I live at Road Runner Caravan park, which is within 700metres of the Lismore Airport. My neighbour in another Caravan has access to Broadband. There seems to be a lack of maintenance on the existing cable, and no one knows who is responsible or where to go, to have a check of the cables. Is this a government problem or a lack of maintenance issue? I am a single dad that has found an effective way of living and offering a comfortable home for my kids during their fortnightly visits. This style of living (caravan) has a less of an impact on the earth and allows single people to continue with their lives and run their business without having a massive drain on their finances,,,,, Now we have to get Braodband via satellite at \$109/month,,,,, without voice over service???? Can anyone help me please? Jean-Pierre
