SUSTAINABILITY OF ENERGY SUPPLY AND RESOURCES IN NSW

Name: Dr Ross Halatchev

Date Received: 28 August 2019

I support the Mining Industry of NSW which generates thousands of jobs and contribute significantly to the national economy of Australia. The NSW Mining Industry has a long history and old traditions. It always had a strong social impact on the life of our society. I kindly ask the politicians who are responsible at present for this industry to make the right decisions in the name of the Australian national interests.

Dr Ross Halatchev
Mining Engineer
