COMMUTER CAR PARKING IN NEW SOUTH WALES

Organisation:

Name: Mr Timothy Kotlar

Position:

Date Received: 2 August 2017

The lack of car parking facilities at the New Station at Schofields is for more than word can explain.

It's a wonder no one has been killed as the people parking along railway terrace and associated streets, as they get out of their cars and run to catch their train.

Buses and cars swerve to miss pedestrians as they go to the station.

If an adequate car park had been installed to cater for the situation in the first place, we wouldn't have the current problem.

NO the new light rail will not remedy the situation, as everybody is saying. The vast amount of new homes outways all these suggestions.

I have returned home to Schofields travelling by train and NEVER has the Bus been there to take me home, it ALWAYS leaves as the train is pulling into the platform.

Yours sincerely

Tim Kotlar
