EXPLANATORY NOTE

(This Explanatory Note relates to this Bill as introduced into Parliament)

The objects of this Bill are to amend the Electricity Development Act, 1945 ("the Act"), so as—

- (a) to repeal and re-enact with modifications the provisions of the Act requiring, and regulating the manner of granting, approvals under the Act in relation to certain electrical articles, with the aim of—
 - (i) requiring a declaration with respect to the conformity of those articles with specified standards ("a declaration of compliance") to be lodged with the Energy Authority of New South Wales ("the Authority") before an approval is given in relation to those articles (Schedule 1 (2)—proposed section 21C);
 - (ii) ensuring, in certain cases, that samples of those electrical articles are tested, in accordance with nominated standards, by qualified persons at testing facilities approved by the Authority before an approval is granted in relation to those articles (Schedule 1 (2)—proposed section 21C); and
 - (iii) providing that the approval or registration, by certain additional regulatory authorities outside New South Wales, of a class, description or type of electrical article may be recognised as having the same effect as an approval granted by the Authority (Schedule 1 (2)—proposed section 21A);
- (b) to provide that, in certain cases, a prescribed guarantee given in respect of compliance of an electrical article with specified standards may provide a defence to a prosecution for sale of a declared electrical article contrary to the requirements of the Act (Schedule 1 (2)—proposed section 21D);
- (c) to extend the powers of the Authority and persons authorised by the Authority in relation to the prohibition of the sale of unsafe electrical articles and to provide for the seizure and forfeiture of such articles in certain circumstances (Schedule 1 (2)—proposed sections 21E, 21F and 21G);
- (d) to make certain evidentiary provisions to facilitate the administration of the Act in relation to the sale of declared electrical articles in breach of the Act (Schedule 1 (2)—proposed section 21H);

- (e) to require a warrant to be obtained prior to the exercise by an authorised person of certain powers under proposed section 21F (Schedule 1 (2)—proposed section 21i);
- (f) to prevent the bringing of certain actions, claims or demands against persons lawfully acting in the execution of proposed Part IVC of the Act (Schedule 1 (2)—proposed section 21j);
- (g) to restrict the disclosure of certain information relating to electrical articles which is supplied to the Authority (Schedule 1 (2)—proposed section 21k);
- (h) to increase penalties for certain breaches of the Act and increase the range of penalties that may be fixed for breaches of the regulations (Schedule 1 (5) and (7));
- (i) to enable the making of regulations relating to the testing of, and standards for, declared electrical articles and the form of declarations of compliance (Schedule 1 (6) (c));
- (j) to clarify the definitions of “Electrical installation” and “Electrical wiring work” (Schedule 2 (1));
- (k) to enable the making of regulations requiring the giving of notices with respect to the carrying out of electrical wiring work (Schedule 2 (2)—proposed section 37 (2) (f1)); and
- (l) to make certain other provisions of a minor or consequential nature.

The Bill also contains provisions of a saving and transitional nature (Schedule 3).
