COMMUTER CAR PARKING IN NEW SOUTH WALES

Organisation:

Name: Mrs Lynette Lennon

Position:

Date Received: 13 July 2017

My submission is in reference to the railway parking northside of St Mary's railway station. When the multi level carpark was built it included shop space which to this day has never been utilized which to me was a very bad design taking up precious parking space this needs to be re designed as a matter of urgency. The parking is so bad at this station that people are parking in streets around here as no chance of parking within the designated station parking after 730 in the morning. Please consider building another multi storey carpark adjacent to the one there now which would alleviate the parking struggles within this area
