

Answer to question on notice – 16 August public hearing – Muslim Women Australia

David Harris MP posed a question relating to best practice approaches. I shared that in NSW we need to develop responses in line with a therapeutic healing model for response and recovery in line with a human-rights, strength based and intersectional framework that balances between cultural responsiveness and cultural stereotyping.

It was taken on notice that I will provide some detail relating to this.

Please find attached two reports Muslim Women Australia published throughout the pandemic that reference and were developed as per the aforementioned guiding principles and framework, to enter into evidence
