**PREVENTION OF CRUELTY TO ANIMALS AMENDMENT (VIRTUAL STOCK
FENCING) BILL 2024**

Name: Mr Simon Wright

Date Received: 11 April 2024

Virtual fencing is a tool that will not only save the grazing industry millions of dollars in physical infrastructure, but also allow animals to be managed more effectively and efficiently. Additionally virtual fencing will allow for closer monitoring of animals thus minimising potential health and welfare issues. Animals are quick to learn and any perceived cruelty associated with virtual fencing is over stated.
