DRIVER EDUCATION, TRAINING AND ROAD SAFETY

Name: Mr Grant Mistler
Date Received: 2/1/2017

Perhaps introducing a 'black box' device which is limited to recording the last few hours of driving history would be useful. In the event of an RBT for example, the attending police would also be able to view the maximum speed reached prior to the RBT. The 'black box' device would also give more accurate information to insurance companies from both vehicles if any crash at any speed were to happen.
