6. (p20) Have PSA been consulted on housing needs of our members? **No**
7. (p20) Data on members being unable to apply for roles because of the housing costs involved? **We do not have any hard data on this. We do however have anecdotal evidence which supports this. An excellent example can be seen from the response to Q5 – Commute times. Typically, those employed as SLSOs work in schools where their children are educated – i.e. close to home. Such domestic arrangements often prevent our members from taking up more senior positions in schools elsewhere. As such, commute times are effectively limited.**
