MANAGEMENT OF SHARKS IN NEW SOUTH WALES WATERS

Name: Mr Brian Hewson

Date Received: 18/09/2015

I apologize for not being in a position to provide the Committee with a properly developed submission. I nevertheless, as an experienced SCUBA diver and long-time lover of sea life, am grateful for the opportunity to make a suggestion: Please consider the possibility, which would require proper scientific analysis, of instead of killing sharks, of injecting them with a transponder or similar device which would be detectable on shore at surfing locales or even by something worn by divers, surfers, etc.

Thank you.

Brian Hewson.
