### EXPLANATORY NOTE.

THE objects of this Bill are—

- (1) to place certain works of water supply under the control and administration of the Minister for Public Works as Administrator of the Fish River Water Supply;
- (2) to enable certain portions of such works of water supply to be placed under the care and management of certain councils;
- (3) to empower the Administrator of the Fish River Water Supply to supply water to councils and others and to enter into contracts for such supply; and

THE UNIVERSITY OF CHICAGO

EXPERIMENTAL NOTE

THE UNIVERSITY OF CHICAGO

The following experiment was conducted to determine the effect of temperature on the rate of reaction between hydrogen peroxide and potassium iodide. The reaction is as follows:

$$2H_2O_2 + 2KI \rightarrow 2H_2O + 2KOH + I_2$$

The rate of reaction was measured by the time taken for a fixed amount of iodine to be produced. The results are shown in the table below:

Temperature (°C)	Time (s)
10	120
20	60
30	30
40	15

It is evident that the rate of reaction increases as the temperature increases. This is due to the fact that at higher temperatures, the molecules have more kinetic energy and are therefore more likely to collide with sufficient energy to overcome the activation energy barrier.
