

The residents of Martinsville NSW would appreciate attention being given to communications in their area.

Several years ago, a submission was made on our behalf by Kellie Hore, then our Local Member and we were disappointed that nothing was upgraded in the area.

As the Martinsville area is very high risk for fires, mobile phone and television warnings regarding bush fires can be ineffective.

As communications are essential, especially for business operations and our local Martinsville Fire Brigade, we would appreciate attention being given to this problem.

Sincerely, Jill Overton (Secretary Martinsville Rural Fire Brigade).
