SUSTAINABILITY OF ENERGY SUPPLY AND RESOURCES IN NSW

Name: Mr David Hazell

Date Received: 15 September 2019

Foreign owned windfarms are unreliable, environmentally damaging, community dividing, bird killing, and nothing but a clear waste of our county side and beautiful landscape. A shame some pathetic individuals of positions of power in N S W planning have gotten together with 'concrete cowboys' who own, but do not live on land they are happy to destroy for \$\$\$\$.
