COMMUTER CAR PARKING IN NEW SOUTH WALES

Organisation: Ourimbah Region Residents Association Inc.
Name: Miss Diane Willard
Position: Chairperson/President
Date Received: 3 August 2017

We request that the Parliamentary Committee on Transport and Infrastructure inquire and report on commuter car parking in NSW including the Central Coast where commuter parking in many areas is next to impossible on week days;

- a) The effectiveness of current state government policies and programs covering commuter car parking;
- b) Processes for selecting the location of commuter car parks;
- c) The potential for restricted access (we are not in favour of user pays commuter car parks - train, bus & ferry prices are high enough now, why should commuters be expected to pay more).
- d) Consideration of alternative modes of first mile/last mile travel, including point to point transport, active transport and on demand buses ????? Exactly what does this mean?
- e) More disabled car parking bays - a minimum of 5 at most rail stations and at major rail stations 8- 10.
