No 32**

## **FOOD PRODUCTION AND SUPPLY IN NSW**

**Name:** Ms Carole Meade  
**Date Received:** 23 February 2022

Please change all Government policies, actions, education and information to support plant based food options (not animal based food options) for the following reasons:

This will help mitigate the climate emergency and it is healthier for individuals and will reduce harms and health care costs. It is also a much more ethical approach to enable animals to live without the high levels of harm they currently endure (especially in factory farms).

Please ensure your discussions, policies and actions are not influenced by lobbying from key groups with vested interests.

I thank you for your time and consideration,

Carole Meade
