46. The total of the estimates under section 45 for all fire districts for a financial year is not to exceed the amount approved in respect of that financial year by the Treasurer in consultation with the Minister.

Reduction of amount estimated

47. (1) The total of the estimates for a financial year is to be reduced by the aggregate of:

- (a) the amount standing to the credit of the Working Account at the beginning of that financial year; and
- (b) the amount that the Director-General estimates will be the amount paid into the Working Account during that financial year under section 63 (2) (a) and (b).

(2) There is to be a corresponding pro-rata reduction in the amount required to be contributed in respect of each fire district so that the amount required to be contributed is calculated in accordance with the following:

Financial year estimate to be used to produce calendar year estimate

48. (1) An estimate for a financial year (reduced as required by section 47) is to be multiplied by the factor determined under

(2) If a fire district comprises a reserved area (as defined in section 5) and no other area:

- (a) a local government area included in the fire district is not required to contribute in respect of the fire district; and

Apportionment between local government areas

51. If a fire district comprises more than one local government area, the amount of the contribution to be paid by each area is to be apportioned according to the aggregated land values (estimated under section 67 of the Valuation of Land Act 1916) of all ratable land in the local government area or in the part of it to which this Act applies.

How contribution is to be funded

52. (1) If this Act applies to the whole of a local government area, the amount of contribution payable by the area is to be paid out of the general fund of the council concerned.

(2) If this Act applies to part only of a local government area, the council is to pay the required contribution out of the general fund or raise the required amount by a local rate under the Local Government Act 1919 on the land value of ratable land in the part.

(3) Despite any provision of the Local Government Act 1919 to the contrary, no poll of ratepayers is to be taken on the question of whether such a rate is to be levied.

(4) If the amount required for any year is greater than that required for any previous year, the council may levy a higher local rate, to be fixed by the council, to provide for the greater amount, without making a rate for that year.

Returns by local government areas

53. (1) The council of a local government area must furnish a return to the Director-General during July in each year or at such other time as the Director-General may require and notify to the council.

(2) The return is to show such particulars as the Director-General considers necessary to be obtained for the purposes of this Part in relation to all ratable property in the local government area or in the part of it to which this Act applies.

(3) A council which fails to furnish a return as required by this section or which in furnishing a return furnishes information that is false or misleading in a material particular is guilty of an offence.

Maximum penalty: 20 penalty units.

(4) A conviction for the offence of failing to furnish a return does not affect the requirement to furnish the return or the liability of a council to be convicted of a further offence in respect of a continuing failure.

Division 3 - Contributions by insurance companies

Contributions required from insurance companies
