## **NON-REGISTERED MOTORISED VEHICLES**

**Name:** Mr Darrell Landrebe

**Date Received:** 26/04/2013

My mother, Maureen Landrebe was run down by a mobility scooter on the 14th Feb 2013 at Merrylands. It was a hit and run. Police were unable to identify the woman on the scooter due to no registration no, serial number etc.

My mother sustained a broken arm and severe bruising and spent 6 days in Westmead Hospital. These scooters need a visible identification number so they can be held accountable in incidents such as these. I also believe people should show just cause to have one, so many people use them because they are just too lazy to walk and are not suffering any particular disability.
