Your Comments on the Transportation of Nuclear Waste Through Your Community

I say "No to Nuclear Waste" because I want a healthy, safe, beautiful environment.

- Jasmine Rose Robinson
Blackheath 2785
Karen, Zac, Skye. Sean.

PPM, Safe, & healthy life "No to Nuclear waste!"

Nuclear waste is safe - the same as pigs being able to fly
Definitely NOT
Bullaburra/Wentworth Rocks
Chris Ince, Em Plains 2750
Amanda Broadly Springwood

If I don't think the reactor is necessary. Please no transport of waste here.

David Matheron, Blackland

Keep our homes safe, don't transport waste.

Bernadine Brock, Faulconbridge

Common sense says not to use such dangerous ways of providing power, we need to look again at other methods, & not lock our society into any form of radio active power. Even in medical use, it is possible to limit the broad use of radium etc.

Rachel Ward Springwood
2777.

No nuclear waste is safe - shut where it stands
Close Lucas H4. Reactor - Lu News 2780

Please don't build the Nuclear Reactor again.

Your Comments on the Transportation of Nuclear Waste Through Your Community

No to a waste dump in SA and No to transportation thru Blue Mts.

No waste in the Montaby!

Stop the whole nuclear cycle - we don't want mines, or reactors, we certainly don't want waste dumps on Aboriginal lands or waste transported through the world heritage Blue Mountains. We don't need weapons, waste or nuclear energy.

I oppose transport of nuclear waste through this National Heritage Area

I am totally opposed to the mining of uranium and the use, transportation & disposal of radioactive material. There is no direct need for radioactive materials to be removed from the earth - we have so many renewable sources of energy available.

Transporting nuclear waste through a World Heritage Site & Community is a disgrace, as is the mining of uranium near Jabaluka - A disgrace to Humanity & the Earth. Jade Beggs-Clark.
