HISTORICAL DEVELOPMENT CONSENTS IN NSW

Name: Shanelle Dawson

Date Received: 7 April 2024

With the rising numbers of threatened and endangered species in nsw and our whole country, it is absolutely crucial that we take real and urgent measures to halt destruction of habitats and begin rehabilitation. Putting a moratorium on all zombie DA's until adequate environmental assessments can be done, adhering to current (or even more stringent) standards is the only intelligent thing to do.

Expecting a developer to self refer, when they clearly don't care about the MNES present on the site, and in fact have lied in their reports about their very existence, is not adequate legislation. This needs amending.
