COMMUTER CAR PARKING IN NEW SOUTH WALES

Submission 76 – Elizabeth Kotlar

Members of parliament, please provide the stations of Schofields and Quakers Hill with adequate parking. I have grown up in Schofields and have seen it grow over the last 30 years. The current parking situation is inadequate for the current residents, and as our suburb and its surrounding suburbs continue to expand this situation is only going to get worse. The commuter car park quickly fills very early each morning and the cars spill onto the surrounding roads. These roads have not been designed for this, they do not all have curb and guttering and after successive wet days it becomes a bog. Since the move of Schofields Station, my home is no longer close to the station. When I drive to the station I end up parking closer to my home than the station, as the cars spill along Railway Terrace. It is ridiculous to see that Woolworths across the road can provide a better car park than the State Government.
