By Authority:

[3d.]

The first of these is the fact that the amount of the deposit is not fixed, but is determined by the amount of the loan. This is a very important feature, as it allows the lender to adjust the amount of the deposit to the amount of the loan. The second feature is that the deposit is not made at the time of the loan, but is made at the time of the repayment. This is also a very important feature, as it allows the lender to adjust the amount of the deposit to the amount of the loan. The third feature is that the deposit is not made by the lender, but by the borrower. This is also a very important feature, as it allows the borrower to adjust the amount of the deposit to the amount of the loan.

The amount of the deposit is not fixed, but is determined by the amount of the loan.
