

- **Initial positive rate in May 2011 was in excess of 10%; and up to 16%**
- **Post WA Poisons Act legislation amendments of September 2011, strike rate dropped dramatically to 3 to 5 %**
- **From December 2011 to current May 2012, positive strike rate steady at 1 to 2%; commensurate with opiates and classic amphetamines - Black market appears to have stabilized via Internet and Postal services**
