**CRITICAL TRANSPORT INFRASTRUCTURE SUPPORTING THE WESTERN
SYDNEY INTERNATIONAL AIRPORT AND WESTERN SYDNEY
AEROTROPOLIS**

Name: Mr Salman Tariq

Date Received: 28 March 2024

Hi,

The speed of airport construction is marvellous all due to continuous flow of federal funding. However, there is a lot to do about surrounding developments which is not catching up. I am pretty sure when airport is ready by year 2026 the surrounding facilities such as train lines, roads, aerotropolis, parkland city etc. will not be catching up with the speed.

Also, the metro line which is extending from st marys till airport should have been extended further to leppington train station which is few KMs away. This could provide another connectivity to sydney trains. At the moment the metro line will be limited to airport only. All the passengers have no option but to go back to st marys via metro and then connect with sydney trains.

It would be a great opportunity to connect metro line with leppington station such an example could be see at chatswood where metro line was connecting north west with sydney trains.

Appreciate if you consider.

regards

Salman Tariq
