## **TRANSPORT TECHNOLOGY SECTOR**

**Name:** Mr Tony Robinson

**Date Received:** 23 May 2021

The doors between carriages should be locked at night for safety and cameras or extra guards in certain carriages . Trains to be expanded to stop in country towns that will bring life back to towns. Tourism . Maybe make trains from country towns have 1 or 2 stops on way to bigger towns. . change speed limits on highways they can go faster maybe change limit on lanes inside faster than outside .lower price of tickets and tolls. You make a major terminal from blue mountains to Sydney in between were people park they can get bus or train to Sydney. That would ease traffic in Sydney .you could do this every were so only public transport is in Sydney if done right .
