REVIEW OF ROAD SAFETY ISSUES FOR FUTURE INQUIRY

Name: Miss Ferran Thornycroft

Date Received: 26 August 2018

In order to improve bicyclers safety on the road and encourage cycling as a means of transport, NSW needs to invest in proper cycling lanes. lanes need to be continuous so that riders are not forced onto roads during a gap in the lane and they need to have a physical barrier in order to prevent cars from clipping the line.

Such infrastructure should be prioritized around train stations and places of education and work.
