## **MANAGEMENT OF SHARKS IN NEW SOUTH WALES WATERS**

Name: Name Suppressed  
Date Received: 22/10/2015

*Partially Confidential*

Hi there,

I am writing to you to express my disgust in current methods of shark management. Shark nets are not an effective measure in keeping both animal and human safe while enjoying the ocean. 70% of sealift caught in the nets are not shark and even on netted beaches sharks can still swim under or around the nets! Shark nets are causing detrimental effects on the animals in the ocean and therefore the ocean ecosystem. Please consider other non lethal methods of shark 'management'.

Kind regards!
