## **HISTORICAL DEVELOPMENT CONSENTS IN NSW**

**Name:** Ms Jaclyn Cunningham

**Date Received:** 20 May 2024

The Wallum development site is home to endangered froglets, black cockatoos and other precious biodiversity. It is also a site of great cultural significance. The Zombie DA approved to develop this land would no longer be granted under current environmental standards. It is mind blowing to think that with everything we know now about the ecological crisis we are facing, that we would continue to destroy precious biodiversity, but if this development goes ahead that is what we are doing. Action needs to be taken to revoke any historical development consents that would not pass current standards.
