(1) State Environmental Planning Policy (Affordable Rental Housing) 2009 (Affordable Rental Housing SEPP) does not contain any rent setting or income eligibility requirements for boarding houses. However, boarding house rooms tend to be more affordable than other forms of housing because of their size and shared facilities.

The Department of Fair Trading manages the NSW Boarding House Register, which includes some data on rents.

- (1) Will the Government mandate affordable housing targets across New South Wales?
(a) If not, why not?

Answer—

I am advised:

It is important that the strategic plans which address the future supply and demand for affordable housing are tailored to meet the needs of the areas to which they apply.

A Metropolis of Three Cities - the Greater Sydney Region Plan, released in March 2018, includes an action to implement Affordable Rental Housing Targets in defined precincts in Greater Sydney.

The Greater Sydney Commission's five District Plans, also released in March 2018, require that councils and other planning authorities prepare Affordable Rental Housing Target Schemes.

These targets will be created after a process of viability testing and are generally expected to be in the range of 5–10 per cent of new residential floor space in urban renewal and land release areas.

The Greater Sydney Commission stipulates that Affordable Rental Housing Targets will be able to be varied by precinct according to the local development conditions and viability, rather than flat rates applying over broad areas. This will ensure that the targets do not impede the overall housing supply, and are sensitive to local conditions.

Outside of Sydney, Regional Plans also address the need for affordable housing at the regional level.

(a) What safeguards will be in place to ensure the integrity of the report?
- (3) What skills and/or expertise will the organisation tasked with undertaking the comparative analysis be required to have?
- (4) What is the methodology and timeline for this comparative analysis?
- (5) Why was the analysis of air quality omitted?

LEGISLATIVE ASSEMBLY QUESTIONS AND ANSWERS
Wednesday 20 June 2018

- (6) What community consultation will be required as part of this comparative analysis?
- (7) Will the decision arising from the comparative analysis be considered a modification to the planning approval you have already granted?
- (8) Why was the use of Option B sites approved if there was a requirement for further comparative analysis, and an associated mitigation and management report for approval by the Secretary of Planning?
- (9) Will you as the Minister for Planning have final say in determining the use of sites?

Answer—

I am advised:

(1) Roads and Maritime and Services (RMS) as the Proponent will undertake the comparative analysis. Should RMS decide to progress Option B for purposes other than parking and works that would not adversely impact on the acoustic amenity of residents, the comparative analysis must be submitted to the Department of Planning and Environment for approval. The Department would undertake a rigorous review of the report, ensuring its integrity.

(3) and (4) These are matters for the Minister for Roads.

(5) The Department did not consider air quality to be an issue requiring a comparative analysis as in both options the expected impacts would be consistent.

(6) This is a matter for the Minister for Roads.

(7) A modification would only be required if the proposed use of the site is not consistent with the approval.

(8) All construction sites require a level of mitigation to reduce potential amenity impacts. Option B is a feasible option for tunnelling and support facilities. However, given the assessment identified that the level of impacts would be comparatively less under Option A, it was considered that RMS should identify additional mitigation measures that would be implemented to achieve comparable environmental outcomes and for this to be demonstrated in a report.

(9) Approval for the use sites has been given subject to the outcomes of the comparative analysis.

8346 COOKS RIVER CATCHMENT COASTAL MANAGEMENT PLAN SCOPING STUDY—Ms Jo Haylen to ask the Minister for Lands and Forestry, and Minister for Racing representing the Minister for Primary Industries, Minister for Regional Water, Minister for Trade and Industry—

8347 OPERATION PEDRO—Ms Jo Haylen to ask the Minister for Police, and Minister for Emergency Services—

*8348 ENVIRONMENTAL ASSESSMENT REPORT FOR THE M4-M5 WESTCONNEX PROJECT—Ms Jo Haylen asked the Minister for Planning, Minister for Housing, and Special Minister for State—

- (1) Considering the Department of Planning clearly stated its preference for option A sites to be used for the M4-M5 WestConnex project in Haberfield in its Environmental Assessment Report (EAR), why has the Minister given approval for the use of option B sites, albeit with the requirement for further comparative analysis?
- (2) Why has the Minister given approval for the use of option B sites that take more time to establish, albeit with the requirement for further comparative analysis?
- (3) Considering it was indicated in the planning approval process for the M4 East project that option A sites (as outlined in the Environmental Impact Statement for the M4-M5 Link) would be used, why has the Minister given approval for the use of option B sites, albeit with the requirement for further comparative analysis?

Answer—

I am advised:

(1) Use of Option B was approved as the assessment considered it a suitable site for the establishment of a construction ancillary facility. The comparative analysis requirement is a safeguard for the community to ensure that residents adjacent to Option B would not be subjected to amenity impacts greater than that which residents adjacent to Option A sites would experience.

(2) The length of time taken to establish a construction ancillary facility is not a matter for consideration when determining an application. I have been advised that although the Option B site may take comparatively longer to establish, possession of the site can be achieved earlier as the Option A sites are

currently being used as a construction facility for the M4 East project. This would reduce the difference in the length of time taken to commence operations.

The assessment of the M4-M5 Link project is based on the information provided in the Environmental Impact Statement, submissions received, and Submissions and Preferred Infrastructure Report for the project. The Environmental Impact Statement and Submissions and Preferred Infrastructure Report presented two options - A and B - for construction compounds at Haberfield and Ashfield. The Department of Planning and Environment, while preferring Option A, did not discount Option B as it is a feasible option for tunnelling and support facilities.

(1) How many affordable housing properties has the Government provided in Maitland in each financial year from 2011-12 to 2017-18 (as at 16 May 2018)?

(2) What is the Government doing to provide affordable housing in the Maitland electorate?

Answer—

I am advised:

(1) State Environmental Planning Policy (Affordable Rental Housing) 2009 (ARHSEPP), contains provisions to facilitate the delivery of affordable rental housing, among other housing types.

Data provided to the Department of Planning and Environment by Maitland City Council via the Affordable Rental Housing Development Data Collection, indicates that 64 dwellings were approved through development applications under the ARHSEPP between 2011-12 and 2015-16 in Maitland. Data is not yet available for 2016-17 or 2017-18. By year:

- 2011-12 – 0
- 2012-13 – 51
- 2013-14 – 0
- 2014-15 – 4
- 2015-16 – 9.

These figures include affordable rental housing and secondary dwellings. The data set refers to dwellings approved, but does not collect data on how many dwellings were constructed.

(2) The Government recognises the housing affordability challenge facing New South Wales, including in regional areas and is committed to increasing housing supply and making housing more affordable across the state. This is evidenced in the 'Fair Go for First Home Buyers' housing affordability package announced in June 2017; as well as initiatives such as Communities Plus and the Social and Affordable Housing Fund.

The Department is also reviewing housing related policies to ensure they remain consistent with current needs and community expectations.
