.

W. G. H.-W.,

Mr. Keele, Deputy Registrar-General, Land Titles Branch.

Registrar-General.

The Registrar-General. Submitted.—C.H.K., 1/11/98.

EXHIBIT P.

As Mr. Wright's suspension occurred prior to my appointment, I have no personal knowledge of the facts of the case upon which to base a report. The papers certainly show Mr. Wright's conduct in a most unfavourable light, and I do not find any explanation from him which could be regarded as satisfactory. His letter of the 22nd ultimo, addressed to the Public Service Board, appears to be an admission of the charges, and I presume the Board can now deal with the matter under section 49, subsection 4, of the Public Service Act.

Whilst hesitating to express an opinion which might tend to affect the prospects of an officer, of whose qualifications and conduct I personally have had no opportunity of judging, I do not think it likely, under the circumstances, that Mr. Wright's replacement in this Department would be of advantage to Mr. Wright himself or conducive to the maintenance of discipline in the Department.

If

If it is decided to retain Mr. Wright in the service, advantage might possibly be taken of the proposed transfer of the work of preparation of Vital Statistics to the Government Statistician's Department to find Mr. Wright some position in that Department, where he would have an opportunity of doing justice to himself, with an absence of the unpleasant and irritating conditions which would probably obtain were he to be replaced in this Department.

The Under Secretary of Justice, B.C., 10th November, 1898.

W. G. H.-W.,
Registrar-General.

Forwarded to the Public Service Board.—G.M., B.C., 10/11/98. The Secretary, Public Service Board.

No. 13.

Minute of the Public Service Board.

DEPARTMENT OF JUSTICE.—Recommending the dismissal of Mr. J. S. Inch, Clerk, Registrar-General's Office.

Public Service Board, 50, Young-street, Sydney, 14 June, 1900.

It having been brought under the notice of the Public Service Board, on the information of the permanent head of the Department of Justice, that Mr. James Stephen Inch, clerk, Registrar-General's Office, at interviews accorded him by the Board on the 2nd and 8th November last on the subject of his salary and position, did unjustifiably seek to advance his own interests and importance at the expense of the character and reputation of his superior officer, Mr. Noble, the Board held an inquiry into the matter in accordance with the provisions of section 51 of the Public Service Act.

As the result of such inquiry, the Board have come to the conclusion that Mr. Inch is guilty of the charges preferred against him, and that he is not a proper person to be retained in the Public Service. They therefore feel it their duty to recommend for the approval of His Excellency the Governor and the Executive Council that he be dismissed the Public Service.

A copy of the evidence taken at the inquiry, together with the papers in the case, are forwarded herewith.

Submitted,— { C. DELOHERY, Member of the Public Service Board.
F. BRIDGES, Deputy Member of the Public Service Board.

The necessary minute might now be prepared.—G.M., 15/6/1900. Appd.—W.H.W., 31/7/1900. Min. Ex. Council, 31/7/1900.

No. 14.

Mr. J. S. Inch to The Under Secretary of Justice.

Sir, "Walton," Belmore-street, Burwood, 26 June, 1900.
I have the honor to enclose a copy of a letter which I have sent to-day to the Attorney-General for the information of the Honorable the Minister of Justice. I have, &c.,
JAMES S. INCH.

[Enclosure.]

Sir, "Walton," Belmore-street, Burwood, 25 June, 1900.
I have the honor to state that for upwards of three years I filled the position of Clerk-in-charge of Correspondence and Records, Registrar-General's Department, without my appointment being properly confirmed by the Public Service Board.

As a result of an appeal to the Public Service Board, I was afforded two lengthy interviews by them in November of last year.

The grounds of such appeal were set out in my memorandum to the Board of 2nd November, 1899. Following the evidence given by me at the inquiry held in connection with the death of the late Mr. Parry Long, both before and since my appeal, various unacceptable inducements were employed to procure my relinquishment of this particular post, and this, notwithstanding the fact that I was performing all duties required of me to the entire satisfaction of the Registrar-General.

Being subject to the penal clauses of the Public Service Act, I naturally felt that I was entitled to the protection afforded by Section 45 of such Act, and respectfully said so.

So as not to appear obstructive, however, I made application for every suitable position of about equal value to my own, which became publicly vacant in the service during such period.

Failing success in this, leave of absence was forced upon me for term after term, so that I have been continuously absent from my post, three days excepted, since the 5th March last.

The only reply the Board made to my appeal was an intimation dated 22nd May last, that I was to be charged with an offence under Section 51 of the Public Service Act.

Being eventually charged, a lengthy inquiry resulted, and I was informed that the Board had decided "to recommend my dismissal from the Public Service."

In consequence of such intimation, I now do myself the honor to approach you by way of appeal against such decision, on the following grounds, viz. :—

1. That the statements complained of as having been made by me to the Public Service Board on the 2nd and 8th November, 1899, were in reply to questions put to me by the Board, and which I regarded as confidential, and consequently privileged.

2. That a reference to the report of the interviews in question will show that the second interview was held on the invitation of the Board.

3. That the statements complained of were true, and were made by me *bona-fide*, and in the belief that the duty of making these statements under the circumstances rested upon me.

4. That none of the statements were made maliciously, or with a view to injure any officer in the Department.

5. That such statements fairly represented the views of the responsible officers in the Department with regard to the matter expressed.

6. That between the time of the statements complained of, over six months had been allowed to elapse, and in the meantime such readjustments had been made in the Department as to remove some of the cause of complaint, and to reconcile officers who had previously been dissatisfied in the Department.

7. That at the inquiry the Board refused to allow evidence to prove the truth of the statements, but insisted that justification should be first established, and the points on which I was ultimately permitted to call evidence were limited to four.

8. That I was placed in the position of a plaintiff instead of a defendant, and after my evidence in chief was concluded, notwithstanding my objection, the Board admitted evidence upon an issue with which I had not been charged, and found specifically against me upon such issue.

9. That I had a long and honorable record in the Department, and at the time of making the statements complained of was filling a position entitling me to a higher salary than I then received.

Finally, on a charge on which I am absolutely innocent, the Board propose to deprive me of—

- (a) My right to any portion of short salary paid to me during the past three years—over £250. (See gradings and recommendations.)
- (b) My salary and position.
- (c) A reputation which I have established throughout nearly twenty years of approved service, and, therefore,
- (d) The means of supporting the young and helpless family dependent upon me.
- (e) A superannuation cash credit of upwards of £20.
- (f) The heavy legal expenses incurred by me through the recent departmental inquiry.

In view of the late Attorney-General having invited Civil Service appellants to approach him without fear of prejudice, and of the exceptional treatment meted out to me, I do myself the honor to hope that you will graciously consider the foregoing in connection with the Board's recommendation before referred to.

The Hon. B. R. Wise, Q.C., M.L.A., Attorney-General, Sydney.

I have, &c.,
JAMES S. INCH.

No. 15.

Minute-Paper by The Registrar-General.

Subject:—Letter addressed by Mr. J. S. Inch, Burwood, to the Attorney-General, regarding the recommendation of the Public Service Board that he should be dismissed from the Public Service.

Registrar-General's Department, New South Wales.

Mr. INCH's letter to the Honorable the Attorney-General of the 26th instant, a copy of which accompanies his letter to the Under Secretary of Justice of the same date, is so framed as to somewhat misrepresent the matters to which the former letter refers. As some explanation appears to be desirable for the information of the Honorable the Minister of Justice, I have set out Mr. Inch's letter with my remarks relative thereto in parallel columns.

"Walton,"

Belmore-street, Burwood,
26th June, 1900.

Sir,

I have the honor to state that for upwards of three years I filled the position of Clerk in Charge of Correspondence and Records, Registrar-General's Department, without my appointment being properly confirmed by the Public Service Board.

As a result of an appeal to the Public Service Board I was afforded two lengthy interviews by them in November of last year.

The grounds of such appeal were set out in my memorandum to the Board of 2nd November, 1899.

Following the evidence given by me at the inquiry held in connection with the death of the late Mr. Parry Long, both before and since my appeal, various unacceptable inducements were employed to procure my relinquishment of this particular post, and this, notwithstanding the fact that I was performing all duties required of me to the entire satisfaction of the Registrar-General.

Being subject to the penal clauses of the Public Service Act, I naturally felt that I was entitled to the protection afforded by section 45 of such Act, and respectfully said so.

So as not to appear obstructive, however, I made application for every suitable position of about equal value to my own which became publicly vacant in the Service during such period.

562—F

Remarks.

This would appear to imply that a wrong had been done Mr. Inch owing to the non-confirmation of his position. This is not so. As a matter of fact, the title is a departmental one, similar to that of clerk to the Examiners, and clerk in charge B., D., and M. Branch, these positions being held by officers senior to Mr. Inch, who were graded as he is—as clerks merely. The title clerks in charge of correspondence and records is, to some extent, a misnomer, and conveys an erroneous idea of the importance of the position, the staff of the Correspondence Branch in fact consisting of only four (4) officers, including Mr. Inch.

This entirely misrepresents the matter. Shortly after my appointment I came to the conclusion that the position held by Mr. Inch could, with advantage to the Department, be filled by an officer having some knowledge of legal principles and some experience in the practice of conveyancing, especially in reference to the Real Property Act. Moreover, I did not consider that Mr. Inch was best fitted for a confidential position. The matter was represented to the Under Secretary of Justice and to the Public Service Board, and it was understood that a recommendation should ultimately be made with a view to bringing about the change. This was explained to Mr. Inch by me; but on his representations of his long and satisfactory services, and practically at his request, I agreed to defer making any immediate change in order that Mr. Inch might take advantage of any opportunity that might offer for his being transferred to a position carrying about the same salary as his own. This was communicated verbally to the Public Service Board, and I understood that opportunity was sought by the Board to effect a transfer; but, although Mr. Inch made application for various positions in the service as they became vacant, his applications were not successful. The phrase, "various unacceptable inducements were employed to procure my relinquishment of this particular post," is therefore quite unwarranted.

I do not grasp the application of this remark.

Mr. Inch apparently intends it to be inferred from this and the earlier portion of his letter that there was a deliberate and organised attempt made to force him out of his position, and that all efforts in this direction, notwithstanding his hesitation to appear obstructive, having failed

Failing

Failing success in this, leave of absence was forced upon me, for term after term, so that I have been continuously absent from my post—three days excepted—since the 5th March last.

the object was ultimately attained by forcing leave of absence upon him. If this is the inference, the absurdity of the statement will be apparent when it is borne in mind that I had merely, as I understood, to make a recommendation for the appointment of some person having the qualifications previously referred to, to bring about the removal of Mr. Inch from the position he held.

In reference to Mr. Inch's lengthened leave of absence, I might point out that in the first place he voluntarily applied for twenty-four days' leave from the 5th March. Previously to this application I had told him in very plain terms that I strongly disapproved of the course of action he had taken in attacking his senior officer at his interviews with the Board in November last, and that an inquiry would probably be held into his conduct in that respect. Mr. Noble, who for some time had been absent upon medical certificate, was due at the office on the 5th March, and I understood from Mr. Inch that he chose this opportunity of applying for leave to which he was entitled, first, because he needed a spell, and, next, because he felt, in view of his statements in regard to Mr. Noble, there might be an unpleasantness in his being on duty at the time of Mr. Noble's return, and it was, no doubt, anticipated that before the expiration of his leave, the inquiry which I had intimated would probably be initiated, would have been concluded. For various reasons, however, not in any way referable to this Department, the inquiry could not be held for some considerable time, and, as it appeared undesirable that Mr. Inch should return to his duty whilst a very serious charge against him, in reference to his attack upon an officer with whom he would necessarily be in almost daily contact, was pending, I recommended that he should have extended leave from time to time until the matter had been finally disposed of.

The only reply the Board made to my appeal was an intimation, dated 22nd May last, that I was to be charged with an offence under section 51 of the Public Service Act.

Being eventually charged, a lengthy inquiry resulted, and I was informed that the Board had decided to "recommend my dismissal from the Public Service."

In consequence of such intimation I now do myself the honor to approach you by way of appeal against such decision on the following grounds —

1. That the statements complained of as having been made by me to the Public Service Board on the 2nd and 8th November, 1899, were in reply to questions put to me by the Board, and which I regarded as confidential and, consequently, privileged.
2. That a reference to a report of the interviews in question will show that the second interview was held on the invitation of the Board.
3. That the statements complained of were true, and were made by me *bona fide* and in the belief that the duty of making these statements under the circumstances rested upon me.
4. That none of the statements were made maliciously or with a view to injure any officer in the Department.
5. That such statements fairly represented the views of the responsible officers in the Department with regard to the matter expressed.

1. This statement is true in part only. A good deal of what Mr. Inch said was in reply to questions put to him by the members of the Board with whom the interviews were held, but a reference to a transcript of the notes of the interviews will show that those questions were the natural outcome of statements in the first instance voluntarily made by Mr. Inch

The second interview was, no doubt, held on the invitation of the Board, and the reasons for its being accorded are clearly apparent from the transcript itself.

Reference to the evidence will, I think, show conclusively that Mr. Inch failed to establish the truth of one single statement made by him to the Board reflecting upon Mr. Noble. Mr. Inch is too intelligent a man, and too well versed in departmental practice, to believe for one moment that there was any duty cast upon him—a subordinate officer of the Department—of making any representations to the Public Service Board affecting a senior officer or the administration of his Department. He had, moreover, discharged himself of this duty—if any existed—by communicating with the Head of his Department twelve months previously.

This calls for no comment under the circumstances.

I believe this statement to be without foundation. Mr. Inch, at all events, called no evidence which in any way bears out the statement, although his counsel obtained permission to interview any of the officers of the Department, and, of course, had the right to call them as witnesses if he chose.

6. That between the time of the statements complained of over six months had been allowed to elapse, and in the meantime such readjustments had been made in the Department as to remove some of the cause of complaint and to reconcile officers who had previously been dissatisfied in the Department.

7. That at the inquiry the Board refused to allow evidence to prove the truth of the statements, but insisted that justification should first be established, and the points on which I was ultimately permitted to call evidence were limited to four.

In only one instance was there a readjustment of positions between the date of Mr. Inch's interviews with the Board—2nd and 8th November, 1899—and the holding of the inquiry, Mr. Rositter being, on the 19th November, placed temporarily in sub-charge of the Births, Deaths, and Marriages Branch, and Mr. Croker, who previously held the post, being placed in the Land Titles Branch, a change which has recently been confirmed. This readjustment had been in view, and under discussion for some time before Mr. Inch's interviews with the Board, and was actually carried into effect as a temporary measure long before the papers in connection with the interviews had been before me. It is not clear what Mr. Inch intends to be implied from this particular statement; but, I assume that he is making some kind of claim that his statements to the Board influenced the re-adjustment referred to. The object of the change was to facilitate the working of the Department, and it has had no other result than this that I am aware of.

This is only partly correct. Representing the Department of Justice at the inquiry, I took up the position at the outset, as a matter of principle, affecting the whole service, that no officer was at liberty to make charges to the Public Service Board, affecting the character and reputation of another officer, without justification. The Board supported this contention, and Mr. Inch was informed that with the exception of four matters which it was admitted might have a bearing upon the question in regard to which he had interviewed the Board, he was not at liberty to offer evidence in proof of his statements until he had satisfied the Board, in the first instance, that he was justified in making the statements; that is to say, that he must establish that the statements made by him, defamatory of Mr. Noble, were essential, or reasonably necessary to the presentation of his case when interviewing the Board, before evidence as to the truth of the statements could be admitted. Notwithstanding, however, that my contention was supported, and the principle I was desirous of laying down was recognised by the Board of Inquiry, all the more important matters contained in the transcript of the notes of the two interviews in question were opened up in my cross-examination of Mr. Inch.

As regards the four matters which it was admitted might be relevant to his case before the Board at the interviews, and upon which he was therefore at liberty to call evidence, it will be seen from the papers connected with the inquiry, that Mr. Inch made no attempt to support his statements, except by his own evidence and the production of certain papers. Whether he was successful in proving his statements will appear upon reference to the evidence.

The four matters referred to were:—

1. The alleged aberration of intellect and consequent unreliability of Mr. Noble.
2. The allegation, direct or inferential, that Mr. Noble had made misrepresentations prejudicial to Mr. Inch.
3. The allegation, direct or inferential, that Mr. Noble had minimised Mr. Inch's duties or services to his (Mr. Inch's) prejudice.
4. The allegation, direct or inferential, that Mr. Noble improperly used intimidating language to Mr. Inch.

8. That I was placed in the position of a plaintiff instead of a defendant, and after my evidence in chief was concluded, notwithstanding my objection, the Board admitted evidence upon an issue with which I had not been charged, and found specifically against me upon such issue.

This is incorrect. The Department was in the position of plaintiff and the transcript of the notes of the interview, together with certain documents, were put in as the case on behalf of the Department, the transcript being submitted as *prima facie* evidence in support of the charge. Mr. Inch then gave evidence on his own behalf, and was cross-examined. Subsequently, when I sought to examine a witness whom I had called, I was expressly limited to evidence in contradiction to statements made upon cross-examination by Mr. Inch, although I wished to tender evidence in support of the case for the Department. This is, no doubt, the evidence to which Mr. Inch refers as having been admitted upon an issue which was not covered by the charge. That the Board, in their finding, went beyond their charge is, I think, immaterial, the charge having been found to have been proved. 9.

9. That I had a long and honorable record in the Department, and at the time of making the statements complained of was filling a position entitling me to a higher salary than I then received.

Finally, on a charge of which I am absolutely innocent, the Board propose to deprive me of :—

- (a) My right to any portion of short salary paid to me during the past three years—over £250—see Gradings and Recommendations ;
- (b) my salary and position ;
- (c) a reputation which I have established throughout nearly twenty years of approved service, and, therefore,
- (d) the means of supporting the young and helpless family dependent upon me ;
- (e) a superannuation cash credit of upwards of £20 ;
- (f) the heavy legal expenses incurred by me through the recent departmental inquiry.

In view of the late Attorney-General having invited Civil Service appellants to approach him without fear of prejudice, and of the exceptional treatment meted out to me, I do myself the honor to hope that you will graciously consider the foregoing in connection with the Board's recommendation before referred to.

That I have more than once declined to recommend Mr. Inch in the position he occupied for more than the increment he would be entitled to under the operation of the Increment Regulations, is sufficient answer to this statement.

There is no such right.

Mr. Inch's service dates from 30th December, 1891— $8\frac{1}{2}$ years, not twenty years.

I have, &c.,
JAMES S. INCH.

The Under Secretary of Justice, B.C., 28th June, 1900.

Mr. Inch's letter of 28th instant, together with the attached copy of his letter to the Honorable the Attorney-General, is returned herewith. I have refrained from making any comments upon the matter, except such as are called for by Mr. Inch's statements.—W.G.H.-W., Registrar-General.

No. 16.

Minute Paper for the Executive Council.

Subject :—Recommending the dismissal of Mr. James Stephen Inch, Clerk, Registrar-General's Office, from the Public Service.

Department of Justice, Sydney, 31 July, 1900.

FOR the reasons disclosed in the accompanying minute from the Public Service Board, dated the 14th ultimo, I advise that Mr. James Stephen Inch, Clerk, Registrar-General's Office, be dismissed from the Public Service, in accordance with the provisions of section 49 of the Public Service Act of 1895.

W. H. WOOD.

His Excellency the Governor and the Executive Council.

The Executive Council advise, for the reason stated, that Mr. Inch be dismissed the Public Service.—ALEX. C. BUDGE, Clerk of the Council. Min. 32, 1/8/1900. Confirmed, 7/8/1900. Approved,—BEAUCHAMP, 1/8/1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PUBLIC SERVICE.

(INFORMATION RESPECTING CLERK AT THE BOTANIC GARDENS.)

Printed under No. 18 Report from Printing Committee, 29 November, 1900.

Question.

(9.) Clerk at the Botanic Gardens:—*Mr. J. C. L. Fitzpatrick*, for *Mr. Wilks*, asked The Colonial Secretary,—

- (1.) What was the salary paid to the late clerk at the Botanic Gardens?
- (2.) Is it a fact that, though applied for on account of the amount of work, an increase of salary from £140 per annum was refused, the answer given by the Public Service Board being that he would have to abide by the Increment Regulations?
- (3.) Can he say how, in the face of the previous decision in connection with an increase to the late clerk, the Public Service Board can now, by ignoring the Regulations, give the present clerk an increase of £25 per annum, thus obviating the necessity for examination; and can he reconcile the Board's action with that taken in connection with the previous clerk, as a junior clerk at £50 per annum has now been appointed to assist the present clerk; and the major portion of the work, such as payment of salaries, wages, &c., has been taken over by another Department, thus leaving the present occupant of the position with 35 per cent. less work to do than the late clerk who was refused an increase except under Regulations?
- (4.) Will he state if the clerk at the Botanic Gardens is a sister of a late member of the Public Service Board, and can he explain how, as the Act places the grading in the hands of the Permanent Heads, who are now engaged regrading the whole Service, the Board increases the salary of the clerk from the 1st January next, and thus tie the hands of the Permanent Head?

Answer.

Mr. See answered,—The Public Service Board have supplied me with the following information:—

- (1.) £160 per annum when he left the Service in May last. Under the present Increment Regulations his salary would have been £170 from the 1st July of this year.
- (2.) It is not a fact. The circumstances are as follow:—On the retirement of the former Secretary and Accountant of the Botanic Gardens, who received a salary of £175, and residence valued at £60 per annum (the salary was £362 and residence prior to the reorganisation by the Public Service Board in 1896), the Director of Botanic Gardens recommended that the vacancy be filled by the appointment of a clerk at a salary of £150 per annum. The Board accordingly transferred a clerk from the staff of their own office who was in receipt of £140 per annum, and he was appointed with an increase of £10. After being some months in the position he applied for an increase in salary, and the Director then stated that he considered the position was worth £175 per annum. The Board were then making the Regulations providing for progressive increments of salary to officers of the lower grades of the Clerical Division, and they considered that the case would be met by the operation of these Regulations, which would in a short time give Mr. Humphries the salary which the Director considered the position was worth. As a matter of fact, his salary was increased to £160 per annum from the 1st July, 1899, and had he remained a short time longer in the Service he would have been entitled to receive £170 per annum, viz., from the 1st July, 1900.
- (3.) On the position becoming vacant in March of this year, the Director, Mr. Maiden, asked for the appointment of a female clerk who had a knowledge of shorthand and typewriting. Mrs. D. C. Murphy, who has been in the Service for seven years, and who has the requisite qualifications, was accordingly transferred from another branch of the Chief Secretary's Department, on trial, at the rate of salary she was then receiving, viz., £150. At the expiration of six months she asked that inquiry might be made by the Public Service Board with a view to the regrading of the position and the adjustment of the salary attached to it. The Acting Director of the Botanic Gardens recommended that the request be acceded to, and it was forwarded by the Head of the Department to the Public Service Board. The Board in due course examined the work of the office, and as a result thereof they came to the conclusion that a salary of £175 per annum would be a proper one, and they

they therefore decided, under the terms of No. 261 of the amended Increment Regulations published in June of this year (of which amendment the Honorable Member is apparently unaware), to nominate Mrs. Murphy permanently for the position at that salary, subject, of course, to the necessary funds being voted by Parliament for the purpose, in accordance with section 10 of the Public Service Act. With regard to the junior clerk, one was appointed in May last at the instance of the Director, and with the approval of the Chief Secretary. Mr. Maiden stated that the work of the establishment had for some time been so heavy that he had promised Mr. Humphries, the late clerk, that he would bring the matter under notice as soon as the erection of new buildings at the Gardens afforded the necessary accommodation. It is a fact that the actual payment of wages is undertaken by the Chief Secretary's Department, but it is not true that the major portion of the work has been taken over by another Department.

(4.) It is understood that Mrs. Murphy is a sister of the Government Statistician; but, in justice to that gentleman, it must be stated that he has neither directly nor indirectly in any way approached the Public Service Board in regard to her. It is not a fact that the Act places the grading of officers in the hands of the Permanent Heads of Departments; on the contrary, the determination of the salaries of officers is vested in the Board. See section 10, which reads as follows:—"The Board shall from time to time determine what salary, fee, or allowance is fairly appropriate to the work to be performed by, or assigned to, each officer or grade of officers, or to be performed by or assigned to persons temporarily employed, and the salary, fee, or allowance so determined shall, subject to the necessary provision being from time to time made therefor by Parliament, be the salary payable in respect of such work accordingly. . . ." The hands of the Permanent Head are not tied in any way; he is at liberty to make any recommendation to the Board which he may think fit.

ADMINISTRATION OF JUSTICE.

(MINUTE OF UNDER SECRETARY OF JUSTICE RESPECTING CHARGES PREFERRED BY MR. B. B. O'CONNOR, M.P., WITH REGARD TO ALLEGED UNFAIRNESS IN THE PROMOTION OF POLICE MAGISTRATES.)

Printed under No. 15 Report from Printing Committee, 1 November, 1900.

[Laid upon the Table of the House in accordance with answer given to Question No. 9, Thursday, 25th October, 1900.]

Department of Justice, Sydney, 22 October, 1900.

MINUTE.

Subject :—Charges made against me by Mr. B. B. O'Connor, M.P., during the discussion of the Departmental Estimates.

SUBMITTED.

In reference to the charges preferred against me in the Legislative Assembly by Mr. B. B. O'Connor on Thursday morning last, as printed in *Hansard*, I feel it incumbent upon me, as permanent head of this most important Department of the State, which employs hundreds of officials, to make the following remarks upon those charges, which may be summarised as follows:—

“The Police Magistrates and Stipendiaries are in a state of discontent.” “He wanted to know why one man received information from the Under Secretary when recommendations for promotion were made, and other men in the service did not. He made that charge against the Under Secretary.” “The Under Secretary exercised great influence as regards the administration of justice.” “There were influences at work in the Department of Justice that were corrupt. He knew of one case, and there might be hundreds. This was a serious matter which should engage the attention of the House and the Government.”

On Friday morning, in consequence of the Minister's very forcible and proper request that he would either supply specific information upon which the charges were based and give the names of his informants, or withdraw his charges. Mr O'Connor is reported to have said, *inter alia*, “I will only substitute the word ‘unfair’ for the word ‘corrupt,’ and to that extent I will withdraw what I said.”

This leaves me under a charge of being unfair and influenced by favouritism in my administration of this Department—a grave charge which was made in Parliament and has been published in the morning and evening papers, and which must seriously affect my character as an administrator, if not contradicted. I well know that a man in such a difficult and responsible position as mine cannot expect to escape abuse from dissatisfied persons, and I have had my full share of it in a roundabout way. This sort of thing I treat as the idle wind; but I cannot afford to let pass unnoticed such a serious allegation against my fairness and impartiality as has been made in such a direct and public way by Mr. O'Connor.

I therefore now most emphatically deny having acted unfairly or improperly towards any officer (Police Magistrate or other official), and declare the charge made against me to be absolutely false. You are yourself aware that nothing can be more straightforward than the system upon which my recommendations are made through you as my Ministerial chief to the Public Service Board, by whom they are most carefully considered in connection with the lists of officers who are eligible for the different vacancies to be filled, before they are finally dealt with and submitted to the Governor-in-Council.

In view of the strong and emphatic manner in which he spoke, I feel sure that some very gross misrepresentations have been made to Mr. O'Connor by some Police Magistrate, and I trust that such further information will be forthcoming as will clear up this, to me, most painful matter.

GEORGE MILLER.

APPOINTMENT OF MR. JAMES BONWICK.
(HISTORICAL RECORDS.)

Printed under No. 10 Report from Printing Committee, 30 August, 1900.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated the 31st October, 1899, That there be laid upon the Table of this House, a Return showing,—

- “(1.) Who appointed Mr. James Bonwick, in London, to the position he now holds, and how long he has held the same.
“(2.) Whether he has been receiving from £52 to £54 per month since his appointment.
“(3.) What his duties really are; what number of hours he is employed per day, and how many days per week.
“(4.) The total number of paying subscribers to the Historical Records.
“(5.) The total sum voted in connection with the Historical Records, and the amount expended.”

(Mr. Affleck.)

(1.) Mr. Bonwick was appointed on the 13th April, 1887, by Sir Henry Parkes, the then Chief Secretary.

(2.) Mr. Bonwick, when appointed, was to receive remuneration at the rate of £1 per day, which was increased to 30s. per day from the 1st January, 1892. It appears that at the present time he is receiving from £52 to £54 per month.

(3.) Transcribing records in London relating to the early days of New South Wales for the “Historical Records of New South Wales.” Mr. Bonwick is employed six hours daily, and six days a week.

(4.) Practically only 98, as only this number out of the 200 original subscribers took delivery of and paid for the last volume issued.

MR. H. R. CARLETON, PRINCIPAL ASSISTANT ENGINEER, HARBOURS
AND RIVERS, DEPARTMENT OF PUBLIC WORKS.(MINUTES RESPECTING THE GRANTING OF FURTHER SICK LEAVE TO, AND THE RETIREMENT OF
THAT OFFICER AT THE EXPIRATION OF SUCH LEAVE.)*Printed under No. 13 Report from Printing Committee, 27 September, 1900.**[Presented to Parliament in pursuance of a regulation under the Public Service Act of 1895 dealing with
"Sick Leave in Exceptional Cases," published in the Government Gazette on the 24th October, 1899.]*

SCHEDULE OF PAPERS.

NO.		PAGE.
1.	Minute by the Under Secretary for Public Works and Commissioner for Roads, approved by the Secretary for Public Works, forwarded to the Public Service Board on 1st August, 1900.....	1
2.	Minute by the Public Service Board recommending additional leave and retirement of Mr. Carleton at the expiration of leave. 24th August, 1900	2
3.	Minute of the Governor-in-Council endorsing the Board's recommendation. 1st September, 1900	2

No. 1.

Minute by The Under Secretary for Public Works and Commissioner for Roads.

Extension of Special Sick Leave to Mr. H. R. Carleton.

Department of Public Works, Sydney, 23 July, 1900.

HAVING known Mr. Carleton intimately for so many years, both in his private and official life, I was well fitted to bear testimony to his undoubted worth and capabilities, and consequently had no hesitation in making a strong recommendation in his favour when I wrote my minute of 26th October last, which was endorsed by the Minister, and I am still convinced that I had every justification for stating what is therein set forth.

However, I find myself in a somewhat different position at the present time, because Mr. Carleton's health is so precarious that, if I now ask the Minister to recommend that additional leave be allowed on the ground of ill-health, I am almost certain that a still further concession in this respect must be sought for him on the expiry of any period of sick leave which may now be granted.

Although Mr. Carleton has been absent from the office so much during the last two years, I feel constrained to suggest that he be granted a further extension of sick leave to 31st December next, on the ground that he has rendered exceptionally good service to the Government on many occasions, and, in my opinion, there cannot be any doubt but that his present state of health is, in a great measure, attributable to the exposure he was subjected to while surveying on the bar harbours of the Colony some few years ago.

I also recommend that Mr. Carleton be allowed to retire from the Service on the expiry of this leave, as I understand he will be entitled to a pension for his full term of service now that the Supreme Court has decided Josephson's claim in this respect.

ROBT. HICKSON.

No. 2.

Minute by The Public Service Board.

Department of Public Works.—Recommending six months' special sick leave to Mr. H. R. Carleton, Principal Assistant Engineer, Harbours and Rivers Branch, prior to retirement.

Public Service Board, 50, Young-street, Sydney, 24 August, 1900.

WITH reference to the minute of the Public Service Board of the 31st October last, recommending six months' leave of absence to Mr. H. R. Carleton, Principal Assistant Engineer, Harbours and Rivers Branch, Department of Public Works, under the provisions of the regulation regarding sick leave in exceptional cases, published in the Supplement to the *Government Gazette* of the 24th idem, the Board, in view of the accompanying recommendation of the Under Secretary for Public Works, which has been approved of by the Minister, have the honor to recommend, for the approval of His Excellency the Governor and the Executive Council, that Mr. Carleton be granted further leave of absence for a period of six months, on full pay, under the provisions of the above-mentioned regulation, which provides that the reason for granting the leave and the Minister's minute in relation thereto shall be laid before Parliament as soon as practicable.

In view of the accompanying report of the Assistant Medical Officer, in which the Chief Medical Officer concurs, the Board further recommend that, at the expiration of such leave, Mr. Carleton be allowed to retire from the Public Service, and to receive the compensation allowed by law, he being a contributor to the Superannuation Fund.

J. BARLING, }
C. DELOHERY, } Members of the
GEO. A. WILSON, } Public Service Board.

For approval.—R.H. (*per* Jno. P.), 28/8/1900. Approved.—E.W.O'S., 29/8/1900.

No. 3.

Minute by The Secretary for Public Works.

Further leave of absence to and retirement of Mr. Henry R. Carleton, Principal Assistant Engineer, Harbours and Rivers Branch, Department of Public Works.

Department of Public Works, Sydney, 1 September, 1900.

IN accordance with the recommendation of the Public Service Board contained in the accompanying minute, I have the honor to submit, for the approval of His Excellency the Governor and the Executive Council, that further leave of absence on full pay for a period of six months from the 1st July last be granted to Mr. Henry R. Carleton, Principal Assistant Engineer, Harbours and Rivers Branch of this Department, under the provisions of the regulation regarding sick leave in exceptional cases, published in the Supplement to the *Government Gazette* on the 24th October, 1899.

It is also requested that the authority of the Governor-in-Council be given to allow Mr. Carleton to retire from the Public Service at the expiration of the leave of absence referred to above, and to receive compensation allowed by law, he being a contributor to the Superannuation Fund.

E. W. O'SULLIVAN.

The Executive Council approves of the further leave of absence recommended to Mr. Henry R. Carleton, and his subsequent retirement from the Public Service.—ALEX. BUDGE, Clerk of the Council, Min. 38-11/9/1900. Confirmed, 18/9/1900. Approved.—B., 11/9/1900.

[Laid upon the Table of the House in accordance with promise made in answer to Question No. 26, Votes and Proceedings No. 14, 11 July, 1900.]

Question 1.

What was the number of officers in, and the amount granted as increments to, the lower series of grades of the purely Professional Staff in the Lands and the Works Departments, respectively, in the re-grading of May, 1899?

Answer.

Department of Lands—Number of Officers, 102; amount of increase, £1,054.
 Department of Public Works—Number of Officers, 111; amount of increase, £1,638.

Question 2.

Out of £14,000 voted by Parliament on the Estimates for 1899-1900 for increments, &c., to the Public Service, how much was absorbed by the lower series of grades of the purely Professional Staff of the Lands Department—(a) as a result of appeals; (b) by increments, independently of appeals; (c) by new salaries under £100 per annum?

Answer.

(a) £144; (b) £320; (c) nil.

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MR. A. MARSHALL, ASSISTANT ENGINEERING SURVEYOR,
DEPARTMENT OF NAVIGATION.

(MINUTE OF THE PUBLIC SERVICE BOARD AND EVIDENCE IN REGARD TO THE SUSPENSION OF.)

Printed under No. 16 Report from Printing Committee, 15 November, 1900.

The Public Service Board to The Premier and Colonial Treasurer.

Public Service Board, 50, Young-street, Sydney, 23 October, 1900.

Reorganization of the Marine Department.

As the Honorable the Premier is aware, the Public Service Board has been holding an investigation into the Marine Department, with a view to its regrading under the provisions of the Navigation (Amendment) Act of 1899. During the progress of this work one of the Marine Inspectors was suspended by the Department and reported to the Board for wrongfully demanding a fee for his private use. This was only accidentally discovered by reason of the person, on whom he made the demand, sending a cheque for the amount to the Department under the belief that it was an ordinary transaction.

This particular case has been dealt with and the appropriate punishment inflicted, but the fact of its occurrence gave rise to an uneasy feeling that it was not an unique one, and after conference with Sir William Lyne, who expressed a strong opinion that the matter should be sifted to the bottom, the Board determined, after consulting the Attorney-General as to their powers, to hold a searching inquiry into the whole Department.

This has been done, and the minutes of evidence are submitted herewith for the information of the Government. The inquiry began on the 6th September, but was not concluded till the 9th instant, as it was necessary to await the return of Captain Hixson, late President of the Marine Board, whose evidence it was important to obtain.

To save the time of the Honorable the Premier a summary of the evidence has been prepared and is attached, from which it will be seen that a wholesale system of gratuities, or, to use a common phrase, "tips," has been in existence for many years. One witness, Mr. J. M. Silly, shipping clerk to Messrs. Gibbs, Bright, & Co., testified that to his knowledge the practice has been going on for eighteen years (see page 38 of the evidence).

Captain G. S. Lindeman, late Secretary to the Marine Board, on being questioned on the subject, said that if fees were given to the sea pilots for bringing vessels to the wharf, it would certainly be considered a most improper proceeding both by the Marine Board and himself; and further, he states that if shipping surveyors have been given fees for surveying steamers at night, it had been done without the knowledge of the Board or the Department. He, himself, was entirely unaware of such a thing; it was the first he had heard of it.

Captain Hixson, in his evidence, says that he knew nothing of these fees being given to the harbour pilots or to the surveyors. He had a sort of vague recollection of Mr. Selfe (Engineer Surveyor) coming to him about the matter, and it is very probable he said, "Well, I don't want to know anything about it," but he could not say whether he did or whether he did not. He would not wish that to be taken as authority for the wholesale demand and receipt of fees. He certainly would not have given a formal approval to the practice. He, however, thought that some remuneration should be granted to surveyors for working on holidays and Sundays.

Captain Hixson adds that he would take a pretty strong view of a surveyor receiving a gratuity, as he would think it might prejudice his work. The system of receiving gratuities has been in operation without his knowledge.

We now come to the evidence which has been elicited of the fact of gratuities having been given.

Mr. Silly, whose evidence has already been quoted, says:—"If a sea pilot berths a ship at night for his firm (Messrs. Gibbs, Bright, & Co.) they give him a gratuity ranging from £1 to £2 or £3, not as a bribe, but to facilitate their business." When asked to name one pilot, he said, "There was one the other day—Captain Plaice, I think it was; I gave him £3."

At a later stage of the inquiry Mr. Silly furnished a statement showing that last year such gratuities had been given to sea pilots. Plaice, Tylor, and Jack (retired). "At times," he said, "I have had pilots come and ask for a fee, but I have refused." When asked later to name such, Mr. Silly could only think of Captain Jack, who, he said, "used to come in and ask as if it were his right."

Mr. H. C. Benson, the Australian Representative of Messrs. Tyser & Co., states in his evidence that he has known cases of sea pilots bringing a ship straight to the wharf. He fancied the pilots received a gratuity in such cases, but would not swear it. Pilots have been ordered to take a ship out from the wharf at (say) 5 o'clock in the afternoon, but have been delayed for a couple of hours. In such cases "They generally look round for a gratuity; they go to the master of the ship for it." He has known that to be done, but could not recall any particular instance.

Captain Bracegirdle, Assistant Harbour Master, very naively said, "He did not know whether the sea pilots got anything for doing it (*i.e.*, bringing ships right to the wharf) or not, but he hardly thought a man would go out of his way to look after a job like that if there was nothing attached to it"; but when he was examined on the second occasion he had to admit having taken fees himself, thus:—"He has received fees of 1 guinea from Mail Companies for bringing their steamers to the wharfs on Sunday; on the average about seven or eight times a year for the last sixteen years. They had all (Captains Pettit, Thompson, and himself, Harbour Masters) received these fees."

A similar admission had to be made by Captain Pettit, Harbour Master, who says, "He has received gratuities for removing ships after hours during the last ten years. The fee was always voluntarily given; it would be from 1 to 2 guineas."

Captain Thompson, Assistant Harbour Master, admits, "He has received fees from nearly all the Shipping Companies during the last fifteen years. He heard the practice was allowed by the Marine Board when he joined the Service. He has received 11 guineas in fees this year, and had received as much as £20 in one year."

Captain Wm. Crossan, Harbour Pilot, recently master of the pilot steamer "Ajax" at Newcastle, stated he had never received a gratuity. He did not think this system was going on at Newcastle; if it was, he would have heard something of it.

Captain Chudleigh (of the pilot steamer "Captain Cook"), in charge of the Pilot Station, admits that he has received gratuities of from £1 to £2 from masters of ships and agents for the last fourteen years for bringing ships up to the wharf on Sundays or at night-time. He thought the practice must have been known to the Marine Board. He had never asked for a fee.

Captain Morris, Sea Pilot, states he has received gratuities about every two months from Messrs. Dangar, Gedye, & Co., Gibbs, Bright, & Co., M. Segur, and Burns, Philp, & Co. (Limited), generally of 1 guinea. He had been given 2 guineas, and once £3. He never got more than £1 for taking a ship away.

Captain Plaice, Sea Pilot, also admits that he has received presents from captains of vessels about once in two months during the last four years. He never asked for them; they gave him an order on the agent generally for £1, at the most £3. This was for bringing vessels up on holidays, Saturday afternoons, Sundays, and at nights. "He did not have the authority of the Marine Board to receive these fees."

Captain Tyler, Sea Pilot, says, "He has received gratuities for bringing ships to wharf for the whole time he has been in the Service (thirteen years). He has had as much as £2, and on one occasion £3, given to him."

The evidence so far referred to has been that relating to the payment of gratuities to pilots.

From the following it will be seen that the same practice has obtained in connection with the surveying of vessels:—

Mr. A. Marshall, Assistant Engineer Surveyor, stated that "he has only once asked for a fee for surveying ships, but has received fees gratuitously from the Adelaide Company two or three times. The fee has invariably been £2 2s., on account of late or early surveys, *i.e.*, before 9 a.m. or after 4:30 p.m. Messrs. Selfe and Marr (Engineer Surveyors) had told him they had accepted similar fees. This had been going on since about 1896. He thought Captain Hixson knew about it. Mr. Selfe told him that when he (Selfe) got his first fee for a late survey, he showed it to Captain Hixson, who said if it was overtime he did not want to know anything about it, and that he did not want fees applied for. He himself did not mention to Captain Hixson or Captain Lindeman that he had received fees."

Mr. Henry Selfe, Engineer Surveyor, admits that "he has received, on three occasions, a cheque for £2 2s. from the Adelaide Company—on one occasion for allowing one of their vessels to get away under steam at 10 or 11 o'clock p.m.; on another occasion for surveying on a public holiday. The first fee he took in to Mr. Cruickshank, who advised him to send it back. He then saw Captain Hixson, who, in answer to his question as to whether he should keep it, said, 'I don't want to know anything about it.' He kept that fee, and the other two which he subsequently received. The last one he received was about twelve months ago." Later in the inquiry, Mr. Selfe acknowledged having received a further fee of £2 2s. for surveying the "Flinders" on the 26th May, 1900, a public holiday.

Mr. William Marr, Assistant Engineer Surveyor, stated he had held his present position about eleven months. "He had received gratuities about four times from the Adelaide Steamship Company. He showed the first to Mr. Selfe, who advised him to keep it. He did not think he was doing wrong after he had consulted Mr. Selfe. The gratuities were for £2 2s., by cheque forwarded in a letter thanking him for his courtesy for surveying the Company's steamer after hours."

Captain A. Sangster, Inspector and Surveyor, said he had been offered gratuities on several occasions. "In one instance he had the money put into his hand; in the others it had been offered to him in an indirect way. It happened very often. He had never taken a gratuity."

Captain William Newton, Inspector and Surveyor, states that "within the last six months he refused a gratuity of £1. On other occasions he has had veiled offers made to him."

William McRitchie, Shipwright Surveyor, admits "he accepted a gratuity of £1 1s. from Mr. Wall, of the firm of Wall and Molesworth. On three other occasions he accepted gratuities of a guinea each."

The perusal of the evidence produces anything but pleasant reflections. To find that one of the most important State Departments has for many years been honeycombed with illicit practices, is very disappointing to anyone who desires, above all things, pure administration in the Public Service.

With

With regard to the fees paid to the pilots, no worse result has probably accrued than that the State has lost some fees for harbour pilotage, which have gone into the pockets of these officers.

It is different when the fees to the surveyors is concerned. In the case of these officers, any failure to properly perform their duty may lead to disaster and loss of life. The importance of the work entrusted to them may be gathered from a reply made to a question during the course of the Inquiry.

Question : It rested entirely in your hands what should be done ; your office was not acquainted with it at all.

Mr. H. Selve : Not at all.

Question : It was left in your hands whether you called upon the shipping company to spend thousands of pounds or £10 ?

Mr. Selve : Yes, when on board we were entirely "masters of the situation—everything was in our hands."

And again, see page 28 of Evidence.

Question : Suppose one of them (the Assistant Engineer Surveyors) went aboard a ship and saw that a tube was defective in a boiler, would he have the power to say that the tube must come out ?

Mr. W. D. Cruickshank : Yes.

Question : Without sending a report to you.

Mr. Cruickshank : Most decidedly ; they have almost unlimited power.

And further, on the same page of evidence.

Question : If a surveyor wished to be lenient to a company, he might make his requisitions lighter than another surveyor would ?

Mr. Cruickshank : Yes, he could make it either way ; he could make it very hard or very light, from which it will be seen how necessary it is to prevent the least approach to anything like unauthorised payments to these officials from the persons who may be deeply interested in getting unsound work passed.

The Board have much pleasure in pointing to some bright exceptions from the list of those who have compromised themselves by unauthorised practices ; they refer to Mr. W. D. Cruickshank, and Captains Newton and Sangster. These gentlemen had a sufficiently proper sense of the obligations attaching to the important positions they occupied not to lower themselves by accepting gratuities, which, to use Mr. Cruickshank's expressive phrase, "shuts a man's mouth up."

The Board are far from thinking that, in some of the cases, extra remuneration was not due ; on the contrary it seems only fair that, if an officer works at night for the convenience of the shipping community, some payment should be made for it, but it should be done in an open and above-board manner. They fully endorsed the view held by Mr. Benson, Convener of the Shipping Section of the Chamber of Commerce, when he says : "If it becomes a question of overtime for the pilot, . . . I do not think that anyone would object to pay a small gratuity to him, but I would suggest that in such cases it should be treated in the same way as the overtime of a Custom-house officer ; a debit note comes to us from the Department, we pay the Department, and the Department pays the officer. We ought not to have any monetary dealings with any of these officers direct ; no money should pass between the pilots and the agent or the shipmaster, there should be no cases of new hats, or 'tips,' or anything of that sort," and the Board propose, in conjunction with Captain Edie, to frame such regulations as will remove the temptation to resort to such improper practices as the evidence discloses ; they will be drawn up on the basis of providing the utmost facilities for the shipping business.

The Board were particularly concerned on hearing the evidence of Mr. Selve, which seemed to show a want of a right perception of the proprieties attaching to the important position he holds, which stands out in such startling contrast to the evidence given by his chief, Mr. Cruickshank. They refer particularly to that portion of the evidence where Mr. Selve says : "When I got that letter (containing a fee) from Mr. Prosser, and saw the kindly way in which it was worded, I considered it would be an insult to him if I did not take the cheque. Mr. Cruickshank said, 'I would not take it' ; I said, 'I cannot afford to be so beastly virtuous as you are ; I consider I have earned it, and I shall stick to it.'"

They wish it to be understood by Mr. Selve, and all the other officers implicated, that their conduct is regarded by the Board with the strongest reprehension, and that in the event of anything of the kind coming under their notice again, they will take the severest measures prescribed by the Public Service Act, and they are certain that in this attitude they will have the strong support of the Hon. the Premier. At present they do not propose to proceed further, as that would mean the displacing of many able officers. This warning they hope will be sufficient.

From inquiries made the Board are led to believe that the Department at Newcastle is free from the bad system which has been rife in Sydney.

Before concluding, the Board are pleased to acknowledge the assistance they have received from Mr. Robert Reid, Mr. J. M. Silly, of Messrs. Gibbs, Bright, & Co., Mr. H. C. Benson, Convener of the Shipping Section of the Chamber of Commerce, and Mr. Prosser, of the Adelaide Steamship Company, without whose assistance it would have been difficult to have arrived at the true facts of the case.

The work of regrading the Department is nearing completion, and the necessary *Gazette* notices will shortly be issued.

J. BARLING,
C. DELOHERY,
GEO. A. WILSON, } Members of the
Public Service Board.

Public Service Board, 50, Young-street, Sydney, 27 September, 1900.

Department of Navigation.

Suspension of Mr. A. Marshall, Assistant Engineer Surveyor.

WITH reference to your communication of the 10th August last, reporting the suspension of Mr. Alexander Marshall, Assistant Engineer Surveyor, Department of Navigation, on a charge of improper conduct, in that he demanded a fee in respect of the survey of the steamer "Egremont Castle," such action being contrary to the Navigation Act of 1871 and the Public Service Act of 1895 and Regulations thereunder, I am directed to inform you that Mr. Marshall was called on to state whether he admitted the truth of the charge, and in reply he admitted that the charge was true.

The Board delayed dealing with the case pending an examination into the Navigation Department as they were doubtful as to how far the practice of receiving fees which Mr. Marshall was charged with might have extended.

This examination has been made, and the Board are now in a position to give their finding.

The Board regard the case of Mr. Marshall as a very bad one, in fact the worst they discovered in the course of their examination, and they consider dismissal from the service would not be too severe a penalty to inflict.

In view, however, of Mr. Marshall's previous good conduct and his acknowledged ability, they have determined to adopt a less severe course, and have therefore decided that he be fined £50, to be deducted from his salary by regular monthly instalments spread over one year. Further, that for the same period he shall lose promotion, and that he shall only be allowed salary for the period of his suspension in excess of one month.

The Board regret having to deal so heavily with this officer, but they feel that in the interests of the pure administration of the Department an offence of so grave a nature must be met by fitting and exemplary punishment.

The Board would have recommended that Mr. Marshall be transferred to some other Department, but they could find no one suitable to take up his position in the Navigation Department.

J. W. HOLLIMAN,
Secretary.

SUMMARY OF EVIDENCE.

Name of Witness.	Position.	Page.
Benson, H. C.	Representative Tyser & Co.	7
Bracegirdle, Captain	Assistant Harbour Master	5-8

Steel, Robt.	Assistant Engineer Surveyor	8
Taylor, W. C.	Sea Pilot	8
Thompson, C. R.	Assistant Harbour Master	9

Service.	G. S. Lindeman stated that he held the position of Secretary to the Marine Board for twenty-five years, and is quite familiar with the rules, regulations, and practices which obtained under the old Board.
No fees payable to pilots and surveyors.	Sea pilots and surveyors are not paid by fees but by salary. There are no fees payable to them.
Practice which obtains in bringing ships from sea to steamer and wharf.	That an incoming ship was brought in by a sea pilot. If at night time she was anchored, and after passing the doctor, brought up in the morning to probably Neutral Bay. After anchoring there would be taken charge of by a harbour pilot and put alongside the particular wharf she wanted. Sometimes it is necessary to bring the ship direct to the wharf. In that case it was usual for an application to be made to the Department, who would send a telegram to the Heads instructing the sea pilot to bring the ship direct to the wharf if practicable. She would then only pay the sea pilotage fee, but if she were anchored and then removed to the wharf, she would have to pay a removal fee, according to the tonnage, from 30s. to £4 10s.
Sea and harbour pilotage fees.	As a rule, if the sea pilot brought the vessel up to the wharf she would have to pay the harbour pilotage as well, but very often on Sundays or holidays, when the harbour pilots were not available, the Department would forego the harbour pilotage fees.
Department would forego the harbour pilotage fees.	As a matter of fact he did not know that it was legal to charge for the services of a harbour pilot when the sea pilot did the work, but it was an understood thing, and if the shipowner objected to pay the removal fee witness did not know that it was enforced. There would not be many cases of that kind. The ordinary practice would be to charge the full fee.
When harbour pilotage fee not enforced.	If fees were given to the pilots for bringing vessels to the wharf, it would certainly be considered a most improper proceeding, both by the Marine Board and witness.
Ordinary practice.	It was not the practice to ease a ship off the harbour pilotage because she had the services of a sea pilot only.
Taking of fees by pilots most improper.	If a pilot accepted a fee for bringing a vessel to the wharf, he would be doing that which was absolutely wrong.
Not the practice to let ships off harbour pilotage.	
Acceptance of fee by pilot absolutely wrong.	

If

If a steamer, as a matter of convenience, was required to be surveyed at night, or at any other time, it was an understood thing by the Department, that the surveyors would be expected to do it, but they were not unless they were willing to do so.	Working hours of surveyors.
If fees had been given to surveyors who had performed this work at night, it had been done without the knowledge of the Board or the Department. He was entirely unaware of such a thing, and it was the first he had heard of it.	Fees given to surveyors.
He remembered a case, where Mr. Cruickshank when offered a fee, refused it. It was a practice not recognised by the Board, who know nothing about it. It was against the rules.	Case where surveyors refused to accept fee.
If required to work at unreasonable hours, surveyors should be paid some extra fee, but such fee should not be paid <i>sub rosa</i> .	Cases in which extra pay should be given to surveyors.
Pilotage fees in accordance with the Act are collected by the Customs Department. The Customs people would come in and look at the Department's books, and from the entries made there they arrived at the fees to be charged, and saw that they were paid. The Public Service Board could see these books at the Navigation Department.	Pilotage fees collected by Customs Department.
Some years ago it used to be the practice to charge harbour removals even when the work was done by a sea pilot; but, on the agents objecting to this practice, the charge was discontinued.	Additional evidence as regards harbour pilotage fees.
Since that time witness did not think any charge had been made, except for the sea pilotage, when the sea pilot has been the only man to do the work. It was not a common practice. The agents objected seven or eight years ago.	Marine Board thought sea pilotage charges were excessive.
Before 1897, the sea pilotage fee was considered by the Marine Board to be so heavy and unreasonable that they were not particular about the harbour charges.	Sea pilots brought vessels to wharf if practicable.
The matter of bringing the vessels right up to the wharf was always left to the judgment of the sea pilots, the instructions being "if practicable."	Number of vessels brought direct to wharf.
It could be easily ascertained how many vessels were brought direct to the wharf in the last seven years. The steamer's log will show the time of day.	
Francis Rule, Accountant, stated :—	
He knew nothing about the method adopted under the old Marine Board, with regard to the collection of pilotage fees.	Pilotage fees.
He would not like to say anything about any exemptions having been made in the charging of the harbour pilotage. He knew nothing at all about it.	Harbour pilotage fees exemption.
Captain Bracegirdle, Assistant Harbourmaster, stated :—	
Sixteen years Assistant Harbourmaster.	Service.
When the harbour pilots have removed a vessel they make out a certificate of such removal in duplicate. One goes to the Treasury and the other goes to the office.	Harbour pilotage certificates.
Some years ago there were a great many more harbour removals than at the present time; now the sea pilots are permitted to bring ships up to the wharf. That system was introduced some seven or eight years ago.	Sea pilots permitted to bring vessels direct to wharf.
No additional pilotage is charged under this system. Some firms in Sydney ignore the office altogether. When they want a sea pilot they send a message or telephone to the Heads, outside the office altogether, instead of making an application on a proper form, so that it may be entered in the books.	Some firms ignore the Department altogether, and give orders to sea pilots.
This ignoring of the Department in this respect is growing, and it is often done for the purpose of getting out of the payment of the harbour pilotage. There is no doubt about that.	For the purpose of not paying the harbour pilotage rates.
Before this latter system was introduced of allowing the sea pilots to bring up vessels direct to the wharf, the sea pilot made out a list every month for the Customs. Sometimes there were as many as twenty vessels a month brought by the sea pilots direct to the wharf, and the Customs saw that the removal fee was paid, although a harbour pilot had not been employed; but, so far as he can remember, that practice finished about seven years ago.	Practice obtaining seven years ago with regard to payment of harbour pilotage fees when vessels brought direct to wharf by sea pilot.
The high charges for pilotage brought about the change. The Marine Board, taking the heavy pilotage charge of this port into account, remitted the removal fee, but it introduced a bad system, because it allowed the sea pilots to squeeze in and do a lot of the harbour pilots' work, with the consequence that when the sea pilotage fee was reduced the old system was not reverted to.	When pilotage fees reduced, the old system not reverted to.
He did not know whether the sea pilots got anything for doing it or not, but he hardly thought a man would go out of his way to look after a job like that if there was nothing attached to it.	Fees to sea pilots for extra work.
Although the pilotage rates have been reduced, one-half the sea pilots continue to take more and more out of hands of the harbour pilots, the consequence being the work of the latter has largely decreased.	Sea pilots continue to perform harbour duties after reduction in sea pilotage rates.
Dangar, Gedye was one of the firms who had communicated direct with a pilot.	Dangar, Gedye, sent telegram to the Heads direct to pilot.
He did not think it was a proper system for sea pilots to bring vessels right up. If the ship came straight up to the wharf it was only one pilotage. It was the custom of the port, before steamers came in, that <i>all</i> ships should go to anchor for a day or two before coming up to the wharf; but that has been altered owing to the rush of business, and they are brought to the wharf as quickly as possible.	Improper system for sea pilots to bring ships direct to wharf.
Every ship brought direct to the wharf means a loss of revenue to the Government.	Loss of revenue.
Sailing vessels rarely come to the wharf direct; they anchor down the stream.	Sailing vessels anchor in stream.
The majority of steamers are taken up to the wharfs direct, the agents communicating direct with the pilots.	Majority of steamers go to wharf direct.
The loss to the revenue consequent on this would be more now, the harbour pilotage under the new Act being £4 10s. instead of £3 as formerly.	Loss to revenue more now.
Sea pilots were instructed by the Marine Board to bring vessels up direct to the wharf if there was no danger.	Marine Board's instructions to sea pilots—vessels direct to wharf.
Ships, not infrequently, are brought up to the wharfs direct at night by the sea pilots. It is optional with the sea pilot. He can always excuse himself should he so desire.	Ships are brought direct to wharf at night.
The duties of a sea pilot end at Pinchgut.	Duties of sea pilot ends.
The sea pilots seem willing to bring the vessels up; they are not averse to doing it.	Only instance where removal fee is not charged.
The only case where the removal is not charged is where, the sea pilot takes the vessel straight to the wharf.	
Arthur S. Davies, Relieving Clerk, stated that :—	
As regards outward pilotage, applicants come to the office, and they book their requirements at the office, or else they apply by letter. A record of removal is kept in the Harbour Removal Book.	Applications for outward pilotage.
The Customs have been complaining about not getting harbour removal certificates, and they say they therefore have no means of knowing how many removals are due against a particular vessel.	Customs complain they cannot get removal certificates.
Say a vessel wants to go out to-morrow. They clear to-day. The Department cannot get the harbour removal certificate before the removal has taken place, and in that case the vessel has cleared, and there is one removal due. There are not many cases like that, but he has had to send to Newcastle to get the removal fees from one vessel which had cleared in this way.	In some cases the Department cannot get removal certificate out before vessel has cleared.
He suggested that vessels should produce a certificate from the Navigation Department as to what dues are owing to the Customs-house before the Customs grant a clearance. This is done at Newcastle, but not in Sydney.	Suggestion made by witness to pay removal fees beforehand.

Alexander

Alexander Marshall, Assistant Engineer Surveyor, stated :—

Number of times fees asked for or accepted by him. With reference to the matter of his suspension, witness stated that he has only once asked for a fee for surveying ships, but he has received fees gratuitously from the Adelaide Company two or three times.

Only received fees from Adelaide Company. Captain Hixson knew of the receipt of the fees. The fee has invariably been £2 2s. on account of late or early surveys, *i.e.*, before 9 a.m. or after 4.30 p.m. He dare say it might be four times. Messrs. Selge and Marr had told him they had accepted similar fees. This has been going on since about 1896.

First fee. He has not received fees from anybody else.

Subsequent fees. He thought Captain Hixson knew about it. Mr. Selge told witness that when he (Selge) got his first fee for a late survey he showed it to Captain Hixson, who said if it was overtime he did not want to know anything about it, and that he did not want fees applied for.

Did not inform President or Secretary of receipt of fees. His first fee came to him in a letter, and he showed it to Mr. Selge. He did not show the subsequent fees to Mr. Selge, but just kept them. Mr. Selge on one occasion only mentioned that he had received a fee. Witness did not mention to Captain Hixson or Captain Lindeman that he had received his fees.

S. Robinson, Clerk, Auditor-General's Department, stated that :—

Pilot could perform a removal without Audit Office knowing. He had, under Mr. Brodie's instructions, inquired into the pilotage and harbour removal dues. [*Witness here detailed the procedure in regard to the collection of these dues.*]

Suggested check on removal fees. If a pilot performed a removal and did not furnish a certificate thereof, the Audit Department would, so far as checking was concerned, know nothing about it.

Check on sea pilotage fees. If every removal required was noted down through the Harbour Master, that would be a check. He thinks it possible to check everything done in that way by the sea pilots. Of course there are exceptions. The captain who holds an exemption certificate will not employ a pilot. Sometimes he does, and then if the pilot suppressed his certificate, the Audit Office would have no knowledge of the performance of the service.

No record of removals. As a general rule, there is a greater check on the sea pilots than on the harbour pilots, because there is an independent record, but there is no record of the removals.

Newcastle system. The system at Newcastle is an excellent one. There is hardly the necessity for the same system in Sydney.

Exemption certificate becoming scarcer. Pilotage exemption certificates are becoming less and less every year.

Henry Selge, Assistant Engineer, stated that :—

Surveys after ordinary office hours. They are not very often called upon to perform services after the ordinary office hours. If they are on a survey in the afternoon, they invariably finish it before leaving.

Received fees from the Adelaide Company. Has never been called upon to begin survey late at night or after half-past 4, and does not think any of the other surveyors have been called upon to do either. They only complete the surveys after office hours, but this is not often.

The first fee received. The total number of times he would be called upon to complete surveys during the year would be four or five times.

Subsequent fees. He has received on three occasions a cheque for £2 2s. from the Adelaide Company—on one occasion for allowing one of their vessels to get away under steam at 10 or 11 o'clock p.m., on another occasion on a public holiday.

Practice liable to abuse. The first fee he received he took into Mr. Cruickshank, who advised him to send it back. He then saw Captain Hixson who, in answer to his question as to whether he should keep it, said, "I don't want to know anything about it." He kept that fee and the other two, which he subsequently received. The last one he received was about twelve months ago.

Fees paid publicly. He considered he was justified in taking the fees. He thinks it is possible in some cases that the practice is liable to abuse, but not so far as he himself would be concerned.

Where possible each surveyor keeps to his own steamer. It would be better if the fee were paid publicly and openly. He considered that, having showed his first fee to Captain Hixson, he had the sanction of the Department. He never made any demand for fees; the company sent them to him.

Last fee received two years ago. Applications for survey are made to Mr. Cruickshank. The notices are then sent to the Assistant Engineer Surveyors, and then as near as possible they keep to their own steamers, so as not to change ships as much as possible. The ship is put down to the surveyor who generally surveys them.

Could not trace dates of receiving cheques. He has not received any fee for a couple of years.

Mr. Marshall's case an abuse. He could not undertake the job of finding out the dates he got the cheques. He did not know whether it was one, two, or three years ago. There would be nothing on the notices to assist him to this end. He expected that he paid the cheques into his own account. They were crossed. He might have cashed them at the Balmain Club.

Fees should be paid through the Department. He would never have thought that if the practice of accepting fees were allowed to continue it would lead to the corruption of the whole of the Government Departments, until Mr. Marshall's case happened.

President and Secretary not informed that ships condemned. The payment should be made to the officers through the Department.

"Tips." They (the Engineer Surveyors) never told Captains Hixson or Lindeman when ships were condemned. It would be no good if they did. When the Surveyors were on board ship they were entirely masters of the situation, everything was in their hands, and neither Captains Hixson, Lindeman, or the Board knew anything about it. It rested entirely with them whether they ordered £10, £1,000, or £10,000 worth of work to be done.

W. D. Cruickshank, Chief Engineer Surveyor, stated that :—

Hours of duty. They have no hours of duty. He considers his staff should go out whenever called upon.

Mr. Selge and his first fee. Some years ago Mr. Selge brought a cheque, which he (Selge) said he had just received. Witness told him to send it back. Selge said he would take it to Captain Hixson, and subsequently informed witness that Captain Hixson had told him he did not want to know anything about it. That is the only occasion witness knew of before he went to Port Darwin.

Receipt of fees pernicious. The receiving of such gifts would tend to sap the independence of the surveyors; and it has.

Particulars of defects in steamers would go before the Marine Board. If he condemned, say, a boiler altogether, his report would go before the Marine Board.

All reports of this nature went through witness. He never allowed a report to go out without he saw it, and very often he altered the wording.

Assistant surveyors give orders for repairs. His assistants would give orders for repairs without his knowledge. When they go on board a vessel they practically take the responsibility of the ship, repairs and everything else. They have most unlimited power even up to £10,000 worth of repairs. If

<p>If his assistants authorised anything beyond the usual repairs it was reported; but a great many repairs would be carried out entirely on their verbal representations and their own responsibility without his knowledge.</p>	Unusual repairs.
<p>A surveyor could in this respect be very hard or light.</p>	Surveyor could make few or many repairs necessary.
<p>That would strongly accentuate the necessity for looking down with the greatest suspicion upon any gratuity that might be offered.</p>	
<p>The practice of giving gratuities would take away a man's independence.</p>	Practice of giving gratuities.
<p>The Act gives a surveyor unlimited power.</p>	Surveyors' powers unlimited.
<p>He was unaware that the practice of receiving "tips" had been continued.</p>	Unaware practice of receiving "tips" was continued.
<p>The whole of this system has arisen through want of system, want of regulation, want of under-standing.</p>	Regulations wanted.
<p>Receiving gratuities in this way shuts a man's mouth.</p>	Receipt of fees shuts a man's mouth.
<p>William Marr, Assistant Engineer Surveyor, stated that:—</p>	
<p>Has been an Assistant Engineer Surveyor for eleven months.</p>	Length of service.
<p>He has received gratuities about four times. They were from the Adelaide Steamship Company.</p>	Received gratuities.
<p>He showed the first of them to Mr. Selfe, who advised him to keep it. He did not think he was doing wrong in keeping it after he had consulted Mr. Selfe.</p>	Advised to keep gratuity.
<p>The gratuities were for £2 2s. by cheques, forwarded in a letter thanking him for his courtesy in surveying their steamer after hours.</p>	Fees received by cheque.
<p>Henry Pettit, Harbour Master, stated that:—</p>	
<p>Has been Harbour Master for about sixteen years.</p>	Length of service.
<p>It is recognised now that if a sea pilot is sent to bring a vessel to its berth he may do it, but the Department get no removal fees for that. It is one job.</p>	Recognised practice for sea pilots to bring vessels to their berths.
<p>This arrangement was made between Mr. Powell and Captain Hixson some eight or nine years ago. It was always optional with the pilot.</p>	Optional with sea pilots to bring vessels to wharfs.
<p>To a certain extent it was left to the discretion of the sea pilot whether or not the harbour pilotage should be paid.</p>	Harbour pilotage left to discretion of sea pilots.
<p>The sea pilots were told by Captain Hixson that "It is in your own hands, if you are coming to a certain berth and you think it risky or likely to run you into trouble, you can refuse to do it."</p>	Instructions to sea pilots.
<p>There was about an average of twenty-five per month all done by the sea pilots with no harbour pilotage added. In those days the Government got both the sea and harbour pilotage fees, but there was no certificate to show that the harbour pilots had performed any services, but the system gradually subsided about ten years ago.</p>	Average quantity of ships brought up by sea pilots.
<p>Shipping agents send private messages to the sea pilots, ignoring the office altogether, the result being that ships are brought to the wharf, and the Department would know nothing about it until the harbour pilots see them there.</p>	Shipping agents communicate direct with pilots.
<p>Has heard it spoken round that sea pilots have been paid for bringing vessels right up. He would not think a man would run himself into trouble, and exceed his duty without some extra remuneration. It is the most risky part of the work.</p>	Fees received by sea pilots.
<p>He would not run his head into a noose without some remuneration.</p>	He would not do it for nothing.
<p>If an accident occurred now, through the negligence of the sea pilot, the Government would probably have to stand the loss.</p>	Government responsible for accidents while berthing ships.
<p>The tendency of the present practice of allowing the sea pilots to bring vessels right up to the wharf, would appear to render the services of the harbour pilots less necessary.</p>	
<p>Whenever the sea pilots perform the duties of harbour pilots, the Government lose the harbour pilotage and removal fees.</p>	Loss of harbour pilotage rates.
<p>Dangar, Gedye, & Co., Gibbs, Bright, & Co., Burns, Philp, & Co., communicate direct with the sea pilots.</p>	Firms who communicate direct with sea pilots.
<p>The log of the "Captain Cook" would show the names of all vessels brought right up by sea pilots.</p>	Record of vessels brought right up.
<p>J. M. Silley, Shipping Clerk, Gibbs, Bright, & Co., stated that:—</p>	
<p>At times they communicate direct with the pilots at the Heads.</p>	Communicated direct with pilots.
<p>If the sea pilot berths a ship at night, they give him a gratuity, ranging from £1 to £2 or £3. They give it to them, not as a bribe, but to facilitate their business.</p>	Gratuities to sea pilots.
<p>They gave to Captain Plaice £3. Probably he had given to the lot of them, including some that left. Pilots have, at times, come and asked him for a fee, but he has refused, because the services rendered did not justify it.</p>	Gratuities given to all. Pilots have asked for fees.
<p>They only paid the pilots for night work, and only when they forwarded their business.</p>	Pilots only paid fees for night work.
<p>He has heard that other firms have done the same thing.</p>	Other firms have paid gratuities.
<p>They communicate with the pilot in charge if the office is not open, but when it is they do it through the usual channel.</p>	They communicate with the pilot in charge if office not open.
<p>This has been going on for eighteen years; as, also, the giving of gratuities varying from £1 to £3.</p>	Practice going on for eighteen years.
<p>They would not have to pay a removal fee if the vessel is brought right up.</p>	Removal fee not paid.
<p>In one instance he gave a pilot a gratuity of £4.</p>	Gratuity to pilot of £4.
<p>If it can be arranged that they may secure the services of a pilot whenever they want one, instead of being under a compliment to them, it will be a great convenience.</p>	Procuring services of pilots at all times a great convenience.
<p>Gratuities were always paid by cash.</p>	Cash gratuities.
<p>J. M. Silley, further examined, stated that:—</p>	
<p>The return furnished by him represented, so far as he could trace them, the whole of the payments made during the last twelve months. In previous years the amount would be smaller. Last (the past) year would show the largest amount paid.</p>	Statement of fees paid to pilots.
<p>Captain Jack was the only pilot who came in and asked for a fee. He used to come in and ask as if it were his right.</p>	Captain Jack the only pilot who asked for fee.
<p>He would furnish a statement showing the disbursements by his firm to the pilots during the previous two years.</p>	Further statement of fees to pilots.
<p>H. C. Benson, Australian Representative of the firm of Tyser & Co., stated that:—</p>	
<p>He is Convener of the Chamber of Commerce and Agriculture.</p>	
<p>Has known cases of sea pilots bringing a ship straight to the wharf. He fancied the pilot received a gratuity. He would not swear it.</p>	Gratuities to sea pilots.
<p>If a sea pilot brings a vessel alongside the wharf there is no removal fee charged.</p>	No removal fee.
<p>It is to a sea pilot's interest to bring a ship right up to the wharf.</p>	Sea pilot's interest to bring ship right up.
<p>It is a serious thing to have a ship lying down the harbour for half a day or a day.</p>	Serious thing to have a ship lying down the harbour.
<p>In cases where pilots take away a ship from the wharf at, say, 5 o'clock p.m., they generally look round for a gratuity. They go to the master of the ship for it.</p>	Cases where pilots look for a gratuity.
	Harbour

Sea pilot takes ship from wharf to sea. Harbour pilots never come aboard the ship when she is going out; the sea pilot takes her right down.

No moneys should be paid to pilots but to the Department. He thought that in a port like Sydney they should be in a position to have a ship brought in at any hour day or night; and, that a small gratuity should be paid to the pilot on account of any overtime, but it should be done in the same way as the overtime of a Customs-house Officer is paid. A debit note comes to them from the Department; they pay the Department, and the Department pays the officer. They ought not to have any money dealings with any of the officers direct.

Harbour pilots employed. His firm always employ a harbour pilot.

Hours of duty of pilots. The great thing is that the pilots' services should be available at any time, day or night.

Captain Bracegirdle, recalled, stated that:—

Received gratuities. He has received gratuities of a guinea from the Mail Companies for bringing their ships to the wharfs on Sundays. He has received them about seven or eight times a year.

Captain Hixson's alleged views. At one time one of the Shipping Companies' Clerks spoke to Captain Hixson, and he said, "Well, these officers have got regular hours, but if you can make arrangements with them they will attend on the job."

Fees received. He has received these fees about seven or eight times a year during the last sixteen years. They all received them, *i.e.*, Captains Pettit, Thompson, and himself.

Received a larger fee. He got £2 2s. from the French Company (Messageries).

Henry Selfe, further examined, stated that:—

Further survey fee received. He received £2 2s. for surveying the "Flinders" on a public holiday. It would be about 26th May.

Total number of gratuities received. The whole amount would not be more than five.

George Plaice, Sea Pilot, stated that:—

Gratuities received. He has received presents about once in two months during last four years. He has never asked for them. He received them from the captains of the vessels. They gave him an order on the agents— for sometimes £1, very often £1; the most has been £3. He has only received them for bringing vessels up on holidays, Saturday afternoons, or Sundays, and at nights.

No authority to receive fee. He did not have the authority of the Marine Board to receive these fees.

All pilots taken fees. All pilots at present engaged, and Captain Jack, who has retired, have accepted fees.

Left to their discretion to bring ships right up. He has brought ships right up to the wharf upon the general authority issued by the Marine Board making it optional for the sea pilots to do so.

Master can shift ship himself above Bradleys. He thought that Captain Hixson and the Collector of Customs had at one time decided that if a Master was above Bradley's, he could shift his ship to any part of the harbour without paying pilotage.

Does not know whether harbour fees are paid or not. He is still bringing ships right up to the wharf. If he did not do so it would detain the ships.

Received no fees for taking ships out. He does not know whether the harbour fees are paid in these instances.

Hours of work. They never get any fees for taking ships out.

He is supposed to be on duty night and day whenever required.

F. W. Morris, Sea Pilot, stated that:—

Has received fees. Has received gratuities about every two months from Dangar, Gedye, Gibbs, Bright, Mr. Segur, and Burns, Philp. The amount generally was one guinea. He had two guineas, and on one occasion £3. He has never received more than £1 for taking a ship away.

Harbour pilotage lost. Bringing the ship straight to the wharf saved her the harbour pilotage.

Never asked for a fee. He has never asked for a fee.

Fees from men-of-war. They only get the fees for night-work or on Sundays or holidays. Sometimes when they bring a man-of-war up they receive a fee.

W. C. Tylor, Sea Pilot, stated that:—

Received gratuities. He has received gratuities for bringing ships to wharf. Has done it for the whole time he has been in the service (thirteen years). He might get one gratuity in each month, and then he might not get anything for three months.

No permission from Marine Board. The Marine Board did not give them permission to receive gratuities, but they have instructed the pilots to berth them at night time.

All received fees. The harbour pilots and the sea pilots, from Captain Creer down, have all received gratuities. They have never received anything for taking ships to sea.

Harbour pilots not available at night time. They have to take ships away from the wharf at night time because the harbour pilots are not on duty.

Pilots can enforce a fee after first attendance. Has had as much as £2 and on one occasion £3 given to him. He never asked for it. Under the Harbour Regulations if a pilot is ordered (say) in the morning, and he finds the vessel not ready for sea, he can, if he attends upon and finds the vessel not ready, charge 10s. for every visit he makes after that. That regulation has been frequently enforced in the old days. He believed Captain Jack had enforced such a fee.

G. S. Lindeman, recalled, stated that:—

Wholesale receipt of fees. He would be very surprised to hear that pilots had been given gratuities wholesale, and if it had come under his knowledge he would at once have reported it to the Marine Board. He would be equally surprised to hear if Captain Hixson knew anything about it. He was a bit surprised at the willingness of the pilots to bring vessels up at all hours.

W. D. Cruickshank, further examined, stated that:—

Respecting offer of fee made to him. The best explanation he could give with regard to the offer of a sum of money to him would be to hand in two letters in connection with the matter for the perusal of the Board.

Robert Steel, Assistant Engineer Surveyor, stated that:—

Received fee. He received a gratuity from the captain of the "Ramazan" for surveying a ship on Saturday afternoon and Sunday morning. He considered he was doing right in accepting it as his senior officers had previously informed him it was the custom. It was a matter that was open to abuse. That was the only occasion upon which he received a gratuity.

Henry Pettit, recalled, stated that:—

Received gratuities. Has received gratuities for removing ships after hours during the last ten years. The fee was always voluntarily given. It would be from one to two guineas. He thought the practice must have been known to Captain Hixson. On one occasion when he spoke to Captain Hixson about it he (Captain Hixson), said that he thought it was mean of the company not to make some little recognition of this extra service.

Harbour pilot took up duties from Fort Denison. There was an old recognised rule that above Fort Denison was where the harbour pilots took up their duties.

Why he did not say he had received fees before. He might have mentioned the fact that he himself had received fees at his previous examination, but as he was not asked the question he did not think it worth while mentioning it then.

C. R. Thompson,

C. R. Thompson, Assistant Harbour Master, stated that :—

He has received fees from nearly all the shipping companies during the last fifteen years. He Received fees.
heard the practice was allowed by the Marine Board when he joined the service.

He considers the service wants regulating. The sea pilots and harbour pilots are working too System wants regulating
much into one another.

He has received eleven guineas in fees this year He has received as much as £20 in one year. Amount of fees received.
Captain Edie had told them they were supposed to remove a ship whenever they were called upon, Overtime.
and that if they were entitled to overtime he would see that they received it.

In his opinion the service should be worked with one staff, instead of as at present having a Should be one staff of
harbour staff and a pilot staff. If the two staffs were amalgamated there would be more men to do the pilots only.
work. Two men could always attend in Sydney to deal with the removals that might be required during
the day.

A. Sangster, Inspector and Surveyor, stated that :—

He has never received a gratuity, but has been offered them on several occasions. In one instance Never received a
he had the money put into his hand; in the others it had been offered to him in an indirect way. It gratuity.
happens very often.

Herbert Chudleigh, Captain, Pilot Steamer "Captain Cook," stated that :—

He has received gratuities from the masters of ships and several agents about town. He has Received gratuities.
done so for the last fourteen years. For bringing ships right up to the wharf on Sundays or at night
time he has received £1 or £2. He thought the practice must have been known to the Marine Board.
He never asked for a fee.

William Crossan, Harbour Pilot, stated that :—

He has never receive } a gratuity. Never received a
gratuity.

William Newton, Inspector and Surveyor, stated that :—

Whilst he held the position of pilot, at Ballina, he received a cheque for £20 from the under- Has received gratuities.
writers and owners of the s.s. "Terranora," £10 for himself and £10 for the boat's crew, as a present in
recognition of their services in floating the vessel off the South Spit on the 15th October last.

He was authorised by the Marine Board (as per letter handed in by witness) to accept this fee. Was authorised to accept
it by Marine Board by
letter.

On another occasion he returned a fee of £5 to Captain Fenwick for assisting him to remove his Returned a gratuity.
vessel at Ballina.

On another occasion, whilst on the Richmond, he took a fee of £2 2s. for giving his opinion that Retained a gratuity.
the "Saucy Jack" was fit to carry sugar from Richmond to Sydney.

Within the last six months he refused a gratuity of £1. Refused a gratuity.

On other occasions he has had veiled offers made to him. Veiled offers.

On one occasion they saw Captain Lindeman about overtime, and he said that it was of no use Overtime discouraged
their talking about overtime, and that the only thing they could do was to take a half-day off sometimes. by Secretary, Marine
Board.

William McRitchie, Shipwright Surveyor, stated that :—

He accepted a gratuity of £1 1s. from Mr. Wall, of the firm of Wall and Molesworth. On three Accepted a gratuity.
occasions he accepted gratuities of a guinea.

Captain Hixson, late President, Marine Board, stated that :—

There is no legal charge for a harbour pilot; the law is that there is a charge for sea pilots, but if Harbour fees.
harbour pilotage is performed by one of the Harbour Department certain fees should be charged, while
there is no compulsion on a ship to pay outside pilotage except for her own convenience.

He knew nothing of these fees being given to the harbour pilots or to the surveyors. He had a No knowledge of fees
sort of vague recollection of Mr. Selge coming to him about the matter, and it is very probable he said, given to pilots.
"Well, I don't want to know anything about it," but he could not say whether he did or whether he did
not. He would not wish that to be taken as authority for the wholesale demand and receipt of fees.
He certainly would not have given a formal approval to the practice.

He certainly thought there should be some remuneration granted for working on holidays and
Sundays.

He looked upon the cases of pilots and surveyor as altogether different. A surveyor might sap Cases of surveyors and
his independence by taking fees; in the case of a pilot, he merely puts a ship ashore. pilots different.

The Treasury had not in all cases lost the harbour removal fees. Harbour removal fees
not always lost by
Treasury.

We would lose our reputation as a port if we insisted upon a ship anchoring out in the stream in
place of coming direct up.

All the evil that has resulted from the taking of fees by pilots is that the Treasury may have lost Treasury suffered from
here and there the harbour removal fees by the ship coming direct to the wharf instead of anchoring in the stream. the pilots taking
gratuities.

But there is another point. The fact is that this port was enormously expensive to shipping until Sydney port enormously
lately. Each ship had to pay 4d. per ton for pilotage in, 4d. harbour and light rate, and 4d. outwards. expensive to shipping
So, those charges being so enormous, it was inclined to make him lax if he could do so without really until lately.
committing himself.

He had a sympathy against charging removals when he knew what great expense ships were put Sympathy against
to already. charging removals.

He thought it would be an excellent thing to allow overtime to pilots and surveyors, and to pay Overtime should be
the sea pilot to lead the ship direct to the wharf, in place of leaving her in the stream, and thereby allowed to pilots and
causing delay, and then charge the owners a certain fee. surveyors.

If the sea pilot performed both duties he would give him the fee for it, as there is an immense deal of responsibility in bringing one of these big ships to the wharf. Sea pilots should bring
ships direct to wharf.

It is a very small proportion of the vessels that could come direct to the wharf. Sailing vessels Small proportion only of

An investigation under section 8 of the Public Service Act, into matters connected with the Department of Navigation, was commenced on Thursday, 6th September, 1900.

Present:—

Mr. J. BARLING, Chairman, }
Mr. C. DELOHERY, Member, } Public Service Board.
Mr. WILSON, Member, }

Captain G. S. Lindeman, Shipping Master of the Port of Sydney.

The Chairman : This is an investigation we are making in pursuance of the powers conferred upon the Board by section 8 of the Public Service Act into matters connected with the Navigation Department, with a view to the regrading of that Department. The section referred to gives this power to the Board. "As often as shall be necessary to carry out the directions and provisions of this Act, and to ensure the establishment and continuance of a proper standard of efficiency and economy in the Public Service, the Board shall, as far as practical, personally inspect each Department and investigate the character of the work performed by every officer therein, and the efficiency, economy, and general working of such Department, both separately and in its relation to other Departments, and may, for such purpose, examine the permanent head of such Department, and such other witnesses as may appear to the Board to be necessary." As to the power of the Board to summon witnesses, section 16 of the Act reads thus: "The Board, for the purpose of conducting any inquiry or investigation under this Act, shall have the same powers and authority to summon witnesses and receive evidence as are conferred upon commissioners by Letters Patent by the Act Forty-fourth Victoria Number One; and all the provisions of the said Act shall apply to witnesses so summoned, and evidence so received and given, as completely and effectually as if such witnesses had been summoned, and such evidence had been received or given by virtue or under the authority of the said Act." Having explained the scope of the investigation we desire to ask you certain questions, Captain Lindeman.

George Sidney Lindeman sworn and examined:—

The Chairman : What are you, Captain Lindeman? I am Shipping Master.

Of the Port of Sydney? Yes.

You were, previously, Secretary to the old Marine Board? Yes.

Which position you held for how long? Twenty-five years.

You are quite familiar with all the rules, regulations, and practices which obtained under the old Board? Yes.

We want you to tell us what has been the practice in regard to the fees of sea pilots and surveyors? They are not paid by fees but by salary.

I mean in regard to the fees paid to the Government in connection with their services, and we also wish to know if there are any fees payable to them? There are no fees payable to them.

Tell us in your own words what the practice was? An incoming ship was brought in by a sea pilot. If at night time the vessel was anchored and passed by the doctor in the morning, and then brought up, probably to Neutral Bay. She would be anchored there and then taken charge of by a harbour pilot and put alongside the particular wharf she wanted to go to. Sometimes it is necessary to bring the ship direct to the wharf. In that case it was usual for an application to be made to the Department, and we would send a telegram to the Heads instructing the sea pilot to bring the ship direct to the wharf if practicable.

Has a ship to pay any extra fee if she is brought straight to the wharf? No.

What fee would be payable then? Just the sea pilotage.

Supposing she were anchored, and then afterwards brought to the wharf, what fee would be payable in such a case? The removal fee.

What would be the removal fee? From 30s. to £4 10s.

According to the tonnage? Yes.

You say that if the Marine Board gave permission to the sea pilot to bring a vessel direct to the wharf no harbour pilotage fee is then payable? I think it used to be an understood thing that they were not to pay for the removal. Very often they paid the full fee, seeing that the sea pilot used to do the work for their convenience.

Does that mean that they paid harbour pilotage in addition to the sea pilotage? Yes.

Did it ever happen that that was not enforced? I think it is very likely, but it would not be brought under my notice; it was a matter which would be settled between the accountant and the President. I should order the pilot to do the work.

We

We want to understand exactly what did take place in connection with these matters? As a rule, if the sea pilot brought the vessel up to the wharf they would have to pay the harbour pilotage as well.

Under what circumstances would the Department forego the harbour pilotage fee? Very often on Sundays or holidays, when the harbour pilots were not available.

Then no fee would be paid? No.

But supposing a harbour pilot were available on an ordinary day? Then a harbour pilot could do the work.

But if a vessel came in at night, on an ordinary day, and you gave permission to the sea pilot to bring her to the wharf, you say that the rule was that the harbour pilotage fee should be paid? Yes.

You also say there were some circumstances under which the second fee was not enforced? There must have been.

Under what circumstances would the harbour pilotage fee be remitted? As a matter of fact I do not know that it was legal to charge for the services of a harbour pilot when the sea pilot did the work.

It was a matter of agreement? Yes. If the shipowner objected to pay the removal fee, I do not know that it was enforced.

The understanding was that if the sea pilot were allowed to bring a vessel direct to the wharf the harbour pilotage fee was also paid? Yes.

Can you remember what exceptions were made to that rule? I cannot remember.

You say that exceptions were made occasionally? Yes; they might go to the President and explain the thing to him, and he would say "we will not charge the fee under the circumstances." I would know nothing about it.

Would there be many cases of exemption of that kind? No; I do not think so; the ordinary practice would be to charge full fee.

And that practice, you say, was a matter of arrangement? Yes.

Do you think the accountant will be able to give us any information as to the special circumstances under which the harbour fee was remitted? Yes; he might.

Supposing evidence was brought before us showing that fees were given to the pilots for bringing vessels to the wharf, would that be considered an improper thing by the Board? Certainly.

Would you consider it as a most improper proceeding? Yes; certainly.

Do you think there were any cases in which the sea pilot would bring a vessel direct to the wharf without communicating with the Board, and without getting their permission? These payments are made to the Customs.

Could such a case occur as I have described? It is possible that a sea pilot may have brought a vessel up and that the harbour fees have not been paid; but the practice was not to ease them off the harbour pilotage because they had the services of a sea pilot only.

Might a case of this kind arise: that a vessel would come in at night with the sea pilot on board and that the sea pilot, without communicating with the Marine Board, would bring the vessel right up to the wharf? He could not do that at night because he must pass the Health Officer in the morning.

You do not think a case of that kind could occur? If it was represented as a matter of urgency, he might do it and report it afterwards.

In such a case I suppose you would demand the harbour pilotage? Oh, yes.

If the sea pilot accepted any fee for doing that he would be doing that which was absolutely wrong? Yes; he was a salaried officer.

Now let us come to the surveyors;—what are the rules with regard to the survey work? Notices would come to the office asking for a vessel to be surveyed at a certain time, and at that time the surveyor would attend and do the work.

What fee would be paid to them? It would be according to the tonnage.

Can you tell me what rules there are as to the times of survey;—is there any rule that a survey must be carried out within certain hours? No.

What time did you recognise as the right time for a survey to be made; suppose, as a matter of convenience, a steamer required to be surveyed (say) at night? The surveyors would be expected to do it.

Was it understood in the Department that at whatever time a survey had to be made a surveyor should attend to make it? Yes.

You are quite sure of that? Yes.

At any hour, day or night? I do not know about night. Mr. Cruickshank has often been rung up at night as an emergency, and he has gone down at 12 o'clock at night. We were anxious to assist the shippers as much as possible; but at the same time if Mr. Cruickshank had said, "I will not go at this hour of the night," we should have backed him up.

While you were quite ready to facilitate the convenience of the shippers, the surveyors were not ordered to go out at all hours of the night? Certainly not.

You would be willing enough for them to do it, but if they took any exception to it you would say it was unreasonable to expect them to turn out? Yes.

I think you said the surveyors have made their surveys at different hours? Yes.

Now supposing evidence were given to us to the effect that fees have been given to surveyors who have done this work at night, what would be your view of such a transaction? It has been done without the knowledge of the Board or of the Department.

Supposing a fee was voluntarily given to a surveyor, would that be within the knowledge of the Department? No.

Do you think the Board would consider it right? No.

Would you think it was right? No. Of course, I cannot tell what the Board would think. I was entirely unaware of such things being done.

However, as the late Secretary to the Board, you can say that if it were done it was not with the knowledge of the Department? I knew nothing about it. It is the first I have heard of such a thing. I may tell you I remember a case where Mr. Cruickshank was offered a certain sum for certain work he had done and he refused to accept it.

You thought it was right that he should refuse it? He thought it was right.

The Board did not recognise any such practice? He told me, unofficially, that this money had been sent to him, and he informed Captain Hixson, and told him he was going to refuse it.

It was a practice not recognised by the Board? Certainly not.

One can quite understand that if such fees were given and taken *sub rosa*, it would naturally incline a surveyor to be easier in the survey work? The Board knew nothing about it.

And if it were done it was against the rules? Yes.

Mr. Wilson: Would you think it reasonable to expect surveyors to be available at any hour of the night, without some extra fee being paid to them? I think surveyors should have the same privileges as other officers, of certain hours in which to perform their duties, and if they work outside those hours they should be paid extra.

If they had refused to work in unreasonable hours, you say you would have backed them up? Yes.

And if they were required to go out at unreasonable hours, some extra pay should be given to them? Yes.

But that extra fee should not be paid *sub rosa*? No.

Mr. Delohery: Do you know of any case where surveyors have received money in that way? No; I never heard of such a thing.

It was not recognised by the authorities? No. Such a thing never came before the Board as fees for extra work; at any rate not to my knowledge. These fees are collected in the Customs; I do not know that the accountant in the Navigation Department would know much about it. The pilotage certificates were sent from the office to the Customs without going through Mr. Rule.

The Customs became your agents for the collection of the fees? Yes; according to the Act the fees had to be collected by the Customs and not by the Marine Board.

Although they were the fees of your Department? We never saw them, we simply sent along the certificates showing that the pilots had done certain work.

You say Captain Hixson might have arranged with the shipper not to charge the harbour pilotage fees? There might have been any amount of fees remitted, and I, as Secretary to the Board, would know nothing about it. I had nothing whatever to do with the money, and especially with the fees paid into another Department.

Would there be any record kept in your office of the fees remitted in that way by Captain Hixson? No.

Mr. Wilson: Did the Customs know that he had remitted these fees? The Collector of Customs might see him in reference to a particular case, and the agents might make a claim for a refund on a certain basis, and Captain Hixson might say, "I think it is a fair thing; I do not think the fee should be charged here." The

The Chairman : Would there be any record of Captain Hixson's action in such a case? No. It would not come before the Board.

Will you describe to us exactly what took place with regard to the collection of these pilotage fees by the Customs? That is a thing which did not come under my notice as Secretary.

You cannot tell us what the process was? I only know that the pilotage certificates were handed in to the office, and that they were sent on to the Collector of Customs.

Were any accounts kept in your office showing what was due on account of these pilotage fees? There is a record; there is the duplicate certificate, but that only refers to the sea pilotage, and not to the harbour pilotage.

You say the harbour pilotage fees are not shown? That was arranged by the agents; there was nothing in our office to show that.

How did the Customs know about the harbour pilotage fees, if you did not inform them? There is a book in the office showing the vessels moved by the harbour pilots.

How would that record come to the knowledge of the Customs? They came in to inspect.

The Customs people came in and looked at your books, and from the entries made there they arrived at the fees to be charged? Yes.

That was the practice? Yes.

Then we can see these books and see what has been done? Yes.

Mr. Wilson : The Customs people can see the books and ascertain all they require with reference to the clearance of vessels? Every removal is shown in the book.

The Chairman : Before they finally clear a ship on her departure they would send to the office and find out what was due, and see that the amount was paid? Yes.

Francis Rule sworn and examined :—

The Chairman : You are accountant in the Navigation Department? Yes.

We want you to describe to us the method adopted under the old Marine Board with regard to collection of pilotage fees? I know nothing about it, the Harbour Master's clerk attends to these matters.

You know nothing about it whatever? Well, I do know something, but I cannot give any evidence with certainty. I know that the pilotage rate is 2d. in and out.

That is scarcely what we want; we want you to describe the system adopted with regard to sending in of certificates and the collection of pilotage fees. We understand that the Custom-house collects these fees? Yes.

How do the Customs become acquainted with the fact that certain fees have to be collected? When the pilot does the work he furnishes a certificate to our Department, and we send that certificate on to the Customs.

Is there any record kept in your Department of these certificates? I believe there is. The Harbour Master's clerk would be able to give you all that information.

Who is that? That is Mr. Davies. He is acting clerk; he has been there for two months.

Mr. Wilson : Would not the shipping clerk at the Customs know that? I think he certainly would. Mr. Alpin or Mr. Miller would be able to furnish you with some information.

The Chairman : You know nothing personally? No, I cannot say with certainty; I should not like to give evidence. I know that when the pilots do the work a certificate is furnished. We send on one to the Customs-house, and a duplicate goes to the Audit Office every month.

Are you aware that any exemptions have been made in the charging of the harbour pilotage? I would not like to say anything about it.

We understand that it was the custom when the sea pilot brought a ship to the wharf sometimes to forego the harbour pilotage fee? I know nothing at all about that matter.

Would Captain Pettit know about it? Yes, he would know all about the harbour work.

Is he at hand now? If there is no ship in he will be available.

Mr. Wilson : Where are the pilotage accounts kept? At the Customs-house.

Captain Lindeman : The butts are always kept at the Witness Office. Mr. O'Connor, the clerk, keeps those.

The Chairman : I understand you wish to say something in addition to the evidence you have already given, Captain Lindeman?

Captain Lindeman : Yes; I wish to say that, in addition to the pilots' certificates, the removal certificates were also sent to the Customs daily. Every ship that is moved is booked, that service being performed by a harbour pilot, who sends in a certificate, which the Department sends along to the Customs, and on that they charge the fee. Some years ago, I remember, it used to be the custom to charge up harbour removals even when the work was done by a sea pilot; but on the agents objecting to this practice the charge was discontinued. Since that time I do not think any charge has been made, except for the sea pilotage, when the sea pilot has been the only man to do the work.

The Chairman : Then, it has been the common practice for the sea pilot to bring vessels up to the wharf and berth them? It was not a very common practice in my time. If any service of that sort was to be done, it was customary to send a message down to the Heads, telling the sea pilot to bring the ship up if practicable.

In that case the harbour pilotage was not charged? No.

That is, after the objection was raised? Yes; some years ago.

Mr. Delohery : How long ago? Seven or eight years ago. I may say this : that before 1897 the sea pilotage was so heavy, and was considered so unreasonable in view of the large tonnage of the vessels coming into port, that the Board were not particular about the harbour charges. They thought the sea pilotage—4d. per ton—was excessive in itself.

The Chairman : As a matter of fact it was a common thing, until recently, for sea pilots to bring vessels right up to the wharf? Yes; but it was always left to their own judgment. The instruction was, "if practicable."

The sea pilot had the option of saying if it was practicable or not to do so—the sea pilots had the option of saying that? Yes.

Mr. Brodie : When these matters were left to the discretion of the sea pilot, who collected the fees? The Custom-house.

Would the captain of the ship hand the money to the Custom-house? It was always paid through their agents. We never saw any of the money.

That was the rule—the pilots did not receive the money? No; the agents had to sign the certificate, and that certificate was sent to the Customs. The Customs people made the charge, and the agents paid it.

The Chairman : It was no duty of the Navigation Officers to receive money? No; Captain Hixson will corroborate that.

Can it be ascertained how many vessels have been brought direct to the wharf? Yes.

We should like to find out how often, during the last seven years, sea pilots have acted in this way? That can easily be ascertained; principally it was done for the big mail-steamers.

It can be ascertained what ships have been brought in in this way? Yes.

And the records, I suppose, will also show the time of day? The steamer log will show that.

Captain Bracegirdle sworn and examined :—

The Chairman : We are investigating certain matters in connection with the Navigation Department with a view to the regrading, and we want to have your opinion on one or two little points. First of all, what is your position, Captain Bracegirdle? I am Assistant Harbour Master.

We want you to inform us as to the method that is adopted with regard to the pilotage certificates and the manner in which the money is collected. We also want to know how the Customs are informed of the amounts due. For how many years have you been Assistant Harbour Master? Sixteen years.

Now tell us in your own way the method adopted? They have a book in the office, and when any harbour pilot is wanted, the names of the pilots are put down in rotation. There are three of us, and when a ship is booked we have to attend at the time appointed. When we have finished the job we have to make out a certificate in duplicate.

What is done with the duplicates of the certificates? They are given to the clerk. One goes to the Treasury, and the other goes to the office.

Who

Who sets you in motion? An order is brought to the office saying that the services of a harbour pilot are required.

Do they go to the Customs-house? Yes.

Then you take it in turn to move the ships? Yes.

And you say that, when the work is finished, you furnish a certificate in duplicate? Yes; to the clerk in the office. If a ship is going away, we sometimes bring her down, and then they have to pay for that removal.

The Customs-house has to see that all the fees due are collected? Yes. If I believe a ship is going away early in the morning, I tell the people in the office to keep a lookout and see that the removal fee is paid.

We understand that, some years ago, there were a great many more harbour removals than at the present time? Yes; now the sea pilots are permitted to bring ships up to the wharf.

Is that the case? Yes.

How many years ago was that system introduced? About seven or eight years ago.

Are you aware, in the case of a sea pilot bringing a ship to the wharf, if any additional pilotage is charged? No; it is not. Some firms in Sydney ignore the office altogether. When they want a sea pilot they send a message to the Heads outside the office altogether. Instead of sending an order into the office in proper form, so that it may be entered in the books there, they communicate with the pilots direct. There are two books in the office—one for the harbour pilots and one for the sea pilots. Instead of going to the office and saying what services they require, they ignore us altogether, and send telegrams to the Heads, and give orders to the sea pilots.

How long ago is it since that system was introduced? That is working in more and more. As people find out that they can do these things they do them.

Your office is ignored altogether? Yes; by some firms.

What firms do you refer to? Often it is done for the purpose of getting out of the payment of the harbour pilotage; there is no doubt about that. When a steamer is coming in, instead of telling the harbour pilot to meet the vessel, the sea pilot was instructed to bring her right in. They do not consider that a removal, and the Department have allowed that it is not a removal when the sea pilot takes the vessel direct to the wharf. In that way we are done out of some work; whether it is a removal or not, is for the Board to consider. Before this time that I speak of, when the system was altered, they were charged for the removal whenever the sea pilot took a vessel to the wharf, or direct from the wharf. We made out a list every month for the Customs; sometimes there were as many as twenty vessels brought up in this way, and the Customs saw that the removal was paid for, although a harbour pilot had not been employed.

That was about seven years ago? So far as I can remember, that finished about seven years ago.

What brought about the change? At that time they were paying a very high rate for the pilotage. The mail boats were paying up to £50 to be brought from outside the Heads to their anchorage, wherever it was—generally to the buoy.

What brought about the change? The high charges for pilotage.

How did the harbour pilotage come to be remitted? The Department allowed it.

The Navigation Department allowed the change to take place? Yes, the Marine Board did.

The result of that was that the Treasury lost a large sum of money? They considered that it was a great tax on the shipping, seeing that they were paying such a large amount for sea-pilotage. In the case of some ships the pilotage in and out, without removal, amounted to over £100.

The Marine Board took that heavy charge into account, and remitted the removal fee? Yes, but it introduced a bad system, because it allowed the sea pilots to squeeze in and do a lot of our work, with the consequence that when the sea pilotage fee was reduced the old system was not reverted to.

You say that it allowed the sea pilots to squeeze in. What interest would the sea pilots have in continuing to do this work? I do not know whether they got anything for doing it or not.

Has it ever come to your knowledge that the sea pilots have received anything for doing this work? I cannot tell that.

What object could they have in doing this work? I am sure I cannot say what it was. I should hardly think a man would go out of his way to look after a job like that if there was nothing attached to it.

The result of the departmental action was, that you were squeezed out of your work by the sea pilots? They were allowed to do it. I may have given a wrong impression by what I have said, but the sea pilots were allowed to do this.

And that, you say, commenced about seven years ago? I am not positive about the time.

I suppose the work of the sea pilots has largely increased since that time; they have taken more and more out of your hands? Yes.

Is it still going on? Yes.

Although the pilotage rates have been largely reduced? They have reduced them half.

The sea pilots continue to do this work? Yes.

Up to the present time? Yes; they do not call it a removal when they come from over-sea direct to the wharf; they call it one pilotage.

So that really the work you have had during the last seven or eight years has been largely decreased? Yes.

Now you were telling us about this system of communicating with the pilots direct. When did that first come into operation? It is not often done, still it is done; it was done only the day before last.

In what case was that? Dangar, Gedye's steamer. They sent a telegram to the Heads, saying that they required the services of a sea pilot, at 4 o'clock in the afternoon. They afterwards came to the office, just about five minutes to 3, and said they wanted a pilot at 3 o'clock. Of course, they had not ordered him at all in our office; they had sent a telegram to the Heads, but when they found they wanted him earlier, they came to the office.

Do you consider it a proper system for the sea pilots to bring vessels right up? It used to be done before that on Sundays, when we were not at work.

I mean on ordinary days? I do not think it is.

Does it mean that the Government lose the harbour pilotage for every ship treated in that way? The whole question is whether it is to be considered right or wrong for sea pilots to come up in that way. If the ship is coming straight in to the wharf, it is really only one pilotage, but sea pilots were only supposed to bring vessels up to the Pinchgut.

Is there any regulation or law which fixes that as the boundary? No; before the steamers came in all ships went to anchorage for a day or two before coming up to the wharf.

Is it simply the custom of the port? Yes.

And that custom is now largely broken into? That has been altered, owing to the rush of business. The ships do not want to be kept waiting, and they are brought to the wharf as quickly as possible.

Every ship treated in that way means a loss to the revenue to the extent of the harbour pilotage? Yes.

Do any of the vessels employ harbour pilots now, or is it common for them to be brought direct to the wharf? Oh, no.

What proportion of the vessels coming into port is brought up to the wharf by the sea pilots? Sailing vessels rarely come straight to the wharf; they have done so sometimes, but not often; sailing ships nearly always anchor down the stream.

Then the harbour pilotage is paid? Yes.

But with regard to the steamers, are the majority of them taken up to the wharfs direct by the sea pilots? Yes; the agents send a letter, or a telegram, down to the pilots themselves.

Mr. Wilson: Who do you say sends the letters down? The agents.

The Chairman: They communicate direct with the sea pilot? Yes, with the captain of the "Captain Cook"; the instructions to be given to the pilot when he goes aboard the vessel; sometimes they send telegrams, sometimes letters.

Do you think it right that the harbour pilotage should be evaded in that way? I do not think so; it means a loss to the revenue.

A large loss? Yes; it means more now. We used to get £3 for berthing a ship, now it is £4 10s. They muddled that in Parliament.

Is the sea pilot compelled to bring a vessel up to the wharf? The Marine Board's instructions were that they could do it, if they saw their way clear; but if they saw any danger in it they were not to do it.

They had the option of refusing; they could do this at their discretion? Yes.

Can you tell us whether ships are brought up in this way at night? Yes; they are sometimes.

Often? Not infrequently.

They

They are brought up to the wharf by the sea pilot? Yes; when the conditions are favourable.
 If it is a clear night, I suppose? Yes; if it is a favourable opportunity.
 However, it is left to the pilot's discretion;—if he chooses he may say that he will only bring the vessel to a certain point? He has always the power to excuse himself. He may only bring the vessel to her anchorage.
 Where is that point? In Neutral Bay, or below Garden Island, wherever he sees a vacant berth on either side.
 Where do the duties of the sea pilot end? At Pinchgut.
 Then the harbour pilot's duties commence? Yes, we are instructed to go on with it next morning.
 Could a return be compiled from your books as to the number of times sea pilots have brought vessels up to the wharf? I think it could only be done by getting a list of the vessels entering the port, some of them are exempt.
 There are no exemptions now, are there? Yes, there are.
 But not as many as before? They are gradually dwindling away; but there are a good few yet.
 Do the sea pilots show any desire to oust you from your work;—do they show any particular desire to bring the ships up? They seem willing to do it. They are not averse to doing it.
 Mr. Delohery: Did you ever make any complaint about the sea pilots acting in this way? The head of the Department has always known that they did it.
 It was well known that the sea pilots did this; but you made no complaints about it? I think the Harbour Master has pointed it out.
 To whom? To the old Board.
 Mr. Brodie: In the case of the removal of any vessel after it has been anchored off Pinchgut, is a fee charged? Yes.
 And for any other removal? Yes, they are all charged now. The only cases where the removal is not charged is where the sea pilot takes the vessel straight to the wharf.

Arthur S. Davies sworn and examined :—

The Chairman: You are relieving clerk in the Navigation Department? Yes.
 We want to ascertain from you what is done with regard to the applications for pilots;—we want to know the system adopted in the case of both sea and harbour pilotage? In the case of sea pilotage, for vessels coming in. I have nothing whatever to do with those applications. Those vessels signal from outside the Heads, and the signal-master at the South Head runs up the signal which notifies the pilots that their services are required outside. As regards the outward pilotage they come to the office, and they book their requirements in a book which is called the pilotage book, or else they send a letter down.

Do you know anything about the agents communicating direct with the Heads? They are not supposed to.
 Do you know whether they do that or not? I believe there have been a few cases in which such a thing has been done, although, of course, I cannot say for certain. I have brought one of the books showing the form of certificate used. These forms are filled in showing the services rendered by the pilot, and at the end of the month a return is made out for the Audit Office showing the number of harbour removals, and the same with the sea pilotage.

Do you retain any record in the office? I keep a record of the removals in the book, in the harbour removal book. The removals are entered up against each ship, and as one of these certificates is given to me, I turn up the name of the steamer in the book, and I enter up "from Mort's Dock to stream," or whatever the removal may be.

Mr. Brodie: In connection with these removals, I may tell the Board that there was a leak in the Customs sometime ago, and I sent a special audit officer, Mr. Robinson, to investigate affairs. I think that if he were called, and if the Board put a few questions to him, he might throw some light upon some one or two points which you would like to have cleared up.

The Witness: The Customs have been complaining lately about not getting the harbour removal certificates, and they say they cannot charge the removal fees;—they have no means of knowing how many removals are due against a particular vessel. Say a vessel wants to go out to-morrow. They clear to-day, and the removal will not take place until to-morrow. We cannot get the harbour removal certificate before the removal has taken place, and in that case the vessel has cleared, and there is one removal due.

The Chairman: Are there many cases like that? No; but since I have been in the Department I had to send to Newcastle to get the removal fees from one vessel which had cleared in the way I have described.

Why not make them pay beforehand? That is a suggestion I made. I suggested that they should produce a certificate from the Navigation Department as to what dues are owing to the Custom-house before the Customs grants a clearance.

Is not that always done? No; there is no book of that description, there is no certificate of that kind. I made the suggestion to the Secretary the other day. It is done in Newcastle, but not here. It was at Newcastle that I got that idea.

[Mr. Wilson retired at this stage.]

Alexander Marshall sworn and examined :—

The Chairman: We are not inquiring directly into this matter of yours, on which you are suspended, Mr. Marshall, and which you have freely admitted; but we are at present conducting a wider investigation. We are investigating the general management of the Navigation Department, with a view to regrading the officers. We desire to ask you certain questions with regard to that Department. Before putting those questions I wish to tell you that if I put any question, or Mr. Delohery, or Mr. Wilson, asks you any question which you think will incriminate you, you can refuse to answer; but in the event of your refusal you will have to pledge your oath that to answer such a question would be to injure yourself. I am making this explanation, because we do not wish to take you unawares. In the first place, you say this is the first time you ever asked for a fee? Yes.

And it was the only occasion? Yes.

Now, I want to ask you another question. Have you ever had any fees given to you for inspecting a vessel's machinery, out of office hours? Yes; gratuitously.

Tell me who has given these gratuities? I have received them two or three times from the Adelaide Company; that is the only company I ever received them from.

You say two or three times; is that the outside? Yes.

How much have you received? It has invariably been £2 2s. when I have done a late or early survey.

By late or early survey, you mean a survey made before 9 o'clock in the morning or about half-past 4 in the afternoon? Yes; I have surveyed boats at 6 o'clock and 7 o'clock in the morning, and at half-past 10 at night, and I have surveyed some on Sundays.

Those were the only occasions when they have offered you £2 2s.? The only times they sent it along to me; I did not ask them for it or expect it.

They sent the gratuity and you accepted it? Yes.

How many times did you say—three or four was it? I dare say it is four times, at the outside, since the Adelaide Company started running here.

Are you aware that others have received similar gratuities? I have heard it; but I cannot swear to it. I would not swear that they had or that they had not.

Can you give us the names of those whom you have heard received gratuities in this way? I have heard it from the parties themselves.

Which parties? My colleagues.

Who are they? Mr. Selge and Mr. Marr.

They both have told you that they had received similar fees? Well; yes.

And that they both of them had accepted these gratuities? Yes.

How long has that been going on? For the last two or three years, since about the time that the big Engineers' strike was on. I should say about 1896; but I am not quite sure.

You have received no fees or gratuities from anyone else? I have received nothing from any other firm.

Or any person? Yes; or any person. These are the only fees I have received.

You

You say that both Mr. Selve and Mr. Marr have told you that they have received similar fees? Yes; from the same source.

Do you mean from the same company? Yes; from the same company.

And from no others? Not that I am aware of.

You are quite certain you have not received gratuities from anyone else? Quite.

Is there anything else you can tell us which will assist us in our investigation? I do not know of anything.

Was your Department aware that you received these gratuities? I think Mr. Cruickshank was indirectly aware of it.

You are not certain? No; I am not.

Did Captain Hixson know about it? I think he did. Mr. Selve told me that when he got his first fee for a late survey that he took the letter in and showed it to Captain Hixson, and Captain Hixson said he did not want to know anything about it; if it was overtime, or something to that effect—he did not want to know anything about it; he did not want fees to be applied for.

That was told to you? I was told that.

Who told you? Mr. Selve told me himself.

Mr. Delohery: How did it first come about, do you recollect, that these gratuities were paid? Just through late surveys.

Did you make application for it? No.

Was it offered to you? A cheque was sent along to Mr. Selve in a letter from the Adelaide Company. He simply opened the letter and showed the cheque to Captain Hixson.

How long ago is that? I think it was about the time of the Engineers' strike was on.

Was it before that? I do not think so.

Mr. Brodie: How did you receive the first fee from the Adelaide Company? Just in the same way as Mr. Selve, by a letter being sent, addressed to me; I did not know what was in it until I opened it, and then I found a cheque for £2 2s.

Did you take the cheque to Mr. Selve? I showed it to him, and he said that a similar cheque had been given to him; that he had shown it to Captain Hixson, and that Captain Hixson said he did not want to know anything about it.

That was the first cheque you received? Yes.

And the subsequent cheques you received,—did you show those to Mr. Selve? No, I did not; I just kept them.

You never mentioned them to him? No further than this, that the others knew we were surveying late, and when the letters were brought in, if they saw one from the Adelaide Company they might suspect there was something of the sort in it. It is seldom that a junior officer gets correspondence from a steamship company which does not come through the head of the Department. That is the only thing, and they might surmise there was something of the sort in the letter. The letter might be lying there for four or five hours. I frequently go to Mort's Dock first thing in the morning, and I do not get back till the afternoon; perhaps I might be a day out of the office altogether, and that letter might be lying on my desk for twenty-four hours.

As a matter of fact, you only mentioned it to Mr. Selve on one occasion? Yes.

Did Mr. Selve mention to you on more than one occasion that he had received a fee? No, he did not.

You only remember the one occasion? Yes.

Did Mr. Marr tell you that he had ever received a fee? No; I scarcely know how to put it. I do not know whether it was through Mr. Selve, or from Mr. Marr himself, that I heard he had received a fee; I would not be certain.

Have you heard of any other officers? No.

Is Mr. Selve your senior officer? Yes.

Is Mr. Marr your senior officer also? No; junior.

Did you mention to Mr. Marr the fact that you were receiving these gratuities? No.

Did you mention it to Captain Hixson or Captain Lindeman? No, but Mr. Selve did.

Were those open cheques that you received? I cannot say; I think they were crossed.

What did you do with them? I cashed them.

Mr. Brodie: Did you cash them in the office? No.

Did you cash them at the bank on which they were drawn? Yes, I think I did.

Mr. Delohery: Have you a banking account? No.

The Chairman: You must not mention a word to anybody about the evidence you have given here to-day. As regards your own matter, we shall not keep you longer than we can help. We trust to your honor not to say a word to anyone about your evidence in this case.

John Robinson sworn and examined:—

The Chairman: You are clerk in the Auditor-General's Department? Yes.

Mr. Brodie: Do you remember that you took up an inquiry, under my directions, into the checking of the pilotage and harbour removal dues? Yes.

Will you tell the Board the procedure in regard to the collection of those dues? In connection with the pilotage, when a ship arrives or departs from the port she reports the fact at the Customs-house, and it is entered in what is called the Report Book. The master or his agent—in the case of a foreign-going ship, it is the master himself, and if an inter-colonial vessel, the agent—comes down and enters his ship inwards on arrival, and outwards on the point of departure; and he then either tenders the pilotage dues or produces his exemption certificate. The production of that certificate is noted, as well as the number of the certificate, in the Report Book. In the course of the day, the Marine Board furnishes the Customs Department with the certificate from the pilot, saying he has reported such and such a ship inwards, and that certificate shows that the master of the vessel had the services of the pilot, and the pilotage fee is charged up against the vessel.

That is done whether the master has an exemption certificate or not? Yes, in those cases where the services of a pilot have been employed.

Although a master may have an exemption certificate he may sometimes employ a pilot? Yes. If he is off the coast on a dirty night, or if he has a valuable cargo, which frequently happens in the case of a big boat like the "Rome." Although Captain Brown holds an exemption certificate, he will not bring the vessel in in bad weather; he hoists his flag for a pilot, and a pilot goes out to bring in the ship. Notwithstanding the production of a certificate in that case, if they relied on the pilotage certificate, the revenue would lose if he were to produce his pilotage exemption certificate. Then we have a certificate from the pilot saying that Captain So-and-So piloted the steamship "Rome" into the harbour; that certificate shows that the pilotage has been properly paid. The same thing is done when a ship is clearing. In the Customs-house, they may know that the master of a vessel is exempt. They may take his statement that he has an exemption certificate; but here, again, comes in the certificate from the Marine Board showing whether he has had the services of the pilot or not.

It is a proper check? It is a thorough check in respect of the payment of pilotage fees. Under the amended law, with regard to removals, if a master is not the holder of an exemption certificate he cannot remove his boat from one portion of the harbour to the other; that is to say, he can do it, but if he does, he is liable for pilotage fees. When an order is given to one of the harbour pilots to remove a vessel, he furnishes a certificate to the Customs-house saying that the "Rome" has been removed from Neutral Bay to Circular Quay, or from the Circular Quay to the stream, as the case may be. As in the case of the pilotage, that certificate goes to the Customs-house, and the services rendered entered in the Report Book, and debited against the "Rome." When the master comes to clear, this book is turned up to see what dues are owing, and the amount is collected.

Do the pilots each keep a book of removal certificates? Most of them have certificates themselves.

In book form? Yes, in duplicate.

Is it possible for one of these harbour pilots to use a removal certificate form surreptitiously;—do you check the records of the Navigation Department to ascertain whether each certificate is from a current book, and not from a second book? No. I mentioned that when you were in the Department. I thought the Marine Board should keep a book or some kind recording all the removals.

Were they relying on these certificates? Yes, they had a sort of rough exercise book, and when the agent came in and reported they wanted the "Rome" moved, they would probably note it down. But it did not follow that the "Rome" was moved. The pilot received no money and the Marine Board received no money.

They

They are not allowed to receive money, that is what you mean? The Navigation Act provides that all moneys paid on account of the Marine Board shall be paid to the Collector of Customs.

Suppose one of the harbour pilots removed a vessel from one point to another in the harbour, and he suppressed his certificate, would you be able to check that;—would you be able to find out that the certificate had been held back? It is possible to check every removal by the certificate.

You can trace every removal from the certificates? Yes.

But there is no independent means of checking the removals;—it all rests with the pilot? Yes.

And if the pilot were dishonest, could he ring the changes on you? If he performed the service, and never furnished a certificate, we should know nothing of it. If the tide-surveyors had a book they might be able to make an independent note of some of these removals.

Is there an application in the first instance for a pilot to remove a vessel from such and such a point to such and such a point? The agents applied to the Navigation Department, previously the old Marine Board.

Is there a written application? No.

Can an agent go direct to a pilot? He might see Captain Pettit, the Harbour Master.

Does he keep a book recording these removals? I do not think so.

Would it be possible to keep an application book; you say some of these removals are done hurriedly? Yes, if they kept a register and noted down through the Harbour Masters every removal required, that would be a check. There is nothing to prevent a pilot removing a boat unless they have some idea of what he is doing. A pilot brings a boat up, and he may be asked to remove a vessel from one part of the harbour to another. He may do that work quickly, and on his way back there might be another vessel which required to be removed; if he performed that second service there would be no means of checking him.

But in the case of the sea pilotage you think it is possible to check everything that is done in that way? Yes; the great safeguard is this, almost invariably, of course there are exceptions, the captain who holds an exemption certificate will not employ a pilot. Sometimes, however, he does, as in the case of Captain Brown; and, if the pilot suppressed that certificate we should have no knowledge of the service having been performed.

The Chairman: As a general rule there is a greater check on the sea pilots than on the harbour pilots, because there is an independent record, but there is no record of the removals, and in those cases you must trust to the officers? Yes, I think so. The Harbour Master at Newcastle furnishes a pilot certificate in every case, though it does not follow that they have had the services of a pilot. In those cases where the masters are exempt, he notes the fact on the corner of the certificate; it is an excellent system.

Mr. Brodie: Would that system work here? There is hardly any necessity for it here because we see so much of the shipping, and besides we do not altogether rely on what we see, we look at the papers every day and note the movements of the vessels. We always get from the Department the certificates inward and outward. At Newcastle we get no certificates, but we get a return from Captain Newton, the Harbour Master. Every quarter he furnishes a return showing the ships inward and outward, and the number of removals, and that is checked with the Newcastle accounts. Of course, in connection with the pilotage, the exemptions are becoming less and less every year; because, under the new Navigation Act, the sea pilot's certificate is strictly limited to British subjects, and to Australian registered ships trading between Australian ports only. The masters of deep-sea ships will not be able to get exemption certificates. There was a case where £20, in connection with pilotage fees due to the Customs-house, sometime ago, was overlooked and subsequently recovered.

How was that overlooked by the Department? I think the vessel was the "Friedrich der Grosse"; she had an inward pilotage and an outward pilotage, and two removals, and I think the Customs Office, in collecting the dues, when the vessel was clearing, took the removal for the outward pilotage.

It was a mistake? Yes; it was a big difference to the revenue. The removal fee is £4, while the outward pilotage is £20; the extra removal and the pilotage fee were recovered.

[The investigation was adjourned until 10 a.m. the following day.]

THE investigation, under section 8 of the Public Service Act, into matters connected with the Department of Navigation, was resumed and continued on Friday, 7th September, 1900, at 10 a.m.

Present:—

Mr. J. BARLING, Chairman, }
Mr. C. DELOHERY, Member, } Public Service Board.
Mr. WILSON, Member, }

Mr. G. E. Brodie, Assistant Auditor-General and Chief Inspector Public Accounts.

Henry Selfe sworn and examined:—

The Chairman: We are holding an investigation into the Department of Navigation with a view to the regrading of the officers, and we desire you to give us some evidence. Your name is? Henry Selfe.

And the position you occupy? Engineer Surveyor.

You are the next one to Mr. Cruickshank? Yes.

How long have you held that office? Going on for twenty years.

Now, will you tell the Board what are your hours of work? As a rule, I get to the office exactly at 9 o'clock, but sometimes, if I have nothing important on in the morning, I get there at half-past 9; it all depends on which boat I catch. I live at Drummoyne. The boat I usually catch enables me to get to the office exactly at 9; if I miss that I get in at half-past 9.

What hour do you usually leave off work? We have no regular hours.

Are you often called upon to perform services after the ordinary office hours? Not very often.

But I suppose it occasionally happens? Occasionally. If we are on a survey in the afternoon, say, we have no idea whether it will take two or three hours to complete; but we invariably finish before leaving.

Are you ever called upon to begin a survey late at night? Not to begin a survey.

Have you never been called upon to begin a survey after half-past 4? I never have.

Are you aware whether other surveyors have done so? I do not think so. I do not see how they could. It generally takes one or two days to prepare a ship for survey, and the vessels lay up to be overhauled.

You are not called upon to perform services after the ordinary hours? No, only to complete surveys, as I said a moment ago.

How often are you required to complete a survey began in office time? We almost invariably commence and complete them within office hours; but many times the vessels are not ready to be seen under steam to enable us to finish the survey.

You must see them under steam before you complete the survey? Yes.

And in a case like that it may be you would make the inspection after office hours? Yes, but not often.

Is there any office regulation by which you are compelled to do that;—suppose you commence a survey, and you have not finished it by half-past 4, is there any regulation by which you are compelled to finish that survey before leaving the vessel? There is no regulation; but you could not delay a steamer full of passengers for the sake of office hours.

If you have to complete an inspection under steam you would not exactly regard the office hours? We would go at any time to enable them to get away.

That is to inspect them under steam? Yes.

How often do such cases as that arise? Not more than four or five times a year. Those would be my own particular cases.

That would be the total number of times you would be called upon to perform that duty out of office hours? Yes.

Now

Now I want to ask you another question ; I have reasons for asking it ; but you need not reply to it if you think it will injure you in any way? I will answer any question you ask.

If you refuse to answer you must declare that to do so will be to injure you ;—have you ever received any gratuity from any steamship company, or from anyone, for doing work after office hours? Yes, I have.

Who are the persons you have received it from? The Adelaide Steamship Company.

Is that the only company? Yes.

How often have you received fees from the Adelaide Steamship Company? I think three times.

What have you received? A cheque for £2 2s.

On each occasion? Yes.

For what services was that fee given? That was for allowing one of their vessels to get away under steam at 10 or 11 o'clock at night. On one occasion it was for surveying a ship in Mort's Dock on a public holiday.

Then they gave you a gratuity? They sent it to me in a letter.

Is that recognised by the Department as a right thing to do? Well, the first cheque I received I took it in to Mr. Cruickshank. That must be about six years ago. I had a very courteous letter from Mr. Prosser, thanking me for my kindness, and trusting that I would accept the enclosed cheque as a slight recognition of my services; something to that effect. I took the letter in to Mr. Cruickshank, and he said, "I would send it back, it would never do to accept it." I said, "I do not know about that, you may be able to afford to snub these people, and after a letter like that it would be a direct snub to send the cheque back. I will see Captain Hixson." I took it in to Captain Hixson; he read the letter through and said, "Well, you know, Mr. Selfe, these people do not send a cheque unless they get full value out of you for it." I said, "Shall I accept it"; and Captain Hixson replied, "I do not want to know anything about it." I told Mr. Cruickshank what had passed, and he asked me if I proposed to send it back; and I said "No, I want the money more than the Adelaide Company do." They had kept me in town one night, as I lost the last boat home.

You kept the cheque? Yes.

And after that you received four or five more cheques? No; I only had two others.

I thought you said you had five altogether? No; three.

When was the last one? Over twelve months ago.

You have received no money from anyone else? No.

Do you consider that receiving money in that way is conducive to the pure administration of the Department? Well, I do not think a cheque of that description could harm the Department.

As a general rule do you think the fact of officers receiving money in that way conduces to the pure administration of the Department? Well, it depends on how anyone takes it. For myself, I thought from the times I had been out at night I was justified in accepting it. Now, on one night I had to go out at 8 o'clock to see one of the North Coast Company's vessels under steam. When I got down to the ship she was not ready, and I was told it would be 10 o'clock. I came back again at 10 o'clock, and she was not ready; it would be 11 o'clock. I said if the vessel was not ready at 11 o'clock I was going to clear out. My last boat leaves at a quarter-past 11; and I said I was not going to stop in town. The superintendent engineer then told me, "If you stop in town and help us to get the vessel away we will send you home in a cab." You not stayed, but I never even got a thank you for that. It rested with the superintendent engineer.

Do you think it is possible that a person with a less conscientious sense of duty than yourself might argue in this way: That the company which had been good enough to give a gratuity of this sort deserved some consideration at his hands, and therefore he would be less careful in passing the vessel; that is to say, he would not be so precise and curious in looking into matters.

Mr. Wilson: You might put it in this way. Is the practice liable to abuse?

The Chairman: Yes. Is the practice liable to abuse? I think it is possible in some cases.

Although it would not affect you? No.

A person with a high sense of duty would not be affected by it? No.

But a person less conscientious might be led to pass a vessel with defects which under other conditions might be condemned? It might with some people, but I cannot realise a man's sense of justice and morality being at such a low ebb as that the matter of £2 2s. should affect his judgment with regard to the safety of a ship.

Mr. Wilson: Unfortunately it is not the high-minded man we have to legislate for.

The Chairman: No; we have to legislate for the low-minded man. I ask you if the practice of accepting these fees is not liable to abuse? It might set up a precedent which would lead to abuse.

Being conscious of your own integrity it did not affect you? I was glad to receive it; to tell the truth I was glad that some one at any rate recognised that we had put ourselves out of our way to suit their convenience.

I do not suggest that you should not be paid for such services, but would it not be better that the fee should be paid publicly and openly? Yes. I was on the Blackwattle wharf last Saturday. I was come for in a cab at 8 o'clock, and they could not find me, but they picked me up at the Balmain Club, and I went over there, and waited for three-quarters of an hour shivering with cold, waiting for a boat, one of Dalgety's boats, to come up to the wharf. I was on that wharf three-quarters of an hour waiting for that steamer, so that I could inspect her on arrival, and let her get away again quickly. They had a cab waiting for me to catch my last boat. I completed the survey, and they said, "We are very much obliged to you, Mr. Selfe." And I said, "We were only too pleased to oblige the shipowners. We know what the detention of a ship for a couple of days means to a company." There the matter ended.

The question is not whether some recognition should be given for services rendered in that way after hours, but whether it is proper that it should be done in this way, *sub rosa*, a way which you admit would be liable to great abuse? It is possible it might.

Is that your letter Mr. Selfe [*handing witness document*]? Yes.

I will ask the Shorthand-writer to read it. [*The Shorthand-writer read the letter as follows*]:—

"Sydney, September 4th, 1900. To the Secretary, Public Service Board. Sir,—I trust I may be excused for bringing the following facts under the notice of the Board as a supplement to my statement before them. Mr. Marr, who was Chief Engineer of the s.s. "Miowera," received a salary of £25 per month with £2 per month bonus, from the company, and extras equalling about £30 per month. He gave up this position and joined this Department at £25 per month; and on the same morning that he appeared before the Board he was surveying the "Miowera," the Chief Engineer receiving 4s. per day victualling allowance in excess of his salary of £25 per month. Mr. Marshall is essentially an engineer with no business capacity, and I am confident his offence is an isolated case, and he had no idea of its seriousness. His altered private surroundings have tempted him in a weak moment to supplement his income (of £25 per month after fifteen years' service), he evidently for the time having lost the dignity of his position. I have, &c., HENRY SELFE."

You are aware that Mr. Marshall is under suspension, and that his case is before the Public Service Board for decision? Yes.

And I suppose you are aware that no decision has yet been given? Yes.

What was your object in sending that letter to the Board? My first object in mentioning Mr. Marr's case was this: He said to me, after he had been before the Board, "This is a bit of an anomaly. I came straight away from my old ship to the Board, and there is the Chief Engineer receiving £25 per month, and getting 4s. per day victualling money. And here am I, representing the Government of New South Wales, surveying this ship, and only getting £25 per month." I said "Did you tell the Public Service Board that." He said, "No." I said, "I think they should know it." He said, "Well, to tell the truth I might have mentioned it, but I did not think of it." That was the first thing. The other thing was that I thought I might perhaps give you a little idea of Mr. Marshall's character. He is one of those hard-headed Scotsmen, and he has never been mixed up with anything but engineering all his life, and I do not think when he did that that he had the slightest idea of the enormity of his offence. He could not have. In all engineering matters he comes and consults me, and, however, a man like him could go and do a thing of that sort without asking me I cannot possibly understand. We know that men do stupid things on the spur of the moment, and I believe that when that captain asked Marshall to survey the ship, he caught him on the spur of the moment, when he was doing another vessel, and did not send in any regular notice for this survey of the ship's bottom. No doubt he told Marshall if he would do it for him then he would make it worth his while. Marshall went there and through some stupid idea that the captain should send him something, he thought he would give him a reminder and so he sent the bill in. It was such a paltry absurd thing for any man of common sense to do that I cannot understand how he came to do it.

Mr. Wilson: If he is the hard-headed Scotchman you say, he does not appear to have been particularly childlike in this transaction? He never had anything to do with business, he has always been working at engineering. You would think a man would have business sense enough to tell him that he was giving himself away for a matter of £2.

The Chairman: Was Mr. Marshall aware that you were accepting these gratuities from Mr. Prosser? I think he was; I did not hide the matter at all.

You think he was aware of it? Yes, I think so.

Do you not think this exactly illustrates what you have already admitted that the practice of taking these fees, in that underhand way, I do not mean in a bad sense, but *sub rosa*, is liable to lead to abuses? There is no doubt about it; that was the beginning of the abuse of it, on his part.

The abuse of a system which you yourself have come under? Yes.

Do you not begin to see the evil of the whole thing? There is no doubt it is an evil, if the thing is done in that way, *sub rosa*, but I did it perfectly openly, I never made any secret of it.

Mr. Wilson: Having shown your first letter to Captain Hixson, in that particular instance, you think you had the sanction of the Department? I considered I had.

That is in the particular case where you showed the letter to the head of your Department? Yes; I have only had the three cheques.

The Chairman: What did Captain Hixson say to you? Well, it is a long time to remember, but it was something to this effect, "These are the sort of people who would get full value for their money, or they would not send you a cheque. Well, I do not want to know anything about it."

You thought that conveyed his sanction, and afterwards you continued to accept these gratuities? Yes; but I never made the slightest demand for them.

The company sent them to you? Yes.

Mr. Wilson: These gratuities were given voluntarily; you did not suggest to the company that they should pay you? I never gave the slightest hint. In fact I am so particular that I would not stop on board a steamer for a meal. You give yourself away to a certain extent if you get on too social a footing with those on board.

Marshall with all his simplicity demanded a fee? Yes.

Mr. Brodie: I understand you to say that regular notices were submitted to the Navigation Department when the survey of a vessel was required to be made? Yes.

In the cases in which you received these fees for working after hours, was the regular notice submitted to the Navigation Department? Yes.

Is any time placed on the notice when it is submitted? The time is invariably put down. For instance, the notice would say that the vessel could be seen at Mort's Dock at 10 a.m. on such and such a day, and under steam at the Company's wharf at 3 or 4 p.m. on such and such a day. Very often the time for viewing the vessel under steam is put down "as per arrangement."

These regular notices are filed, are they? Yes.

Who has the custody of these notices? We have the custody of them, and then they go to the Secretary. Who do you mean by "we." Who is the senior officer? Mr. Cruickshank. The notices are sent up to us, and then as near as possible we keep to our own steamers—that is, we stick to the ones we have been in the habit of surveying so as not to change ships any more than possible. The ship is put down on the board to the surveyor who generally surveys it.

You say that each of the Marine surveyors retains possession of the notices under which he makes his survey? We file them.

Individually? Yes.

Mr. Cruickshank does not retain them? No; we have a file on our desk, and after the work is finished we write in the corner "coaled," such and such a day, "passed and declared such and such a day," and then we put it on the file.

Is there any register kept by an independent officer in which these notices are recorded? Yes.

Who makes the records in that register? We make a declaration and take the affidavit to the Secretary when the ship is finished.

These notices are recorded in a register in the Secretary's Office, are they? We have to make a declaration; the Secretary is a Commissioner, and we go before him and declare that the contents of this form are true. We put that in and the shipwright puts another in, if it is a wooden hull; then on the strength of these declarations the Department issues a certificate.

In the cases you have mentioned to the Board, in which you received these fees, can you put your hands on the notices? It is so many years ago. I have not had anything for a couple of years. I might find out by looking back through my note-books.

Mr. Delohery: What did you do with the cheques;—did you bank them? I paid them into my account.

Could not you find out the date of those payments in? I do not think so.

Every cheque is shown in your bank-book? It would be a job to trace them; I might have paid them in with some other cheques. You would get at the date better through the Adelaide Company. I should have in my note-books a record of all the vessels I surveyed at night.

Mr. Brodie: It would be much better if you could furnish this information yourself; you can more readily put your hands on this information than anyone else? I cannot undertake the job; I do not know what clue I could have which would enable me to find out the dates I got these three cheques. I cannot tell you whether it is one, two, or three years since I got the last.

Would it take you long to run through your file and look over the notices for the past twelve months? It would not be mentioned in the notice.

But the notices would enable you to refresh your memory? No. It is not on the notice. The notices would not show the times that we had completed the inspection and when the vessel got away under steam.

No, but the names of the vessels appear on the notices? We survey these ships every six months.

Would there not be something on the notice which would refresh your memory? No; not on the notice.

Mr. Wilson: The Adelaide Company's books might show it, or possibly your bank pass-book?

The Chairman: You say you paid the cheques into your own account? I am not sure that I did. I expect I did.

Were they crossed cheques? Yes.

Then would not that almost necessitate your paying the cheques into your account? I might have cashed them at the Balmain Club. I really cannot say what I did with them; it is so long ago. The only way I could possibly find out would be to look through my notes. We write down in our note-books all the particulars of the surveys we make, and we record everything we have called attention to. If there are any special repairs to be done, we cautioned them that those repairs must be completed at the next survey. We put down all the defects in case we do not inspect the vessel next time, so that whoever makes the survey may look at our notes and find out all the weak spots that specially require looking at. We write these things down in pencil in a field-book, and the clerk takes out those notes from the field-book and writes them down in ink against each ship in the register.

Are you aware whether any other officers, besides yourself and Mr. Marr and Mr. Marshall, have received cheques in this way? I do not know of anyone else.

This fact has come out in evidence. We had Captain Lindeman before us yesterday, and we questioned him about this matter. He was asked if the practice was recognised by the Department, and he said, "Certainly not; the Board knew nothing about it." Then he was asked, "If it were done it was against the rules," and he answered "Yes." Do you not think, seeing that the Secretary of the Department knew nothing about it, as the whole thing was *sub rosa*, that if the system were allowed to continue it would lead to the corruption of the whole of the Government Departments? Mr. Marshall's case proves that. I would never have thought so until that case happened.

You see the evil of the thing now? There is no doubt it is a great evil. He has certainly abused it. But I think a man should be paid for his services. If he is kept out of bed at night to do people a good turn he should be paid. It means £30 or £40 to these people if the ship does not get away.

Mr. Wilson: The service should be paid for openly? I never dreamt of making a demand, because it is of such small importance to the surveyor, though it is of immense importance to the company.

The

The Chairman : That is not the question. It is not whether it is a convenience to the company or whether payment should be made. The question is, is it right for the payment to be made in that way ;—you admit that it is not right ? It certainly should be done through the Department. But there are only two people in the Department—Captain Hixson and Lieutenant Lindeman. The Department is run like a man-of-war—they were on the quarter-deck, and we were the men in the fore-castle ; we were really. As for being considered officers, that was never done. In the office they did not know what was going on. Ships were condemned, but we never told them about it ; it would be no good if we did. We gave the shipping people six months' notice that certain repairs must be done ; and at the expiration of that time we sent them a notice telling them what work was required to be done. We sent it to the superintendent engineer ; he understands it, and so that he shall not say we have arranged it beforehand we send a note.

It rested entirely in your hands what should be done. Your office was not acquainted with it at all ? Not at all.

It was left in your hands whether you called upon the company to spend thousands of pounds or £10 ? Yes. When on board ship we were entirely masters of the situation ; everything was in our hands.

Neither Captain Hixson nor Captain Lindeman knew anything about it ? No, nor the Board either.

You gave your instructions and orders without consulting the Head Office ? We were obliged to ; everything is done in that way.

It rested entirely with yourself as to whether you should order £10 of work to be done or a thousand pounds ? Yes ; and many a time we ordered £10,000.

Does not that fact bring out most conclusively the absolute danger of receiving "tips" from steamship owners ? If you look upon it in the light of "tips" it is an abuse altogether ; but I did not look upon it as a "tip." I looked upon it as money earned. I considered that by doing the work I was placing them under an obligation to me. When I got that letter from Mr. Prosser, and saw the kindly way in which it was worded, I considered it would be an insult to him if I did not take the cheque. Mr. Cruickshank said, "I would not take it." I said, "I cannot afford to be so beastly virtuous as you are. I consider I have earned it, and I shall stick to it."

Mr. Brodie : Is Mr. Cruickshank the chief officer of your Department ? He is senior.

Have you to report matters to him in connection with your surveys ? In anything of vital importance we always consult with him.

After he spoke so strongly when you mentioned having received that first fee, did you mention to him subsequently that you had been tendered other fees ? No, I do not think I did. I believe it is only three—I think it is just three—that I have received, and that is over a period of six years. The thing has gone out of my mind.

William Douglas Cruickshank sworn and examined :—

The Chairman : We are holding an investigation into the Navigation Department with a view to regrading the officers, and we wish to ask you a few questions. You are Chief Engineer-Surveyor of the Navigation Department ? Yes.

I want to ask you what rules you have as to the times within which you survey steamers—what rules and regulations do you observe with regard to your working hours ? None whatever ; we have no hours.

You consider that at any time you may be called upon you are bound to obey the summons ? I do.

I do not think I need go into a lot of detailed questions, but I may come to the point straight away. Evidence has been given here that gratuities have been sent without the knowledge of the Department to some of the surveyors. Do you know anything about that ? Not until I came back from Port Darwin. I remember some years ago that Mr. Selve one day brought me a cheque which he said he had just received. I forget whether it was for attending some steamer after hours or for some special occasion ; but, so far as my memory serves me, I told him to send it back again. He said he would take it to Captain Hixson, and subsequently he informed me that Captain Hixson had told him he did not want to know anything about it, or something of that sort. That is the only occasion I knew of before I came back from Port Darwin.

That is a few weeks ago ? Yes.

You never heard of it until a few weeks ago ? Yes.

You did not hear about it from Mr. Selve until a few weeks ago ? It was some years ago that he told me ; he also told me when I came back.

Did Mr. Selve tell you at the time he received the cheque ? Yes ; he brought the cheque into me.

I thought you said you only knew of this matter a few weeks ago ? With that exception.

You say you thought it most improper to receive that cheque ? I think I told him to send it back.

Evidence has been given that your conduct was straight in the matter ; you showed by your action that you thought it was improper ? I suppose I work ten times as much overtime as the whole lot of them put together. I consider that a surveyor's time is just when he is wanted. If I wanted an hour or two off when there was nothing doing, I took it.

The receiving of gifts of that sort you consider was a mistake ? Yes.

You thought it would tend to sap the independence of the surveyors ? Yes, of course ; and it has.

Is it a fact that the President of the Marine Board was not aware what instructions you gave to steamship companies as to the repairs that had to be carried out ;—supposing you inspected a vessel, and you found a defect in the boiler, and that you condemned it altogether, would that go through Captain Hixson ? Yes ; I should report upon it, and my letter-book showing the copy of that report would go before the Board.

The Board must approve of it ? Nothing of that sort took place or could take place without the Board knowing all about it. No report went out of my office without I saw it.

Was that the same with the other surveyors ? When I was there all the reports and all the letters of all the surveyors had to go through me. I never allowed a report to go out without I saw it, and very often I altered the wording of it.

You would see all the reports prepared by Mr. Selve and Mr. Marr ? Yes.

Has that always been the custom ? Yes.

Is it possible that your assistant surveyors may have given orders for repairs without your knowledge ? Oh, yes ; they give orders for repairs. When they go on board a vessel, they practically take the responsibility of the ship, repairs and everything else.

Suppose one of them went aboard a ship, and saw that a tube was defective in the boiler, would he have the power to say that the tube must come out ? Yes.

Without sending in a report to you ? Most decidedly ; they have almost unlimited powers.

They have power to say whether £10 worth of repairs, or £1,000 worth should be done ? Aye, or £10,000.

Without your knowledge—without coming to you ? If they authorised anything beyond the usual repairs it was reported. The ships have to be gone through twice every year, and the surveyors had to report to me the result of their survey.

Still, a great many repairs might be necessary, amounting to a considerable sum, which would be carried out entirely on their verbal representations ? Yes, on their own responsibility.

And without your knowledge ? Yes.

If a surveyor wished to be lenient to a company, he might make his requisitions lighter than another surveyor would ? Yes ; he could make it either way—he could be very hard or very light.

Does not that strongly accentuate the necessity for looking down with the greatest suspicion upon any gratuity that might be offered ? Yes.

The practice of giving gratuities of that sort, if allowed to continue, might have the effect of corrupting the service ? Most decidedly ; it takes away a man's independence. If he goes aboard another ship, and he wants things done, he does not stand in the same position as if he were thoroughly independent.

Mr. Wilson : He might penalise the ship if he does not get a gratuity ? Yes. The Act gives the surveyor almost unlimited power, and unless it is done with a certain amount of discretion, the abuse you speak of would take place.

The Chairman : You have only heard of one instance of a gratuity being received ? Yes.

Would you be surprised to learn that Mr. Selve, himself, admits having received several ? I know nothing about it. That is the only one I know of.

Is it a matter of surprise to you that the practice has been continued ? Yes ; I was unaware of it.

... You would most unhesitatingly condemn it ? Yes.

To

To make the matter clear, I may say that Mr. Selve admits having received cheques on three occasions? I think, I may mention to the Board, that the shipping people are only too anxious and willing to pay for services performed in this way. The whole thing has been in a most unsatisfactory condition. When I told Mr. Selve to send the cheque book back, he told me that he would show it to Captain Hixson, and he told me that Captain Hixson's observation was "I don't want to know anything about it." What could I do?

Mr. Delohery: Would it not be better for these men to report to you all the directions they give when on board a ship? When you send a surveyor aboard a ship, you are sending a man supposed to know his business, and to do what you suggest would entail a vast amount of work, and would almost amount to having no confidence in the people you send.

Mr. Wilson: Mr. Delohery means would it not be wise to do this as a matter of record? Every man keeps a note book, and every morning he enters up his day's work, and his record is taken from that note-book and entered in the office book. You can get at the day's work of every man.

You know what work a man is doing? Yes; we can tell every day for the last twenty-seven years. A man may give orders for certain work to be done, and he is not compelled to enter it up in his note-book, he might put it in, or leave it out as he thought proper; but, so far as the system is concerned, the day's work of every man is supposed to be entered up in his note-book, and that book can be produced at any time. During the time we had the trouble with the labour people, we produced all the books showing every man's work for the last twenty-six years. And it was not possible that exception could be taken to it. Unless a man is unscrupulous and puts down what he likes, these note-books afford a perfect record. But you must trust these men, and trust them implicitly. You cannot go with them every where. The whole of this business has arisen through want of system, want of regulation, want of understanding. I do not think any of our fellows ever asked for anything. These fees have been sent to them. I think Mr. Selve did the right thing; he took it to Captain Hixson, and Captain Hixson made use of the remark that he did not want to know anything about it.

Mr. Delohery: Were you there when Captain Hixson said that, or did Mr. Selve tell you? Mr. Selve told me. He has his peculiarities, but I would trust him; he is a very truthful man.

The Chairman: As we shall have to frame regulations governing the working hours of the different officers, we shall have to provide for these cases, and it would be of considerable use to us if you would furnish us with your ideas. Our regulations will only affect the times of working, the pay, and the duties of the officers, and it will help us very much in the framing of those regulations if you could formulate some suggestions? I could frame some so far as our Department is concerned, but we could have no hours.

Mr. Wilson: It would be a good thing to recognise this overtime and have a proper fee. It does not seem reasonable that a man should be called upon to do work at midnight without receiving something for it? Of course not.

The Chairman: We do not object to a fee being paid, but we do object to gratuities being sent to officers in this underhand way? I might point out if we had a regular system and proper regulations there would have been no underhand work; it is not the surveyor's fault altogether.

Mr. Delohery: With reference to these repairs which are carried out under instructions from the surveyor, and concerning which no reports are made. Suppose a boiler had to be replaced at the end of six months, and in the meantime the officer making that recommendation died or resigned, in a case like that, in all probability, the work would not be carried out? If there is anything of that sort, we always give them six months' notice, never less, in writing.

You give it in writing do you? Yes.

A surveyor goes on board a ship and he says that a new boiler must be put in at the end of six months. You do not survey that vessel again for another six months; how do you ensure that the work is carried out? Anything of that sort would go through me, I should write officially to the owner of the boiler.

I understood you to say that the surveyor might not record what work has to be done? If you get an unscrupulous man who would deliberately do a thing like that, of course, it is difficult to check it.

He should make a record of an order of that kind? Yes, of anything of that sort; and then I should write a short report from the surveyor's report, and communicate with the owner and inform him that Engineer Surveyor Mr. So-and-So reports so-and-so, and at the expiration of the present certificate it will be necessary to do so and so.

That is conveyed in writing to the owner? Yes. I do not see how you can prevent deliberate fraud.

The Chairman: Receiving gratuities in this way would be opening the door to fraud? It shuts a man's mouth up.

William Marr sworn and examined:—

The Chairman: We are holding an investigation into the Navigation Department with a view to regrading the officers and framing regulations, and we wish to have some evidence from you on certain matters. What position do you occupy? Assistant Engineer Surveyor.

How long have you held that position? Eleven months.

Now I am going to ask you a question which you are not compelled to answer—that is to say, if you think it will injure you to do so; but in the event of your refusing you must pledge your oath that it will injure you to answer the question. Having given you that caution, I want to ask you if you have received gratuities from anyone for work done in connection with the Navigation Department? I have.

From whom have you received them? From the Adelaide Steamship Company.

How often have you received them? About four times, I think I can say.

When was the last? The last was about six weeks ago, I think.

Under what authority did you take that;—was the Department aware of it? I had been about a week in the Department when the first gratuity came. It was in the form of a cheque, and I asked Mr. Selve what I should do with it. I had heard nothing before about its coming. Mr. Selve said to me, "Well, you keep it."

He advised you to keep it? Yes.

Did you think you were doing wrong in accepting it? Not after I had consulted him.

He was your superior? Yes.

Has it come to your knowledge that anyone else has received gratuities in that way? Not to my direct knowledge.

You are certain that no gratuities have come except from the Adelaide Company? From no one else, except from one of the Adelaide Company's chartered ships.

But that would be from the same source? Yes.

Is that included in the four? Yes.

Mr. Brodie: What was the amount of the gratuity you received? £2 2s.

Mr. Delohery: Was it addressed to you? Yes. The cheque came with a letter, as an acknowledgment of my courtesy in surveying their steamer after hours. That is the form in which it was put.

Henry Pettit sworn and examined:—

The Chairman: We are holding an investigation into the Navigation Department, Captain Pettit, with a view to grading it, and we want to ask you some questions about matters that have come under your knowledge. First of all, what is your position? Harbour Master.

How long have you been in that position? About sixteen years.

We want to get some information from you with regard to the systems adopted in connection with sea pilots and harbour pilots, and the way in which their services are called for and performed;—what is the inter-action between your duties and those of the sea pilots? Of course, our work is greatly different to that of the sea pilots. The sea pilots are supposed to be available Sundays, holidays, and every day, to bring ships into the port. They are supposed to bring vessels in, and anchor them until it is known to what berth they are to go. Now, there is a great alteration in the kind of shipping we are getting. We are getting a lot of steam vessels, which call at Adelaide, Melbourne, and Sydney, with cargo for each port. The agents of these vessels at the different ports are in communication now by telegraph, and they sometimes regulate these vessels to come to a certain berth. When a vessel makes the port she runs up a signal for a pilot, and one of the pilots from the "Captain Cook" boards her and brings her to an anchorage at Bradley's Head or Neutral Bay, or wherever he can find a suitable place. Then the agent is supposed to come to our office and book the ship, so that without any waiting she can be berthed for the discharge of cargo. That is the regular routine; but sometimes there is a little difference. Sometimes, instead of anchoring a vessel, they want her brought straight to a certain berth.

berth. In such cases they come and ask at our office if the sea pilot may bring the ship to the berth, and the old system used to be that it was left to the pilot's judgment; if he thought it prudent to bring the ship up that he was in charge of he would do it; but it was always left optional with him. Since that time there has not been so much for the harbour pilots to do. It is recognised now that if a sea pilot is sent to bring a vessel to its berth, he may do it; so that we get no removals in our Department for that—it is one job, as it were.

The sea pilot carries the vessel right up? Yes.

Is there anything improper in that, do you think? About eight or nine years ago Mr. Powell and Captain Hixson met on the subject; there was a lot of talk about it, and they decided that they could not see where the removal came in; they did not see anything against it, and they always left it optional with the pilot, if he did not think it prudent, or did not think the berth was clear, he need not bring the vessel up. Then they were put to the trouble of dropping her anchor, and waiting for a harbour pilot, in his time of duty, to take the ship to the wharf.

If the sea pilot did not consider it prudent to bring the vessel straight up, she would have to anchor and pay an additional harbour pilotage? Quite so.

But if, on the other hand, the sea pilot thought it prudent, he brought the ship up immediately to the wharf, and the payment of the harbour pilotage was thus avoided? Yes.

So that it was left to the discretion of the sea pilot whether or not the harbour pilotage should be paid? Yes, to a certain extent.

When did that come into force? It has been gradually working in to greater dimensions. There is a great deal of difference in the traffic to the port now. The pilots used to object to take ships away from the wharfs at night, which they were justified in doing at times. I am speaking particularly of vessels that were going up to Newcastle to coal. These ships going from the wharfs had a small crew and a small berth, and to get them out at night was a difficult matter, and they used to object and make complaints about it. When they met Captain Hixson, the President at the time, and explained the thing to him, he told them, "It is in your own hands. If you are coming to a certain berth, and you think it risky, or likely to run you into trouble, you can refuse to do it." That was said to the sea pilots.

Was it the custom ever, when a sea pilot brought a particular ship straight to the wharf, for the harbour pilotage to be added to the sea pilotage? For years we did not add on the harbour pilotage. When the sea pilot brought in his certificate, signed by the master, it was sent on by our clerk to the Customs for collection; but, of course, there was no removal given. It was recognised that the sea pilots' duties did not go further than Fort Denison. The consequence was that some twenty-five of these certificates came down without the signature of the Harbour Master, and they were sent back by the Customs Department. That took place for some years in Captain Miles' time and Captain Bell's. I had to follow in their footsteps and sign these certificates. There was about an average of twenty-five per month, all done by the sea pilots, with no harbour pilotage added.

If the sea pilot said it was not safe to bring the vessel up, the Government would have gained the harbour pilotage from those twenty-five vessels? The Government got them in those days, only there was no certificate to show that the harbour pilots had performed any service.

Do I understand that in those cases both the sea pilotage and the harbour pilotage was charged? Both pilotages were charged.

When did that system cease? That gradually subsided about ten years ago.

That is to say, the payment of the harbour pilotage was not pressed when a sea pilot brought the vessel up to the wharf? The agents began to rake this matter up, and representations were made to our office. There was a meeting between Captain Hixson and Mr. Powell, the Collector, and they both considered that where there was no removal, when the ship did not drop her anchor, and the work was carried out by one man, it was hard to charge for a removal.

You say it was left to the pilot's discretion to say whether a ship should drop anchor off Bradley's Head or in Neutral Bay, or whether she should be taken straight to the wharf? Yes.

So that it largely remained with the sea pilot as to whether the revenue should receive this sea pilotage plus the harbour pilotage, or whether it should only receive the sea pilotage? Yes.

That discretion was in the hands of the sea pilots? Yes, it was left to them; they could do it if they thought it prudent. It was recognised by the Board, and by the Secretary, that if an agent came in and requested that a ship might be brought to the wharf direct by the sea pilot, an order was sent down by telegraph to the Heads, instructing the pilot to bring a certain ship to a certain wharf, if practicable.

That is the system now? Yes.

And that has been in operation about ten years? Yes, it has gradually increased.

Are you aware whether the shipping agents here are in the habit of communicating direct with the pilot steamer? Yes, instead of coming to the office. Sometimes it is left until late in the afternoon, and they then send a private message to the pilot, ignoring our office altogether. Many of them send messages in that way, and ships are brought to the wharf and we know nothing about it until we see them there.

Do you think that is a good plan? No, it is not a proper system by any means.

How long has that system been in force? In the time of the old Board the order was that a vessel could be brought up "if practicable." If the pilot was not sure that the berth was clear, and he did not care to run into difficulty, he could refuse to bring the ship up.

You are of opinion that it is a bad practice to allow agents to communicate direct with the pilots at the Heads? I think it should come through the proper channel; I think it should go through our office. It is partly through the shipping clerks in the different offices. They find that they can let the sea pilot know at the last moment in that way, and they do not communicate through the office.

Now, I want to ask you, has it ever come to your knowledge that the sea pilots have been paid for bringing vessels up in this way? I have never heard it personally, but I have heard it spoken round. It never came personally under my notice.

It has been talked of? I have heard it spoken of.

Has it been spoken of in such a way as would lead you to believe that it was true? Really I cannot say.

Has it conveyed to your mind the impression that there is some truth in it? It is possible there may be truth in it, I do not think a man would run himself into trouble, and exceed his duty, without some extra remuneration.

Mr. Wilson: It is not part of his work? I consider it the most risky part of the work. The bringing in of ships through the Heads to the anchorage at the back of Garden Island or in Neutral Bay is the easiest part of the work, particularly with these big steamers. But when you come to take them into close quarters; when it comes to bringing them to the Central Wharf, or Dibbs' Wharf, or Dalgety's Wharf, there is extra risk, and a man must have had experience.

Mr. Delohery: A sea pilot would not understand that work as well as a harbour pilot? They are now getting practice to carry out both duties.

The Chairman: You are put in that position because you have become competent by constant practice. The business of the sea pilot is merely to bring a vessel to an anchorage, leaving it to the harbour pilot to bring her to the wharf. The harbour pilots make it their business to know if the wharfs are clear. We are in daily communication with the wharfs, and we know how they lie, and therefore we must have a better knowledge than a sea pilot who only comes up to the wharfs once a month or once a week.

You have heard the statement that it is made worth the while of the sea pilots to undertake this extra risk? I have heard from outside sources, but I cannot say that it is really true.

But it seems reasonable to assume that they would not undertake this risk without some consideration. I know I should not. I would not run my head into a noose without some remuneration.

Supposing a sea pilot brought a vessel to the wharf, and an accident occurred, would the Government be responsible in a case like that? I do not think so, the pilot would be the man. There would be an inquiry, and if it was proved that the pilot was negligent or incompetent, or had exceeded his duty, it might lead to his suspension or even dismissal.

Would the Government be responsible for the damage done to the vessel? I do not think so.

Through the careless or wrongful action of the pilot? I do not think so. If it was compulsory pilotage the Government might be liable, but in our case removals and the working of the ships about the wharfs was not considered compulsory pilotage. There was a lawsuit years ago, which raised this very point. A harbour pilot relieved the sea pilot on one of the American mail boats, and the vessel collided with the Darling-street wharf and did some considerable damage. The Government won the case through the harbour pilotage not being considered to be imperative. The

The sea pilot got his certificate signed as doing his duty satisfactorily, and he was relieved by the harbour pilot, and the ship was damaged while the harbour pilot was in charge, which was a non-compulsory pilotage. In that way the Government got out of it. If there had been a compulsory pilotage system the Government would have had to pay.

Is it not a compulsory pilotage at the present time? Sea pilotage is supposed to be compulsory for all over-sea going ships, and non-exempt masters.

It is compulsory under the new Act? Yes.

If an accident occurred now through the negligence of the sea pilot, the Government would probably have to stand the loss? Yes.

Have the sea pilots who are carrying out this harbour work, the same knowledge and the same experience that you have in moving vessels about the wharfs? No, they have not had as much of it as I have. There are two or three new pilots, but many of the old pilots, having been at it for a number of years, make it their business to know these wharfs almost as well as we do. When we relieve them they have watched our manoeuvres in bringing ships in, and they have gained experience in that way.

The tendency of the present practice is to render your services less and less frequent? Yes; that is what it appears to be.

And whenever the sea pilots perform your duties it is a fact that the Government lose the harbour pilotage and removal fees? Yes.

The discretion given to the sea pilots lands the Government in a loss whenever they undertake the duties of the harbour pilots? Yes.

Can you say how many vessels per month would be brought up by the sea pilots? We have never kept an account of that.

Can you get out a statement showing that? Very nearly, I think; by looking at the sea pilots' certificates.

Will you oblige the Board by getting out that information as far back as you can? I will try.

Now can you tell me the names of the agents who communicate direct with the Heads when they want a sea pilot, instead of through the office? Dangar, Gedye & Co.; Gibbs, Bright & Co., at times; Burns, Philp, & Co., I think, also; I do not know whether Holder Brothers. I do not know of anyone else.

Can you tell us the clerks or agents of these firms who have communicated direct in this way? The shipping clerk himself may not do it, he may send one of the younger lads down to book the ship.

What I want to find out is,—who would send these messages to the Heads? I think they must come from the principal shipping clerk.

Can you give us the names of the principal shipping clerks in these companies? I can tell you some of them. I think Mr. Duker is the shipping clerk at Dangar, Gedye's; at Gibbs, Bright's, I think, it is Mr. Silly, but am not sure. I do not know the name of the principal shipping clerk at Holder Brothers. Mr. Black is at Burns, Philp's.

Mr. Wilson: Do the Adelaide Steamship Company communicate direct with the Heads? Most of their ships are exempt. It is principally the large steamers that are brought up in this way. Their time is so limited, the cargo has to be got out of them, and the vessel discharged as quickly as possible, so that they may get away to Newcastle and take coal. It is a pushing kind of business just now, and time is an object with them. There is some excuse to be made for them. They must get to their berths immediately, and if they come in at night time it is a great saving if the sea pilot is allowed to bring the vessel direct to the wharf.

Mr. Brodie: The Captain in charge of the "Captain Cook" keeps a log, does he not? Yes.

Would he record in his log all the vessels that are brought right up? Yes.

That would show all the cases in which the sea pilots have brought vessels direct to the wharf? Yes; it would give a very good idea. The orders are supposed to go to the captain of the "Captain Cook," and it is his duty to direct the pilot that such and such a firm have sent word that they want the ship taken to the wharf. And in this case the agent employs a boatman to meet the ship and hand a letter of instruction to the captain telling him what is to be done.

Immediately an order is sent down to the "Captain Cook," and it is given to the pilot, the nature of it is supposed to be recorded in the log-book? Yes.

Do you carry out any similar system for the harbour pilots? We have a book in which the harbour pilotage is recorded. The moment the work is done the harbour pilot sends his certificate in to our clerk. It is a perforated double ticket. He keeps the butt and sends the other upstairs every day.

John Mitchell Silly sworn and examined:—

The Chairman: We are sitting practically as a Royal Commission to inquire into certain matters affecting the Navigation Department, and in order that you may understand the powers conferred upon the Board in investigations of this kind I will read you section 16 of the Act. [Section read.]

We are sitting practically as a Court now receiving evidence on oath. Will you kindly tell me your name? John Mitchell Silly.

You are Shipping Clerk for Gibbs, Bright, & Co.? Yes.

We have been investigating the question of pilotage and the system which obtains in the Navigation Department with regard to this matter, and we have invited you to come before the Board, because we think you can give us some information which will be of value—information as to how the practices and customs of the Department affect the shipping merchants. I may explain to you at once that it is the desire of the Board to frame such regulations as to the duties of our officers, and as to the times in which these duties shall be performed as will meet the convenience of the port. Every obstacle which impedes the action of the Department and which comes under their jurisdiction, we will endeavour to remove. We think the information you can give us will assist us in the object we have in view. There is one important question I wish to ask you first. We understand that you communicate direct with the pilots at the Heads? At times.

When you do that has it been your practice to give the pilot any fee; do you pay him anything? We do not pay him anything, but if he berths a ship at night we give him a gratuity.

What gratuity do you give? It varies at times.

About what is the amount of it? It ranges from £1; it all depends on circumstances. If it is a nasty night, or a case of urgency, and business requires that the vessel shall be brought in, we do not hesitate to give them £2 or £3.

Your business is facilitated by the sea pilots bringing ships straight to the wharf? Yes.

And you give them this gratuity? It is not given to them in any way as a bribe, simply to facilitate our business.

We do not suggest such a thing for a moment; you say it facilitates your business? Yes. It is left to us whether we give them anything or not.

Still, as a matter of fact, you do give them something? As a matter of fact we do, because it assists our business.

Who are the pilots you have given these gratuities to? That I cannot say.

Can you remember anyone? I cannot without referring to the accounts.

Can you think of any one? It has been done as a general rule.

Can you give me the name of any one pilot? There was one the other day, Captain Plaice, I think it was.

How much was given to him? I gave him £3.

Is there any other that you can think of? No.

Probably you have given to them all? Probably to the lot of them, including some that have left.

It has been the recognised custom? It is not a custom, because it is solely left in our hands whether we give the pilots these gratuities or not.

Mr. Wilson: You do it as a matter of business? Yes.

The Chairman: You say it facilitates your business? Undoubtedly. Say we have a steamer on time charter, she comes in at 6 o'clock at night; under the ordinary rule the services of a harbour pilot are not available until daylight on the following morning. We have to leave that ship lying there for twelve hours.

But the sea pilot bringing the ship straight to the wharf saves you that period of time? Yes.

I need hardly say that in pursuing this investigation it is not our object to suggest that these facilities should be withdrawn? I can perfectly disabuse your mind about that. They have come in and asked if I was going to give them a new hat, and I have said "No," because I did not think the services rendered justified it.

Do I understand that the pilots themselves have come in and asked for a fee? At times I have had them come and ask for it, but I have refused.

The

The pilots have asked for it? Yes.

And you refused it because you did not think the services rendered justified it? They did not justify it.

If they brought a vessel up in daylight would you give them anything? No, only at night; only when they forward our business.

Are you aware that any other firms have done the same thing? I have heard of it.

What is your practice in communicating with the pilots; do you communicate direct with the Heads? We telegraph to the pilot in charge—that is unless the office is open, then we do it through the usual channel.

You telegraph to the pilot in charge? Yes, when the office is not open for the transaction of business.

For how long has this been going on? To my knowledge for eighteen years.

And the giving of these gratuities? Yes.

The amounts varying from £1 to £3? Yes.

Mr. Wilson: I understand you only telegraph direct when the office is closed? Yes, when we have no opportunity of getting a pilot through the ordinary channel.

When the ordinary channel is closed that is the only way in which you can arrange matters? Yes.

Mr. Delohery: You save a fee do you not by the sea pilot bringing the ship straight up; if a vessel anchors you have to pay for the removal? That is a thing we do not consider, we are not to consider that, it is a matter of business.

But you would not have to pay that fee if the sea pilot brings the ship straight in? No.

The Chairman: Would it be inconvenient to you to take out from your books what has been paid during the last twelve months? I cannot give you definite information about it, I simply put down the amount.

Mr. Brodie, the Chief Inspector of Public Accounts, is assisting us in this investigation, and we should be obliged if you will furnish him with this information. We are not doing this with the purpose of withdrawing any facilities, but to put them on a more satisfactory basis? So that we can have a pilot at any time we want one?

Yes; we do not desire to withdraw any facilities? I can cite you one instance. We had a steamer at Mort's Dock, we were very anxious to get her away to Newcastle to take her turn for loading; had she not arrived she would have lost her turn, and would probably have been delayed there for a fortnight. A few words with the pilot, and he took her up. I did not offer him anything, but I told him to come in and see me, and I gave him a gratuity of £4.

How long ago is that? That is twelve years ago. He did not ask for it.

Mr. Wilson: In view of the magnitude of the shipping business nowadays firms are forced to do this? You will readily understand that if you are paying £80 a day for a steamer on time charter.

The Chairman: We recognise that it is of vast importance, and we are anxious to frame such regulations as will give you every facility you require, and so that you will not have to thank anyone? As it is now they put us under a compliment by doing it. I may say the pilots are always willing to oblige us, and not with any view of receiving remuneration, because time and again I have refused.

It would be much more satisfactory to you to feel that you are not under a compliment to anyone? Undoubtedly.

Mr. Wilson: You may have to pay a little for it? That does not matter, that does not come into the question.

The Chairman: You would rather pay it over openly and above-board? As a matter of fact we are quite open and above-board.

You would much rather have it put on business lines? We would rather, if we go down at 10 o'clock and receive a telegram that a steamer is due, that we could arrange to have a pilot and depend on having one day or night.

The expenses in connection with the shipping trade are so enormous that unless you have all these facilities it means a great deal to you. What we want to do is to put matters on a right footing. It you will assist Mr. Brodie by giving him the information the Board desire we shall be obliged. Under the Act we can compel the production of these things, but we would rather obtain it with your cordial co-operation? I have no objection.

Will you convey the remarks I have made to your firm, and tell them what we hope to see as the outcome of this investigation? Certainly, it is something that will be appreciated by all the shipping people. If it can be arranged that we may secure the services of a pilot whenever we want, instead of being under a compliment to them—although I must say everyone of them has been most obliging—it will be a great convenience.

Mr. Delohery: Did you pay those gratuities by cheque or cash? Always cash.

Mr. Brodie: If Mr. Silly prepares a statement for the past twelve months, perhaps that would meet the case.

The Chairman: That will be ample.

[The investigation was adjourned until Monday, 10th September.]

THE investigation, under section 8 of the Public Service Act, into matters connected with the Department of Navigation, was resumed and continued on Tuesday, 11th September, 1900, at 10.15 a.m.

Present:—

Mr. J. BARLING, Chairman,	} Public Service Board.
Mr. C. DELOHERY, Member,	
Mr. WILSON, Member,	

John Mitchell Silly further examined:—

The Chairman: We are very much obliged to you, Mr. Silly, for the trouble you have taken in fulfilling our request. This, I understand, is the return you have prepared, showing the amounts you have paid to the sea pilots during the last twelve months? Yes. It is only made out roughly.

Does this return represent the whole of the payments made during that period? So far as I can trace them.

This statement shows that on 4th August, 1899, you paid £3 to Captain Tylor in connection with the "Pathan"? Yes.

And on 3rd October of the same year you paid an amount of £3 to Captain Tylor in connection with the same vessel? Yes.

On 13th November, of 1899, you paid to Captain Plaice £3 in connection with the "Devonshire"? Yes.

And on 20th December a similar amount to Captain Plaice in connection with the "Mombassa"? Yes.

On 2nd January of this year you paid to Captain Jack £3 in connection with the "Strathrod"? Yes.

On 5th March a further sum of £3 to Captain Plaice on account of the "Gymeric"? Yes.

On 11th August you gave to Captain Tylor £3 on account of the "Nordgarer"? Yes.

And on the 3rd September you gave Captain Plaice £3 on account of the "Ras Dara"? Yes.

The items I have just read represent the various payments you have made to the different officers during the period mentioned? Yes, during the last twelve months.

In previous years was the amount paid larger or smaller? Smaller, because the number of steamers has been considerably augmented by this New York line.

There has been an increase during the past year? Yes. Last year would show the largest amount paid.

You think it would? Yes, I should say so.

In your evidence on Friday, in reply to the question "Do I understand that the pilots themselves have come and asked for a fee?" you replied, "At times I have had them come in and ask for it, but I have refused." I want to ask you what pilot you refer to there? I did not consider that the work they had performed justified my paying them anything.

What pilot are you referring to? I think Captain Jack was one.

Anyone else? Not to my knowledge.

He is the only one who has asked for a fee? Yes. He used to come in and ask as if it were his right.

In reply to the further question, "Probably you have given them all?" you replied, "Probably to the lot of them." You still adhere to that I suppose? Yes, I agree with that statement.

I think you also stated that this has been going on for eighteen years? Yes. Of course, in the earlier days the traffic of the port was nothing like what it is now, and it was then only in isolated cases that we paid the pilots anything.

In recent years the system has become more pronounced? Quite so.

Mr. Delohery: You entered up all these amounts, did you? Yes; they are taken from the ship's disbursements.

The

The Chairman : Can you furnish us with a return or the previous year without any trouble ? Yes, I think so.

Of course, we shall be pleased to pay for any overtime that your clerks may be put to in getting out this information. If you can prepare a return showing the disbursements to the pilots in this way for the previous two years we shall be obliged. I suppose you will allow me a little time ; you see this is mail day.

How long do you think it will take,—we want to meet your convenience in every way ? I will hurry it up as far as I can.

If you can get it out some time this week it will suit us ? Oh, yes ; you shall have it inside forty-eight hours. Thank you, that will do very well.

Harry Clifton Benson sworn and examined :—

The Chairman : We are holding an investigation into the Navigation Department, Mr. Benson, with the view of regrading it and preparing regulations as to the duties and hours of work of the officers ; and we understand that you can give us considerable help in several matters connected therewith ; we have had several gentlemen before us engaged in the shipping trade ; from whom we have obtained some valuable information ; the particular subject we are now investigating is the payment of gratuities to pilots for bringing vessels up to the wharfs ; from your connection with the shipping section of the Chamber of Commerce, and your association with the firm of Tyser & Co., we believe you can furnish us with information which will greatly assist our investigation ; and we further understand that you are willing to afford the help we are seeking. First of all, as to your position, Mr. Benson ; you are a member of the firm of Tyser & Co., are you not ?

The Witness : No ; I am the Australian representative of the firm.

The Chairman : And you are also chairman of the shipping section of the Chamber of Commerce ?

The Witness : I am what is called Convener by the Chamber of Commerce and Agriculture.

The Chairman : We understand that it has been the practice of late years for the sea pilots to bring vessels direct to the wharfs, instead of the harbour pilots doing it, as was the case some years previously ; and also that the merchants had been in the habit of paying the pilots, or of giving them gratuities for undertaking this duty ?

The Witness : I believe it has been done ; we have done it very rarely. The majority of our captains are exempt, or at any rate many of them are exempt ; but even then they take a harbour pilot, as they do not care to berth the ships themselves. The captains bring their vessels into the harbour ; but they take a harbour pilot to bring them to the wharf. I have known cases of sea pilots bringing a ship straight to the wharf. I would not like to swear that in such cases the pilot received a gratuity ; but I fancy he did. However, that is going back some considerable time.

The Chairman : It has not been done recently ?

The Witness : No, not recently. I may say that the whole of the pilotage arrangements have been an anomaly to me. We pay here a pilotage of £20, and that pilotage is where to ? Is it to Pinchgut, or where is it ? Then we are debited after that with a removal fee ; but we do not move the ship at all ; we come straight to the wharf. If the sea pilot brings a vessel in, there is no charge made at all by the Government, and the sea pilot may bring her alongside the wharf. Why that should be I do not know.

The Chairman : Is not that explained by the fact that the sea pilot gets a gratuity ? Of course, it is to his interest to bring the ship right to the wharf.

The Witness : Why does not the Department come to some determination on the matter, and say if it should be the sea pilot or the harbour pilot ? Then, again, in taking a ship out, the pilot comes to the wharf, goes on board, and takes the vessel straight out to sea, and there is not a word said. Why they should charge a removal for bringing a ship in, and nothing for taking her out, I have never been able to understand.

The Chairman : The remedy seems to be to establish a point to which the sea pilot shall take a vessel, and at which the harbour pilot will come on and bring her to the wharf. We understand that some seven or eight years ago it was the practice when a sea pilot took a vessel direct to the wharf to charge that vessel with the harbour pilotage as well.

The Witness : I believe that was done. It is a long time since I had a ship brought up by a sea pilot.

The Chairman : It was found that the shipowners objected to the double charge. They made representations to the Harbour Department that it was a great hardship on them to have to pay the two pilotages, seeing that the pilotage fee was so very heavy. That view of the case prevailed, and orders were given to the sea pilots that when practicable they might bring vessels direct to the wharfs. The consequence was that the sea pilots, acting under this authority, in many cases brought ships straight up, and for performing that duty a gratuity was given to them by the merchants, who were considerably inconvenienced thereby, and often saved a great deal of time.

The Witness : It is a serious thing to have a ship lying down the harbour for half a day or a day. If you have a time-chartered steamer, costing £60 or £70 per day, and she arrives on Saturday afternoon, you probably want to start coaling at midnight on Sunday ; and if you have to keep the vessel waiting, it means that you are going to lose at least seven and a half hours before a harbour pilot can be obtained on Monday morning to bring the ship to the wharf ; and that delay may run into two days by the following Saturday and Sunday. So you see it becomes a serious question.

The Chairman : The object of our investigation is not to take away any facilities from the shipping, but rather to increase them ; but we want to put the facilities on such a basis that merchants will not be under a compliment to the pilot. We want to lay down the hours and duties of the pilots in such a way that shippers may have the advantages they are now getting ; but in a somewhat irregular manner. As I said before, our object is not to curtail whatever advantages are now enjoyed ; but to increase them if possible. We have received from several shipping firms statements showing the amount of fees given to the pilots and others, and we wish to put a stop to this irregular way of doing business. That is why we ask you first to give us any instances that have come under your notice where gratuities have been given to pilots ; and, second, to suggest some means by which the required facilities can be put on a recognised and proper footing.

The Witness : May I ask what are the present pilotage hours ?

The Chairman : I do not think they have any hours at all ; there is no system whatever.

The Witness : I have had a good many cases in which sea pilots have been ordered to take a ship away from the wharf, say, at 5 o'clock in the afternoon. We say 5 o'clock, because that is the time, as near as we can determine, at which the vessel will leave ; but something may occur to prevent it, and she may be two hours late going to sea. Well, in a case like that the pilots generally look round for a gratuity.

The Chairman : They come round, do they ?

The Witness : They do not come to me ; they go to the master of the ship.

The Chairman : And he gives them a gratuity ?

The Witness : I have known it to be done.

The Chairman : Can you recall any particular instance ?

The Witness : I cannot. Another thing I may say : The harbour pilot never comes aboard the ship when she is going out ; the sea pilot takes her right down.

The Chairman : Do you think that is frequently done ?

The Witness : I think it is. It has not been frequently done with me ; but I know it is done, and I know our men have done it.

The Chairman : Do you think it is done frequently by others ?

The Witness : That, of course, I cannot say.

The Chairman : But you know it has been done in your case ?

The Witness : Yes.

The Chairman : And you think it has been done by other firms ?

The Witness : I daresay it has.

The Chairman : Our object is to put a stop to that, and to have such regulations prepared as will ensure this work being done by the pilots without the necessity for paying any gratuity.

The Witness : I think that in an important port like this we should be in a position to have a ship brought in at any hour, day or night. If it becomes a question of overtime for the pilot—if such a point as that arose—I do not know that anyone would object to pay a small gratuity to the pilot ; but I would suggest that in such cases it should be treated in the same way as the overtime of a Customs-house officer. A debit note comes to us from the Department ; we pay the Department,

Department, and the Department pays the officer. We ought not to have any monetary dealings with any of these officers direct; no money should pass between the pilot and the agent or the shipmaster; there should be no cases of new hats, or "tips," or anything of that sort.

The Chairman: That is your view of the case?

The Witness: Yes.

The Chairman: I wish to accentuate the fact that it is not our desire to in any way limit the facilities of the port. If possible, we want to increase them; but whatever is done must be on a sound foundation, so that the shippers can come and demand, as a right, what is now a matter of compliment with the pilots.

The Witness: Is there any reason why a sea pilot should not bring a ship direct to the wharf? Why should we pay a pilotage of £20 to have our ships brought in and left down the harbour; and why should we have to pay another fee of £4 10s. to the harbour pilot for bringing that vessel to the wharf? If you come to think of it the pilotage from the sea to the wharf is only an hour or an hour and a quarter's work, and £20 in and £20 out, or £40 per ship, is very good pay for the work done without our being called upon to pay for the harbour pilot in addition.

The Chairman: That hardly puts the whole of the case. You must not forget that a very large sum of money has been spent in dredging the harbour and in other ways to increase the conveniences of the port. I remember that some twenty years ago large expense was incurred in blasting at the Sow and Pigs. That is only one of the heavy expenses which have been incurred by the Government, and, of course, the pilotage you pay is not merely for the labour of bringing the ship in, but to pay the interest on the very large sum which has been spent upon the harbour, and necessarily spent in maintaining the harbour as a navigable port.

The Witness: This charge is an optional one, and with most of our steamers we bring them straight to the wharf without employing a sea pilot at all.

The Chairman: Is it not a fact that you are charged a fee of £20 when the sea pilot brings a vessel to the wharf, and that, in addition, you also pay the harbour pilotage?

The Witness: Not if the sea pilot brings a vessel right up.

The Chairman: Can you tell me if the sea pilots generally bring vessels to the wharf now?

The Witness: Not with us.

The Chairman: The harbour pilot comes aboard?

The Witness: We always employ a harbour pilot. Our captains are mostly exempt; but even then a harbour pilot is generally ordered. There is one case I had in my mind just now of a sea pilot bringing a ship straight up to the wharf. It was not one of our own ships, it was a chartered vessel, and the captain told the sea pilot to bring her right up.

Mr. Delohery: Are the sea pilots as well able to berth vessels as the harbour pilots?

The Witness: Well, the harbour pilot who does nothing else but berth vessels should be better able to do that work.

Mr. Delohery: Is not that the reason vessels used to anchor down the harbour and then take on a harbour pilot to bring them up to the wharf?

The Witness: I cannot say if that was the object, but I should certainly think that the man who does nothing else but berth ships would be better able to do that work than a sea pilot. That is my opinion only.

The Chairman: This custom has been continued from the old days when sailing ships were chiefly employed?

The Witness: I suppose it has. In those days vessels used to come up to Neutral Bay or Garden Island and anchor there for a couple of days before coming up to the wharf. Then it was a distinct service altogether. If one man brings the ship to Garden Island and another man brings her from that point and berths her in Darling Harbour there are two distinct services, and one can understand two distinct charges being made; but where a steamer comes right in, and goes to the wharf where everything is ready for her, it seems anomalous that two pilotage fees should be demanded.

The Chairman: How do you manage about the Health Officer when vessels are brought in in that way?

The Witness: We have nothing to do with the Health Officer. You see, we come from Melbourne, and there is no occasion for the Health Officer to board; we can come right up.

The Chairman: Will you kindly think over and see if you can help us in some way with suggestions which will be a guide to us in drafting new regulations. As a Public Service Board we have only the right to make regulations with regard to the duties and hours of work of the officers; it is not within our province to make regulations as to the pilotage fees; but we have power to make regulations as to the salaries of officers, and their hours of labour, and so on; and if you can suggest anything which would tend to facilitate the working of the port in the direction I have indicated you would be assisting the Board very much.

The Witness: I shall be very glad to call a meeting of the shipping section of the Chamber of Commerce to discuss this matter.

The Chairman: If you can do that it will greatly help us; but whatever is done I hope you will keep it perfectly quiet, as otherwise it might hinder us in our work. Our idea, as I told you, is not to devise restrictions, but to take away whatever impediments there may be to the fullest enjoyment of the facilities of the port. And we shall be pleased if you can help us in any way to secure this.

The Witness: I think I can do something for you. The great thing is that the pilots should be available at any time, day or night, when their services may be required.

Mr. Wilson: It is only with these general principles that Mr. Benson can help us. We want to know what are the requirements of the shipping merchants.

The Witness: Speaking for myself, I would not mind paying the small amount of £1 or 1 guinea additional pilotage after hours, or on Sundays. In saying that I am, of course, speaking without any authority whatever. But when a pilot has to come down, say at 6 o'clock on Sunday morning, to work a vessel up the harbour I do not think there is any ship-owner who would grudge that man £1 for the services performed; but let us have it done fair and above board, and let it come through the Department in the ordinary way; do not let us have any question of new hats or "tips," or anything of that sort.

Mr. Delohery: Do the captains on board these vessels keep a record of the gratuities they pay, or do they pay the money out of their own pockets? No, it goes into the ship's accounts, and the ship's accounts go to the owners when the vessel arrives home; it is a sort of petty disbursement.

Then there is no record kept here? No, I have had pilots come to the office with orders on me for the money.

Do you keep those orders? No, we make them sign a receipt in duplicate, and that goes away with the ship's papers as an ordinary disbursement.

The Chairman: Can you remember any specific case in which that has occurred? I cannot remember any particular case.

Mr. Delohery: Has it happened recently? Within the last twelve months I can remember some.

The Chairman: Could you give us any information with regard to these cases? I do not think it is possible, because these things go through the petty cash book, it simply goes down as pilotage for such and such a ship.

You cannot remember a specific case? I cannot.

We already have information as to actual transactions, and it would be merely adding to what we have already got, if you could tell us any instances which have come within your own knowledge where payments have been made in this way to the pilots. The evidence you have given exactly bears out what we have heard from others under oath; we know the individuals who have received money, and we know the amounts that have been paid, and if you can help us with any further instances it would strengthen our hands very much. I will do what I can; I will have a look; but, unfortunately, we do not keep these vouchers, we send them away; we pass all our vouchers to New Zealand, and from New Zealand they go to London.

Do you think there have been many instances of this sort during the last twelve months? There may have been four or five.

Would they affect the harbour pilots as well as the sea pilots? I think it applies to both.

If you can help us we shall be much obliged? I will think the matter over; I suppose you do not mind my consulting some of the other shippers.

Mr. Wilson: I hardly think it would be desirable to officially call the shipping section together. There are only two or three points upon which you can help us, and those you have already mentioned.

The Chairman: Whatever is done should be as informal as possible.

The Witness : I should like to consult some of the other shipping merchants. Personally, as I told you a moment ago, I should not object to a small overtime charge for the pilots, but I should prefer to get the views of some of the others on that point.

Mr. Wilson : Our powers, so far as the Navigation Department are concerned, are, as the Chairman has already said, somewhat circumscribed ; we can only deal with the salaries and the hours of working of the officers. You have mentioned that the pilots should be available at any hour of the day or night ; that is one point ; and you have also stated that the shipping community would not object to a small additional fee, if the pilots are called upon to work after hours. That is point No. 2 ; and I think we can incorporate as the third, that pilots should be absolutely forbidden, under any circumstances, from having monetary transactions with the agents or ship masters ; beyond those three points I do not think Mr. Benson can do very much for us.

The Chairman : That is the extent of the information and of the assistance we are asking for, and Mr. Benson will see that, although our powers are circumscribed, still they cover a very wide ground, they cover practically all he needs. Suppose we were to say that pilots should be available at any time, it is our business to provide a sufficiency of officers to compass that. Then as to the overtime ; it is for the Board to say what the pilots shall receive ; and having done that we can lay down a regulation prohibiting pilots receiving anything either from the captains or owners of vessels. On these points Mr. Benson can help us very much, but whatever is done should be as informal as possible.

The Witness : There is another point I should like to see settled definitely, one way or the other, and that is the right of the sea pilots to bring ships right up to the wharf, and whether when they do that they must do it for nothing.

The Chairman : As a matter of fact the sea pilots have not brought the ships up for nothing, they have received payment for that in the shape of these gratuities.

The Witness : But they do not get £4 10s.

The Chairman : The revenue receives nothing while the pilot gets something ; whatever is given goes into the pockets of the pilots.

The Witness : That is the present position, certainly.

Mr. Delohery : The pilots now perform this work as a favour.

The Chairman : Mr. Benson knows the points upon which he can assist us, and we shall be glad of whatever help he can afford.

The Witness : Very well, I will do what I can.

Captain Bracegirdle recalled :—

The Chairman : Since we saw you last we have obtained a good deal of information on various points. There is one thing more we wish to ask you ; remember you need not answer the question if you think that it will injure you to do so. Have you ever received and gratuity or payment from any firm for overtime ? Yes.

Who are the firms, and what were the occasions ? From the mail companies for bringing their ships to the wharfs on Sundays.

For any other services ? No, only taking ships up on Sundays.

What firms have given you gratuities, and what have been the amounts ? It has only been a guinea.

How often has that happened ? I suppose seven or eight times in the year.

In each year ? Yes, I suppose about that.

Has that been recognised by the Department ? At one time one of the shipping company's clerks spoke to Captain Hixson, and he said, " Well, these officers have got regular hours, but if you can make arrangements with them they will attend on the job."

Was it understood by Captain Hixson that you were to receive a fee ? He did not know that we got anything, but it was tantamount to the same thing.

We think it is a reasonable thing, if officers are called upon to work overtime, that some allowance should be made to them ; but we think it is very irregular that the allowance should be made in this way ? It is not nice to have to go to the office to get it ; I would rather there was some other way of doing it. When I joined the Service I was not to work on Sundays, but now we are supposed to attend these ships on Sundays. In these days of rush they want the ships brought to the wharfs as soon as possible ; everyone is in a hurry with the shipping now. We may be called out at 5 o'clock on Sunday mornings, and we may not finish until Sunday afternoon. There is nowhere to go, and we have to hang about in order not to miss the ship.

How many years has that been going on ? Ever since I joined the Service, pretty well.

How many years is that ? Sixteen years.

And it has amounted to seven or eight times a year ? Sometimes.

Are you aware whether others have received it ? Yes ; the whole three of us have received it.

Who are the three ? Captain Pettit, Captain Thompson, and myself.

Would that be only on Sundays ? Yes. At one time we got it for working Saturday afternoons, but that has dropped out of fashion.

That is all you have been paid ;—just a guinea. Yes.

And you think that has averaged seven or eight times a year ? Yes.

Mr. Delohery : Did you get a fee for working after office hours ;—say if you were wanted late at night or early in the morning ? I had to board a ship at a quarter-past 3 in the morning, because they wanted to get her away ; but I received nothing for that.

Have you received anything at other times for working after office hours ? We do not do anything at night-time.

Have you never received anything ? No.

What are your hours supposed to be ? From sunrise to sunset.

Did you never receive a larger sum than a guinea ? Yes ; from the French Company. I got £2 2s. from them.

Have you ever received a larger sum than that from anybody ? No.

Are you sure ? Quite.

The Chairman : You think it is a bad practice, do you not, to obtain it in that way ? Yes ; I think it is myself.

Have you ever spoken to Captain Hixson about it yourself ? No.

How do you know that Captain Hixson made that observation ? I know it from the clerk, who went in to see him.

Who was the clerk ? It was the shipping clerk of the Orient Company.

Mr. Wilson : Are these gratuities voluntarily paid by the companies, or do you ask for them ? There has been no question about it. We only tell them that we do not work on Sundays. Of course, the clerk approached Captain Hixson about it.

Is it a fact that pilots are not supposed to work on Sundays ? They do not put us on the staff as pilots at all ; we were like Civil Servants, and had special hours for this Department.

The Chairman : The sea pilots are supposed to work at any hour ? Yes ; any hour of the day, and any time of the night.

Mr. Brodic : What French Company was it you referred to just now ;—was it the Messageries ? Yes.

[The investigation was adjourned till 12 o'clock on the following day.]

THE investigation, under section 8 of the Public Service Act, into matters connected with the Department of Navigation, was resumed and continued on Wednesday, 12th September, 1900, at 11.30 a.m.

Present :—

Mr. J. BARLING, Chairman, }
Mr. C. DELOHERY, Member, } Public Service Board.
Mr. WILSON, Member. }

Mr. G. E. BRODIE, Assistant Auditor-General and Chief Inspector of Public Accounts.

Henry Selfe further examined :—

The Chairman : In looking through your evidence, Mr. Selfe, we have noticed several discrepancies which we wish to have some explanation about from you. You were asked, "I thought you said you had five altogether? No, three. When was the last one? Over twelve months ago." Then a little later in reply to the question, "In the cases you have mentioned to the Board, in which you received these fees, can you put your hands on the notices?" you replied, "It is so many years ago; I have not had anything for a couple of years; I might find out by looking at my note-books." Subsequently, we received a statement from Mr. Prosser from which it appears that you received a cheque for two guineas as late as 26th May of this year. In view of that your evidence appears so extraordinary that we thought it desirable to give you an opportunity to explain these discrepancies. What have you to say? After leaving the Board I thought about the evidence I had given, and it occurred to me that I could hunt up when I received cheques. I have surveyed very few of the Adelaide Company's steamers, and I thought if I went through my notes I could find out from them when I had surveyed these steamers, and if I had done it at night; and if I had surveyed them at night I would have received a cheque. In going up to the dock the other day I saw the "Franklin" lying there, and I said to Mr. Marr, "did not we survey that boat one holiday, you and I, when she was in the dock?" and he said, "Yes." I said, "then I got a fee for it." He said, "it was not that boat at all, it was the "Flinders." Then it came to my mind that I had received £2 2s. for surveying her on a public holiday, when it was a very wet day.

Then you admit that you did receive two guineas on the 26th May? I cannot say whether that was the day, but it was a public holiday, I know.

Would it be about that time? I think it would. You must remember that I have received so few cheques, and we are surveying so many ships, that a matter of a few pounds is not a great consideration with me. I could not call it to mind at the time when I was before the Board. If Mr. Prosser hunted back, he could not find, I am sure, that I had received more than three altogether.

Is not the fact that you have received so few cheques an argument rather against you—ought it not to impress it on your memory? The number of steamers I go to is so large that the matter of £2 being sent I cannot always remember. I could not think of it at the moment. After I got away, and when I was going in the steamer, I began to think over what I had said, and I began to wonder what was the last fee that I had received. I have looked through my bank-book, but there is no trace of anything there. There is money paid in, but I have never paid in £2 by itself. If the cheques were paid in they would be paid with other cheques. I am acting as trustee for two or three different ladies, and these things are a bit complicated, and my memory is not quite clear. I believe if you wanted to know that I could let you know every penny, it would be down in my notes when I was working there at night.

Mr. Delohery : I asked you that question and you said you could not give the dates? I said I would have a difficulty. We have so many steamers to survey, and we have so many things on our minds that we cannot fix these dates exactly.

The Chairman : Seeing these discrepancies in your evidence, are you certain you have given us the whole thing. Have you received any cheques, or cash, or any gratuity of any kind other than those you have mentioned? I would not compromise myself one iota for such a matter. I may tell you now that about twelve years ago—I will not give you the name even if you press me—

In regard to your giving the name, I do not know what it is you are about to say, but you evidently do not understand the powers of the Board. We can do whatever a Judge of the Supreme Court may do in dealing with witnesses; however, you may proceed with your statement? I was going to say that about twelve years ago I was taken into the private bar of the "Exchange Hotel," and a gentleman began to tell me how kind and considerate I had been towards them. He told me they felt they were indebted to me, and he took out a handful of sovereigns and put them on the table. I said, "What about these?" He said, "This is just a little present for you." I said, "They look very nice, do they not, you would like me to take them?" He said, "Yes, they are for you." I said, "They would count for the future, and not for the past." I said, "Put them in your pocket and stick to them." He said, "I know I am clumsy over these things, but we feel we ought to make you some recognition." I said, "I have done no more for you than I would do for anyone else, and I do not want any recognition."

You did not receive it? No, I did not; and I never have received one penny. If I had I would acknowledge it to you straight out. I think I am about as straight from the shoulders as any man, and the shipping people will tell you that if you ask them. There is no beating about the bush with me. I tell them what I think, and they know it. What I told you was what at the time I honestly believed to be true.

We are not doubting it, we only want your explanation? If I can give you any information, if there is anything I can do which will assist you to bring these practices to light, I shall be only too pleased to do it, because I do not go in for that sort of thing myself.

It is only fair to you that you should have this opportunity of explaining yourself? I felt it myself as soon as I thought over it that I might have led you astray; but it was quite unintentional. I told you what I believed to be the truth at the time. It is a long time to tax a man's memory, and when I got that last £2 2s. Mr. Cruickshank, I think, was away, and Mr. Marr told me about the "Flinders." I could not possibly go to it. I told him I had a room full of men to be examined, and I said we would go on the following morning. We went in the morning, and we decided that the boat was good enough for another six months, at any rate. It was about ten days afterwards that I got this cheque. I trust you will not think I have tried to mislead you; I assure you I did not. I gave evidence of what I believed to be true, and what I believe to be true now. I said three, four, or five occasions. I said four or five because I doubted my own memory, though I could not call to mind more than three. After five or six years it is difficult to remember. The whole amount has not been more than five; still, you cannot be sure—at least, I cannot.

George Plaice sworn and examined :—

The Chairman : We are holding an investigation into the Navigation Department with the view, as you are no doubt aware, to regrading the officers, and we are sitting now with the powers conferred upon us by the 16th section—a section which places us in the position of a Royal Commission, and the evidence we are taking is under oath. What is your name? George Plaice.

What are you? I am a sea pilot.

How long have you held that position? Four years last January.

Now, I am going to ask you a question which you may refuse to answer if you consider that it will injure you in any way; but, in the event of your refusing, you must pledge your oath that to give an answer will do you an injury;—have you received any gratuities from anyone for bringing vessels to the wharfs, or performing any services of that kind? I have received presents.

Have you ever asked for them? No, never.

You are quite certain about that? I never asked for any payment.

How long has that been going on? Before ever I was a pilot.

I mean so far as you are concerned? Since I have been a pilot, but very seldom.

Can you tell me on how many occasions these presents have been given to you? About once in two months.

From whom have you received them? From the captains.

From the captains of the vessels? Yes; they gave me an order.

An order on whom? On the agents.

What

What have been the amounts that you have received? Different amounts. Sometimes £1; very often £1. The most has been £3.

You say the captains have given you orders on the agents to pay you those amounts? Yes.

What are these presents supposed to be for? For working on holidays, Saturday afternoons, or Sundays.

Have you only received them for bringing vessels up on these occasions? Yes; that is all.

Have you ever received anything for bringing a vessel up at night? Yes; at night I have.

You have received presents for bringing vessels up on holidays, Saturday afternoons, Sundays, and at night-time? Yes. On one occasion I remember I took the "Transvaal" into Woolloomooloo Bay at 2 o'clock in the morning and berthed her, and the captain gave me an order.

Do you generally bring vessels direct to the wharf, or do you leave it to the harbour pilot? To the harbour pilots, unless I receive an order.

An order from whom? We have had it from the Marine Board. Here is a copy of one of them (*handing in document*).

Is it necessary to get an order from the Marine Board before you move these vessels to the wharfs? No; it is a standing order from the Marine Board to facilitate the working of the ships.

Is this the standing order? That is one of them; that is the form we used to receive them in.

Do you never bring a vessel up without an order of this kind? Yes.

Without receiving a specific order for a specific vessel, you consider that the instructions of the Marine Board apply to all vessels? Yes, being instructed by the Marine Board to do so.

That is to say, when you got an order of that sort, you construed it to be a general order, and you brought vessels up to the wharf? Yes, direct to the wharf; but we did not in all cases receive anything.

You say the presents averaged about two a month? Yes; they would average that.

You are sure you never asked for it? Yes.

Have you ever had authority from the Marine Board for receiving these fees? No.

Do you know whether they were aware of it? I do not.

You thought it was the right thing to do, and you accepted these fees? Yes; I have done it as master of a ship myself.

When you were master of a ship, you gave a fee to the pilot? Yes; and my owners never objected if the pilot had done them a service in any way.

Are you aware whether any of the other pilots have received fees in this way? Yes; every pilot that is there now. Every one of them has taken these gratuities? Yes.

You are quite certain that you have only done it in these cases? Yes. The master of the ship, when he was a pilot, received gratuities. Captain Chudleigh—when he was a pilot—he did the same.

He received these gratuities, did he? Yes; when he was a pilot, and Captain Jack also before he retired.

What pilots within your knowledge have received fees? All those at present employed, and Captain Jack who has retired.

You say you have brought ships to the wharf when they came in at night, or on holidays, Saturday afternoon, or Sundays, and you have taken the general direction of the Marine Board as sufficient authority for doing it? Yes.

What orders have been given to you;—is it left to your discretion? Yes.

You can refuse if you like? Yes; if I thought there was any danger attached to it. I was not to run any risks.

If you thought there was no danger, you might bring them up? If I thought it was prudent to do so.

And have all the sea pilots acted in the same way? Yes. On one occasion there was an order to take a French steamer to the Grafton Wharf. I took her there; but there was no berth, so I took her over to Johnstone's Bay, and anchored her there. The agent complained, and I had to explain to the Marine Board why it was that I did not berth the vessel at the Grafton Wharf. It was at night-time.

So far as you know, the Marine Board were not aware that these gratuities were being received? No.

You thought it was a right thing to do? Yes.

Now, if you had not brought these vessels direct to the wharf, would they not have had to pay harbour pilotage in addition? Not always; because it is only until quite recently that a captain could shift his ship wherever he liked.

I mean that, in coming in from sea, if you had not brought these vessels straight up to the wharf, they would have had to pay a harbour pilotage? Not formerly; the master could shift his ship where he liked.

What you mean is this: if you brought a ship to an anchor below Fort Denison, the master could afterwards shift his ship to the wharf himself? Yes; the captain could.

Whether he had an exempt certificate or not? Yes. That was Captain Hixson's decision at one time with the Collector of Customs. They decided that, according to the Act, if a master was above Bradley's, he could shift his ship to any part of the harbour he liked without paying pilotage; but I think that is altered now.

Are you still carrying on the practice of bringing vessels to the wharf? Yes.

Under the new orders, if you did not perform this duty, would not these vessels have to pay a harbour pilotage fee? I think so; but it would mean detaining the ship.

Is not the result of your bringing vessels to the wharfs that the ships escape the payment of the harbour pilotage fee? Yes. I do not know whether it is paid or not.

When you bring them straight to the wharf, the harbour pilotage is not paid? I am not sure. I do not think it is. Mr. Delohery: There would be no removal? No; it is direct from the sea, the same as taking a ship out.

The Chairman: Then the harbour pilotage would not be paid? So far as I know, it would not.

The fact of your performing that service saves the ship the payment of the harbour pilotage? So far as I know.

Mr. Wilson: Has the receiving of these gratuities been openly done, or has there been any concealment about it? No concealment so far as I am concerned, and no demand made; nor did I always get it. I berthed the "Alameda" the other Sunday afternoon; but I did not get anything. I did not go to the office, because he did not give me an order. It is not every ship that we receive a present from.

You are not paid on all occasions? No.

In what cases were you paid, and in what cases not? I have had cases where the agent has sent money down for taking ships from the wharf on a holiday—not that that was customary; and Holder Brothers have sent for me, and said, "You took a steamer away on the holiday." I said, "Yes"; and they said, "You are entitled to this—we always give the pilot a present." There would be no removal charged for that ship, she went right to sea.

Mr. Brodie: Do you remember removing the "Ferndene" in March last? I do not remember; I can find out by looking at my books.

Do you remember removing the "Indraghari" in the same month? Inwards or outwards?

Outwards? No.

Did you ever receive fees for taking them out after hours? No; we never get anything for taking them out. I have been at Pyrmont, ordered to take a vessel out at 8 o'clock, and I have had to wait about till midnight. The captain asked me to bring the vessel down below Garden Island, and then he told me that he could not go to sea that night. I anchored her at the back of Garden Island, and stayed aboard until 3 o'clock next day; but I never received anything for it.

Have you ever mentioned to the shippers that you had been delayed till all hours of the night? I never went near them. That is not the only occasion. There have been several occasions where I have been detained all night, or the best part of the night.

What record do you keep when you are bringing vessels inwards late at night, and taking them direct to the wharf? The time is entered in the log-book.

Do you record the time in the log-book? No.

Who does that? The Chief Officer takes the time.

And enters it in the log? Yes.

The Chairman: What are your hours of duty? All hours.

How long are you supposed to be on and off duty? We are always supposed to be on duty. I have not been able to leave that station for the last eight months. I have not been able to leave Watson's Bay to go anywhere with my wife and family.

Whenever you are called upon, whatever the time may be, the "Captain Cook" takes you out, and the pilots in their turn board the vessels? Yes.

And

And having boarded a vessel you do not leave her until you have berthed her? Or anchored her; and then the tender takes us back to Watson's Bay, and we are ready for whatever next comes along.

Then you are on duty again to take your turn for the next incoming vessel? If there is anything going to sea I am called on.

You take it in turns? Yes; I am first on duty.

You are supposed to be on duty night and day, whenever you may be called upon? Yes; Saturday, Sunday, holidays, and any time

Mr. Brodie: Do you take it in turn to receive these fees or gratuities from the shipping-masters? Oh, no.

There was no mutual agreement of that kind? No; no arrangement at all, it rested with the captain whether he gave it or not. The captain would propose it himself. I have done it as master of a ship, and Mr. J. C. Ellis, who was the shipowner at that time, never objected to it. In China I have done the same thing.

Do not you think it would be better to have this put under a regulation, so that you could get these fees above-board, and so that everyone might be aware of it? It has been above-board so far as I am concerned.

I mean so that it would be understood by everybody? Yes, it would be better.

Mr. Wilson: It would be much more satisfactory to yourselves? Yes, then we could make a demand if we did any service like this.

You would not make any demand, it would be regulated by the Department;—you would receive no money from the ship? Yes; I understand. But under the old Marine Board, if we did not take a ship out at night time or take her to the wharf, the agent would complain, and we should have to explain about it by writing a letter.

Frederick William Morris sworn and examined:—

The Chairman: You are one of the pilots stationed at the Heads? Yes.

How long have you been in the Service? Twelve years and two months.

I want to ask you a question now which you need not answer if you think it will injure you. Have you received any gratuities from anyone for bringing vessels up to the wharfs? Yes, I have.

From whom have you received those gratuities? From Dangar, Gedye's, from Gibbs, Bright, from Mr. Segur, and from Burns, Philp.

Have you received these gratuities during the whole time of your service? Pretty well, I think.

About how often did you get a gratuity? Perhaps five or six times in the year, I could not say positively.

About every two months? Yes.

What has been the amount of the gratuity generally? A guinea; I have had two guineas.

Any more? On one occasion I had £3.

What was that gratuity supposed to be for? For taking a ship up to the wharf, or sometimes for taking her away from the wharf. I never received £3 for taking a ship away, never more than £1.

When you do that of course there is no necessity for the ship to employ a harbour pilot, and I presume there is no payment for harbour pilotage? No.

So that your bringing a ship straight to the wharf saved her the harbour pilotage? Yes.

That is a fact? It has only happened lately.

That is under the new regulations? Yes; in former times they paid the removal just the same.

That would be seven or eight years ago? Yes, I suppose it would be about that.

Before that time, whether a harbour pilot was employed or not, a removal fee was paid? Yes.

Afterwards that was remitted when a sea pilot brought a vessel direct to the wharf? No, it was not remitted, they paid it just the same.

I mean after seven or eight years ago? No one was allowed to bring them to the wharf, the captains could bring them up themselves.

Have all the pilots done the same thing to your knowledge? I believe so, as far as I am aware.

Mr. Delohery: They have received fees for bringing vessels up and taking them away? Yes; more for taking them away than for bringing them up; it is not exactly for taking them away from the wharf—we are supposed to do that with all vessels—there is no removal charged for taking the vessel away from the wharf.

You get a fee for doing that? Only sometimes, for a good many of the ships we take away we never get anything at all.

The Chairman: Have you ever asked for a fee? No, I never did, it has been given as a present.

Mr. Delohery: What is the fee for, is it for working after hours? Yes; say we are ordered for 8 or 9 o'clock, and we stay till 5 or 6 next morning.

In the daytime you get nothing? Only at night or on Sundays.

The Chairman: Or holidays? Yes, but nothing in the day time.

Mr. Brodie: Did you get anything for taking the "Clan Buchanan" out in March last? If I took her out, I did not get anything for it.

Why would you not get anything for taking her out? It just depends on the captain. If the captain does not say "There's a new hat," we cannot charge anything. I took a large ship out of the dock the other day, it was the "South Australia," but nothing attached to it.

It is part of your ordinary duties, is it not, to be in attendance to take vessels out at all hours? It is not our duty really, our duty only extends to Pinchgut; according to the law, we are not supposed, to do anything beyond Pinchgut, although we have done it.

The Chairman: A harbour pilot is supposed to go on board at that point? Yes; some years ago, the pilotage being so heavy, Captain Hixson allowed us to do this. We used to take the P. & O. boats from the wharf, and they were charged a removal, but we never got anything for that. We never get anything for day work, it is only at night, or on Sundays, or on holidays, when the harbour pilots are not supposed to work.

Mr. Brodie: How was it that, as a sea pilot, you took the "Clan Buchanan" out? If a vessel wants to go down in the stream, for instance, then a harbour pilot does that, and a removal is charged; then we take the vessel out to sea. If the ship does not want to go to stream, but direct to sea from the wharf, we take her out, and if the captain is generous enough to give us something he does it.

Mr. Wilson: There is no concealment about it? No.

The Chairman: You are not aware whether the Marine Board was cognisant of what was going on? I think they were, but I do not know for certain. We have had instructions lots of times to take ships to the wharf from the Marine Board. Of course, when a man-o'-war comes in they give us something for bringing her up, because they pay no pilotage.

Do they always give you something? Sometimes they do, sometimes they do not.

Mr. Wilson: The foreign men-o'-war, I suppose? The French boats never give us anything, but the German do. The Government charges them no pilotage.

William Charles Tylor sworn and examined:—

The Chairman: We are holding an investigation into the Department of Navigation with a view to regrading the officers, and we wish to have some evidence from you on certain matters; what is your position? Sea pilot.

How long have you held that position? Thirteen years and four months.

I want to ask you a question now, which you need not answer if you think it will injure you; but if you do refuse, of course, you must pledge your oath that to answer it will do you an injury;—have you received any gratuities for bringing ships to the wharfs? Yes.

Have you done that the whole time you have been in the Service? Yes.

How frequently did you receive gratuities? Very rarely; only when I have done it at night time or on Sundays.

What would be the average? There is no average. I have sometimes done nothing for three months; I might get one in each month, and then I might not get anything for three months.

You say that has extended over the thirteen years of your service? Yes.

Are you aware if the Marine Board has ever given permission to the pilots to receive these gratuities? They have not given us permission, but they have instructed us to berth these vessels at night time. In a great many cases ships
come

come into this port at night time. Say one comes in at midnight, she is worth £120,000, and they are naturally anxious to get her to the wharf as quickly as possible. We have taken steps to the wharf upon an order from the Marine Board, but not demanding any money, and not with the Marine Board's sanction of getting any that I know of.

Are you aware whether other pilots have received gratuities in the same way? I do not think there is a man in the service—I hope I am not injuring anyone else by saying it—who has not at some time or other received a gratuity.

You are speaking of the pilots? The harbour pilots and the sea pilots, from Captain Creder down, have all received gratuities. We have never received anything for taking ships to sea. Another thing which I did not have an opportunity of telling you the other day; ever since I have been in the Service our boundaries as sea pilots are supposed to be Neutral Bay; the harbour pilots were supposed to do the removals. The other night I had to take a ship to sea; it was a sailing ship, about 3,000 tons. It was blowing hard, and it is very difficult to get a vessel like that out of the wharf in the dark, because in a great many cases the crew is half drunk, and they will not heave on the windlass. The ship was lying in a most awkward position near the gasworks, and the master had 60 fathoms of chain out, and only seven men to heave the anchor up. I asked him why he had not shifted the ship. "Oh," he said, "I went to the office to order a harbour pilot, and they told me the sea pilot would take me away." That has been the case since we have been in the Service. We have had to do their work, because they do not work at night time. As a rule, a ship wants to shift down in the evening, and we go to the wharf to take her from there.

Is it for doing that that the gratuity is given to you? We have never received payment for that, not a penny. I have had as much as £2, and on one occasion I had £3 given to me. It is very seldom that it happens; I do not ask for it, and I do not demand it. I have been master of a ship myself. I was in the "Zealandia" for five years, and I used to give gratuities. I have given a pilot a sovereign, and the owners have never objected; it has gone in with the accounts.

Mr. Wilson: You would prefer that any fee for work of that kind should be under a proper regulation, so that it could not be objected to? To tell the real truth, I never felt that I had done wrong, if I had been ordered not to take it, of course, I would have refused it.

That is scarcely an answer to my question;—I asked you whether you would not prefer that the payment of such fees should be governed by regulations so that you would know what your rights were in the matter? Certainly. I may tell you that in the Harbour Regulations we are allowed to charge fees. If we attend a ship two or three times, we can charge a fee, and we can recover that fee summarily or by process; we are entitled to that by law.

What is that? Under the Harbour Regulations, if a pilot is ordered, say, this morning, and he finds the vessel is not ready for sea, and if he attends again, and finds that the vessel is not ready, that pilot can charge 10s. for every visit he makes after that.

The pilot or the Department? The pilot, and he can recover. If you look at the Harbour Regulations, you will see it.

The Chairman: Has that ever been enforced? Oh yes; it was frequently enforced in the old days. A master might be lying down below ready for sea, and he would keep on ordering pilots, and the pilots had to be running up and down, and dancing attendance on him.

Did the pilots ever enforce that fee? Yes; to my knowledge they have enforced it.

Mr. Delohery: Would that fee go to the pilot? Yes, I think so; that is the way I have read it.

The pilots are entitled to it as their own fee? Yes; he can recover it as his own fee.

Mr. Brodie: Surely you do not retain the fees? I never charged it; but it has been charged and retained by the pilot.

The Chairman: Can you mention any case? I believe I can mention the case of a pilot named Christison, since dead.

Do you know of any other case? I believe Captain Jack has done it; but I would not be positive.

He has demanded and retained a fee? Yes.

Is there anyone else you know of? No; the thing seems to be explicit in the Harbour Regulations. Personally I have never charged it.

Whatever you have done has been done openly? Whenever I have received a gratuity it has been for taking a ship to the wharf.

George Sidney Lindeman recalled:—

The Chairman: There are one or two questions we wish to ask you, Captain Lindeman, in view of the evidence which has been given since you were here;—I think you said in your evidence that if gratuities were given to surveyors, it would be entirely wrong? Yes; without authority.

And you also said that you were entirely unaware of such things being done? Yes.

You were further asked whether you were aware that gratuities had been given to the sea pilots; you replied that you were not aware, and that if it was done it was unknown to the Department;—I think you said that? Yes.

Do you still adhere to that? Certainly.

Would you be surprised to hear that it has been done wholesale? I should be very surprised.

We have evidence to show that gratuities have been given to sea pilots; it is admitted, in fact, that for seventeen or eighteen years this has been going on, and that it has been done almost from the very first; the pilots themselves have admitted that they have been in the habit of receiving gratuities, and three of the engineer surveyors also have admitted receiving gratuities. I suppose this comes as a surprise to you? Yes, quite.

You will admit, I think, that this practice of receiving gratuities is much more dangerous in the case of the surveyors than of the pilots? Yes.

And had it come to your knowledge you would have unhesitatingly condemned the whole system? If it had come under my notice I should at once have reported it to the Board.

The system has been carried on quite without your knowledge? Yes; I knew nothing whatever about it.

And it would not have had your authority or sanction? No; of course I should have reported it at once to the Board.

It is admitted on all hands that it has been going on for years and years? I am surprised to hear it, and I should be equally surprised to think that Captain Hixson knew anything about it.

You do not think he was aware of it? I do not think so.

At any rate, so far as you are concerned, you knew nothing about it? Nothing at all.

Mr. Seife came before us, and gave certain evidence; he said that a certain company sent him a fee, and that he went to Captain Hixson and showed him the letter he had received, and that Captain Hixson said, "I do not want to know anything about it." That was taken as a tacit approval of the acceptance of these fees? I know nothing about it; it is the first I have heard.

You have not previously heard of this? No; it never came under my notice. Captain Hixson's room was at the top of the building.

He might have said this? He might know all about it.

Or he may deny it; we propose to give him an opportunity to explain? Certainly I never heard anything about it.

We thought it right to let you know the result of our investigation? Of course you know when I was Secretary to the Board I had no authority, as Captain Hixson stated in his evidence. It is quite possible they may have seen him without my knowing anything about it, but I should be surprised to learn that he sanctioned anything of the sort.

Mr. Wilson: If a surveyor did want to get an opinion on the matter, it would be to Captain Hixson that he would go? Yes; not to me. If he came to me I should send a communication to Captain Hixson.

The Chairman: It shows how quiet the whole thing has been kept when you, as Secretary, knew nothing about it? I knew nothing whatever about it.

It has been done wholesale? I was a bit surprised at the willingness of the pilots to bring vessels up at all hours.

Mr. Wilson: This explains their willingness.

The Chairman: With regard to the surveyors, it is right to point out that Mr. Cruickshank stands out in bold relief against them all. Not only would he receive nothing himself, but when it came under his notice he gave it as his decided opinion that these gratuities should not be accepted.

Mr. Wilson: It was only when Mr. Cruickshank told Mr. Seife that he should return it that he went to Captain Hixson.

The Witness: Of course I do not know what took place with Captain Hixson.

[The investigation was adjourned till 2.15 p.m. the next day.]

THE investigation, under section 8 of the Public Service Act, into matters connected with the Department of Navigation, was resumed and continued on Thursday, 13th September, 1900, at 2.15 p.m.

Present :—

Mr. J. BARLING, Chairman, }
Mr. WILSON, Member, } Public Service Board.

Mr. G. E. Brodie, Assistant Auditor-General, and Chief Inspector of Public Accounts.

William Douglas Cruickshank further examined :—

The Chairman : When we were examining Captain Lindeman in connection with this investigation he made this statement : " I may tell you I remember a case where Mr. Cruickshank was offered a certain sum for certain work he had done, and he refused to accept it." Captain Lindeman was then asked, " You thought it was right that he should refuse it?" and he replied, " He thought it was right." Then he was asked, " The Board did not recognise any such practice," his answer being, " He told me unofficially that this money had been sent to him, and he informed Captain Hixson, and told him that he was going to refuse it." " It was a practice not recognised by the Board," was the next question put ; and Captain Lindeman replied, " Certainly not." As this evidence has been elicited in the course of the inquiry we thought it right that you should be given an opportunity to state your version of the case.

The Witness : I suppose the Board wishes to know all about it. The best explanation I can give you, gentlemen, is to let you read these two letters—one sent to me, and the reply I made. [*Documents handed in for the perusal of the Board.*] I have shown you the correspondence, and I think it fully explains the whole transaction. It shows what actually took place, and that the fee was returned as soon as it was received.

The Chairman : Mr. Wilson and I have read these letters, and there is nothing in them but reflects the greatest credit on you. Your evidence all through, Mr. Cruickshank, has shown that the Government may be congratulated upon having in the Service such a high-minded officer, and one whose conduct stands out in such bold relief against that of others who have come before the Board.

Mr. Wilson : I may say that I entirely concur with what the Chairman has just said.

The Chairman : I need hardly say that you leave this investigation without the slightest stain on your character.

The Witness : Thank you, Mr. Chairman. With respect to the regulations, which the Board asked me to prepare, I have drawn them up, and I have them here.

The Chairman : It will be better if we see you specially about this matter, but we shall be glad to have your rough draft to look through.

Robert Steel sworn and examined :—

The Chairman ; What position do you occupy ? Assistant Engineer Surveyor.

How long have you held that position ? About four months.

Now I want to ask you a question which you may, if you think proper, refuse to answer ; but if you do you must pledge your oath that it will injure you to give a reply. Have you received gratuities from anyone since you have occupied the position of Assistant Engineer Surveyor ? Yes.

From whom ? I do not know the person's name ; it was the captain of the steamer.

The captain of what steamer ? The " Ramazan."

What did you do in order to earn that gratuity ? I worked the whole of Saturday afternoon and Sunday morning.

What were you engaged in doing ? Surveying the machinery, boilers, hull, &c.

What made you think that you had a right to accept that fee ? Through hearing the opinions of others in the office, old servants who had been there a considerable time.

From whom did you hear it ? My seniors in the office.

To whom are you referring ? To Mr. Selfe, Mr. Marshall, and Mr. Marr.

Did you ask for their opinion when you received this fee ? Not at the time. I was not in a position to do so, because it was after hours.

As soon as you had an opportunity you asked them, did you ? No, it was prior to that. The matter had been talked over, and I understood it was customary.

You took it in the full belief that it was a right thing to do ? Yes.

Having considered the matter again, do you think it is a right thing to take fees in that way ? Under the circumstances, I do, being called out during those hours.

Do you think it is a right thing to take fees in that way, without the distinct knowledge of the Department ;—do you not think the practice is liable to abuse ? It is a matter that is open to abuse.

Still you thought it was customary, you were told it was, and you accepted it ? Yes.

Of course we recognise that you are a new appointee to the Department, and no doubt you have been completely misled in the matter.

The Witness : I was sent away late on Saturday morning over to the Sutherland Dock. I would have refused to carry out the survey had I been able to communicate with the Superintendent, but it being after hours I did not know where to find him. I had been told in the office that it was customary to carry out these surveys on Saturday afternoons and Sundays, and I thought I might be doing wrong if I refused.

The Chairman : Is that the only occasion on which you received a fee ? Yes. I may say that we are frequently called out on Saturday afternoons and on Sundays, and at night time.

The Chairman : We are not objecting to the payment of overtime, where a person is called out at unearthly hours ; all we say is that it should be done under proper regulations.

The Witness : Considering the salaries we are receiving, I thought it was right to accept this fee.

The Chairman : Still, it was not right to receive it in that way. The practice is one that might lead to the greatest abuse.

Mr. Wilson : You would prefer that the payment for overtime should be put on a different footing. If you are called out on Sundays, for instance, you would prefer that there should be some recognised system, and that the payment should be under a regulation ? We would prefer that there should be some understanding.

I suppose you also recognise that this work must be done at any hour in the interests of the shipping ? Yes ; I have been given to understand that before.

Henry Pettit recalled :—

The Chairman : We want to ask you some further questions, Captain Pettit. I am about to put one to you which you can refuse to answer, if you think it will injure you ; but if you do refuse you must pledge your oath that to answer them will do you an injury ;—have you been in the habit of receiving gratuities ? Do you mean from the shipping ?

Yes ? Well, I have received a little in excess of the removal of a ship on special occasions.

Do you mean by that that the statutory fee has been paid to the Treasury for that removal ? Yes.

And that something has been given to you over and above that fee ? Yes.

For how long has that practice continued ? For some years ; but it has dwindled down to a very low thing during the last four years.

During that period, I suppose the sea pilots have been doing the work and taking the gratuities ? No ; they have not done that. It has been on Saturday afternoon, perhaps, or at night time, when we are not supposed to be on duty. We have the privilege of Civil Service hours in our Department, which the sea pilots have not.

When you have accomplished removals after hours, or on holidays, these gratuities have been given to you ? Yes.

But in that event the statutory fee has been paid to the Treasury ? Yes.

And something extra has been given to you ? Yes ; for the extra duty out of office hours.

You say that has continued for some years ? Yes ; this last ten years.

To how much would the gratuities amount to in a year ? Do you mean to each pilot.

Yes ? There is no definite amount.

How

How many times in a year have you received a gratuity? I never kept count.

Would it come to a dozen times? I do not think so. I do not think that I have received more than a couple of gratuities during the current year.

In previous years, would it come to as much as a dozen a year? I can hardly say that from memory.

Did you demand a fee, or was it given to you? It was voluntarily given.

About what would be the amount of the fee? From a guinea to a couple of guineas.

According to the time, I suppose? According to the description of the vessel. If it was a large mail-boat arriving on a Sunday they would naturally be anxious to get to the wharf, and they would make the pilot a present of a couple of guineas. If it was Saturday afternoon they might give the pilot a guinea for a new hat. That was about what was usually given in these cases.

Was that practice known to Captain Hixson or to the Department? I think it must have been known to Captain Hixson; he did not appear to interfere with it in any way. I remember, on one occasion, an agent demurred to giving anything to the pilot for services performed in this way. It was said, "You expect a fee?" We said, "This is out of hours; we do not expect a fee; it has been given; it is not asked for." The agent said, "Well, we do not intend to pay anything." I said, "If you do not, I will put it before the head of the Department; we are not supposed to work on Saturday afternoons or on Sundays." I told the agent that if we were to be kept working during those hours it was completely against the regulations. I told Captain Hixson about it, and he said, "If it is so important with these people to get vessels up to the wharf out of office hours, and when the Custom-house is closed, and when this office is closed, and if an officer is done out of his legitimate holiday, I think it is mean of the company not to make a little allowance." He did not say that he was in favour, but he said he thought it was mean of the company not to make some little recognition of this extra service.

Captain Hixson said that to you, did he? Yes; he said, "I do not tell you that it is proper to take it, but still I think, when it suits their interests to have a ship brought up out of office hours, they should make some little recognition to the officer whose duty it is to remove the ship."

Would not you consider it more satisfactory if there was some regulation, some recognised rule, for the payment of overtime? Yes; particularly in our Department, where we are supposed to have Civil Service hours. I think it would be more satisfactory to the Department to pay a recognised sum to the pilot who had the job to do, and it would be more satisfactory to the pilot and to every one concerned.

The position would be thoroughly understood then? Yes.

Can you tell us, Captain Pettit, if there were any regulations which defined the boundaries of the jurisdiction of the harbour pilots and the sea pilots? Well, there was an old recognised rule that above Fort Denison was where the harbour pilots took up their duties.

When you were before the Board previously this question was asked, "Now I want to ask you has it ever come to your knowledge that the sea pilots have been paid for bringing vessels up in this way?" And you replied, "I have never heard it personally; but I have heard it spoken round. It never came personally under my notice." Then the evidence proceeds: "It has been talked of? I have heard it spoken of. Has it been spoken of in such a way as would lead you to believe that it was true? Really I cannot say. Has it conveyed to your mind the impression that there is some truth in it? It is possible there may be truth in it. I do not think a man would run himself into trouble, and exceed his duty without some extra remuneration." Why did you not when you gave that evidence about the sea pilots mention the fact that you yourself had received gratuities for bringing vessels up? You never asked me if I had received a fee.

You did not mention about yourself? I did not.

Do not you think it would have been better if you had? I might have done so; but as it was not a question asked I did not think it worth while mentioning then.

Charles Robertson Thompson sworn and examined:—

The Chairman: This is an investigation we are making into the Marine Department with a view to regrading the officers.

What position do you occupy? I am Assistant Harbour Master.

I wish to ask you a question now which you need not reply to if you think to do so will injure you;—have you ever received gratuities from anyone for carrying out your duties? I have.

From whom have you received them? From nearly all the shipping companies going?

How long has that continued? Almost ever since I have been in the Service.

How long is that? Fifteen years.

It has been the practice from the first? Yes.

Is there any rule or regulation which authorises your receiving such fees? I never heard of any rule or regulation; but I heard that it was allowed.

Allowed by whom? By the Marine Board, when I joined the service.

Will you be surprised to learn that this practice was known neither to Captain Hixson nor to Captain Lindeman? I will just read you Captain Lindeman's evidence. "Would you consider it as a most improper proceeding? Yes, certainly." Then again, "Do you think the Board would consider it right? No." "It was a practice not recognised by the Board? Certainly not." You see your idea that the Department was aware of it does not appear to be borne out by the evidence? We took it from what Captain Hixson told Mr. Hillman.

Who is Mr. Hillman? He belongs to the Orient Company. I have only got this second hand. I did not hear it from Captain Hixson, or from Mr. Hillman, it was told to me by Captain Pettit and Captain Bracegirdle, they were my seniors. Captain Hixson told them that Saturday afternoons, Sundays, and public holidays were considered our own time, and if there was any urgency in getting a vessel to the wharf, if the company made an arrangement with us we should not stand in their way.

You are under the impression that although the practice was not actually acknowledged still it was tacitly acceded to? Yes, that was my idea.

You thought it was quite right under the circumstances to accept these fees? Yes.

Do you not think it would be very much better if that were done according to rule and regulation? I certainly think so. I have advocated it amongst ourselves for years, but I had not the ear of anyone who would take notice of it. I certainly think it should be regulated; in fact I think the whole service wants regulating.

In what way do you consider that the service wants regulating? We are working too much into one another, the sea pilots are bringing vessels up to the wharfs. I think matters ought to be regulated so that we may really know what we are doing.

If a sea pilot brings a vessel straight to the wharf the harbour pilotage dues are lost? Yes. I believe it is Captain Edie's opinion that if they do not drop anchor, if it is one movement from sea to wharf, a removal should not be charged, and it has for a long time been the custom for vessels not to pay a removal fee when going away from the wharf to sea.

Mr. Brodie: Can you give the Board any idea of the number of fees you have received within the last twelve months? I have received eleven guineas this year.

The Chairman: Do you think you received more in previous years? Yes, some time ago.

What is the highest amount you have received in any one year? About £20, so far as I can tell from memory. It does not often come that way, and even when it does, we try to put them off until it is working hours.

You would rather have your holiday than the guinea? Yes; I would rather have my Sunday as a holiday than I would have that. I may say that when Captain Edie took charge of this Department a case occurred where I was required to take a ship down stream on Saturday afternoon. I made some demur, as I had been up from 4 o'clock, and because Saturday afternoons had been considered our own time. Captain Edie then said that we were supposed to go whenever we were called upon, and that if we were entitled to that time, he would see that we were paid overtime. But I have had many cases since that time, and I have never received any overtime.

The payment for overtime would be the proper way of dealing with these cases? Yes; it is only right that we should have some fixed time. As it is now, it is not justice to us or to anyone else.

Mr. Wilson: I am not quite sure that your hours should be those of the clerical division. As a matter of fact, there may be times in which you have practically nothing to do.

The Witness: Those hours will not do now at all. The steamships are in too much of a hurry, and they make it a point to arrive here on Sundays, and thus save a day.

Mr.

Mr. Wilson : There is too much urgency about shipping matters nowadays to allow of clerical hours being observed in work like yours.

The Witness : If I might mention it, my opinion is that the whole service could be worked with one staff instead of having two as at present, a harbour staff and a sea staff.

The Chairman : The two sections could be amalgamated ?

The Witness : Yes.

Mr. Wilson : Just as they are at Newcastle ?

The Witness : Yes, they have a steam launch to attend the pilots there, which takes them out to the different vessels. We have a small boat ; we are living in our own houses wherever we can get them ; we have to depend on ourselves for rising, we have no one to call us ; and we only have rowing boats, and if there is any wind or the weather is bad we have difficulty in getting to the vessels, and a lot of time is lost.

The Chairman : Your idea is that the positions should be amalgamated, and that whenever a pilot is put in charge of a ship he should invariably bring it to its moorings ?

The Witness : If the two staffs were amalgamated there would be more men to do the work. Two men could always attend in Sydney to deal with the removals that might be required during the day.

Alexander Sangster sworn and examined :—

The Chairman : As no doubt you are aware, Captain Sangster, we are making an investigation into the Department of Navigation with the object of regrading the various officers ;—how long have you been in the Department ? Three and a half years.

What position do you occupy ? Inspector and surveyor.

What are your duties ? Preventing breaches of the Navigation Act, and surveying vessels.

You survey vessels—that is the shipwright's work ? Yes.

The spars, tackling, and all that sort of thing ? Yes, and the ship's hull ; the rigging generally and the boats.

Now I want to ask you a question which, if you think it will injure you, you may refuse to answer ;—have you ever received a gratuity from anyone ? Never.

Has anyone ever offered you a gratuity ? Yes, on several occasions.

From whom have these offers come ? I think I must refuse to answer that question.

Will it injure you to answer it ; if not, I think we must compel you to give an answer. I will answer it if you wish. It was*

Has anyone else offered you a gratuity ? In an indirect way.*

Anyone else ? In another indirect way.

What do you mean by an indirect way ;—how was the offer made ? Our work is a peculiar sort of work, inspecting shipping, such as when vessels are overloaded, and things like that, and sometimes we have to put shipowners to great expense in discharging the ship again. I have been told on such occasions, in an indirect way, that they would make it worth my while if I did not compel them to discharge again.

Who has told you that ? Well, the wharfinger on Howard Smith's wharf.

Do you know his name ? No, I do not, it is sometime ago.

About how long ago ? About two years.

He told you that it would be made worth your while if you did not compel them to discharge cargo again ? Yes ; they were overloaded, and they had to discharge a portion of the cargo to bring her up to the proper line ; I suppose it would be four or five hours' work.

You were told they would make it worth your while ? They did not offer me money ; but I knew their meaning.

Now, about the other case—the case of the Adelaide Company—what was that occasion ? That case happened only a short time ago. About 4 o'clock, or a quarter-past 4 one afternoon, they came in and wanted a load-line for one of the China ships for which they are agent. Under the present Act there is a very large amount of work involved in measuring a ship and marking the load-line. I told the agent who came in that it would be impossible for me to do it that day, as it would take me quite four hours to complete the work. He said, "Captain Sangster, we want to get the ship away to-night ; in fact, she must go." If they wanted her to go, if she must go, and they had not the load-line, they could not go to Melbourne, so I said, "Very well, I will do my best." I finished the work about 10 o'clock, and the five-guinea fee was paid to the Secretary. What I was going to say was this : when I told the agent that I could not do it, he said, "Try and do it ; we want to get the ship away ; it is most important ; it means a lot to us, and we can make it worth your while." I said, "I do not want anything like that." I consider that anything I refuse in that way is an investment.

What happened in the other case you mentioned ? I had the money put into my hand.

Who gave it to you ? I think it was Mr. Jones.

How much did he give you ? I think it was a sovereign, I did not look at it long enough to be sure, I simply asked him what he meant by doing the like of that.

What was that fee intended to cover ? I do not know I am sure. I surveyed his vessel with all honesty, and had everything right, so far as I required it. When he put the sovereign into my hand I did not think it was for doing anything in particular.

You at once refused it ? I did.

Of course your duties are of the most responsible character ? They are duties where a man, if he likes to be dishonest, can make a good bit of money. Sometimes we have to put a shipowner to a great deal of expense in shifting cargo. We may go to one of Huddart Parker's ships, or one of Howard Smith's, and we find her filled on both sides with fruit in such a way that the boats could not be managed, and as would make it uncomfortable for the passengers to get about the decks. We have perhaps, 2,000 cases of fruit shifted, and delay the ship several hours. It means a large sum of money to them when a ship has been overloaded and we compel them to discharge cargo again.

Are the instances you have mentioned the only ones where a fee has been offered to you ? Those are the only occasions I can swear to. I believe I have had other offers in an indirect sort of manner. I have been told to let the ship go. If a ship has been an inch or two below the load-line, I have refused to let her go out, and when they asked me to let her go, I knew what they meant by doing that.

Who has said that to you ? Huddart Parker's principally.

Anyone else ? I cannot from memory say. We are round amongst the ships all day long, and this happens very often.

The Chairman : I think the Government is to be congratulated in having officers who will maintain their position as you appear to have done.

The Witness : I have been in an unfortunate position. I left good employment to enter the service of the Department. I think the Board promised to inquire into my case. I do not think the Marine Board dealt fairly with me, although I have tried to do my best. Both Captain Hixson and Captain Edie promised me that my salary should be increased. I told them I could not stay where I am at the salary I was getting. I have kept out of difficulties up to the present, but I have to dress well, and I have to meet Mr. Burns and Mr. Forsyth, and gentlemen like them, in connection with their business, and I have to go round town inquiring into different matters. The Marine Board, about nine months ago, wrote to the Treasury and asked them to put £50 on my salary, and a communication came back, through the Public Service Board, I believe, saying the matter would be referred to on the regrading.

The Chairman : The time has now arrived when we shall be able to do something. Your case will not be overlooked. I hope you will always continue in the straightforward way you have gone on to the present.

The Witness : I consider that in shipping matters anything you take from them they will only throw up into your face again whenever they can. They will want three times the value of the money out of you in the long run.

Herbert Chudleigh sworn and examined :—

The Chairman : You are captain of the pilot steamer "Captain Cook," are you not ? Yes.

And you are also in charge of the Pilot Station ? Yes.

You do pilot's work as well, do you not ? When it becomes necessary ; when all the other pilots are out on duty.

I want to ask you a question, which you are at liberty to refuse to answer, if you think it will injure you to do so. Have you received gratuities from anyone ? I have.

From

* It is not considered desirable to disclose the names.

From whom have you received gratuities? I can hardly tell you from whom; from the masters of ships, and several agents about town.

For how long has that practice continued? I may say that it was in vogue when I went into the Service. I remember I had been in the Service just about a fortnight when I went to take a French steamer to sea. I was waiting in town for a gentleman to come down. I think he was at Dalgety's. When Mr. Moore came down he inquired for me, and he said, "Well, you took the ship away, call and see me during the week." I called up during the week, and he gave me a sovereign. That ship had to pay pilotage as well.

How long ago is that? That must be over fourteen years ago.

Has it continued since? Yes, but it has not been a thing of frequent occurrence.

How often does it occur? Sometimes we might go three or four months and get nothing at all, at other times perhaps it might be a little oftener.

Occasionally, I suppose, you have brought vessels right up to the wharf? Yes; that is on Sundays or at night time.

What have you received for doing work of that kind? Sometimes I have got nothing whatever; at other times, if the captain is generous, or the agent is generous, I have received a pound or £2.

So far as you know, that has continued from the very first? Yes, from ever since I went into the Service.

Mr. Brodie: Did you ever mention to Captain Hixson at any time the fact that you were receiving fees in this way? I have only been in charge of the steamer during the last six months, and Captain Hixson was not there during that time.

Do you know of anyone having spoken to Captain Hixson about this matter? No; but I think the Marine Board must have had knowledge of it, because we often received orders by telegram to berth certain ships. We thought it was nothing but a just thing. I should have been sorry in need to have taken anything from anyone if I had not considered it just. I handled thousands of pounds before I went into the pilot service. I was master of Mr. See's ships before I went into the service, and I must have handled thousands of pounds, and I would not have taken one single sixpence if I had not thought it was just.

The Chairman: You thought it was fairly earned? I did.

Do you not think it would be much better if those fees were paid under a proper regulation, and received with the full knowledge of the Department? Undoubtedly, and I hope the Board will make some regulations now which will do away with this sort of thing. No one would wish to take a single sixpence if it was offensive to anyone.

If persons work overtime, it is only right they should receive some remuneration, but it should be done under proper regulations, so that everyone may know what he is about? Everyone would prefer it.

You never asked for a fee, I suppose? Never in my life. Whatever I received was given to me without any trouble or bother about it. I think it would be better to have some good regulations, and do away with this at once.

William Crossan sworn and examined:—

The Chairman: You have only just come from Newcastle, Captain Crossan? Yes.

What position did you occupy there? Master of the pilot steamer "Ajax."

I want to ask you a question, which you can refuse to answer if you like—that is if you think it will injure you to do so. Have you received a gratuity from anyone during your time of service? No.

Neither at Newcastle nor here. No. I was not in a position at Newcastle to receive anything.

Have you heard of anyone else receiving gratuities? Nothing that I can give as evidence.

Did you hear anything at Newcastle which would lead you to suspect that this sort of thing was going on? No. I do not think it is a customary thing there. If it was I think I should have heard something that I could rely on.

As a matter of fact, you yourself have received nothing? Nothing at all.

[The investigation was adjourned until the following day.]

The investigation was resumed on Friday, 14th September, 1900, at 10.15 a.m.

Present:—

Mr. J. BARLING, Chairman,	} Public Service Board.
Mr. C. DELOHERY, Member,	
Mr. WILSON, Member,	

William Newton sworn and examined:—

The Chairman: As you are no doubt aware, we are holding an investigation into matters connected with the Department of Navigation, with a view to the regrading of the officers;—what position do you occupy? Inspector and Surveyor.

To the Marine Department? Yes.

How long have you held that position? About eleven years.

Are you acting under Mr. Cruickshank? No; I am a shipwright, my appointment being Inspector and Surveyor. Recently, since the Department has been changed into the Department of Navigation, I have been working more with Mr. McRitchie, the Shipwright Surveyor.

Is he your principal officer? Yes.

You are Inspector and Surveyor, working under him? Yes; by the instructions of the Superintendent I am assisting Mr. McRitchie.

What is the distinction between your duties and those of Mr. McRitchie? There is really none at present.

What are we to understand by your saying that since the new Department has been created you have been told to assist Mr. McRitchie? There was no alteration in my gazettement.

In what respect have the relations between yourself and Mr. McRitchie been altered by this instruction of the Superintendent? Before that I had nothing to do with the shipwright surveyors. I was inspector for the overloading of ships; but now that Mr. McRitchie has more than he can do, my instructions are to take my orders from him and to assist him. If he has more ships to survey than he can possibly do himself, he sets me to survey one of them. For instance, yesterday afternoon there were two ships dry in different docks, at 2 o'clock, Mr. McRitchie went to one and he sent me to the other.

Prior to that your duties were confined to inspecting the load-line of ships, and compelling vessels to adhere to that. You would have power to make them discharge cargo if you noticed the vessel was below the load-line? Yes, that was part of my duty.

Since the Marine Department has been reconstituted you have been told to assist Mr. McRitchie in his work as Shipwright Surveyor? Yes.

We want to ask you a question, Mr. Newton, which you need not answer if you think to do so will be to injure you; but, of course, if you do refuse, you will have to pledge your oath that it will injure you to give a reply.

Have you ever received gratuities from any companies or individuals in connection with your work? Do you mean since I joined the Service?

Yes? Yes, I have.

You have received gratuities? Yes. Here is a letter from the Secretary of the Board at the time, and a copy of a letter I wrote in reference to it. [Documents handed in and read by the shorthand-writer as follows:—"Ballina, 5th December, 1887. Sir,—It is my duty to inform you that I have received a cheque for £20 from the underwriters and owners of the s.s. "Terranora," £10 for myself and £10 to be divided between the boat's crew, as a present in recognition of our services in floating the vessel off the South Spit on the 15th October last. And now I beg your permission to be allowed to accept the same. I have the honor to be, Sir, your obedient servant, W. NEWTON, Pilot, Richmond River." "Sydney, 13th December, 1887. Sir,—I have the honor to acknowledge the receipt of your letter of the 5th instant, and, in reply, beg to inform you that the Marine Board are much pleased that, by your energy and that of your crew, such valuable assistance was rendered in floating the s.s. "Terranora," and they have much pleasure in allowing you to accept the gratuity of £20. I have the honor to be, Sir, your obedient servant, GEO. S. LINDEMAN, Secretary, Marine Board of New South Wales."]

That was not in connection with your ordinary duties? Yes; it was my duty to do that. It was clearly my duty to render what assistance I could.

Was there any other case? Yes. Here is the copy of a letter I wrote on 12th September, 1888. [Copy of letter handed in and read as follows:—"Pilot Station, 12th September, 1888. Captain Fenwick, Sir,—I beg to return cheque for £5, as officers in the Government service are not allowed to receive gratuities. Kindly accept the above explanation, for I assure you I have not taken any offence at your offering, and hope you will not take any at my returning your generous offer. I have the honor to be, Sir, your obedient servant, W. NEWTON, Pilot."]

What was that supposed to be for? Well, there is a flat to be got over before you get to the bar, and Captain Fenwick wanted to take his vessel over and anchor on the lower side, in the fairway. He asked me if I would allow him to do it. I took into consideration the fact that it would only take about twenty-four hours, and that nothing was expected and that nothing was likely to come in, and so I allowed him to move his vessel, and I also rendered him assistance. I did not take official charge of the ship, but I gave him what help I could, and he sent a cheque to me, which I returned. I not only had not earned anything, but I had to work a lot with him, and I had to keep perfectly clear.

Are those the only occasions on which you have been offered gratuities? No; I think there was another. I was still at the Richmond, and the Alliance Marine Insurance Company telegraphed to me for my opinion as to whether the "Saucey Jack" was fit to carry sugar from the Richmond to Sydney. I went on board the ship and looked at her, and I telegraphed back to say that I thought she was fit, and the vessel took away a cargo of sugar. I heard no more about the matter until some months afterwards, when I came to Sydney, and I met the manager of the company, and he told me there was a cheque at the office for me. I took the cheque of £2 2s.

That also was outside your duty;—you were asked to express an opinion as to the sea-worthiness of this vessel? Yes.

And you accepted a fee? Yes. I had no idea at the time I gave them my opinion that I should receive anything; I thought they were asking for it in a friendly way. I was very surprised to learn that there was a cheque for me.

Has there been anything else? No, I have been in Sydney?

At any time during your service? Since I have been acting as shipwright surveyor I surveyed the "Captain Cook," collier. They had not quite finished all that was required to be done; the survey had been going on for some time, and at 5 o'clock one afternoon the master came down to get his certificate. I was called in—I happened to be in the office at the time—and I was asked if the ship was all right. I said she was not all right when I last saw her, and I said that I must see her again before I could make a declaration. The superintendent then told the master that he could not grant the certificate. The master assured us that all the work had been done which I had pointed out should be done—the fittings of the boats, that is really what it was—and the superintendent was in a fix, inasmuch as I could not make a declaration without seeing the steamer again. I volunteered to take the certificate with me, and to go to the ship—it was then past 5 o'clock—and if I found everything satisfactory I could hand the certificate to the master. I did it, and it was nearly 6 o'clock before I was finished. The master offered me a sovereign for doing that, not as a bribe; the man was grateful; he wished to get away, because he was under contract to deliver coal to one of the mail boats next day. I refused to accept the sovereign.

How long ago was that? Within the last six months, because she has not come up for her certificate since.

Is there anything else? I do not know of anything else.

Have you ever been offered anything, practically a bribe, to pass a vessel which was below the load-line? I hardly know how things were meant, but this sort of thing has occurred. A ship has been overloaded, and they were lightening away; it is a heart-breaking job to do, and they come and ask you every five minutes to look and see if it is not right. In such a case I have been told, "You had better go home, it will be all right." You do not quite know whether they mean that the ship will be all right, or whether they mean they will make it all right with you.

No more direct offer than that has ever been made to you? I cannot say that there has.

It was made just in that way,—you need not remain there, and that it will be all right? Yes.

You do not know whether to interpret that to mean that they would load the ship all right, or whether they would make it right with you? Exactly; I never asked the question.

You were doubtful as to what was meant? It did not trouble me which way they meant it.

These are the only occasions when such a veiled offer has been made to you? There was one other occasion; a steamer was overloaded, and I drew the master's attention to it. We both went to see the manager, and the manager then said, "Cannot we persuade you to overlook this?" I said, "What do you mean?" and the manager said, "No, no, nothing of that," and the thing dropped at that.

Was that all that took place? That was all. I never had any money actually offered to me outside the "Captain Cook"; not since I left the Richmond and came to Sydney.

What do you consider are your hours of work? Well, I do not know. We have spoken before about overtime; we saw the Secretary, and pointed out to him how irregular were the hours we were working, and he said that it was no use talking about overtime, and that the only thing we could do was to take a half-day off sometimes.

That was the Departmental view of the position? Yes, the Marine Board Department. The question has not been raised under the new department. On one occasion I remember, Captain Sangster and I spoke to the Secretary; we had been out until 2 or 3 o'clock in the morning, and we asked him if the Board could make some allowance in the way of refreshment, and he said that they could make no allowance whatever. We pointed out to him that we could get plenty of refreshment on board ship if we liked; they would be only too glad to give it to us. But if we took that sort of thing, it would only weaken our position. I have always held that I must be in a position to put my foot down any time I liked.

You are a captain, are you not? Yes, and shipwright as well.

The Chairman: I may tell you that we think your statement is most satisfactory.

The Witness: How I came to be a shipwright, my father was a builder, and I have lived in a ship yard practically all the time. I have never had to wait a day for a ship or anything, and I have never had a holiday since I have been in the Service.

William McRitchie sworn and examined:—

The Chairman: We are investigating certain matters connected with the Marine Department, with the object of regrading it. If in your judgment, any of the questions we are about to ask you will compromise you or injure you, you are at liberty to refuse to answer. I am giving you the usual caution; but of course if you do refuse to answer, you will then have to pledge your oath that it will injure you.

What position do you occupy, Mr. McRitchie? Shipwright Surveyor.

How long have you been in that position? Fourteen years and four months.

You have been shipwright surveyor the whole of that time? Yes.

Will you shortly describe your duties? I have to survey all vessels that want a passenger's certificate.

That is the shipwright's work? Yes; the boats, masts, sails, tackling, and all the top hamper. If it is a wooden ship, I have to survey both the outside and the inside; but in the case of iron ships the engineers survey the hull.

With regard to steel and iron ships, it is not part of your duty to survey the hull? No; only the outfit.

Mr. Cruickshank and his staff would inspect the hull in the case of an iron or steel vessel? Yes.

Now I want to ask you this question, since you have held the position you now occupy, have you been offered, or have you received gratuities in connection with your work? Yes.

Will you let us know what those gratuities were? I am surveyor for the Emigration Office, and the "Wilcannia" was clearing out with passengers; it was a holiday, and Captain Edie requested me to go and survey the ship. I was there from 8 o'clock till half-past 12.

When was that? About three or four months ago. Mr. Wall came and told me there was a guinea for me.

Who is Mr. Wall? The shipping agent.

Is he of the firm of Wall and Molesworth? Yes; that was for doing this work on a holiday.

He gave you a guinea? Yes.

And you accepted it? Yes.

You passed the ship and accepted a fee? Yes; it was a holiday.

What holiday was that? It was one of the days when the Contingents were going away.

Have there been any other occasions? I was at the "Peru," a new boat belonging to the A.U.S.N. Company, until early one Sunday morning, and I got a guinea for that.

Who

Who gave you that? Burns, Philp.

How long ago was that? A couple of years ago.

Is there anything else? Not that I recollect.

You do not recollect anything else during your whole service when you were offered and accepted a fee? About twelve months ago I surveyed a vessel in my own time for the Colonial Sugar Company, to go away to the South Sea Islands with labour. If she had not been surveyed in dock here they would have had to dock her somewhere else. They preferred to do it here, and Captain Hixson asked me to see the ship. I was there from 5 o'clock to 7 or 8, and, if I recollect rightly, I got a guinea for that.

So far as you remember, that exhausts the list? That is the lot.

Three guineas during that time? That is all.

Have any offers been made to you for passing ships when they have been below the load-line? The load-line does not come under me.

Have any gratuities been offered to you for passing ships with defective tackling? No.

Neither directly nor indirectly? I do not recollect anything.

Are we to understand by that that you will not swear it has not been done? No one ever offered me anything.

Either directly or indirectly? No.

Interview.

At 3 p.m. on Tuesday, 9th October, 1900, Captain Francis Hixson waited upon the Public Service Board in regard to the investigation into matters connected with the management of the Marine Board Department.

Present :—

Mr. J. BARLING, Chairman, }
Mr. G. A. WILSON, Member, } Public Service Board.

Mr. G. E. Brodie, Chief Treasury Inspector.

The Chairman: You are aware, I think, Captain Hixson, that we have been holding an investigation in connection with the management of the Marine Department, and that certain evidence has been taken, a copy of which has been given to you?

Captain Hixson: Yes.

The Chairman: There are certain portions of the evidence which bear on your administration, and we are anxious, in order that we may get the fullest information on the subject, and in justice to you, to hear what you have to say with regard to the evidence which has been taken. I may mention that Mr. Brodie, who has been present at the investigation, represents the Treasury.

Captain Francis Hixson, late President, Marine Board, was sworn :—

The Chairman: You have read the evidence referred to, I think?

Captain Hixson: I have.

The Chairman: The special portions of the evidence which we wish to bring under your attention are the following, which I will read.

(The Chairman then quoted from the evidence taken at the investigation referred to, as follows :—

Captain Lindeman:—(Page 11). You say that exceptions were made occasionally in the payment of harbour pilotage when the sea pilot brought the vessel direct to the wharf? A.—Yes. They might go to the President and explain the thing to him, and he would say, "We will not charge the fee under the circumstances."

(Page 11). A.—I may tell you I remember a case where Mr. Cruickshank was offered a certain sum for certain work he had done and he refused to accept it. . . . He told me unofficially that this money had been sent to him, and he informed Captain Hixson and told him he was going to refuse it.

(Page 11). Mr. Delohery: You say Captain Hixson might have arranged with the shipper not to charge the harbour pilotage fees? A.—There might have been any amount of fees remitted, and I, as Secretary for the Board, would know nothing about it.

Q. Would there be any record kept in your office of the fees remitted in that way by Captain Hixson? A.—No.

Mr. Wilson: Did the Customs know that he had remitted these fees? A.—The Collector of Customs might see him in reference to a particular case, and the agents might make a claim for a refund on a certain basis, and Captain Hixson might say, "I think it is a fair thing; I do not think the fee should be charged here."

The Chairman: Would there be any record of Captain Hixson's action in such a case? A.—No; it would not come before the Board.

(Page 30). Mr. Wilson: If a surveyor did want to get an opinion on the matter (of receiving fees) it would be to Captain Hixson that he would go? A.—Yes, not to me. If he came to me I should send a communication to Captain Hixson.

Mr. A. Marshall :—(Page 36). The Chairman: Did Captain Hixson know about it (officers receiving gratuities)? A.—I think he did. Mr. Selve told me that when he got this first fee for a late survey that he took the letter in and showed it to Captain Hixson, and Captain Hixson said he did not want to know anything about it; if it was overtime, or something to that effect, he did not want to know anything about it; he did not want fees to be applied for.

Mr. Brodie: Did you take the cheque to Mr. Selve? A.—I showed it to him, and he said that a similar cheque had been given to him, that he had shown it to Captain Hixson, and that Captain Hixson said he did not want to know anything about it.

Mr. H. Selve :—(Page 17). The Chairman: Is that (the acceptance of gratuities) recognised by the Department as a right thing to do? A.—Well, the first cheque I received I took it into Mr. Cruickshank. That must be about six years ago. I had a very courteous letter from Mr. Prosser thanking me for my kindness, and trusting that I would accept the enclosed cheque as a slight recognition of my services, something to that effect. I took the letter into Mr. Cruickshank, and he said, "I would send it back, it would never do to accept it." I said, "I do not know about that; you may be able to afford to snub these people, and after a letter like that it would be a direct snub to send the cheque back. I will see Captain Hixson." I took it in to Captain Hixson; he read the letter through, and said, "Well, you know, Mr. Selve, these people do not send the cheque unless they get full value out of you for it." I said, "Shall I accept it"; and Captain Hixson replied, "I do not want to know anything about it."

(Pages 23 and 24.) What did Captain Hixson say to you? Well, it is a long time to remember, but it was something to this effect: These are the sort of people who would get full value for their money, or they would not send you a cheque. Well, I do not want to know anything about it.

(Page 26.) A. . . . But there are only two people in the Department—Captain Hixson and Lieutenant Lindeman. The Department is run like a man-o'-war; they were on the quarter deck, and we were the men in the fo'c'sle; we were, really. As for being considered officers, that was never done. In the office they did not know what was going on. Ships were condemned, but we never told them about it; it would be no good if we did.

Neither Captain Hixson nor Captain Lindeman knew anything about it? No, nor the Board either.

Mr. W. D. Cruickshank :—(Page 27.) A. . . . I remember some years ago that Mr. Selve one day brought me a cheque which he said he had just received. He said he would take it to Captain Hixson, and subsequently he informed me that Captain Hixson had told him he did not want to know anything about it, or something of that sort.

(Page 29.) A. . . . I do not think any of our fellows ever asked for anything. These fees have been sent to them. I think Mr. Selve did the right thing; he took it to Captain Hixson, and Captain Hixson made use of the remark that he did not want to know anything about it.

Captain Pettit :—(Page 21). A. . . . The pilots used to object to take ships away from the wharfs at night. When they met Captain Hixson, the President, at the time, and explained the thing to him, he told them, "It is in your own hands; if you are coming to a certain berth and you think it risky, or likely to run you into trouble, you can refuse to do it." That was said to the sea pilots.

(Page 32). The Chairman : Was that practice—the payment of gratuities to harbour pilots—known to Captain Hixson or to the Department? A.—I think it must have been known to Captain Hixson; he did not appear to interfere with it in any way. I remember, on one occasion, an agent demurred to giving anything to the pilot for services performed in this way. I told Captain Hixson about it, and he said, “If it is so important with these people to get vessels up to the wharf out of office hours, and when the Custom-house is closed, and when this office is closed, and if an officer is done out of his legitimate holiday, I think it is mean of the company not to make a little allowance. He did not say he was in favour; but he said he thought it was mean of the company not to make some little recognition of this extra service.”

Q.—Captain Hixson said that to you, did he? A.—Yes. He said, “I do not tell you that it is proper to take it, but still I think when it suits their interest to have a ship brought up out of office hours they should make some little recognition to the officer whose duty it is to remove the ship.”

Captain Bracegirdle :—(Page 26). The Chairman : Has that been recognised by the Department (the payment of gratuities to harbour pilots)? A.—At one time one of the shipping companies' clerks spoke to Captain Hixson, and he said, “Well, these officers have got regular hours, but if you can make arrangements with them they will attend on the job.”

Q. Was it understood by Captain Hixson that you were to receive a fee? A.—He did not know that we got anything, but it was tantamount to the same thing.

Q. How do you know that Captain Hixson made that observation? A.—I know it from the clerk who went in to see him.

Q. Who was the clerk? A.—It was the shipping clerk of the Orient Company.

Captain Thompson :—(Page 32). The Chairman : Will you be surprised to learn that this practice (receipt of fees by pilots) was known neither to Captain Hixson nor to Captain Lindeman. I will just read you Captain Lindeman's evidence. (*Evidence read to witness*). You see that your idea that the Department was aware of it does not appear to be borne out by the evidence? A. We took it from what Captain Hixson told Mr. Hillman.

Q. Who is Mr. Hillman? A.—He belongs to the Orient Company. I have only got this second-hand. I did not hear it from Captain Hixson or from Mr. Hillman; it was told to me by Captain Pettit and Captain Bracegirdle. They were my seniors. Captain Hixson told them that Saturday afternoons, Sundays, and public holidays were considered our own time, and if there was any urgency in getting a vessel to the wharf, if the company made an arrangement with us, we should not stand in their way.

Q. You were under the impression that, although the practice was not actually acknowledged, still it was tacitly acceded to? A.—Yes; that was my idea.

Captain Chudleigh :—(Page 34). Mr. Brodie : Do you know of any one having spoken to Captain Hixson about this matter? A.—No; but I think the Marine Board must have had knowledge of it, because we often received orders by telegram to berth certain ships. We thought it was nothing but a just thing. I should have been sorry indeed to have taken anything from any one if I had not considered it just.

Chairman : Those are the points, Captain Hixson.

Captain Hixson : Do you want me to explain each paragraph?

Chairman : Please; just as you think best.

Captain Hixson : Well, as far as the first paragraph is concerned, really I know nothing about that, except that there is no legal charge for a harbour pilot; the law is that there is a charge for sea pilots, but if harbour pilotage is performed by one of the Harbour Department certain fees should be charged, while there is no compulsion on a ship to pay outside pilotage, except for her own convenience. But to remember over twenty or thirty years all these thousand-and-one details that take place in this office—I certainly cannot make any reliable statement on the subject. I had better tell you that I know nothing of these fees being given to the harbour pilots or to the surveyors. I have certainly often brought pressure, upon applications of the agents and so on, on the harbour pilots and surveyors to work outside their regular office hours; but whether they got fees for it or what happened, I could not tell you. In the case mentioned by Mr. Selve, it says in the evidence it was six years ago. Well, I have a sort of vague recollection of Mr. Selve coming to me about a thing, and it is very probable I said, “Well, I do not want to know anything about it”; but I could not say whether I did or whether I did not.

Chairman : You would not wish that to be taken as authority for the wholesale demand and receipt of fees?

Captain Hixson : Certainly not.

Chairman : You have had no idea it has been going on as shown in the evidence?

Captain Hixson : Not the slightest; it was quite unknown to me.

Chairman : And you would never approve of such a thing being done?

Captain Hixson : I certainly would not have given a formal approval to it. But there are two sides to this question; the same as to others.

Mr. Wilson : But circumstances might occur in which you might consider some recognition was deserved?

Captain Hixson : Exactly what I am coming to. If a man works beyond his time to oblige people—as I know Mr. Cruickshank and Mr. Selve have done—I think that there should be some remuneration for their services; and in the case of working on holidays and Sundays, I certainly think that when they do so they should be remunerated for that extra work. But you see in a Department like the Marine Board, or the present Navigation Department, it is impossible to govern it precisely as you would govern any other Department—the railways, for instance. Ships belong to private owners and come in at all possible times, and all sorts of little conveniences are required at different times that would not be wanted if it was a regular Government Department that goes on like clockwork.

Mr. Wilson : Of course you could have an authorised scale of fees?

Captain Hixson : I think it would be a very good thing; and I candidly admit I was rather surprised to find how smoothly things ran. When I wanted extra men, or a little extra done, everything went on nicely; and shipowners are always on the push—always wanting to push and shove along, and very properly they have come to me; and I have passed a thing. And the state of affairs which you now unearth appears to have been the result.

Chairman : I do not think there can be any question as to the justice of these men being remunerated if called upon at unearthly hours to perform service for the public; there should be some remuneration for it, but the danger is that it should be done in this underhand way; it should have been laid down by proper regulations, so that everybody should know what has been done. The evil is shown conclusively by the lapse which Mr. Marshall made into what might be called almost an actionable thing. With regard to the pilots, the only mischief that seems to have occurred is this: they have received fees into their own pockets which, if they had not been paid to them, would have been paid for harbour pilotage and gone into the Treasury; so the Treasury lost something in that way. But with regard to surveyors, where it might have the effect of warping their judgment, it may mean, of course, laxity in inspection of the machinery or equipments of a vessel, and so lead to loss of life.

Captain Hixson : I look upon the cases of pilots and surveyors as altogether different. A surveyor might sap his independence by taking fees; in the case of a pilot he merely puts a ship ashore. I am not inclined to think that the Treasury lost by these things. The harbour removals would probably be sent in, but this pound or two is probably something extra a ship has had to pay.

Chairman : The evidence shows it is not so; but that the Treasury has actually lost that harbour removal, which has not been paid.

Captain Hixson : Not in all cases.

Chairman : It seems to me, if I may so express it, that you made a very proper arrangement—that where pilots could do so they should bring ships up to the wharf; but the evil has been that the pilot would not have done so unless this fee had been given.

Captain Hixson : The sea pilot's duty was to put the ship up to the westward of Garden Island. But I see what you mean; it would be the the greatest possible nuisance, and we should lose our reputation as a port (whereas I think we have the reputation of pushing commerce on in every possible way) if we insisted upon a ship anchoring out in the stream in place of coming direct up. Of course, if she anchored in the stream, a harbour pilot would be necessary to take her from there to the wharf, and in that instance the Treasury, of course, would suffer. So that all the evil that has resulted from the taking of fees by pilots is that the Treasury may have lost, here and there, the harbour removal fees by the ship coming direct to the wharf instead of anchoring in the stream.

Chairman :

Chairman : But there is no doubt that in some cases, if the pilots had not received these fees, the vessels would not have come direct to the wharf ; and the Treasury, of course, has then lost this harbour removal?

Captain Hixson : Quite so. But there is another point. The fact is that this port was enormously expensive to shipping until lately. Each ship had to pay 4d. per ton for pilotage in, 4d. harbour and light rate, and 4d. outwards. So those charges being so enormous, it was inclined to make me be lax if I could do so without really committing myself. But I had a sympathy against charging removals when I knew what great expense ships were put to already.

Chairman : I have no doubt you came to the right conclusion ; but the whole point is this : That this system has been in operation outside of your knowledge, and it might lead to all sorts of abuses.

Captain Hixson : Yes ; and these gentlemen, when they are in a mess, do not fail to try and get out of it at the expense of other people, as appears in the evidence.

Chairman : We do not believe it, Captain Hixson.

Mr. Wilson : I think the last point, Captain Hixson was a good one ;—that under the present low rates the Department should be very much more strict and rigorous in enforcing their proper dues than when they were so high.

Chairman : Would you see any objection to allowing overtime to the pilots and surveyors ?

Captain Hixson : No ; I think it would be an excellent thing. And I think it would be a very good thing to pay the sea pilot to lead the ship direct to the wharf, in place of leaving her in the stream, and thereby causing delay.

Chairman : And then charging the owners a certain fee ?

Captain Hixson : Yes. And now the pilotage is reduced, and a maximum of £20 is fixed. Five years ago these big boats simply paid an exorbitant sum for this service, which they now get for £20.

Chairman : Is there anything else in that evidence you would like to draw attention to ?

Captain Hixson : I do not think so, sir ; it seems simply that these irregularities have taken place. And it would be a very good thing if you would make regulations and positive arrangements so that they should not occur again.

Chairman : I can quite understand that you, as President of the Marine Board, would be the very last man to hear about these things.

Captain Hixson : Well, I should not be the first, sir.

Chairman : And it only came out through Mr. Marshall's wrong doing—it put us on the inquiry.

Captain Hixson : I might mention, too, that it is only in very few places where the Government take upon themselves the control of the Pilotage Department. In most ports pilots are altogether apart from the Government ; they are just paid fees for the work they perform. There is a laxity between pilots and ships that perhaps should not prevail when it is a Government Department. And then the ship is in Melbourne to-day, where they pay the pilots in the way described, and then she is in Sydney two days afterwards, when they are inclined to act the same.

Mr. Wilson : In Melbourne the pilots used to be a corporation.

Chairman : I think they are now.

Captain Hixson : But they provide their own schooners to supply the ships with pilots. They are not a Government Department there, but a corporation, as you say.

Chairman : You think that is all you have to say ?

Captain Hixson : Nothing more. You are very good to give me this opportunity. I would like to modify the remark I made about people getting out of trouble at anybody else's expense. I do not want to blame anybody.

Chairman : We will send you a copy of the notes.

Mr. Wilson : I understand that the fee should be charged to bring the vessel in right up to the wharf, one fee for one operation ?

Captain Hixson : You could not do that because of breaking the law. What I meant to say was that if the sea pilot did both works, as it were, I would give him the fee for it. Because there is an immense deal of responsibility in bringing one of these big ships alongside the wharf, and if any damage was created there would be great trouble.

Mr. Brodie : There are one or two questions I would like to ask, particularly on what Captain Hixson has just mentioned. There are harbour pilots and sea pilots ?

Captain Hixson : Yes.

Mr. Brodie : Is it within your knowledge that the whole of the sea pilots have a knowledge of the various wharfs where the vessels would require to be berthed ?

Captain Hixson : They have not so good a knowledge as the harbour pilots have, but they should have a general knowledge. In fact, you may depend that no sea pilot would take upon himself to say he would put a ship alongside the wharf unless he knew exactly the condition the wharf was in. At the same time the harbour pilots would have a better knowledge.

Mr. Brodie : And were the harbour pilots appointed for the purpose of removing the vessels from the stopping-place westward of Garden Island up to the particular berthing-places in lieu ?

Captain Hixson : Yes ; they were appointed for that particular purpose.

Mr. Brodie : Then, if the sea pilots took on this other work—that is, of bringing the vessels straight to their particular wharfs—there would be less work for the harbour pilots to do ?

Captain Hixson : But it is a very small proportion of the vessels that could come direct to the wharf—steamers, for instance. Sailing-vessels have to anchor out there, and make a report to their agents, and make arrangements as to where they are to go subsequently—in fact, the master does not know himself where he is going.

Mr. Brodie : Did either the captain of the pilot-ship or the chief pilot of the harbour pilots mention to you at any time that their subordinates were receiving fees from the shipping companies ?

Captain Hixson : No ; not to my recollection ; and I think if they had I should have recollected.

Mr. Brodie : And, if they had, you would have taken some steps to have the thing officially authorised ?

Captain Hixson : To tell you the truth, that was the great difficulty in the Marine Board, getting things authorised, especially of late years—we could not get our views carried out. For the last four or five years we have simply had to wait for reorganisation before anything could be recommended.

Mr. Brodie : But it appears this matter has been going on for ten years. Previously to the time you speak of, if they had been brought under your notice, you would have taken steps to have them placed on a proper footing ?

Captain Hixson : I hope, Mr. Brodie, I should have done what I considered best to have them placed in their proper position ; and I think I should have done so.

Mr. Brodie : You do not remember any case of accident through any of the sea pilots bringing up a vessel to the wharf ?

Captain Hixson : No ; I never remember any.

Mr. Brodie : Nor any report of any accident ?

Captain Hixson : No—in fact, although I say it, we are extremely immune from accidents in Port Jackson.

Mr. Brodie : With regard to the surveyors, it appears from the statements made before the Board that Mr. Selfe has received two or three fees ;—do you remember him coming to you on more than one occasion ?

Captain Hixson : I do not remember it—no ; I have only a vague recollection of his coming, and I do not really remember the details of that visit. Of course, you know it is in a busy time. It is not deliberate, like sitting in this court. I might have been troubled by half a dozen different things. But I am quite certain, if he did come, he never came a second time.

Mr. Brodie : As far as marine surveyors are concerned, you would take a pretty strong view of an officer receiving such a gratuity ?

Captain Hixson : Most certainly ; because I should think it might prejudice his work, because they are in a very responsible position. It is a very easy thing to say, " Take that out," as they sometimes do ; but it might entail hundreds of pounds—the position of a marine surveyor, or engineer, or shipwright.

Mr. Brodie : And, entertaining those strong views, do you think it is at all feasible that you would lead Mr. Selfe, or any of the surveyors, to understand you agreed to their accepting any fee, or gratuity, no matter when they performed the service ?

Captain Hixson : I should think they would be like I am myself—that they would be ashamed to look a shipowner in the face if they had taken a fee for anything that is apart from their regular work. I remember Mr. Cruickshank coming to me once with a £50 cheque from^{*} Mr. Cruickshank had no notion of taking it ; but I said to him, " How could you look the man in the face afterwards if you take this £50 ?"

* It is not considered desirable to disclose the name.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

**CHARGES AGAINST MR. G. P. WEBB, FORMERLY
POSTMASTER AT MINMI.**

(MAGISTRATE'S REPORT AND EVIDENCE RESPECTING.)

Ordered by the Legislative Assembly to be printed, 16 November, 1900.

INQUIRY under the "Public Service Act of 1895" (59 Victoria No. 25), in connection with certain charges laid by the Minmi Improvement Committee against George Parfitt Webb, Post and Telegraph Master at Minmi.

Before Charles N. Payten, Esquire, Stipendiary Magistrate, Court-house, Minmi, 24th, 25th, 26th, and 31st July, 1899.

Mr. W. A. Reid, solicitor, Newcastle, appeared on behalf of the Improvement Committee.

Mr. Alexander Burnett watched the case in the interests of the Post and Telegraph Authorities. Shorthand-writer to inquiry, Mr. Charles Hibble.

INDEX TO WITNESSES EXAMINED.

No.	Name, &c.	No.	Name, &c.
1.	G. A. Humphreys, letter-carrier, Minmi.	18.	G. Akhurst, farmer, Mount Elliott.
2.	A. E. Ayerst, Secretary, Minmi Improvement Committee.	19.	W. Keohan, postmaster, Wallsend.
3.	G. P. Webb, postmaster, Minmi.	20.	R. Sneddon, miner, Minmi.
4.	J. Renfrew, blacksmith, Minmi.	21.	Ellen Williams, Minmi.
5.	Elizabeth Smith, storekeeper, Minmi.	22.	William Reen, assistant postmaster at Minmi (now on leave).
6.	John Smith, screenman, Minmi.	23.	C. E. Gillespie, bus proprietor, Wallsend.
7.	J. C. Cosgrove, schoolmaster, late of Minmi.	24.	W. Swanton, school-teacher, Minmi.
8.	Edgar Grierson, draper, Minmi.	25.	G. Wile, bootmaker, Minmi.
9.	A. E. Williams, hairdresser, Minmi.	26.	G. W. Akhurst, school-teacher, Mount Elliott.
10.	H. O'Donnell, pupil-teacher, Minmi.	27.	E. Dodd, pit-boy, Minmi.
11.	W. T. Grierson, acting assistant postmaster at Minmi.	28.	D. Dyet, bootmaker, Minmi.
12.	R. Brownlee, draper, Minmi.	29.	A. Fisher, hairdresser, Minmi.
13.	J. K. Walker, storekeeper, Minmi.	30.	E. J. Young, postal inspector.
14.	W. Hogg, baker, Minmi.	31.	H. Bain, miner, Minmi.
15.	E. Trelford, special constable, Minmi.	32.	R. Smith, baker, Minmi.
16.	J. Dill, draper, Minmi.	33.	G. Smith, carpenter, Minmi.
17.	R. Richards, hotelkeeper, Minmi.		

INDEX TO THE EXHIBITS.

Nature of the Exhibit.

- "A"—Mr. Payten's authority to hold inquiry.
 "B"—Charges as formulated.
 "C"—Letter from Mr. Webb, asking to be permitted to be represented by a solicitor.
 "D"—Vouchers from Audit Office.
 "E"—Letters from the Improvement Committee, setting forth the charges in detail.
 "F"—Do do do do
 "G"—Do do do do
 "H"—Minmi Telegraph Message Book for year 1898.
 "I"—Wire from Mr. Young to Improvement Committee.
 "J"—School Roll.
 "K"—Wire from Assistant Auditor-General *re* Vouchers for 1896.
 "L"—Letters between Mr. Webb and Postal Department.
 "M"—School Roll.
 "N"—School Roll.
 "O"—Tabulated statement, showing the attendances of Mr. Webb's children at school.
 "P"—Letter from Improvement Committee to Deputy Postmaster-General, *re* delay over Mr. Young's wire.
 "Q"—Receipt for registration of above letter.
 "R"—Message Book for 1896.
 "S"—Various letters between Mr. Webb and the Postal Department.

Mr. Webb : Is this a private inquiry or a public one ?

Mr. Payten : I need not close it to the public.

[*Three letters from the Minmi Improvement Committee to the Public Service Board, containing in detail the complaints and charges against Mr. Webb, put in, and marked Exhibits "E," "F," and "G."*]

George Alban Humphreys, being duly sworn, saith as follows :—I am a letter-carrier stationed at Minmi ; I take out telegrams occasionally ; I have been at Minmi nine years, in the service of the postal authorities ; I was letter-carrier in 1896 and 1897 ; I do not know of any boy named G. Arthur Webb having been employed as messenger in those years, but I have seen Mr. Webb's boy deliver messages ; his name is G. Arthur Webb ; I am brother-in-law to Mr. Webb ; during 1897 and 1898 I do not know of any boy being employed by the name of A. Webb, only the same boy as I have already mentioned ; G. A. Webb was employed last year ; I do not know anyone of the name of A. Webb having been employed, and if any boy of that name were employed I would have known it ; I know Mr. Webb's signature ; I do not know the signature of the boy George Arthur Webb ; about December last year I do not remember having taken a telegram from Mr. Young, postal inspector, but I do remember Mr. Webb sending me to Mrs. Smith to tell her that if Mr. Ayerst was in he was to call for a wire, and she replied that Mr. Ayerst had gone home ; I returned and so informed Mr. Webb, and, as far as I can remember, Mrs. Smith told me to send the telegram out next morning by B. Taylor ; I was sent up to Mrs. Smith's simply to ask for Mr. Ayerst ; I think that B. Taylor delivered the wire ; I think that he called at the Post Office for it next morning ; Mr. Webb told me there was an important telegram for Mr. Ayerst, and to call at Mrs. Smith's and ask her to get him to call for the wire if he was in Minmi ; I do not remember whether I told Mrs. Smith whether it was important or not ; it was in office hours when I called there ; I have delivered some telegrams for Mr. Ayerst at Smith's, acting under instructions from the postmaster ; those instructions have never been cancelled, so far as I am concerned ; I do not know anything about a wire sent to Mr. Grierson ; on the 17th November, 1898, I do not remember having delivered a wire from Mr. Woodcock for Mr. Ayerst at Mrs. Smith's place. [*Telegraph messenger's delivery book containing this wire was here put in and marked "Exhibit H."*]

Witness : There is no signature in connection with the entry, and he thought that was irregular.

[*Mr. Webb here admitted that the entry was entirely in his handwriting.*]

Mr. Payten (inspecting book) : The whole of this entry is in pencil, and it is the only pencil entry on the page.

Witness : No boy by the name of Smith was ever employed at the Minmi post-office ; I am not in a position to swear whether I took this message or not to Mrs. Smith ; I am not in a position to say whether I told Mrs. Smith that it would save Ayerst 3s. or 4s. if Jack (her son) takes it out to Ayerst instead of me ; I do not think I said anything at all about portorage to Mrs. Smith ; I remember on one occasion, though, that Mrs. Smith said that Jack was away delivering orders, and that when he came back he could take a telegram out to Mr. Ayerst ; I left that particular wire with Mrs. Smith ; I think that Mrs. Smith signed for it.

By Mr. Webb : The Department has ordered me to deliver telegrams, and I still do it ; I have nothing to complain of ; I have seen Mr. Webb's two girls delivering messages ; I have been ordered by the Department to put in a fair day's work every day, and I have signed a paper to that effect ; you have compelled me to remain on, and I have had to come back and do it also, but I was relieved of a lot of this work during the last assistant's time, as he was going up for an examination, and wanted practice ; I am not prepared to swear that the message from Woodcock was delivered by me to Mrs. Smith ; I saw him (Mr. Ayerst) come to the office on that night ; I only saw him there on one night.

By Mr. Reid : Of course, I do not know whether that was on this particular night or not ; I think he was in the office on account of some telegram, but I did not see him write any wire out.

By Mr. Payten : He was speaking to Mr. Webb at the counter ; I saw nothing else ; he did not remain very long ; the office was not closed ; it was about 7 or 8 o'clock in the evening ; I cannot say what conversation took place.

Alfred Ernest Ayerst, being duly sworn, saith as follows :—I am a farmer and a fruit-grower, and reside at Cedar Hill, near Minmi ; I am also a Justice of the Peace for the Colony ; I am Secretary to the Minmi Improvement Committee ; on the 6th December, 1898, I received a wire from Mr. E. J. Young, Postal Inspector, reading :—

Will be at Minmi post-office ten thirty Wednesday morning for purposes of inquiring into matters affecting local office referred to by Improvement Committee. Please arrange for attendance of those desired by committee.

And the document shown to me now is a copy of that wire (*Exhibit I*) ; the wire is dated the 5th, and I received it on the 6th, at about 7.10 p.m. ; I did not sign for it ; I received it from Mrs. Taylor's daughter ; I gave instructions to Mr. Webb that my wires were to be delivered to Mrs. Smith, and several have been so delivered for the last five or six years ; I was in Minmi on the 5th December, 1898 ; I live $2\frac{1}{2}$ miles out, at Cedar Hill ; I came to Minmi on that day about twenty minutes to 4 o'clock ; I was at Mrs. Smith's at about 4 o'clock ; I had a conversation with Mr. Webb in the presence of Mr. Young and Mr. Renfrew on the 8th December ; I apologised to Mr. Young, and told him that if I had received his wire in time I would have had more members of the Improvement Committee present to see him ; he (Mr. Young) then asked me when I received his wire, and I informed him at about 7 o'clock last night ; he said that he had sent it at 3 p.m. on Monday, and asked if I had the wire about me, and I told him that I had ; I then gave him the wire, and he said that he noticed it was dated 4 p.m., Minmi ; he then asked Mr. Webb why the message was not delivered sooner, and he (Webb) replied that he had been a bit busy, but that he himself had taken it up to Smith's at tea-time ; I asked him to define "tea-time," and he said, "Half-past 6 o'clock," so that up to that time it was two and a-half hours late ; Mr. Webb's plea was that he was so busy ; Mr. Young then asked him why he did not get a messenger and send it out, and he replied, "Because he knew Mr. Young would not pay the portorage on it" ; Mr. Young then asked him if his duty was not to send telegrams immediate, and he admitted that that was so ; Mr. Young then asked me if I would give him the telegram to take away with him, and I did so ; I asked for a copy of that wire to be produced here, and it has been admitted ; I asked Mr. Webb for an explanation of the difference between the 1s. 6d. charged on a previous telegram and the sum of 2s. paid on the telegram that Mrs. Smith's boy brought out ; he replied, "I took the wire to Smith's myself, and the boy refused to take it out to Ayerst's unless he got 2s. for doing so" ; in August, Mr. Webb asked me what the

Improvement

Improvement Committee were fishing about, and I told him that we were asking for information with respect to the employment of a temporary messenger during Assistant Reen's absence, and he then made use of the remark, "Of course, you will understand that the Department do not know I am being assisted by my children; it might be a serious matter for me if they did."

By Mr. Webb: I will not swear that all my wires were delivered at Smith's in 1898; I have no animus through any Parliamentary election against you; I gave you instructions to deliver all my messages at Smith's; about seven years ago you (Webb) charged me 5s. portorage on my wires; I knew that that charge was excessive, and I then asked that all my wires in future should be left at Smith's; Webb admitted having received those instructions, as I heard him myself admit it to Mr. Young, though Mr. Young did not press the point; on 29th August, 1896, a telegram was delivered to me at the post office, and another on the 30th September, following; I cannot explain why a message was delivered to B. Taylor on the 31st August, 1897, instead of to Smith, and I also do not know why a telegram for me was delivered to S. M. Wells, at Minmi, on the 3rd September, 1897, or whether you delivered one to me on the 31st August, 1897, instead of to Smith's; I cannot say whether a message was delivered to Mrs. Pellow for me on the 30th November, 1897; on 6th December, 1897, a message was delivered to me by Webb, and I signed for it; my instructions to you were that you were to deliver all messages for me to Mrs. Smith's place; when you (Webb) ask me why I did not report to the Department until after last Parliamentary election night that my telegrams had not been delivered as instructed, I must reply that I do not altogether understand your question; my instructions were practically complied with until the 5th September, 1898; I remember reading a wire from Mr. Windross to myself at a public meeting held in Minmi; but I cannot say whether that was after a certain paragraph had appeared in the *Newcastle Herald* or not; I have never shown any energy in reporting you (Webb) until I received instructions from the Improvement Committee to do so; if it was known I was coming in, I believe, or suppose, you (Webb) would have kept my wires for me; I have never gone into any house in Minmi and said that: "Now I know I had got you (Webb) over Mr. Young's matter"; I have never received one copper from Mr. Bruncker in my life, except once when I was scrutineer, when I received the fee of one guinea, which is customary; I remember a certain message that came to me from Dalrymple, Wood, & Co.; you brought it and handed it to my wife, and said there was 3s. 6d. to pay on it; I took the message from my wife, wrote the reply, handed it to you, and told you to collect the 3s. 6d. at the other end; I do not know that the portorage was paid in Sydney, and if so, I think you tried to have me for the 3s. 6d.; I certainly said nothing about the portorage being paid by the Government; I know nothing about any portorage being paid in Sydney at all; all I know is that you tried to get 3s. 6d. portorage out of me for the wire; this was, I think, in September some time.

George Parfitt Webb, being duly sworn, saith as follows:—I am post and telegraph master at Minmi; the only lad employed in the post-office during 1896 and 1897 was G. Arthur Webb; G. Arthur is portion of the lad's name; no one of the surname of Arthur was employed there; but George Arthur Webb was; I see the pay voucher produced, No. 34837, and the writing in the body of that is in my hand, and the claimant's name, "G. Arthur," is also written by me; I have marked him down as the claimant, and I have certified in that voucher that from the 2nd January, 1897, to the 16th January of the same year he was engaged performing the duties of messenger at the Minmi post-office during the absence of W. Reen, two weeks at 10s.; I have certified that to be correct in every particular; the signature of the boy appears as "George Arthur", but not as George Arthur Webb, but they are one and the same person; the receipt for the £1 is also witnessed by me; I paid the money to the boy as it was sent to me; I see pay-voucher No. 52576 for 10s., claimant George Arthur; that is in my handwriting, and the 10s. is charged from the 9th to the 15th April, 1897, inclusive; that money was paid to my son by me, and the voucher is certified by me as being correct; in pay-voucher No. 25851 the writing in the body is mine; all of these vouchers were, however, filled up after the lad had signed them, not before; the lad was allowed to sign as he thought fit, and I filled up all the particulars next; I did not interfere with the lad as to how he should sign them; the boy received the money, and I can show that the one who received the money was the one who was entitled to it; in pay-voucher, I did not tell him to sign as "George Arthur," and I did not point out to him that his name was not "George Arthur"; in pay-voucher No. 25848 the claimant's name is in my handwriting, the same as in the others, and the signature "George Arthur" is my son's; in pay-voucher No. 7645 the claimant's name is George A. Webb; the name George A. Webb was put in there because the vouchers were becoming of sufficient importance in amount to make it worth while stopping the other matters, and now having it corrected; the other vouchers were very trivial, and so they were not corrected; in this particular voucher (No. 7645) the amount was for £3 15s., and it was, therefore, of sufficient importance to have it correct; I made the boy sign that properly, because of the amount; my son's name is Arthur Webb, or George Arthur Webb; the claimant, Arthur Webb, on some of the vouchers is my son, George Arthur Webb; his full name is George Arthur Humphreys Webb; in pay-voucher No. 44452 the claimant is put down by me as Arthur Webb, and that name is identical with George Arthur Webb; the boy signed as Arthur Webb; but not under my instructions; this voucher was signed before it was filled up; the cross showing where to sign was placed on before the body of the voucher was filled in; that voucher (No. 44452) is for £1 5s.; there is also a voucher No. 44452 for £3, and that is signed in the name of Arthur Webb as claimant; that name is identical with the boy George Arthur Webb, and also George Arthur Humphreys Webb; pay voucher No. 49176, is for 7s. 6d., claimant Arthur Webb; I have certified that that is correct also; that claimant is also identical with the others; I told the boy to sign no more as "George Arthur," but to sign as Arthur Webb; the name we always called him by was "Sonny" or "Arthur," but never "George Arthur"; pay-voucher No. 28869, is for £1, and the claimant put down as Arthur Webb, and the body of this voucher is in my hand-writing; the Arthur Webb there is identical with my boy; pay-voucher No. 31371, is for 16s. 8d., claimant Arthur Webb, and the signature Arthur Webb is still identical with "George Arthur" and "George Arthur Webb"; it is my son's signature; pay-voucher No. 27643, is for £3 in the name of Arthur Webb; the body of the voucher is in my hand, and the Arthur Webb mentioned there is still identical; I despatched all of these vouchers, and received the money and paid it to the boy; in 1896 George Arthur Webb was employed as Arthur Webb, and he signed the vouchers as "George Arthur"; he was a lad of about 10 or 11 years old, and really did not know what was the correct way to sign his name; as there was no fraud in the matter I did not check him; I have never made

made a statement to Mr. Ayerst to the effect that I did not want it known in the Department that I was engaging my children, and I am well aware that there was no necessity to hide the lad's name in any way; with regard to Mr. Young's telegram to Mr. Ayerst, I told Mr. Young that I had no messenger at the time to send out with it, and as it was over 1 mile to Ayerst's place, Regulation No. 590 did not compel its delivery, and as Mr. Ayerst had come to the office for the mails every Monday night, I had retained it there to give it to him then; I did not tell Mr. Young I was too busy then, but I took it up at tea-time; Mr. Ayerst did not ask me to define tea-time, nor did Mr. Young; I did not say that tea-time was half-past 6; I did not say I was too busy, but would send it out by the milk-boy; I will swear I did not make those remarks; I mentioned nothing at all about tea-time, and I do not think I said anything about the milk-boy; I said that I had sent the letter-carrier to Smith's to leave a message that Mr. Ayerst was to call at the office for a wire; Humphreys was on duty that night; I was never near Smith's; I have no recollection of ever having delivered a telegram at Smith's at all; I never told anyone that the A. Webb referred to Annie Webb or Amelia Webb, but I might have said that it would stand for the whole three, by way of a joke; with regard to Woodcock's wire, I did not say to Mr. Young, in reply to an inquiry about the 2s. portorage, that I had taken the wire myself to Smith's but the boy would not take it out to Ayerst's except he got 2s. portorage; I never saw the lad to make such a statement to him; I paid the boy 2s. about a week after; the memo. asking for 2s. was sent immediately on receipt of the message, and in the meantime I had sent Humphreys to Smith's to see if it could not be delivered by Smith's boy; I did not see young Smith until he returned with the reply, and I then informed him that I had sent for 2s. which would be paid him for taking the message out; I then found that I had made a mistake in sending for 2s., and that the proper charge should have been 3s., but Smith's boy said that 2s. would do him; in compliance with that I allowed 2s. to be sent to me by Hamilton station, and Smith came into the office a few days afterwards, and I handed the 2s. to him; I admit that I made a blunder in sending for 2s. instead of 3s.; I know nothing about Grierson's wire at all, except on the afternoon of the 11th April, Assistant Grierson informed me that he had forgotten to hand in a telegram given to him; he had put it in his pocket and forgotten it; no attempt was made to hide this fault, and I have had nothing to do with it in any shape or form whatever; in connection with my children being employed as messengers I never at any time told Mr. Williams, hairdresser, that I could just as easily have got a pound a week for their service as 15s. when Reen was away, or that I had written down to the Department for an assistant, and had received a reply to the effect that assistants were scarce, and that in consequence I would put my own boy on at 15s. a week; I have no recollection of any conversation with Mr. Williams at all, except that he asked me to put his own boy on; my boy was over 8 years of age when he was employed, and I think he was quite capable of delivering messages; at that time no other boy could be obtained; when my boy was employed he might have gone to school some of the time, and in that case one of the girls would have taken his place; the work was performed; from 17th January to 7th February, 1898, he was paid on the vouchers 15s. a week, and if the rolls show that he was always at school during that time they are false; the boy and the girls did the work between them; he might have done two days delivering telegrams, and then went to school for a couple of days; my boy used to go up to the school and then come out early; he used to go from 1 to 3 p.m., and during the rest of the day he would be employed in the office as messenger; he was never absent for the whole of the time; I sent him repeatedly to make up his time at the school for a few hours a day, as then his name would appear on the roll, and so save my being summoned for the lad's non-attendance; thus on many times he was supposed to be at school he was not at school at all; I have no knowledge of how long he actually attended school during the time he was employed as messenger; the work was done between the boy and the two girls; if the boy went to school the girls did the work; my wife also assisted in the office, selling stamps, &c.

George Alban Humphreys, recalled:—*By Mr. Webb*: I noticed that Mr. Ayerst called regularly on Monday nights at the post-office; it was remarked by both Webb and myself that he would call; he did not call on the Monday night that Mr. Young's message was lying at the office; I have seen Mr. Webb's wife and daughters giving assistance in the office during the time that the assistant, Mr. Reen, was away sick.

By Mr. Payten: I have noticed Mrs. Webb and daughters assisting in the office for about two years past; the boy and the girls attended to the delivery of the messages during that time; the boy was at school some of the time.

John Renfrew, being duly sworn, saith as follows:—I am a blacksmith, residing at Minmi; I remember the occasion on which Mr. Young, Postal Inspector, came to Minmi, and I was present at the post-office on the 8th December, 1898; Mr. Webb and Mr. Ayerst were there also; Mr. Ayerst introduced me to Mr. Young, and in doing so apologised for not having the Improvement Committee there, owing to some delay in the delivery of a wire from Mr. Young to Mr. Ayerst about the former's visit; Mr. Young thereupon asked Mr. Webb the reason he had not sent his wire out to Mr. Ayerst; Mr. Webb said he took the telegram up to Smith's, but as he could not get it sent out he had better take it back again, and put it in the pigeon-hole; I remember Mr. Ayerst asking Mr. Webb what he called tea-time, and Mr. Webb replied that it was about half-past 6 o'clock; Mr. Ayerst asked if it was not usual for his wires to be left at Smith's when he was not coming into town, and Mr. Webb replied that it was; Mr. Young inquired if those instructions were written, and Mr. Webb said that they were verbal only; Mr. Young asked if other wires had been so left at Smith's, and Mr. Webb replied that they had, when Mr. Young said that the practice would become the law; there was some conversation about portorage; Mr. Webb said he had taken the telegram up to Smith's, and that there was 2s. to pay on it, and Mrs. Smith's boy refused to take it out.

Elizabeth Smith, being duly sworn, saith as follows:—I am a widow, and I reside at Minmi; I am a storekeeper; it is usual for all telegrams for Mr. Ayerst to be left at my place, to be sent on for him, and my boy used to take them out; I remember the 5th December, 1898; I remember the date particularly, because my daughter-in-law was confined on that day; Mr. Humphreys called at my store on that night, and asked if Mr. Ayerst was in town, because there was a wire for him at the post-office; I told him that Mr. Ayerst had gone home, and I asked him if the wire was important, because, if so, I would get it and send my son out with it at once; he said that the office was now closed, and he did not know whether
it

it was important or not; Mr. Webb did not call at all on that day at my store with a telegram; if he has said that he did, that would be incorrect; on one occasion Mr. Humphreys brought a telegram to me into my back yard, and said something about portorage; I think I signed for that wire—at all events I took it; I have seen telegrams left without the book, but on some occasions I have signed for them.

By Mr. Webb: Mr. Ayerst is a friend of mine, and he comes to my place very often—almost every time he comes into Minmi; he never promised to get any of my sons into the post-office at Minmi; I have never charged him anything for sending telegrams out to him; I would not say anything to please him; I deliver his messages to him because he is a customer of mine.

John Smith, being duly sworn, saith as follows:—I am working at the screens on the Minmi Colliery; I have taken several telegrams out to Mr. Ayerst that were left at my mother's place for him; I remember a telegram from Mr. Woodcock, because I took the reply back; I got that telegram when I went home from work; I never refused to deliver that telegram until I got 2s. for doing so; I took back the reply, and I saw Mr. Webb at the post office, and he told me there was 2s. attached to the job and would he wire away for it; I then told him to do so, and he asked me to come in in a week's time and he would then give the money to me; I was never at any time in the employ of the post office at Minmi.

By Mr. Webb: I got the message at my mother's house, and took it out to Mr. Ayerst, and returned with the reply; I came back with the reply about 6 o'clock; I left to go out to Ayerst's after work at 4 o'clock; you said there was 2s. attached to it, and would you wire away for it, and I told you to do so; you asked me did I want the money, and I said I did; that was about 6 o'clock; that was the only message I was ever paid to take to Mr. Ayerst.

James Christopher Cosgrove, being duly sworn, saith as follows:—I am a public school teacher at Adamstown, and was teacher of the school at Minmi in 1896, 1897, and 1898; I left this month, since the holidays; I think it was on the 10th July; I know the boy, George Arthur Webb; he is about 12 years of age; he was at school at Minmi during the 10th February to the 4th May, 1898, but not on all the days; he was in attendance for that period for thirty-seven days out of fifty-five school days; I called the roll at 12:30 and 4 o'clock; from the 15th June to the 19th July, 1898, he was in attendance six and a half days out of ten school days; the mid-winter holidays came in here; from the 17th January to the 7th February, 1898, he attended seven and a half days out of thirteen school days; from April the 9th to April the 15th, 1897, he attended half a day—that was on the 13th April; from October 20th to 9th November, 1897, he attended seven and a half days out of sixteen school days; from 10th November to 16th November, 1897, he attended two days out of five school days; he left the school at Minmi and has since been going to the Wallsend school.

By Mr. Payten: The roll is kept by H. O'Donnell, pupil-teacher.

By Mr. Webb: The whole of the marks on the roll were made by Mr. O'Donnell, and they are in the same condition now as when I received the books from him; I was never checked by you (Webb) for my betting conversations; I admit having sent tips about races; I decline to answer whether I am a member of Tattersall's Club or not; I decline to answer whether I have been in the habit of spending afternoons in the club rooms at Newcastle; I admit that it was possible for your boy to come to school at 11:15 and from 2 till 3 and be marked for full attendance; I have received repeated notes from you to let your boy out of school; you never complained of my having brow-beaten your son; I admit sending racing tips to a Mr. Reen, assistant at the Minmi Post Office; the roll was kept in my charge until it was marked; it was practically in my possession all of the day; the roll could, of course, have been altered if there was anyone contemptible enough to do it; the roll was marked at 12:30 and 4 o'clock.

Edgar Grierson, being duly sworn, saith as follows:—I am a draper, residing at Minmi; Postal-Assistant Grierson admitted to me that he made a mistake in delaying a telegram; I have no relative in the post office at Copeland; my father-in-law used to live there; he is now living at Hamilton; I have never boasted to the public about Mr. Webb having stopped memos going through the telegraph office.

Alfred Edward Williams, being duly sworn, saith as follows:—I am a hairdresser living at Minmi; in the year 1898 I had some conversation with Mr. Webb about his children being employed at the post office; I asked him did he have any assistant, and he replied that he had not, as Reen was still laid up; he said he had written to the Department to see if they could send him up an assistant, and they had replied that it was very hard to get one, but that he was to try and get a suitable boy in the town for 10s. a week; he said he could not get a boy under 15s., and that he was then told by the Department to engage one at that sum; I asked him who he had put on, and he said, "I have my own boy doing the work"; he said he was foolish in not applying for £1 a week, as he could have got that as easily as 10s.

By Mr. Webb: My father-in-law lives at Copeland; I know nothing about any memo. coming through from Assistant Brockwell at Copeland; Brockwell is on friendly terms with my father-in-law.

Herbert O'Donnell, being duly sworn, saith as follows:—I am a pupil-teacher at the Minmi Public School; I mark the attendance of the boys according to the class they are in; the boy Arthur Webb was in upper 3rd class; I marked the roll from the 17th January to the 7th February, 1898, and the boy Webb attended seven and a-half days out of fifteen.

By Mr. Payten: I can tell that there has been no alterations in the roll, and I will swear that there have not been any; from the 10th February to the 4th May he attended thirty-seven days; I made all the marks on the roll, and they are in the same state now as when I made them; from the 15th June to the 19th July he attended six and a-half days.

By Mr. Webb: The rolls were locked up in the school during the dinner hour, and I had the key; sometimes Mr. Cosgrove would have the key; if a child was absent all the day an "A" would be against his name; if the child were only absent in the morning a dot would be placed against his name at the time; a dot could not be changed into a present mark without my noticing it; if it was changed into a stroke I would have noticed it also, because I could remember every child that was at the school; it was not possible to alter the rolls without my knowing it.

By

By Mr. Payten: The fact of a child being absent would be noticed, independent of any dot in the book; out of forty-two children there might have been ten away, and I could remember them; I could tell how many there were away in a morning, and have kept it in my memory; I could have detected any dot turned into a stroke. [*Roll put in (Exhibit "J").*]

Second Day—Wednesday, 25th July, 1899. Court resumed at 11:30 a.m.

John Renfrew, recalled:—*By Mr. Webb*: I made a complaint to Mr. Young, the Postal Inspector, about the delay in despatching a wire I had sent through the Minmi post office to C. E. Sorby & Co., of Newcastle; the statement I made to Mr. Young about the matter was true; when I entered the post office and spoke to you at the time about the matter, you (Webb) lifted up the form on which the wire was written, and I at once recognised the writing of my boy; I was not 20 feet away, and I could recognise the writing from where I stood; I do not think I could recognise the writing 25 feet off, but that was not the distance I was from you; my lad wrote the message, and I noticed the word "Sorby" on the top of the form; I do not think that you send the form when you send a message, as I am not quite so simple as that; I took note of the time that I went into the post office to see if the wire was sent; I was not there before in connection with this wire, as my lad took up the message; I got the information in the first place from my lad, as when he returned he informed me he was delayed in the post office, and I then went up to the post office to see about the matter; I know nothing at all about the business of your office, or the inner working of any post office; all I know is that you greatly delayed my wire; Mr. Ayerst and myself are very intimate friends, and have been so for the last twenty years or so.

By Mr. Reid: When I went into the post office about this matter of the delayed telegram and spoke to Mr. Webb about it I saw him take up the form on which my wire was written and commence sending it at the instrument; he took the wire up off a side-table; I could recognise the wire by my boy's "twisty" writing.

By Mr. Webb: I know nothing about whether you were repeating the message; I know for a fact that the wire must have been delayed by the telegram I received in reply; when I went into the post office you were sitting down reading a newspaper.

Walter Thomas Grierson, being duly sworn, saith as follows:—I am the acting assistant post-master at Minmi; I remember on the 10th April last a telegram was handed to me at Mr. Grierson's store by Mr. Grierson the draper; it was given to me at about half-past 4 o'clock in the afternoon; no money was paid to me, as it was a "reply paid" telegram; when I went back to the office I did not see Mr. Webb, so I did not speak to him about the message at all—in fact, the wire completely slipped my memory; it was still in my pocket at tea-time; I changed my coat, and it was still in my pocket, because I found it there the next day; I was doing returns at the time I discovered I had not sent the message, so I at once spoke to Mr. Webb about it, and he told me to go at once to the sender (Mr. Grierson), and I did so; Mr. Webb knew nothing at all about the delay in this message; I will take the whole responsibility of it.

By Mr. Payten: I have been in the office at Minmi about seven months; I deliver the telegrams, and I assist generally; the only other person employed at the office besides myself and Mr. Webb is a letter-carrier; the only occasion on which I have been absent since I have been at the post-office was three days on leave to attend an examination; during my absence Mr. Webb's son came on, and he was employed in my place on the 23rd, 24th, and 26th of June of this year; the boy was about 11 or 12 years old; I could not say whether he was capable of doing my duties; he delivered the messages, and that would be the only portion of my duties he performed; the girls would be capable of doing that; I should say that, on an average, there are four or five telegrams come through the office in a day, and they are delivered within the radius of a mile; I could not exactly say what portion of my time that would occupy in a day.

By Mr. Reid: I do not know whether the boy was engaged in 1896 and 1897, as I only came to the office on the 12th June last year.

By Mr. Webb: In December last I received a telegram from Brockwell, at the Copeland post-office, sent to H. Williams, of Minmi, free as a memo., and you stopped the delivery of it.

Alfred Ernest Ayerst, recalled:—*By Mr. Webb*: The reason I received wires from you at places other than Smith's, and did not report you for not delivering all wires at Smith's as you were asked, was, I suppose, because very probably I might have happened to be in Minmi at the time, and called at the office, or I might have called, and said I was going over to Wells' or Pellow's, and that you were to send any wires that came over there to me.

Mr. Ayerst: I desire to make a statement with reference to what has been said about my friendship for Mrs. Smith; when Mr. Smith died, myself and other friends assisted Mrs. Smith, and we have given her advice ever since; as I am living 2 or 3 miles out of Minmi, I always either ride or drive in, and I have the use of Mrs. Smith's stable, so that is why I always call on her when I come in.

By Mr. Payten: I am a married man, and have a family partly grown up; I come into Minmi about three days a week, and remain in about half a day; when I am here it is a well-known fact to all the residents; I generally come in on Tuesdays and Saturdays, but when the grape season is on I am in almost every day; I go to see Mrs. Smith in connection with my business; I purchase my provisions at her store, and supply her with fruit and vegetables.

George Parfitt Webb—[*Statement made by Mr. Webb*]:—I myself have been out to Mrs. Smith with messages, and also sent others, and she informed me that it was of no use my leaving any more wires at her place for Ayerst, as her boys were all in work, and could not now take them out; wires came after that, and were handed by me to Mr. Ayerst, when I also informed him of what Mrs. Smith had said about delivering any wires that were left at her place; the detention of those messages at the office was not objected to or reported by Ayerst, nor were instructions of any kind given to me by him (Ayerst) for the future; on one occasion, when I told Ayerst that Mrs. Smith would not send out any more messages that might be left for him, he replied, "All right"; I, therefore, did not send to Smith's place at once when the message for Ayerst from Inspector Young came; I sent letter-carrier Humphreys to Smith's though,
and

and asked them to tell Ayerst to call for an important wire; Humphreys returned to the office and informed me that Ayerst was gone, but that it could be delivered next morning to the milk-boy; Humphreys waited at the office about half an hour before going home; I left the office practically open, and the light burning until 9 p.m., so that I could give Ayerst the message if he happened to come in; I wanted to deliver it if I could; the reason I did not send to Mr. Young for portorage on his wire was because I had no messenger except my son, and he could not have gone so far as 3 miles; I deny ever having had any instructions, verbal or otherwise, from Ayerst, that I was to always deliver his wires to Mrs. Smith's, but I have always tried to do the best I could for him; if he says that the message-book will show that all his wires have been delivered at Smith's, that would not be true, as only four telegrams out of about twenty-five delivered in three years are signed for by any of Smith's family, and then only after they agreed to take the message out to Ayerst's; I had no one to send out with the message, even if portorage had been asked for, and as Ayerst had been in the habit of calling, I thought it best to wait, and do what I could with the message; Ayerst always used to call at the office on Monday nights until December last, but since then he has discontinued calling; this was noticed by Letter-carrier Humphreys also, he being on duty every night to deliver telegrams; I have had special permission given me since to employ Letter-carrier Humphreys in his spare time, at any part of the day, as a messenger if necessary, and he was compelled to sign a paper to that effect; this was done in order to bring his time up to a fair day's work, and was done by the Department, and not by me; these instructions were given about five or six years since; as Inspector Young's message was from the postal authorities, I did not look at it in the same light as if it was from an ordinary private person; I object to its being treated as Ayerst's private affair, as he is doing, as it was from the Postal authorities; I claim that I did the best I could in the matter, and I also claim that, being in want of a messenger, the Department was likely to treat me less strictly, and that I was to do the best I could under the circumstances of the case; dozens of telegrams have been detained at the office for Mr. Ayerst, and it was only when I had one that I thought very important that I sent it to Smith's at all on my own accord; why did not Ayerst report this neglect of his alleged verbal instructions?—No, he did not do so, but waited until after last Parliamentary election night before he reported the misunderstanding over Mr. Young's message, and this was done out of spite to me; if Mrs. Smith had not said she would not deliver his telegrams any more after Humphreys and myself called to see her, I would not say so; George Arthur Webb attended school for many days for two hours daily, from 11:30 a.m. to 12:30 p.m., and from 2 to 3 p.m.; when the three children were away at school, the work might still have been done by A. Webb, as he was not at school for the full days; he could go to school and still be on duty from 8:30 a.m. until 11:30, and from 12:30 to 2 o'clock, and from 3 p.m. to 7 p.m., which would make up a fair day's work for a messenger; with reference to the message from Dalrymple Wood, I remember sending Letter-carrier Humphreys to Mrs. Smith to see if the message could possibly be delivered to Ayerst; I had already sent to Hamilton for portorage on the message, which either Humphreys left at Smith's or some of Smith's called for it; when young Smith came back to the office that night about 7:30 I told him 2s. portorage had been paid on it, and asked him if he would take it, or should I return it to the sender; he said he would take it, and I paid him later on, after stamps had been received from Hamilton; Smith will swear that I did not see him until a reply was handed to me; the reply to this particular message was received by me at about 7:45 p.m. to send to Wood, Newcastle, and the station-master at Hamilton informed me that the portorage was paid at 7:8 p.m.; I never saw Smith to see if he wanted portorage until after 7:45 p.m.—after it was paid; number of telegrams were delivered to Ayerst at the office, having been put in the pigeon-hole with his letters to await his calling for them, and the reason these messages were not signed for can be accounted for by the fact that the message book might have been out with a wire when he called, and, so as not to detain him until the book came back, the wire was delivered up, and no signature obtained; however, several messages bearing Ayerst's signature were, I claim, delivered to him at the office; none were ever taken to his home, except one I delivered in September, by anyone else but Smith; in the message-book for 1894 all telegrams to Ayerst are shown as having been signed by Ayerst and A. Taylor, and, none are down as having been delivered to Smith; with reference to the few messages sent to Smith, I sent them simply to oblige Mr. Ayerst, as I would have done for anyone else; the reason I did not employ a strange lad in the place of my own lad was because the work of assistance was inside the office in post and telegraph work, and not the work of a messenger pure and simple; my wife and daughters also used to assist me; the remuneration was paid for the services done, and whether it was in the name of George Arthur, George Arthur Webb, G. A. Webb, or any other name, was quite immaterial, so long as the money was earned honestly; my children were sent to school many times from 11:30 to 12:30, being marked for a full attendance that morning, and they were also sent from 2 till 3, and were marked for a full attendance in the afternoon; in my opinion, the attendances for both the boy and the girl as shown on the school registers is misleading.

By Mr. Payten: I received the wire Mr. Young sent at 4 p.m.; I sent letter-carrier to Smith's at about 7:20 p.m.; I waited the four hours, expecting to see Mr. Ayerst that night at the office; I waited, too, because I had no messenger to send out to Ayerst's; I did not take any other steps to deliver the message; six messages in all were received at the office on the 5th December, three of which were received subsequently to Mr. Young's telegram, and they were duly delivered in the town; no one of those messages in any way interfered with or delayed Mr. Young's wire; it is my duty to get receipts for all telegrams I deliver, but it is difficult to get one on all occasions, as the book might be away; if the book was away I should enter it up on its return, so that some entry should appear in the book, and make the station book and the message book agree; I cannot say altogether how I secured the absence of my boy from school; I do not know whether it is the practice to have a notification sent you from the school when a child is absent; notifications were, however, sent to me, but in a most irregular manner; the boy could do no work, except deliver messages, but his sisters and my wife could; he has been capable of delivering messages since he was 8 years of age; I consider a lad of 8 is capable of delivering a message, providing it was put in a bag for him, and the book entered up properly.

By Mr. Reid: I know it is 3 miles from Minmi to Cedar Hill; but would not swear it was not 2 $\frac{3}{4}$ miles, but that would not affect the charge for portorage; I sent Humphreys to Mrs. Smith's on the 5th December at about 7:30, and he came back to the office; he was sent with another message at the time; he informed me that Mrs. Smith had said Ayerst had gone home; I did not know whether that was an actual fact or not, and thinking that Ayerst might possibly come in for something, I left a light in the office.

office, so that he could see it, and so know there was someone about; I did that, although I heard from Humphreys that he had gone home; I did it, because I wanted to get the message delivered if it was at all possible; I had no desire whatever to delay the message; indeed, if his house had been alongside the road, I would have taken it out myself; he (Ayerst) did not report the delay of any of his messages until after the Parliamentary election; I think Mr. Young called at the post office on the 8th December, and Ayerst reported about the delayed message then; I kept no record of the hours the boy was away at school, when he was engaged as messenger; I have authority to manage the office to the best of my ability, and in order to save the Department money, I agreed to do the work of the assistant for 15s. a week; otherwise it would have cost £2 to £2 10s. a week; in earning this money, I was assisted by my wife, and daughters, and son, and for convenience, the vouchers were made out, and the money received in the name of my boy; if the boy was away at school, he, of course, would not be there to deliver telegrams, but in that case my wife would look after the office, while I took out the message; the boy was getting money for work that had been performed for him, but had not altogether been performed by himself; the whole money was, however, honestly earned, and honestly paid.

Robert Brownlee, being duly sworn, saith as follows:—I am a draper residing at Minmi; I am a member of the Improvement Committee; I was at a meeting of the Improvement Committee, at which a letter from the Postal Department was read, *re* vouchers, in the name of G. A. Webb, with reference to the Minmi Post Office; I cannot say whether that communication was marked “private and confidential” or not; I think there was some remark passed to the effect about allowing the matter of the vouchers to drop, or Webb would get a laugh in on us; Ayerst might have said he would see whether Webb would get a laugh on or not; I cannot give the date of the meeting, or the number present; I think that in 1898 the matter of Webb’s children being employed in the Post Office was referred to; I suppose Mr. Ayerst would be present then, as he was very rarely absent; Mr. Ayerst calls the meetings; at the public meeting, at which I was elected a member of the committee, there was not what you would call a large attendance, though there might have been thirty present; the meeting was not called by an advertisement in the newspaper; I am not positive on that point, but I am sure that notices were posted up calling the attention of the public to the meeting.

John Kennedy Walker, being duly sworn, saith as follows:—I am a storekeeper, carrying on business at Minmi; in the years 1897 and 1898, I have seen Mr. Webb’s children delivering telegrams in Minmi, and I have also received telegrams from them; I have seen them delivering telegrams repeatedly, and I have also received wires from both his son and daughters.

By Mr. Payten: That would be at various times during the day and the evening; I think it was during school hours and in the evening; I have never received a telegram from the office, and not signed for it, that I can remember; but it is quite possible that I may have done so.

By Mr. Reid: The reason I did not sign for it might have been because I was away.

William Hogg, being duly sworn, saith as follows:—I am a baker and general storekeeper residing at Minmi; in 1898, I saw Mr. Webb’s two girls delivering messages in Minmi repeatedly; they delivered some to my shop; the boy also delivered telegrams to my shop in the year mentioned; I am a storekeeper, and I receive a fair number of telegrams, and I am in a fair way of saying whether I thought your children (Webb’s) were employed as messengers; I believe they were so employed.

Edward Trelford, being duly sworn, saith as follows:—I am a special constable at Messrs. J. and A. Brown’s, and I reside at Minmi; in the year 1898 or 1899 telegrams were received at my house, and they were delivered by Mr. Webb’s girl; I did not see the girl, but my wife informed me that the girl had brought them; I cannot say whether I have seen the children carrying the telegraph bag about and delivering messages, but I know that it is a well known fact about Minmi that they do so.

By Mr. Payten: The telegrams I refer to were received at my house at about 2 or 3 o’clock in the afternoon.

James Dill, being duly sworn, saith as follows:—I am a draper, and I reside at Minmi; in the year 1898, during the time Mr. Webb was without an assistant, I have seen the children delivering messages; they were delivered at my shop by both the boy and the girls, and I have seen them taking messages to other places as well; at a meeting of the Improvement Committee I said that Mr. Webb’s son and daughters were doing the work of delivering telegrams, and that his daughters were assisting him in the work of the office; I cannot say whether Mr. Ayerst was present at that meeting or not; I do not know whether anyone was acting in his place as secretary if he was absent; I do not know if he was absent or present.

By Mr. Reid: I knew that the boy and the girls were doing the work by seeing them do it; I only formed my own opinion, and I mentioned this to the Committee.

By Mr. Payten: I saw the children so engaged on many occasions; I have also seen the children come after my shop was closed at night; I receive a fair number of telegrams—about one a week on an average; I do not always receive the telegrams myself; my wife might take some, or some of my employees; they are invariably signed for; I have never received any that I have not signed for as I know of.

Richard Richards, being duly sworn, saith as follows:—I am a hotelkeeper, residing at Minmi; in the year 1898 I have seen Mr. Webb’s children delivering telegrams, and that was time after time, and day after day; I spent a good deal of my time on my hotel verandah, which is near the post office, so that I would have an excellent chance of seeing the children doing the work; they did it almost daily when Mr. Webb was without an assistant.

By Mr. Payten: He was without an assistant for about five or six weeks about twelve months ago; I knew that the assistant was off, because I knew that the young fellow, William Reen, was away.

George Achurst, being duly sworn, saith as follows: I am a farmer, residing at Mount Elliott; in the year 1898 I heard at the Improvement Committee the fact that Mr. Webb’s two boys and one girl were doing the work of assistants in delivering messages; I think it was two boys and one girl that I

heard mentioned, and not one boy and two girls, but it might have been; I am a member of the Minmi Improvement Committee; at the public meeting on which I was elected I do not know whether it was called by advertisement, or whether there was a large or a small attendance; I do not think that that has anything to do with this case; notices were posted up calling the meeting; it was a fair gathering, and there might have been twenty or thirty persons present.

William Keohan, being duly sworn, saith as follows:—I am postmaster at Wallsend; I have employed my son to do the work of messenger when the assistant was away on leave; the Department always paid the vouchers without any objection; I was authorised to employ a temporary messenger, and I employed my son to do the work; I did not inform the Department that I was employing my son; I simply employed a temporary messenger, and sent in the vouchers for the services rendered; so far as I know the Department were quite satisfied in the matter.

By Mr. Reid: My son's name is William, and he was then about 16 years of age; I have employed both of my sons; one was about 16 and the other 14; when sending in the claim vouchers I put their names in in full; the boys signed the receipts for the money in their own names.

By Mr. Payten: At the time I engaged my sons, their time was fully occupied, and I did not allow them to go to school; on both occasions it was vacation time when they were engaged; one was employed about a month, and the other nine days.

Robert Snedden, being duly sworn, saith as follows:—I am a miner, living at Minmi; in the year 1898 I heard it spoken at the Minmi Improvement Committee that Mr. Webb's son was delivering telegrams in Minmi; I did not hear that the girls' names were mentioned; at the meeting at which I was elected a member of the committee it was a pretty good one; I do not know whether the meeting was advertised in the papers.

Ellen Williams, being duly sworn, saith as follows:—I am a married woman, residing at Minmi; I do not remember Mr. Webb asking me early in August last, before four or five persons, if I had heard anything about a telegram from Copeland being missed.

William Reen, being duly sworn, saith as follows:—I am the assistant postmaster at Minmi, but I am away at present on sick leave; I have been in Minmi about eight years; during the year I was on duty, Ayerst's telegrams were generally kept in the office; I delivered many telegrams for Ayerst with his letters at the office to Bertie Taylor; several of Ayerst's telegrams used to be kept until he called for them; I was never given instructions that Ayerst's telegrams were to be taken to Smith's; I heard Mr. Webb say to young Smith, in the office, that there was 2s. portorage to be paid on the wire from Woodcock to Ayerst, and that Smith could either take it or it would be refunded back to the sender; I have delivered many messages to Ayerst; young Taylor used to call for Ayerst's letters.

By Mr. Reid: I have taken telegrams down to Smith's for Ayerst under Mr. Webb's instructions; any telegrams that Taylor would take away he would sign for; Mr. Webb asked me did I remember what he had said to Mr. Young, and I replied that I had.

By Mr. Webb: You (Webb) did not tell me what to say.

By Mr. Payten: I have delivered telegrams to Smith's for years past, but some were left at the office, and Mr. Ayerst called for them; I do not remember Mr. Young sending a telegram lately.

By Mr. Reid: I remember Mr. Young coming to Minmi, and Mr. Webb sent for me to assist him in the office whilst he was having his interview; I do not remember Mr. Webb saying to Mr. Young, "I was too busy to deliver it at the time, so I took it up at tea-time"; I cannot say what was said, as I can only remember a part of the conversation; I can remember them talking about portorage, as they talked about it for a long time.

By Mr. Webb: I was attending to the business of the office at the time, and I was sent for so that you might be free.

By Mr. Payten: It was a very unusual thing for the Inspector to come into the office, but I was busy on the line, so that I could not listen; I had to attend to the instrument at the time; I should say that there are about four or five telegrams delivered in Minmi daily; I used to deliver them sometimes, and sometimes the children would do so; they were attending school, but if I was not well they would lose half a day; I used to deliver wires within a radius of half a mile, and that would take me about half an hour.

By Mr. Reid: I did not hear Mr. Webb say, "I took the wire to Smith's, and the boy said he would not take it out to Ayerst's unless he got 2s. for doing so"; there was something said about Mr. Webb going to Smith's though, and I heard Smith's boy's name mentioned, too.

By Mr. Webb: I am not sure whether you said you went or sent the letter-carrier; I heard it mentioned that some one went to Smith's.

By Mr. Payten: At the time Mr. Young was in the office I was in the same room, about 4 or 5 yards away; I was at the instrument; besides myself there was Mr. Webb, Mr. Young, Mr. Ayerst, and Mr. Renfrew present—five in all.

By Mr. Webb: I do not know the exact distance between the instrument and where Mr. Young was standing.

By Mr. Payten: It was about 11:30 in the day, and on the 8th December, I think; I received a wire from West Wallsend whilst Mr. Young was present, and that telegram would show the time Mr. Young was there; I was at the instrument, and the records will show that I was either sending or receiving a telegram, and I would know what the wire was about if it was shown to me; I might have been called to the instrument to answer some question, or it might have been the telephone.

By Mr. Webb: I had been away from the office then for some months, and I might have been chatting with some one on the line, as every time I go near I go to the office and have a chat.

By Mr. Payten: He could not say whether that (to chat on the line) was regular or not.

Charles Edgar Gillispie, being duly sworn, saith as follows:—I am a 'bus proprietor, residing at Wallsend; in 1898 I saw Mr. Webb's wife and two daughters assisting in the office during the absence of Assistant Reen, and that was done during almost the whole of the time Webb was without an assistant;

assistant; this work was in connection with the making up of mails; I am at the post office nightly, from ten to five, until twenty minutes past, so that I had a fair opportunity of observing matters; I could see all that went on in the office; I could see that you (Webb) received assistance from your wife and girls; one delivered stamps, and the other helped with the mails.

By Mr. Payten: I have been receiving the mails for a year and seven months; the quantity of mails I receive is three bags; I should say they contain about 200 letters on the average; it generally occupied from a quarter of an hour to twenty minutes for them to make up the mails; I cannot say how long it would take a smart man by himself to do the work; I do not know whether Mr. Webb could not easily make up the mail by himself in half an hour; he did not close the mail at once, as he was in the habit of despatching letters received after the hours of closing; my proper time to leave is half-past six.

By Mr. Webb: I have seen you doing duties in the office which necessitated your attention, and then your wife would take up your other work; your time was always fully engaged.

By Mr. Payten: I cannot say whether anyone else but the postmaster sealed up the bags; I know he used to tie them up.

By Mr. Webb: I always examined the seals and the strings before going away with the bags, and I have never found one yet with anything wrong with it; the postmaster always did this too, so that if any neglect had taken place he would have corrected it.

George Humphreys, recalled:—In September last year Mr. Webb sent me to Mrs. Smith's about noon; I went to see if a message could be taken out to Mr. Ayerst by Mrs. Smith's son; since then I have delivered messages at Smith's for Ayerst; Mrs. Smith replied that the boy was engaged and could not go out, and I returned to the office and informed Mr. Webb.

By Mr. Reid: This conversation took place about the middle of September; I have heard since of the trouble between Mr. Webb and Mr. Ayerst.

By Mr. Payten: In accordance with Mr. Webb's instructions, I have been in the habit of calling at Mrs. Smith's in connection with Ayerst's telegrams, and asking Mrs. Smith if Mr. Ayerst was in town or not; I have been doing that now for nearly five or six years; I can give no explanation as to why all the telegrams were not sent to Smith's; as Mr. Ayerst is in the habit of coming into Minmi I would be likely to see him, but I cannot say whether I have delivered telegrams to him whilst he was in Minmi, without taking them to Mrs. Smith's.

By Mr. Webb: I do not know about every telegram that was received; many telegrams could come for Mr. Ayerst which I would know nothing about at all, unless they were placed in the pigeon-hole.

By Mr. Payten: Wires that are kept in the office are retained amongst the letters, so far as I know; I have not access to them; I sort my letters on the side counter near the stamping table, and any telegrams would be given to me to deliver by either Mr. Webb or the assistant; they are handed to me personally, and not put in a special place for me to take.

By Mr. Webb: Whilst Mr. Webb was without an assistant I have seen his wife and daughters assisting him in the office.

Alfred Ernest Ayerst, recalled:—*By Mr. Webb*: I think I attended all the meetings of the Improvement Committee from the annual election to the end of the year 1898; if I get instructions from the chairman or the committee I will produce the attendance book, but not otherwise.

Mr. Payten: I will not ask you to produce the book.

Third Day—Wednesday, 26th July, 1899. Court resumed at noon.

Mr. Payten: I wired away for the 1896 vouchers that were asked for, and am now in receipt of the following reply:—"No vouchers for 1896 to signature of G. Arthur. See my letter enclosing other vouchers. The only vouchers for 1896 I have forwarded you. Perhaps you can prove the *bona-fides* of the signatures thereto. (Signed) G. E. BRODIE, Assist. Auditor-General. Sydney, 25th July, 1899." (*Exhibit "K."*)

Alfred Ernest Ayerst, recalled:—*By Mr. Webb*: On the 22nd August, 1898, you made this statement to me:—"Of course you know the Department are not aware that I am employing my children, for it would be a serious matter to me if they did"; I have given you the exact statement as you made it; I have also heard you say that I could withdraw all my charges, as you had more influence than me and the Committee put together.

George Parfitt Webb, recalled: I swear that the first voucher in the name of Arthur Webb was sent into my Department in the first half of 1898, and that I had forwarded a document informing the Department that my son was being so employed; that was four or five years before I am accused of having asked the man Ayerst to hide this fact.

By Mr. Reid: I have no recollection of what led up to this conversation with Ayerst; I deny in toto that there was any such conversation; I remember asking him what he had written to the Department about, but he gave me no information; he did not tell me that he had written to the Department for the particulars of Reen's absence in 1896 and 1897, and for the persons' names who were respectively employed in those years; I told him my son and daughters were doing all the work between them, and that was all that passed between us; I am certain that it was before the end of June, 1898, that I sent vouchers in the name of Arthur Webb, and informed the Department that my son was doing the work of messenger, and had been doing it all along in the absence of Assistant Reen; I cannot say whether I sent in a statement to the Department that G. Arthur, in the years 1896-1897 was doing the work of Assistant Reen; my son was employed in Reen's absence in 1896; I think he was, but I am not sure; I cannot say whether he was employed in 1896, as I have no record of the dates; all moneys sent for in the name of "George Arthur" were paid to my son, George Arthur Webb; he did not then give it back to me; it was paid to him.

By Mr. Payten: It was paid to him in cash.

George

George Parfitt Webb, recalled:—[*Statement by Mr. Webb*]: About June or July, in 1898, I received a telegram from Copeland, addressed to Johnston, at Minmi, from F. Brockwell, of Copeland, which I would not deliver, because it was sent as a free message; also, in December last, I stopped Walter Grierson, relieving assistant at Minmi Post Office, from delivering a telegram addressed to A. E. Williams, of Minmi, the said telegram being from Brockwell, of Copeland, as it was sent as a free message; as there was a difference in the name of the first voucher, sent in in the name of Arthur Webb, compared with other vouchers sent in in the name of George Arthur, I sent in with the voucher in the name of Arthur Webb a letter to the Deputy Postmaster-General, in which I informed him that my son had been doing the work of messenger till then, namely, till the time that that voucher in the name of Arthur Webb was sent in; the Department did not send the vouchers to me for alteration or for any further explanation; I mean the vouchers in the name of George Arthur, to which I had invited attention; I had no idea of any fault being found seriously, but as they would probably notice a difference in the names in the same handwriting, I expected them to send to me for an explanation, and when I did not receive anything from the Department in the matter I considered that the difference was immaterial and did not consider it worth while altering; I considered that my son, Arthur Webb, had been doing the work till then; I also, in a letter to the Deputy Postmaster-General on the 29th October, 1898, offered, because of the expense to the Department for relieving assistant, namely, 30s. a week, to which would have to be added 15s. per week for the lad that would have to take the assistant's place at East Maitland, in all, £2 5s. a week, to do the work with my family for 20s. per week; I told the Deputy Postmaster-General that while the money would be acceptable to me it would be a saving to the Department of 25s. a week; I left it to them to accept or refuse my offer; on the 8th November, 1898, I received a telegram from the Deputy Postmaster-General to the effect that my offer was accepted, and that I was to arrange for the work to be done as I suggested, and to send Bridekirk, the temporary assistant, back to East Maitland.

[*At this stage Mr. Webb called for certain letters, and the following were handed in by Mr. Burnett*:—*G.P.O.*, 98/326, 21st January; *G.P.O.*, 98/3,805, 9th September; *G.P.O.*, 98/4,730, 7th November.—*Exhibit "L."*]

Mr. Webb, resuming: My son was commonly called Arthur Webb; that is the name under which he is known at school, and under which I believe he is entered on the rolls at the Minmi Public School; he has not been referred to there as George Arthur Humphreys Webb; I often sent my son, Arthur Webb, to the school at Minmi for an hour in the morning and for an hour in the afternoon, he being marked down as present all day; he on various days, and his sisters also, on days on which they had attended for one hour in the morning and one hour in the afternoon were marked for the whole day; on those days they were in attendance at the post office for duty from 8:30 a.m. to 11:15, from 12:30 till 2 p.m., and from 3 till 7 p.m., which would make a fair day's work; the letter-carrier did messenger work from 7 to 8:15 p.m. nightly; whilst I was without an assistant, in 1897 and 1898, my wife assisted me in the office daily, in other ways than making up mails; my daughters served stamps and helped generally, except in telegraphic work; my wife helped me a little in telegraphic work in ways which suited me; she could tell the call on the line, and watch things in the dinner hour; she could tell when I was wanted on the line; a strange lad could not have done this; she still would have had to have done it if a strange lad had been employed, and the lad would have obtained all the remuneration; my girls assisted me in busy times daily; letter-carrier Humphreys is not nor was he any use as an assistant in the office; his time is fully occupied in letter carrying and messenger work; he was of no use as an assistant in any way; my son, Arthur Webb, was paid for the work done by the woman and sisters; Letter-carrier Humphreys never at any time served out stamps; the number of wires received daily would average about six or seven, going as high as twelve or more, and seldom below four; I have, in addition to local business, to repeat telegraph line business to and from West Wallsend, which necessitates the double repetition of each message; the business is large enough to render an assistant in the office necessary, in my opinion, through Minmi being a repeating station for West Wallsend, and its own local business; at times when I have had strangers as assistants in 1898 and 1899, messages have been missed twice, but when my late assistant Reen and my family did the work nothing of the kind took place; the office has been remarkably free from such things, as I then cannot remember one wire being missed or delayed until the next day—in fact I can swear that not two messages have been missed since Reen was with me, or while my wife and daughters were doing the work; on the morning of Sorby's telegram, portion of my time was engaged in examining English papers looking for enclosures; I asked James Johnston, relieving letter-carrier, to note what I was doing; I believe that I sent the first telegram to Sorby & Co. of Newcastle, and it was sent within reasonable time—in fact, good time, considering all hands were busy; I believe that I had to repeat a portion of it; the first telegram to Sorby was handed in about 9:35 a.m., and the second one about 9:45 or 9:50 a.m., and a reply to both telegrams was received at 10 a.m., and within thirty-five minutes of the first having been handed in; Renfrew was outside the counter when he said he read the telegram; he would be 22 feet off; I did not raise the wire to send it; but it was lying on a clip on the table; I never hold a telegram in my hand while sending it; I always leave them in the clip; in the telegram, Woodcock to Ayerst, I at once sent for portorage to be paid on the 17th November, 1898, at Hamilton; the memo. said that the portorage was paid or received at 7:10 p.m.; when I saw young Smith the portorage had been in the hands of Hamilton for thirty minutes; I at once sent to Hamilton for the portorage to be paid, and received a memo. to that effect about 7:10 p.m.; I sent reply to Woodcock at about 7:15 p.m.

By Mr. Reid: I first heard that the Improvement Committee were taking a certain action against me in September, 1898, the matter then being before the Committee; I knew that it was before the Committee; it was some time after that that I wrote to the Department offering to give the services of my family instead of an assistant; it would have been the 2nd of November, that I wrote into the Department; I kept no record of the dates at all.

By Mr. Payten: My lad received 15s. a week; that would be in 1898; he would be 10 years old then; he was unable to do anything else but deliver messages; I should think that there were six or seven messages delivered then in Minmi in a day; if those messages cost 4s. or 5s. each to deliver that would be a matter for the Department; I cannot say whether I made a declaration when I entered upon postal work; I know now it is necessary to do so; my wife has made a declaration; my children have not made any such declaration; Mrs. Webb took the declaration at Cooronbong; she was then assistant to me.

William Swanton, being duly sworn, saith as follows:—I am the head-master of the Minmi Superior Public School; I produce the boys' school attendance-roll for January, 1897 to December, 1898; [*Note.—This roll has already been put in, and marked "J". See page 30 of evidence*]; I also produce the girls' roll, 3rd class, from April, 1897, to December, 1898; I likewise produce the girls' class roll (4th class) from April, 1897, to the present time (*Exhibits "M" and "N"*); these rolls are kept under the Regulations of the Department of Public Instruction, and they show the attendance of the children; I have made out a tabulated statement showing the attendance of Mr. Webb's children, Arthur, Annie, and Millie, and that statement is a true and correct extract from the attendance rolls; I produce the statement (*Exhibit "O"*).

George Wile, being duly sworn, saith as follows:—I am a bootmaker, residing at Minmi; I remember being employed at the Minmi Post-office by Mr. Webb; I signed my name to pay-voucher No. 46484 for 11s. 8d., for services as temporary messenger from 14th March to 21st March, 1896, at 10s. a week; I was paid the money by Mr. Webb.

By Mr. Payten: I have been bootmaking about three years; I was not engaged bootmaking when I signed the voucher; I carried out telegrams, and got people to sign the book before I delivered same.

By Mr. Webb: I did not do anything more than messenger duty.

George William Akhurst, being duly sworn, saith as follows:—I am a school-teacher, residing at Mount Elliott, near Minmi; I kept the class-roll at the Minmi school from 9th April to 15th April, 1897, showing the attendance of George Arthur Webb; the attendance during that time was half a day, that was on the 13th April; from 20th October to 9th November, 1897, he attended eight and a half days; from the 10th to the 16th November, 1897, he attended four days; I think that Mr. O'Donnell kept the rolls after then; and the record of the attendances given were kept by me.

By Mr. Webb: In the dinner hour the press was locked where the rolls were kept, and Mr. Cosgrove had the key; when a child was absent in the morning a dot is placed against his name; if a dot were turned into a dash the dashes would have to be much thicker than they are, or it would be noticed.

By Mr. Payten: When I came to mark the attendance in the afternoon, I would see whether a child had been credited with attendance in the morning, and from my memory I would detect the matter at once; such a thing could not have happened without my detecting it, and I am sure that it never did happen.

By Mr. Webb: About an average of four children would be absent from the class every day; when children were absent in the morning I put their names down; I did this so as to get an explanation from them as to why they were away; the roll could not be altered without my detecting it.

By Mr. Payten: If a child was absent in the morning, I got an explanation from him in the afternoon, but if they were absent all day I wrote notes, taking the name from the roll; I kept a record of the notes I wrote, but I cannot say where the book is now; it was a block book, one portion being sent to the parent of the child and the other part retained.

Edward Dodd, being duly sworn, saith as follows:—I am a pit-boy at the new tunnel; I remember being employed in the Minmi Post-office by Mr. Webb, and he paid me for my services there; vouchers Nos. 33010 (two) were paid to me; I received the money for them; the signature on the vouchers is mine.

[At this stage the inquiry adjourned for an hour to see about the attendance of a witness (Mr. Young); on resuming, the inquiry was adjourned until Monday, 31st July, at 11 a.m.]

Fourth Day—Monday, 31st July, 1899. Court resumed at 11:30 a.m.

John Kennedy Walker, recalled:—*By Mr. Webb*: About the year 1898 I had repeated conversations with you (Webb), and was informed that Mr. Webb's children were being employed at the post-office, and were being paid for that service; that was long before the Improvement Committee took up the matter; it was quite a public thing in Minmi that Mr. Webb was receiving payment for the services of his boy at the post-office.

Mr. Payten: You said "children" before, and now you say "boy"; which is it you mean? You should be more careful.

Witness: I mean the boy.

By Mr. Webb: Mr. Webb never told me that he was doing it on the sly.

David Dyet, being duly sworn, saith as follows:—I am a bootmaker residing at Minmi; in the year 1898 I had repeated conversations with Mr. Webb when his children were employed at the post office; he informed me he was getting paid 15s. a week for their services; he never made any secret about it at all; he did not appear to be afraid of its being known; I myself told Mr. Fisher; he did not ask me not to tell anyone; I heard the fact from other persons besides Mr. Webb.

By Mr. Reid: I have not been in the habit of discussing private matters with Mr. Webb; I was at the post office when he spoke to me about his children; he told me about eighteen months ago, and he was not charged with anything then; he also told me at my shop; he must have told me the same thing about three or four times; I have a clear recollection about the matter; Mr. Webb never gave me any racing tips.

Albert Fisher, being duly sworn, saith as follows:—I am a hairdresser residing at Minmi; I remember Mr. Webb telling me in 1898 that his children were doing messenger work at the post office, and he was getting paid for it; I was never asked to keep that fact quiet; I never heard it from others; I am quite certain Mr. Webb never asked me to keep it quiet; Mr. Webb did not seem afraid of my telling others.

By Mr. Reid: This conversation took place about June or early last year; I was not warming myself at the post office fire at the time; the expression of Mr. Webb's face did not alter when he was telling me about his children; it was at my shop the conversation took place, and in the day-time; he did not tell me to keep it secret; I might have told others; Mr. Webb has not seen me recently; I did not know what I was going to say when I came here; Mr. Webb told me that I would be subpoenaed to tell the truth; I do not spend a good deal of my time with Mr. Webb; it is not a common thing for me to spend hours of my time at the post office lounging about; I have never heard that people have complained of my being too much at the office; I am a friend of Mr. Webb's, but I do not go to his house very often; I chat with him on business at the post office.

George

George Parfitt Webb, recalled:—In addition to letter of 29th January, 1898, about the first week in March, 1898, I sent also a letter to the Deputy Postmaster-General asking for an assistant to be sent me, and in which I believe I again referred to the fact that my children had done work at the post office; an assistant named Stewerald was then sent up, and commenced work at Minmi on 12th March, 1898; Stewerald then returned to Dungog, and Reen came on duty again; in June, 1898, Reen was again taken ill; I again sent a letter to the Deputy Postmaster-General, in which I told him I was trying to manage with my son, so as to save the expense of a relieving assistant, which would be a saving of 45s. a week; again, in July, 1898, I sent to the Deputy Postmaster-General, in which I again referred to my son and family doing the work; E. Bridekirk, of East Maitland, was then sent, and commenced duty in August, 1898; I swear that in the latter part of 1898 I had no conversation with Ayerst or A. E. Williams, of Minmi, in which I begged them not to say anything over the matter of my getting payment for my children's services at the post office; I also swear that I told different persons in Minmi repeatedly that I was getting money for my son, and that the postal authorities knew of it; I made that fact a public matter; the original telegrams will show that.

Edward James Young, being duly sworn, saith as follows:—I am an Inspector in the Post and Telegraph Department; on the 5th December, 1898, I sent a wire to Mr. Ayerst, Secretary of the Minmi Improvement Committee; the document shown me [*Exhibit "I"*] is that wire; it would be on the 8th December that I was at Minmi; I came in my official capacity; Mr. Webb was present, and, so far as I can remember, Mr. Ayerst complained that the wire I had sent had been delayed; he also said that his instructions to Mr. Webb were for all telegrams to be sent to Smith's, a hotel-keeper, or a storekeeper; Mr. Ayerst then wanted to know what delayed the telegram, and Mr. Webb replied, "We were very busy in the office, and I sent it up later on," or words to that effect; I then asked him what time, and he said, "About tea-time"; I do not know whether anyone asked him to define tea-time or not; I may explain that this matter was really not a part of the inquiry that had brought me to Minmi, as it was really a side issue; it would apparently interest Mr. Ayerst and Mr. Renfrew more than it did me, for at the time I did not feel any direct interest in it; Mr. Webb admitted to me that he had received verbal instructions from Mr. Ayerst that all his wires were to be left at Smith's; Mr. Ayerst may have mentioned something about 2s. portorage on some other wire, but, really, as I paid very little attention to it at the time, I cannot remember it very well; it was simply referred to in a casual way; I do not know whether Webb said himself that he had taken the wire out to Smith's, but there was something said about a wire being taken out to Smith's, and unless 2s. was got it would not be taken out to Mr. Ayerst.

By Mr. Webb: I am quite sure that Mr. Ayerst said he had given instructions for all his wires to be delivered to Smith's; I do not remember on the 24th January last coming into the office at Minmi again, after I had left Messrs. Ayerst and Renfrew; I cannot remember that particular case; I do not recollect Mr. Webb having asked me to take any statement on that occasion; I do not recollect saying anything in reply to you (Webb); if postmasters take verbal instructions, it is a dereliction of duty; I have never refused to take any statement from you (Webb); I have never spoken to Assistant Grierson about any telegram, to my knowledge; the verbal statement made by Mr. Renfrew was in your presence; complaints are generally taken down in writing, and signed by the persons making them; but these particular ones were not official complaints; they were side issues; I do not know what time the mails leave at nights; I know nothing about Woodcock's message, or any reply that young Smith might have made to you; with reference to my telegram to Ayerst, you said it was about tea-time; I do not know whether you said you went or you sent.

By Mr. Reid: I know that at the particular time I was at the post office Mr. Ayerst was very much annoyed.

Alfred Ernest Ayerst, recalled:—I see letter produced, dated 10th December, 1898, written by myself to the Deputy Postmaster-General, with reference to Mr. Webb delaying the telegram that was sent to me by Mr. Young, Postal Inspector (*Exhibit "P"*); I had that letter sent by registered post, and I produce the receipt (*Exhibit "Q"*); the facts of the case were fresh in my mind when I wrote the letter.

By Mr. Webb: I do not know why you (Webb) went to Mrs. Smith on the 23rd September, and told her you had a message for me, and that you then did or did not bring it out to me; it is quite impossible for me to say what you would or would not do; I know nothing at all about the inner working of the post office; if I had control of the post office, I might be able to tell you; I did not call any public meeting in 1898 in an irregular way, in order to have it packed with my friends; I called the meeting as directed by the committee; I did not neglect to call the meeting in a proper manner, in order to suit my own ends in any way.

George Parfitt Webb, recalled:—On 7th or 8th December, 1898, I said in the presence of Mr. Postal Inspector Young that I had sent to Smith's about tea-time, my tea-time being 7 p.m.; I sent letter-carrier Humphreys to Smith's at about 7.15 p.m., as he was passing with a telegram to deliver; he returned to office with a reply from Mrs. Smith, and remained on duty until 8.15 p.m.

By Mr. Payten: I cannot remember taking a single message to Mrs. Smith; if I have said on page 36 of my evidence that I went out to Mrs. Smith with a message, that will be correct; I did say that in my evidence; I went there to see if Mrs. Smith would have a message from Dalrymple Wood to Ayerst sent out, and received the reply that I need not bring any more messages out—that the boys were in work, and she could not now send them out to Ayerst; I was at Mrs. Smith's on the 3rd September, 1898, with Dalrymple Wood's message to Ayerst, to see if it could not be sent out; I had previously sent Letter-carrier Humphreys there, and went myself to see if his reply was correct; I cannot remember being there on any other occasion; it was not the practice to send messages out there before the boys went to work; Mrs. Smith had taken other messages, but not all by a long way, or even a sixth part of them; if I received a telegram for Ayerst, I just tried to see Mrs. Smith to see if she would take it out; I would do that for anyone; I refer to Dalrymple Wood's message on page 36 of my evidence.

By Mr. Reid: I deny that ever Mr. Ayerst gave me instructions to take messages to Mrs. Smith for him; I simply did it to oblige him; I heard Mr. Young say that Mr. Ayerst had given me instructions, but

but Mr. Young is mistaken; I simply say that I have sent some there, but he never gave me instructions to do so; I never informed Mr. Young that I had received verbal instructions to deliver wires for Ayerst to Mrs. Smith; I sent them to Mrs. Smith, because I knew that Ayerst would call there, knowing he was a personal friend of hers; but not because he gave me instructions to do so.

[Inquiry at this stage was adjourned until 2:30 p.m.]

George Parfitt Webb, recalled:—I see message-book for 1896 produced (*Exhibit R*); there is an entry of a telegram for Ayerst on the 27th August in my hand-writing; that telegram appears to have been called for at the office; the entry was made on the same day, or perhaps the next; on the 5th December, 1896, a telegram was delivered to Ayerst at the office; the entry in the book is in my hand-writing, and it was made on that day or the one following; the list I have put in about telegrams having been delivered to Ayerst was made up from the books; I will swear, to the best of my belief, that they were not delivered to Mrs. Smith; when telegrams are not booked up at the time, I place them in the message-book the next day, so as to make the books agree with the list; I have never tampered with the books since the inquiry started; the reason these wires were not signed for at the office was because they might have been delivered with the letters when the mail was called for; the entries in the books are correct.

By Mr. Payten: The book might have been away at the time, and so no receipt could be obtained; I cannot point out any other case in which a message has been delivered at the office in this book, and no receipt has been taken for it; I cannot account for the omission of the time not being entered, as they might have been delivered on the previous day; a list of messages is taken on a slip of paper when they are first issued, for the purpose of putting them in the message-book afterwards; if I was sending a message out I would put the time in, but if the wires were placed in the letter-box to be called for, that would not appear; if telegrams are delivered with letters they would not be signed for; if the book was out I could not possibly get a receipt for the wires; there was only one book in use at the office; I had other books, but they were in blank; in all messages I delivered I did not take the book with me, for the reason that then all other messages would have to be detained until my return; I do not know that it would be a disobedience of some Regulation not to get a signature under the circumstances.

Elizabeth Smith, recalled:—*By Mr. Reid*: I did not at any time tell Mr. Webb that it was of no use his leaving any more messages at my place for Mr. Ayerst, as my boys were all in work, and could not take them out; I never told Letter-carrier Humphreys anything of the kind either; I will swear to that.

By Mr. Payten: I was always only too ready and willing to have wires sent out to Mr. Ayerst at any time; we were always only too glad to oblige him.

By Mr. Reid: I do not remember the date on which Mrs. Bain died, but I remember someone handing me a telegram coming from Mr. Ayerst about Mrs. Bain's death; Reen delivered it; when he brought it I asked him if she was gone, and he said, "Yes, she's gone at last"; I cannot say what year that was in, but I think it is more than two years ago; that particular wire had reference to the death of Mr. Ayerst's mother (Mrs. Bain); I sent that wire out to Mr. Ayerst straight away by my son George.

By Mr. Webb: I cannot say what business took you to my shop on 23rd September; I never refused in my life to send a wire out to Mr. Ayerst; I remember you saying you had a wire for Mr. Ayerst, and I asked you if it was important, and when you replied that it was important I said, "I will send my son out with it at once"; you then said you would take it out yourself, as there was 3s. 6d. attached to it; I then said that if that was the case you had better get it for yourself; you then went away with the message yourself; I never refused to have it sent out; I do not know what necessity there was for you to come to my shop with the message if you wished to take it out to Mr. Ayerst yourself; all I know is that you did call, and then you took the wire out yourself; I should be very sorry to think that you called to see me.

Alfred Ernest Ayerst, recalled:—My mother (Mrs. Bain) died on the 27th August, 1896, and I received a telegram announcing her death on that day; the telegram was brought to me by George Smith; I certainly did not go into the Minmi post office on that day, because I was busily engaged getting a consignment of peas for Maitland, both me and my step-brother, and we had not time to be away, so that that wire was not called for at the post office; I remember the day on which the Ford-Tressider boat race was pulled; I believe it was on the 5th December, 1896; I got a wire on that day announcing the result from James Ayerst, my brother, from Raymond Terrace; this wire was delivered to me by Mrs. Smith herself; I received no other telegram on that day.

By Mr. Payten: I have seen the two entries in the message book produced (*Exhibit R*), and as far as I am concerned those entries are incorrect; in connection with Dalrymple Wood's wire, when it was handed to me by Mr. Webb he demanded 3s. 6d. portorage, and I remember telling him in a jocular way "to go and bag his head," as he could collect it at the other end, as the wire was on Government business; the only money I gave Webb was a shilling or so, to pay for the return wire.

By Mr. Webb: I cannot explain anything about your actions when you came to my place.

By Mr. Payten: He did not at any time tell me that the portorage was paid at the other end; all his conversation fairly led me to believe that he intended to collect payment from me for the portorage; I never said to Webb that as Mrs. Smith's boys were all working it would be no use leaving any more telegrams there for me; I never rescinded my previous instructions, either by word or deed, that all my telegrams were to be left at Smith's; when I have been in Minmi and expecting a wire, I have called at the post office and asked that it should be kept for me when it came; I remember on one occasion when a certain gold-mine lease in which I was interested was about to be cancelled, I said I was expecting a wire from Nundle about the matter, and would call at the office for it; but it was only on special occasions like this that I said I would call for my wires; there is no truth in the statement Mr. Webb made to the Postmaster-General in his (Webb's) letter of the 12th December last, reading: "I find that the reason Mr. Ayerst was almost friendless on Wednesday last (occasion of Mr. Young's visit), was that the business people, all living within a stone's throw of the office, would not come with him, and miners would not lose a day's pay in the pit"; the reason I did not see people was because I did not receive the wire intimating that Mr. Young was coming in time; it is not true that it was because I was friendless; I never asked a single soul to come who refused.

George

George Parfitt Webb, recalled :—On 23rd September, 1898, before starting for Ayerst's with Dalrymple Wood's message, I had sent to Sydney for the portorage, and had received a reply that it was to be charged "On Service"; I then went to Ayerst with the wire, and after I had delivered it he brought the sum of 5s. to me, and asked me what there was to pay for it; I said, "There is nothing to pay on it; it was paid for at the other end; it was paid before I started out."

By Mr. Reid: Mrs. Smith's statement that I told her there was 3s. 6d. to pay on it is incorrect, and Mr. Ayerst's statement about the 3s. 6d. is also false; it was after I had been at Mrs. Smith's that I wired for the portorage, and immediately on receipt of a reply from Sydney saying that it was "O.S.," I took it out to Ayerst.

By Mr. Payten: I received that 3s. 6d.; I took the money, as I had earned it on my own bicycle; that was during office hours.

Henry Bain, being duly sworn, saith as follows :—I am a miner, and I reside at Minmi; I remember the occasion on which Tressider and Ford pulled a boat race at Raymond Terrace; I remember a telegram being delivered at Smith's on that date; Billy Reen threw it off a 'bus to me, saying, "Here's a wire for you, Harry"; I tore the envelope open, and then saw it was for Mr. Ayerst; I then handed it to Mrs. Smith; I was in the shop when Mr. Ayerst came in and read that wire; it announced the result of the boat-race; Reen was on front of the 'bus going to Wallsend when he threw me the wire; that would be on the 5th December, 1898; I was at Mrs. Smith's when Humphreys called at about half-past 8; I was half-way between the counter and the door; he asked if Mr. Ayerst was in, when he was informed that Ayerst had been there, but had gone home; when asked what he wanted him for, he said he had a wire; he was then told that if it was important the boy would be sent out with it; Humphreys then said that he did not know whether it was important or not, and went away in the direction of his home.

Richard Smith, being duly sworn, saith as follows: I am a baker residing at Minmi; I am a son of Mrs. Smith, who has given evidence here; I remember Humphreys calling at my mother's place at about twenty minutes or half-past 8 on the night of 5th December, 1898; I remember the date, as that was the day on which my sister-in-law was confined; Humphreys came in and asked my mother if Mr. Ayerst was in, and he was told that he had gone home; he said, "There is a wire laying in the office for him"; my mother then asked if it was important, because if so she would send the boy out with it; Humphreys replied that he did not know whether it was important or not, and the office was closed; he then said "Good night," and went away.

William Reen, recalled :—I remember the Ford-Tressider boat race; I remember delivering a telegram to Bain for Mr. Ayerst; I was on a 'bus at the time, going to Wallsend, when I gave it to him; that telegram was not delivered at the office here; I remember Mrs. Bain dying, and I remember delivering a telegram about the matter to Smith's; as that telegram was delivered by myself to Mrs. Smith, it could not have been delivered at the office here.

George Smith, being duly sworn, saith as follows: I am a carpenter, residing at Minmi; the Mrs. Smith who has given evidence here is my mother; I remember a telegram coming about Mrs. Bain's death; my mother handed it to me, and said, "It is all up this time"; I at once saddled up my horse, and took it out to Ayerst's; I gave the wire to Mr. Ayerst myself, and I remember saying, "It's all up this time," before doing so.

Mr. Webb then asked that a number of original letters between himself and the Postal Department should be put in. These were obtained from Mr. Burnett and handed in. [*Exhibit S.*]

Mr. Reid intimated that if the Exhibit did not contain all the letters Mr. Webb wanted, he would raise no objection to others going in later on.

The inquiry was then adjourned *sine die*.

Names and addresses of witnesses subpoenaed to attend at Minmi, at request of Mr. Webb, to receive notice when their attendance is required :—

James Johnstone, Merewether, letter-carrier.
George A. Humphreys, Minmi, letter-carrier.
Walter T. Grierson, Minmi, acting postal assistant.
Robert Brownlee, Minmi, hawk and draper.
James Dill, Minmi, draper.
John Kennedy Walker, Minmi, grocer.
David Dyet, Minmi, bootmaker.
William Hogg, Minmi, baker and grocer.
Edward Trelford, Minmi, special constable.
Charles H. Thomas, Minmi, butcher.
Charles Gillispie, Wallsend, 'bus proprietor.
Robert Robertson, Minmi, hotelkeeper.
James Christopher Cosgrove, Minmi, school-teacher.
Albert Fisher, Minmi, hairdresser.
James Tennant, Minmi, grocer's assistant.

Alexander Dyet, Minmi, grocer's assistant.
Herbert O'Donnell, Minmi, school-teacher.
Robert Sneddon, Minmi, miner.
Daniel McDougall, Minmi, miner.
Theophilus Smith, Minmi, miner.
James Evans, Minmi, miner.
Telegraph Station-master, Hamilton.
William Reen, Plattsburg, "Imperial Hotel."
Telegraph Station-master, Newcastle.
Mrs. Ellen Williams, Minmi.
William Springbutt, Minmi.
W. Keahan, Wallsend, postmaster.
George W. Akhurst, Black Hill, Minmi, farmer.
Richard Richards, Minmi, hotelkeeper.

The undermentioned persons, whose names were sent in by Mr. Webb have not been subpoenaed :—

Alfred E. Ayerst, Cedar Hill, Minmi.
F. Brockwell, Copeland, postal assistant.
Secretary and doorkeeper, "Newcastle Tattersall's Club."

Names and addresses of witnesses subpoenaed to attend on 24th July, at request of Mr. A. E. Ayerst :—

George Humphreys, Minmi, letter-carrier.
Master G. A. Webb, Minmi, son of G. A. Webb.
William Reen, Plattsburg, postal assistant, Minmi (on sick-leave).
Edgar Grierson, Minmi, draper.
C. J. Cosgrove, Adamston, schoolmaster.
H. O'Donnell, Minmi, schoolmaster.
William Phillips, Minmi, c/o John Renfrew.
J. S. Young, Sydney, postal inspector.*

* See wire from Deputy Postmaster-General, re Mr. Young's attendance.

Production

Production of documents at request of Mr. Ayerst :—

The Auditor-General to produce—

1. Pay-vouchers for 1896–1897, to signature of G. Arthur, at 10s. per week.
2. Pay-vouchers for 1897–1898, to signature of A. Webb, at 15s. per week.
3. Pay-vouchers for 1898, to signature of G. A. Webb, at 15s. per week.

The Deputy Postmaster-General to produce—

1. Telegram sent to Ayerst by Mr. Postal-Inspector Young, on 5th December, 1898, also tape with such wire on at Minmi office.
2. Tape with wire on (Minmi office), from Woodcock to Ayerst, early in November, 1898.
3. Tape with wire on it 19th January, 1899, John Renfrew, of Minmi, to Sorby & Co., Newcastle.
4. Tape with wires on it 10th and 11th April, 1899, from traveller in Newcastle to E. Grierson, Minmi, and his reply which was delayed.
5. Document forwarded by Postal Department to Hon. J. N. Bruncker, 5th September, 1898, giving returns of the periods of leave to Assistant Reen, also dates and names of the temporary assistant employed during his absence, and rate of pay that they were employed at.
6. Letter written by G. P. Webb, in February, 1898, to Postal Department asking permission for messenger's duties to be performed by his own boy, also copy of reply forwarded to Mr. Webb by Postal Department.
7. Signature book from Minmi Post Office, showing delivery of telegrams.

The Stipendiary Magistrate, Newcastle, to The Under Secretary of Justice.

Sir,

Court-house, Newcastle, 9 August, 1899.

I have the honor to state, for your information, that, with the approval of the Minister of Justice, as contained in your B.C. communication of the 15th of June last, and in accordance with the formal delegation of the Public Service Board under the Public Service Act, dated the 18th of July last; I held an inquiry into the truth of certain charges against Mr. G. P. Webb, postmaster, at Minmi.

I forward herewith a report containing my opinion thereon for transmission to the Board, also the depositions and all the papers in connection with the inquiry.

I have, &c.,

C. N. PAYTEN,

Stipendiary Magistrate.

Forwarded to the Public Service Board.—G.M., 11/8/99.
Board, B.C.

The Secretary, Public Service

Gentlemen,

Newcastle, 9 August, 1899.

I have the honor to state, for your information, that, in accordance with the authority contained in the delegation dated the 18th day of July, 1899, of your powers to me to hold an inquiry under the 17th section of the Public Service Act of 1895, into certain charges against one G. P. Webb, postmaster at Minmi, I held the inquiry referred to at the Court-house, Minmi. I sat in open Court on the following days, viz., July 24th, 25th, 26th, and 31st.

I had received written applications from both Mr. Webb and Mr. Ayerst, who preferred the charges, to allow them to be represented by attorneys, and in reply I intimated that I saw no objection to the application. Mr. Ayerst took advantage of the offer, but Mr. Webb, notwithstanding his application, at the last moment failed to do so, and also objected to the representation of Mr. Ayerst by attorney. I disallowed his objection, and Mr. W. Reid, solicitor, appeared on behalf of Mr. Ayerst.

Mr. Alexander Burnett, an inspector from the Post and Telegraph Office, Sydney, watched the case on behalf of the Post and Telegraph Department.

Mr. Charles Hibble, of Newcastle, took the evidence in shorthand, and transcribed his notes with the typewriter. His work was done in a most expeditious and complete manner, and to my entire satisfaction.

There were six charges formulated. The fourth was withdrawn at the opening of the inquiry, and the fifth was abandoned later on, because, as was stated by the attorney acting for those bringing the charge, the witnesses had been "got at."

I carefully and fully inquired into the four other charges, and I forward herewith my report as to my opinion thereon.

I also forward the depositions, exhibits, and all other documents in connection with the matter.

I have, &c.,

C. N. PAYTEN,

Stipendiary Magistrate.

Court-house, Newcastle, 8 August, 1899.

REPORT on charges by the Minmi Improvement Committee against the local postmaster (Mr. Webb)
Inquiry held at Minmi on 24th, 25th, 26th, and 31st July, 1899.

The charges preferred were as follows :—

1. That you did wilfully and knowingly, in the years 1896–1897, send to the head of your Department, vouchers for the payment of sums of money, amounting to 10s. per week, in the name and to the signature of "G. Arthur," whereas a boy of that name was not at any time employed in the office.
2. That during the years 1897 and 1898 you sent in vouchers in the name of "A. Webb," for sums of 15s. per week, whereas a boy of that name was not at any time employed in the office.
3. That in December, 1898, you delayed the delivery of a telegram sent by Mr. Young, Postal Inspector, to A. F. Ayerst, of Cedar Hill, Minmi.
4. That you delayed the despatch of a telegram on the 19th January, 1899, from Mr. John Renfrew, of Minmi, to C. E. Sorby & Co., of Newcastle.
5. That, on the 10th April, 1899, a telegram was handed at Mr. Grierson's store, by Mr. Grierson, draper of Minmi, to Mr. Grierson, assistant postmaster, to be despatched, and that such telegram was overlooked until 5 p.m. the next day twenty-seven hours afterwards.

6. That about the month of November, 1898, you gave an untrue explanation with regard to a charge of 2s. on a telegram to Mr. Ayerst.

Mr. Webb pleaded "not guilty" to each charge.

Charge 1.—That you did wilfully and knowingly, in the years 1896–1897, send to the head of your Department, vouchers for the payment of sums of money amounting to 10s. per week, in the name and to the signature of G. Arthur, whereas a boy of that name was not at any time employed in the office.

This charge, when amplified by evidence, was that Mr. Webb had forwarded vouchers for services rendered by one George Arthur as messenger at the Minmi post office during the absence of Mr. W. Reen, in 1897, and had certified the same as correct in every particular, whereas no boy of the name of George Arthur was at any time employed in the office.

The evidence did not support the formal charge in respect of the year 1896, no evidence whatever being adduced to show that any vouchers were sent in in the name of George Arthur for that year.

Vouchers were produced showing that George Arthur claimed 10s. for services as messenger from the 9th to the 15th April, 1897, and £2 5s. from 20th October to 9th November, 1897, and 15s. from the 10th to 16th November, 1897. It will be noticed that the last two vouchers were for a continuous service, and I do not know the reason of separate vouchers having been forwarded.

Mr. Webb admitted that the vouchers were correct, and that he had so certified; and that the boy signing as George Arthur was his son, George Arthur Humphrey Webb. He explains the forwarding of the vouchers with a fictitious name by stating that "vouchers (referring to other vouchers sent in subsequently) were now becoming of sufficient importance in amount to make it worth while stopping the other matters, and now having it corrected. The other vouchers were very trivial, and so they were not corrected."

He also admitted that his son was very young (10 or 11 years), and attending school; but sought to show that he could have been credited with attendances at school, and the boy still have done the duties for which he was paid; but no evidence was given in support of this possibility. During the periods (9th to 15th April, 1897, and 20th October to 16th November, 1897) covered by these vouchers there were twenty-six school-days, out of which the boy attended school on ten days only. (*Vide* evidence given by Mr. James C. Cosgrove, schoolmaster, at page 25).

Conclusion.—It appears to be a very simple matter to come to a conclusion on the charge as laid, viz., as to whether Mr. Webb wilfully and knowingly sent vouchers for payment in the name and to the signature of G. Arthur, well knowing that a boy of that name was not employed in the Minmi post office.

The truth of the charge was practically admitted; but Mr. Webb sought to excuse himself by submitting that the employment of a boy was authorised; and if the work was done, and the person who received the money was entitled to it, what did it matter if that person was his son?

It appears to me that the postmaster, when he got the authority of employing a messenger instead of Reen, saw an opportunity of putting money in his own pocket. There was very little to do for the liberal amount paid, viz., 10s., and subsequently 15s. per week, in delivering on an average four messages a day within a small area. The postmaster saw that he could get the messages delivered by members of his own family, but was met with these difficulties:—First, that the Postal Department would not authorise the employment of his daughters, who were competent for the duties, and (second) that his son was too young, and to keep him away from school (he being under the age of 14 years) would possibly submit him to being fined for not sending his boy to school for the required number of days under the Public Instruction Act. He, therefore, resorted to the very questionable expedient of sending in the vouchers in a fictitious name.

Charge 2.—That during the years 1897 and 1898 you sent in vouchers in the name of A. Webb for sums of 15s. per week, whereas a boy of that name was not at any time employed in the office.

The evidence submitted in support of this charge was almost similar in respect of the first charge. Mr. Webb admitted that he sent in the following vouchers as correct:—

	£	s.	d.	£	s.	d.
1. 17th, 18th, and 20th January, 1897	0	7	6			
29th January, 1897, to 5th February	0	17	6			
				1	5	0
2. 10th February to 9th March, 1898, 4 weeks, at 15s.				3	0	0
3. 10th March to 12th March, 1898				0	7	6
4. 13th June to 19th July, 1898, 5 weeks, at 15s.				3	15	0
5. 20th July to 5th August, 1898, 2½ weeks, at 15s.				1	17	6
6. 10th November, to 30th November, 1898, 3 weeks, at 20s.				3	0	0
7. 1st December, to 7th December, 1898, 1 week, at 20s.				1	0	0
8. 8th December to 13th December, 1898, 5 days, at £1 per week				0	16	8

Voucher referred to as "4" was sent in to the signature of George Arthur Webb; it was also admitted that the claimant was his son, George Arthur Humphrey Webb, aged 10 or 11 years.

Conclusion.—The charge, as formally preferred, I consider, has not been proved. The vouchers were signed "Arthur Webb," and that is the name by which the boy was usually known; but the evidence also disclosed these facts: that the boy, during much of the time when he was supposed to be engaged by the Government in performing the duties of temporary messenger, was in attendance as a scholar at the Public School, Minmi.

The work of delivering the messages, no doubt, was performed; but if Mr. Webb was unable to carry on the office during Reen's absence—which I very much question—without extra assistance, he could, I am quite certain, have easily obtained assistance outside his own family, without being guilty of practices of such a suspicious character.

In both these charges Mr. Webb—both by innuendo and letters—sought to cast doubt upon the evidence of the witnesses from the Minmi school, by ascribing to them corruption in altering the school rolls so as to make it appear that his son, Arthur Webb, was present when he was actually absent from school. There was not the slightest ground, as far as I could see, for such aspersions, and I consider his conduct in this respect most unwarrantable and reprehensible.

Charge

Charge 3.—That in December, 1898, you delayed the delivery of a telegram sent by Mr. Young, Postal Inspector, to A. E. Ayerst, of Cedar Hill, Minmi.

From the evidence it appeared that on the 5th December last Mr. Young, the Postal Inspector, sent a telegram to Mr. A. E. Ayerst, of Cedar Hill, Minmi, requesting him to arrange for the attendance of those who were complaining of certain matters affecting the local post office, on Wednesday morning, at half-past 10 o'clock. The wire was received by Mr. Webb at 4 p.m. on Monday, and Mr. Ayerst did not obtain it until after 7 o'clock next evening—too late to make proper arrangements for those complaining to meet the Inspector. The complaint was against Mr. Webb.

Mr. Ayerst, it appears, lives about $2\frac{1}{4}$ miles out of Minmi, and on account of some difference he had had with Mr. Webb about excessive charging for portorage, he states that he had arranged with Mr. Webb that all telegrams for him (Ayerst) should be left at Mrs. Smith's, a storekeeper in the town, who would send one of her boys out with the messages, and that this practice had been followed for about five or six years past; but from spite, engendered from the fact of Mr. Ayerst reporting him, he (Webb) had wilfully delayed the delivery of this telegram.

There can be no possible doubt that the practice had prevailed of Mr. Ayerst's telegrams being left at Mrs. Smith's for delivery by her boys; but Mr. Webb's defence to this charge was that this had been countermanded by Mrs. Smith, who had said that it was no use leaving any more wires at her place for Ayerst, as her boys were all in work, and could not take them out; also, that he had sent Humphreys, the letter-carrier, to Smith's at 7.20 p.m. on the 5th, to inform them that an important wire was at the office for Mr. Ayerst. Mrs. Smith stated she remembered Humphreys calling and informing her of the wire, when she told him that if it was important she would send one of her boys out with it. He informed her the office was then closed.

Conclusion.—Mr. Webb's defence and statements with regard to this charge are unsupported, and entirely opposed to those submitted in proof of it. Even his account of the interview between himself and Mr. Young, the inspector, is contradicted in most material particulars by Mr. Young and the other witnesses who were present, and I am forced to the conclusion that Mr. Webb is not the witness of truth; whilst, on the other hand, the statements of Mr. Ayerst, who preferred the charge, are corroborated in a very material manner by witnesses who are entitled to every degree of credit.

Charge 4.—That you delayed the dispatch of a telegram on the 19th January, 1899, from Mr. John Renfrew, of Minmi, to C. E. Sorby & Co., of Newcastle.

This charge was withdrawn at the inception of the inquiry by Mr. Reid, acting for Mr. Ayerst, the Secretary of the Minmi Improvement Committee, who made the charge.

Mr. Webb desired to submit certain evidence in respect of this charge, and I did not prevent him, but I think it is mere surplusage.

Charge 5.—That on the 10th April, 1899, a telegram was handed at Mr. Grierson's store by Mr. Grierson, draper, of Minmi, to Mr. Grierson, assistant postmaster, to be despatched, and that such telegram was overlooked until 5 p.m. next day, twenty-seven hours afterwards.

This charge, also, was practically abandoned; the only witnesses examined in respect of it being those put forward by Mr. Webb, who knew that the other side did not wish to press the matter, but he still persisted in examining the witnesses.

Charge 6.—That about the month of November, 1898, you gave an untrue explanation with regard to a charge of 2s. on a telegram to Mr. Ayerst.

This charge is that a telegram had arrived at the Minmi post office from Mr. Woodcock for Mr. Ayerst, of Cedar Hill, near Minmi. Mr. Ayerst stated that the wire was taken to Mrs. Smith's by Humphreys, the letter-carrier, and that one of the Smith's boys brought it out to him (Ayerst), and the boy took back a reply wire to the post office, and that when there Mr. Webb told the boy he was collecting 2s. for him for taking the wire out to Mr. Ayerst. When Mr. Young came to Minmi, Mr. Ayerst asked Mr. Webb for an explanation as to the difference (1s. 6d.) between the cost of portorage for the delivery of this wire (Woodcock to Ayerst) and the cost of a former wire (3s. 6d.), and that Mr. Webb had replied, "I took the wire to Smith's myself, and the boy refused to take it out to Ayerst unless he got 2s. for doing so."

Mr. Webb denies most emphatically that he ever made such a statement in the presence of Mr. Young.

That he told an untruth in making the explanation is the charge preferred.

Mr. John Renfrew, who was present at the interview between Mr. Young and Mr. Ayerst and Mr. Webb, corroborates the account given by Mr. Ayerst as to what transpired on that occasion.

The boy, John Smith, stated he remembered taking the wire out, and never refused to deliver that telegram; but that when he went to the post office with the reply, Mr. Webb told him there was 2s. attached to the job, and he would wire away for it, and to come in a week's time and he would give him the money, and that he called back some days after and got it.

Mr. Young does not throw much light upon this matter, except that Mr. Ayerst made a complaint *re* the portorage charged.

Conclusion.—In giving my opinion on this matter, all I have to guide me is the credibility of the witnesses on either side.

Mr. Ayerst and Mr. Renfrew swear most positively to the conversation, and are corroborated to a certain extent by the boy Smith, and, in a lesser degree, by the evidence of Mr. Young.

Both Mr. Ayerst and Mr. Renfrew were examined and cross-examined on several occasions throughout the inquiry, and their evidence was not shaken in any degree. I saw no reason whatever to doubt the truth of any statement that either of them made. Mr. Webb also gave evidence at great length, and on several occasions during the holding of the Inquiry his evidence is, in my opinion, on very many matters inconsistent, improbable, and contradictory. On different things he is flatly contradicted by most respectable residents of Minmi, who, in my opinion, are worthy of credence. Different books, also, which were produced contained entries made by Mr. Webb, and which he submitted in support of his case. These entries have, in my opinion, been corruptly made by Mr. Webb since the opening of the Inquiry, or the lodgment of the complaints, in order, I believe, to bolster up part of his case. For these reasons I do not consider him to have made a truthful statement in explanation to Mr. Young.

The Chairman Public Service Board.

C. N. PAYTEN,

Stipendiary Magistrate, Newcastle.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MR. ARTHUR H. MOODIE, TELEGRAPH OPERATOR.
(MINUTE OF THE POSTMASTER-GENERAL, RESPECTING LEAVE OF ABSENCE GRANTED TO.)

Printed under No. 10 Report from Printing Committee, 30 August, 1900.

Minute for Executive Council.

Postal and Electric Telegraph Department,

General Post Office, Sydney, 30 November, 1899.

I HAVE to report that Mr. Arthur H. Moodie, Telegraph Operator, Head Office, after being absent from duty on sick leave from the 16th August to the 18th September last, was obliged to cease work again on the 25th September, since which date he has been unable to resume duty, and he has now submitted an application to be granted three months' leave of absence, on full pay. Dr. W. Odillo Maher certified under date of the 23rd September, that Mr. Moodie was suffering from a grave affection of the eyes, and in a further certificate, dated the 28th idem, Dr. Maher stated as follows:—

“Mr. A. Moodie is suffering from an affection of his optic nerves, and is unable to resume his duties. I have advised him to apply for three months' leave, as I do not think his sight will recover sufficiently for him to resume work before.”

In the foregoing circumstances, and as Mr. Moodie has already exhausted the full period of sick leave allowed on full pay under Article 40 of the Public Service Regulations, and in virtue of his fifteen years' service, which has been satisfactory, the Public Service Board recommend that leave of absence, on account of ill-health, for a period of three months, on full pay, be granted to the officer referred to, in accordance with the provisions of the Regulation regarding “sick leave in exceptional cases,” published in the Supplement to the *Government Gazette* of the 24th ultimo, which provides that the reason for granting the leave, and the Minister's Minute in relation thereto, shall be laid before Parliament as soon as practicable, and I accordingly request authority to give effect to such recommendation.

W. P. CRICK.

REGISTRAR OF THE DISTRICT COURT.

(REPORT OF, RESPECTING CERTAIN CHARGES MADE BY MR. B. B. O'CONOR, M.P.)

*Printed under No. 16 Report from Printing Committee, 15 November, 1900.**[Laid upon the Table in accordance with promise made in answer to Question No. 18, Votes, &c., No. 70, Thursday, 8 November, 1900.]*

REPORT of Registrar of the District Court, Sydney, respecting certain statements made by Mr. B. B. O'Connor, M.P., in the Legislative Assembly, on 17th October, 1900, *re* purchase of copies of *Government Gazette* containing District Court Rules.

District Court Office, Sydney, 29 October, 1900.

THE statement made by Mr. B. B. O'Connor that I have bought up all the copies of the *Government Gazette* containing the District Court Rules is absolutely false. I have not, nor has anyone either directly or indirectly on my behalf or interest, bought a single copy of the *Gazette* in question.

It is, perhaps, unnecessary for me to remind the Under Secretary that the sale of a large number of copies of the District Court Rules will not in any way benefit me pecuniarily, and therefore it would not be to my interest to attempt to establish a "corner" in them.

Although the charge levelled at me is ridiculously absurd on the face of it, still, as it has been made in such a conspicuous manner, and if uncontradicted may possibly be believed by some of the public, I would ask that my denial may be given the same publicity.

J. M. A. BONTHORNE,

Registrar.

The Under Secretary of Justice, B.C.

Question 3.

All fines imposed were paid to the credit of the Consolidated Revenue.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

POLICE DEPARTMENT.

(REPORT FOR THE YEAR 1899.)

Printed under No. 2 Report from Printing Committee, 28 June, 1900.

The Inspector-General of Police to The Principal Under Secretary.

Sir, Police Department, Inspector-General's Office, Sydney, 16 January, 1900.

In compliance with instructions, and as required by the Police Regulations, I have the honor to submit, for the Chief Secretary's information, the following Report of the operations during the year 1899 of the Department under my control, accompanied by a statement, as usually furnished, of the strength and distribution of the establishment on the 31st December, and certain other figures and information.

During the year new stations have been established at the undermentioned places:—

Metropolitan District	Narrabeen, or Mona Vale.
Northern District	Boggy Camp.
Southern District	Yarrangobilly (temporarily).
North-eastern District	{ Cockle Creek. Ellenborough. Nabiac.
Western District	{ Bogan Gate. Henty.
Murray District	{ Reno (Prince of Wales Gold- Mine, near Gundagai).

The Station has been re-established at Collie.

Police Camps have also been formed at the Harden-Murrumburrah Railway Deviation Works, and the Demondrille Main Camp, in the Southern District, and at the Blayne Deviation Railway Works.

Provision has been voted on the Estimates for an increase in the Police Establishment to the following extent:—

Sergeants, 1st Class	3
Do 2nd do	5
Senior Constables	14
Constables, 1st Class	25
Do Ordinary	49
Do Probationary	20

116

Less, say, 64 of all ranks. Provided for in the previous year by a Special Vote of £7,000.

Net increase ... 52

This increase, however, will not make up for the loss of effective strength by the general leave—three weeks annually—granted to the police of all ranks by the authority of the Government.

The strength of the Force in the Metropolitan District has been increased to a small extent. Additional police have also been sent to Lismore, in the Northern District; Dapto, in the Eastern District; Millthorpe and Lithgow, in the Western District; Newcastle, in the North-eastern District; Wee Waa, in the North-western District; Broken Hill, Broken Hill Railway Town, and White Cliffs, in the South-western District; and Brewarrina, in the Bourke District.

To provide for the increase shown, and to fill vacancies occasioned as under, 150 appointments (foot and mounted) have been made during the year.

Resignations	39
Discharges	22
Dismissals	5
Superannuations	6
Deaths	11

*10—A

[700 copies—Approximate Cost of Printing (S.L.) (labour and material), £6 19s. 8d.]

Police

Police Reward and Superannuation Fund.

The total amount paid for pensions and gratuities for the year was £26,477. The income being insufficient to meet the claims, the balance was paid from the Consolidated Revenue, a sum of £10,000 being voted for the purpose for the current financial year.

During the year 12 police pensioners died who were in receipt of pensions amounting to £2,080 per annum, and with deaths occurring in the previous year the total decrease amounted to nearly £3,500 per annum.

In obedience to the instructions from the Government, no pensions have been approved or recommended during the past year; but it has been necessary, with the Chief Secretary's authority, to retire 6 members of the Police Force, continuing their full pay in lieu of pensions at similar rates, they being medically certified as unfit for further service. This is a heavy charge upon the Pay Vote, amounting to £1,177 5s. per annum for officers practically superannuated. As there are still a good many members of the Force, who from age and other causes, are scarcely fit to continue in the active performance of their police duties, I trust that the funds will be placed upon a settled basis at an early date.

Eight members of the Force were discharged with gratuities amounting to £1,197, and 11 widows of members of the Force were awarded gratuities from the Police Reward Fund amounting in all to £2,436, and two pensions were granted—one at £68 per annum, for ten years, for the widow of a constable; and the other at £40 per annum, for five years, towards the maintenance of the children of a sergeant of police, deceased.

The advance figures, taken as usual from the station watch-house records in the Metropolitan District, show an increase of 1,051 apprehensions within the district as compared with the previous year:—

Total number of arrests, 1898	20,959
Do do 1899	22,010

There was an increase of 789 in the apprehensions for drunkenness, simple or accompanied by disorderly conduct over the previous year, but a slight decrease in habitual drunkenness. An increase of 49 is recorded of prosecutions for breaches of the "Betting Houses Suppression Act," and a decrease of 9 in the number of arrests for desertion of wives and families. Throughout the Colony generally there has been an increase of 12 in the number of criminal assaults on women and girls. Burglaries and robberies from shops and dwellings also show an increase of 64 as compared with the year 1898. There have, however, been decreases in the number of murders, 6; arson, 18; infanticide, 2; and rape, 2.

The following statement exhibits particulars of the licensing business in the Metropolitan District for the year 1899:—

Applications.	Granted.	Refused.	Withdrawn.	No Parties.	Total.
For new publicans' licenses	1	1
For conditional licenses.....	3	11	8	22
For Colonial wine licenses	91	17	29	20	157
For spirit licenses	12	1	13
For billiard licenses	105	105
For packet licenses	21	21
For booth licenses	551	551
Music permits.....	718	4	5	727
Publicans' transfers	411	7	25	11	454
Colonial wine transfers.....	51	2	5	6	64
Spirit transfers	5	5
By landlord (sec. 40).....	4	1	2	7
Conditional licenses confirmed.....	4	4

There are 792 public house licenses now in actual existence in the Metropolis, as against 790 in 1898, an increase of 2; colonial wine licenses, 345, an increase of 37; spirit merchants' licenses, 112, an increase of 6; billiard licenses, 105, an increase of 16; packet licenses, 21, an increase of 11.

When the present licensing laws came into operation in 1882, there were 848 hotels for a population of 248,231, being one hotel for every 293 persons. At the present time there are 792 hotels for a population of 426,950, or one hotel for every 539 persons. The proportion of population to each hotel has nearly doubled in seventeen years.

There has been a slight decrease in the number of prosecutions for breaches of the Licensing Act during the year. The difficulties in enforcing the provisions of the Act, particularly as regards Sunday trading, appear to increase, and also the tendency to evade the law.

There were 1,208 inquests held during the year on the bodies of deceased persons, an increase of 11 as compared with the previous year. In 96 cases death was attributable either directly or indirectly to intemperance.

155 inquests were held on fires, a decrease of 7 on the year 1898. 51 were returned as "wilful," 69 as "accidental," and 35 not specified.

There have been 628 inquiries for missing friends during the year, 327 of which have resulted successfully. These figures include 90 cases reported from Great Britain and elsewhere beyond Australasia. There has been an increase of 74 in the total number of cases reported as compared with the previous year.

The increased annual leave approved under the new regulations have caused a diminution in the number of men available for duty, in the Metropolis especially; great difficulty has been experienced in providing police for the necessary and increasing duties, regulating street traffic, &c.

From the last reports received, the following particulars have been extracted as regards the proportion of police to population in the following cities:—

Liverpool—	one constable to 411 of the population.
Manchester—	" 490 "
Sydney—	" 590 "

The work performed by the police for other Departments of the Public Service is still increasing. There were 445 communications received from the Board of Health in connection with the "Dairies Supervision Act," "The Noxious Trades and Cattle Slaughtering Act," and the "Diseased Animals and Meat Act."

Proceedings have been taken by the Police on behalf of the Public Instruction Department in 1,335 cases under the compulsory clauses of the Education Act, for neglect to send children to school, and recovery of fees, &c.

Inquiries have also been conducted in 1,055 cases for the Master-in-Lunacy, 2,371 for the State Children's Relief Department and Government Asylums, 1,185 for the Department of Mines and Agriculture, 227 for the Mercantile Explosives Department, 94 for the Fisheries Commission, 122 for the Government Labour Bureau, 923 for the Commissioners of Taxation (exclusive of a large number of inquiries in the country), 31 for the Government Statistician, 15 for the Pharmacy Board, and 57 for the Randwick Asylum. 1,526 inquiries have also been made for the Lands Department, and 409 notices served on behalf of the Land Board, making a total of 9,559 inquiries, &c., during the year.

In consequence of the Police being called upon to perform such multifarious duties, so much of their time is taken up thereby that the discharge of their more legitimate functions has, necessarily, been neglected, and complaints that Police Constables cannot be found when wanted, and that crime and disorder are not promptly dealt with, are not infrequent.

The Police launch "Nemesis," which has been in use by the Sydney Water Police for a number of years, has been replaced by a larger and more speedy vessel, and the former has now been transferred to Newcastle, where a Police launch was required.

In accordance with the Chief Secretary's instructions I have provided, for Military purposes in South Africa, 368 horses, chiefly from the Police stud, which I believe to be in every respect suited for the requirements. I have had no difficulty in replacing them at a moderate cost.

I append hereto a list of Police buildings completed; also a list of additions and repairs effected to Police buildings during the year. (See Appendices A and B.)

During the year Police classes have been formed from time to time, and instruction in ambulance work given by Dr. R. Vandeleur Kelly, President of the St. John's Ambulance Association.

The new Police Station at Darlinghurst is now nearing completion, and when completed arrangements will be made for the holding of a Court for dealing with lunacy cases in the building, which will no doubt be conducive to the welfare of the patients, who will be taken there direct to be dealt with, instead of being conveyed from the various watch-houses in the city and suburbs to the different Police Courts before being taken to their destination for treatment.

The following information regarding the number and ages of the members of the Police Force has been prepared, in order to enable the Chief Secretary to form an idea of the number of men who will be shortly retiring on pension.

STATEMENT of Ages of Members of the Police Force, 1899:—

Under 30.	30 to 35.	35 to 40.	40 to 45.	45 to 50.	50 to 55.	55 to 60.	Over 60.	Total.
542	447	387	325	142	73	60	40	2,016

Notwithstanding the higher standard adopted for recruits, physically and educationally, no difficulty has been experienced in making a satisfactory selection from the numerous candidates of eligible men to fill vacancies. An appointment in the Service is now highly valued, which is evidenced by the general good conduct of the Police, and the few cases of misconduct which it has been necessary to deal with by dismissal from the Service.

I have, &c.,

EDMUND FOSBERY,

Inspector-General of Police.

APPENDIX A.

LIST of Police Buildings completed during the year 1899.

Warroo ...	Erection of Police Station.	Mungund ...	Erection of Police Station.
Collie	" "	Boohgal	" "

Police Department,
Inspector-General's Office,
16th January, 1900.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CASES AGAINST CONSTABLES M^CDONALD
AND M^CGOVERN.

(PAPERS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 20 June, 1900.

Report forwarded to Inspector-General of Police by Mr. Rose on the 2nd January (?), to Inspector Read for report on the 5th January, and subsequently to the Crown Solicitor.

POLICE v. HARRISON—BREACH OF THE BETTING ACT.

9th December, 1899, date of the alleged offence at 245, Pitt-street, Sydney.

12th December, 1899, identification of Harrison by Constables McGovern and McDonald.

25th December, 1899, summons served on Harrison by Constable McGovern.

29th December, 1899, case tried before Mr. Smithers, P.M., at the Central Police Court, Sydney, and dismissed.

Constable McGovern, sworn, deposed that on the 9th December, 1899, he gave certain cash and instructions to Constable McDonald, who entered premises No. 245, Pitt-street, Sydney, from whence he in a few minutes returned, rejoined him (McGovern), made a report, and handed him (McGovern) the voucher produced, and which he now tendered as evidence. [*The voucher was then handed in and marked.*]

Constable McDonald, sworn, deposed that on the 9th December, 1899, acting under instructions from Constable McGovern, he visited No. 245, Pitt-street, Sydney, where he saw the defendant Harrison; after representing himself as Mr. J. Wall, Harrison made a wager with him, the wager being 30s. to 5s., Victory, Canterbury Park Races; he (McDonald) then initialled a book with the letters "J.C.W.," and producing a voucher, Harrison wrote across it a receipt for the 5s. wager, as follows:—"30s. to 5s., Victory, Canterbury Park Races, H. Oxenham"; the produced voucher is the one Harrison wrote on, and the writing is Harrison's.

At this stage of the evidence McDonald was instructed to write the words that were on the voucher. He did so; and it was asked if the name Oxenham was spelled in the same manner. A second piece of paper was handed McDonald, and he wrote "H. Oxenham," when it was pointed out that he had misspelled Oxenham, precisely as it was done on the voucher, the name being spelled incorrectly as follows:—"Oxhenham."

The Magistrate, addressing McDonald, said he had no hesitation in saying that he believed that he (McDonald) had penned the memo., notwithstanding that he (McDonald) had sworn Harrison had written it. "He was sorry that McDonald had commenced his police career so ignobly." Looking towards McGovern, the Magistrate continued: "Old police officers should show the young men an example, instead of which they incited them to these despicable conspiracies."

The case was dismissed.

On the 29th December, 1899, Mr. J. Wall wrote the attached letter, marked A.

On the 2nd January, 1899, Mr. J. Wall made the attached statutory declaration, marked —.

As the case for the prosecution broke down, evidence for the defence was not gone into; had it been, the following testimony was available:—McDonald did not make the wager he swore he did on the 9th December or at any other date; that Harrison did not write the receipt (voucher) produced; that whoever did sign H. Oxenham to the receipt held no authority to do so; that McDonald did not initial any book at any time at 245, Pitt-street; nor has anyone outside of members of the staff ever been permitted to write in the said books; that it was Wall who made the bet that McDonald claimed.

I submit the following as what appears to be the facts :—McDonald did not make the wager he swore he did ; Harrison did not write on the voucher as sworn by McDonald.

That on the declaration of Wall, and further proof he alleges he can give, McGovern could not have had the voucher in his possession between the 9th and 14th of December, 1899.

I attach newspaper report of the case, marked "B." The general correctness of this report can be substantiated on sworn declarations if required.

To H. Oxenham, Esq.,—

Sydney, 29 December, 1899.

Dear Sir,

Having learned that there is some Court case coming off to-day in connection with some wager taken in my name a few weeks ago, perhaps you may be under the impression that I was implicated in the matter, which I would not like you to think that I was of such a mean character. However, I will explain to you how the thing came about. I came to Sydney about a month ago to have a holiday, and took up my lodgings at 266, Elizabeth-street, in which place Constable McDonald also resided. I being a sporting man, we had a conversation over the coming races at Canterbury Park, and he wished to back a horse for the Flying Handicap, in which I preferred Victory. He informed me that he often backed horses at "Sportsman's," "Sterling's," and others, when I remarked that I always dealt with Oxenham, and found him to lay me longer prices than any others quoted. Of course you know that I done a deal of betting with you from Candelo. McDonald said that Oxenham would not bet with him. I produced some vouchers of yours, and I told him to mention my name, and also gave him some vouchers if he wished to take a wager, not thinking that he was only trying to get a wager to make a case out of it (which I have just learned). However, I trust you will exonerate me from all blame in the matter, and I sincerely hope that the case will not injure your business in any respect ; and trust in future that you will not hesitate about laying a wager with me, but mind you always get my signature before you do so. I thought I was only doing you a good turn advising McDonald to bet with you, for I was not under the opinion that he was such a "character."

Yours, &c.,

JOSEPH WALL.

266, Elizabeth-street.

IN THE COLONY OF NEW SOUTH WALES.

I, *Joseph Wall*, of 266, Elizabeth-street, Redfern, near Sydney, in the Colony of New South Wales, do hereby solemnly and sincerely declare as follows :—On the 9th day of December, 1899, I made the following wager with a clerk in the employ of H. Oxenham, at 245, Pitt-street, Sydney ; the name of the clerk, I believe, is C. Harrison ; the wager was 25s. to 5s., Victory, for the Flying Handicap, to be run at Canterbury Park on the 9th of December, 1899 ; I informed Constable McDonald, of Redfern Station, while in conversation, that I had taken the said wager ; on the 14th December, 1899, I gave Constable McDonald a voucher I had in my possession, and which I had previously received from H. Oxenham when I resided at Candelo ; the said voucher referred to some bets I had with H. Oxenham over the Melbourne Cup of 1899, and was dated, I believe, September 20th, 1899 ; Constable McDonald then wrote, with pencil, something on the voucher ; I believe it was "30s. to 5s., Victory, Canterbury Park Races" ; the reason why I gave Constable McDonald the voucher was to enable him to get a wager from H. Oxenham, as it served for an introduction ; did not give it to him to enable him to entrap H. Oxenham—simply to obtain a wager ; and I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the Suppression of Voluntary and Extra-judicial Oaths and Affidavits."

Subscribed and declared at Sydney this second day }
of January, 1900, before me,—

JOSEPH WALL.

JOHN BENNETT, J.P.

CASES heard at Central Police Office, 29th December, 1899 :—Name—A. E. F. Zeech ; offence—Using 65, King-street, contrary to Betting Houses Suppression Act ; result—Dismissed ; S.M.—G. H. Smithers, S.M. Name—Wm. Montgomery ; offence—Using 57, King-street, as above ; result—Dismissed ; S.M.—G. H. Smithers, S.M. Name—Chas. Harrison ; offence—Using 245, Pitt-street, as above ; result—Dismissed ; S.M.—G. H. Smithers, S.M. The two first cases were heard at the same time as Harrison's.—G. READ.

Forwarded to the Inspector-General of Police.—Constable McDonald, of course, acted improperly in untruthfully stating that his name was Wall. With this exception, I am unable to see that the police are in any way deserving censure. The difficulties in obtaining evidence, especially when the betting business is so cautiously conducted as at Oxenham's, is so great that all sorts of devices are found to be necessary. There have, I have no doubt, been convictions in cases where the evidence was much less conclusive, and such irrelevant matters as the misspelling of Oxenham's name are of no real importance. The whole of the facts of the case tend to show that Oxenham's premises are used as a betting establishment, in contravention of the law ; and the object of the complaint against the police is, I have no doubt, to intimidate and prevent them making any attempt to compel obedience to the law. I can discover no false swearing on the part of the police.—GEO. READ, Superintendent, 9/1/00.

Re Charles Harrison.—Breach of the Betting Act.

Sir,

No. 1 Police Station, 8 January, 1900.

In forwarding the attached papers, I beg to state that Senior-constable McGovern has, I am sure, been very careful and conscientious in his prosecution of these cases.

As for Constable McDonald, I am thoroughly of opinion that Wall, his fellow lodger, being aware of the object of his proceedings, took the opportunity of informing Mr. Oxenham and his manager, Mr. Rose, of what had been done, and they, being put on their guard, were able to anticipate the forthcoming evidence, and discount its value.

The alleged discovery of the witness Wall, therefore, does not amount to much when all the facts are taken into consideration.

Wall's cringing letter to Oxenham affords strange reading when placed alongside Mr. McGovern's report of his (Wall's) professed services.

It is to be regretted that the Magistrate did not follow the time-honoured practice of hearing both sides, instead of dismissing the case out of hand as he did.

For the prosecution, there were two witnesses: McDonald, who swore to the taking of the wager by Harrison, and McGovern, who gave certain facts tending to corroborate him.

For the defence, Mr. Slattery could have called Harrison, who, it was alleged, took the bet, and Mr. Rose, who had charge of the establishment. Both men were at the Court, but did not attempt to give evidence, though every opportunity was theirs by legal right.

Had the evidence been taken in full, the authorities and the general public would have been seized of the whole facts and able to judge of themselves of the character of the proceedings, instead of, as now, being influenced by the censures of the Justices whose utterances were not based on what appeared in any public record.

The fact of McDonald saying that the book produced was not the one he initialled forcibly reminds me that in January, 1899, Mr. Rose was prosecuted for a breach of the Betting Act in the very same shop, and the police witnesses were fully of opinion that the book brought to the Court was not the one seen by them on the date of the alleged offence. That case was dismissed.

The pencil copies of the handwriting furnished with the copy of the depositions are of no real value, being deficient of the characteristics looked for in such examples.

G. Read, Esq., J.P.,
Superintendent.

I have, &c.,
ALFRED POTTER,
Inspector.

No. 1 Police Station, Sydney, 8 January, 1900.

REFERRING to the attached papers concerning action taken by the police in *re* prosecution of one Charles Harrison for breaches of the Betting Houses Suppression Act on the 29th ultimo, Senior-constable McGovern would respectfully point out, for the consideration of his authorities, the character of the men with whom the police have to deal in the execution of their duty, by drawing their attention to a very serious discrepancy existing between the letter of Wall marked "A," which is the more reliable, as he had not then been approached for a certain purpose, and his affidavit procured to bolster up a lame defence. In this letter referred to it will be seen that Wall, in form of apology to Mr. Oxenham, says that, while he and McDonald were discoursing on the coming races at Canterbury Park, he, to enable McDonald to obtain a wager, gave the latter a voucher, and told him to mention his (Wall's) name at Oxenham's. This conversation was previous to the races being run, and bears out in a very remarkable manner Constable McDonald's evidence with reference to the document, as reported in newspaper cuttings marked "B." Now, Wall has the temerity to make a sworn affidavit that he did not give McDonald the voucher until the 14th, or five days after the race was run. The senior-constable need not dwell further on this point, knowing that his authorities are quite competent to give the value it deserves to any statement from this man. Touching his statement that he was not under the opinion that McDonald was such a "character," the senior-constable has to report that Wall, who was living under the same roof as McDonald, was in the latter's company when McDonald, acting under the senior-constable's instructions, was performing duties under the Betting Houses Suppression Act prior to the 9th December, the date on which the wager was taken at Oxenham's. On one occasion Wall tendered his services to the senior-constable to catch betting-shops, and more particularly Oxenham's, if the senior-constable would use his influence to get him on the Police, for which he made application, 27th December, 1899, which application is filed at the Inspector-General's Office.

Continuing, with reference to the voucher, the senior-constable would like to add that Constable Rouse was present in Pitt-street on the morning of the 9th December when McDonald handed him this document, which bore the endorsement shown in Court. The senior-constable returned it to McDonald, but again received it from him on the 12th ultimo, after which it remained in the senior-constable's custody until handed to Mr. Tillet on the 29th December.

Constable McDonald, after giving his evidence, was subjected to a searching cross-examination by Mr. Slattery, who appeared for Harrison, and also spoken to in a threatening manner by His Worship. Being the first time he gave evidence in a Court it cannot be wondered at if there were some slight discrepancies in his evidence. The constable positively swore the betting-book produced in Court was not the book used by Harrison for inserting wagers made by him on the Flying Handicap run at Canterbury on 9th ultimo. The book produced in Court was ruled and was written in with pen and ink, whereas it is well known that betting-books are filled in with pencil. Mr. Smithers, S.M., did not call for a defence in this case, therefore, there was no attempt made to disprove that a wager, as sworn to by McDonald, was made, nor was there a specimen of Harrison's handwriting asked for.

In dismissing the case, Mr. Smithers made the following extraordinary remarks:—"I deplore the action of the police in those cases in producing false evidence, and that of informers for the purpose of obtaining convictions, and that the older police officers should not incite the younger ones to these despicable conspiracies."

The

The senior-constable begs to state that the concluding words above quoted no doubt referred to the senior-constable. The senior-constable at the time protested, and he now protests, in the strongest manner against the unfounded accusation levelled at him by Mr. Smithers, having clean hands as far as this or any other case is concerned.

Before Harrison's case was called on, Mr. Tillett, who appeared to prosecute, told the senior-constable he would withdraw the case against Harrison. The senior strongly objected, and urged Mr. Tillett to proceed with it. Mr. Tillett, however, informed the Court he would withdraw the case. Mr. Smithers then accused the senior-constable of urging Mr. Tillett to withdraw the case. The senior-constable at once denied this allegation, and was supported by Mr. Tillett. Mr. Smithers said: "I am glad to hear you say so; I did not approve of the police withdrawing this case because I dismissed the other two."

The senior-constable, in conclusion, states that on the 23rd ultimo, the day before those summonses came on for hearing, he took Constable McDonald to Mr. Tillett's office, where he, McDonald, gave a statement of the evidence he was about to give in the two cases in which he was a witness.

George Read, Esq., Superintendent.

PATRICK MCGOVERN,
Senior-constable.

By reference to the cutting from *Truth* of 7th instant (attached) the authorities will be able to infer by the underlined words that a doubt existed to the soundness of Mr. Smithers' decision in the summons case against Harrison, and the further "strengthening" evidence referred to is no doubt Wall's affidavit. This "document" is fully dealt with in the first part of the senior-constable's report.

As threats of further action are held—presumably legal proceedings—the senior-constable would respectfully ask his authorities not to allow these papers to be seen outside the Department.

PATRICK MCGOVERN,
Senior-constable.

Copy newspaper report referred to:—

Those Betting Cases.—Further action probable.

At the Central Police Court on 29th December, 1899, the presiding Magistrate (Mr. Smithers) during the hearing of two cases, upon which he was adjudicating, and in which Constables McGovern and McDonald were prosecutors, said, *inter alia*: "I have no hesitation in saying I believe McDonald penned the memò. which he has sworn Harrison wrote * * * I am sorry McDonald has commenced his police career so ignobly. * * * Old police officers should show the young men a good example, instead of inciting them to these despicable conspiracies." *It is said that since the above case was heard evidence has transpired which can be procured to prove the soundness of Mr. Smithers' decision.* *Truth* hears that some of the facts have been placed before the Inspector-General of Police for his consideration. Not being desirous of prejudicing what may develop into a serious prosecution, *Truth* abstains from further comment, confidently awaiting the Inspector-General's action.

Coram Simpson, J., 8/6/00, *Reg. v. McDonald.* Crown's Exhibit D.—E.S.S., Associate. Redfern, 8 January, 1900.

Constable Cecil A. McDonald respectfully begs to report, for the information of the Superintendent, that on the 9th December, 1899, he met by appointment Senior-constable McGovern and Constable Rouse in George-street, Sydney, opposite the Town Hall, and was handed 5s. by Senior-constable McGovern, and also certain instructions; the constable went to H. Oxenham's, 245, Pitt-street, and saw a man named Harrison behind the counter, and asked him for 5s. worth of Victory for the Canterbury Park Races Flying Handicap; Harrison entered the wager, 30s. to 5s., in a book with a pencil; Harrison said "What name?" the constable said, "Pass me the book, and I will put my initials"; the constable then signed the letters "J.C.W." opposite the wager, and asked Harrison for a ticket; he said, "I do not give tickets"; the constable then produced a voucher, and asked him by way of further guarantee to write the wager across the bottom; he did so and said, "You are Mr. Wall"; the constable said, "Yes"; the constable then left the shop and saw Senior-constable McGovern and Constable Rouse in Pitt-street, and explained to them what he had above stated took place, and handed McGovern the voucher on which was written the wager referred to. Senior-constable McGovern handed the voucher back to the constable, who kept it in his possession until the 12th ultimo; on which date Senior-constable McGovern asked for and received from the constable the voucher; on the 12th ultimo, in company with Senior-constable McGovern, went to H. Oxenham's, for the purpose of identifying the man who the constable received the bet from on the previous Saturday; the constable saw the man, Harrison, in the shop, and identified him, when Mr. Oxenham ordered him out of the shop, and was most abusive; on the 29th December, at the Central Police Court, Charles Harrison was proceeded against in the Summons Court, before S.M. Smithers, S.M., for a breach of the Betting Houses Suppression Act; the constable detailed the above facts in his evidence; the voucher before referred to was also handed in; the constable obtained the voucher on the 8th December, 1899, from a man known as Mr. Wall, who had been lodging in the same house as the constable; he said he was quite willing to catch all the betting-houses if it would assist to get him on the Police Force, for which he is an applicant; with reference to the constable's evidence, and his admission of having given the name Wall to Harrison, this was not the constable's name, but did not tell him anything different, this being the first time the constable gave evidence before the Court, and subject to a cross-fire of questions and insinuations both from the Bench and from the solicitor for the defence, he became flurried and excited, and may not have answered all questions as he should have wished; with regard to the misspelling of Oxenham's name, the constable being, at the time, flurried, as above stated, and seeing the name Oxenham spelt with two h's on a piece of paper, handed to the constable while in the witness-box, naturally spelt it in a similar manner; the constable, in conclusion, positively states that the betting-book produced was not the one that Harrison entered the wager in, as the book written in was with pencil, and the book produced before the Court was written in with ink.

CECIL ALLAN McDONALD,
Constable.

No.

Re summons case against Charles Harrison under Betting Houses Suppression Act, and dismissed by Mr. Smithers on 29th ultimo.

No. 1 Police Station, 8 January, 1900.

Constable John E. Rouse respectfully reports, for the information of the Superintendent, that on the 9th of morning of December he was in company of Senior-constable McGovern and Constable McDonald prior to McDonald going to Oxenham's to get a wager. McGovern's instructions to McDonald was to be careful and notice the book the wager would be inserted in, also the person whom he took the wager from. There was no mention of a voucher or other documents at the time. Some short time afterwards the three constables met again in Pitt-street, close to Market-street. McDonald said, "I got the wager 30s. to 5s. Victory, Flying Handicap." McGovern said, "You have got no ticket." McDonald replied, "No, but I signed the initials J.C.W. after the wager with a pencil in the betting-book." McDonald then pulled from his pocket a piece of paper, handed it to McGovern, and said, "I got him to write the wager on that for me." McGovern looked at the paper and handed it back to McDonald. McDonald was also asked by McGovern to describe the man he made the wager with, and he accurately described Harrison, afterwards summoned.

JOHN E. ROUSE,
Constable.

Sir, Police Department, Inspector-General's Office, Sydney, 10 January, 1900.

With reference to your interview with me, and the statement subsequently transmitted in regard to the conduct of the police in a case against Charles Harrison, for a breach of the "Betting Houses Suppression Act," I beg to inform you that I have caused certain inquiries to be made in the matter, but as you informed me when you saw me that you were desirous that proceedings should be taken against the police witnesses in the case for perjury or conspiracy, and as I consider it desirable that there should be an investigation on oath, I should be glad if you would call at the Police Court and lay an information, when the officer of police in charge of the Division (Inspector Potter) will be instructed to afford all facilities with regard to the attendance of the necessary witnesses.

At this stage I abstain from expressing any opinion in the matter.

I am, &c.,
E. F.,

Mr. Rose, c/o "Oxenham," Pitt-street, Sydney.

Inspector-General of Police.

Sir, 245, Pitt-street, Sydney, 11 January, 1900.

I beg to acknowledge the receipt of your letter, dated 10th instant, referring to the late case of Potter *v.* Harrison, which was tried at the Central Police Court, Sydney, on the 29th December, 1899, and in the case referred to, I had the pleasure, at your request, made on the 2nd instant, of placing before you certain documents in support of my allegations that your officers had been guilty of certain offences.

You said at the interview I had the honor of holding with you on the 2nd instant that if my allegations were correct you would see justice done, that you would not countenance such actions as were alleged against your officers; and that if, upon inquiry, the facts warranted it, you would, through the Crown Law Officers, institute a prosecution. You may remember Mr. Levien, who was present, said he was satisfied you would not cloak or condone such conduct as I alleged your officers were guilty of, and that I could rest satisfied you would, if you considered it justifiable, prosecute the police officers mentioned.

In your letter to me, dated 10th instant, you suggest that I should become prosecutor, and swear out a charge against your officers, and that Inspector Potter (who was the late nominal prosecutor against Harrison) would afford me facilities with regard to the attendance of necessary witnesses. From your letter I gather that you consider the onus of a prosecution should lie with me. If the only vindication of justice that was left was a private prosecution on my part, there ought not to have been any necessity for me to waste your valuable time, or to supply you with any particulars of the peculiar tactics of your officers. Nor is it clear to me why you should have asked me for a report, or that you should have instituted an inquiry extending over eight days, unless you intended to prosecute, or state you did not think the facts warranted it.

I respectfully submit it must have escaped your memory that you, when asking me for a report, stated my name should not be mentioned in the matter, and I am therefore somewhat surprised at your proposal of the 10th instant, that I should initiate a prosecution. Is it reasonable that I, a private citizen, under the existing circumstances, should take to myself the functions of Government officials? As I before stated, I am prepared to supply the names and addresses of witnesses who can corroborate my report to you, and can also supply documentary proof in substantiation of it.

I must most respectfully protest against the position your letter of the 10th instant would assign to me, maintaining, as I do, that I have already placed in your hands ample evidence for the initiation of action. If you, Sir, think the late prosecution was a clean one, I will esteem it a favour if you will return me the documents I have placed in your hands.

Edmund Fosbery, Esq., Inspector-General of Police, Sydney.

I am, &c.,
T. M. ROSE.

Sir

Sir, Police Department, Inspector-General's Office, Sydney, 12 January, 1900.

I have the honor to forward herewith papers respecting a complaint as to the conduct of the police witnesses in the case of *Potter v. Harrison* (being a prosecution under the Betting Houses Suppression Act), together with a copy of a letter addressed by me to a Mr. Rose on the subject.

As a professional officer from your Department conducted the prosecution in the case, and is cognisant of all the facts, I should be glad to be advised if the circumstances warrant any action by the Department to prosecute the constable or constables referred to for perjury or other offence, or for "misconduct" under the Police Regulation Act (section 14, Act 20, 1899). An investigation on oath into the complaint is certainly desirable.

I have, &c.,

EDMUND FOSBERY,
Inspector-General of Police.

The Crown Solicitor.

(No. 1900, C.S. 52.)

Sir,

Crown Solicitor's Office, Sydney, 22 January, 1900.

I have the honor to return herewith the papers, numbered as in the margin, forwarded to me to advise whether the circumstances disclosed warrant the prosecution for perjury of the constables who gave evidence at the Central Police Court in the case *Potter v. Harrison*.

Although my officer who conducted the case informs me that, upon a comparison of handwritings, he inclines to the view that Constable McDonald wrote the memorandum of the bet himself which he swore was written by Harrison, I am of opinion that the constables should not be prosecuted, as the only evidence against them would be the statements of Wall (a person who, from the comparison of his letter of the 25th December last and his statutory declaration, is manifestly telling an untruth in one or other of them) and Harrison, a person employed in a betting-house, on whose word credence should not, in my opinion, be placed.

I think, on the whole, that if members of the police force were prosecuted on such extremely doubtful evidence as is available in this case it might tend to give rise to the belief that those in authority have very little faith in the integrity of their men, and thus create a feeling of distrust against the police.

If any of these papers are returned to the person who sent them in the first instance, care should be taken to first take copies thereof.

I have, &c.,

GEO. COLQUHOUN,
Crown Solicitor (*per* C.E.P.).

The Inspector-General of Police.

Return documents, taking copies (certified). Inform Mr. Rose that he is mistaken in stating that if the facts be warranted, &c., &c., but as I am now advised that the institution of such a prosecution by the Crown would not be justifiable, I can take no action in that direction. Attended to, 24/1/00.

Members of the force concerned informed.—G. READ, 30/1/00. For Superintendent's information. These papers should be shown to the police concerned.—S.F., 24/1/00. To Mr. Read. Members of the force concerned informed.—G. READ, Supt. The I.G.P.

Re Potter v. Harrison.—Breach of the Betting Act.

Sir,

No. 1 Police Station, 29 January, 1900.

I beg to return the papers in the above case, and also to forward a statement made by Mr. Patrick Flood, in whose house the man Wall and Constable McDonald had resided. I would respectfully draw your attention to the last paragraph of it, and the clipping from *Truth* newspaper of the 21st instant.

I have, &c.,

ALFRED POTTER,

Inspector.

G. Read, Esq., J.P., Superintendent.

Forwarded to the Inspector-General.—G. READ, Supt., 30/1/00.

VOLUNTARY Statement by Patrick Flood, of 266, Elizabeth-street, city, made on the 25th January, 1900, *in re* a certain prosecution under the Betting Houses Suppression Act against C. Harrison, on the 29th December, 1899.

My name is Patrick Flood. I am the proprietor of a boarding-house situate at 266, Elizabeth-street, city, where I reside.

About the 25th of November, 1899, Joseph Wall came from Candelo to my place, where he resided continuously as a boarder until about the 4th of January in the present year. Constable McDonald, of Redfern Station, was boarding at my house during the same period. A day or two previous to the 9th December, 1899, I heard a conversation take place between Wall and McDonald about catching "Sportsman," in King-street. I understood them to refer to a betting-shop of that name. Wall said to McDonald, "Why not catch Oxenham?" McDonald made some casual reply. On Saturday morning, the 9th December last, McDonald and Wall left my place in company shortly after 9 o'clock. Shortly before dinner-hour—1 o'clock p.m.—on same date Wall remarked in my presence and that of others, "It did not take McDonald and myself long to catch them."

The question was asked, "Who?" and Wall replied, "Oxenham." I knew that Wall was a candidate for the Police Force, consequently seeing him on several occasions leaving my house in company with McDonald, who I know was engaged on work in connection with betting-shops, and concluding that he was assisting McDonald. I, in the course of conversation one day, suggested to him that he should speak to Senior-constable McGovern to use his influence in getting him on the police. Wall told me in reply that he had already done so.

I would wish to contradict the statement which appears in *Truth* newspaper of the 21st instant, and which evidently emanates from Wall, wherein it is alleged that the latter removed his "goods and chattels" from Woollahra to my place on 14th December last. Wall brought his chattels to my place on his arrival in November, and never during his stay did he bring any other luggage there, nor, to the best of my belief, was he one night absent from my house, until he finally left.

PATRICK FLOOD.

Cutting from *Truth* newspaper of 21st January, 1900.

"On December 14, five days after Wall made the bet referred to, Wall removed his goods and chattels from Woollahra to the house where McDonald lived at Redfern."

[Referred to by Mr. Flood in his statement attached.]

Extract of portion of an article from *Truth*, forwarded by Mr. Rose to the Department of Justice, and by them to Attorney-General and Chief Secretary.

Sir,

245, Pitt-street, Sydney, 15 January, 1900.

Permit me most respectfully to bring under your official notice the attached particulars of a late police prosecution. I trust you will pardon me stating I am of opinion the facts herewith submitted by me disclose conspiracy, perjury, and forgery on the part of the prosecution. Acting under advice, I sought redress through Mr. E. Fosbery, Inspector-General of Police, but I am now convinced I applied in the wrong quarter. I place the case before you with every confidence that you will see justice done. As proof of my personality and *bona fides* I refer you with every confidence to your colleague, the Honorable W. P. Crick, Esq.

I have, &c.,

THOMAS MANFRED ROSE.

The Hon. W. Wood, Esq., Minister for Justice, N.S.W.

Refer to Attorney-General.—W.H.W., 25/1/1900. The Secretary to the Attorney-General.—G.M., B.C., 25/1/00. Submitted—H.P., 29/1/00. Seen; return.—B.R.W., 5/2/00. The Under Secretary for Justice.—H.P., 5/2/00. Submitted for the Minister's information.—G.M., 12/2/00. Might be forwarded on to the Chief Secretary.—W.H.W., 14/2/00. The Principal Under Secretary.—G.M., B.C., 15/2/00.

Department of Justice, Sydney, 15 February, 1900.

Date of letter under reply:—15th January, 1900.

Subject:—Respecting the action of the police in connection with the case against C. Harrison for betting.

Reply:—I have the honor to inform you that your letter with enclosure has been referred to the Chief Secretary, under whose Ministerial direction the Police Department is placed.

GEORGE MILLER,

Under Secretary.

Mr. T. M. Rose, 245, Pitt-street, Sydney.

PARTICULARS referred to in Mr. Rose's letter.

Police v. Harrison.—Breach of the Betting Houses Suppression Act. 9th December, 1899, date of alleged offence; 12th December, 1899, date on which Constables McGovern and McDonald identified Harrison; 25th December, 1899, date on which summons was served on Harrison; 29th December, 1899, date case was tried at the Central Police Court, Sydney, before Mr. Smithers, S.M., and dismissed without the defence being called for.

I herewith attach newspaper report of the case, the material correctness of which can be testified to by several witnesses.

Another Bad Bump.

When the case of Charles Harrison was called on Mr. Tillett said he would withdraw the information.

Mr. T. M. Slattery, who represented Harrison, said he must have an absolute dismissal or go into evidence. He would not accept a withdrawal.

Mr. Tillett said under those circumstances he would go on.

The information was similar to the previous two, Harrison being charged with having wagered on the Flying Handicap, a horse-race at Canterbury Park, on 2nd December.

The two Macs again.

Senior-constable McGovern deposed that, on Saturday, 9th instant, at about ten minutes to 10 in the morning, he gave Constable McDonald five shillings and certain instructions. He went to 245, Pitt-street, to premises occupied by Humphrey Oxenham, and after being there a few minutes came out and rejoined witness, showing him a certain paper (produced). On the following Tuesday witness and McDonald called at the shop and McDonald identified defendant, who was then at the counter, as the man who had given him the paper (produced). Asked defendant his name, but he hesitated. Rose then entered.

entered the shop, and said, "His name is Charles Harrison." Told Rose what the constable said, and Rose replied, "You will have a hard job to prove it." Mr. Oxenham was also present. They abused McDonald for laying a trap to catch a man.

To Mr. Slattery: Gave McDonald five single shillings. Mr. Oxenham on the Tuesday told McDonald to clear out of the office, and said he should be ashamed of himself to come there and try and get people to wager with him for the purpose of trapping them.

To Mr. Tillet: There was a race "the Flying Handicap" at the Canterbury Park on the day in question.

To Mr. Slattery: He knew from memory of announcements that such a race was run. He did not know of his own knowledge. He was not present at the course.

Mr. Slattery: Well, you should go. You deserve a day off now and again. (Laughter.)

Witness: Well, I can assure you we do not get many.

The Ubiquitous McDonald.

Constable McDonald then called, deposed that on December 9th he received five shillings and certain instructions from the previous witness. Leaving McGovern he went to Oxenham's shop, 245, Pitt-street, and got a bet. He there saw defendant, and asked him for "five shillings worth of Victory" in the Flying Handicap to be run at Canterbury Park. Asked defendant for ticket, and was told they did not give tickets; but he produced a book for him (witness) to sign his name. Witness signed the initials "J.C.W." opposite Victory's name. Did not think the book (produced) was the one in which he signed his initials. It seemed a larger one. Would swear the book (produced) was not the one. Having signed the book, he asked defendant to sign a voucher he had with him as a further guarantee of the wager. The voucher (produced) was the one. Witness then went out, saw McGovern, and gave him the documents. Gave defendant five shillings in consideration of the bet.

To Mr. Slattery: McGovern gave him 5s. in single shillings. The writing on the voucher was in defendant's handwriting, and the words "J. Wall" were his. Witness here, at Mr. Slattery's request, wrote the words "Canterbury Victory Flying Handicap thirty shillings to five H. Oxenham." This being done, the paper was handed to Mr. Slattery.

Falls at second Hurdle.

His Worship: Is the name Oxenham spelt the same way.

Mr. Slattery: No, Your Worship.

To Witness: Just write the name Oxenham again. After much hesitation asked, "Is the name spelt right there?" To this Mr. Slattery replied, "Never you mind; you write the name." Witness did so with much diffidence.

Mr. Slattery: There, your Worship, he falls at the second hurdle. (Laughter.) He introduces a second "h" into Mr. Oxenham's name. It is similarly spelt on the voucher where he swears it was written, not by him, but by a clerk in Mr. Oxenham's employ. (Sensation.) Witness continuing, said he made the wager about 10 o'clock the morning of the race. Did not tell defendant, "I am Mr. Wall, of Candelo," but defendant asked him if he had any voucher or letter to prove he was a Mr. Wall. He said his name was Wall, but gave no address. His name was not Wall, but he made such a false statement for the purpose to get defendant to commit a crime.

His Worship: A nice admission from a police officer. (To witness): You have commenced your career very badly.

Misusing Wall's Name.

Continuing, witness said he produced only one letter to satisfy defendant that he was Mr. Wall. He had secured these letters from Mr. Wall, Candelo, who was a friend of his. Did not exactly know his trade. Had known him for some three or four months. Wall had no idea for what purpose he would use the letter, but it was his (witness) intention to use the letter for the purpose of getting a bet from Oxenham. Wall had no idea he (witness) was using his name in the way he had. Could not say if Wall was manager of a butter factory at Candelo; he might be so. Would positively swear he never wrote the words on the voucher; would swear the defendant had done so.

The book in which were the wagers made on December 9th was here put in by Mr. Tillet; it was seen to contain an entry showing that twenty-five shillings to five Victory for the Flying Handicap had been made with Wall on that day.

This was the case for the Crown.

Mr. Slattery urged that the case be dismissed, as it was as clear as possible McDonald had written the memo. In that memo Mr. Oxenham's name was spelt "Oxhenham," and McDonald had so spelt it when asked to write the name in Court. Again, the memo, which he had made McDonald rewrite disclosed, or purported to disclose, that a wager had been made on the Canterbury Park Races. Everyone knew that no such race had ever existed. Hence no sporting man could have penned that memo. He would ask for a dismissal. As to the entry in the book, that was a five to one wager, while all the evidence given in the case was concerning a six to one wager.

Mr. Tillet having replied, his Worship said he would dismiss the case. He had no hesitation in saying he believed that McDonald had penned the memo., notwithstanding that he had sworn that Harrison had written it. He was sorry that McDonald had commenced his police career so ignobly. Old police officers should show the young men an example, instead of which they incited them to these despicable conspiracies.

Mr. Slattery: The police would be better employed in protecting people from the magmen and confidence men who infest the city. There is no doubt they conspired to lay their charges and secure convictions, and if such charges were felonies they would be accessories both before and after the fact.

Senior-constable McGovern protested against it being assumed that he had incited McDonald in the matter. He had not done anything of the kind.

On the 2nd January, 1900, the Mr. Wall referred to in the above report called upon me, and made a statement (verbally), portion of which is embodied in the following statutory declaration, which was duly attested before J. Bennett, Esquire, J.P. :—

"I, Joseph Wall, of 266, Elizabeth-street, Redfern, near Sydney, in the Colony of New South Wales, do hereby solemnly and sincerely declare as follows :—

"On the 9th December, 1899, I made the following wager with a clerk in the employ of H. Oxenham, at 245, Pitt-street, Sydney. The name of the clerk is, I believe, C. Harrison. The wager was

25s. to 5s. Victory, for the Flying Handicap, to be run at Canterbury Park on the 9th December, 1899. I informed Constable McDonald, of Redfern Station (while in conversation), that I had taken the said wager. On the 14th December, 1899, I gave Constable McDonald a voucher I had in my possession and which I had previously received from H. Oxenham when I resided at Candelo—one said voucher referred to some bets I had with said H. Oxenham over the Melbourne Cup of 1899. Constable McDonald then wrote with pencil something on the voucher. I believe it was 30s. to 5s. Victory, Canterbury Park Races. The reason why I gave Constable McDonald the voucher was to enable him to get a wager from H. Oxenham, as it served as an introduction. Did not give it to him to enable him to entrap H. Oxenham, simply to obtain a wager. And I make this solemn declaration, &c. Signed JOSEPH WALL, Sydney, 2nd January, 1900. Before me, JOHN BENNETT, J.P.”

In verbal explanation of Wall's statement, he alleges his papers, including the voucher in question, was in the possession of a friend who resides at Woollahra, and that on the 14th December, 1899, he (Wall) obtained the papers from his friend and took them to 266, Elizabeth-street, Redfern, where both he (Wall) and McDonald resided. That while he (Wall) was looking through the said papers he came across the voucher produced in Court, and at McDonald's request gave it to him (McDonald). McDonald then wrote across the voucher a certain contract. It was not until Wall saw the newspaper report of the case that he realised he had been made use of by McDonald. Wall then, of his own free will, called on me and made the declaration referred to. He further stated that he was prepared to give testimony on oath before any legal tribunal of the correctness of his statement to me. I have the present address of Wall, which can be supplied if required. Wall states his sole desire to be relieved of the stigma of having played the part of an informer. Up to this position is: Constable McDonald swore he obtained a bet from Harrison, and that Harrison gave him a receipt in writing for the said bet on the 9th December, 1899. Constable McGovern swore that he received from McDonald the said receipt on the 9th December, and produced it in Court as evidence. We have the Magistrate's opinion that McDonald executed the writing he (McDonald) swore Harrison wrote. Harrison, Rose, and others can testify the handwriting is not that of Harrison. It can be proved that Wall did take the bet McDonald swore he took. The books are all at the disposal of inquiry. Wall then appears on the scene, and his statement can be corroborated up to a certain point. Wall's testimony is that the voucher on which the case depended was in his (Wall) possession up to the 14th December, 1899. He alleged this can be proved, by additional facts and testimony. If Wall's testimony is correct, if he is prepared to give evidence on oath of its correctness, McDonald could not have had the voucher in his possession on the 9th December, nor could McGovern have had it in his possession from the 9th December. Up to the 14th December, therefore, their case was trumped up and supported by perjury, and McDonald must have forged Oxenham's name to the receipt as Wall states he did. Armed with the above facts, on the 2nd January, 1900, I waited on Mr. Fosbery, the Inspector-General of Police, and I was accompanied by Mr. H. Levien, who can vouch for the correctness of the following developments. During my interview with Mr. Fosbery he requested me, in confidence, to supply him with a report. I did so, giving the preceding particulars, also Wall's declaration. On the 10th January, 1900, I received the following letter:—

“No. 1900/70.

“Sir,

Police Department, Inspector-General's Office, Sydney, 10 January, 1900.

“With reference to your interview with me, and the statements subsequently transmitted, in regard to the conduct of the police in a case against Charles Harrison for a breach of the Betting Houses Suppression Act, I beg to inform you that I have caused certain inquiries to be made in the matter, but as you informed me when you saw me that you were desirous that proceedings should be taken against the police for perjury or conspiracy, and as I consider it desirable that there should be an investigation on oath, I should be glad if you would call at the Police Court and lay an information, when the officer in charge of the division (Inspector Potter) will be instructed to afford all facilities with regard to the attendance of the necessary witnesses. At this stage I abstain from expressing any opinion in the matter.

“I am, &c.,

“EDMUND FOSBERY,

“Mr. Rose, c/o 'Oxenham,' 245 Pitt-street.”

“Inspector-General of Police.

To Mr. Fosbery's letter of the 10th instant, I wrote as follows:—

“Sir,

245, Pitt-street, Sydney, 11 January, 1900.

“I beg to acknowledge the receipt of your letter of the 10th instant, referring to the late case of Potter v. Harrison, tried at the Central Police Court, Sydney, on the 29th December, 1899. In the case referred to, I had the pleasure, at your request, on the 2nd instant, of placing before you certain documents in support of my allegations that your officers had been guilty of certain offences. You said at the interview I had the honor of holding with you on the 2nd instant that if my allegations were correct you would see justice done, that you would not countenance such actions as was alleged against your officers, and that if, upon inquiry, the facts warranted it you would, through the Crown Law Officers, institute a prosecution. You may remember Mr. H. Levien, who was present, said he was satisfied you would not cloak or condone such conduct as I alleged your officers were guilty of, and that I could rest satisfied you would, if you considered it justifiable, prosecute the police officers mentioned. In your letter to me dated 10th instant, you suggest that I should become prosecutor and swear out a charge against your officers, and that Inspector (who was the late nominal prosecutor of Harrison) would afford me facilities with regard to the attendance of necessary witnesses. From your letter I gather that you consider that the onus of a prosecution should lie with me. If the only vindication of justice that was left was a private prosecution on my part, there ought not to have been any necessity for me to waste your valuable time or to supply you with any particulars of the peculiar tactics of your officers. Nor is it clear to me why you should have asked me for a report, or that you should have instituted an inquiry extending over eight days, unless you intended to prosecute, or state you did not think the facts warranted it. I respectfully submit it must have escaped your memory that you, when asking me for a report, stated my name should not be mentioned in the matter. I am therefore somewhat surprised at your proposal of the 10th instant, that I should initiate a prosecution. Is it reasonable that I, a private citizen, under the existing circumstances, should take to myself the function

function of Government officials? As I before stated, I am prepared to supply you with the names and addresses of witnesses who can corroborate my report to you, and can also supply documentary proof in substantiation of it. I must most respectfully protest against the position your letter of the 10th instant would assign to me, maintaining, as I do, that I have already placed in your hands ample evidence for the initiation of action. If you, Sir, think that the late prosecution was a clean one, I would esteem it a favour if you will return me the documents I have placed in your hands.

"I am, &c.,

"Edmund Fosbery, Esq., Inspector-General of Police, Sydney."

"T. M. ROSE.

Up to date, 15th January (9 p.m.), I have not received a reply to my letter handed in to Mr. Fosbery's office at 10 a.m. on the 12th instant. I am now of the opinion that, even if Mr. Fosbery does now take action, any prosecution that will ensue will be still-born. I most respectfully submit the following as facts:—

1. McDonald did not make the wager he swore he did on the 9th December, 1899.
2. Harrison did not give McDonald the receipt he (McDonald) swore Harrison had.
3. Harrison did not write the contract note (voucher).
4. McDonald did write the contract note (voucher).
5. Neither McDonald or McGovern could have had the voucher in their possession prior to the 14th December, 1899.
6. McDonald had no authority from H. Oxenham to make any such contract as that produced, or to sign his (Oxenham's) name to any document.
7. That McDonald (nor any other person) has never initialled any book in the possession and property of H. Oxenham.
8. That the prosecution was a conspiracy, the evidence perjured, and the voucher a forgery.
9. Eight persons are prepared to give testimony, produce books and documents in support of statement No. 8, as above.

I, therefore, respectfully request you, Sir, to make inquiry into the subject-matter of my complaint.

I have, &c.,

THOMAS M. ROSE,

245, Pitt-street, Sydney.

Hon. W. Wood, Esq., Minister of Justice.

Article from *Truth* forwarded by The Hon. W. P. Crick to Justice Department, and by them to the Attorney-General.

Dear Mr. Wood,

This is certainly a most serious matter, and should not be allowed to rest without expressing an opinion. I am clear that it is due to the Magistrate and the Police Force that the whole affair should be cleared up. The papers should be placed before the A.-G.

22/1/00.

W. P. CRICK.

MINUTE PAPER.

Truth, Sunday, 21st January, 1900.

Police *v.* People. Perjured Police and Pimps. Forgery and Conspiracy, and Perjury. The two mendacious Maes. "Demon" McGovern and his Deputy McDonald. The faked ticket. Working on Wall. Branding a bygone brief. Treacherous travelling on trusting friend.

THE recent prosecution under the Betting Houses Suppression Act, which broke down so abjectly before Mr. G. H. Smithers, S.M., has caused a stir in sporting circles, and a horrible stink in the purlieus on the Police Department. So much has the matter occupied the public mind that *Truth* offers no apology for recurring to the matter and giving further details and comments on this hideous conspiracy.

Probably, the case of Police Inspector Potter *v.* Harrison is not one bit more dirty than many that have preceded it; but, unfortunately for the much besmirched cause of justice, those who have been wronged refuse to be garrotted into silence by bullying, blackmailing policemen, or their patrons higher in office. Having triumphantly defeated a police conspiracy that was bolstered up with perjury, and buttressed with forgery, these citizens are now seeking that vindication that, unless our Department of Justice is rotten from top to bottom, ought to at once be theirs.

Briefly stated, the police case was as follows:—On the 9th December last a raw constable named McDonald swore he made a wager with C. Harrison at 245, Pitt-street, and that Harrison gave him a receipt for the cash invested, and signed the receipt H. Oxenham. McDonald stated he made the bet in the name of "J. Wall." Senior plain-clothes constable McGovern supported McDonald's testimony very artistically, even to the extent of swearing that he received the receipt in question from McDonald on the 9th December. The receipt was handed in as evidence. During the cross-examination of McDonald he made the following admission:—"His name was not 'Wall,' but he made such a false statement for the purpose of getting defendant to commit a crime." McDonald was then requested to write a duplicate of the receipt; he did so, and, as was partly expected, produced a fac-simile of the handwriting on the exhibit, and even to the misspelling of Oxenham's name.

A.

A number of other minor matters led to the climax, which was reached when the Presiding Magistrate, Mr. Smithers, to whom great credit is due, said, "I will dismiss the case. I have no hesitation in saying I believe that the witness McDonald penned the memo. produced, notwithstanding that he had sworn that Harrison had written it. I am sorry that McDonald has commenced his police career so ignobly."

The Magistrate, turning his attention to McDonald's mate, McGovern, continued, "Old police officers should show the young men an example, instead of which they incite them to these despicable conspiracies."

It is seldom that phlegmatic magistrates inured to daily perjuries, feel called upon to so strongly protest against the prostitution of justice and to point out who are the offenders. It appears to be an open secret that if a magistrate, whose duty it is to protect the public equally as much as the police, dares to express an opinion derogatory to police practices, the old gentleman who is at the head of the police (metaphorically) runs crying to the Crown Law Office to make a complaint.

The fact is not to be glossed over that the charge against Harrison was dismissed because the Bench was satisfied that the prosecuting police had committed perjury and entered into a conspiracy to convict at all costs. A review of a few dates will prove of interest here, and it will be well for readers to remember them in view of what may transpire ere long. It was December the 9th last, according to McDonald, that he made the wager with Harrison and got the ticket. McGovern swore he received this ticket or receipt from McDonald on the same date. On 12th December both officers identified Harrison, and yet it was 25th December before McGovern served the summons.

It will thus be seen that the accused Harrison, without being called upon to answer the charge brought against him, was exonerated by a judicial-minded magistrate, who had become seized of the whole facts, as far as the crook prosecution was concerned. The accused might well be excused for thinking that in such extraordinary circumstances the authorities would call upon Messrs. McGovern and McDonald to explain their peculiar conduct in the case. If he expected any such action he only evinced his remarkable want of knowledge of the methods of the New South Wales Police Department. Absolutely no notice was taken of the failure in conspiracy of the two scoundrels McGovern and McDonald.

Here Mr. J. Wall, whose name had been traded upon by the young perjurer, McDonald, began to bestir himself. He read the report published by *Truth*, and called upon Harrison for an explanation, subsequently interviewing Mr. Rose, under whose direction Harrison carries on business. Mr. Wall is a man of good reputation, and can be completely exonerated from any suspicion of complicity with either side.

His statement showed that he resided in the same house as McDonald, the ardent and unscrupulous "probationer." On 9th December, Wall backed Victory for the Flying Handicap to be run at Canterbury Park on that date. The same evening Wall acquainted his fellow-lodger, McDonald, of his speculation.

This friendly openness appeared to have given McDonald, the fledgeling copper, an inspiration, and he seems to have proceeded to unload his scheme on to McGovern. This was to trump-up a charge against Harrison, and pose himself (McDonald) as Wall. On 14th December, five days after Wall made the bet referred to, Wall removed his goods and chattels from Woollahra to the house where McDonald lived at Redfern. In looking through these goods, Wall came across a voucher of a wager made with Harrison on 20th September. McDonald saw this ticket and said, "Give me this; it will serve as an introduction, and induce them to bet with me." "Certainly," said Wall, "and you can use my name as an introduction." McDonald then asked, "What was the bet you had the other day?" and Wall answered, "Thirty shillings to five shillings Victory for the Flying Handicap at the Canterbury Park Races." McDonald then wrote in pencil across the face of the voucher, and this was the ticket he had the impudence to produce in Court, as having been handed to him by Harrison on 9th December. This is also the voucher which McGovern swore had been handed to him on 9th December by McDonald. To prove this statement Wall willingly made the following affidavit:—

"IN THE COLONY OF NEW SOUTH WALES.

"I, *Joseph Wall*, of 266, Elizabeth-street, Redfern, near Sydney, in the Colony of New South Wales, do hereby solemnly and sincerely declare as follows:—On the 9th day of December, 1899, I made the following wager with a clerk in the employ of H. Oxenham, at 245, Pitt-street, Sydney. The name of the clerk, I believe, is C. Harrison. The wager was twenty-five to five shillings, Victory, for the Flying Handicap, to be run at Canterbury Park on the 9th December, 1899. I informed Constable McDonald, of Redfern Station (while in conversation), that I had taken the said wager. On the 14th December, 1899, I gave Constable McDonald a voucher I had in my possession, and which I had previously received from H. Oxenham when I resided at Candelo. The said voucher referred to some bets I had with H. Oxenham over the Melbourne Cup of 1899. Constable McDonald then wrote with pencil something on the voucher; I believe it was, 'Thirty shillings to five shillings, Victory, Canterbury Park Races.' The reason why I gave Constable McDonald the voucher was to enable him to get a wager with H. Oxenham, as it served as an introduction; did not give it to him to enable him to entrap H. Oxenham—simply to obtain a wager.

"And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled 'An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra judicial oaths and affidavits.

"JOSEPH WALL.

"Subscribed and declared at Sydney, this second day }
of January, 1900, before me,—

"JOHN BENNETT, J.P."

Armed with this affidavit and other proofs, Mr. T. Rose, who was and is responsible for Mr. Harrison's action, waited upon Mr. Fosbery, and what transpired at their interview is set forth below, though, in the interview, Mr. Fosbery stated that on what he heard and read a strict inquiry should be initiated. In face of this *viva voce* utterances Mr. Fosbery subsequently wrote Mr. Rose as follows:—

"Sir, "Police Department, Inspector-General's Office, Sydney, 10 January, 1900.

"With reference to your interview with me, and the statements subsequently transmitted in regard to the conduct of the police in a case against Charles Harrison for a breach of the 'Betting Houses Suppression Act,' I beg to inform you that I have caused certain inquiries to be made in the matter,
but

but as you informed me when you saw me that you were desirous that proceedings should be taken against the police witnesses in the case for perjury or conspiracy, and as I consider it desirable that there should be an investigation on oath, I should be glad if you would call at the Police Court and lay an information, when the officer of police in charge of the Division (Inspector Potter) will be instructed to afford all facilities with regard to the attendance of the necessary witnesses.

"At this stage I abstain from expressing any opinion in the matter.

"I am, &c.,

"EDMUND FOSBERY,

"Inspector-General of Police.

"Mr. Rose, 245, Pitt-street, Sydney."

To this Mr. Rose made answer as follows:—

"Sir,

"245, Pitt-street, 11 January, 1900.

"I beg to acknowledge the receipt of your letter of 10th instant, referring to the late case of Potter v. Harrison, tried at the Central Police Court, Sydney, on the 29th December, 1899. In the case referred to, I had the pleasure, at your request, on the 2nd instant, of placing before you certain documents in support of my allegations that your officers had been guilty of certain offences. You said, at the interview I had the honor of holding with you, on the 2nd instant, that if my allegations were correct, you would, see justice done, that you would not countenance such actions as were alleged against your officers, and that, if, upon inquiry, the facts warranted it, you would, through the Crown Law Officers, institute a prosecution. You may remember Mr. Levien, who was present, said he was satisfied you would not cloak or condone such conduct as I alleged your officers were guilty of, and that I could rest satisfied you would, if you considered it justifiable, prosecute the police officers mentioned. In your letter to me, dated the 10th instant, you suggest that I should become prosecutor, and swear out a charge against your officers, and that Inspector Potter (who was the late nominal prosecutor) would afford me facilities with regard to the attendance of necessary witnesses. From your letter I gather you consider the onus of a prosecution should lie with me. If the only vindication of justice that was left was a private prosecution on my part, there ought not to have been any necessity for me to waste your valuable time, or to supply you with any particulars of the peculiar tactics of your officers. Nor is it clear to me why you should have asked me for a report, or that you should have instituted an inquiry extending over eight days, unless you intended to prosecute, or to state you did not think the facts warranted it. I respectfully submit it must have escaped your memory that you, when asking me for a report, stated my name should not be mentioned in the matter. I am, therefore, somewhat surprised at your proposal of the 10th instant, that I should initiate a prosecution. Is it reasonable that I, a private citizen, under the existing circumstances, should take to myself the functions of Government officials? As I before stated, I am prepared to supply you with the names and addresses of witnesses who can corroborate my report to you, and can also supply documentary proof in substantiation of it. I must most respectfully protest against the position your letter of the 10th instant would assign to me, maintaining, as I do, that I have already placed in your hands ample evidence for the initiation of action. If you, Sir, think that the late prosecution was a clean one, I would esteem it a favour if you will return me the documents I have placed in your hands.

"I am, &c.,

"THOMAS M. ROSE.

"To Edmund Fosbery, Esq., Inspector-General of Police, Sydney."

Up to January 17th no answer had been vouchsafed to Mr. Rose's temperate and justifiable letter, and it would appear as though Mr. Fosbery had made up his mind that it was not his duty to prosecute the members of his force, who, on all appearances, have committed gross breaches of the criminal law. So far from thus attempting to carry out his duties as one trusted to attend to the prevention of crime, it would appear that Mr. Fosbery has betrayed the confidence reposed in him by Mr. Rose as a citizen, for that gentleman has been threatened with persecution by Fosbery's myrmidons.

In these peculiar circumstances it cannot be wondered at that Mr. Rose has placed the whole matter (as well as he can in the absence of the papers he had entrusted to Mr. Fosbery, and which he cannot recover) before the Minister for Justice. But with the evident intention shown of burking inquiry, it would appear to be of little use to prosecute these proved perjurers, forgers, and wicked conspirators.

MINUTE.

Department of Justice, Sydney, 24 January, 1900.

1900/1245.

Subject:—The Hon. W. P. Crick, M.P., forwarding extract from the *Truth* newspaper respecting the action of two members of the Police Force in connection with the prosecution of C. Harrison for a breach of the Betting Houses Suppression Act.

SUBMITTED. It may be pointed out that the complaint is against members of the Police Force, and, therefore, is not a matter for this Department to take action in. The Police Department is under the Ministerial control of the Chief Secretary, to whom these papers might now be forwarded.—G.M.

Approved.—W.H.W., 24/1/1900. The Principal Under Secretary.—G.M., B.C., 25/1/1900. Refer to the Inspector-General of Police.—C.W., B.C., 30/1/1900.

I regret that I cannot report on this matter otherwise than by submitting all the papers to the Chief Secretary, who may see fit to forward them to the Attorney-General, as suggested by Mr. Crick.—EDM. FOSBERY, 31 Jan., 1900. The Principal Under Secretary.

Ret. C. S. O., 1 Feb., 1900. May now be referred to the Honorable the Attorney-General.—C.W., 1/2/00. Approved.—J.S., 1/2/1900. Seen. They might be sent back to the Inspector-General.—B.R.W., 5/2/00. Forwarded.—H.P., 5/2/00.

Report of the Police Magistrate in the Case of Police against Harrison ; Inspector-General forwarding to the Crown Solicitor to take proceedings and Attorney-General's authorisation.

Sir,

Department of Justice, Sydney, 25 January, 1900.

I am directed by the Minister of Justice to forward to you the enclosed extract from *Truth*, of the 21st instant, regarding the case of Inspector Potter *v.* Harrison, and to ask you to be good enough to furnish him with the fullest expression of your views upon the case referred to.

I have, &c.,

GEORGE MILLER,

Under Secretary.

G. H. Smithers, Esq., Stipendiary Magistrate, Sydney.

(Justice, 00/1542, 31/1/00.)

Sir,

Central Police Office, Sydney, 30 January, 1900.

In compliance with the request contained in your letter of the 25th instant, requesting me to furnish the Minister of Justice with the fullest expression of my views upon the case Inspector Potter *versus* Harrison, I have the honor to state, for the information of the Minister, that, in the case alluded to, Constable McDonald swore that on the 9th ultimo he made a wager with Harrison at 245, Pitt-street, Sydney, and that the defendant gave him a receipt for the amount invested. The cross-examination by Mr. T. Slattery, in conjunction with several writing tests made in Court, conclusively proved to me that the constable had never made any such wager, and that he, the constable, had written a receipt said to have been written by Harrison. In my opinion the constable perjured himself to secure a conviction at any cost. Senior-constable McGovern's evidence must necessarily be equally false, and it is deplorable that an officer of his standing should have resorted to such despicable means to bring about a conviction.

In a case under the same Act heard by me immediately prior to that of Harrison's, McDonald gave strong testimony implicating an accused, but it was clearly proved that his evidence was false, as he never made the wager as he swore he did.

In both cases I severely commented upon the police action, as I never heard more deliberately false swearing.

I have, &c.,

G. H. SMITHERS, S.M.

The Under Secretary, Department of Justice.

Might be sent on to the Attorney-General.—W.H.W., 31/1/00. The Secretary to the Attorney-General.—G.M., B.C., 31/1/00. Submitted.—H.P., 1/2/00. I would like to see Mr. Fosbery about this matter.—B.R.W., 1/2/00. Forwarded to the Inspector-General of Police.—B.R.W., 5/2/00. Forwarded.—H.P., 5/2/00.

Police Department, Inspector-General's Office, Sydney, 6 February, 1900.

REFERRED to the Crown Solicitor,—The opinion expressed by the adjudicating Magistrate (forwarded to me by the Attorney-General) is of such a character that an investigation on oath is necessary. Perhaps, therefore, the Crown Solicitor will obtain the requisite permission from a Judge to enable Inspector Potter to take proceedings for perjury against Senior-constable McGovern and Constable McDonald. The Inspector might also be instructed to call at the Crown Solicitor's Office to settle the form of information, and I presume professional assistance will be provided in the case.

EDMUND FOSBERY,

Inspector-General of Police.

The Crown Solicitor.

(1900/73, Crim. L.)

Sir,

Crown Solicitor's Office Sydney, 14 February, 1900.

The enclosed papers have been received by me from the Inspector-General of Police with instructions to institute against Senior-constable McGovern and Constable McDonald prosecutions for perjury alleged to have been committed by them upon the hearing of the case Potter *v.* Harrison at the Central Police Court on the 29th December last.

Briefly, the evidence given by McGovern and McDonald was as follows:—McGovern swore that on the 9th December last he gave McDonald five shillings, that McDonald went into Oxenham's in Pitt-street, and after a short interval returned to McGovern and gave him a paper which he, McGovern, produced in Court.

McDonald stated that he had received instructions from McGovern on the 9th December, together with five shillings, and entered Oxenham's, made a bet with one Harrison, who entered it in a book, requesting McDonald, who gave the name of Wall, to initial the entry, which he did. McDonald then requested Harrison to write a memorandum of the bet produced by him, which Harrison did. McDonald left the shop and met McGovern and handed him the paper bearing the memorandum of the bet.

With regard to the evidence of McGovern, the only two points upon which he might be contradicted are: Did he see McDonald enter Oxenham's, and did McDonald give him the paper bearing the memorandum of the bet?

On the first point there is no evidence against McGovern's statement. On the second one, Wall has made a statutory declaration that he did not give this paper to McDonald until the 14th December; consequently McGovern could not have received it on the 9th December.

This

This statutory declaration must, however, be contrasted with Wall's letter of the 29th December to Oxenham, which contains this passage: "I came to Sydney about a month ago to have a holiday, and took up my lodgings at 266, Elizabeth-street, in which place Constable McDonald also resided. I being a sporting man, we had a conversation over the coming races at Canterbury Park (races were held on the 9th December), and he wished to back a horse for the Flying Handicap, in which I preferred Victory. He informed me that he often backed horses at "Sportsman's," "Sterling's," and others. When I remarked that I always dealt with Oxenham and found him to lay me longer prices than any other quoted. Of course, you know that I done a deal of betting with you from Candelo. McDonald said that Oxenham would not bet with him. I produced some vouchers of yours, and told him to mention my name, and also told him to take some vouchers if he wished to take a wager, not thinking that he was only trying to get a wager to make a case out of it."

Moreover, Inspector Potter has informed me that he saw the paper stated to have been given by McDonald to McGovern in McGovern's hands on the 12th December.

With regard to McDonald, the points upon which he might be contradicted are: 1. Did he enter Oxenham's on the 9th December? 2. Did he make a bet with Harrison on that day as stated by him? 3. Did Harrison make a note of the bet on the paper? 4. Did McDonald give that paper to McGovern?

On point 1, there is no evidence other than McDonald's statement. On point 2, McDonald may be contradicted by Harrison, but I know of nothing which can be used to corroborate Harrison. On 3, Harrison denies ever having written the note of the bet, and the depositions and exhibits are attached for comparison of the handwritings of McDonald and Harrison with the alleged note of the bet. Wall's evidence, too, that the document was not given to McDonald until the 14th December, and that he then made the note of the bet, is available; but see what is mentioned above with regard to Wall. On point 4 the same evidence is available as I have mentioned with regard to McGovern.

I have the honor to request the direction of the Honorable the Attorney-General whether I am justified in proceeding with these prosecutions upon the evidence I have set forth, and I particularly request instructions whether I should obtain an affidavit from Wall in support of the application for leave to prosecute to the effect that he did not give the document mentioned by McGovern and McDonald to McDonald until the 14th December, when it has come to my knowledge that he has made a statement conflicting therewith.

I have, &c.,

GEO. COLQUHOUN,
Crown Solicitor.

The Secretary to the Attorney-General.

Submitted.—H.P., 16/2/00.

As this case has attracted public attention, and in the interests of police, every facility should be given them for public investigation. I think it better to apply to a Judge for leave to prosecute, though I think that when he sees that there is no confirming testimony of Wall, and reads Wall's letter, which must be brought before him, the leave will not be granted.—B.R.W., 17/2/00.

Papers and Reports obtained after Proceedings for Perjury were decided on.

Sir,

245, Pitt-street, Sydney, 21 February, 1900.

Having been informed that you are desirous of communicating with C. Harrison and J. Wall in the matter of a complaint I have made to the Honorable the Minister for Justice about Constables McGovern and McDonald, I beg to inform you that J. Wall has returned to his home at Bemboka (late Lyttleton), N.S.W.; that C. Harrison is at present in Melbourne, Victoria, and his address is care of Coffee (Victoria) Palace, Collins-street, Melbourne. Harrison will not return to N.S.W. until about the 10th March next. If it will facilitate matters, Harrison will make any statutory declaration of facts within his knowledge before a Commissioner for Affidavits for the Colony of N.S.W., and forward them to you from Melbourne. I am prepared to attest to the following facts:—1. Constable McDonald did not make the wager he alleged he did with Harrison on the 9th December, 1899. 2. Harrison did not write the receipt as McDonald swore he did. 3. J. Wall did make the wager he (Wall) alleges he did (as per his statutory declaration). 4. That the receipt produced by McDonald was forwarded to Candelo to Wall, N.S.W., on the 20th September, 1899.

Yours, &c.,

THOMAS M. ROSE.

Mr. Tillett, Crown Law Office, Sydney.

(1900/193, Crim. Law.)

Sir,

Crown Solicitor's Office, Sydney, 26 February, 1900.

In accordance with your instructions to apply for leave to prosecute Constables McGovern and McDonald for perjury, alleged to have been committed by them, heard at the Central Police Court on the 29th December last, I have caused inquiries to be made with a view of obtaining affidavits to support the application to a Judge for the necessary orders. I have learned that Joseph Wall, who, it is stated, can give material evidence, is at present residing with his brother at Bemboka, and I have the honor to request that you will direct inquiries to be made through the police there whether he is willing to make affidavits in support of the charge.

I particularly desire that he should be requested to state whether he adheres to the statement that the document of which I enclose a copy was not given by him to Constable McDonald until the 14th December last, in view of his previous statement in his letter to H. Oxenham on the 29th December, wherein he mentions having given the document to McDonald to enable him to get a bet at the "coming races at Canterbury Park, which were held on the 9th December"; and if he adheres to his statement, what explanation he offers with regard to this letter.

I understand, too, that the document referred to by Wall was obtained from some friend's house at Woollahra. If this be so, he should be requested to give his friend's name and address.

I desire Wall to be informed that he must be careful to tell the truth about this matter, as should it be proved that he is swearing falsely, he will be prosecuted for perjury.

I have, &c.,

GEORGE COLQUHOUN,
Crown Solicitor, *per* C.E.P.

The Inspector-General of Police.

Commission voucher form. H. Oxenham, 245, Pitt-street, Sydney, 20th September, 1899, to Mr. Joseph Wall, Canelo.

(All claims are paid immediately on receipt of this voucher.)

Dear Sir,

As per instructions contained in your esteemed communication of the 16th September, I have procured for you as follows:—

Odds.	Horse.	Race.	Date.
33 to 1	Chief	Caulfield Cup	'99
50 to 2	War God	Melbourne Cup	

Cheque for £3 received with thanks.

Yours truly,
H. OXENHAM.

Re Case Potter *v.* Harrison.

Police Station, Bemboka, 2 March, 1900.

Senior-sergeant Moss begs to report that he interviewed Joseph Wall with regard to the above case.

He was shown the copy of the document (attached to Crown Solicitor's letter), and was asked could he recognise anything in connection with it. He said, "Yes, it is a copy of a voucher I gave to Constable McDonald." He was asked, "When"; he said, "The 14th December."

The senior-sergeant then said, "Did you ever write to Mr. Oxenham about having given a document to McDonald"; he said, "No, I called on him"; the senior-sergeant said, "Are you sure you never wrote about it"; he said, "No." The senior-sergeant then said, "Did you not, on the 29th December last, write to Mr. Oxenham, and mention in that letter having given a voucher to McDonald to enable him to get a bet on the coming races at Canterbury Park?" he said, "No," then after a short interval said, "I believe I did write to Oxenham, but I don't remember writing about the Canterbury Park Races, if I did, it must have been a mistake. I was excited at the time on account of *Truth* stating that I was mixed up in the matter."

The senior-sergeant then said, "If you mentioned in that letter that you gave the voucher for a bet on account of the Canterbury Park Races, you must now see that the races were over on the day you allege you gave the voucher to him." He said, "That cannot be, for I gave it to him on the 14th."

The senior-sergeant then took the attached statement, after having duly cautioned Wall as directed.

It will be seen in this statement that an offer of a voucher was made five or six days before the 14th, and that Wall did have a voucher in his possession, and he has admitted to the senior-sergeant (after having made the statement) that he did not go out to Woollahra for the express purpose of getting a voucher, but that he found one in his pocket-book there, and gave it to McDonald on his return.

There is a probability McDonald having accepted the offer of the voucher five or six days before the 14th. Wall was a candidate for an appointment in the Service, and no doubt the matter of unlawful betting was discussed, and led up to Wall's offer.

If Wall did write to Oxenham, and mentioned having given the document to enable McDonald to obtain a bet on the "Canterbury Park Races" on 9th December, it seems strange that he should deny it.

Another strange matter is a statement he made to the senior-sergeant when leaving him to-day, that he was "sure Senior-constable McGovern had done nothing wrong." He was asked to explain. He said, "He knew nothing about the writing on the voucher, or about the signature that was supposed to be forged, but he might be confused about the date." He would give no reasons why he made this statement.

Wall appears to have borne a good character in this district; his parents and the other members of the family are very respectable people.

Wall states that he will make an affidavit if called upon to do so.

W. T. MOSS,
Senior-sergeant.

The Superintendent of Police, Goulburn.

Forwarded to the Inspector-General of Police.—E. GRAINGER, Superintendent, 4/3/00. Forwarded to the Crown Solicitor.—E. FOSBERY, B.C., 6/3/00.

Bemboka, 2 March, 1900.

The following statement has been made by Joseph Wall to Senior-sergeant Moss:—

"During the month of December last I was boarding at 266, Elizabeth-street, Sydney. Constable McDonald, with other constables, were boarding there also.

"I have had numerous conversations with McDonald in regard to racing and betting, and on one occasion he asked me who I had bet with. I said, 'I generally bet with Oxenham.' He then said that he would like to get a wager with Oxenham. I said to him, 'If you are anxious to get a wager, I will either give you a personal introduction, or supply you with a voucher which will serve as an introduction.' He said, 'Probably Oxenham will not bet, as he only bets with sportsmen.' I did not give him the voucher then, although I had one on me. I had another one at Woollahra, and I went, five or six days after the above conversation, out to Woollahra, a friend's place, where I obtained it. It was in a pocket-book that I had left there. Mrs. Dwyer is my friend's name, and her address is 47 or 49, Rosebud-terrace.

The

The date that I went to Woollahra was the 14th December last. I remember it, because the day following was my birthday. When I returned to the boarding-house, on the evening of the 14th, I gave the voucher to Constable McDonald.

"I would not say that I did not write to Mr. Oxenham on the 29th December last to the effect that I had given the document to McDonald to enable him to get a bet at the coming races at Canterbury. I know that these races were on the 9th December. If I did write that to Oxenham, I must have made a mistake.

"I only gave McDonald the one voucher, the copy of which has been shown to me by Senior-sergeant Moss.

"I wrote to Mr. Oxenham on the day the case was heard at the Police Court, and on the 2nd January I called at his office and made a statement to Mr. Rose, his manager. That statement was taken down, and I signed it. I mentioned in that statement that it was the 14th December that I gave the voucher to McDonald. I saw him, when I gave it to him, write something in pencil across the corner of it, but I could not swear what it was he wrote. He had asked me what wager I got from Oxenham, and I told him thirty shillings to five. I could not swear that McDonald put those figures on the paper.

"I have read the whole of the within-written statement, and it is correct.

"JOSEPH WALL."

(Crim. L., 1900/111.)

Re Prosecution of McGovern and McDonald for Perjury.

Sir,

Crown Solicitor's Office, Sydney, 10 March, 1900.

I have the honor to forward herewith two affidavits to be made by Joseph Wall, of Bemboka, and to request that you will direct the officer of police at Bemboka to get these affidavits sworn by Wall before a Commissioner for Affidavits, and return to me.

I have, &c.,

GEO. COLQUHOUN,

Crown Solicitor.

The Inspector-General of Police.

Supt. Grainger for prompt attention, and Senr.-sergt. Moss.—E. FOSBERY, I.-G.P., 10/3/00. For prompt attention.—E. GRAINGER, Supt., 12/3/00. S.-S. Moss, Bega. Affidavits by Joseph Wall completed and returned to Superintendent's Office.—W. T. Moss, Sen.-sergt. The Supt. of Police, Goulburn. Affidavits completed and returned herewith to Inspector-General of Police.—E. GRAINGER, Supt., 22/3/00. The Crown Solicitor.—EDMUND FOSBERY, I.-G.P., 23/3/00.

MEMO.

Police Station, Bega, 17 March, 1900.

Re prosecutions of S.-C. McGovern and Constable McDonald for perjury, and affidavit forwarded to Bega to be completed by Joseph Wall.

Wall is at present away from the district, and may not return for a few days. Upon his return immediate steps will be taken to procure his affidavit.

W. T. MOSS,

Senior-sergeant.

The Superintendent of Police, Goulburn.

(Crim. L., 1900/163.)

Re Prosecution of McGovern and McDonald for Perjury.

Sir,

Crown Solicitor's Office, Sydney, 9 April, 1900.

The above cases will be heard at the Central Police Court on the 20th instant, and I have the honor to forward herewith subpoenas for Joseph Wall, of Bemboka, and to request that they may be served upon him, and arrangements made for his attendance in Sydney to give evidence.

I have, &c.,

GEO. COLQUHOUN,

Crown Solicitor.

The Inspector-General of Police. Forwarded for attention.—E.F., Inspector-General of Police. Superintendent of Police, Goulburn. For attention and report.—N. FENTON, Insp., ab. Supt., 11/4/00. S.-S. Moss, Bega.

New South Wales, Sydney, }
to wit. }

156911. To Joseph Wall, Bemboka.

Regina
v. McGovern
and another.

You are hereby commanded that, all excuses being laid aside, you be and appear in your own proper person before the Court of Petty Sessions, at the Central Police Court, Sydney, on Friday, the 20th April instant, at ten of the clock in the forenoon, and so from day to day as may be required of you, to testify all and singular what you know in a certain cause referred to in the margin hereof, now depending and undetermined, then and there to be tried, at your peril fail not.

Given under my hand and seal this 9th day of April, 1900,—

M. S. LOVE, P.M.

(Magistrate's Seal.)

Perjury.

Martin Filan, Senior-constable of Police, maketh oath that he served a duplicate of the within subpoena on Joseph Wall personally at Mogilla, on the 14th day of April, 1900.

Memo.

Memo.

Police Station, Bega, 13 April, 1900.

Regina v. McGovern and another—Perjury—for Central Police Court on 20th instant.

SUBPŒNAS herewith for service on Joseph Wall. Duplicate to be endorsed with usual affidavit of service, and to be returned to this station with report as to probability of witness attending.

Witnesses attending Police Courts, on behalf of the Crown, are allowed necessary and actual out-of-pocket expenses.

Senior-constable Filan, Bemboka.

W. T. MOSS, Senior-sergeant.

Subpœna served and duplicate returned herewith. Wall states he will leave for Sydney on Tuesday or Wednesday next.

M. FILAN, Senior-constable,

Senior-sergeant Moss, Bega.

14/4/1900.

Forwarded to the Superintendent.—W. T. Moss, Senr.-sergt, 15/4/00. The Supt. of Police, Goulburn. Forwarded to the Inspector-General of Police.—N. FENTON, Insp., ab. Supt., 17/4/00. Forwarded.—E. FOSBERY, Inspector-General of Police, 18/4/00. The Crown Solicitor.

SUMMONS.—To Charles Harrison, of the Metropolitan Police District, in the Colony of New South Wales. WHEREAS information hath this day been laid before the undersigned, one of Her Majesty's Justices of the Peace, in and for the said Colony of New South Wales, for that you did, on the ninth day of December instant, use a certain place, to wit, a shop situate at 245, Pitt-street, Sydney, in the metropolitan police district, in the said Colony, for the purpose of money being received by you as or for the consideration for a promise to give thereafter certain money on a contingency relating to a certain horse-race called the Flying Handicap, thereafter to be run at the Canterbury Park Racecourse, Canterbury, on the ninth day of December, 1899.

These are, therefore, to command you, in Her Majesty's name, to be and appear on Friday, the twenty-ninth day of December instant, at ten of the clock in the forenoon, at the Central Police Office, Sydney, in the said Colony, before such stipendiary magistrate or stipendiary magistrates for the metropolitan police district in the said Colony as may then be there, to answer to the said information and to be further dealt with according to law.

Given under my hand and seal, this nineteenth day of December, in the year of our Lord one thousand eight hundred and ninety-nine, at Sydney, in the said Colony.

M. S. LOVE, P.M.

Affidavits of Charles Langby, Thomas M. Rose, Joseph Wall, in connection with application of Inspector-General of Police for leave to institute the prosecution, or to direct the prosecution to be instituted, of Cecil McDonald and Patrick McGovern for perjury.

IN THE SUPREME COURT OF NEW SOUTH WALES.

In the matter of the application of the Inspector-General of Police for leave to institute the prosecution, or to direct the prosecution to be instituted, of Cecil McDonald for perjury; and in the matter of the Criminal Law Amendment Act of 1883.

ON this nineteenth day of March, in the year of our Lord one thousand nine hundred, Charles Langby, of Sydney, in the Colony of New South Wales, clerk, being duly sworn, maketh oath and saith as follows:—

1. I am usually known by the name of Charles Harrison, and am a clerk employed in the betting-house of Humphrey Oxenham, kept at 245, Pitt-street, Sydney, and I was the defendant in the case of Potter *v.* Harrison, heard at the Central Police Court, Sydney, on the twenty-ninth day of December last, wherein I was charged with a breach of the Act for the Suppression of Betting-houses, 39 Victoria No. 28.

2. I know Constable Cecil McDonald, who gave evidence against me on the hearing of the said charge, and I say he did not enter the betting-house of the said Humphrey Oxenham on the ninth day of December last.

3. The said Cecil McDonald did not make with me any bet on the Flying Handicap, Canterbury Park Races, on the ninth day of December last, or any other bet.

4. I did not produce any book for the said Cecil McDonald to sign his name in, and the said Cecil McDonald did not write in any book in the said Humphrey Oxenham's betting-house the initials "J.C.W."

5. The said Cecil McDonald did not produce any voucher to me and ask me to write the bet on it, and I did not write the memorandum of the bet on the document marked 'A' in the said case.

6. One Joseph Wall did take with me a bet of twenty-five shillings to five shillings on Victory for the Flying Handicap, at Canterbury Park Races, on the ninth day of December last.

To H. Oxenham, Esq.,—

Sydney, 29 December, 1899.

Dear Sir,

Having learned that there is some Court case coming off to-day in connection with some wager taken in my name a few weeks ago, perhaps you may be under the impression that I was implicated in the matter, which I would not like you to think that I was of such a mean character. However, I will explain to you how the thing came about. I came to Sydney about a month ago to have a "holiday," and took up my lodgings at 266, Elizabeth-street, in which place Constable McDonald also resided. I being a sporting man, we had a conversation over the coming races at Canterbury Park, and he wished to back a horse for the Flying Handicap, in which I preferred Victory. He informed me that he often backed horses at "Sportman's," "Sterling's," and others, when I remarked that I always dealt with Oxenham, and found him to pay me longer prices than any others quoted. Of course you know that I done a deal of betting with you from Candelo. McDonald said that Oxenham would not bet with him. I produced some vouchers of yours, and I told him to mention my name, and also gave him some vouchers if he wished to take a wager, not thinking that he was only trying to get a wager to make a case out of it (which I have just learned). However, I trust you will exonerate me from all blame in the matter, and I sincerely hope that the case will not injure your business in any respect, and trust in future that you will not hesitate about laying a wager with me; but mind you always get my signature before you do so. I thought I was only doing you a good turn advising McDonald to bet with you, for I was not under the opinion that he was such a "character."

Yours faithfully,

JOSEPH WALL,
266, Elizabeth-street.

This is the copy letter marked "A" referred to in the annexed affidavit of Thomas Manfred Rose, sworn before me this nineteenth day of March, 1900.

C. A. H. REDGRAVE,

IN THE SUPREME COURT OF NEW SOUTH WALES.

In the matter of the application of the Inspector-General of Police for leave to institute the prosecution, or to direct the prosecution to be instituted, of Patrick McGovern for perjury; and in the matter of the Criminal Law Amendment Act of 1883.

ON this nineteenth day of March, in the year of our Lord one thousand nine hundred, Thomas Manfred Rose, of Sydney, in the Colony of New South Wales, clerk, being duly sworn, maketh oath, and saith as follows:—

1. I am the manager of a betting-house carried on by Humphrey Oxenham at 245, Pitt-street, Sydney, in the Colony of New South Wales.

2. I was present at the Central Police Court on the twenty-ninth day of December last during the hearing of the case Potter *v.* Harrison, and heard the evidence given upon oath by Patrick McGovern, as set forth in his deposition taken in such case.

3. I know Constable McDonald, who also gave evidence in the said case of Potter *v.* Harrison.

4. I was present in Oxenham's shop in Pitt-street, Sydney, on Saturday the ninth day of December last, from half-past nine in the forenoon until twelve o'clock noon, and saw every person who entered the said shop.

5.

5. Constable McDonald, the person referred to by the said Patrick McGovern in his said evidence, did not enter H. Oxenham's betting-shop in Pitt-street, Sydney, between the hours of half-past nine o'clock in the forenoon and twelve o'clock noon.

6. On the twenty-ninth day of December last past I received from Joseph Wall, the person referred to in the depositions taken upon the hearing of the said charge, a letter, of which a copy is hereunto annexed, marked "A".

Sworn by the deponent on the day first above }

ON this nineteenth day of March, in the year of our Lord one thousand nine hundred, Thomas Manfred Rose, of 245, Pitt-street, Sydney, in the Colony of New South Wales, being duly sworn, maketh oath and saith as follows:—

1. I am the manager of a betting-house carried on by Humphrey Oxenham, of 245, Pitt-street, Sydney, in the said Colony.

2. I was present at the Central Police Court on the twenty-ninth day of December last during the hearing of the case *Potter v. Harrison*, and heard the evidence given upon oath by Cecil McDonald as set forth in his deposition taken in such case.

3. I was present in Oxenham's betting-house in Pitt-street, Sydney, on Saturday, the ninth day of December last, from half-past nine in the forenoon until twelve o'clock noon, and saw every person who entered the said house between those times; and I was supervising the betting carried on in the said house.

4. The said Cecil McDonald did not enter the said betting-house between the hours of nine thirty o'clock in the forenoon and twelve o'clock noon on the ninth day of December last.

5. The said Cecil McDonald did not take any bet with Charles Harrison, a clerk in the said betting-house, on the said ninth day of December last, as stated by him in his deposition in the said case, either under the name of Joseph Wall or under any other name.

6. The said Cecil McDonald was not asked by the said Charles Harrison to write his name or initials in any book in the said betting-house on the ninth day of December last, and there is no book in the said betting-house, or in the possession of Humphrey Oxenham or myself, containing the initials "J.C.W." written by the said Cecil McDonald.

7. The said Charles Harrison did not write the memorandum of the bet which appears upon Exhibit "A" in the said case at the request of the said Cecil McDonald on the ninth day of December last, and I am well acquainted with the handwriting of the said Charles Harrison, and I say that the said memorandum of the bet is not in the handwriting of the said Charles Harrison.

8. On the twenty-ninth day of December last, while I was present in the Central Criminal Court, I saw the said Cecil McDonald write the memorandum marked as the document written by Constable McDonald.

9. On the twenty-ninth day of December last I received a letter from one Joseph Wall, of which a copy is hereunto annexed, marked "A."

EXHIBIT No. 10.

Tindall v. McDonald, Central Police Court, Sydney, 17/5/00; Wm. J. Camplin, Depn. Clerk; marked for identification (1).—E.S.S., Associate. WALKER JAMES.

CERTIFICATE under section 23 of the Evidence Act 11, 1898.

I, the undersigned, Clerk of Petty Sessions at the Central Police Office, in the City of Sydney, in the Colony of New South Wales, being the officer having ordinarily the custody of the records or documents or proceedings or minutes of the Court of Petty Sessions at the office aforesaid, showing the convictions, sentences, orders, or acquittals, had, passed, or made before the Stipendiary Magistrates for the Metropolitan

Metropolitan Police District in the said Colony sitting in Petty Sessions at the Central Police Court, do hereby certify that on the twenty-ninth day of December, in the year of our Lord one thousand eight hundred and ninety-nine, there existed a certain proceeding wherein one Charles Harrison was at the said Central Police Court charged before George Henry Smithers, Esquire, one of her Majesty's Stipendiary Magistrates in and for the Metropolitan Police District in the said Colony, for "that he, the said Charles Harrison, did on the ninth day of December, in the year of our Lord one thousand eight hundred and ninety-nine, use a certain place, to wit, a shop situate at 245, Pitt-street, Sydney, in the Metropolitan Police District in the said Colony, for the purpose of money being received by him as or for the consideration for a promise to give thereafter certain money on a contingency relating to a certain horse-race called "Flying Handicap," thereafter to be run at the Canterbury Racecourse, Canterbury, on the ninth day of December, 1899, contrary to the Act in that case made and provided," and after hearing the evidence adduced, he, the said Charles Harrison, was by the said Magistrate discharged of the said offence.

Given under my hand at the Central Police Office, in the City of Sydney, this twentieth day of April, A.D. 1900.

M. S. LOVE, P.M.,
C.P.S. and Chamber Magistrate.

To H. Oxenham, Esq.,—

Sydney, 29 December, 1899.

Dear Sir,

Having learned that there is some Court case coming off to-day in connection with some wager taken in my name a few weeks ago, perhaps you may be under the impression that I was implicated in the matter, which I would not like you to think that I was of such a mean character. However, I will explain to you how the thing came about.

I came to Sydney about a month ago to have a "holiday," and took up my lodgings at 266, Elizabeth-street, in which place Constable McDonald also resided. I being a sporting man, we had a conversation over the coming races at Canterbury Park, and he wished to back a horse for the Flying Handicap, in which I preferred Victory. He informed me that he often backed horses at "Sportsman's," "Sterling's," and others, when I remarked that I always dealt with Oxenham, and found him to lay me longer prices than any others quoted. Of course you know that I done a good deal of betting with you from Candelo. McDonald said that Oxenham would not bet with him. I produced some vouchers of yours, and I told him to mention my name, and also gave him some vouchers if he wished to take a wager, not thinking that he was only trying to get a wager to make a case out of it (which I have just learned). However, I trust you will exonerate me from all blame in the matter, and I sincerely hope that the case will not injure your business in any respect, and trust in future that you will not hesitate about laying a wager with me, but mind you always get my signature before you do so. I thought I was only doing you a good turn advising McDonald to bet with you, for I was not under the opinion that he was such a "character."

Yours, &c.,

JOSEPH WALL,
266, Elizabeth-street.

Coram Simpson, J., 4/6/00. Reg. v. McGovern. Prisoner's Exhibit "1."—E.S.S., Associate.

STATUTORY DECLARATION.

Exhibit E.—Reg. v. McGovern, perjury. Deposition Clerk, Water Police Office, Sydney.—9/4/1900.

Exhibit No. 14.—Tindall v. McDonald, Central Police Court, Sydney, 18/5/1900.—WM. J. CAMPBELL, Deposition Clerk.

I, Joseph Wall, of 266, Elizabeth-street, Redfern, do solemnly and sincerely declare as follows:—On the 9th day of December, 1899, I made the following wager with a clerk in the employ of H. Oxenham, 245, Pitt-street, Sydney—the name of the clerk, I believe, is C. Harrison; the wager was 25s. to 5s.—Victory, for the Flying Handicap, to be run at Canterbury Park, on the 9th December, 1899; I informed Constable McDonald, of Redfern Station (while in conversation), that I had taken the said wager; on the 14th December, 1899, I gave Constable McDonald a voucher I had in my possession, and which I had previously received from H. Oxenham, when I resided at Candelo; the said voucher referred to some bets I had with H. Oxenham over the Melbourne Cup of 1899, and was dated, I believe, September 20th, 1899; Constable McDonald then wrote with pencil something on the voucher; I believe it was “30s. to 5s., Victory, Canterbury Park Races”; the reason why I gave Constable McDonald the voucher was to enable him to get a wager from H. Oxenham, as it served as an introduction; did not give it to him to enable him to entrap H. Oxenham—simply to obtain a wager.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of Her present Majesty, intituled, “An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the suppression of voluntary and extra-judicial Oaths and Affidavits.”

Subscribed and declared at Sydney, this 2nd day of }
January, 1900, before me,—

JOSEPH WALL.

JOHN BENNETT, J.P.

Coram Simpson, 4/6/00. Reg. v. McGovern. Crown's exhibit D.—E.S.S., Associate.

Coram Simpson J., 4/6/00. Reg. v. McGovern. Crown's exhibit B.—E.S.S., Associate.

Coram Simpson J., 4/5/00. Reg. v. McGovern. Crown's exhibit B.—E.S.S., Associate.

Mr. Tillett for the prosecution. Mr. T. M. Slattery for the defendant. Pleads: Not guilty.

This deponent, on oath, saith my name is Patrick McGovern; I am a senior-constable of police stationed in Sydney; on Saturday, 9th instant, I saw Constable McDonald about ten minutes to 10, and gave him 5s. and certain instructions; he went to Oxenham's, in Pitt-street, Sydney; he remained some short time, and came out; he told me something, and also showed me a certain paper he had; I produce it; the place referred to is in the Metropolitan Police District; on the following Tuesday, about 1 p.m., I called at the shop with the constable; defendant was behind the counter; the constable pointed to him and said, “This is the man who laid me the wager on Saturday”; I asked his name; he hesitated a while, and a man named Rose came on the scene, and he said, “His name is Charles Harrison”; Rose said, “You will have a hard job proving this case”; Mr. Oxenham was also there; they were abusing the constable, Rose being the principal one.

To Mr. Slattery: The 5s. consisted of shillings, as far as I remember; Mr. Oxenham did say to the constable to clear out, and that he ought to be ashamed to come and try to get bets there and trap the young man in his absence.

To Mr. Tillett: The Flying Handicap is a horse-race run at Canterbury Park.

To Mr. Slattery: I swear the Flying Handicap was run at Canterbury Park that day; I was not there; I could not swear of my own knowledge that the race was run there.

Taken and sworn at the Central Police Court, Sydney, }
this 29th day of December, 1899, before me,—

P. MCGOVERN.

GEORGE H. SMITHERS, S.M.

Exhibit No. 3.—Tindall v. McGovern. Central Police Court, Sydney. 1/5/00.—WM. J. CAMPBELL, Depon. Clerk.

IN THE SUPREME COURT OF NEW SOUTH WALES,—

IN the matter of the application of the Inspector-General of Police for leave to institute proceedings, or to direct proceedings to be instituted, for the prosecution of Patrick McGovern for perjury; and in the matter of the Criminal Law Amendment Act of 1833. Tuesday, the 3rd day of April, in the year of our Lord one thousand nine hundred.

UPON reading the affidavits of Charles Langby and William Manfred Rose, sworn herein on the nineteenth day of March last, and the affidavit of Joseph Wall, sworn herein on the twentieth day of March last, and the depositions taken in the case of Potter v. Harrison, and upon hearing the Crown Solicitor, I do order that the Inspector-General of Police be at liberty to institute proceedings, or to direct proceedings to be instituted, against Patrick McGovern, of Sydney, in the said Colony, for perjury committed by him in the hearing by G. H. Smithers, Stipendiary Magistrate and a Justice of the Peace, on the twenty-ninth day of December last, at the Central Police Court, at Sydney, in the said Colony, of the charge against Charles Harrison of committing a breach of the Act for the Suppression of Betting-houses, 39 Vic. No. 28.

IN

IN THE SUPREME COURT OF NEW SOUTH WALES.

IN the matter of the application of the Inspector-General of Police for leave to institute proceedings, or to direct proceedings to be instituted, for the prosecution of Cecil McDonald for perjury; and in the matter of the Criminal Law Amendment Act of 1883. Tuesday, the 3rd day of April, in the year of our Lord one thousand nine hundred.

UPON reading the affidavits of Charles Langby and William Manfred Rose, sworn herein on the nineteenth day of March last, and the affidavit of Joseph Wall, sworn herein on the twentieth day of March last, and the depositions taken in the case of Potter v. Harrison, and upon hearing the Crown Solicitor,— I do order that the Inspector-General of Police be at liberty to institute proceedings, or to direct proceedings to be instituted, against Cecil McDonald, of Sydney, in the said Colony, for perjury committed by him in the hearing by G. H. Smithers, Stipendiary Magistrate and a Justice of the Peace, on the twenty-ninth day of December last, at the Central Police Court, at Sydney, in the said Colony, of the charge against Charles Harrison of committing a breach of the Act for the Suppression of Betting-houses, 39 Victoria No. 28.

W. GREGORY WALKER, J.

Geo. Colquhoun, Crown Solicitor.

Exhibit A.—Reg. v. McDonald, perjury; Deposition Clerk, Water Police Office, Sydney, 8/5/00.

Coram Simpson, J., Exhibit B (part), Associate.

THIS deponent, on oath, saith:—My name is Cecil McDonald; I am a constable of police, stationed in Sydney; on the 9th instant I went with Senr.-const. McGovern to Pitt-street, Sydney, to H. Oxenham's; he had given me certain instructions and 5s.; I then went into Oxenham's—got a bet; I saw the defendant there; I just asked him for a bet, and he gave it; I asked for 5s. worth of Victory for the Canterbury Park Races, Flying Handicap; he said all right; I asked for a ticket then; he said, "We don't give tickets"; he then produced a book for me to sign my name in it; I put "J.C.W." in the book opposite Victory; the book shown me is not the one I initialled; I did not consider that good enough, so I produced a voucher and I asked him to write the bet on it; he did so, and I now produce it (marked "A," and put in); the odds were 6 to 1; I went out, saw McGovern, and gave the voucher to him; I gave defendant 5s. in consideration of the bet.

To Mr. Slattery: I have told all that took place that day as far as I can remember; I got the money in single shillings; I saw the defendant write the pencil on the voucher, but I wrote "J. Wall," in pencil [*witness here writes certain words to the dictation of Mr. Slattery*]; that race mentioned on the voucher is the race I bet on; the wager was got about 10 o'clock; I did not say to defendant, "Are you betting to-day?" he did not say, "Yes, with our clients, but I cannot bet with you, as I do not know you;" I did not say, "I am Mr. Wall, of Candelo;" he did ask me if I had a voucher to prove I was Mr. Wall; I had told him I was a "Mr. Wall," but not "of Candelo;" my name is not Wall; in saying I was Wall I made a false statement for the purpose of making him break the law; I did produce a letter to prove I was Mr. Wall (the voucher, but not the letter); I got the voucher from Mr. Wall, of Candelo, a friend of mine; I do not know his trade; I knew him three or four months at Sydney; I was never in Candelo; Wall was in Sydney when he gave me the voucher, and is now; he had nothing to do with this case; he had no idea what I wanted the voucher for; he knew it was to enable me to get a bet from Oxenham; I knew Wall could get any betting he wanted on "Honor"; Wall does not know anything about my using his name for this matter; I did not know he was manager of a butter factory; I am satisfied he is not manager of the butter factory at Candelo; he may have been; after I produced the paper I asked the price of Victory, and he said "six to one"; he did not ask for any money; after the wager was made I paid the money to him instead of having it booked; I do not know anything about booking the bets; there was no one with me when the bet was made.

To Bench: I had seen Wall with the paper at the boarding-house I stayed at, and I asked him to let me have it to get a bet.

To Mr. Slattery: I swear that the defendant wrote the words in pencil on the voucher; I swear defendant did. [*Mr. Oxenham's day book put in by Mr. Tillet and marked "B."*]

Taken and sworn at the Central Police Court, Sydney, } CECIL McDONALD.
this 29th day of December, 1899, before me,— }

GEORGE H. SMITHERS, S.M.

1900.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

DISTURBANCES BETWEEN THE MILITARY AND A CERTAIN SECTION OF THE PUBLIC KNOWN AS "PUSHES."

(POLICE REPORTS RESPECTING.)

Printed under No. 2 Report from Printing Committee; 28 June, 1900.

Mr. Superintendent N. Larkins to the Inspector-General of Police.

Memo.

Superintendent's Office, Sydney, 4 June, 1900.

THE attached reports from Inspector Potter, Sub-Inspector Bell, and Senior-sergeant Broderick disclose a very unsatisfactory state of things. If the Military are allowed to continue such tactics the result will, in my opinion, be very serious. It may be that some members of the Artillery were badly treated, but they must be prevented from taking the law into their own hands for the purpose of redressing their grievances.

The disturbance on Saturday night might have been far more serious than it was, were it not for the fact of the police having been forewarned.

There was a picket of twenty-five or thirty of the Artillery at the Central Police Station for the purpose of assisting the police in the event of any serious disturbance, but, as it happened, they had a tendency to complicate matters. When they appeared in the street the crowd surrounded them in thousands, and that provided the evil-doers with sufficient cover to enable them to assault several persons without the chance of being identified.

In future I would prefer to rely on the police if any emergency of this sort should arise, but I think the military should be prevented from forming into companies in the public streets for aggressive purposes.

N. LARKINS,

Superintendent.

Submitted for the Chief Secretary's information.—EDM. FOSBERY, I.G.P., B.C., 4/6/00. The Principal Under Secretary.

Mr. Inspector A. Potter to The Superintendent of Police, Metropolitan District.

Re Artillery and the "Pushes."

Sir,

No. 1 Police Station, 3 June, 1900.

I respectfully beg to report for your information respecting the above matter, that during the past week disturbances have arisen between the above parties. From what can be ascertained it appears that a number of the soldiers have been assaulted by the young fellows about the Haymarket and Engine-street, known as the "Cow-lane Push," with the result that some of the former are in hospital from various injuries received.

On Thursday night last a number of the artillerymen attacked some persons in Market-street, who it was alleged were the assailants of their comrades. The matter became a breach of the peace, whereupon the police took action and the offenders received punishment. Last night (Saturday) a number of the soldiers were in town going about in small parties with a following of the young men who frequent the streets on Saturday nights, and are known as the "Straw-hat Push," who, no doubt, urged by their speech and presence the unwise conduct of the young artillerymen, while, no doubt, they (the push) would have been secretly glad to see the larrikin class give them a beating. This state of things continued for nearly two hours, when about 9 p.m. a lot of larrikins came up from the direction of the Haymarket to the front of the Cathedral and there, under the cover of the trams, threw several, at least three, bottles at some of the artillerymen who were walking round as I have described. The matter for a time appeared to be very serious, and the efforts of the police were frightfully hampered by the presence of the crowds of respectable people whose small amount of common sense is so apparent on such occasions. Constable Williams had one of his hands cut with a piece of glass. Two of the soldiers defended themselves with their belts against some of the crowd. No other actual injury was done.

Unfortunately, the persons could not be identified owing to the crowd and the general similarity of appearance to be found amongst all larrikins, whether of the respectable-looking class or otherwise.

After this the police managed to induce a number of the soldiery to go down to the Central Police Station, where a picket was on reserve, and finally, about 11 p.m., when the streets regained their normal quietness, the picket returned to Victoria Barracks,

From what I can make of the matter it is simply this: The Artillery are determined to give a certain section of the community a thrashing; that section is equally determined to return it. The police have to maintain order without taking sides, and are thus exposed to the danger of attack from both parties. The police are reluctant to resort to force, knowing from experience that the really guilty parties are the most likely to escape, generally operating from points chosen for that purpose. I may here mention that military pickets have been sent for duty since the Market-street affair, but it must be admitted the course does not work well, however well-meant, the public not being able, or perhaps willing, to discriminate between those on duty and those off. It may also happen that those on picket one night may be engaged in endangering the peace the next. In making this report and my mention of the artillerymen, I must here state that I refer to the new detachment just enrolled. They appear to be very young, and, therefore, lack the experience of the older members of that service of whose uniform good conduct for many years past I gladly bear witness.

I would, therefore, recommend the discontinuance of the pickets for the reasons given, or if this cannot be done, that the military officer in charge of such to be empowered by his authorities to deal with men acting in the streets in a way calculated to create disturbance. If some such step of like nature is not taken, this state of things must at last culminate in a serious matter, and no doubt to the, for a long time, damage of the military as a body in the public mind.

I subjoin a list of casualties as far as known to me of Saturday night's work:—

A soldier who received a blow on the back of the head, he said with a bottle, but a respectable civilian said the bottle fell short of him. No doubt he must have been struck in some other way.

A civilian, name not unknown, said to have been beaten by soldiers in York-street near the Markets.

A young man named Colé, in the employ of Mr. Thom, hotel-keeper, York-street, beaten by soldiers with belts, his back bruised; the poor fellow, quite innocent of any offence, mistaken for some other person.

A soldier while marching on picket duty, stabbed in the right arm, fortunately not very deep, by one of the public; can only be described as a tall man.

Constable Jackson of this station kicked on the leg by one of the crowd while arresting John Baikie, a Third Contingent man, and a volunteer (in private clothes) named William Henry Harris, for riotous behaviour in George-street. Jackson now off duty.

I have, &c.,

ALFRED POTTER,

Inspector.

Mr. Sub-Inspector J. Bell to Mr. Superintendent N. Larkins.

Sir,

No. 2 Station, 4 June, 1900.

I have the honor to report that on the night of the 28th instant about fifty soldiers, consisting of R. A. Artillery and Third Contingent, marched in a body along George-street, and turned into Engine-street. A bystander inquired if they were out for drill, and he was told that he would soon see some fun. Two police in plain clothes, having listened to their conversation, learned that they were looking for some young fellows who had assaulted one of their comrades a few nights previous. Detective West told them that they should take proceedings against the persons in a Police Court, and not attempt to take the law in their own hands, as the course they were threatening to pursue would render them liable to severe punishment.

Again, on the night of the 30th, about the same number came to the corner of Engine-street, and a man under the influence of drink spoke about fighting men, and a resident informed me that the soldiers knocked him down and kicked him. He was in an unconscious condition for some minutes. The soldiers then left quickly, and went along Ultimo-road, Harris-street, William Henry street, and the police thought they had dispersed, but about half an hour later heard of a disturbance in Market-street between soldiers and civilians.

I have, &c.,

JOHN BELL,

Sub-Inspector.

Mr. Senior-sergeant J. H. Broderick to Mr. Superintendent N. Larkins.

No. 2 Police Station, 4 June, 1900.

SENIOR-SERGEANT BRODERICK respectfully begs to report that about 7:30 p.m. the 2nd instant (Saturday), about fifty members of the Permanent Artillery Force and Third Contingent in uniform, with several others in plain clothes, under the guidance of a leader, marched down George-street to Engine-street, where they halted, the plain-clothes men acting as scouts. They shoved several persons off the footpath on their way down.

They returned as far as Hay-street to Pitt-street, followed by a large crowd. They traversed Hay-street, along Pitt, Campbell, and Castlereagh streets, and when opposite the New Masonic Hall they assaulted some civilians. The police interfered and prevented further trouble. They continued their march towards the city. The senior-sergeant in the meantime telephoned information to the Central Police Station. About 9 p.m. a smaller band of them returned in twos and threes with the usual plain-clothes scouts, several of whom were under the influence of drink, and went by Hay and Engine streets until opposite Christ Church, followed by a few police. They again returned and went towards the city. After passing Liverpool-street a gang of over 100 larrikins, armed with sticks and their pockets filled with stones and bottles, followed the military, whom they overtook in George-street, near Bathurst-street, and before the police could interfere a fight occurred between them. The military used their belts freely, whilst the opposing side threw stones and bottles. By dint of hard work and great determination the police succeeded in averting a very serious riot.

The military got mixed in the crowd, which was very dense, and a few individual skirmishes took place; and when, at the corner of Bathurst and Pitt streets, serious trouble seemed imminent, the senior-sergeant induced several of the military to come with him to the Central Police Barracks for protection.

Large crowds surrounded the police and military down Pitt-street, and the police had great difficulty in forcing their way through and keeping them back until they arrived at the Central Barracks. During a skirmish in Bathurst-street, whilst the senior-sergeant was endeavouring to get the military to the Police

Police Barracks, a man in the crowd aimed a blow at the senior-sergeant's head with some large sharp weapon which struck Constable Williams on the hand and broke one of his fingers. The military, as well as the pickets, remained at the barracks until 11 p.m., when they had to be escorted by police to Paddington Barracks.

There is no doubt but that the military on these, as well as former occasions, came specially for the purpose of fighting, whilst the opposite faction had been also organising to resist and attack the military, who by their frequent organised visits and aggressive behaviour were evidently endeavouring to provoke a fight; and their conduct was, and is, a very great source of danger to the law-abiding citizens and the peace of the city.

J. H. BRODERICK,
Senior-sergeant.

Minute Paper to the Inspector-General of Police.

Subject:—Disturbances in Streets of Sydney between the Artillery and a number of persons called "The Push."

Sydney, 11 June, 1900.

WITH reference to the conversation I had with you a few days ago, when Major-General French and Superintendent Larkins were present, relating to the aggressive and unseemly conduct of a number of persons in Sydney called "The Push," I desire that you will at once take all the necessary steps to prevent a recurrence of the disturbances that have recently taken place in the streets of Sydney between the Artillery and that body of persons, and that you will be so good as to furnish me as early as possible with a report relating to the whole matter.

JOHN SEE.

Referred to Superintendent Larkins. I desire a report from him on this subject; also one from each of the Divisional officers. Judging from letters and other complaints I have received of late, the disorderly class referred to have taken advantage of the large number of police withdrawn from the streets for special duty to cause annoyance, but I am satisfied such misconduct has not justified the sensational reports made. The officers should report whether or not there has been any increase in the so-called "larrikinism" in Sydney; also if apprehensions have been more numerous for such offences as riotous behaviour, assault, obscene and profane language, &c., &c., or the reverse; whether the punishment inflicted for such offences has been exemplary and deterrent in its effect; whether the provisions of the Industrial Schools Act have been enforced with sufficient vigour as affecting idle and ill-conducted lads under 16; if the class of so-called larrikins consists to any extent of lads who are earning a livelihood by honest employment; if an enactment were passed with a clear and decisive "move on" clause—also making "disorderly" behaviour an offence when committed in company by a certain number of men or lads together—would be beneficial.—E.F., I.-G.P., 12/6/1900. Superintendent Larkins.

Mr. Superintendent N. Larkins to the Inspector-General of Police.

Re Recent Disturbances, Artillery *v.* "Pushes," referred to in Chief Secretary's and Inspector-General's attached Minutes.

Police Department, Superintendent's Office, Metropolitan District,
Sydney, 19 June, 1900.

I HAVE obtained the annexed reports from the officers in charge of the various sub-divisions in my district, *re* above matter, all showing that there is no appreciable increase of the disorderly element, notwithstanding the steady increase of population; that there are no organised "pushes"; that the principal part of the disorder is caused by young men who are mostly earning an honest livelihood during the day, and assemble at the street corners in the evenings, and about the Markets and arcades on the Saturday nights; that the Industrial Schools Act is rigorously enforced; that an Act for loitering or obstructing the footpaths, with a clause making disorderly conduct an offence, would materially assist the police in dealing with the young men referred to.

The above paragraph contains the strength of the officers' reports with regard to existing circumstances, and in the main I agree with them.

Before entering into detail with regard to the disturbances in question, it appears to me the whole affair was considerably overdrawn by the accounts that appeared in the public Press. One section made quite a sensation of it, one blamed the Artillery, another the pushes, another the police, but, in winding up, nearly all condemned the action of the authorities for suspending the leave of the Artillery. To show how far the suspension of the leave was justified, I will try and recapitulate a few of the leading facts. It appears that on Tuesday, 29th ultimo, a few of the Artillery came in contact with what is known as the "Cow-lane Push," in the vicinity of Haymarket. Some disturbance arose, and the Artillery seemed to have got the worst of it. A night or two after the military appeared in stronger numbers, patrolled the Haymarket, Pitt, George, and Market streets, and when in the vicinity of the *Evening News* Office, they made an attack on some civilians, though there was no evidence to show that they were connected with the persons with whom the quarrel originated in the first instance. The police appeared on the scene almost immediately after the occurrence at the *Evening News* Office, and, after some trouble, arrested three or four of the principal offenders. On Saturday evening, 2nd instant, the Artillery came down in stronger numbers, and went about in bodies, large crowds followed them about, and some of the public and police were assaulted during an affray that took place, but the offenders could not be recognised amongst the dense crowd, consequently no arrests were made on that occasion.

Although I am not in a position to state who was the cause of the first row, I think it will be admitted by all law-abiding citizens that the Artillery were in fault on the second and third occasions—first, in taking the law into their own hands, and secondly, attacking persons near the *Evening News* Office, not knowing whether they were parties who quarrelled with them on the first occasion.

Under all the circumstances, I think the suspension of the leave with the view of allowing the men time for reflection was a very judicious course. Some may have concluded that it was a source of satisfaction to the pushes, or that it was interfering with the liberty of the subject, but I think it was in their own interest, as liberty to them while in such an infuriated state of mind might have resulted in very serious

serious consequences. I think many precedents might be found for the suspension of leave in garrisoned towns throughout the Empire, and in the city of Sydney we have had many instances where the naval authorities prohibited their men from visiting certain quarters, or the leave would be stopped while in port. I do not for a moment want to condemn the Artillery as a whole; they have hitherto had an exceptional record for good behaviour, and, in many instances, rendered valuable service to the police. But, while at all times the police are on the alert to put down what is commonly known as the pushes, they cannot stand idly by while any section of the community takes the law into their own hands. After the disturbance on the night of the 2nd instant I made certain police arrangements with a view of preventing any similar recurrence, but I am very pleased to be in a position to say that nothing similar has since transpired. I may add that during the last thirty-seven years we have had periodical outbursts of this description, and I have no doubt will have them again in spite of the most efficient police force; but in this as well as other instances of the sort I saw no necessity for sensation.

N. LARKINS,
Superintendent.

Re Disturbances in the Streets of Sydney between the Artillery and a number of persons called "The Push."

Sir,

No. 1 Police Station, 14 June, 1900.

I have the honor to inform you that there has been no appreciable increase in "larrikinism" in No. 1 Division, though on Saturday nights a number of young men go about the streets, the most noticeable being those called "The Straw-hat Push," but in general their worst behaviour consists of hanging about the footpaths, and, at times, making a disturbance in the arcades and the Markets; but in such cases a few arrests for riotous conduct has proved sufficient to keep things in order. Organised "pushes" of openly violent young men do not exist in this part of the city. The recent disturbances (much magnified in account) appear to have been the outcome of petty quarrels between a few inexperienced soldiers and young men of the larrikin class in another part of the town. This trouble, however, seems to have passed, and it is here respectfully suggested, to prevent a recurrence of it, that some regulation be adopted by the military authorities, whereby the men would be restricted from going into localities inhabited or frequented by persons inimical to soldiers—much as is done in the navy, by the officers putting certain districts "out of bounds," to visit which is to commit an offence. Such a regulation, I am sure, would be willingly complied with by the greater part of the artillerymen.

A return (attached) will show the number of arrests for street offences, and also of male children brought up under the Industrial Schools Act; but the idle and ill-conducted lads are the most difficult persons to deal with. They are a curse to their parents, who, however, are the first to resent police interference with them. Those sent to the "Sobraon" are boys of tender years, and, perhaps, furnish better material for those officers who work for their moral and social improvement.

From my observation of the larrikin class I have found that many of them do—during the day—work at some honest employment, driving carts, selling fruit, &c.

The enactment of a "move on" clause, and the making of disorderly conduct a punishable offence, would very much lessen the want of order in our streets.

The question as to the efficiency of the punishments hitherto inflicted for what is known as larrikinism is a most difficult one to answer, inasmuch as it is at once confronted by the evident fact that the trend of public opinion, for a long time past, is in the direction of increased leniency in dealing with even still greater offences.

I have, &c.,

ALFRED POTTER,

Inspector.

N. Larkins, Esq., J.P., Superintendent.

ALFRED POTTER,

Inspector.

N. Larkins, Esq., J.P., Superintendent.

Re

Re the Inspector-General's Minute respecting Disturbances between the Artillery and others.

Sir,

I have the honor to report that there has not of late been any increase in the so-called larrikinism in this Division. Apprehensions have been less numerous for riotous behaviour, assault, obscene and profane language. This cannot be attributed to the punishment inflicted, which is usually no deterrent. The provisions of the Industrial Schools Act have been enforced whenever practicable. The class of larrikins which infest the neighbourhood known as Surry Hills consists of lads, to a great extent, who are earning their livelihood by honest employment, while another portion are quite young lads who, when brought to Court, are defended by their parents.

In my opinion it would be beneficial if a clause were inserted in the Police Act to deal with loitering.

I have, &c.,

JOHN BELL,

Sub-Inspector.

N. Larkins, Esq., Superintendent.

With reference to Disturbances between Artillerymen and persons called "The Push" and other disorderly persons.

Sir,

I have the honor to report that there has been no disturbances in this Division between the Artillery and "The Push." About 3.15 a.m. on the 6th instant three men went to the front gate of the Victoria Barracks and caused a disturbance there. They averred that they were assaulted in a hotel some hours previous by some soldiers in plain clothes, and that they had come to the Barracks to challenge the soldiers to fight it out. Two of the men were arrested on a charge of riotous behaviour, and also for using obscene language. They were fined 20s. each or seven days' gaol for the riotous behaviour and £3 or one month for using the obscene language. The artillerymen frequent Oxford-street very much; they are usually well-conducted, and have often assisted the police.

(2.) There have not been many extra complaints of late of misconduct or annoyance. Nearly all the complaints have been about boys from 13 years to 17 years of age.

(3.) There has been no increase of larrikinism in this Division.

(4.) The apprehensions have not been more numerous this year than last year for riotous behaviour, assaults, obscene and profane language, but rather on the decrease.

(5.) The punishment for such offences has not had a deterrent effect, inasmuch as the fines and punishment are not so severe as some years ago. Formerly offenders were frequently fined from £3 to £5 for obscene or profane language, but now it is usually from 10s. to 40s.

(6.) The provisions of the Industrial Schools Act have been enforced in all cases coming under the notice of the police. During the past twelve months forty-six persons have been brought before the Court, twenty-two of whom were discharged, although the character of many of the boys was bad. Some of the magistrates are disinclined to send boys on board the "Sobraon," alleging that the parents want to get clear of their responsibility of looking after their children, which in many instances it is very evident, as they allow them to wander about the streets or to be employed with bottle-gatherers, &c.

(7.) There are a large number of youths classed as larrikins who do little or no work. They reside with their parents, and, therefore, cannot be arrested under the Vagrant Act. There are a number who work in factories, and employed occasionally in dealing. They congregate about street corners at night, and are sometimes rather troublesome.

(8.) If a "move on" clause were to be enacted it would greatly assist the police and have a beneficial effect in abating nuisances now complained of. Frequently large numbers of young men assemble on the footpaths in front of shop windows and doors, thereby causing annoyance to shopkeepers. Power of arrest should be given when persons refuse to move on. If "disorderly conduct" is made an "offence" it would meet many cases of juvenile offenders which could scarcely be called riotous behaviour.

I have, &c.,

JAMES BREMNER,

Inspector.

N. Larkins, Esq., Superintendent.

Re City Larrikinism.

Sir,

I beg respectfully to report that although this Division embraces the "Rocks" and Miller's Point, two centres frequently and most unjustly spoken of as the abiding places of lawless characters, there has been no increase of late years in so-called "larrikinism" or in what may be termed larrikin offences. Hereunder is a table showing the arrests for six months from 1891 to the present date, for riotous behaviour, assaulting police, common assaults, obscene or indecent language, and malicious injury to property :-

Offence.	1891.	1892.	1893.	1894.	1895.	1896.	1897.	1898.	1899.	1900.
Riotous behaviour	33	31	39	46	47	30	36	45	31	16
Assault police	17	20	13	11	12	10	8	13	8	10
Common assault	32	36	30	19	37	31	49	35	35	42
Obscene or indecent language	47	60	47	51	53	52	29	31	35	41
Injure property	14	23	16	14	7	12	12	7	12	10
Totals	143	170	145	141	156	135	134	131	121	119

The figures show a general decrease in the number of apprehensions for that phase of crime. In two cases of wanton assault in 1893, and one in 1895, the provisions of the Criminal Law Amendment Act had to be resorted to, the offenders being sentenced to imprisonment and to receive twenty-one lashes. These sentences had a very salutary and deterrent effect, and practically put an end to anything in the shape of organised ruffianism in this end of the town. The other cases were of the average Police Court order and dealt with satisfactorily, the Bench being invariably guided in apportioning the penalties by the character given of the offenders by the police.

The groups of lads who gather about the streets at night in some parts of the Division, and occasionally cause annoyance to respectable people by their language and conduct, are, as a rule, composed of youths honestly employed during the day in offices, or as drivers and carters on the wharfs. An enactment dealing with disorderly conduct in company, and giving power to detain, for the purpose of ascertaining the correct address of persons loitering on the footways, would be of assistance to the police in dealing with such cases. To them the provisions of the Industrial Schools Act would not apply. From such sources probably hundreds of lads would have been attracted to the recent disturbances in the city, if the sensational and exaggerated notices of the same had continued. They would have attended, not from any interest in the matter, but simply from their inherent love to be present at a fight. In no sense could such lads be classed as members of lawless bands, having for their aim the molestation and maltreatment of citizens.

Previous to the breaking up of the Chinese gambling dens in George-street North a few months ago we had a number of debased white and half-caste youths who picked up a precarious living by making themselves useful to the Chinamen. With the exodus of the gamblers that class also disappeared. At the present time there is no disorder or rampant larrikinism calling for drastic measures of repression—certainly nothing beyond what might reasonably be expected in a thickly populated seafaring community, or what the police in ordinary circumstances should be able to satisfactorily deal with. It may, perhaps, be mentioned that fifteen years ago there were forty-five men allotted for street duty from Hunter-street to Dawes' Point, and now there are twenty-seven; the difference of eighteen men being engaged on special posts. Only last week two additional constables had to be withdrawn from street duty to supervise traffic at the wharfs in Sussex-street.

Flattering though it may be to the general good conduct of the people, it would be idle to contend that such a serious decrease in the number of men available for police duty proper could take place without incurring a certain amount of risk from unexpected outbursts of crime and disorder.

Doubtless

Doubtless when some allowance is made for the many and ever-increasing demands for the services of the force, and the systematic patrolling of the beats again resumed, less will be heard of matters which at present, perhaps through inadequate means of supervision or observation, assume rather serious proportions before sufficient force can be concentrated to satisfactorily deal with them.

I have, &c.,

JAMES MITCHELL,
Acting Sub-Inspector.

N. Larkins, Esq., J.P., Superintendent of Police, Sydney.

Sir,

Police Station, Newtown, 13 June, 1900.

I have the honor to report in accordance with directions on Minute Paper dated 11th instant, that—
No marked increase of larrikinism occurred in the western suburbs during the recent temporary withdrawal of half the force.

During April and May there were 28 per cent. less arrests than during the corresponding months last year.

Punishment in most cases is reasonably severe and fairly deterrent.

Provisions of Industrial Schools Act received fair attention; fourteen cases (thirteen boys, one girl) were dealt with from January to May.

The larrikins both of the better and poorer classes are chiefly in honest employment.

An enactment as suggested would be beneficial.

I have, &c.,

W. R. QUIRK,
Sub-Inspector.

N. Larkins, Esq., Superintendent.

Sir,

North Sydney Police Station, 12 June, 1900.

I have the honor to report for your information that there has been no increase of larrikinism in this Division during the present year, the total number of arrests and summons for riotous behaviour, language, &c., being 37, as against 41 for the corresponding period last year. In many cases the infliction of fines of 5s. or 10s. for riotous behaviour, and 20s. or 40s. for filthy language, has no deterrent effect, as the money is almost invariably paid by the accused's friends.

The provisions of the Industrial Schools Act have been rigorously enforced at this station, and during the present year three out of four lads arrested have been sent on board the N.S.S. "Sobraon."

The so-called larrikins in this Division consists of lads who are all earning a livelihood by honest employment, and are only to be seen about the streets for a couple of hours in the early portion of the night. Complaints are very seldom made about their conduct.

I have no doubt but that if an enactment were passed (with a clear and decisive "move on" clause, &c.), such as suggested, it would have a very beneficial effect, and be far preferable to the present system of applying for summons for loitering, &c., through the Inspector of Nuisances.

I have, &c.,

A. R. SHERWOOD,
Acting Sub-Inspector.

N. Larkins, Esq., Superintendent.

Sir,

Redfern Station, 13 June, 1900.

With reference to the attached communication, I beg to report for your information that there has been a slight increase in larrikinism in this district recently, owing to the number of men withdrawn from the streets for plague duty; but, so far as the Redfern police district is concerned, "pushism" does not exist in the manner described in sensational newspaper articles recently. There has been no increase in apprehensions for such offences as riotous behaviour, assault, obscene or profane language, or other minor offences lately. In most cases where offenders have been brought before the Court for these offences the punishment has been exemplary and deterrent. The provisions of the Industrial Schools Act have been rigorously enforced in all cases where the police could take action.

If an enactment were passed with a "move on" clause giving the police power to arrest, it would enable them to cope with the gangs of larrikins that are in the habit of congregating on the footways and at street corners to the annoyance of the public. The present municipal by-laws are almost inoperative, as under them the police have no power to arrest, and offenders can give any name they think proper, with the result that those whose names and addresses are unknown can go scot free. I may add that the majority of the class of so-called larrikins consists of youths ranging from 12 to 18 years of age, who are earning an honest livelihood and mostly residing with their parents.

I may also add that a clause in any enactment which may be passed making "disorderly behaviour" an offence when committed by two or more men or boys in company would have a beneficial effect.

I have, &c.,

JOHN GARLAND,
Sub-Inspector.

N. Larkins, Esq., Superintendent.

Sir,

Balmain Police Station, 12 June, 1900.

I have the honor to report for your information, in reference to the Inspector-General's minute of above date, that there is no marked increase of larrikinism in this Division, nor is there any increase in apprehensions for assault or profane language.

Any who have been brought before the Court, from time to time, for these offences have been punished in the usual way, either by fine or imprisonment, without creating any marked impression either for good or evil.

The provisions of the Industrial Schools Act have been carried out with the same amount of rigour now as heretofore with boys under 16 who play truant from school and who otherwise misconduct themselves.

The class of youths who make themselves amenable to the law and are punished for any of the above offences in Balmain do not belong to a "push," and earn their livelihood by honest employment.

A "move on" clause, and also one making disorderly behaviour an offence, if enacted, would no doubt prove very beneficial.

I have, &c.,

A. BOYD,
Sub-Inspector.

N. Larkins, Esq., J.P., Superintendent.

The Inspector-General of Police to The Principal Under Secretary.

I TRUST there will be no recurrence of such disorder, precautions having been taken to prevent the same.

I submit a minute I wrote on the subject and reports from Superintendent Larkins and other officers in the Metropolitan District, for the Chief Secretary's perusal.

The Principal Under Secretary,
B.C., 19/6/00.

EDMUND FOSBERY,
I.-G. Police.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SHEARING AT BUKKULLA STATION.

(REPORTS RESPECTING CONDUCT OF POLICE IN CONNECTION WITH.)

Printed under No. 16 Report from Printing Committee, 15 November, 1900.

[Laid upon the Table of this House in accordance with promise made in answer to Question No. 1, of 1 November.]

Re Constable Perry trying to induce Shearers at Bukkulla Station to accept Non-union terms.

Police Station, Inverell, 27 October, 1900.

CONSTABLE H. E. PERRY, No. 7,216, respectfully reports that he was present at Bukkulla Station on the 15th instant, when the roll was called, to prevent any breach of the peace should any dispute arise among the men. Mr. Hugh Wyndham, owner of the Bukkulla Station, called the roll and told the men his terms, and also informed them that if they did not accept his terms they must all leave the station before night. The constable stood by in the shed, had no conversation with any of the shearers, nor tried to induce them to accept Mr. Wyndham's terms. All of the men left the station almost immediately, and camped that night on a reserve about 2 miles from the station.

The constable, in company with four other men (including two of Mr. Wyndham's sons), slept in the wool-shed all that night. Next morning, the 16th instant, at 8 a.m., the constable, seeing that there was no likelihood of any disturbances, left the station to return to Inverell. He passed the vicinity where the men camped the previous night, which was alongside of the main road. The majority of the men had left the camp before the constable passed, and he never went to any of the camps.

As the constable passed along the road near the camp one of the men came over to him and said, "Is there any likelihood of Mr. Wyndham starting shearing?" The constable replied, "I do not know, but had heard Mr. Wyndham say if he could only get five men at his terms he would start that day."

The constable emphatically denies ever visiting the camp at any time, or trying to induce the men to accept non-union terms or any other terms, as it was immaterial to the constable what terms they accepted.

HENRY E. PERRY,

The Officer in charge of Police, Inverell.

Constable.

Forwarded. On Monday morning, 15th instant, Hugh Wyndham, Esq., J.P., of Bukkulla Station, called at the Police Office here, and asked for a constable to be present when he (Mr. Wyndham) called the roll at 2 p.m. that date, as trouble was anticipated with the shearers. The Senior-constable sent Constable Perry out.—JNO. COWIE, Senr.-Const. (absence Sub-Inspector), Inverell, 27/10/1900. The Superintendent of Police, Armidale.

Forwarded for the information of the Inspector-General of Police.—THOS. GARVIN, Superintendent, Armidale, 29/10/1900.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ARREST OF FREDERICK PIKE BY CONSTABLE TREVATHAN,
OF GUNNEDAH.
(REPORTS RESPECTING.)

Ordered by the Legislative Assembly to be printed, 27 September, 1900.

*[Laid upon the Table of this House in accordance with promise made in answer to Question No. 18, of
27th September, 1900.]*

Henry Pike, Gunnedah, urging inquiry into the conduct of Constable Trevathan, Acting Gaoler, Gunnedah, in connection with the arrest of Fredk. Pike, and his refusal to allow him to be seen or admitted to bail.

The Minister for Justice, Sydney,—

Gunnedah, 2 August, 1900.

Sir,

On the 6th of July, a band concert was held here at the School of Arts. One of the bandsmen went over to the hotel for a drink about a quarter-past 9 o'clock. The gaoler, Trevathan, ran him in for being drunk and disorderly. I was in the hall with three daughters at the time. So two friends went to bail him out. The gaoler told these men the boy was helplessly drunk, and he would not bail him out. These friends then came and told me the boy was in the lock-up for being drunk and disorderly. As I knew it was impossible for the boy to be drunk, as he had just played an important piece in the band, I at once went out and got a doctor, took him to the gaol, and asked the gaoler to let the doctor see the boy. This Trevathan point blank refused, as, he said, the boy was helplessly drunk in the cell, and would not let me or the doctor see him. I offered the gaoler a hundred pounds bail, but he would not take any bail, but swore I broke into his house, and if I did not damned soon clear out he would lock me up. This man appeared to be either drunk or greatly excited at the time, as he refused to let me or the doctor see the boy. I then sent for the senior J.P. of Gunnedah. We then went to the gaol to see the boy. The gaoler would not let us see the boy or take bail, and ordered us out of the place. In the morning the gaoler let the boy out of the lock-up without any bail. A fortnight after he had the boy up at the Court and charged him with being drunk and disorderly on the 6th of July. The case was dismissed.

Was the gaoler, Trevathan, at the time justified in refusing to let the doctor, a J.P., or myself see my son or take bail? We did not want to take the boy away if he was so very bad, but we wanted to see if he was drunk; and I can prove he was not.

When Trevathan was taking the boy to the lock-up, he gave him a severe blow in the ribs with his fist. No doubt this was to cause the boy to commit a breach of the peace, so he could bring a charge against him. When the gaoler, Trevathan, put this boy in the cell, the boy asked him what he was being locked up for. Trevathan said, "You damned scoundrel, you know what you are being locked up for. Ethel Mitchell has given you in charge"; and at the same time Trevathan gave the boy such a kick behind that sent him flying across the cell, using such language as is not often heard—anyway, not at church.

The next morning, July the 7th, Trevathan went to Panty's and asked them who cleaned the mess up that Fred. Pike made in the hall last night, trying to make believe Fred. Pike was drunk and had made a mess in the hall, and people not in the know thought Fred. Pike had made a beast of himself.

This gaoler, Trevathan, is a money-lender on a large scale. Several cases have come under my notice, and it has been said he was a money lender to a party that formerly sat on the Bench, but I don't know if it is true; anyway, I am glad I wasn't a drunk those days.

I shall be glad if you will cause a strict inquiry into this man's conduct, and this case in particular.

Yours, &c.,

HENRY PIKE.

P.S.—You might find it interesting to inquire why this man was shifted from Carroll to Gunnedah.—H.P.

This letter may be referred to the Inspector-General of Police, as the complaint seems to be made respecting Constable Trevathan's actions as a member of the police force. Inform writer.—G.M., 7/8/00. Informed, 8/8/00. The Inspector-General of Police. B.C.—G.M. (for U.S.), 8/8/00. Referred to Superintendent Casey.—E.F., I.G.P., 9/8/00. Police reports herewith. It does not appear that the constable exceeded his duty.—EDM. FOSBERY, I.G. Police, 6/9/00. The Under Secretary, Department of Justice. Seen. Should the Inspector-General of Police consider a reply necessary, perhaps he will cause Mr. Pike to be communicated with.—G.M., B.C., 8/9/00. Mr. Pike informed constable does not appear to have exceeded his duty.—11/9/00.

Police Department, Superintendent's Office, North-Western District,
Tamworth, 4 September, 1900.

The Inspector-General of Police, Sydney.

MEMO.—Police reports and a memo. from the C.P.S. attached.

I am of opinion that Mr. Pike's charges are completely refuted.

WALTER C. CASEY,
Superintendent.

Police Department, Superintendent's Office, North-Western District,
Tamworth, 13 August, 1900.

Senior-Sergeant Borthistle, Gunnedah.

MEMO.—For careful inquiry and prompt report.

WALTER C. CASEY,
Superintendent.

Memorandum from Clerk of Petty Sessions, Gunnedah, to Constable Trevathan, Gunnedah.

Court-house, Gunnedah, 14 August, 1900.

ON 18th July last Frederick Pike was charged before the Police Magistrate with being drunk and disorderly in Conadilly-street, Gunnedah, on 6th July last. He pleaded guilty to the charge, and was admonished and discharged.

W. L. B. BROWN,
C.P.S.

Re attached complaint.

Police Station, Gunnedah, 3 September, 1900.

Mr. Superintendent Casey, Tamworth,—

CONSTABLE W. TREVATHAN, acting gaoler, No. 3,313, respectfully forwards the attached papers to Mr. Superintendent Casey. Those papers have been detained for Senior-sergeant Borthistle's report; but, as he is still absent, and was not present at the time, the constable forwards the papers in his absence.

W. TREVATHAN,
Constable, in absence of Senior-sergeant Borthistle.

Re complaint by Mr. H. Pike *re* Constable Trevathan arresting Frederick Pike.

Police Station, Gunnedah, 28 August, 1900.

Senior-sergeant Borthistle, Gunnedah,—

CONSTABLE G. KEITH, No. 7,042, respectfully reports, in reference to the attached papers, that he saw Frederick Pike on the night of the 6th August, 1900, at the School of Arts, Gunnedah. A concert was being held. Pike was drunk and very disorderly. He was removed from the hall by a man named Roche. When in the street he continued to behave in a very disorderly manner. The constable requested him to go home. This he refused to do. In company with Constable Trevathan, the constable arrested him, and charged him with being drunk and disorderly.

The constable was present when Frederick Pike was locked up in the cell. No assault took place, as complained of by Mr. H. Pike. About 11.30 the constable heard a disturbance at the back of the gaol, and went to ascertain the cause. He there saw Mr. H. Pike, Mr. J. J. Smythe, and Mr. Huthens. Mr. Pike was conversing in a loud and excited manner with his son, who was confined in the cell. Mr. Pike appeared to be very excited. Constable Trevathan came out and requested them to leave the place, which they did.

GEORGE KEITH,
Constable.

Re

Re complaints by H. Pike *re* locking up of his son, Frederick Pike, by Constable Trevathan.

Police Station, Gunnedah, 14 August, 1900.

CONSTABLE W. TREVATHAN, acting gaoler, No. 3,313, respectfully reports he, in company with Constable Keith, arrested Frederick Pike, charged with being drunk and disorderly in Conadilly-street, Gunnedah, at 10:30 p.m., 6th July, 1900. The case came on before the P.M. on 18th July, 1900, when Pike pleaded guilty, and he (Pike) was admonished and discharged (see memo. from the C.P.S. attached). Pike has been three times previously before the Court—twice for language, and once for discharging fire-arms in the town on a Sunday. Pike was taken to the watch-house by Constables Trevathan and Keith. Statement by Pike, senior, that his son was assaulted, is a deliberate falsehood. After the prisoner was searched he was led to the cell by Constable Keith. Constable Trevathan held the light. Constable Goodwin was also present at the arrest, and the conduct of the larrikins at the School of Arts that evening formed the subject of a leading article in the next issue of the local paper. The prisoner was liberated on bail next morning on his own recognizance. Just after 11 p.m. Pike, senior, came to the watch-house with the insurance doctor. The constable was having a bath, and Pike was requested to come to the bathroom window, which he did, and instead of speaking to the constable through the window, he (Pike) opened the door and came into the bathroom, calling on the doctor to follow him. Pike, in a very angry and excitable manner said, "You have got my son here, and I demand to see him, and have him examined at once by this doctor. I will spend £100 on this, and I will bail him out; you have done this to prevent him getting into the Police Force." The constable said, "Mr. Pike, your son is locked up on a charge of being drunk and disorderly, and you can hear him behaving in a very disorderly manner in the cell now; but as soon as he is sober and orderly he will be liberated on his own recognizances; and I cannot let him out before he is sober—it is contrary to rules." Pike became very excited, and said, "I will have him out if it cost me a hundred pounds. I will get a J.P., and I will defy you or anyone else to stop me from bailing him out." The constable said, "I cannot stay here to argue with you about the matter; you will be good enough to leave the room, as I want to get out of this bath and get to bed." Pike, on being requested by the doctor, left. About 11:30 p.m. Pike returned to the lock-up in company with Mr. J. J. Smythe, J.P. The constable spoke to them through the bedroom window, and told Mr. Smythe that the prisoner was still disorderly in the cell, shouting, singing, and kicking the cell door. Mr. Smythe explained the situation to Pike, and then left. A few minutes after the constable heard someone in conversation with the prisoner, calling out to the prisoner from the street, and the prisoner was answering back from his cell. The constable, partly dressed, ran round to the back of the cells, and there met Constable Keith and Constable Goodwin, who had been disturbed by the conversation referred to. On the footpath, outside the garden to the back of the cells, the constables saw Pike, senior, J. J. Smythe, J.P., and a man named Hutchin. The constable asked them what they were doing there. Pike said, "I am speaking to my son"; and Hutchin said, "I and Pike were speaking to Fred., and he was answering." The constable said, "You had better go away." Pike and Hutchin were evidently under the influence of drink. They left then. The next morning the doctor and Mr. J. J. Smythe, J.P., came to the constable in Conadilly-street, and expressed their regret for what had taken place the previous night; and each said that they had been misled by Pike, senior. With reference to the constable lending money since the bank failures, the constable has lent a few small sums to respectable industrious people. The constable is not possessed of large sums of money, or did the constable ever lend any money to a justice of the peace. The constable was not removed from Carroll, but accepted the Gunnedah Gaol when offered to him by Mr. Superintendent Creaghe.

The complaint is deliberately false from beginning to end, and just what would be expected from Pike, by anyone who knows him. He is a most uncultivated and vindictive man. He has spent most of his life in the bush timber-getting. And whilst the constable never drank a glass of spirits, Pike and his family are often suffering from the effects of drink.

W. TREVATHAN,
First-class Constable.

1900.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PRISONS.

(REPORT ON, FOR THE YEAR 1899.)

Printed under No. 2 Report from Printing Committee, 28 June, 1900.

The Comptroller-General of Prisons to The Minister of Justice.

Department of Prisons, New South Wales,

Comptroller-General's Office, Sydney, 28 June, 1900.

Sir,

I have the honor to present for your consideration my Annual Report for 1899 upon the Prisons Department of New South Wales.

2. The principal event of the year was the further extension of the "restricted association" system, which was first inaugurated on the 13th October, 1897. During 1899 all the remaining gaols, with two exceptions, were brought within its operations, and a very great change in the country's penal system was thus accomplished. The bringing into general operation of this large measure of reform occupied, for many reasons, nearly two and a half years, and occasioned much anxiety; but the change was effected without friction or disorder, notwithstanding that it interfered with long-established custom. To the habitual criminal the system is distinctly distasteful, as it prevents the association and intercourse which formerly so freely existed; but to the less hardened offender and to those seeking to reform, the new treatment offers relief from a degrading companionship, which must have been a torture to decent-minded prisoners. There is every reason to hope that the new departure will improve the moral atmosphere of the gaols, and will conduce to the reformation of many of the prisoners entering them.

3. The steady decrease of the gaol population, referred to in my previous Reports, continues. On the last day of the year under review the number of prisoners of all kinds was 1,989, as compared with 2,081 for the preceding year. On the last day of 1894 the number was 2,604. Thus, in five years, the gaol population decreased actually by 615; and relatively by 834 when compared with the increase of the general population during that period. The accompanying chart shows that not for many years has the prison population been so low as it is now, notwithstanding the steady increase in the general population of the Colony. On the 31st December, 1894, there were 2,604 persons in prison out of a general population of 1,251,450. On the same date in 1899, the figures show 1,989 and 1,356,650 respectively. While on the first-mentioned day there was one person in gaol out of every 480 of the general population, there was on the last day of 1899 only one out of every 682.

4. In the foregoing paragraph the total numbers given include persons awaiting trial or undergoing imprisonment only. Omitting these, the number under sentence to penal servitude or hard labour was 1,588, as compared with 1,669 for 1898. Of the 1,588 under sentence, 617 were serving periods of three years and upwards, and 971 less than three years. Three years ago the number of prisoners serving three years and upwards was 772. Since that time the figures have dropped to 617, a reduction of 155, or 20 per cent. This would seem to indicate that the more serious classes of crime are not, at all events, increasing.

5. The total entries and discharges of all kinds for the year amounted to 14,296 and 14,388 respectively, as against 15,066 and 15,245 for 1898. The decrease in the number of prisoners received was 770 during the year's operations. As the number received in 1896 was 17,012, the present year's

154—A

figures

[1,860 copies—Approximate Cost of Printing (labour and material), £110 11s. 8d.]

figures represent the very substantial drop of 2,716. The decrease in the number of prisoners received has been very marked during recent years as the following particulars will show:—

In 1880	the entries were	17,261,	or 2·03	per cent.	of the general population.
In 1896	„	17,012,	or 1·31	„	„
In 1899	„	14,296,	or 1·05	„	„

If the gaol entries had increased since 1880 in the same proportion as the general population, the number of prisoners received during 1899 would have been 31,222. Actually, the entries were 16,926 below that number.

6. It must be understood that amongst the total number of entries (14,296) during 1899 are included many persons who, having been convicted more than once during the year, are consequently counted more than once. Drunken vagrants come and go under the existing conditions of short sentences and faulty treatment, and so unduly swell the prison statistics. Beyond temporarily cleaning and patching them up, little can be done, and the present methods of treating these unfortunates are attended by no beneficial results to themselves or to anybody else. It is not possible to inculcate habits of self control in a few days, and they are simply discharged sober but without having attained the habit of sobriety. Several of these poor people have come under my attention with over 100 convictions—one, indeed, had 350—and nothing could more plainly show the need for radical reform. That no change has taken place is not the fault of the Prisons Department. In this connection attention is invited to the proposals contained in previous reports.

7. Although there were 14,296 entries to gaol during the year, only 11,765 persons were received under sentence. Of these, no fewer than 8,256, or 70 per cent. of the whole, were under sentences not exceeding one month. The presence of these short-sentenced persons in ordinary gaols containing criminals having long terms to serve is a continual source of embarrassment to the administration, and will always remain so, in the absence of a properly equipped Penitentiary. At present, the island prison at Biloela affords some relief by accommodating some 250 vagrants and incapables of both sexes; but Biloela at best can only be regarded as a bad make-shift from its utter unsuitability for the purpose for which it is occupied.

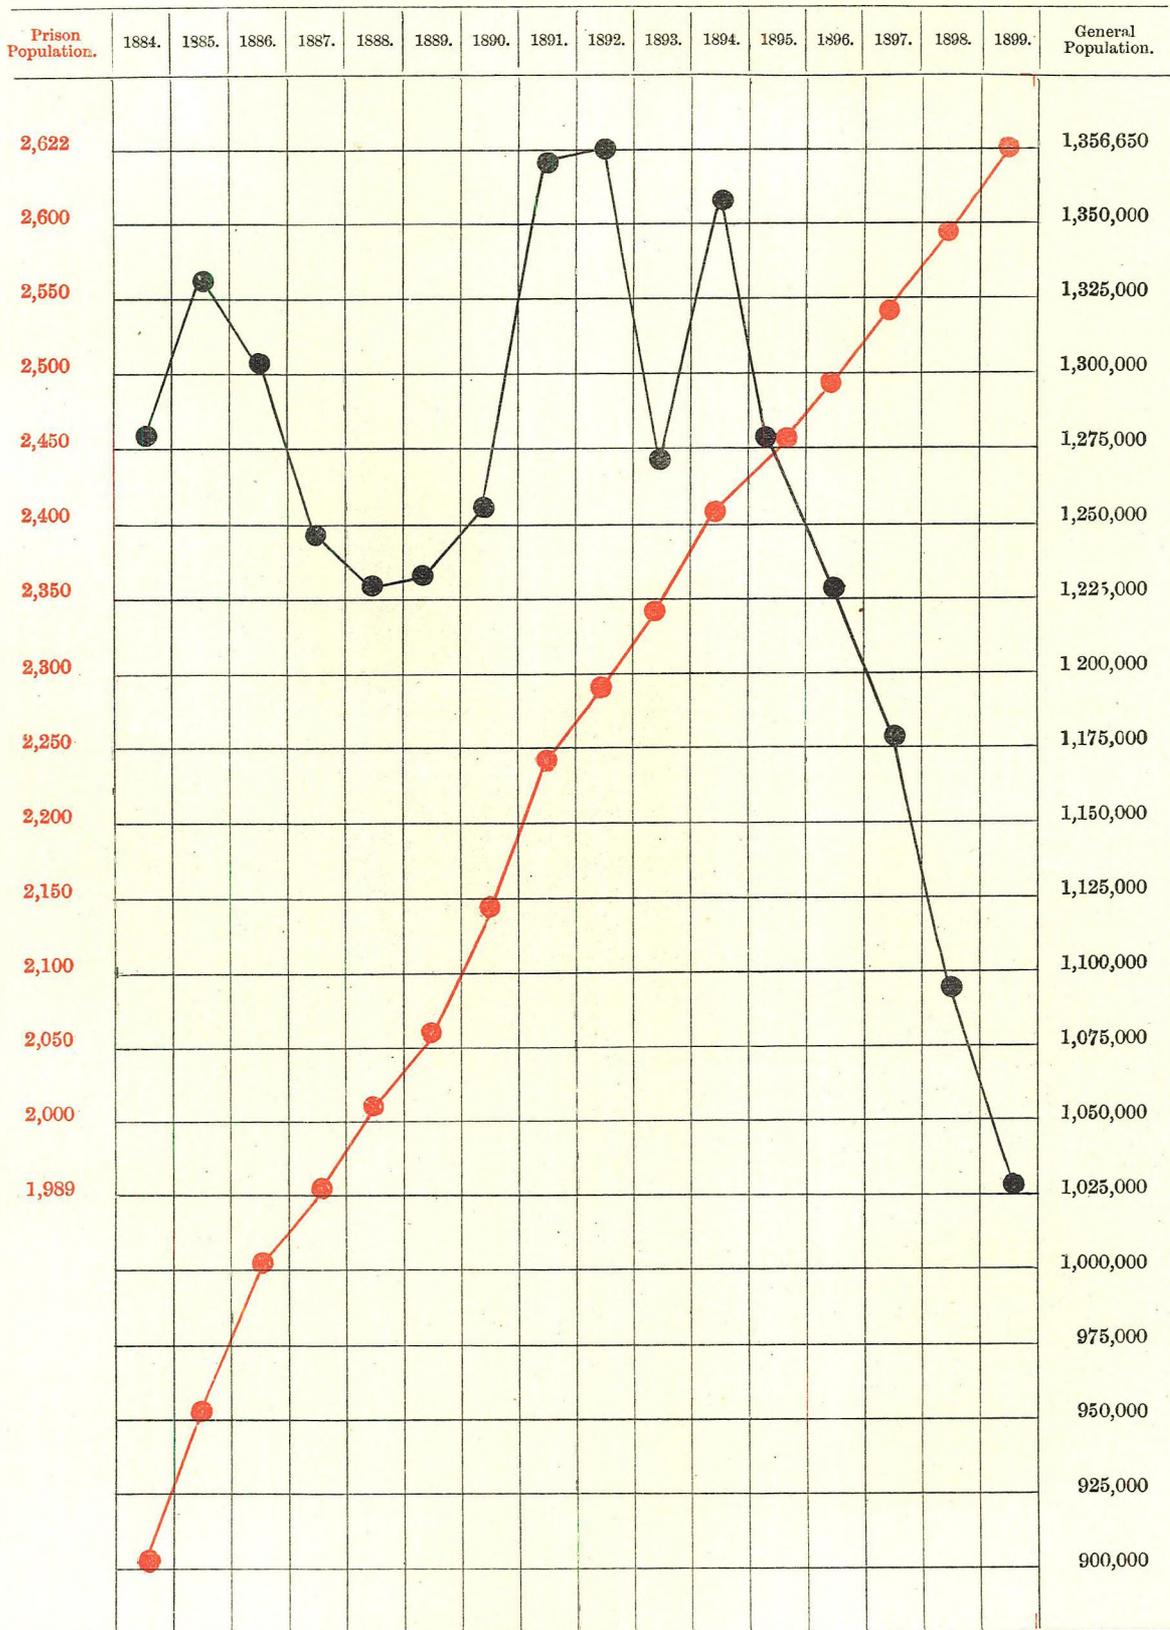

8. It is gratifying to observe that the female prisoners are decreasing. At the close of the year they amounted to 186, a lower number than has been recorded for the past twenty-five years. As explained in a previous Report, in 1897, with the Minister's approval, an improved system of classification was brought into operation, which removed the bulk of the female prisoners from Darlinghurst. Long-sentenced women were sent to Bathurst, prostitutes were assigned to Biloela, while short-sentenced women not of that class were kept at Darlinghurst. These three divisions were further subdivided by separating those previously convicted from the others, and by the segregation of hopeful cases in a class by themselves. It was subsequently decided to subject the women to the operations of the restricted association system. These arrangements may, perhaps, have had some influence in the falling off of female prisoners that has since taken place. In two years the numbers have decreased 23 per cent. A properly constructed Prison for Females, equipped on modern principles, is, however, badly needed. The present arrangements are inconvenient, expensive, and more or less unsatisfactory. Since my last Report, the Public Works Committee have approved of the designs and proposals to erect a Female Prison, as also a Penitentiary for Males; and their recommendations have been laid before Parliament. It is most desirable that these important works should be proceeded with.

9. Exclusive of 41 debtors, 8,311 of the total number received into gaol were born out of the Colony. Out of 14,255 prisoners, only 41 per cent. were natives of New South Wales. From the other Australasian Colonies came 1838, while other nationalities accounted for 6,473. The want of a Protective Act, such as exists in Victoria and elsewhere, restricting the influx of criminals, is needed in this Colony, as, under existing conditions, our criminal classes are recruited from outside its boundaries. Some of the most dangerous and troublesome of these people make this Colony their refuge, after being hunted out of the other provinces, and there exists no law to prevent such undesirable immigration. A measure founded on the Victorian Act would provide a remedy.

10. Six hundred and seventy-four prisoners were received under conviction from the higher courts—an increase of 16 on the preceding year, but a decrease of 147 on the number convicted three years ago. The proportion per 100,000 of the general population was 49, as compared with 63 for 1896.

11. The number of persons received under summary conviction from the lower courts was 10,942, as compared with 11,677 for the year before—a drop of 735. As in previous years, the greater portion of these were received into gaol in default of payment of the fines inflicted on them. Of the total number

CHART showing General Population and Prison Population for each year from, and inclusive of, 1884 to the year ended the 31st December, 1899.

Explanatory Notes.

Figures to the left give the prison population; those on the right the general population. Red line shows the growth of the general population; the black line shows the variation in the prison population. The population in both cases is taken as on the 31st December in each year.

On the last day of 1884, out of every 373 of the general population 1 was in gaol.

NOTE,—

Figures in "red" denote number of prisoners confined at the respective Gaols on 31st December, 1899.
 Figures in "black" denote the distances by Coach from nearest Railway Station.

number imprisoned on summary conviction, 7,786 went to gaol for non-payment of fines—rather more than 7 persons out of every 10. In my previous Annual Reports attention has been drawn to the need for remedial legislation in this direction, and in December last an Act (The Justices' Fines Act) came into operation, which will no doubt have a beneficial effect when its humane provisions become more generally known and understood.

12. As compared with the preceding year, there was a decrease of 15 per cent. in prison offences. The vast majority of the prisoners conformed to the regulations, and punishment was confined to the vicious and idle. Seven hundred and sixty-seven out of the number (18,158) who passed through the prisons were punished, which shows that over 95 per cent. of all those under treatment received no punishment.

13. The Industrial branch of the Prisons Administration must always be attended by considerable drawbacks. The low physique of the majority of prisoners, the inherent disinclination or inability to work, and the difficulty of providing hard work of a profitable or useful character within the confined limits of a gaol are all obstacles in the way. Added to these are the desire not to conflict with free labour, and the obvious impossibility of finding remunerative employment for unskilled persons of whom nearly three out of every four are in gaol for periods not exceeding one month. Still, as will be seen from the Director of Labour's report, a very fair amount of work has been done. All the clothing, boots, &c., for officers and prisoners have been made, and, in addition, the prisoners have earned nearly £20,000 in work for the various Government Departments, repairing buildings, &c., outside the value of the labour employed in the domestic work of the various gaols. At Bathurst a very complete marble cutting and polishing plant has been erected, and the industry in connection with it gives constant occupation to a large body of men. The waste lands attached to the several prisons are being cultivated, and this healthy outdoor work not only provides wholesome employment of a reformatory character, but supplies the greater portion of the vegetables required for consumption. At Goulburn Gaol the complete system of irrigation and cultivation attained reflects great credit on the Governor, Captain Mackay. Earnings paid to prisoners on discharge amounted to the value of £1,500, while a further sum of nearly £1,000 was spent in providing various indulgences as incentives to good conduct and industry.

14. The health of the prisoners has been good. The number of those admitted to hospital was 294 less than in 1898, but the number of deaths was in excess of those who died during the previous year. Particulars will be found in Appendix III. In connection with the mortality returns and the hospital statistics generally, it should be again pointed out that a questionable custom prevails of sending persons to gaol for medical treatment where hospitals are not available or where such institutions will not receive them. This seriously embarrasses the department and also swells its death-rate, as at times sick people are received in a moribund condition. Last year 11 persons died within a week of being received into gaol. In the majority of cases death was attributable to diseases which originated prior to entering gaol. The youngest was a female aged 18, who died within four weeks of admission from old standing heart disease, and the oldest was a man of 78, who died of senile decay within three days of arrival.

15. In previous Reports attention has been drawn to the work cast upon the administration in connection with the custody of lunatics or suspected lunatics. It is obvious that this is a duty which is foreign to the purposes of the establishment and which it cannot properly perform. Exclusive of the Governor's pleasure *detenus*, and of others remaining from previous years, some of whom have been in prison for very long terms, 545 persons were at one time or the other under observation during the year to determine their mental condition. Prison surroundings and prison officers are not the best adapted for the treatment of such cases, whose presence in a prison seems out of place, especially in localities where scientific hospital treatment is available. Two of the demented persons above referred to committed suicide in Darlinghurst Gaol.

16. The number of gaols at the end of 1899 was 58, consisting of 23 established gaols and 35 lock-up gaols. It was found possible to reduce Hay Gaol, making the sixth Prison so dealt with, and since the close of the year reductions in staff have been found possible at Deniliquin and Bourke, without interfering with efficiency of management.

17. More cellular accommodation has been provided by the division of some of the "associated" cells, and further work in this direction is being done. I am glad to say that all prisoners, excepting those under medical treatment and those at Biloela, are now housed by night in single cells, the huts in which the Trial Bay prisoners lived together having been demolished last month. This has undoubtedly brought about a healthier moral tone. The association of three men in one cell through the long hours of the night did not make for wholesomeness of mind or body, and the change has brought about no

small

small degree of reform. Prisoners now have their meals in their cells, instead of taking them in company in the yards; and they are also provided with healthy literature and lights at night. In December last, the new system was extended to Darlinghurst Gaol, where for the first time all cells, with a few exceptions, were lighted in the evening. At Darlinghurst, Parramatta, Goulburn, Bathurst, Berrima, Maitland, and Broken Hill very complete electric lighting has been installed, while at the remaining prisons gas or oil is in use. Altogether during the year 1,270 additional cells have been supplied with lights at night.

18. The total expenditure was less than in the preceding year. In my last report it was stated that the annual sum likely to be required for the future maintenance of the Department was not likely to exceed £99,000. We have, however, been able to keep well within the limits of the sum voted, £97,675, for the financial year. It is not probable that, under existing conditions, much more can be done in the way of retrenchment. The most careful examination has been made, and where it was possible to effect economy without impairing efficiency, it has been done. Certain concessions to the staff in the way of holidays, sick-leave, reduction in rent for quarters, allowances in lieu of servants, and so forth, have added to the cost; but on the whole a substantial reduction has been effected during the last four years, as will be gathered from the following figures:—

Voted for the year ended 30th June, 1896	£117,707
„ current financial year...	97,675
						£20,032
Reduction	

19. Small collections of books on penological and prison matters generally have been sent to all of the established gaols for the use of officers desiring to improve their knowledge of their profession. This has materially assisted deserving members of the warders' staff to qualify for promotion by passing the examination referred to in the last Prison Report. There are only two examinations—one for probationers desiring to enter the permanent ranks, and one qualifying for senior wardership. These examinations are of a practical character, and are purely confined to subjects pertinent to the profession. Although the system of examination has not been long established, up to the present 65 warders have passed the first examination, and 57 the senior warders' examination—122 in all. For the most part the unsuccessful candidates showed much promise and will do better at the next half-yearly examination. The greater number of the successful candidates have been promoted, and all of those who passed the senior warder examination are allowed an extra week's leave per annum. At most of the larger gaols it has been found practicable, under the new system of treating prisoners, to allow a certain number of officers off duty in turns on Saturday afternoons, on Sundays, and on recognised public holidays, and also to leave the prisons during meal hours. These concessions have somewhat shortened the hours of duty, and have rendered the Service more attractive, judging from the number of applicants for employment. At Trial Bay the warders and their families now occupy separate well-built cottages, instead of being housed in an uncomfortable long building, divided by wooden partitions. At Darlinghurst, accommodation has been provided for the single warders, each man having a furnished bedroom, with common sitting-room, and garden, gymnasium, &c. Uniforms of smarter design have been issued to all of the warders, and also to the trades officers, and the appearance and discipline of the staff have benefited. Each officer receives uniforms and three pairs of boots yearly, free.

20. Amongst general improvements in the treatment of prisoners during the year, outside the changes consequent upon the extension of Restricted Association, may be mentioned the following:—

- (a) The new reception establishment at Darlinghurst has been finished, and its bathing and dressing chambers are very complete.
- (b) The bathing accommodation at all of the prisons has been subdivided by placing partitions between the baths, and thus securing privacy and decency.
- (c) A large area of ground at Parramatta Gaol has been walled in, and thus allows of the safe employment of a considerable body of men in agricultural work of a healthy and profitable character.
- (d) A new ward has been constructed at Darlinghurst for the observation of prisoners suspected of insanity.
- (e) A portion of Darlinghurst has been converted into a separate prison for the treatment of the more youthful prisoners.
- (f) The lighting of cells has been completed.
- (g) Increase of library books which are now nearly 20,000 in number.
- (h) Certain longer sentenced prisoners allowed at option cocoa in place of hominy. (i.)

- (i) Extension of mat-making industry to Parramatta and Biloela.
- (j) Extension of gardening operations at gaols generally, more especially at Goulburn.
- (k) Female prisoners brought under new system.
- (l) Abolition of close shaving for which clipping is now substituted, which answers all the purposes required, and prevents a deal of irritation.
- (m) Abolition of gaol endorsement on envelopes containing prisoners' correspondence, affording greater privacy to recipients of letters from prisoners.
- (n) Lights in cells of seventh-class prisoners for a certain period at night.

21. Goulburn Gaol continues to do good work as a reformatory prison for first offenders and hopeful cases serving long sentences. During the year 400 prisoners were received and 360 discharged. Several alterations have been made in the buildings with the object of segregating the various classes, and prisoners under 25 years of age serving terms of penal servitude, are kept apart from others both at work and on other occasions. There is a large area of ground under cultivation with a satisfactory system of irrigation, and employment at gardening affords occupation to many prisoners. Besides this, carpentry, blacksmithing, shoemaking, tailoring, hatmaking, bookbinding, painting, printing, and the cooking, cleaning, and other domestic work of the prison keep the prisoners constantly employed. The library at this gaol is of a superior kind, and, in view of the hopeful character of the prisoners dealt with, special attention is given by the principal members of the executive and visiting staff to influence the prisoners in a reformatory direction and to encourage them to communicate with relatives, former employers, and other friends, with a view to obtain honest occupations on discharge. Passes are granted to prisoners on discharge to take them anywhere near their former homes, or where they have the chance of employment; and, in the cases of the more youthful prisoners, letters are written by the gaol authorities to the relatives urging them to meet the prisoners on discharge, and offering to forward them to stations convenient. I think a step in the right direction has been taken in setting apart Goulburn Gaol for this special work, and that it will be productive of much good in the future.

22. During the preceding year a very important new rule was instituted extending the remission of sentence system to short-sentenced prisoners. This rule has worked well and has greatly encouraged industry and good conduct on the part of the prisoners affected. Until the new regulation came into operation remission was not earnable excepting by those serving sentences exceeding twelve months. Consequently the great bulk of the inmates, constituting 95 per cent. of the whole, were debarred from the hope of gaining remission of sentence no matter how well behaved and industrious they might be. This has now been altered and discipline and good order have benefited.

23. The treatment of male prisoners serving twelve months and under, under 25 years of age, as a class apart from others, continues to work well. They are exercised twice daily in vigorous physical drill, and receive special attention from the visiting and residential officers. Every inducement is held out to them to communicate with relatives or friends likely to assist them on discharge, and they are transferred on or before release to the neighbourhood of such persons' residences. The following memo., issued to all Officers in charge of prisons, visiting chaplains, and others, will explain what is being done:—"It is confidently hoped that the provisions of paragraph 25 will tend towards the reformation of those prisoners who come under its operation. It applies only to well-conducted seventh-class prisoners who have served three months and upwards. A sample of a suitable communication to be forwarded to the parents or guardians of such prisoners is attached, and some days (not less than seven) preceding the date when they become due for discharge these memoranda should be sent. It will be observed, from the terms of the regulation, that only in those cases where the parents or guardians are of good repute is the privilege of letter-writing and daily visits during the last seven days of the sentence to be encouraged. In cases where such persons are known to be of ill repute such action must not be taken, as the object of the regulation would be defeated if such were allowed. A delicate responsibility is placed on the officers in charge in this matter, which they must be prepared to bear. It is not expected that any great difficulties will present themselves. Common sense and tact must, however, be exercised. In those cases where arrangements have been made for the prisoners to be met, they may be released on the day preceding the date of discharge; but in no instance must a prisoner be so liberated unless his parents or relatives are present to receive him. In their absence, he must be detained until the following morning and released at the usual hour." During the year, the privilege of having lights at night has been extended to this class of prisoners, with great benefit from every point of view. It has also been found practicable to extend the general system to the younger prisoners serving penal servitude sentences, the main idea being to keep all the more youthful as a class apart from others both at work, exercise, and on all other occasions where possible.

24. In previous reports, attention has been drawn to the need for establishing a penitentiary for dealing with male vagrants and casual drunkards; a special prison for females on modern lines; and an asylum for treating inebriates and dipsomaniacs. It is not necessary to supplement my former remarks other than to declare that the absolute necessity for such establishments becomes more and more apparent as time goes on. Our present methods are lamentably weak and inefficient, and reflect discredit upon the community.

25. Another matter intimately affecting the future of the prisons is the treatment of juvenile vagrants. These neglected youngsters form the principal source from which the criminal population is created, and anything that would tend to improve their moral condition would, in time, diminish the number of gaol inmates. An extension of the Reformatory and Industrial Schools Act is urgently required so as to provide machinery, in the form of Day Industrial and Truant Schools, for dealing with incipient crime in the truancy and vagrancy stage.

26. It is to be regretted that no comprehensive system exists for dealing with discharged prisoners. One or two organisations accomplish something in this direction, and, so far as it goes, good in individual cases is effected. But something in the form of a National Association is required, which should be free from religious restrictions, and which should deal systematically with all prisoners. A General Council sitting in Sydney, with local centres in the principal country districts, would be able to carry out a great work of usefulness. It is within my knowledge that persons leave gaol anxiously desirous of leading honest and reformed lives, but find no encouragement or assistance to do so. Such persons may be said to be forced to revert to crime, and that they do so revert is neither their fault nor the fault of the Prisons administration.

27. The various important changes in the treatment of prisoners which have been brought into operation within the past few years have cleared the way for further reforms, and, accordingly, some proposals have recently been placed before you which, if approved of, will materially affect several points of long-established routine. The abolition of the yarding of prisoners, and the establishment of the restricted association system, would appear to render practicable a considerable reduction in the term of separate treatment in which prisoners serving certain sentences are subjected. It has also been thought well to suggest a greater classification, having for its object a more complete segregation of the various groups of prisoners and the separation of the hopeful from the less hopeful classes. A progressive stage system has also been submitted in detail, which proposes to attach certain privileges to each stage, and to allow prisoners to qualify for promotion to the successive stages by earning marks for industry and good conduct. Amongst other things, more remission of sentence will be earnable in the upper than in the lower grades, and more privileges in the way of monetary rewards, letter writing, visits, and in other encouraging directions will be permitted. While good behaviour will better a prisoner's condition, misconduct will reduce him in class and deprive him of privileges. The remission scale will be increased, and will be extended to sentences of three months, while a distinction will be observed between the periods earnable by first convicted prisoners and those with former gaol experience. It is further proposed to establish a special or intermediate class, somewhat on the lines of the intermediate class recently established by the English Prison Department, but according more privileges. Promotion to this class will be open to the specially well conducted serving long sentences, towards the latter portion of their imprisonment, and such prisoners will have exceptional opportunities afforded them to prepare for final discharge.

28. The staff have generally worked well, and to my satisfaction. Some exceptions there were, as was only to be expected in a large service such as this, but upon the whole they have done well in their somewhat trying situations. I have much pleasure in specially inviting your attention to the excellent work performed by the officers at headquarters. Without exception, they have afforded me the greatest assistance and support. As in former years, I have to record my high appreciation of the work done by Mr. S. McCauley, the Deputy Comptroller and Inspector of Prisons.

29. The usual Appendices are attached. They contain reports from the Governors of the various prisons, from the Director of Labour, and from the Principal Librarian; and they also afford statistical information on various points concerning the prisons and their inmates.

I have, &c.,

FREDK. W. NEITENSTEIN,
Comptroller-General.

Department

Department of Prisons, Comptroller-General's Office, Sydney.

FOR GENERAL INFORMATION.—INCREASED LEAVE.

THE following Minute of the Comptroller-General has been approved by the Minister of Justice:—

MINUTE PAPER.

Subject :—Proposed new Regulation respecting clothing of warders and Regulation 8A respecting examination for Senior Warders.

Adverting to my interview with the Minister this morning, approval is now asked to grant extra leave, not exceeding seven days yearly, to all warders who may acquire the right to wear the distinctive gold star by passing the qualifying examination for the position of Senior Warder.

This concession would tend to make the service still more attractive to the right class of men, would encourage officers to study their profession, and would place it within the reach of all to materially increase their annual holidays. It would, of course, be within the power of the Comptroller-General to stop such extra leave for unsatisfactory performance of duties, or for other misconduct.

(Sd.) FREDK. W. NEITENSTEIN,
Comptroller-General.

The extra leave may be applied for when ordinary annual leave is next due.
1st February, 1899. FREDK. W. NEITENSTEIN.

Department of Prisons, Comptroller-General's Office, Sydney, 20 October, 1899.

CIRCULAR MEMO.

Re directions on page 43, paragraph 2, of Handbook of Drill, and other instructions with regard to certain leave to warders.

In certain gaols my wishes as regards leave to warders on Sundays and gaol authorised holidays have not been carried out. I am desirous that such leave should be allowed to the fullest possible extent after providing for the safety and supervision of the prison and the requirements of the various prisons. Officers in charge of gaols should themselves personally arrange these important matters, which have such a direct influence as regards the contentment and discipline of the staff, and in no case should such duties be delegated to subordinates.

On non-working days it may be practicable to amalgamate certain posts or to not fill them, and thus free a number of officers from unnecessary work. This has particular application to prisons where restricted association is in vogue. Again, the presence of extra officers may enable regular officers to receive leave in the direction indicated. These are all matters of detail, which should be easy of arrangement by the various Governors.

It is also my wish that warders should receive one monthly day while performing day duty, and they should be able, under ordinary conditions, to forecast this day some time ahead. If, for any cause, a monthly day cannot be allowed at any particular time, a day in lieu should ultimately be allowed.

When, occasionally, extra duties have to be performed, care should be taken that such work is distributed fairly.

Wherever practicable, rosters of leave and turns for extra duty should be exhibited for general information, and officers in charge should themselves prepare such roster, so that they can be constantly in touch with the staff in these important respects. Individual warders at any time desirous of consulting the officer in charge on any of the points indicated should be freely allowed to do so. And any one desirous of seeing the Comptroller-General on any subject connected with leave, duty, &c., should give in his name in the usual way in order that an interview may be arranged.

Careful attention is invited to the foregoing instructions, which are issued to promote the comfort of the staff generally, and a monthly report should be furnished showing the working of the arrangements and explaining anything of note in connection with them.

FREDK. W. NEITENSTEIN,
Comptroller-General.

1.—DARLINGHURST GAOL.

Extract from the Governor's Report.

I HAVE the honour to submit the Annual Returns for the year 1899. There were 4,948 males and 731 females, making a total of 5,679, received during the year; 5,024 males and 731 females, total 5,755, discharged during 1899.

Of the many alterations and improvements made during the year the introduction of the Restricted Association System is the most important, and it would be difficult to anticipate how far the reform will extend. The electric light having been extended to all cells and other necessary alterations completed, the practice of associating prisoners in the yards and cells was altered (during my absence on leave), the Deputy-Comptroller of Prisons being in charge of the gaol.

The new method of dealing with prisoners was introduced on the 5th December last, and has resulted in a marked improvement in the discipline, fewer punishments, and less friction. Men desirous of reform do not incur the risk of being hindered by the contaminating influence of hardened offenders. There was little or no hope of good results so long as men were compelled to associate. Now the opportunity for plotting and discussing villainous schemes in anticipation of discharge is taken away, and prisoners can escape the tyranny and coercion of the bully. Under the new system every man can conceal his identity, and keep what he is entitled to and enjoy the same in peace. The providing of lights in the cells and a liberal supply of interesting reading will assist the men who desire to do better in future, whereas they previously were compelled to listen to the coarse jest, indecent conversation, and other baneful effects of herding men together; for, classify as you will in bodies, a pernicious association will exist.

Under the new system men can be dealt with individually, the gaol agitators' opportunities for sowing mischief are minimised, and any inclination to disorder can be more promptly dealt with. Any person having experience in prisons must admit that the practical results are very satisfactory both as regards prisoners and officers. The condition of the latter has been improved, they have more time to themselves (many going home to their meals), and the hours of duty have been lessened.

All well-known authorities have for years advocated dissociation, and the present system, though not isolating prisoners from their fellows, restricts the contamination that could not be avoided when yarded together.

During the year the physical drill has been carried out with 7th class prisoners. Improvement in physique of those undergoing the drill for a short time is noticeable.

The substitution of close clipping in lieu of shaving came into force early in the year, and the concession was appreciated by the prisoners. The operation of shaving in the hands of the prison barber was at times anything but a pleasant one.

The practice of placing two sane prisoners in the cell at night with each prisoner deemed insane was discontinued, with the result that there is less noise and quarrelling in the ward. Lately the men under observation were transferred to the new ward, which before being altered was occupied as female warders' quarters. It is admirably suited for the supervision and comfort of the men, who are now separated from the rest of the prisoners.

The ceiling of the whole of the male portion of the prison has been removed and iron grilles substituted, causing a marked improvement in the ventilation of the wings. Electric bells have been placed in each cell of "C" wing, where the 7th class and "A" division prisoners are confined.

The quarters vacated by the late Superintendent of Female Division were renovated and the female staff transferred to them. The hospital for female prisoners has been converted into quarters for single male warders. These quarters have been comfortably furnished. Clubs, dumb-bells, single-sticks, and parallel-bars provided for the use of the officers. Only a nominal charge is made for the accommodation. The advantage of having a staff within the walls of the gaol in case of an emergency is obvious.

The dividing wall between "C" and "D" wings was completed, and the necessary requirements for the accommodation of female prisoners in the latter wing were finished during the year, and female prisoners were removed from "C" wing, which after necessary alterations and improvements is occupied by 7th class and "A" division prisoners. Here they can be kept apart entirely from all other classes of prisoners. The completion of the new reception and bathing room permits of all prisoners being thoroughly cleansed before being transferred to the wings in clean prison clothes, the baths being so arranged as to preserve decency, yet each man is under the supervision of the officer. The advantage to the prison by this addition cannot be over estimated. A spray bath for special cases has also been added. The constant efforts to eradicate the bug pest have been successful; these insects can rarely be found in the cells and there are no complaints from the prisoners. The roofs have been tarred.

Prior to the restricted associated system being introduced it was found necessary to divide a large number of cells, this and following improvements were carried out by prison labour:—Enlarging engine-room and making door for same. Building bed for large dynamo, and cutting trench for electric-light cables in engine-room. Dividing cells in "E" division. Fixing sinks and laying on water in "A," "B," "C," and "E" wings. Building pit for new printing press and making two windows in rear of printing-room. Repairing floor in cook-house. Asphalted in front and rear of workshops, also tarring and sanding all asphalt pavement. Drilling holes in walls of wings for electric-light wires. Lining furnace in boiler-room. Dividing garden with iron railings. Cementing yard in single warders' quarters. Removing timber-shed from front and building timber racks at rear of workshops.

During the year the surplus fat was turned into 2,668 lb. of soap and used for cleansing in the gaol.

New uniforms were issued for male and female officers on the 12th June last, giving the officers a much smarter appearance.

There have been a number of changes in the staff during the year, the principal being the appointment of Mr. Rowley as Deputy-Governor, the retirement of the principal female warder and the appointment of Mrs. Donald in her place.

Prison grown vegetables to the value of £27 14s. 8d. were received from other gaols. During the first part of the year great inconvenience and trouble were occasioned by the contractor for the supply of bread attempting to foist a bad article on the prison; it was frequently condemned and it was a relief when a fresh contract was taken, and the present, contractors have given satisfaction.

Mr. Williams, Inspector of Public Accounts, examined the books of this gaol on the 28th November last, and made the following entry in the cash-book:—"Examined from 2nd November, 1898, to 30th November, 1899, and found correct and satisfactory in every respect."

The gaol was visited by the Comptroller-General of Prisons thirty-one times, and by the Deputy-Comptroller and Inspector of Prisons on twenty-eight occasions. The Minister of Justice also visited the gaol on 1/2/99, 21/7/99, 10/10/99, and 20/12/99.

The system of night watch and clock pegging has been carried out and continues to work satisfactorily.

The warders, amongst whom were a number of new officers, have been drilled regularly, and ball practice carried out. Qualifying examinations for position of warder and senior warder were held on the 12/5/99, 6/7/99, and on the 11th and 13th October last, at which a good percentage passed.

The cost of the gaol for the year was £19,680 8s. 5d., as against £20,374 11s. 2d. for the previous year.

The

The transfer of a large number of prisoners to other gaols from the works here considerably reduced the output of manufactures, and several mat looms were sent to Parramatta to start the industry at that prison.

The general conduct of the officers has been good, and I desire to place on record the willing assistance rendered by the Deputy-Governor and Chief-Warder during the year.

Mr. McCauley, Deputy-Comptroller and Inspector of Prisons, was in charge of this gaol from the 27th November to 22nd December last year, during portion of leave of absence granted me.

ARTHUR H. COLLIS,
Governor.

2.—GOULBURN GAOL.

Extract from the Governor's Report.

I took charge of this gaol on the 17th January, 1899, *vice* Mr. Bloxham promoted and transferred to Parramatta Gaol. The number of prisoners received during 1899 was 377 males, 23 females. The number of discharges during 1899 was 340 males, 20 females. The number of persons transferred during 1899 was 50 males, 2 females. The number of prisoners in gaol on the night of December 31st, 1899, was 285 males, 5 females. The daily average number of prisoners for 1899 was 270 4. The number of prisoners remanded during the year for lunacy and protection was as follows—Lunacy 22, protection 18. The amount disbursed in gratuities and bonuses was £155 17s. 6d. The value of indulgences issued throughout the year was £201 15s 8½d., and the number of railway passes issued was 125. In accordance with your instructions letters were written to the relatives of 26 seventh class prisoners prior to their discharge. Conduct.—

Conduct.—The conduct of the prisoners shows a decided improvement. Their quiet, orderly, and respectful demeanour, and the cheerfulness with which their duties are performed, have been remarked by all visitors, and speaks volumes for the new system of restricted association. Among others who have commented favourably upon the state of discipline and good order of this gaol I may perhaps be permitted to mention the following :—The Honourable the Minister for Justice, the late Minister for Justice, His Honor Mr. Justice Cohen, the Honourable the Chairman of the Board of Public Works, the Honourable W. J. Trickett, M.L.C., the Director of Prisons of Victoria, the Inspector-General of Prisons of New Zealand.

The health of the gaol has been remarkably good, considering the prevalence of enteric fever, influenza, measles, and other diseases in the town, and more particularly in the immediate vicinity of the gaol. The only serious cases in hospital have been those of men who were diseased when they entered the gaol; and of these many have been restored to health.

Staff.—The conduct of the staff has been very good with some exceptions.

Restricted Association.—The system of restricted association continues to work most satisfactorily from every point of view, and there is not a prisoner in this gaol at the present time who does not recognise its obvious advantages, or who would care to revert to the old system.

Labour Return.—The labour return shows amount of work done by carpenter's, blacksmith's, tinsmith's, shoemaker's, bookbinder's, tailor's, and hatmaker's departments, detailing the number of different articles made by each department during the year. Taking the value per head of men employed in manufactures, the present year will be found to compare favourably with past years. During 1898 the daily average of carpenters employed in manufactures was 8'6, the value of their labour was £292 16s. 1d. For 1899 the daily average was only 7'38—1'22 less than 1898; the value of their labour was £377 2s. 11d., or £74 6s. 10d. more than last year.

Among other employments of low valuation may be mentioned the following works of an important nature performed for the Government Architect's Department by prison labour :—

Roadmaking.—All the roads in the agricultural grounds taken up and relaid in order to give increased space for cultivation, and to stand heavy traffic in wet weather. All roads within the gaol also relaid and repaired.

Sewerage.—The whole of the sewerage in N.W. section of the gaol leading from female division, gatekeeper's quarters, and Governor's quarters was taken up and an entirely new system relaid. This was a work of considerable magnitude and unpleasantness, and the heavy labour was rendered more unpleasant by an almost continuous rain, which lasted through the months of June and July, filling the trenches every night and requiring them to be kept baled out by day.

The excavation work and construction of filter-beds and new drainage system was done entirely by prison labour.

Hot Water Supply.—The apparatus for supplying hot water for bathing purposes proving inadequate, the heating tank has been moved from its former position in the cook-house to the water-tower, which gives a much greater pressure, and the supply is now most satisfactory. Steam has also been laid on to the laundry for heating all water for washing purposes, and two perforated steam coils have been placed in the coppers.

Buildings.—All brick walls and buildings within the gaol, the surrounding walls, entrance, Governor and Deputy-Governor's quarters, have been thoroughly cleaned down, and the grime and lichens have been removed, giving quite a new appearance to the gaol buildings.

Painting.—All inside and outside paintwork has been renovated, all iron railings cleaned and repainted, and all bolts and bolt-plates burnished.

Female Division.—The brick walls and buildings in female yards have all been demolished, the railings and stone foundations all removed, pavements and blocks of various levels taken up and levelled, leaving a large yard 84 feet by 76 feet, used as a drill ground for seventh-class prisoners.

Observation Holes have been cut in all cell doors and the holes covered with pivot flaps, so that prisoners requiring to be observed frequently can now be seen without unbolting and opening the door.

Electric Light.—This plant has run very satisfactory throughout the year, the work performed amounting approximately to 59,450 I. H. P. hours.

Agriculture.—This department has had a hard struggle against most adverse circumstances. The summer of 1898-9 was one of the driest on record in this district. All crops had been ruined by the terrible drought, the roots being parched in the baked earth, and the ruin had been completed by a plague of locusts. The town water supply being nearly exhausted we were not allowed to use any water for irrigation purposes. In February last the pump supplied by the Government Architect's department relieved us of further anxiety, and since then we have had an unlimited supply of water for irrigation. During the year we have brought under cultivation 25 acres of waste lands, making 32 acres now bearing growing crops. We grew sufficient vegetables to supply all the requirements of this gaol during the past year, and we have an inexhaustible supply of horse feed, potatoes, and other vegetables for the present year's requirement. The amount of gaol grown vegetables supplied as rations during the past year was 37,576 lb.; value at contractor's rates, £153 10s. 10d. The actual production was more than double this amount, but more than one-half was destroyed by locusts.

Soap.—We have made over 8 cwt. of excellent toilet soap from pure refined fat saved during the year.

Library.—The total number of volumes in library is 1634. The books most read are magazines and novels. The average number in weekly circulation is 424.

Warder's Library has been of great service, and is much appreciated by the staff.

Principal Visits :—The following were the principal visits during the year :—Minister of Justice, 18th February, 20th November. Comptroller-General of Prisons, 18th February, 4th, 5th, 6th March, 9th and 10th May, 15th and 16th July, 29th August, 5th, 6th, and 21st September, 20th November. Deputy Comptroller of Prisons, 11th January, 15th February, 22nd March, 28th April, 18th May, 27th and 28th June, 13th July, 23rd and 24th October. Inspector-General of New Zealand Prisons, 9th May. Public Works Committee, 15th July. Inspector-General of Insane, 28th July. The Government Architect, 28th July. Inspector-General of Victorian Prisons, 29th August. Superintendent of Fire Brigades, 21st November. Clerk of Works, 21st November. The Inspector of Public Accounts, 22nd December. Director of Labour, 1st and 2nd June, 6th and 7th November.

Religions.—The following are the religions of prisoners in this gaol on the night of 31st December, 1899 :—

	Males.	Females.
Church of England.....	140	...
Roman Catholic	94	5
Wesleyans	25	...
Presbyterians	18	...
Pagans	4	...
Hindoos	3	...

A. W. MACKAY,
Governor.

3.—PARRAMATTA GAOL.

Extract from the Governor's Report.

THE year has been one of special importance, and marks an epoch in the history of Parramatta Gaol. Amongst the many changes that have been made, the most important is that of the initiation of the system of restricted association.

The new system was introduced on the 12th June last, under your personal supervision, and has worked from the start in an entirely satisfactory way, and, owing to the completeness of detail, has gone without hitch of any kind. The opinion

opinion formed and remarks made in my annual report of 1898 to you from Goulburn Gaol after its initiation there—the first of the large gaols in which it was introduced—have been fully borne out in every particular, and the excellent results in many directions here are obvious. Though the electric lighting plant, which is an adjunct of the system, has so far only been of a temporary nature, pending the completion of a powerful permanent plant, the arrangements made by the Government Architect for lighting the wings and cells have been perfect in their way, and there has been an absence of trouble in this direction, which has been much valued here.

Since the new system started, gaol punishments have decreased just one-half for the six months. This remarkable decrease speaks for itself, and, of course, means that the country is spared the extra expense of keeping this number for the additional time they would have to remain in prison through losses from remission by cell punishment. It also goes to show that many of the prime causes of trouble between prisoners themselves have been removed by the enforced restricted association. This has become recognised, too, by the prisoners as something of value to them, and though it does not suit some of the “hard cases” to be deprived of time-honoured gaol customs, and the manufacturing of criminals in the mess-yards, &c., the large majority realise that it is distinctly beneficial in the long run to them.

I have invited the various chaplains to express their personal opinions upon results, as noted by them, of the new system, and herewith attach their replies, which are very interesting as being viewed from another standpoint. These will be found at the end of this report.

The benefits now enjoyed by the warders' staff are highly appreciated by them. Shorter hours, meals in comfort, no trouble in supervising unruly prisoners at meal-hours or at exercise on Saturdays, Sundays, and holidays, together with other improved conditions, are now their lot; as a consequence they do their duty well and with the best of grace. I take this opportunity, with much pleasure, to report that the whole staff here have afforded me loyal support, and, with few exceptions, I am satisfied that each has done his best to gain my approval. The Visiting Justice has taken constant and considerable interest in the whole year's proceedings, and the same may be said of the various chaplains in their sphere of duty.

A most valuable addition for clerical and reference purposes has been carried out this year by your direction in all the gaols, viz., that of the collection together of former papers of convicts. It frequently assists in many ways the conducting of these establishments, and places the governor in a position to better know the history of the men he has to deal with. This, as often as not, has been used effectively for the benefit alike of prisoners and discipline.

No. 6 wing was completed this month. This fine building has been erected solely by prison labour, with the exception of the iron gallery, stairs, &c., carried out by contract, and through which its completion has been somewhat delayed. It is constructed entirely of freestone which was obtained close to the gaol, and was begun nine years ago. It now only requires the installation of the permanent electric light and the new radiating yards contract to be carried out to make it one of the finest and most complete buildings of its kind. The cells are well ventilated, and are said to be the largest in the colonies.

Sanitary matters have received special attention, and improvements where necessary have been effected. All refuse bins have been demolished, and more effective and safer means have been employed for daily removal of matter. It is a curious and significant fact that this gaol, which was positively infested with rats in thousands, is now practically clear of them, their feeding-ground having gone with the refuse bins and the meals in yards.

The matmaking industry has been established here, the large looms from Darlinghurst having been transferred to this place. During December twenty mats were despatched to orders, and the quality has been spoken of as satisfactory. The brushmaking industry has also been added to.

New inner front gates on improved lines, and affording supervision that has become essential, have been erected, and prove of the greatest value, saving as they do the use of an extra warder.

Safeguards have been added in the observation wing, so as to minimise the danger of accident to any of the unfortunates temporarily kept there. It is a source of some inconvenience (and also of annoyance to sane convicts) to have to keep these irresponsible beings within a space but ill adapted to their special requirements, and where even the most humane treatment that can be bestowed upon them here falls short of that class of trained attendance and supervision that their infliction humanely demands. Neither is it calculated to modify the troubles of other sane unfortunates who have, perforce, to hear the irrational vapourings of their fellows in trouble. Since the change was made during the year in this wing, by removing the two prison-keepers and only having the observation prisoner alone in the cell and in view of the night warder all the time, there has been a remarkable change for the better. It is the exception now to hear yells and demoniacal screeching going on that existed in the early part of the year.

A considerable saving has been made during the year through the arrangements made by the Deputy Comptroller of Prisons, when acting in charge here, in connection with the nightsoil and water contracts. Previously the charge of 7s. 6d. was made by the Council for its sanitary work. This has ceased, and the whole matter is utilised for fertilising purposes in the gaol garden. Water, which was charged for at 10s. 6d. per head per annum by the Council, is taken by the meter, and will eventually result in further considerable saving.

The gas account has been reduced from £359 17s. 6d. for 1898 to £314 11s. 3d.—the substantial sum of £45 6s. 2d. having been saved. Of this, £36 9s. 10d. was saved during the first half of the year and before the electric light was introduced.

Agriculture.—This has formed a special and valuable feature in the year's work, and its importance as an industry cannot be too highly placed. The results have been quite satisfactory, while prisoners have been taught something likely to be of use to them if they care to follow up farm labouring on their discharge. They have assisted to grow over 50,000 lb. weight of vegetables for the year for gaol consumption. Several tons of pumpkins, marrows, carrots, cabbages, &c., are in a forward state.

The writing of letters to parents of young prisoners in 7th class has had a doubly good effect, judging by the replies received from some of the parents, some of whom appear to have been roused from grossly careless habits towards their offspring so criminally negligent that it seems difficult to understand how they could have drifted into them. A number have availed themselves of the privileges extended to them for their children, and have called and gladly received them the day previous to the expiry of sentence, a humane provision that will at least give the young fellow a chance to start afresh in his parents' home.

The stock of books in the library has been largely added to, and the boon of reading is now to prisoners more than it ever was, by reason of the much longer hours they have alone. From a few minutes past 4 to 8 p.m. and 8.30 p.m., according to class, they may now read and write in their cells, and most of their time is put in in this way. Slates and pencils are provided in all genuine cases, where prisoners show me they will be put to proper use. By books and slates the hours are made to pass more fleetingly, the mind is wholesomely occupied, and when bed-time is reached the prisoner is, in most cases, in a comparatively peaceful frame of mind, and is enabled to sleep the rest of the night, rising in a reasonably contented state next morning for the day's work. Indirectly that has tended to keep down prison troubles—a healthy mind helps to make a healthy body, and the two combined are capable of being handled in easier fashion by those charged with such responsibilities. The warders' library has also been made a feature, much first-class and useful literature, bearing principally on matters of men and their treatment, and likely to be of most service to those in the line of life followed here.

The conduct of the prisoners has been excellent as a whole, there being of course a few exceptions amongst them, though, as the punishment schedules show, the number has been gratifyingly small.

The following are the principal visits shown for the year:—Mr. Lee, Minister of Justice, 6th February. Mr. Wood, Minister of Justice, 29th September. The Under Secretary of Justice, 6th February. The Comptroller-General of Prisons, 6th February, 12th to 20th June, 13th April, 11th and 13th July, 29th September, 3rd October. The Deputy Comptroller of Prisons, 17th to 22nd January, 15th and 17th March, 12th, 16th, and 31st May, 10th, 12th, 13th, 14th, 16th, 17th, and 18th June, 8th July, 2nd, 16th, and 17th August, 2nd September, 9th, 10th, and 19th October, 2nd November, 29th December. Inspector-General of Insane, 6th February, 31st May, 6th July, 4th October. Lieutenant-Colonel Hume, Inspector of Prisons, New Zealand, 13th April. Mr. W. Vernon, Government Architect, 19th June. Mr. T. Coghlan, Public Service Board, 13th July.

Extracts from letters to and from the five General Chaplains referred to in this report, having reference to the working of the system of restricted association from their point of view

The Governor's letter to the Chaplains —

"Now that you have had the opportunity of thoroughly seeing and testing from your own standpoint the system of restricted association, which has been in force in this establishment for six months, might I ask you kindly let me have, on receipt of this, a few lines giving your opinion as to results that have come under your own observation since its initiation. I propose attaching same to my annual report, which is now being forwarded and the esteemed opinions from the chaplains will, it is needless to say, be much appreciated."

The Rev John Dome, Church of England Chaplain, in reply —

"In reply to your note, in which you ask me to state what is my opinion on the results of the system of restricted association, I have no hesitation in stating that I consider they are most gratifying in most respects. While the prisoners have been granted greater privileges, and every opportunity is given them to improve themselves by reading in their cells, especially at night, they are made to realise more than ever that they are being punished for crimes they have committed, and prison life, though now comparatively free from those evils that once surrounded it, is sufficiently trying to make it unpleasant for hardened criminals and for first offenders to keep out of it in future. If the present system does not help those who are unfortunate enough to get into gaol to lead a better life in future, I fear nothing on earth will."

The Rev Reginald Bridge, Roman Catholic Chaplain, in reply —

"The six months that have elapsed since the introduction of the restricted association into the gaol under your charge, have been enough to prove the perfections of the new system. From moral and social points of view, the good effects of the system cannot be overrated. It will be interesting, I am sure, as well as agreeably surprising, to compare the criminal statistics and particulars in the next Annual Report to the Minister of Justice with those of preceding years. I find the prisoners continue to appreciate the new order of things."

The Rev Robert Jackson, Presbyterian Chaplain, in reply —

"In answer to your request I have great pleasure in stating that the system of restricted association is working admirably, and is having a mixed influence for good on them. From what I have heard from the men themselves, I am of opinion that the well disposed would strongly resent a return to the old system."

The Rev J E Carruthers, Wesleyan Chaplain, in reply —

"The restricted association system has been in force in Parramatta Gaol for over six months, and I have watched its operation closely. It has effected a marked improvement in the discipline and morale of the institution, and has been beneficial in its influence upon the prisoners. Its tendency has been in the reformatory direction in case of the better class of prisoners, and upon those of a baser type it is deterrent as adding a severer aspect to prison life. It is a reform in the right direction."

The Rev Ph Philippstein, Jewish Chaplain, in reply —

"In answer to your favour of yesterday's date, asking for my opinion re the system of restricted association in force in Parramatta Gaol, permit me to state that, from expressions gathered from prisoners at my visits to your gaol, I am convinced that this system will effect a moral improvement upon the individual prisoner, and will greatly diminish cases of released prisoners returning to their evil ways and companions, as occurred only too frequently in the past under the associated system."

F. E. BLOXHAM,
Governor.

4.—BATHURST GAOL.

Extract from the Governor's Report.

VISITS of Inspection.—The Comptroller-General of Prisons on the 23rd, 24th, 25th March, 15th April, accompanied by Col. Hume (Inspector of Prisons, New Zealand), and on 9th, 10th, and 11th of December. Deputy Comptroller, 3rd, 4th January, 4th May, 7th, 8th, 9th, and 10th August, and 4th September.

Conduct of staff has been good, with exceptions.

Conduct of prisoners, with a few exceptions, has been generally good.

Employment has been found for the prisoners at the following industries:—Bootmaking, saddlery, bookbinding, tailoring, hatmaking, stonecutting, blacksmithing, painting, carpentry, tinsmithing, marble-polishing, needlework, agriculture, and washing, in addition to the ordinary service of the prison.

The additions and alterations to the female division have been completed, and better classification of the prisoners has been made.

Electric Light.—The contractors, Messrs. Lasseter & Co., completed their work in April. A new power-room has been erected and the plant has worked satisfactorily.

Agriculture.—During the year vegetables and forage to the value of £80 (at contract rates) have been taken from the ground. There is now growing a fair crop of potatoes, corn, pumpkins, and a variety of other green vegetables, from which I anticipate a fair yield. An area of 15 acres has been added to the gaol grounds; a considerable amount of this has been fenced, and I hope to complete the work during the coming winter months.

The bath-room for male prisoners has been enlarged and nineteen enamelled baths placed therein, which will give ample accommodation for the prisoners' bathing; a shower is erected over each bath. I have also had one fitted up in "A" division, so that now these prisoners need not go to the general bathroom.

Surplus fat has been collected and a large quantity of soap made.

Marble Industry.—New workshops, showroom, and sheds have been built by contract; the foundation, drainage, and floors by prison labour. Delay was caused in cutting marble during the time this work was in progress. Much preparatory work has been done; blocks of marble, weighing from 4 to 9 tons each, have been cut up into suitable sizes for various designs of mantel-pieces. A very large and handsome mantel with fender was satisfactorily turned out for the new room in the Treasury Department, and the Government Architect has been supplied with mantels for other buildings. The appliances for this industry are very much improved, and it is expected that the work will be done easier and a fair revenue obtained in the future.

The restricted treatment for male prisoners has been in vogue for the past seventeen months, and has worked in every way very satisfactorily. The prisoners are more obedient, and there is marked improvement in the discipline; several of them have on many occasions told me they would not desire to return to the old system.

On the 11th December, the new treatment was introduced into the female division, under the supervision of the Comptroller-General for Prisons; everything passed off satisfactorily, and ever since has worked well. A few days afterwards the whole of the prisoners, by yards (when mustered for dinner), desired me to thank the Comptroller-General for his kindness in placing them under the treatment, stating they were very grateful for the concessions allowed them in the way of reading and light at night. Most of these women are serving long sentences. They say it is a great boon to have their meals so comfortably in the cells, as against the old system in the yards. I am pleased to report that the prisoners in this department have been well conducted and worked industriously, as the value of their labour will show compared with former years.

Prisoners' Earnings.—This amount has been increased by £587 8s. 7d., chiefly by the work of prisoners in the tailoring department and female division. Larger quantities of garments have been made for the stores department than in former years. The increase in the value of labour only for goods supplied to the stores department during 1899 exceeds that of 1898 by £472 11s. 8d.

CHARLES GRAHAM,
Governor.

5.—BERRIMA GAOL.

Extract from the Governor's Report.

The health of the prisoners during the year has been excellent.

The discipline among the prisoners was well maintained. B and C divisions were regularly subjected to elementary drill.

The extension of the seventh class regulations of 9th September last was given effect to.

The prisoners received here for special treatment (who had misconducted themselves at other gaols) have behaved well; in no single instance was it found necessary to punish one.

The prisoners as a body have worked well, and succeeded in turning out good work, especially so in the case of clothing for the inmates of lunatic asylums.

About 230 new books were supplied to the prison library; all of them are of an excellent and readable character. The prisoners read the books with pleasure and profit.

The restricted association system, with all its attendant advantages for the moral and physical improvement of the prisoners, continues to work well and smoothly.

The staff, I am glad to state, have discharged their duties in a satisfactory manner. The warders were granted the usual annual leave, and, in addition, received a day off duty for every month while on day duty, and each warder had six Sundays off duty during the year as well. The staff, after providing a reserve of three warders in rotation for patrol work, enjoyed an hour off duty for breakfast and dinner, with liberty to go home. The intermission for meals, together with a later morning and earlier evening parade, shortens the warders' duty by about two and a half hours per diem. I have carefully observed the warders on and off duty all the year round, and I am glad to bear testimony to the fact that they are as a body strictly sober and respectable men. A library has been supplied for the use of the warders at the gaol. A room has been set apart for the warders' use when they are off duty, and a fire is allowed when necessary. A class for the instruction of the warders, to fit them to pass the senior warders' examination, was conducted for many months by myself and Mr. D. M. Arkins, the clerk. The new pattern uniform for the officers was issued during the year; it is much smarter and better finished than the old pattern.

The Comptroller-General visited on the 9th May, accompanied by Lieutenant-Colonel Hume, Inspector of Prisons, New Zealand; 30th August, with Captain Evans, Inspector-General of Prisons, Victoria; and on the evening of 4th September, and day of the 5th September. The Deputy Comptroller visited on the 29th April.

His Honor Mr. Justice Stephen and the Honorable E. W. O'Sullivan, Minister for Works, recently visited the gaol, and subjoined are extracts from entries made by those gentlemen in the Visitors' Book:—

Mr. Justice Stephen:—"Approves highly of improved system in favour of lights in cells, non-association, and feeding separately in cells, &c."

Hon. E. W. O'Sullivan:—"I am glad to hear that the conditions of life here have been more humanised of late by giving separate food and artificial light—discipline tempered with mercy."

T. G. ADAMSON,
Governor.

6.—BILOELA GAOL.

Extract from the Governor's Report.

In my report for 1898 I called your attention to the faulty construction of the prison, precluding anything like classification, since which time, as you are aware, the Public Works Committee have condemned the establishment as a prison; this was on the 11th July last; nevertheless, the best efforts have been put forward to keep the place habitable and in a cleanly, healthy condition.

The quarters of the officers have been furnished by your direction, and now present a very comfortable appearance. A library has also been added for the use of the officers, and is much appreciated. Baths have been provided for the use of the resident officers.

The garden land of the gaol has been constantly tilled, and with good results, 5,489 lb of mixed vegetables and potatoes, of a total value of £37 16s 3d, having been obtained.

The industries inside the gaol have been satisfactorily carried out, and consist of cabbage tree sennit plaiting, hat-making, tailoring, shoemaking, carpentry, shrinking and rolling tweed, flannel, &c, Government stores, plaiting cocoanut fibre, and oakum picking, and the usual necessary labour of the gaol.

In the female division the prisoners have been usefully and profitably employed in needlework for Government stores and the ordinary prison labour.

Lady readers have been approved by you after consulting with the chaplains here, and these ladies now frequently visit the female prisoners of the Church of England and Roman Catholic denominations, and I hope with good results.

The principal visits during the year were as follows—Minister of Justice, 2nd February and 1st November. The Comptroller General of Prisons, six visits. The Deputy Comptroller of Prisons, fourteen.

The number of prisoners received during the year was—Males, 1,235, and females, 1,863; and the number discharged—Males, 1,277, females, 1,859, remaining in gaol on 31st December, 1899—83 males, 115 females.

No escapes occurred during the year.

The conduct of the officers has been good.

The health of the prisoners has been very good except when the influenza epidemic prevailed.

THOMAS BARNETT,
Governor.

7.—MAITLAND GAOL.

Extract from the Governor's Report.

OFFICIAL Visits of Inspection.—The Honourable C. A. Lee, Minister of Justice, accompanied by the Comptroller-General, inspected the gaol on the 10th March, and after visiting each seventh class prisoner in his cell—to each of whom he addressed a few words of advice and encouragement—he minutely inspected all parts of the prison, the inspection lasting upwards of two hours, and on leaving he expressed himself pleased with the cleanliness and discipline of the gaol. The Deputy-Comptroller and Inspector of Prisons visited on the 23rd February, 26th May, 25th July, 16th and 17th November. The Hon. Alex. Brown, M. L. C., on the 1st April and 22nd September. His Honor the Chief Justice, Sir Fredk. M. Darley, K. C. M. G., on the 4th October.

Officers.—The conduct of the officers has been satisfactory.

Prisoners.—Received and Discharged—number received, 708 males and 72 females; discharged 706 males and 70 females. Daily average number in gaol 109·4, or 14 less than the daily average for the previous year. This speaks well for the new system, which has worked without a hitch from its inception, and which is now in thorough working order. Drills according to the Handbook have been regularly carried out. One death occurred during the year, an old man of 73, who was sentenced to 14 days' imprisonment for having no lawful means of support, otherwise the health of the prisoners has been excellent.

Industries.—Male Division—Bootmaking, tailoring, bookbinding, and hatmaking have been carried on in the workshops, the value of work turned out being largely in excess of that for the previous year, although the number employed has been less. Those employed in the building trades have been actively engaged in the erection of boiler-room for electric light plant, sulphur house, dwarf wall, and galvanised-iron fence round garden outside the gaol, painting and repairing existing buildings, and assisting the Government Architect's workman in altering and perfecting the drainage system of the gaol. Female Division—Making shirts and underclothing.

Agriculture.—A gang of prisoners (sometimes two gangs) has been constantly employed in this very healthy and desirable work, and all available land attached to the gaol is now under cultivation, and when the nature of the soil is taken into consideration, I think that very fair returns have been obtained.

Comparing these figures with last year's return it will be seen that there is a considerable all round reduction. The average number confined during 1893 was 111.9, whereas this year the average is only 96.7, being a reduction of 15.2 prisoners.

Health of Prisoners.—The general health has been good, and although the epidemic of influenza was prevalent in the village and amongst the officers there was little or no appearance of it in the prison.

Daily average of patients has been	1.89
Total patients dealt with during the year	110

Conduct of Prisoners.—Very little fault can be found with the general behaviour, the prisoners being very orderly, cheerful, and in almost every case industrious.

Prisoners' Punishments.—During the year ten prisoners have been punished—nine cell and three dietary punishments being awarded. All offences have been of a minor description with the exception of one—this exception was a case wherein the prisoner wardman was charged and convicted of falsifying the return of medical comforts, appropriating to his own use a quantity of tobacco.

Prison Library.—The volumes contained in this library number 660. Of this number 530 volumes are more or less light literature, the remaining 130 being educational works. All the books are in a good state of preservation and are carefully attended to by the senior warder who acts as librarian. During the year just completed the prisoners have availed themselves of this privilege to a somewhat greater extent than in former years.

Accommodation for Prisoners.—One range of huts has been demolished, the number in association has therefore been somewhat reduced, and in about three months time each prisoner will be provided with a separate cell. Early in the year the Comptroller-General was pleased to approve of wider hammocks than those formerly in use being supplied. Those having been provided are much appreciated.

Prison buildings and grounds.—Every effort has been made to maintain the various buildings in a state of good repair, and improvements in various directions have been carried out. In February, 1899, a contract was entered into with Messrs. Harrison and Son for the erection of improved accommodation for prisoners at this prison, the contract price being £9,368 8s. Notwithstanding the drawbacks consequent on a wet season, good progress has been made with the main building and attachments, and, probably, about April next the work will be completed. In this contract every provision appears to have been made to bring the establishment up to date, both as regards accommodation and from a sanitary point of view.

The quarters for single warders have been wholly remodelled. Formerly these men were all housed in a large dormitory. A new building has now been provided, in which each man has a separate apartment furnished with every convenience. Spare rooms are also set apart for escort officers. A large dining and recreation room, kitchen, and bath-room are attached, and, altogether, the provision made for the comfort of those officers is of the most liberal description.

The ten cottages for married warders, which were in course of erection at the end of 1893, were handed over by the contractor in May last, and were occupied forthwith.

The total payment made to contractor was £3,589 5s. 9d. No bathroom accommodation was included in the contract, but, on the recommendation of the Comptroller-General, these rooms were subsequently added, and each cottage was connected with the main prison water supply. The bath-rooms were built by prison labour. The water connections, also, being made by prison labour.

Those cottages are now complete in every detail, and are of a very superior class. The occupants are highly pleased, and greatly appreciate their improved condition. Each one seems to take an interest in his house, and the grounds are receiving attention, small gardens already being noticeable. Altogether, the arrangements made for the housing of single and married warders at this prison are of the very best description, and the amounts charged for rent are extremely fair and reasonable. I question if the same class are better provided for in any similar institution.

Agricultural Work.—It was proposed in my last Annual Report to fence in a piece of ground behind my quarters, and use it for cultivation purposes. This was done early in the year, and gardening operations commenced.

Peg Clock System.—This system has worked admirably. Three sets of stations are established, and clocks are carried by each of the officers on duty inside the prison, pegging being at such short intervals that there is no opportunity for neglect. Frequent visits of inspection during the night are made, and the officers have been at all times found vigilant and on the alert.

Officers' Drill.—This drill, which at the beginning of the year was very unsatisfactory, has improved in a marked degree. The improvement in drill has also tended towards a smartness and deportment, which was hitherto lacking. The large room, which was formerly occupied by the single warders as a dormitory, has been turned into a drill-hall. This allows of drill being carried out regularly under any conditions of weather.

Target Practice (Revolver and Rifle) has been carried out according to regulations, the marksmanship with both weapons showing a decided improvement. Mcorris' tube practice is also regularly attended to.

Warders' Library.—During the year a number of volumes have been received for the instruction and education of warders in matters connected with Penology, Criminology, and other educational branches. This provision is, I think, an excellent one, allowing an officer who is desirous of making himself thoroughly proficient in matters connected with his every-day duty—an opportunity he could not otherwise possibly have by reason of the expense necessary to purchase those works.

Warders' Examinations.—Three probationary warders presented themselves for examination; two were successful at the first sitting, the third having to undergo a second trial, at which he was fortunate enough to secure a sufficient number of marks to gain a pass. Two 3rd-class warders offered themselves for the qualifying examination for the position of senior warder; they both did creditably, but not sufficiently well to obtain a pass. These examinations were conducted by the Deputy Comptroller.

Officers' Uniform.—The new uniforms were first worn in this prison late in July. The appearance of the men generally is much improved by this uniform, it being much more distinctive than that formerly worn. The works' overseer, and in fact all industrial officers, have also been supplied with uniform. This I think is an excellent idea; each man is now by his dress recognised as an officer, and presents a much smarter appearance than when dressed as an ordinary citizen.

Divine Service.—These services are held at regular intervals by the visiting clergyman of the Church of England, but owing to ill-health the Roman Catholic Clergyman has been unable to give as much attention to his duties as might be wished. Services when conducted here are generally fairly well attended, although there is no compulsion.

Whale-boat Service.—This boat, manned by prisoners under the management of a warder, has been very much in demand during the year. The public freely avail themselves of this provision, which to them is of very great convenience. The boat was launched for service during the year 176 times, the number of passengers embarked and disembarked being 343. On the 30th August the prison crew rescued three men from the small steam-launch "Daisy," which was in imminent danger of foundering in the Bay; the next day the launch was towed to a safe anchorage. Whilst the rescue was being effected a very high sea was running.

Principal Visits.—The Deputy Comptroller, Mr. S. McCauley, visited from 1st to 7th March, and again from 24th to 30th September. The Rev. J. Doyle, R. C. Bishop of Lismore, visited on the 10th November and 3rd December. Mr. D. Miller, Treasury Inspector, visited and inspected accounts on 24th November.

Works.—The year just completed is the first during which the management of prison and works has been in one hand, and the result, so far as the amount of work that has been done, shows that this system should prove satisfactory. There have been many drawbacks, which were to be expected considering the important change, but notwithstanding everything has gone very smoothly.

The improvement of grades, as outlined in the last annual report, was carried out to completion early in the year, and in consequence the horse-traction is very much lessened. During the year No. 1 quarry was worked out, the crane being advanced to No. 2 quarry, and the shear-legs removed. This left only two available quarries, but a third site was fixed and shear-legs placed so that every possible effort might be made to get a good return.

During the year two heavy storms occurred which were most destructive, damaging the breakwater to a considerable extent.

The breakwater is now out a distance of 721 feet, being an advance of 56 feet for the year's work. Had there been no wash-away the advance would have been 177 feet, which represents the actual length of breakwater constructed.

The total output of stone to breakwater during 1899 amounted to 28,456 tons, being an increase of 5,153 tons on the output for 1898. The gross weight of stone handled was 39,637 tons, being 5,365 tons over that dealt with in 1898. Considering the small number of prisoners employed, and that the expenses for labour, stores, and plant are £389 less than during the previous year, the work done should, I think, be considered a good record.

The heaviest stone tipped on the breakwater during 1899 was one weighing 36 tons 2 cwt 1 qr, the number of grid stones tipped being 1,979, and the average weight of each stone 8½ tons.

COMPARATIVE Statement showing Progress of Work on Trial Bay Breakwater from 1st January, 1890, to 31st December, 1899

J. M. CAMERON,
Governor.

9.—ALBURY GAOL.

Extract from the Gaoler's Report.

Conduct of staff has been good, with one exception.

The conduct of the prisoners has been good; only two prisoners were reported during the year.

The prison library is in good condition and prisoners avail themselves of it.

The system of restricted association works well, and Mr. Justice Stephen approves of it very much, and remarked to me that such a change was long wanted.

The Comptroller-General of Prisons visited the gaol on 7th September. The Deputy-Comptroller also visited the gaol on 22nd, 23rd, and 24th April.

The Inspector-General of Prisons from Victoria visited this gaol on 31st August, and remained from 10 a.m. to 4.10 p.m., and was well pleased with what he saw.

J. THOMPSON,
Gaoler.

10.—ARMIDALE GAOL.

Extract from the Gaoler's Report.

THE numerical strength of the staff was reduced by one warder, and the members of the present staff are working steadily and satisfactorily. They highly value the Comptroller-General's consideration in sending books for the officers' library as well as the extra leave of absence allowed to them.

The sanitary conditions of the gaol have been further improved by the town supply of water being connected, giving an ample supply for cleansing and flushing purposes.

Much needed repairs have been made to the quarters. The surgery has been fitted up with cedar shelving, and the Visiting Surgeon is quite pleased with it. A steam cooker has been fitted in the cookhouse, to replace the old boilers, and it is giving satisfaction.

There is a material decrease in the general expenditure for the year.

The Deputy-Comptroller and Inspector of Prisons visited the gaol on 25th and 26th July, also 13th and 14th November, 1899.

The health of the prisoners has been good, and the opinion I have voiced in previous reports of the deterrent principles of the restricted association system seems amply corroborated by the fact that only two prisoners who were subjected to it have been reconvicted and returned to this gaol during the year.

During the year prisoners on remand, trial, and 7th class, also prisoners serving sentences of over twelve months and first-timers sentenced to terms of six months and over, have had lights in their cells to allow of their devoting more of the time in which they are confined to reading the extra issue of library books allowed to them; this great concession is very much appreciated by them, and the fear of losing the night-light is an incentive to good behaviour.

The number of prisoners punished for breaches of regulations during the year has been six. This is an exceptionally small number, and I attribute the healthy decrease in a great measure to the advantages of the restricted association system.

The past season has been very dry and unfavourable to the growth of root crops, but sufficient vegetables and heavy seed have been grown on the gaol grounds to obviate the necessity of purchasing any from the contractor, and a large yield is expected from the crop now in the ground and nearly ready for taking up.

S. F. POLLACK,
Gaoler.

11.—BROKEN HILL GAOL.

Extract from Gaoler's Report.

THE Deputy Comptroller of Prisons visited the gaol from the 12th to the 14th of April inclusive, and personally inaugurated the restricted association system on the former date. He also examined the senior warden and one probationary warden as to their educational qualifications, each of whom passed.

I have no hesitation in saying the new system has had a very marked and beneficial effect upon the prisoners in every way, and who, having long since quite settled down to the new order of things, appear to fully realise and appreciate the advantages of the change. Everything is now working in the smoothest possible manner.

The Comptroller-General of Prisons visited and inspected the gaol on the 15th September; he authorised a fresh supply of books for the prisoner's library, and 125 were shortly after received from Darlinghurst Gaol.

The industry of the prisoners at the various occupations has been most marked.

Although the daily average is less than in the previous year, the cost of gaol shows a slight increase, which can be accounted for by the introduction of the restricted association system and the extra cost in connection therewith. The installation of the electric light, which had been under consideration for some time, is now proceeding, and will, I think, be finished in about two weeks' time.

The conduct of the prisoners has, with few exceptions, been good.

The conduct of the warders has been good.

SIDNEY M. BROMLEY,
Gaoler.

12.—DENILQUIN GAOL.

Extract from the Gaoler's Report.

ONE warder was fined for misconduct; with this exception the conduct of the subordinate officers was exceptionally good.

The conduct of the prisoners was also very good, there being but seven punishments during the year.

Lights have been extended to the cells, and prisoners are now allowed a light until half-past 8 p.m.

Library books are now issued to all prisoners, irrespective of class.

These concessions are highly prized.

The tell-tale clock has been introduced and works well, the result proving that officers are alert on their nightly posts.

Visits were paid by the Comptroller-General of Prisons on 11th September, and by the Deputy Comptroller of Prisons on 7th April.

The cost of the gaol was nearly equal to the preceding year, when the daily average was 21·2, while the average for 1899 was only 11·27, or about one-half; hence the cost per head has been nearly doubled.

Latterly the warders have been allowed increased leave, and the concession is much appreciated. Each warder is allowed one Sunday per month, a Saturday afternoon, and a monthly day, and leave on authorised gaol-holidays in turn.

J. H. MANSELL,
Gaoler.

13.—DUBBO GAOL.

Extract from the Gaoler's Report.

THE Comptroller General of Prisons visited the gaol on 5th April, 1899; the Deputy Comptroller of Prisons visited the gaol on 5th January and 11th August, 1899; the Director of Labour on 11th August, 1899.

The conduct of the warders has been generally good.

Prisoners have been employed at the following work—Tailoring, painting, making cabbage-tree hats, and wood-cutting, grinding axes for private persons and gaol.

The whole of the wing, yards, sheds, hospital, prison kitchen, and main entrance gates, and between the gates, and portion of Gaoler's quarters have been re painted during the year.

The buildings are in good repair.

No escapes or attempts to escape have occurred.

The new system of restricted association was adopted in this gaol on the 5th of January last by the Deputy Comptroller of Prisons. It has been carried out since that date up to the present without the slightest hitch. I have never heard any of the prisoners complain of this treatment; they have, when in their cells on Sundays and holidays, a liberal supply of reading matter to occupy their time. I find this is a great change for the better, which is shown by only three prisoners having been punished for four offences during the year. Officers also welcome the change; they are now in a position to go home to their meals.

Remissions to prisoners of over three months up to twelve months, according to Schedule, is a great boon to this class of prisoners. It prevents them from committing breaches of the regulations, whereby, in days gone by these were the class of prisoners who were the chief cause of long sentence prisoners committing themselves by coming in contact with this class, the remission now puts a stop to this; they now have time to lose as well as long sentenced prisoners.

J. BOYDEN,
Gaoler.

14.—FORBES GAOL.

Extract from the Acting-Gaoler's Report.

THE conduct of the staff during the year has been very good.

The conduct of prisoners has been good.

The prisoners, who are all under short sentences, are employed in the following trades and works:—Carpentry, painting, tinsmithing, shoemaking (repairs), tailoring (repairs), sweeping and cleaning, wood-cutting, cooking, and general labouring.

J. THOMSON,
Acting-Gaoler.

15.—GRAFTON GAOL.

Extract from the Gaoler's Report.

THE Deputy Comptroller of Prisons (Mr. McCauley) inspected the gaol on 27th and 28th February.

Officers passed qualifying examinations for promotion as follows :—3rd class warder R. McBean, for senior warder, 28th February ; probationary warder D. Murphy, for 3rd class warder, 28th February ; probationary warder S. Willis, for 3rd class warder, 25th May.

The conduct of the officers has been good, and their duties have been well and intelligently carried out.

The conduct of the prisoners has been excellent, only four prisoners in all having committed themselves during the year.

Incandescent, in lieu of the ordinary gas burners, were introduced here on 17th June, and although the quantity of gas consumed is greater now than formerly owing to the new system, better light at comparatively less cost has resulted.

The introduction of a warders' library at this gaol, containing books of interest and instruction, with a view to the officers of the gaol lacking no means of self-improvement in their official capacity, is much appreciated.

The 2 acres 1 rood and 30 perches of land recently fenced in are now under maize and pumpkins, which, together with the crops in the other part of the agricultural area, are in a very promising condition.

The value of labour for articles manufactured at this gaol during the past year is £S 12s. 4d. in excess of that of the previous year.

The prisoners have been fully employed at tailoring, cabbage-tree hat and housikin making, wood-cutting for gaol and police, agricultural and general work of the gaol.

Both officers and prisoners have been drilled in conformity with instructions laid down in time-table for modified restricted association system and prisoners' hand-book of drill.

The following alterations and improvements have been made to the gaol :—

By Contract.—The openings for gas-jets in cell walls have been much improved by being each extended upwards and outwards. The addition of 2 acres 1 rood and 30 perches to agricultural area has been fenced in and paled.

By Gaol Labour.—The whole of the floors of cells and corridors have been dressed with crude carbolic acid and lampblack, and the floors polished. All the cells, corridors, and work-shops have been lime-washed. The work and iron work of the gaol has been painted where necessary.

W. JAY,
Gaoler.

16.—HAY GAOL.

Extract from Acting Gaoler's Report.

I ARRIVED in Hay on the 4th of April last, in company with the Deputy Comptroller of Prisons, and duly took charge of the gaol from Mr. D'Arcy, Chief Clerk, Darlington Gaol, who was at that time temporarily in charge. The Deputy Comptroller of Prisons, on the 4th, 5th, and 6th of April last, made a searching investigation into the conduct of the officers and management of the gaol generally.

The Comptroller General paid an official visit of inspection to the gaol on 21st May last.

The new system of restricted association was finally put into practice and it has worked smoothly and well ever since. Lights were installed in all cells for the first time in April last, a privilege highly appreciated by the prisoners, the monotony of the cells being very much relieved by lights and reading. Library books are issued twice weekly to all well-conducted prisoners; also slates and school books if required.

The conduct of prisoners was good.

Vegetable Garden—A quantity of pumpkins and vegetable marrows was obtained from the garden during the early part of the year, which served to supply vegetables to the prisoners every alternate day up to the 8th of October last.

A considerable saving has been effected during the year in gas, water, salaries, and other items. Cost of gaol for 1898, £1,457 3s. 2d.; cost for 1899, ££01 3s. 11d.—a difference of £559 19s. 3d. No trouble or complaints from any quarter.

S. J. NEBBETT,
Acting-Gaoler.

17.—MUDGEE GAOL.

Extract from the Acting Gaoler's Report.

THE conduct of the subordinate officers has been very good.

The conduct of the prisoners has been good, one only having been punished during the year.

The prisoners were employed during the year at painting, whitewashing, cutting firewood for the police, lock-up, post and telegraph offices, cutting firewood for the gaol, cooking for prisoners, repairing prison clothing, sweeping and cleaning, and attending sick prisoners.

One male prisoner was received on the 8th May, on remand for medical observation. He was in bad health on reception, and he was seen immediately after admission by the visiting surgeon, who prescribed for him. He gradually sank, and died on the 21st May.

The cells are now lighted at dusk until 8:30 p.m. The concession is much appreciated by prisoners.

The gaol was visited on the 27th September by His Honor the Chief Justice, who saw the prisoners having meals in their cells, under the restricted association system, which is carried out in this gaol. His Honor was much pleased, and said it was a great improvement on the old system of yarding prisoners, as it certainly would tend to their reformation.

The gaol has been worked smoothly, under the restricted association system, with no complaints during the past year, with a saving over last year of £744 10s. 7d.

The prison buildings are in good order and repair.

NICHOLAS SCULLY,
Acting Gaoler.

18.—TAMWORTH GAOL.

Extract from the Gaoler's Report.

THE new system of restricted association commenced in this gaol on the 26th of May last year, under the personal direction of the Deputy Comptroller of Prisons, and has worked smoothly without the slightest hitch up to this date, it being appreciated alike by officers and prisoners. I noticed that the conduct of the prisoners has been particularly good since its inauguration.

The conduct of the warders has been good, and their duties have been performed most efficiently.

Two deaths occurred to prisoners during the past year; both prisoners were very old men, and in a dying state when received into gaol. The jury's verdict in both cases was "Senile decay."

Three branches of new industries were commenced here in May last, viz., cabbage-tree plaiting, hatmaking, tailoring, and bootmaking—all for prison use.

The other work found for the prisoners being painting, working in the garden, pumping water from a tank outside the gaol, cutting firewood for the gaol and police, planing new decking in connection with the towers.

The whole of the cells have been lighted with gas since the new system.

A new cooking plant has been erected in the cook-house.

The Deputy Comptroller of Prisons visited the gaol three times during the past year, viz., 26th to 28th of May, 27th July, and 15th November.

JOHN COFTER,
Gaoler.

19 —WAGGA WAGGA GAOL

Extract from Acting Gaoler's Report.

CONDUCT of officers has been good

Conduct of prisoners has been good

The prisoners were employed making up prison clothing, sweeping and cleaning, cutting firewood, cooking prisoners rations, painting, and a little carpentry.

The removal of a dividing wall of two cells, as suggested by the Deputy Comptroller on his visit of inspection, is very beneficial in the treatment of lunatics

A restricted association of female prisoners for meals and exercise was inaugurated on the 18th ultimo. This form of treatment for male prisoners has worked very well during the year

Light (candles) were supplied to prisoners on 25th April

Uniform of a new pattern was taken into wear by officers on 12th June

Decrease in expenditure of £6 14s 1d caused by less prisoners being in gaol. The salaries showed an increase of £13 16s 8d, owing to the employment of two special warders to assist in guarding a prisoner who was sentenced to death.

Official inspection by Deputy Comptroller on 24th and 25th April, and by the Comptroller General of Prisons on 6th and 7th September

20 —WILCANNIA GAOL
Extract from the Gaoler's Report.

CONDUCT of the staff has been very good

The gaol was visited by Deputy Comptroller of Prisons on 16th and 17th April, also by Treasury Inspector Reilly on 14th February

The gaol buildings are now in a good state of preservation, the cracked a ch and wall having been repaired.

The principal occupation of the prisoners has been woodcutting painting, tailors' and shoemakers' repairs, besides making up new clothing, also outside work. Their conduct has been good, no escapes nor attempts to escape have taken place

There has been a decrease in expenditure this year of £122 13s 8d

Acting Gaoler

22.—YASS GAOL.

Extract from the Acting Gaoler's Report

THE conduct of the officers has been good.

The conduct of the prisoners has also been good, there being only one punished during the year.

There has been a decrease in the expenditure, through there being a less number of prisoners incarcerated in 1899 than in 1898.

The prisoners under sentence were all kept fully employed during the year at sweeping and cleaning, woodcutting, painting, and agricultural work.

The gaol was visited by the Deputy Comptroller of Prisons on 28th April.

G. COLVIN,
Acting Gaoler.

23.—YOUNG GAOL.

Extract from the Gaoler's Report.

DURING the past year, 142 prisoners were received and 149 discharged; remaining in gaol on 31st December, 41. The conduct of the prisoners during the year has been good; only 12 prisoners were punished for breaches of the Gaol regulations. They have been employed at the following manufactures.—Cabbage tree hatmaking, tailoring, and brush-making; also repairing tinware, shoes, and clothing. They have worked well, showing an increase in the value of manufactures of about £59. The manufacture of brushes was commenced here in June. Better results have also been obtained from the agricultural work on account of increased rainfall.

The health of the prisoners has been very good; one prisoner died, but he was very sick and weak when received into gaol, being in the last stages of consumption.

The system of restricted association is working very satisfactorily, and is appreciated by the majority of the prisoners; at times, in consequence of the number of prisoners confined, we are obliged to associate some of them; they invariably remark that they would prefer to be in separate cells.

During the year the following repairs have been effected by prison labour—A partition has been erected between the prisoners' baths, water laid on from the tank to the kitchen boilers, two skylights have been placed in the verandah over the windows of No. 2 workshop. This is a great improvement, as previously the shop was very dark. The whole of the cell furniture has been repaired; the tables and stools are stronger now than when they were first made. A small shed has been erected outside the gaol for storing closet-pans in; the floor of the verandah and cells in the females' division has been repaired and faced up with cement; the pointing of the main wall was commenced, and is proceeding satisfactorily.

The conduct of the officers during the year has been very good. There has not been any change in the staff.

The Comptroller-General visited the gaol on the 23rd of May, the Deputy Comptroller on the 27th of April. The Director of Labour visited on the 3rd June.

R. GOBLE,
Gaoler.

24 —DARLINGHURST GAOL.

Report of the Librarian for the Year 1899.

I HAVE the honor to submit for your consideration a report on the library work.

The prison library at Darlinghurst, in addition to being maintained for the use of prisoners confined in the metropolitan gaol, serves also as the chief book depot and medium of supply for all gaols under the Department of Prisons. When I took charge as Librarian, in the early part of 1897, I found the library consisted of a very antiquated collection of books that appeared to have seen service with more than one generation of prisoners. Many of them were so old and tattered that I had no alternative but remove them at once from circulation. Others not so badly damaged were repaired and retained in use. The so called stock then consisted of a few old books that had been discarded from other gaols. None of those were fit to be sent out again, and there were no new books on hand.

In those days there was a solitary issue of books per week, and many prisoners did not avail themselves of the privilege. There was an impression amongst some of the prisoners that the old books formed part of the punishment. When shortly afterwards the standard novels of Dickens, Thackeray, and Scott were introduced for the first time, the punishment theory was entirely dispelled.

In the general distribution of 1897 forty-five gaols were supplied.

At that time 7th class prisoners—juvenile offenders—occupied a corridor in a wing in which were confined a large number of prisoners of other classes. The close proximity of such prisoners was detrimental to the best interests of the boys, who had frequently to be called up for punishment for having contraband articles in their possession (usually tobacco) and for ingenious attempts to pass clandestine communications to the yards in which the old offenders spent their hours of ease.

Books have always been prohibited during working hours, and without light in the cells there were few opportunities of reading or self improvement.

By your direction the boys were removed to a wing which had been specially fitted up for them, and as soon as practicable afterwards had the privilege of lights in their cells.

With the introduction of light into the boys' wing, it was found necessary to supply books much more frequently.

The reforms you have initiated have been without exception calculated to elevate and ameliorate the condition of the youths who have made a false start in life, and whose youthful folly has brought them within the restraint of prison walls.

Absolute separation from older criminals, a liberal scale of remission for good conduct, physical exercise, and closer companionship with a better class of books have brought about some desirable results. As I am with them daily, I notice that the boys are brighter, and more amenable to discipline. There is no insubordination, and it is gratifying to note the almost entire absence of prison offences.

Prison punishments, which were formerly almost daily occurrences with the 7th class, are now not frequent.

The boys are also visited in their cells personally by me twice a week, and on these occasions I give instruction, and always endeavour to inculcate high moral principles.

The Restricted Association System for the whole gaol was introduced on the 5th December, 1899. As in similar instances in other gaols, the library was well replenished for the occasion. There are 2,133 volumes available for the use of prisoners in this gaol.

The average weekly issue of books for twelve months previous to the inauguration of the new system was 352 720 volumes were issued on an average per week during the month of February. The total number of books in use in all the prison libraries is 14 600.

In addition to the above there is also a valuable reserve stock at Darlinghurst of 5,142 volumes, which have all been submitted for your approval. By this system there is a safeguard against the introduction of objectionable literature. In this collection I have not included 185 volumes received from the Principal Librarian of the Free Public Library, and which are now at Parramatta Gaol undergoing repairs. It will thus be seen that we have actually an aggregate of over 20,000 books.

During the past twelve months, Parramatta, Bathurst, Goulburn, Berrima, Albury, Grafton, Broken Hill, and a few small gaols were supplied. There will now, however, be, with your approval, a general distribution of books, and the requirements of the most important gaols will be kept well in view.

On the whole, we have had a very satisfactory year, and prospects are encouraging.

Considering that in the beginning of 1897, there was not a single new book on hand, I think it may be fairly claimed that the library work since done has been of a progressive character.

W.M. MCCREADY,
Librarian.

APPENDIX II.
Labour and Industry.

REPORT of the Director of Labour.

Summary (No. 1) showing the value of work performed by prisoners at the different gaols in the Colony during the year 1899.

Summary (No. 2) showing the earnings of the various trades at the established gaols during the year 1899.

NEW SOUTH WALES PRISONS—INDUSTRIAL LABOUR BRANCH.

The Director of Labour's Annual Report.

I HAVE the honor to submit for your consideration my Annual Report for 1899 upon the Industrial Labour Branch of the Department.

In my report for the year 1893, I had the satisfaction of being able to record an increase in the earnings of the prisoners of £2,359 over the year 1897. The year just closed has been distinctly a busy year, and the labour returns show a still further increase of £268, despite the fact that the daily average of prisoners confined in our gaols was 131 below the daily average for 1898. This decrease is, of course, a very satisfactory feature of the administration of the Department, but its effect upon the industries is obvious.

In estimating the industrial capabilities of the prisons, the difficulties referred to in your Report of 1898 must be borne in mind, as—the physical weakness of a large number of prisoners (many of whom are under medical treatment during the greater part of their sentences), the shortness of the sentences, and in most cases the scarcity of skilled workmen. Notwithstanding these disadvantages, the various industries have been vigorously prosecuted, and with few exceptions the prisoners have worked well and have shown increasing interest in their work. There are continual additions being made to our industries, and in this way greater variety of employment is provided for our workmen.

The various Government Departments have continued their support to us during the year, and the following are among the principal supplies:—

Bookbinding (for Government and Educational Institutions)—6,545 volumes have been bound, 891 memorandum blocks, and 4,405 portfolios have been made.

Bootmaking (not including warders' uniform boots or prisoners' shoes and slippers)—3,908 pairs blucher boots, 226 pairs men's F.L. boots, 873 pairs women's F.L. boots, 690 pairs men's E.S. boots, 1,903 pairs women's E.S. boots, 7,018 pairs lunatics' boots, 1,413 pairs cloth boots, 453 pairs cloth slippers, 657 pairs bag leather shoes, and 2,270 pairs lunatics' boots half-soled and heeled.

Brushmaking—4,005 bass brooms, 2,934 hair brooms, 1,943 banister brooms, 1,491 deck brooms, 483 scavenger brooms, 5,598 scrubbing brushes, 433 tar brushes.

Carpentry—43 barrows, 100 inventories, 24 coal trays, 42 barrack tables and forms.

Matmaking—15,936 yards matting, 2,466 mats, 122 kneelers, 2,586 filter mats.

Printing—500,000 receipt forms for the Post Office Savings Bank.

Saddlery—826 pairs leggings, 24 carbine slings, 88 waist belts, 30 revolver cases, 26 pairs muffs, 12 cartridge pouches, 155 leather bags, for Police and Lands Departments.

Tinsmithing (for all Departments ordering through the Chief Inspector of Stores, the Ordnance, Public Works Departments, &c.)—227 meat dishes, 239 wash-hand basins, 144 tureens, 656 dust pans, 109 tea cans, 519 night tubs, 657 closet tubs, 117 washing tubs, 2,411 buckets, 137 water cans, 137 baking trays, 500 vanes, 625 plugs and bars, 53 coal scuttles, 620 plan cases, 17 barrows, 58 teapots, 330 boxes, 71 toilet cans, 34 urns, 900 pints, 851 quarts.

Tailoring and Needlework (not including warders' uniform or prisoners' clothing)—975 tweed jumpers, 1,285 dungaree jumpers, 893 tweed coats, 654 corduroy coats, 3,290 canvas and duck bags, 39 police tunics, 91 pairs police trousers, 8,441 shirts, 2,613 pairs drawers, 3,512 hospital night gowns, 3,075 pairs mole trousers, 2,247 pairs corduroy trousers, 657 pairs tweed and serge trousers, 22 quilted rugs, 33 strait jackets, 503 bed ticks, 692 pillow ticks, 202 tweed dresses, 856 huckaback towels, 367 sheets, 27 mosquito nets, 217 petticoats.

Upholstery—166 mattresses, 179 pillows, 701 pads.

The manufactures necessary for departmental requirements form a very important portion of our industries. With the introduction of the new system of restricted association into the prisons came an improved set of cell furniture and utensils, the manufacture of which helped to keep our trades fully occupied. In this connection we made 5,667 articles of galvanised iron and tin ware, and in addition to the articles previously referred to as having been made in the minor country gaols for departmental requirements, the following articles of clothing have been made for prisoner's use:—2,352 cotton shirts, 2,229 pairs flannel drawers, 1,657 flannel shirts, 1,523 pairs grey trousers, 287 hammocks, 216 pillow slips, 627 hat straps, 145 sheets, 1,245 table covers, 1,368 pairs braces, 240 chemises, 2,260 towels, 266 skirts, 289 jackets, 223 caps and hoods, 603 aprons, 259 pairs corsets, 1,527 clothes bags, 3,267 neckerchiefs, 1,227 vests, 1,930 jackets, 1,946 pairs dowlas trousers, 1,771 C.T. hats, 3,461 bags, 200 pairs mole trousers, 73 serge vests, 121 serge jumpers, 2,615 pairs shoes and slippers, 3,889 pairs shoes half-soled and heeled. And for officers' use—683 coats, 786 pairs trousers, 1,035 pairs boots, 204 pairs boots half-soled and heeled, 51 dresses, 74 aprons, 24 collars, 31 pairs slippers, &c.

The labour value of manufactures for prison use for the year being £5,631, and the material value £6,200.

The value of repairs for Prison Service is as follows:—

	£	s.	d.	
Blacksmiths'	468	6	2	Painters'
Bookbinders'	58	9	8	Tailors'
Bootmakers'	196	13	1	Tinsmiths'
Carpenters'	253	15	2	
Needlework	60	5	4	Total.....
				£1,830 15 10

The design of the officers' uniforms has been altered during the year, greatly improving the appearance of the staff. The industrial officers have also been put into uniform. All the new uniforms have been made in the gaols.

In the principal gaols the waste fat is being saved and made into soap.

Owing to the introduction of the Restricted Association System into Darlinghurst Gaol, it was necessary to reduce the number of prisoners confined there to equal the number of available cells, consequently one branch of the mat-making industry was transferred to Parramatta Gaol. Accommodation for the work was soon provided at the latter gaol, and a detachment of prisoners, plant, and material, with an overseer, were removed to that gaol, and satisfactory work is being turned out. The number of prisoners employed in the other workshops in Darlinghurst Gaol have also been necessarily reduced, and the men transferred to other gaols when the necessary accommodation was available, suitable employment being provided for them at their destinations.

Marble Work.—A very complete plant has now been erected in Bathurst Gaol, and a corresponding increase in the turnover of this branch is expected during the present year.

Agricultural Work.—The land attached to the country prisons has received great attention during the past year. Vegetables and forage valued at £575 (contract rates) have been grown; the scarcity of rain in most instances reduced the value of this branch. In Goulburn and Parramatta Gaols irrigation on a large scale has been established, and good results are expected for the present year.

Minor Gaols.—The prisoners in the minor gaols have also been busily employed. In addition to the domestic service of the prisons the following articles have been made:—308 jackets, 468 vests, 2,101 pairs trousers, 82 bed ticks, 139 pairs braces, 189 towels, 23 sheets, 37 petticoats, 91 neckerchiefs, 82 pairs blucher boots, 155 pairs slippers, 129 pairs drawers, 446 C.T. hats, 458 shirts, 480 canvas bags, 492 scrubbing brushes, 35 candlesticks, 300 pillow ticks, 28 aprons, 43 dusters, 882 books bound.

Materials for manufacturing purposes are being supplied more quickly under the new system of dealing with the contractors than under the old system. In a few instances, however, some lines which were not procurable in the city could not be supplied by the contractors when required, and delay in the manufacture of our orders resulted. Still in most instances requisitions submitted to the Public Service Tender Board Department are promptly satisfied.

Owing to the number of new lines introduced into our trades it was found necessary to revise the labour Schedules so as to include the various items. This was accordingly done, and in a few instances slight increases were made in the tasks.

Our

Our price list is at present under consideration, and a revision will shortly take effect.

In our transactions with other Government Departments, &c., the following were the principal items of material used:—7 cwt millboards, 27 cwt. strawboards, 75 reams paper, 25 gross pasteboards, 308 skins leather, 751 sides bridle leather, 32,267 lb. sole leather, 13,657 lb. kip leather, 3,692 pairs uppers, 10,373 bloom stocks, 42 tons car yarn, 11 tons galvanised iron and tin, 1,898 yards diagonal tweed, 3,416 yards dungaree, 7,103 yards corduroy, 7,086 yards moleskin, 1,001 yards tweed, 18,188 yards flannel, 10,786 yards calico, 3,484 yards dowlas, 887 yards huckaback, 282 yards sheeting, 220 yards mosquito net, 1,385 yards canvas, 370 yards duck, 638 yards wincey.

The gross value of the articles manufactured for the year amounts to £23,460, the value of the material used being £12,353, and the value of prisoners' labour £11,107.

The total amount of the prisoners' earnings for the year 1899, apart from the domestic service of the prisons, is as follows:—

Manufactures .	£	s.	d.
Buildings	11,107	1	5
Working outside, police, &c.	6,388	7	10
Agricultural work .	351	5	2
Trial Bay Breakwater, wharf, roads, &c.	575	5	7
	800	7	0
Total	£19,222	7	0

WM. URQUHART,
Director of Labour.

Port Macquarie	"	18/99, T.G.	35	7/9/99	Remanded	"	9/9/99	Syncope	Before	Bad	1	Groom.

NOTE.—No prisoners died in the remaining forty-two gaols during the year.

TABLE D.—Group 1.

TABLE showing the Daily Average Prison Population, with the number of Deaths from Natural Causes, during each of the past thirteen years in the Prisons of New South Wales.

Year.	In Prison.		
	Daily Average.	Deaths from Natural Causes.	*Death-rate Per thousand of gaol population.
Year ended 31st December, 1887.....	2,374 56	34	14 27
" " 1888	2,209 83	27	12 33
" " 1889	2,227 7	33	13 91
" " 1890	2,261 18	23	11 55
" " 1891	2,458 74	37	14 14
" " 1892	2,550 69	39	14 87
" " 1893	2,540 47	30	12 26
" " 1894	2,443 8	21	8 33
" " 1895	2,412 3	22	8 94
" " 1896	2,442 8	29	12 3
" " 1897	2,324 11	21	9 29
" " 1898	2,234 42	20	9 61
" " 1899	2,101 67	25	11 6

* The average general death rate per thousand for last ten years for whole population was 12 57.

NOTE—A custom prevails of sending persons to gaol for medical treatment where hospitals or charitable institutions are not available. This practice not only seriously inconveniences the Department, but swells the prison death-rate, as unfortunate persons are occasionally received in a moribund condition. During the year 1899, of the twenty five deaths from natural causes, nine died within one week after reception.

TABLE D.—Group 2.

EXECUTIONS IN GAOL.

Total 135. Of this number 81 showed symptoms of insanity on reception, and 36 within one month after admission. In addition to this number 410 persons were remanded into the various gaols, charged with being of unsound mind, or for protection, and 21 others were received suffering from the effects of drink.

APPENDIX IV.

RETURNS concerning Prisoners and Expenditure.

1. Return of prisoners received into the prisons of New South Wales, and of those disposed of, during the year ended 31st December, 1899.
2. Return of the nationalities of prisoners committed to the prisons of New South Wales during the year 1899.
3. Return of the daily average, the greatest and least number of prisoners in custody, in each of the prisons of New South Wales during the year ended 31st December, 1899.
4. Return showing the number and sentences of prisoners under each period of sentence of penal servitude, hard labour, or imprisonment, in all prisons, on the 31st December, 1899.
5. Higher Court convictions. Return showing the population of New South Wales, with the number of prisoners actually received into gaol under sentence of death, of penal servitude, or of hard labour for a term of years, of imprisonment on indictment, in each year from 1890.
- 5A. Return showing the number of prisoners received into the prisons of New South Wales imprisoned on summary convictions, or want of sureties, or for non-payment of fines on summary convictions, during the years 1897, 1898, and 1899.
6. Return showing the number of prisoners received into the prisons of New South Wales, within each of the following periods of sentence during the year 1899.
7. Return showing average sentences and number of prisoners sentenced at the gaol deliveries and Courts of Quarter Sessions during the years 1896, 1897, 1898, and 1899.
8. Return of prisoners convicted at the gaol deliveries and Courts of Quarter Sessions during the year ended 31st December, 1899, and the number of previous convictions recorded against such prisoner; also the number of such prisoners who had not been previously convicted.
9. Statement of the restraints, punishments, and offences, during the year ended 31st December, 1899, in each of the prisons of New South Wales.
10. Statement of accommodation for prisoners in the prisons of New South Wales during the year ended 31st December, 1899, and the daily average, and the greatest number of prisoners.
11. Return of prisoners within each of the following periods of age, remaining in each of the prisons of New South Wales, on the 31st December, 1899.
12. Comparative statement, showing daily average number of prisoners, and the cost of salaries and contingencies, during the years 1895, 1896, 1897, 1898, and 1899. Police gaols omitted.
13. Return showing cost of maintenance of established gaols, number of prisoners to each officer, &c., &c., during the years 1895, 1896, 1897, 1898, and 1899. Police gaols omitted.
14. Detailed cost of established gaols during the year 1899.

No. 1.

RETURN of Prisoners received into the Prisons of New South Wales, and of those disposed of, during the year ended 31st December, 1899.

No. 5.

HIGHER COURT CONVICTIONS.

RETURN showing the Population of New South Wales, with the Number of Prisoners actually received into gaol under sentence of Death, of Penal Servitude, or of Hard Labour for a term of years, of imprisonment on indictment, in each year from 1890.

Year	* Population of New South Wales	Number of Prisoners received, sentenced by the Circuit and District Courts					
		Death, and Death Recorded	Penal Servitude or Hard Labour		Imprisonment only on Indictment By Quarter Sessions or Criminal Courts	Total	Per 100 000 of the General Population
			By Quarter Sessions or Criminal Courts Three years and upwards	By Quarter Sessions or Criminal Courts Under Three years			
1890	1,121,860	7	240	386	121	754	67.2
1891	1,165,300	7	256	439	109	811	69.5
1892	1,197,650	5	211	427	78	721	60.2
1893	1,223,370	10	244	477	84	815	66.6
1894	1,251,450	10	211	556	79	856	68.4
1895	1,277,870	7	195	524	73	799	62.5
1896	1,297,640	4	179	535	103	821	63.2
1897	1,323,460	7	194	560	31	792	59.8
1898	1,346,240	5	169	472	12	658	48.8
1899	1,356,650	6	169	491	18	674	49.6

NOTE—These figures represent the number of persons convicted who were actually received into gaol
Vide Coghlan's "Statistical Register"

No 5A

RETURN showing the Number of Prisoners received into the Prisons of New South Wales imprisoned on Summary Conviction, or Want of Sureties, or for Non payment of Fines on Summary Convictions, during the years 1897, 1898, and 1899

Year	Summary Convictions			Summary Convictions per 100,000 of General Population	Percentage of In prisonment in Default to Total Summary Convictions
	Non payment of Fines	Other Sentences	Total		
1897	8,337	3,182	11,519	870.4	72.4
1898	8,402	3,275	11,677	867.4	71.9
1899	7,786	3,156	10,942	806.5	71.1

NOTE—Number fined at Higher Courts and received into gaol during above years are not included.

* These gaols were disestablished on 17th January, 1899.

NOTE.—There were no escapes during the year. Only 4.2 per cent of the total number of prisoners during the year were punished. The number of offences committed and the number of punishments awarded do not of course agree, it being the practice in most cases to award one form of punishment for several offences, while in others the offence is met by admonition without punishment. In consequence of transfers the same prisoner may be punished in more than one prison during the year, so that the totals do not exactly agree with the total prison population of Form No. 1.

STATEMENT of Accommodation for Prisoners in the Prisons of New South Wales during the year ended 31st December, 1899, and of the Daily Average and the Greatest Number of Prisoners
