EMBEDDED NETWORKS IN NEW SOUTH WALES

Name: Kheng Wong

Date Received: 26 June 2022

Thank you for taking the time to read my submission.

I do not support embedded networks because of the higher price and the no right or option to choose another provider. When your inquiry about choosing another provider from the embedded network they will advise that you have the right to do so but this is impossible because another provider will not accept due to the complicated procedures.

To cut the story short, an embedded network is just a business practice that will restrict users and force us to pay a higher price. I felt ashamed as an Aussie which we are democratic and have a high standard of the human rights nation because our government helps businesses to limit our rights leading to consumers paying higher prices.

I hope parliamentary will look into this embedded network seriously based on the right to choose merit and not to allow some members of Parliament to collude with businesses that allow them to gain more profit by forcing us.

Thank you again and looking forward to hearing from you.
