COMMUTER CAR PARKING IN NEW SOUTH WALES

Organisation:

Name: Mrs Jennifer Deias

Position:

Date Received: 3 August 2017

As resident of Quakers Hill and a public transport commuter, I can say that the number of commuter parking spaces currently available at Quakers Hill and Schofields is no where near the number of spaces required to meet current and future population growth in the area. Streets around the stations are full by 7am and some commuters have up to a 10 minute walk to the station from where they've parked. Not spaces are urgently needed to meet future demand.
