

## **HISTORICAL DEVELOPMENT CONSENTS IN NSW**

**Name:** Ms Gabrielle Griffin  
**Date Received:** 8 April 2024

I cannot believe environmental laws from 10+ years ago are being used to assess & approve new developments! So much has changed in the world since 2014... incl massive losses of habitat, relentless climate-related disasters, plus ongoing and mounting species extinctions to name but a few.

Surely a simple comparison of koala losses since the bushfires in 2019, or flood-related insurance claims payouts in the last five years alone for example, illustrates how much circumstances have changed? WHY IS DUE DILIGENCE not being practiced? WHY is there so little care for our children and grandchildren's future?

Today, 8 April 2024, Chris Minns announced there must be no new developments on flood plains: how many Zombie DA's are in flood plains up and down the coast? Clearly, ALL developments need to be paused and re-assessed!

Take action now.

I am nearly 60, and prepared to be arrested for my determination to protect old-growth trees, heathlands, wetlands, and all other native animal and bird habitats threatened by absolutely inappropriate zombie DAs. I do this for my 24yr old son, and YOUR children, and their children...
