SUSTAINABILITY OF ENERGY SUPPLY AND RESOURCES IN NSW

Name: Ms Noeleen Hazell
Date Received: 15 September 2020

Committee on Environment and Planning
Alex Greenwich MP

Mr Greenwich MP

Re: Inquiry –Sustainability of energy supply and resources in NSW

On behalf of the members of the Yass Landscape Guardian's we wish to add to our earlier response to the Inquiry as follows:

The only sustainably economic and environment solution to the Energy supply in NSW and the entire country is to utilise the vast natural resources of coal and gas prior to the economy recovery from the Covid 19 permitting infrastructure preparing for nuclear, to end the emissions debate

There is no economic opportunity for impacted communities with any foreign owned Industrial Wind or Solar projects and the destruction to the rural environment is irreversible and unviable

Thank you

Noeleen Hazell
