THE HISTORY OF THE UNITED STATES

The first part of the history of the United States is the history of the colonies. The colonies were first settled by the English in 1607. They were at first dependent on England for their supplies and protection. But as they grew in number and power, they began to assert their independence. This led to the American Revolution in 1776. The colonies declared their independence from England and formed the United States of America.

The second part of the history of the United States is the history of the Union. The Union was formed in 1787. It was a union of thirteen states. The states agreed to give up some of their powers to a central government. This government was called the Congress. It was made up of representatives from each state.

The third part of the history of the United States is the history of the West. The West was first explored by the Spanish in the 16th century. It was then explored by the French and the English. The West was a land of opportunity. Many people came to the West to seek their fortune. This led to the westward expansion of the United States.

The fourth part of the history of the United States is the history of the Civil War. The Civil War was fought between 1861 and 1865. It was a war between the North and the South. The North was against slavery and the South was for slavery. The North won the war and slavery was abolished.

The fifth part of the history of the United States is the history of the Reconstruction. The Reconstruction was the period after the Civil War when the South was being rebuilt. The North wanted to make the South a free state. This led to the Reconstruction era. The Reconstruction ended in 1877.

The sixth part of the history of the United States is the history of the Progressive Era. The Progressive Era was the period from 1890 to 1920. It was a time of reform. People wanted to make the government more efficient and to protect the rights of the poor. This led to the Progressive Era.

The seventh part of the history of the United States is the history of the World War. The World War was fought between 1914 and 1918. It was a war between the Allies and the Central Powers. The Allies won the war and the world was changed.

The eighth part of the history of the United States is the history of the Great Depression. The Great Depression was the period from 1929 to 1939. It was a time of economic hardship. Many people lost their jobs and their homes. This led to the Great Depression.

The ninth part of the history of the United States is the history of the World War II. The World War II was fought between 1939 and 1945. It was a war between the Allies and the Axis Powers. The Allies won the war and the world was changed.

The tenth part of the history of the United States is the history of the Cold War. The Cold War was the period from 1945 to 1991. It was a time of tension between the United States and the Soviet Union. This led to the Cold War.

The eleventh part of the history of the United States is the history of the present. The present is the time we live in. It is a time of progress and change. The United States is a great country and we are proud to be Americans.
