

DOWNSTREAM GAS SUPPLY AND AVAILABILITY IN NSW

Name: Name Suppressed
Date Received: 20/06/2013

Partially Confidential

Households are disadvantaged in my area of the upper Blue Mountains. Natural downstream gas is available to the households approximately 500 meters away from me, however I have to buy gas bottles because I live at the end of the road.

This situation is unacceptable in the 21st century.

* I am disadvantaged because I have to pay the higher price for bottled gas, when others don't.

* It's difficult to cook with gas, because I have to keep getting the gas bottles filled.

* I am not entitled to the discount offers that people with natural gas have the benefit of having.

It's time we moved into the 21st century, where the conveniences of natural downstream gas is available to everyone.
