FOOD PRODUCTION AND SUPPLY IN NSW

Name: Mr Thomas Munro
Date Received: 23 February 2022

Science has confirmed that our only home Earth is in a perilous state.
Some even say that we have caused so much damage that it can't be repaired.

The livestock/agricultural has a lot to answer for.
Not long ago I like many others put almost all Farmers on a pedestal, salt of the earth type of thinking.....

But no longer.
The majority are just greedy creatures who will do anything to turn a profit, including cruelty to the animals in their care and using harmful pesticides on their crops.
We are in fact being poisoned from the moment we are conceived to the moment we die.
No wonder every other person is plagued with some kind of neurological disease, depression, autism, allergies such as gluten intolerance and abnormalities in its many forms, and physical diseases including cancer etc.
My belief is that many of these major problems are caused by dangerous pesticides and growth hormones included in every day agricultural practices.
On top of that animals are treated with disrespect.

This miracle called Earth and all it contains, animals, plants and minerals is being reduced to being inhabitable by greed and selfishness, with no thought of the future.
It's all about the present not a possible, better future for the Earth and all it contains.

I'm begging you to make a difference and respect this our only home, Earth and all it contains....
