(Paper No. 103)

* 1284 SPECIAL MINISTER OF STATE—LOCAL SMALL COMMITMENTS ALLOCATION PROGRAM—
The Hon. Damien Tudehope to ask the Special Minister of State, Minister for Roads, Minister for the Arts, Minister for Music and the Night-time Economy, and Minister for Jobs and Tourism—

- (1) Can the Minister advise whether grants to be made under the Local Small Commitments Allocation Program are “one-off or ad hoc grants” for the purposes of the Grants Administration Guide?
- (2) In assessing whether a project meets the eligibility criterion of having “been nominated as an election commitment prior to the March 2023 election” how is the Local Small Commitments Allocation Program Office determining whether a project meets this criterion?
 - (a) Did the pre-election nomination have to have been made by a Labor candidate standing for election in the electorate for which the project had applied for funding?
 - (b) Did the pre-election nomination of a project have to have been accepted by the organisation that would receive the grant?
 - (c) What measures were in place during the pre-election nomination process to identify any potential conflicts of interest between the Labor candidate nominating a project and the proposed recipients of the grant?
 - (d) Will the Probity Advisors for the Program consider any potential conflict of interests between the Labor candidate who nominated a project and the proposed recipients of the grant?
 - (e) Is there a comprehensive list of all projects nominated by Labor candidates prior to the election?
 - (i) If so, who created this list?
 - (ii) If so, when was the list created?
 - (f) Is the Local Small Commitments Allocation Program Office responsible for independently verifying that each specific nomination was made before the election?
 - (i) Has the Local Small Commitments Allocation Program been provided with a list of nominated projects?
- (3) When was a pre-election nomination made to spend any otherwise allocated portion of the \$400,000 per electorate on “playground and park upgrade projects to be delivered by local councils”?
 - (a) By whom was the pre-election nomination made?

Answer—

The Local Small Commitments Allocation has been designed to evenly spread funding across all 93 Legislative Assembly electorates.

It has been designed to prevent pork barrelling and ensure that all electorates receive the exact same amount of funding.

The election commitment ensured \$400,000 went to every electorate in NSW regardless of political allegiance; whether or not a Labor candidate won the seat.

The NSW Government will put every single project through a rigorous assessment process including by an expert independent assessment panel.

Independent probity advisors have been appointed to advise on the management of conflicts of interest and provide probity advice.

The Local Small Commitments Allocation (LSCA) Program Guidelines outline how the grant program will be administered.

The LSCA Program Guidelines can be viewed on the LSCA website and were tabled in Parliament on Tuesday 19th September.

- (1) Can the Minister please advise what steps are being taken by the Government to protect the privacy of children in foster care situations?
- (2) Can the Minister please confirm:

 - (b) that foster parents are allowed to post photos or videos of children in their care to social media?
- (3) Can the Minister please advise what policy governs the use of photos or other media captured of children under the care of foster carers?

Answer—

The NSW Government is acutely aware of the privacy rights of all children, particularly those in out-of-home care.

I am advised:

- (1) Upholding the rights of children engaged with the child protection system, including those in out-of-home care, is a central principle of child protection policy and practice in NSW. This is reflected in the Charter of Rights for children and young people in out-of-home care in New South Wales (Charter). Authorised carers are required under the Code of Conduct for Authorised Carers (Code of Conduct) to uphold the rights set out in the Charter for children and young people under their care.
- (2)(a) Foster carers are generally not prohibited from taking photos and recording media of children in their care. Photos and videos of children in care can be an important part of children's life story work. It provides children with records of their experiences, connections, achievements and strengthens their sense of identity and belonging.
- (2)(b) There is no legislation that expressly prevents a foster carer from posting photos or videos of children and young people in their care to social media.

However, there are some legislative restrictions on the publication or broadcast by any person of the name or identifying information of a child who is in out-of-home care or is reasonably likely to be involved in certain court proceedings or is the subject of certain reports concerning risks posed to the child.

- (3) Foster carers in NSW must comply with the Code of Conduct, which requires them to follow legislation, policies, and procedures applicable to the provision of care.

This includes section 105 of the *Children and Young Persons (Care and Protection) Act 1998*. This section prohibits the publication or broadcasting of the name of a child or young person involved in court proceedings or subject to a report to DCJ in any form accessible by people in NSW at any time before, during or after the proceedings.

- * 1291 PLANNING AND PUBLIC SPACES—PLANTING TREES—The Hon. Jacqui Munro to ask the Minister for Climate Change, Minister for Energy, Minister for the Environment, and Minister for Heritage representing the Minister for Planning and Public Spaces—

- (1) Can the Minister please advise if the Government will commit to the Coalition's target of planting five million trees across Greater Sydney to increase the tree canopy to 40 per cent by 2030?

Answer—

I am advised:

The NSW Government is committed to expanding urban tree canopy across Greater Sydney to 40% by 2036, in line with the Greater Sydney Region Plan. This information is publicly available at <https://www.dpie.nsw.gov.au/our-work/programs-and-initiatives/urban-greening>.

- * 1293 PLANNING AND PUBLIC SPACES—WHITE ROOFS—The Hon. Jacqui Munro to ask the Minister for Climate Change, Minister for Energy, Minister for the Environment, and Minister for Heritage representing the Minister for Planning and Public Spaces—

- (1) Can the Minister please explain what actions are being taken to increase the number of white roofs in New South Wales, to reduce the impact of global warming on homes and suburbs?
- (2) Can the Minister please confirm that a requirement for white roofs will be a requirement for any new buildings or homes built by Landcom?
- (3) Can the Minister please confirm that building codes will be updated in New South Wales to ensure all new buildings are designed with white roofs to reduce heat stress on communities across the state?

Answer—

I am advised:

- (1) From 1 October 2023, dark roofs will not be an available selection for new dwellings in some climate zones using the Do-it-yourself (DIY) thermal performance pathway of the Building Sustainability Index (BASIX). This information is publicly available at <https://www.planningportal.nsw.gov.au/BASIX-standards>. Selecting a dark roof remains an option in other pathways to pass the BASIX thermal performance standards under the *State Environmental Planning Policy (Sustainable Buildings) 2022* (Sustainable Buildings SEPP). For more information, visit <https://www.planning.nsw.gov.au> and search 'Sustainable Buildings SEPP'.

Dark roofs will continue to be available as a choice, and the updated BASIX standards allow dark roofs to be offset, for example through more insulation.

- (2) Landcom uses several approaches to combat the Urban Heat Island effect in its developments. These include innovative street designs, providing wider verges for increased tree planting and rain gardens, as well as driving the application of specific Solar Reflective Index for materials (light coloured roofs and surface materials). Each approach is site specific and works in concert with other methods to deliver climate resilient places.
- (3) The Department of Planning and Environment is monitoring the uptake of dark roofs under the Sustainable Buildings SEPP, which is broadly consistent with the National Construction Code 2022 and as part of the next scheduled review of the Sustainable Buildings SEPP.

- * 1295 HOMELESSNESS—TOGETHER HOME FUNDING—The Hon. Natasha Maclaren-Jones to ask the Minister for Water, Minister for Housing, Minister for Homelessness, Minister for Mental Health, Minister for Youth, and Minister for the North Coast—

- (1) Can the Minister provide a breakdown by dollar value of the \$11.3 million for the Together Home program as part of the Essential Housing Package?

Answer—

I am advised:

The \$11.3 million will enable the extension of Tranche 3 clients who require additional time in the program to achieve stability and independence.

Funds will be allocated across the 18 participating community housing providers (CHPs) to meet additional leasing, and support client needs as evidenced by CHPs mainstreaming data reporting.

All Tranche 3 clients with a high needs package will be extended.

This funding as well as the essential housing package is intended to plug the gaps left by the former government.

 - (a) What is the breakdown by dollar value by local government area?
 - (b) What is the breakdown by dollar value by region?
 - (c) Has the baseline funding changed for Temporary Accommodation?

Answer—

- (1) Temporary Accommodation is a demand driven program and the additional \$11 million will fund accommodation services across the state, where they are needed.
 - (a)-(b) The Department of Communities and Justice (DCJ) does not capture this information.
 - (c) The funding for Temporary Accommodation has increased. It clear the housing and rental crisis are increasing demand for temporary accommodation and the NSW Government is doing everything we can to confront this crisis and provide emergency support to people in need.

- * 1297 ENERGY—WHITE ROOFS—The Hon. Jacqui Munro to ask the Minister for Climate Change, Minister for Energy, Minister for the Environment, and Minister for Heritage—

Recruitment and retention of healthcare workers, in primary care and hospital settings, continues to be a significant challenge faced by regional, rural, and remote communities across the state. - (a) If not, why not?

Answer—

I'm advised:

The NSW Government is committed to delivering high quality health care to communities right across the state, whether they be urban, regional or rural.

In April 2023, the NSW Treasurer and I announced the 2023-24 Budget would be informed by a Comprehensive Expenditure Review and Strategic Infrastructure Review, supported by Infrastructure NSW. The Strategic Infrastructure Review identified projects and programs to proceed to investment in the 2023-24 NSW State Budget and those that can be re-sequenced, re-scoped or re-prioritised.

Despite being announced by the previous Government in 2019, I am advised that assessment of the Forster Hospital project found limited project readiness and confidence.

This is based on the fact that minimal clinical service planning has been undertaken for the project; no site has been acquired; no detailed scope for the hospital has been finalised; no final business case has been produced and there is no timeline for the project that has been produced.

This was a significant consideration for projects that were assessed as part of the Strategic Infrastructure Review of significant capital works that was led by Ken Kanofski.

The 2023-24 NSW Budget showed the NSW Government is committed to delivering the \$100 million Stage 2 redevelopment of Manning Base Hospital.

Answer—

I'm advised:

\$120 million is being invested to support 2,000 annual scholarships for students studying nursing, medical, midwifery, paramedicine, allied health, and Aboriginal health roles.

The NSW Health Rural Health Workforce Incentives Scheme aims to attract, recruit, and retain staff in rural and regional locations in positions with hard-to-fill and critical vacancies. Local health districts and speciality networks incentivise positions in line with the publicly available Rural Health Workforce Incentives Scheme Policy Directive. Health worker eligibility to access incentives under the scheme is outlined in the same Policy Directive.

Districts and Networks advertise and discuss incentives with successful recruits and advise existing health workers if they are eligible.
