

We operate a small enterprise at Gresford NSW where we breed beef cattle, grow lucerne and operate a resort for holiday accommodation, educational and recreational seminars, workshops weddings and social functions. The principals of the business operate this enterprise in conjunction with other business enterprises in Sydney. Effective communication is essential to the growth of the businesses. The broadband access (ADSL) is slow, although it has improved in recent years, the mobile telephone access has deteriorated in the CDMA access that is no longer available was superior to the nextG service now available. Telstra have been unable to provide a satisfactory solution suggesting we install an aerial on our roof, which we have done. This then deprives us of the ability to move around the premises with our mobile. Our guests from urban areas served by digital service cannot use their mobile in the district
