MANAGEMENT OF SHARKS IN NEW SOUTH WALES WATERS

Name: Name Suppressed
Date Received: 19/10/2015

Partially Confidential

Please no more culling or shark nets! These days the public expect government to be responsible towards our Oceans and the animals that live there. The Ocean is a wild place everyone knows there is a risk involved venturing out. Use surveillance technologies like they do successfully in other countries and continue to educate. Non-lethal measures only. Stopping super trawlers fishing in Australian waters, that are bound to throw the natural balance off is a good start.
