Outsourcing Community Service Delivery

Name: Mr Geoffrey Martin

Date Received: 24/04/2012

Essential services should not be run by private industry. essential services should not be profit based. this is bleeding obvious. to privatise ADHC would be a crime against those who lack the ability to fight for their own rights.

ADHC is recognised as the leading carer for people with intellectual disabilities in NSW. to sell this off would be nothing short of criminal.

cost savings and profits have no place in disabilities. by all means ADHC needs some serious streamlining, but to sell it off would be to sell out those without a voice.

shame on anyone considering it. self serving politicians are a discredit to us all.
