

## **TRANSPORT TECHNOLOGY SECTOR**

**Organisation:** Name suppressed

**Date Received:** 15 April 2021

Partially  
Confidential

Research needs to be carried out on how to avoid or restrain larger companies from sabotage and unfair competition against smaller companies. This also needs to be carried through to influence the state government authorities to have systems in place to mitigate the above issues. One small example: In Queensland, the driver is required to have a window sign to represent each ridesharing company. This is impractical and the driver for that reason would avoid working for smaller companies. This is not the same in Victoria as the drivers only need a generic sign representing all rideshare companies.
