DRIVER AND ROAD USER DISTRACTION

Name: Mr Steve Gilhooley

Date Received: 21/03/2012

As a daily car driver and frequent motorbike rider Ive found one of the most distracting and dangerous things to be the constantly changing speed limits in NSW on the same stretch of road. Frequently it can change up and down from 40, 50, 60 , 70 and 90. Im sure there's some logic to this but every second a driver/rider is checking their speedo its time not spent looking at the road ahead, the car in front or pedestrians and cyclist for early warning to a danger and raising the risk of an accident. I hope the terms of your inquiry will consider this as a significant distraction.
