

A1494390

The Hon. Catherine Cusack MLC Chair, Committee on the Ombudsman, the Police Integrity Commission and the Crime Commission Parliament of NSW Macquarie Street Sydney NSW 2000

Dear Ms Cusack

Thank you for your letter, formally requesting the results for the Values and Ethics section in the *NSW People Matter Employee Survey 2012* for the five agencies listed below:

- NSW Police Force
- NSW Ombudsman
- Crime Commission
- Policy Integrity Commission
- Information and Privacy Commission

The heads of these agencies have been informed that I will be providing their respective agency reports to your Committee. These reports contain the results for the Values and Ethics section in the employee survey (pages 9-13).

I also attach a copy of the NSW People Matter Employee Survey 2012 Main Findings Report which contains the sector-wide results and analysis.

Should you have any further queries, please contact Sonja Stewart, Deputy Commissioner, Performance Group, on telephone

Your sincerely

Graeme Head
Public Service Commissioner

People Matter Employee Survey 2012

Agency report for NSW Police Force

(Engagement Index amended February 2013)

1 Introduction

1.1 About this report

The People Matter Employee Survey 2012 was the first of its kind in the NSW public sector and allowed the Public Service Commission (PSC) to capture employees' perceptions of how well they thought the public sector values are applied across the sector as well as their views on – and experiences in – their workplaces. In this inaugural year of the survey it is creating a baseline for the NSW public sector as a whole and in following years results will be tracked against this baseline.

This year, over 130 agencies participated and more than 60,000 employees voluntarily participated. Sector-wide results have been incorporated into the inaugural State of the NSW Public Sector Report 2012 with more detailed results in the accompanying People Matter Employee Survey 2012 Main Findings Report. Individual reports have been produced for each cluster and for each agency, where the agencies' responses are sufficient to satisfy confidentiality criteria.

This is a companion report developed as part of The State of the NSW Public Sector Report 2012 and readers are encouraged to read the latter report first as it presents the Public Service Commissioner's independent review of the performance of the NSW public sector and includes commentary and high-level analysis of the survey results at a sector level together with additional research undertaken by the PSC. Both The State of the NSW Public Sector Report 2012 and the NSW People Matter Employee Survey 2012 Main Findings Report can be found at www.psc.nsw.gov.au.

1.2 Report overview

Survey methodology

Employee surveys are a good human resource practice in measuring employees' adoption of organisational values, wellbeing, job satisfaction and engagement. The survey question-set was sourced from a number of areas including the Victorian SSA People Matter Survey and the United Kingdom (UK) Civil Service People Survey. Items were further refined through PSC stakeholder discussion, Australian Survey Research (ASR) input and a pilot test with NSW public sector employees.

Delivery

The survey was open from mid-July to mid-August 2012 to all public sector employees across NSW. Employees were given the opportunity to participate either online or by completing a paper survey. Participation was strongly encouraged, though not mandatory. Survey champions were identified in each cluster and agency. The PSC provided a link to the online survey to each of the agency survey champions who subsequently distributed it to employees within their agency. An identical version of the online survey was produced in scannable paper form.

Privacy and confidentiality

The People Matter Employee Survey 2012 was managed by the PSC across the whole of the public sector. PSC engaged ASR to deliver the survey and to analyse the results which form the basis of the Main Findings Report. ASR is a member of the Association of Market and Social Research Organisations (AMSRO) and is bound by AMSRO's strict code of conduct and privacy principles which exceed Australia's National Privacy Principles.

No personalised or individual links were created for the online survey and employees were not tracked when answering online or by paper. Only generic web addresses and forms were used. ASR has produced analysis and reports at summary and aggregate levels. ASR has only provided the PSC with de-identified data.

1.3 Reading the results

Comparisons

All comparisons are from the NSW People Matter Employee Survey 2012 sector-wide and cluster level results. Further information on comparisons is provided in the Technical Information section of this report.

Rounding

Throughout the report, percentages have been rounded to whole numbers. When looking at charts and tables, figures may not always add up to 100%. However, if more decimal places were used, additions would be correct.

Introduction

Handling of no answers and Don't know responses

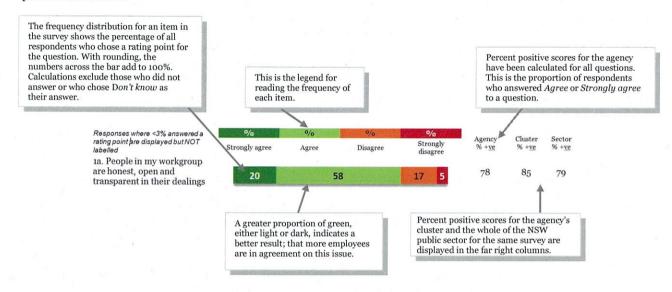

Respondents who did not answer a question or who chose *Don't know* as their response were excluded from all percent positive calculations. Please see the Main Findings Report for more information on questions that had a high proportion of no answers or *Don't know* responses for the sector as a whole.

Negatively worded question

In the People Matter Employee Survey 2012, there was one negatively phrased item: 7j) In my workgroup there is frequently too much work to do. To align with the other items in the survey and to assist with the reading of this report, it has been reworded as a positively phrased item with the responses coded accordingly. For example, if there was 20% agreement to the original statement In my workgroup, there is frequently too much work to do, in this report, the result is presented as 80% agreement to the statement In my workgroup there is not frequently too much work to do.

How to interpret the results

Respondents who did not answer a question or who chose *Don't know* as their response were excluded from all percent positive calculations.

Introduction

1.4 Using the results

The People Matter Employee Survey 2012 provides an important source of information which will be used by the PSC in a number of ways, now as well as in the future.

First, the People Matter Employee Survey 2012 findings support the Commission of Audit recommendations, in particular providing further evidence of the need to focus on leadership and management in the public sector.

Second, the results of the People Matter Employee Survey 2012 have been used by the Public Service Commissioner, Graeme Head, in his inaugural 2012 State of the NSW Public Sector Report when forming his assessment of the performance of the sector. The results of the survey will allow an in-depth exploration of issues facing the sector. The results relating to values for example, were used with an independent Ethics Stocktake to allow the Commissioner to explore the nature of ethics issues, their causes and possible solutions which have been detailed in the State of the NSW Public Sector Report 2012.

Third, sector-wide reporting of employee perceptions can be interpreted alongside statistical data in the workforce profile, giving a powerful insight into the state of the NSW public sector, its strengths and weaknesses and feasible public sector performance improvement strategies.

Fourth, by providing a unique insight into the culture, systems and practices of the NSW public sector a benchmark is established to measure future progress. The PSC plans to run the People Matter Employee Survey biennially, with the next survey due to be run in 2014.

Most importantly, the results of the survey can be used throughout the sector by employees, managers, workgroups, agencies and clusters. These results allow for improvement strategies to be evidence based. The PSC encourages all sector employees to engage with the results of the survey and think about how change can be affected at an individual and systems level to improve results over time.

This section outlines the results at a glance for NSW Police Force.

2.1 Agency response

	NSW Police Force	Attorney General & Justice	NSW public sector
Number of responses	3,564	8,488	60,779
Response rate	18%	19%	16%
Confidence interval*	± 2%	± 1%	±0.4%
Interpretation*	Statistically representative	Statistically representative	Statistically representative
Web response	100%	99%	94%
Paper response	0%	1%	6%

 $^{{}^*\!\}mathit{See}$ technical information section for more information on statistical confidence.

2.2 Highlights and lowlights

Respondents were asked to rate 86 questions using a four point rating scale ranging from *strongly agree* to *strongly disagree* whilst other questions in the survey required a yes or no response. The tables below display the agency's five highest and five lowest scoring questions which used the four point rating scale based on the percent positive score.

Question	% +ve score
7g. I have the skills to do my job effectively	95
3a. My workgroup strives to achieve customer/client satisfaction	95
2d. My organisation strives to earn and sustain a high level of public trust	93
7c. I understand how my work contributes to my organisation's objectives	93
2g. Members of my workgroup treat customers/clients with respect	93

Question	% +ve score
7j. In my workgroup there is not frequently too much work to do	27
5b. My organisation involves employees in decisions about their work	33
5a. I feel that change is handled well in my organisation	39
2i. I feel that senior managers keep employees informed about what's going on	43
9b. I am satisfied with my total benefits package	43

2.3 Above and below

The first two tables show where the agency results are above and below its cluster. The following two tables show where the agency results are above and below the NSW sector-wide results. Only items where the agency is $\pm 5\%$ different to the cluster or the sector as a whole are included and a maximum of 10 items is presented in each table. Where there are no items in a table, this means that no questions at the agency level were $\pm 5\%$ from the cluster or NSW sector-wide results.

Above and below agency results against the cluster results

Question	Agency % +ve score	Cluster % +ve score
9c. I feel my job is secure	74	55
nf. I feel that senior managers model the values of my organisation	67	60
4a. My organisation always tries to improve its performance	85	79
2d. My organisation strives to earn and sustain a high level of public trust	93	87
10a. My performance is assessed against clear criteria	61	55
3e. My organisation supports better practice so we can provide better service	83	77
2c. I am confident that I would be protected from reprisal for reporting improper conduct	59	53
b. My organisation has procedures and systems that ensure objectivity in decision-making	75	69
14a. My organisation has good procedures and processes for recruiting employees	61	55
13e. I have confidence in the ways my organisation resolves grievances	49	44

Question	Agency % +ve score	Cluster % +ve score
9b. I am satisfied with my total benefits package	43	56
9a. I am fairly paid for the work I do	56	63
12c. Disability is not a barrier to success in my workgroup	72	77

Above and below agency results against sector-wide results

Question	Agency % +ve score	Sector % +ve score
gc. I feel my job is secure	74	51
of. My organisation's involvement in the community is strongly linked to its purpose	84	75
2a. My organisation provides procedures and systems that ensure employees avoid conflicts of interest	89	80
ed. My organisation strives to earn and sustain a high level of public trust	. 93	85
3b. My organisation strives to match services to customer/client needs	91	84
of. I feel that senior managers model the values of my organisation	67	61
rj. In my workgroup there is not frequently too much work to do	27	21
a. People in my workgroup are honest, open and transparent in their dealings	85	79
Sc. I feel a strong personal attachment to my organisation	77	71
4a. My organisation always tries to improve its performance	85	80

Question	Agency % +ve score	Sector % +ve score
9b. I am satisfied with my total benefits package	43	63
12c. Disability is not a barrier to success in my workgroup	72	86
9a. I am fairly paid for the work I do	56	65
5b. My organisation involves employees in decisions about their work	33	42
11c. My manager takes into account the differing needs and circumstances of employees when making decisions	63	70
6f. My manager involves my workgroup in decisions about our work	59	66
10e. My manager considers my needs and career aspirations when approving development plans	55	62
10h. Learning and development activities I have completed in the past 12 months have helped to improve my performance	62	69
2k. My manager keeps me informed about what's going on	62	69
7f. I am encouraged to be innovative in my work	62	68

2.4 Engagement Index

Employee engagement is a relatively new term in human resource management literature, becoming more prominent over the last decade. The concept builds on—but goes further than—employee satisfaction, commitment and motivation. According to the UK Chartered Institute of Personnel Development, "engagement is not about driving employees harder, but about providing the conditions under which they will work more effectively—it is about releasing employees' discretionary behaviour".¹

While there is no single definition of employee engagement, the concept is generally recognised as an employee's connection and commitment to their organisation, its goals and values as a whole. Employee engagement has been attributed to achieving improvements in workforce performance, productivity, motivation, satisfaction, commitment, attendance, and retention. It has also been linked to achievement of higher levels of customer service, improved organisational agility, greater efficiency in driving change initiatives and workplace innovation. A focus of the People Matter Employee Survey 2012 was to explore the factors associated with employee engagement, with a view to providing a better understanding of potential strategies that may be employed within the NSW public sector to improve engagement.

The table below shows Engagement Indices for the agency, its cluster and the sector as a whole.

	NSW Police Force	Attorney General & Justice	NSW public sector	
Engagement Index	62%	61%	61%	

The five items used to generate the Engagement Index for NSW Police Force are displayed below, along with the agency's cluster and sector-wide percent positive scores.

Responses where <3%	%	%	%	%			
answered a rating point are displayed but NOT labelled	Strongly agree	Agree	Disagree	Strongly disagree	% +ve Agency	Cluster % +ve	Sector % +ve

nh. My organisation provides frank, impartial and timely advice to the Government	17	59)	16 8	76	73	73

Improper conduct

Within the survey, improper conduct was defined as behaviour that is unethical or wrong, that breaches your organisation's code of conduct, or that compromises your duties.

If '-' appears in a cell in the tables below, it indicates that fewer than 10 people selected the option. In this situation, a number has not been displayed to ensure confidentiality.

Activity		% total agency respondents	% total cluster respondents	% total sector respondents

3.2 Bullying

The following description was provided to survey respondents to help define what was meant by the term bullying.

Workplace bullying is repeated, unreasonable behaviour directed to an employee or a group of employees that creates a risk to health and safety. Types of behaviour that could be considered bullying include: verbal abuse, excluding or isolating employees, psychological harassment, intimidation, assigning meaningless tasks unrelated to the job, giving employees impossible assignments, deliberately changing work rosters to inconvenience particular employees, deliberately withholding information that is vital to effective work performance.

Bullying should not be confused with legitimate feedback given to staff (including negative comments) on their work performance or work-related behaviour; or other legitimate management decisions and actions undertaken in a reasonable and respectful way.

If '-' appears in a cell in the tables below, it indicates that fewer than 10 people selected the option. In this situation, a number has not been displayed to ensure confidentiality.

	% agency	% cluster	% sector
Witnessed bullying at work in the last 12 months	39	47	48
Personally experienced bullying at work in the last 12 months			
Experienced in last 12 months, but not currently	16	18	19
Currently experiencing this behaviour	8	10	10

14c. My manager is sufficiently skilled to make good selection decisions	16	59		16 9	75	74	77

4 Technical information

Glossary of key terms

Percent positive % +ve	The percent positive score is the number of respondents who selected a rating point of <i>Agree</i> or <i>Strongly agree</i> divided by the total number of respondents who selected any rating point. This excludes responses of <i>Don't know</i> and no answers.
PSC	NSW Public Service Commission
Cluster	In the NSW Government the various entities and organisations are now grouped into nine clusters. Clusters are groupings around service delivery areas like education, health, human services, transport, economic development and justice. Clusters enable better linkages between organisational subgroups and provide more integrated services to the community.

Exclusion of question 4b

The PSC acknowledges an error in the wording of one statement in the People Matter Employee Survey 2012. Accordingly the results for 4b) My organisation's decisions and actions are open to review by employees have been excluded from the report.

Employee Engagement Index

The survey included five questions which were used to calculate an engagement index for each respondent. A score indicates the average level of engagement of all people who responded and ranges from 0 to 100. An index score of zero indicates that all respondents *Strongly disagree* with all five engagement questions, while a score of 100 indicates that all respondents *Strongly agree* with all five engagement questions.

Confidence level and interval

Attitudinal research is normally conducted at a 95% confidence level (p<0.05) and aims for a ±5% confidence interval.

Representativeness of a sample is usually assessed at a 95% confidence level (accuracy) and a \pm 5% confidence interval (precision).

The **confidence level** tells you how sure you can be. It is expressed as a percentage and represents how often the true percentage of the population who would pick an answer lies within the confidence interval. The 95% confidence level means you can be 95% certain; the 99% confidence level means you can be 99% certain. Most researchers use the 95% confidence level.

The **confidence interval** is the plus-or-minus figure usually reported in newspaper or television opinion poll results. For example, if you use a confidence interval of 4 and 47% of your sample picks an answer, you can be "sure" that if you had asked the question of the entire relevant population between 43% (47-4) and 51% (47+4) would have picked that answer.

When you put the confidence level and the confidence interval together, you can say that you are 95% sure that the true percentage of the population is between 43% and 51%.
