Submission 73 – Mr Michael Harvey

NWRL future station parking at Kellyville Station In addition to the current planned parking, I would like additional parking to be constructed west of Old Windsor Road and north of Newbury Avenue, with access from Newbury Avenue; with a pedestrian footbridge for station access. This would limit the amount of cars having to cross Old Windsor Road to park, so should help with traffic congestion. Additionally, at all stations with parking, for those commuting outside of peak, limited reserved parking should be available for purchase. Many thanks, Michael Harvey
