SUSTAINABILITY OF ENERGY SUPPLY AND RESOURCES IN NSW

Name: Ms Vicki Riddy

Date Received: 29 August 2019

My husband and son both had careers in the NSW Coal industry. In regional NSW it offers great employment and economic opportunities. There are around 40,000 miners & their families who rely heavily on mining for their livelihood

Our economy relies on high quality NSW coal to meet our energy needs. There are 7,100 local businesses that supply the mining industry in NSW.

NSW coal exports have been at or near record levels for 5 years or more and this is expected to continue.

Yours sincerely,
Vicki Riddy
