Dear Dora,

Re: Amended Testimony – Correction to Quoted Statistic - Inquiry into the Health Services Amendment (Splitting of the Hunter New England Health District) Bill 2025

Please find attached an amended version of my testimony provided on August 22, 2025. I would like to correct a misquoted statistical fact related to the DAP+ project that appeared during my original testimony.

The correction pertains to page 27, line 7 of the transcript, where I mistakenly stated:

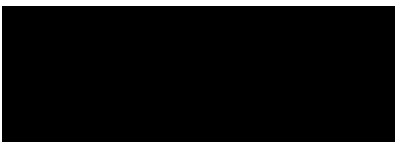

“We now have every single general practice in the region engaged with the DAP+ project...”

The accurate statement should read:

“We now have more than 200 out of 300 general practices in our district and more than 700 GPs engaged with the DAP+ project...”

I appreciate your attention to this correction and apologize for any confusion caused.

Yours sincerely,

Frances Kay

Director | Hunter Medical Research Institute
